Additionally, gold cost of sales1 and total cash costs2 for the quarter were reduced by 3% and 5%, respectively. The results for the year, released today, report a 69% increase in net earnings to $2.14Â billion, a 51% increase in adjusted net earnings3 to $2.21Â billion and a 30% rise in attributable EBITDA4 to $5.19Â billion for 2024 â€” the highest in over a decade. Year-on-year operating cash flow increased 20% to $4.49Â billion and free cash flow5 more than doubled to $1.32Â billion, driven by the stronger earnings. A quarterly dividend of $0.10 per share was maintained, bringing the total annual dividend paid to shareholders to $696Â million, and a further $498Â million was returned in buying back shares. â€œBarrick remains focused on sustainable value creation for all our stakeholders and as our results today clearly demonstrate, we have the asset quality, balance sheet strength and organic growth projects to deliver on our vision well into the future,â€ said Barrick president and chief executive Mark Bristow. CONTINUED ON PAGE 3 Â Â Key Performance Indicators Best Assetsâ€¦ Â Replaced depleted gold reserves at existing mines and added 13Â million ounces attributable proven and probable reserves from Reko Diq6 Â Significant increases in production across all regions deliver higher Q4 gold production Â Full year attributable gold production of 3.91Â million ounces, in line with annual guidance Â Quarter-on-quarter improvement at Pueblo Viejo across flotation, CIL2 circuit stability and recovery step up Â Veladero delivers best production in last five years and successfully commissions Phase 7B leach pad Â Increased Q4 copper production ensures delivery at midpoint of annual guidance Â Engineering partners appointed for Lumwana and Reko Diq and on track with early works design and long lead item fabrication Â Pueblo Viejo Naranjo TSF feasibility completed and drilling ongoing to validate design Â New decline development commences at Bulyanhulu to access new reserves and increase mining flexibility Â Significant drilling results at NGM, Reko Diq, Loulo, Tanzania and Kibali confirm quality pipeline of targets with progress on early-stage targets across Barrickâ€™s expanding greenfields portfolio Key Growth Projectsâ€¦ Â Reko Diq and Lumwana Feasibility Studies add 13Mt of new attributable copper reserves (73Moz of gold equivalent ounces)6,7,8 Â Barrickâ€™s Fourmile proceeds to prefeasibility study on back of successful drilling program Â Lumwana expansion permitted and Reko Diq ESIA progresses Leader in Sustainabilityâ€¦ Â 48% reduction in LTIFR9 and 20% reduction in TRIFR9 year-on-year Â AfricaÂ & Middle East region has again achieved its best Malaria Incident Rate (MIR) on record, lowering the MIR by a further 51% from 2023 Â 824 hectares of concurrent rehabilitation completed in 2024 â€“ exceeding target by 13% Delivering Valueâ€¦ Â 20% increase in operating cash flow for 2024 to $4.5Â billion Â Free cash flow5 for 2024 more than double 2023 at $1.3Â billion Â Net earnings per share of $0.57 and adjusted net earnings per share3 of $0.46 for the quarter Â Q4 share buyback increased to $354Â million â€“ brings total to $498Â million for the year Â $0.10 per share dividend declared with $1.2Â billion in total shareholder returns in 2024 Â BARRICK YEAR-END 2024 Â 2 Â Â PRESS RELEASE Financial and Operating Highlights Â â€‰Financial Results Â Â Q42024 Â Â Â Â Q32024 Â Â Â 2024 Â Â 2023 Â â€‰Realized gold price10,11 â€‰($ per ounce) Â Â 2,657 Â Â Â 2,494 Â Â Â 2,397 Â Â Â 1,948 Â â€‰Realized copper price10,11 â€‰($ per pound) Â Â 3.96 Â Â Â 4.27 Â Â Â 4.15 Â Â Â 3.85 Â â€‰Net earnings12 â€‰($ millions) Â Â 996 Â Â Â 483 Â Â Â 2,144 Â Â Â 1,272 Â â€‰Adjusted net earnings3 â€‰($ millions) Â Â 794 Â Â Â 529 Â Â Â 2,213 Â Â Â 1,467 Â â€‰Attributable EBITDA4 â€‰($ millions) Â Â 1,697 Â Â Â 1,292 Â Â Â 5,185 Â Â Â 3,987 Â â€‰Net cash provided by â€‰operating activities ($ millions) Â Â 1,392 Â Â Â 1,180 Â Â Â 4,491 Â Â Â 3,732 Â â€‰Free cash flow5 â€‰($ millions) Â Â 501 Â Â Â 444 Â Â Â 1,317 Â Â Â 646 Â â€‰Net earnings per share â€‰($) Â Â 0.57 Â Â Â 0.28 Â Â Â 1.22 Â Â Â 0.72 Â â€‰Adjusted net earnings â€‰per share3 ($) Â Â 0.46 Â Â Â 0.30 Â Â Â 1.26 Â Â Â 0.84 Â â€‰Total attributable capital â€‰expenditures13,14 ($Â millions) Â Â 758 Â Â Â 583 Â Â Â 2,607 Â Â Â 2,363 Â â€‰Financial Position Â Â AsÂ at12/31/24 Â Â Â AsÂ at9/30/24 Â Â Â Â As at12/31/24 Â Â Â AsÂ at 12/31/23 Â Â â€‰Debt (current and long-term) â€‰($ millions) Â Â 4,729 Â Â Â 4,725 Â Â Â 4,729 Â Â Â 4,726 Â â€‰Cash and equivalents â€‰($ millions) Â Â 4,074 Â Â Â 4,225 Â Â Â 4,074 Â Â Â 4,148 Â â€‰Debt, net of cash â€‰($ millions) Â Â 655 Â Â Â 500 Â Â Â 655 Â Â Â 578 Â â€‰Operating Results Â Â Â Â Â Q4 2024 Â Â Â Â Â Â Â Â Â Q3 2024 Â Â Â Â Â Â 2024 Â Â Â 2023 Â Â Â Â Â Â â€‰Gold Â Â âƒâƒâƒâƒ Â Â Â âƒâƒâƒâƒ Â Â Â âƒâƒâƒâƒ Â Â Â âƒâƒâƒâƒ Â â€‰Production10 â€‰(thousands of ounces) Â Â 1,080 Â Â Â 943 Â Â Â 3,911 Â Â Â 4,054 Â â€‰Cost of sales1,10 â€‰($ per ounce) Â Â 1,428 Â Â Â 1,472 Â Â Â 1,442 Â Â Â 1,334 Â â€‰Total cash costs2,10 â€‰($ per ounce) Â Â 1,046 Â Â Â 1,104 Â Â Â 1,065 Â Â Â 960 Â â€‰All-in sustaining costs2,10 â€‰($ per ounce) Â Â 1,451 Â Â Â 1,507 Â Â Â 1,484 Â Â Â 1,335 Â Â Â Â Â Â â€‰Copper Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â â€‰Production10,15 â€‰(thousands of tonnes) Â Â 64 Â Â Â 48 Â Â Â 195 Â Â Â 191 Â â€‰Cost of sales10,16 â€‰($ per pound) Â Â 2.62 Â Â Â 3.23 Â Â Â 2.99 Â Â Â 2.90 Â â€‰C1 cash costs10,17 â€‰($ per pound) Â Â 2.04 Â Â Â 2.49 Â Â Â 2.26 Â Â Â 2.28 Â â€‰All-in sustaining costs10,17 â€‰($ per pound) Â Â 3.07 Â Â Â 3.57 Â Â Â 3.45 Â Â Â 3.21 Â Â Â CONTINUED FROM PAGE 1 Â Barrickâ€™s North America and Africa and Middle East operations met their production guidance for the year, while in the Latin America and Asia Pacific region, a slower-than-expected ramp up at Pueblo Viejo meant the region delivered slightly below guidance despite a stellar performance from Veladero. Pueblo Viejo is planning further upgrades in 2025 to continue the improvement in throughput and recovery, starting with a planned 35-day shutdown in the first quarter of the year. â€œDuring the fourth quarter, we made steady progress in ramping up operations at Pueblo Viejo, improving recovery, despite lower production on the back of a slight decrease in grade. At Veladero and Nevada Gold Mines, we boosted production and we closed the gaps at Kibali while strengthening the management team there. Additionally, we completed two major feasibility studies to advance the transformational Lumwana and Reko Diq projects, and also significantly increased our reserves and resources,â€ said Bristow. Barrick continued its strong track record of reserve additions, growing attributable proven and probable gold mineral reserves by 17.4Â million ounces18 (23%) before 2024 depletion. Attributable proven and probable gold mineral reserves now stand at 89Â million ounces at 0.99g/t19, increasing from 77Â million ounces at 1.65g/t20 in 2023. Copper mineral reserves grew by 224% year-on-year on an attributable basis, at more than 13% higher grade, to 18Â million tonnes of copper at 0.45%19, from 5.6Â million tonnes of copper at 0.39% in 2023.20 This resulted from the completion of the Lumwana and Reko Diq feasibility studies â€” affirming both projects as potential Tier One21 copper assets. Additionally, the wholly-owned Fourmile project is advancing to prefeasibility following a successful 2024 drilling program. For 2025, attributable gold production is expected to be in the range of 3.15â€“3.5Â million ounces, excluding production from Loulo-Gounkoto while it is temporarily suspended. Attributable copper production for 2025 is projected to increase from 195,000 tonnes in 2024 to 200,000â€“230,000 tonnes, driven by increased production at Lumwana. Bristow said Barrick remains open to a constructive engagement with the Malian government and he continues to believe that a mutually beneficial solution can be found. â€œWhile ongoing issues in Mali remain an investor concern, which have overly weighed on the share price, Barrickâ€™s fundamental value proposition has never been stronger. As such, we have capitalized on the undervaluation of our shares by increasing our repurchases, and we have renewed our $1Â billion share buyback program for the upcoming year,â€ said Bristow. Â Â Â BARRICK YEAR-END 2024 Â 3 Â Â PRESS RELEASE â€œOur ability to self-fund our growth pipeline is a major strength and, unlike many of our peers, we wonâ€™t need costly mergers and acquisitions or to issue

additional equity to grow production. Our focus on a quality Tier One21 asset portfolio, continuous talent development, growth potential, robust balance sheet and unparalleled track record in replacing the reserves we mine, are the key reasons why we should be the go-to stock,â€ he said. Q4 2024 Results Presentation Mark Bristow will host a live presentation of the results today at 11:00 EST, with an interactive webinar linked to a conference call. Participants will be able to ask questions. â€fâ€fâ€fGo to the webinar â€fâ€fâ€fUS/Canada (toll-free), 1 844 763 8274 â€fâ€fâ€fUK (toll), +44 20 3795 9972 â€fâ€fâ€fInternational (toll), +1 647 484 8814 The Q4 presentation materials will be available on Barrickâ€™s website at www.barrick.com and the webinar will remain on the website for later viewing. Â Â In San Juan, Argentina, a team from Veladero brought a CAT 785B truck to the National Sun Festival for the community to see up close. Barrick Reports Share Repurchases and Declares Q4 Dividend Barrick today announced the declaration of a dividend of $0.10 per share for the fourth quarter of 2024. The dividend is consistent with the Companyâ€™s Performance Dividend Policy announced at the start of 2022. Â The Q4 2024 dividend will be paid on MarchÂ 17, 2025 to shareholders of record at the close of business on FebruaryÂ 28, 2025. In addition to the quarterly dividends, Barrick repurchased 28.675Â million shares during the year under the share buyback program that was announced in February 2024, including 21Â million shares during Q4 2024. â€œThe strong performance of our business has allowed us to provide significant returns to shareholders in 2024 through the combination of dividends and share buybacks, especially in the fourth quarter, at a compelling valuation. At the same time, Barrick continues to maintain one of the strongest balance sheets in the industry ensuring adequate liquidity to invest in our significant growth projects,â€ said senior executive vice-president and chief financial officer Graham Shuttleworth. Â Â BARRICK YEAR-END 2024 Â 4 Â Â PRESS RELEASE Barrick Announces New Share Buyback Program Barrick announced today that it plans to undertake a new share repurchase program for the buyback of its common shares. Â Barrickâ€™s Board of Directors has authorized a new program for the repurchase of up to $1.0Â billion of the Companyâ€™s outstanding common shares over the next 12 months at prevailing market prices in accordance with applicable law. In connection with the new share repurchase program, Barrick has terminated the share repurchase program announced by the Company on FebruaryÂ 14, 2024. The Company repurchased $498Â million in common shares under its 2024 share repurchase program. Under the program, repurchases can be made from time to time through published markets in the United States such as the New York Stock Exchange using a variety of methods, including open market purchases, as well as by any other means permitted under the rules of the U.S. Securities and Exchange Commission and other applicable legal requirements. Barrick believes that, from time to time, the market price of its common shares trade at prices that may not adequately reflect their underlying value. The actual number of shares that may be purchased, if any, and the timing of such purchases, will be determined by Barrick based on a number of factors, including the Companyâ€™s financial performance, the availability of cash flows, and the consideration of other uses of cash, including capital investment opportunities, returns to shareholders, and debt reduction. The repurchase program does not obligate the Company to acquire any particular number of common shares, and the repurchase program may be suspended or discontinued at any time at the Companyâ€™s discretion. Â Â For 2025, Barrickâ€™s attributable gold production is expected to be in the range of 3.15â€”3.5Â million ounces, excluding production from Loulo-Gounkoto while it is temporarily suspended. Attributable copper production for 2025 is projected to increase from 195,000 tonnes in 2024 to 200,000â€“230,000 tonnes, driven by increased production at Lumwana. Barrick Grows Gold and Copper Reserves Significantly, Setting It Apart From Its Peers as It Positions for Growth Barrick grew attributable proven and probable gold mineral reserves by 17.4Â million ounces18 (23%) before 2024 depletion. Attributable proven and probable mineral reserves now stand at 89Â million ounces at 0.99g/t19, increasing from 77Â million ounces at 1.65g/t20 in 2023. Â The year-on-year change was led by the conversion of Reko Diq resources to mineral reserves, adding 13Â million ounces of gold at 0.28g/t19 on an attributable basis, following the completion of the feasibility study. Significantly, before the addition of Reko Diq, Barrick delivered a fourth consecutive year of replacing annual depletion at a 4% higher grade, continuing to demonstrate the results of an unremitting focus on asset quality and further extending the life of our existing operations. Â Â BARRICK YEAR-END 2024 Â 5 Â Â PRESS RELEASE Since the end of 2019, Barrick has replaced more than 180%18 of the companyâ€™s depleted gold reserves, adding almost 46Â million ounces18 of attributable proven and probable reserves (77Â million ounces18 of proven and probable reserves on a 100% basis) across Barrick-managed assets. Attributable measured and indicated gold resources for 2024 remain consistent, at 180Â million ounces at 1.06g/t19, with a further 41Â million ounces at 0.9g/t19 of inferred resources, up 5% from 2023. At the same time, copper mineral reserves grew by 224% year-on-year on an attributable basis, at more than 13% higher grade to 18Â million tonnes of copper at 0.45%19, from 5.6Â million tonnes of copper at 0.39% in 2023.20 This resulted from the completion of the Lumwana and Reko Diq feasibility studies affirming both projects as Tier One21 Copper Assets. The Lumwana Super Pit Expansion feasibility study added 5.5Mt of Cu reserves to the project, resulting in proven and probable copper reserves of 8.3Â million tonnes of copper at 0.52%.19 The Reko Diq feasibility study added 7.3Â million tonnes of copper at 0.48%6 to attributable copper reserves. This represents an addition of more than 20Â million tonnes19 of proven and probable copper reserves on a 100% basis since 2023. Attributable measured and indicated copper resources for 2024 stand at 24Â million tonnes19 of copper at 0.39%, with a further 3.9Mt19 of copper at 0.3% of inferred resources, reflecting the conversion and upgrade of copper mineral resources at Lumwana. For 2024, mineral reserves are based on an updated gold price assumption of $1,400/oz22 and a consistent copper price of $3.00/lb.22 Mineral resources are reported inclusive of reserves and for 2024 are based on an updated gold price of $1,900/oz22 and a consistent copper price of $4.00/lb.22 President and chief executive Mark Bristow said Barrickâ€™s strategy of investing in organic growth through exploration and mineral resource management has set the group apart from its peers within the industry, positioning Barrick as a champion for value creation as we continue to grow our production profile organically. â€œIn order for our industry to help build a better world, we have to invest in our own future, with transformational projects like the Lumwana Super Pit and Pueblo Viejo expansions, Reko Diq and Fourmile. Barrickâ€™s vision for these projects extends beyond mining, ensuring the benefits of these investments provide multi-generational benefits to our host countries and local communities through the development of local service provider partnerships and investment in the sustainability of our operating environments,â€ said Bristow. Mineral Resource Management and Evaluation Executive Simon Bottoms said that since the end of 2019, Barrick has successfully added 111Â million ounces18 of attributable gold equivalent reserves at a cost of approximately $10 per ounce23, demonstrating the value proposition of our strategy. â€œThe companyâ€™s reserve prices of $1,400/oz for gold22 and $3.00/lb for copper22 are designed to extract the optimum value from our geologically defined orebodies whilst delivering the highest value, demonstrating the quality differentiation of our Tier One21 assets. This approach is complemented by our reserve replacement strategy, where we aim to add value by delineating ore body extensions and satellites at our long-term reserve prices rather than diluting the quality of our reserves through lifting reserve prices beyond the relative levels of cost inflation,â€ said Bottoms. Gold mineral reserves in the AfricaÂ & Middle East region, after annual depletion, grew to 19Â million ounces at 3.35g/t19 in 2024 from 18.8Â million ounces at 3.24g/t20 in 2023. This was predominantly driven by both Bulyanhulu and Loulo-Gounkoto, with extensions of the high-grade Reef 2 and Yalea underground orebodies respectively, combined with growth of the Faraba open pit. Overall, this delivered a 2.3Â million ounce19 increase in attributable proven and probable reserves across the region, before depletion. North Mara also contributed to the strong results through the extension of the Gokona underground and Gena open pit. At Kibali, the ongoing conversion drilling in the 9000 and 11000 lodes in KCD underground replaced 98% of depletion, with ongoing development to establish further underground drill platforms for 2025. The Latin AmericaÂ & Asia Pacific region, led by Pueblo Viejo, replaced 115% of the regional 2024 gold reserve depletion before the addition of Reko Diq, which added 0.78Â million ounces19 to attributable proven and probable reserves before depletion as a result of additional pit design pushbacks unlocked by the additional TSF capacity in the new Naranjo facility. Porgera grew attributable gold reserves by 22% year-on-year with the successful conversion of the open pit Link cutback adjacent to the West Wall cutback. In North America, the ongoing growth programs at Turquoise Ridge, Leeville Underground in Carlin and the Reona cut-back in Phoenix, added 1.54Â million ounces19 of gold to proven and probable reserves on an attributable basis before annual depletion, which were partially offset by reductions in Cortez driven by metallurgical model updates in Crossroads and Robertson. This resulted in attributable proven and probable mineral reserves for the region of 30Â million ounces at 2.71g/t19, representing a more than 10% increase in the grade year-over-year (2.45g/t in 2023) as a result of the high-grade growth additions and reductions of low-grade at Cortez. At the same time, attributable gold measured and indicated mineral resources for the region now stands at 66Â million ounces at 2.18g/t19, due to the removal of Long Canyon mineral resources, as the site is planned to progress into full closure during 2025. Meanwhile, attributable inferred gold mineral resources for the region grew to 21Â million ounces at 3.3 g/t19, driven by Fourmileâ€™s mineral resource24 growth in the southernmost portion of the orebody immediately adjacent to the existing Goldrush mine. Looking forward to 2025, Barrick plans to commence prefeasibility-study drilling at the end of the first quarter of 2025 which will target continued extension of the mineral resource along strike to the north, while also completing the foundational studies for the planned Bullion Hill northern access portal. Â Â BARRICK YEAR-END 2024 Â 6 Â Â PRESS RELEASE The expansion project at Lumwana in Zambia will substantially increase the mineâ€™s production capacity, extending its operational life by 17 years to 2057. Transforming Lumwana Into a Top 25 Copper Producer Barrick has completed a comprehensive feasibility study for the Super Pit Expansion at Lumwana in Zambia25, transforming the mine into a long-life, high yielding, Top 25 copper producer and Tier One21 copper mine, capable of contending with the volatility of the copper demand cycles. Â The expansion will substantially increase the mineâ€™s production capacity, extending its operational life by 17 years to 2057, and doubling the capacity of the processing plant from 27Â million tonnes per annum (Mtpa) to a peak design of 54Mtpa â€“ achieving an average copper output of 240,000 tonnes annually over the life of the mine, from a planned 52Mtpa process feed. Based on the feasibility study, the total project capital cost is estimated to be $2Â billion. Construction is set to begin in 2025, with the project promising substantial improvements in operational efficiency. The expansion has significantly grown Lumwanaâ€™s mineral reserves, increasing proven and probable copper reserves from 510Â million tonnes at 0.58% for 3.0Â million tonnes of contained copper as of year-end 2023 to 1,600Â million tonnes at 0.52% for 8.3Â million tonnes of contained copper as of year-end 2024.7 Notably, this expansion will replace the total copper produced by Lumwana since 2009 by over 400%.25 The project involves key infrastructure developments, including the expansion of existing mining operations at Chimiwungo and Malundwe, the opening of two new open pits at Kamisengo and Kababisa, and a substantial increase in mining capacity to 200Mtpa in 2026 and 300Mtpa in 2030. By 2039, the mine is projected to reach a maximum peak mining capacity of 350Mtpa, positioning Lumwana as the largest mine in Africa by total tonnes moved. Technological advancements are central to the expansion, with plans to introduce high-level automation and modern process control systems. The parallel process circuit will enable substantial productivity improvements and reduced operating costs. A new pit-rim crusher and conveyor system will optimize hauling efficiency, cutting current ultra-class trucking haul cycles by at least 15%. The tailings storage facility will see a capacity increase from 360Â million tonnes to two billion tonnes. The expansion capitalizes on copper fundamentals and delivers a financially robust low capital intensity mine, with a projected cumulative operating cash flow of $36Â billion and free cash flow of $15.2 billion5 over the mineâ€™s life, based on a three-year trailing copper price of $4.03 per pound.25 The project will be self-funded by Barrick and current Lumwana operations, paying back the initial expansion capital in approximately two years after completion of the expansion at $4.03 per pound. Environmental and social responsibility are key considerations of the project. Barrick has secured all necessary mining licenses over the entire project area and completed an Environmental and Social Impact Assessment, which was approved in November 2024. Additional permits are on schedule to be approved prior to construction. The Company is also investing up to $2Â million through a REDD+ Project to offset environmental impacts, partnering with local chiefdoms and the Zambian government to conserve approximately 215,000 hectares of forest. Â Â BARRICK YEAR-END 2024 Â 7 Â Â PRESS RELEASE Updated Feasibility Study Demonstrates Reko Diqâ€™s Transformative Potential Barrick has completed the updated feasibility study for the Reko Diq project26, marking a significant milestone in the development of one of the worldâ€™s largest undeveloped copper-gold deposits. Reko Diq will be a major contributor to Pakistanâ€™s economy which is expected to have a transformative impact on the Balochistan province. Â Barrickâ€™s share of the project represents 50%, with 25% held by three Pakistani state-owned enterprises and 25% held by the Government of Balochistan, of which 15% is on a fully funded basis and 10% is on a free carried basis. The updated feasibility study outlines a 37-year mine life with a total estimated capital investment on a 100% basis of $8.83Â billion, to be divided into two phases, with Phase 1 having an estimated total capital cost of $5.6-$6.0Â billion (100% basis, exclusive of financing costs). On FebruaryÂ 11, 2025, the Board of Directors conditionally approved the development of Phase 1 subject to the closing of up to $3Â billion of limited recourse project financing. Assuming $3Â billion of project financing, Barrickâ€™s share of the total partner equity contribution required for the development of Phase 1 is expected to be $1.8-$2.0Â billion. Early works construction commenced during the first quarter of 2025, with first production anticipated by the end of 2028. The project will leverage five of the fifteen identified porphyry surface expressions within the current mining lease, highlighting substantial future growth potential. Under the updated feasibility study, Phase 1 is planned to see 45Â million tonnes of mill feed processed annually (Mtpa), ramping up to 240,000 tonnes of copper and 297,000 ounces of gold (on a 100% basis).26 By 2034, Phase 2 will expand operations to 90Mtpa, increasing annual production to an average of 460,000 tonnes of copper and 520,000 ounces of gold for the first ten years (2034-2043).26 2044 will see the peak mining rate of 250Mtpa and a life-of-mine strip ratio of 1.07.26 Probable mineral reserves, on a 100% basis, are 3,000 million tonnes at 0.48% representing 15 million tonnes of copper and 2,900Â million tonnes at 0.28g/t representing 26Â million ounces of gold.6 The mining operation will utilize electric rope shovels, diesel hydraulic excavators and 360-tonne ultra class haul trucks. The processing plant consists of a three-stage crushing circuit, ball milling and conventional flotation. Saline groundwater, located approximately 300-750 meters below the surface, that is not suitable for drinking or irrigation is planned as the primary water supply sourced from a nearby aquifer, with power produced through a combination of heavy fuel oil generators, solar systems and battery storage. Future integration into Pakistanâ€™s national grid is planned for Phase 2. An Environmental and Social Impact Assessment (ESIA) was completed in December 2024 and submitted to the relevant government authorities, with approval expected during Q1 2025. Throughout the ESIA process, continuous engagement with local communities and other key stakeholders was undertaken to ensure that their concerns were considered. Based on a three-year trailing average copper price of $4.03 per pound and gold price of $2,045 per ounce, Barrick estimates the project will deliver an internal rate of return of 21.32%, generating $90 billion in operating cash flow and $70Â billion in free cash flow5 (on a 100% basis) over the life of mine and generating $54Â billion of revenue within Pakistan. Reko Diq is the largest foreign direct investment project in Balochistan and one of the largest in Pakistan. Â Â BARRICK YEAR-END 2024 Â 8 Â Â PRESS RELEASE Barrick Advances Fourmile Project in Nevada The results of Barrickâ€™s 2024 drilling program at the wholly owned Fourmile project in Nevada, have been incorporated into a preliminary economic assessment, highlighting an impressive resource base and promising economic indicators that position Fourmile as a world-class gold deposit. Â The 2024 mineral resource update expanded the projectâ€™s mineral resources, across the southernmost portion of the orebody, immediately adjacent to the existing Goldrush mine, resulting in a 192% increase in indicated resources (to 1.4Â million ounces grading 11.76 g/t), a 137% increase in inferred resources (to 6.4Â million ounces at 14.1 g/t) and a 35% increase in grade relative to Barrickâ€™s 2023 year-end mineral resource estimate.24,27 President and chief executive Mark Bristow, stated that the Fourmile project is a truly world-class asset which can only really be compared to the original Goldstrike deposit that was the foundational asset of Barrick and is now part of Carlin within the Nevada Gold Mines joint venture. â€œThe current resource represents approximately one-third of the total orebody defined by drilling to date, supporting substantial growth potential, with increasing grades as drilling progresses northward,â€ said Bristow. Economic projections for Fourmile are equally compelling, whereby the preliminary economic assessment demonstrates Fourmileâ€™s potential to become a Tier One mine21 at comparable annual mining rates and costs to the current Goldrush mine plan.24 These results have encouraged Barrick to advance the project through a three-year pre-feasibility-study program. Barrickâ€™s Mineral Resource Management and Evaluation Executive Simon Bottoms stated, â€œGeotechnical drilling and ongoing hydrological measurements have confirmed more favourable ground conditions with lower permeability than other typical Carlin-style deposits. This has the potential to reduce the dewatering requirements during mine development and allows for stope heights to be increased up to 25m high compared to 15m within the neighboring Goldrush mine.â€ â€œMetallurgical test work has demonstrated compatibility with existing facilities, offering processing flexibility through both autoclave and roaster facilities. The initial mine design incorporates three semi-independent production zones, providing operational flexibility and potential for increased production rates,â€ said Bottoms. Looking ahead, Barrick plans to commence pre-feasibility-study drilling at the end of the first quarter of 2025, which will provide the foundational study data to underpin the planned Bullion Hill northern access portal. The upcoming studies will also explore materials handling options and investigate the synergies Fourmile could bring to both the existing Goldrush mine and associated processing facilities. Â Â Maâ€™aden Barrick Copper Company Advances Female Employment in Saudi Mining In August 2020, the Kingdom of Saudi Arabiaâ€™s Cabinet approved landmark amendments to the Labor Law, repealing Articles 149 and 150, which previously restricted women from working in hazardous occupations or during night shifts. Â A new clause was introduced to guarantee women equal access to job opportunities as men, provided the roles are not hazardous to their health. This progressive step aligns with Saudi Arabiaâ€™s Vision 2030, a national initiative to empower women across all sectors, including mining. The Maâ€™aden Barrick Copper Company (MBCC), a 50/50 joint venture between Barrick and Maâ€™aden, exemplifies this vision by opening doors for women in the traditionally male-dominated mining industry. Starting in 2022, MBCC began

employing women in various roles, including accounting, human resources, procurement, geology, supply chain management, logistics and compliance. By the beginning of 2025, MBCC had more than doubled the number of female employees, rising from eight in 2022 to 17 â€" a testament to Barrickâ€™s commitment to fostering a diverse and inclusive workforce. MBCC became the first mine in Saudi Arabia to recruit women to work in remote areas for operational roles. Women now actively contribute to the companyâ€™s operations, taking on positions such as project coordinators and chemists in the process lab. Additionally, MBCC has trained 15 women across multiple disciplines, including as instrument and planning engineers in the maintenance department, and as chemists in the process plant. Barrickâ€™s efforts extend beyond hiring to developing future talent. The Company collaborates with local universities and colleges to provide tailored training opportunities, empowering women to excel in roles critical to the mining sector. This progress not only supports Saudi Arabiaâ€™s national goals but also highlights Barrickâ€™s dedication to creating a diverse, equitable and forward-thinking workplace. By integrating talented women into their operations, MBCC and Barrick are setting a new standard for the mining industry in Saudi Arabia and beyond. These results represent our 61.5% interest in Carlin, Cortez, Turquoise Ridge, Phoenix and Long Canyon until it transitioned to care and maintenance at the end of 2023, as previously reported. Â b. Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of Barrickâ€™s Q4 2024 MD&A. Â c. Includes Goldrush. Â d. Starting in Q1 2024, we have ceased to include production or non-GAAP cost metrics for Long Canyon as it was placed on care and maintenance at the end of 2023, as previously reported. Â e. As Porgera was placed on care and maintenance from AprilÂ 25, 2020 until DecemberÂ 22, 2023, no operating data or per ounce data has been provided from Q3 2020 to Q4 2023. On DecemberÂ 22, 2023, we completed the Commencement Agreement, pursuant to which the PNG government and BNL, the 95% owner and operator of the Porgera joint venture, agreed on a partnership for the future ownership and operation of the mine. Ownership of Porgera is held in a joint venture owned 51% by PNG stakeholders and 49% by a Barrick affiliate, PJL. PJL is jointly owned on a 50/50 basis by Barrick and Zijin Mining Group and therefore Barrick now holds a 24.5% ownership interest in the Porgera joint venture. Barrick holds a 23.5% interest in the economic benefits of the mine under the economic benefit sharing arrangement agreed with the PNG government whereby Barrick and Zijin Mining Group together share 47% of the overall economic benefits derived from the mine accumulated over time, and the PNG stakeholders share the remaining 53%. Â f. Excludes Pierina, which is producing incidental ounces while in closure. Â g. Gold cost of sales per ounce is calculated as cost of sales across our gold operations (excluding sites in closure or care and maintenance) divided by ounces sold (both on an attributable basis using Barrickâ€™s ownership share). The notes to these consolidated financial statements, which are contained in the Fourth Quarter and Year End Report, available on our website are an integral part of these consolidated financial statements. Â BARRICK YEAR-END 2024 Â 20 Â Â PRESS RELEASE Technical Information The scientific and technical information contained in this press release has been reviewed and approved by Craig Fiddes, SME-RM, Lead, Resource Modeling, Nevada Gold Mines; Richard Peattie, MPhil, FAusIMM, Mineral Resources Manager: Africa and Middle East; Peter Jones, MAIG, Manager Resource Geology â€“ Latin AmericaÂ & Asia Pacific; Simon Bottoms, CGeol, MGeol, FGS, FAusIMM, Mineral Resource Management and Evaluation Executive; and Joel Holliday, FAusIMM, Executive Vice-President, Exploration â€“ each a â€œQualified Personâ€ as defined in National Instrument 43-101 â€“ Standards of Disclosure for Mineral Projects. All mineral reserve and mineral resource estimates are estimated in accordance with National Instrument 43-101 â€“ Standards of Disclosure for Mineral Projects. Unless otherwise noted, such mineral reserve and mineral resource estimates are as of DecemberÂ 31, 2024. Endnotes Endnote 1 Gold cost of sales per ounce is calculated as cost of sales across our gold operations (excluding sites in closure or care and maintenance) divided by ounces sold (both on an attributable basis using Barrickâ€™s ownership share). Endnote 2 â€œTotal cash costsâ€ per ounce and â€œAll-in sustaining costsâ€ per ounce are non-GAAP financial performance measures which are calculated based on the definition published by the World Gold Council (a market development organization for the gold industry comprised of and funded by gold mining companies from around the world, including Barrick, the â€œWGCâ€). The WGC is not a regulatory organization. Management uses these measures to monitor the performance of our gold mining operations and their ability to generate positive cash flow, both on an individual site basis and an overall company basis. â€œTotal cash costsâ€ per ounce start with our cost of sales related to gold production and removes depreciation, the noncontrolling interest of cost of sales and includes by-product credits. â€œAll-in sustaining costsâ€ per ounce start with â€œTotal cash costsâ€ per ounce and includes sustaining capital expenditures, sustaining leases, general and administrative costs, minesite exploration and evaluation costs and reclamation cost accretion and amortization. These additional costs reflect the expenditures made to maintain current production levels. These definitions recognize that there are different costs associated with the life-cycle of a mine, and that it is therefore appropriate to distinguish between sustaining and non-sustaining costs. Barrick believes that the use of â€œTotal cash costsâ€ per ounce and â€œAll-in sustaining costsâ€ per ounce will assist analysts, investors and other stakeholders of Barrick in understanding the costs associated with producing gold, understanding the economics of gold mining, assessing our operating performance and also our ability to generate free cash flow from current operations and to generate free cash flow on an overall company basis. â€œTotal cash costsâ€ per ounce and â€œAll-in sustaining costsâ€ per ounce are intended to provide

additional information only and do not have standardized definitions under IFRS and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. These measures are not equivalent to net income or cash flow from operations as determined under IFRS. Although the WGC has published a standardized definition, other companies may calculate these measures differently. Further details on these non-GAAP financial performance measures are provided in the MD&A accompanying Barrickâ€™s financial statements filed from time to time on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov. Â BARRICK YEAR-END 2024 Â 21 Â Â PRESS RELEASE Reconciliation of Gold Cost of Sales to Total cash costs and All-in sustaining costs, including on a per ounce basis Â Â Â Â Â Â Â ForÂ theÂ threeÂ monthsÂ ended Â Â Â Â Â Â For the years ended Â â€„($ millions, except per ounce information in dollars) Â Â Â Footnote Â Â Â 12/31/24 Â Â Â 9/30/24 Â Â Â Â Â Â Â â€f12/31/24 Â Â Â 12/31/23 Â Â Â 12/31/22 Â â€„Cost of sales applicable to gold production Â Â Â Â 1,810 Â Â Â 1,856 Â Â Â Â Â Â 7,226 Â Â Â 7,178 Â Â Â 6,813 Â Depreciation Â Â Â Â Â (424)Â Â Â (409)Â Â Â Â Â Â (1,641)Â Â Â Â (1,756)Â Â Â (1,756)Â Cash cost of sales applicable to equity method investments Â Â Â Â 90 Â Â Â 93 Â Â Â Â Â Â 316 Â Â Â 260 Â Â Â 222 Â By-product credits Â Â Â Â (58)Â Â Â (58)Â Â Â Â Â (247)Â Â Â Â (252)Â Â Â (225)Â â€„Non-recurring items Â Â Â a Â Â Â 0 Â Â Â 0 Â Â Â Â Â Â 0 Â Â Â 0 Â Â Â (23)Â â€„Other Â Â Â b Â Â Â 4 Â Â Â 3 Â Â Â Â Â Â 14 Â Â Â 18 Â Â Â (23)Â â€„Non-controlling interests Â Â Â c Â Â Â (413)Â Â Â (417)Â Â Â Â Â Â (1,623)Â Â Â (1,578)Â Â Â (1,442)Â Â Â Â Â Â Â Â â€„Total cash costs Â Â Â Â Â Â 1,009 Â Â Â 1,068 Â Â Â Â Â Â Â 4,045 Â Â Â 3,870 Â Â Â 3,566 Â GeneralÂ & administrative costs Â Â Â Â 9 Â Â Â 46 Â Â Â Â Â Â 115 Â Â Â 126 Â Â Â 159 Â Minesite exploration and evaluation costs Â Â Â d Â Â Â 8 Â Â Â 10 Â Â Â Â Â Â 37 Â Â Â 40 Â Â Â 75 Â Minesite sustaining capital expenditures Â Â Â e Â Â Â 525 Â Â Â 511 Â Â Â Â Â Â 2,217 Â Â Â 2,076 Â Â Â 2,071 Â Sustaining leases Â Â Â Â 7 Â Â Â 8 Â Â Â Â Â Â 30 Â Â Â 30 Â Â Â 38 Â Rehabilitation - accretion and amortization (operating sites) Â Â Â f Â Â Â 15 Â Â Â 14 Â Â Â Â Â Â 66 Â Â Â 63 Â Â Â 50 Â Non-controlling interest, copper operations and other Â Â Â g Â Â Â (173)Â Â Â (199)Â Â Â Â Â (874)Â Â Â (824)Â Â Â (900)Â Â Â Â Â Â Â Â â€„All-in sustaining costs Â Â Â Â Â Â Â 1,400 Â Â Â 1,458 Â Â Â Â Â Â Â 5,636 Â Â Â 5,381 Â Â Â 5,059 Â â€„Ounces sold - attributable basis (000s ounces) Â Â Â h Â Â Â 965 Â Â Â 967 Â Â Â Â Â Â 3,798 Â Â Â 4,024 Â Â Â 4,141 Â â€„Cost of sales per ounce Â Â Â i,j Â Â Â 1,428 Â Â Â 1,472 Â Â Â Â Â Â 1,442 Â Â Â 1,334 Â Â Â 1,241 Â â€„Total cash costs per ounce Â Â Â j Â Â Â 1,046 Â Â Â 1,104 Â Â Â Â Â Â 1,065 Â Â Â 960 Â Â Â 862 Â â€„Total cash costs per ounce (on a co-product basis) Â Â Â j,k Â Â Â 1,086 Â Â Â 1,145 Â Â Â Â Â Â 1,109 Â Â Â 1,002 Â Â Â 897 Â â€„All-in sustaining costs per ounce Â Â Â j Â Â Â 1,451 Â Â Â 1,507 Â Â Â Â Â Â 1,484 Â Â Â 1,335 Â Â Â 1,222 Â â€„All-in sustaining costs per ounce (on a co-product basis) Â Â Â j,k Â Â Â 1,491 Â Â Â 1,548 Â Â Â Â Â Â 1,528 Â Â Â 1,377 Â Â Â 1,257 Â Â Â a. Non-recurring items - These costs are not indicative of our cost of production and have been excluded from the calculation of total cash costs. Non- recurring items for 2022 relate to a net realizable value impairment of leach pad inventory at Veladero. Â Â b. Other - Other adjustments for Q4 2024 and 2024 include the removal of total cash costs and by-product credits associated with Pierina of $nil and $nil, respectively (Q3 2024: $nil; 2023: $3Â million; 2022: $24 million), which was producing incidental ounces until DecemberÂ 31, 2023 while in closure. Â Â c. Non-controlling interests - Non-controlling interests include non-controlling interests related to gold production of $559Â million and $2,189Â million, respectively, for Q4 2024 and 2024; (Q3 2024: $556Â million; 2023: $2,192Â million; 2022: $2,032 million). Non-controlling interests include NGM, Pueblo Viejo, Loulo-Gounkoto, Tongon, North Mara and Bulyanhulu. Refer to note 5 to the Financial Statements for further information. Â Â d. Exploration and evaluation costs - Exploration, evaluation and project expenses are presented as minesite if it supports current mine operations and project if it relates to future projects. Refer to page 51 of Barrickâ€™s Q4 2024 MD&A. Â Â e. Capital expenditures - Capital expenditures are related to our gold sites only and are split between minesite sustaining and project capital expenditures. Â Â f. Rehabilitation - accretion and amortization - Includes depreciation on the assets related to rehabilitation provisions of our gold operations and accretion on the rehabilitation provisions of our gold operations, split between operating and non-operating sites. Â Â g. Non-controlling interest and copper operations - Removes generalÂ & administrative costs related to non-controlling interests and copper based on a percentage allocation of revenue. Also removes exploration, evaluation and project expenses, rehabilitation costs and capital expenditures incurred by our copper sites and the non-controlling interests of NGM, Pueblo Viejo, Loulo-Gounkoto, Tongon, North Mara and Bulyanhulu operating segments. It also includes capital expenditures applicable to our equity method investments in Kibali and Porgera. Figures remove the impact of Pierina up until DecemberÂ 31, 2023. The impact is summarized as the following: Â â€ƒ($ millions) Â Â ForÂ theÂ threeÂ monthsÂ ended Â Â For the years ended Â â€ƒNon-controlling interest, copper operations and other Â Â Â â€,12/31/24 Â Â Â â€ƒ9/30/24 Â Â Â â€,12/31/24 Â Â Â â€ƒ12/31/23 Â Â Â â€ƒ12/31/22 Â â€ƒGeneralÂ & administrative costs Â Â Â 3 Â Â Â (7)Â Â Â (14)Â Â Â (9)Â Â Â (31)Â â€ƒMinesite exploration and evaluation costs Â Â Â (2)Â Â Â (2)Â Â Â (10)Â Â Â (14)Â Â Â (27)Â â€ƒRehabilitation - accretion and amortization (operating sites) Â Â Â (5)Â Â Â (5)Â Â Â (21)Â Â Â (21)Â Â Â (16)Â â€ƒMinesite sustaining capital expenditures Â Â Â (169)Â Â Â (185)Â Â Â (829)Â Â Â (780)Â Â Â (826)Â Â Â Â Â Â Â â€ƒAll-in sustaining costs total Â Â Â (173)Â Â Â (199)Â Â Â (874)Â Â Â (824)Â Â Â (900)Â Â Â h. Ounces sold - attributable basis - Excludes Pierina, which was producing incidental ounces until DecemberÂ 31, 2023 while in closure. It also excludes Long Canyon which is producing residual ounces from the leach pad while in care and maintenance. Â Â i. Cost of sales per ounce - Figures remove the cost of sales impact of Pierina of $nil and $nil, respectively, for Q4 2024 and 2024 (Q3 2024: $nil; 2023: $3Â million; 2022: $24 million), which was producing incidental ounces up until DecemberÂ 31, 2023 while in closure. Gold cost of sales per ounce is calculated as cost of sales across our gold operations (excluding sites in closure or care and maintenance) divided by ounces sold (both on an attributable basis using Barrickâ€™s ownership share). Â Â j. Per ounce figures - Cost of sales per ounce, cash costs per ounce and all-in sustaining costs per ounce per ounce may not calculate based on amounts presented in this table due to rounding. Â Â k. Co-product costs per ounce Cash costs per ounce and all-in sustaining costs per ounce per ounce presented on a co-product basis remove the impact of by-product credits of our gold production (net of non-controlling interest) calculated as: Â BARRICK YEAR-END 2024 Â 22 Â Â PRESS RELEASE â€f($ millions) Â ForÂ theÂ threeÂ monthsÂ ended Â Â For the years ended Â Â Â Â â€,12/31/24 Â Â Â Â Â 9/30/24 Â Â Â â€,12/31/24 Â Â Â Â Â Â 12/31/23 Â Â Â Â Â Â 12/31/22 Â â€ƒBy-product credits Â Â Â 58 Â Â Â Â Â Â 58 Â Â Â 247 Â Â Â Â Â Â 252 Â Â Â Â Â Â 225 Â â€ƒNon-controlling interest Â Â Â (19)Â Â Â Â Â Â (18)Â Â Â (79)Â Â Â Â Â Â (81)Â Â Â Â Â Â (78)Â â€ƒBy-product credits (net of non-controlling interest) Â Â Â 39 Â Â Â Â Â Â 40 Â Â Â 168 Â Â Â Â Â Â 171 Â Â Â Â Â Â 147 Â Endnote 3 â€œAdjusted net earningsâ€ and â€œadjusted net earnings per shareâ€ are non-GAAP financial performance measures. Adjusted net earnings excludes the following from net earnings: impairment charges (reversals) related to intangibles, goodwill, property, plant and equipment, and investments; acquisition/disposition gains/losses; foreign currency translation gains/losses; significant tax adjustments; other items that are not indicative of the underlying operating performance of our core mining business; and tax effect and non-controlling interest of the above items. Management uses this measure internally to evaluate our underlying operating performance for the reporting periods presented and to assist with the planning and forecasting of future operating results. Management believes that adjusted net earnings is a useful measure of our performance because impairment charges, acquisition/disposition gains/losses and significant tax adjustments do not reflect the underlying operating performance of our core mining business and are not necessarily indicative of future operating results. Adjusted net earnings and adjusted net earnings per share are intended to provide additional information only and does not have any standardized definition under IFRS Accounting Standards as issued by the International Accounting Standards Board (â€œIFRSsâ€) and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. Other companies may calculate these measures differently. The following table reconciles these non-GAAP financial measures to the most directly comparable IFRS measure. Further details on these non-GAAP financial performance measures are provided in the MD&A accompanying Barrickâ€™s financial statements filed from time to time on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov. Reconciliation of Net Earnings to Net Earnings per Share, Adjusted Net Earnings and Adjusted Net Earnings per Share Â Â Â Â ForÂ theÂ threeÂ monthsÂ ended Â Â Â Â Â Â For the years ended Â â€ƒ($ millions, except per share amounts in dollars) Â Â Â â€ƒâ€,12/31/24 Â Â Â â€ƒ9/30/24 Â Â Â â€ƒâ€,12/31/24 Â Â Â â€ƒâ€12/31/24 Â Â Â â€ƒâ€12/31/23 Â Â Â â€ƒâ€12/31/22 Â â€ƒNet earnings attributable to equity holders of the Company Â Â Â 996 Â Â Â 483 Â Â Â Â Â Â 2,144 Â Â Â 1,272 Â Â Â 432 Â â€ƒImpairment (reversals) charges related to non-current assetsa Â Â Â (477)Â Â Â 2 Â Â Â Â Â (457)Â Â Â 312 Â Â Â 1,671 Â â€ƒAcquisition/disposition gainsb Â Â Â (17)Â Â Â (1)Â Â Â Â Â (24)Â Â Â (364)Â Â Â (405)Â â€ƒLoss on currency translation Â Â Â 18 Â Â Â 4 Â Â Â Â Â 39 Â Â Â 93 Â Â Â 16 Â â€ƒSignificant tax adjustmentsc Â Â Â 1 Â Â Â (30)Â Â Â Â Â 137 Â Â Â 220 Â Â Â 95 Â â€ƒOther expense adjustmentsd Â Â Â 113 Â Â Â 97 Â Â Â Â Â 249 Â Â Â 96 Â Â Â 17 Â â€ƒNon-controlling intereste Â Â Â (159)Â Â Â (7)Â Â Â Â Â (170)Â Â Â (98)Â Â Â (274)Â â€ƒTax effecte Â Â Â 319 Â Â Â (19)Â Â Â Â Â 295 Â Â Â (64)Â Â Â (226)Â Â Â Â Â Â Â â€ƒAdjusted net earnings Â Â Â 794 Â Â Â 529 Â Â Â Â Â Â 2,213 Â Â Â 1,467 Â Â Â 1,326 Â â€ƒNet earnings per sharef Â Â Â 0.57 Â Â Â 0.28 Â Â Â Â Â 1.22 Â Â Â 0.72 Â Â Â 0.24 Â â€ƒAdjusted net earnings per share Â Â Â 0.46 Â Â Â 0.30 Â Â Â Â Â Â 1.26 Â Â Â 0.84 Â Â Â 0.75 Â Â Â a.Â Net impairment (reversals) charges for Q4 2024 and 2024 mainly related to long-lived asset impairment reversals at Lumwana and Veladero, partially offset by a goodwill impairment at Loulo-Gounkoto. Net impairment charges for 2023 mainly relate to a long-lived asset impairment at Long Canyon. For 2022, net impairment charges primarily relate to a goodwill impairment at Loulo-Gounkoto, and non-current asset impairments at Veladero and Long Canyon, partially offset by an impairment reversal at Reko Diq. Â b.Â Acquisition/disposition gains for Q4 2024 and 2024 relate to miscellaneous assets. For 2023, acquisition/disposition gains primarily relate to a gain on the reopening of the Porgera mine. For 2022, acquisition/disposition gains primarily relate to a gain as Barrickâ€™s interest in the Reko Diq project increased from 37.5% to 50%, as well as the sale of two royalty portfolios. Â c.Â Significant tax adjustments in 2024 and 2023 primarily relate to the resolution of uncertain tax positions; the impact of prior year adjustments; the impact of nondeductible foreign exchange losses; and the recognition and derecognition of deferred tax assets. Â d.Â Other expense adjustments for Q4 2024 and 2024 mainly relate to a payment to the Government of Mali to advance negotiations and a customs and royalty settlement at Tongon. 2024 was further impacted by the interest and penalties recognized following the proposed settlement of the ZaldÃvar Tax Assessments in Chile, which was recorded in Q2 2024, a provision made relating to a legacy mine site operated by Homestake Mining Company that was closed prior to the 2001 acquisition by Barrick, and an accrual relating to the road construction in Tanzania per our community investment obligations under the Twiga partnership. For 2023, other expense adjustments mainly relate to changes in the discount rate assumptions on our closed mine rehabilitation provision, care and maintenance expenses at Porgera and the $30Â million commitment we made towards the expansion of education infrastructure in Tanzania. For 2022, other expense adjustments mainly relate to a net realizable value impairment of leach pad inventory at Veladero, care and maintenance expenses at Porgera and supplies obsolescence write-off at Bulyanhulu and North Mara. Â e.Â Non-controlling interest and tax effect for 2024 primarily relates to impairment (reversals) charges related to non-current assets. Â f. Calculated using weighted average number of shares outstanding under the basic method of earnings per share. Endnote 4 EBITDA is a non-GAAP financial performance measure, which excludes the following from net earnings: income tax expense; finance costs; finance income; and depreciation. Management believes that EBITDA is a valuable indicator of our ability to generate liquidity by producing operating cash flow to fund working capital needs, service debt obligations, and fund capital expenditures. Management uses EBITDA for this purpose. Adjusted EBITDA removes the effect of impairment charges; acquisition/disposition gains/losses; foreign currency translation gains/losses; and other expense adjustments. We also remove the impact of the income tax expense, finance costs, finance income and depreciation incurred in our equity method accounted investments. We believe these items provide a greater level of consistency with the adjusting items included in our adjusted net Â BARRICK YEAR-END 2024 Â 23 Â Â PRESS RELEASE earnings reconciliation, with the exception that these amounts are adjusted to remove any impact on finance costs/income, income tax expense and/or depreciation as they do not affect EBITDA. We believe this additional information will assist analysts, investors and other stakeholders of Barrick in better understanding our ability to generate liquidity from our full business, including equity method investments, by excluding these amounts from the calculation as they are not indicative of the performance of our core mining business and not necessarily reflective of the underlying operating results for the periods presented. We believe this additional information will assist analysts, investors and other stakeholders of Barrick in better understanding our ability to generate liquidity from our attributable business and which is aligned with how we present our forward looking guidance on gold ounces and copper pounds produced. Attributable EBITDA margin is calculated as attributable EBITDA divided by revenues - as adjusted. We believe this ratio will assist analysts, investors and other stakeholders of Barrick to better understand the relationship between revenues and EBITDA or operating profit. Starting with the Q2 2024 MD&A, we are presenting net leverage as a non-GAAP ratio and is calculated as debt, net of cash divided by the sum of adjusted EBITDA of the last four consecutive quarters. We believe this ratio will assist analysts, investors and other stakeholders of Barrick in monitoring our leverage and evaluating our balance sheet. EBITDA, adjusted EBITDA, attributable EBITDA, EBITDA margin and net leverage are intended to provide additional information to investors and analysts and do not have any standardized definition under IFRS, and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. EBITDA, adjusted EBITDA and attributable EBITDA exclude the impact of cash costs of financing activities and taxes, and the effects of changes in operating working capital balances, and therefore are not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. Other companies may calculate EBITDA, adjusted EBITDA, attributable EBITDA, EBITDA margin and net leverage differently. Further details on these non-GAAP financial performance measures are provided in the MD&A accompanying Barrickâ€™s financial statements filed from time to time on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov. Reko Diq probable reserves of 1,400Â million tonnes grading 0.28 g/t representing 13Â million ounces of gold, probable reserves of 1,500Â million tonnes grading 0.48% representing 7.3Â million tonnes of copper, indicated resources of 1,800Â million tonnes grading 0.25 g/t representing 15Â million ounces of gold, inferred resources of 640Â million tonnes grading 0.2 g/t representing 3.9Â million ounces of gold, indicated resources of 2,000Â million tonnes grading 0.43% representing 8.4Â million tonnes of copper, and inferred resources of 690Â million tonnes grading 0.3% representing 2.2Â million tonnes of copper. Complete mineral reserve and mineral resource data for all mines and projects referenced in this press release, including tonnes, grades, and ounces, can be found on pages 83-92 of Barrickâ€™s Fourth Quarter and Year-End 2024 Report. Endnote 7 Lumwana mineral reserves are estimated in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects as required by Canadian securities regulatory authorities. Estimates as of DecemberÂ 31, 2024: Proven reserves of 140Â million tonnes grading 0.49% representing 0.68Â million tonnes of copper, probable reserves of 1,500Â million tonnes grading 0.53% representing 7.6Â million tonnes of copper, measured resources of 170Â million tonnes grading 0.45% representing 0.77Â million tonnes of copper, indicated resources of 1,800Â million tonnes grading 0.50% representing 9.2Â million tonnes of copper, and inferred resources of 230Â million tonnes grading 0.4% representing 0.91Â million tonnes of copper. Estimates as of DecemberÂ 31, 2023: Proven mineral reserves of 88Â million tonnes grading 0.54%, representing 0.48Â million tonnes of copper. Probable reserves of 420Â million tonnes grading 0.59%, representing 2.5Â million tonnes of copper. Complete mineral reserve and mineral resource data for all mines and projects referenced in this press release, including tonnes, grades, and ounces, can be found on pages 83-92 of Barrickâ€™s Fourth Quarter and Year-End 2024 Report. Endnote 8 Gold Equivalent Ounces from copper assets are calculated using a gold price of $1,400/oz and a copper price of $3.00/lb. Endnote 9 TRIFR is a ratio calculated as follows: number of reportable injuries x 1,000,000 hours divided by the total number of hours worked. Reportable injuries include fatalities, lost time injuries, restricted duty injuries, and medically treated injuries. LTIFR is a ratio calculated as follows: number of lost time injuries x 1,000,000 hours divided by the total number of hours worked. Endnote 10 On an attributable basis. Endnote 11 â€œRealized priceâ€ is a non-GAAP financial performance measure which excludes from sales: treatment and refining charges; and cumulative catch-up adjustment to revenue relating to our streaming arrangements. We believe this provides investors and analysts with a more accurate measure with which to compare to market gold and copper prices and to assess our gold and copper sales performance. For those reasons, management believes that this measure provides a more accurate reflection of our companyâ€™s past performance and is a better indicator of its expected performance in future periods. The realized price measure is intended to provide additional information, and does not have any standardized definition under IFRS and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The measure is not necessarily indicative of sales as determined under IFRS. Other companies may calculate this measure differently. The following table reconciles realized prices to the most directly comparable IFRS measure. Further details on these non-GAAP financial performance measures are provided in the MD&A accompanying Barrickâ€™s financial statements filed from time to time on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov. Represents sales of $208Â million and $741Â million, respectively, for Q4 2024 and 2024 (Q3 2024: $193Â million; 2023: $667Â million; 2022: $597 million) applicable to our 45% equity method investment in Kibali and $32Â million and $108Â million, respectively (Q3 2024: $48Â million; 2023: $nil; 2022: $nil) applicable to our 24.5% equity method investment in Porgera for gold. Represents sales of $97Â million and $357Â million, respectively, for Q4 2024 and 2024 (Q3 2024: $91Â million; 2023: $359Â million; 2022: $390 million) applicable to our 50% equity method investment in ZaldÃvar and $74Â million and $270Â million, respectively (Q3 2024: $55Â million; 2023: $253Â million; 2022: $275 million) applicable to our 50% equity method investment in Jabal Sayid for copper. Â b. Sales applicable to equity method investments are net of treatment and refinement charges. Â c. On an attributable basis. Excludes Pierina, which was producing incidental ounces until DecemberÂ 31, 2023 while in closure. It also excludes Long Canyon which is producing residual ounces from the leach pad while in care and maintenance. Â d. Represents cumulative catch-up adjustment to revenue relating to our streaming arrangements. Refer to note 2e to the Financial Statements for more information. Â e. Realized price per ounce/pound may not calculate based on amounts presented in this table. Endnote 12 Net earnings represents net earnings attributable to the equity holders of the Company. Endnote 13 Attributable capital expenditures are presented on the same basis as guidance, which includes our 61.5% share of NGM, our 60% share of Pueblo Viejo, our 80% share of Loulo-Gounkoto, our 89.7% share of Tongon, our 84% share of North Mara and Bulyanhulu, our 45% share of Kibali, our 50% share of ZaldÃvar and Jabal Sayid, and our 24.5% share of Porgera. Total attributable capital expenditures for 2024 actual results also includes capitalized interest of $30Â million. Endnote 14 These amounts are presented on the same basis as our guidance. Minesite sustaining capital expenditures and project capital expenditures are non-GAAP financial measures. Capital expenditures are classified into minesite sustaining capital expenditures or project capital expenditures depending on the nature of the expenditure. Minesite sustaining capital expenditures is the capital spending required to support current production levels. Project capital expenditures represent the capital spending at new projects and major, discrete projects at existing operations intended to increase net present value through higher production or longer mine life. Management believes this to be a useful indicator of the purpose of capital expenditures and this distinction is an input into the calculation of all-in sustaining costs per ounce. Classifying capital expenditures is intended to provide additional information only and does not have any standardized definition under IFRS, and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Other companies may calculate these measures differently. The following table reconciles these non-GAAP financial performance measures to the most directly comparable IFRS measure. Reconciliation of the Classification of Capital Expenditures Â Â Â Â ForÂ theÂ threeÂ monthsÂ ended Â Â Â Â Â Â For the years ended Â â€,($ millions) Â Â Â 12/31/24 Â Â Â Â 9/30/24 Â Â Â Â Â Â Â Â 12/31/24 Â Â Â Â 12/31/23 Â Â Â Â 12/31/22 Â â€,Minesite sustaining capital expenditures Â Â Â 525 Â Â Â Â 511 Â Â Â Â Â 2,217 Â Â Â Â 2,076 Â Â Â Â 2,071 Â â€,Project capital expenditures Â Â Â 362 Â Â Â Â 221 Â Â Â Â Â 924 Â Â Â Â 969 Â Â Â Â Â 949 Â â€,Capitalized interest Â Â Â 4 Â Â Â Â 4 Â Â Â Â Â Â Â Â 33 Â Â Â Â 41 Â Â Â Â 29 Â â€,Total consolidated capital expenditures Â Â Â 891 Â Â Â Â 736 Â Â Â Â Â Â Â Â 3,174 Â Â Â Â 3,086 Â Â Â Â 3,049 Â Endnote 15 Starting in 2024, we have presented our copper production and sales quantities in tonnes rather than pounds (1 tonne is equivalent to 2,204.6 pounds). Production and sales amounts for prior periods have been restated for comparative purposes. Our copper cost metrics are still reported on a per pound basis. Â BARRICK YEAR-END 2024 Â 26 Â Â PRESS RELEASE Endnote 16 Copper cost of sales per pound is calculated as cost of sales across our copper operations divided by pounds sold (both on an attributable basis using Barrickâ€™s ownership share). Endnote 17 â€œC1 cash costsâ€ per pound and â€œAll-in sustaining costsâ€ per pound are non-GAAP financial performance measures related to our copper mine operations. We believe that â€œC1 cash costsâ€ per pound enables investors to better understand the performance of our copper operations in comparison to other copper producers who present results on a similar basis. â€œC1 cash costsâ€ per pound excludes royalties and non-routine charges as they are not direct production costs. â€œAll-in sustaining costsâ€ per pound is similar to the gold all-in sustaining costs metric and management uses this to better evaluate the costs of copper production. We believe this measure enables investors to better understand the operating performance of our copper mines as this measure reflects all of the sustaining expenditures incurred in order to produce copper. â€œAll-in sustaining costsâ€ per pound includes C1 cash costs, sustaining capital expenditures, sustaining leases, general and administrative costs, minesite exploration and evaluation costs, royalties, reclamation cost accretion and amortization and writedowns taken on inventory to net realizable value. Further details on these non-GAAP financial performance measures are provided in the MD&A accompanying Barrickâ€™s financial statements filed from time to time on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov. Reconciliation of Copper Cost of Sales to C1 cash costs and All-in sustaining costs, including on a per pound basis Â Â Â Â ForÂ theÂ threeÂ monthsÂ ended Â Â Â Â Â Â Â For the years ended Â â€,($ millions, except per pound information in dollars) Â Â Â â€fâ€,12/31/24 Â Â Â â€fâ€f9/30/24 Â Â Â Â Â Â Â Â â€fâ€f12/31/24 Â Â Â â€fâ€f12/31/23 Â Â Â â€fâ€f12/31/22 Â â€„Cost of sales Â Â Â 179 Â Â Â 187 Â Â Â Â Â 706 Â Â Â 726 Â Â Â 666 Â Depreciation/amortization Â Â Â (54)Â Â Â (60)Â Â Â Â Â (245)Â Â Â (259)Â Â Â (223)Â Treatment and refinement charges Â Â Â 51 Â Â Â 39 Â Â Â Â Â 162 Â Â Â 191 Â Â Â 199 Â Cash cost of sales applicable to equity method investments Â Â Â 103 Â Â Â 83 Â Â Â Â Â 352 Â Â Â 356 Â Â Â Â 317 Â Less: royalties Â Â Â (22)Â Â Â (17)Â Â Â Â Â (67)Â Â Â (62)Â Â Â (103)Â By-product credits Â Â Â (11)Â Â Â (3)Â Â Â Â Â (25)Â Â Â (19)Â Â Â (14)Â Â Â Â Â Â Â Â Â Â Â Â Â â€„C1 cash cost of sales Â Â Â 246 Â Â Â 229 Â Â Â Â Â Â Â Â 883 Â Â Â 933 Â Â Â 842 Â GeneralÂ & administrative costs Â Â Â 2 Â Â Â 6 Â Â Â Â Â 17 Â Â Â 22 Â Â Â Â Â 30 Â Rehabilitation - accretion and amortization Â Â Â 3 Â Â Â 2 Â Â Â Â Â 9 Â Â Â 9 Â Â Â 4 Â Royalties Â Â Â 22 Â Â Â 17 Â Â Â Â Â 67 Â Â Â 62 Â Â Â 103 Â Minesite exploration and evaluation costs Â Â Â 2 Â Â Â 1 Â Â Â Â Â 4 Â Â Â 7 Â Â Â 22 Â Minesite sustaining capital expenditures Â Â Â 91 Â Â Â 71 Â Â Â Â Â 356 Â Â Â 266 Â Â Â 410 Â Sustaining leases Â Â Â 4 Â Â Â 2 Â Â Â Â Â 11 Â Â Â 12 Â Â Â 6 Â Â Â Â Â Â Â Â Â Â Â â€„All-in sustaining costs Â Â Â 370 Â Â Â 328 Â Â Â Â Â Â Â Â 1,347 Â Â Â 1,311 Â Â Â 1,417 Â â€„Tonnes sold - attributable basis (thousands of tonnes) Â Â Â 54 Â Â Â 42 Â Â Â Â Â Â Â 177 Â Â Â 185 Â Â Â 202 Â â€„Pounds sold - attributable basis (millions pounds) Â Â Â 121 Â Â Â 91 Â Â Â Â Â Â Â Â 391 Â Â Â 408 Â Â Â 445 Â â€„Cost of sales per pounda,b Â Â Â 2.62 Â Â Â 3.23 Â Â Â Â Â Â Â Â 2.99 Â Â Â 2.90 Â Â Â 2.43 Â â€„C1 cash costs per pounda Â Â Â 2.04 Â Â Â 2.49 Â Â Â Â Â Â Â Â 2.26 Â Â Â 2.28 Â Â Â 1.89 Â â€„All-in sustaining costs per pounda Â Â Â 3.07 Â Â Â 3.57 Â Â Â Â Â Â Â Â 3.45 Â Â Â 3.21 Â Â Â 3.18 Â Â Â a.Â Cost of sales per pound, C1 cash costs per pound and all-in sustaining costs per pound may not calculate based on amounts presented in this table due to rounding. Attributable acquisitions and divestments includes the following: a decrease of 2.2 Moz in proven and probable gold reserves from DecemberÂ 31, 2019 to DecemberÂ 31, 2020, as a result of the divestiture of Barrickâ€™s Massawa gold project effective March 4, 2020; and a decrease of 0.91 Moz in proven and probable gold reserves from DecemberÂ 31, 2020 to DecemberÂ 31, 2021, as a result of the change in Barrickâ€™s ownership interest in Porgera from 47.5% to 24.5% and the net impact of the asset exchange of Lone Tree to i-80 Gold for the remaining 50% of South Arturo that Nevada Gold Mines did not already own. All estimates are estimated in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects as required by Canadian securities regulatory authorities. Â a. Estimates as of DecemberÂ 31, 2019, unless otherwise noted, Proven reserves of 280Â million tonnes grading 2.42 g/t, representing 22Â million ounces of gold and 420Â million tonnes grading 0.4%, representing 3,700Â million pounds of copper (which is equal to 1.7Â million tonnes of copper). Probable

reserves of 1,000Â million tonnes grading 1.48 g/t, representing 49Â million ounces of gold and 1,200Â million tonnes grading 0.38%, representing 9,800Â million pounds of copper (which is equal to 4.4Â million tonnes of copper). Conversions may not recalculate due to rounding. Â b. Estimates as of DecemberÂ 31, 2020, unless otherwise noted: Proven reserves of 280Â million tonnes grading 2.37g/t, representing 21Â million ounces of gold, and 350Â million tonnes grading 0.39%, representing 3,000Â million pounds of copper (which is equal to 1.4Â million tonnes of copper). Probable reserves of 990Â million tonnes grading 1.46g/t, representing 47Â million ounces of gold, and 1,100Â million tonnes grading 0.39%, representing 9,700Â million pounds of copper (which is equal to 4.4Â million tonnes of copper). Conversions may not recalculate due to rounding. Â c. Estimates as of DecemberÂ 31, 2021, unless otherwise noted, Proven mineral reserves of 240Â million tonnes grading 2.20g/t, representing 17Â million ounces of gold and 380Â million tonnes grading 0.41%, representing 3,400Â million pounds of copper (which is equal to 1.6Â million tonnes of copper), and probable reserves of 1,000Â million tonnes grading 1.60g/t, representing 53Â million ounces of gold and 1,100Â million tonnes grading 0.37%, representing 8,800Â million pounds of copper (which is equal to 4.0Â million tonnes of copper). Conversions may not recalculate due to rounding. Â d. Estimates as of DecemberÂ 31, 2022, unless otherwise noted. Proven mineral reserves of 260Â million tonnes grading 2.26g/t, representing 19Â million ounces of gold and 390Â million tonnes grading 0.40%, representing 3,500Â million pounds of copper (which is equal to 1.6Â million tonnes of copper), and probable reserves of 1,200Â million tonnes grading 1.53g/t, representing 57Â million ounces of gold and 1,100Â million tonnes grading 0.37%, representing 8,800Â million pounds of copper (which is equal to 4.0Â million tonnes of copper). Conversions may not recalculate due to rounding. Â e. Estimates are as of DecemberÂ 31, 2023, unless otherwise noted. Proven mineral reserves of 250Â million tonnes grading 1.85g/t, representing 15Â million ounces of gold, and 320Â million tonnes grading 0.41%, representing 1.3Â million tonnes of copper. Probable reserves of 1,200Â million tonnes grading 1.61g/t, representing 61Â million ounces of gold, and 1,100Â million tonnes grading 0.38%, representing 4.3Â million tonnes of copper. Â f. Estimates are as of DecemberÂ 31, 2024, unless otherwise noted. Proven mineral reserves of 270Â million tonnes grading 1.75g/t, representing 15Â million ounces of gold, and 380Â million tonnes grading 0.42%, representing 1.6Â million tonnes of copper. Probable reserves of 2,500Â million tonnes grading 0.90g/t, representing 74Â million ounces of gold, and 3,600Â million tonnes grading 0.46%, representing 17Â million tonnes of copper. Endnote 19 Estimated in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects as required by Canadian securities regulatory authorities. Estimates are as of DecemberÂ 31, 2024, unless otherwise noted. Proven mineral reserves of 270Â million tonnes grading 1.75g/t, representing 15Â million ounces of gold, and 380Â million tonnes grading 0.42%, representing 1.6Â million tonnes of copper. Probable reserves of 2,500Â million tonnes grading 0.90g/t, representing 74Â million ounces of gold, and 3,600Â million tonnes grading 0.46%, representing 17Â million tonnes of copper. Measured resources of 450Â million tonnes grading 1.68g/t, representing 24Â million ounces of gold, and 600Â million tonnes grading 0.38%, representing 2.3Â million tonnes of Â BARRICK YEAR-END 2024 Â 28 Â Â PRESS RELEASE copper. Indicated resources of 4,800Â million tonnes grading 1.01g/t, representing 150Â million ounces of gold, and 5,400Â million tonnes grading 0.39%, representing 22Â million tonnes of copper. Inferred resources of 1,400Â million tonnes grading 0.9g/t, representing 41Â million ounces of gold, and 1,300Â million tonnes grading 0.3%, representing 3.9Â million tonnes of copper. Totals may not appear to sum correctly due to rounding. Complete mineral reserve and mineral resource data for all mines and projects referenced in this press release, including tonnes, grades, and ounces, can be found in the Mineral Reserves and Mineral Resources Tables included on the following pages of this press release. Endnote 20 Estimated in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects as required by Canadian securities regulatory authorities. Estimates are as of DecemberÂ 31, 2023, unless otherwise noted. Proven mineral reserves of 250Â million tonnes grading 1.85g/t, representing 15Â million ounces of gold, and 320Â million tonnes grading 0.41%, representing 1.3Â million tonnes of copper. Probable reserves of 1,200Â million tonnes grading 1.61g/t, representing 61Â million ounces of gold, and 1,100Â million tonnes grading 0.38%, representing 4.3Â million tonnes of copper. Measured resources of 430Â million tonnes grading 1.76g/t, representing 24Â million ounces of gold, and 580Â million tonnes grading 0.39%, representing 2.2Â million tonnes of copper. Indicated resources of 4,800Â million tonnes grading 1.00g/t, representing 150Â million ounces of gold, and 4,900Â million tonnes grading 0.39%, representing 19Â million tonnes of copper. Inferred resources of 1,500Â million tonnes grading 0.8g/t, representing 39Â million ounces of gold, and 2,000Â million tonnes grading 0.4%, representing 7.1Â million tonnes of copper. Totals may not appear to sum correctly due to rounding. Complete mineral reserve and mineral resource data for all mines and projects referenced in this press release as of DecemberÂ 31, 2023, including tonnes, grades, and ounces, can be found on pages 33-45 of Barrickâ€™s 2023 Annual Information Form / Form 40-F on file with the Canadian provincial securities regulators on SEDAR+ at www.sedarplus.ca and the Securities and Exchange Commission on EDGAR at www.sec.gov. Endnote 21 A Tier One Gold Asset is an asset with a $1,400/oz reserve with potential to deliver a minimum 10-year life, annual production of at least 500,000 ounces of gold and with costs per ounce in the lower half of the industry cost curve. A Tier One Copper Asset is an asset with a $3.00/lb reserve with potential for +5Mt contained copper in support of at least 20 years life, annual production of at least 200ktpa, with costs per pound in the lower half of the industry cost curve. Tier One Assets must be located in a world class geological district with potential for organic reserve growth and long-term geologically driven addition. Endnote 22 Â â€ƒ Commodity Â Â ProvenÂ andÂ ProbableÂ ReserveÂ Priceâ€ƒâ€ƒAssumptionsâ€ƒâ€ƒ Â Â Â
Measured,Â IndicatedÂ andÂ InferredÂ Resourceâ€ƒâ€ƒPrice Assumptionsâ€ƒâ€ƒ Â Â Â 2023â€ƒâ€ƒ Â Â Â 2024â€ƒâ€ƒ Â Â Â 2023â€ƒâ€ƒ Â Â Â 2024â€ƒâ€ƒ Â Â Â Â Â Â Gold Â $1,300/oz i â€ƒâ€ƒ Â $1,400/oz i,Â iiiâ€ƒâ€ƒ Â $1,700/ozâ€ƒâ€ƒ Â $1,900/ozâ€ƒâ€ƒ Â Â Â Â Â Copperii Â $3.00/lb ii â€ƒâ€ƒ Â $3.00/lb ii,iii â€ƒâ€ƒ Â $4.00/lbâ€ƒâ€ƒ Â $4.00/lbâ€ƒâ€ƒ Â Â Â Â Silver Â $18.00/ozâ€ƒâ€ƒâ€‰ Â $20.00/ozâ€ƒâ€ƒ Â $21.00/ozâ€ƒâ€ƒ Â $24.00/ozâ€ƒâ€ƒ Â Â i. Except at Tongon and Hemlo Open Pit where gold mineral reserves for 2024 are based upon a price assumption of $1,650/oz. Â Â ii. Except at Zaldivar, where mineral reserves and resources are based on Antofagastaâ€™s price assumptions. For mineral reserves, the copper price assumption used by Antofagasta is $3.80/lb for 2024 and was $3.50/lb for 2023. For mineral resources, the copper price assumption used by Antofagasta is $4.40/lb for 2024 and was $4.20/lb for 2023. Â Â iii. Except at Norte Abierto where mineral reserves for 2024 are reported by Newmont within a $1,200/oz, $2.75/lb copper and $22/oz Ag pit design, before application of updated 2023 project economics using escalated operating and capital costs resulting in Newmont guidance of $1,600/oz for gold, $4.00/lb for copper and $23/oz for silver for assumed mineral reserve commodity prices. Mineral resources for 2024 are reported by Newmont within a $1,400/oz, $3.25/lb copper and $20/oz Ag pit shell, before application of updated 2023 project economics using escalated operating and capital costs resulting in Newmont guidance of $1,600/oz for gold, $4.00/lb for copper and $23/oz for silver for assumed mineral resource commodity price. Endnote 23 Attributable organic gold equivalent reserve $/oz additions are calculated from the cumulative net change in reserves from year-end 2019 using reserve prices for gold equivalent ounce (GEO) conversion as outlined in Endnote 18, divided by the total attributable Barrick group expenditure on exploration, reserve conversion and technical studies from preliminary economic assessment, pre-feasibility and feasibility during the same period. Endnote 24 Fourmile financial metrics and production metrics are based upon preliminary economic assessment which is preliminary in nature because it includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the preliminary economic assessment will be realized. The preliminary economic assessment for Fourmile is based upon $1,900/oz mineable stope optimizer. The assumptions outlined within the preliminary economic assessment have formed the basis for the ongoing study and are made by the qualified person. Fourmile is currently 100% owned by Barrick. As previously disclosed, Barrick anticipates Fourmile being contributed to the Nevada Gold Mines joint venture, at fair market value, if certain criteria are met. Â BARRICK YEAR-END 2024 Â 29 Â Â PRESS RELEASE Endnote 25 A Technical Report on Lumwana will be prepared in accordance with Form 43-101F1 and filed on SEDAR+ within 45 days of Barrickâ€™s press release dated as of FebruaryÂ 6, 2025, entitled â€œBarrick Grows Gold and Copper Reserves Significantly, Setting It Apart From Peers as It Positions for Growthâ€. For further information with respect to the key assumptions, parameters and risks associated with Lumwana and other technical information, please refer to the Technical Report to be made available on SEDAR+ at www.sedarplus.ca. and EDGAR at www.sec.gov. Endnote 26 A Technical Report on Reko Diq will be prepared in accordance with Form 43-101F1 and filed on SEDAR+ within 45 days of Barrickâ€™s press release dated as of FebruaryÂ 6, 2025, entitled â€œBarrick Grows Gold and Copper Reserves Significantly, Setting It Apart From Peers as It Positions for Growthâ€. For further information with respect to the key assumptions, parameters and risks associated with Reko Diq and other technical information, please refer to the Technical Report to be made available on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov. Endnote 27 Fourmile mineral resources are estimated in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects as required by Canadian securities regulatory authorities. Estimates as of DecemberÂ 31, 2023: Attributable Indicated resources of 1.5Â million tonnes grading 10.04g/t representing 0.48Â million ounces of gold. Inferred resources of 8.2Â million tonnes grading 10.1g/t, representing 2.7Â million ounces of gold. Estimates as of DecemberÂ 31, 2024: Attributable Indicated resources of 3.6Â million tonnes grading 11.76g/t representing 1.4Â million ounces of gold. Inferred resources of 14Â million tonnes grading 14.1g/ t, representing 6.4Â million ounces of gold. Complete mineral reserve and mineral resource data for all mines and projects referenced in this press release, including tonnes, grades, and ounces, can be found in the Mineral Reserves and Mineral Resources Tables included on the following pages of this press release. Endnote 28 Includes Goldrush. Endnote 29 As a result of the temporary suspension of operations at Loulo-Gounkoto, we have excluded Loulo-Gounkoto from our 2025 production guidance (refer to page 9 of Barrickâ€™s Fourth Quarter and Year-End 2024 Report for more information). We expect to update our guidance to include Loulo-Gounkoto when we have greater certainty regarding the timing for the restart of operations. Endnote 30 Total cash costs and all-in sustaining costs per ounce include costs allocated to non-operating sites. Endnote 31 Operating division guidance ranges reflect expectations at each individual operating division, and may not add up to the company-wide guidance range total. Endnote 32 Includes corporate administration costs. Resources Endnotesâ€. Â BARRICK YEAR-END 2024 Â 38 Â Â PRESS RELEASE Mineral Reserves and Resources Endnotes Â 1. Mineral reserves (â€œreservesâ€) and mineral resources (â€œresourcesâ€) have been estimated as at DecemberÂ 31, 2024 (unless otherwise noted) in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects (â€œNI 43-101â€) as required by Canadian securities regulatory authorities. For United States reporting purposes, the SEC has adopted amendments to its disclosure rules to modernize the mineral property disclosure requirements for issuers whose securities are registered with the SEC under the Securities and Exchange Act of 1934, as amended (the â€œExchange Actâ€). These amendments became effective FebruaryÂ 25, 2019 (the â€œSEC Modernization Rulesâ€) with compliance required for the first fiscal year beginning on or after JanuaryÂ 1, 2021. The SEC Modernization Rules replace the historical property disclosure requirements for mining registrants that were included in SEC Industry Guide 7, which was rescinded from and after the required compliance date of the SEC Modernization Rules. As a result of the adoption of the SEC Modernization Rules, the SEC now recognizes estimates of â€œmeasuredâ€, â€œindicatedâ€ and â€œinferredâ€ mineral resources. In addition, the SEC has amended its definitions of â€œproven mineral reservesâ€ and â€œprobable mineral reservesâ€ to be substantially similar to the corresponding Canadian Institute of Mining, Metallurgy and Petroleum definitions, as required by NI 43-101. U.S. investors should understand that â€œinferredâ€ mineral resources have a great amount of uncertainty as to their existence and great uncertainty as to their economic and legal feasibility. In addition, U.S. investors are cautioned not to assume that any part or all of Barrickâ€™s mineral resources constitute or will be converted into reserves. Mineral resource and mineral reserve estimations have been prepared by employees of Barrick, its joint venture partners or its joint venture operating companies, as applicable, under the supervision of Craig Fiddes, SME-RM, Lead, Resource Modeling, Nevada Gold Mines; Richard Peattie, MPhil, FAusIMM, Mineral Resources Manager: Africa and Middle East; Peter Jones, MAIG, Manager Resource Geology â€“ Latin AmericaÂ & Asia Pacific; and Simon Bottoms, CGeol, MGeol, FGS, FAusIMM, Mineral Resource Management and Evaluation Executive. For 2024, reserves have been estimated based on an assumed gold price of US$1,400 per ounce, an assumed silver price of US$20.00 per ounce, and an assumed copper price of US$3.00 per pound and long-term average exchange rates of 1.30 CAD/US$, except at Tongon, and Hemlo open pit, both where mineral reserves for 2024 were estimated using $1,650/oz; at ZaldÃvar, where mineral reserves for 2024 were calculated using Antofagasta guidance and an updated assumed copper price of US$3.80 per pound; and at Norte Abierto where mineral reserves are reported by Newmont within a $1,200/oz gold, $2.75/lb copper and $22/oz silver pit design, before application of updated 2023 project economics using escalated operating and capital costs resulting in Newmont guidance of $1,600/oz for gold, $4.00/lb for copper and $23/oz for silver for assumed mineral reserve commodity prices. For 2023, reserves have been estimated based on an assumed gold price of US$1,300 per ounce, an assumed silver price of US$18.00 per ounce, and an assumed copper price of US$3.00 per pound and long-term average exchange rates of 1.30 CAD/US$, except at Tongon, where mineral reserves for 2023 were calculated using $1,500/oz; Hemlo, where mineral reserves for 2023 were calculated using $1,400/oz; and at ZaldÃvar, where mineral reserves for 2023 were calculated using Antofagasta guidance and an updated assumed copper price of US$3.50 per pound. Reserve estimates incorporate current and/or expected mine plans and cost levels at each property. Varying cut-off grades have been used depending on the mine and type of ore contained in the reserves. Barrickâ€™s normal data verification procedures have been employed in connection with the calculations. Verification procedures include industry-standard quality control practices. Resources as at DecemberÂ 31, 2024 have been estimated using varying cut-off grades, depending on both the type of mine or project, its maturity and ore types at each property. Â 2. In confirming our annual reserves for each of our mineral properties, projects, and operations, we conduct a reserve test on December 31 of each year to verify that the future undiscounted cash flow from reserves is positive. The cash flow ignores all sunk costs and only considers future operating and closure expenses as well as any future capital costs. Â 3. All mineral resource and mineral reserve estimates of tonnes, Au oz, Ag oz and Cu tonnes are reported to the second significant digit. Â 4. Mineral resources and mineral reserves for the Loulo-Gounkoto Complex have been estimated under the 1991 Malian Mining Code and the Loulo and Gounkoto Mining Conventions under which the Complex has operated to date. Any update to applicable terms as a result of ongoing engagements with the Government of Mali will be incorporated after a definitive agreement is reached. For additional information see page 9 of Barrickâ€™s Fourth Quarter and Year End Report 2024. Â 5. 2024 polymetallic mineral resources and mineral reserves are estimated using the combined value of gold, copperÂ & silver and accordingly are reported as gold, copper and silver mineral resources and mineral reserves. Â 6. For 2024, mineral resources have been estimated based on an assumed gold price of US$1,900 per ounce, an assumed silver price of US$24.00 per ounce, and an assumed copper price of US$4.00 per pound and long-term average exchange rates of 1.30 CAD/US$, except ZaldÃvar, where mineral resources for 2024 were estimated using Antofagasta guidance and an assumed copper price of US$4.40 per pound, and Norte Abierto, where mineral resources are reported by Newmont within a $1,400/oz gold, $3.25/ lb copper and $20/oz silver pit shell, before application of updated 2023 project economics using escalated operating and capital costs resulting in Newmont guidance and an assumed price of $1,600/oz for gold, $4.00/lb for copper and $23/oz for silver for assumed mineral resource commodity price. For 2023, mineral resources were estimated based on an assumed gold price of US$1,700 per ounce, an assumed silver price of US$21.00 per ounce, and an assumed copper price of US$4.00 per pound and long-term average exchange rates of 1.30 CAD/US$, except at ZaldÃvar, where mineral resources for 2023 were calculated using Antofagasta guidance and an assumed copper price of US$4.20. Â 7. Mineral resources which are not mineral reserves do not have demonstrated economic viability. Â 8. Mineral resources are reported inclusive of mineral reserves. Â 9. All measured and indicated mineral resource estimates of grade and all proven and probable mineral reserve estimates of grade for Au g/t, Ag g/t and Cu % are reported to two decimal places. Â 10. All inferred mineral resource estimates of grade for Au g/t, Ag g/t and Cu % are reported to one decimal place. All statements, other than statements of historical fact, are forward-looking statements. The words â€œbelieveâ€, â€œexpectâ€, â€œstrategyâ€, â€œtargetâ€, â€œplanâ€, â€œcommitmentâ€ â€œopportunitiesâ€, â€œguidanceâ€, â€œprojectâ€, â€œprogressâ€, â€œexpandâ€, â€œinvestâ€, â€œcontinueâ€, â€œprogressâ€, â€œdevelopâ€, â€œon trackâ€, â€œongoingâ€, â€œestimateâ€, â€œgrowthâ€, â€œpotentialâ€, â€œfutureâ€, â€œextendâ€, â€œwillâ€, â€œcouldâ€, â€œwouldâ€, â€œshouldâ€, â€œmayâ€ and similar expressions identify forward-looking statements. In particular, this press release contains forward-looking statements including, without limitation, with respect to: Barrickâ€™s forward-looking production guidance and our five and ten-year production profiles for gold and copper; projected capital, operating and exploration expenditures; our ability to convert resources into reserves and replace reserves net of depletion from production; the potential for Lumwana to become a Tier One asset and a top 25 copper asset; the potential for Fourmile to become a Tier One asset and world-class gold deposit; anticipated timing for commencement of the pre-feasibility study and development of the Bullion Hill access portal at Fourmile; anticipated increases in mine production capacity as a result of the Lumwana Super Pit expansion; expected financial performance of the Lumwana Super Pit expansion and the Reko Diq project, including forecasted cash flow, capital expenditures, and internal rates of return; timing for construction at Reko Diq and Lumwana and anticipated timing for first production at Reko Diq; mine life and production rates, including anticipated production growth from Barrickâ€™s organic project pipeline; Barrickâ€™s global exploration strategy and planned exploration activities; Barrickâ€™s copper strategy; our plans, and expected timing, completion and benefits of our growth projects; potential mineralization and metal or mineral recoveries; Barrickâ€™s strategy, plans, targets and goals in respect of environmental and social governance issues, including local community relations, economic contributions and education, employment and procurement initiatives, climate change and biodiversity initiatives; Barrickâ€™s talent management strategy; Barrickâ€™s performance dividend policy and share buyback program; and expectations regarding future price assumptions, financial performance and other outlook or guidance. Forward-looking statements are necessarily based upon a number of estimates and assumptions including material estimates and assumptions related to the factors set forth below that, while considered reasonable by the Company as at the date of this press release in light of managementâ€™s experience and perception of current conditions and expected developments, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements and undue reliance should not be placed on such statements and information. Such factors include, but are not limited to: fluctuations in the spot and forward price of gold, copper or certain other commodities (such as silver, diesel fuel, natural gas and electricity); risks associated with projects in the early stages of evaluation and for which additional engineering and other analysis is required; risks related to the possibility that future exploration results will not be consistent with the Companyâ€™s expectations, that quantities or grades of reserves will be diminished, and that resources may not be converted to reserves; risks associated with the fact that certain of the initiatives described in this press release are still in the early stages and may not materialize; changes in mineral production performance, exploitation and exploration successes; risks that exploration data may be incomplete and considerable additional work may be required to complete further evaluation, including but not limited to drilling, engineering and socioeconomic studies and investment; the speculative nature of mineral exploration and development; lack of certainty with respect to foreign legal systems, corruption and other factors that are inconsistent with the rule of law; changes in national and local Â government legislation, taxation, controls or regulations and/or changes in the administration of laws, policies and practices, including the status of value added tax refunds received in Chile in connection with the Pascua-Lama Project; expropriation or nationalization of property and political or economic developments in Canada, the United States, Mali or other countries in which Barrick does or may carry on business in the future; risks relating to political instability in certain of the jurisdictions in which Barrick operates; timing of receipt of, or failure to comply with, necessary permits and approvals; non-renewal of key licenses by governmental authorities; failure to comply with environmental and health and safety laws and regulations; increased costs and physical and transition risks related to climate change, including extreme weather events, resource shortages, emerging policies and increased regulations related to greenhouse gas (â€œGHGâ€) emission levels, energy efficiency and reporting of risks; the Companyâ€™s ability to achieve its sustainability goals, including its climate-related goals and GHG emissions reduction targets, in particular its ability to achieve its Scope 3 emissions targets which require reliance on entities

within Barrickâ€™s value chain, but outside of the Companyâ€™s direct control, to achieve such targets within the specified timeframes; contests over title to properties, particularly title to undeveloped properties, or over access to water, power and other required infrastructure; the liability associated with risks and hazards in the mining industry, and the ability to maintain insurance to cover such losses; damage to the Companyâ€™s reputation due to the actual or perceived occurrence of any number of events, including negative publicity with respect to the Companyâ€™s handling of environmental matters or dealings with community groups, whether true or not; risks related to operations near communities that may regard Barrickâ€™s operations as being detrimental to them; litigation and legal and administrative proceedings; operating or technical difficulties in connection with mining or development activities, including geotechnical challenges, tailings dam and storage facilities failures, and disruptions in the maintenance or provision of required infrastructure and information technology systems; increased costs, delays, suspensions and technical challenges associated with the construction of capital projects; risks associated with working with partners in jointly controlled assets; risks related to disruption of supply routes which may cause delays in construction and mining activities, including disruptions in the supply of key mining inputs due to the invasion of Ukraine by Russia and conflicts in the Middle East; risk of loss due to acts of war, terrorism, sabotage and civil disturbances; risks associated with artisanal and illegal mining; risks associated with Barrickâ€™s infrastructure, information technology systems and the implementation of Barrickâ€™s technological initiatives, including risks related cybersecurity incidents, including those caused by computer viruses, malware, ransomware and other cyberattacks, or similar information technology system failures, delays and/or disruptions; the impact of global liquidity and credit availability on the timing of cash flows and the values of assets and liabilities based on projected future cash flows; the impact of inflation, including global inflationary pressures driven by ongoing global supply chain disruptions, global energy cost increases following the invasion of Ukraine by Russia and country-specific political and economic factors in Argentina; adverse changes in our credit ratings; fluctuations in the currency markets; changes in U.S. dollar interest rates; risks arising from holding derivative instruments (such as credit risk, market liquidity risk and mark-to-market risk); risks related to the demands placed on the Companyâ€™s management, the ability of management to implement its business strategy and enhanced political risk in certain jurisdictions; uncertainty whether some or all of Barrickâ€™s targeted investments and projects will meet the Companyâ€™s capital allocation objectives and internal hurdle rate; whether benefits expected from recent transactions are realized; business opportunities that may be presented to, or pursued by, the Company; our ability to successfully integrate acquisitions or complete divestitures; risks related to competition in the mining industry; employee relations including loss of key employees; availability and increased costs associated with mining inputs and labor; risks associated with diseases, epidemics and pandemics; risks related to the failure of internal controls; and risks related to the impairment of the Companyâ€™s goodwill and assets. In addition, there are risks and hazards associated with the business of mineral exploration, development and mining, including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, flooding and gold bullion, copper cathode or gold or copper concentrate losses (and the risk of inadequate insurance, or inability to obtain insurance, to cover these risks). Many of these uncertainties and contingencies can affect our actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, us. Readers are cautioned that forward-looking statements are not guarantees of future performance. All of the forward-looking statements made in this press release are qualified by these cautionary statements. Specific reference is made to the most recent Form 40-F/ Annual Information Form on file with the SEC and Canadian provincial securities regulatory authorities for a more detailed discussion of some of the factors underlying forward-looking statements and the risks that may affect Barrickâ€™s ability to achieve the expectations set forth in the forward-looking statements contained in this press release. We disclaim any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable law. Â EX-99.2 3 d853431dex992.htm EX-99.2 EX-99.2 Exhibit 99.2 Managementâ€™s Discussion and Analysis (â€œMD&Aâ€)Fourth Quarter and Full Year 2024Managementâ€™s Discussion and Analysis (â€œMD&Aâ€) is intended to help the reader understand Barrick Gold Corporation (â€œBarrickâ€, â€œweâ€, â€œourâ€, the â€œCompanyâ€ or the â€œGroupâ€), our operations, financial performance and the present and future business environment. This MD&A, which has been prepared as of FebruaryÂ 11, 2025, should be read in conjunction with our audited consolidated financial statements (â€œFinancial Statementsâ€) for the year ended DecemberÂ 31, 2024. Unless otherwise indicated, all amounts are presented in U.S. dollars.For the purposes of preparing our MD&A, we consider the materiality of information. Information is considered material if: (i)Â such information results in, or would reasonably be expected to result in, a significant change in the market price or value of our shares; (ii)Â there is a substantial likelihood that a reasonable investor would consider it important in making an investment decision; or (iii)Â it would significantly alter the total mix of information available to investors. We evaluate materiality with reference to all relevant circumstances, including potential market sensitivity.Â Â Â Â Continuous disclosure materials, including our most recent FormÂ 40-F/Annual Information Form, annual MD&A, audited consolidated financial statements, and Notice of Annual Meeting of Shareholders and Proxy Circular will be available on our website at www.barrick.com, on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov. For an explanation of terminology unique to the mining industry, readers should refer to the glossary on page 84.Abbreviations ARK Agbarabo-Rhino-Kombokolo BNL Barrick Niugini Limited Calista Calista Corporation CDCs Community Development Committees CIL Carbon-in-leach Commencement Agreement Detailed Porgera Project Commencement Agreement between PNG and BNL DRC Democratic Republic of the Congo E&S Committee Environmental and Social Oversight Committee ESG & Nominating Committee Environmental, Social, Governance & Nominating Committee ESIA Environmental and Social Impact Assessment GHG Greenhouse Gas GISTM Global Industry Standard for Tailings Management GoT Government of Tanzania ICMM International Council on Mining and Metals ICSID International Centre for the Settlement of Investment Disputes IFRS IFRS Accounting Standards as issued by the International Accounting Standards Board KCD Karagba, Chauffeur and Durba Ktpa Thousand tonnes per annum LTI Lost Time Injury LTIFR Lost Time Injury Frequency Rate LOM Life of Mine Mtpa Million tonnes per annum MVA Megavolt-amperes MW Megawatt NGM Nevada Gold Mines OECD Organisation for Economic Co-operation and Development PJL Porgera Jersey Limited PNG Papua New Guinea Randgold Randgold Resources Limited RC Reverse Circulation RIL Resin-in-leach SDG Sustainable Development Goals TCFD Task Force for Climate-related Financial Disclosures TRIFR Total Recordable Injury Frequency Rate TSF Tailings Storage Facilities TW True Width UNHRC United Nations Human Rights Council VAT Value-Added Tax VMS Volcanogenic Massive Sulfide WGC World Gold Council WTI West Texas Intermediate BARRICK YEAR-END 2024 1 MANAGEMENTâ€™S DISCUSSION AND ANALYSISCautionary Statement on Forward-Looking Information Â Certain information contained or incorporated by reference in this MD&A, including any information as to our strategy, projects, plans or future financial or operating performance, constitutes â€œforward-looking statementsâ€. All statements, other than statements of historical fact, are forward-looking statements. The words â€œbelieveâ€, â€œexpectâ€, â€œanticipatedâ€, â€œvisionâ€, â€œaimâ€, â€œstrategyâ€, â€œtargetâ€, â€œplanâ€, â€œramp-upâ€; â€œopportunitiesâ€, â€œguidanceâ€, â€œforecastâ€, â€œoutlookâ€, â€œobjectiveâ€, â€œintendâ€, â€œprojectâ€, â€œpursueâ€, â€œdevelopâ€, â€œprogressâ€, â€œcontinueâ€, â€œcommittedâ€, â€œbudgetâ€, â€œestimateâ€, â€œpotentialâ€, â€œprospectiveâ€, â€œfutureâ€, â€œfocusâ€, â€œongoingâ€, â€œfollowingâ€, â€œsubject toâ€, â€œscheduledâ€, â€œmayâ€, â€œwillâ€, â€œcanâ€, â€œcouldâ€, â€œwouldâ€, â€œshouldâ€ and similar expressions identify forward-looking statements. In particular, this MD&A contains forward-looking statements including, without limitation, with respect to: Barrickâ€™s forward-looking production guidance; estimates of future cost of sales per ounce for gold and per pound for copper, total cash costs per ounce and C1 cash costs per pound, and all-in-sustaining costs per ounce/pound; cash flow forecasts; projected capital, operating and exploration expenditures; the share buyback program and performance dividend policy, including the criteria for dividend payments; mine life and production rates; projected capital estimates and anticipated development timelines related to the Goldrush Project; our plans, timelines, and expected completion and benefits of our growth projects, including the Goldrush Project, Fourmile, Ren, Donlin Gold, Pueblo Viejo Expansion project, Veladero Phase 7 and Phase 8 Leach Pads, Reko Diq Project, solar power projects at NGM, Loulo-Gounkoto and Kibali, and the Jabal Sayid Lode 1 project and the Lumwana Super Pit Expansion; anticipated production at Goldrush, Ren and Reko Diq; the potential for Lumwana to extend its life of mine through the development of the Super Pit and targeted first production; timing for the advancement of early works, project financing, a final investment decision and first production at Reko Diq; the resumption of operations at Loulo-Gounkoto; the status of negotiations with the Government of Mali in respect of ongoing disputes regarding the Loulo-Gounkoto Complex, including the status of the gold stock removed from site and the outcome of dispute resolution through arbitration; capital expenditures related to upgrades and ongoing management initiatives; Barrickâ€™s global exploration strategy and planned exploration activities; our pipeline of high confidence projects at or near existing operations; potential mineralization and metal or mineral recoveries; our ability to convert resources into reserves and future reserve replacement; asset sales, joint ventures and partnerships; Barrickâ€™s strategy, plans, targets and goals in respect of environmental and social governance issues, including climate change, GHG reduction targets (including with respect to our Scope 3 emissions and our reliance on our value chain to help us achieve these targets within the specified time frames), safety performance, TSF management, including Barrickâ€™s conformance with the GISTM, community development, responsible water use, biodiversity and human rights initiatives; Barrickâ€™s engagement with local communities; and expectations regarding future price assumptions, financial performance and other outlook or guidance. Forward-looking statements are necessarily based upon a number of estimates and assumptions including material estimates and assumptions related to the factors set forth below that, while considered reasonable by the Company as at the date of this MD&A in light of managementâ€™s experience and perception of current conditions and expected developments, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements and undue reliance should not be placed on such statements and information. Such factors include, but are not limited to: fluctuations in the spot and forward price of gold, copper or certain other commodities (such as silver, diesel fuel, natural gas and electricity); risks associated with projects in the early stages of evaluation and for which additional engineering and other analysis is required; risks related to the possibility that future exploration results will not be consistent with the Companyâ€™s expectations, that quantities or grades of reserves will be diminished, and that resources may not be converted to reserves; risks associated with the fact that certain of the initiatives described in this MD&A are still in the early stages and may not materialize; changes in mineral production performance, exploitation and exploration successes; risks that exploration data may be incomplete and considerable additional work may be required to complete further evaluation, including but not limited to drilling, engineering and socioeconomic studies and investment; the speculative nature of mineral exploration and development; lack of certainty with respect to foreign legal systems, corruption and other factors that are inconsistent with the rule of law; changes in national and local government legislation, taxation, controls or regulations and/or changes in the administration of laws, policies and practices, including the status of VAT refunds received in Chile in connection with the Pascua-Lama project; expropriation or nationalization of property and political or economic developments in Canada, the United States, Mali or other countries in which Barrick does or may carry on business in the future; risks relating to political instability in certain of the jurisdictions in which Barrick operates; timing of receipt of, or failure to comply with, necessary permits and approvals; non-renewal of key licenses by governmental authorities; failure to comply with environmental and health and safety laws and regulations; increased costs and physical and transition risks related to climate change, including extreme weather events, resource shortages, emerging policies and increased regulations related to GHG emission levels, energy efficiency and reporting of risks; the Companyâ€™s ability to achieve its sustainability goals, including its climate-related goals and GHG emissions reduction targets, in particular its ability to achieve its Scope 3 emissions targets which require reliance on entities within Barrickâ€™s value chain, but outside of the Companyâ€™s direct control, to achieve such targets within the specified time frames; contests over title to properties, particularly title to undeveloped properties, or over access to water, power and other required infrastructure; the liability associated with risks and hazards in the mining industry, and the ability to maintain insurance to cover such losses; damage to the Companyâ€™s reputation due to the actual or perceived occurrence of any number of events, including negative publicity with respect to the Companyâ€™s handling of environmental matters or dealings BARRICK YEAR-END 2024 2 MANAGEMENTâ€™S DISCUSSION AND ANALYSISwith community groups, whether true or not; risks related to operations near communities that may regard Barrickâ€™s operations as being detrimental to them; litigation and legal and administrative proceedings; operating or technical difficulties in connection with mining or development activities, including geotechnical challenges, tailings dam and storage facilities failures, and disruptions in the maintenance or provision of required infrastructure and information technology systems; increased costs, delays, suspensions and technical challenges associated with the construction of capital projects; risks associated with working with partners in jointly controlled assets; risks related to disruption of supply routes which may cause delays in construction and mining activities, including disruptions in the supply of key mining inputs due to the invasion of Ukraine by Russia and conflicts in the Middle East; risk of loss due to acts of war, terrorism, sabotage and civil disturbances; risks associated with artisanal and illegal mining; risks associated with Barrickâ€™s infrastructure, information technology systems and the implementation of Barrickâ€™s technological initiatives, including risks related to cybersecurity incidents, including those caused by computer viruses, malware, ransomware and other cyberattacks, or similar information technology system failures, delays and/or disruptions; the impact of global liquidity and credit availability on the timing of cash flows and the values of assets and liabilities based on projected future cash flows; the impact of inflation, including global inflationary pressures driven by ongoing global supply chain disruptions, global energy cost increases following the invasion of Ukraine by Russia and country-specific political and economic factors in Argentina; adverse changes in our credit ratings; fluctuations in the currency markets; changes in U.S. dollar interest rates; risks arising from holding derivative instruments (such as credit risk, market liquidity risk and mark-to-market risk); risks related to the demands placed on the Companyâ€™s management, the ability of management to implement its business strategy and enhanced political risk in certain jurisdictions; uncertainty whether some or all of Barrick's targeted investments and projects will meet the Companyâ€™s capital allocation objectives and internal hurdle rate; whether benefits expected from recent transactions are realized; business opportunities that may be presented to, or pursued by, the Company; our ability to successfully integrate acquisitions or complete divestitures; risks related to competition in the mining industry; employee relations including loss of key employees; availability and increased costs associated with mining inputs and labor; risks associated with diseases, epidemics and pandemics; risks related to the failure of internal controls; and risks related to the impairment of the Companyâ€™s goodwill and assets. In addition, there are risks and hazards associated with the business of mineral exploration, development and mining, including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, flooding and gold bullion, copper cathode or gold or copper concentrate losses (and the risk of inadequate insurance, or inability to obtain insurance, to cover these risks).Many of these uncertainties and contingencies can affect our actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, us. Readers are cautioned that forward-looking statements are not guarantees of future performance. All of the forward-looking statements made in this MD&A are qualified by these cautionary statements. Specific reference is made to the most recent Form 40-F/Annual Information Form on file with the SEC and Canadian provincial securities regulatory authorities for a more detailed discussion of some of the factors underlying forward-looking statements and the risks that may affect Barrickâ€™s ability to achieve the expectations set forth in the forward-looking statements contained in this MD&A. We disclaim any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable law.Use of Non-GAAP Financial Measures We use the following non-GAAP financial measures and ratios in our MD&A:â– â€œadjusted net earningsâ€â– â€œfree cash flowâ€â– â€œEBITDAâ€â– â€œadjusted EBITDAâ€â– â€œattributable EBITDAâ€â– â€œattributable EBITDA marginâ€â– â€œnet leverageâ€â– â€œminesite sustaining capital expendituresâ€â– â€œproject capital expendituresâ€â– â€œtotal cash costs per ounceâ€â– â€œC1 cash costs per poundâ€â– â€œall-in sustaining costs per ounce/poundâ€ andâ– â€œrealized priceâ€For a detailed description of each of the non-GAAP financial measures used in this MD&A and a detailed reconciliation to the most directly comparable measure under IFRS, please refer to the Non-GAAP Financial Measures section of this MD&A on pages 59 to 75. Each non-GAAP financial measure has been annotated with a reference to an endnote on page 76. The non-GAAP financial measures set out in this MD&A are intended to provide additional information to investors and do not have any standardized meaning under IFRS, and therefore may not be comparable to other issuers, and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS.Changes in Presentation of Non-GAAP Financial Performance MeasuresNet LeverageStarting with our Q2 2024 MD&A, we are presenting net leverage as a non-GAAP ratio. It is calculated as debt, net of cash divided by the sum of adjusted EBITDA of the last four consecutive quarters. We believe this ratio will assist analysts, investors and other stakeholders of Barrick in monitoring our leverage and evaluating our balance sheet. Overview

Our Vision

We strive to be the worldâ€™s most valued gold and copper company by owning the best assets, managed by the best people, to deliver the best returns and benefits for all our stakeholders.

Our Business

Barrick is a sector-leading gold and copper producer with annual gold production and gold reserves that are among the highest in the industry. We are principally engaged in the production and sale of gold and copper, as well as related activities such as exploration and mine development. We hold ownership interests in twelve producing gold mines and three producing copper mines. This includes six Tier One Gold Assets1, two Tier One Copper Projects3 and a diversified exploration portfolio positioned for growth in many of the worldâ€™s most prolific gold districts. Our twelve producing gold mines are geographically diversified and are located in Argentina, Canada, CÃ´te dâ€™Ivoire, the Democratic Republic of Congo, the Dominican Republic, Papua New Guinea, Tanzania and the United States. Our mine in Mali was placed on temporary suspension in January 2025 (refer to page 9 for more information). Our three producing copper mines are located in Zambia, Chile and Saudi Arabia and we have a greenfield project in Pakistan. Our exploration and other development projects are located throughout the world, including the Americas, Asia and Africa. We sell our production in the world market through the following distribution channels: gold bullion is sold in the gold spot market or to independent refineries; gold and copper concentrate is sold to independent smelting or trading companies; and copper cathode is sold to third-party purchasers or on an exchange. Barrick shares trade on the New York Stock Exchange under the symbol GOLD and the Toronto Stock Exchange under the symbol ABX.

2024 REVENUE ($ millions)

Our Strategy

Our strategy is to operate as business owners by attracting and developing world-class people who understand and are involved in the value chain of the business, act with integrity and are tireless in their pursuit of excellence. We are focused on returns to our stakeholders by optimizing free cash flow, managing risk to create long-term value for our shareholders and partnering with host governments and our local communities to transform their countryâ€™s natural resources into sustainable benefits and mutual prosperity. We aim to achieve this through the following:

1Asset Qualityâ– Grow and invest in a portfolio of Tier One Gold Assets1, Tier Two Gold Assets2, Tier One Copper Assets/Projects3 and Strategic Assets4 with an emphasis on organic growth to leverage our existing footprint located in world-class geological districts. We will focus our efforts on identifying, investing in and developing assets that meet our investment criteria. The required return on Tier One1,3 capital investments is 15%, adjusting to 10% return on long-life (20+ year) investments with exposure to multiple commodity cycles. The required return on investment for Tier Two Gold Assets2 is 20%.â– Invest in exploration across extensive land positions in many of the worldâ€™s most prolific gold and copper districts.â– Maximize the long-term value of our strategic Copper Business5. â– Sell non-core assets over time in a disciplined manner.

Operational Excellenceâ– Strive for zero harm workplaces.â– Operate a flat management structure with a strong ownership culture. â– Streamline management and operations, and hold management accountable for the businesses they manage. â– Leverage innovation and technology to drive industry-leading efficiencies. â– Build trust-based partnerships with our host governments, business partners, and local communities to drive shared long-term value.

Sustainable Profitabilityâ– Follow a disciplined approach to growth and proactively manage our impacts on the wider environment, emphasizing long-term value for all stakeholders. â– Increase returns to shareholders, driven by a focus on return on capital, internal rate of return and free cash flow6.1 Numerical annotations throughout the text of this document refer to the endnotes found on page 76.

Factors affecting net earnings and adjusted net earnings6 - Q4 2024 versus Q3 2024

Net earnings for Q4 2024 were $996 million compared to $483 million in Q3 2024. The increase was primarily due to the following items:â– a long-lived asset impairment reversal of $655 million at Lumwana as a result of the inclusion of the Super Pit Expansion in the LOM plan and higher copper prices; andâ– a long-lived asset impairment reversal of $437 million at Veladero reflecting higher gold prices, extended mine life and lower country risk; partially offset byâ– a goodwill impairment at Loulo-Gounkoto of $484 million (refer to Key Business Developments on page 9; and â– other expense adjustments of $113 million in Q4 2024 which mainly related to a payment to the Government of Mali to advance negotiations and a customs and royalty settlement at Tongon.

After adjusting for items that are not indicative of future operating earnings, adjusted net earnings6 of $794 million for Q4 2024 was $265 million higher than Q3 2024 mainly due to a higher realized gold price6 and a decrease in both gold cost of sales per ounce7 and copper cost of sales per pound7. These impacts were slightly offset by a decrease in the realized copper price6. The realized gold price6 was $2,657 per ounce for Q4 2024, compared to $2,494 per ounce in Q3 2024, while the realized copper price6 decreased to $3.96 per pound from $4.27 per pound in Q3 2024. The decrease in gold cost of sales per ounce7 was mainly due to the changes in sales mix across the portfolio partially offset by higher royalties due to an increase in the realized gold price6 ($9/oz impact), while the lower copper cost of sales per pound7 was primarily due to higher grades processed, higher recoveries and the benefit of diluting the fixed costs over more production at Lumwana. Notwithstanding the higher production, gold sales volumes were slightly lower than Q3 2024 reflecting the restrictions placed by the Government of Mali during Q4 2024 on our ability to ship and sell gold from Loulo-Gounkoto, partially offset by higher gold production and sales across the rest of the portfolio. Adjusted net earnings6 would have been higher still in the absence of these restrictions.

Refer to page 59 for a full list of reconciling items between net earnings and adjusted net earnings6 for the current and previous periods.

Factors affecting net earnings and adjusted net earnings6 - 2024 versus 2023

Net earnings for the year ended DecemberÂ 31, 2024 were $2,144 million compared to $1,272 million in the prior year. The increase was primarily due to:â– long-lived asset impairment reversals of $655 million at Lumwana and $437 million at Veladero, partially offset by a goodwill impairment at Loulo-Gounkoto of $484 million, as described above; â– the removal of significant tax adjustments of $220 million occurring in 2023, related to deferred tax recoveries as a result of net impairment charges; foreign currency translation gains and losses on tax balances; the resolution of uncertain tax positions; the impact of prior year adjustments; the impact of nondeductible foreign exchange losses; and the recognition and derecognition of deferred tax assets; andâ– a long-lived asset impairment of $280 million at Long Canyon occurring in 2023; partially offset byâ– a gain of $352Â million related to the reopening of the Porgera mine, occurring in 2023; andâ– other expense adjustments of $249Â million in 2024 which mainly related to a payment to the Government of Mali to advance negotiations; a customs and royalty settlement at Tongon; interest and penalties recognized relating to the settlement of the ZaldÃvar Tax Assessments in Chile; a provision made relating to a legacy mine site operated by Homestake Mining Company that was closed prior to the 2001 acquisition by Barrick, and an accrual relating to the road construction in Tanzania per our community investment obligations under the Twiga partnership.

After adjusting for items that are not indicative of future operating earnings, adjusted net earnings6 of $2,213 million for the year ended DecemberÂ 31, 2024 was $746 million higher than 2023. This result for 2024 was the highest adjusted net earnings6 since 2013. The increase in adjusted net earnings6 relative to 2023 was primarily due to a higher realized gold price6, partially offset by an increase in gold cost of sales per ounce7 and lower gold sales volumes. The realized gold price6 was $2,397 per ounce in 2024 compared to $1,948 per ounce in 2023. The increase in gold cost of sales per ounce7 was primarily due to lower production across the portfolio (resulting in reduced fixed cost dilution) together with higher electricity consumption, plant maintenance costs, and gas prices at Pueblo Viejo; lower grades processed and lower recoveries at Carlin; and higher royalties across all sites due to the increase in the realized gold price6 ($23/oz impact). Lower gold sales volumes were largely driven by Cortez and Carlin. At Cortez, this was due to lower leach ore mined at the Crossroads open pit and lower oxide ore mined from Cortez Hills underground, in line with the mine sequence, and at Carlin due to lower grades processed, lower recoveries and the reduction in open pit tonnes mined. These impacts were combined with the restrictions placed by the Government of Mali during Q4 2024 on our ability to ship and sell gold at Loulo-Gounkoto, partially offset by increased production and sales at Porgera following the ramp-up of operations in 2024.

Refer to page 59 for a full list of reconciling items between net earnings and adjusted net earnings6 for the current and previous periods.

Factors affecting operating cash flow and free cash flow6 - Q4 2024 versus Q3 2024

In Q4 2024, we generated $1,392 million in operating cash flow, compared to $1,180 million in Q3 2024. The increase of $212 million was primarily due to a higher realized gold price6 and a decrease in both gold total cash costs per ounce6 and copper C1 cash costs per pound6. These impacts were slightly offset by a decrease in the realized copper price6. Operating cash flow was further impacted by a favorable working capital movement, mainly in accounts receivable and accounts payable. These results were partially offset by an increase in cash taxes paid and higher interest paid as a result of the timing of semi-annual interest payments on our bonds, which primarily occur in the second and fourth quarters. Operating cash flow in Q4 2024 was also negatively impacted by the restrictions placed by

the Government of Mali on our ability to ship and sell gold (for more detail, refer to note 35 of the Financial Statements). Free cash flow6 for Q4 2024 was $501 million, compared to $444 million in Q3 2024, reflecting higher operating cash flows, partially offset by higher capital expenditures. In Q4 2024, capital expenditures on a cash basis were $891 million compared to $736 million in Q3 2024 primarily due to higher project capital expenditures6 including down payments on the order of long lead items for the Lumwana Super Pit Expansion project, which includes the mining fleet.

Factors affecting operating cash flow and free cash flow6 - 2024 versus 2023

For the year ended DecemberÂ 31, 2024, we generated $4,491 million in operating cash flow, compared to $3,732 million in the prior year. The increase of $759 million was primarily due to a higher realized gold price6, partially offset by lower gold sales volumes and an increase in gold total cash costs per ounce6. Operating cash flow was further impacted by higher cash taxes paid relative to 2023. Operating cash flow in 2024 was also negatively impacted by the restrictions placed by the Government of Mali on our ability to ship and sell gold (for more detail, refer to note 35 of the Financial Statements).

For 2024, we generated free cash flow6 of $1,317 million compared to $646 million in the prior year. The increase primarily reflects higher operating cash flows, slightly offset by higher capital expenditures. In 2024, capital expenditures on a cash basis were $3,174 million compared to $3,086 million in the prior year, mainly due to higher minesite sustaining capital expenditures6, partially offset by lower project capital expenditures6. Higher minesite capital expenditures6 were driven by increased capitalized stripping at Lumwana and the purchase of the Komatsu-930 truck fleet at Carlin. Project capital expenditures6 were lower as the Pueblo Viejo plant expansion project and TS Solar Project at NGM were substantially completed in 2023, partially offset by early works expenditure at Reko Diq and the down payments on the order of long lead items for the Lumwana Super Pit Expansion project, which includes the mining fleet.

Key Business Developments

Loulo-Gounkoto Temporary Shutdown

The Company and the Government of Mali have been engaged in an ongoing dispute in connection with the existing mining conventions of SociÃ©tÃ© des Mines de Loulo SA (â€œSomiloâ€) and SociÃ©tÃ© des Mines de Gounkoto (â€œGounkotoâ€) (together, the â€œConventionsâ€). On December 18, 2024, after multiple good faith attempts to resolve the dispute, Somilo and Gounkoto submitted a request for arbitration to ICSID in accordance with the provisions of their respective Conventions. On January 14, 2025, due to the restrictions imposed by the Government of Mali on gold shipments, the Company announced that the Loulo-Gounkoto complex would temporarily suspend operations.As described in note 21 of the Financial Statements, we recorded a goodwill impairment of $484 million in Q4 2024. For more information, refer to note 35 of the Financial Statements.

Share Buyback Program

At the February 11, 2025 meeting, the Board of Directors authorized a new share buyback program for the purchase of up to $1 billion of Barrickâ€™s outstanding common shares over the next 12 months. Barrick repurchased $498 million of shares in 2024 under its prior share buyback program, which was announced on February 14, 2024, and terminated in connection with the new program. The actual number of common shares that may be purchased, and the timing of any such purchases, will be determined by Barrick based on a number of factors, including the Companyâ€™s financial performance,

the availability of cash flows, and the consideration of other uses of cash, including capital investment opportunities, returns to shareholders, and debt reduction. The repurchase program does not obligate the Company to acquire any particular number of common shares, and the repurchase program may be suspended or discontinued at any time at the Companyâ€™s discretion.Nevada Gold Mines Management ChangeOn August 9, 2024, Henri Gonin was appointed Managing Director for Nevada Gold Mines, succeeding Peter Richardson, the former Executive Managing Director, Nevada Gold Mines, who departed from Barrick at the end of Q2 2024. Mr. Gonin has over 30 years of experience in the mining industry, including 13 years working for Barrick in Nevada where he most recently held the role of Head of Operations for Nevada Gold Mines. Mr Gonin will work with Christine Keener, Chief Operating Officer, North America, and Mark Bristow, Barrickâ€™s President and Chief Executive Officer and the Chairman of Nevada Gold Mines, as we plan for the next phase of Nevada Gold Minesâ€™ development. BARRICK YEAR-END 2024 9 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSOutlook for 2025 Operating Division GuidanceOur 2024 actual gold and copper production, cost of sales, total cash costs6, all-in sustaining costs6 and 2025 forecast gold and copper production, cost of sales, total cash costs6 and all-in sustaining costs6 ranges by operating division are as follows:Â Operating Division 2024 attributable production (000s ozs) 2024 cost of salesa($/oz) 2024 total cash costsb ($/oz) 2024 all-in sustaining costsb ($/oz) 2025 forecast attributable production (000s ozs) 2025 forecast cost of salesa ($/oz) 2025 forecast total cash costsb ($/oz) 2025 forecast all-in sustaining costsb ($/oz) Gold Carlin (61.5%) 775 1,429 1,187 1,730 705 - 785 1,470 - 1,570 1,140 - 1,220 1,630 - 1,730 Cortez (61.5%)c 444 1,402 1,046 1,441 420 - 470 1,420 - 1,520 1,050 - 1,130 1,370 - 1,470 Turquoise Ridge (61.5%) 304 1,615 1,238 1,466 310 - 345 1,370 - 1,470 1,000 - 1,080 1,260 - 1,360 Phoenix (61.5%) 127 1,687 765 1,031 85 - 105 2,070 - 2,170 890 - 970 1,240 - 1,340 Nevada Gold Mines (61.5%) 1,650 1,478 1,126 1,561 1,540 - 1,700 1,470 - 1,570 1,070 - 1,150 1,460 - 1,560 Hemlo 143 1,754 1,483 1,769 140 - 160 1,500 - 1,600 1,200 - 1,280 1,600 - 1,700 North America 1,793 1,500 1,155 1,578 1,680 - 1,860 1,470 - 1,570 1,080 - 1,160 1,480 - 1,580 Pueblo Viejo (60%) 352 1,576 1,005 1,323 370 - 410 1,540 - 1,640 910 - 990 1,280 - 1,380 Veladero (50%) 252 1,254 905 1,334 190 - 220 1,390 - 1,490 890 - 970 1,570 - 1,670 Porgera (24.5%) 46 1,423 1,073 1,666 70 - 95 1,510 - 1,610 1,210 - 1,290 1,770 - 1,870 Latin America & Asia Pacific 650 1,434 969 1,350 630 - 730 1,490 - 1,590 940 - 1,020 1,430 - 1,530 Loulo-Gounkoto (80%)d 578 1,218 828 1,304 â€” â€” â€” â€” Kibali (45%) 309 1,344 905 1,123 310 - 340 1,280 - 1,380 940 - 1,020 1,130 - 1,230 North Mara (84%) 265 1,266 989 1,274 230 - 260 1,370 - 1,470 1,020 - 1,100 1,400 - 1,500 Bulyanhulu (84%) 168 1,509 1,070 1,420 150 - 180 1,470 - 1,570 1,010 - 1,090 1,540 - 1,640 Tongon (89.7%) 148 1,903 1,670 1,867 110 - 140 1,790 - 1,890 1,570 - 1,650 1,660 - 1,760 Africa and Middle East 1,468 1,368 1,000 1,333 820 - 910 1,420 - 1,520 1,060 - 1,140 1,360 - 1,460 Total Attributable to Barricke,f,g 3,911 1,442 1,065 1,484 3,150 - 3,500 1,460 - 1,560 1,050 - 1,130 1,460 - 1,560 Â 2024 attributable production (000s tonnes) 2024 cost of salesa($/lb) 2024 C1 cash costsb ($/lb) 2024 all-in sustaining costsb($/lb) 2025 forecast attributable production(000s tonnes) 2025 forecast cost of salesa($/lb) 2025 forecast C1 cash costsb ($/lb) 2025 forecast all-in sustaining costsb ($/lb) Copper Lumwana 123 2.94 2.23 3.85 125 - 155 2.30 - 2.60 1.60 - 1.90 2.80 - 3.10 ZaldÃvar (50%) 40 4.09 3.04 3.58 40 - 45 3.60 - 3.90 2.70 - 3.00 3.50 - 3.80 Jabal Sayid (50%) 32 1.77 1.37 1.56 25 - 35 2.00 - 2.30 1.60 - 1.90 1.80 - 2.10 Total Coppere,f,g 195 2.99 2.26 3.45 200 - 230 2.50 - 2.80 1.80 - 2.10 2.80 - 3.10a.Gold cost of sales per ounce is calculated as cost of sales across our gold operations (excluding sites in closure or care and maintenance) divided by ounces sold (both on an attributable basis using Barrickâ€™s ownership share). Copper cost of sales per pound is calculated as cost of sales across our copper operations divided by pounds sold (both on an attributable basis using Barrickâ€™s ownership share). b.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.c.Includes Goldrush. d.As a result of the temporary suspension of operations at Loulo-Gounkoto, we have excluded Loulo-Gounkoto from our 2025 production guidance (refer to page 9 for more information). We expect to update our guidance to include Loulo-Gounkoto when we have greater certainty regarding the timing for the restart of operations.e.Total cash costs and all-in sustaining costs per ounce include costs allocated to non-operating sites.f.Operating division guidance ranges reflect expectations at each individual operating division, and may not add up to the company-wide guidance range total. g.Includes corporate administration costs. BARRICK YEAR-END 2024 10 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSOperating Division, Consolidated Expense and Capital GuidanceOur 2024 actual gold and copper production, cost of sales, total cash costs6, all-in sustaining costs6, consolidated expenses and capital expenditures and 2025 forecast gold and copper production, cost of sales, total cash costs6, all-in sustaining costs6, consolidated expenses and capital expenditures are as follows:Â ($Â millions,Â exceptÂ perÂ ounce/poundÂ data) 2024 Guidancea 2024 Actual 2025 Guidancea Gold production Production (millions of ounces) 3.90 - 4.30 3.91 3.15 - 3.50 Gold cost metrics Cost of sales - gold ($ per oz) 1,320 - 1,420 1,442 1,460 - 1,560 Â Total cash costs ($ per oz)b 940 - 1,020 1,065 1,050 - 1,130 Depreciation ($ per oz) 340 - 370 336 370 - 400 Â All-in sustaining costs ($ per oz)b 1,320 - 1,420 1,484 1,460 - 1,560 Copper production Production (thousands of tonnes) 180 - 210 195 200 - 230 Copper cost metrics Cost of sales - copper ($ per lb) 2.65 - 2.95 2.99 2.50 - 2.80 Â C1 cash costs ($ per lb)b 2.00 - 2.30 2.26 1.80 - 2.10 Depreciation ($ per lb) 0.90 - 1.00 0.91 0.75 - 0.85 Â All-in sustaining costs ($Â perÂ lb)b 3.10 - 3.40 3.45 2.80 - 3.10 Exploration and project expenses 400 - 440 392 330 - 370 Exploration and evaluation 180 - 200 190 220 - 240 Project expenses 220 - 240 202 110 - 130 General and administrative expenses ~180 115 ~160 Corporate administration ~130 95 ~120 Â Stock-based compensationc ~50 20 ~40 Other expense (income) 70 - 90 214 70 - 90 Finance costs, net 260 - 300 232 270 - 310 Attributable capital expendituresd Attributable minesite sustainingb,d 1,550 - 1,750 1,773 1,400 - 1,650 Attributable projectb,d 950 - 1,150 804 1,700 - 1,950 Total attributable capital expendituresd 2,500 - 2,900 2,607 3,100 - 3,600 a.As a result of the temporary suspension of operations at Loulo-Gounkoto, we have excluded Loulo-Gounkoto from our 2025 production guidance (refer to page 9 for more information). We expect to update our guidance to include Loulo-Gounkoto when we have greater certainty regarding the timing for the restart of operations. Guidance ranges also exclude Long Canyon which is producing incidental ounces from the leach pad while in closure. b.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.c.2024 actual results are based on a US$15.71 share price and 2025 guidance is based on a one-month trailing average ending DecemberÂ 31, 2024 of US$16.39 per share.d.Attributable capital expenditures are presented on the same basis as guidance, which includes our 61.5% share of NGM, our 60% share of Pueblo Viejo, our 80% share of Loulo-Gounkoto, our 89.7% share of Tongon, our 84% share of North Mara and Bulyanhulu, our 45% share of Kibali, our 50% share of ZaldÃvar, Jabal Sayid, and our 24.5% share of Porgera. Total attributable capital expenditures for 2024 actual results also includes capitalized interest of $30 million. 2025 Guidance AnalysisEstimates of future production, cost of sales per ounce7, total cash costs per ounce6 and all-in sustaining costs per ounce6 presented in this MD&A are based on mine plans that reflect the expected method by which we will mine reserves at each site. Actual gold and copper production and associated costs may vary from these estimates due to a number of operational and non-operational risk factors (see the â€œCautionary Statement on Forward-Looking Informationâ€ on page 2 of this MD&A for a description of certain risk factors that could cause actual results to differ materially from these estimates). Gold ProductionAs a result of the temporary suspension of operations at Loulo-Gounkoto, we have excluded Loulo-Gounkoto from our 2025 production guidance (refer to page 9 for more information). We expect to update our guidance to include Loulo-Gounkoto when we have greater certainty regarding the timing for the restart of operations.Excluding Loulo-Gounkoto, we expect 2025 gold production to be in the range of 3.15 to 3.5Â million ounces, compared to our actual 2024 gold production of 3.91 million ounces (or 3.33 million ounces on a like for like basis if Loulo-Gounkoto is excluded from 2024). We expect Pueblo Viejo, Turquoise Ridge, Porgera and Kibali to deliver higher year-over-year performances, together with stable delivery across Carlin and Cortez. At Veladero and Phoenix, we expect 2025 production to be lower than 2024. Across the four quarters of 2025, the Companyâ€™s gold production is expected to be the lowest in Q1 (between 700-750koz) and highest in Q4 due to the timing of shutdowns, the Goldrush ramp-up and mine sequencing across the NGM sites, the 35 day shutdown for de-bottlenecking work needed at Pueblo Viejo in Q1 as previously disclosed, and grade variability at Kibali driven by the mine plan. This trend is partially offset by Veladero and North Mara where production is slightly weighted to the first half of the year. This is expected to result in an approximately 46% / 54% split of the Companyâ€™s total gold production between the first half and second half of the BARRICK YEAR-END 2024 11 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSyear, respectively. We expect to update the above commentary when we have greater certainty regarding the timing for the restart of operations at Loulo-Gounkoto.Gold Cost of Sales per Ounce7Loulo-Gounkoto has also been removed from our 2025 cost guidance for the reasons referred to above. On a per ounce basis, cost of sales applicable to gold7, after removing the portion related to non-controlling interests, is expected to be in the range of $1,460 to $1,560 per ounce in 2025, compared to the 2024 actual result of $1,442 per ounce.Costs are expected to be marginally higher than 2024 which is a combination of higher depreciation and the impact of higher costs at certain operations as described further in the Gold Total Cash Costs per Ounce6 section immediately below. Gold Total Cash Costs per Ounce6Total cash costs per ounce6 in 2025 are expected to be in the range of $1,050 to $1,130 per ounce, compared to the 2024 actual result of $1,065 per ounce. In North America, our 2025 guidance for total cash costs per ounce6 for NGM of $1,070 to $1,150 per ounce compares to the 2024 actual result of $1,126 per ounce. Lower unit costs at Turquoise Ridge driven by the higher expected production volumes are partially offset by higher costs at Phoenix, which are in turn driven by lower production volumes, producing a relatively consistent outcome relative to 2024.In Latin America & Asia Pacific, total cash costs per ounce6 at Pueblo Viejo are expected to be lower compared to 2024, driven by higher production.For Africa and Middle East (excluding Loulo-Gounkoto for the reasons described above), total cash costs per ounce6 are expected to be $1,060 to $1,140 per ounce, which is an increase compared to 2024 mainly driven by higher costs at Kibali following the introduction of new duties which includes a customs duty of 3% relating to gold exports pursuant to the new finance law enacted in the DRC (refer to page 33 for more details).Gold All-In Sustaining Costs per Ounce6All-in sustaining costs per ounce6 in 2025 are expected to be in the range of $1,460 to $1,560 per ounce, compared to the 2024 actual result of $1,484 per ounce. This is based on the expectation that minesite sustaining capital expenditures6 on a per ounce basis will be slightly higher than 2024 (refer to Capital Expenditures commentary below for further detail).Copper Production and CostsWe expect 2025 copper production to be in the range of 200 to 230 thousand tonnes, compared to actual production of 195 thousand tonnes in 2024. Production is expected to be more evenly spread over the last three quarters with Q1 being the lowest quarter of the year mainly driven by grade at Lumwana as per the mine plan.In 2025, cost of sales applicable to copper7 is expected to be in the range of $2.50 to $2.80 per pound, which compares to the actual result of $2.99 per pound for 2024. C1 cash costs per pound6 guidance of $1.80 to $2.10 per pound for 2025 compares to the 2024 actual result of $2.26 per pound, mainly driven by lower costs at Lumwana resulting from higher production and operating efficiencies partially offset by higher costs at Jabal Sayid. Copper all-in sustaining costs per pound6 guidance of $2.80 to $3.10 for 2025 compares to the actual result of $3.45 in 2024.Exploration and Project ExpensesWe expect to incur approximately $330 to $370 million of exploration and project expenses in 2025. This is lower than our 2024 guidance range, and lower than the 2024 actual result of $392 million as detailed below.Within this range, we expect our exploration and evaluation expenditures in 2025 to be approximately $220 to $240 million. This is higher than the 2024 actual result of $190 million driven by an increase in spending at Barrickâ€™s 100% owned Fourmile project where we expect to spend $75 to $85 million for the 2025 year. This spend on exploration and evaluation expenditures will continue to support our resource and reserve conversion over the coming years continuing our record of replacing the reserves we mine.We also expect to incur approximately $110 to $130 million of project expenses in 2025, compared to $202 million in 2024. The key driver of this decrease is that following the completion of the feasibility study update for the Reko Diq project in Pakistan, future amounts spent on the project will be capitalized. The expected expenditure for 2025 relates to Donlin, Pascua-Lama as well as project evaluation costs across the rest of the portfolio, particularly in the Latin America & Asia Pacific region. General and Administrative ExpensesIn 2025, we expect corporate administration costs to be approximately $120 million given our track record over the last six years of consistently delivering costs below the guidance. Separately, stock-based compensation expense in 2025 is expected to be approximately $40 million based on a share price assumption of $16.39 noting that the actual outcome will be impacted by the share price movements over the course of the 2025 year.Finance Costs, NetIn 2025, our guidance range for net finance costs of $270 to $310 million primarily represents interest expense on long-term debt, non-cash interest expense relating to the gold and silver streaming agreements at Pueblo Viejo, and accretion, net of finance income. This guidance for 2025 is higher than the actual result for 2024 of $232 million, and reflects our expectation that market interest rates will on average be lower relative to 2024, translating to lower interest income earned on our cash balance. Interest expense incurred on our bonds is at a fixed rate and consequently does not change with market interest rates.Capital ExpendituresTotal attributable gold and copper capital expenditures for 2025 are expected to be in the range of $3,100 to $3,600 million excluding Loulo-Gounkoto. This is higher than the actual spend for the 2024 year of $2,607 million driven by the advancement of the Lumwana Super Pit Expansion project and our expectation that the Reko Diq project will also proceed into execution once the project financing has closed. Inclusive of these two major projects, we expect attributable project capital expenditures6 to be in the range of $1,700 to $1,950 million in 2025, which is higher than our actual expenditures of $804 million in 2024.Â Across the Companyâ€™s gold assets, the material growth projects relate to the new Naranjo tailings facility at Pueblo Viejo (around BARRICK YEAR-END 2024 12 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS$200 million spend in 2025), the Goldrush ramp-up at Cortez and the Ren project at Carlin. Attributable minesite sustaining capital expenditures6 for 2025 are expected to be in the range of $1,400 to $1,650 million, which compares to the actual spend for 2024 of $1,773 million. The guidance range for 2025 is split between our gold assets excluding Loulo-Gounkoto ($1,100 to $1,300 million) and copper assets ($300 to $350 million). Compared to the prior year, minesite sustaining capital expenditures6 in 2025 are expected to be approximately $50 million lower across the Companyâ€™s gold assets, with most of this due to the exclusion of Loulo-Gounkoto. In addition to this, minesite sustaining capital expenditures6 are expected to be higher at Veladero due to increased capitalized stripping and at Pueblo Viejo due to higher expenditure on the existing Llagal tailings facility. Minesite sustaining capital expenditures6 at NGM are expected to be approximately $60 million lower compared to 2024.Effective Income Tax RateBased on a gold price assumption of $2,400/oz, our expected effective tax rate range for 2025 is 26% to 30%. The rate is sensitive to the relative proportion of sales in high versus low tax jurisdictions, realized gold and copper prices, the proportion of income from our equity accounted investments and the level of non-tax affected costs in countries where we generate net losses. Â Outlook Assumptions and Economic Sensitivity Analysis Â Â 2025 Guidance Assumption Hypothetical Change Consolidated impact on EBITDAa (millions) Attributable impact on EBITDAa (millions) Attributable impact on TCC and AISCa Â Â Gold price sensitivity $2,400/oz +/- $100/oz â€˜+/-$450 â€˜+/-$320 â€˜+/-$5/oz Copper price sensitivity $4.00/lb â€˜+/-$0.25/lb â€˜+/- $120 â€˜+/- $120 â€˜+/-$0.01/lb a.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.SustainabilitySustainability, including our license to operate, is entrenched in our DNA: our sustainability strategy is our business plan. Barrickâ€™s vision for sustainability is underpinned by the knowledge that sustainability aspects are interconnected and must be tackled in conjunction with, and reference to, each other. We call this approach Holistic and Integrated Sustainability Management. We must tackle all sustainability aspects holistically and concurrently to make meaningful progress in any single aspect. Although we integrate our sustainability management, we discuss our sustainability strategy within four overarching pillars: (1) respecting human rights; (2) protecting the health and safety of our people and local communities; (3) sharing the benefits of our operations; and (4) managing our impacts on the environment. We implement this strategy by blending top-down accountability with bottom-up responsibility. This means we place the day-to-day ownership of sustainability, and the associated risks and opportunities, in the hands of individual sites. In the same way that each site must manage its geological, operational and technical capabilities to meet business objectives, it must also manage and identify programs, metrics, and targets that measure progress and deliver real value for the business and our stakeholders, including our host countries and local communities. The Group Sustainability Executive, supported by regional sustainability leads, provides oversight and direction over this site-level ownership, to ensure alignment with the strategic priorities of the overall business.GovernanceThe bedrock of our sustainability strategy is strong governance. Our most senior management-level body dedicated to sustainability is the E&S Committee, which connects site-level ownership of our sustainability strategy with the leadership of the Group. It is chaired by the President and Chief Executive Officer and includes: (1) regional Chief Operating Officers; (2) minesite General Managers; (3) Health, Safety, Environment and Closure Leads; (4) the Group Sustainability Executive; (5) in-house legal counsel; and (6) an independent sustainability consultant in an advisory role. The E&S Committee meets on a quarterly basis to review our performance across a range of key performance indicators, and to provide independent oversight and review of sustainability management.The President and Chief Executive Officer reviews the reports of the E&S Committee at every quarterly meeting of the Board's ESG & Nominating Committee. The reports are reviewed to ensure the implementation of our

sustainability policies and to drive performance of our environmental, health and safety, community relations and development and human rights programs. This is supplemented by weekly meetings, at a minimum, between the Regional Sustainability Leads and the Group Sustainability Executive. These meetings examine the sustainability-related risks and opportunities facing the business in real time, as well as the progress and issues integrated into weekly Executive Committee review meetings. Incentive payments for senior leaders under Barrickâ€™s Partnership Plan are tied to Sustainability performance. For 2024, this comprised a 15% weighting under the annual incentive program based on our annual safety and environment performance, and a 20% weighting under our Long-Term Company Scorecard linked to the assessment of our industry-first Sustainability Scorecard. As we strive for ongoing strong performance, the Sustainability Scorecard targets and metrics are updated annually. The results of the 2024 Sustainability Scorecard will be published in the Annual Report and Sustainability Report during the first half of 2024. The E&S Committee tracks our progress against all metrics on a quarterly basis.Human rightsOur commitment to respect human rights is codified in our standalone Human Rights Policy and informed by the BARRICK YEAR-END 2024 13 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSexpectations of the United Nations Guiding Principles on Business and Human Rights, the Voluntary Principles on Security and Human Rights and the OECD Guidelines for Multinational Enterprises. This commitment is fulfilled on the ground via our Human Rights Program, the fundamental principles of which include: monitoring and reporting, due diligence, training, as well as disciplinary action and remedy.We continue to assess and manage security and human rights risks at all our operations and provide security and human rights training to private and public security forces across our sites. During 2024, independent human rights assessments were undertaken at the following sites: North Mara in Tanzania; Lumwana in Zambia, Reko Diq in Pakistan and Pueblo Viejo in Dominican Republic. The planned independent human rights assessment at Porgera in Papua New Guinea was postponed due to security challenges in the country. In June 2024, Barrick published a detailed response to a widely circulated â€œJoint Communicationâ€ from the UNHRC Special Procedures Branch making allegations regarding, predominantly, police conduct in the areas related to the North Mara gold mine in Tanzania. These allegations were unsubstantiated in the Joint Communication. Barrick has made its fulsome response publicly available to address both the contents of the Joint Communication, as well as to ensure transparency in how these risks are managed. No response has been received to date from the UNHRC, or any of the Special Rapporteurs. SafetyWe are committed to the safety, health and well-being of our people, their families and the communities in which we operate. Our safety vision is â€œEveryone to go home safe and healthy every day.â€ Our Management-Level Safety Committee continues to drive the implementation of the â€œJourney to Zeroâ€ initiative. The current priority is the roll out and training of the revised and standardized Fatal Risks and associated operating standards. We report our safety performance quarterly as part of both our E&S Committee meetings and our reports to the ESG & Nominating Committee. Our safety performance is the first item on our weekly Executive Committee review meeting.As part of our Journey to Zero, we have identified four key elements in developing a culture that fosters a strong and effective focus on safety: (1) Leadership and Culture, (2) Zero Fatalities, (3) Risk Management, and (4) Prevention of Injuries.Overall, our three regions saw an improvement in their safety performance over the prior year, in both TRIFR and LTIFR. The TRIFR8 of 0.91 improved by 20% compared to 2023 and the severity of injuries has been reduced significantly, as evidenced by a 48% decrease in LTIFR8 from the prior year to 0.12. Notwithstanding these positive improvements on the lagging indicators, it is with regret that these advancements were overshadowed by three fatalities that occurred during 2024; one at North Mara and two at Kibali. Two of the incidents are related to the Fatal Risk of Stored Energy and the other is related to Mobile Equipment. Our focus remains on the Fatal Risk Management program, entailing Fatal Risk standards and critical controls. Emphasis is on the Critical Control Verifications in the field, which are being completed by frontline line supervisors and managers, who the responsibility to stop unsafe work if controls are not in place.Social We regard our host communities and countries as important partners in our business. Our sustainability policies commit us to transparency in our relationships with host communities, government authorities, the public and other key stakeholders. Through these policies, we commit to conducting our business with integrity and with absolute opposition to corruption. We require our suppliers to operate ethically and responsibly as a condition of doing business with us.Community and economic developmentOur commitment to social and economic development is set out in our overarching Sustainable Development and Social Performance policies. Mining has been identified as vital for the achievement of the United Nations SDGs, not only for its role in providing the minerals needed to enable the transition to a lower carbon intensive economy, but more importantly because of its ability to drive socio-economic development and build resilience. Creating long-term value and sharing economic benefits is at the heart of our approach to sustainability, as well as community development. This approach is encapsulated in three concepts: The primacy of partnership: this means that we invest in real partnerships with mutual responsibility. Partnerships include local communities, suppliers, governments and organizations, and this approach is epitomized through our CDCs with development initiatives and investments.Sharing the benefits: We hire and buy local wherever possible as this injects money into and keeps it in our local communities and host countries. By doing this, we build capacity, community resilience and create opportunity. We also invest in community development through our CDCs. Sharing the benefits also means paying our fair share of taxes, royalties and dividends and doing so transparently, primarily through the reporting mechanism of the Canadian Extractive Sector Transparency Measures Act. Our annual Tax Contribution Report, most recently published in May 2024, sets out, in detail, our economic contributions to host governments. Engaging and listening to stakeholders: We develop tailored stakeholder engagement plans for every operation and the business as a whole. These plans guide and document how often we engage with various stakeholder groups and allow us to proactively deal with issues before they escalate into significant risks. Our community development spend for 2024 was more than $48 million. EnvironmentWe know the environment in which we work and our host communities are inextricably linked, and we apply a holistic and integrated approach to sustainability management. We can deliver significant cost savings to our business, reduce future liabilities and help build stronger stakeholder relationships by being responsible stewards of the environment. This includes applying the highest standards of environmental management, using natural resources and energy efficiently, recycling and reducing waste, as well as working to protect biodiversity. Environmental matters such as how we use water, prevent incidents, manage tailings, BARRICK YEAR-END 2024 14 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSrespond to changing climate and protect biodiversity are key areas of focus.We maintained our strong track record of stewardship and did not record any Class 19 environmental incidents in 2024.Climate ChangeThe ESG & Nominating Committee is responsible for overseeing Barrickâ€™s policies, programs and performance relating to sustainability and the environment, including climate change. The Audit & Risk Committee assists the Board in overseeing the Groupâ€™s management of enterprise risks as well as the implementation of policies and standards for monitoring and mitigating such risks. Climate change is built into our formal risk management process, outputs of which are regularly reviewed by the Audit & Risk Committee.Barrickâ€™s climate change strategy has three pillars: (1) identify, understand and mitigate the risks associated with climate change; (2) measure and reduce our GHG emissions across our operations and value chain; and (3) improve our disclosure on climate change. The three pillars of our climate change strategy do not focus solely on the development of emissions reduction targets, rather, we integrate and consider aspects of biodiversity protection, water management and community resilience in our approach. We are acutely aware of the impacts that climate change and extreme weather events have on our host communities and countries, particularly developing nations which are often the most vulnerable. As the world economy transitions to renewable power, it is imperative that developing nations are not left behind. As a responsible business, we have focused our efforts on building resilience in our host communities and countries, just as we do for our business. Our climate disclosure is based on the recommendations of the TCFD. Identify, understand and mitigate the risks associated with climate changeWe identify and manage risks, build resilience to a changing climate and extreme weather events, as well as position ourselves for new opportunities. These factors continue to be incorporated into our formal risk assessment process. We have identified several risks and opportunities for our business including: physical impacts of extreme weather events; an increase in regulations that seek to address climate change; and an increase in global investment in innovation and low-carbon technologies. The risk assessment process includes scenario analysis, which has been rolled out to all our Tier One Gold Assets1, to assess site-specific climate related risks and opportunities. The key findings and a summary of this asset-level physical and transitional risk assessment were disclosed as part of our CDP (formerly known as the Carbon Disclosure Project) Climate Change and Water Security questionnaires, submitted to CDP in October 2024. Measure and reduce the Groupâ€™s impact on climate changeMining is an energy-intensive business, and we understand the important link between energy use and GHG emissions. By measuring and effectively managing our energy use, we can reduce our GHG emissions, achieve more efficient production and reduce our costs. We have climate champions at each site who are tasked with identifying roadmaps and assessing feasibility for our GHG emissions reductions and carbon offsets for hard-to-abate emissions. Any carbon offsets that we pursue must have appropriate socioeconomic and/or biodiversity benefits. We have published an achievable emissions reduction roadmap and continue to assess further reduction opportunities across our operations. The detailed roadmap was first published in our 2021 Sustainability Report and includes committed capital projects and projects under investigation that rely on technological advances, with a progress summary contained in the 2023 Sustainability Report. We continue to progress our extensive work across our value chain in understanding our Scope 310 (indirect emissions associated with the value chain) emissions and implementing our engagement roadmap to enable our key suppliers to set meaningful and measurable reduction targets, in line with the commitments made through the ICMM Climate Position Paper. Improve our disclosure on climate change Our disclosure on climate change, including in our Sustainability Report and on our website, is developed in line with the TCFD recommendations. Barrick continues to monitor the various regulatory climate disclosure standards being developed around the world, including the International Sustainability Standards Boardâ€™s S2 Climate-related Disclosures standard. In addition, we complete the annual CDP Climate Change and Water Security questionnaires. This ensures our investor-relevant water use, emissions and climate data is widely available. EmissionsBarrickâ€™s interim GHG emissions reduction target is for a minimum 30% reduction by 2030 against our 2018 baseline, while maintaining a steady production profile. The basis of this reduction is against a 2018 baseline of 7,541 kt CO2-e. Our GHG emissions reduction target is grounded in science and has a detailed pathway for achievement. Our target is not static and will be updated as we continue to identify and implement new GHG reduction opportunities. Ultimately, our vision is net zero GHG emissions by 2050, achieved primarily through GHG reductions, with some offsets for hard-to-abate emissions. Site-level plans to improve energy efficiency, integrate clean and renewable energy sources and reduce GHG emissions will also be strengthened. We plan to supplement our corporate emissions reduction targets with context-based site-specific emissions reduction targets. During the fourth quarter of 2024, the Group's total Scope 1 and 210 (location-based) GHG emissions were 1,866 kt CO2-e. The preliminary 2024 annual emissions are 7,30511 (location-based), and 5% above 2023 levels due predominantly to the restart of Porgera, and emissions from the TS Power Plant at NGM, which underwent maintenance in Spring of 2023 and reduced 2023â€™s emissions comparatively. WaterWater is a vital and increasingly scarce global resource. Managing and using water responsibly is one of the most critical parts of our sustainability strategy. Our commitment to responsible water use is codified in our Environmental Policy and standalone Water Policy. Steady, reliable access to water is critical to the effective operation of our mines. Access to water is also a fundamental human right. Understanding the water stress in the regions in which we operate enables us to better understand the risks BARRICK YEAR-END 2024 15 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSand manage our water resources through site-specific water balances, based on the ICMM Water Accounting Framework, aimed at minimizing our water withdrawal and maximizing water reuse and recycling within our operations.We include each mineâ€™s water risks in its operational risk register. These risks are then aggregated and incorporated into the Group risk register. Our identified water-related risks include: (1) managing excess water in regions with high rainfall; (2) maintaining access to water in arid areas and regions prone to water scarcity; and (3) regulatory risks related to permitting limits as well as municipal and national regulations for water use.We set an annual water recycling and reuse target of 80%. Our water recycling and reuse rate for Q4 2024 and the year was approximately 85%. TailingsWe are committed to having our TSFs meet global best practices for safety. Our TSFs are carefully engineered and regularly inspected, particularly those in regions with high rainfall and seismic events. We disclosed our conformance to the GISTM for all Extreme and Very High consequence facilities on the Barrick website in August 2023, within the GISTM disclosure timeframe. All of our sites that are classified as Very High or Extreme consequence are in conformance with the GISTM. We continue to progress with our conformance for lower consequence facilities in accordance with the GISTM and disclosures for lower consequence facilities will be completed by August 2025, also in accordance with the GISTM.BiodiversityBiodiversity underpins many of the ecosystem services on which our mines and their surrounding communities depend. If improperly managed, mining and exploration activities have the potential to negatively affect biodiversity and ecosystem services. Protecting biodiversity and preventing nature loss is also critical and inextricably linked to the fight against climate change. We work to proactively manage our impact on biodiversity and strive to protect the ecosystems in which we operate. Wherever possible, we aim to achieve a net neutral biodiversity impact, particularly for ecologically sensitive environments. We continue to work to implement our BAPs. The BAPs outline our strategy to achieve no-net loss for all key biodiversity features and their associated management plans. Market OverviewThe market prices of gold and, to a lesser extent, copper are the primary drivers of our profitability and our ability to generate free cash flow6 for our shareholders.GoldThe price of gold is subject to volatile price movements over short periods of time and is affected by numerous industry and macroeconomic factors. During 2024, the gold price ranged from $1,984 per ounce to an all-time high of $2,790 per ounce. The average market price for the year of $2,386 per ounce also represented an all-time annual high, and a 23% increase from the 2023 average of $1,941 per ounce. During the year, the gold price rose strongly, reaching all-time high nominal and average prices, as inflation pressures eased and benchmark interest rates were cut, while the global economic outlook remained uncertain and geopolitical conflicts persisted. This occurred despite an increase in the trade-weighted US dollar, underscoring goldâ€™s role as a safe haven investment and store of value. AVERAGE MONTHLY SPOT GOLD PRICES(dollars per ounce) CopperDuring 2024, London Metal Exchange copper prices traded in a range of $3.69 per pound to an all-time high of $5.04 per pound, averaged $4.15 per pound, and closed the year at $3.95 per pound. Copper prices are heavily influenced by physical demand from emerging markets, especially China. Copper prices in 2024 were impacted by reductions in benchmark interest rates made possible by a moderation of inflationary pressures along with continued supply disruptions, tempered by an increase in the trade-weighted US dollar. AVERAGE MONTHLY SPOT COPPER PRICES(dollars per pound) We have provisionally priced copper sales for which final price determination versus the relevant copper index is outstanding at the balance sheet date. As at DecemberÂ 31, 2024, we recorded 63 million pounds of copper sales still subject to final price settlement at an average provisional price of $4.04 per pound. The impact to net income before taxation of a 10% movement in the market price of copper would be approximately $25 million, holding all other variables constant.Currency Exchange RatesThe results of our mining operations outside of the United States are affected by fluctuations in exchange rates. We have exposure to the Argentine peso through operating costs at our Veladero mine, and peso denominated VAT receivable balances. We also have exposure to the Canadian and Australian dollars, Chilean peso, Papua New Guinea kina, Zambian kwacha, Tanzanian shilling, Dominican peso, West African CFA franc, Euro, South BARRICK YEAR-END 2024 16 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSAfrican rand, and British pound through mine operating and capital costs. In addition, we also have exposure to the Pakistani rupee through project costs and capital costs on Reko Diq.Fluctuations in these exchange rates increase the volatility of our costs reported in US dollars. In 2024, the Australian dollar traded in a range of $0.62 to $0.69 against the US dollar, while the US dollar against the Canadian dollar and West African CFA franc ranged from $1.32 to $1.45 and XOF 585 to XOF 635, respectively. Due to inflationary pressures in Argentina and the actions of the government, there was a continued weakening of the Argentine peso during the year and it ranged from ARS 810 to ARS 1,031. During 2024, we did not have any currency hedge positions, and are unhedged against foreign exchange exposures as at DecemberÂ 31, 2024 beyond spot requirements.FuelFor 2024, the price of WTI crude oil traded in a range between $65 and $88 per barrel, with the market price averaging $76 per barrel, and closing the year at $72 per barrel. Oil prices were impacted by the strength of the trade-weighted US dollar, concerns about global economic growth, managed supply, and geopolitical concerns, including the ongoing invasion of Ukraine by Russia and the conflicts in the Middle East. AVERAGE MONTHLY SPOT CRUDE OIL PRICE (WTI)(dollars per barrel) During 2024, we did not have any fuel hedge positions, and are unhedged against fuel exposures as at DecemberÂ 31, 2024.USÂ Dollar Interest RatesIn response to inflationary pressure, the US Federal Reserve raised benchmark interest rates during 2022 and 2023 to a range of 5.25% to 5.50% by the end of 2023. During 2024, as those inflationary pressures eased, benchmark interest rates were cut by a total of 100 bps to a range of 4.25% to 4.50% by the end of the year. Changes to monetary

policy in 2025 will be dependent on economic data to be observed during the year. At present, our interest rate exposure mainly relates to interest income received on our cash balances ($4.1 billion at DecemberÂ 31, 2024); the carrying value of certain non-current assets and liabilities; and the interest payments on our variable-rate debt ($0.1 billion at DecemberÂ 31, 2024). Currently, the amount of interest expense recorded in our consolidated statement of income is not materially impacted by changes in interest rates, because the majority of our debt was issued at fixed interest rates. The relative amounts of variable-rate financial assets and liabilities may change in the future, depending on the amount of operating cash flow we generate, as well as the level of capital expenditures and our ability to borrow on favorable terms using fixed rate debt instruments. Changes in interest rates affect the accretion expense recorded on our provision for environmental rehabilitation and therefore would affect our net earnings.Reserves and Resources12For full details of our mineral reserves and mineral resources, refer to page 83 of the Fourth Quarter 2024 Report.Gold Reserves and ResourcesBarrickâ€™s 2024 gold mineral reserves and resources are estimated using a gold price assumption of $1,400 and $1,900 per ounce, increased from $1,300 and $1700 in 2023 respectively, except at Tongon and Hemlo open pit, where mineral reserves were estimated using a gold price assumption of $1,650 per ounce. Both are reported to a rounding standard of two significant digits for tonnes and metal content, with grades reported to two decimal places. As of December 31, 2024, Barrickâ€™s proven and probable gold mineral reserves were 89 million ounces13 at an average grade of 0.99 g/t, increasing from 77 million ounces14 at an average grade of 1.65 g/t in 2023. Year-over-year, attributable mineral reserves have increased by 17.4 million ounces15 before 2024 depletion of 4.6 million ounces15. The year-on-year change was led by the conversion of Reko Diq resources to mineral reserves, adding 13 million ounces13 of gold at 0.28 g/t on an attributable basis, following the completion of the feasibility study. Significantly, before the addition of Reko Diq, Barrick delivered a fourth consecutive year of replacing annual depletion at a 4% higher grade, further extending the life of our existing operations. Since year-end 2019, Barrick has successfully delivered replacement of over 180%15 of the Companyâ€™s gold mineral reserve depletion, adding almost 46 million ounces15 of attributable proven and probable mineral reserves or 77 million ounces15 of proven and probable mineral reserves on a 100% basis (excluding both acquisitions and divestments).ATTRIBUTABLE CONTAINED GOLD RESERVES13,14,a (Moz) a Figures rounded to two significant digits.Barrick attributable measured and indicated gold resources for 2024 remain consistent year-on-year at 180â€¯million ounces13 at 1.06 g/t, with a further 41â€¯million ounces13 at 0.9 g/t of inferred resources, up 5% from 2023. Mineral resources are reported inclusive of mineral reserves and BARRICK YEAR-END 2024 17 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSboth tonnes and metal content are reported to a rounding standard of two significant digits for tonnes and metal content. Measured and indicated mineral resource grades are reported to two decimal places, whilst inferred mineral resource grades are reported to one decimal place.Gold mineral reserves in the Africa & Middle East region, after annual depletion, grew to 19 million ounces13 at 3.35 g/t in 2024 from 18.8 million ounces14 at 3.24 g/t in 2023. This was predominantly driven by both Bulyanhulu and Loulo-Gounkoto, with extensions of the high-grade Reef 2 and Yalea underground orebodies respectively, combined with growth of the Faraba open pit. Overall, this delivered a 2.3 million ounce13 increase in attributable proven and probable mineral reserves across the region, before depletion. North Mara also contributed to the strong results through the extension of the Gokona underground and Gena open pit. At Kibali, the ongoing conversion drilling in the 9000 and 11000 lodes in KCD underground replaced 98% of depletion, with ongoing development to establish further underground drill platforms for 2025. The Latin America & Asia Pacific region replaced 115% of the regional 2024 gold mineral reserve depletion before the addition of Reko Diq. This was led by Pueblo Viejo which added 0.78 million ounces13 to attributable proven and probable mineral reserves before depletion as a result of additional pit design pushbacks unlocked by the additional TSF capacity in the new Naranjo facility. Porgera grew attributable gold mineral reserves by 22% year-on-year with the successful conversion of the open pit Link cutback adjacent to the West Wall cutback.In North America, the ongoing growth programs at Turquoise Ridge, Leeville Underground in Carlin and the Reona cut-back in Phoenix, added 1.54 million ounces13 of gold to proven and probable mineral reserves on an attributable basis before annual depletion, which were partially offset by reductions in Cortez driven by metallurgical model updates at Crossroads and Robertson. This resulted in attributable proven and probable mineral reserves for the region of 30 million ounces13 at 2.71 g/t, representing a more than 10% increase in the grade year-over-year (2.45 g/t in 2023) as a result of the high-grade growth additions and reductions of low-grade at Cortez. At the same time, attributable gold measured and indicated mineral resources for the region now stands at 66 million ounces13 at 2.18 g/t, due to the removal of Long Canyon mineral resources, as the site is planned to progress into full closure during 2025. Meanwhile, attributable inferred gold mineral resources for the region grew to 21 million ounces13 at 3.3 g/t, driven by Fourmileâ€™s mineral resource growth in the southernmost portion of the orebody immediately adjacent to the existing Goldrush mine. Looking forward to 2025, Barrick plans to commence prefeasibility-study drilling at Fourmile16, at the end of the first quarter of 2025, targeting continued extension of the mineral resource along strike to the north, while also completing the foundational studies for the planned Bullion Hill northern access portal. Copper Reserves and ResourcesFor Barrick-operated assets, copper mineral reserves for 2024 are estimated using a copper price of $3.00 per pound15, consistent with 2023. Copper mineral resources for 2024 are estimated using a price of $4.00 per pound15 also consistent with 2023. Both are reported to a rounding standard of two significant digits, for tonnes and metal content, with grades reported to two decimal places. Attributable proven and probable copper mineral reserves grew by 224% year-on-year on an attributable basis, at more than 13% higher grade to 18 million tonnes of copper15 at 0.45%, from 5.6 million tonnes of copper15 at 0.39% in 2023. This resulted from the completion of the Lumwana and Reko Diq feasibility studies affirming both as Tier One Copper Projects3. The Lumwana Super Pit Expansion feasibility study added 5.5 million tonnes of copper15 mineral reserves to the project, resulting in proven and probable copper mineral reserves of 8.3 million tonnes of copper15 at 0.52%. The Reko Diq feasibility study added 7.3 million tonnes of copper15 at 0.48% to attributable copper mineral reserves. This represents an addition of more than 20 million tonnes15 of proven and probable copper mineral reserves on a 100% basis since 2023. ATTRIBUTABLE CONTAINED COPPER RESERVES13,14,a (M tonnes) a Figures rounded to two significant digits.Barrickâ€™s attributable measured and indicated for 2024 stands at 24 million tonnes of copper13 at 0.39%, with a further 3.9 million tonnes of copper13 at 0.3% of inferred resources, reflecting the conversion and upgrade of copper mineral resources at Lumwana. Mineral resources are reported inclusive of mineral reserves and both tonnes and metal content are reported to a rounding standard of two significant digits for tonnes and metal content. Measured and indicated mineral resource grades are reported to two decimal places, whilst inferred mineral resource grades are reported to one decimal place.2024 mineral reserves and mineral resources are estimated using the combined value of gold, copper and silver. Accordingly, mineral reserves and mineral resources are reported for all assets where copper or silver is produced and sold as a primary product or a by-product. BARRICK YEAR-END 2024 18 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSRisks and Risk ManagementOverviewThe ability to deliver on our vision, strategic objectives and operating guidance depends on our ability to understand and appropriately respond to the uncertainties or â€œrisksâ€ we face that may prevent us from achieving our objectives. To achieve this, we:â– maintain a framework that permits us to manage risk effectively and in a manner that creates the greatest value;â– integrate a process for managing risk into all our important decision-making processes so that we reduce the effect of uncertainty on achieving our objectives;â– actively monitor key controls we rely on to achieve the Companyâ€™s objectives so they remain in place and are effective at all times; andâ– provide assurance to senior management and relevant committees of the Board on the effectiveness of key control activities.Board and Committee OversightWe maintain strong risk oversight practices, with responsibilities outlined in the mandates of the Board and related committees. The Boardâ€™s mandate is clear on its responsibility for reviewing and discussing with management the processes used to assess and manage risk, including the identification by management of the principal risks of the business, and the implementation of appropriate systems to deal with such risks.The Audit & Risk Committee assists the Board in overseeing the Companyâ€™s management of principal risks and the implementation of policies and standards for monitoring and modifying such risks, as well as monitoring and reviewing the Companyâ€™s financial position and financial risk management programs. The ESG & Nominating Committee assists the Board in overseeing the Companyâ€™s policies and performance for its environmental, health and safety, corporate social responsibility and human rights programs. The Compensation Committee assists the Board in ensuring that executive compensation is appropriately linked to our sustainability performance, including with respect to climate change and water.Management OversightOur weekly Executive Committee Review is the main forum for senior management to raise and discuss risks facing the operations and organization more broadly. Additionally, our most senior management-level body dedicated to sustainability is the E&S Committee which meets on a quarterly basis to review sustainability performance and key performance indicators across our operations. At every quarterly meeting, the ESG & Nominating Committee and the Audit & Risk Committee are provided with updates on the key issues identified by management at these regular sessions.Principal RisksThe following subsections describe some of our key sources of uncertainty and critical risk mitigation activities. The risks described below are not the only ones facing Barrick. Our business is subject to inherent risks in financial, regulatory, strategic and operational areas. For a more comprehensive discussion of those inherent risks, see â€œRisk Factorsâ€ in our most recent Form 40-F/Annual Information Form on file with the SEC and Canadian provincial securities regulatory authorities. Also see the â€œCautionary Statement on Forward-Looking Informationâ€ on page 2 of this MD&A. Risk Factor Risk Mitigation Strategy Free cash flow6 and costs Our ability to improve productivity, drive down operating costs and optimize working capital remains a focus in 2025 and is subject to several sources of uncertainty. This includes our ability to achieve and maintain industry-leading margins by improving the productivity and efficiency of our operations. â– Maximizing the benefit of higher gold prices through agile management and operational execution; â– Weekly Executive Committee Review to identify, assess and respond to risks in a timely manner;â– Enabling simplification and agile decision making through optimization of business systems; â– Supply Chain is decentralized to the operations with a centralized Strategic Sourcing Group and is focused on mitigating the risks of rising costs and supply chain disruption; â– Disciplined capital allocation criteria for all investments, to ensure a high degree of consistency and rigor is applied to all capital allocation decisions based on a comprehensive understanding of risk and reward;â– Continued enhancement and testing of controls to prevent, detect and respond to potential cyber-attacks; andâ– A flat, operationally focused, agile management structure with a tenet in ownership culture. BARRICK YEAR-END 2024 19 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS Risk Factor Risk Mitigation Strategy Social license to operate At Barrick, we are committed to building, operating and closing our mines in a safe and responsible manner. To do this, we seek to build trust-based partnerships with host governments and local communities to drive shared long-term value while working to minimize the social and environmental impacts of our activities. Geopolitical risks such as resource nationalism and incidents of corruption are inherent in the business of a company operating globally. Past environmental incidents in the extractive industry highlight the hazards (e.g., water management, tailings storage facilities, etc.) and the potential consequences to the environment, community health and safety. Our ability to maintain compliance with regulatory and community obligations in order to protect the environment and our host communities alike remains one of our top priorities. Barrick also recognizes climate change as an area of risk requiring specific focus and that reducing GHG emissions to counter the causes of climate change requires strong collective action by the mining industry. â– Our commitment to responsible mining is supported by a robust governance framework, including an overarching Sustainable Development Policy and related policies in the areas of Biodiversity, Conflict-Free Gold, Social Performance, Occupational Health and Safety, Environment and Human Rights;â– Use of our Sustainability Scorecard to track sustainability performance using key performance indicators aligned to priority areas set out in our strategy; â– Mandatory training on our Code of Business Conduct and Ethics as well as supporting policies which set out the ethical behavior expected of everyone working at, or with, Barrick;â– We take a partnership approach with our host governments. This means we work to balance our own interests and priorities with those of our government partners, working to ensure that everyone derives real value from our operations;â– Standalone, independent Human Rights Assessment Program whereby each site is assessed on a periodic cycle of two to three years, depending on the risk level and the number and level of identified risks to the rightsholder;â– Established CDCs at all our operating mines to identify community needs and priorities and to allocate funds to those initiatives most needed and desired by local stakeholders;â– We open our social and environmental performance to third-party scrutiny, including through the ISO 14001 re-certification process, International Cyanide Management Code audits and annual human rights impact assessments; â– We published site-level TSF disclosures, in accordance with Principle 15 of the GISTM, for all of the Companyâ€™s facilities classified as â€˜Very Highâ€™ and â€˜Extremeâ€™ consequence, in conformance with the requirements of the GISTM; â– Our climate change strategy has three pillars: identify, understand and mitigate the risks associated with climate change; measure and reduce our impacts on climate change; and improve our disclosure on climate change;â– We continuously monitor developments around the world and work closely with our local communities on managing the impacts of health issues, such as Ebola or Mpox outbreaks, on our people and business; andâ– We continuously review and update our closure plans and cost estimates to plan for environmentally responsible closure and monitoring of operations. Resources and reserves and production outlook Like any mining company, we face the risk that we are unable to discover or acquire new resources or that we do not convert resources into production. As we move into 2025 and beyond, our overriding objective of growing free cash flow6 continues to be underpinned by a strong pipeline of organic projects and minesite expansion opportunities in our core regions. Uncertainty related to these and other opportunities exists (potentially both favorable and unfavorable) due to the speculative nature of mineral exploration and development as well as the potential for increased costs, delays, suspensions and technical challenges associated with the construction of capital projects. â– Focus on responsible mineral resource management, continuously improve ore body knowledge and add to reserves and resources;â– Consolidate and secure dominant land positions in favored operating districts and emerging new prospective geological domains;â– Focus on economically feasible discoveries with potential Tier One1,3 status;â– Optimize the value of underdeveloped projects; â– Establish and develop motivated and highly agile discovery-driven teams; andâ– Identify emerging opportunities and secure them through earn-in agreements or acquisition. Financial position and liquidity Our liquidity profile, level of indebtedness and credit ratings are all factors in our ability to meet short- and long-term financial demands. Barrickâ€™s outstanding debt balances impact liquidity through scheduled interest and principal repayments and the results of leverage ratio calculations, which could influence our investment grade credit ratings and ability to access capital markets. In addition, our ability to draw on our credit facility is subject to meeting its covenants. Our primary source of liquidity is our operating cash flow, which is dependent on the ability of our operations to deliver projected future cash flows. The ability of our operations to deliver projected future cash flows, as well as future changes in gold and copper market prices, either favorable or unfavorable, will continue to have a material impact on our cash flow and liquidity. â– Continued focus on generating positive free cash flow6 by improving the underlying cost structures of our operations in a sustainable manner;â– Preparation of budgets and forecasts to understand the impact of different price scenarios on liquidity, including our capacity to provide cash returns to shareholders, repurchase outstanding debt and shares, and formulate appropriate strategies; â– Review of debt and net debt levels to ensure appropriate leverage and monitor the market for liability management opportunities; and â– Other options available to the Company to enhance liquidity include drawing on our $3.0Â billion undrawn Credit Facility, asset sales, joint ventures or the issuance of debt or equity securities. BARRICK YEAR-END 2024 20 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSOperating Performance Our presentation of reportable operating segments consists of eight gold mines (Carlin, Cortez, Turquoise Ridge, Pueblo Viejo, Loulo-Gounkoto, Kibali, North Mara and Bulyanhulu) and one copper mine (Lumwana). The remaining operating segments, including our remaining gold and copper mines, have been grouped into an â€œOther Minesâ€ category and will not be reported on individually. Segment performance is evaluated based on a number of measures including operating income before tax, production levels and unit production costs. Certain costs are managed on a consolidated basis and are therefore not reflected in segment income. Safety and Environment For the three months ended For the year ended 12/31/24 9/30/24 12/31/24 12/31/23 LTI 0 0 3 7 LTIFR8 0.00 0.00 0.3 0.77 TRIFR8 1.59 1.53 2.33 2.09 Class 19 environmental incidents 0 0 0 0Financial Results Q4 2024 compared to Q3 2024Gold production in Q4 2024 was 2% higher compared to Q3 2024 primarily due to 6% higher tonnes processed at the Gold Quarry roaster as a result of the planned shutdown in the prior quarter to complete phase 2 of the roaster expansion project. Additionally, underground ore tonnes mined increased 7% compared to the prior quarter resulting in higher processed grades. This was partially offset by lower ounces produced at the Goldstrike autoclave due to lower recoveries owing to the ore chemistry of historic stockpiles processed during the quarter. Cost of sales per ounce7 and total cash costs per ounce6 in Q4 2024 were in line with the prior quarter. In Q4 2024, all-in sustaining costs per ounce6 were 6% lower compared to Q3 2024, mainly due to lower minesite sustaining capital expenditures6.Capital expenditures in Q4 2024 were 13% lower than Q3 2024, driven in large part by the Gold Quarry shutdown that occurred in the prior quarter, partially offset by higher capitalized stripping at South Arturo. This was partially offset by an increase in project capital expenditures6, relating to the continuation of dewatering and detailed engineering associated with the Ren project. BARRICK YEAR-END 2024 22 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS2024 compared to 2023Gold production in 2024 was 11% lower compared to 2023, mainly due to a combination of lower grades processed, lower recoveries and the reduction in open pit ore mined as a result of the wall failure in the Gold Quarry open pit in Q1 2024. This was further impacted by a higher proportion of higher grade Cortez refractory ore processed at the Carlin roasters compared to 2023 which displaced lower grade Carlin feed (noting that overall production for NGM was maximized as a result of these ore movements between the two sites). These factors were partially offset by higher underground tonnes mined and processed in 2024. Gold production was also impacted by higher throughput at the autoclave as the conversion from RIL to CIL occurred in 2023. Finally, heap leach production was lower for 2024 owing to the leach cycle with no tonnes placed on leach pads in 2024. Cost of sales per ounce7 and total cash costs per ounce6 for 2024 were 14% and 15% higher, respectively, than 2023, primarily due to the lower grades processed and lower recoveries, combined with lower capitalized stripping driven by less waste tonnes mined at both Gold Quarry and South Arturo, which was in pre-production stripping in 2023. For 2024, all-in sustaining costs per ounce6 were 16% higher than 2023, due to the impact of higher total cash costs per ounce6 and higher minesite sustaining capital expenditures6. All cost metrics were also impacted by higher royalties from the higher realized gold price6 (the average realized price was $449/oz higher in 2024 relative to 2023).Capital expenditures in 2024 increased by 20% from 2023 resulting from higher minesite sustaining capital expenditures6 driven primarily by the purchase of the Komatsu-930 truck fleet. This was combined with an increase in project capital expenditures6, driven by the commencement of dewatering and detailed engineering associated with the Ren project in late 2023.2024 compared to Guidance 2024 Actual 2024 Guidance Gold produced (000s oz) 775 800 - 880 Cost of sales7 ($/oz) 1,429 1,270 - 1,370 Total cash costs6 ($/oz) 1,187Â 1,030 - 1,110 All-in sustaining costs6 ($/oz) 1,730Â 1,450 - 1,530Gold production for 2024 was below the guidance range, impacted primarily by the previously disclosed pit wall failure in the Gold Quarry open pit in Q1 2024, combined with increased ounces from Cortez processed at the Carlin roasters, to the overall benefit of NGM. The pit wall failure was also a key driver of cost of sales per ounce7 and total cash costs per ounce6 being above the guidance range through both lower production and higher mining costs resulting from longer haul distances. In addition, costs were higher due to higher maintenance costs underground and at the process facilities. All-in sustaining costs per ounce6 were higher than guidance, mainly driven by higher total cash costs per ounce6 and higher minesite sustaining capital expenditures. All cost metrics were also impacted by higher royalties from the higher realized gold price6 (guidance was based on a gold price assumption of $1,900/oz). This was mainly driven by higher ore tonnes from both Cortez Hills underground and Goldrush transported and processed at the Carlin roasters, combined with higher tonnes and higher grades from Cortez pits and increased Cortez Hills underground tonnes processed at the Cortez oxide mill, partially offset by lower leach ore tonnes placed resulting in lower leach production. Cost of sales per ounce7 and total cash costs per ounce6 in Q4 2024 were 8% and 10% lower, respectively, than Q3 2024, driven by the increased production and higher grade processed, partially offset by a higher proportion of higher-cost refractory ounces in the sales mix. In Q4 2024, all-in sustaining costs per ounce6 were 9% lower than Q3 2024, mainly due to lower total cash costs per ounce6 and lower minesite sustaining capital expenditures6 on a per ounce sold basis.Capital expenditures in Q4 2024 were 8% higher compared to Q3 2024, mainly due to higher minesite sustaining capital expenditures6, which was driven by increased underground development. BARRICK YEAR-END 2024 24 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS2024 compared to 2023 Gold production in 2024 was 19% lower than 2023 resulting from a combination of less leach ore mined at the Crossroads open pit as well as less oxide ore mined from Cortez Hills underground, in line with the mine sequence. This resulted in lower grade oxide ore processed at the oxide mill and a decrease in tonnes placed on the leach pad. This was partially offset by an increase in refractory ore shipped and processed at the Carlin roasters. Cost of sales per ounce7 and total cash costs per ounce6 in 2024 were 6% and 15% higher, respectively, than 2023, reflecting a higher proportion of higher cost refractory ounces processed at the Carlin roasters in the sales mix. For 2024, all-in sustaining costs per ounce6 increased by 12% compared to 2023, driven by higher total cash costs per ounce6 and higher minesite sustaining capital expenditures6 on a per ounce sold basis. All cost metrics were also impacted by higher royalties from the higher gold realized price6.Capital expenditures in 2024 decreased by 4% compared to 2023, due to lower minesite sustaining capital expenditures6 as the Komatsu 930-E truck fleet was primarily purchased in 2023. This was partially offset by increased project capital expenditures6 due to increased development and exploration activities at Goldrush.2024 compared to Guidance 2024 Actual 2024 Guidance Gold produced (000s oz) 444 380 - 420 Cost of sales7 ($/oz) 1,402Â 1,460 - 1,560 Total cash costs6 ($/oz) 1,046 1,040 - 1,120 All-in sustaining costs6 ($/oz) 1,441Â 1,390 - 1,490Gold production for 2024 was above the guidance range, primarily due to higher than forecasted refractory ore shipped and processed at the Carlin roasters, to the overall benefit of NGM. Cost of sales per ounce7 was below the guidance range while total cash costs per ounce6 were at the low end of the guidance range primarily due to the higher production, partially offset by a higher proportion of refractory ounces in the sales mix. All-in sustaining costs per ounce6 were at the mid-point of the guidance as lower total cash costs per ounce6 were partially offset by increased capitalized stripping at Crossroads. All cost metrics were also impacted by higher royalties from the higher gold realized price6. BARRICK YEAR-END 2024 25 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSTurquoise Ridge (61.5%), Nevada USASummary of Operating and Financial Data For the three months ended For the years ended 12/31/24 9/30/24 Change 12/31/24 12/31/23 Change 12/31/22 Total tonnes mined (000s) 282Â 758Â (63)% 2,339Â 919Â 155% 1,053Â Open pit ore 50Â 82Â (39)% 132Â 0Â 100% 131Â Open pit waste 5Â 475Â (99)% 1,380Â 0Â 100% 4Â Underground 227Â 201Â 13% 827Â 919Â (10)% 918Â Average grade (grams/tonne) Open pit mined 1.07Â 1.36Â (21) % 1.25Â n/a n/a 1.13Â Underground mined 13.71Â 13.89Â (1)% 12.50Â 11.28Â 11% 11.08Â Processed 5.23Â 5.69Â (8)% 4.86Â 4.34Â 12% 4.26Â Ore tonnes processed (000s) 651Â 503Â 29% 2,268Â 2,608Â (13)% 2,541Â Oxide Mill 83Â 69Â 20% 289Â 357Â (19)% 329Â Autoclave 568Â 434Â 31% 1,979Â 2,251Â (12)% 2,166Â Heap leach 0Â 0Â 0% 0Â 0Â 0% 46Â Recovery Rate 85Â % 84Â % 1% 85Â % 86Â % (1)% 81Â % Oxide Mill 85Â % 82Â % 4% 84Â % 85Â % (1)% 84Â % Autoclave 85Â % 84Â % 1% 85Â % 86Â % (1)% 81Â % Gold produced (000s oz) 94Â 76Â 24% 304Â 316Â (4)% 282Â Oxide Mill 5Â 3Â 67% 14Â 14Â 0% 10Â Autoclave 88Â 73Â 21% 287Â 299Â (4)% 266Â Heap leach 1Â 0Â 100% 3Â 3Â 0% 6Â Gold sold (000s oz) 89Â 77Â 16% 298Â 318Â (6)% 278Â Revenue ($ millions) 237Â 192Â 23% 724Â 620Â 17% 501Â Cost of sales ($ millions) 132Â 129Â 2% 481Â 444Â 8% 398Â Income ($ millions) 104Â 61Â 70% 238Â 172Â 38% 98Â EBITDA ($ millions)a 137Â 90Â 52% 348Â 288Â 21% 208Â EBITDA margin b 58Â % 47Â % 23% 48Â % 46Â % 4% 42Â % Capital expenditures ($ millions) 12Â 16Â (25)% 63Â 67Â (6)% 97Â Â Â Â Â Minesite sustaininga 12Â 16Â (25)% 62Â 61Â 2% 67Â Â Â Â Â Projecta 0Â 0Â 0% 1Â 6Â (83)% 30Â Cost of sales ($/oz) 1,491Â 1,674Â (11)% 1,615Â 1,399Â 15% 1,434Â Total cash costs ($/oz)a 1,107Â 1,295Â (15)% 1,238Â 1,026Â 21% 1,035Â All-in sustaining costs ($/oz)a 1,260Â 1,516Â (17)% 1,466Â 1,234Â 19% 1,296Â a.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.b.Represents EBITDA divided by revenue. Safety and Environment For the three months ended For the year ended 12/31/24 9/30/24 12/31/24 12/31/23 LTI 2 0 3 5 LTIFR8 2.84 0.00 1.05 1.99 TRIFR8 5.68 4.06 3.5 3.98 Class 19 environmental incidents 0 0 0 0Financial Results Q4 2024 compared to Q3 2024 Gold production in Q4 2024 was 24% higher than Q3 2024, mainly due to 31% higher tonnes processed at the Sage autoclave as a result of the planned shutdown in the prior quarter combined with 13% higher underground ore tonnes mined owing to improved mining efficiencies. Cost of sales per ounce7 and total cash costs per ounce6 in Q4 2024 were 11% and 15% lower, respectively, than Q3 2024, primarily due to higher production, combined with lower maintenance spend, primarily at the Sage autoclave as there was a planned shutdown in the prior quarter. All-in sustaining costs per ounce6 were 17% lower than Q3 2024, mainly reflecting lower total cash costs per ounce6, combined with lower minesite sustaining capital expenditures6.Capital expenditures in Q4 2024 were 25% lower than Q3 2024, mainly due to lower open pit equipment upgrades, partially offset by increased underground mobile equipment purchases. 2024 compared to 2023 Gold production in 2024 was 4% lower compared to 2023, primarily due to lower underground ore tonnes mined as the first half of 2024 was primarily focused on backfill and development to set up the mine to operate on a more efficient and cost effective basis going forward. Tonnes processed were 13% lower in 2024 compared to 2023 as there was an additional planned shutdown at the autoclave this year in order to perform reengineering and repairs to set up the autoclave for improved reliability and increased throughput in the future.Cost of sales per ounce7 and total cash costs per ounce6 in 2024 were 15% and 21% higher, respectively, BARRICK YEAR-END 2024 26 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSthan 2023, due to the additional autoclave shutdown in the current year and increased backfill and development activity at the Turquoise Ridge underground mine in the first half of 2024. All-in sustaining costs per ounce6 increased by 19% compared to 2023 due to higher total cash costs per ounce6, combined with higher minesite sustaining capital expenditures6 driven in large part by the Juniper tailings dam construction and the CIL tank upgrades. All cost metrics were also impacted by higher royalties from the higher realized gold price6.2024 compared to Guidance 2024 Actual 2024 Guidance Gold produced (000s oz) 304 330 - 360 Cost of sales7 ($/oz) 1,615Â 1,230 - 1,330 Total cash costs6 ($/oz) 1,238 850 - 930 All-in sustaining costs6 ($/oz) 1,466Â 1,090 - 1,190Gold production in 2024 was below the guidance range as the improvements in stabilizing the processing plant and increasing underground production in H2 took longer

than planned. Cost of sales per ounce7 and total cash costs per ounce6 were consequently above the guidance range compounded further by higher than planned maintenance costs both on underground infrastructure and at the Sage autoclave. All-in sustaining costs per ounce6 were also above the guidance range as higher total cash costs per ounce6 were partially offset by lower than planned minesite sustaining capital expenditures6. All cost metrics were also impacted by higher royalties from the higher realized gold price6. Pueblo Viejo is accounted for as a subsidiary with a 40% non-controlling interest. The results in the table and the discussion that follows are based on our 60% share only.b.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.c.Represents EBITDA divided by revenue.d.Starting in the first quarter of 2024, this amount includes capitalized interest. Safety and Environment For the three months ended For the year ended 12/31/24 9/30/24 12/31/24 12/31/23 LTI 0 0 0 0 LTIFR8 0.00 0.00 0.00 0.00 TRIFR8 0.56 0.00 0.54 0.82 Class 19 environmental incidents 0 0 0 0Financial ResultsQ4 2024 compared to Q3 2024Gold production for Q4 2024 was 5% lower than Q3 2024 due to lower grades processed as per the mine plan and lower throughput caused by failures in the limestone circuit. This was partially offset by drawdown of CIL inventory relative to the end of Q3 and improved recoveries in the flotation circuit.Cost of sales per ounce7 and total cash costs per ounce6 for Q4 2024 were 14% and 8% higher, respectively, than Q3 2024 primarily due to the lower grades processed, partially offset by lower mining costs, lower electricity input prices and lower plant maintenance costs. In addition, cost of sales per ounce7 was further impacted by higher depreciation expense. For Q4 2024, all-in sustaining costs per ounce6 were 9% higher than Q3 2024, reflecting the higher total cash costs per ounce6 and higher minesite sustaining capital expenditures6. Capital expenditures for Q4 2024 increased by 5% compared to Q3 2024 due to higher minesite sustaining capital expenditures6 following the execution of projects to improve the process plant throughput and recoveries. This was partially offset by lower project capital expenditures on the Naranjo TSF. 2024 compared to 2023Gold production for 2024 was 5% higher than 2023, mainly due to higher tonnes processed as a result of the ramp-up of the expanded plant. This was partially offset by lower recoveries as a result of the flotation circuit commissioning.Cost of sales per ounce7 and total cash costs per ounce6 for 2024 increased by 11% and 13%, respectively, compared to 2023, primarily due to higher electricity consumption, higher plant maintenance costs and higher gas prices. This was partially offset by increased production and lower mining costs. For 2024, all-in sustaining costs per ounce6 increased by 6% compared to 2023, mainly reflecting higher total cash costs per ounce6, partially offset by lower minesite sustaining capital expenditures6. All cost metrics were also impacted by higher royalties from the higher realized gold price6.Capital expenditures for 2024 decreased by 17% compared to 2023, mainly due to lower project capital expenditures6 incurred on the plant expansion as construction was substantially completed in 2023. BARRICK YEAR-END 2024 28 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS2024 compared to Guidance 2024 Actual 2024 Guidance Gold produced (000s oz) 352 420 - 490 Cost of sales7 ($/oz) 1,576Â 1,340 - 1,440 Total cash costs6 ($/oz) 1,005 830 - 910 All-in sustaining costs6 ($/oz) 1,323Â 1,100 - 1,200Gold production in 2024 was lower than the guidance range mainly due to ramp-up issues which hindered our ability to increase throughput. This included mill failures, lower flotation plant availability, lower limestone production and unplanned maintenance at the autoclaves. All cost metrics were higher than the guidance ranges mainly due to the impact of lower production. All cost metrics were also impacted by higher royalties from the higher realized gold price6. BARRICK YEAR-END 2024 29 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSLoulo-Gounkoto (80% basis)a, MaliSummary of Operating and Financial Data For the three months ended For the years ended Â Â 12/31/24 9/30/24 Change 12/31/24 12/31/23 Change 12/31/22 Total tonnes mined (000s) 10,476Â 8,962Â 17% 36,447Â 28,200Â 29% 30,845Â Â Â Â Â Open pit ore 510Â 233Â 119% 894Â 1,240Â (28)% 2,989Â Â Â Â Â Open pit waste 9,004Â 7,807Â 15% 31,778Â 23,353Â 36% 24,560Â Â Â Â Â Underground 962Â 922Â 4% 3,775Â 3,607Â 5% 3,296Â Average grade (grams/tonne) Â Â Â Â Open pit mined 1.80Â 1.99Â (10)% 1.81Â 2.98Â (39)% 2.29Â Â Â Â Â Underground mined 7.03Â 4.54Â 55% 5.74Â 5.04Â 14% 4.58Â Â Â Â Â Processed 5.13Â 4.80Â 7% 4.73Â 4.61Â 3% 4.59Â Ore tonnes processed (000s) 1,050Â 1,016Â 3% 4,163Â 4,049Â 3% 4,069Â Recovery rate 90Â % 92Â % (2)% 91Â % 91Â % 0% 91Â % Gold produced (000s oz) 156Â 144Â 8% 578Â 547Â 6% 547Â Gold sold (000s oz) 47Â 135Â (65)% 459Â 546Â (16)% 548Â Revenue ($ millions) 127Â 337Â (62)% 1,076Â 1,068Â 1% 989Â Cost of sales ($ millions) 65Â 170Â (62)% 558Â 653Â (15)% 631Â Income (loss) ($ millions) (13) 161Â (108)% 420Â 388Â 8% 342Â EBITDA ($ millions)b 9Â 214Â (96)% 598Â 585Â 2% 547Â EBITDA margin c 7Â % 64Â % (89)% 56Â % 55Â % 2% 55Â % Capital expendituresd ($ millions) 86Â 82Â 5% 307Â 300Â 2% 258Â Â Â Â Â Minesite sustainingb 58Â 56Â 4% 215Â 177Â 21% 152Â Â Â Â Â Projectb 27Â 26Â 4% 91Â 123Â (26)% 106Â Cost of sales ($/oz) 1,397Â 1,257Â 11% 1,218Â 1,198Â 2% 1,153Â Total cash costs ($/oz)b 923Â 865Â 7% 828Â 835Â (1)% 778Â All-in sustaining costs ($/oz)b 2,136Â 1,288Â 66% 1,304Â 1,166Â 12% 1,076Â a.Barrick owns 80% of SociÃ©tÃ© des Mines de Loulo SA and SociÃ©tÃ© des Mines de Gounkoto with the Republic of Mali owning 20%. Loulo-Gounkoto is accounted for as a subsidiary with a 20% non-controlling interest on the basis that Barrick controls the asset. The results in the table and the discussion that follows are based on our 80% share, inclusive of the impact of the purchase price allocation resulting from the merger with Randgold. b.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.c.Represents EBITDA divided by revenue.d.Includes capitalized interest.Safety and Environment For the three months ended For the year ended 12/31/24 9/30/24 12/31/24 12/31/23 LTI 0 0 1 1 LTIFR8 0.00 0.00 0.05 0.06 TRIFR8 0.19 0.00 0.29 0.45 Class 19 environmental incidents 0 0 0 0Financial ResultsQ4 2024 compared to Q3 2024Gold production for Q4 2024 was 8% higher than Q3 2024, mainly due to higher throughput and higher grades processed. Gold sold was 65% lower than Q3 2024, reflecting the restrictions placed by the Government of Mali during Q4 2024 on our ability to ship and sell gold. Cost of sales per ounce7 and total cash costs per ounce6 for Q4 2024 were 11% and 7% higher, respectively, than Q3 2024, primarily due to the impact of higher underground costs driven by more tonnes mined. For Q4 2024, all-in sustaining costs per ounce6 increased by 66% compared to Q3 2024, primarily due to higher minesite sustaining capital expenditures6 on a per ounce basis, reflecting the impact of lower gold sales volumes, as discussed above, combined with higher total cash costs per ounce6. Capital expenditures for Q4 2024 increased by 5% compared to Q3 2024, mainly due to higher minesite sustaining capital expenditures6 driven by higher underground development. 2024 compared to 2023 Gold production in 2024 was 6% higher than 2023, driven by higher grades processed and higher plant throughput. Gold sold was 16% lower than 2023, reflecting the restrictions placed by the Government of Mali during Q4 2024 on our ability to ship and sell gold.Cost of sales per ounce7 in 2024 was 2% higher compared to 2023, reflecting higher depreciation expense, partially offset by lower total cash costs per ounce6. Total cash costs per ounce6 in 2024 were 1% lower than 2023, mainly due to lower operating costs in both underground and open pit mining, as well as lower processing costs. This was partially offset by higher royalties driven by the higher realized gold price6. For 2024, all-in sustaining costs6 were 12% higher compared to 2023 reflecting higher minesite sustaining capital expenditures6 on a per ounce basis, mainly reflecting the impact of lower gold sales volumes, as discussed above, partially offset by slightly lower total cash costs per ounce6.Capital expenditures in 2024 were 2% higher compared to 2023, mainly due to higher minesite sustaining capital expenditures6, partially offset by lower project capital expenditures6. The increase in minesite sustaining capital BARRICK YEAR-END 2024 30 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSexpenditures6 is mainly due to higher capitalized stripping, reflecting a higher strip ratio primarily at the Gounkoto and Baboto pits. Lower project capital expenditures6 is as a result of the completion of the Loulo-Gounkoto solar plant expansion project in 2023. 2024 compared to Guidance 2024 Actual 2024 Guidance Gold produced (000s oz) 578 510 - 560 Cost of sales7 ($/oz) 1,218Â 1,190 - 1,290 Total cash costs6 ($/oz) 828 780 - 860 All-in sustaining costs6 ($/oz) 1,304Â 1,150 - 1,250Gold production in 2024 was above the top end of the guidance range due to higher grades and better than expected throughput performance from the plant. Cost of sales per ounce7 and total cash costs per ounce6 were within the guidance ranges, despite the higher royalties from the higher realized gold price6 (royalty impact was $27/oz for Loulo-Gounkoto). All-in sustaining costs per ounce6 were above the guidance range, reflecting higher minesite sustaining capital expenditures6 on a per ounce basis as a result of lower gold sales volumes due to the restrictions on our ability to ship gold ($96/oz impact) and the higher realized gold price6 ($27/oz impact as per above). Factoring these into the outcome for 2024, Loulo-Gounkoto would have been within its guidance for all three cost metrics. Mining Conventions DisputeAs previously disclosed, the Company and the Government of Mali have been engaged in an ongoing dispute over the existing mining Conventions. On December 18, 2024, after multiple good faith attempts to resolve the dispute, Somilo and Gounkoto submitted a request for arbitration to ICSID in accordance with the provisions of their respective Conventions. On January 14, 2025, due to the restrictions imposed by the Government of Mali on gold shipments, the Company announced that the Loulo-Gounkoto complex would temporarily suspend operations.For more information, refer to notes 21 and 35 of the Financial Statements. BARRICK YEAR-END 2024 31 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSKibali (45% basis)a, Democratic Republic of CongoSummary of Operating and Financial Data For the three months ended For the years ended Â Â 12/31/24 9/30/24 Change 12/31/24 12/31/23 Change 12/31/22 Total tonnes mined (000s) 4,821Â 4,615Â 4% 19,398Â 17,837Â 9% 16,649Â Â Â Â Â Open pit ore 631Â 412Â 53% 2,045Â 2,721Â (25)% 2,551Â Â Â Â Â Open pit waste 3,741Â 3,763Â (1)% 15,539Â 13,288Â 17% 12,428Â Â Â Â Â Underground 449Â 440Â 2% 1,814Â 1,828Â (1)% 1,670Â Average grade (grams/tonne) Â Â Â Â Open pit mined 1.46Â 1.58Â (8)% 1.43Â 1.60Â (11)% 1.62Â Â Â Â Â Underground mined 5.27Â 4.92Â 7% 5.21Â 5.11Â 2% 5.62Â Â Â Â Â Processed 2.88Â 2.58Â 12% 2.82Â 3.21Â (12)% 3.39Â Ore tonnes processed (000s) 971Â 965Â 1% 3,827Â 3,700Â 3% 3,495Â Recovery rate 89Â % 89Â % 0% 89Â % 90Â % (1)% 88Â % Gold produced (000s oz) 80Â 71Â 13% 309Â 343Â (10)% 337Â Gold sold (000s oz) 79Â 77Â 3% 309Â 343Â (10)% 332Â Revenue ($ millions) 209Â 193Â 8% 743Â 670Â 11% 598Â Cost of sales ($ millions) 111Â 111Â 0% 415Â 419Â (1)% 413Â Income ($ millions) 95Â 73Â 30% 316Â 243Â 30% 142Â EBITDA ($ millions)b 130Â 108Â 20% 450Â 390Â 15% 320Â EBITDA margin c 62Â % 56Â % 11% 61Â % 58Â % 5% 54Â % Capital expenditures ($ millions) 32Â 26Â 23% 116Â 73Â 59% 92Â Â Â Â Â Minesite sustainingb 15Â 12Â 25% 58Â 35Â 66% 70Â Â Â Â Â Projectb 17Â 14Â 21% 58Â 38Â 53% 22Â Cost of sales ($/oz) 1,413Â 1,441Â (2)% 1,344Â 1,221Â 10% 1,243Â Total cash costs ($/oz)b 966Â 978Â (1)% 905Â 789Â 15% 703Â All-in sustaining costs ($/oz)b 1,182Â 1,172Â 1% 1,123Â 918Â 22% 948Â a.Barrick owns 45% of Kibali Goldmines SA with the Government of Democratic Republic of Congo and our joint venture partner, AngloGold Ashanti, owning 10% and 45%, respectively. The figures presented in this table and the discussion that follows are based on our 45% effective interest in Kibali Goldmines SA held through our 50% interest in Kibali (Jersey) Limited and its other subsidiaries (collectively "Kibali"), inclusive of the impact of the purchase price allocation resulting from the merger with Randgold. Kibali is accounted for as an equity method investment on the basis that the joint venture partners that have joint control have rights to the net assets of the joint venture. b.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.c.Represents EBITDA divided by revenue.Safety and Environment For the three months ended For the year ended 12/31/24 9/30/24 12/31/24 12/31/23 LTI 1 0 3 3 LTIFR8 0.22 0.00 0.17 0.17 TRIFR8 1.57 0.45 1.2 1.39 Class 19 environmental incidents 0 0 0 0Financial ResultsQ4 2024 compared to Q3 2024Gold production for Q4 2024 was 13% higher than Q3 2024, primarily due to higher grades processed. Cost of sales per ounce7 and total cash costs per ounce6 for Q4 2024 were 2% and 1% lower, respectively, than Q3 2024 mainly due to the benefit of higher grades processed. All-in sustaining costs per ounce6 for Q4 2024 were in line with Q3 2024.Capital expenditures for Q4 2024 were 23% higher than Q3 2024, driven by higher project capital expenditures6 relating to the progress of the solar project, and higher minesite sustaining capital expenditures6, driven by equipment rebuilds.2024 compared to 2023Gold production in 2024 was 10% lower compared to 2023, mainly due to lower grades processed and slightly lower recoveries, partially offset by higher throughput.Cost of sales per ounce7 and total cash costs per ounce6 in 2024 increased by 10% and 15%, respectively, compared to 2023, mainly due to lower grades processed as well as higher royalties driven by the higher realized gold price6. For 2024, all-in sustaining costs per ounce6 were 22% higher compared to 2023, reflecting both higher minesite sustaining capital expenditures6 and higher total cash costs per ounce6.Capital expenditures in 2024 were 59% higher compared to 2023 due to higher minesite sustaining capital expenditures6 driven by higher capitalized waste stripping and increased project capital expenditures6 relating to the solar project, which aligns with our GHG emission reduction plan. BARRICK YEAR-END 2024 32 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS2024 compared to Guidance 2024 Actual 2024 Guidance Gold produced (000s oz) 309 320 - 360 Cost of sales7 ($/oz) 1,344Â 1,140 - 1,240 Total cash costs6 ($/oz) 905 740 - 820 All-in sustaining costs6 ($/oz) 1,123Â 950 - 1,050Gold production in 2024 was below the guidance range, primarily driven by lower grades processed than planned. All cost metrics were above the guidance ranges primarily as a result of the lower production and higher royalties from the higher realized gold price6. New Finance LawOn December 22, 2024, the DRC officially promulgated the Finance Law for the 2025 fiscal year which included significant changes affecting Kibaliâ€™s legislative framework with the key one being an additional 3% customs duty on gold exports. This increased the total applicable duty to 5%, in addition to the 3.5% royalty rate i.e. 8.5% in total. In addition, it also added additional excise duties on certain consumable items. The net effect of these legislative changes is an increase in the Kibali cost base from January 1, 2025 onwards and is reflected in our 2025 cost guidance. North Mara is accounted for as a subsidiary with a 16% non-controlling interest on the basis that Barrick controls the asset. The results in the table and the discussion that follows are based on our 84% share. b.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.c.Represents EBITDA divided by revenue.Safety and Environment For the three months ended For the year ended 12/31/24 9/30/24 12/31/24 12/31/23 LTI 0 0 0 3 LTIFR8 0.00 0.00 0.00 0.29 TRIFR8 0 0.00 0.35 0.97 Class 19

environmental incidents 0 0 0 0Financial ResultsQ4 2024 compared to Q3 2024In Q4 2024, gold production was 20% higher than Q3 2024 mainly due to higher grades processed and higher throughput. Cost of sales per ounce7 and total cash costs per ounce6 in Q4 2024 were 8% and 9% lower, respectively, than Q3 2024, resulting from higher grades processed and lower underground mining costs, slightly offset by increased royalties from the higher realized gold price6. All-in sustaining costs per ounce6 in Q4 2024 were 4% higher than Q3 2024, reflecting the higher minesite sustaining capital expenditures6, partially offset by lower total cash costs per ounce6.Capital expenditures in Q4 2024 increased by 93% compared to Q3 2024, driven by higher project capital expenditures6 mainly related to the underground paste plant combined with higher minesite sustaining capital expenditures6 due to higher spend on key underground and open pit equipment in line with our optimization plans. 2024 compared to 2023In 2024, gold production was 5% higher than 2023 as we transitioned into higher grades in the underground and open pit, following underground development and waste stripping cycles in the prior year. Cost of sales per ounce7 and total cash costs per ounce6 in 2024 were both 5% higher than 2023, mainly reflecting higher royalties from the higher realized gold price6, higher power generation costs following the grid instability challenges faced in Q1 2024 and higher maintenance costs on our underground fleet during the year. This was partially offset by higher grades processed. All-in sustaining costs per ounce6 were 5% lower than 2023, primarily due to lower minesite sustaining capital expenditures6, partially offset by higher total cash costs per ounce6. In 2024, capital expenditures decreased by 23% compared to 2023 mainly due to lower minesite sustaining capital expenditures6, reflecting lower capitalized stripping and drilling expenditures, partially offset by higher expenditures relating to the open pit mining fleet. This was combined with lower project capital expenditures6 relating to the completion of the paste plant. BARRICK YEAR-END 2024 34 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS2024 compared to Guidance 2024 Actual 2024 Guidance Gold produced (000s oz) 265 230 - 260 Cost of sales7 ($/oz) 1,266Â 1,250 - 1,350 Total cash costs6 ($/oz) 989 970 - 1,050 All-in sustaining costs6 ($/oz) 1,274Â 1,270 - 1,370Gold production in 2024 ended above the guidance range reflecting higher grades processed versus the mine plan at the start of the year. All cost metrics were impacted by higher royalties from the higher realized gold price6. Notwithstanding this impact, all cost metrics were at the lower end of the guidance ranges, reflecting the benefit of increased production diluting the fixed costs over more ounces. Bulyanhulu is accounted for as a subsidiary with a 16% non-controlling interest on the basis that Barrick controls the asset. The results in the table and the discussion that follows are based on our 84% share. b.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.c.Represents EBITDA divided by revenue.Safety and Environment For the three months ended For the year ended 12/31/24 9/30/24 12/31/24 12/31/23 LTI 0 0 0 3 LTIFR8 0.00 0.00 0.00 0.44 TRIFR8 0.98 2.97 1.76 2.40 Class 19 environmental incidents 0 0 0 0Financial ResultsQ4 2024 compared to Q3 2024In Q4 2024, gold production was 19% higher than Q3 2024, primarily reflecting higher throughput, higher grades processed and higher recovery. Cost of sales per ounce7 and total cash costs per ounce6 in Q4 2024 decreased by 8% and 10%, respectively, due to the higher grades processed and lower general and administration costs. All-in sustaining costs per ounce6 in Q4 2024 were 1% higher than Q3 2024, mainly as a result of increased minesite sustaining capital expenditures6, largely offset by lower total cash costs6. Capital expenditures in Q4 2024 were 17% higher than Q3 2024, mainly due to increased minesite sustaining capital expenditures6 related to deposits on equipment orders for 2025 as we continue to expand the underground operations. This was partially offset by lower underground development in Q4 2024. 2024 compared to 2023In 2024, gold production was 7% lower than 2023 as we prioritized underground development and transitioned into lower grade areas of the mine, in line with the mine plan. We continue to increase the scale of operations at Bulyanhulu as reflected by the higher tonnes mined and processed in 2024. Cost of sales per ounce7 and total cash costs per ounce6 in 2024 were 15% and 16% higher, respectively, than 2023, reflecting lower grades and higher input costs driven by consumables and maintenance. All-in sustaining costs per ounce6 were 15% higher than 2023 due to increased total cash costs per ounce6 and higher minesite sustaining capital expenditures6 on a per ounce basis. All cost metrics were also impacted by higher royalties from the higher realized gold price6.In 2024, capital expenditures increased by 28% compared to 2023, reflecting higher project capital expenditures6 mainly from the new Upper West underground decline development.2024 compared to Guidance 2024 Actual 2024 Guidance Gold produced (000s oz) 168 160 - 190 Cost of sales7 ($/oz) 1,509Â 1,370 - 1,470 Total cash costs6 ($/oz) 1,070 990 - 1,070 All-in sustaining costs6 ($/oz) 1,420Â 1,380 - 1,480Gold production in 2024 ended within the guidance range. All cost metrics were impacted by higher royalties from the higher realized gold prices6. In addition, cost of sales per ounce7 was slightly above the guidance range, driven by higher depreciation. Total cash costs6 and all-in sustaining costs6 were within their respective guidance ranges notwithstanding the higher realized gold price6. BARRICK YEAR-END 2024 36 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSOther Mines - Gold Summary of Operating and Financial Data For the three months ended 12/31/24 9/30/24 Gold produced (000s oz) Cost of sales ($/oz) Total cash costs ($/oz)a All-in sustaining costs ($/oz)a Capital Expend-ituresb Gold produced (000s oz) Cost of sales ($/oz) Total cash costs ($/oz)a All-in sustaining costs ($/oz)a Capital Expend-ituresb Phoenix (61.5%) 39 1,474Â 752Â 956Â 6Â 29 1,789Â 764Â 1,113Â 8Â Veladero (50%) 82 1,151Â 828Â 1,191Â 41Â 57 1,311Â 951Â 1,385Â 36Â Tongon (89.7%) 39 1,405Â 1,198Â 1,460Â 7Â 28 2,403Â 2,184Â 2,388Â 7Â Hemlo 39 1,754Â 1,475Â 1,689Â 8Â 30 1,929Â 1,623Â 2,044Â 11Â Porgera (24.5%) 13 2,127Â 1,322Â 2,967Â 20Â 18 1,163Â 999Â 1,214Â 6Â For the years ended 12/31/24 12/31/23 Gold produced (000s oz) Cost of sales ($/oz) Total cash costs ($/oz)a All-in sustaining costs ($/oz)a Capital Expend-ituresb Gold produced (000s oz) Cost of sales ($/oz) Total cash costs ($/oz)a All-in sustaining costs ($/oz)a Capital Expend-ituresb Phoenix (61.5%) 127 1,687Â 765Â 1,031Â 26Â 123 2,011Â 961Â 1,162Â 19Â Veladero (50%) 252 1,254Â 905Â 1,334Â 139Â 207 1,440Â 1,011Â 1,516Â 99Â Tongon (89.7%) 148 1,903Â 1,670Â 1,867Â 20Â 183 1,469Â 1,240Â 1,408Â 27Â Hemlo 143 1,754Â 1,483Â 1,769Â 38Â 141 1,589Â 1,382Â 1,672Â 41Â Porgera (24.5%) 46 1,423Â 1,073Â 1,666Â 72Â â€” â€”Â â€”Â â€”Â â€”Â a.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.b.Includes both minesite sustaining and project capital expenditures. Cost of sales per ounce7 and total cash costs per ounce6 in Q4 2024 were 18% and 2% lower, respectively, than Q3 2024, mainly due to the impact of higher grades and recoveries, combined with lower maintenance spend. Cost of sales per ounce7 was further impacted by lower depreciation expense on a per ounce basis. In Q4 2024, all-in sustaining costs per ounce6 decreased by 14% compared to Q3 2024, due to both lower minesite sustaining capital expenditures6 and lower total cash costs per ounce6. 2024 Actual 2024 Guidance Gold produced (000s oz) 127 120 - 140 Cost of sales7 ($/oz) 1,687Â 1,640 - 1,740 Total cash costs6 ($/oz) 765 810 - 890 All-in sustaining costs6 ($/oz) 1,031Â 1,100 - 1,200Compared to our 2024 outlook, gold production and cost of sales per ounce7 were within the guidance ranges. Total cash costs per ounce6 and all-in sustaining costs per ounce6 were below the guidance ranges driven mainly by higher than expected by-product credits. Veladero (50%), ArgentinaGold production for Veladero in Q4 2024 was 44% higher than Q3 2024 driven by an increase in recoverable ounces placed on the leach pad. Cost of sales per ounce7 and total cash costs per ounce6 in Q4 2024 were 12% and 13% lower, respectively, than Q3 2024, mainly due to the impact of higher production. In Q4 2024, all-in sustaining costs per ounce6 decreased by 14% compared to Q3 2024, primarily driven by both lower total cash costs per ounce6 and lower minesite sustaining capital expenditures6 on a per ounce basis. 2024 Actual 2024 Guidance Gold produced (000s oz) 252 210 - 240 Cost of sales7 ($/oz) 1,254Â 1,340 - 1,440 Total cash costs6 ($/oz) 905Â 1,010 - 1,090 All-in sustaining costs6 ($/oz) 1,334Â 1,490 - 1,590Gold production for the full year 2024 was above the guidance range driven by additional recoverable ounces placed and higher ounces contributed by phase 1-5 of the leach facility. All cost metrics were below the guidance ranges as a result of the higher production notwithstanding the impact of higher royalties from the higher realized gold price6. Tongon (89.7% basis), CÃ´te d'IvoireGold production for Tongon in Q4 2024 was 39% higher than Q3 2024, reflecting higher throughput, grades and recoveries. Cost of sales per ounce7 and total cash costs per ounce6 in Q4 2024 were 42% and 45% lower, respectively, than Q3 2024 primarily due to higher grades processed, higher recoveries and improvements in processing cost efficiencies. All-in sustaining costs per ounce6 in Q4 2024 were 39% lower than Q3 2024, driven by lower total cash costs per ounce6. BARRICK YEAR-END 2024 37 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS 2024 Actual 2024 Guidance Gold produced (000s oz) 148 160 - 190 Cost of sales7 ($/oz) 1,903Â 1,520 - 1,620 Total cash costs6 ($/oz) 1,670Â 1,200 - 1,280 All-in sustaining costs6 ($/oz) 1,867Â 1,440 - 1,540Gold production for the full year 2024 was below the guidance range driven by lower than planned grades and recoveries. All cost metrics were above the guidance ranges due to the impact of lower production and the impact of higher royalties from the higher realized gold price6.Although Tongon continues to be managed for the benefit of all stakeholders, our investment in this asset is not considered to be a core part of our portfolio.Hemlo, Ontario, CanadaHemlo's gold production in Q4 2024 was 30% higher than Q3 2024, primarily due to higher ore tonnes mined due to improved underground performance and higher grades. Cost of sales per ounce7 and total cash costs per ounce6 in Q4 2024 were both 9% lower than Q3 2024 due to the impact of the improved production. All-in sustaining costs per ounce6 decreased by 17% compared to Q3 2024, primarily due to lower minesite sustaining capital expenditures6 and lower total cash costs per ounce6. 2024 Actual 2024 Guidance Gold produced (000s oz) 143 140 - 160 Cost of sales7 ($/oz) 1,754Â 1,470 - 1,570 Total cash costs6 ($/oz) 1,483Â 1,210 - 1,290 All-in sustaining costs6 ($/oz) 1,769Â 1,600 - 1,700 Gold production in 2024 was within the guidance range. All cost metrics were higher than guidance mainly due to increased underground maintenance spend and higher royalties from the higher realized gold price6. All-in sustaining costs per ounce6 were further impacted by lower than forecasted minesite sustaining capital expenditures6.Porgera (24.5%), Papua New GuineaGold production in Q4 2024 was 28% lower than Q3 2024 as operations were impacted by regional tribal conflicts, unplanned power outages and ongoing logistical challenges stemming from the Mulitaka landslide. As a result, cost of sales per ounce7 and total cash costs per ounce6 were 83% and 32% higher, respectively, than Q3 2024. Cost of sales per ounce7 was further impacted by higher depreciation expense. All-in sustaining costs per ounce7 increased by 144% compared to Q3 2024 primarily reflecting both higher minesite sustaining capital expenditures6 on a per ounce basis and higher total cash costs per ounce6. Porgera continues to work proactively with its stakeholders in Papua New Guinea to address external challenges impacting the Porgera operations. 2024 Actual 2024 Guidance Gold produced (000s oz) 46 50 - 70 Cost of sales7 ($/oz) 1,423Â 1,670 - 1,770 Total cash costs6 ($/oz) 1,073Â 1,220 - 1,300 All-in sustaining costs6 ($/oz) 1,666Â 1,900 - 2,000 Gold production in 2024 was marginally below the guidance range mainly due to the impacts of the external events related to the landslide and tribal conflicts. All cost metrics were lower than the guidance ranges mainly due to the earlier than planned start-up of gas power generation notwithstanding the impact of higher royalties from the higher realized gold price6. All-in sustaining costs per ounce6 were further impacted by lower than forecasted minesite sustaining capital expenditures6. BARRICK YEAR-END 2024 38 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSLumwana (100%), ZambiaSummary of Operating and Financial Data For the three months ended Â ForÂ theÂ yearsÂ ended Â 12/31/24 9/30/24 Change 12/31/24 12/31/23 Change 12/31/22 Open pit tonnes mined (000s) 35,354Â 36,809Â (4) % 140,866Â 113,633Â 24Â % 98,340Â Â Â Â Â Open pit ore 10,596Â 6,178Â 72Â % 26,064Â 26,030Â 0Â % 20,277Â Â Â Â Â Open pit waste 24,758Â 30,631Â (19) % 114,802Â 87,603Â 31Â % 78,063Â Average grade (grams/tonne) Â Open pit mined 0.61Â % 0.55Â % 11Â % 0.55Â % 0.51Â % 8Â % 0.61Â % Â Processed 0.71Â % 0.53Â % 34Â % 0.53Â % 0.49Â % 8Â % 0.52Â % Tonnes processed (000s) 6,858Â 6,380Â 7Â % 25,783Â 26,797Â (4) % 25,166Â Recovery rate 93Â % 91Â % 2Â % 90Â % 89Â % 0Â % 93Â % Copper produced (kt)a 46Â 30Â 53Â % 123Â 118Â 4Â % 121Â Copper sold (kt)a 36Â 26Â 38Â % 109Â 113Â (3) % 125Â Revenue ($ millions) 260Â 213Â 22Â % 855Â 795Â 8Â % 868Â Cost of sales ($ millions) 177Â 187Â (5) % 704Â 723Â (3) % 666Â Income ($ millions) 79Â 26Â 204Â % 135Â 37Â 265Â % 180Â EBITDA ($ millions)b 133Â 86Â 55Â % 379Â 294Â 29Â % 403Â EBITDA marginc 51Â % 40Â % 28Â % 44Â % 37Â % 19Â % 46Â % Capital expenditures ($ millions) 186Â 79Â 135Â % 469Â 306Â 53Â % 405Â Â Â Â Â Minesite sustainingb 73Â 62Â 18Â % 312Â 223Â 40Â % 360Â Â Â Â Â Projectb 113Â 17Â 565Â % 157Â 83Â 89Â % 45Â Cost of sales ($/lb) 2.27Â 3.27Â (31) % 2.94Â 2.91Â 1Â % 2.42Â C1 cash costs ($/lb)b 1.89Â 2.53Â (25) % 2.23Â 2.29Â (3) % 1.89Â All-in sustaining costs ($/lb)b 3.14Â 3.94Â (20) % 3.85Â 3.48Â 11Â % 3.63Â a.Starting in 2024, we have presented our copper production and sales quantities in tonnes rather than pounds (1 tonne is equivalent to 2,204.6 pounds). Production and sales amounts for prior periods have been restated for comparative purposes. Our copper cost metrics are still reported on a per pound basis. b.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.c.Represents EBITDA divided by revenue.Safety and Environment For the three months ended For the year ended 12/31/24 9/30/24 12/31/24 12/31/23 LTI 0 0 3 3 LTIFR8 0.00 0.00 0.19 0.23 TRIFR8 0.23 0.00 0.37 0.31 Class 19 environmental incidents 0 0 0 0Financial ResultsQ4 2024 compared to Q3 2024Copper production in Q4 2024 was 53% higher than Q3 2024 due to higher throughput, grades and recoveries. Copper sales were lower than copper production due to a prolonged shutdown at one of the third-party smelters that processes a portion of Lumwanaâ€™s concentrate. Alternative plans are underway to have our other smelters process additional concentrate in the near term.Cost of sales per pound7 and C1 cash costs per pound6 were 31% and 25% lower, respectively, than Q3 2024 primarily due to higher grades processed, higher recoveries and the benefit of diluting the fixed costs over more production. In Q4 2024, all-in sustaining costs per pound6 decreased by 20% compared to Q3 2024, primarily driven by lower C1 cash costs per pound6 and lower minesite sustaining capital expenditures6 on a per pound basis. Capital expenditures were 135% higher compared to Q3 2024 due to an increase in both project and minesite capital expenditures6. Project capital expenditures6 increased by 565% primarily reflecting down payments on the order of long lead items for the Lumwana Super Pit Expansion project, which includes the mining fleet. The increase in minesite sustaining capital expenditures6 of 18% was mainly due to timing of projects. 2024 compared to 2023In 2024, copper production increased by 4% compared to 2023, primarily due to higher grades processed and higher recoveries, partially offset by lower throughput. Copper sales were lower than copper production due to a prolonged shutdown at one of the third-party smelters that processes a portion of Lumwanaâ€™s concentrate. Alternative plans are underway to have our other smelters process additional concentrate in the near term. In 2024, cost of sales per pound7 was in line with 2023 as higher depreciation expense was largely offset by lower C1 cash costs per pound6. C1 cash costs per pound6 were 3% lower compared to 2023 due to higher grades processed, reduced mining costs reflecting an increase in mining efficiencies and higher capitalized stripping. All-in sustaining costs per pound6 in 2024 increased by 11% compared to 2023, mainly due to higher minesite sustaining capital expenditures6.In 2024, capital expenditures increased by 53% compared to 2023, primarily related to higher minesite sustaining capital expenditures6 resulting from higher capitalized waste stripping, reflecting an increase in the strip ratio. This was combined with higher project capital BARRICK YEAR-END 2024 39 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSexpenditures6 reflecting down payments on the order of long lead items for the Lumwana Super Pit Expansion project, which includes the mining fleet.2024 compared to Guidance 2024 Actual 2024 Guidance Copper produced (M lbs) 123 120 - 140 Cost of sales7 ($/oz) 2.94 2.50 - 2.80 Total cash costs6 ($/oz) 2.23 1.85 - 2.15 All-in sustaining costs6 ($/oz) 3.85Â 3.30 - 3.60Copper production in 2024 was within the guidance range. All cost metrics were above the guidance ranges, mainly due to the impact of higher

power costs, as efforts to offset the power grid instability included co-generation of power through diesel generators and higher royalties. BARRICK YEAR-END 2024 40 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSOther Mines - Copper Summary of Operating and Financial Data For the three months ended 12/31/24 9/30/24 Copper production (kt)a Cost of sales ($/lb) C1 cash costs ($/lb)b All-in sustaining costs ($/lb)b Capital Expend-ituresc Copper production (kt)a Cost of sales ($/lb) C1 cash costs ($/lb)b All-in sustaining costs ($/lb)b Capital Expend-ituresc ZaldÃvar (50%) 11 4.22Â 3.11Â 3.98Â 16Â 10 4.04Â 2.99Â 3.45Â 9Â Jabal Sayid (50%) 7 2.02Â 1.29Â 1.44Â 5Â 8 1.76Â 1.54Â 1.76Â 5Â For the years ended 12/31/24 12/31/23 Copper production (kt)a Cost of sales ($/lb) C1 cash costs ($/lb)b All-in sustaining costs ($/lb)b Capital Expend-ituresc Copper production (kt)a Cost of sales ($/lb) C1 cash costs ($/lb)b All-in sustaining costs ($/lb)b Capital Expend-ituresc ZaldÃvar (50%) 40 4.09Â 3.04Â 3.58Â 42Â 40 3.83Â 2.95Â 3.46Â 44Â Jabal Sayid (50%) 32 1.77Â 1.37Â 1.56Â 19Â 32 1.60Â 1.35Â 1.53Â 23Â a.Starting in 2024, we have presented our copper production and sales quantities in tonnes rather than pounds (1 tonne is equivalent to 2,204.6 pounds). Production and sales amounts for prior periods have been restated for comparative purposes. Our copper cost metrics are still reported on a per pound basis. b.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.c.Includes both minesite sustaining and project capital expenditures6. Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A. ZaldÃvar (50% basis), ChileCopper production for ZaldÃvar in Q4 2024 was 10% higher than Q3 2024 driven by higher throughput. Cost of sales per pound7 and C1 cash costs per pound6 in Q4 2024 were both 4% higher than Q3 2024 primarily driven by processing of higher-cost inventory mined in prior periods. All-in sustaining costs per pound6 increased by 15% compared to Q3 2024, primarily due to higher minesite sustaining capital expenditures6 driven by increased spend on components, combined with higher C1 cash costs per pound6. 2024 Actual 2024 Guidance Copper produced (kt) 40 35 - 40 Cost of sales7 ($/lb) 4.09Â 3.70 - 4.00 C1 cash costs6 ($/lb) 3.04Â 2.80 - 3.10 All-in sustaining costs6 ($/lb) 3.58Â 3.40 - 3.70Copper production in 2024 was at the top end of the guidance range. Cost of sales per pound7 was above the guidance range mainly due to the impact of higher depreciation, while both C1 cash costs per pound6 and all-in sustaining costs per pound6 were within the guidance ranges. This investment, of which we are not the operator, continues to be a non-core part of our portfolio.Jabal Sayid (50% basis), Saudi ArabiaJabal Sayid's copper production in Q4 2024 was slightly below Q3 2024 driven by lower feed grade, as per the mine plan. Cost of sales per pound7 in Q4 2024 was 15% higher than Q3 2024 mainly due to higher depreciation expense, partially offset by lower C1 cash costs per pound6. C1 cash costs per pound6 were 16% lower mainly due to the impact of increased gold by-product credits. All-in sustaining costs per pound6 were 18% lower than Q3 2024, mainly due to lower C1 cash costs per pound6 with minesite sustaining capital expenditures6 consistent across quarters. 2024 Actual 2024 Guidance Copper produced (kt) 32 25 - 30 Cost of sales7 ($/lb) 1.77Â 1.75 - 2.05 C1 cash costs6 ($/lb) 1.37 1.40 - 1.70 All-in sustaining costs6 ($/lb) 1.56Â 1.70 - 2.00Copper production in 2024 exceeded the upper end of the guidance range due to higher than planned feed grades. Cost of sales per pound7 was at the low end of the guidance range driven by the benefit of diluting the fixed costs over more tonnes based on the strong production results. C1 cash costs per pound6 and all-in sustaining costs per pound6 were below the guidance ranges due to higher gold by-product credits in addition to the strong production results as per above. BARRICK YEAR-END 2024 41 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSGrowth Project Updates Goldrush Project, Nevada, USA17Goldrush, which is included within Cortez, is expected to be a long-life underground mine with anticipated annual production in excess of 400,000 ounces per year (100% basis) by 2028.In Q4 2024, ventilation shaft sinking and installation of two underground primary fans were completed, the first of two planned vent shafts which enable increased mining rates. The initial Horse Canyon surface access development has also been completed. The water management infrastructure construction is in progress in Horse Canyon and the Pine Valley district.As at DecemberÂ 31, 2024, project spend was $436 million on a 100% basis (including $13 million in Q4 2024) inclusive of the exploration declines. This capital spent to date, together with the remaining expected pre-production capital, is still anticipated to be near the approximate $1 billion initial capital estimate for the Goldrush project (100% basis).Fourmile, Nevada, USA16Fourmile, located adjacent to Goldrush, is a 100% owned Barrick asset in Nevada and has the potential to be a standalone Tier One Gold Asset1. The current focus is on exploration drilling with promising results to date that support the potential to significantly increase the modeled extents of the declared mineral resource within the 2.5km of prospective Wenban stratigraphy, as well as to uplift the grade. A dedicated Barrick project development team and budget are targeting the extension of the existing mineral resources, while also evaluating an independent surface portal access from Bullion Hill, which would decouple the evaluation of the project from the existing Goldrush development and ultimately complement the current Goldrush multi-purpose development. Footwall development along the strike of the Fourmile orebodies would initially be used for underground exploration drilling and then later be re-used for mine haulage. During Q4 2024, geotechnical drilling was completed to cover nearly the first 1km of the initial assessment of the Bullion Hill portal. Exploration and resource definition drilling in 2024 exceeded the planned meters, confirming the geologic model and supporting the decision to progress to a prefeasibility study in 2025. In the south, at Rose and Blanche, the mineralized breccias have now been constrained at depth, along with concurrent growth in the modeled widths of shallower mineralization, providing substantial upgrades in the extents of higher confidence areas within the resource model. To the north, drilling at Sophia and Dorothy tested and confirmed the continuity of the structurally controlled brecciation within the broader upside model. This work is reflected in the current Fourmile resource estimate and as expected, has significantly increased the inferred resources compared to year-end 2023 and exploration upside. Barrick anticipates Fourmile will be incorporated into the NGM joint venture, at fair market value, if certain criteria are met. As at DecemberÂ 31, 2024, we had spent $46 million in 2024 (including $16 million in Q4 2024). For 2025, we expect to spend $75 to $85 million as we continue to expand the upside and continue conversion drilling in the known deposits. This will also cover additional study costs as we commence the prefeasibility study in 2025. NGM TS Solar Project, Nevada, USAThe TS Solar project is a 200 MW photovoltaic solar farm located adjacent to NGMâ€™s TS Power Plant and interconnected with the existing plant transmission infrastructure. Now complete, the project will supply renewable energy to NGMâ€™s operations and is expected to deliver a reduction of 234kt of CO2 equivalent emissions per annum, equating to an 8% decrease from NGMâ€™s 2018 baseline.In Q4 2024, the remaining Phase 2 array performance testing was completed and all milestones were achieved to declare commercial operation. As at DecemberÂ 31, 2024, project spend was $300 million (there was no material spend in Q4 2024) out of an estimated capital cost of $310 million (100% basis).Ren, Nevada, USARen is a new ore deposit at Goldstrike Underground and a key expansion project at Carlin. Located north of Goldstrike Undergroundâ€™s Meikle and Banshee deposits, Ren is anticipated to produce an average of 140,000 ounces per year (100% basis) once in full production in 2027.To develop the deposit, the existing exploration drift will be duplicated, allowing for increased ventilation and secondary egress into the working area. Once completed, two additional exploration drilling platforms will be constructed to support further drilling on the project allowing for both the conversion of the existing resource and further growth of the deposit. To support production mining of the deposit, an additional set of twin declines will be driven from the Betze-Post open pit to the north with the intent to provide life of mine ventilation to the deposit as well as a direct path for material to be hauled and hoisted out via the existing Meikle Headframe. To complete the project, a 7 meter ventilation shaft will be sunk 550 meters to serve as an exhaust raise and utility conduit for the orebody.During the fourth quarter, the focus was on advancing the twin exploration drift development to the exploration drilling platforms, installing highwall stabilization & surface utilities for the new twin declines and drilling additional dewatering wells. Twin decline development started with portal set installation. The ventilation shaft surface pad and utilities were completed in advance of shaft sinking activities which are expected to begin in Q1 2025.As at December 31, 2024, project spend was $72 million out of an estimated capital cost of $410 to $470 million (100% basis).Donlin Gold, Alaska, USAOver the past three years the focus of the Donlin Gold team has centered on building ore body knowledge around the controls on mineralization through detailed mapping and infill grid drilling. The tightly spaced drill grids focused on the depositâ€™s three main structural domains (ACMA, Lewis and Divide) and supported the classification of inferred and indicated resources in the current Donlin Gold resource estimate as provided in Barrickâ€™s 2024 year-end Mineral BARRICK YEAR-END 2024 42 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSReserves and Resources disclosures, but have not yet defined a spacing that would support the declaration of measured resources underpinned by the appropriate modifying factors. Trade-off studies and analysis on project assumptions, inputs and design components for optimization (mine engineering, metallurgy, hydrology, power and infrastructure) have continued through 2024.Donlin Gold, in collaboration with Calista and The Kuskokwim Corporation, supported important initiatives in the Yukon-Kuskokwim region, including education, health, safety, cultural traditions and environmental programs. Further, Donlin Gold collaborated with Calista and the village of Crooked Creek and engaged state officials, the U.S. Army Corps of Engineers, members of the U.S. congressional delegation and with senior leadership from the U.S. Department of the Interior as part of ongoing outreach to emphasize the thoroughness of the projectâ€™s environmental review and permitting procedures, as well as on the strong partnership between Donlin Gold and the Alaska Native Corporations who own the mineral resource and land. The 2025 work program has now been defined and agreed to by both Barrick and NOVAGOLD to continue to move the Donlin Gold project up the value curve. Focus continues to be on updating the resource model; modifying factors to support mine design and scheduling; optimizing the power sources and delivery, infrastructure constructability review, and flow sheet; mitigating the technical challenges; advancing the remaining project permitting; defending challenges to the existing permits; and exploring further partnership opportunities to unlock value for our Alaskan partners and communities.Pueblo Viejo Expansion, Dominican Republic18The Pueblo Viejo Life of Mine Expansion continues and with the Process Plant expansion now complete, the focus is on the Naranjo Tailings Storage Facility. The feasibility study has now been completed and advancement of all critical supply chain activities has commenced including releasing tenders for all major construction contracts and long lead procurement while continuing to advance the process to select an engineering partner. Field work has also kicked off with the construction of a road that will gain access to the temporary water management structures and support the overall schedule of having the starter dam completed, ahead of the existing Llagal dam reaching capacity. Â Â Â Â Resettlement work continues to advance with over 100 homes complete and 300 more under construction. Additionally, the potable water treatment plant is now mechanically complete and all common community facilities are under construction including the new elementary school, parks and baseball diamond. As at DecemberÂ 31, 2024, total project spend was $1,130 million (including $17 million in Q4 2024) on a 100% basis. The estimated capital cost of the plant expansion and mine life extension project has been updated from $2.1 billion and is expected to be approximately $2.6 billion (as previously guided during our Investor Day on November 22, 2024) based on the new estimate to complete the Naranjo Tailings Storage Facility inclusive of associated land acquisition and resettlement costs.Veladero Phase 7 Leach Pad, Argentina In November 2021, Minera Andina del Sol approved the Phase 7A leach pad construction project with Phase 7B subsequently approved in the third quarter of 2022. Construction on both phases includes sub-drainage and monitoring, leak collection and recirculation, impermeabilization, as well as pregnant leaching solution collection. Additionally, the north channel will be extended along the leach pad facility. Phase 7B construction was completed in December 2024 and is operating as intended. Overall for Phase 7, as at DecemberÂ 31, 2024, project spend was $159 million (including $11 million in Q4 2024) out of an estimated capital cost of $160 million (100% basis).Veladero Phase 8 Leach Pad, Argentina The construction of the phase 8 leach pad will be divided into three phases being 8A, 8B and 8C. In December 2024 the Phase 8A leach pad construction project was approved. Construction will start in Q1 2025 and is expected to be completed by Q1 2026. Construction of the phase includes cut, filling, sub-drainage and monitoring, leak collection and recirculation, impermeabilization, as well as pregnant leaching solution collection.Overall, for Phase 8, as at DecemberÂ 31, 2024, project spend was $10 million (including $7 million in Q4 2024) out of an estimated capital cost of $250-270 million (100% basis).Reko Diq Project, Pakistan19 At the end of 2024, Barrick completed a full update of the projectâ€™s 2010 feasibility study and 2011 expansion prefeasibility study and added 7.3 million tonnes of copper and 13 million ounces of attributable gold in probable reserves as at December 31, 202420. Once fully commissioned, the Reko Diq project is now projected to deliver 240,000 tonnes of copper production and 297,000 ounces of gold per year during Phase 1 increasing to 460,000 tonnes of copper and 520,000 ounces of gold during the first ten years (2034-2043) of Phase 2 (100% basis). This is based on an increased 45Mtpa process plant throughput in Phase 1 (from the original 40Mtpa) and 90Mtpa (from the original 80Mtpa) in Phase 2, following the grind size optimization work undertaken as part of the feasibility study. The total estimated capital cost of Phase 1 is $5.6-6.0 billion (100% basis, exclusive of capitalization of financing costs) to be spent between 2025-2029. On February 11, 2025, the Board of Directors conditionally approved the development of Phase 1 subject to the closing of up to $3 billion of limited recourse project financing. Assuming $3 billion of project financing, Barrickâ€™s share of the total partner equity contribution required to fund the construction of Phase 1 is expected to be $1.4-1.7 billion (exclusive of capitalization of financing costs). The total estimated capital cost of Phase 2 is $3.3-3.6 billion (100% basis, exclusive of capitalization of financing costs) to be spent between 2029-2033. During the year, additional personnel were recruited and mobilized for the project with the majority of new hires from Balochistan. Site works were advanced with a focus on early works infrastructure (perimeter fence, bulk earthworks, camp and water pond and pipeline for construction) and the project received approval of its early works ESIA. In addition, the full project ESIA was submitted BARRICK YEAR-END 2024 43 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSto the Balochistan Environmental Protection Agency during Q4 2024 and approval is expected in Q1 2025. With the completion of the updated feasibility study, early works construction has commenced during Q1 2025 with a final investment decision to proceed with development of Phase 1 expected later in 2025 subject to joint venture approvals and closing of the project financing. First production is targeted by the end of 2028.As at DecemberÂ 31, 2024, total spend on the feasibility update was $186 million (including $32 million in Q4 2024) (100% basis). This amount is recorded in exploration, evaluation and project expense and excludes amounts relating to fixed asset purchases that were capitalized. Capital expenditures commenced in Q2 2024, with total capitalized spend of $168 million (including $109 million in Q4 2024) (100% basis).For 2025, as construction advances, the capital spend for the year is anticipated to be approximately $1 billion (100% basis).Loulo-Gounkoto Solar Project, MaliThis project entailed the design, supply and installation of a 40 MW (48 MW peak) photovoltaic solar farm with a 36 MVA battery energy storage system to complement the existing installed 20 MW plant. Now complete, this project is projected to deliver a reduction of 23 million liters of fuel in the power plant, which translates to savings of approximately 63kt of CO2 equivalent emissions per annum. The project was constructed in two phases of solar and battery storage and was completed 12 months ahead of schedule. Continuous optimization of the photovoltaic solar farm is ongoing and performing above the targeted power blend. The project was completed in Q1 2024 and the final project spend of $73 million finished below the original capital cost of approximately $90 million (100% basis).Kibali Solar Project, DRCThis project entails the design, supply and installation of a 16 MW photovoltaic solar farm with a 15 MW battery energy storage system to complement the existing hydroelectric power stations raising the renewable component of the mineâ€™s energy mix from 81% to 85%. The completion of this project is projected to deliver a 53% reduction in fuel consumption in the power plant. The project is on schedule with completion planned for Q2 2025. Earthworks progressed well during the quarter and are now complete. All long lead equipment has been ordered and tracker and transformer installation commenced during Q4 2024. Upcoming areas of focus include the civil construction for substations and ramming of posts for the solar field installation. As at DecemberÂ 31, 2024, project spend was $32 million (including $9 million in Q4 2024) out of an estimated capital cost of $55 million (100% basis).Jabal Sayid Lode 1, Saudi ArabiaThe scope of this project is to develop and mine a new orebody, located less than a kilometer from the existing lode at Jabal Sayid. The project design includes underground capital development as well as ventilation, paste plant and underground mining infrastructure upgrades. Stoping commenced during Q3 2023 with development for 2024 completed on schedule. The ventilation raise bore shaft is fully equipped and the reaming of the fresh air ventilation shaft has been completed. The reagent plant and direct flow reactor has been completed. All construction activities at the paste plant have been completed and commissioning commenced during Q2 2024. The project is 100% complete.As at DecemberÂ 31, 2024, project spend was $43 million (there was no material spend in Q4 2024) in line with the estimated capital cost of approximately $43 million (100% basis).Lumwana Super Pit Expansion, Zambia21The Lumwana Super Pit Expansion is projected to deliver 240,000 tonnes of copper production per year, from a 52Mtpa process plant expansion, with a mine life of more than 30 years. Following the successful transition in 2023 to the owner stripping model we have already seen the 20% planned cost and efficiency benefit which aligns well with the interim mine volumes and longer-term expansion strategy.The feasibility study has now been completed. Long lead equipment selection is finalized and ordering of key packages commenced during Q3 2024 to enable preparation of vendor data required for detailed engineering. Delivery schedules of vendor data and equipment remains in line with the project schedule. Geotechnical site investigation drilling of the feasibility study project layout is

complete.Enabling construction works remain on schedule to commence in 2025 with first production targeted for 2028. The building of the first accommodation units for the construction camp progressed to 70% completion during the quarter. The TSF design and reviews have been completed and are included in the capital cost estimate. The field work on the ESIA was completed during Q1 2024 and approval of the ESIA report was received from the Zambia Environmental Management Agency during Q4 2024.As at DecemberÂ 31, 2024, the total spend on the feasibility study was $38 million (including $2 million in Q4 2024), in line with the budgeted study cost. For 2024, we also capitalized $120 million (including $113 million in Q4 2024) related to early works, infrastructure improvements and down payments on fleet and long lead equipment for the project. The total project capital cost is expected to be $2 billion based on the feasibility study with capital spend for 2025 estimated at $0.6 billion. BARRICK YEAR-END 2024 44 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSExploration and Mineral Resource Management The foundation of our exploration strategy is a deep organizational understanding that discovery through exploration is a long-term investment and the main value driver for the business - not a process. Our exploration strategy has multiple elements that all need to be in balance to deliver on Barrick's business plan for growth and long-term sustainability.First, we seek to deliver projects of a short- to medium-term nature that will drive improvements in mine plans. Second, we seek to make new discoveries that add to Barrick's Tier One Gold Asset1 portfolio. Third, we work to optimize the value of our major undeveloped projects and finally, we seek to identify emerging opportunities early in their value chain and secure them by an earn-in or outright acquisition, where appropriate.During 2024, our exploration portfolio was upgraded in all regions with the addition of new projects, while we have significantly rationalized our ground holdings where we saw little potential. In Canada, we are now drill testing the new targets we identified during 2023. In the United States, we have progressed multiple exciting prospects outside the Carlin district with further consolidation in progress. In Nevada, the team continues to identify new opportunities around our Carlin operations, with large cells of Carlin alteration and anomalism discovered under cover being evaluated, while material brownfields progress delivers conversion opportunities. In Latin America, a portfolio of exciting targets in Peru were progressed to drilling, while we advanced permitting on a prospective portfolio in Ecuador. We continue to evaluate near mine targets around Pueblo Viejo while developing a regional exploration portfolio in the Dominican Republic, and we have entered Jamaica through a country-wide alliance. Our work in Argentina is focused around Veladero and providing optionality to the operation. In the Africa and Middle East region, we have confirmed high-grade mineralization on key structures around our deposits in Mali and DRC, notably the Baboto and ARK targets, and in Tanzania we expanded our ground holding significantly while testing new targets around North Mara and Bulyanhulu. In Saudi Arabia, early drilling at the Umm Ad Damar project has identified mineralization along multiple trends. We also continue to evaluate opportunities across the Asia-Pacific region as we test targets around Reko Diq in Pakistan and across Japan. Through 2025, we plan to maintain a healthy balance in our exploration focus between early-stage and advanced exploration projects to deliver on Barrickâ€™s growth and long-term business plan.The following section summarizes the exploration results from Q4 2024.North AmericaCarlin, Nevada, USA22Drilling to expand the footprint of Leeville, including both Miramar and Fallon (formerly North Leeville) continues to confirm the geologic model. As we move to indicated resource conversion at Miramar, drilling along the Veld fault in Q4 confirmed the high grade ore control with NTC-24-021 reporting 22.1 meters at 11.61 g/t Au (true thickness). Northeast of Fallon, a new access road for framework surface drilling has exposed broad zones of structurally controlled alteration and multiple intrusive dikes cutting through the unfavorable Upper Plate Cover, further validating new target concepts beyond the footprint of Leeville, with results from surface mapping and sampling now defining several targets within the four-kilometer long northeast trending corridor. The first framework hole testing the prospectivity of the lower plate carbonates is planned for Q2 2025.In the Carlin Basin, adjacent to Gold Quarry, wide spaced RC drilling through post mineral cover has defined a multi-kilometer footprint of low-level gold and Carlin style alteration and geochemistry in the less prospective upper plate stratigraphy. The anomalism observed is along trend of, and controlled by the Good Hope Fault, an important ore controlling feature at Gold Quarry. Two deeper core holes, 3.5km apart, returned hundreds of meters of alteration extending from the bedrock contact into the favorable Lower Plate carbonate stratigraphy. Work will continue to define the extent of the hydrothermal system and delineate vectors to additional targeted drill holes in 2025.Cortez, Nevada, USAStep-out drilling was completed during Q4 at the Hanson target, approximately 235 meters beneath the Cortez Hills underground operation. Drilling to-date continues to confirm the geologic model and define the open, up dip, opportunity beyond the â€œHeart of Hansonâ€, a resource with good potential to be added to reserves in the upcoming years. This early-stage drilling continues to provide confidence in the resource growth below the existing infrastructure of the Cortez Hills underground mine that is expected to add material life-of-mine extensions. Follow-up drilling is planned for 2025.At Swift, drilling continued to better define the structure and stratigraphic understanding in the southwest portion of the property where previous drilling has identified widespread alteration and anomalous gold. The second framework hole was completed in December 2024 and encountered signification structural disruptions to the expected stratigraphy, omitting the most prospective slope facies rocks. Weak to moderate Carlin type alteration occurred in and adjacent to the larger fault zones further expanding the footprint of alteration in the area. Assays are currently pending.Patris, Quebec, CanadaPermitting was secured to complete drill for till target delineation work across the sedimentary basins on the property. The drilling program is expected to begin in early Q1 2025 and will continue to define the extent of strong anomalism along the La Pause Fault, following up on the results from the 2024 programs.Latin America & Asia-PacificPueblo Viejo, Dominican RepublicAt Pueblo Viejo, target delineation work concluded in the Zambrana area, one kilometer to the east of the Moore pit. Favorable lithology, alteration, soil and rock chip geochemical anomalies and an induced polarization, high chargeability geophysical anomaly define two targets and drilling commenced in January 2025. BARRICK YEAR-END 2024 45 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSRegional Exploration, Dominican RepublicAt the Restauracion District, located in the Western Dominican Republic, field work commenced during Q4. These activities are focusing on the Neita Norte Property (part of the earn-in agreement with Unigold) and on the adjacent 100% Barrick-owned permits. Three large areas of interest have been defined with further, more focused work planned for the first half of 2025.JamaicaEarly-stage exploration activities continued in all areas under the earn-in agreement with Geophysx Jamaica Ltd. (Geophysx). Fieldwork focused on regional-scale geological evaluation (including assessment of post-mineral cover thickness) and camp-scale delineation of priority areas. Drill-ready targets are expected to be defined by Q3 2025.Veladero District, ArgentinaAt Argenta Norte, located one kilometer to the northwest of Veladeroâ€™s Argenta pit, a six drillhole follow-up campaign was completed. These partially validated the exploration model, confirming high-sulfidation mineralization and some continuity between holes. Assays are expected during Q1 2025.At Domo Negro, following the framework drilling campaign that intersected a previously reported shallow low-sulfidation vein with bonanza gold results, detailed geological mapping, sampling, trenching and a ground magnetic survey were completed. Two structurally controlled epithermal gold targets were defined, and a follow-up drilling program is scheduled to be completed in Q1 2025.PeruSeveral consolidated areas of interest in Peru are being advanced with projects at various stages, from early-stage reconnaissance work to drill-ready targets.In the Libelula District, drilling commenced on the first of three high-sulfidation epithermal gold targets. The first hole in the Libelula system intercepted multiple hydrothermal events confirming the exploration model. Assays are expected during Q1 2025.In the Ccoropuro District, located in southern Peru, permitting is on track to commence drilling in H2 2025.EcuadorFollowing Barrickâ€™s successful participation in a public tender process conducted by ENAMI EP (the state-owned mining company of Ecuador) and the signing of a commercial framework agreement with ENAMI EP, Barrick continued with prospecting work in the southern Jurassic Belt, which hosts the Mirador and Fruta del Norte deposits.Reko Diq, Pakistan23At Reko Diq, the exploration team is progressing with the re-logging of historic drill holes, re-interpreting legacy datasets and modeling historical and newly generated targets. Additionally, the team is completing geological and structural mapping at various scales, with infill geochemical surveys ongoing in parallel. Results are being integrated to define a pipeline of high potential projects with several drillholes completed during the quarter. These are the first exploration holes completed in the Reko Diq district, since 2009.At H14, one of the Western Porphyries, a deep drillhole confirmed open, high-grade mineralization at depth, 250m west of the existing drilling. At the Tanjeel supergene copper enrichment blanket, two holes intercepted high-grade copper sulfide minerals and confirmed potential for hypogene mineralization below the supergene copper enriched blanket, for the first time. At the newly defined Gurich gold-copper porphyry-breccia complex several drillholes were completed during Q4, confirming strong mineralization near surface in a new northwest trending corridor, located to the west of H8 which remains open. Partial assays were received for hole RD-925 (897 meters), confirming copper and gold mineralization with an intersection of 598 meters at 0.43% Cu and 0.1 g/t Au from 102 meters, including an interval of 170 meters with 0.57% Cu and 0.13 g/t Au from 340 meters. Other assays are pending and are expected during Q1 2025.Porgera, Papua New GuineaDrilling on the Wangima priority target continued in Q4 with over 23,800m of diamond drilling completed in 2024. Reprocessing and inversion modeling of the projectâ€™s geophysical data was completed with new surface and underground targets generated. Exploration activities have expanded to include mapping and sampling of prospects north of the current Wangima drilling areas. Initial surface mapping has indicated extensions to mineralization, with promising results from surface sampling programs. Further evaluation of these targets will continue through 2025.Japan Gold Strategic Alliance, JapanAt Togi, the Akasaka target was tested with two drill holes during Q4. These holes partially confirmed the exploration model for a preserved shallow low-sulfidation system.At Ebino, located near the Hishikari low-sulfidation deposit, two drill-ready low sulfidation targets were defined. Drilling is expected in Q2 2025.At the Hakuryu area, located in the North of Japan, one low-sulfidation target has been defined. Drilling is expected to be completed in Q2 2025, following the winter season.Africa and Middle EastLoulo-Gounkoto, Mali24At Baboto, exploration results during Q4 continue to highlight the potential for the complex to deliver a significant orebody. Drilling has intersected multiple sub-parallel zones of mineralization beneath the pit and extended the mineralized system along strike which remains open in multiple directions, including down plunge along several emerging high-grade ore-shoots. Near surface, opportunities to expand the existing open pit have been identified where high-grade intersections have been returned at the base of the pit shell such as BNRC355: 7 meters at 10.06 g/t Au. Meanwhile, results received to date on the sub-parallel East Zone have been variable with high grade controls not yet well understood; however, the presence of multiple very high gram-meter intersections, including BNRC381: 15 meters at 25.13 g/t Au, including 5 meters at 72.47 g/t Au, highlights the potential to contribute significantly to the overall mineral inventory. The geological BARRICK YEAR-END 2024 46 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSmodel is being updated to explore and extend the system more effectively while a delineation drilling program will commence once the temporary suspension of operations is lifted (refer to page 9 for further details). A full geological review of the Loulo-District will be completed early in 2025 to reinforce the base of the resource triangle while high priority targets are advanced, such as Barika, located south of Yalea where open, high-grade mineralization has been intersected showing similarities in style and pathfinders to the main Yalea system. Tongon, CÃ´te Dâ€™Ivoire25Systematic near mine exploration has identified additional inventory and upside along key prospective corridors, which are designated for aggressive follow-up in 2025.At Jubula East, drilling has demonstrated a shoot of plunging high-grade mineralization. Though small in scale, it demonstrates the potential for additional, small footprint, value-adding zones of oxide mineralization to be discovered within 10km of the Tongon plant: JBERC025: 18 meters at 4.64 g/t Au, JBERC088: 12 meters at 9.81 g/t Au.At Koro A2, drilling targeting a sub-parallel structure to the east of the main system returned several significant intersections highlighting a new high-grade shoot, with potential for others; KKHRC054: 13 meters at 3.73 g/t Au and KKHRC090: 9 meters at 3.49 g/t Au. Meanwhile step-out drilling along the Koro A2 main structure succeeded in extending the system over 180 meters southward. The target is part of a larger mineralized corridor that remains open along strike and is sparsely tested.Kibali, DRC26At ARK, drilling is in progress following a review of the wider ARK corridor in Q3 2024, which highlighted multiple open-pit and underground discovery opportunities. Results continue to extend and define mineralization, as well as demonstrate zones of bonanza grade potential, such as on the emerging lens between Rhino and Agbarabo highlighted by RHGC2053: 12.00 meters at 231.15 g/t Au, and RHDD0079: 8.80 meters at 17.30 g/t Au, hosted by strong sericite-silica-pyrite altered conglomerate. Additionally, drilling down plunge of the Upper Rhino lens demonstrates the continuity of the lode: RHGC2066: 24.00 meters at 3.12 g/t Au and RHGC2067: 22.00 meters at 2.74 g/t Au. Furthermore, drilling at Kombokolo commenced this quarter, confirming the down dip extension of the mineralized system. An intensive exploration drilling campaign is planned for 2025 to assess the significant overall potential of the ARK system.At KCD, drilling on the down-plunge extension continued in Q4 supporting the continuation of high-grade mineralization related to the 3000 and 5000 lodes demonstrated by: KCDU7507: 34.04 meters at 3.9 g/t Au. Additionally, a deep, directional, drilling program commenced to intersect the orebody an additional 500 meters down-plunge beyond the known mineralization (3000, 5000 and 9000 lodes) to guide decisions on future infrastructure upgrades. North Mara and Bulyanhulu, TanzaniaAt North Mara, during the wet season, a target generation session was completed, aiming to replenish the base of the resource triangle and re-prioritize existing targets for follow-up. The review highlighted multiple, poorly tested early-stage target areas demonstrating key prospectivity drivers including increased structural complexity and rheological contrasts. The highest priority targets will be motivated for follow-up and drilling in 2025. On the Bulyanhulu Inlier, geochemical AC drilling and scout RC drilling returned encouraging results, identifying multiple kilometer scale gold, copper and pathfinder geochemical anomalies, associated with both Reef 1 and Reef 2-style geological settings. Framework diamond drilling is planned for Q1 2025 to guide follow-up drilling in the dry season in Q2 2025. At Nzega, observations from reconnaissance mapping and framework AC drilling (under post-mineral cover) continue to validate the modeled geological setting and interpreted structural complexity indicative of a prospective setting for large orogenic gold systems. High-resolution geophysics is planned in Q1 2025 over most of the belt, including over 100km strike of sparsely tested, major structural corridors. This data will guide the planning of aggressive target generation programs in Q2 2025 while testing under extensive post-mineral cover which has preserved the discovery potential for additional major gold deposits in the belt. Jabal Sayid, Kingdom of Saudi ArabiaFull results have been received from the aircore and soil geochemistry screening program at Umm ad Damar, defining the paleosurface over 3.5km strike length under cover and at Jabal Sayid two paleosurface horizons have been constrained within the mining license. These prospective corridors will be explored at depth with appropriate geophysical techniques and diamond drilling in 2025 to assess the potential to deliver the next VMS discovery in the Jabal Sayid camp. BARRICK YEAR-END 2024 47 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSREVIEW OF FINANCIAL RESULTS Revenue ($ millions, except per ounce/pound data in dollars) For the three months ended ForÂ theÂ yearsÂ ended Â Â 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Gold 000s oz solda 965Â 967Â 3,798Â 4,024Â 4,141Â 000s oz produceda 1,080Â 943Â 3,911Â 4,054Â 4,141Â Market price ($/oz) 2,663Â 2,474Â 2,386Â 1,941Â 1,800Â Realized price ($/oz)b 2,657Â 2,494Â 2,397Â 1,948Â 1,795Â Revenue 3,327Â 3,097Â 11,820Â 10,350Â 9,920Â Copper 000s tonnes solda,c 54Â 42Â 177Â 185Â 202Â 000s tonnes produceda,c 64Â 48Â 195Â 191Â 200Â Market price ($/lb) 4.17Â 4.18Â 4.15Â 3.85Â 3.99Â Realized price ($/lb)b 3.96Â 4.27Â 4.15Â 3.85Â 3.85Â Revenue 260Â 213Â 855Â 795Â 868Â Other sales 58Â 58Â 247Â 252Â 225Â Total revenue 3,645Â 3,368Â 12,922Â 11,397Â 11,013Â a.On an attributable basis. b.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.c.Starting in 2024, we have presented our copper production and sales quantities in tonnes rather than pounds (1 tonne is equivalent to 2,204.6 pounds). Production and sales amounts for prior periods have been restated for comparative purposes. Our copper cost metrics are still reported on a per pound basis. Our 2024 gold production of 3.91 million ounces was within the guidance range of 3.9 to 4.3 million ounces. As previously disclosed, this was towards the lower end of the range mainly due to lower than planned production at Pueblo Viejo due to ramp-up issues which hindered our ability to increase throughput. This included mill failures, lower flotation plant availability, lower limestone production and unplanned maintenance at the autoclaves. This was combined with lower than planned production at NGM, mainly at Carlin as production was impacted primarily by the previously disclosed pit wall failure in the Gold Quarry open pit in Q1 2024, combined with increased ounces from Cortez processed at the Carlin roasters, to the overall benefit of NGM, and at Turquoise Ridge as the improvements in stabilizing the processing plant and increasing underground production in H2 took longer than planned. Gold production was further impacted by lower than planned production at Kibali, primarily driven by lower grades processed than planned. Copper production of 195 thousand tonnes for 2024 was at the midpoint of the guidance range of 180 to 210 million pounds.Q4 2024 compared to Q3 2024In Q4 2024, gold revenues increased by 7% compared to Q3 2024 primarily due to a higher realized gold price6, partially offset by slightly lower sales volume. The average realized price for the three month period ended DecemberÂ 31, 2024 was $2,657 per ounce versus $2,494 per ounce for Q3 2024. During Q4 2024, the gold price ranged from $2,537 per ounce to an all-time nominal high of $2,790 per ounce and closed the quarter at $2,609 per ounce. Gold prices in Q4 2024 continued to rise as a result of reductions in benchmark interest rates, geopolitical

tensions and global economic concerns, tempered by the strength of the trade-weighted US dollar. ATTRIBUTABLE GOLD PRODUCTION VARIANCE (000s oz)Q4 2024 compared to Q3 2024 In Q4 2024, attributable gold production was 137 thousand ounces higher than Q3 2024, primarily driven by stronger performances at Cortez mainly due to higher ore tonnes from both Cortez Hills underground and Goldrush; at Veladero (included in the â€œOtherâ€ category above) due to an increase in recoverable ounces placed on the leach pad; and at Turquoise Ridge reflecting higher tonnes processed. Attributable gold sales volumes were lower than attributable gold production, reflecting the restrictions placed by the Government of Mali during Q4 2024 on our ability to ship and sell gold from Loulo-Gounkoto.Copper revenues in Q4 2024 increased by 22% compared to Q3 2024, primarily due to higher copper sales volume, with the realized copper price6 only slightly lower. The average market price in Q4 2024 was $4.17 per pound versus $4.18 per pound in Q3 2024. In Q4 2024, the realized copper price6 was lower than the market copper price due to the impact of negative provisional pricing adjustments, whereas a positive provisional pricing adjustment was recorded in Q3 2024. During Q4 2024, the copper price ranged from $3.95 per pound to $4.59 per pound and closed the quarter at $3.95 per pound. Copper prices in Q4 2024 were influenced by concerns about slowing economic growth, especially in China, supply disruptions and a strengthening trade-weighted US dollar.Attributable copper production in Q4 2024 was 33% higher compared to Q3 2024 driven by higher throughput, grades and recoveries at Lumwana. BARRICK YEAR-END 2024 48 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS2024 compared to 2023In 2024, gold revenues increased by 14% compared to 2023, primarily due to a higher realized gold price6, partially offset by a decrease in sales volumes. The average market gold price for 2024 was $2,386 per ounce compared to $1,941 per ounce in 2023. In 2024, attributable gold production was 3,911 thousand ounces, or 143 thousand ounces lower than 2023 largely driven by NGM, mainly at Cortez and Carlin. At Cortez, this was due to lower leach ore mined at the Crossroads open pit and lower oxide ore mined from Cortez Hills underground, in line with the mine sequence, and at Carlin due to lower grades processed, lower recoveries and the reduction in open pit tonnes mined. These impacts were partially offset by increased production at Porgera (included in the â€œOtherâ€ category below) following the ramp-up of operations in 2024. Attributable gold sales volumes were lower than attributable gold production, reflecting the restrictions placed by the Government of Mali during Q4 2024 on our ability to ship and sell gold from Loulo-Gounkoto.ATTRIBUTABLE GOLD PRODUCTION VARIANCE (000s oz)Year ended DecemberÂ 31, 2024 Copper revenues for 2024 were 8% higher compared to 2023 due to a higher realized copper price6, partially offset by lower copper sales volume. In both years, the realized copper price6 was in line with the market copper price.Attributable copper production for 2024 was 4 thousand tonnes higher than 2023, mainly due to higher grades processed and higher recoveries at Lumwana. Production Costs ($ millions, except per ounce/pound data in dollars) For the three months ended ForÂ theÂ yearsÂ ended Â Â 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Gold Site operating costs 1,268Â 1,332Â 5,146Â 5,015Â 4,678 Depreciation 424Â 409Â 1,641Â 1,756Â 1,756 Royalty expense 112Â 106Â 405Â 371Â 342 Community relations 6Â 9Â 34Â 36Â 37 Cost of sales 1,810Â 1,856Â 7,226Â 7,178Â 6,813 Cost of sales ($/oz)a 1,428Â 1,472Â 1,442Â 1,334Â 1,241 Total cash costs ($/oz)b 1,046Â 1,104Â 1,065Â 960Â 862 All-in sustaining costs ($/oz)b 1,451Â 1,507Â 1,484Â 1,335Â 1,222 Copper Site operating costs 101Â 109Â 389Â 401Â 336 Depreciation 54Â 60Â 245Â 259Â 223 Royalty expense 22Â 17Â 67Â 62Â 103 Community relations 2Â 1Â 5Â 4Â 4 Cost of sales 179Â 187Â 706Â 726Â 666 Cost of sales ($/lb)a 2.62Â 3.23Â 2.99Â 2.90Â 2.43 C1 cash costs ($/lb)b 2.04Â 2.49Â 2.26Â 2.28Â 1.89 All-in sustaining costs ($/lb)b 3.07Â 3.57Â 3.45Â 3.21Â 3.18a.Gold cost of sales per ounce is calculated as cost of sales across our gold operations (excluding sites in closure or care and maintenance) divided by ounces sold (both on an attributable basis using Barrickâ€™s ownership share). Copper cost of sales per pound is calculated as cost of sales across our copper operations divided by pounds sold (both on an attributable basis using Barrickâ€™s ownership share). b.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.Q4 2024 compared to Q3 2024In Q4 2024, cost of sales applicable to gold was 2% lower compared to Q3 2024, primarily as a result of slightly lower sales volumes, partially offset by higher depreciation expense and increased royalty expense as a result of a higher realized gold price6. Our 45% interest in Kibali is equity accounted and we therefore do not include its cost of sales in our consolidated gold cost of sales. On a per ounce basis, cost of sales applicable to gold7 and total cash costs per ounce6, after including our proportionate share of cost of sales at our equity method investees, were 3% and 5% lower, respectively, than Q3 2024 primarily due to the changes in sales mix across the portfolio partially offset by higher royalties due to an increase in the realized gold price6 ($9/oz impact). In Q4 2024, gold all-in sustaining costs6 decreased by 4% on a per ounce basis compared to Q3 2024, primarily due to lower total cash costs per ounce6 as described above, and decreased general and administrative expenses. This was partially offset by higher minesite sustaining capital expenditures6. BARRICK YEAR-END 2024 49 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSIn Q4 2024, cost of sales applicable to copper was 4% lower than Q3 2024, primarily due to the impact of lower processing and maintenance costs at Lumwana, partially offset by higher copper sales volumes. Our 50% interests in ZaldÃvar and Jabal Sayid are equity accounted and therefore we do not include their cost of sales in our consolidated copper cost of sales. On a per pound basis, cost of sales applicable to copper7 and C1 cash costs6, after including our proportionate share of cost of sales at our equity method investees, decreased by 19% and 18%, respectively, compared to Q3 2024 primarily due to higher grades processed, higher recoveries and the benefit of diluting the fixed costs over more production at Lumwana. In Q4 2024, copper all-in sustaining costs6, which have been adjusted to include our proportionate share of equity method investees, were 14% lower per pound than Q3 2024, primarily reflecting lower C1 cash costs per pound6 and lower general and administrative costs, while minesite sustaining capital expenditures6 on a per pound basis were in line with Q3 2024. 2024 compared to 2023In 2024, cost of sales applicable to gold was 1% higher than the prior year primarily due to higher site operating costs and increased royalties as a result of a higher realized gold price6, partially offset by lower depreciation. On a per ounce basis, cost of sales applicable to gold7, after including our proportionate share of cost of sales at our equity method investees, and total cash costs per ounce6 were 8% and 11% higher, respectively, than the prior year, primarily due to lower production across the portfolio (resulting in reduced fixed cost dilution) together with higher electricity consumption, plant maintenance costs, and gas prices at Pueblo Viejo; lower grades processed and lower recoveries at Carlin; and higher royalties across all sites due to the increase in the realized gold price6 ($23/oz impact). In 2024, gold all-in sustaining costs per ounce6 increased by 11% compared to the prior year primarily due to higher total cash costs per ounce6, combined with higher minesite sustaining capital expenditures6.In 2024, cost of sales applicable to copper was 3% lower than the prior year, primarily due to lower volumes sold. Our 50% interests in ZaldÃvar and Jabal Sayid are equity accounted and therefore we do not include their cost of sales in our consolidated copper cost of sales. On a per pound basis, cost of sales applicable to copper7 after including our proportionate share of cost of sales at our equity method investees increased by 3%, compared to the prior year, primarily due to higher depreciation expense on a per pound sold basis. This was partially offset by lower C1 cash costs per pound6 of 1%, due to higher grades processed, reduced mining costs reflecting an increase in mining efficiencies and higher capitalized stripping at Lumwana.Copper all-in sustaining costs per pound6 were 7% higher than the prior year, primarily due to higher minesite sustaining capital expenditures6 resulting from higher capitalized waste stripping, reflecting an increase in the strip ratio at Lumwana, partially offset by lower C1 cash costs per pound6, as discussed above.2024 compared to Guidance2024 cost of sales applicable to gold7 and gold total cash costs6 were $1,442 and $1,065 per ounce, respectively, which were both higher than our guidance ranges of $1,320 to $1,420 per ounce and $940 to $1,020 per ounce, respectively. Gold all-in sustaining costs6 for 2024 of $1,484 per ounce were also higher than the guidance range of $1,320 to $1,420 per ounce. All gold cost metrics were higher than the guidance ranges mainly due to higher royalties due to the increase in the realized gold price6 ($25/oz impact) and changes in the sales mix across the portfolio.2024 cost of sales applicable to copper7 and copper all-in sustaining costs6 were $2.99 per pound and $3.45 per pound, respectively, which were both slightly higher than our guidance ranges of $2.65 to $2.95 per pound and $3.10 to $3.40 per pound, respectively, mainly due to the impact of higher power costs, as efforts to offset the power grid instability included co-generation of power through diesel generators and higher royalties at Lumwana related to the higher realized copper price6. 2024 C1 cash costs6 of $2.26 per pound was within our guidance range of $2.00 to $2.30 per pound. General and Administrative ExpensesÂ ($ millions) For the three months ended ForÂ theÂ yearsÂ endedÂ Â Â 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Corporate administration 19Â 25Â 95 101Â 125Â Share-based compensationa (10) 21Â 20 25Â 34Â GeneralÂ & administrative expenses 9Â 46Â 115 126Â 159Â 2024 Guidance ~$180 a.Based on US$15.71 share price as at DecemberÂ 31, 2024 (SeptemberÂ 30, 2024: US$20.45; 2023: US$18.09; 2022: US$17.21).Q4 2024 compared to Q3 2024In Q4 2024, general and administrative expenses decreased by $37 million compared to Q3 2024, primarily due to lower share-based compensation. The remeasurement of our share-based compensation liability during the current quarter resulted in a gain due to the decrease in our share price during Q4 2024.2024 compared to 2023General and administrative expenses in 2024 decreased by $11 million compared to the prior year due to lower corporate administration expenses attributed to reductions in employee and consultant costs, combined with lower share-based compensation expense as a result of a decrease in our share price. 2024 compared to GuidanceGeneral and administrative expenses in 2024 of $115 million were lower than guidance of ~$180 million. Corporate administration expenses of $95 million were below our guidance of ~$130 million, highlighting the continued benefit of our cost discipline, while share-based compensation expenses of $20 million were lower than our guidance of ~$50 million due to a lower share price during the current year. BARRICK YEAR-END 2024 50 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSExploration, Evaluation and Project Costs ($ millions) For the three months ended ForÂ theÂ yearsÂ ended Â Â 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Global exploration and evaluation 37Â 45Â 153 143Â 123Â Project costs: Reko Diq 32Â 30Â 126 60Â 14Â Lumwana 0Â 0Â 0 37Â 0Â Other 19Â 19Â 76 81Â 138Â Global exploration and evaluation and project expense 88Â 94Â 355 321Â 275Â Minesite exploration and evaluation 8Â 10Â 37 40Â 75Â Total exploration, evaluation and project expenses 96Â 104Â 392 361Â 350Â 2024 Actuals 2024 Guidance E&E 190 180 - 200 Project expenses 202Â 220 - 240 Total E&E and project expenses 392Â 400 - 440Q4 2024 compared to Q3 2024Exploration, evaluation and project expenses for Q4 2024 decreased by $8 million compared to Q3 2024. This was primarily due to lower global exploration and evaluation costs at Fourmile as the drilling activities are curtailed during the winter months which impacted Q4 2024.2024 compared to 2023Exploration, evaluation and project costs for 2024 increased by $31 million compared to 2023, primarily due to higher project costs at Reko Diq due to the ramp-up of project activities, partially offset by lower project costs at Lumwana as the pre-feasibility study work was completed in 2023.2024 compared to GuidanceExploration, evaluation and project expenses for 2024 of $392 million were slightly lower than the guidance range. Exploration and evaluation costs of $190 million were within the guidance range, while project expenses of $202 million were below the guidance range, mainly due to the timing of different projects across the portfolio, particularly in the Latin America & Asia Pacific region.Finance Costs, Net ($ millions) For the three months ended ForÂ theÂ yearsÂ ended Â Â 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Interest expensea 113Â 137Â 452Â 387Â 366Â Accretion 22Â 23Â 89Â 87Â 66Â Interest capitalized (4) (4) (33) (42) (29) Gain on debt extinguishment 0Â 0Â 0Â 0Â (14) Other finance costs 1Â 2Â 5Â 7Â 6Â Finance income (64) (76) (281) (269) (94) Finance costs, net 68Â 82Â 232Â 170Â 301Â 2024 Guidance 260 - 300 a.For Q4 2024 and 2024, interest expense includes approximately $9 million and $33 million, respectively, of non-cash interest expense relating to the streaming agreement with Royal Gold Inc. (Q3 2024: $8 million; 2023: $32 million; 2022: $33 million). Interest expense also includes approximately $18 million and $78 million for Q4 2024 and 2024, respectively, relating to finance costs in Argentina (Q3 2024: $44 million; 2023: $nil; 2022: $nil) Q4 2024 compared to Q3 2024In Q4 2024, finance costs, net decreased by 17% compared to Q3 2024, mainly due to lower interest expense due to decreased finance costs in Argentina associated with cash repatriation, partially offset by lower finance income.2024 compared to 2023In 2024, finance costs, net were 36% higher than the prior year, primarily due to higher interest expense due to increased finance costs in Argentina associated with cash repatriation, partially offset by higher finance income. 2024 compared to GuidanceFinance costs, net for 2024 of $232 million were lower than the guidance range of $260 to $300 million, mainly due to higher than expected finance income earned on our cash balance resulting from higher revenue from higher metal prices.Additional Significant Statement of Income Items ($ millions) For the three months ended ForÂ theÂ yearsÂ ended Â Â 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Impairment charges (reversals) (477) 2Â (457) 312Â 1,671Â Loss on currency translation 18Â 4Â 39Â 93Â 16Â Closed mine rehabilitation 11Â 59Â 59Â 16Â (136) Other (income) expense 71Â 46Â 214Â (195) (268) BARRICK YEAR-END 2024 51 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSImpairment Charges (Reversals) ($ millions) For the three months ended ForÂ theÂ yearsÂ ended Â Â 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Asset impairments (reversals) Lumwana (655) 0Â (655) 0Â 23Â Veladero (437) 0Â (437) 0Â 490Â Carlin 82Â 0Â 82Â 4Â 0Â Long Canyon 49Â 0Â 49Â 280Â 85Â Tanzania 0Â 0Â 0Â 22Â 0Â Reko Diq 0Â 0Â 0Â 0Â (120) Other 0Â 2Â 20Â 6Â 5Â Total asset impairment charges (reversals) (961) 2Â (941) 312Â 483Â Goodwill Loulo-Gounkoto 484Â 0Â 484Â 0Â 1,188Â Total goodwill impairment charges 484Â 0Â 484Â 0Â 1,188Â Total impairment charges (reversals) (477) 2Â (457) 312Â 1,671Â In Q4 2024 and the full year 2024, we recognized $961 million and $941 million, respectively, of net impairment reversals, mainly due to non-current asset impairment reversals of $655 million at Lumwana as a result of the inclusion of the Super Pit Expansion in the LOM plan and higher copper prices, and of $437 million at Veladero, reflecting higher gold prices, extended mine life and lower country risk. In addition, we recognized a goodwill impairment of $484 million at Loulo-Gounkoto (refer to Key Business Developments. This compares to net impairment charges of $312 million in 2023, mainly due to a non-current asset impairment of $280 million at Long Canyon as we decided not to pursue the permitting associated with Phase 2 mining, removed those ounces from our LOM plan and placed the mine on care and maintenance.Refer to note 21 to the Financial Statements for a full description of impairment charges, including pre-tax amounts and sensitivity analysis.Loss on Currency TranslationLoss on currency translation in Q4 2024 increased by $14 million compared to Q3 2024, as a result of realized foreign currency losses related to the Chilean peso, whereas there were unrealized gains on the Chilean peso in Q3 2024. These realized losses were hedged, with a corresponding gain on non-hedge derivatives in other income. Loss on currency translation for 2024 decreased by $54 million compared to 2023, mainly due to the unrealized foreign currency losses in the prior year related to the Argentine peso, and the Zambian kwacha resulting from the high inflation levels and the countryâ€™s debt restructuring concerns in 2023. This was partially offset with the depreciation of the Chilean peso in 2024, compared to a gain in 2023. Currency fluctuations result in a revaluation of our local currency denominated VAT receivables and local currency denominated payable balances. Closed mine rehabilitationClosed mine rehabilitation in 2024 includes higher closure cost estimates at various closure sites, including an update in Q3 2024 to the provision relating to a legacy mine site operated by Homestake Mining Company that was closed prior to the 2001 acquisition by Barrick. This was partially offset by gains in both Q4 2024 and 2024 resulting from an increase in the market real risk-free rate used to discount the closure provision, while the market real risk-free rate decreased in both Q3 2024 and 2023. Other (Income) ExpenseIn Q4 2024, other expense was $71 million, while 2024 was $214 million. Other expense in Q4 2024 mainly relates to the $84 million payment to the Government of Mali to advance negotiations and the $60 million customs and royalty settlement at Tongon, partially offset by the insurance proceeds received in relation to the claim for the 2023 conveyor failure at Pueblo Viejo and the gain on sale of miscellaneous non-current assets. In Q3 2024, other expense primarily related to the $40 million accrual relating to the road construction in Tanzania per our community investment obligations under the Twiga partnership. The full year 2024 was further impacted by interest and penalties recognized following the settlement of the ZaldÃvar Tax Assessment in Chile (refer to note 35 of the Financial Statements). The other income of $195 million in 2023 mainly related to a gain of $352Â million as the conditions for the reopening of the Porgera mine were completed on December 22, 2023, partially offset by care and maintenance expenses at Porgera, and the $30 million commitment we made towards the expansion of education infrastructure in Tanzania per our community investment obligations under the Twiga partnership.For a further breakdown of other expense (income), refer to note 9 to the Financial Statements.Income Tax ExpenseIncome tax expense was $1,520 million in 2024. The unadjusted effective income tax rate for 2024 was 33% of the income before income taxes.The underlying effective income tax rate on ordinary income for 2024 was 25% after adjusting for the impact of net impairment reversals; the resolution of uncertain tax positions; the impact of foreign currency translation losses on current and deferred tax balances; the impact of the recognition and de-recognition of deferred tax assets; the impact of updates to the rehabilitation provision for our non-operating mines; the impact of the sale of non-current assets; the impact of prior year adjustments; the impact of the community relations projects at Tanzania per our community investment obligations under the Twiga partnership; and the impact of other expense adjustments.We record deferred tax charges or credits if changes in facts or circumstances affect the estimated tax basis of assets and, therefore, the expectations in our ability to realize deferred tax assets. The interpretation of tax regulations and legislation as well as their application to our business is complex and subject to change. We have significant amounts of deferred

tax assets, including tax loss carryforwards, and also deferred tax liabilities. We also have significant amounts of unrecognized deferred tax assets (e.g. for tax losses in Canada). Potential changes in any of these amounts, as well as our ability to realize deferred tax assets, could significantly affect net income or BARRICK YEAR-END 2024 52 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTScash flow in future periods. For further details on income tax expense, refer to note 12 to the Financial Statements. Reconciliation to Canadian Statutory Rate For the years ended 12/31/24 12/31/23 At 26.5% statutory rate 1,221Â 746Â Increase (decrease) due to: Allowances and special tax deductionsa (211) (184) Impact of foreign tax ratesb 18Â (79) Non-deductible expenses / (non-taxable income) 111Â 72Â Goodwill impairment charges not tax deductible 145Â â€”Â Taxable gains on sales of non-current assets 2Â 6Â Net currency translation losses on current and deferred tax balances 52Â 289Â Tax impact from pass-through entities and equity accounted investments (263) (183) Current year tax results sheltered by previously unrecognized deferred tax assets (5) (22) Recognition and derecognition of deferred tax assets (26) (142) Settlements and adjustments in respect of prior years 116Â 23Â Increase to income tax related contingent liabilities 1Â 54Â Impact of tax rate changes â€”Â (2) Withholding taxes 70Â 61Â Mining taxes 290Â 224Â Tax impact of amounts recognized within accumulated OCI â€”Â (2) Other items (1) â€”Â Income tax expense 1,520Â 861Â a.We are able to claim certain allowances, incentives and tax deductions unique to extractive industries that result in a lower effective tax rate.b.We operate in multiple foreign tax jurisdictions that have tax rates different than the Canadian statutory rate.The more significant items impacting income tax expense in 2024 and 2023 include the following:Currency TranslationCurrent and deferred tax balances are subject to remeasurement for changes in foreign currency exchange rates each period. This is required in countries where tax is paid in local currency and the subsidiary has a different functional currency (typically US dollars). The most significant relate to Argentine and Malian tax balances.In 2024, a net tax expense of $52Â million arose from translation losses on tax balances, mainly due to the weakening of the Argentine peso and the West African CFA franc against the US dollar. In 2023, a tax expense of $289 million arose from translation losses on tax balances, mainly due to the weakening of the Argentine peso and strengthening of the West African CFA franc against the US dollar. These net translation losses are included within income tax expense.Withholding TaxesIn 2024, we have recorded $3Â million (2023: $5 million) of dividend withholding taxes related to the undistributed earnings of our subsidiaries in Saudi Arabia. We have also recorded $45Â million (2023: $26Â million, related to Saudi Arabia, Tanzania and the United States) of dividend withholding taxes related to the distributed earnings of our subsidiaries in Saudi Arabia, Peru and the United States.Accounting for Joint Ventures and AssociatesNGM is a limited liability company treated as a flow through partnership for US tax purposes. The partnership is not subject to federal income tax directly, but each of its partners is liable for tax on its share of the profits of the partnership. As such, Barrick accounts for its current and deferred income tax associated with the investment (61.5% share) following the principles in IAS 12.Mining TaxesNGM is subject to a Net Proceeds of Minerals tax in Nevada at a rate of 5% and the tax expense recorded in 2024 was $145Â million (2023: $105Â million). The other significant mining tax is the Dominican Republicâ€™s Net Profits Interest tax, which is determined based on cash flows as defined by the Pueblo Viejo Special Lease Agreement. A tax expense of $134Â million (2023: $nil) was recorded for this in 2024. Both taxes are included on a consolidated basis in the Company's consolidated statements of income.United States Tax ReformIn August 2022, President Joe Biden signed the Inflation Reduction Act (â€œthe Actâ€) into law. The Act includes a 15% corporate alternative minimum tax (â€œCAMTâ€) that is imposed on applicable financial statement income and therefore would be considered in scope for IAS 12 given it is a tax on profits. The CAMT is effective for tax years beginning after December 31, 2022 and CAMT credit carryforwards have an indefinite life. Barrick is subject to CAMT because the Company meets the applicable income thresholds for a foreign-parented multinational group.In Q3 2024, the US Treasury and IRS released proposed regulations detailing the application of CAMT followed by some technical corrections released on December 23, 2024. Some rules would apply to tax years ending after September 13, 2024, while the rest would generally apply to tax years ending after the final regulations are published. Comments on the technical corrections were due on January 16, 2025 and we are still awaiting the final regulations to be released. For 2024, the deferred tax asset arising from the CAMT credit carryforwards has been recognized on the basis we expect that it will be recovered against US Federal Income Tax in the future.ImpairmentsA deferred tax expense of $321Â million (2023: deferred tax recovery of $55Â million primarily related to the impairment at Long Canyon) was recorded primarily related to the impairment reversal at our Lumwana and Veladero mines. BARRICK YEAR-END 2024 53 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS Financial Condition Review Â Â Â Summary Balance Sheet and Key Financial Ratios Â Â ($ millions, except ratios and share amounts) As at December 31 2024Â 2023Â 2022Â Total cash and equivalents 4,074Â 4,148Â 4,440Â Current assets 3,558Â 3,290Â 4,025Â Non-current assets 39,994Â 38,373Â 37,500Â Total Assets 47,626Â 45,811Â 45,965Â Current liabilities excluding short-term debt 2,618Â 2,345Â 3,107Â Non-current liabilities excluding long-term debta 7,023Â 6,738Â 6,787Â Debt (current and long-term) 4,729Â 4,726Â 4,782Â Total Liabilities 14,370Â 13,809Â 14,676Â Total shareholdersâ€™ equity 24,290Â 23,341Â 22,771Â Non-controlling interests 8,966Â 8,661Â 8,518Â Total Equity 33,256Â 32,002Â 31,289Â Total common shares outstanding (millions of shares)b 1,727Â 1,756Â 1,755Â Debt, net of cash 655Â 578Â 342Â Key Financial Ratios: Â Â Â Current ratioc 2.89:1 3.16:1 2.71:1 Debt-to-equityd 0.14:1 0.15:1 0.15:1 Net leveragee 0.1:1 0.1:1 0.1:1a.Non-current financial liabilities as at DecemberÂ 31, 2024 were $5,215 million (2023: $5,221 million; 2022: $5,314 million).b.As of February 4, 2025, the number of common shares outstanding is 1,727,100,407. c.Represents current assets (excluding assets held-for-sale) divided by current liabilities (including short-term debt and excluding liabilities held-for-sale) as at DecemberÂ 31, 2024, DecemberÂ 31, 2023 and DecemberÂ 31, 2022.d.Represents debt divided by total shareholdersâ€™ equity (including minority interest) as at DecemberÂ 31, 2024, DecemberÂ 31, 2023, and DecemberÂ 31, 2022.e.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.Balance Sheet ReviewTotal assets were $47.6 billion at DecemberÂ 31, 2024, higher than total assets at DecemberÂ 31, 2023, mainly due to an increase in property, plant and equipment. Our asset base is primarily comprised of non-current assets such as property, plant and equipment and equity method investments, reflecting the capital-intensive nature of the mining business and our history of growth through acquisitions and creation of joint ventures with other mining companies. Other significant assets include production inventories, indirect taxes recoverable and receivable, concentrate sales receivables, other government transaction and joint venture related receivables, as well as cash and equivalents. Total liabilities at DecemberÂ 31, 2024 were $14.4 billion, in line with total liabilities at DecemberÂ 31, 2023. Our liabilities are primarily comprised of debt, other non-current liabilities (such as provisions and deferred income tax liabilities), and accounts payable. Financial Position and LiquidityWe believe we have sufficient financial resources to meet our business requirements for the foreseeable future, including capital expenditures, working capital requirements, interest payments, environmental rehabilitation, securities buybacks and dividends. Total cash and cash equivalents as at DecemberÂ 31, 2024 were $4.1 billion. Our capital structure comprises a mix of debt, non-controlling interest (primarily at NGM) and shareholdersâ€™ equity. As at DecemberÂ 31, 2024, our total debt was $4.7 billion (debt, net of cash and equivalents was $655 million) and our debt-to-equity ratio was 0.14:1. This compares to debt as at DecemberÂ 31, 2023 of $4.7 billion (debt, net of cash and cash equivalents was $578 million), and a debt-to-equity ratio of 0.15:1. In 2025, we have capital commitments of $553Â million and expect to incur attributable sustaining and project capital expenditures6 of approximately $3,100 to $3,600 million based on our guidance range on page 10. In 2025, we have contractual obligations and commitments of $740Â million associated with purchase obligations for supplies and consumables. In addition, we have $286 million in interest payments and other amounts as detailed in the table on page 57. We expect to fund these commitments through operating cash flow, which is our primary source of liquidity, as well as existing cash balances as necessary. As previously disclosed, we have authorized a share buyback program, where we may purchase up to $1 billion of Barrickâ€™s shares. We purchased $498 million of shares under this program in 2024, including $354 million during Q4. We also have a performance dividend policy that enhances shareholder returns when the Company's liquidity is strong. In addition to our base dividend, the amount of the performance dividend on a quarterly basis will be based on the amount of cash, net of debt, on our balance sheet at the end of each quarter as per the schedule below. BARRICK YEAR-END 2024 54 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS Performance Dividend Level Threshold Level Quarterly Base Dividend Quarterly Performance Dividend Quarterly Total Dividend Level I Net cash <$0 $0.10 per share $0.00 per share $0.10 per share Level II Net cash >$0 and <$0.5B $0.10 per share $0.05 per share $0.15 per share Level III Net cash >$0.5B and <$1B $0.10 per share $0.10 per share $0.20 per share Level IV Net cash >$1B $0.10 per share $0.15 per share $0.25 per shareThe declaration and payment of dividends is at the discretion of the Board of Directors, and will depend on the companyâ€™s financial results, cash requirements, future prospects, the number of outstanding common shares, and other factors deemed relevant by the Board.Our operating cash flow is dependent on the ability of our operations to deliver projected future cash flows. The market prices of gold and to a lesser extent, copper, are the primary drivers of our operating cash flow. Other options to enhance liquidity include portfolio optimization; issuance of equity or long-term debt securities in the public markets or to private investors (Moodyâ€™s and S&P currently rate Barrickâ€™s outstanding long-term debt as investment grade, with ratings of A3 and BBB+, respectively); and drawing on the $3.0 billion available under our undrawn Credit Facility (subject to compliance with covenants and the making of certain representations and warranties, this facility is available for drawdown as a source of financing). In May 2024, we completed an update to our undrawn $3.0 billion revolving Credit Facility, including an extension of the termination date by one year to May 2029. The revolving Credit Facility incorporates sustainability-linked metrics which are made up of annual environmental and social performance targets directly influenced by Barrick's actions, rather than based on external ratings. The performance targets include Scope 1 and Scope 2 GHG emissions intensity, water use efficiency (reuse and recycling rates), and TRIFR8. Barrick may incur positive or negative pricing adjustments on drawn credit spreads and standby fees based on its sustainability performance versus the targets that have been set. The Credit Facility was undrawn as at DecemberÂ 31, 2024. The key financial covenant in our undrawn Credit Facility requires Barrick to maintain a net debt to total capitalization ratio of less than 0.60:1. Barrickâ€™s net debt to total capitalization ratio was 0.02:1 as at DecemberÂ 31, 2024 (0.02:1 as at DecemberÂ 31, 2023). Summary of Cash Inflow (Outflow) ($ millions) For the three months ended ForÂ theÂ yearsÂ ended Â 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Net cash provided by operating activities 1,392Â 1,180Â 4,491Â 3,732Â 3,481Â Investing activities Capital expenditures (891) (736) (3,174) (3,086) (3,049) Funding of equity method investments (4) 0Â (59) 0Â 0Â Dividends received from equity method investments 71Â 38Â 198Â 273Â 869Â Shareholder loan repayments from equity method investments 16Â 49Â 155Â 7Â 0Â Investment (purchases) sales 20Â 44Â 97Â (23) 381Â Other 10Â 2Â 19Â 13Â 88Â Total investing outflows (778) (603) (2,764) (2,816) (1,711) Financing activities Net change in debta (3) (4) (14) (56) (395) Dividendsb (172) (174) (696) (700) (1,143) Net disbursements to non-controlling interests (291) (110) (639) (514) (833) Share buyback program (354) (95) (498) 0Â (424) Other 58Â (4) 52Â 65Â 191Â Total financing outflows (762) (387) (1,795) (1,205) (2,604) Effect of exchange rate (3) (1) (6) (3) (6) Increase (decrease) in cash and equivalents (151) 189Â (74) (292) (840) a.The difference between the net change in debt on a cash basis and the net change on the balance sheet is due to changes in non-cash charges, specifically the unwinding of discounts and amortization of debt issue costs.b.For the three months and year ended DecemberÂ 31, 2024, we declared and paid dividends per share in US dollars totaling $0.10 and $0.40, respectively (SeptemberÂ 30, 2024: declared and paid $0.10; 2023: declared and paid $0.40; 2022: declared and paid $0.65).Q4 2024 compared to Q3 2024In Q4 2024, we generated $1,392 million in operating cash flow, compared to $1,180 million in Q3 2024. The increase of $212 million was primarily due to a higher realized gold price6 and a decrease in both gold total cash costs per ounce6 and copper C1 cash costs per pound6. These impacts were slightly offset by a decrease in the realized copper price6. Operating cash flow was further impacted by a favorable working capital movement, mainly in accounts receivable and accounts payable. These results were partially offset by an increase in cash taxes paid and higher interest paid as a result of the timing of semi-annual interest payments on our bonds, which primarily occur in the second and fourth quarters. Operating cash flow in Q4 2024 BARRICK YEAR-END 2024 55 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSwas also negatively impacted by the restrictions placed by the Government of Mali on our ability to ship and sell gold (for more detail, refer to note 35 of the Financial Statements). Cash outflows from investing activities in Q4 2024 were $778 million, compared to $603 million in Q3 2024. The increased outflow of $175 million was primarily due to an increase in capital expenditures primarily due to higher project capital expenditures6 including down payments on the order of long lead items for the Lumwana Super Pit Expansion project, which includes the mining fleet.Net financing cash outflows for Q4 2024 amounted to $762 million, compared to $387 million in Q3 2024. The increased outflow of $375 million was primarily due to higher repurchases of shares under our share buyback program compared to Q3 2024, combined with higher net disbursements to non-controlling interests, primarily to Newmont in relation to their interest in NGM and Pueblo Viejo. 2024 compared to 2023In 2024, we generated $4,491 million in operating cash flow, compared to $3,732 million in 2023. The increase of $759 million was primarily due to a higher realized gold price6, partially offset by lower gold sales volumes and an increase in gold total cash costs per ounce6. Operating cash flow was further impacted by higher cash taxes paid relative to 2023. Operating cash flow in 2024 was also negatively impacted by the restrictions placed by the Government of Mali on our ability to ship and sell gold (for more detail, refer to note 35 of the Financial Statements).Cash outflows from investing activities for 2024 were $2,764 million compared to $2,816 million in 2023. The decreased outflow of $52 million was primarily due to shareholder loan repayments made by equity method investments, in particular Kibali, and cash proceeds received from the sale of some of our investments in other mining companies. Cash flows from investing activities were negatively impacted by higher capital expenditures as a result of higher minesite sustaining capital expenditures6, partially offset by lower project capital expenditures6. Higher minesite capital expenditures6 were driven by increased capitalized stripping at Lumwana and the purchase of the Komatsu-930 truck fleet at Carlin. Project capital expenditures6 were lower as the Pueblo Viejo plant expansion project and TS Solar Project at NGM were substantially completed in 2023, partially offset by early works expenditure at Reko Diq and the down payments on the order of long lead items for the Lumwana Super Pit Expansion project, which includes the mining fleet. These impacts were further impacted by lower cash dividends received from equity method investments, in particular Kibali, as well as the funding provided to Porgera.Net financing cash outflows for 2024 amounted to $1,795 million, compared to $1,205 million in 2023. The higher outflow of $590 million is primarily due to the repurchases of shares under our share buyback program in 2024, combined with higher net disbursements to non-controlling interests, primarily to Newmont in relation to their interest in NGM and Pueblo Viejo. Summary of Financial Instrumentsa As at December 31, 2024 Financial Instrument Principal/NotionalÂ Amount Â AssociatedÂ Risks nÂ Â Interest rate Cash and equivalents $4,074Â million nÂ Â Credit Â Â Â Â nÂ Â Credit Accounts receivable $763Â million nÂ Â Market Â Â nÂ Â Interest rate Notes receivable $217Â million nÂ Â Credit nÂ Â Interest rate Kibali joint venture receivable $462Â million nÂ Â Credit nÂ Â Interest rate Norte Abierto joint venture partner receivable $74Â million nÂ Â Credit nÂ Â Interest rate Restricted cash $65Â million nÂ Â Credit Other investments $42Â million nÂ Â Liquidity Accounts payable Â $1,613Â million nÂ Â Liquidity Debt Â $4,749Â million nÂ Â Interest rate Other liabilities $595Â million nÂ Â Liquidity Restricted share units Â $39Â million nÂ Â Market Deferred share units Â $12Â million nÂ Â Market a.Refer to notes 25, 26 and 28 to the Financial Statements for more information regarding financial instruments, fair value measurements and financial risk management, respectively. BARRICK YEAR-END 2024 56 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSCommitments and Contingencies Litigation and ClaimsWe are currently subject to various litigation proceedings as disclosed in note 35 to the Financial Statements, and we may be involved in disputes with other parties in the future that may result in litigation. If we are unable to resolve these disputes favorably, it may have a material adverse impact on our financial condition, cash flow and results of operations.Contractual Obligations and CommitmentsIn the normal course of business, we enter into contracts that give rise to commitments for future minimum payments. The following table summarizes the remaining contractual maturities of our financial liabilities and operating and capital commitments shown on an undiscounted basis:Â ($ millions) Payments due as at December 31, 2024 Â Â 2025 2026 2027 2028 2029 2030 and thereafter Total Debta Repayment of principal 11Â 47Â 0Â 0Â 0Â 4,632Â 4,690Â Capital leases 13Â 11Â 11Â 7Â 5Â 12Â 59Â Interest 286Â 283Â 280Â 279Â 278Â 2,660Â 4,066Â Provisions for environmental rehabilitationb 229Â 139Â 105Â 157Â 132Â 1,831Â 2,593Â Restricted share units 29Â 10Â 0Â 0Â 0Â 0Â 39Â Pension benefits and other post-retirement benefits 5Â 5Â 4Â 4Â 4Â 62Â 84Â Purchase obligations for supplies and consumablesc 740Â 270Â 250Â 164Â 142Â 55Â 1,621Â Capital commitmentsd 553Â 52Â 0Â 0Â 0Â 0Â 605Â Social development costse 56Â 29Â 7Â 4Â 2Â 58Â 156Â Other obligationsf 72Â 68Â 60Â 60Â 68Â 485Â 813Â Total 1,994Â 914Â 717Â 675Â 631Â 9,795Â 14,726Â a.Debt and Interest: Our

debt obligations do not include any subjective acceleration clauses or other clauses that enable the holder of the debt to call for early repayment, except in the event that we breach any of the terms and conditions of the debt or for other customary events of default. We are not required to post any collateral under any debt obligations. Projected interest payments on variable rate debt were based on interest rates in effect at DecemberÂ 31, 2024. Interest is calculated on our long-term debt obligations using both fixed and variable rates.b.Provisions for environmental rehabilitation: Amounts presented in the table represent the undiscounted uninflated future payments for the expected cost of provisions for environmental rehabilitation.c.Purchase obligations for supplies and consumables: Includes commitments related to new purchase obligations to secure supplies of consumables such as acid, tires and cyanide for our production process.d.Capital commitments: Purchase obligations for capital expenditures include only those items where binding commitments have been entered into.Â Â Â Â e.Social development costs: Includes a commitment of $14 million in 2030 and thereafter related to the funding of a power transmission line in Argentina.f.Other obligations includes the Pueblo Viejo joint venture partner shareholder loan, the deposit on the Pascua-Lama silver sale agreement with Wheaton Precious Metals Corp. due in 2039, and minimum royalty payments. BARRICK YEAR-END 2024 57 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSReview of Quarterly Results Quarterly Informationa Â Â 2024 2023 ($ millions, except where indicated) Q4 Q3 Q2 Q1 Q4 Q3 Q2 Q1 Revenues 3,645Â 3,368Â 3,162Â 2,747Â 3,059Â 2,862Â 2,833Â 2,643Â Realized price per ounce â€“ goldb 2,657Â 2,494Â 2,344Â 2,075Â 1,986Â 1,928Â 1,972Â 1,902Â Realized price per pound â€“ copperb 3.96Â 4.27Â 4.53Â 3.86Â 3.78Â 3.78Â 3.70Â 4.20Â Cost of sales 1,995Â 2,051Â 1,979Â 1,936Â 2,139Â 1,915Â 1,937Â 1,941Â Net earnings 996Â 483Â 370Â 295Â 479Â 368Â 305Â 120Â Â Â Â Â Â Per share (dollars)c 0.57Â 0.28Â 0.21Â 0.17Â 0.27Â 0.21Â 0.17Â 0.07Â Adjusted net earningsb 794Â 529Â 557Â 333Â 466Â 418Â 336Â 247Â Â Â Â Â Â Per share (dollars)b,c 0.46Â 0.30Â 0.32Â 0.19Â 0.27Â 0.24Â 0.19Â 0.14Â Operating cash flow 1,392Â 1,180Â 1,159Â 760Â 997Â 1,127Â 832Â 776Â Cash consolidated capital expendituresd 891Â 736Â 819Â 728Â 861Â 768Â 769Â 688Â Free cash flowb 501Â 444Â 340Â 32Â 136Â 359Â 63Â 88Â a.Sum of all the quarters may not add up to the annual total due to rounding.b.Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.c.Calculated using weighted average number of shares outstanding under the basic method of earnings per share.d.Amounts presented on a consolidated cash basis.Â Our recent financial results reflect our emphasis on cost discipline, an agile management structure that empowers our site based leadership teams and a portfolio of Tier One Gold Assets1. This, combined with ongoing strength in gold and copper prices, has resulted in strong operating cash flows over the past several quarters. The positive operating cash flow generated has allowed us to continue to reinvest in our business including our key growth projects, maintain a strong balance sheet and increase returns to shareholders. In addition to the strength in metal prices, net earnings has also been impacted by the following items in each quarter, which have been excluded from adjusted net earnings6. In Q4 2024, we recorded non-current asset impairment reversals of $655 million at Lumwana and of $437 million at Veladero. In addition, we recorded a goodwill impairment of $484 million related to Loulo-Gounkoto. In Q2 2024, we recorded a provision following the proposed settlement of the ZaldÃvar Tax Assessments in Chile (refer to note 35 of the Financial Statements). In the Q4 2023, we recorded a gain of $352Â million as the conditions for the reopening of the Porgera mine were completed on December 22, 2023. In addition, we recorded a non-current asset impairment of $280 million at Long Canyon. In Q1 2023, we recorded a loss on currency translation of $38 million, mainly related to the devaluation of the Zambian kwacha, and a $30 million commitment towards the expansion of education infrastructure in Tanzania per our community investment obligations under the Twiga partnership. Internal Control Over Financial Reporting and Disclosure Controls and Procedures Management is responsible for establishing and maintaining adequate internal control over financial reporting and disclosure controls and procedures. Internal control over financial reporting is a framework designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. The Companyâ€™s internal control over financial reporting framework includes those policies and procedures that: (i)Â pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii)Â provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii)Â provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Companyâ€™s assets that could have a material effect on the Companyâ€™s consolidated financial statements.Disclosure controls and procedures form a broader framework designed to provide reasonable assurance that other financial information disclosed publicly fairly presents in all material respects the financial condition, results of operations and cash flows of the Company for the periods presented in this MD&A and Barrickâ€™s Annual Report. The Companyâ€™s disclosure controls and procedures framework includes processes designed to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to management by others within those entities to allow timely decisions regarding required disclosure.Together, the internal control over financial reporting and disclosure controls and procedures frameworks provide internal control over financial reporting and disclosure. Due to its inherent limitations, internal control over financial reporting and disclosure may not prevent or detect all misstatements. Further, the effectiveness of internal control is subject to the risk that BARRICK YEAR-END 2024 58 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTScontrols may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may change.There were no changes in the Companyâ€™s internal control over financial reporting during the year ended DecemberÂ 31, 2024 that have materially affected, or are reasonably likely to materially affect, the Companyâ€™s internal control over financial reporting.The management of Barrick, at the direction of our President and Chief Executive Officer and Senior Executive Vice-President, Chief Financial Officer, evaluated the effectiveness of the design and operation of internal control over financial reporting as of the end of the period covered by this report based on the framework and criteria established in Internal Control â€“ Integrated Framework (2013) as issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that evaluation, management concluded that the Companyâ€™s internal control over financial reporting was effective as at DecemberÂ 31, 2024.Barrickâ€™s annual management report on internal control over financial reporting and the integrated audit report of Barrickâ€™s auditors for the year ended DecemberÂ 31, 2024 will be included in Barrickâ€™s 2024 Annual Report and its 2024 Form 40-F/Annual Information Form to be filed with the US Securities and Exchange Commission and Canadian provincial securities regulatory authorities.IFRS Critical Accounting Policies and Accounting Estimates Management has discussed the development and selection of our critical accounting estimates with the Audit & Risk Committee of the Board of Directors, and the Audit & Risk Committee has reviewed the disclosure relating to such estimates in conjunction with its review of this MD&A. The accounting policies and methods we utilize determine how we report our financial condition and results of operations, and they may require management to make estimates or rely on assumptions about matters that are inherently uncertain. The consolidated financial statements have been prepared in accordance with IFRS. Our material accounting policies are disclosed in note 2 to the Financial Statements, including a summary of current and future changes in accounting policies.Critical Accounting Estimates and JudgmentsCertain accounting estimates have been identified as being â€œcriticalâ€ to the presentation of our financial condition and results of operations because they require us to make subjective and/or complex judgments about matters that are inherently uncertain; or there is a reasonable likelihood that materially different amounts could be reported under different conditions or using different assumptions and estimates. Our significant accounting judgments, estimates and assumptions are disclosed in note 3 to the accompanying Financial Statements.Non-GAAP Financial Measures Adjusted Net Earnings and Adjusted Net Earnings per ShareAdjusted net earnings is a non-GAAP financial measure which excludes the following from net earnings:â– Impairment charges (reversals) related to intangibles, goodwill, property, plant and equipment, and investments;â– Acquisition/disposition gains/losses;â– Foreign currency translation gains/losses;â– Significant tax adjustments; â– Other items that are not indicative of the underlying operating performance of our core mining business; andâ– Tax effect and non-controlling interest of the above items.Management uses this measure internally to evaluate our underlying operating performance for the reporting periods presented and to assist with the planning and forecasting of future operating results. Management believes that adjusted net earnings is a useful measure of our performance because impairment charges, acquisition/disposition gains/losses and significant tax adjustments do not reflect the underlying operating performance of our core mining business and are not necessarily indicative of future operating results. Furthermore, foreign currency translation gains/losses are not necessarily reflective of the underlying operating results for the reporting periods presented. The tax effect and non-controlling interest of the adjusting items are also excluded to reconcile the amounts to Barrickâ€™s share on a post-tax basis, consistent with net earnings.As noted, we use this measure for internal purposes. Managementâ€™s internal budgets and forecasts and public guidance do not reflect the types of items we adjust for. Consequently, the presentation of adjusted net earnings enables investors and analysts to better understand the underlying operating performance of our core mining business through the eyes of management. Management periodically evaluates the components of adjusted net earnings based on an internal assessment of performance measures that are useful for evaluating the operating performance of our business segments and a review of the non-GAAP financial measures used by mining industry analysts and other mining companies.Adjusted net earnings is intended to provide additional information only and does not have any standardized definition under IFRS and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. Other companies may calculate these measures differently. The following table reconciles these non-GAAP financial measures to the most directly comparable IFRS measure. BARRICK YEAR-END 2024 59 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSReconciliation of Net Earnings to Net Earnings per Share, Adjusted Net Earnings and Adjusted Net Earnings per ShareÂ ForÂ theÂ threeÂ monthsÂ ended ForÂ theÂ yearsÂ ended ($ millions, except per share amounts in dollars) 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Net earnings attributable to equity holders of the Company 996Â 483Â 2,144Â 1,272Â 432Â Impairment (reversals) charges related to non-current assetsa (477) 2Â (457) 312Â 1,671Â Acquisition/disposition gainsb (17) (1) (24) (364) (405) Loss on currency translation 18Â 4Â 39Â 93Â 16Â Significant tax adjustmentsc 1Â (30) 137Â 220Â 95Â Other expense adjustmentsd 113Â 97Â 249Â 96Â 17Â Non-controlling intereste (159) (7) (170) (98) (274) Tax effecte 319Â (19) 295Â (64) (226) Adjusted net earnings 794Â 529Â 2,213Â 1,467Â 1,326Â Net earnings per sharef 0.57Â 0.28Â 1.22Â 0.72Â 0.24Â Adjusted net earnings per sharef 0.46Â 0.30Â 1.26Â 0.84Â 0.75Â a.Net impairment (reversals) charges for Q4 2024 and 2024 mainly relate to long-lived asset impairment reversals at Lumwana and Veladero, partially offset by a goodwill impairment at Loulo-Gounkoto. Net impairment charges for 2023 mainly relate to a long-lived asset impairment at Long Canyon. For 2022, net impairment charges primarily relate to a goodwill impairment at Loulo-Gounkoto, and non-current asset impairments at Veladero and Long Canyon, partially offset by an impairment reversal at Reko Diq. b.Acquisition/disposition gains for Q4 2024 and 2024 relate to miscellaneous assets. For 2023, acquisition/disposition gains primarily relate to a gain on the reopening of the Porgera mine. For 2022, acquisition/disposition gains primarily relate to a gain as Barrickâ€™s interest in the Reko Diq project increased from 37.5% to 50%, as well as the sale of two royalty portfolios. c.Significant tax adjustments in 2024 and 2023 primarily relate to the resolution of uncertain tax positions; the impact of prior year adjustments; the impact of nondeductible foreign exchange losses; and the recognition and derecognition of deferred tax assets.d.Other expense adjustments for Q4 2024 and 2024 mainly relate to a payment to the Government of Mali to advance negotiations and a customs and royalty settlement at Tongon. 2024 was further impacted by the interest and penalties recognized following the proposed settlement of the ZaldÃvar Tax Assessments in Chile, which was recorded in Q2 2024, a provision made relating to a legacy mine site operated by Homestake Mining Company that was closed prior to the 2001 acquisition by Barrick, and an accrual relating to the road construction in Tanzania per our community investment obligations under the Twiga partnership. For 2023, other expense adjustments mainly relate to changes in the discount rate assumptions on our closed mine rehabilitation provision, care and maintenance expenses at Porgera and the $30 million commitment we made towards the expansion of education infrastructure in Tanzania. For 2022, other expense adjustments mainly relate to a net realizable value impairment of leach pad inventory at Veladero, care and maintenance expenses at Porgera and supplies obsolescence write-off at Bulyanhulu and North Mara. e.Non-controlling interest and tax effect for 2024 primarily relates to impairment (reversals) charges related to non-current assets.f.Calculated using weighted average number of shares outstanding under the basic method of earnings per share.Free Cash FlowFree cash flow is a non-GAAP financial measure that deducts capital expenditures from net cash provided by operating activities. Management believes this to be a useful indicator of our ability to operate without reliance on additional borrowing or usage of existing cash.Free cash flow is intended to provide additional information only and does not have any standardized definition under IFRS, and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The measure is not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. Other companies may calculate this measure differently. The following table reconciles this non-GAAP financial measure to the most directly comparable IFRS measure.Reconciliation of Net Cash Provided by Operating Activities to Free Cash FlowÂ ForÂ theÂ threeÂ monthsÂ ended ForÂ theÂ yearsÂ ended Â Â ($ millions) 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Net cash provided by operating activities 1,392Â 1,180Â 4,491Â 3,732Â 3,481Â Capital expenditures (891) (736) (3,174) (3,086) (3,049) Free cash flow 501Â 444Â 1,317Â 646Â 432Â Capital ExpendituresCapital expenditures are classified into minesite sustaining capital expenditures or project capital expenditures depending on the nature of the expenditure. Minesite sustaining capital expenditures is the capital spending required to support delivery of the current mine plan. Project capital expenditures represent the capital spending at new projects and major, discrete projects at existing operations intended to increase net present value through higher production or longer mine life. Management believes this to be a useful indicator of the purpose of capital expenditures and this distinction is an input into the calculation of all-in sustaining costs per ounce.Classifying capital expenditures is intended to provide additional information only and does not have any standardized definition under IFRS, and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Other companies may calculate these measures differently. The following table reconciles these non-GAAP financial measures to the most directly comparable IFRS measure. BARRICK YEAR-END 2024 60 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSReconciliation of the Classification of Capital ExpendituresÂ ForÂ theÂ threeÂ monthsÂ ended ForÂ theÂ yearsÂ ended Â Â ($ millions) 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Minesite sustaining capital expenditures 525Â 511Â 2,217Â 2,076Â 2,071Â Project capital expenditures 362Â 221Â 924Â 969Â 949Â Capitalized interest 4Â 4Â 33Â 41Â 29Â Total consolidated capital expenditures 891Â 736Â 3,174Â 3,086Â 3,049Â Total cash costs per ounce, All-in sustaining costs per ounce, C1 cash costs per pound and All-in sustaining costs per poundTotal cash costs per ounce and all-in sustaining costs per ounce are non-GAAP financial measures which are calculated based on the definition published by the WGC (a market development organization for the gold industry comprised of and funded by gold mining companies from around the world, including Barrick). The WGC is not a regulatory organization. Management uses these measures to monitor the performance of our gold mining operations and its ability to generate positive cash flow, both on an individual site basis and an overall company basis.Total cash costs start with our cost of sales related to gold production and removes depreciation, the non-controlling interest of cost of sales and includes by-product credits. All-in sustaining costs start with total cash costs and includes sustaining capital expenditures, sustaining leases, general and administrative costs, minesite exploration and evaluation costs related to the current mine plan and reclamation cost accretion and amortization. These additional costs reflect the expenditures made to maintain current production levels.We believe that our use of total cash costs and all-in sustaining costs will assist analysts, investors and other stakeholders of Barrick in understanding the costs associated with producing gold, understanding the economics of gold mining, assessing our operating performance and also our ability to generate free cash flow from current operations and on an overall company basis. Due to the capital-intensive nature of the industry and the long useful lives over which these items are depreciated, there can be a significant timing difference between net earnings calculated in accordance with IFRS and the amount of free cash flow that is generated by a mine and therefore we believe these measures are useful non-GAAP operating metrics and supplement our IFRS disclosures. These measures are not representative of all of our cash expenditures as they do not include income tax payments, interest costs or dividend payments. These measures do not include depreciation or amortization.Total cash costs per ounce and all-in sustaining costs are intended to provide additional information only and do not have standardized definitions under IFRS and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. These measures are not equivalent to net income or cash flow from operations as determined under IFRS. Although the WGC has

published a standardized definition, other companies may calculate these measures differently.In addition to presenting these metrics on a by-product basis, we have calculated these metrics on a co-product basis. Our co-product metrics remove the impact of other metal sales that are produced as a by-product of our gold production from cost per ounce calculations but does not reflect a reduction in costs for costs associated with other metal sales.C1 cash costs per pound and all-in sustaining costs per pound are non-GAAP financial measures related to our copper mine operations. We believe that C1 cash costs per pound enables investors to better understand the performance of our copper operations in comparison to other copper producers who present results on a similar basis. C1 cash costs per pound excludes royalties and production taxes and non-routine charges as they are not direct production costs. All-in sustaining costs per pound is similar to the gold all-in sustaining costs metric and management uses this to better evaluate the costs of copper production. We believe this measure enables investors to better understand the operating performance of our copper mines as this measure reflects all of the sustaining expenditures incurred in order to produce copper. All-in sustaining costs per pound includes C1 cash costs, sustaining capital expenditures, sustaining leases, general and administrative costs, minesite exploration and evaluation costs, royalties and production taxes, reclamation cost accretion and amortization and write-downs taken on inventory to net realizable value. BARRICK YEAR-END 2024 61 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSReconciliation of Gold Cost of Sales to Total cash costs and All-in sustaining costs, including on a per ounce basis Â ForÂ theÂ threeÂ monthsÂ ended ForÂ theÂ yearsÂ ended Â Â ($ millions, except per ounce information in dollars) Â Footnote 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Cost of sales applicable to gold production 1,810Â 1,856Â 7,226Â 7,178Â 6,813Â Â Depreciation (424) (409) (1,641) (1,756) (1,756) Cash cost of sales applicable to equity method investments 90Â 93Â 316Â 260Â 222Â By-product credits (58) (58) (247) (252) (225) Non-recurring items a 0Â 0Â 0Â 0Â (23) Other b 4Â 3Â 14Â 18Â (23) Non-controlling interests c (413) (417) (1,623) (1,578) (1,442) Total cash costs Â 1,009Â 1,068Â 4,045Â 3,870Â 3,566Â Â Â GeneralÂ & administrative costs 9Â 46Â 115Â 126Â 159Â Minesite exploration and evaluation costs d 8Â 10Â 37Â 40Â 75Â Minesite sustaining capital expenditures e 525Â 511Â 2,217Â 2,076Â 2,071Â Sustaining leases 7Â 8Â 30Â 30Â 38Â Rehabilitation - accretion and amortization (operating sites) f 15Â 14Â 66Â 63Â 50Â Non-controlling interest, copper operations and other g (173) (199) (874) (824) (900) Â All-in sustaining costs Â 1,400Â 1,458Â 5,636Â 5,381Â 5,059Â Ounces sold - attributable basis (000s ounces) h 965Â 967Â 3,798Â 4,024Â 4,141Â Cost of sales per ounce i,j 1,428Â 1,472Â 1,442Â 1,334Â 1,241Â Total cash costs per ounce j 1,046Â 1,104Â 1,065Â 960Â 862Â Total cash costs per ounce (on a co-product basis) j,k 1,086Â 1,145Â 1,109Â 1,002Â 897Â All-in sustaining costs per ounce j 1,451Â 1,507Â 1,484Â 1,335Â 1,222Â All-in sustaining costs per ounce (on a co-product basis) j,k 1,491Â 1,548Â 1,528Â 1,377Â 1,257Â a.Non-recurring items - These costs are not indicative of our cost of production and have been excluded from the calculation of total cash costs. Non-recurring items for 2022 relate to a net realizable value impairment of leach pad inventory at Veladero. b.Other - Other adjustments for Q4 2024 and 2024 include the removal of total cash costs and by-product credits associated with Pierina of $nil and $nil, respectively (Q3 2024: $nil; 2023: $3 million; 2022: $24 million), which was producing incidental ounces until December 31, 2023 while in closure.c.Non-controlling interests - Non-controlling interests include non-controlling interests related to gold production of $559Â million and $2,189 million, respectively, for Q4 2024 and 2024; (Q3 2024: $556 million; 2023: $2,192Â million; 2022: $2,032 million). Non-controlling interests include NGM, Pueblo Viejo, Loulo-Gounkoto, Tongon, North Mara and Bulyanhulu. Refer to note 5 to the Financial Statements for further information.d.Exploration and evaluation costs - Exploration, evaluation and project expenses are presented as minesite if it supports current mine operations and project if it relates to future projects. Refer to page 51 of this MD&A.e.Capital expenditures - Capital expenditures are related to our gold sites only and are split between minesite sustaining and project capital expenditures. f.Rehabilitation - accretion and amortization - Includes depreciation on the assets related to rehabilitation provisions of our gold operations and accretion on the rehabilitation provisions of our gold operations, split between operating and non-operating sites.g.Non-controlling interest and copper operations - Removes generalÂ & administrative costs related to non-controlling interests and copper based on a percentage allocation of revenue. Also removes exploration, evaluation and project expenses, rehabilitation costs and capital expenditures incurred by our copper sites and the non-controlling interests of NGM, Pueblo Viejo, Loulo-Gounkoto, Tongon, North Mara and Bulyanhulu operating segments. It also includes capital expenditures applicable to our equity method investments in Kibali and Porgera. Figures remove the impact of Pierina up until December 31, 2023. The impact is summarized as the following: ($ millions) ForÂ theÂ threeÂ monthsÂ ended ForÂ theÂ yearsÂ ended Â Â Non-controlling interest, copper operations and other 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Â Â Â GeneralÂ & administrative costs 3Â (7) (14) (9) (31) Minesite exploration and evaluation costs (2) (2) (10) (14) (27) Rehabilitation - accretion and amortization (operating sites) (5) (5) (21) (21) (16) Â Â Minesite sustaining capital expenditures (169) (185) (829) (780) (826) Â Â Â Â All-in sustaining costs total (173) (199) (874) (824) (900) h.Ounces sold - attributable basis - Excludes Pierina, which was producing incidental ounces until December 31, 2023 while in closure. It also excludes Long Canyon which is producing residual ounces from the leach pad while in care and maintenance. i.Cost of sales per ounce - Figures remove the cost of sales impact of Pierina of $nil and $nil, respectively, for Q4 2024 and 2024 (Q3 2024: $nil; 2023: $3 million; 2022: $24 million), which was producing incidental ounces up until December 31, 2023 while in closure. Gold cost of sales per ounce is calculated as cost of sales across our gold operations (excluding sites in closure or care and maintenance) divided by ounces sold (both on an attributable basis using Barrickâ€™s ownership share).j.Per ounce figures - Cost of sales per ounce, cash costs per ounce and all-in sustaining costs per ounce per ounce may not calculate based on amounts presented in this table due to rounding.k.Co-product costs per ounceCash costs per ounce and all-in sustaining costs per ounce per ounce presented on a co-product basis remove the impact of by-product credits of our gold production (net of non-controlling interest) calculated as: BARRICK YEAR-END 2024 62 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS ($ millions) ForÂ theÂ threeÂ monthsÂ ended ForÂ theÂ yearsÂ ended Â Â 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Â Â Â By-product credits 58Â 58Â 247Â 252Â 225Â Â Â Â Non-controlling interest (19) (18) (79) (81) (78) Â Â Â By-product credits (net of non-controlling interest) 39Â 40Â 168Â 171Â 147Â Reconciliation of Gold Cost of Sales to Total cash costs and All-in sustaining costs, including on a per ounce basis, by operating segment ($ millions, except per ounce information in dollars) For the three months ended 12/31/24 Â Â Footnote Carlin Corteza Turquoise Ridge Phoenix Nevada Gold Minesb Hemlo North America Cost of sales applicable to gold production 451Â 274Â 215Â 97Â 1,039Â 66Â 1,105Â Depreciation (75) (66) (54) (19) (215) (11) (226) Â Â Â By-product credits (1) (1) (1) (35) (38) 0Â (38) Â Â Â Non-recurring items c 0Â 0Â 0Â 0Â 0Â 0Â 0Â Other d (1) 0Â 0Â 6Â 5Â 0Â 5Â Non-controlling interests (144) (80) (61) (19) (304) 0Â (304) Total cash costs 230Â 127Â 99Â 30Â 487Â 55Â 542Â GeneralÂ & administrative costs 0Â 0Â 0Â 0Â 0Â 0Â 0Â Minesite exploration and evaluation costs e 3Â 2Â 1Â 1Â 8Â 0Â 8Â Minesite sustaining capital expenditures f 120Â 65Â 20Â 11Â 218Â 7Â 225Â Sustaining capital leases 0Â 0Â 0Â 0Â 0Â 1Â 1Â Rehabilitation - These costs are not indicative of our cost of production and have been excluded from the calculation of total cash costs. Non-recurring items at Veladero in 2022 relate to a net realizable value impairment of leach pad inventory. d.Other - Other adjustments at Carlin include the removal of total cash costs and by-product credits associated with Emigrant starting Q2 2022, which is producing incidental ounces.e.Exploration and evaluation costs - Exploration, evaluation and project expenses are presented as minesite sustaining if it supports current mine operations and project if it relates to future projects. Refer to page 51 of this MD&A.f.Capital expendituresÂ - Capital expenditures are related to our gold sites only and are split between minesite sustaining and project capital expenditures. g.Rehabilitation - accretion and amortizationÂ - Includes depreciation on the assets related to rehabilitation provisions of our gold operations and accretion on the rehabilitation provision of our gold operations, split between operating and non-operating sites.h.Cost of sales per ounce - Gold cost of sales per ounce is calculated as cost of sales across our gold operations (excluding sites in closure or care and maintenance) divided by ounces sold (both on an attributable basis using Barrickâ€™s ownership share).i.Per ounce figures - Cost of sales per ounce, total cash costs per ounce and all-in sustaining costs per ounce may not calculate based on amounts presented in this table due to rounding.j.Co-product costs per ounce - Total cash costs per ounce and all-in sustaining costs per ounce presented on a co-product basis removes the impact of by-product credits of our gold production (net of non-controlling interest) calculated as: ($ millions) For the three months ended 12/31/24 Â Â Carlin Corteza Turquoise Ridge Phoenix Nevada Gold Minesb Hemlo Pueblo Viejo By-product credits 1Â 1Â 1Â 35Â 38Â 0Â 11Â Non-controlling interest 0Â 0Â 0Â (14) (14) 0Â (4) By-product credits (net of non-controlling interest) 1Â 1Â 1Â 21Â 24Â 0Â 7Â ($ millions) For the three months ended 12/31/24 Â Â Veladero Porgerak Loulo-Gounkoto Kibali North Mara Tongon Bulyanhulu By-product credits 3Â 0 0 1Â 1Â 0Â 7Â Non-controlling interest 0Â 0 0 0Â 0Â 0Â (1) By-product credits (net of non-controlling interest) 3Â 0 0 1Â 1Â 0Â 6Â BARRICK YEAR-END 2024 70 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS ($ millions) For the three months ended 9/30/24 Â Â Carlin Corteza Turquoise Ridge Phoenix Nevada Gold Minesb Hemlo Pueblo Viejo By-product credits 1Â 0Â 1Â 39Â 41Â 0Â 5Â Non-controlling interestÂ (1) 0Â (1) (15) (17) 0Â (2) By-product credits (net of non-controlling interest) 0Â 0Â 0Â 24Â 24Â 0Â 3Â ($ millions) For the three months ended 9/30/24 Â Â Veladero Porgerak Loulo-Gounkoto Kibali North Mara Tongon Bulyanhulu By-product credits 3Â 0Â 0Â 0Â 1Â 0Â 6Â Non-controlling interestÂ 0Â 0Â 0Â 0Â 0Â 0Â (1) By-product credits (net of non-controlling interest) 3Â 0Â 0Â 0Â 1Â 0Â 5Â Â Â For the year ended 12/31/24 Â Â Carlin Corteza Turquoise Ridge Phoenix Nevada Gold Minesb Hemlo Pueblo Viejo By-product credits 3Â 3Â 3Â 152Â 161Â 0Â 40Â Non-controlling interestÂ (1) (1) (1) (59) (62) 0Â (16) By-product credits (net of non-controlling interest) 2Â 2Â 2Â 93Â 99Â 0Â 24Â Â Â For the year ended 12/31/24 Â Â Veladero Porgerak Loulo-Gounkoto Kibali North Mara Tongon Bulyanhulu By-product credits 10Â 1Â 0Â 2Â 3Â 0Â 26Â Non-controlling interestÂ 0Â 0Â 0Â 0Â 0Â 0Â (4) By-product credits (net of non-controlling interest) 10Â 1Â 0Â 2Â 3Â 0Â 22Â Â Â For the year ended 12/31/23 Â Â Carlin Corteza Turquoise Ridge Long Canyon Phoenix Nevada Gold Minesb Hemlo By-product credits 2Â 3Â 4Â 0Â 157Â 166Â 1Â Non-controlling interestÂ (1) (1) (2) 0Â (60) (64) 0Â By-product credits (net of non-controlling interest) 1Â 2Â 2Â 0Â 97Â 102Â 1Â Â Â For the year ended 12/31/23 Â Â Pueblo Viejo Veladero Loulo-Gounkoto Kibali North Mara Tongon Bulyanhulu By-product credits 37Â 9Â 0Â 2Â 3Â 1Â 23Â Non-controlling interestÂ (15) 0Â 0Â 0Â 0Â 0Â (4) By-product credits (net of non-controlling interest) 22Â 9Â 0Â 2Â 3Â 1Â 19Â Â Â For the year ended 12/31/22 Â Â Carlin Corteza Turquoise Ridge Long Canyon Phoenix Nevada Gold Minesb Hemlo By-product credits 2Â 2Â 2Â 0Â 139Â 145Â 1Â Non-controlling interestÂ (1) (1) (1) 0Â (54) (57) 0Â By-product credits (net of non-controlling interest) 1Â 1Â 1Â 0Â 85Â 88Â 1Â Â Â For the year ended 12/31/22 Â Â Pueblo Viejo Veladero Loulo-Gounkoto Kibali North Mara Tongon Bulyanhulu By-product credits 45Â 4Â 0Â 1Â 2Â 1Â 24Â Non-controlling interestÂ (18) 0Â 0Â 0Â 0Â 0Â (4) By-product credits (net of non-controlling interest) 27Â 4Â 0Â 1Â 2Â 1Â 20Â k.As Porgera was placed on care and maintenance from April 25, 2020 until December 22, 2023, no operating data or per ounce data has been provided from Q3 2020 to Q4 2023. On December 22, 2023, we completed the Commencement Agreement, pursuant to which the PNG government and BNL, the 95% owner and operator of the Porgera joint venture, agreed on a partnership for the future ownership and operation of the mine. Ownership of Porgera is held in a joint venture owned 51% by PNG stakeholders and 49% by a Barrick affiliate, PJL. PJL is jointly owned on a 50/50 basis by Barrick and Zijin Mining Group and therefore Barrick now holds a 24.5% ownership interest in the Porgera joint venture. Barrick holds a 23.5% interest in the economic benefits of the mine under the economic benefit sharing arrangement agreed BARRICK YEAR-END 2024 71 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSwith the PNG government whereby Barrick and Zijin Mining Group together share 47% of the overall economic benefits derived from the mine accumulated over time, and the PNG stakeholders share the remaining 53%. l.Starting Q1 2024, we have ceased to include production or non-GAAP cost metrics for Long Canyon as it was placed on care and maintenance at the end of 2023, as previously reported. EBITDA, Adjusted EBITDA, Attributable EBITDA, Attributable EBITDA Margin and Net LeverageEBITDA is a non-GAAP financial measure, which excludes the following from net earnings:â– Income tax expense;â– Finance costs;â– Finance income; andâ– Depreciation.Management believes that EBITDA is a valuable indicator of our ability to generate liquidity by

producing operating cash flow to fund working capital needs, service debt obligations, and fund capital expenditures. Management uses EBITDA for this purpose. EBITDA is also frequently used by investors and analysts for valuation purposes whereby EBITDA is multiplied by a factor or â€œEBITDA multipleâ€ that is based on an observed or inferred relationship between EBITDA and market values to determine the approximate total enterprise value of a company.Adjusted EBITDA removes the effect of impairment charges; acquisition/disposition gains/losses; foreign currency translation gains/losses; and other expense adjustments. We also remove the impact of the income tax expense, finance costs, finance income and depreciation incurred in our equity method accounted investments. Attributable EBITDA further removes the non-controlling interest portion. We believe these items provide a greater level of consistency with the adjusting items included in our adjusted net earnings reconciliation, with the exception that these amounts are adjusted to remove any impact on finance costs/income, income tax expense and/or depreciation as they do not affect EBITDA. We believe this additional information will assist analysts, investors and other stakeholders of Barrick in better understanding our ability to generate liquidity from our attributable business, including equity method investments, by excluding these amounts from the calculation as they are not indicative of the performance of our core mining business and do not necessarily reflect the underlying operating results for the periods presented. Additionally, it is aligned with how we present our forward-looking guidance on gold ounces and copper pounds produced. Attributable EBITDA margin is calculated as attributable EBITDA divided by revenues - as adjusted. We believe this ratio will assist analysts, investors and other stakeholders of Barrick to better understand the relationship between revenues and EBITDA or operating profit.Starting with our Q2 2024 MD&A, we are presenting net leverage as a non-GAAP ratio. It is calculated as debt, net of cash divided by the sum of adjusted EBITDA of the last four consecutive quarters. We believe this ratio will assist analysts, investors and other stakeholders of Barrick in monitoring our leverage and evaluating our balance sheet.EBITDA, adjusted EBITDA, attributable EBITDA, EBITDA margin and net leverage are intended to provide additional information to investors and analysts and do not have any standardized definition under IFRS, and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. EBITDA, adjusted EBITDA and attributable EBITDA exclude the impact of cash costs of financing activities and taxes, and the effects of changes in operating working capital balances, and therefore are not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. Other companies may calculate EBITDA, adjusted EBITDA, attributable EBITDA, EBITDA margin and net leverage differently. BARRICK YEAR-END 2024 73 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSReconciliation of Net Earnings to EBITDA, Adjusted EBITDA and Attributable EBITDA ForÂ theÂ threeÂ monthsÂ ended ForÂ theÂ yearsÂ ended Â Â ($ millions) 12/31/24 9/30/24 12/31/24 12/31/23 12/31/22 Net earnings 1,187Â 780Â 3,088Â 1,953Â 1,017Â Â Â Income tax expense 694Â 245Â 1,520Â 861Â 664Â Â Â Â Finance costs, neta 46Â 59Â 143Â 83Â 235Â Â Â Depreciation 484Â 477Â 1,915Â 2,043Â 1,997Â EBITDA 2,411Â 1,561Â 6,666Â 4,940Â 3,913Â Impairment charges (reversals) of non-current assetsb (477) 2Â (457) 312Â 1,671Â Acquisition/disposition gainsc (17) (1) (24) (364) (405) Loss on currency translation 18Â 4Â 39Â 93Â 16Â Other expense adjustmentsd 113Â 97Â 249Â 96Â 17Â Income tax expense, net finance costsa, and depreciation from equity investees 201Â 110Â 532Â 397Â 401Â Adjusted EBITDA 2,249Â 1,773Â 7,005Â 5,474Â 5,613Â Non-controlling Interests (552) (481) (1,820) (1,487) (1,584) Attributable EBITDA 1,697Â 1,292Â 5,185Â 3,987Â 4,029Â Revenues - as adjustede 3,038Â 2,806Â 10,724Â 9,411Â 9,147Â Attributable EBITDA marginf 56Â % 46Â % 48Â % 42Â % 44Â % As at 12/31/24 As at 12/31/23 As at 12/31/22 Net leverageg 0.1:1 0.1:1 0.1:1a.Finance costs exclude accretion.b.Net impairment (reversals) charges for Q4 2024 and 2024 mainly relate to long-lived asset impairment reversals at Lumwana and Veladero, partially offset by a goodwill impairment at Loulo-Gounkoto. Net impairment charges for 2023 mainly relate to a long-lived asset impairment at Long Canyon. For 2022, net impairment charges primarily relate to a goodwill impairment at Loulo-Gounkoto, and non-current asset impairments at Veladero and Long Canyon, partially offset by an impairment reversal at Reko Diq. c.Acquisition/disposition gains for Q4 2024 and 2024 relate to miscellaneous assets. For 2023, acquisition/disposition gains primarily relate to a gain on the reopening of the Porgera mine. For 2022, acquisition/disposition gains primarily relate to a gain as Barrickâ€™s interest in the Reko Diq project increased from 37.5% to 50%, as well as the sale of two royalty portfolios. d.Other expense adjustments for Q4 2024 and 2024 mainly relate to a payment to the Government of Mali to advance negotiations and a customs and royalty settlement at Tongon. 2024 was further impacted by the interest and penalties recognized following the proposed settlement of the ZaldÃvar Tax Assessments in Chile, which was recorded in Q2 2024, a provision made relating to a legacy mine site operated by Homestake Mining Company that was closed prior to the 2001 acquisition by Barrick, and an accrual relating to the road construction in Tanzania per our community investment obligations under the Twiga partnership. For 2023, other expense adjustments mainly relate to changes in the discount rate assumptions on our closed mine rehabilitation provision, care and maintenance expenses at Porgera and the $30 million commitment we made towards the expansion of education infrastructure in Tanzania. For 2022, other expense adjustments mainly relate to a net realizable value impairment of leach pad inventory at Veladero, care and maintenance expenses at Porgera and supplies obsolescence write-off at Bulyanhulu and North Mara. e.Refer to Reconciliation of Sales to Realized Price per pound/ounce on page 75 of this MD&A.f.Represents attributable EBITDA divided by revenues - as adjusted.g.Represents debt, net of cash divided by adjusted EBITDA of the last four consecutive quarters. Excludes Pierina, which was producing incidental ounces until December 31, 2023 while in closure. It also excludes Long Canyon which is producing residual ounces from the leach pad while in care and maintenance. d.Represents cumulative catch-up adjustment to revenue relating to our streaming arrangements. Refer to note 2e to the Financial Statements for more information.e.Realized price per ounce/pound may not calculate based on amounts presented in this table. BARRICK YEAR-END 2024 75 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSTechnical Information The scientific and technical information contained in this MD&A has been reviewed and approved by Craig Fiddes, SME-RM, Lead, Resource Modeling, Nevada Gold Mines; Richard Peattie, MPhil, FAusIMM, Mineral Resources Manager: Africa and Middle East; Peter Jones, MAIG, Manager Resource Geology â€“ Latin America & Asia Pacific; Simon Bottoms, CGeol, MGeol, FGS, FAusIMM, Mineral Resource Management and Evaluation Executive; and Joel Holliday, FAusIMM, Executive Vice-President, Exploration â€“ each a â€œQualified Personâ€ as defined in National Instrument 43-101 â€“ Standards of Disclosure for Mineral Projects. All mineral reserve and mineral resource estimates are estimated in accordance with National Instrument 43-101 â€“ Standards of Disclosure for Mineral Projects. Unless otherwise noted, such mineral reserve and mineral resource estimates are as of DecemberÂ 31, 2024.EndnotesÂ 1A Tier One Gold Asset is an asset with a $1,400/oz reserve with potential to deliver a minimum 10-year life, annual production of at least 500,000 ounces of gold and with costs per ounce in the lower half of the industry cost curve. Tier One Assets must be located in a world-class geological district with potential for organic reserve growth and long-term geologically driven addition.2A Tier Two Gold Asset is an asset with a reserve with potential to deliver a minimum 10-year life, annual production of at least 250,000 ounces of gold and total cash costs per ounce over the mine life that are in the lower half of the industry cost curve. 3A Tier One Copper Asset/Project is an asset with a $3.00/lb reserve with potential for +5Mt contained copper in support of at least 20 years life, annual production of at least 200ktpa, with costs per pound in the lower half of the industry cost curve.4A Strategic Asset is an asset, which in the opinion of Barrick, has the potential to deliver significant unrealized value in the future. 5Currently consists of Barrickâ€™s Lumwana mine, ZaldÃvar and Jabal Sayid joint ventures, and Reko Diq project.6Further information on these non-GAAP financial measures, including detailed reconciliations, is included on pages 59 to 75 of this MD&A.7Gold cost of sales per ounce is calculated as cost of sales across our gold operations (excluding sites in closure or care and maintenance) divided by ounces sold (both on an attributable basis using Barrickâ€™s ownership share). Copper cost of sales per pound is calculated as cost of sales across our copper operations divided by pounds sold (both on an attributable basis using Barrickâ€™s ownership share). 8TRIFR is a ratio calculated as follows: number of reportable injuries x 1,000,000 hours divided by the total number of hours worked. Reportable injuries include fatalities, lost time injuries, restricted duty injuries, and medically treated injuries. LTIFR is a ratio calculated as follows: number of lost time injuries x 1,000,000 hours divided by the total number of hours worked.9Class 1 - High Significance is defined as an incident that causes significant negative impacts on human health or the environment or an incident that extends onto publicly accessible land and has the potential to cause significant adverse impact to surrounding communities, livestock or wildlife. 10Categories as defined in the Greenhouse Gas Protocolâ€™s Technical Guidance for Calculating Scope 3 Emissions. Achievement of Barrickâ€™s Scope 3 targets will require collaboration with suppliers and customers in our value chain, which are outside of Barrickâ€™s direct control. 11Preliminary figures and subject to external assurance.12All mineral resource and mineral reserve estimates of tonnes, Au oz, Ag oz and Cu Mt are reported to the second significant digit. All measured and indicated mineral resource estimates of grade and all proven and probable mineral reserve estimates of grade for Au g/t, Ag g/t and Cu % are reported to two decimal places. All inferred mineral resource estimates of grade for Au g/t, Ag g/t and Cu % are reported to one decimal place. 2024 polymetallic mineral resources and mineral reserves are estimated using the combined value of gold, copper & silver and accordingly are reported as gold, copper & silver mineral resources and mineral reserves.13Estimated in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects as required by Canadian securities regulatory authorities. Estimates are as of DecemberÂ 31, 2024, unless otherwise noted. Proven reserves of 270 million tonnes grading 1.75 g/t, representing 15 million ounces of gold, and 380 million tonnes grading 0.42%, representing 1.6 million tonnes of copper. Probable reserves of 2,500 million tonnes grading 0.90 g/t, representing 74 million ounces of gold, and 3,600 million tonnes grading 0.46%, representing 17 million tonnes of copper. Measured resources of 450 million tonnes grading 1.68 g/t, representing 24 million ounces of gold, and 600 million tonnes grading 0.38%, representing 2.3 million tonnes of copper. Indicated resources of 4,800 million tonnes grading 1.01 g/t, representing 150 million ounces of gold, and 5,400 million tonnes grading 0.39%, representing 22 million tonnes of copper. Inferred resources of 1,400 million tonnes grading 0.9 g/t, representing 41 million ounces of gold, and 1,300 BARRICK YEAR-END 2024 76 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSmillion tonnes grading 0.3%, representing 3.9 million tonnes of copper. Totals may not appear to sum correctly due to rounding. Complete mineral reserve and mineral resource data for all mines and projects referenced in this MD&A, including tonnes, grades, and ounces, can be found on pages 83-92 of Barrickâ€™s Fourth Quarter and Year-End 2024 Report. 14Estimated in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects as required by Canadian securities regulatory authorities. Estimates are as of December 31, 2023, unless otherwise noted. Proven reserves of 250 million tonnes grading 1.85 g/t, representing 15 million ounces of gold, and 320 million tonnes grading 0.41%, representing 1.3 million tonnes of copper. Probable reserves of 1,200 million tonnes grading 1.61 g/t, representing 61 million ounces of gold, and 1,100 million tonnes grading 0.38%, representing 4.3 million tonnes of copper. Measured resources of 430 million tonnes grading 1.76 g/t, representing 24 million ounces of gold, and 580 million tonnes grading 0.39%, representing 2.2 million tonnes of copper. Indicated resources of 4,800 million tonnes grading 1.00 g/t, representing 150 million ounces of gold, and 4,900 million tonnes grading 0.39%, representing 19 million tonnes of copper. Inferred resources of 1,500 million tonnes grading 0.8 g/t, representing 39 million ounces of gold, and 2,000 million tonnes grading 0.4%, representing 7.1 million tonnes of copper. Totals may not appear to sum correctly due to rounding. Complete 2023 mineral reserve and mineral resource data for all mines and projects referenced in this MD&A, including tonnes, grades, and ounces, can be found on pages 33-45 of Barrickâ€™s Annual Information Form/FormÂ 40-FÃ for the year ended DecemberÂ 31, 2023 on file with Canadian provincial securities regulatory authorities and the U.S. Securities and Exchange Commission.15Proven and probable reserve gains from cumulative net change in reserves from year end 2019 to 2024. Reserve replacement percentage is calculated from the cumulative net change in reserves from 2020 to 2024 divided by the cumulative depletion in reserves from year end 2019 to 2024 as shown in the table below: Year Attributable P&P Gold (Moz) Attributable Gold Acquisition & Divestments (Moz) Attributable Gold Depletion (Moz) Attributable Gold Net Change (Moz) Reported Reserve Price USD/oz for GEO conversion 2019a 71 â€“ â€“ â€“ â€“ 2020b 68 (2.2) (5.5) 4.2 $1,200 2021c 69 (0.91) (5.4) 8.1 $1,200 2022d 76 â€“ (4.8) 12 $1,300 2023e 77 â€“ (4.6) 5 $1,300 2024f 89 â€“ (4.6) 17 $1,400 2019 - 2024 Total N/A (3.1) (25) 46 N/A Year Attributable P&P Copper (Mlb) Attributable Copper Acquisition & Divestments (Mlb) Attributable Copper Depletion (Mlb) Attributable Copper Net Change (Mlb) Reported Reserve Price USD/lb for GEO conversion 2019a 13,494 â€“ â€“ â€“ â€“ 2020b 12,691 â€“ (834) 31 $2.75 2021c 12,233 â€“ (636) 178 $2.75 2022d 12,252 â€“ (623) 642 $3.00 2023e 12,391 â€“ (589) 728 $3.00 2024f 40,201 â€“ (731) 28,542 $3.00 2019 - 2024 Total N/A â€“ (3,413) 30,121 N/AAttributable Proven and

Probable organic gold equivalent reserve additions calculated from the cumulative net change in reserves from year-end 2020 to 2024 using reserve prices for gold equivalent ounce (GEO) conversionâ€¯as shown in the tables above to result in the Attributable Net Change GEO tabulated below: Year Attributable P&P GEO Attributable Acquisition & Divestments GEO Attributable Depletion GEO Attributable Net Change GEO (using reported reserve prices) 2019a â€” â€” â€” â€” 2020b 97 (2.2) (7.4) 4.2 2021c 97 (0.91) (6.9) 8.5 2022d 104 â€” (6.3) 13 2023e 105 â€” (6.0) 6.7 2024f 176 â€” (6.1) 6.7 2019 - 2024 Total N/A (3.1) (33) 111 Totals may not appear to sum correctly due to rounding.Attributable acquisitions and divestments includes the following: a decrease of 2.2 Moz in proven and probable gold reserves from December 31, 2019 to December 31, 2020, as a result of the divestiture of Barrick's Massawa gold project effective March 4, 2020; and a decrease of 0.91 Moz in proven and probable gold reserves from December 31, 2020 to BARRICK YEAR-END 2024 77 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSDecember 31, 2021, as a result of the change in Barrickâ€™s ownership interest in Porgera from 47.5% to 24.5% and the net impact of the asset exchange of Lone Tree to i-80 Gold for the remaining 50% of South Arturo that Nevada Gold Mines did not already own. All estimates are estimated in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects as required by Canadian securities regulatory authorities.a Estimates as of December 31, 2019, unless otherwise noted, Proven reserves of 280 million tonnes grading 2.42 g/t, representing 22 million ounces of gold and 420 million tonnes grading 0.4%, representing 3,700 million pounds of copper (which is equal to 1.7 million tonnes of copper). Probable reserves of 1,000 million tonnes grading 1.48 g/t, representing 49 million ounces of gold and 1,200 million tonnes grading 0.38%, representing 9,800 million pounds of copper (which is equal to 4.4 million tonnes of copper). Conversions may not recalculate due to rounding. b Estimates as of December 31, 2020, unless otherwise noted: Proven reserves of 280 million tonnes grading 2.37g/t, representing 21 million ounces of gold, and 350 million tonnes grading 0.39%, representing 3,000 million pounds of copper (which is equal to 1.4 million tonnes of copper). Probable reserves of 990 million tonnes grading 1.46g/t, representing 47 million ounces of gold, and 1,100 million tonnes grading 0.39%, representing 9,700 million pounds of copper (which is equal to 4.4 million tonnes of copper). Conversions may not recalculate due to rounding. c Estimates as of December 31, 2021, unless otherwise noted, Proven mineral reserves of 240 million tonnes grading 2.20g/t, representing 17 million ounces of gold and 380 million tonnes grading 0.41%, representing 3,400 million pounds of copper (which is equal to 1.6 million tonnes of copper), and probable reserves of 1,000 million tonnes grading 1.60g/t, representing 53 million ounces of gold and 1,100 million tonnes grading 0.37%, representing 8,800 million pounds of copper (which is equal to 4.0 million tonnes of copper). Conversions may not recalculate due to rounding. d Estimates as of December 31, 2022, unless otherwise noted. Proven mineral reserves of 260 million tonnes grading 2.26g/t, representing 19 million ounces of gold and 390 million tonnes grading 0.40%, representing 3,500 million pounds of copper (which is equal to 1.6 million tonnes of copper), and probable reserves of 1,200 million tonnes grading 1.53g/t, representing 57 million ounces of gold and 1,100 million tonnes grading 0.37%, representing 8,800 million pounds of copper (which is equal to 4.0 million tonnes of copper). Conversions may not recalculate due to rounding. e Estimates are as of December 31, 2023, unless otherwise noted. Proven mineral reserves of 250 million tonnes grading 1.85g/t, representing 15 million ounces of gold, and 320 million tonnes grading 0.41%, representing 1.3 million tonnes of copper. Probable reserves of 1,200 million tonnes grading 1.61g/t, representing 61 million ounces of gold, and 1,100 million tonnes grading 0.38%, representing 4.3 million tonnes of copper. f Estimates are as of December 31, 2024, unless otherwise noted. Proven mineral reserves of 270 million tonnes grading 1.75g/t, representing 15 million ounces of gold, and 380 million tonnes grading 0.42%, representing 1.6 million tonnes of copper. Probable reserves of 2,500 million tonnes grading 0.90g/t, representing 74 million ounces of gold, and 3,600 million tonnes grading 0.46%, representing 17 million tonnes of copper. 16Fourmile is currently 100% owned by Barrick. As previously disclosed, Barrick anticipates Fourmile being contributed to the NGM joint venture if certain criteria are met following the completion of drilling and the requisite feasibility work.17See the Technical Report on the Cortez Complex, Lander and Eureka Counties, State of Nevada, USA, dated December 31, 2021, and filed on SEDAR+ at www.sedarplus.ca and EDGAR at www.sec.gov on March 18, 2022.18See the Technical Report on the Pueblo Viejo mine, Dominican Republic, dated March 17, 2023, and filed on SEDAR+ at www.sedarplus.ca and EDGAR at www.sec.gov on March 17, 2023.19Estimated in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects as required by Canadian securities regulatory authorities. Estimates are as of December 31, 2024, unless otherwise noted. A Technical Report on Reko Diq will be prepared in accordance with Form 43-101F1 and filed on SEDAR+ within 45 days of Barrick's Q4 and Annual MD&A and Financial Statements dated February 12, 2025. For further information with respect to the key assumptions, parameters and risks associated with Reko Diq, the mineral reserve and resource estimates included herein and other technical information, please refer to the Technical Report to be made available on SEDAR+ at www.sedarplus.ca.20Reko Diq probable reserves of 1,400 million tonnes grading 0.28 g/t representing 13 million ounces of gold, probable reserves of 1,500 million tonnes grading 0.48% representing 7.3 million tonnes of copper, indicated resources of 1,800 million tonnes grading 0.25 g/t representing 15 million ounces of gold, inferred resources of 640 million tonnes grading 0.2 g/t representing 3.9 million ounces of gold, indicated resources of 2,000 million tonnes grading 0.43% representing 8.4 million tonnes of copper, and inferred resources of 690 million tonnes grading 0.3% representing 2.2 million tonnes of copper. Complete mineral reserve and mineral resource data for all mines and projects referenced in this MD&A, including tonnes, grades, and ounces, can be found on pages 83-92 of Barrickâ€™s Fourth Quarter and Year-End 2024 Report. 21A Technical Report on Lumwana will be prepared in accordance with Form 43-101F1 and filed on SEDAR+ at www.sedarplus.ca and EDGAR at www.sec.gov within 45 days of Barrick's Q4 and Annual MD&A and Financial Statements dated February 12, 2025. For further information with respect to the key assumptions, parameters and risks associated with Lumwana and other technical information, please refer to the Technical Report to be made available on SEDAR+ at www.sedarplus.ca and EDGAR at www.sec.gov. Sample preparation and analyses are conducted by SGS, an independent laboratory. Industry accepted best practices for preparation and fire assaying procedures are utilized to determine gold content. Procedures are employed to ensure security of samples during their delivery from the drill rig to the laboratory. The quality assurance procedures, data verification and assay protocols used in connection with drilling and sampling on the Tongon property conform to industry accepted quality control methods.26Â Â Â Â Kibali Significant Interceptsa Drill Results from Q4 2024 Includinge Drill Holeb Azimuth Dip Interval (m) Width (m)c Au (g/t) Interval (m) Width (m)d Au (g/t) RHGC2053 230 (63) 42.00 - 46.00 4.00 1.76 76.00 - 88.00 12.00 231.15 RHGC2066 230 (64) 72.00 - 96.00 24.00 3.12 72.00 - 76.00 4.00 11.18 RHGC2067 230 (70) 74.00 - 96.00 22.00 2.74 72.00 - 88.00 14.00 3.29 RHDD0079 229 (64) 79.00 - 81.80 2.80 0.63 85.00 - 91.00 6.00 1.40 131.00 - 140.80 8.80 17.30 134.00 - 138.00 4.00 36.17 KCDU7507 316 30 0.00 - 7.86 7.86 1.76 21.79 - 55.83 34.04 3.9 21.79 - 48.00 26.21 3.18 a.All intercepts calculated using a 0.5 g/t Au cutoff and are uncapped; minimum intercept width is 2 meters; internal dilution is equal to or less than 25% total width.b.Kibali drill hole nomenclature: prospect initial (KC=Durba (KCD), RH=Rhino followed by the type of drilling (RC=Reverse Circulation, DD=Diamond, GC=Grade control) with no designation of the year. KCDU = KCD Underground. c.True widths of intercepts are uncertain at this stage.d.Weighted average is calculated by fence using significant intercepts, over the strength length.e.All including intercepts, calculated using a 0.5 g/t Au cutoff and are uncapped, minimum intercept width is 1 meter, no internal dilution, with grade significantly above (>40%) the overall intercept grade .The drilling results for Kibali contained in this MD&A have been prepared in accordance with National Instrument 43-101 â€“ Standards of Disclosure for Mineral Projects. All drill hole assay information has been manually reviewed and approved by staff geologists and re-checked by the project manager. Sample preparation and analyses are conducted by an independent laboratory, SGS. Procedures are employed to ensure security of samples during their delivery from the drill rig to the laboratory. The quality assurance procedures, data verification and assay protocols used in connection with drilling and sampling at Kibali conform to industry accepted quality control methods. BARRICK YEAR-END 2024 81 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSGlossary of Technical Terms Â ALL-IN SUSTAINING COSTS: A non-GAAP measure of cost per ounce/pound for gold/copper. Refer to page 61 of this MD&A for further information and a reconciliation of the measure.AUTOCLAVE: Oxidation process in which high temperatures and pressures are applied to convert refractory sulfide mineralization into amenable oxide ore.BY-PRODUCT: A secondary metal or mineral product recovered in the milling process such as silver.C1 CASH COSTS: A non-GAAP measure of cost per pound for copper. Refer to page 61 of this MD&A for further information and a reconciliation of the measure.CONCENTRATE: A very fine, powder-like product containing the valuable ore mineral from which most of the waste mineral has been eliminated.CONTAINED OUNCES: Represents ounces in the ground before loss of ounces not able to be recovered by the applicable metallurgical processing process.DEVELOPMENT: Work carried out for the purpose of gaining access to an ore body. In an underground mine, this includes shaft sinking, crosscutting, drifting and raising. In an open-pit mine, development includes the removal of overburden (more commonly referred to as stripping in an open pit).DILUTION: The effect of waste or low-grade ore which is unavoidably extracted and comingled with the ore mined thereby lowering the recovered grade from what was planned to be mined.DORÃ‰: Unrefined gold and silver bullion bars usually consisting of approximately 90Â percent precious metals that will be further refined to almost pure metal.DRILLING:Core: drilling with a hollow bit with a diamond cutting rim to produce a cylindrical core that is used for geological study and assays.Reverse circulation: drilling that uses a rotating cutting bit within a double-walled drill pipe and produces rock chips rather than core. Air or water is circulated down to the bit between the inner and outer wall of the drill pipe. The chips are forced to the surface through the center of the drill pipe and are collected, examined and assayed. In-fill: drilling closer spaced holes in between existing holes, used to provide greater geological detail and to help upgrade resource estimates to reserve estimates.Step-out: drilling to intersect a mineralized horizon or structure along strike or down-dip.EXPLORATION: Prospecting, sampling, mapping, drilling and other work involved in searching for minerals.FREE CASH FLOW: A non-GAAP measure that reflects our ability to generate cash flow. Refer to page 60 of this MD&A for a definition.GRADE: The amount of metal in each tonne of ore, expressed as grams per tonne (g/t) for precious metals and as a

percentage for most other metals.Cut-off grade: the minimum metal grade at which an ore body can be economically mined (used in the calculation of ore reserves).Mill-head grade: metal content per tonne of ore going into a mill for processing. Reserve grade: estimated metal content of an ore body, based on reserve calculations.HEAP LEACHING: A process whereby gold/copper is extracted by â€œheapingâ€ broken ore on sloping impermeable pads and continually applying to the heaps a weak cyanide solution/sulfuric acid which dissolves the contained gold/copper. The gold/copper-laden solution is then collected for gold/copper recovery.HEAP LEACH PAD: A large impermeable foundation or pad used as a base for stacking ore for the purpose of heap leaching.MILL: A processing facility where ore is finely ground and thereafter undergoes physical or chemical treatment to extract the valuable metals.MINERAL RESERVE: See pages 83 to 92 â€“ Summary Gold/Copper Mineral Reserves and Mineral Resources.MINERAL RESOURCE: See pages 83 to 92 â€“ Summary Gold/Copper Mineral Reserves and Mineral Resources.OPEN PIT: A mine where the minerals are mined entirely from the surface.ORE: Rock, generally containing metallic or non-metallic minerals, which can be mined and processed at a profit.ORE BODY: A sufficiently large amount of ore that can be mined economically.OUNCES: Troy ounce is a unit of measure used for weighing gold at 999.9 parts per thousand purity and is equivalent to 31.1035g.RECLAMATION: The process by which lands disturbed as a result of mining activity are modified to support future beneficial land use. Reclamation activity may include the removal of buildings, equipment, machinery and other physical remnants of mining, closure of tailings storage facilities, leach pads and other mine features, and contouring, covering and re-vegetation of waste rock dumps and other disturbed areas.RECOVERY RATE: A term used in process metallurgy to indicate the proportion of valuable material physically recovered in the processing of ore. It is generally stated as a percentage of the valuable material recovered compared to the total material originally contained in the ore.REFINING: The final stage of metal production in which impurities are removed through heating to extract the pure metal.ROASTING: The treatment of sulfide ore by heat and air, or oxygen enriched air, in order to oxidize sulfides and remove other elements (carbon, antimony or arsenic). STRIPPING: Removal of overburden or waste rock overlying an ore body in preparation for mining by open-pit methods. TAILINGS: The material that remains after all economically and technically recoverable precious metals have been removed from the ore during processing.TOTAL CASH COSTS: A non-GAAP measure of cost per ounce for gold. Refer to page 61 of this MD&A for further information and a reconciliation of the measure. BARRICK YEAR-END 2024 82 MANAGEMENTâ€™S DISCUSSION AND ANALYSIS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSMineral Reserves and Mineral ResourcesThe tables on the next seven pages set forth Barrickâ€™s interest in the total proven and probable gold, silver and copper reserves and in the total measured, indicated and inferred gold, silver and copper resources and certain related information at each property. For further details of proven and probable mineral reserves and measured, indicated and inferred mineral resources by category, metal and property, see pages 83 to 92.The Company has carefully prepared and verified the mineral reserve and mineral resource figures and believes that its method of estimating mineral reserves has been verified by mining experience. These figures are estimates, however, and no assurance can be given that the indicated quantities of metal will be produced. Metal price fluctuations may render mineral reserves containing relatively lower grades of mineralization uneconomic. Moreover, short-term operating factors relating to the mineral reserves, such as the need for orderly development of ore bodies or the processing of new or different ore grades, could affect the Companyâ€™s profitability in any particular accounting period.DefinitionsA mineral resource is a concentration or occurrence of diamonds, natural solid inorganic material, or natural solid fossilized organic material including base and precious metals, coal, and industrial minerals in or on the Earthâ€™s crust in such form and quantity and of such a grade or quality that it has reasonable prospects for economic extraction. The location, quantity, grade, geological characteristics and continuity of a mineral resource are known, estimated or interpreted from specific geological evidence and knowledge. Mineral resources are sub-divided, in order of increasing geological confidence, into inferred, indicated and measured categories.An inferred mineral resource is that part of a mineral resource for which quantity and grade or quality can be estimated on the basis of geological evidence and limited sampling and reasonably assumed, but not verified, geological and grade continuity. The estimate is based on limited information and sampling gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes.An indicated mineral resource is that part of a mineral resource for which quantity, grade or quality, densities, shape and physical characteristics can be estimated with a level of confidence sufficient to allow the appropriate application of technical and economic parameters, to support mine planning and evaluation of the economic viability of the deposit. The estimate is based on detailed and reliable exploration and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes that are spaced closely enough for geological and grade continuity to be reasonably assumed.A measured mineral resource is that part of a mineral resource for which quantity, grade or quality, densities, shape and physical characteristics are so well established that they can be estimated with confidence sufficient to allow the appropriate application of technical and economic parameters, to support production planning and evaluation of the economic viability of the deposit. The estimate is based on detailed and reliable exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes that are spaced closely enough to confirm both geological and grade continuity.Mineral resources, which are not mineral reserves, do not have demonstrated economic viability.A mineral reserve is the economically mineable part of a measured or indicated mineral resource demonstrated by at least a preliminary feasibility study. This study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified.A mineral reserve includes diluting materials and allowances for losses that may occur when the material is mined. Mineral reserves are sub-divided in order of increasing confidence into probable mineral reserves and proven mineral reserves. A probable mineral reserve is the economically mineable part of an indicated and, in some circumstances, a measured mineral resource demonstrated by at least a preliminary feasibility study. This study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified.A proven mineral reserve is the economically mineable part of a measured mineral resource demonstrated by at least a preliminary feasibility study. This study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction is justified. BARRICK YEAR-END 2024 91 RESERVES AND RESOURCES OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS Mineral Reserves and Resources Endnotes1.Mineral reserves (â€œreservesâ€) and mineral resources (â€œresourcesâ€) have been estimated as at DecemberÂ 31, 2024 (unless otherwise noted) in accordance with National Instrumentâ€¯43-101â€¯- Standards of Disclosure for Mineral Projects (â€œNI 43-101â€) as required by Canadian securities regulatory authorities. For United States reporting purposes, the SEC has adopted amendments to its disclosure rules to modernize the mineral property disclosure requirements for issuers whose securities are registered with the SEC under the Securities and Exchange Act of 1934, as amended (the â€œExchange Actâ€). These amendments became effective February 25, 2019 (the â€œSEC Modernization Rulesâ€) with compliance required for the first fiscal year beginning on or after January 1, 2021. The SEC Modernization Rules replace the historical property disclosure requirements for mining registrants that were included in SEC Industry Guide 7, which was rescinded from and after the required compliance date of the SEC Modernization Rules. As a result of the adoption of the SEC Modernization Rules, the SEC now recognizes estimates of â€œmeasuredâ€, â€œindicatedâ€ and â€œinferredâ€ mineral resources. In addition, the SEC has amended its definitions of â€œproven mineral reservesâ€ and â€œprobable mineral reservesâ€ to be substantially similar to the corresponding Canadian Institute of Mining, Metallurgy and Petroleum definitions, as required by NI 43-101. U.S. investors should understand that â€œinferredâ€ mineral resources have a great amount of uncertainty as to their existence and great uncertainty as to their economic and legal feasibility. In addition, U.S. investors are cautioned not to assume that any part or all of Barrickâ€™s mineral resources constitute or will be converted into reserves. Mineral resource and mineral reserve estimations have been prepared by employees of Barrick, its joint venture partners or its joint venture operating companies, as applicable, under the supervision of Craig Fiddes, SME-RM, Lead, Resource Modeling, Nevada Gold Mines; Richard Peattie, MPhil, FAusIMM, Mineral Resources Manager: Africa and Middle East; Peter Jones, MAIG, Manager Resource Geology â€“ Latin America & Asia Pacific; and Simon Bottoms, CGeol, MGeol, FGS, FAusIMM, Mineral Resource Management and Evaluation Executive. For 2024, reserves have been estimated based on an assumed gold price of US$1,400 per ounce, an assumed silver price of US$20.00 per ounce, and an assumed copper price of US$3.00 per pound and long-term average exchange rates of 1.30 CAD/US$, except at Tongon, and Hemlo open pit, both where mineral reserves for 2024 were estimated using $1,650/oz; at ZaldÃvar, where mineral reserves for 2024 were calculated using Antofagasta guidance and an updated assumed copper price of US$3.80 per pound; and at Norte Abierto where mineral reserves are reported by Newmont within a $1,200/oz gold, $2.75/lb copper and $22/oz silver pit design, before application of updated 2023 project economics using escalated operating and capital costs resulting in Newmont guidance of $1,600/oz for gold, $4.00/lb for copper and $23/oz for silver for assumed mineral reserve commodity prices. For 2023, reserves have been estimated based on an assumed gold price of US$1,300 per ounce, an assumed silver price of US$18.00 per ounce, and an assumed copper price of US$3.00 per pound and long-term average exchange rates of 1.30 CAD/US$, except at Tongon, where mineral reserves for 2023 were calculated using $1,500/oz; Hemlo, where mineral reserves for 2023 were calculated using $1,400/oz; and at ZaldÃvar, where mineral reserves for 2023 were calculated using Antofagasta guidance and an updated assumed copper price of US$3.50 per pound. Reserve estimates incorporate current and/or expected mine plans and cost levels at each property. Varyingâ€¯cut-offâ€¯grades have been used depending on the mine and type of ore contained in the reserves. Barrickâ€™s normal data verification procedures have been employed in connection with the calculations. Verification procedures include industry-standard quality control practices. Resources as at DecemberÂ 31, 2024 have been estimated using varyingÂ cut-offÂ grades, depending on both the type of mine or project, its maturity and ore types at each property.2.In confirming our annual reserves for each of our mineral properties, projects, and operations, we conduct a reserve test on Decemberâ€¯31 of each year to verify that the future undiscounted cash flow from reserves is positive. The cash flow ignores all sunk costs and only considers future operating and closure expenses as well as any future capital costs.3.All mineral resource and mineral reserve estimates of tonnes, Au oz, Ag oz and Cu tonnes are reported to the second significant digit. 4.Mineral resources and mineral reserves for the Loulo-Gounkoto Complex have been estimated under the 1991 Malian Mining Code and the Loulo and Gounkoto Mining Conventions under which the Complex has operated to date. Any update to applicable terms as a result of ongoing engagements with the Government of Mali will be incorporated after a definitive agreement is reached. For additional information see page 9 of Barrickâ€™s Fourth Quarter and Year End Report 2024. 5.2024 polymetallic mineral resources and mineral reserves are estimated using the combined value of gold, copper & silver and accordingly are reported as gold, copper and silver mineral resources and mineral reserves.6.For 2024, mineral resources have been estimated based on an assumed gold price of US$1,900 per ounce, an assumed silver price of US$24.00 per ounce, and an assumed copper price of US$4.00 per pound and long-term average exchange rates of 1.30 CAD/US$, except ZaldÃvar, where mineral resources for 2024 were estimated using Antofagasta guidance and an assumed copper price of US$4.40 per pound, and Norte Abierto, where mineral resources are reported by Newmont within a $1,400/oz gold, $3.25/lb copper and $20/oz silver pit shell, before application of updated 2023 project economics using escalated operating and capital costs resulting in Newmont guidance of $1,600/oz for gold, $4.00/lb for copper and $23/oz for silver for assumed mineral resource commodity price. For 2023, mineral resources were estimated based on an assumed gold price of US$1,700 per ounce, an assumed silver price of US$21.00 per ounce, and an assumed copper price of US$4.00 per pound and long-term average exchange rates of 1.30 CAD/US$, except at ZaldÃvar, where mineral resources for 2023 were calculated using Antofagasta guidance and an assumed copper price of US$4.20. 7.Mineral resources which are not mineral reserves do not have demonstrated economic viability. 8.Mineral resources are reported inclusive of mineral reserves.9.All measured and indicated mineral resource estimates of grade and all proven and probable mineral reserve estimates of grade for Au g/t, Ag g/t and Cu % are reported to two decimal places.10.All inferred mineral resource estimates of grade for Au g/t, Ag g/t and Cu % are reported to one decimal place. BARRICK YEAR-END 2024 92 RESERVES AND RESOURCESManagementâ€™s Responsibility for Financial StatementsThe accompanying consolidated financial statements have been prepared by and are the responsibility of the Board of Directors and Management of the Company.The consolidated financial statements have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board and reflect Managementâ€™s best estimates and judgments based on currently available information. The Company has developed and maintains a system of internal controls in order to ensure, on a reasonable and cost effective basis, the reliability of its financial information.The consolidated financial statements have been audited by PricewaterhouseCoopers LLP, Chartered Professional Accountants. Their report outlines the scope of their examination and opinion on the consolidated financial statements.Â /s/ Graham ShuttleworthGraham ShuttleworthSenior Executive Vice Presidentand Chief Financial OfficerFebruaryÂ 11, 2025 Managementâ€™s Report on Internal Control over Financial ReportingBarrickâ€™s management is responsible for establishing and maintaining adequate internal control over financial reporting.Barrickâ€™s management assessed the effectiveness of the Companyâ€™s internal control over financial reporting as at DecemberÂ 31, 2024. Barrickâ€™s Management used the Internal Control â€“ Integrated Framework (2013)Â as issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) to evaluate the effectiveness of Barrickâ€™s internal control over financial reporting. Based on managementâ€™s assessment, Barrickâ€™s internal control over financial reporting is effective as at DecemberÂ 31, 2024.The effectiveness of the Companyâ€™s internal control over financial reporting as at DecemberÂ 31, 2024 has been audited by PricewaterhouseCoopers LLP, Chartered Professional Accountants, as stated in their report which is located on pages 94 - 97 of Barrickâ€™s 2024 Annual Financial Statements. BARRICK YEAR-END 2024 93 Report of Independent Registered Public Accounting FirmTo the Board of Directors and Shareholders of Barrick Gold CorporationOpinions on the Financial Statements and Internal Control over Financial ReportingWe have audited the accompanying consolidated balance sheets of Barrick Gold Corporation and its subsidiaries (the Company) as of December 31, 2024 and 2023, and the related consolidated statements of income, of comprehensive income, of changes in equity and of cash flow for the years then ended, including the related notes (collectively referred to as the consolidated financial statements). We also have audited the Companyâ€™s internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control â€’ Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in conformity with IFRS Accounting Standards as issued by the International Accounting Standards Board. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control â€’ Integrated Framework (2013) issued by the COSO.Basis for OpinionsThe Companyâ€™s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Managementâ€™s Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Companyâ€™s consolidated financial statements and on the Companyâ€™s internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial PricewaterhouseCoopers LLPPwC Tower, 18 York Street, Suite 2500, Toronto, Ontario, Canada M5J oB2T: +1 416 863 1133, F: +1 416 365 8215, Fax to mail: ca_toronto_18_york_fax@pwc.comâ€œPwCâ€ refers to PricewaterhouseCoopers LLP, an Ontario limited liability partnership. reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.Definition and Limitations of Internal Control over Financial ReportingA companyâ€™s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A companyâ€™s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the companyâ€™s assets that could have a material effect on the financial statements.Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.Critical Audit Matters The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the Audit & Risk Committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates. Impairment (impairment reversal) assessments for goodwill and other non-current assets As described in Notes 2, 3, 10, 20, and 21 to the consolidated financial statements, the Companyâ€™s goodwill and other non-current assets are tested for impairment if there is an indicator of impairment or reversal of impairment, and in the case of goodwill annually, during the fourth quarter. Impairment assessments and impairment reversal assessments are conducted at the level of the cash generating unit (CGU), which is the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and includes liabilities specific to the CGU. For operating mines and projects, the individual mine/project represents a CGU for impairment and impairment reversal assessments. The Companyâ€™s goodwill and other non-current assets balances subject to impairment testing as of December 31, 2024 were $3.1 billion and $36.1 billion, respectively. During 2024, an indicator of impairment was identified for the Loulo-Gounkoto CGU and indicators of impairment reversal were identified for the Lumwana and Veladero CGUs. Management determined that the Fair Value Less Costs of Disposal (FVLCD) exceeded carrying value for the Lumwana and Veladero CGUs, and consequently recorded other non-current asset impairment reversals of $655 million and $437 million for the respective CGUs. Management determined that the carrying value of the Loulo-Gounkoto CGU exceeded FVLCD, and consequently recorded an impairment of goodwill of $484 million. Management estimated the recoverable amounts of the CGUs as the FVLCD using discounted estimates of future cash flows derived, where applicable, from the life of mine (LOM) plans, estimated fair values of mineral resources outside LOM plans and the application of a specific Net Asset Value (NAV) multiple for each CGU.

Managementâ€™s estimates of the FVLCD of the CGUs included assumptions with respect to future metal prices, operating and capital costs, weighted average costs of capital, NAV multiples, and future production levels, including mineral reserves and mineral resources, where applicable. Managementâ€™s estimates of future production levels, including mineral reserves and mineral resources are based on information compiled by qualified persons (managementâ€™s specialists). The principal considerations for our determination that performing procedures relating to the impairment (impairment reversal) assessments for goodwill and other non-current assets is a critical audit matter are (i) the significant judgment by management, including the use of managementâ€™s specialists, in estimating the FVLCD of the CGUs; (ii) a high degree of auditor judgment, subjectivity and effort in performing procedures and evaluating managementâ€™s assumptions, where we assessed them as significant, with respect to future metal prices, operating and capital costs, weighted average costs of capital, NAV multiples, and future production levels, including mineral reserves and mineral resources, where applicable; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge. Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to managementâ€™s impairment (impairment reversal) assessments for goodwill and other non-current assets, including controls over the significant assumptions used in managementâ€™s estimates of the FVLCD of the CGUs. These procedures also included, among others, testing managementâ€™s process for estimating the FVLCD of the CGUs with goodwill and for each CGU where there is an indicator of impairment (or impairment reversal); evaluating the appropriateness of the methods and discounted cash flow models used; testing the completeness and accuracy of underlying data used in the models; and evaluating the reasonableness of the significant assumptions used by management in the estimates of FVLCD. Evaluating the reasonableness of the significant assumptions used by management in the estimates of FVLCD with respect to future metal prices, operating and capital costs and NAV multiples involved (i) comparing future metal prices to external industry data; (ii) comparing operating and capital costs to recent actual operating and capital costs incurred and assessing whether these assumptions were consistent with evidence obtained in other areas of the audit, where appropriate; (iii) assessing the operating costs forecast for the Loulo-Gounkoto CGU by considering the correspondence with the Government of Mali and other relevant information obtained from management; and (iv) comparing NAV multiples to evidence of value from comparable market information. The work of managementâ€™s specialists was used in performing the procedures to evaluate the reasonableness of future production levels, including mineral reserves and mineral resources. As a basis for using this work, managementâ€™s specialistsâ€™ qualifications were understood and the Companyâ€™s relationship with managementâ€™s specialists was assessed. The procedures performed also included evaluation of the methods and significant assumptions used by managementâ€™s specialists, tests of data used by managementâ€™s specialists and an evaluation of managementâ€™s specialistsâ€™ findings. Professionals with specialized skill and knowledge were used to assist in evaluating the appropriateness of the methods and discounted cash flow models and the reasonableness of the weighted average costs of capital and NAV multiple assumptions./s/PricewaterhouseCoopers LLPChartered Professional Accountants, Licensed Public AccountantsToronto, CanadaFebruary 11, 2025We have served as the Companyâ€™s auditor since at least 1982. We have not been able to determine thespecific year we began serving as auditor of the Company. The Companyâ€™s corporate office is located at Brookfield Place, TD Canada Trust Tower, 161 Bay Street, Suite 3700, Toronto, Ontario, M5J 2S1. The Companyâ€™s registered office is 925 West Georgia Street, Suite 1600, Vancouver, British Columbia, V6C 3L2. Barrick shares trade on the New York Stock Exchange under the symbol GOLD and the Toronto Stock Exchange under the symbol ABX. We are principally engaged in the production and sale of gold and copper, as well as related activities such as exploration and mine development. We sell our gold and copper into the world market. We have ownership interests in producing gold mines that are located in Argentina, Canada, CÃ´te dâ€™Ivoire, the Democratic Republic of Congo, the Dominican Republic, Papua New Guinea, Tanzania and the United States. Our mine in Mali was placed on temporary suspension in January 2025. We have ownership interests in producing copper mines in Chile, Saudi Arabia and Zambia. We also have various projects located throughout the Americas, Asia and Africa. 2 n Material Accounting Policy Information a) Statement of ComplianceThese consolidated financial statements have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (â€œIFRSâ€). Accounting policies are consistently applied to all years presented, unless otherwise stated. These consolidated financial statements were approved for issuance by the Board of Directors on February 11, 2025.b) Basis of PreparationThese consolidated financial statements include the accounts of Barrick, its subsidiaries, its share of joint operations (â€œJOâ€) and its equity share of joint ventures (â€œJVâ€). When applying the equity method of accounting, specifically for Porgera, whereby the economic interest differs from the shareholding, the equity accounting is based on the economic share contractually agreed among the shareholders rather than the equity participation. For non wholly-owned, controlled subsidiaries, profit or loss for the period that is attributable to non-controlling interests is typically calculated based on the ownership of the minority shareholders in the subsidiary. BARRICK YEAR-END 2024 103 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSOutlined below is information related to our joint arrangements and entities other than 100% owned Barrick subsidiaries at DecemberÂ 31, 2024:Â PlaceÂ ofÂ business Entity type Interest1Â Â Â Â Â Â Method2 Nevada Gold Mines3 United StatesÂ Â Â Â Â Subsidiary 61.5% Consolidation North Mara3,4 Tanzania Subsidiary 84% Consolidation Bulyanhulu3,4 Tanzania Subsidiary 84% Consolidation Loulo-Gounkoto3 Mali Subsidiary 80% Consolidation Tongon3 CÃ´te dâ€™Ivoire Subsidiary 89.7% Consolidation Pueblo Viejo3 DominicanÂ Republic Subsidiary 60% Consolidation Reko Diq Project3 Pakistan Subsidiary 50% Consolidation Norte Abierto Project Chile JO 50% Our share Donlin Gold Project United States JO 50% Our share Veladero Argentina JO 50% Our share Kibali5 Democratic Republic of Congo JV 45% Equity Method Jabal Sayid5 Saudi Arabia JV 50% Equity Method ZaldÂvar5 Chile JV 50% Equity Method Porgera Mine5,6 PapuaÂ NewÂ Guinea JV 24.5% Equity Method1Unless otherwise noted, all of our JOs are funded by contributions made by the parties sharing joint control in proportion to their economic interest.2For our JOs, we recognize our share of any assets, liabilities, revenues and expenses of the JO.3We consolidate our interests in Carlin, Cortez, Turquoise Ridge, Phoenix, Long Canyon, North Mara, Bulyanhulu, Loulo-Gounkoto, Tongon, Pueblo Viejo and the Reko Diq project and record a non-controlling interest for the interest that we do not own. 4The Government of Tanzania receives half of the economic benefits from the Tanzanian operations (Bulyanhulu and North Mara) from taxes, royalties, clearing fees and participation in all cash distributions made by the mines, after the recoupment of capital investments. Earnings are recorded proportionally based on our equity interests each period in accordance with the terms of the agreement with the Government of Tanzania.5Barrick has commitments of $541 million relating to its interest in the joint ventures, including purchase obligations disclosed in note 17 and capital commitments disclosed in note 19.6On December 22, 2023, we completed the Porgera Project Commencement Agreement, pursuant to which the Papua New Guinea (â€œPNGâ€) government and Barrick Niugini Limited (â€œBNLâ€), the 95% owner and operator of the Porgera joint venture, agreed on a partnership for the future ownership and operation of the mine. Ownership of Porgera is held in a joint venture owned 51% by PNG stakeholders and 49% by a Barrick affiliate, Porgera (Jersey) Limited (â€œPJLâ€). PJL is jointly owned on a 50/50 basis by Barrick and Zijin Mining Group and therefore Barrick holds a 24.5% ownership interest in the Porgera joint venture. Barrick holds a 23.5% interest in the economic benefits of the mine under the economic benefit sharing arrangement agreed with the PNG government whereby Barrick and Zijin Mining Group together share 47% of the overall economic benefits derived from the mine accumulated over time, and the PNG stakeholders share the remaining 53%. Refer to notes 4 for further details.c) Business CombinationsOn the acquisition of a business, the acquisition method of accounting is used.d) Foreign Currency TranslationThe functional currency of all of our operations is the US dollar. We translate non-US dollar balances for these operations into US dollars as follows:â–ªProperty, plant and equipment (â€œPP&Eâ€), intangible assets and equity method investments using the rates at the time of acquisition;â–ªFair value through other comprehensive income (â€œFVOCIâ€) equity investments using the closing exchange rate as at the balance sheet date with translation gains and losses permanently recorded in Other Comprehensive Income (â€œOCIâ€);â–ªDeferred tax assets and liabilities using the closing exchange rate as at the balance sheet date with translation gains and losses recorded in income tax expense;â–ªOther assets and liabilities using the closing exchange rate as at the balance sheet date with translation gains and losses recorded in other income/expense; andâ–ªIncome and expenses using the average exchange rate for the period, except for expenses that relate to non-monetary assets and liabilities measured at historical rates, which are translated using the same

historical rate as the associated non-monetary assets and liabilities.e) Revenue RecognitionWe sell our production in the world market through the following distribution channels: gold bullion is sold in the gold spot market, to independent refineries or to our non-controlling interest holders; and gold and copper concentrate is sold to independent smelting or trading companies.Gold Bullion SalesGold bullion is sold primarily in the London spot market. The sale price is fixed on the date of sale based on the gold spot price. Generally, we record revenue from gold bullion sales at the time of physical delivery, which is also the date that title to the gold passes.Concentrate SalesUnder the terms of concentrate sales contracts with independent smelting companies, gold and copper sales prices are provisionally set on a specified future date after shipment based on market prices. We record revenues under these contracts at the time of shipment, which is also when the risks and rewards of ownership pass to the BARRICK YEAR-END 2024 104 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSsmelting companies, using forward market gold and copper prices on the expected date that final sales prices will be determined. Variations between the price recorded at the shipment date and the actual final price set under the smelting contracts are caused by changes in market gold and copper prices, which result in an embedded derivative in accounts receivable. The embedded derivative is recorded at fair value each period until final settlement occurs, with changes in fair value classified as provisional price adjustments and included in revenue in the consolidated statement of income and presented separately in note 6 of these consolidated financial statements.Streaming ArrangementsAs the deferred revenue on streaming arrangements is considered variable consideration, an adjustment is made to the transaction price per unit each time there is a change in the underlying production profile of a mine (typically in Q4 of each year). The change in the transaction price per unit results in a cumulative catch-up adjustment to revenue in the period in which the change is made, reflecting the new production profile expected to be delivered under the streaming agreement. A corresponding cumulative catch-up adjustment is made to accretion expense, reflecting the impact of the change in the deferred revenue balance. f) Exploration and EvaluationExploration expenditures are the costs incurred in the initial search for mineral deposits with economic potential or in the process of obtaining more information about existing mineral deposits. Exploration expenditures typically include costs associated with prospecting, sampling, mapping, diamond drilling and other work involved in searching for ore.Evaluation expenditures are the costs incurred to establish the technical and commercial viability of developing mineral deposits identified through exploration activities or by acquisition. Evaluation expenditures include the cost of: (i)Â establishing the volume and grade of deposits through drilling of core samples, trenching and sampling activities in an ore body that is classified as either a mineral resource or a proven and probable reserve; (ii)Â determining the optimal methods of extraction and metallurgical and treatment processes; (iii)Â studies related to surveying, transportation and infrastructure requirements; (iv)Â permitting activities; and (v)Â economic evaluations to determine whether development of the mineralized material is commercially justified, including scoping, pre-feasibility and final feasibility studies.Exploration and evaluation expenditures are expensed as incurred unless management determines that probable future economic benefits will be generated as a result of the expenditures. Once the technical feasibility and commercial viability of a program or project has been demonstrated with a pre-feasibility study, and we have recognized reserves in accordance with the Canadian Securities Administratorsâ€™ National Instrument 43-101 - Standards of Disclosure for Mineral Projects, we account for future expenditures incurred in the development of that program or project in accordance with our policy for Property, PlantÂ and Equipment, as described in note 2l.Â g) Production StageA mine that is under construction is determined to enter the production stage when the project is in the location and condition necessary for it to be capable of operating in the manner intended by management. We use the following factors to assess whether these criteria have been met: (1)Â the level of capital expenditures compared to construction cost estimates; (2)Â the completion of a reasonable period of commissioning and testing of mine plant and equipment; (3)Â the ability to produce minerals in saleable form (within specifications); and (4)Â the ability to sustain ongoing production of minerals.When a mine construction project moves into the production stage, the capitalization of certain mine construction costs ceases and costs are either capitalized to inventory or expensed, except for capitalizable costs related to property, plant and equipment additions or improvements, open pit stripping activities that provide a future benefit, underground mine development or expenditures that meet the criteria for capitalization in accordance with IAS 16 Property, Plant and Equipment.h) TaxationCurrent tax for each taxable entity is based on the local taxable income at the local statutory tax rate enacted or substantively enacted at the balance sheet date and includes adjustments to tax payable or recoverable in respect of previous periods.Deferred tax is recognized using the balance sheet method in respect of all temporary differences between the tax bases of assets and liabilities, and their carrying amounts for financial reporting purposes, except as indicated below.Deferred income tax liabilities are recognized for all taxable temporary differences, except:â€¢Where the deferred income tax liability arises from the initial recognition of goodwill, or the initial recognition of an asset or liability in an acquisition that is not a business combination and, at the time of the acquisition, affects neither the accounting profit nor taxable profit or loss; andâ€¢In respect of taxable temporary differences associated with investments in subsidiaries and interests in joint arrangements, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.Deferred income tax assets are recognized for all deductible temporary differences and the carryforward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carryforward of unused tax assets and unused tax losses can be utilized, except:â€¢Where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in an acquisition that is not a business combination and, at the time of the acquisition, affects neither the accounting profit nor taxable profit or loss; andâ€¢In respect of deductible temporary differences associated with investments in subsidiaries and interests in joint arrangements, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized. BARRICK YEAR-END 2024 105 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSThe carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. To the extent that an asset not previously recognized fulfills the criteria for recognition, a deferred income tax asset is recorded.Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which the asset is realized or the liability is settled, based on tax rates and tax laws enacted or substantively enacted at the balance sheet date. Current and deferred tax relating to items recognized directly in equity are recognized in equity and not in the income statement.The Company is subject to assessments by various taxation authorities, who may interpret tax legislation differently than the Company. Tax liabilities for uncertain tax positions are adjusted by the Company to reflect its best estimate of the probable outcome of assessments and in light of changing facts and circumstances, such as the completion of a tax audit, expiration of a statute of limitations, the refinement of an estimate, and interest accruals associated with the uncertain tax positions until they are resolved. Some of these adjustments require significant judgment in estimating the timing and amount of any additional tax expense. Royalties and Special Mining TaxesIncome tax expense includes the cost of royalties and special mining taxes payable to governments that are calculated based on a percentage of taxable profit whereby taxable profit represents net income adjusted for certain items defined in the applicable legislation.Indirect TaxesIndirect tax recoverable is recorded at its undiscounted amount, and is disclosed as non-current if not expected to be recovered within twelve months.Â i) Other Investments Investments in publicly quoted equity securities that are neither subsidiaries nor associates are categorized as FVOCI pursuant to the irrevocable election available in IFRS 9 for these instruments. FVOCI equity investments are recorded at fair value with all realized and unrealized gains and losses recorded permanently in OCI. Warrant investments are classified as fair value through profit or loss (â€œFVPLâ€). j) InventoryMaterial extracted from our mines is classified as either ore or waste. Ore represents material that, at the time of extraction, we expect to process into a saleable form and sell at a profit. Raw materials are comprised of both ore in stockpiles and ore on leach pads as processing is required to extract benefit from the ore. Ore is accumulated in stockpiles that are subsequently processed into gold/copper in a saleable form.Â The recovery of gold and copper from certain oxide ores is achieved through the heap leaching process.Â Work in process represents gold/copper in the processing circuit that has not completed the production process, and is not yet in a saleable form. Finished goods inventory represents gold/copper in saleable form.Metal inventories are valued at the lower of cost and net realizable value. Cost is determined on a weighted average basis and includes all costs incurred, based on a normal production capacity, in bringing each product to its present location and condition. Cost of inventories comprises: direct labor, materials and contractor expenses, including non-capitalized stripping costs; depreciation on PP&E including capitalized stripping costs; and an allocation of general and administrative costs. As ore is removed for processing, costs are removed based on the average cost per ounce/pound in the stockpile. Net realizable value is determined with reference to relevant market prices less applicable variable selling and downstream processing costs. Inventory provisions are reversed to reflect subsequent improvements in net realizable value where the inventory is still on hand.Mine operating supplies represent commodity consumables and other raw materials used in the production process, as well as spare parts and other maintenance supplies that are not classified as capital items. Provisions are recorded to reduce mine operating supplies to net realizable value, which is generally calculated by reference to its salvage or scrap value, when it is determined that the supplies are obsolete. k) RoyaltiesCertain of our properties are subject to royalty arrangements based on mineral production at the properties. The primary type of royalty is a net smelter return (â€œNSRâ€) royalty. Under this type of royalty we pay the holder an amount calculated as the royalty percentage multiplied by the value of gold production at market gold prices less third-party smelting, refining and transportation costs. Royalty expense is recorded on completion of the production or sales process in cost of sales. Other types of royalties include:â€¢Net profits interest royalty to a party other than a government,â€¢Modified NSR royalty,â€¢Net smelter return sliding scale royalty,â€¢Gross proceeds sliding scale royalty,â€¢Gross smelter return royalty,â€¢Net value royalty,â€¢Land tenement royalty, and aâ€¢Gold revenue royalty. BARRICK YEAR-END 2024 106 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSl) Property, Plant and EquipmentEstimated Useful Lives of Major Asset Categories Buildings, plant and equipment 1Â -Â 39Â years Underground mobile equipment 3Â -Â 7Â years Light vehicles and other mobile equipment 1Â -Â 7Â years Furniture, computer and office equipment 1 - 7 yearsBuildings, Plant and EquipmentAt acquisition, we record buildings, plant and equipment at cost, including all expenditures incurred to prepare an asset for its intended use. These expenditures consist of: the purchase price; brokersâ€™ commissions; and installation costs including architectural, design and engineering fees, legal fees, survey costs, site preparation costs, freight charges, transportation insurance costs, duties, testing and preparation charges.Buildings, plant and equipment are depreciated on a straight-line basis over their expected useful life, which commences when the assets are considered available for use. Once buildings, plant and equipment are considered available for use, they are measured at cost less accumulated depreciation and applicable impairment losses.Depreciation on equipment utilized in the development of assets, including open pit and underground mine development, is recapitalized as development costs attributable to the related asset.Mineral PropertiesMineral properties consist of: the fair value attributable to mineral reserves and resources acquired in a business combination or asset acquisition; underground mine development costs; open pit mine development costs; capitalized exploration and evaluation costs; and capitalized interest. In addition, we incur project costs which are generally capitalized when the expenditures result in a future benefit.i) Acquired Mining PropertiesOn acquisition of a mining property, we prepare an estimate of the fair value attributable to the proven and probable mineral reserves, mineral resources and exploration potential attributable to the property. The estimated fair value attributable to the mineral reserves and the portion of mineral resources considered to be probable of economic extraction at the time of the acquisition is depreciated on a units of production (â€œUOPâ€) basis whereby the denominator is the proven and probable reserves and the portion of mineral resources considered to be probable of economic extraction based on the current life of mine (â€œLOMâ€) plan that benefit from the development and are considered probable of economic extraction. The estimated fair value attributable to mineral resources that are not considered to be probable of economic extraction at the time of the acquisition is not subject to depreciation until the resources become probable of economic extraction in the future. The estimated fair value attributable to exploration licenses is recorded as an intangible asset and is not subject to depreciation until the property enters production.ii) Underground Mine Development CostsAt our underground mines, we incur development costs to build new shafts, drifts and ramps that will enable us to physically access ore underground. The time over which we will continue to incur these costs depends on the mine life. These underground development costs are capitalized as incurred.Capitalized underground development costs are depreciated on a UOP basis, whereby the denominator is the estimated ounces/pounds of gold/copper in proven and probable reserves and the portion of resources considered probable of economic extraction based on the current LOM plan that benefit from the development and are considered probable of economic extraction.iii) Open Pit Mine Development CostsIn open pit mining operations, it is necessary to remove overburden and other waste materials to access ore from which minerals can be extracted economically. The process of mining overburden and waste materials is referred to as stripping. Stripping costs incurred in order to provide initial access to the ore body (referred to as pre-production stripping) are capitalized as open pit mine development costs.Pre-production stripping costs are capitalized until an â€œother than de minimisâ€ level of mineral is extracted, after which time such costs are either capitalized to inventory or, if it qualifies as an open pit stripping activity that provides a future benefit, to PP&E. We consider various relevant criteria to assess when an â€œother than de minimisâ€ level of mineral is produced. Some of the criteria considered would include, but are not limited to, the following: (1)Â the amount of minerals mined versus total ounces in ore expected over the LOM; (2)Â the amount of ore tonnes mined versus total LOM expected ore tonnes mined; (3)Â the current stripping ratio versus the strip ratio expected over the LOM; and (4)Â the ore grade mined versus the grade expected over the LOM.Stripping costs incurred during the production stage of an open pit are accounted for as costs of the inventory produced during the period that the stripping costs are incurred, unless these costs are expected to provide a future economic benefit to an identifiable component of the ore body. Components of the ore body are based on the distinct development phases identified by the mine planning engineers when determining the optimal development plan for the open pit. Production phase stripping costs generate a future economic benefit when the related stripping activity: (1)Â improves access to a component of the ore body to be mined in the future; (2)Â increases the fair value of the mine (or open pit) as access to future mineral reserves becomes less costly; and (3)Â increases the productive capacity or extends the productive life of the mine (or open pit). Production phase stripping costs that are expected to generate a future economic benefit are capitalized as open pit mine development costs.Capitalized open pit mine development costs are depreciated on a UOP basis whereby the denominator is the estimated ounces/pounds of gold/copper in proven and probable reserves and the portion of resources considered probable of economic extraction based on the current LOM plan that benefit from the development and are considered probable of economic extraction. BARRICK YEAR-END 2024 107 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSConstruction-in-ProgressAssets under construction are capitalized as construction-in-progress until the asset is available for its intended use. The cost of construction-in-progress comprises its purchase price and any costs directly attributable to bringing it into working condition for its intended use. Construction-in-progress amounts related to development projects are included in the carrying amount of the development project. Construction-in-progress amounts incurred at operating mines are presented as a separate asset within PP&E. Construction-in-progress also includes deposits on long lead items. Construction-in-progress is not depreciated. Depreciation commences once the asset is complete, commissioned and available for use. Capitalized InterestWe capitalize interest costs for qualifying assets. Qualifying assets are assets that require a significant amount of time to prepare for their intended use, including projects that are in the exploration and evaluation, development or construction stages. Qualifying assets also include significant expansion projects at our operating mines. Capitalized interest costs are considered an element of the cost of the qualifying asset which is determined based on gross expenditures incurred on an asset. Capitalization ceases when the asset is substantially complete or if active development is suspended or ceases. Where the funds used to finance a qualifying asset form part of general borrowings, the amount capitalized is calculated using a weighted average of rates applicable to the relevant borrowings during the period. Where funds borrowed are directly attributable to a qualifying asset, the amount capitalized represents the borrowing costs specific to those borrowings. Where surplus funds available out of money borrowed specifically to finance a project are temporarily invested, the total capitalized interest is reduced by income generated from short-term investments of such funds.Â m) Impairment (and Reversals of Impairment) of Non-Current AssetsWe review and test the carrying amounts of PP&E and intangible assets with finite lives when an indicator of impairment is considered to exist. Impairment (or reversals of impairment) assessments on PP&E and intangible assets are conducted at the level of the cash generating unit (â€œCGUâ€), which is the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and includes liabilities specific to the CGU. For operating mines and projects, the individual

mine/project represents a CGU for impairment testing.The recoverable amount of a CGU is the higher of Value in Use (â€œVIUâ€) and Fair Value Less Costs of Disposal (â€œFVLCDâ€). We have determined that the FVLCD is greater than the VIU amounts and is therefore used as the recoverable amount for impairment testing purposes. An impairment loss is recognized for any excess of the carrying amount of a CGU over its recoverable amount where both the recoverable amount and carrying value include the associated other assets and liabilities, including taxes where applicable, of the CGU. Where it is not appropriate to allocate the loss to a separate asset, an impairment loss related to a CGU is allocated to the carrying amount of the assets of the CGU on a pro rata basis based on the carrying amount of its non-monetary assets.Impairment ReversalAn assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses may no longer exist or may have decreased. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the CGUâ€™s recoverable amount since the last impairment loss was recognized. This reversal is recognized in the consolidated statements of income and is limited to the carrying value that would have been determined, net of any depreciation where applicable, had no impairment charge been recognized in prior years. When an impairment reversal is undertaken, the recoverable amount is assessed by reference to the higher of VIU and FVLCD. We have determined that the FVLCD is greater than the VIU amounts and is therefore used as the recoverable amount for impairment testing purposes. n) Intangible AssetsOn acquisition of a mineral property in the exploration stage, we prepare an estimate of the fair value attributable to the exploration licenses acquired, including the fair value attributable to mineral resources, if any, of that property. The fair value of the exploration license is recorded as an intangible asset (acquired exploration potential) as at the date of acquisition. When an exploration stage property moves into development, the acquired exploration potential attributable to that property is transferred to mining interests within PP&E.We also have water rights associated with our mineral properties. Upon acquisition, they are measured at initial cost and are depreciated when they are being used. They are also subject to impairment testing when an indicator of impairment is considered to exist.o) GoodwillGoodwill is tested for impairment in Q4 and also when there is an indicator of impairment. At the date of acquisition, goodwill is assigned to the CGU or group of CGUs that is expected to benefit from the synergies of the business combination. For the purposes of impairment testing, goodwill is allocated to the Companyâ€™s operating segments, which are our individual minesites, and corresponds to the level at which goodwill is internally monitored by the Chief Operating Decision Maker (â€œCODMâ€). Goodwill impairment charges are not reversible.For a CGU to which goodwill has been allocated, the most recent recoverable amount determined for the CGU may be used in the annual impairment assessment of that CGU in the current year provided all the following criteria are met: â€¢the assets and liabilities making up the CGU have not changed significantly (change in book value or change in nature of assets/ liabilities in CGU) since the most recent recoverable amount calculation;â€¢The most recent recoverable amount calculation, completed in prior year, resulted in an amount that exceeded the carrying amount of the CGU by a substantial margin; andâ€¢Based on an analysis of events that have occurred and circumstances that have changed since the most recent recoverable amount calculation, the likelihood that a current recoverable amount determination will be less than the carrying amount of the CGU is remote. BARRICK YEAR-END 2024 108 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSp) DebtDebt is recognized initially at fair value, net of financing costs incurred, and subsequently measured at amortized cost. Any difference between the amounts originally received and the redemption value of the debt is recognized in the consolidated statements of income over the period to maturity using the effective interest method.q) Environmental Rehabilitation ProvisionMining, extraction and processing activities normally give rise to obligations for environmental rehabilitation. Rehabilitation work can include facility decommissioning and dismantling; removal or treatment of waste materials; site and land rehabilitation, including compliance with and monitoring of environmental regulations; security and other site-related costs required to perform the rehabilitation work; and operation of equipment designed to reduce or eliminate environmental effects. The extent of work required and the associated costs are dependent on the requirements of relevant authorities and our environmental policies. Routine operating costs that may impact the ultimate closure and rehabilitation activities, such as waste material handling conducted as an integral part of a mining or production process, are not included in the provision. Abnormal costs arising from unforeseen circumstances, such as the contamination caused by unplanned discharges, are recognized as an expense and liability when the event that gives rise to an obligation occurs and reliable estimates of the required rehabilitation costs can be made.Provisions for the cost of each rehabilitation program are normally recognized at the time that an environmental disturbance occurs or a new legal or constructive obligation is determined. When the extent of disturbance increases over the life of an operation, the provision is increased accordingly. The major parts of the carrying amount of provisions relate to closure/rehabilitation of tailings facilities, heap leach pads and waste dumps; demolition of buildings/mine facilities; ongoing water treatment; and ongoing care and maintenance and security of closed mines. Costs included in the provision encompass all closure and rehabilitation activity expected to occur progressively over the life of the operation at the time of closure and post-closure in connection with disturbances as at the reporting date. Estimated costs included in the determination of the provision reflect the risks and probabilities of alternative estimates of cash flows required to settle the obligation at each particular operation. The expected rehabilitation costs are estimated based on the cost of external contractors performing the work or the cost of performing the work internally depending on managementâ€™s intention.The timing of the actual rehabilitation expenditure is dependent upon a number of factors such as the life and nature of the asset, the operating license conditions and the environment in which the mine operates. Expenditures may occur before and after closure and can continue for an extended period of time depending on rehabilitation requirements. Rehabilitation provisions are measured at the expected value of future cash flows, which exclude the effect of inflation, discounted to their present value using a current US dollar real risk-free pre-tax discount rate. The unwinding of the discount, referred to as accretion expense, is included in finance costs and results in an increase in the amount of the provision. Provisions are updated each reporting period for changes to expected cash flows and for the effect of changes in the discount rate, and the change in estimate is added to or deducted from the related asset and depreciated over the expected economic life of the operation to which it relates.Significant judgments and estimates are involved in forming expectations of future activities, the amount and timing of the associated cash flows and the period over which we estimate those cash flows. Those expectations are formed based on existing environmental and regulatory requirements or, if more stringent, our environmental policies which give rise to a constructive obligation. When provisions for closure and rehabilitation are initially recognized, the corresponding cost is capitalized as an asset, representing part of the cost of acquiring the future economic benefits of the operation. The capitalized cost of closure and rehabilitation activities is recognized in PP&E and depreciated over the expected economic life of the operation to which it relates.Adjustments to the estimated amount and timing of future closure and rehabilitation cash flows are a normal occurrence in light of the significant judgments and estimates involved. The principal factors that can cause expected cash flows to change are: the construction of new processing facilities; changes in the quantities of material in reserves and resources with a corresponding change in the life of mine plan; changing ore characteristics that impact required environmental protection measures and related costs; changes in water quality or volumes that impact the extent of water treatment required; changes in discount rates; changes in foreign exchange rates; changes in Barrickâ€™s closure policies; and changes in laws and regulations governing the protection of the environment.Rehabilitation provisions are adjusted as a result of changes in estimates and assumptions. Those adjustments are accounted for as a change in the corresponding cost of the related assets, including the related mineral property, except where a reduction in the provision is greater than the remaining net book value of the related assets, in which case the value is reduced to nil and the remaining adjustment is recognized in the consolidated statements of income. In the case of closed sites, changes in estimates and assumptions are recognized immediately in the consolidated statements of income. For an operating mine, the adjusted carrying amount of the related asset is depreciated prospectively. Adjustments also result in changes to future finance costs. Provisions are discounted to their present value using a current US dollar real risk-free pre-tax discount rate and the accretion expense is included in finance costs.r) Stock-Based CompensationWe recognize the expense related to these plans over the vesting period, beginning once the grant has been approved and announced to the beneficiaries.Barrick offers cash-settled (Restricted Share Units (â€œRSUâ€), Deferred Share Units (â€œDSUâ€) and Performance Granted Share Units (â€œPGSUâ€)) awards to certain employees, officers and directors of the Company.Restricted Share UnitsUnder our Long-Term Incentive Plan, selected employees are granted RSUs where each RSU has a value equal to one Barrick common share. RSUs generally vest within BARRICK YEAR-END 2024 109 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSthree years in cash and the after-tax value of the award may be used to purchase common shares on the open market, depending on the terms of the grant. Additional RSUs are credited to reflect dividends paid on Barrick common shares over the vesting period.A liability for RSUs is measured at fair value on the grant date and is subsequently adjusted for changes in fair value. The liability is recognized on a straight-line basis over the vesting period, with a corresponding charge to compensation expense, as a component of general and administrative expenses and cost of sales. Compensation expenses for RSUs incorporate an estimate for expected forfeiture rates based on which the fair value is adjusted.Deferred Share UnitsUnder our DSU plan, Directors must receive at least 63.6% of their basic annual retainer in the form of DSUs or cash to purchase common shares that cannot be sold, transferred or otherwise disposed of until the Director leaves the Board. Each DSU has the same value as one Barrick common share. DSUs must be retained until the Director leaves the Board, at which time the cash value of the DSUs is paid out. Additional DSUs are credited to reflect dividends paid on Barrick common shares. The initial fair value of the liability is calculated as of the grant date and is recognized immediately. Subsequently, at each reporting date and on settlement, the liability is remeasured, with any change in fair value recorded as compensation expense in the period. Performance Granted Share UnitsUnder our PGSU plan, selected employees are granted PGSUs, where each PGSU has a value equal to one Barrick common share. Annual PGSU awards are determined based on a multiple ranging from three to six times base salary (depending on position and level of responsibility) multiplied by a performance factor. PGSUs vest within three years in cash, and the after-tax value of the award is used to purchase common shares on the open market. Generally, these shares cannot be sold until the employee meets their share ownership requirement (in which case only those Barrick shares in excess of the requirement can be sold), or until they retire or leave the Company.The initial fair value of the liability is calculated as of the grant date and is recognized within compensation expense using the straight-line method over the vesting period. Subsequently, at each reporting date and on settlement, the liability is remeasured, with any changes in fair value recorded as compensation expense.s) New Accounting Standards Issued Certain new accounting standards and interpretations have been published that are either applicable in the current year or not mandatory for the current period. We have assessed these standards, including Amendments to IAS 1 - Non-current Liabilities with Covenants, and determined they do not have a material impact on Barrick in the current reporting period. In addition, the following standards have been issued by the International Accounting Standards Board (â€œIASBâ€) and we are currently assessing the impact on our consolidated financial statements.â€¢Amendments to the Classification and Measurement of Financial Instruments (IFRS 9 and IFRS 7) with mandatory application of the standard in annual reporting periods beginning on or after January 1, 2026.â€¢IFRS 18 Presentation and Disclosure in Financial Statements with mandatory application of the standard in annual reporting periods beginning on or after January 1, 2027. No standards have been early adopted in the current period. BARRICK YEAR-END 2024 110 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS3 n Critical Judgments, Estimates, Assumptions and Risks Many of the amounts included in the consolidated balance sheet require management to make judgments and/or estimates. These judgments and estimates are continuously evaluated and are based on managementâ€™s experience and knowledge of the relevant facts and circumstances. Actual results may differ from the estimates. Information about such judgments and estimates is contained in the description of our accounting policies and/or other notes to the financial statements. The key areas where judgments, estimates and assumptions have been made are summarized below.Life of Mine Plans and Reserves and ResourcesEstimates of the quantities of proven and probable mineral reserves and mineral resources form the basis for our LOM plans, which are used for a number of important business and accounting purposes, including: the calculation of depreciation expense; the capitalization of production phase stripping costs; the current/non-current classification of inventory and certain receivables; the recognition of deferred revenue related to streaming arrangements and forecasting the timing of the payments related to the environmental rehabilitation provision. In addition, the underlying LOM plans are generally used in the impairment tests for goodwill and non-current assets. In certain cases, these LOM plans have made assumptions about our ability to obtain the necessary permits required to complete the planned activities. We estimate our future production levels, including mineral reserves and resources based on information compiled by qualified persons as defined in accordance with the Canadian Securities Administratorsâ€™ National Instrument 43-101 - Standards of Disclosure for Mineral Projects requirements. To calculate our gold and copper mineral reserves, as well as measured, indicated, and inferred mineral resources, we have used the following assumptions. Refer to notes 19 and 21. As at December 31, 2024 As at December 31, 2023 Gold ($/oz) Mineral reserves $ 1,400Â $ 1,300Â Measured, indicated and inferred 1,900Â 1,700Â Copper ($/lb) Mineral reserves 3.00Â 3.00Â Measured, indicated and inferred 4.00Â 4.00Â InventoryThe measurement of inventory including the determination of its net realizable value, especially as it relates to ore in stockpiles and recoverable from leach pads, involves the use of estimates. Net realizable value is determined with reference to relevant market prices less applicable variable selling expenses. Estimation is also required in determining the tonnage, recoverable gold and copper contained therein, and in determining the remaining costs of completion to bring inventory into its saleable form. Judgment is also exercised in determining whether to recognize a provision for obsolescence on mine operating supplies, and estimates are required to determine salvage or scrap value of mine operating supplies. Estimates of recoverable gold or copper on the leach pads are calculated from the quantities of ore placed on the leach pads (measured tonnes added to the leach pads), the grade of ore placed on the leach pads (based on assay data) and a recovery percentage (based on ore type).Impairment and Reversal of Impairment for Non-Current Assets and Impairment of GoodwillGoodwill and non-current assets are tested for impairment if there is an indicator of impairment or reversal of impairment, and in the case of goodwill annually during the fourth quarter, for all of our operating segments. We consider both external and internal sources of information for indications that non-current assets and/or goodwill are impaired. External sources of information we consider include changes in the market, economic, legal and permitting environment in which the CGU operates that are not within its control and affect the recoverable amount of mining interests and goodwill. Internal sources of information we consider include the manner in which mining properties and plant and equipment are being used or are expected to be used and indications of economic performance of the assets. Calculating the FVLCD of CGUs for non-current asset and goodwill impairment tests requires management to make estimates and assumptions with respect to future production levels, operating, capital and closure costs in our LOM plans, future metal prices, foreign exchange rates, Net Asset Value (â€œNAVâ€) multiples, fair value of mineral resources outside LOM plans, the market values per ounce and per pound and weighted average costs of capital (â€œWACCâ€). Changes in any of the assumptions or estimates used in determining the fair values could impact the impairment analysis. Refer to notes 2m, 2o and 21 for further information. Provisions for Environmental Rehabilitation Management assesses its provision for environmental rehabilitation on an annual basis or when new information becomes available. This assessment includes the estimation of the future rehabilitation costs (including water treatment), the timing of these expenditures, and the impact of changes in discount rates and foreign exchange rates. The actual future expenditures may differ from the amounts currently provided if the estimates made are significantly different than actual results or if there are significant changes in environmental and/or regulatory requirements in the future. Refer to notes 2q and 27 for further information.TaxesManagement is required to assess uncertainties and make judgments and estimations regarding the tax basis of assets and liabilities and related deferred income tax assets and liabilities, amounts recorded for uncertain tax positions, the measurement of income tax expense and indirect taxes such as royalties and export duties, and estimates of the timing of repatriation of earnings, which would impact the recognition of withholding taxes and taxes related to the outside basis on subsidiaries/associates. While these amounts represent managementâ€™s best estimate based on the laws and regulations that exist at the time of preparation, we operate in certain jurisdictions that have increased degrees of political and sovereign risk and while host governments have historically supported the development of natural resources by foreign companies, tax BARRICK YEAR-END 2024 111 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSlegislation in these jurisdictions is developing and there is a risk that fiscal reform changes with respect to existing investments could unexpectedly impact application of this tax legislation. Such changes could impact the Companyâ€™s judgments about the amounts recorded for uncertain tax positions, tax basis of assets and liabilities, and related deferred income tax assets and liabilities, and estimates of the timing of repatriation of earnings. This could necessitate future adjustments to tax income and expense already recorded. A number of these estimates require management to make estimates of future

taxable profit, as well as the recoverability of indirect taxes, and if actual results are significantly different than our estimates, the ability to realize the deferred tax assets and indirect tax receivables recorded on our balance sheet could be impacted. Refer to notes 2h, 12, 30 and 35 for further information. ContingenciesContingencies can be either possible assets or possible liabilities arising from past events which, by their nature, will only be resolved when one or more future events not wholly within our control occur or fail to occur. The assessment of such contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future events. In assessing loss contingencies related to legal proceedings that are pending against us or unasserted claims that may result in such proceedings or regulatory or government actions that may negatively impact our business or operations, the Company with assistance from its legal counsel evaluates the perceived merits of any legal proceedings or unasserted claims or actions as well as the perceived merits of the nature and amount of relief sought or expected to be sought, when determining the amount, if any, to recognize as a contingent liability or assessing the impact on the carrying value of assets. If the assessment of a contingency suggests that a loss is probable, and the amount can be reliably estimated, then a loss is recorded. When a contingent loss is not probable but is reasonably possible, or is probable but the amount of loss cannot be reliably estimated, then details of the contingent loss are disclosed. Loss contingencies considered remote are generally not disclosed unless they involve guarantees, in which case we disclose the nature of the guarantee. Contingent assets are not recognized in the consolidated financial statements. Refer to note 35 for more information.Pascua-Lama Value Added TaxThe Pascua-Lama project had historically received VAT refunds in Chile under the export incentive VAT regime relating to the development of the Chilean side of the project ($472Â million as at December 31, 2023). Under the export incentive VAT regime, this amount would have needed to be repaid if the project did not evidence exports for an amount of $3,538 million within a term that was due to expire on December 31, 2026, unless extended. On September 11, 2024, the Minister of Economy, Development and Tourism issued an order to terminate the export incentive VAT regime with respect to the Chilean side of the project with immediate effect. This required us to repay the VAT refunds received under the export incentive VAT regime and subsequently recover them through the normal VAT regime, both of which occurred in Q4 2024. This resolves the matter and there is no further exposure for the Company.In addition, we have recorded $8 million in VAT recoverable in Argentina as at December 31, 2024 ($9Â million as at December 31, 2023) relating to the development of the Argentinean side of the project. This balance may not be fully recoverable if the project does not enter into production and is subject to foreign currency risk as the amounts are recoverable in Argentine pesos.Streaming TransactionsThe upfront cash deposit received from Royal Gold on the gold and silver streaming transaction for production linked to Barrickâ€™s 60% interest in the Pueblo Viejo mine has been accounted for as deferred revenue since we have determined that it is not a derivative as it will be satisfied through the delivery of non-financial items (i.e., gold and silver) rather than cash or financial assets. It is our intention to settle the obligations under the streaming arrangement through our own production and if we were to fail to settle the obligations with Royal Gold through our own production, this would lead to the streaming arrangement becoming a derivative. This would cause a change to the accounting treatment, resulting in the revaluation of the fair value of the agreement through profit and loss on a recurring basis. Refer to note 29 for further details.The deferred revenue component of our streaming agreements is considered variable and is subject to retroactive adjustment when there is a change in the timing of the delivery of ounces or in the underlying production profile of the relevant mine. The impact of such a change in the timing or quantity of ounces to be delivered under a streaming agreement will result in retroactive adjustments to both the deferred revenue recognized and the accretion recorded prior to the date of the change. Refer to note 2e. For further details on streaming transactions, including our silver sale agreement with Wheaton Precious Metals Corp. (â€œWheatonâ€), refer to note 29.Consolidation of Reko DiqThe Reko Diq project is 50% held by Barrick and 50% by Pakistani stakeholders, comprising a 10% free-carried, non-contributing share held by the Provincial Government of Balochistan, an additional 15% held by a special purpose company owned by the Provincial Government of Balochistan and 25% owned by other federal state-owned enterprises. Pursuant to the joint venture agreement, Barrick has power over the relevant activities of the project, including operatorship of the project, the decision to proceed with development of the project, subject to a sufficient expected rate of return, as well as development and approval of LOM plans. Therefore Barrick has concluded that it controls Reko Diq and it is consolidated in Barrickâ€™s consolidated financial statements with a 50% non-controlling interest. BARRICK YEAR-END 2024 112 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSOther Notes to the Financial Statements Â Â Note Acquisitions and Divestitures 4Â Segment Information 5Â Revenue 6Â Cost of Sales 7Â Exploration, Evaluation and Project Expenses 8Â Other Expense (Income) 9Â Impairment Charges (Reversals) 10Â General and Administrative Expenses 11Â Income Tax Expense 12Â Earnings Per Share 13Â Finance Costs, Net 14Â Cash Flow - Other Items 15Â Investments 16Â Inventories 17Â Accounts Receivable and Other Current Assets 18Â Property, Plant and Equipment 19Â Goodwill and other Intangible Assets 20Â Impairment and Reversal of Non-Current Assets 21Â Other Assets 22Â Accounts Payable 23Â Other Current Liabilities 24Â Financial Instruments 25Â Fair Value Measurements 26Â Provisions 27Â Financial Risk Management 28Â Other Non-Current Liabilities 29Â Deferred Income Taxes 30Â Capital Stock 31Â Non-Controlling Interests 32Â Related Party Transactions 33Â Stock-Based Compensation 34Â Contingencies 35Â 4 n Acquisitions and Divestitures a) PorgeraOn April 25, 2020, the Porgera mine was put on care and maintenance after the PNG government indicated that the SML would not be extended. On April 9, 2021, the PNG government and BNL, the 95% owner and operator of the Porgera joint venture, agreed on a partnership for the future ownership and operation of the mine under a binding Framework Agreement. The Framework Agreement was replaced by the more detailed Porgera Project Commencement Agreement (â€œPPCAâ€), which reached formal completion on December 22, 2023. Under the terms of the PPCA, ownership of Porgera is held in a joint venture owned 51% by PNG stakeholders and 49% by a company, Porgera (Jersey) Limited, that is jointly owned on a 50/50 basis by Barrick and Zijin Mining Group and therefore Barrick now holds a 24.5% equity accounted for interest in the Porgera mine. BNL is the operator of the mine. Porgera was previously accounted for as a joint operation, but under the new shareholder agreements, we have concluded that Barrick will account for its interest in Porgera as a joint venture.As the conditions for the reopening of the mine were completed on December 22, 2023, in Q4 2023, we recorded the following: (a) derecognition of Barrickâ€™s 47.5% share of the assets and liabilities of the joint operation that were transferred to the new Porgera joint venture; (b) an equity method investment for Barrickâ€™s interest in the new Porgera joint venture, measured at fair value based on Barrickâ€™s share of the cash flows expected to be generated from the mine; and (c) a gain of $352Â million in other income as the net result of the derecognition of the joint operation and recognition of the new Porgera joint venture. In Q4 2024, we recorded an additional gain of $7 million in other income. BARRICK YEAR-END 2024 113 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS5 n Segment Information Barrickâ€™s business is organized into sixteen minesites. Barrickâ€™s CODM (Mark Bristow, President and Chief Executive Officer) reviews the operating results, assesses performance and makes capital allocation decisions at the minesite level. Our presentation of our reportable operating segments consists of eight gold mines (Carlin, Cortez, Turquoise Ridge, Pueblo Viejo, Loulo-Gounkoto, Kibali, North Mara and Bulyanhulu) and one copper mine (Lumwana). The remaining operating segments, including our remaining gold mines, have been grouped into an â€œOther Minesâ€ category and will not be reported on individually. Segment performance is evaluated based on a number of measures including operating income before tax, production levels and unit production costs. Certain costs are managed on a consolidated basis and are therefore not reflected in segment income.Consolidated Statements of Income Information Â Â Cost of Sales Â Â Â For the year ended December 31, 2024 Revenue Site operating costs, royalties and community relations Depreciation Exploration, evaluation and project expenses Other expenses (income)1 Segment income (loss) Carlin2 $3,041Â $1,522Â $307Â $12Â $11Â $1,189Â Cortez2 1,725Â 752Â 253Â 9Â 6Â 705Â Turquoise Ridge2 1,177Â 603Â 179Â 6Â 1Â 388Â Pueblo Viejo2 1,429Â 629Â 295Â 4Â 8Â 493Â Loulo-Gounkoto2 1,346Â 475Â 223Â â€”Â 123Â 525Â Kibali 743Â 281Â 134Â â€”Â 12Â 316Â Lumwana 855Â 460Â 244Â â€”Â 16Â 135Â North Mara2 770Â 312Â 83Â â€”Â 57Â 318Â Bulyanhulu2 495Â 234Â 63Â â€”Â 5Â 193Â Other Mines2 2,076Â 1,036Â 229Â 10Â 74Â 727Â Reportable segment total $13,657Â $6,304Â $2,010Â $41Â $313Â $4,989Â Share of equity investee (743) (281) (134) â€”Â (12) (316) Segment total $12,914Â $6,023Â $1,876Â $41Â $301Â $4,673Â Consolidated Statements of Income Information Â Â Cost of Sales Â Â Â For the year ended December 31, 2023 Revenue Site operating costs, royalties and community relations Depreciation Exploration, evaluation and project expenses Other expenses (income)1 Segment income (loss) Carlin2 $2,760Â $1,475Â $314Â $23Â $10Â $938Â Cortez2 1,737Â 810Â 364Â 14Â 7Â 542Â Turquoise Ridge2 1,008Â 533Â 189Â 5Â 1Â 280Â Pueblo Viejo2 1,118Â 536Â 255Â 4Â 7Â 316Â Loulo-Gounkoto2 1,335Â 570Â 247Â â€”Â 34Â 484Â Kibali 670Â 272Â 147Â â€”Â 8Â 243Â Lumwana 795Â 466Â 257Â 37Â (2) 37Â North Mara2 591Â 288Â 77Â â€”Â 61Â 165Â Bulyanhulu2 442Â 220Â 62Â â€”Â 13Â 147Â Other Mines2 1,591Â 975Â 246Â 6Â 78Â 286Â Reportable segment total $12,047Â $6,145Â $2,158Â $89Â $217Â $3,438Â Share of equity investee (670) (272) (147) â€”Â (8) (243) Segment total $11,377Â $5,873Â $2,011Â $89Â $209Â $3,195Â 1Includes accretion expense, which is included with finance costs in the consolidated statements of income. Capital expenditures in the consolidated statements of cash flow are presented on a cash basis. In 2024, cash expenditures were $3,174Â million (2023: $3,086 million) and the increase in accrued expenditures was $116Â million (2023: $36Â million increase).6 n Revenue For the years ended December 31 2024 2023 Gold sales Spot market sales $11,268Â $9,973Â Concentrate sales 536Â 367Â Provisional pricing adjustments 16Â 10Â $11,820Â $10,350Â Copper sales Copper concentrate sales $871Â $786Â Provisional pricing adjustments (16) 9Â $855Â $795Â Other sales1 $247Â $252Â Total $12,922Â $11,397Â 1Revenues from the sale of by-products from our gold and copper mines.For the year ended DecemberÂ 31, 2024, the Company has two customers that individually account for more than 10% of the Companyâ€™s total revenue. These customers represent approximately 23% and 22% of total revenue. However, because gold can be sold through numerous gold market traders worldwide (including a large number of financial institutions), the Company is not economically dependent on a limited number of customers for the sale of its product.Principal ProductsAll of our gold mining operations produce gold in dorÃ© form, except Phoenix and Bulyanhulu, which produce both gold dorÃ© and gold concentrate. Gold dorÃ© is unrefined gold bullion bars usually consisting of 90% gold that is refined to pure gold bullion prior to sale to our customers. Concentrate is a semi-processed product containing the valuable metal minerals from which most of the waste mineral has been eliminated. Our Lumwana mine produces a concentrate that primarily contains copper. Our Phoenix mine produces a concentrate that contains both gold and copper. Incidental revenues from the sale of by-products, primarily copper, silver and energy at our gold mines, are classified within other sales.Provisional Copper and Gold SalesWe have provisionally priced sales for which price finalization, referenced to the relevant copper and gold index, is outstanding at the balance sheet date. Our exposure at DecemberÂ 31, 2024 to the impact of future movements in market commodity prices for provisionally priced sales is set out in the following table: Â Â Volumes subject to final pricingÂ Copper (millions)Â Gold (000s) Impact on net income before taxation of 10% movement in market price As at December 31 2024 2023 2024 2023 Copper pounds1 63Â 61Â $25Â $23Â Gold ounces 48Â 50Â 13Â 10Â 1Amounts in thousands of tonnes: 2024: 28; 2023: 28.At DecemberÂ 31, 2024, our provisionally priced copper sales subject to final settlement were recorded at an average price of $4.04/lb (2023: $3.81/lb). At DecemberÂ 31, 2024, our provisionally priced gold sales subject to final settlement were recorded at an average price of $2,636/oz (2023: $2,079/oz). The sensitivities in the above tables have been determined as the impact of a 10% change in commodity prices at each reporting date, while holding all other variables, including foreign currency exchange rates, constant. BARRICK YEAR-END 2024 117 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS12 n Income Tax Expense For the years ended December 31 2024 2023 Tax on profit

Current tax Charge for the year $1,063Â $694Â Adjustment in respect of prior years1 9Â (14) Â $1,072Â $680Â Deferred tax Origination and reversal of temporary differences in the current year $478Â $144Â Adjustment in respect of prior years1 (30) 37Â $448Â $181Â Income tax expense $1,520Â $861Â Tax expense related to continuing operations Current Canada $8Â ($3) International 1,064Â 683Â $1,072Â $680Â Deferred Canada $4Â $â€”Â International 444Â 181Â $448Â $181Â Income tax expense $1,520Â $861Â 1Includes adjustments to equalize the difference between prior year's tax return and the year-end provision. Reconciliation to Canadian Statutory Rate For the years ended December 31 2024 2023 At 26.5% statutory rate $1,221Â $746Â Increase (decrease) due to: Allowances and special tax deductions1 (211) (184) Impact of foreign tax rates2 18Â (79) Non-deductible expenses / (non-taxable income) 111Â 72Â Goodwill impairment charges not tax deductible 145Â â€”Â Taxable gains on sales of non-current assets 2Â 6Â Net currency translation losses on current and deferred tax balances 52Â 289Â Tax impact from pass-through entities and equity accounted investments (263) (183) Current year tax results sheltered by previously unrecognized deferred tax assets (5) (22) Recognition and derecognition of deferred tax assets (26) (142) Settlements and adjustments in respect of prior years 116Â 23Â Increase to income tax related contingent liabilities 1Â 54Â Impact of tax rate changes â€”Â (2) Withholding taxes 70Â 61Â Mining taxes 290Â 224Â Tax impact of amounts recognized within accumulated OCI â€”Â (2) Other items (1) â€”Â Income tax expense $1,520Â $861Â 1We are able to claim certain allowances, incentives and tax deductions unique to extractive industries that result in a lower effective tax rate.2We operate in multiple foreign tax jurisdictions that have tax rates different than the Canadian statutory rate. Currency TranslationCurrent and deferred tax balances are subject to remeasurement for changes in foreign currency exchange rates each period. This is required in countries where tax is paid in local currency and the subsidiary has a different functional currency (typically US dollars). The most significant relate to Argentine and Malian tax balances.In 2024, a net tax expense of $52Â million arose from translation losses on tax balances, mainly due to the weakening of the Argentine peso and the West African CFA franc against the US dollar. In 2023, a tax expense of $289 million arose from translation losses on tax balances, mainly due to the weakening of the Argentine peso and strengthening of the West African CFA franc against the US dollar. These net translation losses are included within income tax expense.Withholding TaxesIn 2024, we have recorded $3Â million (2023: $5Â million related to Saudi Arabia) of dividend withholding taxes related to the undistributed earnings of our subsidiaries in Saudi Arabia. We have also recorded $45Â million (2023: $26Â million related to Saudi Arabia, Tanzania and the United States) of dividend withholding taxes related to the distributed earnings of our subsidiaries in Saudi Arabia, Peru and the United States.United States Tax ReformIn August 2022, President Joe Biden signed the Inflation Reduction Act (â€œthe Actâ€) into law. The Act includes a 15% corporate alternative minimum tax (â€œCAMTâ€) that is imposed on applicable financial statement income and therefore would be considered in scope for IAS 12 given it is a tax on profits. The CAMT is effective for tax years beginning after December 31, 2022 and CAMT credit carryforwards have an indefinite life. Barrick is subject to CAMT because the Company meets the applicable income thresholds for a foreign-parented multinational group.In Q3 2024, the US Treasury and IRS released proposed regulations detailing the application of CAMT followed by some technical corrections released on December 23, 2024. Some rules would apply to tax years ending after September 13, 2024, while the rest would generally apply to tax years ending after the final regulations are published. Comments on the technical corrections were due on January 16, 2025 and we are still awaiting the final regulations to be released. For 2024, the deferred tax asset arising from the CAMT credit carryforwards has been recognized on the basis we expect that it will be recovered against US Federal Income Tax in the future.Nevada Gold Mines (â€œNGMâ€)NGM is a limited liability company treated as a flow through partnership for US tax purposes. The partnership is not subject to federal income tax directly, but each of its partners is liable for tax on its share of the profits of the partnership. As such, Barrick accounts for its current and deferred income tax associated with the investment (61.5% share) following the principles in IAS 12. BARRICK YEAR-END 2024 118 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSOrganisation for Economic Co-operation and Development (â€œOECDâ€) Pillar Two model rulesIn October 2021, more than 135 jurisdictions agreed to the OECD/G20 Inclusive Framework on Base Erosion and Profit Shifting Statement on a Two-Pillar Solution to Address the Tax Challenges Arising from the Digitalisation of the Economy. Since then, the OECD has published model rules and other documents related to the second pillar of this solution (the Pillar Two model rules). The Pillar Two model rules provide a template that jurisdictions can translate into domestic tax law and implement as part of an agreed common approach.Pillar Two legislation in Canada has been enacted in Q2 2024 and came into effect for fiscal years commencing on or after December 31, 2023. Other jurisdictions where the group operates have either enacted legislation or are in the process of doing so. In terms of the potential implications for income tax accounting, we have applied the exception available under the amendments to IAS 12 published by the IASB in May 2023 and are not recognizing or disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes. We have completed a review of Pillar Two for the current year using the OECDâ€™s Pillar Two Transitional Safe Harbour rules as implemented in the Global Minimum Tax Act in Canada. Based on our review, we have not identified any material amount that should be accrued in 2024 for Pillar Two purposes. As the law is evolving, both in Canada and elsewhere, we will continue to monitor the impact of this legislation.Mining TaxesIn addition to corporate income tax, we pay mining taxes in the United States (Nevada), the Dominican Republic, and Canada (Ontario). NGM is subject to a Net Proceeds of Minerals tax in Nevada at a rate of 5% and the tax expense recorded in 2024 was $145Â million (2023: $105Â million). The other significant mining tax is the Dominican Republicâ€™s Net Profits Interest tax, which is determined based on cash flows as defined by the Pueblo Viejo Special Lease Agreement. A tax expense of $134Â million (2023: $nil) was recorded for this in 2024. Both taxes are included on a consolidated basis in the Company's consolidated statements of income.ImpairmentsIn 2024, we recorded net impairment reversals of $941Â million (2023: net impairment charges of $312Â million) for non-current assets. Refer to note 21 for further information.A deferred tax expense of $321Â million (2023: deferred tax recovery of $55Â million primarily related to the impairment at Long Canyon) was recorded primarily related to the impairment reversal at our Lumwana and Veladero mines.13 n Earnings Per Share For the years ended December 31 ($ millions, except shares in millions and per share amounts in dollars) 2024 2023 Basic Diluted Basic Diluted Net income $3,088Â $3,088Â $1,953Â $1,953Â Net income attributable to non-controlling interests (944) (944) (681) (681) Net income attributable to the equity holders of Barrick Gold Corporation $2,144Â $2,144Â $1,272Â $1,272Â Weighted average shares outstanding 1,751Â 1,751Â 1,755Â 1,755Â Basic and diluted earnings per share data attributable to the equity holders of Barrick Gold Corporation $1.22Â $1.22Â $0.72Â $0.72Â 14 n Finance Costs, Net For the years ended December 31 2024 2023 Interest expense1 $452Â $387Â Amortization of debt issue costs 1Â 1Â Amortization of premium (1) â€”Â Interest on lease liabilities 4Â 5Â Loss on interest rate hedges 1Â 1Â Interest capitalized2 (33) (42) Accretion 89Â 87Â Finance income (281) (269) Total $232Â $170Â 1Interest in the consolidated statements of cash flow is presented on a cash basis. In 2024, cash interest paid was $380Â million (2023: $300 million).2For the year ended DecemberÂ 31, 2024, the general capitalization rate was 6.40% (2023: 6.60%). This forms the basis for our LOM plans. We prospectively revise calculations of amortization expense for property, plant and equipment amortized using the UOP method, where the denominator is our LOM ounces. The effect of changes in our LOM on amortization expense for 2024 was a $21 million decrease (2023: $31 million decrease).c)Â Â Â Capital CommitmentsIn addition to entering into various operational commitments in the normal course of business, we had commitments of approximately $605 million at DecemberÂ 31, 2024 (2023: $258 million) for construction activities at our sites and projects.d)Â Â Â Other Lease DisclosureThe Company leases various buildings, plant and equipment as part of the normal course of operations. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. Refer to note 25 for a lease maturity analysis. Included in net income for 2024 are short-term payments and variable lease payments not included in the measurement of lease liabilities of $9Â million (2023: $12 million) and $203 million (2023: $161 million), respectively.20 n Goodwill and Other Intangible Assets a) Intangible Assets Water rights1 Technology2 Exploration potential3 Total Opening balance January 1, 2023 $61Â $6Â $82Â $149Â Amortization and impairment losses â€”Â â€”Â â€”Â Closing balance December 31, 2023 $61Â $6Â $82Â $149Â Amortization and impairment losses â€”Â (1) â€”Â (1) Closing balance December 31, 2024 $61Â $5Â $82Â $148Â Cost $61Â $17Â $252Â $330Â Accumulated amortization and impairment losses â€”Â (12) (170) (182) Net carrying amount December 31, 2024 $61Â $5Â $82Â $148Â 1Relates to water rights in South America, and will be amortized through cost of sales when we begin using these in the future.2The amount is amortized through cost of sales using the UOP method over LOM ounces of the Pueblo Viejo mine, with no assumed residual value.3Exploration potential consists of the estimated fair value attributable to exploration licenses acquired as a result of a business combination or asset acquisition. The carrying value of the licenses will be transferred to PP&E when the development of attributable mineral resources commences.Â BARRICK YEAR-END 2024 125 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSb) Goodwill Closing balance December 31, 2023 Impairments Closing balance December 31, 2024 Carlin $1,294Â $â€”Â $1,294Â Cortez 899Â â€”Â 899Â Turquoise Ridge 722Â â€”Â 722Â Phoenix 119Â â€”Â 119Â Hemlo 63Â â€”Â 63Â Loulo-Gounkoto 484Â (484) â€”Â Total $3,581Â ($484) $3,097Â On a total basis, the gross amount and accumulated impairment losses are as follows: Cost $12,211Â Accumulated impairment losses December 31, 2024 (9,114) Net carrying amount December 31, 2024 $3,097Â Â 21 n Impairment and Reversal of Non-Current Assets Summary of impairments (reversals)For the year ended DecemberÂ 31, 2024, we recorded a net impairment reversal of $941 million (2023: net impairment charges of $312 million) for non-current assets and $484 million (2023: $nil) of impairment to goodwill, as summarized in the following table: For the years ended December 31 2024 2023 Lumwana ($655) $â€”Â Veladero (437) â€”Â Carlin 82Â 4Â Long Canyon 49Â 280Â Pueblo Viejo 10Â â€”Â Cortez 9Â â€”Â Bulyanhulu â€”Â 17Â North Mara â€”Â 5Â Other 1Â 6Â Total impairment charges (reversals) of non-current assets ($941) $312Â Loulo-Gounkoto goodwill 484Â â€”Â Total goodwill impairment charges $484Â $â€”Â Total impairment charges (reversals) ($457) $312Â 2024 Indicators of Impairment and ReversalsIn Q4 2024, as per our policy, we performed our annual goodwill impairment test as required by IAS 36 and identified a goodwill impairment at Loulo-Gounkoto. For certain CGUs the prior year calculation of the recoverable amount was used for the annual goodwill impairment test, since all criteria described in note 2o were satisfied. Also, in Q4 2024, we reviewed the updated LOM plans for our other operating minesites for indicators of impairment or reversal. We noted indicators of impairment reversal at our Lumwana and Veladero mines and of impairment at our Carlin and Long Canyon mines. The key assumptions used in these impairment assessments are listed below.Loulo-GounkotoThe Company and the Government of Mali have been engaged in an ongoing dispute over the existing mining conventions of SociÃ©tÃ© des Mines de Loulo SA (â€œSomiloâ€) and SociÃ©tÃ© des Mines de Gounkoto (â€œGounkotoâ€) (together, the â€œConventionsâ€). On January 14, 2025, due to the restrictions imposed by the Government of Mali on gold shipments, the Company announced that the Loulo-Gounkoto complex would temporarily suspend operations (refer to note 35 for more information). We determined that the carrying value of $3,564Â million exceeded the FVLCD. We recorded a goodwill impairment of $484 million based on a FVLCD of $3,080Â million. LumwanaIn Q4 2024, we updated the LOM plan for Lumwana and we observed an increase in the mineâ€™s discounted cash flows reflecting the increased confidence of the Super Pit Expansion following the completion of the feasibility study and higher copper price assumptions. We determined that this was an indicator of impairment reversal and concluded that the mineâ€™s FVLCD exceeded its carrying value. We recorded a partial non-current asset impairment reversal of $655 million. VeladeroIn the Q4 2024, we updated the LOM plan for Veladero and we observed an increase in the mineâ€™s discounted cash flows reflecting higher gold prices and a decrease in the WACC primarily due to lower country risk. We determined that this was an indicator of impairment reversal and concluded that the mineâ€™s FVLCD exceeded its carrying value and we recorded a non-current asset impairment reversal of $437 million, which represents a full reversal of the non-current asset impairments recorded in 2018 and 2022.CarlinIn Q4 2024, we updated the LOM plan for Carlin and identified that due to a change in the mine plan, an area of the Goldstrike open pit was no longer economic to be mined. As a result, we identified a non-current asset impairment of $82Â million related to a capitalized stripping asset that no longer had a future benefit.Long CanyonIn Q4 2024, we decided to place the mine in closure and remove the associated mineral resources from our December 31, 2024 Mineral Reserves and Resources BARRICK YEAR-END 2024 126 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSstatement. As a result, we identified a non-current asset impairment of $49 million on assets that no longer had a future benefit. 2023 Indicators of Impairment and ReversalsIn Q4 2023, as per our policy, we performed our annual goodwill impairment test as required by IAS 36 and identified no impairments. Also in Q4 2023, we reviewed the updated LOM plans for our other operating minesites for indicators of impairment or reversal. We noted an indicator of impairment at our Long Canyon mine.Long CanyonFollowing the completion of certain studies in Q4 2023, we decided not to pursue the permitting associated with Phase 2 mining, removed those ounces from our LOM plan and placed the mine in care and maintenance. This represented an impairment trigger in Q4 2023 and we performed an impairment analysis. We concluded that the carrying amount of $301 million exceeded the FVLCD of $65 million and recorded a non-current asset impairment of $280 million. The key assumptions used in this assessment were consistent with our testing of goodwill impairment in Q4 2023, as listed below.PorgeraOn December 22, 2023, the Porgera Project Commencement Agreement was completed and recommissioning of the mine commenced. No impairment was identified. Refer to note 4 for more information.Key AssumptionsRecoverable amount has been determined based on the estimated FVLCD, which has been determined to be greater than the VIU amounts. The key assumptions and estimates used in determining the FVLCD are related to future metal prices, WACC, NAV multiples for gold assets, operating costs, capital expenditures, closure costs, future production levels, continued license to operate, and the expected start of production for our projects. In addition, assumptions are related to observable market evaluation metrics, including identification of comparable entities, and associated market values per ounce or per pound of reserves and/or resources, as well as the fair value of mineral resources outside of LOM plans.GoldFor the gold segments where a recoverable amount was required to be determined, FVLCD was determined by calculating the net present value (â€œNPVâ€) of the future cash flows expected to be generated by the mines and projects within the CGU (Level 3 of the fair value hierarchy). The estimates of future cash flows were derived from the LOM plans and, where the LOM plans exclude a material portion of total reserves and resources, we assign value to resources not considered in these models. Based on observable market or publicly available data, including equity sell-side analyst forecasts, we make an assumption of future gold, copper and silver prices to estimate future revenues. The future cash flows for each gold mine are discounted using a real WACC, which reflects specific market risk factors for each mine. Some gold companies trade at a market capitalization greater than the NPV of their expected cash flows. Market participants describe this as a â€œNAV multipleâ€, which represents the multiple applied to the NPV to arrive at the trading price. The NAV multiple is generally understood to take account of a variety of additional value factors such as the exploration potential of the mineral property, namely the ability to find and produce more metal than what is currently included in the LOM plan or reserve and resource estimates, and the benefit of gold price optionality. As a result, we applied a specific NAV multiple to the NPV of each CGU within each gold segment based on the NAV multiples observed in the market in recent periods and that we judged to be appropriate to the CGU.In the absence of a LOM plan for Long Canyon, in 2023 we used the market approach which means the FVLCD was determined by considering observable market values for comparable assets expressed as dollar per ounce of mineral resources (level 3 of the fair value hierarchy). CopperFor the copper segment where a recoverable amount was required to be determined, FVLCD was determined by calculating the NPV of the future cash flows expected to be generated by the mine and projects within the CGU (Level 3 of the fair value hierarchy). The estimates of future cash flows were derived from the LOM plans. Based on observable market or publicly available data, including equity sell-side analyst forecasts, we make an assumption of future copper prices to estimate future revenues. The future cash flows for each copper mine are discounted using a real WACC, which reflects specific market risk factors for each mine. AssumptionsThe short-term and long-term gold and copper price assumptions used in our fourth quarter 2024 and 2023 impairment testing are as follows: 2024 2023 Gold price per oz (short-term) $2,400 $1,900 Gold price per oz (long-term) 1,850 1,600 Copper price per lb (short-term) 4.25 3.75 Copper price per lb (long-term) 4.00 3.50Neither the increase in the long-term gold price nor long-term copper price assumption from 2023 were considered an indicator of impairment reversal as the increased price would not, in isolation, have resulted in the identification of an impairment reversal at our mines with reversible impairments. The other key assumptions used in our impairment testing, based on the CGUs tested in each year, are summarized in the following table:Â 2024 2023 WACC - gold (range) 5%-9% 5%-9% WACC - gold (avg) 6Â % 6Â % WACC - copper 12Â % n/a Value per ounce of gold n/a $40 NAV multiple - gold (avg) 1.2 1.2 LOM years - gold (avg) 21 23SensitivitiesShould there be a significant increase or decline in commodity prices, we would take actions to assess the implications on our LOM plans, including the determination of reserves and resources, and the appropriate cost structure for the CGU. The recoverable amount of the CGU would be affected by these changes and also be impacted by other market factors such as changes in NAV multiples and the value per ounce or pound of comparable market entities. BARRICK YEAR-END 2024 127 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSWe performed a sensitivity analysis on each gold CGU that was tested as part of the goodwill impairment test, as well as those gold CGUs which we believe are most sensitive to changes in the key assumptions. We flexed the gold prices, WACC and NAV multiple, which are the most significant assumptions that impact the impairment calculations. We first assumed a +/- $100 per ounce change in our gold price assumptions, while holding all other assumptions constant. We then assumed a +/-1% change in our WACC, independent from the change in gold prices, while holding all other assumptions constant. Finally, we assumed a +/- 0.1 change in the NAV multiple, while holding all other assumptions constant. These sensitivities help to determine the theoretical impairment losses or impairment reversals that would be recorded with these changes in gold prices, WACC and NAV multiple. At Loulo-Gounkoto, if the gold price per ounce was increased by $100, the WACC was decreased by 1%, or the NAV multiple was increased by 0.1, no goodwill impairment would have been recorded. If the WACC was increased by 1% or the NAV multiple was decreased by 0.1, there would be no change to the goodwill impairment recorded. If the gold price per ounce was decreased by $100, a non-current asset impairment of $529 million would have been recognized in addition to the goodwill impairment.We also performed a sensitivity analysis on the Lumwana CGU. We flexed the copper prices and the WACC, which are the most significant assumptions that impact the impairment calculations. We first assumed a +/- $0.25 per pound change in our copper price assumptions, while holding all other assumptions constant. We then assumed a +/-1% change in our WACC, independent from the change in copper prices, while holding all other assumptions constant. These sensitivities help to determine the theoretical impairment losses or impairment reversals that would be recorded with these changes in copper prices and WACC.Instead of the non-current asset impairment reversal of $655 million recognized at Lumwana, if the following changes were made, the theoretical impairment reversal would be as follows: 1% increase in WACC $301Â 1% decrease in WACC 1,067Â $0.25/lb increase in copper prices 1,507Â $0.25/lb decrease in copper prices â€”Â The carrying value of the CGUs that are most sensitive to changes in the key assumptions used in the FVLCD calculation are:Â As at December 31, 2024 Carrying Value Loulo-Gounkoto $3,080Â Kibali1 2,477Â Lumwana 2,401Â Veladero 804Â Hemlo 368Â 1Kibaliâ€™s carrying value is comprised of the equity investment and JV receivable.22 n Other AssetsÂ As at December 31, 2024 As at December 31, 2023 Value added taxes receivable1 $222Â $134Â Other investments2 42Â 131Â Notes receivable3 217Â 187Â Norte Abierto JV partner receivable 51Â 61Â Restricted cash4 65Â 101Â Kibali JV Receivable5 202Â 358Â Prepayments6 234Â 212Â PV resettlement receivable 86Â 32Â Other 176Â 140Â $1,295Â $1,356Â 1Includes VAT and fuel tax receivables of $100 million in Mali, $6 million in Argentina, $69 million in Tanzania and $47 million in Chile (Dec. 31, 2023: $nil, $7 million, $69 million and $58 million, respectively). 2Includes equity investments in other mining companies. 3Primarily represents the interest bearing promissory note due from NovaGold.4Primarily represents the cash balance at Pueblo Viejo that is contractually restricted in respect of disbursements for environmental rehabilitation, which are expected to occur near the end of Pueblo Viejoâ€™s mine life.5Refer to note 16 for further details. 6Primarily relates to prepaid royalties at Carlin.23 n Accounts Payable As at December 31, 2024 As at December 31, 2023 Accounts payable $655Â $678Â Accruals 673Â 567Â Payroll accruals 285Â 258Â $1,613Â $1,503Â 24 n Other Current Liabilities As at December 31, 2024 As at December 31, 2023 Provision for environmental rehabilitation (note 27b) 226Â 270Â Deposit on Pueblo Viejo gold and silver streaming agreement 40Â 58Â Share-based payments (note 34a) 54Â 50Â Pueblo Viejo JV partner shareholder loan (note 29) 60Â 32Â Other 80Â 129Â $460Â $539Â BARRICK YEAR-END 2024 128 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS25 n Financial Instruments Financial instruments include cash; evidence of ownership in an entity; or a contract that imposes an obligation on one party and conveys a right to a second entity to deliver/receive cash or another financial instrument. These provisions allow Barrick, at its option, to redeem indebtedness prior to maturity at specified prices and also may permit redemption of debt by Barrick upon the occurrence of certain specified changes in tax legislation.2Amortization of debt premium/discount and increases (decreases) in capital leases.3Consists of $850 million (2023: $850 million) of our wholly-owned subsidiary Barrick North America Finance LLC (â€œBNAFâ€) notes due 2041.4Consists of $375Â million (2023: $375Â million) of 5.25% notes which mature in 2042. 5Consists of $400 million (2023: $400 million) of 5.80% notes which mature in 2034.6Consists of $600 million (2023: $600 million) of 6.35% notes which mature in 2036.7Consists of $1.1 billion (2023: $1.1 billion) in conjunction with our wholly-owned subsidiary BNAF and our wholly-owned subsidiary Barrick (PD) Australia Finance Pty Ltd. (â€œBPDAFâ€). This consists of $250 million (2023: $250 million) of BNAF notes due 2038 and $807 million (2023: $807 million) of BPDAF notes due 2039.8Consists primarily of leases at Nevada Gold Mines, $12 million, Loulo-Gounkoto, $18 million, Veladero, $2Â million, Lumwana, $1 million, Hemlo, $9Â million, North Mara, $4 million and Tongon, $5 million (2023: $13 million, $20 million, $1Â million, $3 million, $1Â million, $nil and $6 million, respectively).9Consists of $850 million (2023: $850 million) in conjunction with our wholly-owned subsidiary BNAF.10We provide an unconditional and irrevocable guarantee on all BNAF, BPDAF, Barrick Gold Finance Company (â€œBGFCâ€), and Barrick (HMC) Mining (â€œBHMCâ€) notes and generally provide such guarantees on all BNAF, BPDAF, BGFC, and BHMC notes issued, which rank equally with our other unsecured and unsubordinated obligations.11The current portion of long-term debt consists of leases ($13 million; 2023: $11 million) and other debt obligations ($11 million; 2023: $nil).Â BARRICK YEAR-END 2024 130 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS5.7% NotesIn June 2011, BNAF issued an aggregate of $4.0 billion in debt securities including $850 million of 5.70% notes that mature in 2041 issued by BNAF (collectively, the â€œBNAF Notesâ€). Barrick provides an unconditional and irrevocable guarantee of the BNAF Notes, which rank equally with Barrickâ€™s other unsecured and unsubordinated obligations.5.25% NotesOn AprilÂ 3, 2012, we issued an aggregate of $2 billion in debt securities including $750 million of 5.25% notes that mature in 2042. During 2022, $375 million of the 5.25% notes was repaid. Other Fixed Rate NotesOn OctoberÂ 16, 2009, we issued debentures through our wholly-owned indirect subsidiary BPDAF consisting of $850 million of 30-year notes with a coupon rate of 5.95%. We also provide an unconditional and irrevocable guarantee of these payments, which rank equally with our other unsecured and unsubordinated obligations. During 2023, $43Â million of the 5.95% notes was repaid. In September 2008, we issued an aggregate of $1.25 billion of notes through our wholly-owned indirect subsidiaries BNAF and BGFC including $250 million of 30-year notes with a coupon rate of 7.5%. We also provide an unconditional and irrevocable guarantee of these payments, which rank equally with our other unsecured and unsubordinated obligations.5.75% NotesOn MayÂ 2, 2013, we issued an aggregate of $3 billion in notes through Barrick and our wholly-owned indirect subsidiary BNAF including $850 million of 5.75% notes issued by BNAF that mature in 2043. $2 billion of the net proceeds from this offering was used to repay amounts outstanding under our revolving Credit Facility at that time. We provide an unconditional and irrevocable guarantee on the $850 million of 5.75% notes issued by BNAF, which rank equally with our other unsecured and unsubordinated obligations.Credit FacilityIn May 2024, we completed an update of the credit and guarantee agreement (the â€œCredit Facilityâ€) with certain Lenders, which requires such Lenders to make available to us a credit facility of $3.0 billion or the equivalent amount in Canadian dollars. The Credit Facility, which is unsecured, currently has an interest rate of Secured Overnight Financing Rate (â€œSOFRâ€) plus 1.00% on drawn amounts, and a standby rate of 0.09% on undrawn amounts. The Credit Facility incorporates sustainability-linked metrics which are made up of annual environmental and social performance targets directly influenced by Barrick's actions, rather than based on external ratings. The performance targets include Scope 1 and Scope 2 greenhouse gas emissions intensity, water use efficiency (reuse and recycling rates), and total recordable injury frequency rate. Barrick may incur positive or negative pricing adjustments on drawn credit spreads and standby fees based on its sustainability performance versus the targets that have been set. As part of the update, the termination date of the Credit Facility was extended from May 2028 to May 2029. The Credit Facility was undrawn as at DecemberÂ 31, 2024. For these particular risks, we believe that derivatives are an appropriate way of managing the risk.We use derivatives as part of our risk management program to mitigate variability associated with changing market values related to the hedged item. Many of the derivatives we use meet the hedge effectiveness criteria and are designated in a hedge accounting relationship.Certain derivatives are designated as either hedges of the fair value of recognized assets or liabilities or of firm commitments (â€œfair value hedgesâ€) or hedges of highly probable forecasted transactions (â€œcash flow hedgesâ€), collectively known as â€œaccounting hedgesâ€. Hedges that are expected to be highly effective in achieving offsetting changes in fair value or cash flows are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated. Some of the derivatives we use are effective in achieving our risk management objectives, but they do not meet the strict hedge accounting criteria. These derivatives are considered to be â€œnon-hedge derivativesâ€.During 2024 and 2023, we did not enter into any derivative contracts for US dollar interest rates, currencies, metals or commodity inputs. We had no contracts outstanding at DecemberÂ 31, 2024. BARRICK YEAR-END 2024 132 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS26 n Fair Value Measurements Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability (for example, interest rate and yield curves observable at commonly quoted intervals, forward pricing curves used to value currency and commodity contracts and volatility measurements used to value option contracts), or inputs that are derived principally from or corroborated by observable market data or other means. Level 3 inputs are unobservable (supported by little or no market activity). The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs.a) Â Â Â Â Assets and Liabilities Measured at Fair Value on a Recurring Basis Fair Value Measurements Â Â Â At December 31, 2024 Quoted Prices in Active Markets for Identical Assets Significant Other Observable Inputs Significant Unobservable Inputs Aggregate Fair Value (Level 1) (Level 2) (Level 3) Other investments1 $42Â $â€”Â $â€”Â $42Â Receivables from provisional copper and gold sales â€”Â 204Â â€”Â 204Â $42Â $204Â $â€”Â $246Â Fair Value Measurements Â Â Â Â At December 31, 2023 Quoted Prices in Active Markets for Identical Assets Significant Other Observable Inputs Significant Unobservable Inputs Aggregate Fair Value (Level 1) (Level 2) (Level 3) Other investments1 $131Â $â€”Â $â€”Â $131Â Receivables from provisional copper and gold sales â€”Â 246Â â€”Â 246Â $131Â $246Â $â€”Â $377Â 1 Â Includes equity investments in other mining companies. b)Â Â Â Â Fair Values of Financial Assets and Liabilities Â Â At December 31, 2024 At December 31, 2023 Carrying amount Estimated fair value Carrying amount Estimated fair value Financial assets Other assets1 $776Â $776Â $807Â $807Â Other investments2 42Â 42Â 131Â 131Â Â $818Â $818Â $938Â $938Â Financial liabilities Debt3 $4,729Â $4,821Â $4,726Â $5,107Â Â Â Other liabilities 595Â 595Â 574Â 574Â $5,324Â $5,416Â $5,300Â $5,681Â 1Includes restricted cash and amounts due from our partners and joint ventures.2Includes equity investments in other mining companies. Recorded at fair value. Quoted market prices are used to determine fair value.3Debt is generally recorded at amortized cost. The fair value of debt is primarily determined using quoted market prices. Balance includes both current and long-term portions of debt.Â The fair values of the Companyâ€™s remaining financial assets and liabilities, which include cash and equivalents, accounts receivable and trade and other payables approximate their carrying values due to their short-term nature. We do not offset financial assets with financial liabilities. BARRICK YEAR-END 2024 133 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSc)Â Â Â Assets Measured at Fair Value on a Non-Recurring BasisÂ Valuation Techniques At December 31, 2024 Quoted prices in active markets for identical assets Significant other observable inputs Significant unobservable inputs Aggregate fair value (Level 1) (Level 2) (Level 3) Property, plant and equipment1 â€”Â â€”Â â€”Â â€”Â Goodwill2 â€”Â â€”Â â€”Â â€”Â â€”Â 1 Property, plant and equipment were written down by $151Â million, which was included in earnings in this period.2 Goodwill was written down at Loulo-Gounkoto by $484Â million, which was included in earnings in this period. Receivables from Provisional Copper and Gold SalesThe fair value of receivables arising from copper and gold sales contracts that contain provisional pricing mechanisms is determined using the appropriate quoted forward price from the exchange that is the principal active market for the particular metal. As such, these receivables, which meet the definition of an embedded derivative, are classified within LevelÂ 2 of the fair value hierarchy.Other Long-Term AssetsThe fair value of property, plant and equipment, goodwill, intangibles and other assets is determined primarily using an income approach based on unobservable cash flows, and as a result is classified within LevelÂ 3 of the fair value hierarchy. Refer to note 21 for disclosure of inputs used to develop these measures.27 n Provisions a) Provisions As at December 31, 2024 As at December 31, 2023 Environmental rehabilitation (â€œPERâ€) $1,751Â $1,883Â Post-retirement benefits 34Â 36Â Share-based payments 23Â 20Â Other employee benefits 32Â 36Â Other 122Â 83Â $1,962Â $2,058Â Â b) Environmental Rehabilitation 2024 2023 At January 1 $2,153Â $2,204Â PERs divested during the year1 â€”Â (64) Closed Sites Impact of revisions to expected cash flows recorded in earnings 38Â 14Â Settlements Â Â Â Â Cash payments (121) (117) Â Â Â Â Settlement gains (10) (7) Accretion 41Â 29Â Operating Sites PER revisions in the year (92) 91Â Settlements Â Â Â Â Cash payments (76) (50) Â Â Â Â Settlement gains (4) (5) Accretion 48Â 58Â At December 31 $1,977Â $2,153Â Current portion (note 24) (226) (270) $1,751Â $1,883Â 1 2023 primarily relates to the transfer of our Porgera mine to equity accounting method investment. The eventual settlement of substantially all PERs estimated is expected to take place between 2025 and 2064.Â Â Â Â The total PER has decreased in Q4 2024 by $147 million primarily due to an increase in the discount rate, and spending incurred during the quarter, partially offset by changes in cost estimates at our US closure sites, Pascua-Lama, Pierina, Hemlo and Lumwana properties, combined with accretion. For the year ended DecemberÂ 31, 2024, our PER balance decreased by $176 million primarily due to spending incurred during the year, and an increase in the discount rate, partially offset by accretion, combined with the changes in cost estimates described above. A 1% increase in the discount rate would result in a decrease in the PER by $186 millionÂ and a 1% decrease in the discount rate would result in an increase in the PER by $228 million, while holding the other assumptions constant. BARRICK YEAR-END 2024 134 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS28 n Financial Risk Management Our financial instruments are comprised of financial liabilities and financial assets. Our principal financial liabilities, other than derivatives, comprise accounts payable and debt. The main purpose of these financial instruments is to manage short-term cash flow and raise funds for our capital expenditure program. Our principal financial assets, other than derivative instruments, are cash and equivalents, restricted cash, accounts receivable, notes receivable, JV receivable and JV partner receivable, which arise directly from our operations. In the normal course of business, we use derivative instruments to mitigate exposure to various financial risks.We manage our exposure to key financial risks in accordance with our financial risk management policy. The objective of the policy is to support the delivery of our financial targets while protecting future financial security. The main risks that could adversely affect our financial assets, liabilities or future cash flows are as follows:a.Market risk, including commodity price risk, foreign currency and interest rate risk;b.Credit risk;c.Liquidity risk; andd.Capital risk management.Management designs strategies for managing each of these risks, which are summarized below. Our senior management oversees the management of financial risks. Our senior management ensures that our financial risk-taking activities are governed by policies and procedures and that financial risks are identified, measured and managed in accordance with our policies and our risk appetite. All derivative activities for risk management purposes are carried out by the appropriate personnel.a) Market RiskMarket risk is the risk that changes in market factors, such as commodity prices, foreign exchange rates or interest rates, will affect the value of our financial instruments. We manage market risk by either accepting it or mitigating it through the use of derivatives and other economic hedging strategies.Commodity Price RiskGold and CopperWe sell our gold and copper production in the world market. The market prices of gold and copper are the primary drivers of our profitability and ability to generate both operating and free cash flow. Our corporate treasury group may implement hedging strategies on an opportunistic basis to protect us from downside price risk on our gold and copper production. We did not enter into any positions during 2024 or 2023 and we do not have any positions outstanding as at DecemberÂ 31, 2024. Our gold and copper production is subject to market prices.FuelWe consume diesel fuel and natural gas to run our operations. Diesel fuel is refined from crude oil and is therefore subject to the same price volatility affecting crude oil prices. Therefore, volatility in crude oil and natural gas prices have a direct and indirect impact on our production costs.Foreign Currency RiskThe functional and reporting currency for all of our operating segments is the US dollar and we report our results using the US dollar. The majority of our operating and capital expenditures are denominated and settled in US dollars. We have exposure to the Argentine peso through operating costs at our Veladero mine, and peso denominated VAT receivable balances. We also have exposure to the Canadian and Australian dollars, Zambian kwacha, Tanzanian shilling, Dominican peso, West African CFA franc, Euro, South African rand, and British pound through mine operating and capital costs. In addition, we also have exposure to the Pakistan rupee through project costs and capital costs on Reko Diq. Consequently, fluctuations in the US dollar exchange rate against these currencies increase the volatility of cost of sales, general and administrative costs, project costs and overall net earnings, when translated into US dollars.Interest Rate RiskInterest rate risk refers to the risk that the value of a financial instrument or cash flows associated with the instruments will fluctuate due to changes in market interest rates. Currently, our interest rate exposure mainly relates to

interest receipts on our cash balances ($4.1Â billion as at DecemberÂ 31, 2024); the mark-to-market value of derivative instruments; and to the interest payments on our variable-rate debt ($0.1Â billion as at DecemberÂ 31, 2024).The effect on net earnings and equity of a 1% change in the interest rate of our financial assets and liabilities as at DecemberÂ 31, 2024 is approximately $30 million (2023: $30Â million).b) Credit RiskCredit risk is the risk that a third party might fail to fulfill its performance obligations under the terms of a financial instrument. Credit risk arises from cash and equivalents, restricted cash, notes receivable, JV receivable, JV partner receivable, accounts receivable, as well as derivative assets. To mitigate our inherent exposure to credit risk on all financial assets listed above (other than derivative assets) we maintain policies to limit the concentration of credit risk, review counterparty creditworthiness on a monthly basis, and ensure liquidity of available funds. We also invest our excess cash and equivalents in highly rated financial institutions, primarily within the United States and Canada. Furthermore, we sell our gold and copper production into the world market and to financial institutions and private customers with strong credit ratings. Historically, customer defaults have not had a significant impact on our operating results or financial position.The Companyâ€™s maximum exposure to credit risk at the reporting date is the carrying value of each of the financial assets, excluding derivative assets, disclosed as follows: BARRICK YEAR-END 2024 135 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS As at December 31, 2024 As at December 31, 2023 Cash and equivalents $4,074Â $4,148Â Accounts receivable 763Â 693Â Notes receivable 217Â 187Â Kibali JV receivable 462Â 505Â Norte Abierto JV partner receivable 74Â 81Â Restricted cash 65Â 101Â $5,655Â $5,715Â c) Liquidity RiskLiquidity risk is the risk of loss from not having access to sufficient funds to meet both expected and unexpected cash demands. We manage our exposure to liquidity risk by maintaining cash reserves, access to undrawn credit facilities and access to public debt markets, by staggering the maturities of outstanding debt instruments to mitigate refinancing risk and by monitoring of forecasted and actual cash flows. Details of the undrawn Credit Facility are included in note 25.Our capital structure comprises a mix of debt, non-controlling interest and shareholdersâ€™ equity. As at DecemberÂ 31, 2024, our total debt was $4.7 billionÂ (debt net of cash and equivalents was $655 million) compared to total debt as at DecemberÂ 31, 2023 of $4.7 billion (debt net of cash and equivalents was $578 million).Our operating cash flow is dependent on the ability of our operations to deliver projected future cash flows. The market prices of gold, and to a lesser extent copper, are the primary drivers of our operating cash flow. Other options to enhance liquidity include further portfolio optimization; issuance of equity or long-term debt securities in the public markets or to private investors (Moodyâ€™s and S&P currently rate Barrickâ€™s outstanding long-term debt as investment grade, with ratings of A3 and BBB+, respectively); and drawing on the $3.0 billion available under our undrawn Credit Facility (subject to compliance with covenants and the making of certain representations and warranties, this facility is available for drawdown as a source of financing). The key financial covenant in the Credit Facility (undrawn as at DecemberÂ 31, 2024) requires Barrick to maintain a net debt to total capitalization ratio, as defined in the agreement, of 0.60:1 or lower (Barrickâ€™s net debt to total capitalization ratio was 0.02:1 as at DecemberÂ 31, 2024).The following table outlines the expected maturity of our significant financial assets and liabilities into relevant maturity groupings based on the remaining period from the balance sheet date to the contractual maturity date. As the amounts presented in the table are the contractual undiscounted cash flows, these balances may not agree with the amounts disclosed in the balance sheet.Â BARRICK YEAR-END 2024 136 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS As at December 31, 2024 (in $ millions) LessÂ thanÂ 1Â year 1 to 3 years 3 to 5 years Over 5 years Total Cash and equivalents $4,074Â $â€”Â $â€”Â $â€”Â $4,074Â Accounts receivable 763Â â€”Â â€”Â â€”Â 763Â Notes receivable â€”Â 61Â â€”Â 156Â 217Â Kibali JV receivable 260Â 202Â â€”Â â€”Â 462Â Norte Abierto JV partner receivable 23Â â€”Â â€”Â 51Â 74Â Restricted cash â€”Â 5Â â€”Â 60Â 65Â Trade and other payables 1,613Â â€”Â â€”Â â€”Â 1,613Â Debt 24Â 69Â 12Â 4,644Â 4,749Â Other liabilities 85Â 167Â 97Â 246Â 595Â As at December 31, 2023 (in $ millions) Less than 1 year 1 to 3 years 3 to 5 years Over 5 years Total Cash and equivalents $4,148Â $â€”Â $â€”Â $â€”Â $4,148Â Accounts receivable 693Â â€”Â â€”Â â€”Â 693Â Notes receivable â€”Â 46Â 3Â 138Â 187Â Kibali JV receivable 148Â 314Â 43Â â€”Â 505Â Norte Abierto JV partner receivable 20Â 10Â â€”Â 51Â 81Â Restricted cash â€”Â 4Â â€”Â 97Â 101Â Trade and other payables 1,503Â â€”Â â€”Â â€”Â 1,503Â Debt 11Â 78Â 12Â 4,646Â 4,747Â Other liabilities 69Â 243Â 89Â 173Â 574Â d) Capital Risk ManagementOur objective when managing capital is to provide value for shareholders by maintaining an optimal short-term and long-term capital structure in order to reduce the overall cost of capital while preserving our ability to continue as a going concern. Our capital management objectives are to safeguard our ability to support our operating requirements on an ongoing basis, continue the development and exploration of our mineral properties and support any expansion plans. Our objectives are also to ensure that we maintain a strong balance sheet and optimize the use of debt and equity to support our business and maintain financial flexibility in order to provide meaningful returns to shareholders and maximize shareholder value. We define capital as total debt less cash and equivalents and it is managed by management subject to approved policies and limits by the Board of Directors. We have no significant financial covenants or capital requirements with our lenders or other parties other than what is discussed under liquidity risk in note 28c.29 n Other Non-Current Liabilities As at December 31, 2024 As at December 31, 2023 Deposit on Pascua-Lama silver sale agreement $167Â $162Â Deposit on Pueblo Viejo gold and silver streaming agreement1 408Â 398Â Long-term income tax payable 80Â 165Â GoT shareholder loan 60Â 82Â Pueblo Viejo JV partner shareholder loan 407Â 383Â Provision for offsite remediation 36Â 34Â Other 16Â 17Â $1,174Â $1,241Â 1Revenues of $30 million were recognized in 2024 (2023: $36 million) through the draw-down of our streaming liabilities relating to a contract in place at Pueblo Viejo.Government of Tanzania Shareholder LoanOn January 24, 2020, Barrick formalized the establishment of a joint venture between Barrick and the Government of Tanzania (â€œGoTâ€). Effective January 1, 2020, the GoT received a 16% interest in the shareholder loans owed by Bulyanhulu and Buzwagi, of which $167Â million was payable to the GoT.Â During 2024 and 2023, $nil and $37Â million, respectively, was offset against VAT receivables. During 2024, a $22Â million reduction in the outstanding balance was recorded against other income as part of the economic benefits sharing under the Twiga partnership. BARRICK YEAR-END 2024 137 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSPueblo Viejo Shareholder LoanIn November 2020, Pueblo Viejo entered into a $1.3Â billion loan facility agreement with its shareholders (the â€œFirst PV Shareholder Loanâ€) to provide long-term financing to expand the mine. The shareholders lend funds pro rata in accordance with their shareholding in Pueblo Viejo. In October 2024, Pueblo Viejo entered into an additional $0.8Â billion loan facility agreement with its shareholders (the â€œSecond PV Shareholder Loanâ€). The First PV Shareholder Loan is broken up into two facilities: $0.8Â billion of funds that could be drawn on a pro rata basis until June 30, 2022 (â€œFacility Iâ€) and $0.5Â billion of funds that can be drawn on a pro rata basis until June 30, 2025 (â€œFacility IIâ€). During 2022, the drawing period for Facility I was extended to December 31, 2022. Starting in 2023, amortized repayments for Facility I began twice yearly on the scheduled repayment dates, with a final maturity date of February 28, 2032. Amortized repayments for Facility II are due to begin twice yearly on the scheduled repayment dates after June 30, 2025, with a final maturity date of February 28, 2035. The interest rate on drawn amounts is SOFR plus 400 basis points for Facility I and Facility II. The Second PV Shareholder Loan consists of $0.8Â billion of funds that can be drawn on a pro rata basis until June 30, 2029. Amortized repayments for the Second PV Shareholder Loan are due to begin twice yearly on the scheduled repayment dates after June 30, 2029, with a final maturity date of February 15, 2039. The interest rate on drawn amounts is SOFR plus 381 basis points for the Second PV Shareholder Loan. During 2022, 2021 and 2020, $369Â million, $327Â million and $104Â million, respectively, were drawn on Facility I, fully drawing it down, including $147Â million, $131Â million and $42Â million, respectively, from Barrickâ€™s Pueblo Viejo JV partner. During 2024 and 2023, $80 million and $80Â million, respectively, was repaid on Facility I, including $32 million and $32Â million, respectively, from Barrickâ€™s Pueblo Viejo JV partner. During 2024, 2023 and 2022, $100 million, $242Â million and $75Â million, respectively, were drawn on Facility II, including $40 million, $97Â million and $30Â million, respectively, from Barrickâ€™s Pueblo Viejo JV partner.During 2024, $110Â million was drawn on the Second PV Shareholder Loan, including $44Â million from Barrickâ€™s Pueblo Viejo JV partner.Pascua-Lama Silver Sale AgreementOur silver sale agreement with Wheaton requires us to deliver 25% of the life of mine silver production from the Pascua-Lama project once it is constructed and required delivery of 100% of silver production from the Lagunas Norte, Pierina and Veladero mines until MarchÂ 31, 2018. In return, we were entitled to an upfront cash payment of $625 million payable over three years from the date of the agreement, as well as ongoing payments in cash of the lesser of $3.90 (subject to an annual inflation adjustment of 1Â percent starting three years after project completion at Pascua-Lama) and the prevailing market price for each ounce of silver delivered under the agreement. An imputed interest expense was recorded on the liability at the rate implicit in the agreement. The liability plus imputed interest was amortized based on the difference between the effective contract price for silver and the amount of the ongoing cash payment per ounce of silver delivered under the agreement. The completion date guarantee under the silver sale agreement for Pascua-Lama was originally DecemberÂ 31, 2015 but was subsequently extended to JuneÂ 30, 2020. Per the terms of the amended silver purchase agreement, if the requirements of the completion guarantee were not satisfied by JuneÂ 30, 2020, then Wheaton had the right to terminate the agreement within 90 days of that date, in which case, they would have been entitled to the return of the upfront consideration paid less credit for silver delivered up to the date of that event.Given that, as of September 28, 2020, Wheaton had not exercised its termination right, a residual liability of $253Â million remains due on September 1, 2039 (assuming no future deliveries are made). This residual cash liability was remeasured to $148Â million as at September 30, 2020, which was the present value of the liability due in 2039 discounted at a rate estimated for comparable liabilities, including Barrick's outstanding debt. The liability had a balance of $167 million as at December 31, 2024 and is measured at amortized cost.Pueblo Viejo Gold and Silver Streaming AgreementOn SeptemberÂ 29, 2015, we closed a gold and silver streaming transaction with Royal Gold, Inc. (â€œRoyal Goldâ€) for production linked to Barrickâ€™s 60% interest in the Pueblo Viejo mine. Royal Gold made an upfront cash payment of $610 million and will continue to make cash payments for gold and silver delivered under the agreement. The $610 million upfront payment is not repayable and Barrick is obligated to deliver gold and silver based on Pueblo Viejoâ€™s production. We have accounted for the upfront payment as deferred revenue and will recognize it in earnings, along with the ongoing cash payments, as the gold and silver is delivered to Royal Gold. We will also be recording accretion expense on the deferred revenue balance as the time value of the upfront deposit represents a significant financing component of the transaction.Under the terms of the agreement, Barrick will sell gold and silver to Royal Gold equivalent to:â€¢7.5%Â of Barrickâ€™s interest in the gold produced at Pueblo Viejo until 990,000 ounces of gold have been delivered, and 3.75% thereafter. As at DecemberÂ 31, 2024, approximately 369,000 ounces of gold have been delivered.â€¢75% of Barrickâ€™s interest in the silver produced at Pueblo Viejo until 50 million ounces have been delivered, and 37.5% thereafter. Silver will be delivered based on a fixed recovery rate of 70%. Silver above this recovery rate is not subject to the stream. As at DecemberÂ 31, 2024, approximately 13Â million ounces of silver have been delivered.Barrick will receive ongoing cash payments from Royal Gold equivalent to 30% of the prevailing spot prices for the first 550,000 ounces of gold and 23.1 million ounces of silver delivered. Thereafter payments will double to 60% of prevailing spot prices for each subsequent ounce of gold and silver delivered. Ongoing cash payments to Barrick are tied to prevailing spot prices rather than fixed in advance, maintaining exposure to higher gold and silver prices in the future. BARRICK YEAR-END 2024 138 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS30 n Deferred Income Taxes Recognition and MeasurementWe record deferred income tax assets and liabilities where temporary differences exist between the carrying amounts of assets and liabilities in our balance sheet and their tax bases. The measurement and recognition of deferred income tax assets and liabilities takes into account: substantively enacted rates that will apply when temporary differences reverse; interpretations of relevant tax legislation; estimates of the tax bases of assets and liabilities; and the deductibility of expenditures for income tax purposes. In addition, the measurement and recognition of deferred tax assets takes into account tax planning strategies. We recognize the effect of changes in our assessment of these estimates and factors when they occur. Changes in deferred income tax assets and liabilities are allocated between net income, other comprehensive income, equity and goodwill based on the source of the change.Current income taxes of $3Â million have been provided in the year on the undistributed earnings of certain foreign subsidiaries. Our total income tax provision for these items as at DecemberÂ 31, 2024 is $7Â million. Deferred income taxes have not been provided on the undistributed earnings of all other foreign subsidiaries for which we are able to control the timing of the remittance, and it is probable that there will be no remittance in the foreseeable future. These undistributed earnings amounted to $16,974Â million as at DecemberÂ 31, 2024.Sources of Deferred Income Tax Assets and Liabilities As at December 31, 2024 As at December 31, 2023 Deferred tax assets Tax loss carryforwards $204Â $292Â Tax credits 105Â 58Â Environmental rehabilitation 285Â 270Â Post-retirement benefit obligations and other employee benefits 24Â 17Â Other working capital 236Â 115Â Other 11Â 10Â $865Â $762Â Deferred tax liabilities Property, plant and equipment (4,321) (3,748) Inventory (419) (446) Accrued interest payable (12) (7) ($3,887) ($3,439) Classification: Â Â Non-current assets â€”Â â€”Â Non-current liabilities (3,887) (3,439) ($3,887) ($3,439) Expiry Dates of Tax Losses 2025 2026 2027 2028 2029+ No expiry date Total Non-capital tax losses1 Barbados $218Â $2Â $119Â $2Â $2Â â€”Â $343Â Canada â€”Â 1Â 1Â 72Â 1,961Â â€”Â 2,035Â Chile â€”Â â€”Â â€”Â â€”Â â€”Â 1,131Â 1,131Â Peru â€”Â â€”Â â€”Â â€”Â â€”Â 150Â 150Â Tanzania â€”Â â€”Â â€”Â â€”Â â€”Â 973Â 973Â United Kingdom â€”Â â€”Â â€”Â â€”Â â€”Â 164Â 164Â Others 1Â 1Â 52Â â€”Â â€”Â 93Â 147Â $ 219Â $ 4Â $ 172Â $ 74Â $ 1,963Â $ 2,511Â $ 4,943Â 1Represents the gross amount of tax loss carryforwards translated at closing exchange rates at DecemberÂ 31, 2024.The non-capital tax losses include $4,261Â million of losses which are not recognized in deferred tax assets. Of these, $219Â million expire in 2025, $4Â million expire in 2026, $172Â million expire in 2027, $74Â million expire in 2028, $1,963Â million expire in 2029 or later, and $1,829Â million have no expiry date.Â Â Â Â Recognition of Deferred Tax AssetsWe recognize deferred tax assets taking into account the effects of local tax law. Deferred tax assets are fully recognized when we conclude that sufficient positive evidence exists to demonstrate that it is probable that a deferred tax asset will be realized. The main factors considered are:â€¢Historic and expected future levels of taxable income;â€¢Tax plans that affect whether tax assets can be realized; andâ€¢The nature, amount and expected timing of reversal of taxable temporary differences.Â Levels of future income are mainly affected by: market prices for gold, copper and silver; forecasted future costs and expenses to produce gold and copper; quantities of proven and probable gold and copper reserves; market interest rates; and foreign currency exchange rates. If these factors or other circumstances change, we record an adjustment to the recognition of deferred tax assets to reflect our latest assessment of the amount of deferred tax assets that is probable will be realized. BARRICK YEAR-END 2024 141 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS33 n Related Party Transactions The Companyâ€™s related parties include its subsidiaries, joint operations, joint ventures and key management personnel. During its normal course of operations, the Company enters into transactions with its related parties for goods and services. Transactions between the Company and its subsidiaries and joint operations, which are related parties of the Company, have been eliminated on consolidation and are not disclosed in this note. There were no other material related party transactions reported in the year.Remuneration of Key Management PersonnelKey management personnel include the members of the Board of Directors and the executive leadership team. Compensation for key management personnel (including Directors) was as follows: For the years ended December 31 2024 2023 Salaries and short-term employee benefits1 $28Â $25Â Post-employment benefits2 4Â 3Â Share-based payments and other3 25Â 27Â $57Â $55Â 1 Includes annual salary and annual short-term incentives/other bonuses earned in the year.2 Represents Company contributions to retirement savings plans.3 Relates to DSU, RSU, and PGSU grants and other compensation.34 n Stock-Based Compensation a)Â Â Â Â Restricted Share Units (RSUs) and Deferred Share Units (DSUs)Compensation expense for RSUs was a $35Â million charge to earnings in 2024 (2023: $30 million) and is presented as a component of general and administrative expenses and cost of sales, consistent with the classification of other elements of compensation expense for those employees who had RSUs.Compensation expense for RSUs incorporates an expected forfeiture rate. The expected forfeiture rate is estimated based on historical forfeiture rates and expectations of future forfeiture rates. We make adjustments if the actual forfeiture rate differs from the expected rate. At DecemberÂ 31, 2024, the weighted average remaining contractual life of RSUs was 0.82 years (2023: 0.82 years).DSU and RSU Activity (Number of Units in Thousands) DSUs Fair value RSUs Fair value At January 1, 2023 837Â $14.4Â 2,337Â $26.3Â Settled for cash â€”Â â€”Â (1,383) (23.2) Granted 174Â 2.9Â 1,820Â 32.9Â Credits for dividends â€”Â â€”Â 81Â 1.4Â Change in value â€”Â 1.0Â â€”Â (3.4) At December 31, 2023 1,011Â $18.3Â 2,855Â $34.0Â Settled for cash (384) (6.7) (1,665) (31.3) Granted 145Â 2.5Â 2,395Â 37.6Â Credits for dividends â€”Â â€”Â 101Â 1.7Â Change in value â€”Â (2.1) â€”Â (2.7) At December 31, 2024 772Â $12.0Â 3,686Â $39.3Â b)Â Â Â Â Performance Granted Share Units (PGSUs)In 2014, Barrick launched a PGSU plan. Under this plan, selected employees are granted PGSUs, where each PGSU has a value equal to one Barrick common share. At DecemberÂ 31, 2024, 3,453Â thousand units had been granted at a fair value of $38Â million (2023: 3,002Â thousand units at a fair value of $36 million).Â Â BARRICK YEAR-END 2024 142 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTS35 n Contingencies Certain conditions may exist as of the date the financial statements are issued that may result in a loss to the Company, but which will only be resolved when one or more future events occur or fail to occur. The impact of any resulting loss from such matters affecting these financial statements and noted below may be material.Litigation and ClaimsIn assessing loss contingencies related to legal proceedings that are pending against us or unasserted claims that may result in such proceedings, the Company, with assistance from its legal counsel, evaluates the perceived merits of any legal proceedings or unasserted claims as well as the perceived merits of the amount of relief sought or expected to be sought.Pascua-Lama â€“ Proposed Canadian Securities Class Actions In 2014, proposed secondary market liability securities class actions were initiated in Ontario and Quebec against Barrick Gold Corporation and certain of its former senior executives. These actions relate to public disclosures concerning Barrick's Pascua-Lama Project. The Ontario case focuses on disclosure regarding capital cost and schedule estimates for Pascua Lama and environmental matters in Chile between February 2012 and June 2013, while the Quebec case pertains only to disclosure regarding environmental matters in Chile between July 2012 and October 2013. In the Ontario proceedings, plaintiffs are seeking damages exceeding $3Â billion. Alleged damages in the Quebec case have yet to be quantified.Efforts to resolve the Quebec case through mediation were unsuccessful in November 2023. Subsequently, the plaintiffs filed their Originating Application in February 2024 and Barrick responded formally in March 2024. No trial date has been set as of this time. In the Ontario case, the Plaintiffsâ€™ application for leave to appeal to the Supreme Court of Canada from the February 13, 2024 decision of the Court of Appeal was dismissed on September 26, 2024. The Plaintiffsâ€™ motion for class certification has not yet been scheduled.The Company intends to vigorously defend these actions. No amounts have been recorded for any potential liability arising from either of the actions, as the Company cannot reasonably predict the outcome in Ontario or Quebec. Pascua-Lama â€“ SMA Regulatory Sanctions In May 2013, CompaÃ±Ãa Minera Nevada (â€œCMNâ€), Barrickâ€™s Chilean subsidiary that holds the Chilean portion of the Pascua-Lama Project (the â€œProjectâ€), received a resolution (the â€œOriginal Resolutionâ€) from Chileâ€™s environmental regulator (the Superintendencia del Medio Ambiente, or â€œSMAâ€) requiring CMN to complete the water management system in accordance with the Projectâ€™s environmental permit before resuming construction activities. The Original Resolution also required CMN to pay an administrative fine of approximately $16Â million, which CMN paid in May 2013.In 2013, a group of local farmers and indigenous communities challenged the Original Resolution, claiming the fine was inadequate and requesting more severe sanctions, including the revocation of the Projectâ€™s environmental permit. The SMA and CMN defended the Original Resolution.In 2018, the SMA issued the revised resolution (the â€œRevised Resolutionâ€), which reduced the original administrative fine to $11.5Â million and ordered the closure of existing surface facilities on the Chilean side of the Project. The Revised Resolution did not revoke the Projectâ€™s environmental permit. CMN filed an appeal of the Revised Resolution in 2018 with the First Environmental Court of Antofagasta (the â€œAntofagasta Environmental Courtâ€).In 2020, the Antofagasta Environmental Court upheld the closure order and sanctions in the Revised Resolution. It also ordered the SMA to reevaluate certain environmental infringements. The Company did not appeal this ruling, and the Chilean side of the Pascua-Lama project is being transitioned to closure accordingly.On November 13, 2024, the SMA determined that no further fine was applicable to the environmental infringements. On November 21, 2024, CMN paid the outstanding balance of fines previously imposed by the SMA in an amount of approximately $0.3Â million. On December 9, 2024, the same group of local farmers and indigenous communities that challenged the Original Resolution filed an appeal of the SMAâ€™s November 13, 2024 decision. This appeal remains pending. Veladero â€“ Operational Incidents and Associated Proceedings Minera Andina del Sol SRL (formerly, Minera Argentina Gold SRL) (â€œMASâ€), the joint venture company that operates the Veladero mine, is the subject of regulatory proceedings related to operational incidents at the Veladero Valley Leach Facility (â€œVLFâ€) occurring in March 2017 (the â€œMarch 2017 incidentâ€), September 2016 (the â€œSeptember 2016 incidentâ€) and September 2015 (the â€œSeptember 2015 incidentâ€). Following the March 2017 incident, an â€œamparoâ€ protection action (the â€œProvincial Amparo Actionâ€) was filed against MAS in the Jachal First Instance Court, San Juan Province (the â€œJachal Courtâ€) by individuals who claimed to be living in Jachal, San Juan Province, Argentina, seeking the cessation of all activities at the Veladero mine or, alternatively, a suspension of the mineâ€™s leaching process. The matter before the Jachal Court remains pending. In 2017, the National Minister of Environment of Argentina filed an amparo action in the Federal Court in connection with the same March 2017 incident (the â€œFederal Amparo Actionâ€) seeking an order requiring the cessation and/or suspension of activities at the Veladero mine. On June 28, 2024, the Federal Court rejected the National Ministerâ€™s request for, among other things, an interim injunction requiring the cessation and/or suspension of activities at the Veladero mine. The National Minister sought to appeal this decision twice in 2024, most recently seeking leave to the Federal Supreme Court on October 16, 2024. The Federal Amparo Action will continue before the Federal Court while the Federal Supreme Court considers whether to hear the appeal for an interim injunction. The Company continues to believe that the Provincial and Federal Amparo Actions are without merit and intends to continue to vigorously defend its position. BARRICK YEAR-END 2024 143 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSCivil ActionIn 2016, MAS was served notice of a civil action filed before the San Juan Provincial Court by certain persons allegedly living in Jachal, San Juan Province, claiming to be affected by the Veladero mine and, in particular, the VLF. The plaintiffs requested a court order that MAS cease leaching metals with cyanide solutions, mercury and other similar substances at the mine and replace that process with one that is free of hazardous substances, implement a closure and remediation plan for the VLF and surrounding areas, and create a committee to monitor this process. These claims were supplemented by new allegations that the risk of environmental damage had increased as a result of the March 2017 incident. MAS replied to the lawsuit in February 2017, responded to the supplemental claim and intends to continue defending this matter vigorously. Legacy Philippines Matters In 2009, Barrick Gold Inc. and Placer Dome Inc. (â€œPlacer Domeâ€), which was acquired by the Company in 2006, were purportedly served in Ontario with a complaint filed in November 2008 in the Regional Trial Court of Boac on the Philippine island of Marinduque, on behalf of two named individuals and purportedly on behalf of the approximately 200,000 residents of Marinduque. The complaint alleges injury to the economy and the ecology of Marinduque as a result of the discharge of mine tailings from the Marcopper mine into Calancan Bay, the Boac River, and the Mogpog River. Placer Dome was previously a minority indirect shareholder of Marcopper Mining Corporation (â€œMarcopperâ€). The plaintiffs are claiming for abatement of a public nuisance and nominal damages for an alleged violation of their constitutional right to a balanced and healthful ecology. By Order dated November 9, 2011, the Court granted the plaintiffsâ€™ motion to suspend the proceedings.On December 5, 2024, the Court issued an Order directing the Plaintiffs to advise, within 10 days of receipt of the Order, whether they intend to pursue the case. The Order also stated that failure by the Plaintiffs to do so would warrant dismissal of the case with prejudice. It is unclear whether or when the Plaintiffs received a copy of the Order. On February 25, 2011, a Petition for the Issuance of a Writ of Kalikasan with Prayer for Temporary Environmental Protection Order was filed in the Supreme Court of the Republic of the Philippines by Eliza M. Hernandez, Mamerto M. Lanete and Godofredo L. Manoy against Placer Dome and the Company (the â€œPetitionâ€). The Petition alleges that Placer Dome violated the Petitioners' constitutional right to a balanced and healthful ecology as a result of, amongst other things, the discharge of tailings into Calancan Bay, a dam breach in 1993, and a tailings spill in 1996. The Petition was subsequently transferred to the Court of Appeals. The Petitioners are seeking orders requiring Barrick to environmentally remediate the areas in and around the mine site that are alleged to have sustained environmental impacts. On January 21, 2021, the Court of Appeals granted an Intervention Motion introduced by the Province of Marinduque (the â€œProvinceâ€) and admitted the Provinceâ€™s Petition-in-Intervention. In the Petition-in-Intervention, the Province seeks to expand the scope of relief sought within the Writ of Kalikasan to include claims seeking rehabilitation and remediation of alleged maintenance and structural integrity issues supposedly associated with Marcopper mine infrastructure.In October 2022, the Court granted the Companyâ€™s motion requesting court-ordered mediation between the parties and the proceeding has been suspended ever since. If these matters are reactivated, the Company intends to defend the actions vigorously. No amounts have been recorded for any potential liability arising from these matters, as the Company cannot reasonably predict the outcome. North Mara â€“ Ontario LitigationOn November 23, 2022, an action was commenced against the Company in the Ontario Superior Court of Justice in respect of alleged security-related incidents in the vicinity of the North Mara Gold Mine in Tanzania. The named plaintiffs purport to have been injured, or to be the dependents of individuals who were allegedly killed, by members of the Tanzanian Police Force. The Statement of Claim asserts that Barrick Gold Corporation is legally responsible for the actions of the Tanzanian Police Force, and that the Company is liable for an unspecified amount of damages. Â Â Â Â In February 2024, an additional action was commenced against the Company in the Ontario Superior Court of Justice on behalf of different named plaintiffs in respect of alleged security-related incidents said to have occurred in the vicinity of the North Mara Gold Mine. The Statement of Claim in the second action is substantially similar to the Statement of Claim issued in November 2022. The Company believes that the allegations in both claims are without merit, including because the Tanzanian Police Force is a sovereign police force that operates under its own chain of command. On November 26, 2024, the court granted Barrickâ€™s motion to dismiss both actions on the grounds that the Ontario Superior Court of Justice lacks jurisdiction and that Tanzania is a more appropriate forum in which to litigate this matter. On December 27, 2024, the plaintiffsâ€™ appealed this decision to the Ontario Court of Appeal. The hearing of this appeal has not yet been scheduled.Loulo-Gounkoto Mining Conventions DisputeIn 2023, the Government of Mali adopted Law No. 2023-040, establishing the Mining Code in the Republic of Mali (the "2023 Mining Code") and initiated a review process of existing mining conventions, including the mining conventions of SociÃ©tÃ© des Mines de Loulo SA (â€œSomiloâ€) and SociÃ©tÃ© des Mines de Gounkoto (â€œGounkotoâ€) (together, the â€œConventionsâ€). As part of this process, the Government of Mali demanded that the mines become subject to the 2023 Mining Code, in direct violation of the stability rights contained in the Conventions. Beginning in 2023, the Government of Mali initiated several fiscal and customs proceedings against Somilo and Gounkoto, demanding payment of various charges, taxes, duties, and other amounts (including approximately $417Â million in recoverable VAT charges as previously disclosed) from which they are exempt. Barrick continued its engagement with the Government of Mali to find a global settlement and in October 2024, Barrick made a payment of CFA 50Â billion ($84Â million) to advance those negotiations (which was expensed in Q4 2024). Despite the Companyâ€™s efforts, in November 2024, Somilo and BARRICK YEAR-END 2024 144 NOTES TO FINANCIAL STATEMENTS OVERVIEW OPERATING PERFORMANCE GROWTH PROJECTS & EXPLORATION REVIEW OF FINANCIAL RESULTS OTHER INFORMATION & NON-GAAP RECONCILIATIONS MINERAL RESERVES AND MINERAL RESOURCES FINANCIAL STATEMENTSGounkoto were restricted from exporting gold from Mali, also in violation of the Conventions.On December 18, 2024, after multiple good faith attempts to resolve the dispute, Somilo and Gounkoto submitted a request for arbitration to the International Centre for the

Settlement of Investment Disputes (ICSID) in accordance with the provisions of their respective Conventions. Among other things, Somilo and Gounkoto request that the arbitral panel declare that the Conventions are binding and are not subject to any legislative or regulatory changes under Malian law enacted after the entry into force of said Conventions. On January 2, 2025, an interim attachment order was issued by the Senior Investigating Judges of the PÃ´le National Ã‰conomique et Financier (â€œPÃ´le Ã‰conomiqueâ€) against the existing gold stock on the site of the Loulo-Gounkoto mining complex, which was executed on January 11, 2025 when the gold was removed from the site to a custodial bank. This further disrupted normal operations and put gold exports at risk in violation of the Conventions (see â€“ Abuse of Criminal Proceedings below).On January 14, 2025, due to the restrictions imposed by the Government of Mali on gold shipments, the Company announced that the Loulo-Gounkoto complex would temporarily suspend operations. We remain in discussions with the Government of Mali to find an acceptable resolution to these disputes, while the Company continues to vigorously enforce Somiloâ€™s and Gounkotoâ€™s rights through the ICSID arbitration process. No amounts have been recorded for any potential liability arising from these matters as the Company cannot reasonably predict the outcome of the Conventions dispute. Abuse of Criminal ProceedingsThe Government of Mali has initiated meritless criminal proceedings against the Company, its Malian subsidiaries, their officers and directors, and several individual employees, alleging violations of exchange control regulations and threatening billions of dollars in fines and up to five years imprisonment for the individuals. On September 24, 2024, employees of Somilo and Gounkoto were summoned to appear at the PÃ´le Ã‰conomique for interviews. When these employees appeared, five of them were illegally detained and held unlawfully in police custody for six days.On November 25, 2024, the employees were again summoned to appear before the Investigating Judge at the PÃ´le Ã‰conomique. At the end of the hearing, four employees were charged and incarcerated at the Central Prison of Bamako pending trial. These employees remain imprisoned unjustifiably. On December 4, 2024, the Government of Mali caused an illegitimate arrest warrant to be issued against Barrickâ€™s President and Chief Executive Officer, Mark Bristow, alleging money laundering and violations of exchange control regulations. As with all of the previous allegations made by the Government of Mali on these matters, there is no merit whatsoever to the claims outlined in the arrest warrant.The Company is vigorously defending its rights and the rights of its Malian subsidiaries, and the impacted employees against these claims. No amounts have been recorded for any potential liability arising from the criminal proceedings as the allegations are wholly without merit. ZaldÃvar Chilean Tax Assessment On August 28, 2019, Barrick's Chilean subsidiary that holds the Company's interest in the ZaldÃvar mine, CompaÃ±Ãa Minera ZaldÃvar Limitada ("CMZ"), received notice of a tax assessment from the Chilean Internal Revenue Service ("Chilean IRS") amounting to approximately $1Â billion in outstanding taxes, including interest and penalties (subsequently reduced to $678Â million) (the "2015 Tax Assessment"). In April 2020, the Chilean IRS initiated an audit of CMZ for 2016 relating to the same claims included in the 2015 Tax Assessment. This audit resulted in a new tax assessment against CMZ (the â€œ2016 Tax Assessmentâ€). In September 2020, the Tax Court of Coquimbo approved CMZ's request to consolidate its challenges to the 2015 and 2016 Tax Assessments (collectively, the â€œZaldÃvar Tax Assessmentsâ€) into a single proceeding.In September 2024, CMZ and the Chilean IRS jointly filed two applications with the Chilean Judiciary to seek approval to settle the ZaldÃvar Tax Assessments and related claims. The Company recorded an estimated amount for the potential liability arising from these matters in June 2024 and the Courts approved the settlement proposals in September 2024. On November 20, 2024, the Company settled all claims and paid the agreed settlement amount through a combination of cash and the write-off of certain tax receivables. This matter is now closed. ZaldÃvar Water ClaimsOn March 30, 2022, the State Defense Council ("CDE"), an entity that represents the interests of the Chilean state, filed a lawsuit in the Environmental Court of Antofagasta against CompaÃ±Ãa Minera ZaldÃvar SpA (â€œCMZ SpAâ€), the joint venture company that operates the ZaldÃvar mine, and two other companies with mining operations that utilize water from a shared aquifer (Minera Escondida Ltda. and Albermarle Ltda.). The CDE claims that the extraction of groundwater by these companies since 2005 has caused environmental damage to the surrounding area. The CDEâ€™s lawsuit seeks to require the companies to conduct a series of studies and undertake certain actions to protect and repair the alleged environmental damage in the area, and to cease extracting water from the aquifer.On October 24, 2024, a joint settlement proposal was filed with the Court. On December 16, 2024, the Court approved the joint settlement proposal.On January 16, 2025, a member of a local indigenous community filed a constitutional action challenging the settlement. The Court of Appeals of Antofagasta rejected this challenge on January 17, 2025, and the Supreme Court subsequently rejected an appeal from that ruling. The matter is now closed. All statements, other than statements of historical fact, are forward-looking statements. The words â€œbelieveâ€, â€œexpectâ€, â€œanticipatedâ€, â€œvisionâ€, â€œaimâ€, â€œstrategyâ€, â€œtargetâ€, â€œplanâ€, â€œramp-upâ€; â€œopportunitiesâ€, â€œguidanceâ€, â€œforecastâ€, â€œoutlookâ€, â€œobjectiveâ€, â€œintendâ€, â€œprojectâ€, â€œpursueâ€, â€œdevelopâ€, â€œprogressâ€, â€œcontinueâ€, â€œcommittedâ€, â€œbudgetâ€, â€œestimateâ€, â€œpotentialâ€, â€œprospectiveâ€, â€œfutureâ€, â€œfocusâ€, â€œongoingâ€, â€œfollowingâ€, â€œsubject toâ€, â€œscheduledâ€, â€œmayâ€, â€œwillâ€, â€œcanâ€, â€œcouldâ€, â€œwouldâ€, â€œshouldâ€ and similar expressions identify forward-looking statements. In particular, this MD&A contains forward-looking statements including, without limitation, with respect to: Barrickâ€™s forward-looking production guidance; estimates of future cost of sales per ounce for gold and per pound for copper, total cash costs per ounce and C1 cash costs per pound, and all-in-sustaining costs per ounce/pound; cash flow forecasts; projected capital, operating and exploration expenditures; the share buyback program and performance dividend policy, including the criteria for dividend payments; mine life and production rates; projected capital estimates and anticipated development timelines related to the Goldrush Project; our plans, timelines, and expected completion and benefits of our growth projects, including the Goldrush Project, Fourmile, Ren, Donlin Gold, Pueblo Viejo Expansion project, Veladero Phase 7 and Phase 8 Leach Pads, Reko Diq Project, solar power projects at NGM, Loulo-Gounkoto and Kibali, and the Jabal Sayid Lode 1 project and the Lumwana Super Pit Expansion; anticipated production at Goldrush, Ren and Reko Diq; the potential for Lumwana to extend its life of mine through the development of the Super Pit and targeted first production; timing for the advancement of early works, project financing, a final investment decision and first production at Reko Diq; the resumption of operations at Loulo-Gounkoto; the status of negotiations with the Government of Mali in respect of ongoing disputes regarding the Loulo-Gounkoto Complex, including the status of the gold stock removed from site and the outcome of dispute resolution through arbitration; capital expenditures related to upgrades and ongoing management initiatives; Barrickâ€™s global exploration strategy and planned exploration activities; our pipeline of high confidence projects at or near existing operations; potential mineralization and metal or mineral recoveries; our ability to convert resources into reserves and future reserve replacement; asset sales, joint ventures and partnerships; Barrickâ€™s strategy, plans, targets and goals in respect of environmental and social governance issues, including climate change, GHG reduction targets (including with respect to our Scope 3 emissions and our reliance on our value chain to help us achieve these targets within the specified time frames), safety performance, TSF management, including Barrickâ€™s conformance with the GISTM, community development, responsible water use, biodiversity and human rights initiatives; Barrickâ€™s engagement with local communities; and expectations regarding future price assumptions, financial performance and other outlook or guidance. Forward-looking statements are necessarily based upon a number of estimates and assumptions including material estimates and assumptions related to the factors set forth below that, while considered reasonable by the Company as at the date of this MD&A in light of managementâ€™s experience and perception of current conditions and expected developments, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements and undue reliance should not be placed on such statements and information. Such factors include, but are not limited to: BARRICK YEAR-END 2024 146 fluctuations in the spot and forward price of gold, copper or certain other commodities (such as silver, diesel fuel, natural gas and electricity); risks associated with projects in the early stages of evaluation and for which additional engineering and other analysis is required; risks related to the possibility that future exploration results will not be consistent with the Companyâ€™s expectations, that quantities or grades of reserves will be diminished, and that resources may not be converted to reserves; risks associated with the fact that certain of the initiatives described in this MD&A are still in the early stages and may not materialize; changes in mineral production performance, exploitation and exploration successes; risks that exploration data may be incomplete and considerable additional work may be required to complete further evaluation, including but not limited to drilling, engineering and socioeconomic studies and investment; the speculative nature of mineral exploration and development; lack of certainty with respect to foreign legal systems, corruption and other factors that are inconsistent with the rule of law; changes in national and local government legislation, taxation, controls or regulations and/or changes in the administration of laws, policies and practices, including the status of VAT refunds received in Chile in connection with the Pascua-Lama project; expropriation or nationalization of property and political or economic developments in Canada, the United States, Mali or other countries in which Barrick does or may carry on business in the future; risks relating to political instability in certain of the jurisdictions in which Barrick operates; timing of receipt of, or failure to comply with, necessary permits and approvals; non-renewal of key licenses by governmental authorities; failure to comply with environmental and health and safety laws and regulations; increased costs and physical and transition risks related to climate change, including extreme weather events, resource shortages, emerging policies and increased regulations related to GHG emission levels, energy efficiency and reporting of risks; the Companyâ€™s ability to achieve its sustainability goals, including its climate-related goals and GHG emissions reduction targets, in particular its ability to achieve its Scope 3 emissions targets which require reliance on entities within Barrickâ€™s value chain, but outside of the Companyâ€™s direct control, to achieve such targets within the specified time frames; contests over title to properties, particularly title to undeveloped properties, or over access to water, power and other required infrastructure; the liability associated with risks and hazards in the mining industry, and the ability to maintain insurance to cover such losses; damage to the Companyâ€™s reputation due to the actual or perceived occurrence of any number of events, including negative publicity with respect to the Companyâ€™s handling of environmental matters or dealings with community groups, whether true or not; risks related to operations near communities that may regard Barrickâ€™s operations as being detrimental to them; litigation and legal and administrative proceedings; operating or technical difficulties in connection with mining or development activities, including geotechnical challenges, tailings dam and storage facilities failures, and disruptions in the maintenance or provision of required infrastructure and information technology systems; increased costs, delays, suspensions and technical challenges associated with the construction of capital projects; risks associated with working with partners in jointly controlled assets; risks related to disruption of supply routes which may cause delays in construction and mining activities, including disruptions in the supply of key mining inputs due to the invasion of Ukraine by Russia and conflicts in the Middle East; risk of loss due to acts of war, terrorism, sabotage and civil disturbances; risks associated with artisanal and illegal mining; risks associated with Barrickâ€™s infrastructure, information technology systems and the implementation of Barrickâ€™s technological initiatives, including risks related to cybersecurity incidents, including those caused by computer viruses, malware, ransomware and other cyberattacks, or similar information technology system failures, delays and/or disruptions; the impact of global liquidity and credit availability on the timing of cash flows and the values of assets and liabilities based on projected future cash flows; the impact of inflation, including global inflationary pressures driven by ongoing global supply chain disruptions, global energy cost increases following the invasion of Ukraine by Russia and country-specific political and economic factors in Argentina; adverse changes in our credit ratings; fluctuations in the currency markets; changes in U.S. dollar interest rates; risks arising from holding derivative instruments (such as credit risk, market liquidity risk and mark-to-market risk); risks related to the demands placed on the Companyâ€™s management, the ability of management to implement its business strategy and enhanced political risk in certain jurisdictions; uncertainty whether some or all of Barrick's targeted investments and projects will meet the Companyâ€™s capital allocation objectives and internal hurdle rate; whether benefits expected from recent transactions are realized; business opportunities that may be presented to, or pursued by, the Company; our ability to successfully integrate acquisitions or complete divestitures; risks related to competition in the mining industry; employee relations including loss of key employees; availability and increased costs associated with mining inputs and labor; risks associated with diseases, epidemics and pandemics; risks related to the failure of internal controls; and risks related to the impairment of the Companyâ€™s goodwill and assets. In addition, there are risks and hazards associated with the business of mineral exploration, development and mining, including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, flooding and gold bullion, copper cathode or gold or copper concentrate losses (and the risk of inadequate insurance, or inability to obtain insurance, to cover these risks).Many of these uncertainties and contingencies can affect our actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, us. Readers are cautioned that forward-looking statements are not guarantees of future performance. All of the forward-looking statements made in this MD&A are qualified by these cautionary statements. Specific reference is made to the most recent Form 40-F/Annual Information Form on file with the SEC and Canadian provincial securities regulatory authorities for a more detailed discussion of some of the factors underlying forward-looking statements and the risks that may affect Barrickâ€™s ability to achieve the expectations set forth in the forward-looking statements contained in this MD&A. We disclaim any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable law. CORPORATE INFORMATION 12 Months Ended

Dec. 31, 2024

Corporate Information [Abstract] Corporate Information

Corporate InformationWe have ownership interests in producing gold mines that are located in Argentina, Canada, Côte d'Ivoire, the Democratic Republic of Congo, the Dominican Republic, Papua New Guinea, Tanzania and the United States. Our mine in Mali was placed on temporary suspension in January 2025. We have ownership interests in producing copper mines in Chile, Saudi Arabia and Zambia. We also have various projects located throughout the Americas, Asia and Africa.

Barrick Gold Corporation ("Barrick", "we" or the "Company") is a corporation governed by the Business Corporations Act (British Columbia). The Company's corporate office is located at Brookfield Place, TD Canada Trust Tower, 161 Bay Street, Suite 3700, Toronto, Ontario, M5J 2S1. The Company's registered office is 925 West Georgia Street, Suite 1600, Vancouver, British Columbia, V6C 3L2. Barrick shares trade on the New York Stock Exchange under the symbol GOLD and the Toronto Stock Exchange under the symbol ABX. We are principally engaged in the production and sale of gold and copper, as well as related activities such as exploration and mine development. We sell our gold and copper into the world market.

MATERIAL ACCOUNTING POLICY INFORMATION12 Months Ended

Dec. 31, 2024

Material accounting policy information [Abstract] Material Accounting Policy InformationNo standards have been early adopted in the current period.n Material Accounting Policy Information

a) Statement of Compliance

These consolidated financial statements have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IFRS"). Accounting policies are consistently applied to all years presented, unless otherwise stated. These consolidated financial statements were approved for issuance by the Board of Directors on February 11, 2025.

b) Basis of Preparation

These consolidated financial statements include the accounts of Barrick, its subsidiaries, its share of joint operations ("JO") and its equity share of joint ventures ("JV"). When applying the equity method of accounting, specifically for Porgera, whereby the economic interest differs from the shareholding, the equity accounting is based on the economic share contractually agreed among the shareholders rather than the equity participation. For non-wholly-owned, controlled subsidiaries, profit or loss for the period that is attributable to non-controlling interests is typically calculated based on the ownership of the minority shareholders in the subsidiary.

Outlined below is information related to our joint arrangements and entities other than 100% owned Barrick subsidiaries at December 31, 2024:

	Place of business	Entity type	Interest[1]	Method
Nevada Gold Mines[2]	United States	Subsidiary	61.5%	Consolidation
North Mara[3]	Tanzania	Subsidiary	84%	Consolidation
Bulyanhulu[3]	Tanzania	Subsidiary	84%	Consolidation
Loulo-Gounkoto[4]	Mali	Subsidiary	80%	Consolidation
Tongon[4]	Côte d'Ivoire	Subsidiary	89.7%	Consolidation
Pueblo Viejo[5]	Dominican Republic	Subsidiary	60%	Consolidation
Reko Diq Project	Pakistan	Subsidiary	50%	Consolidation
Norte Abierto Project	Chile	JO	50%	Our share
Donlin Gold Project	United States	JO	50%	Our share
Veladero	Argentina	JO	50%	Our share
Kibali	Democratic Republic of Congo	JV	45%	Equity Method
Jabal Sayid[6]	Saudi Arabia	JV	50%	Equity Method
Zaldívar[6]	Chile	JV	50%	Equity Method
Porgera Mine[7]	Papua New Guinea	JV	24.5%	Equity Method

1 Unless otherwise noted, all of our JOs are funded by contributions made by the parties sharing joint control in proportion to their economic interest.

2 For our JOs, we recognize our share of any assets, liabilities, revenues and expenses of the JO.

3 We consolidate our interests in Carlin, Cortez, Turquoise Ridge, Phoenix, Long Canyon, North Mara, Bulyanhulu, Loulo-Gounkoto, Tongon, Pueblo Viejo and the Reko Diq project and record a non-controlling interest for the interest that we do not own.

4 The Government of Tanzania receives half of the economic benefits from the Tanzanian operations (Bulyanhulu and North Mara) from taxes, royalties, clearing fees and participation in all cash distributions made by the mines, after the recoupment of capital investments. Earnings are recorded proportionally based on our equity interests each period in accordance with the terms of the agreement with the Government of Tanzania.

5 Barrick has commitments of $541 million relating to its interest in the joint ventures, including purchase obligations disclosed in note 17 and capital commitments disclosed in note 19.

6 On December 22, 2022, we completed the Porgera Project Commencement Agreement, pursuant to which the Papua New Guinea ("PNG") government and Barrick Niugini Limited ("BNL"), the 95% owner and operator of the Porgera joint venture, agreed on a partnership for the future ownership and operation of the mine. Ownership of Porgera is held in a joint venture owned 51% by PNG stakeholders and 49% by a Barrick affiliate, Porgera (Jersey) Limited ("PJL"). PJL is jointly owned on a 50/50 basis by Barrick and Zijin Mining Group and therefore Barrick holds a 24.5% ownership interest in the Porgera joint venture. Barrick holds a 23.5% interest in the economic benefits of the mine under the economic benefit sharing arrangement agreed with the PNG government whereby Barrick and Zijin Mining Group together share 47% of the overall economic benefits derived from the mine accumulated over time, and the PNG stakeholders share the remaining 53%. Refer to notes 4 for further details.

c) Business Combinations

On the acquisition of a business, the acquisition method of accounting is used.

d) Foreign Currency Translation

The functional currency of all of our operations is the US dollar. We translate non-US dollar balances for these operations into US dollars as follows:

- Property, plant and equipment ("PP&E"), intangible assets and equity method investments using the rates at the time of acquisition;
- Fair value through other comprehensive income ("FVOCI") equity investments using the closing exchange rate as at the balance sheet date with translation gains and losses permanently recorded in Other Comprehensive Income ("OCI");
- Deferred tax assets and liabilities using the closing exchange rate as at the balance sheet date with translation gains and losses recorded in income tax expense;
- Other assets and liabilities using the closing exchange rate as at the balance sheet date with translation gains and losses recorded in other income/expense; and
- Income and expenses using the average exchange rate for the period, except for expenses that relate to non-monetary assets and liabilities measured at historical rates, which are translated using the same historical rate as the associated non-monetary assets and liabilities.

e) Revenue Recognition

We sell our production in the world market through the following distribution channels: gold bullion is sold in the gold spot market, to independent refineries or to our non-controlling interest holders; and gold and copper concentrate is sold to independent smelting or trading companies.

Gold Bullion Sales

Gold bullion is sold primarily in the London spot market. The sale price is fixed on the date of sale based on the gold spot price. Generally, we record revenue from gold bullion sales at the time of physical delivery, which is also the date that title to the gold passes.

Concentrate Sales

Under the terms of concentrate sales contracts with independent smelting companies, gold and copper sales prices are provisionally set on a specified future date after shipment based on market prices. We record revenues under these contracts at the time of shipment, which is also when the risks and rewards of ownership pass to the smelting companies, using forward market gold and copper prices on the expected date that final sales prices will be determined. Variations between the price recorded at the shipment date and the actual final price set under the smelting contracts are caused by changes in market gold and copper prices, which result in an embedded derivative in accounts receivable. The embedded derivative is recorded at fair value each period until final settlement occurs, with changes in fair value classified as provisional price adjustments and included in revenue in the consolidated statement of income and presented separately in note 6 of these consolidated financial statements.

Streaming Arrangements

As the deferred revenue on streaming arrangements is considered variable consideration, an adjustment is made to the transaction price per unit each time there is a change in the underlying production profile of a mine (typically in Q4 of each year). The change in the transaction price per unit results in a cumulative catch-up adjustment to revenue in the period in which the change is made, reflecting the new production profile expected to be delivered under the streaming agreement. A corresponding cumulative catch-up adjustment is made to accretion expense, reflecting the impact of the change in the deferred revenue balance.

f) Exploration and Evaluation

Exploration expenditures are the costs incurred in the initial search for mineral deposits with economic potential or in the process of obtaining more information about existing mineral deposits. Exploration expenditures typically include costs associated with prospecting, sampling, mapping, diamond drilling and other work involved in searching for ore.

Evaluation expenditures are the costs incurred to establish the technical and commercial viability of developing mineral deposits identified through exploration activities or by acquisition. Evaluation expenditures include the cost of: (i) establishing the volume and grade of deposits through drilling of core samples, trenching and sampling activities in an ore body that is classified as either a mineral resource or a proven and probable reserve; (ii) determining the optimal methods of extraction and metallurgical and treatment processes; (iii) studies related to surveying, transportation and infrastructure requirements; (iv) permitting activities; and (v) economic evaluations to determine whether development of the mineralized material is commercially justified, including scoping, pre-feasibility and final feasibility studies.

Exploration and evaluation expenditures are expensed as incurred unless management determines that probable future economic benefits will be generated as a result of the expenditures. Once the technical feasibility and commercial viability of a program or project has been demonstrated with a pre-feasibility study, and we have recognized reserves in accordance with the Canadian Securities Administrators' National Instrument 43-101 – Standards of Disclosure for Mineral Projects, we account for future expenditures incurred in the development of that program or project in accordance with our policy for Property, Plant and Equipment, as described in note 2l.

g) Production Stage

A mine that is under construction is determined to enter the production stage when the project is in the location and condition necessary for it to be capable of operating in the manner intended by management. We use the following factors to assess whether these criteria have been met: (1) the level of capital expenditures compared to construction cost estimates; (2) the completion of a reasonable period of commissioning and testing of mine plant and equipment; (3) the ability to produce minerals in saleable form (within specifications); and (4) the ability to sustain ongoing production of minerals. When a mine construction project moves into the production stage, the capitalization of certain mine construction costs ceases and costs are either capitalized to inventory or expensed, except for capitalizable costs related to property, plant and equipment additions or improvements, open pit stripping activities that provide a future benefit, underground mine development or expenditures that meet the criteria for capitalization in accordance with IAS 16 Property, Plant and Equipment.

h) Taxation

Current tax for each taxable entity is based on the local taxable income at the local statutory tax rate enacted or substantively enacted at the balance sheet date and includes adjustments to tax payable or recoverable in respect of previous periods.

Deferred tax is recognized using the balance sheet method in respect of all temporary differences between the tax bases of assets and liabilities, and their carrying amounts for financial reporting purposes, except as indicated below.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- Where the deferred income tax liability arises from the initial recognition of goodwill, or the initial recognition of an asset or liability in an acquisition that is not a business combination and, at the time of the acquisition, affects neither the accounting profit nor taxable profit or loss; and
- In respect of taxable temporary differences associated with investments in subsidiaries and interests in joint arrangements, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences and the carryforward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carryforward of unused tax assets and unused tax losses can be utilized, except:

- Where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in an acquisition that is not a business combination and, at the time of the acquisition, affects neither the accounting profit nor taxable profit or loss; and
- In respect of deductible temporary differences associated with investments in subsidiaries and interests in joint arrangements, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. To the extent that an asset not previously recognized fulfills the criteria for recognition, a deferred income tax asset is recorded.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which the asset is realized or the liability is settled, based on tax rates and tax laws enacted or substantively enacted at the balance sheet date.

Current and deferred tax relating to items recognized directly in equity are recognized in equity and not in the income statement.

The Company is subject to assessments by various taxation authorities, who may interpret tax legislation differently than the Company. Tax liabilities for uncertain tax positions are adjusted by the Company to reflect its best estimate of the probable outcome of assessments and in light of changing facts and circumstances, such as the completion of a tax audit, expiration of a statute of limitations, the refinement of an estimate, and interest accruals associated with the uncertain tax positions until they are resolved. Some of these adjustments require significant judgment in estimating the timing and amount of any additional tax expense.

Royalties and Special Mining Taxes

Income tax expense includes the cost of royalties and special mining taxes payable to governments that are calculated based on a percentage of taxable profit whereby taxable profit represents net income adjusted for certain items defined in the applicable legislation.

Indirect Taxes

Indirect tax recoverable is recorded at its undiscounted amount, and is disclosed as non-current if not expected to be recovered within twelve months.

i) Other Investments

Investments in publicly quoted equity securities that are neither subsidiaries nor associates are categorized as FVOCI pursuant to the irrevocable election available in IFRS 9 for these instruments. FVOCI equity investments are recorded at fair value with all realized and unrealized gains and losses recorded permanently in OCI. Warrant investments are classified as fair value through profit or loss ("FVPL").

j) Inventory

Material extracted from our mines is classified as either ore or waste. Ore represents material that, at the time of extraction, we expect to process into a saleable form and sell at a profit. Raw materials are comprised of both ore in stockpiles and ore on leach pads as processing is required to extract benefit from the ore. Ore is accumulated in stockpiles that are subsequently processed into gold/copper in a saleable form. The recovery of gold and copper from certain oxide ores is achieved through the heap leaching process. Work in process represents gold/copper in the processing circuit that has not completed the production process, and is not yet in a saleable form. Finished goods inventory represents gold/copper in saleable form. Metal inventories are valued at the lower of cost and net realizable value. Cost is determined on a weighted average basis and includes all costs incurred, based on a normal production capacity, in bringing each product to its present location and condition. Cost of inventories comprises: direct labor, materials and contractor expenses, including non-capitalized stripping costs; depreciation on PP&E including capitalized stripping costs; and an allocation of general and administrative costs. As ore is removed for processing, costs are removed based on the average cost per ounce/pound in the stockpile. Net realizable value is determined with reference to relevant market prices less applicable variable selling and downstream processing costs. Inventory provisions are reversed to reflect subsequent improvements in net realizable value where the inventory is still on hand.

Mine operating supplies represent commodity consumables and other raw materials used in the production process, as well as spare parts and other maintenance supplies that are not classified as capital items. Provisions are recorded to reduce mine operating supplies to net realizable value, which is generally calculated by reference to its salvage or scrap value, when it is determined that the supplies are obsolete.

k) Royalties

Certain of our properties are subject to royalty arrangements based on mineral production at the properties. The primary type of royalty is a net smelter return ("NSR") royalty. Under this type of royalty we pay the holder an amount calculated as the royalty percentage multiplied by the value of gold production at market gold prices less third-party smelting, refining and transportation costs. Royalty expense is recorded on completion of the production or sales process in cost of sales. Other types of royalties include:

- Net profits interest royalty to a party other than a government,
- Modified NSR royalty,
- Net smelter return sliding scale royalty,
- Gross proceeds sliding scale royalty,
- Gross smelter return royalty,
- Net value royalty,
- Land tenement royalty, and a
- Gold revenue royalty.

l) Property, Plant and Equipment

Estimated Useful Lives of Major Asset Categories

	Buildings, plant and equipment
1 - 39 years	Underground mobile equipment
3 - 7 years	Light vehicles and other mobile equipment
1 - 7 years	Furniture, computer and office equipment
1 - 7 years	

Buildings, Plant and Equipment

At acquisition, we record buildings, plant and equipment at cost, including all expenditures incurred to prepare an asset for its intended use. These expenditures consist of: the purchase price; brokers' commissions; and installation costs including architectural, design and engineering fees, legal fees, survey costs, site preparation costs, freight charges, transportation insurance costs, duties, testing and preparation charges.
Buildings, plant and equipment are depreciated on a straight-line basis over their expected useful life, which commences when the assets are considered available for use. Once buildings, plant and equipment are considered available for use, they are measured at cost less accumulated depreciation and applicable impairment losses.
Depreciation on equipment utilized in the development of assets, including open pit and underground mine development, is recapitalized as development costs attributable to the related asset.

Mineral Properties

Mineral properties consist of: the fair value attributable to mineral reserves and resources acquired in a business combination or asset acquisition; underground mine development costs; open pit mine development costs; capitalized exploration and evaluation costs; and capitalized interest. In addition, we incur project costs which are generally capitalized when the expenditures result in a future benefit.

i) Acquired Mining Properties

On acquisition of a mining property, we prepare an estimate of the fair value attributable to the proven and probable mineral reserves, mineral resources and exploration potential attributable to the property. The estimated fair value attributable to the mineral reserves and the portion of mineral resources considered to be probable of economic extraction at the time of the acquisition is depreciated on a units of production ("UOP") basis whereby the denominator is the proven and probable reserves and the portion of mineral resources considered to be probable of economic extraction based on the current life of mine ("LOM") plan that benefit from the development and are considered probable of economic extraction. The estimated fair value attributable to mineral resources that are not considered to be probable of economic extraction at the time of the acquisition is not subject to depreciation until the resources become probable of economic extraction in the future. The estimated fair value attributable to exploration licenses is recorded as an intangible asset and is not subject to depreciation until the property enters production.

ii) Underground Mine Development Costs

At our underground mines, we incur development costs to build new shafts, drifts and ramps that will enable us to physically access ore underground. The time over which we will continue to incur these costs depends on the mine life. These underground development costs are capitalized as incurred.
Capitalized underground development costs are depreciated on a UOP basis, whereby the denominator is the estimated ounces/pounds of gold/copper in proven and probable reserves and the portion of resources considered probable of economic extraction based on the current LOM plan that benefit from the development and are considered probable of economic extraction.

iii) Open Pit Mine Development Costs

In open pit mining operations, it is necessary to remove overburden and other waste materials to access ore from which minerals can be extracted economically. The process of mining overburden and waste materials is referred to as stripping. Stripping costs incurred in order to provide initial access to the ore body (referred to as pre-production stripping) are capitalized as open pit mine development costs.
Pre-production stripping costs are capitalized until an "other than de minimis" level of mineral is extracted, after which time such costs are either capitalized to inventory or, if it qualifies as an open pit stripping activity that provides a future benefit, to PP&E. We consider various relevant criteria to assess when an "other than de minimis" level of mineral is produced. Some of the criteria considered would include, but are not limited to, the following: (1) the amount of minerals mined versus total ounces in ore expected over the LOM; (2) the amount of ore tonnes mined versus total LOM expected ore tonnes mined; (3) the current stripping ratio versus the strip ratio expected over the LOM; and (4) the ore grade mined versus the grade expected over the LOM.
Stripping costs incurred during the production stage of an open pit are accounted for as costs of the inventory produced during the period that the stripping costs are incurred, unless these costs are expected to provide a future economic benefit to an identifiable component of the ore body. Components of the ore body are based on the distinct development phases identified by the mine planning engineers when determining the optimal development plan for the open pit. Production phase stripping costs generate a future economic benefit when the related stripping activity: (1) improves access to a component of the ore body to be mined in the future; (2) increases the fair value of the mine (or open pit) as access to future mineral reserves becomes less costly; and (3) increases the productive capacity or extends the productive life of the mine (or open pit). Production phase stripping costs that are expected to generate a future economic benefit are capitalized as open pit mine development costs.
Capitalized open pit mine development costs are depreciated on a UOP basis whereby the denominator is the estimated ounces/pounds of gold/copper in proven and probable reserves and the portion of resources considered probable of economic extraction based on the current LOM plan that benefit from the development and are considered probable of economic extraction.

Construction in Progress

Assets under construction are capitalized as construction-in-progress until the asset is available for its intended use. The cost of construction-in-progress comprises its purchase price and any costs directly attributable to bringing it into working condition for its intended use. Construction-in-progress amounts related to development projects are included in the carrying amount of the development project. Construction-in-progress amounts incurred at operating mines are presented as a separate asset within PP&E. Construction-in-progress also includes deposits on long lead items. Construction-in-progress is not depreciated. Depreciation commences once the asset is complete, commissioned and available for use.

Capitalized Interest

We capitalize interest costs for qualifying assets. Qualifying assets are assets that require a significant amount of time to prepare for their intended use, including projects that are in the exploration and evaluation, development or construction stages. Qualifying assets also include significant expansion projects at our operating mines. Capitalized interest costs are considered an element of the cost of the qualifying asset which is determined based on gross expenditures incurred on an asset. Capitalization ceases when the asset is substantially complete or if active development is suspended or ceases. Where the funds used to finance a qualifying asset form part of general borrowings, the amount capitalized is calculated using a weighted average of rates applicable to the relevant borrowings during the period. Where funds borrowed are directly attributable to a qualifying asset, the amount capitalized represents the borrowing costs specific to those borrowings. Where surplus funds available out of money borrowed specifically to finance a project are temporarily invested, the total capitalized interest is reduced by income generated from short-term investments of such funds.

m) Impairment (and Reversals of Impairment) of Non-Current Assets

We review and test the carrying amounts of PP&E and intangible assets with finite lives when an indicator of impairment is considered to exist. Impairment (or reversals of impairment) assessments on PP&E and intangible assets are conducted at the level of the cash generating unit ("CGU"), which is the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and includes liabilities specific to the CGU. For operating mines and projects, the individual mine/project represents a CGU for impairment testing.
The recoverable amount of a CGU is the higher of Value in Use ("VIU") and Fair Value Less Costs of Disposal ("FVLCD"). We have determined that the FVLCD is greater than the VIU amounts and is therefore used as the recoverable amount for impairment testing purposes. An impairment loss is recognized for any excess of the carrying amount of a CGU over its recoverable amount where both the recoverable amount and carrying value include the associated other assets and liabilities, including taxes where applicable, of the CGU. Where it is not appropriate to allocate the loss to a separate asset, an impairment loss related to a CGU is allocated to the carrying amount of the assets of the CGU on a pro rata basis based on the carrying amount of its non-monetary assets.

Impairment Reversal

An assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses may no longer exist or may have decreased. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the CGU's recoverable amount since the last impairment loss was recognized. This reversal is recognized in the consolidated statements of income and is limited to the carrying value that would have been determined, net of any depreciation where applicable, had no impairment charge been recognized in prior years. When an impairment reversal is undertaken, the recoverable amount is assessed by reference to the higher of VIU and FVLCD. We have determined that the FVLCD is greater than the VIU amounts and is therefore used as the recoverable amount for impairment testing purposes.

n) Intangible Assets

On acquisition of a mineral property in the exploration stage, we prepare an estimate of the fair value attributable to mineral resources, if any, of that property. The fair value of the exploration license is recorded as an intangible asset (acquired exploration potential) as at the date of acquisition. When an exploration stage property moves into development, the acquired exploration potential attributable to that property is transferred to mining interests within PP&E.
We also have water rights associated with our mineral properties. Upon acquisition, they are measured at initial cost and are depreciated when they are being used. They are also subject to impairment testing when an indicator of impairment is considered to exist.

o) Goodwill

Goodwill is tested for impairment in Q4 and also when there is an indicator of impairment. At the date of acquisition, goodwill is assigned to the CGU or group of CGUs that is expected to benefit from the synergies of the business combination. For the purposes of impairment testing, goodwill is allocated to the Company's operating segments, which are our individual minesites, and corresponds to the level at which goodwill is internally monitored by the Chief Operating Decision Maker ("CODM"). Goodwill impairment charges are not reversible.
For a CGU to which goodwill has been allocated, the most recent recoverable amount determined for the CGU may be used in the annual impairment assessment of that CGU in the current year provided all the following criteria are met:

- the assets and liabilities making up the CGU have not changed significantly (change in book value or change in nature of assets/ liabilities in CGU) since the most recent recoverable amount calculation;
- The most recent recoverable amount calculation, completed in prior year, resulted in an amount that exceeded the carrying amount of the CGU by a substantial margin; and
- Based on an analysis of events that have occurred and circumstances that have changed since the most recent recoverable amount calculation, the likelihood that a current recoverable amount determination will be less than the carrying amount of the CGU is remote.

p) Debt

Debt is recognized initially at fair value, net of financing costs incurred, and subsequently measured at amortized cost. Any difference between the amounts originally received and the redemption value of the debt is recognized in the consolidated statements of income over the period to maturity using the effective interest method.

q) Environmental Rehabilitation Provision

Mining, extraction and processing activities normally give rise to obligations for environmental rehabilitation. Rehabilitation work can include facility decommissioning and dismantling; removal or treatment of waste materials; site and land rehabilitation, including compliance with and monitoring of environmental regulations; security and other site-related costs required to perform the rehabilitation work; and operation of equipment designed to reduce or eliminate environmental effects. The extent of work required and the associated costs are dependent on the requirements of relevant authorities and our environmental policies. Routine operating costs that may impact the ultimate closure and rehabilitation activities, such as waste material handling conducted as an integral part of a mining or production process, are not included in the provision. Abnormal costs arising from unforeseen circumstances, such as the contamination caused by unplanned discharges, are recognized as an expense and liability when the event that gives rise to an obligation occurs and reliable estimates of the required rehabilitation costs can be made.
Provisions for the cost of each rehabilitation program are normally recognized at the time that an environmental disturbance occurs or a new legal or constructive obligation is determined. When the extent of disturbance increases over the life of an operation, the provision is increased accordingly. The major parts of the carrying amount of provisions relate to closure/rehabilitation of tailings facilities, heap leach pads and waste dumps; demolition of buildings/mine facilities; ongoing water treatment; and ongoing care and maintenance and security of closed mines. Costs included in the provision encompass all closure and rehabilitation activity expected to occur progressively over the life of the operation at the time of closure and post-closure in connection with disturbances as at the reporting date. Estimated costs included in the determination of the provision reflect the risks and probabilities of alternative estimates of cash flows required to settle the obligation at each particular operation. The expected rehabilitation costs are estimated based on the cost of external contractors performing the work or the cost of performing the work internally depending on management's intention.
The timing of the actual rehabilitation expenditure is dependent upon a number of factors such as the life and nature of the asset, the operating license conditions and the environment in which the mine operates. Expenditures may occur before and after closure and can continue for an extended period of time depending on rehabilitation requirements. Rehabilitation provisions are measured at the expected value of future cash flows, which exclude the effect of inflation, discounted to their present value using a current US dollar real risk-free pre-tax discount rate. The unwinding of the discount, referred to as accretion expense, is included in finance costs and results in an increase in the amount of the provision. Provisions are updated each reporting period for changes to expected cash flows and for the effect of changes in the discount rate, and the change in estimate is added to or deducted from the related asset and depreciated over the expected economic life of the operation to which it relates.
Significant judgments and estimates are involved in forming expectations of future activities, the amount and timing of the associated cash flows and the period over which we estimate those cash flows. Those expectations are formed based on existing environmental and regulatory requirements or, if more stringent, our environmental policies which give rise to a constructive obligation.
When provisions for closure and rehabilitation are initially recognized, the corresponding cost is capitalized as an asset, representing part of the cost of acquiring the future economic benefits of the operation. The capitalized cost of closure and rehabilitation activities is recognized in PP&E and depreciated over the expected economic life of the operation to which it relates.
Adjustments to the estimated amount and timing of future closure and rehabilitation cash flows are a normal occurrence in light of the significant judgments and estimates involved. The principal factors that can cause expected cash flows to change are: the construction of new processing facilities; changes in the quantities of material in reserves and resources with a corresponding change in the life of mine plan; changing ore characteristics that impact required environmental protection measures and related costs; changes in water quality or volumes that impact the extent of water treatment required; changes in discount rates; changes in foreign exchange rates; changes in Barrick's closure policies; and changes in laws and regulations governing the protection of the environment.
Rehabilitation provisions are adjusted as a result of changes in estimates and assumptions. Those adjustments are accounted for as a change in the corresponding cost of the related assets, including the related mineral property, except where a reduction in the provision is greater than the remaining net book value of the related assets, in which case the value is reduced to nil and the remaining adjustment is recognized in the consolidated statements of income. In the case of closed sites, changes in estimates and assumptions are recognized immediately in the consolidated statements of income. For an operating mine, the adjusted carrying amount of the related asset is depreciated prospectively. Adjustments also result in changes to future finance costs. Provisions are discounted to their present value using a current US dollar real risk-free pre-tax discount rate and the accretion expense is included in finance costs.

r) Stock-Based Compensation

We recognize the expense related to these plans over the vesting period, beginning once the grant has been approved and announced to the beneficiaries.
Barrick offers cash-settled (Restricted Share Units ("RSU"), Deferred Share Units ("DSU") and Performance Granted Share Units ("PGSU")) awards to certain employees, officers and directors of the Company.

Restricted Share Units

Under our Long-Term Incentive Plan, selected employees are granted RSUs where each RSU has a value equal to one Barrick common share. RSUs generally vest within three years in cash and the after-tax value of the award may be used to purchase common shares on the open market, depending on the terms of the grant. Additional RSUs are credited to reflect dividends paid on Barrick common shares over the vesting period.
A liability for RSUs is measured at fair value on the grant date and is subsequently adjusted for changes in fair value. The liability is recognized on a straight-line basis over the vesting period, with a corresponding charge to compensation expense, as a component of general and administrative expenses and cost of sales. Compensation expenses for RSUs incorporate an estimate for expected forfeiture rates based on which the fair value is adjusted.

Deferred Share Units

Under our DSU plan, Directors must receive at least 63.6% of their basic annual retainer in the form of DSUs or cash to purchase common shares that cannot be sold, transferred or otherwise disposed of until the Director leaves the Board. Each DSU has the same value as one Barrick common share. DSUs must be retained until the Director leaves the Board, at which time the cash value of the DSUs is paid out. Additional DSUs are credited to reflect dividends paid on Barrick common shares.
The initial fair value of the liability is calculated as of the grant date and is recognized immediately. Subsequently, at each reporting date and on settlement, the liability is remeasured, with any change in fair value recorded as compensation expense in the period.

Performance Granted Share Units

Under our PGSU plan, selected employees are granted PGSUs, where each PGSU has a value equal to one Barrick common share. Annual PGSU awards are determined based on a multiple ranging from three to six times base salary (depending on position and level of responsibility) multiplied by a performance factor. PGSUs vest within years in cash, and the after-tax value of the award is used to purchase common shares on the open market. Generally, these shares cannot be sold until the employee meets their share ownership requirement (in which case only those Barrick shares in excess of the requirement can be sold), or until they retire or leave the Company. three
The initial fair value of the liability is calculated as of the grant date and is recognized within compensation expense using the straight-line method over the vesting period. Subsequently, at each reporting date and on settlement, the liability is remeasured, with any changes in fair value recorded as compensation expense.

s) New Accounting Standards Issued

Certain new accounting standards and interpretations have been published that are either applicable in the current year or not mandatory for the current period. We have assessed these standards, including Amendments to IAS 1 - Non-current Liabilities with Covenants, and determined they do not have a material impact on Barrick in the current reporting period. In addition, the following standards have been issued by the International Accounting Standards Board ("IASB") and we are currently assessing the impact on our consolidated financial statements.

- Amendments to the Classification and Measurement of Financial Instruments (IFRS 9 and IFRS 7) with mandatory application of the standard in annual reporting periods beginning on or after January 1, 2026.
- IFRS 18 Presentation and Disclosure in Financial Statements with mandatory application of the standard in annual reporting periods beginning on or after January 1, 2027.

CRITICAL JUDGMENTS, ESTIMATES, ASSUMPTIONS AND RISKS12 Months Ended

Dec. 31, 2024

Accounting judgements and estimates [Abstract] Critical Judgements, Estimates, Assumptions and Risks n Critical Judgments, Estimates, Assumptions and Risks

Many of the amounts included in the consolidated balance sheet require management to make judgments and/or estimates. These judgments and estimates are continuously evaluated and are based on management's experience and knowledge of the relevant facts and circumstances. Actual results may differ from the estimates. Information about such judgments and estimates is contained in the description of our accounting policies and/or other notes to the financial statements. The key areas where judgments, estimates and assumptions have been made are summarized below.

Life of Mine Plans and Reserves and Resources

Estimates of the quantities of proven and probable mineral reserves and mineral resources form the basis for our LOM plans, which are used for a number of important business and accounting purposes, including: the calculation of depreciation expense; the capitalization of production phase stripping costs; the current/non current classification of inventory and certain receivables; the recognition of deferred revenue related to streaming arrangements and forecasting the timing of the payments related to the environmental rehabilitation provision. In addition, the underlying LOM plans are generally used in the impairment tests for goodwill and non-current assets. In certain cases, these LOM plans have made assumptions about our ability to obtain the necessary permits required to complete the planned activities. We estimate our future production levels, including mineral reserves and resources based on information compiled by qualified persons as defined in accordance with the Canadian Securities Administrators' National Instrument 43-101 - Standards of Disclosure for Mineral Projects requirements. To calculate our gold and copper mineral reserves, as well as measured, indicated, and inferred mineral resources, we have used the following assumptions. Refer to notes 19 and 21.

As at December 31, 2023 **Gold ($/oz)** Mineral reserves $1,400 $1,300 Measured, indicated and inferred $1,900 $1,700 **Copper ($/lb)** Mineral reserves $3.00 $3.00 Measured, indicated and inferred $4.00 $4.00

Inventory

The measurement of inventory including the determination of its net realizable value, especially as it relates to ore in stockpiles and recoverable from leach pads, involves the use of estimates. Net realizable value is determined with reference to relevant market prices less applicable variable selling expenses. Estimation is also required in determining the tonnage, recoverable gold and copper contained therein, and in determining the remaining costs of completion to bring inventory into its saleable form. Judgment is also exercised in determining whether to recognize a provision for obsolescence on mine operating supplies, and estimates are required to determine salvage or scrap value of mine operating supplies. Estimates of recoverable gold or copper on the leach pads are calculated from the quantities of ore placed on the leach pads (measured tonnes added to the leach pads), the grade of ore placed on the leach pads (based on assay data) and a recovery percentage (based on ore type).

Impairment and Reversal of Impairment for Non-Current Assets and Impairment of Goodwill

Goodwill and non-current assets are tested for impairment if there is an indicator of impairment or reversal of impairment, and in the case of goodwill annually during the fourth quarter, for all of our operating segments. We consider both external and internal sources of information for indications that non-current assets and/or goodwill are impaired. External sources of information we consider include changes in the market, economic, legal and permitting environment in which the CGU operates that are not within its control and affect the recoverable amount of mining interests and goodwill. Internal sources of information we consider include the manner in which mining properties and plant and equipment are being used or are expected to be used and indications of economic performance of the assets. Calculating the FVLCD of CGUs for non-current asset and goodwill impairment tests requires management to make estimates and assumptions with respect to future production levels, operating, capital and closure costs in our LOM plans, future metal prices, foreign exchange rates, Net Asset Value ("NAV") multiples, fair value of mineral resources outside LOM plans, the market values per ounce and per pound and weighted average costs of capital ("WACC"). Changes in any of the assumptions or estimates used in determining the fair values could impact the impairment analysis. Refer to notes 2m, 2o and 21 for further information.

Provisions for Environmental Rehabilitation

Management assesses its provision for environmental rehabilitation on an annual basis or when new information becomes available. This assessment includes the estimation of the future rehabilitation costs (including water treatment), the timing of these expenditures, and the impact of changes in discount rates and foreign exchange rates. The actual future expenditures may differ from the amounts currently provided if the estimates made are significantly different than actual results or if there are significant changes in environmental and/or regulatory requirements in the future. Refer to notes 2q and 27 for further information.

Taxes

Management is required to assess uncertainties and make judgments and estimations regarding the tax basis of assets and liabilities and related deferred income tax assets and liabilities, amounts recorded for uncertain tax positions, the measurement of income tax expense and indirect taxes such as royalties and export duties, and estimates of the timing of repatriation of earnings, which would impact the recognition of withholding taxes and taxes related to the outside basis on subsidiaries/associates. While these amounts represent management's best estimate based on the laws and regulations that exist at the time of preparation, we operate in certain jurisdictions that have increased degrees of political and sovereign risk and while host governments have historically supported the development of natural resources by foreign companies, tax legislation in these jurisdictions is developing and there is a risk that fiscal reform changes with respect to existing investments could unexpectedly impact application of this tax legislation. Such changes could impact the Company's judgments about the amounts recorded for uncertain tax positions, tax basis of assets and liabilities, and related deferred income tax assets and liabilities, and estimates of the timing of repatriation of earnings. This could necessitate future adjustments to tax income and expense already recorded. A number of these estimates require management to make estimates of future taxable profit, as well as the recoverability of indirect taxes, and if actual results are significantly different than our estimates, the ability to realize the deferred tax assets and indirect tax receivables recorded on our balance sheet could be impacted. Refer to notes 2h, 12, 30 and 35 for further information.

Contingencies

Contingencies can be either possible assets or possible liabilities arising from past events which, by their nature, will only be resolved when one or more future events not wholly within our control occur or fail to occur. The assessment of such contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future events. In assessing loss contingencies related to legal proceedings that are pending against us or unasserted claims that may result in such proceedings or regulatory or government actions that may negatively impact our business or operations, the Company with assistance from its legal counsel evaluates the perceived merits of any legal proceedings or unasserted claims or actions as well as the perceived merits of the nature and amount of relief sought or expected to be sought, when determining the amount, if any, to recognize as a contingent liability or assessing the impact on the carrying value of assets. If the assessment of a contingency suggests that a loss is probable, and the amount can be reliably estimated, then a loss is recorded. When a contingent loss is not probable but is reasonably possible, or is probable but the amount of loss cannot be reliably estimated, then details of the contingent loss are disclosed. Loss contingencies considered remote are generally not disclosed unless they involve guarantees, in which case we disclose the nature of the guarantee. Contingent assets are not recognized in the consolidated financial statements. Refer to note 35 for more information.

Pascua Lama Value Added Tax

The Pascua Lama project had historically received VAT refunds in Chile under the export incentive VAT regime relating to the development of the Chilean side of the project ($472 million as at December 31, 2023). Under the export incentive VAT regime, this amount would have needed to be repaid if the project did not evidence exports for an amount of $3.53B million within a term that was due to expire on December 31, 2026, unless extended. On September 11, 2024, the Minister of Economy, Development and Tourism issued an order to terminate the export incentive VAT regime with respect to the Chilean side of the project with immediate effect. This required us to repay the VAT refunds received under the export incentive VAT regime and subsequently recover them through the normal VAT regime, both of which occurred in Q4 2024. This resolves the matter and there is no further exposure for the Company.
In addition, we have recorded $8 million in VAT recoverable in Argentina as at December 31, 2024 ($9 million as at December 31, 2023) relating to the development of the Argentinean side of the project. This balance may not be fully recoverable if the project does not enter into production and is subject to foreign currency risk as the amounts are recoverable in Argentine pesos.

Streaming Transactions

The upfront cash deposit received from Royal Gold on the gold and silver streaming transaction for production linked to Barrick's 60% interest in the Pueblo Viejo mine has been accounted for as deferred revenue since we have determined that it is not a derivative as it will be satisfied through the delivery of non-financial items (i.e., gold and silver) rather than cash or financial assets. It is our intention to settle the obligations under the streaming arrangement through our own production and if we were to fail to settle the obligations with Royal Gold through our own production, this would lead to the streaming arrangement becoming a derivative. This would cause a change to the accounting treatment, resulting in the revaluation of the fair value of the agreement through profit and loss on a recurring basis. Refer to note 29 for further details.
The deferred revenue component of our streaming agreements is considered variable and is subject to retroactive adjustment when there is a change in the timing of the delivery of ounces or in the underlying production profile of the relevant mine. The impact of such a change in the timing or quantity of ounces to be delivered under a streaming agreement will result in retroactive adjustments to both the deferred revenue recognized and the accretion recorded prior to the date of the change. Refer to note 2e. For further details on streaming transactions, including our silver sale agreement with Wheaton Precious Metals Corp. ("Wheaton"), refer to note 29.

Consolidation of Reko Diq

The Reko Diq project is 50% held by Barrick and 50% by Pakistani stakeholders, comprising a 10% free carried, non-contributing share held by the Provincial Government of Balochistan, an additional 15% held by a special purpose company owned by the Provincial Government of Balochistan and 25% owned by other federal state-owned enterprises. Pursuant to the joint venture agreement, Barrick has power over the relevant activities of the project, including operatorship of the project, the decision to proceed with development of the project, subject to a sufficient expected rate of return, as well as development and approval of LOM plans. Therefore Barrick has concluded that it controls Reko Diq and it is consolidated in Barrick's consolidated financial statements with a 50% non-controlling interest.

ACQUISITIONS AND DIVESTITURES 12 Months Ended

Dec. 31, 2024

Business combinations and discontinued operations [Abstract] Acquisitions and Divestitures

Acquisitions and DivestituresAs the conditions for the reopening of the mine were completed on December 22, 2023, in Q4 2023, we recorded the following: (a) derecognition of Barrick's 47.5% share of the assets and liabilities of the joint operation that were transferred to the new Porgera joint venture; (b) an equity method investment for Barrick's interest in the new Porgera joint venture, measured at fair value based on Barrick's share of the cash flows expected to be generated from the mine; and (c) a gain of $352 million in other income as the net result of the derecognition of the joint operation and recognition of the new Porgera joint venture. In Q4 2024, we recorded an additional gain of $7 million in other income.

a) Porgera

On April 25, 2020, the Porgera mine was put on care and maintenance after the PNG government indicated that the SML would not be extended. On April 9, 2021, the PNG government and BNL, the 95% owner and operator of the Porgera joint venture, agreed on a partnership for the future ownership and operation of the mine under a binding Framework Agreement. The Framework Agreement was replaced by the more detailed Porgera Project Commencement Agreement ("PPCA"), which reached formal completion on December 22, 2023. Under the terms of the PPCA, ownership of Porgera is held in a joint venture owned 51% by PNG stakeholders and 49% by a company, Porgera (Jersey) Limited, that is jointly owned on a 50/50 basis by Barrick and Zijin Mining Group and therefore Barrick now holds a 24.5% equity accounted for interest in the Porgera mine. BNL is the operator of the mine. Porgera was previously accounted for as a joint operation, but under the new shareholder agreements, we have concluded that Barrick will account for its interest in Porgera as a joint venture.

SEGMENT INFORMATION 12 Months Ended

Dec. 31, 2024

Operating segments [Abstract] Segment Information n Segment Information

Barrick's business is organized into sixteen minesites. Barrick's CODM (Mark Bristow, President and Chief Executive Officer) reviews the operating results, assesses performance and makes capital allocation decisions at the minesite level. Our presentation of our reportable operating segments consists of eight gold mines (Carlin, Cortez, Turquoise Ridge, Pueblo Viejo, Loulo-Gounkoto, Kibali, North Mara and Bulyanhulu) and one copper mine (Lumwana). The remaining operating segments, including our remaining gold mines, have been grouped into an "Other Mines" category and will not be reported on individually. Segment performance is evaluated based on a number of measures including operating income before tax, production levels and unit production costs. Certain costs are managed on a consolidated basis and are therefore not reflected in segment income.

Consolidated Statements of Income Information

	Cost of Sales			For the year ended December 31, 2024	Revenue	Site operating costs	royalties and community relations	Depreciation	Exploration, evaluation and project expenses	Other expenses (income)[2]	Segment income (loss)
Carlin	$2,041	$1,632	$407	$12	$11	$1,109					
Cortez	$2,728	$2,196	$532	$4	$106						
Turquoise Ridge	$1,008	$523	$485	$—	$1	$280					
Pueblo Viejo	$1,210	$536	$674	$—	$—	$416					
Loulo-Gounkoto	$1,335	$770	$565	$—	$—	$484					
Kibali	$670	$272	$398	$—	$8	$243					
Lumwana	$795	$466	$329	$—	$—	$257					
North Mara	$537	$288	$249	$—	$—	$91					
Bulyanhulu	$412	$250	$162	$—	$13	$147					
Other Mines	$1,591	$975	$616	$6	$78	$86					
Reportable segment total	$12,047	$8,145	$3,950	$89	$217	$3,438					
Share of equity investees	($670)	($272)	($147)	$—	($8)	($243)					
Segment total	$11,377	$7,873	$3,803	$89	$209	$3,195					

1 Includes accretion expense, which is included with finance costs in the consolidated statements of income. For the year ended December 31, 2024, accretion expense was $53 million ($2023: $49 million).

2 Includes non-controlling interest portion of revenues, cost of sales and segment income (loss) for the year ended December 31, 2024, for Pueblo Viejo, $578 million, $370 million, $208 million (2023: $448 million, $315 million, $130 million); Nevada Gold Mines, $2,539 million, $1,530 million, $989 million (2023: $2,329 million, $1,580 million, $724 million); North Mara and Bulyanhulu, $203 million, $111 million, $81 million (2023: $165 million, $103 million, $50 million); Loulo-Gounkoto, $269 million, $140 million, $107 million (2023: $267 million, $163 million, $99 million) and Tongon, $41 million, $32 million, $1 million (2023: $41 million, $31 million, $10 million).

Reconciliation of Segment Income to Income Before Income Taxes

	For the years ended December 31,		
	2024	2023	2022
Segment income	$4,673	$3,195	$1,109
Other revenue[1]	$20	$—	$—
Other cost of sales/amortization	($62)	($48)	($48)
Exploration, evaluation and project expenses not attributable to segments	($351)	($272)	($126)
General and administrative expenses	($115)	($126)	($111)
Other income not attributable to segments	$1	$54	$—
Impairment reversals (charges)	$53	($12)	($15)
Loss on currency translation	($9)	($9)	($6)
Closed mine rehabilitation	($5)	($16)	($20)
Income from equity investees	$41	$32	$—
Finance costs, net (includes non-segment accretion)	($179)	($121)	($49)
Gain on non-hedge derivatives	$3	$1	$—
Income before income taxes	$4,049	$2,814	$734

Geographic Information

INCOME TAX EXPENSE 12 Months Ended
Dec. 31, 2024
Income Tax [Abstract] Income Tax Expense Income Tax Expense

For the years ended December 31, 2023 Tax on profit Current tax Charge for the year $1,062 $694
Adjustment in respect of prior years 1 9 (14) $1,071 $680
Deferred tax Origination and reversal of temporary differences in the current year $478 $144
Adjustment in respect of prior years 1 (30) 37 $448 $181
Income tax expense $1,520 $861
Tax expense related to continuing operations
Current Canada $8 ($3) International $1,064 683 $1,072 $680
Deferred Canada $4 $— International 444 181 $448 $181
Income tax expense $1,520 $861

1 Includes adjustments to equalize the difference between prior year's tax return and the year-end provision.

Reconciliation to Canadian Statutory Rate For the years ended December 31, 2023
At 26.5% statutory rate $1,221 $746
Increase (decrease) due to:
Allowances and special tax deductions 1 ($211) (184)
Impact of foreign tax rates 2 32 (29)
Non-deductible expenses / (non-taxable income) 111 72
Goodwill impairment charges not tax deductible 145 —
Taxable gains on sales of non-current assets 2 6
Net currency translation losses on current and deferred tax balances 52 289
Tax impact from pass-through entities and equity accounted investments (263) (183)
Current year tax results sheltered by previously unrecognized deferred tax assets (5) (22)
Recognition and derecognition of deferred tax assets (26) (142)
Settlements and adjustments in respect of prior years 116 23
Increase to income tax related contingent liabilities 1 54
Impact of tax rate changes — (2)
Withholding taxes 70 61
Mining taxes 290 224
Tax impact of amounts recognized within accumulated OCI — (2)
Other items (1) —
Income tax expense $1,520 $861

1 We are able to claim certain allowances, incentives and tax deductions unique to extractive industries that result in a lower effective tax rate.
2 We operate in multiple foreign tax jurisdictions that have tax rates different than the Canadian statutory rate.

Currency Translation

Current and deferred tax balances are subject to remeasurement for changes in foreign currency exchange rates each period. This is required in countries where tax is paid in local currency and the subsidiary has a different functional currency (typically US dollars). The most significant relate to Argentine and Malian tax balances.
In 2024, a net tax expense of $52 million arose from translation losses on tax balances, mainly due to the weakening of the Argentine peso and the West African CFA franc against the US dollar. In 2023, a tax expense of $289 million arose from translation losses on tax balances, mainly due to the weakening of the Argentine peso and strengthening of the West African CFA franc against the US dollar. These net translation losses are included within income tax expense.

Withholding Taxes

In 2024, we have recorded $3 million (2023: $5 million related to Saudi Arabia) of dividend withholding taxes related to the undistributed earnings of our subsidiaries in Saudi Arabia. We have also recorded $45 million (2023: $26 million related to Saudi Arabia, Tanzania and the United States) of dividend withholding taxes related to the distributed earnings of our subsidiaries in Saudi Arabia, Peru and the United States.

United States Tax Reform

In August 2022, President Joe Biden signed the Inflation Reduction Act ("the Act") into law. The Act includes a 15% corporate alternative minimum tax ("CAMT") that is imposed on applicable financial statement income and therefore would be considered in scope for IAS 12 given it is a tax on profits. The CAMT is effective for tax years beginning after December 31, 2022 and CAMT credit carryforwards have an indefinite life. Barrick is subject to CAMT because the Company meets the applicable income thresholds for a foreign-parented multinational group.
In Q3 2024, the US Treasury and IRS released proposed regulations detailing the application of CAMT followed by some technical corrections released on December 23, 2024. Some rules would apply to tax years ending after September 13, 2024, while the rest would generally apply to tax years ending after the final regulations are published. Comments on the technical corrections were due on January 16, 2025 and we are still awaiting the final regulations to be released.
For 2024, the deferred tax asset arising from the CAMT credit carryforwards has been recognized on the basis we expect that it will be recovered against US Federal Income Tax in the future.

Nevada Gold Mines ("NGM")

NGM is a limited liability company treated as a flow through partnership for US tax purposes. The partnership is not subject to federal income tax directly, but each of its partners is liable for tax on its share of the profits of the partnership. As such, Barrick accounts for its current and deferred income tax associated with the investment (61.5% share) following the principles in IAS 12.

Organisation for Economic Co-operation and Development ("OECD") Pillar Two model rules

In October 2021, more than 135 jurisdictions agreed to the OECD/G20 Inclusive Framework on Base Erosion and Profit Shifting Statement on a Two-Pillar Solution to Address the Tax Challenges Arising from the Digitalisation of the Economy. Since then, the OECD has published model rules and other documents related to the second pillar of this solution (the Pillar Two model rules). The Pillar Two model rules provide a template that jurisdictions can translate into domestic tax law and implement as part of an agreed common approach.
Pillar Two legislation in Canada has been enacted in Q2 2024 and came into effect for fiscal years commencing on or after December 31, 2023. Other jurisdictions where the group operates have either enacted legislation or are in the process of doing so.
In terms of the potential implications for income tax accounting, we have applied the exception available under the amendments to IAS 12 published by the IASB in May 2023 and are not recognizing or disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes. We have completed a review of Pillar Two for the current year using the OECD's Pillar Two Transitional Safe Harbour rules as implemented in the Global Minimum Tax Act in Canada. Based on our review, we have not identified any material amount that should be accrued in 2024 for Pillar Two purposes. As the law is evolving, both in Canada and elsewhere, we will continue to monitor the impact of this legislation.

Mining Taxes

In addition to corporate income tax, we pay mining taxes in the United States (Nevada), the Dominican Republic, and Canada (Ontario). NGM is subject to a Net Proceeds of Minerals tax in Nevada at a rate of 5% and the tax expense recorded in 2024 was $145 million (2023: $105 million). The other significant mining tax is the Dominican Republic's Net Profits Interest tax, which is determined based on cash flows as defined by the Pueblo Viejo Special Lease Agreement. A tax expense of $134 million (2023: $nil) was recorded for this in 2024. Both taxes are included on a consolidated basis in the Company's consolidated statements of income.

Impairments

In 2024, we recorded net impairment reversals of $941 million (2023: net impairment charges of $312 million) for non-current assets. Refer to note 21 for further information.
A deferred tax expense of $321 million (2023: deferred tax recovery of $55 million primarily related to the impairment at Long Canyon) was recorded primarily related to the impairment reversal at our Lumwana and Veladero mines.

1 Additions include $20 million of right-of-use assets for lease arrangements entered into during the year ended December 31, 2024 (2023: $9 million). Depreciation includes depreciation for leased right-of-use assets of $17 million for the year ended December 31, 2024 (2023: $17 million). The net carrying amount of leased right-of-use assets was $53 million as at December 31, 2024 (2023: $53 million).
2 Includes capitalized reserve acquisition costs, capitalized development costs and capitalized exploration and evaluation costs other than exploration license costs included in intangible assets.
3 Assets subject to depreciation include the following items for production stage properties: acquired mineral reserves and resources, capitalized mine development costs, capitalized stripping and capitalized exploration and evaluation costs.
4 Assets not subject to depreciation include construction-in-progress, projects and acquired mineral resources and exploration potential at operating minesites and development projects.
5 Additions include revisions to the capitalized cost of closure and rehabilitation activities.
6 Primarily relates to non-current assets that are transferred between categories within PP&E once they are placed into service.
7 Includes the transfer of Porgera to equity accounting method investment. Refer to note 4 for further information.

a) Mining Property Costs Not Subject to Depreciation

	Carrying amount at Dec. 31, 2023	Construction-in-progress[1]	$1,856	$2,694	Acquired mineral resources and exploration potential	53	62	Projects	Pascua-Lama	725	726	Norte Abierto	686	678	Reko Diq	914	746	Donlin Gold	251	252	$4,485	$5,158

1 Represents assets under construction at our operating minesites.

b) Changes in Gold and Copper Mineral Life of Mine Plan

As part of our annual business cycle, we prepare updated estimates of proven and probable gold and copper mineral reserves and the portion of resources considered probable of economic extraction for each mineral property. This forms the basis for our LOM plans. We prospectively revise
calculations of amortization expense for property, plant and equipment amortized using the UOP method, where the denominator is our LOM ounces. The effect of changes in our LOM on amortization expense for 2024 was a $21 million decrease (2023: $31 million decrease).

c) Capital Commitments

In addition to entering into various operational commitments in the normal course of business, we had commitments of approximately $605 million at December 31, 2024 (2023: $258 million) for construction activities at our sites and projects.

d) Other Lease Disclosure

The Company leases various buildings, plant and equipment as part of the normal course of operations. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. Refer to note 25 for a lease maturity analysis. Included in net income for 2024 are short-term payments and variable lease payments not included in the measurement of lease liabilities of $9 million (2023: $12 million) and $203 million (2023: $161 million), respectively.

IMPAIRMENT AND REVERSAL OF NON-CURRENT ASSETS12 Months Ended

Dec. 31, 2024

Impairment of assets [Abstract] Impairment and Reversal of Non-Current Assets Impairment and Reversal of Non-Current Assets

Summary of impairments (reversals)

For the year ended December 31, 2024, we recorded a net impairment reversal of $941 million (2023: net impairment charges of $312 million) for non-current assets and $484 million (2023: $nil) of impairment to goodwill, as summarized in the following table:

For the years ended December 31:	2024	Lumwana	($655)	$—	Veladero	($437)	—	$(1,092)
Carlin	$82	$4						
Long Canyon	$49	$80						
Pueblo Viejo	$10	—						
Cortez	$—	—						
Bulyanhulu	—	$7						
North Mara	—	$5						
Other	$1	$6						
Total impairment charges (reversals) of non-current assets	($941)	$312						
Loulo-Gounkoto goodwill	$484	—						
Total goodwill impairment charges	$484	$—						
Total impairment charges (reversals)	($457)	$312						

2024 Indicators of Impairment and Reversals

In Q4 2024, as per our policy, we performed our annual goodwill impairment test as required by IAS 36 and identified a goodwill impairment at Loulo-Gounkoto. For certain CGUs the prior year calculation of the recoverable amount was used for the annual goodwill impairment test, since all criteria described in note 2e were satisfied. Also, in Q4 2024, we reviewed the updated LOM plans for our other operating minesites for indicators of impairment or reversal. We noted indicators of impairment reversal at our Lumwana and Veladero mines and of impairment at our Carlin and Long Canyon mines. The key assumptions used in these impairment assessments are listed below.

Loulo-Gounkoto

The Company and the Government of Mali have been engaged in an ongoing dispute over the existing mining conventions of Société des Mines de Loulo SA ("Somilo") and Société des Mines de Gounkoto ("Gounkoto") (together, the "Conventions"). On January 14, 2025, due to the restrictions imposed by the Government of Mali on gold shipments, the Company announced that the Loulo-Gounkoto complex would temporarily suspend operations (refer to note 35 for more information). We determined that the carrying value of $3,564 million exceeded the FVLCD. We recorded a goodwill impairment of $484 million based on a FVLCD of $3,080 million.

Lumwana

In Q4 2024, we updated the LOM plan for Lumwana and we observed an increase in the mine's discounted cash flows reflecting the increased confidence of the Super Pit Expansion following the completion of the feasibility study and higher copper price assumptions. We determined that this was an indicator of impairment reversal and concluded that the mine's FVLCD exceeded its carrying value. We recorded a partial non-current asset impairment reversal of $655 million.

Veladero

In the Q4 2024, we updated the LOM plan for Veladero and we observed an increase in the mine's discounted cash flows reflecting higher gold prices and a decrease in the WACC primarily due to lower country risk. We determined that this was an indicator of impairment reversal and concluded that the mine's FVLCD exceeded its carrying value and we recorded a non-current asset impairment reversal of $437 million, which represents a full reversal of the non-current asset impairments recorded in 2018 and 2022.

Carlin

In Q4 2024, we updated the LOM plan for Carlin and identified that due to a change in the mine plan, an area of the Goldstrike open pit was no longer economic to be mined. As a result, we identified a non-current asset impairment of $82 million related to a capitalized stripping asset that no longer had a future benefit.

Long Canyon

In Q4 2024, we decided to place the mine in closure and remove the associated mineral resources from our December 31, 2024 Mineral Reserves and Resources statement. As a result, we identified a non-current asset impairment of $49 million on assets that no longer had a future benefit.

2023 Indicators of Impairment and Reversals

In Q4 2023, as per our policy, we performed our annual goodwill impairment test as required by IAS 36 and identified no impairments. Also in Q4 2023, we reviewed the updated LOM plans for our other operating minesites for indicators of impairment or reversal. We noted an indicator of impairment at our Long Canyon mine.

Long Canyon

Following the completion of certain studies in Q4 2023, we decided not to pursue the permitting associated with Phase 2 mining, removed those ounces from our LOM plan and placed the mine in care and maintenance. This represented an impairment trigger in Q4 2023 and we performed an impairment analysis. We concluded that the carrying amount of $301 million exceeded the FVLCD of $65 million and recorded a non-current asset impairment of $280 million. The key assumptions used in this assessment were consistent with our testing of goodwill impairment in Q4 2023, as listed below.

Porgera

On December 22, 2023, the Porgera Project Commencement Agreement was completed and recommissioning of the mine commenced. No impairment was identified. Refer to note 4 for more information.

Key Assumptions

Recoverable amount has been determined based on the estimated FVLCD, which has been determined to be greater than the VIU amounts. The key assumptions and estimates used in determining the FVLCD are related to future metal prices, WACC, NAV multiples for gold assets, operating costs, capital expenditures, closure costs, future production levels, continued license to operate, and the expected start of production for our projects. In addition, assumptions are related to observable market evaluation metrics, including identification of comparable entities, and associated market values per ounce or per pound of reserves and/or resources, as well as the fair value of mineral resources outside of LOM plans.

Gold

For the gold segments where a recoverable amount was required to be determined, FVLCD was determined by calculating the net present value ("NPV") of the future cash flows expected to be generated by the mines and projects within the CGU (Level 3 of the fair value hierarchy). The estimates of future cash flows were derived from the LOM plans and, where the LOM plans exclude a material portion of total reserves and resources, we assign value to resources not considered in these models. Based on observable market or publicly available data, including equity sell-side analyst forecasts, we make an assumption of future gold, copper and silver prices to estimate future revenues. The future cash flows for each gold mine are discounted using a real WACC, which reflects specific market risk factors for each mine. Some gold companies trade at a market capitalization greater than the NPV of their expected cash flows. Market participants describe this as a "NAV multiple", which represents the multiple applied to the NPV to arrive at the trading price. The NAV multiple is generally understood to take account of a variety of additional value factors such as the exploration potential of the mineral property, namely the ability to find and produce more metal than what is currently included in the LOM plan or reserve and resource estimates, and the benefit of gold price optionality. As a result, we applied a specific NAV multiple to the NPV of each CGU within each gold segment based on the NAV multiples observed in the market in recent periods and that we judged to be appropriate to the CGU.
In the absence of a LOM plan for Long Canyon, in 2023 we used the market approach which means the FVLCD was determined by considering observable market values for comparable assets expressed as dollar per ounce of mineral resources (level 3 of the fair value hierarchy).

Copper

For the copper segment where a recoverable amount was required to be determined, FVLCD was determined by calculating the NPV of the future cash flows expected to be generated by the mine and projects within the CGU (Level 3 of the fair value hierarchy). The estimates of future cash flows were derived from the LOM plans. Based on observable market or publicly available data, including equity sell-side analyst forecasts, we make an assumption of future copper prices to estimate future revenues. The future cash flows for each copper mine are discounted using a real WACC, which reflects specific market risk factors for each mine.

Assumptions

The short-term and long-term gold and copper price assumptions used in our fourth quarter 2024 and 2023 impairment testing are as follows:

	2024	2023
Gold price per oz (short-term)	$2,400	$1,900
Gold price per oz (long-term)	$2,000	$1,800
Copper price per lb (short-term)	$4.25	$3.75
Copper price per lb (long-term)	$4.00	$3.50

Neither the increase in the long-term gold price nor long-term copper price assumption from 2023 were considered an indicator of impairment reversal as the increased price would not, in isolation, have resulted in the identification of an impairment reversal at our mines with reversible impairments. The other key assumptions used in our impairment testing, based on the CGUs tested in each year, are summarized in the following table:

	2024	2023
WACC - gold (range)	5%-9%	5%-9%
WACC - gold (avg)	6 %	6 %
WACC - copper	12 %	n/a
Value per ounce of gold	n/a	$40
NAV multiple - gold (avg)	1.2	1.2
LOM years - gold (avg)	21	23

Sensitivities

Should there be a significant increase or decline in commodity prices, we would take actions to assess the implications on our LOM plans, including the determination of reserves and resources, and the appropriate cost structure for the CGU. The recoverable amount of the CGU would be affected by these changes and also be impacted by other market factors such as changes in NAV multiples and the value per ounce or pound of comparable market entities.
We performed a sensitivity analysis on each gold CGU that was tested as part of the goodwill impairment test, as well as those gold CGUs which we believe are most sensitive to changes in the key assumptions. We flexed the gold prices, WACC and NAV multiple, which are the most significant assumptions that impact the impairment calculations. We first assumed a +/- $100 per ounce change in our gold price assumptions, while holding all other assumptions constant. We then assumed a +/-1% change in our WACC, independent from the change in gold prices, while holding all other assumptions constant. Finally, we assumed a +/- 0.1 change in the NAV multiple, while holding all other assumptions constant. These sensitivities help to determine the theoretical impairment losses or impairment reversals that would be recorded with these changes in gold prices, WACC and NAV multiple.
At Loulo-Gounkoto, if the gold price per ounce was increased by $100, the WACC was decreased by 1%, or the NAV multiple was increased by 0.1, no goodwill impairment would have been recorded. If the WACC was increased by 1% or the NAV multiple was decreased by 0.1, there would be no change to the goodwill impairment recorded. If the gold price per ounce was decreased by $100, a non-current asset impairment of $529 million would have been recognized in addition to the goodwill impairment.
We also performed a sensitivity analysis on the Lumwana CGU. We flexed the copper prices and the WACC, which are the most significant assumptions that impact the impairment calculations. We first assumed a +/- $0.25 per pound change in our copper price assumptions, while holding all other assumptions constant. We then assumed a +/-1% change in our WACC, independent from the change in copper prices, while holding all other assumptions constant. These sensitivities help to determine the theoretical impairment losses or impairment reversals that would be recorded with these changes in copper prices and WACC.
Instead of the non-current asset impairment reversal of $655 million recognized at Lumwana, if the following changes were made, the theoretical impairment reversal would be as follows:

	1% increase in WACC	1% decrease in WACC	$0.25/lb increase in copper prices	$0.25/lb decrease in copper prices
	$301	$1,067	$1,507	$—

The carrying value of the CGUs that are most sensitive to changes in the key assumptions used in the FVLCD calculation are:

As at December 31, 2024	Carrying Value	Loulo-Gounkoto	$3,080
Kibali	$1,477	Lumwana	$2,401
Veladero	$804	Hemlo	$68

‡ Kibali's carrying value is comprised of the equity investment and JV receivable.

PV resettlement receivable	$6	$2
Other	$76	$40	$1,295	$1,356

‡ Includes VAT and fuel tax receivables of $180 million in Mali, $6 million in Argentina, $69 million in Tanzania and $47 million in Chile (Dec. 31, 2023: $nil, $7 million, $69 million and $58 million, respectively).
‡‡ Includes equity investments in other mining companies.
‡ Primarily represents the interest-bearing promissory note due from NovaGold.
‡ Primarily represents the cash balance at Pueblo Viejo that is contractually restricted in respect of disbursements for environmental rehabilitation, which are expected to occur near the end of Pueblo Viejo's mine life.
‡ Refer to note 16 for further details.
‡ Primarily relates to prepaid royalties at Carlin.

FINANCIAL INSTRUMENTS 12 Months Ended
Dec. 31, 2024
Disclosure of detailed information about financial instruments [abstract] Financial Instruments
Financial InstrumentsDuring 2024 and 2023, we did not enter into any derivative contracts for US dollar interest rates, currencies, metals or commodity inputs. We had no contracts outstanding at December 31, 2024.

Financial instruments include cash; evidence of ownership in an entity; or a contract that imposes an obligation on one party and conveys a right to a second entity to deliver/receive cash or another financial instrument. Information on certain types of financial instruments is included elsewhere in these consolidated financial statements as follows: accounts receivable (note 18); and restricted share units (note 34a).

a) Cash and Equivalents

Cash and equivalents include cash, term deposits, treasury bills and money market investments with original maturities of less than 90 days.

As at December 31, 2023 Cash deposits $3,120 $2,952
Term deposits 954 1,196 $4,074 $4,148

Of total cash and cash equivalents as of December 31, 2024, $nil (2023: $nil) was held in subsidiaries which have regulatory or contractual restrictions or operate in countries where exchange controls and other legal restrictions apply and are therefore not available for general use by the Company.

b) Debt and Interest[1]

1 The agreements that govern our long-term debt each contain various provisions which are not summarized herein. These provisions allow Barrick, at its option, to redeem indebtedness prior to maturity at specified prices and also may permit redemption of debt by Barrick upon the occurrence of certain specified changes in tax legislation.
2 Amortization of debt premium/discount and increases (decreases) in capital leases.
3 Consists of $850 million (2023: $850 million) of our wholly-owned subsidiary Barrick North America Finance LLC ("BNAF") notes due 2041.
4 Consists of $375 million (2023: $375 million) of 5.25% notes which mature in 2042.
5 Consists of $400 million (2023: $400 million) of 5.80% notes which mature in 2034.
6 Consists of $600 million (2023: $600 million) of 6.35% notes which mature in 2036.
7 Consists of $1.1 billion (2023: $1.1 billion) in conjunction with our wholly-owned subsidiary BNAF and our wholly-owned subsidiary Barrick (PD) Australia Finance Pty Ltd. ("BPDAF"). This consists of $250 million (2023: $250 million) of BNAF notes due 2038 and $807 million (2023: $807 million) of BPDAF notes due 2039.
8 Consists primarily of leases at Nevada Gold Mines, $12 million, Loulo-Gounkoto, $18 million, Veladero, $2 million, Lumwana, $1 million, Hemlo, $9 million, North Mara, $4 million and Tongon, $5 million (2023: $13 million, $20 million, $1 million, $3 million, $1 million, $nil and $6 million, respectively).
9 Consists of $850 million (2023: $850 million) in conjunction with our wholly-owned subsidiary BNAF.
10 We provide an unconditional and irrevocable guarantee on all BNAF, BPDAF, Barrick Gold Finance Company ("BGFC"), and Barrick (HMC) Mining ("BHMC") notes and generally provide such guarantees on all BNAF, BPDAF, BGFC, and BHMC notes issued, which rank equally with our other unsecured and unsubordinated obligations.
11 The current portion of long-term debt consists of leases ($13 million; 2023: $11 million) and other debt obligations ($11 million; 2023: $nil).

5.7% Notes

In June 2011, BNAF issued an aggregate of $4.0 billion in debt securities including $850 million of 5.70% notes that mature in 2041 issued by BNAF (collectively, the "BNAF Notes"). Barrick provides an unconditional and irrevocable guarantee of the BNAF Notes, which rank equally with Barrick's other unsecured and unsubordinated obligations.

5.25% Notes

On April 3, 2012, we issued an aggregate of $2 billion in debt securities including $750 million of 5.25% notes that mature in 2042. During 2022, $375 million of the 5.25% notes was repaid.

Other Fixed Rate Notes

On October 16, 2009, we issued debentures through our wholly-owned indirect subsidiary BPDAF consisting of $850 million of 30-year notes with a coupon rate of 5.95%. We also provide an unconditional and irrevocable guarantee of these payments, which rank equally with our other unsecured and unsubordinated obligations. During 2023, $43 million of the 5.95% notes was repaid.
In September 2008, we issued an aggregate of $1.25 billion of notes through our wholly-owned indirect subsidiaries BNAF and BGFC including $250 million of 30-year notes with a coupon rate of 7.5%. We also provide an unconditional and irrevocable guarantee of these payments, which rank equally with our other unsecured and unsubordinated obligations.

5.75% Notes

On May 2, 2013, we issued an aggregate of $3 billion in notes through Barrick and our wholly-owned indirect subsidiary BNAF including $850 million of 5.75% notes issued by BNAF that mature in 2043. $2 billion of the net proceeds from this offering was used to repay amounts outstanding under our revolving Credit Facility at that time. We provide an unconditional and irrevocable guarantee on the $850 million of 5.75% notes issued by BNAF, which rank equally with our other unsecured and unsubordinated obligations.

Credit Facility

In May 2024, we completed an update of the credit and guarantee agreement (the "Credit Facility") with certain Lenders, which requires such Lenders to make available to us a credit facility of $3.0 billion or the equivalent amount in Canadian dollars. The Credit Facility, which is unsecured, currently has an interest rate of Secured Overnight Financing Rate ("SOFR") plus 1.00% on drawn amounts, and a standby rate of 0.09% on undrawn amounts. The Credit Facility incorporates sustainability-linked metrics which are made up of annual environmental and social performance targets directly influenced by Barrick's actions, rather than based on external ratings. The performance targets include Scope 1 and Scope 2 greenhouse gas emissions intensity, water use efficiency (reuse and recycling rates), and total recordable injury frequency rate. Barrick may incur positive or negative pricing adjustments on drawn credit spreads and standby fees based on its sustainability performance versus the targets that have been set. As part of the update, the termination date of the Credit Facility was extended from May 2028 to May 2029. The Credit Facility was undrawn as at December 31, 2024.

Interest

2023 For the years ended December 31 Interest cost Effective rate[1] Interest cost
Effective rate[1] 5.7% notes $49 5.74 % $49 5.74 % 5.25% notes 20 5.29 % 20 5.29 % 5.80% notes 23 5.85 % 23 5.85 % 6.35% notes 38 6.41 % 38 6.41 % Other fixed rate notes 68 6.41 % 70 6.40 % Leases 4 8.16 % 5 7.02 % Other debt obligations 35 6.17 % 35 6.17 % 5.75% notes 49 5.79 % 49 5.79 % Deposits on Pascua-Lama silver sale agreement (note 29) 5 2.82 % 5 2.82 % Deposits on Pueblo Viejo gold and silver streaming agreement (note 29) 28 6.16 % 27 5.81 %

3 Included in Other fixed rate notes in the Long-Term Debt table.

c) Derivative Instruments ("Derivatives")

In the normal course of business, our assets, liabilities and forecasted transactions, as reported in US dollars, are impacted by various market risks including, but not limited to:

Item Impacted by

- Revenue

● Prices of gold, silver and copper
; ● Cost of sales ; ● Consumption of diesel fuel, propane, natural gas, and electricity ● Prices of diesel fuel, propane, natural gas, and electricity ● Non-US dollar expenditures ● Currency exchange rates - US dollar versus A$, ARS, C$, DOP, EUR, TZS, XOF, ZAR and ZMW ● General and administration, exploration and evaluation costs ● Currency exchange rates - US dollar versus A$, ARS, C$, DOP, GBP, PKR, TZS, XOF, ZAR, and ZMW ● Capital expenditures ; ● Non-US dollar capital expenditures ● Currency exchange rates - US dollar versus A$, ARS, C$, DOP, EUR, GBP, PKR, XOF, ZAR, and ZMW ● Consumption of steel ● Price of steel ● Interest earned on cash and equivalents ● US dollar interest rates ● Interest paid on fixed-rate borrowings ● US dollar interest rates

The time frame and manner in which we manage those risks varies for each item based upon our assessment of the risk and available alternatives for mitigating risk. For these particular risks, we believe that derivatives are an appropriate way of managing the risk.
We use derivatives as part of our risk management program to mitigate variability associated with changing market values related to the hedged item. Many of the derivatives we use meet the hedge effectiveness criteria and are designated in a hedge accounting relationship.
Certain derivatives are designated as either hedges of the fair value of recognized assets or liabilities or of firm commitments ("fair value hedges") or hedges of highly probable forecasted transactions ("cash flow hedges"), collectively known as "accounting hedges". Hedges that are expected to be highly effective in achieving offsetting changes in fair value or cash flows are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated. Some of the derivatives we use are effective in achieving our risk management objectives, but they do not meet the strict hedge accounting criteria. These derivatives are considered to be "non-hedge derivatives".

FAIR VALUE MEASUREMENTS 12 Months Ended
Dec. 31, 2024
Fair value measurements [Abstract] Fair Value Measurements Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability (for example, interest rate and yield curves observable at commonly quoted intervals, forward pricing curves used to value currency and commodity contracts and volatility measurements used to value option contracts), or inputs that are derived principally from or corroborated by observable market data or other means. Level 3 inputs are unobservable (supported by little or no market activity). The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs.

a) Assets and Liabilities Measured at Fair Value on a Recurring Basis

Fair Value Measurements				At December 31, 2024	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs	Aggregate Fair Value	(Level 1)	(Level 2)	(Level 3)
Other investments[1]	$42	$—	$—	$42							
Receivables from provisional copper and gold sales	—	204	—	204							
	$42	$204	$—	$246							
Fair Value Measurements				At December 31, 2023	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs	Aggregate Fair Value	(Level 1)	(Level 2)	(Level 3)
Other investments[2]	$131	$—	$—	$131							
Receivables from provisional copper and gold sales	—	246	—	246							
	$131	$246	$—	$377							

[1] Includes equity investments in other mining companies.

b) Fair Values of Financial Assets and Liabilities

	At December 31, 2023	Carrying amount	Estimated fair value	Carrying amount	Estimated fair value	Financial assets
Other assets[1]	$775	$775	$807	$807		
Other investments[2]	$42	$42	$131	$131		
Debt[3]	$4,729	$4,021	$4,726	$5,107		
Other liabilities	$95	$95	$74	$74		
	$5,324	$5,416	$5,300	$5,681		

[1] Includes restricted cash and amounts due from our partners and joint ventures.
[2] Includes equity investments in other mining companies. Recorded at fair value. Quoted market prices are used to determine fair value.
[3] Debt is generally recorded at amortized cost. The fair value of debt is primarily determined using quoted market prices. Balance includes both current and long-term portions of debt.

The fair values of the Company's remaining financial assets and liabilities, which include cash and equivalents, accounts receivable and trade and other payables approximate their carrying values due to their short-term nature. We do not offset financial assets with financial liabilities.

c) Assets Measured at Fair Value on a Non-Recurring Basis Valuation Techniques

At December 31, 2024	Quoted prices in active markets for identical assets	Significant other observable inputs	Significant unobservable inputs	Aggregate fair value	(Level 1)	(Level 2)	(Level 3)
Property, plant and equipment[2]	—	—	—	—			
Goodwill[3]	—	—	—	—			

[2] Property, plant and equipment were written down by $151 million, which was included in earnings in this period.
[3] Goodwill was written down at Loulo-Gounkoto by $484 million, which was included in earnings in this period.

Receivables from Provisional Copper and Gold Sales
The fair value of receivables arising from copper and gold sales contracts that contain provisional pricing mechanisms is determined using the appropriate quoted forward price from the exchange that is the principal active market for the particular metal. As such, these receivables, which meet the definition of an embedded derivative, are classified within Level 2 of the fair value hierarchy.

Other Long-Term Assets
The fair value of property, plant and equipment, goodwill, intangibles and other assets is determined primarily using an income approach based on unobservable cash flows, and as a result is classified within Level 3 of the fair value hierarchy. Refer to note 21 for disclosure of inputs used to develop these measures.

FINANCIAL RISK MANAGEMENT 12 Months Ended
Dec. 31, 2024
Disclosure of nature and extent of risks arising from financial instruments [abstract] Financial Risk Management Financial Risk Management

Our financial instruments are comprised of financial liabilities and financial assets. Our principal financial liabilities, other than derivatives, comprise accounts payable and debt. The main purpose of these financial instruments is to manage short-term cash flow and raise funds for our capital expenditure program. Our principal financial assets, other than derivative instruments, are cash and equivalents, restricted cash, accounts receivable, notes receivable, JV receivable and JV partner receivable, which arise directly from our operations. In the normal course of business, we use derivative instruments to mitigate exposure to various financial risks.
We manage our exposure to key financial risks in accordance with our financial risk management policy. The objective of the policy is to support the delivery of our financial targets while protecting future financial security. The main risks that could adversely affect our financial assets, liabilities or future cash flows are as follows:

a. Market risk, including commodity price risk, foreign currency and interest rate risk;
b. Credit risk;
c. Liquidity risk; and
d. Capital risk management.

Management designs strategies for managing each of these risks, which are summarized below. Our senior management oversees the management of financial risks. Our senior management ensures that our financial risk-taking activities are governed by policies and procedures and that financial risks are identified, measured and managed in accordance with our policies and our risk appetite. All derivative activities for risk management purposes are carried out by the appropriate personnel.

a) Market Risk

Market risk is the risk that changes in market factors, such as commodity prices, foreign exchange rates or interest rates, will affect the value of our financial instruments. We manage market risk by either accepting it or mitigating it through the use of derivatives and other economic hedging strategies.

Commodity Price Risk

Gold and Copper
We sell our gold and copper production in the world market. The market prices of gold and copper are the primary drivers of our profitability and ability to generate both operating and free cash flow. Our corporate treasury group may implement hedging strategies on an opportunistic basis to protect us from downside price risk on our gold and copper production. We did not enter into any positions during 2024 or 2023 and we do not have any positions outstanding as at December 31, 2024. Our gold and copper production is subject to market prices.

Fuel
We consume diesel fuel and natural gas to run our operations. Diesel fuel is refined from crude oil and is therefore subject to the same price volatility affecting crude oil prices. Therefore, volatility in crude oil and natural gas prices have a direct and indirect impact on our production costs.

Foreign Currency Risk
The functional and reporting currency for all of our operating segments is the US dollar and we report our results using the US dollar. The majority of our operating and capital expenditures are denominated and settled in US dollars. We have exposure to the Argentine peso through operating costs at our Veladero mine, and peso denominated VAT receivable balances. We also have exposure to the Canadian and Australian dollars, Zambian kwacha, Tanzanian shilling, Dominican peso, West African CFA franc, Euro, South African rand, and British pound through mine operating and capital costs. In addition, we also have exposure to the Pakistan rupee through project costs and capital costs on Reko Diq. Consequently, fluctuations in the US dollar exchange rate against these currencies increase the volatility of cost of sales, general and administrative costs, project costs and overall net earnings, when translated into US dollars.

Interest Rate Risk

Interest rate risk refers to the risk that the value of a financial instrument or cash flows associated with the instruments will fluctuate due to changes in market interest rates. Currently, our interest rate exposure mainly relates to interest receipts on our cash balances ($4.1 billion as at December 31, 2024); the mark-to-market value of derivative instruments; and to the interest payments on our variable-rate debt ($0.1 billion as at December 31, 2024).
The effect on net earnings and equity of a 1% change in the interest rate of our financial assets and liabilities as at December 31, 2024 is approximately $30 million (2023: $30 million).

b) Credit Risk

Credit risk is the risk that a third party might fail to fulfill its performance obligations under the terms of a financial instrument. Credit risk arises from cash and equivalents, restricted cash, notes receivable, JV receivable, JV partner receivable, accounts receivable, as well as derivative assets. To mitigate our inherent exposure to credit risk on all financial assets listed above (other than derivative assets) we maintain policies to limit the concentration of credit risk, review counterparty creditworthiness on a monthly basis, and ensure liquidity of available funds. We also invest our excess cash and equivalents in highly rated financial institutions, primarily within the United States and Canada. Furthermore, we sell our gold and copper production into the world market and to financial institutions and private customers with strong credit ratings. Historically, customer defaults have not had a significant impact on our operating results or financial position.
The Company's maximum exposure to credit risk at the reporting date is the carrying value of each of the financial assets, excluding derivative assets, disclosed as follows:

As at December 31, 2023	Cash and equivalents	$4,074	$4,148
Accounts receivable	763	693	
Notes receivable	217	187	
Kibali JV receivable	462	505	
Norte Abierto JV partner receivable	74	81	
Restricted cash	65	101	
	$5,655	$5,715	

c) Liquidity Risk

Liquidity risk is the risk of loss from not having access to sufficient funds to meet both expected and unexpected cash demands. We manage our exposure to liquidity risk by maintaining cash reserves, access to undrawn credit facilities and access to public debt markets, by staggering the maturities of outstanding debt instruments to mitigate refinancing risk and by monitoring of forecasted and actual cash flows. Details of the undrawn Credit Facility are included in note 25.
Our capital structure comprises a mix of debt, non-controlling interest and shareholders' equity. As at December 31, 2024, our total debt was $4.7 billion (debt net of cash and equivalents was $655 million) compared to total debt as at December 31, 2023 of $4.7 billion (debt net of cash and equivalents was $578 million).

Our operating cash flow is dependent on the ability of our operations to deliver projected future cash flows. The market prices of gold, and to a lesser extent copper, are the primary drivers of our operating cash flow. Other options to enhance liquidity include further portfolio optimization; issuance of equity or long-term debt securities in the public markets or to private investors (Moody's and S&P currently rate Barrick's outstanding long-term debt as investment grade, with ratings of A3 and BBB+, respectively); and drawing on the $3.0 billion available under our undrawn Credit Facility (subject to compliance with covenants and the making of certain representations and warranties, this facility is available for drawdown as a source of financing). The key financial covenant in the Credit Facility (undrawn as at December 31, 2024) requires Barrick to maintain a net debt to total capitalization ratio, as defined in the agreement, of 0.60:1 or lower (Barrick's net debt to total capitalization ratio was 0.02:1 as at December 31, 2024).

The following table outlines the expected maturity of our significant financial assets and liabilities into relevant maturity groupings based on the remaining period from the balance sheet date to the contractual maturity date. As the amounts presented in the table are the contractual undiscounted cash flows, these balances may not agree with the amounts disclosed in the balance sheet.

:

(in $ millions)	Less than 1 year	1 to 3 years	3 to 5 years	Over 5 years	Total

d) Capital Risk Management

Our objective when managing capital is to provide value for shareholders by maintaining an optimal short-term and long-term capital structure in order to reduce the overall cost of capital while preserving our ability to continue as a going concern. Our capital management objectives are to safeguard our ability to support our operating requirements on an ongoing basis, continue the development and exploration of our mineral properties and support any expansion plans. Our objectives are also to ensure that we maintain a strong balance sheet and optimize the use of debt and equity to support our business and maintain financial flexibility in order to provide meaningful returns to shareholders and maximize shareholder value. We define capital as total debt less cash and equivalents and it is managed by management subject to approved policies and limits by the Board of Directors. We have no significant financial covenants or capital requirements with our lenders or other parties other than what is discussed under liquidity risk in note 28c.

OTHER NON-CURRENT LIABILITIES	12 Months Ended
Dec. 31, 2024	
Miscellaneous non-current liabilities [abstract]	Other Non-Current Liabilities Other Non-Current Liabilities

As at December 31, 2023
Deposit on Pascua-Lama silver sale agreement $167 $162
Deposit on Pueblo Viejo gold and silver streaming agreement[1] 408 398
Long-term income tax payable 88 165
GoT shareholder loan 60 82
Pueblo Viejo JV partner shareholder loan 407 383
Provision for offsite remediation 36 34
Other 16 17 $1,174 $1,241

[1] Revenues of $30 million were recognized in 2024 (2023: $36 million) through the draw-down of our streaming liabilities relating to a contract in place at Pueblo Viejo.

Government of Tanzania Shareholder Loan

On January 24, 2020, Barrick formalized the establishment of a joint venture between Barrick and the Government of Tanzania ("GoT"). Effective January 1, 2020, the GoT received a 16% interest in the shareholder loans owed by Bulyanhulu and Buzwagi, of which $167 million was payable to the GoT. During 2024 and 2023, $nil and $37 million, respectively, was offset against VAT receivables. During 2024, a $22 million reduction in the outstanding balance was recorded against other income as part of the economic benefits sharing under the Twiga partnership.

Pueblo Viejo Shareholder Loan

In November 2020, Pueblo Viejo entered into a $1.3 billion loan facility agreement with its shareholders (the "First PV Shareholder Loan") to provide long-term financing to expand the mine. The shareholders lend funds pro rata in accordance with their shareholding in Pueblo Viejo. In October 2024, Pueblo Viejo entered into an additional $0.8 billion loan facility agreement with its shareholders (the "Second PV Shareholder Loan").

The First PV Shareholder Loan is broken up into two facilities: $0.8 billion of funds that could be drawn on a pro rata basis until June 30, 2022 ("Facility I") and $0.5 billion of funds that can be drawn on a pro rata basis until June 30, 2025 ("Facility II"). During 2022, the drawing period for Facility I was extended to December 31, 2022. Starting in 2023, amortized repayments for Facility I began twice yearly on the scheduled repayment dates, with a final maturity date of February 28, 2032. Amortized repayments for Facility II are due to begin twice yearly on the scheduled repayment dates after June 30, 2025, with a final maturity date of February 28, 2035. The interest rate on drawn amounts is SOFR plus 400 basis points for Facility I and Facility II.

The Second PV Shareholder Loan consists of $0.8 billion of funds that can be drawn on a pro rata basis until June 30, 2029. Amortized repayments for the Second PV Shareholder Loan are due to begin twice yearly on the scheduled repayment dates after June 30, 2029 with a final maturity date of February 15, 2039. The interest rate on drawn amounts is SOFR plus 381 basis points for the Second PV Shareholder Loan.

During 2022, 2021 and 2020, $369 million, $327 million and $104 million, respectively, were drawn on Facility I, fully drawing it down, including $147 million, $131 million and $42 million, respectively, from Barrick's Pueblo Viejo JV partner. During 2024 and 2023, $80 million and $80 million, respectively, was repaid on Facility I, including $32 million and $32 million, respectively, from Barrick's Pueblo Viejo JV partner.

During 2024, 2023 and 2022, $100 million, $242 million and $75 million, respectively, were drawn on Facility II, including $40 million, $97 million and $30 million, respectively, from Barrick's Pueblo Viejo JV partner.

During 2024, $110 million was drawn on the Second PV Shareholder Loan, including $44 million from Barrick's Pueblo Viejo JV partner.

Pascua-Lama Silver Sale Agreement

Our silver sale agreement with Wheaton requires us to deliver 25% of the life of mine silver production from the Pascua-Lama project once it is constructed and required delivery of 100% of silver production from the Lagunas Norte, Pierina and Veladero mines until March 31, 2018. In return, we were entitled to an upfront cash payment of $625 million payable over years from the date of the agreement, as well as ongoing payments in cash of the lesser of $3.90 (subject to an annual inflation adjustment of 1 percent starting years after project completion at Pascua-Lama) and the prevailing market price for each ounce of silver delivered under the agreement. An imputed interest expense was recorded on the liability at the rate implicit in the agreement. The liability plus imputed interest was amortized based on the difference between the effective contract price for silver and the amount of the ongoing cash payment per ounce of silver delivered under the agreement. The completion date guarantee under the silver sale agreement for Pascua-Lama was originally threethree

December 31, 2015 but was subsequently extended to June 30, 2020. Per the terms of the amended silver purchase agreement, if the requirements of the completion guarantee were not satisfied by June 30, 2020, then Wheaton had the right to terminate the agreement within 90 days of that date, in which case, they would have been entitled to the return of the upfront consideration paid less credit for silver delivered up to the date of that event.

Given that, as of September 29, 2020, Wheaton had not exercised its termination right, a residual liability of $253 million remains due on September 1, 2039 (assuming no future deliveries are made). This residual cash liability was remeasured to $148 million as at September 30, 2020, which was the present value of the liability due in 2039 discounted at a rate estimated for comparable liabilities, including Barrick's outstanding debt. The liability had a balance of $167 million as at December 31, 2024 and is measured at amortized cost.

Pueblo Viejo Gold and Silver Streaming Agreement

On September 29, 2015, we closed a gold and silver streaming transaction with Royal Gold, Inc. ("Royal Gold") for production linked to Barrick's 60% interest in the Pueblo Viejo mine. Royal Gold made an upfront cash payment of $610 million and will continue to make cash payments for gold and silver delivered under the agreement. The $610 million upfront payment is not repayable and Barrick is obligated to deliver gold and silver based on Pueblo Viejo's production. We have accounted for the upfront payment as deferred revenue and will recognize it in earnings, along with the ongoing cash payments, as the gold and silver is delivered to Royal Gold. We will also be recording accretion expense on the deferred revenue balance as the time value of the upfront deposit represents a significant financing component of the transaction.

Under the terms of the agreement, Barrick will sell gold and silver to Royal Gold equivalent to:

- 7.5% of Barrick's interest in the gold produced at Pueblo Viejo until 990,000 ounces of gold have been delivered, and 3.75% thereafter. As at December 31, 2024, approximately 369,000 ounces of gold have been delivered.
- 75% of Barrick's interest in the silver produced at Pueblo Viejo until 50 million ounces have been delivered, and 37.5% thereafter. Silver will be delivered based on a fixed recovery rate of 70%. Silver above this recovery rate is not subject to the stream. As at December 31, 2024, approximately 13 million ounces of silver have been delivered.

Barrick will receive ongoing cash payments from Royal Gold equivalent to 30% of the prevailing spot prices for the first 550,000 ounces of gold and 23.1 million ounces of silver delivered. Thereafter payments will double to 60% of prevailing spot prices for each subsequent ounce of gold and silver delivered. Ongoing cash payments to Barrick are tied to prevailing spot prices rather than fixed in advance, maintaining exposure to higher gold and silver prices in the future.

DEFERRED INCOME TAXES	12 Months Ended
Dec. 31, 2024	
Income tax [Abstract]	Deferred Income Taxes n Deferred Income Taxes

Recognition and Measurement

We record deferred income tax assets and liabilities where temporary differences exist between the carrying amounts of assets and liabilities in our balance sheet and their tax bases. The measurement and recognition of deferred income tax assets and liabilities takes into account: substantively enacted rates that will apply when temporary differences reverse; interpretations of relevant tax legislation; estimates of the tax bases of assets and liabilities; and the deductibility of expenditures for income tax purposes. In addition, the measurement and recognition of deferred tax assets takes into account tax planning strategies. We recognize the effect of changes in our assessment of these estimates and factors when they occur. Changes in deferred income tax assets and liabilities are allocated between net income, other comprehensive income, equity and goodwill based on the source of the change.

Current income taxes of $3 million have been provided in the year on the undistributed earnings of certain foreign subsidiaries. Our total income tax provision for these items as at December 31, 2024 is $7 million. Deferred income taxes have not been provided on the undistributed earnings of all other foreign subsidiaries for which we are able to control the timing of the remittance, and it is probable that there will be no remittance in the foreseeable future. These undistributed earnings amounted to $16,974 million as at December 31, 2024.

Sources of Deferred Income Tax Assets and Liabilities

[1] Represents the gross amount of tax loss carryforwards translated at closing exchange rates at December 31, 2024.

The non-capital tax losses include $4,261 million of losses which are not recognized in deferred tax assets. Of these, $219 million expire in 2025, $4 million expire in 2026, $172 million expire in 2027, $74 million expire in 2028, $1,963 million expire in 2029 or later, and $1,829 million have no expiry date.

Recognition of Deferred Tax Assets

We recognize deferred tax assets taking into account the effects of local tax law. Deferred tax assets are fully recognized when we conclude that sufficient positive evidence exists to demonstrate that it is probable that a deferred tax asset will be realized. The main factors considered are:

- Historic and expected future levels of taxable income;
- Tax plans that affect whether tax assets can be realized; and
- The nature, amount and expected timing of reversal of taxable temporary differences.

Levels of future income are mainly affected by: market prices for gold, copper and silver; forecasted future costs and expenses to produce gold and copper; quantities of proven and probable gold and copper reserves; market interest rates; and foreign currency exchange rates. If these factors or other circumstances change, we record an adjustment to the recognition of deferred tax assets to reflect our latest assessment of the amount of deferred tax assets that is probable will be realized.

Deferred Tax Assets Not Recognized

As at December 31, 2023	Australia	$467	$303
Barbados	31	Canada	850	904
Chile	1,129	1,109

CAPITAL STOCK 12 Months Ended

Dec. 31, 2024

Capital stock [Abstract] Capital StockCapital

Authorized Capital Stock

Our authorized capital stock is composed of an unlimited number of common shares (issued 1,727,100,407 common shares as at December 31, 2024). Our common shares have no par value.

Dividends

In 2024, we declared and paid dividends in US dollars totaling $696 million (2023: $700 million).
The Company's dividend reinvestment plan resulted in $4 million (2023: $3 million) reinvested into the Company.

Share Buyback Program

At the February 13, 2024 meeting, the Board of Directors authorized a share buyback program for the repurchase of up to $1.0 billion of the Company's outstanding common shares over the next 12 months. In 2024, Barrick purchased 28.675 million common shares for a total of $508 million under this program. At the February 11, 2025 meeting, the Board of Directors authorized a new share buyback program for the repurchase of up to $1.0 billion of the Company's outstanding common shares over the next 12 months.
The actual number of common shares that may be purchased, and the timing of any such purchases, will be determined by Barrick based on a number of factors, including the Company's financial performance, the availability of cash flows, and the consideration of other uses of cash, including capital investment opportunities, returns to shareholders, and debt reduction.
The repurchase program does not obligate the Company to acquire any particular number of common shares, and the repurchase program may be suspended or discontinued at any time at the Company's discretion.

STOCK-BASED COMPENSATION 12 Months Ended
Dec. 31, 2024
Share-based payment arrangements [Abstract] Stock-Based Compensation Stock-Based Compensation

a) Restricted Share Units (RSUs) and Deferred Share Units (DSUs)

Compensation expense for RSUs was a $35 million charge to earnings in 2024 (2023: $30 million) and is presented as a component of general and administrative expenses and cost of sales, consistent with the classification of other elements of compensation expense for those employees who had RSUs.

Compensation expense for RSUs incorporates an expected forfeiture rate. The expected forfeiture rate is estimated based on historical forfeiture rates and expectations of future forfeiture rates. We make adjustments if the actual forfeiture rate differs from the expected rate. At December 31, 2024, the weighted average remaining contractual life of RSUs was 0.82 years (2023: 0.82 years).

DSU and RSU Activity (Number of Units in Thousands)

	DSUs	Fair value	RSUs	Fair value

CONTINGENCIES 12 Months Ended
Dec. 31, 2024
Contingent liabilities [Abstract] Contingencies
On January 16, 2025, a member of a local indigenous community filed a constitutional action challenging the settlement. The Court of Appeals of Antofagasta rejected this challenge on January 17, 2025, and the Supreme Court subsequently rejected an appeal from that ruling. The matter is now closed.

31 Contingencies

Certain conditions may exist as of the date the financial statements are issued that may result in a loss to the Company, but which will only be resolved when one or more future events occur or fail to occur. The impact of any resulting loss from such matters affecting these financial statements and noted below may be material.

Litigation and Claims

In assessing loss contingencies related to legal proceedings that are pending against us or unasserted claims that may result in such proceedings, the Company, with assistance from its legal counsel, evaluates the perceived merits of any legal proceedings or unasserted claims as well as the perceived merits of the amount of relief sought or expected to be sought.

Pascua-Lama – Proposed Canadian Securities Class Actions

In 2014, proposed secondary market liability securities class actions were initiated in Ontario and Quebec against Barrick Gold Corporation and certain of its former senior executives. These actions relate to public disclosures concerning Barrick's Pascua-Lama Project. The Ontario case focuses on disclosure regarding capital cost and schedule estimates for Pascua-Lama and environmental matters in Chile between February 2012 and June 2013, while the Quebec case pertains only to disclosure regarding environmental matters in Chile between July 2012 and October 2013. In the Ontario proceedings, plaintiffs are seeking damages exceeding $3 billion. Alleged damages in the Quebec case have yet to be quantified.

Efforts to resolve the Quebec case through mediation were unsuccessful in November 2023. Subsequently, the plaintiffs filed their Originating Application in February 2024 and Barrick responded formally in March 2024. No trial date has been set as of this time. In the Ontario case, the Plaintiffs' application for leave to appeal to the Supreme Court of Canada from the February 13, 2024 decision of the Court of Appeal was dismissed on September 26, 2024. The Plaintiffs' motion for class certification has not yet been scheduled.

The Company intends to vigorously defend these actions. No amounts have been recorded for any potential liability arising from either of the actions, as the Company cannot reasonably predict the outcome in Ontario or Quebec.

Pascua-Lama – SMA Regulatory Sanctions

In May 2013, Compañía Minera Nevada ("CMN"), Barrick's Chilean subsidiary that holds the Chilean portion of the Pascua-Lama Project (the "Project"), received a resolution (the "Original Resolution") from Chile's environmental regulator (the Superintendencia del Medio Ambiente, or "SMA") requiring CMN to complete the water management system in accordance with the Project's environmental permit before resuming construction activities. The Original Resolution also required CMN to pay an administrative fine of approximately $16 million, which CMN paid in May 2013.

In 2013, a group of local farmers and indigenous communities challenged the Original Resolution, claiming the fine was inadequate and requesting more severe sanctions, including the revocation of the Project's environmental permit. The SMA and CMN defended the Original Resolution.

In 2018, the SMA issued the revised resolution (the "Revised Resolution"), which reduced the original administrative fine to $11.5 million and ordered the closure of existing surface facilities on the Chilean side of the Project. The Revised Resolution did not revoke the Project's environmental permit. CMN filed an appeal of the Revised Resolution in 2018 with the First Environmental Court of Antofagasta (the "Antofagasta Environmental Court").

In 2020, the Antofagasta Environmental Court upheld the closure order and sanctions in the Revised Resolution. It also ordered the SMA to reevaluate certain environmental infringements. The Company did not appeal this ruling, and the Chilean side of the Pascua-Lama project is being transitioned to closure accordingly.

On November 13, 2024, the SMA determined that no further fine was applicable to the environmental infringements. On November 21, 2024, CMN paid the outstanding balance of fines previously imposed by the SMA in an amount of approximately $0.3 million. On December 9, 2024, the same group of local farmers and indigenous communities that challenged the Original Resolution filed an appeal of the SMA's November 13, 2024 decision. This appeal remains pending.

Veladero – Operational Incidents and Associated Proceedings

Minera Andina del Sol SRL (formerly, Minera Argentina Gold SRL) ("MAS"), the joint venture company that operates the Veladero mine, is the subject of regulatory proceedings related to operational incidents at the Veladero Valley Leach Facility ("VLF") occurring in March 2017 (the "March 2017 incident"), September 2016 (the "September 2016 incident") and September 2015 (the "September 2015 incident").

Following the March 2017 incident, an "amparo" protection action (the "Provincial Amparo Action") was filed against MAS in the Jachal First Instance Court, San Juan Province (the "Jachal Court") by individuals who claimed to be living in Jachal, San Juan Province, Argentina, seeking the cessation of all activities at the Veladero mine or, alternatively, a suspension of the mine's leaching process. The matter before the Jachal Court remains pending.

In 2017, the National Minister of Environment of Argentina filed an amparo action in the Federal Court in connection with the same March 2017 incident (the "Federal Amparo Action") seeking an order requiring the cessation and/or suspension of activities at the Veladero mine.

On June 28, 2024, the Federal Court rejected the National Minister's request for, among other things, an interim injunction requiring the cessation and/or suspension of activities at the Veladero mine. The National Minister sought to appeal this decision twice in 2024, most recently seeking leave to the Federal Supreme Court on October 16, 2024. The Federal Amparo Action will continue before the Federal Court while the Federal Supreme Court considers whether to hear the appeal for an interim injunction.

The Company continues to believe that the Provincial and Federal Amparo Actions are without merit and intends to continue to vigorously defend its position.

Civil Action

In 2016, MAS was served notice of a civil action filed before the San Juan Provincial Court by certain persons allegedly living in Jachal, San Juan Province, claiming to be affected by the Veladero mine and, in particular, the VLF. The plaintiffs requested a court order that MAS cease leaching metals with cyanide solutions, mercury and other similar substances at the mine and replace that process with one that is free of hazardous substances, implement a closure and remediation plan for the VLF and surrounding areas, and create a committee to monitor this process. These claims were supplemented by new allegations that the risk of environmental damage had increased as a result of the March 2017 incident.

MAS replied to the lawsuit in February 2017, responded to the supplemental claim and intends to continue defending this matter vigorously.

Legacy Philippines Matters

In 2009, Barrick Gold Inc. and Placer Dome Inc. ("Placer Dome"), which was acquired by the Company in 2006, were purportedly served in Ontario with a complaint filed in November 2008 in the Regional Trial Court of Boac on the Philippine island of Marinduque, on behalf of two named individuals and purportedly on behalf of the approximately 200,000 residents of Marinduque.

The complaint alleges injury to the economy and the ecology of Marinduque as a result of the discharge of mine tailings from the Marcopper mine into Calancan Bay, the Boac River, and the Mogpog River. Placer Dome was previously a minority indirect shareholder of Marcopper Mining Corporation ("Marcopper"). The plaintiffs are claiming for abatement of a public nuisance and nominal damages for an alleged violation of their constitutional right to a balanced and healthful ecology. By Order dated November 9, 2011, the Court granted the plaintiffs' motion to suspend the proceedings.

On December 5, 2024, the Court issued an Order directing the Plaintiffs to advise, within 10 days of receipt of the Order, whether they intend to pursue the case. The Order also stated that failure by the Plaintiffs to do so would warrant dismissal of the case with preludice. It is unclear whether or when the Plaintiffs received a copy of the Order.

On February 25, 2011, a Petition for the Issuance of a Writ of Kalikasan with Prayer for Temporary Environmental Protection Order was filed in the Supreme Court of the Republic of the Philippines by Eliza M. Hernandez, Mamerto M. Lanete and Godofredo L. Manoy against Placer Dome and the Company (the "Petition"). The Petition alleges that Placer Dome violated the Petitioners' constitutional right to a balanced and healthful ecology as a result of, amongst other things, the discharge of tailings into Calancan Bay, a dam breach in 1993, and a tailings spill in 1996. The Petition was subsequently transferred to the Court of Appeals. The Petitioners are seeking orders requiring Barrick to environmentally remediate the areas in and around the mine site that are alleged to have sustained environmental impacts.

On January 21, 2021, the Court of Appeals granted an Intervention Motion introduced by the Province of Marinduque (the "Province") and admitted the Province's Petition in Intervention. In the Petition in Intervention, the Province seeks to expand the scope of relief sought within the Writ of Kalikasan to include claims seeking rehabilitation and remediation of alleged maintenance and structural integrity issues supposedly associated with Marcopper mine infrastructure.

In October 2022, the Court granted the Company's motion requesting court-ordered mediation between the parties and the proceeding has been suspended ever since.

If these matters are reactivated, the Company intends to defend the actions vigorously. No amounts have been recorded for any potential liability arising from these matters, as the Company cannot reasonably predict the outcome.

North Mara – Ontario Litigation

On November 23, 2022, an action was commenced against the Company in the Ontario Superior Court of Justice in respect of alleged security-related incidents in the vicinity of the North Mara Gold Mine in Tanzania. The named plaintiffs purport to have been injured, or to be the dependents of individuals who were allegedly killed, by members of the Tanzanian Police Force. The Statement of Claim asserts that Barrick Gold Corporation is legally responsible for the actions of the Tanzanian Police Force, and that the Company is liable for an unspecified amount of damages.

In February 2024, an additional action was commenced against the Company in the Ontario Superior Court of Justice on behalf of different named plaintiffs in respect of alleged security-related incidents said to have occurred in the vicinity of the North Mara Gold Mine. The Statement of Claim in the second action is substantially similar to the Statement of Claim issued in November 2022. The Company believes that the allegations in both claims are without merit, including because the Tanzanian Police Force is a sovereign police force that operates under its own chain of command.

On November 26, 2024, the court granted Barrick's motion to dismiss both actions on the grounds that the Ontario Superior Court of Justice lacks jurisdiction and that Tanzania is a more appropriate forum in which to litigate this matter. On December 27, 2024, the plaintiffs' appealed this decision to the Ontario Court of Appeal. The hearing of this appeal has not yet been scheduled.

Loulo-Gounkoto Mining Conventions Dispute

In 2023, the Government of Mali adopted Law No. 2023-040, establishing the Mining Code in the Republic of Mali (the "2023 Mining Code") and initiated a review process of existing mining conventions, including the mining conventions of Société des Mines de Loulo SA ("Somilo") and Société des Mines de Gounkoto ("Gounkoto") (together, the "Conventions"). As part of this process, the Government of Mali demanded that the mines become subject to the 2023 Mining Code, in direct violation of the stability rights contained in the Conventions.

Beginning in 2023, the Government of Mali initiated several fiscal and customs proceedings against Somilo and Gounkoto, demanding payment of various charges, taxes, duties, and other amounts (including approximately $417 million in recoverable VAT charges as previously disclosed) from which they are exempt. Barrick continued its engagement with the Government of Mali to find a global settlement and in October 2024, Barrick made a payment of CFA 50 billion ($84 million) to advance those negotiations (which was expensed in Q4 2024). Despite the Company's efforts, in November 2024, Somilo and Gounkoto were restricted from exporting gold from Mali, also in violation of the Conventions.

On December 18, 2024, after multiple good faith attempts to resolve the dispute, Somilo and Gounkoto submitted a request for arbitration to the International Centre for the Settlement of Investment Disputes (ICSID) in accordance with the provisions of their respective Conventions. Among other things, Somilo and Gounkoto request that the arbitral panel declare that the Conventions are binding and are not subject to any legislative or regulatory changes under Malian law enacted after the entry into force of said Conventions.

On January 2, 2025, an interim attachment order was issued by the Senior Investigating Judges of the Pôle National Économique et Financier ("Pôle Économique") against the existing gold stock on the site of the Loulo-Gounkoto mining complex, which was executed on January 11, 2025 when the gold was removed from the site to a custodial bank. This further disrupted normal operations and put gold exports at risk in violation of the Conventions (see – Abuse of Criminal Proceedings below).

On January 14, 2025, due to the restrictions imposed by the Government of Mali on gold shipments, the Company announced that the Loulo-Gounkoto complex would temporarily suspend operations. We remain in discussions with the Government of Mali to find an acceptable resolution to these disputes, while the Company continues to vigorously enforce Somilo's and Gounkoto's rights through the ICSID arbitration process.

No amounts have been recorded for any potential liability arising from these matters as the Company cannot reasonably predict the outcome of the Conventions dispute.

Abuse of Criminal Proceedings

The Government of Mali has initiated meritless criminal proceedings against the Company, its Malian subsidiaries, their officers and directors, and several individual employees, alleging violations of exchange control regulations and threatening billions of dollars in fines and up to five years imprisonment for the individuals.

On September 24, 2024, employees of Somilo and Gounkoto were summoned to appear at the Pôle Économique for interviews. When these employees appeared, five of them were illegally detained and held unlawfully in police custody for six days. On November 25, 2024, the employees were again summoned to appear before the Investigating Judge at the Pôle Économique. At the end of the hearing, four employees were charged and incarcerated at the Central Prison of Bamako pending trial. These employees remain imprisoned unjustifiably.

On December 4, 2024, the Government of Mali caused an illegitimate arrest warrant to be issued against Barrick's President and Chief Executive Officer, Mark Bristow, alleging money laundering and violations of exchange control regulations. As with all of the previous allegations made by the Government of Mali on these matters, there is no merit whatsoever to the claims outlined in the arrest warrant.

The Company is vigorously defending its rights and the rights of its Malian subsidiaries, and the impacted employees against these claims. No amounts have been recorded for any potential liability arising from the criminal proceedings as the allegations are wholly without merit.

Zaldívar Chilean Tax Assessment

On August 28, 2019, Barrick's Chilean subsidiary that holds the Company's interest in the Zaldívar mine, Compañía Minera Zaldívar Limitada ("CMZ"), received notice of a tax assessment from the Chilean Internal Revenue Service ("Chilean IRS") amounting to approximately $1 billion in outstanding taxes, including interest and penalties (subsequently reduced to $678 million) (the "2015 Tax Assessment").

In April 2020, the Chilean IRS initiated an audit of CMZ for 2016 relating to the same claims included in the 2015 Tax Assessment. This audit resulted in a new tax assessment against CMZ (the "2016 Tax Assessment"). In September 2020, the Tax Court of Coquimbo approved CMZ's request to consolidate its challenges to the 2015 and 2016 Tax Assessments (collectively, the "Zaldívar Tax Assessments") into a single proceeding.

In September 2024, CMZ and the Chilean IRS jointly filed two applications with the Chilean judiciary to seek approval to settle the Zaldívar Tax Assessments and related claims. The Company recorded an estimated amount for the potential liability arising from these matters in June 2024 and the Courts approved the settlement proposals in September 2024. On November 20, 2024, the Company settled all claims and paid the agreed settlement amount through a combination of cash and the write-off of certain tax receivables. This matter is now closed.

Zaldívar Water Claims

On March 30, 2022, the State Defense Council ("CDE"), an entity that represents the interests of the Chilean state, filed a lawsuit in the Environmental Court of Antofagasta against Compañía Minera Zaldívar SpA ("CMZ SpA"), the joint venture company that operates the Zaldívar mine, and two other companies with mining operations that utilize water from a shared aquifer (Minera Escondida Ltda. and Albermarle Ltda.). The CDE claims that the extraction of groundwater by these companies since 2005 has caused environmental damage to the surrounding area. The CDE's lawsuit seeks to require the companies to conduct a series of studies and undertake certain actions to protect and repair the alleged environmental damage in the area, and to cease extracting water from the aquifer.

On October 24, 2024, a joint settlement proposal was filed with the Court. On December 16, 2024, the Court approved the joint settlement proposal.

MATERIAL ACCOUNTING POLICY INFORMATION (Policies)12 Months Ended

Dec. 31, 2024

Material accounting policy information [Abstract] Statement of ComplianceStatement of Compliance

These consolidated financial statements have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IFRS"). Accounting policies are consistently applied to all years presented, unless otherwise stated. These consolidated financial statements were approved for issuance by the Board of Directors on February 11, 2025.**Description of accounting policy for subsidiaries Basis of Preparation**

These consolidated financial statements include the accounts of Barrick, its subsidiaries, its share of joint operations ("JO") and its equity share of joint ventures ("JV"). When applying the equity method of accounting, specifically for Porgera, whereby the economic interest differs from the shareholding, the equity accounting is based on the economic share contractually agreed among the shareholders rather than the equity participation. For non wholly-owned, controlled subsidiaries, profit or loss for the period that is attributable to non-controlling interests is typically calculated based on the ownership of the minority shareholders in the subsidiary.

Outlined below is information related to our joint arrangements and entities other than 100% owned Barrick subsidiaries at December 31, 2024:

	Place of business	Entity type	Interest[1]	Method[2]
Nevada Gold Mines[3]	United States	Subsidiary	61.5%	Consolidation
North Mara[4]	Tanzania	Subsidiary	84%	Consolidation
Bulyanhulu[4]	Tanzania	Subsidiary	84%	Consolidation
Loulo-Gounkoto	Mali	Subsidiary	80%	Consolidation
Tongon[5]	Côte d'Ivoire	Subsidiary	89.7%	Consolidation
Pueblo Viejo[6]	Dominican Republic	Subsidiary	60%	Consolidation
Reko Diq Project[7]	Pakistan	Subsidiary	50%	Consolidation
Norte Abierto Project	Chile	JO	50%	Our share
Donlin Gold Project	United States	JO	50%	Our share
Veladero	Argentina	JO	50%	Our share
Kibali[8]	Democratic Republic of Congo	JV	45%	Equity Method
Jabal Sayid[9]	Saudi Arabia	JV	50%	Equity Method
Zaldívar[10]	Chile	JV	50%	Equity Method
Porgera Mine[11]	Papua New Guinea	JV	24.5%	Equity Method

1 Unless otherwise noted, all of our JOs are funded by contributions made by the parties sharing joint control in proportion to their economic interest.

2 For our JOs, we recognize our share of any assets, liabilities, revenues and expenses of the JO.

3 We consolidate our interests in Carlin, Cortez, Turquoise Ridge, Phoenix, Long Canyon, North Mara, Bulyanhulu, Loulo-Gounkoto, Tongon, Pueblo Viejo and the Reko Diq project and record a non-controlling interest for the interest that we do not own.

4 The Government of Tanzania receives half of the economic benefits from the Tanzanian operations (Bulyanhulu and North Mara) from taxes, royalties, clearing fees and participation in all cash distributions made by the mines, after the recoupment of capital investments. Earnings are recorded proportionally based on our equity interests each period in accordance with the terms of the agreement with the Government of Tanzania.

5 Barrick has commitments of $541 million relating to its interest in the joint ventures, including purchase obligations disclosed in note 17 and capital commitments disclosed in note 19.

6 On December 22, 2023, we completed the Porgera Project Commencement Agreement, pursuant to which the Papua New Guinea ("PNG") government and Barrick Niugini Limited ("BNL"), the 95% owner and operator of the Porgera joint venture, agreed on a partnership for the future ownership and operation of the mine. Ownership of Porgera is held in a joint venture owned 51% by PNG stakeholders and 49% by a Barrick affiliate, Porgera (Jersey) Limited ("PJL"). PJL is jointly owned on a 50/50 basis by Barrick and Zijin Mining Group and therefore Barrick holds a 24.5% ownership interest in the Porgera joint venture. Barrick holds a 25.5% interest in the economic benefits of the mine under the economic benefit sharing arrangement agreed with the PNG government whereby Barrick and Zijin Mining Group together share 47% of the overall economic benefits derived from the mine accumulated over time, and the PNG stakeholders share the remaining 53%. Refer to notes 4 for further details.**Business Combinations Business Combinations**

On the acquisition of a business, the acquisition method of accounting is used.**Foreign Currency Translation Foreign Currency Translation**

The functional currency of all of our operations is the US dollar. We translate non-US dollar balances for these operations into US dollars as follows:

- Property, plant and equipment ("PP&E"), intangible assets and equity method investments using the rates at the time of acquisition;
- Fair value through other comprehensive income ("FVOCI") equity investments using the closing exchange rate as at the balance sheet date with translation gains and losses permanently recorded in Other Comprehensive Income ("OCI");
- Deferred tax assets and liabilities using the closing exchange rate as at the balance sheet date with translation gains and losses recorded in income tax expense;
- Other assets and liabilities using the closing exchange rate as at the balance sheet date with translation gains and losses recorded in other income/expense; and
- Income and expenses using the average exchange rate for the period, except for expenses that relate to non-monetary assets and liabilities measured at historical rates, which are translated using the same historical rate as the associated non-monetary assets and liabilities.**Revenue Recognition**

Revenue RecognitionAs the deferred revenue on streaming arrangements is considered variable consideration, an adjustment is made to the transaction price per unit each time there is a change in the underlying production profile of a mine (typically in Q4 of each year). The change in the transaction price per unit results in a cumulative catch-up adjustment to revenue in the period in which the change is made, reflecting the new production profile expected to be delivered under the streaming agreement. A corresponding cumulative catch-up adjustment is made to accretion expense, reflecting the impact of the change in the deferred revenue balance.

We sell our production in the world market through the following distribution channels: gold bullion is sold in the gold spot market, to independent refineries or to our non-controlling interest holders; and gold and copper concentrate is sold to independent smelting or trading companies.

Gold Bullion Sales

Gold bullion is sold primarily in the London spot market. The sale price is fixed on the date of sale based on the gold spot price. Generally, we record revenue from gold bullion sales at the time of physical delivery, which is also the date that title to the gold passes.

Concentrate Sales

Under the terms of concentrate sales contracts with independent smelting companies, gold and copper sales prices are provisionally set on a specified future date after shipment based on market prices. We record revenues under these contracts at the time of shipment, which is also when the risks and rewards of ownership pass to the smelting companies, using forward market gold and copper prices on the expected date that final sales prices will be determined. Variations between the price recorded at the shipment date and the actual final price set under the smelting contracts are caused by changes in market gold and copper prices, which result in an embedded derivative in accounts receivable. The embedded derivative is recorded at fair value each period until final settlement occurs, with changes in fair value classified as provisional price adjustments and included in revenue in the consolidated statement of income and presented separately in note 6 of these consolidated financial statements.

Streaming Arrangements**Exploration and Evaluation Exploration and Evaluation**

Exploration expenditures are the costs incurred in the initial search for mineral deposits with economic potential or in the process of obtaining more information about existing mineral deposits. Exploration expenditures typically include costs associated with prospecting, sampling, mapping, diamond drilling and other work involved in searching for ore.

Evaluation expenditures are the costs incurred to establish the technical and commercial viability of developing mineral deposits identified through exploration activities or by acquisition. Evaluation expenditures include the cost of: (i) establishing the volume and grade of deposits through drilling of core samples, trenching and sampling activities in an ore body that is classified as either a mineral resource or a proven and probable reserve; (ii) determining the optimal methods of extraction and metallurgical and treatment processes; (iii) studies related to surveying, transportation and infrastructure requirements; (iv) permitting activities; and (v) economic evaluations to determine whether development of the mineralized material is commercially justified, including scoping, pre-feasibility and final feasibility studies.

Exploration and evaluation expenditures are expensed as incurred unless management determines that probable future economic benefits will be generated as a result of the expenditures. Once the technical feasibility and commercial viability of a program or project has been demonstrated with a pre-feasibility study, and we have recognized reserves in accordance with the Canadian Securities Administrators' National Instrument 43-101 – Standards of Disclosure for Mineral Projects, we account for future expenditures incurred in the development of that program or project in accordance with our policy for Property, Plant and Equipment, as described in note 2I.**Production Stage Production Stage**

A mine that is under construction is determined to enter the production stage when the project is in the location and condition necessary for it to be capable of operating in the manner intended by management. We use the following factors to assess whether these criteria have been met: (1) the level of capital expenditures compared to construction cost estimates; (2) the completion of a reasonable period of commissioning and testing of mine plant and equipment; (3) the ability to produce minerals in saleable form (within specifications); and (4) the ability to sustain ongoing production of minerals. When a mine construction project moves into the production stage, the capitalization of certain mine construction costs ceases and costs are either capitalized to inventory or expensed, except for capitalizable costs related to property, plant and equipment additions or improvements, open pit stripping activities that provide a future benefit, underground mine development or expenditures that meet the criteria for capitalization in accordance with IAS 16 Property, Plant and Equipment.

Construction in ProgressAssets under construction are capitalized as construction-in-progress until the asset is available for its intended use. The cost of construction-in-progress comprises its purchase price and any costs directly attributable to bringing it into working condition for its intended use. Construction-in-progress amounts related to development projects are included in the carrying amount of the development project. Construction-in-progress amounts incurred at operating mines are presented as a separate asset within PP&E. Construction-in-progress also includes deposits on long-lead items. Construction-in-progress is not depreciated. Depreciation commences once the asset is complete, commissioned and available for use.**Taxation Taxation**

Current tax for each taxable entity is based on the local taxable income at the local statutory tax rate enacted or substantively enacted at the balance sheet date and includes adjustments to tax payable or recoverable in respect of previous periods.

Deferred tax is recognized using the balance sheet method in respect of all temporary differences between the tax bases of assets and liabilities, and their carrying amounts for financial reporting purposes, except as indicated below.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- Where the deferred income tax liability arises from the initial recognition of goodwill, or the initial recognition of an asset or liability in an acquisition that is not a business combination and, at the time of the acquisition, affects neither the accounting profit nor taxable profit or loss; and
- In respect of taxable temporary differences associated with investments in subsidiaries and interests in joint arrangements, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences and the carryforward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carryforward of unused tax assets and unused tax losses can be utilized, except:

- Where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in an acquisition that is not a business combination and, at the time of the acquisition, affects neither the accounting profit nor taxable profit or loss; and
- In respect of deductible temporary differences associated with investments in subsidiaries and interests in joint arrangements, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. To the extent that an asset not previously recognized fulfills the criteria for recognition, a deferred income tax asset is recorded.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which the asset is realized or the liability is settled, based on tax rates and tax laws enacted or substantively enacted at the balance sheet date.

Current and deferred tax relating to items recognized directly in equity are recognized in equity and not in the income statement.

The Company is subject to assessments by various taxation authorities, who may interpret tax legislation differently than the Company. Tax liabilities for uncertain tax positions are adjusted by the Company to reflect its best estimate of the probable outcome of assessments and in light of changing facts and circumstances, such as the completion of a tax audit, expiration of a statute of limitations, the refinement of an estimate, and interest accruals associated with the uncertain tax positions until they are resolved. Some of these adjustments require significant judgment in estimating the timing and amount of any additional tax expense.

Royalties and Special Mining Taxes

Income tax expense includes the cost of royalties and special mining taxes payable to governments that are calculated based on a percentage of taxable profit whereby taxable profit represents net income adjusted for certain items defined in the applicable legislation.

Indirect Taxes

Indirect tax recoverable is recorded at its undiscounted amount, and is disclosed as non-current if not expected to be recovered within twelve months.**Deferred Taxes**

The Company is subject to assessments by various taxation authorities, who may interpret tax legislation differently than the Company. Tax liabilities for uncertain tax positions are adjusted by the Company to reflect its best estimate of the probable outcome of assessments and in light of changing facts and circumstances, such as the completion of a tax audit, expiration of a statute of limitations, the refinement of an estimate, and interest accruals associated with the uncertain tax positions until they are resolved. Some of these adjustments require significant judgment in estimating the timing and amount of any additional tax expense.

Deferred tax is recognized using the balance sheet method in respect of all temporary differences between the tax bases of assets and liabilities, and their carrying amounts for financial reporting purposes, except as indicated below.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- Where the deferred income tax liability arises from the initial recognition of goodwill, or the initial recognition of an asset or liability in an acquisition that is not a business combination and, at the time of the acquisition, affects neither the accounting profit nor taxable profit or loss; and
- In respect of taxable temporary differences associated with investments in subsidiaries and interests in joint arrangements, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences and the carryforward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carryforward of unused tax assets and unused tax losses can be utilized, except:

- Where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in an acquisition that is not a business combination and, at the time of the acquisition, affects neither the accounting profit nor taxable profit or loss; and
- In respect of deductible temporary differences associated with investments in subsidiaries and interests in joint arrangements, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. To the extent that an asset not previously recognized fulfills the criteria for recognition, a deferred income tax asset is recorded.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which the asset is realized or the liability is settled, based on tax rates and tax laws enacted or substantively enacted at the balance sheet date.

Current and deferred tax relating to items recognized directly in equity are recognized in equity and not in the income statement.**Indirect Taxes**

Royalties and Special Mining Taxes

Income tax expense includes the cost of royalties and special mining taxes payable to governments that are calculated based on a percentage of taxable profit whereby taxable profit represents net income adjusted for certain items defined in the applicable legislation.

Indirect Taxes

Indirect tax recoverable is recorded at its undiscounted amount, and is disclosed as non-current if not expected to be recovered within twelve months.**Other Investments**

Other Investments Investments in publicly quoted equity securities that are neither subsidiaries nor associates are categorized as FVOCI pursuant to the irrevocable election available in IFRS 9 for these instruments. FVOCI equity investments are recorded at fair value with all realized and unrealized gains and losses recorded permanently in OCI. Warrant investments are classified as fair value through profit or loss ("FVPL").

Inventory

InventoryMine operating supplies represent commodity consumables and other raw materials used in the production process, as well as spare parts and other maintenance supplies that are not classified as capital items. Provisions are recorded to reduce mine operating supplies to net realizable value, which is generally calculated by reference to its salvage or scrap value, when it is determined that the supplies are obsolete.

Material extracted from our mines is classified as either ore or waste. Ore represents material that, at the time of extraction, we expect to process into a saleable form and sell at a profit. Raw materials are comprised of both ore in stockpiles and ore on leach pads as processing is required to extract benefit from the ore. Ore is accumulated in stockpiles that are subsequently processed into gold/copper in a saleable form. The recovery of gold and copper from certain oxide ores is achieved through the heap leaching process. Work in process represents gold/copper in the processing circuit that has not completed the production process, and is not yet in a saleable form. Finished goods inventory represents gold/copper in saleable form.

Metal inventories are valued at the lower of cost and net realizable value. Cost is determined on a weighted average basis and includes all costs incurred, based on a normal production capacity, in bringing each product to its present location and condition. Cost of inventories comprises: direct labor, materials and contractor expenses, including non-capitalized stripping costs; depreciation on PP&E including capitalized stripping costs; and an allocation of general and administrative costs. As ore is removed for processing, costs are removed based on the average cost per ounce/pound in the stockpile. Net realizable value is determined with reference to relevant market prices less applicable variable selling and downstream processing costs. Inventory provisions are reversed to reflect subsequent improvements in net realizable value where the inventory is still on hand.**Royalties Royalties**

Certain of our properties are subject to royalty arrangements based on mineral production at the properties. The primary type of royalty is a net smelter return ("NSR") royalty. Under this type of royalty we pay the holder an amount calculated as the royalty percentage multiplied by the value of gold production at market gold prices less third-party smelting, refining and transportation costs. Royalty expense is recorded on completion of the production or sales process in cost of sales. Other types of royalties include:

- Net profits interest royalty to a party other than a government.
- Modified NSR royalty.
- Net smelter return sliding scale royalty.
- Gross proceeds sliding scale royalty.
- Gross smelter return royalty.
- Net value royalty.
- Land tenement royalty, and a
- Gold revenue royalty. Property, Plant and EquipmentProperty, Plant and Equipment

Estimated Useful Lives of Major Asset Categories

Buildings, plant and equipment

1 - 39 years Underground mobile equipment
3 - 7 years Light vehicles and other mobile equipment
1 - 7 years Furniture, computer and office equipment
1 - 7 years

Buildings, Plant and Equipment

At acquisition, we record buildings, plant and equipment at cost, including all expenditures incurred to prepare an asset for its intended use. These expenditures consist of: the purchase price; brokers' commissions; and installation costs including architectural, design and engineering fees, legal fees, survey costs, site preparation costs, freight charges, transportation insurance costs, duties, testing and preparation charges.
Buildings, plant and equipment are depreciated on a straight-line basis over their expected useful life, which commences when the assets are considered available for use. Once buildings, plant and equipment are considered available for use, they are measured at cost less accumulated depreciation and applicable impairment losses.
Depreciation on equipment utilized in the development of assets, including open pit and underground mine development, is recapitalized as development costs attributable to the related asset.Mineral Properties

Mineral Properties

Mineral properties consist of: the fair value attributable to mineral reserves and resources acquired in a business combination or asset acquisition: underground mine development costs; open pit mine development costs; capitalized exploration and evaluation costs; and capitalized interest. In addition, we incur project costs which are generally capitalized when the expenditures result in a future benefit.

i) Acquired Mining Properties

On acquisition of a mining property, we prepare an estimate of the fair value attributable to the proven and probable mineral reserves, mineral resources and exploration potential attributable to the property. The estimated fair value attributable to the mineral reserves and the portion of mineral resources considered to be probable of economic extraction at the time of the acquisition is depreciated on a units of production ("UOP") basis whereby the denominator is the proven and probable reserves and the portion of mineral resources considered to be probable of economic extraction based on the current life of mine ("LOM") plan that benefit from the development and are considered probable of economic extraction. The estimated fair value attributable to mineral resources that are not considered to be probable of economic extraction at the time of the acquisition is not subject to depreciation until the resources become probable of economic extraction in the future. The estimated fair value attributable to exploration licenses is recorded as an intangible asset and is not subject to depreciation until the property enters production.

ii) Underground Mine Development Costs

At our underground mines, we incur development costs to build new shafts, drifts and ramps that will enable us to physically access ore underground. The time over which we will continue to incur these costs depends on the mine life. These underground development costs are capitalized as incurred.
Capitalized underground development costs are depreciated on a UOP basis, whereby the denominator is the estimated ounces/pounds of gold/copper in proven and probable reserves and the portion of resources considered probable of economic extraction based on the current LOM plan that benefit from the development and are considered probable of economic extraction.

iii) Open Pit Mine Development Costs

In open pit mining operations, it is necessary to remove overburden and other waste materials to access ore from which minerals can be extracted economically. The process of mining overburden and waste materials is referred to as stripping.
Stripping costs incurred in order to provide initial access to the ore body (referred to as pre-production stripping) are capitalized as open pit mine development costs.
Pre-production stripping costs are capitalized until an "other than de minimis" level of mineral is extracted, after which time such costs are either capitalized to inventory or, if it qualifies as an open pit stripping activity that provides a future benefit, to PP&E. We consider various relevant criteria to assess when an "other than de minimis" level of mineral is produced. Some of the criteria considered would include, but are not limited to, the following: (1) the amount of minerals mined versus total ounces in ore expected over the LOM; (2) the amount of ore tonnes mined versus total LOM expected ore tonnes mined; (3) the current stripping ratio versus the strip ratio expected over the LOM; and (4) the ore grade mined versus the grade expected over the LOM.
Stripping costs incurred during the production stage of an open pit are accounted for as costs of the inventory produced during the period that the stripping costs are incurred, unless these costs are expected to provide a future economic benefit to an identifiable component of the ore body. Components of the ore body are based on the distinct development phases identified by the mine planning engineers when determining the optimal development plan for the open pit. Production phase stripping costs generate a future economic benefit when the related stripping activity: (1) improves access to a component of the ore body to be mined in the future; (2) increases the fair value of the mine (or open pit) as access to future mineral reserves becomes less costly; and (3) increases the productive capacity or extends the productive life of the mine (or open pit). Production phase stripping costs that are expected to generate a future economic benefit are capitalized as open pit mine development costs.
Capitalized open pit mine development costs are depreciated on a UOP basis whereby the denominator is the estimated ounces/pounds of gold/copper in proven and probable reserves and the portion of resources considered probable of economic extraction based on the current LOM plan that benefit from the development and are considered probable of economic extraction.

Construction in ProgressProduction Stage

A mine that is under construction is determined to enter the production stage when the project is in the location and
condition necessary for it to be capable of operating in the manner intended by management. We use the following factors to assess whether these criteria have been met: (1) the level of capital expenditures compared to construction cost estimates; (2) the completion of a reasonable period of commissioning and testing of mine plant and equipment; (3) the ability to produce minerals in saleable form (within specifications); and (4) the ability to sustain ongoing production of minerals.
When a mine construction project moves into the production stage, the capitalization of certain mine construction costs ceases and costs are either capitalized to inventory or expensed, except for capitalizable costs related to property, plant and equipment additions or improvements, open pit stripping activities that provide a future benefit, underground mine development or expenditures that meet the criteria for capitalization in accordance with IAS 16 Property, Plant and Equipment.
Construction in ProgressAssets under construction are capitalized as construction-in-progress until the asset is available for its intended use. The cost of construction-in-progress comprises its purchase price and any costs directly attributable to bringing it into working condition for its intended use. Construction-in-progress amounts related to development projects are included in the carrying amount of the development project. Construction-in-progress amounts incurred at operating mines are presented as a separate asset within PP&E. Construction-in-progress also includes deposits on long lead items. Construction-in-progress is not depreciated. Depreciation commences once the asset is complete, commissioned and available for use.

Capitalized Interest

We capitalize interest costs for qualifying assets. Qualifying assets are assets that require a significant amount of time to prepare for their intended use, including projects that are in the exploration and evaluation, development or construction stages. Qualifying assets also include significant expansion projects at our operating mines. Capitalized interest costs are considered an element of the cost of the qualifying asset which is determined based on gross expenditures incurred on an asset. Capitalization ceases when the asset is substantially complete or if active development is suspended or ceases. Where the funds used to finance a qualifying asset form part of general borrowings, the amount capitalized is calculated using a weighted average of rates applicable to the relevant borrowings during the period. Where funds borrowed are directly attributable to a qualifying asset, the amount capitalized represents the borrowing costs specific to those borrowings. Where surplus funds available out of money borrowed specifically to finance a project are temporarily invested, the total capitalized interest is reduced by income generated from short-term investments of such funds.

Capitalized InterestImpairment (and Reversals of Impairment) of Non-Current Assets

m) Impairment (and Reversals of Impairment) of Non-Current Assets

We review and test the carrying amounts of PP&E and intangible assets with finite lives when an indicator of impairment is considered to exist. Impairment (or reversals of impairment) assessments on PP&E and intangible assets are conducted at the level of the cash generating unit ("CGU"), which is the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and includes liabilities specific to the CGU. For operating mines and projects, the individual mine/project represents a CGU for impairment testing.
The recoverable amount of a CGU is the higher of Value in Use ("VIU") and Fair Value Less Costs of Disposal ("FVLCD"). We have determined that the FVLCD is greater than the VIU amounts and is therefore used as the recoverable amount for impairment testing purposes. An impairment loss is recognized for any excess of the carrying amount of a CGU over its recoverable amount where both the recoverable amount and carrying value include the associated other assets and liabilities, including taxes where applicable, of the CGU. Where it is not appropriate to allocate the loss to a separate asset, an impairment loss related to a CGU is allocated to the carrying amount of the assets of the CGU on a pro rata basis based on the carrying amount of its non-monetary assets.
Impairment ReversalAn assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses may no longer exist or may have decreased. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the CGU's recoverable amount since the last impairment loss was recognized. This reversal is recognized in the consolidated statements of income and is limited to the carrying value that would have been determined, net of any depreciation where applicable, had no impairment charge been recognized in prior years. When an impairment reversal is undertaken, the recoverable amount is assessed by reference to the higher of VIU and FVLCD. We have determined that the FVLCD is greater than the VIU amounts and is therefore used as the recoverable amount for impairment testing purposes.Intangible AssetsIntangible Assets
On acquisition of a mineral property in the exploration stage, we prepare an estimate of the fair value attributable to the exploration licenses acquired, including the fair value attributable to mineral resources, if any, of that property. The fair value of the exploration license is recorded as an intangible asset (acquired exploration potential) as at the date of acquisition. When an exploration stage property moves into development, the acquired exploration potential attributable to that property is transferred to mining interests within PP&E.
We also have water rights associated with our mineral properties. Upon acquisition, they are measured at initial cost and are depreciated when they are being used. They are also subject to impairment testing when an indicator of impairment is considered to exist.GoodwillGoodwill
Goodwill is tested for impairment in Q4 and also when there is an indicator of impairment. At the date of acquisition, goodwill is assigned to the CGU or group of CGUs that is expected to benefit from the synergies of the business combination. For the purposes of impairment testing, goodwill is allocated to the Company's operating segments, which are our individual mine-sites, and corresponds to the level at which goodwill is internally monitored by the Chief Operating Decision Maker ("CODM"). Goodwill impairment charges are not reversible.
For a CGU to which goodwill has been allocated, the most recent recoverable amount determined for the CGU may be used in the annual impairment assessment of that CGU in the current year provided all the following criteria are met:

- the assets and liabilities making up the CGU have not changed significantly (change in book value or change in nature of assets/ liabilities in CGU) since the most recent recoverable amount calculation;
- The most recent recoverable amount calculation, completed in prior year, resulted in an amount that exceeded the carrying amount of the CGU by a substantial margin; and
- Based on an analysis of events that have occurred and circumstances that have changed since the most recent recoverable amount calculation, the likelihood that a current recoverable amount determination will be less than the carrying amount of the CGU is remote.DebtDebt

Debt is recognized initially at fair value, net of financing costs incurred, and subsequently measured at amortized cost. Any difference between the amounts originally received and the redemption value of the debt is recognized in the consolidated statements of income over the period to maturity using the effective interest method.Environmental Rehabilitation ProvisionEnvironmental Rehabilitation Provision
Mining, extraction and processing activities normally give rise to obligations for environmental rehabilitation. Rehabilitation work can include facility decommissioning and dismantling; removal or treatment of waste materials; site and land rehabilitation, including compliance with and monitoring of environmental regulations; security and other site-related costs required to perform the rehabilitation work; and operation of equipment designed to reduce or eliminate environmental effects. The extent of work required and the associated costs are dependent on the requirements of relevant authorities and our environmental policies. Routine operating costs that may impact the ultimate closure and rehabilitation activities, such as waste material handling conducted as an integral part of a mining or production process, are not included in the provision. Abnormal costs arising from unforeseen circumstances, such as the contamination caused by unplanned discharges, are recognized as an expense and liability when the event that gives rise to an obligation occurs and reliable estimates of the required rehabilitation costs can be made.
Provisions for the cost of each rehabilitation program are normally recognized at the time that an environmental disturbance occurs or a new legal or constructive obligation is determined. When the extent of disturbance increases over the life of an operation, the provision is increased accordingly. The major parts of the carrying amount of provisions relate to closure/rehabilitation of tailings facilities, heap leach pads and waste dumps; demolition of buildings/mine facilities; ongoing water treatment; and ongoing care and maintenance and security of closed mines. Costs included in the provision encompass all closure and rehabilitation activity expected to occur progressively over the life of the operation at the time of closure and post-closure in connection with disturbances as at the reporting date. Estimated costs included in the determination of the provision reflect the risks and probabilities of alternative estimates of cash flows required to settle the obligation at each particular operation. The expected rehabilitation costs are estimated based on the cost of external contractors performing the work or the cost of performing the work internally depending on management's intention.
The timing of the actual rehabilitation expenditure is dependent upon a number of factors such as the life and nature of the asset, the operating license conditions and the environment in which the mine operates. Expenditures may occur before and after closure and can continue for an extended period of time depending on rehabilitation requirements. Rehabilitation provisions are measured at the expected value of future cash flows, which exclude the effect of inflation, discounted to their present value using a current US dollar real risk-free pre-tax discount rate. The unwinding of the discount, referred to as accretion expense, is included in finance costs and results in an increase in the
amount of the provision. Provisions are updated each reporting period for changes to expected cash flows and for the effect of changes in the discount rate, and the change in estimate is added to or deducted from the related asset and depreciated over the expected economic life of the operation to which it relates.
Significant judgments and estimates are involved in forming expectations of future activities, the amount and timing of the associated cash flows and the period over which we estimate those cash flows. Those expectations are formed based on existing environmental and regulatory requirements or, if more stringent, our environmental policies which give rise to a constructive obligation.
When provisions for closure and rehabilitation are initially recognized, the corresponding cost is capitalized as an asset, representing part of the cost of acquiring the future economic benefits of the operation. The capitalized cost of closure and rehabilitation activities is recognized in PP&E and depreciated over the expected economic life of the operation to which it relates.
Adjustments to the estimated amount and timing of future closure and rehabilitation cash flows are a normal occurrence in light of the significant judgments and estimates involved. The principal factors that can cause expected cash flows to change are: the construction of new processing facilities; changes in the quantities of material in reserves and resources with a corresponding change in the life of mine plan; changing ore characteristics that impact required environmental protection measures and related costs; changes in water quality or volumes that impact the extent of water treatment required; changes in discount rates; changes in foreign exchange rates; changes in Barrick's closure policies; and changes in laws and regulations governing the protection of the environment.
Rehabilitation provisions are adjusted as a result of changes in estimates and assumptions. Those adjustments are accounted for as a change in the corresponding cost of the related assets, including the related mineral property, except where a reduction in the provision is greater than the remaining net book value of the related assets, in which case the value is reduced to nil and the remaining adjustment is recognized in the consolidated statements of income. In the case of closed sites, changes in estimates and assumptions are recognized immediately in the consolidated statements of income. For an operating mine, the adjusted carrying amount of the related asset is depreciated prospectively. Adjustments also result in changes to future finance costs. Provisions are discounted to their present value using a current US dollar real risk-free pre-tax discount rate and the accretion expense is included in finance costs.Stock-Based CompensationStock-Based Compensation
We recognize the expense related to these plans over the vesting period, beginning once the grant has been approved and announced to the beneficiaries.
Barrick offers cash-settled (Restricted Share Units ("RSU"), Deferred Share Units ("DSU") and Performance Granted Share Units ("PGSU")) awards to certain employees, officers and directors of the Company.

Restricted Share Units

Under our Long-Term Incentive Plan, selected employees are granted RSUs where each RSU has a value equal to one Barrick common share. RSUs generally vest within
years in cash and the after-tax value of the award may be used to purchase common shares on the open market, depending on the terms of the grant. Additional RSUs are credited to reflect dividends paid on Barrick common shares over the vesting period.three
A liability for RSUs is measured at fair value on the grant date and is subsequently adjusted for changes in fair value. The liability is recognized on a straight-line basis over the vesting period, with a corresponding charge to compensation expense, as a component of general and administrative expenses and cost of sales. Compensation expenses for RSUs incorporate an estimate for expected forfeiture rates based on which the fair value is adjusted.

Deferred Share Units

Under our DSU plan, Directors must receive at least 63.6% of their basic annual retainer in the form of DSUs or cash to purchase common shares that cannot be sold, transferred or otherwise disposed of until the Director leaves the Board. Each DSU has the same value as one Barrick common share. DSUs must be retained until the Director leaves the Board, at which time the cash value of the DSUs is paid out. Additional DSUs are credited to reflect dividends paid on Barrick common shares.
The initial fair value of the liability is calculated as of the grant date and is recognized immediately. Subsequently, at each reporting date and on settlement, the liability is remeasured, with any change in fair value recorded as compensation expense in the period.

Performance Granted Share Units

Under our PGSU plan, selected employees are granted PGSUs, where each PGSU has a value equal to one Barrick common share. Annual PGSU awards are determined based on a multiple ranging from three to six times base salary (depending on position and level of responsibility) multiplied by a performance factor. PGSUs vest within years in cash, and the after-tax value of the award is used to purchase common shares on the open market. Generally, these shares cannot be sold until the employee meets their share ownership requirement (in which case only those Barrick shares in excess of the requirement can be sold), or until they retire or leave the Company.three
The initial fair value of the liability is calculated as of the grant date and is recognized within compensation expense using the straight-line method over the vesting period. Subsequently, at each reporting date and on settlement, the liability is remeasured, with any changes in fair value recorded as compensation expense.

New Accounting Standards IssuedNew Accounting Standards Issued No standards have been early adopted in the current period.

Certain new accounting standards and interpretations have been published that are either applicable in the current year or not mandatory for the current period. We have assessed these standards, including Amendments to IAS 1 - Non-current Liabilities with Covenants, and determined they do not have a material impact on Barrick in the current reporting period. In addition, the following standards have been issued by the International Accounting Standards Board ("IASB") and we are currently assessing the impact on our consolidated financial statements.

- Amendments to the Classification and Measurement of Financial Instruments (IFRS 9 and IFRS 7) with mandatory application of the standard in annual reporting periods beginning on or after January 1, 2026.
- IFRS 18 Presentation and Disclosure in Financial Statements with mandatory application of the standard in annual reporting periods beginning on or after January 1, 2027.

MATERIAL ACCOUNTING POLICY INFORMATION (Tables) 12 Months Ended

Dec. 31, 2024

Material accounting policy information [Abstract] Schedule of subsidiaries other than 100% owned Barrick subsidiaries

Outlined below is information related to our joint arrangements and entities other than 100% owned Barrick subsidiaries at December 31, 2024:

Place of business Entity type

Interest[1]

Method[2]

Nevada Gold Mines[3] United States Subsidiary 61.5% Consolidation
North Mara[3,4] Tanzania Subsidiary 84% Consolidation
Bulyanhulu[3,4] Tanzania Subsidiary 84% Consolidation
Loulo-Gounkoto[3] Mali Subsidiary 80% Consolidation
Tongon[3] Côte d'Ivoire Subsidiary 89.7% Consolidation
Pueblo Viejo[3] Dominican Republic Subsidiary 60% Consolidation
Reko Diq Project[3] Pakistan Subsidiary 50% Consolidation Norte Abierto Project Chile JO 50% Our share Donlin Gold Project United States JO 50% Our share Veladero Argentina JO 50% Our share
Kibali[5] Democratic Republic of Congo JV 45% Equity Method
Jabal Sayid[5] Saudi Arabia JV 50% Equity Method
Zaldívar[5] Chile JV 50% Equity Method
Porgera Mine[5,6] Papua New Guinea JV 24.5% Equity Method

1 Unless otherwise noted, all of our JOs are funded by contributions made by the parties sharing joint control in proportion to their economic interest.

2 For our JOs, we recognize our share of any assets, liabilities, revenues and expenses of the JO.

3 We consolidate our interests in Carlin, Cortez, Turquoise Ridge, Phoenix, Long Canyon, North Mara, Bulyanhulu, Loulo-Gounkoto, Tongon, Pueblo Viejo and the Reko Diq project and record a non-controlling interest for the interest that we do not own.

4 The Government of Tanzania receives half of the economic benefits from the Tanzanian operations (Bulyanhulu and North Mara) from taxes, royalties, clearing fees and participation in all cash distributions made by the mines, after the recoupment of capital investments. Earnings are recorded proportionally based on our equity interests each period in accordance with the terms of the agreement with the Government of Tanzania.

5 Barrick has commitments of $541 million relating to its interest in the joint ventures, including purchase obligations disclosed in note 17 and capital commitments disclosed in note 19.

6 On December 22, 2023, we completed the Porgera Project Commencement Agreement, pursuant to which the Papua New Guinea ("PNG") government and Barrick Niugini Limited ("BNL"), the 95% owner and operator of the Porgera joint venture, agreed on a partnership for the future ownership and operation of the mine. Ownership of Porgera is held in a joint venture owned 51% by PNG stakeholders and 49% by a Barrick affiliate, Porgera (Jersey) Limited ("PJL"). PJL is jointly owned on a 50/50 basis by Barrick and Zijin Mining Group and therefore Barrick holds a 24.5% ownership interest in the Porgera joint venture. Barrick holds a 23.5% interest in the economic benefits of the mine under the economic benefit sharing arrangement agreed with the PNG government whereby Barrick and Zijin Mining Group together share 47% of the overall economic benefits derived from the mine accumulated over time, and the PNG stakeholders share the remaining 53%. Refer to notes 4 for further details. Schedule of estimated useful lives of major asset categories

CRITICAL JUDGMENTS, ESTIMATES, ASSUMPTIONS AND RISKS (Tables) 12 Months Ended

Dec. 31, 2024

Disclosure of changes in accounting estimates [abstract] Gold and copper mineral reserves assumption [Table Text Block]

We estimate our future production levels, including mineral reserves and resources based on information compiled by qualified persons as defined in accordance with the Canadian Securities Administrators' National Instrument 43-101 -Standards of Disclosure for Mineral Projects requirements. To calculate our gold and copper mineral reserves, as well as measured, indicated, and inferred mineral resources, we have used the following assumptions. Refer to notes 19 and 21.

As at December 31, 2023 **Gold ($/oz)** Mineral reserves $ 1,400 $1,300 Measured, indicated and inferred 1,900 1,700 **Copper ($/lb)** Mineral reserves 3.00 3.00 Measured, indicated and inferred 4.00 4.00

GOODWILL AND OTHER INTANGIBLE ASSETS (Tables) 12 Months Ended
Dec. 31, 2024
Intangible assets and goodwill [abstract] Schedule of intangible assets

a) Intangible Assets

	Water rights[1]	Technology[2]	Exploration potential[3]	Total
Opening balance January 1, 2023	$61	$6	$82	$149
Amortization and impairment losses	—	—	—	—
Closing balance December 31, 2023	$61	$6	$82	$149
Amortization and impairment losses	—	(1)	—	(1)
Closing balance December 31, 2024	$61	$5	$82	$148
Cost	$61	$17	$252	$330
Accumulated amortization and impairment losses	—	(12)	(170)	(182)
Net carrying amount December 31, 2024	$61	$5	$82	$148

[1] Relates to water rights in South America, and will be amortized through cost of sales when we begin using these in the future.
[2] The amount is amortized through cost of sales using the UOP method over LOM ounces of the Pueblo Viejo mine, with no assumed residual value.
[3] Exploration potential consists of the estimated fair value attributable to exploration licenses acquired as a result of a business combination or asset acquisition. The carrying value of the licenses will be transferred to PP&E when the development of attributable mineral resources commences. Schedule of goodwill Goodwill

	Closing balance December 31, 2023	Impairments

IMPAIRMENT AND REVERSAL OF NON-CURRENT ASSETS (Tables)12 Months Ended

Dec. 31, 2024

Impairment of assets [Abstract]: Schedule of impairments (reversals)

For the year ended December 31, 2024, we recorded a net impairment reversal of $941 million (2023: net impairment charges of $312 million) for non-current assets and $484 million (2023: $nil) of impairment to goodwill, as summarized in the following table:

	For the years ended December 31,		
	2024	2023	
Lumwana	($655)	$—	
Veladero	($37)	—	
Carlin	$2	4	
Long Canyon	$9	280	
Pueblo Viejo	$0	—	
Cortez	$0	—	
Bulyanhulu	—	17	
North Mara	—	5	
Other	$1	6	
Total impairment charges (reversals) of non-current assets	($941)	$312	
Loulo-Gounkoto goodwill	$484	—	
Total goodwill impairment charges	$484	$—	
Total impairment charges (reversals)	($457)	$312	

Schedule of key assumptions used in impairment testing

The short-term and long-term gold and copper price assumptions used in our fourth quarter 2024 and 2023 impairment testing are as follows:

	2023	Gold price per oz (short-term)	$2,400	$1,900	Gold price per oz (long-term)	$1,850	1,600	Copper price per lb (short-term)	$4.25	3.75	Copper price per lb (long-term)	$4.00	3.50

Neither the increase in the long-term gold price nor long-term copper price assumption from 2023 were considered an indicator of impairment reversal as the increased price would not, in isolation, have resulted in the identification of an impairment reversal at our mines with reversible impairments. The other key assumptions used in our impairment testing, based on the CGUs tested in each year, are summarized in the following table:

	2023	WACC - gold (range)	5%-9%	5%-9%	WACC - gold (avg)	6 %	6 %	WACC - copper	12 %	n/a	Value per ounce of gold	n/a	$40	NAV multiple - gold (avg)	1.2	1.2	LOM years - gold (avg)	21	23

Schedule of carrying value of CGU's Kibali's carrying value is comprised of the equity investment and JV receivable

The carrying value of the CGUs that are most sensitive to changes in the key assumptions used in the FVLCD calculation are:

	As at December 31, 2024	Carrying Value	Loulo-Gounkoto	$2,080	Kibali[1]	2,477	Lumwana	2,401	Veladero	804	Hemlo	368

[1] Sensitivity analysis impact on impairment

Instead of the non-current asset impairment reversal of $655 million recognized at Lumwana, if the following changes were made, the theoretical impairment reversal would be as follows:

	1% increase in WACC	$301	1% decrease in WACC	1,067	$0.25/lb increase in copper prices	1,507	$0.25/lb decrease in copper prices	—

OTHER ASSETS (Tables) 12 Months Ended

Dec. 31, 2024

Other assets abstract [Abstract]: Schedule of other assets

	As at December 31, 2024	As at December 31, 2023
Value added taxes receivable[1]	$222	$134
Other investments[2]	$2	131
Notes receivable[3]	$17	187
Norte Abierto JV partner receivable	$1	61
Restricted cash[4]	$6	101
Kibali JV Receivable[5]	$12	358
Prepayments[6]	$34	212
PV resettlement receivable	$6	32
Other	$76	140
	$1,295	$1,356

1 Includes VAT and fuel tax receivables of $100 million in Mali, $6 million in Argentina, $69 million in Tanzania and $47 million in Chile (Dec. 31, 2023: $nil, $7 million, $69 million and $58 million, respectively).
2 Includes equity investments in other mining companies.
3 Primarily represents the interest bearing promissory note due from NovaGold.
4 Primarily represents the cash balance at Pueblo Viejo that is contractually restricted in respect of disbursements for environmental rehabilitation, which are expected to occur near the end of Pueblo Viejo's mine life.
5 Refer to note 16 for further details.
6 Primarily relates to prepaid royalties at Carlin.

1 The agreements that govern our long-term debt each contain various provisions which are not summarized herein. These provisions allow Barrick, at its option, to redeem indebtedness prior to maturity at specified prices and also may permit redemption of debt by Barrick upon the occurrence of certain specified changes in tax legislation.

2 Amortization of debt premium/discount and increases (decreases) in capital leases.

3 Consists of $850 million (2023: $850 million) of our wholly-owned subsidiary Barrick North America Finance LLC ("BNAF") notes due 2041.

4 Consists of $375 million (2023: $375 million) of 5.25% notes which mature in 2042.

5 Consists of $400 million (2023: $400 million) of 5.80% notes which mature in 2034.

6 Consists of $600 million (2023: $600 million) of 6.35% notes which mature in 2036.

7 Consists of $1.1 billion (2023: $1.1 billion) in conjunction with our wholly-owned subsidiary BNAF and our wholly-owned subsidiary Barrick (PD) Australia Finance Pty Ltd. ("BPDAF"). This consists of $250 million (2023: $250 million) of BNAF notes due 2038 and $807 million (2023: $807 million) of BPDAF notes due 2039.

8 Consists primarily of leases at Nevada Gold Mines, $12 million, Loulo-Gounkoto, $18 million, Veladero, $2 million, Lumwana, $1 million, Hemlo, $9 million, North Mara, $4 million and Tongon, $5 million (2023: $13 million, $20 million, $1 million, $3 million, $1 million, $nil and $6 million, respectively).

9 Consists of $850 million (2023: $850 million) in conjunction with our wholly-owned subsidiary BNAF.

10 We provide an unconditional and irrevocable guarantee on all BNAF, BPDAF, Barrick Gold Finance Company ("BGFC"), and Barrick (HMC) Mining ("BHMC") notes and generally provide such guarantees on all BNAF, BPDAF, BGFC, and BHMC notes issued, which rank equally with our other unsecured and unsubordinated obligations.

11 The current portion of long-term debt consists of leases ($13 million; 2023: $11 million) and other debt obligations ($11 million; 2023: $nil).

5.7% Notes

In June 2011, BNAF issued an aggregate of $4.0 billion in debt securities including $850 million of 5.70% notes that mature in 2041 issued by BNAF (collectively, the "BNAF Notes"). Barrick provides an unconditional and irrevocable guarantee of the BNAF Notes, which rank equally with Barrick's other unsecured and unsubordinated obligations.

5.25% Notes

On April 3, 2012, we issued an aggregate of $2 billion in debt securities including $750 million of 5.25% notes that mature in 2042. During 2022, $375 million of the 5.25% notes was repaid.

Other Fixed Rate Notes

On October 16, 2009, we issued debentures through our wholly-owned indirect subsidiary BPDAF consisting of $850 million of 30-year notes with a coupon rate of 5.95%. We also provide an unconditional and irrevocable guarantee of these payments, which rank equally with our other unsecured and unsubordinated obligations. During 2023, $43 million of the 5.95% notes was repaid.
In September 2008, we issued an aggregate of $1.25 billion of notes through our wholly-owned indirect subsidiaries BNAF and BGFC including $250 million of 30-year notes with a coupon rate of 7.5%. We also provide an unconditional and irrevocable guarantee of these payments, which rank equally with our other unsecured and unsubordinated obligations.

5.75% Notes

On May 2, 2013, we issued an aggregate of $3 billion in notes through Barrick and our wholly-owned indirect subsidiary BNAF including $850 million of 5.75% notes issued by BNAF that mature in 2043. $2 billion of the net proceeds from this offering was used to repay amounts outstanding under our revolving Credit Facility at that time. We provide an unconditional and irrevocable guarantee on the $850 million of 5.75% notes issued by BNAF, which rank equally with our other unsecured and unsubordinated obligations.

Credit Facility

In May 2024, we completed an update of the credit and guarantee agreement (the "Credit Facility") with certain Lenders, which requires such Lenders to make available to us a credit facility of $3.0 billion or the equivalent amount in Canadian dollars. The Credit Facility, which is unsecured, currently has an interest rate of Secured Overnight Financing Rate ("SOFR") plus 1.00% on drawn amounts, and a standby rate of 0.09% on undrawn amounts. The Credit Facility incorporates sustainability-linked metrics which are made up of annual environmental and social performance targets directly influenced by Barrick's actions, rather than based on external ratings. The performance targets include Scope 1 and Scope 2 greenhouse gas emissions intensity, water use efficiency (reuse and recycling rates), and total recordable injury frequency rate. Barrick may incur positive or negative pricing adjustments on drawn credit spreads and standby fees based on its sustainability performance versus the targets that have been set. As part of the update, the termination date of the Credit Facility was extended from May 2028 to May 2029. The Credit Facility was undrawn as at December 31, 2024.

	For the years ended December 31			Interest cost
	2023			
Effective rate[1]	Interest cost			
Effective rate	5.7% notes	$49	5.74 %	$49

1 This table illustrates the contractual undiscounted cash flows, and may not agree with the amounts disclosed in the consolidated balance sheet.

2 Included in Other debt obligations in the Long-Term Debt table.

3 Included in Other fixed rate notes in the Long-Term Debt table. Schedule of market risks

In the normal course of business, our assets, liabilities and forecasted transactions, as reported in US dollars, are impacted by various market risks including, but not limited to:

Item	Impacted by
● Revenue	
● Prices of gold, silver and copper	
● Cost of sales	○ Consumption of diesel fuel, propane, natural gas, and electricity ○ Prices of diesel fuel, propane, natural gas, and electricity ○ Non-US dollar expenditures ○ Currency exchange rates - US dollar versus A$, ARS, C$, DOP, EUR, TZS, XOF, ZAR and ZMW
● General and administration, exploration and evaluation costs	○ Currency exchange rates - US dollar versus A$, ARS, C$, DOP, GBP, PKR, TZS, XOF, ZAR, and ZMW
● Capital expenditures	○ Non-US dollar capital expenditures ○ Currency exchange rates - US dollar versus A$, ARS, C$, DOP, EUR, GBP, PKR, XOF, ZAR, and ZMW ○ Consumption of steel ○ Price of steel
● Interest earned on cash and equivalents	● US dollar interest rates
● Interest paid on fixed-rate borrowings	● US dollar interest rates

Receivables from provisional copper and gold sales	—	204	—	204	$42	$204	$—	$246

Inputs Significant Unobservable Inputs Aggregate Fair Value (Level 1) (Level 2) (Level 3)
Other investments[2] $131 $ — $ — $131 Receivables from provisional copper and gold sales — 246 — 246 $131 $246 $ — $377
2 Includes equity investments in other mining companies.

b) Fair Values of Financial Assets and Liabilities

	At December 31, 2023			Carrying amount	Estimated fair value
	Carrying amount	Estimated fair value	Financial assets		
Other assets[1]	$776	$776	$807	$807	
Other investments[2]	$2	$2	$131	$131	
	$818	$818	$938	$938	Financial liabilities
Debt[3]	$4,729	$4,821	$4,726	$5,107	
Other liabilities	$95	$95	$74	$74	
	$5,324	$5,416	$5,300	$5,681	

1 Includes restricted cash and amounts due from our partners and joint ventures.
2 Includes equity investments in other mining companies. Recorded at fair value. Quoted market prices are used to determine fair value.
3 Debt is generally recorded at amortized cost. The fair value of debt is primarily determined using quoted market prices. Balance includes both current and long-term portions of debt.

The fair values of the Company's remaining financial assets and liabilities, which include cash and equivalents, accounts receivable and trade and other payables approximate their carrying values due to their short-term nature. We do not offset financial assets with financial liabilities.

c) Assets Measured at Fair Value on a Non-Recurring Basis Valuation Techniques

	At December 31, 2024			Quoted prices in active markets for identical assets	Significant other observable inputs	Significant unobservable inputs	Aggregate fair value
Property, plant and equipment[1]	—	—	—	—			
Goodwill	—	—	—	—			

1 Property, plant and equipment were written down by $151 million, which was included in earnings in this period.[1] Disclosure of fair value measurement of financial assets and liabilities

	At December 31, 2023			Carrying amount	Estimated fair value
	Carrying amount	Estimated fair value	Financial assets		
Other assets	$776	$776	$807	$807	
Other investments[2]	$2	$2	$131	$131	
	$818	$818	$938	$938	Financial liabilities
Debt[3]	$4,729	$4,821	$4,726	$5,107	
Other liabilities	$95	$95	$74	$74	
	$5,324	$5,416	$5,300	$5,681	

1 Includes restricted cash and amounts due from our partners and joint ventures.
2 Includes equity investments in other mining companies. Recorded at fair value. Quoted market prices are used to determine fair value.
3 Debt is generally recorded at amortized cost. The fair value of debt is primarily determined using quoted market prices. Balance includes both current and long-term portions of debt.

PROVISIONS (Tables) 12 Months Ended
Dec. 31, 2024
Other provisions [abstract] Schedules of provisions Provisions

a) Provisions | As at December 31, 2023 | Environmental rehabilitation ("PER") | $1,751 | $1,883 | Post-retirement benefits | 34 | 36 | Share-based payments | 23 | 20 | Other employee benefits | 32 | 36 | Other | 122 | 83 | $1,962 | $2,058 |

b) Environmental Rehabilitation | 2023 | At January 1 | $2,153 | $2,204 | PERs divested during the year[1] | — | (64) | Closed Sites | Impact of revisions to expected cash flows recorded in earnings | 38 | 14 | Settlements | Cash payments | (121) | (117) | Settlement gains | (10) | (7) | Accretion | 41 | 29 | Operating Sites | PER revisions in the year | (92) | 91 | Settlements | Cash payments | (76) | (50) | Settlement gains | (4) | (5) | Accretion | 48 | 58 | At December 31 | $1,977 | $2,153 | Current portion (note 24) | (226) | (270) | $1,751 | $1,883 |

1 2023 primarily relates to the transfer of our Porgera mine to equity accounting method investment.

The eventual settlement of substantially all PERs estimated is expected to take place between 2025 and 2064.

The total PER has decreased in Q4 2024 by $147 million primarily due to an increase in the discount rate, and spending incurred during the quarter, partially offset by changes in cost estimates at our US closure sites, Pascua Lama, Pierina, Hemlo and Lumwana properties, combined with accretion. For the year ended December 31, 2024, our PER balance decreased by $176 million primarily due to spending incurred during the year, and an increase in the discount rate, partially offset by accretion, combined with the changes in cost estimates described above. A 1% increase in the discount rate would result in a decrease in the PER by $186 million and a 1% decrease in the discount rate would result in an increase in the PER by $228 million, while holding the other assumptions constant.

- Definition

Decommissioning, restoration and rehabilitation costs for closed mines

+ References

No definition available.

+ Details
Name:abx_DecommissioningRestorationAndRehabilitationCosts Namespace Prefix:abx_ Data Type:xbrli:monetaryItemType Balance Type:debit Period Type:duration

- Definition

The amount of all expenses directly or indirectly attributed to the goods or services sold. Attributed expenses include, but are not limited to, costs previously included in the measurement of inventory that has now been sold, such as depreciation and maintenance of factory buildings and equipment used in the production process, unallocated production overheads, and abnormal amounts of production costs of inventories.

Name:abx_DisclosureOfDetailedInformationAboutCostOfSalesLineItems Namespace Prefix:abx_ Data Type:xbrli:stringItemType Balance Type:na Period Type:duration

- Definition

The amount of all expenses directly or indirectly attributed to the goods or services sold. Attributed expenses include, but are not limited to, costs previously included in the measurement of inventory that has now been sold, such as depreciation and maintenance of factory buildings and equipment used in the production process, unallocated production overheads, and abnormal amounts of production costs of inventories.

- Definition

The amount of investments accounted for using the equity method. The equity method is a method of accounting whereby the investment is initially recognised at cost and adjusted thereafter for the post-acquisition change in the investor's share of net assets of the investee. The investor's profit or loss includes its share of the profit or loss of the investee. The investor's other comprehensive income includes its share of the other comprehensive income of the investee. [Refer: At cost [member]]

+ Details

Name:ifrs-full_ComprehensiveIncome Namespace Prefix:ifrs-full Data Type:xbrli:monetaryItemType Balance Type:credit Period Type:duration

– Definition

The amount of all expenses directly or indirectly attributed to the goods or services sold. Attributed expenses include, but are not limited to, costs previously included in the measurement of inventory that has now been sold, such as depreciation and maintenance of factory buildings and equipment used in the production process, unallocated production overheads, and abnormal amounts of production costs of inventories.

- Definition

The amount of investments accounted for using the equity method. The equity method is a method of accounting whereby the investment is initially recognised at cost and adjusted thereafter for the post-acquisition change in the investor's share of net assets of the investee. The investor's profit or loss includes its share of the profit or loss of the investee. The investor's other comprehensive income includes its share of the other comprehensive income of the investee. [Refer: At cost [member]]

- Definition

The amount of assets: (a) held for sale in the ordinary course of business; (b) in the process of production for such sale; or (c) in the form of materials or supplies to be consumed in the production process or in the rendering of services. Inventories encompass goods purchased and held for resale including, for example, merchandise purchased by a retailer and held for resale, or land and other property held for resale. Inventories also encompass finished goods produced, or work in progress being produced, by the entity and include materials and supplies awaiting use in the production process. [Refer: Current finished goods; Current merchandise; Current work in progress; Land]

Name:ifrs-full_DisclosureOfPropertyPlantAndEquipmentLineItems Namespace Prefix:ifrs-full_ Data Type:xbrli:stringItemType Balance Type:na Period Type:duration

- Definition

The amount of the expense relating to short-term leases accounted for applying paragraph 6 of IFRS 16. This expense need not include the expense relating to leases with a lease term of one month or less. Short-term lease is a lease that, at the commencement date, has a lease term of 12 months or less. A lease that contains a purchase option is not a short-term lease.

- Definition
The amount of assets that are: (a) cash; (b) an equity instrument of another entity; (c) a contractual right: (i) to receive cash or another financial asset from another entity; or (ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity; or (d) a contract that will, or may be, settled in the entity's own equity instruments and is: (i) a non-derivative for which the entity is, or may be, obliged to receive a variable number of the entity's own equity instruments; or (ii) a derivative that will, or may be, settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments. For this purpose the entity's own equity instruments do not include puttable financial instruments classified as equity instruments in accordance with paragraphs 16A-16B of IAS 32, instruments that impose on the entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation and are classified as equity instruments in accordance with paragraphs 16C-16D of IAS 32, or instruments that are contracts for the future receipt or delivery of the entity's own equity instruments. + Details
Name:ifrs-full_FinancialAssets Namespace Prefix:ifrs-full_ Data Type:xbrli:monetaryItemType Balance Type:debit Period Type:instant

– Definition

The amount of liabilities that are: (a) a contractual obligation: (i) to deliver cash or another financial asset to another entity; or (ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity; or (b) a contract that will, or may be, settled in the entity's own equity instruments and is: (i) a non-derivative for which the entity is, or may be, obliged to deliver a variable number of the entity's own equity instruments; or (ii) a derivative that will, or may be, settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments. For this purpose, rights, options or warrants to acquire a fixed number of the entity's own equity instruments for a fixed amount of any currency are equity instruments if the entity offers the rights, options or warrants pro rata to all of its existing owners of the same class of its own non-derivative equity instruments. Also, for those purposes the entity's own equity instruments do not include puttable financial instruments that are classified as equity instruments in accordance with paragraphs 16A-16B of IAS 32, instruments that impose on the entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation and are classified as equity instruments in accordance with paragraphs 16C-16D of IAS 32, or instruments that are contracts for the future receipt or delivery of the entity's own equity instruments. As an exception, an instrument that meets the definition of a financial liability is classified as an equity instrument if it has all the features and meets the conditions in paragraphs 16A-16B or paragraphs 16C-16D of IAS 32. weight:400;line-height:120%">Mineral properties consist of: the fair value attributable to mineral reserves and resources acquired in a business combination or asset acquisition; underground mine development costs; open pit mine development costs; capitalized exploration and
evaluation costs; and capitalized interest. In addition, we incur project costs which are generally capitalized when the expenditures result in a future benefit.</div><div style="text-align:justify">
</div><div><span style="color:#a39161;font-
family:'Arial',sans-serif;font-size:9pt;font-style:italic;font-weight:400;line-height:120%">i) Acquired Mining Properties</div><div style="text-align:justify">On
acquisition of a mining property, we prepare an estimate of the fair value attributable to the proven and probable mineral reserves, mineral resources and exploration potential attributable to the property. The estimated fair value attributable to the mineral reserves and the
portion of mineral resources considered to be probable of economic extraction at the time of the acquisition is depreciated on a units of production (“UOP”) basis whereby the denominator is the proven and probable reserves and the portion of mineral resources considered to be
probable of economic extraction based on the current life of mine (“LOM”) plan that benefit from the development and are considered probable of economic extraction. The estimated fair value attributable to mineral resources that are not considered to be probable of economic
extraction at the time of the acquisition is not subject to depreciation until the resources become probable of economic extraction in the future. The estimated fair value attributable to exploration licenses is recorded as an intangible asset and is not subject to
depreciation until the property enters production.</div><div style="text-align:justify">
</div><div>
</div></div><div style="display:inline-block;max-width:7.017%;min-width:6.017%;vertical-align:top"></div><div style="display:inline-
block;vertical-align:top;width:46.492%"><div>ii) Underground Mine Development Costs</div><div style="text-align:justify">At our underground mines, we incur development costs to build new shafts, drifts and ramps that will enable us to physically access ore underground. The time over which we will
continue to incur these costs depends on the mine life. These underground development costs are capitalized as incurred.</div><div style="text-align:justify;text-indent:36pt"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-
height:120%">Capitalized underground development costs are depreciated on a UOP basis, whereby the denominator is the estimated ounces/pounds of gold/copper in proven and probable reserves and the portion of resources considered probable of economic extraction based on the
current LOM plan that benefit from the development and are considered probable of economic extraction.</div><div style="text-align:justify">
</div><div><span style="color:#a39161;font-family:'Arial',sans-serif;font-size:9pt;font-style:italic;font-
weight:400;line-height:120%">iii) Open Pit Mine Development Costs</div><div style="text-align:justify">In open pit mining operations, it is necessary to remove
overburden and other waste materials to access ore from which minerals can be extracted economically. The process of mining overburden and waste materials is referred to as stripping. Stripping costs incurred in order to provide initial access to the ore body (referred to as
pre-production stripping) are capitalized as open pit mine development costs.</div><div style="text-align:justify;text-indent:36pt">Pre-production stripping costs
are capitalized until an “other than de minimis” level of mineral is extracted, after which time such costs are either capitalized to inventory or, if it qualifies as an open pit stripping activity that provides a future benefit, to PP&E. We consider various relevant
criteria to assess when an “other than de minimis” level of mineral is produced. Some of the criteria considered would include, but are not limited to, the following: (1) the amount of minerals mined versus total ounces in ore expected over the LOM; (2) the amount of ore
tonnes mined versus total LOM expected ore tonnes mined; (3) the current stripping ratio versus the strip ratio expected over the LOM; and (4) the ore grade mined versus the grade expected over the LOM.</div><div style="text-align:justify;text-indent:36pt">Stripping costs incurred during the production stage of an open pit are accounted for as costs of the inventory produced during the period that the stripping costs are incurred,
unless these costs are expected to provide a future economic benefit to an identifiable component of the ore body. Components of the ore body are based on the distinct development phases identified by the mine planning engineers when determining the optimal development plan
for the open pit. Production phase stripping costs generate a future economic benefit when the related stripping activity: (1) improves access to a component of the ore body to be mined in the future; (2) increases the fair value of the mine (or open pit) as access to future
mineral reserves becomes less costly; and (3) increases the productive capacity or extends the productive life of the mine (or open pit). Production phase stripping costs that are expected to generate a future economic benefit are capitalized as open pit mine development
costs.</div><div style="text-align:justify;text-indent:36pt">Capitalized open pit mine development costs are depreciated on a UOP basis whereby the denominator is
the estimated ounces/pounds of gold/copper in proven and probable reserves and the portion of resources considered probable of economic extraction based on the current LOM plan that benefit from the development and are considered probable of economic extraction.</div>
<div>
</div></div></div><div style="width:100.000%"><div style="display:inline-block;vertical-align:top;width:46.491%"><div>Construction-in-
Progress</div><div style="text-align:justify">Assets under construction are capitalized as construction-in-progress until the asset is available for its intended
use. The cost of construction-in-progress comprises its purchase price and any costs directly attributable to bringing it into working condition for its intended use. Construction-in-progress amounts related to development projects are included in the carrying amount of the
development project. Construction-in-progress amounts incurred at operating mines are presented as a separate asset within PP&E. Construction-in-progress also includes deposits on long lead items. Construction-in-progress is not depreciated. Depreciation commences once the
asset is complete, commissioned and available for use. </div><div style="text-align:justify">
</div><div><span style="color:#a39161;font-
family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-height:120%">Capitalized Interest</div><div style="text-align:justify">We capitalize interest costs for
qualifying assets. Qualifying assets are assets that require a significant amount of time to prepare for their intended use, including projects that are in the exploration and evaluation, development or construction stages. Qualifying assets also include significant expansion
projects at our operating mines. Capitalized interest costs are considered an element of the cost of the qualifying asset which is determined based on gross expenditures incurred on an asset. Capitalization ceases when the asset is substantially complete or if active
development is suspended or ceases. Where the funds used to finance a qualifying asset form part of general borrowings, the amount capitalized is calculated using a weighted average of rates applicable to the relevant borrowings during the period. Where funds borrowed are
directly attributable to a qualifying asset, the amount capitalized represents the borrowing costs specific to those borrowings. Where surplus funds available out of money borrowed specifically to finance a project are temporarily invested, the total capitalized interest is
reduced by income generated from short-term investments of such funds. </div><div style="text-align:justify">
</div><div style="text-align:justify"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-weight:700;line-
height:120%">m) Impairment (and Reversals of Impairment) of Non-Current Assets</div><div style="text-align:justify">We review and test the carrying amounts of
PP&E and intangible assets with finite lives when an indicator of impairment is considered to exist. Impairment (or reversals of impairment) assessments on PP&E and intangible assets are conducted at the level of the cash generating unit (“CGU”), which is the lowest
level for which identifiable cash flows are largely independent of the cash flows of other assets and includes liabilities specific to the CGU. For operating mines and projects, the individual mine/project represents a CGU for impairment testing.</div><div style="text-
align:justify;text-indent:36pt">The recoverable amount of a CGU is the higher of Value in Use (“VIU”) and Fair Value Less Costs of Disposal (“FVLCD”). We have determined
that the FVLCD is greater than the VIU amounts and is therefore used as the recoverable amount for impairment testing purposes. An impairment loss is recognized for any excess of the carrying amount of a CGU over its recoverable amount where both the recoverable amount and
carrying value include the associated other assets and liabilities, including taxes where applicable, of the CGU. Where it is not appropriate to allocate the loss to a separate asset, an impairment loss related to a CGU is allocated to the carrying amount of the assets of the
CGU on a pro rata basis based on the carrying amount of its non-monetary assets.</div><div>
</div></div><div style="display:inline-block;max-width:7.017%;min-width:6.017%;vertical-align:top"></div><div style="display:inline-block;vertical-
align:top;width:46.492%"><div>Impairment Reversal</div><div style="text-align:justify"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-
weight:400;line-height:120%">An assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses may no longer exist or may have decreased. A previously recognized impairment loss is reversed only if there has
been a change in the assumptions used to determine the CGU’s recoverable amount since the last impairment loss was recognized. This reversal is recognized in the consolidated statements of income and is limited to the carrying value that would have been determined, net of any
depreciation where applicable, had no impairment charge been recognized in prior years. When an impairment reversal is undertaken, the recoverable amount is assessed by reference to the higher of VIU and FVLCD. We have determined that the FVLCD is greater than the VIU amounts
and is therefore used as the recoverable amount for impairment testing purposes. </div><div style="text-align:justify">
</div><div
style="text-align:justify">n) Intangible Assets</div><div style="text-align:justify"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-
weight:400;line-height:120%">On acquisition of a mineral property in the exploration stage, we prepare an estimate of the fair value attributable to the exploration licenses acquired, including the fair value attributable to mineral resources, if any, of that property. The
fair value of the exploration license is recorded as an intangible asset (acquired exploration potential) as at the date of acquisition. When an exploration stage property moves into development, the acquired exploration potential attributable to that property is transferred
to mining interests within PP&E.</div><div style="text-align:justify;text-indent:36pt">We also have water rights associated with our mineral properties. Upon
acquisition, they are measured at initial cost and are depreciated when they are being used. They are also subject to impairment testing when an indicator of impairment is considered to exist.</div><div style="text-align:justify">
</div><div
style="text-align:justify">o) Goodwill</div><div style="text-align:justify"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-
weight:400;line-height:120%">Goodwill is tested for impairment in Q4 and also when there is an indicator of impairment. At the date of acquisition, goodwill is assigned to the CGU or group of CGUs that is expected to benefit from the synergies of the business combination. For
the purposes of impairment testing, goodwill is allocated to the Company’s operating segments, which are our individual minesites, and corresponds to the level at which goodwill is internally monitored by the Chief Operating Decision Maker (“CODM”). Goodwill impairment charges
are not reversible.</div><div style="text-align:justify;text-indent:36pt">For a CGU to which goodwill has been allocated, the most recent recoverable amount
determined for the CGU may be used in the annual impairment assessment of that CGU in the current year provided all the following criteria are met: </div><div style="padding-left:18pt;text-align:justify;text-indent:-18pt"><span style="color:#000000;font-
family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-height:120%">•the assets and liabilities making up the CGU have not changed
significantly (change in book value or change in nature of assets/ liabilities in CGU) since the most recent recoverable amount calculation;</div><div style="padding-left:18pt;text-align:justify;text-indent:-18pt"><span style="color:#000000;font-family:'Arial',sans-

weight:400;line-height:120%">Debt is recognized initially at fair value, net of financing costs incurred, and subsequently measured at amortized cost. Any difference between the amounts originally received and the redemption value of the debt is recognized in the consolidated
statements of income over the period to maturity using the effective interest method.</div><div>
</div><div style="text-align:justify">q)
Environmental Rehabilitation Provision</div><div style="text-align:justify">Mining, extraction and processing activities normally give rise to obligations for
environmental rehabilitation. Rehabilitation work can include facility decommissioning and dismantling; removal or treatment of waste materials; site and land rehabilitation, including compliance with and monitoring of environmental regulations; security and other site-related
costs required to perform the rehabilitation work; and operation of equipment designed to reduce or eliminate environmental effects. The extent of work required and the associated costs are dependent on the requirements of relevant authorities and our environmental policies.
Routine operating costs that may impact the ultimate closure and rehabilitation activities, such as waste material handling conducted as an integral part of a mining or production process, are not included in the provision. Abnormal costs arising from unforeseen circumstances,
such as the contamination caused by unplanned discharges, are recognized as an expense and liability when the event that gives rise to an obligation occurs and reliable estimates of the required rehabilitation costs can be made.</div><div style="text-align:justify;text-
indent:36pt">Provisions for the cost of each rehabilitation program are normally recognized at the time that an environmental disturbance occurs or a new legal or
constructive obligation is determined. When the extent of disturbance increases over the life of an operation, the provision is increased accordingly. The major parts of the carrying amount of provisions relate to closure/rehabilitation of tailings facilities, heap leach pads
and waste dumps; demolition of buildings/mine facilities; ongoing water treatment; and ongoing care and maintenance and security of closed mines. Costs included in the provision encompass all closure and rehabilitation activity expected to occur progressively over the life of
the operation at the time of closure and post-closure in connection with disturbances as at the reporting date. Estimated costs included in the determination of the provision reflect the risks and probabilities of alternative estimates of cash flows required to settle the
obligation at each particular operation. The expected rehabilitation costs are estimated based on the cost of external contractors performing the work or the cost of performing the work internally depending on management’s intention.</div><div style="text-
align:justify;text-indent:36pt">The timing of the actual rehabilitation expenditure is dependent upon a number of factors such as the life and nature of the asset, the
operating license conditions and the environment in which the mine operates. Expenditures may occur before and after closure and can continue for an extended period of time depending on rehabilitation requirements. Rehabilitation provisions are measured at the expected value
of future cash flows, which exclude the effect of inflation, discounted to their present value using a current US dollar real risk-free pre-tax discount rate. The unwinding of the discount, referred to as accretion expense, is included in finance costs and results in an
increase in the </div></div><div style="display:inline-block;max-width:7.017%;min-width:6.017%;vertical-align:top"></div><div style="display:inline-block;vertical-align:top;width:46.492%"><div style="text-align:justify"><span style="color:#000000;font-
family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-height:120%">amount of the provision. Provisions are updated each reporting period for changes to expected cash flows and for the effect of changes in the discount rate, and the change in estimate is added to or
deducted from the related asset and depreciated over the expected economic life of the operation to which it relates.</div><div style="text-align:justify;text-indent:36pt"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-
height:120%">Significant judgments and estimates are involved in forming expectations of future activities, the amount and timing of the associated cash flows and the period over which we estimate those cash flows. Those expectations are formed based on existing environmental
and regulatory requirements or, if more stringent, our environmental policies which give rise to a constructive obligation. </div><div style="text-align:justify;text-indent:36pt"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-
weight:400;line-height:120%">When provisions for closure and rehabilitation are initially recognized, the corresponding cost is capitalized as an asset, representing part of the cost of acquiring the future economic benefits of the operation. The capitalized cost of closure
and rehabilitation activities is recognized in PP&E and depreciated over the expected economic life of the operation to which it relates.</div><div style="text-align:justify;text-indent:36pt"><span style="color:#000000;font-family:'Arial',sans-serif;font-
size:9pt;font-weight:400;line-height:120%">Adjustments to the estimated amount and timing of future closure and rehabilitation cash flows are a normal occurrence in light of the significant judgments and estimates involved. The principal factors that can cause expected cash
flows to change are: the construction of new processing facilities; changes in the quantities of material in reserves and resources with a corresponding change in the life of mine plan; changing ore characteristics that impact required environmental protection measures and
related costs; changes in water quality or volumes that impact the extent of water treatment required; changes in discount rates; changes in foreign exchange rates; changes in Barrick’s closure policies; and changes in laws and regulations governing the protection of the
environment.</div><div style="text-align:justify;text-indent:36pt">Rehabilitation provisions are adjusted as a result of changes in estimates and assumptions. Those
adjustments are accounted for as a change in the corresponding cost of the related assets, including the related mineral property, except where a reduction in the provision is greater than the remaining net book value of the related assets, in which case the value is reduced
to nil and the remaining adjustment is recognized in the consolidated statements of income. In the case of closed sites, changes in estimates and assumptions are recognized immediately in the consolidated statements of income. For an operating mine, the adjusted carrying
amount of the related asset is depreciated prospectively. Adjustments also result in changes to future finance costs. Provisions are discounted to their present value using a current US dollar real risk-free pre-tax discount rate and the accretion expense is included in
finance costs.</div><div style="text-align:justify">
</div><div style="text-align:justify">r) Stock-Based Compensation</div><div
style="text-align:justify">We recognize the expense related to these plans over the vesting period, beginning once the grant has been approved and announced to the
beneficiaries.</div><div style="text-align:justify;text-indent:36pt">Barrick offers cash-settled (Restricted Share Units (“RSU”), Deferred Share Units (“DSU”) and
Performance Granted Share Units (“PGSU”)) awards to certain employees, officers and directors of the Company.</div><div>
</div><div>Restricted
Share Units</div><div style="text-align:justify">Under our Long-Term Incentive Plan, selected employees are granted RSUs where each RSU has a value equal to one
Barrick common share. RSUs generally vest within </div></div></div><div style="display:inline-block;vertical-align:top;width:46.491%"><div style="text-align:justify"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-
height:120%">three years in cash and the after-tax value of the award may be used to purchase common shares on the open market, depending on the terms of the grant. Additional RSUs are credited to reflect dividends paid on Barrick
common shares over the vesting period.</div><div style="text-align:justify;text-indent:36pt">A liability for RSUs is measured at fair value on the grant date and is
subsequently adjusted for changes in fair value. The liability is recognized on a straight-line basis over the vesting period, with a corresponding charge to compensation expense, as a component of general and administrative expenses and cost of sales. Compensation expenses
for RSUs incorporate an estimate for expected forfeiture rates based on which the fair value is adjusted.</div><div style="text-align:justify">
</div><div><span style="color:#a39161;font-family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-
height:120%">Deferred Share Units</div><div style="text-align:justify">Under our DSU plan, Directors must receive at least 63.6% of their basic annual retainer in
the form of DSUs or cash to purchase common shares that cannot be sold, transferred or otherwise disposed of until the Director leaves the Board. Each DSU has the same value as one Barrick common share. DSUs must be retained until the Director leaves the Board, at which time
the cash value of the DSUs is paid out. Additional DSUs are credited to reflect dividends paid on Barrick common shares. The initial fair value of the liability is calculated as of the grant date and is recognized immediately. Subsequently, at each reporting date and on
settlement, the liability is remeasured, with any change in fair value recorded as compensation expense in the period. </div><div style="text-align:justify">
</div><div><span style="color:#a39161;font-family:'Arial',sans-serif;font-size:9pt;font-
weight:400;line-height:120%">Performance Granted Share Units</div><div style="text-align:justify">Under our PGSU plan, selected employees are granted PGSUs, where
each PGSU has a value equal to one Barrick common share. Annual PGSU awards are determined based on a multiple ranging from three to six times base salary (depending on position and level of responsibility) multiplied by a performance factor. PGSUs vest within <span style="-
sec-ix-hidden:f-434">three years in cash, and the after-tax value of the award is used to purchase common shares on the open market. Generally, these shares cannot be sold until the employee meets their share ownership requirement (in which case only those Barrick
shares in excess of the requirement can be sold), or until they retire or leave the Company.</div><div style="text-align:justify;text-indent:36pt">The initial fair
value of the liability is calculated as of the grant date and is recognized within compensation expense using the straight-line method over the vesting period. Subsequently, at each reporting date and on settlement, the liability is remeasured, with any changes in fair value
recorded as compensation expense.</div><div>
</div><div style="text-align:justify">
</div></div><div style="text-align:justify">s)
New Accounting Standards Issued </div><div style="text-align:justify">Certain new accounting standards and interpretations have been published that are either
applicable in the current year or not mandatory for the current period. We have assessed these standards, including Amendments to IAS 1 - Non-
current Liabilities with Covenants, and determined they do not have a material impact on Barrick in the current reporting period. In addition, the following
standards have been issued by the International Accounting Standards Board (“IASB”) and we are currently assessing the impact on our consolidated financial statements.</div><div style="padding-left:18pt;text-align:justify;text-indent:-18pt">•Amendments to the
Classification and Measurement of Financial Instruments (IFRS 9 and IFRS 7) with mandatory application of the standard in annual reporting periods beginning on or
after January 1, 2026.</div><div style="padding-left:18pt;text-align:justify;text-indent:-18pt">•<span style="color:#000000;font-family:'Arial',sans-
serif;font-size:9pt;font-weight:400;line-height:120%;padding-left:14.85pt">IFRS 18 Presentation and Disclosure in Financial Statements with mandatory application of the standard in annual reporting periods beginning on or after January 1, 2027. </div>No standards have been early adopted in the current
period.Statement of Compliance<div style="text-align:justify">These consolidated financial statements have been prepared in accordance with IFRS Accounting Standards as
issued by the International Accounting Standards Board (“IFRS”). Accounting policies are consistently applied to all years presented, unless otherwise stated. These consolidated financial statements were approved for issuance by the Board of Directors on February 11, 2025.
</div>Basis of Preparation<div style="text-align:justify">These consolidated financial statements include the accounts of Barrick, its subsidiaries, its share of
joint operations (“JO”) and its equity share of joint ventures (“JV”). When applying the equity method of accounting, specifically for Porgera, whereby the economic interest differs from the shareholding, the equity accounting is based on the economic share contractually
agreed among the shareholders rather than the equity participation. For non wholly-owned, controlled subsidiaries, profit or loss for the period that is attributable to non-controlling interests is typically calculated based on the ownership of the minority shareholders in the
subsidiary. </div><div style="text-align:justify"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-height:120%">Outlined below is information related to our joint arrangements and entities other than 100% owned Barrick

*align:baseline">3We consolidate our interests in Carlin, Cortez, Turquoise Ridge, Phoenix, Long Canyon, North Mara, Bulyanhulu, Loulo-Gounkoto, Tongon, Pueblo Viejo and the Reko Diq project and record a non-controlling interest for the interest that we do not own. 4Barrick receives half of the economic benefits from the Tanzanian operations (Bulyanhulu and North Mara) from taxes, royalties, clearing fees and participation in all cash distributions made by the mines, after the recoupment of capital investments. Earnings are recorded proportionally based on our equity interests each period in accordance with the terms of the agreement with the Government of Tanzania. 5Barrick has commitments of $541 million relating to its interest in the joint ventures, including purchase obligations disclosed in note 17 and capital commitments disclosed in note 19. 6Pursuant to the terms of the Pargera Project Completion Deed Poll between the Pargera joint venture owners dated December 22, 2023, the future ownership of Pargera is held in a joint venture owned 51% by PNG stakeholders and 49% by a Barrick affiliate, Pargera (Jersey) Limited ("PJL"). PJL is jointly owned on a 50/50 basis by Barrick and Zijin Mining Group and therefore Barrick holds a 24.5% ownership interest in the Pargera joint venture. Barrick holds a 23.5% interest in the economic benefits of the mine under the economic benefit sharing arrangement agreed with the PNG government whereby Barrick and Zijin Mining Group together share 47% of the overall economic benefits derived from the mine accumulated over time, and the PNG stakeholders share the remaining 53%. Refer to notes 4 for further details. 10;6150;840;840;800;8970;600;500;500;500;500;450;500;500;2455410000000;950;510;490;500;500;2450;2350;470;53business Combinations On the acquisition of a business, the acquisition method of accounting is used. Foreign Currency Translation The functional currency of all of our operations is the US dollar. We translate non-US dollar balances for these operations into US dollars as follows: •Monetary assets and liabilities at market rates are translated using the exchange rates prevailing at the balance sheet date and the actual fixed price set under the smelting contracts are caused by changes in market gold and copper prices, which result in an embedded derivative in accounts receivable. The embedded derivative is recorded at fair value each period until final settlement occurs, with changes in fair value recognized in revenue in the consolidated statement of income and presented separately in note 6 of these consolidated financial statements.
 •Property, plant and equipment ("PP&E"), intangible assets and equity method investments using the rates at the time of acquisition. •Fair value through other comprehensive income ("FVOCI") equity investments using the closing exchange rate as at the balance sheet date with translation gains and losses permanently recorded in Other Comprehensive Income ("OCI"). •Deferred tax assets and liabilities using the closing exchange rate as at the balance sheet date with translation gains and losses recorded in other income/expense; and •Income and expenses using the average exchange rate for the period, except for expenses that relate to non-monetary assets and liabilities measured at historical rates, which are translated using the same historical rate as the associated non-monetary assets and liabilities. Revenue Recognition We sell our production in the world market through the following distribution channels:
 Gold and copper concentrate sales
 Gold Bullion Sales Gold bullion is sold primarily in the London spot market. The sale price is fixed on the date of sale based on the gold spot price. Generally, we record revenue from gold bullion sales at the time of physical delivery, which is also the date that title to the gold passes.
 Concentrate Sales Under the terms of concentrate sales contracts with independent smelting companies, gold and copper sales prices are provisionally set on a specified future date after shipment based on market prices. We record revenues under these contracts at the time of shipment, which is also when the risks and rewards of ownership pass to the customer. Under the terms of these contracts, the sales prices are subject to adjustment during a period after delivery based on the actual price set under the smelting contracts are caused by changes in market gold and copper prices, which result in an embedded derivative in accounts receivable. The embedded derivative is recorded at fair value each period until final settlement occurs, with changes in fair value recognized in revenue in the consolidated statement of income and presented separately in note 6 of these consolidated financial statements.
 Streaming Arrangements As the deferred revenue on streaming arrangements is considered variable consideration, an adjustment is made to the transaction price per unit each time there is a change in the underlying production profile of a mine (typically in Q4 of each year). The change in the transaction price per unit results in a cumulative catch-up adjustment to revenue in the period in which the change is made, reflecting the new production profile expected to be delivered under the agreement. A corresponding adjustment is made to accretion expense such that the deferred revenue balance following the change in estimate is equal to the balance that would have been recorded if the new estimate had been applied since the inception of the agreement. Exploration and evaluation expenditures are the costs incurred in the initial search for mineral deposits with economic potential or in the process of obtaining more information about existing mineral deposits. Exploration expenditures typically include costs associated with prospecting; sampling; mapping; diamond drilling and other work involved in searching for ore. Evaluation expenditures are the costs incurred to establish the technical and commercial viability of developing mineral deposits identified through exploration activities or by acquisition. Evaluation expenditures include the cost of: (1) establishing the volume and grade of deposits through drilling of core samples, trenching and sampling activities in an ore body that is classified as either a mineral resource or a proven and probable reserve; (ii) determining the optimal methods of extraction and metallurgical and treatment processes; (iii) studies related to surveying, transportation and infrastructure requirements; (iv) permitting activities; and (v) economic evaluations to determine whether development of the mineralized material is commercially justifiable, including determining the cut-off grade and estimating the future cost and timing of development and production.
 Exploration and evaluation expenditures are expensed as incurred unless management determines that probable future economic benefits will be generated as a result of the expenditures. Once the technical feasibility and commercial viability of a program or project has been demonstrated with a pre-feasibility study, and we have recognized reserves in accordance with the Canadian Securities Administrators' National Instrument 43-101 - Standards of Disclosure for Mineral Projects, we account for future expenditures incurred in the development of that program or project in accordance with our policy for Property, Plant and Equipment, as described in note 2i. Production Stage A mine that is under construction is determined to enter the production stage when the project is in the location and condition necessary for it to be capable of operating in the manner intended by management. The following factors are used to assess whether the mine is in the production stage: (1) the completion of a reasonable period of commissioning and testing of mine plant and equipment; (2) the ability to produce minerals in saleable form (within specifications); and (4) the ability to sustain ongoing production of minerals. When a mine construction project moves into the production stage, the capitalization of certain mine construction costs ceases and costs are either capitalized to inventory or expensed, except for capitalizable costs related to property, plant and equipment additions or improvements, open-pit stripping activities that provide a future benefit, underground mine development or expenditures that meet the criteria for capitalization in accordance with IAS 16 Property, Plant and Equipment. Construction-in-Progress Assets under construction are capitalized as construction-in-progress until the asset is available for use in the intended manner by management. This generally occurs after the asset has reached the condition for its intended use. Costs incurred in relation to development projects are included in the carrying amount of the development project. Construction in progress amounts incurred at operating mines are presented as a separate asset within PP&E. Construction-in-progress also includes deposits on long lead items. Construction-in-progress is not depreciated. Depreciation commences once the asset is complete, commissioned and available for use.Taxation Current tax for each taxable entity is based on the local taxable income at the local statutory tax rate enacted or substantively enacted at the balance sheet date and includes adjustments to tax payable or recoverable in respect of previous periods. Deferred tax is recognized using the balance sheet method in respect of all temporary differences between the tax bases of assets and liabilities, and their carrying amounts for financial reporting purposes, except as indicated below. Deferred income tax liabilities are recognized for all taxable temporary differences, except: •where the deferred income tax liability arises from the initial recognition of goodwill or the initial recognition of an asset or liability in an acquisition that is not a business combination and, at the time of the acquisition, affects neither the accounting profit nor taxable profit or loss; and •in respect of taxable temporary differences associated with investments in subsidiaries and interests in joint arrangements, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.
 Deferred income tax assets are recognized for all deductible temporary differences, carryforward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carryforward of unused tax assets and unused tax losses can be utilized, except: •where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in an acquisition that is not a business combination and, at the time of the acquisition, affects neither the accounting profit nor taxable profit or loss; and •in respect of deductible temporary differences associated with investments in subsidiaries and interests in joint arrangements, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.
 The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. To the extent that an asset not previously recognized fulfills the criteria for recognition, a deferred income tax asset is recorded. Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which the asset is realized or the liability is settled, based on tax rates and tax laws enacted or substantively enacted at the balance sheet date. Current and deferred tax relating to items recognized directly in equity are recognized in equity and not in the income statement. The Company is subject to assessments by various taxation authorities, who may interpret tax legislation differently than the Company. Tax liabilities for uncertain tax positions are adjusted by the Company to reflect its best estimate of the probable outcome of assessments and in light of changing facts and circumstances, such as the completion of a tax audit, expiration of a statute of limitations, the refinement of an estimate, and interest accruals associated with the uncertain tax positions until they are resolved. Some of these adjustments require significant judgment in estimating the timing and amount of any additional tax expense.
 Royalties and Special Mining Taxes Income tax expense includes the cost of royalties and special mining taxes payable to governments that are calculated based on a percentage of taxable profit whereby taxable profit represents net income adjusted for certain items defined in the applicable legislation.
 Indirect Taxes Indirect tax recoverable is recorded at its undiscounted amount, and is disclosed as non-current if not expected to be recovered within twelve months. Royalties and Special Mining Taxes Income tax expense includes the cost of royalties and special mining taxes payable to governments that are calculated based on a percentage of taxable profit whereby taxable profit represents net income adjusted for certain items defined in the applicable legislation.
 Indirect Taxes Indirect tax recoverable is recorded at its undiscounted amount, and is disclosed as non-current if not expected to be recovered within twelve months. Other Investments Investments in publicly quoted equity securities that are neither subsidiaries nor associates are categorized as FVOCI pursuant to the irrevocable election available in IFRS 9 for these instruments. FVOCI equity investments are recorded at fair value with all realized and unrealized gains and losses recorded permanently in OCI. Warrant investments are classified as fair value through profit or loss ("FVPL").Inventory Material extracted from our mines is classified as either ore or waste. Ore represents material that, at the time of extraction, we expect to process into a saleable form and sell at a profit. Raw materials are comprised of both ore in stockpiles and ore on leach pads as processing is required to extract benefit from the ore. Ore is accumulated in stockpiles that are subsequently processed into gold/copper in a saleable form. The recovery of gold and copper from certain oxide ores is achieved through the heap leaching process. Work in process inventory includes gold in the leach cycle that is currently being recovered. Finished goods inventory includes gold bullion and gold and copper concentrate that are ready for shipment. Metal inventories are valued at the lower of cost and net realizable value. Cost is determined on a weighted average basis and includes all costs incurred: based on a normal production capacity, in bringing each product to its present location and condition. Cost of inventories comprises: direct labor, materials and contractor expenses, including non-capitalized stripping costs; depreciation on PP&E including capitalized stripping costs; and an allocation of general and administrative costs. As ore is removed for processing, costs are removed based on the average cost per ounce/pound in the stockpile. Net realizable value is determined with reference to relevant market prices less applicable variable selling and downstream processing costs. Inventory provisions are reversed to reflect subsequent improvements in net realizable value where the inventory is still on hand. Mine operating supplies represent commodity consumables and other raw materials used in the production process, as well as spare parts and other maintenance supplies that are not classified as capital items. Provisions are recorded to reduce mine operating supplies to net realizable value, which is generally calculated by reference to the salvage or scrap value, when it is determined that the supplies are obsolete. Certain mining companies are subject to royalty agreements based on mineral production at the properties. The primary type of royalty is a net smelter return ("NSR") royalty. Under this type of royalty we pay the holder an amount calculated as the royalty percentage multiplied by the value of gold production at market gold prices less third-party smelting, refining and transportation costs. Royalty expense is recorded on completion of the production or sales process in cost of sales. Other types of royalties include: •Net profits interest royalty to a party other than a government: •Net profits interest royalty to a government: •Net smelter return sliding scale royalty: •Gross smelter return royalty sliding scale royalty: •Gross smelter return royalty: •Net value royalty: •Net value royalty sliding scale royalty: •Gold revenue royalty. Property, Plant and Equipment Estimated Useful Lives of Major Asset Categories <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:96.54%"><tr><td style="width:1.0%"></td><td style="width:66.652%"></td><td style="width:1.0%"></td><td style="width:31.148%"></td></tr><tr><td colspan="3" style="border-top:0.5pt solid #a39161;padding:2px 1pt;text-align:left;vertical-align:bottom">Buildings, plant and equipment</td><td colspan="3" style="border-top:0.5pt solid #a39161;padding:2px 1pt;text-align:left;vertical-align:bottom">20 - 35 years</td></tr><tr><td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:left;vertical-align:bottom">Underground mobile equipment</td><td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:left;vertical-align:bottom">- 7 years</td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom">Light vehicles and other mobile equipment</td><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom">- 7 years</td></tr><tr><td colspan="3" style="background-color:#f2f2f2;border-bottom:0.5pt solid #a39161;padding:2px 1pt;text-align:left;vertical-align:bottom">Processing plant and equipment</td><td colspan="3" style="background-color:#f2f2f2;border-bottom:0.5pt solid #a39161;padding:2px 1pt;text-align:left;vertical-align:bottom">1 - 7 years</td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom">Buildings, Plant and Equipment</td><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom">1 - 7 years</td></tr></table>
 At acquisition, we record buildings, plant and equipment at cost, including all expenditures incurred to prepare an asset for its intended use. These expenditures consist of: the purchase price; brokers' commissions; and installation costs including architectural, design and engineering fees, legal fees, survey costs, site preparation costs, freight charges, transportation insurance costs, duties, testing and preparation charges. Buildings, plant and equipment are depreciated on a straight-line basis over their expected useful life, which commences when the assets are considered available for use. Once buildings, plant and equipment are considered available for use, they are measured at cost less accumulated depreciation and applicable impairment losses. Mining properties, including open pit and underground mine development, is recapitalized as development costs attributable to the related asset. Estimated Useful Lives of Major Asset Categories <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:96.54%"><tr><td style="width:1.0%"></td><td style="width:66.652%"></td><td style="width:1.0%"></td><td style="width:31.148%"></td></tr><tr><td colspan="3" style="border-top:0.5pt solid #a39161;padding:2px 1pt;text-align:left;vertical-align:bottom">Buildings, plant and equipment</td><td colspan="3" style="border-top:0.5pt solid #a39161;padding:2px 1pt;text-align:left;vertical-align:bottom">20 - 35 years</td></tr><tr><td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:left;vertical-align:bottom">Underground mobile equipment</td><td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:left;vertical-align:bottom">3 - 7 years</td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom">Light vehicles and other mobile equipment</td><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom">3 - 7 years</td></tr><tr><td colspan="3" style="background-color:#f2f2f2;border-bottom:0.5pt solid #a39161;padding:2px 1pt;text-align:left;vertical-align:bottom">Processing plant and equipment</td><td colspan="3" style="background-color:#f2f2f2;border-bottom:0.5pt solid #a39161;padding:2px 1pt;text-align:left;vertical-align:bottom">1 - 7 years</td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom">Buildings, Plant and Equipment</td><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom">1 - 7 years</td></tr></table>
 Mineral Properties Mineral properties consist of: the fair value attributable to mineral reserves and resources acquired in a business combination or asset acquisition; underground mine development costs; open pit mine development costs; capitalized exploration and evaluation costs; and capitalized interest. In addition, we incur project costs which are generally capitalized when the expenditures result in a future benefit.
 i) Acquired Mining Properties On acquisition of a mining property, we prepare an estimate of the fair value attributable to the proven and probable mineral reserves, mineral resources and exploration potential attributable to the property. The estimated fair value attributable to the mineral reserves and the portion of mineral resources considered probable of economic extraction based on the current LOM plan that benefit from the development and are considered probable of economic extraction ("UOM") basis are depreciated on a unit-of-production ("UOP") basis over the proven and probable mineral reserves and the portion of mineral resources considered probable of economic extraction based on the current life of mine ("LOM") plan that benefit from the development and are considered probable of economic extraction. The estimated fair value attributable to mineral resources that are not considered to be probable of economic extraction at the time of the acquisition is not subject to depreciation until the resources become probable of economic extraction in the future. The estimated fair value attributable to exploration licenses is recorded as an intangible asset and is not subject to depreciation until the property enters production. ii) Underground Mine Development Costs At our underground mines, we incur development costs to build new shafts, drifts and ramps that will enable us to physically access ore underground. The time over which we will continue to incur these costs depends on the mine's life. These underground development costs are capitalized as incurred. Capitalized underground mine development costs are depreciated on a UOP basis whereby the denominator is the estimated ounces/pounds of gold/copper in proven and probable reserves and the portion of resources considered probable of economic extraction based on the current LOM plan that benefit from the development and are considered probable of economic extraction.
 iii) Open Pit Mine Development Costs In open pit mining operations, it is necessary to remove overburden and other waste materials to access ore from which minerals can be extracted economically. The process of mining overburden and waste materials is referred to as stripping. Stripping costs incurred in order to provide initial access to the ore body (referred to as pre-production stripping) are capitalized as open pit mine development costs. Capitalized stripping costs are depreciated on a UOP basis whereby the denominator is the estimated ounces/pounds of gold/copper in proven and probable reserves and the portion of resources considered probable of economic extraction based on the current LOM plan that benefit from the stripping activity that provides a future benefit. In PP&E, We consider various relevant criteria to assess when an "other than de minimis" level of mineral is produced. Some of the criteria considered would include, but are not limited to, the following: (1) the amount of minerals mined versus total ounces in ore expected over the LOM; (2) the amount of ore tonnes mined versus total LOM expected ore tonnes mined; (3) the current stripping ratio versus the strip ratio expected over the LOM; and (4) the ore grade mined versus the grade expected over the LOM. Stripping costs incurred during the production stage of an open pit are accounted for as costs of the inventory produced during the period that the stripping costs are incurred, unless these costs are expected to provide a future economic benefit to an identifiable component of the ore body. Components of the ore body are based on the distinct development phases identified by the mine planning engineers when determining the optimal development plan for the open pit. Production phase stripping costs generate a future economic benefit when the related stripping activity: (1) improves access to a component of the ore body to be mined in the future; (2) increases the fair value of the mine (or open pit) as access to future mineral reserves becomes less costly; and (3) increases the productive capacity or extends the productive life of the mine (or open pit). Production phase stripping costs that are expected to generate a future economic benefit are capitalized as open pit mine development costs. Capitalized open pit mine development costs are depreciated on a UOP basis whereby the denominator is the estimated ounces/pounds of gold/copper in proven and probable reserves and the portion of resources considered probable of economic extraction based on the current LOM plan that benefit from the development and are considered probable of economic extraction.
 Capitalized Interest We capitalize interest costs for qualifying assets. Qualifying assets are assets that require a significant amount of time to prepare for their intended use, including projects that are in the exploration and evaluation, development or construction stages. Qualifying assets also include significant expansion projects at our operating mines. Capitalized interest costs are considered an element of the cost of the qualifying asset which is determined based on gross expenditures incurred on an asset. Capitalization ceases when the asset is substantially complete or if active

development is suspended or ceases. Where the funds used to finance a qualifying asset form part of general borrowings, the amount capitalized is calculated using a weighted average of rates applicable to the relevant borrowings during the period. Where funds borrowed are
directly attributable to a qualifying asset, the amount capitalized represents the borrowing costs specific to those borrowings. Where surplus funds available out of money borrowed specifically to finance a project are temporarily invested, the total capitalized interest is
reduced by income generated from short-term investments of such funds.<div style="text-align:justify">m) Impairment (and Reversals of Impairment) of Non-Current
Assets</div><div style="text-align:justify">We review and test the carrying amounts of PP&E and intangible assets with finite lives when an indicator of
impairment is considered to exist. Impairment (or reversals of impairment) assessments on PP&E and intangible assets are conducted at the level of the cash generating unit (“CGU”), which is the lowest level for which identifiable cash flows are largely independent of the
cash flows of other assets and includes liabilities specific to the CGU. For operating mines and projects, the individual mine/project represents a CGU for impairment testing.</div><div style="text-align:justify;text-indent:36pt"><span style="color:#000000;font-
family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-height:120%">The recoverable amount of a CGU is the higher of Value in Use (“VIU”) and Fair Value Less Costs of Disposal (“FVLCD”). We have determined that the FVLCD is greater than the VIU amounts and is therefore
used as the recoverable amount for impairment testing purposes. An impairment loss is recognized for any excess of the carrying amount of a CGU over its recoverable amount where both the recoverable amount and carrying value include the associated other assets and liabilities,
including taxes where applicable, of the CGU. Where it is not appropriate to allocate the loss to a separate asset, an impairment loss related to a CGU is allocated to the carrying amount of the assets of the CGU on a pro rata basis based on the carrying amount of its non-
monetary assets.</div><div>Impairment Reversal</div><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-
height:120%">An assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses may no longer exist or may have decreased. A previously recognized impairment loss is reversed only if there has been a change in
the assumptions used to determine the CGU’s recoverable amount since the last impairment loss was recognized. This reversal is recognized in the consolidated statements of income and is limited to the carrying value that would have been determined, net of any depreciation
where applicable, had no impairment charge been recognized in prior years. When an impairment reversal is undertaken, the recoverable amount is assessed by reference to the higher of VIU and FVLCD. We have determined that the FVLCD is greater than the VIU amounts and is
therefore used as the recoverable amount for impairment testing purposes.Intangible Assets<div style="text-align:justify">On acquisition of a mineral property in
the exploration stage, we prepare an estimate of the fair value attributable to the exploration licenses acquired, including the fair value attributable to mineral resources, if any, of that property. The fair value of the exploration license is recorded as an intangible asset
(acquired exploration potential) as at the date of acquisition. When an exploration stage property moves into development, the acquired exploration potential attributable to that property is transferred to mining interests within PP&E.</div><div style="text-
align:justify;text-indent:36pt">We also have water rights associated with our mineral properties. Upon acquisition, they are measured at initial cost and are depreciated
when they are being used. They are also subject to impairment testing when an indicator of impairment is considered to exist.</div>Goodwill<div style="text-align:justify"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-
height:120%">Goodwill is tested for impairment in Q4 and also when there is an indicator of impairment. At the date of acquisition, goodwill is assigned to the CGU or group of CGUs that is expected to benefit from the synergies of the business combination. For the purposes of
impairment testing, goodwill is allocated to the Company’s operating segments, which are our individual minesites, and corresponds to the level at which goodwill is internally monitored by the Chief Operating Decision Maker (“CODM”). Goodwill impairment charges are not
reversible.</div><div style="text-align:justify;text-indent:36pt">For a CGU to which goodwill has been allocated, the most recent recoverable amount determined for
the CGU may be used in the annual impairment assessment of that CGU in the current year provided all the following criteria are met: </div><div style="padding-left:18pt;text-align:justify;text-indent:-18pt"><span style="color:#000000;font-family:'Arial',sans-serif;font-
size:9pt;font-weight:400;line-height:120%">•the assets and liabilities making up the CGU have not changed significantly (change in book value
or change in nature of assets/ liabilities in CGU) since the most recent recoverable amount calculation;</div><div style="padding-left:18pt;text-align:justify;text-indent:-18pt"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-
weight:400;line-height:120%">•The most recent recoverable amount calculation, completed in prior year, resulted in an amount that exceeded the
carrying amount of the CGU by a substantial margin; and</div><div style="padding-left:18pt;text-align:justify;text-indent:-18pt">•Based on an analysis of events that have occurred and circumstances that have changed since the most recent recoverable amount calculation, the likelihood
that a current recoverable amount determination will be less than the carrying amount of the CGU is remote.</div>Debt<div style="text-align:justify">Debt is
recognized initially at fair value, net of financing costs incurred, and subsequently measured at amortized cost. Any difference between the amounts originally received and the redemption value of the debt is recognized in the consolidated statements of income over the period
to maturity using the effective interest method.</div>Environmental Rehabilitation Provision<div style="text-align:justify">Mining, extraction and processing
activities normally give rise to obligations for environmental rehabilitation. Rehabilitation work can include facility decommissioning and dismantling; removal or treatment of waste materials; site and land rehabilitation, including compliance with and monitoring of
environmental regulations; security and other site-related costs required to perform the rehabilitation work; and operation of equipment designed to reduce or eliminate environmental effects. The extent of work required and the associated costs are dependent on the
requirements of relevant authorities and our environmental policies. Routine operating costs that may impact the ultimate closure and rehabilitation activities, such as waste material handling conducted as an integral part of a mining or production process, are not included in
the provision. Abnormal costs arising from unforeseen circumstances, such as the contamination caused by unplanned discharges, are recognized as an expense and liability when the event that gives rise to an obligation occurs and reliable estimates of the required
rehabilitation costs can be made.</div><div style="text-align:justify;text-indent:36pt">Provisions for the cost of each rehabilitation program are normally
recognized at the time that an environmental disturbance occurs or a new legal or constructive obligation is determined. When the extent of disturbance increases over the life of an operation, the provision is increased accordingly. The major parts of the carrying amount of
provisions relate to closure/rehabilitation of tailings facilities, heap leach pads and waste dumps; demolition of buildings/mine facilities; ongoing water treatment; and ongoing care and maintenance and security of closed mines. Costs included in the provision encompass all
closure and rehabilitation activity expected to occur progressively over the life of the operation at the time of closure and post-closure in connection with disturbances as at the reporting date. Estimated costs included in the determination of the provision reflect the risks
and probabilities of alternative estimates of cash flows required to settle the obligation at each particular operation. The expected rehabilitation costs are estimated based on the cost of external contractors performing the work or the cost of performing the work internally
depending on management’s intention.</div><div style="text-align:justify;text-indent:36pt">The timing of the actual rehabilitation expenditure is dependent upon a
number of factors such as the life and nature of the asset, the operating license conditions and the environment in which the mine operates. Expenditures may occur before and after closure and can continue for an extended period of time depending on rehabilitation
requirements. Rehabilitation provisions are measured at the expected value of future cash flows, which exclude the effect of inflation, discounted to their present value using a current US dollar real risk-free pre-tax discount rate. The unwinding of the discount, referred to
as accretion expense, is included in finance costs and results in an increase in the </div><div style="text-align:justify">amount of the provision. Provisions are
updated each reporting period for changes to expected cash flows and for the effect of changes in the discount rate, and the change in estimate is added to or deducted from the related asset and depreciated over the expected economic life of the operation to which it relates.
</div><div style="text-align:justify;text-indent:36pt">Significant judgments and estimates are involved in forming expectations of future activities, the amount and
timing of the associated cash flows and the period over which we estimate those cash flows. Those expectations are formed based on existing environmental and regulatory requirements or, if more stringent, our environmental policies which give rise to a constructive obligation.
</div><div style="text-align:justify;text-indent:36pt">When provisions for closure and rehabilitation are initially recognized, the corresponding cost is
capitalized as an asset, representing part of the cost of acquiring the future economic benefits of the operation. The capitalized cost of closure and rehabilitation activities is recognized in PP&E and depreciated over the expected economic life of the operation to which
it relates.</div><div style="text-align:justify;text-indent:36pt">Adjustments to the estimated amount and timing of future closure and rehabilitation cash flows are
a normal occurrence in light of the significant judgments and estimates involved. The principal factors that can cause expected cash flows to change are: the construction of new processing facilities; changes in the quantities of material in reserves and resources with a
corresponding change in the life of mine plan; changing ore characteristics that impact required environmental protection measures and related costs; changes in water quality or volumes that impact the extent of water treatment required; changes in discount rates; changes in
foreign exchange rates; changes in Barrick’s closure policies; and changes in laws and regulations governing the protection of the environment.</div><div style="text-align:justify;text-indent:36pt"><span style="color:#000000;font-family:'Arial',sans-serif;font-
size:9pt;font-weight:400;line-height:120%">Rehabilitation provisions are adjusted as a result of changes in estimates and assumptions. Those adjustments are accounted for as a change in the corresponding cost of the related assets, including the related mineral property,
except where a reduction in the provision is greater than the remaining net book value of the related assets, in which case the value is reduced to nil and the remaining adjustment is recognized in the consolidated statements of income. In the case of closed sites, changes in
estimates and assumptions are recognized immediately in the consolidated statements of income. For an operating mine, the adjusted carrying amount of the related asset is depreciated prospectively. Adjustments also result in changes to future finance costs. Provisions are
discounted to their present value using a current US dollar real risk-free pre-tax discount rate and the accretion expense is included in finance costs.</div>Stock-Based Compensation<div style="text-align:justify"><span style="color:#000000;font-family:'Arial',sans-
serif;font-size:9pt;font-weight:400;line-height:120%">We recognize the expense related to these plans over the vesting period, beginning once the grant has been approved and announced to the beneficiaries.</div><div style="text-align:justify;text-indent:36pt">Barrick offers cash-settled (Restricted Share Units (“RSU”), Deferred Share Units (“DSU”) and Performance Granted Share Units (“PGSU”)) awards to certain employees, officers and
directors of the Company.</div><div>
</div><div>Restricted Share Units</div><div style="text-align:justify"><span style="color:#000000;font-
family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-height:120%">Under our Long-Term Incentive Plan, selected employees are granted RSUs where each RSU has a value equal to one Barrick common share. RSUs generally vest within </div><div style="display:inline-
block;vertical-align:top;width:46.491%"><div style="text-align:justify">three years in cash and the after-tax value of the award
may be used to purchase common shares on the open market, depending on the terms of the grant. Additional RSUs are credited to reflect dividends paid on Barrick common shares over the vesting period.</div><div style="text-align:justify;text-indent:36pt">A liability for RSUs is measured at fair value on the grant date and is subsequently adjusted for changes in fair value. The liability is recognized on a straight-line basis
over the vesting period, with a corresponding charge to compensation expense, as a component of general and administrative expenses and cost of sales. Compensation expenses for RSUs incorporate an estimate for expected forfeiture rates based on which the fair value is
adjusted.</div><div style="text-align:justify">
</div><div>Deferred Share Units</div><div style="text-align:justify">Under our DSU plan, Directors must receive at least 63.6% of their basic annual retainer in the form of DSUs or cash to purchase common shares that cannot be sold, transferred
or otherwise disposed of until the Director leaves the Board. Each DSU has the same value as one Barrick common share. DSUs must be retained until the Director leaves the Board, at which time the cash value of the DSUs is paid out. Additional DSUs are credited to reflect
dividends paid on Barrick common shares. The initial fair value of the liability is calculated as of the grant date and is recognized immediately. Subsequently, at each reporting date and on settlement, the liability is remeasured, with any change in fair value recorded as
compensation expense in the period. </div><div style="text-align:justify">
</div><div>Performance Granted Share Units</div><div style="text-
align:justify">Under our PGSU plan, selected employees are granted PGSUs, where each PGSU has a value equal to one Barrick common share. Annual PGSU awards are determined
based on a multiple ranging from three to six times base salary (depending on position and level of responsibility) multiplied by a performance factor. PGSUs vest within three years in cash, and the after-tax value of the award is used
to purchase common shares on the open market. Generally, these shares cannot be sold until the employee meets their share ownership requirement (in which case only those Barrick shares in excess of the requirement can be sold), or until they retire or leave the Company.
</div><div style="text-align:justify;text-indent:36pt">The initial fair value of the liability is calculated as of the grant date and is recognized within compensation
expense using the straight-line method over the vesting period. Subsequently, at each reporting date and on settlement, the liability is remeasured, with any changes in fair value recorded as compensation expense.</div><div>

</div><div style="text-align:justify">Inventory</div><div style="text-align:justify"><span style="color:#000000;font-
family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-height:120%">The measurement of inventory including the determination of its net realizable value, especially as it relates to ore in stockpiles and recoverable from leach pads, involves the use of estimates. Net
realizable value is determined with reference to relevant market prices less applicable variable selling expenses. Estimation is also required in determining the tonnage, recoverable gold and copper contained therein, and in determining the remaining costs of completion to
bring inventory into its saleable form. Judgment is also exercised in determining whether to recognize a provision for obsolescence on mine operating supplies, and estimates are required to determine salvage or scrap value of mine operating supplies. </div><div
style="display:inline-block;vertical-align:top;width:46.492%"><div style="text-align:justify;text-indent:36pt">Estimates of recoverable gold or copper on the leach pads
are calculated from the quantities of ore placed on the leach pads (measured tonnes added to the leach pads), the grade of ore placed on the leach pads (based on assay data) and a recovery percentage (based on ore type).</div><div style="text-align:justify">
</div><div style="text-align:justify">Impairment and Reversal of Impairment for Non-Current Assets and Impairment of Goodwill</div><div style="text-
align:justify">Goodwill and non-current assets are tested for impairment if there is an indicator of impairment or reversal of impairment, and in the case of goodwill
annually during the fourth quarter, for all of our operating segments. We consider both external and internal sources of information for indications that non-current assets and/or goodwill are impaired. External sources of information we consider include changes in the market,
economic, legal and permitting environment in which the CGU operates that are not within its control and affect the recoverable amount of mining interests and goodwill. Internal sources of information we consider include the manner in which mining properties and plant and
equipment are being used or are expected to be used and indications of economic performance of the assets. Calculating the FVLCD of CGUs for non-current asset and goodwill impairment tests requires management to make estimates and assumptions with respect to future production
levels, operating, capital and closure costs in our LOM plans, future metal prices, foreign exchange rates, Net Asset Value (“NAV”) multiples, fair value of mineral resources outside LOM plans, the market values per ounce and per pound and weighted average costs of capital
(“WACC”). Changes in any of the assumptions or estimates used in determining the fair values could impact the impairment analysis. Refer to notes 2m, 2o and 21 for further information. </div><div style="text-align:justify">
</div><div style="text-
align:justify">Provisions for Environmental Rehabilitation </div><div style="text-align:justify"><span style="color:#000000;font-family:'Arial',sans-serif;font-
size:9pt;font-weight:400;line-height:120%">Management assesses its provision for environmental rehabilitation on an annual basis or when new information becomes available. This assessment includes the estimation of the future rehabilitation costs (including water treatment),
the timing of these expenditures, and the impact of changes in discount rates and foreign exchange rates. The actual future expenditures may differ from the amounts currently provided if the estimates made are significantly different than actual results or if there are
significant changes in environmental and/or regulatory requirements in the future. Refer to notes 2q and 27 for further information.</div><div style="text-align:justify">
</div><div style="text-align:justify"><span style="color:#a39161;font-
family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-height:115%">Taxes</div><div style="text-align:justify">Management is required to assess uncertainties
and make judgments and estimations regarding the tax basis of assets and liabilities and related deferred income tax assets and liabilities, amounts recorded for uncertain tax positions, the measurement of income tax expense and indirect taxes such as royalties and export
duties, and estimates of the timing of repatriation of earnings, which would impact the recognition of withholding taxes and taxes related to the outside basis on subsidiaries/associates. While these amounts represent management’s best estimate based on the laws and
regulations that exist at the time of preparation, we operate in certain jurisdictions that have increased degrees of political and sovereign risk and while host governments have historically supported the development of natural resources by foreign companies, tax
</div></div><div style="width:100.000%"><div style="display:inline-block;vertical-align:top;width:46.491%"><div style="text-align:justify">legislation in these
jurisdictions is developing and there is a risk that fiscal reform changes with respect to existing investments could unexpectedly impact application of this tax legislation. Such changes could impact the Company’s judgments about the amounts recorded for uncertain tax
positions, tax basis of assets and liabilities, and related deferred income tax assets and liabilities, and estimates of the timing of repatriation of earnings. This could necessitate future adjustments to tax income and expense already recorded. A number of these estimates
require management to make estimates of future taxable profit, as well as the recoverability of indirect taxes, and if actual results are significantly different than our estimates, the ability to realize the deferred tax assets and indirect tax receivables recorded on our
balance sheet could be impacted. Refer to notes 2h, 12, 30 and 35 for further information. </div><div style="text-align:justify">
</div><div style="text-align:justify"><span style="color:#a39161;font-family:'Arial',sans-serif;font-size:9pt;font-
weight:400;line-height:120%">Contingencies</div><div style="text-align:justify">Contingencies can be either possible assets or possible liabilities arising from
past events which, by their nature, will only be resolved when one or more future events not wholly within our control occur or fail to occur. The assessment of such contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future
events. In assessing loss contingencies related to legal proceedings that are pending against us or unasserted claims that may result in such proceedings or regulatory or government actions that may negatively impact our business or operations, the Company with assistance from
its legal counsel evaluates the perceived merits of any legal proceedings or unasserted claims or actions as well as the perceived merits of the nature and amount of relief sought or expected to be sought, when determining the amount, if any, to recognize as a contingent
liability or assessing the impact on the carrying value of assets. If the assessment of a contingency suggests that a loss is probable, and the amount can be reliably estimated, then a loss is recorded. When a contingent loss is not probable but is reasonably possible, or is
probable but the amount of loss cannot be reliably estimated, then details of the contingent loss are disclosed. Loss contingencies considered remote are generally not disclosed unless they involve guarantees, in which case we disclose the nature of the guarantee. Contingent
assets are not recognized in the consolidated financial statements. Refer to note 35 for more information.</div><div style="text-align:justify">
</div><div style="text-align:justify"><span style="color:#a39161;font-family:'Arial',sans-serif;font-
size:9pt;font-weight:400;line-height:115%">Pascua-Lama Value Added Tax</div><div style="text-align:justify">The Pascua-Lama project had historically received VAT
refunds in Chile under the export incentive VAT regime relating to the development of the Chilean side of the project ($472 million as at December 31, 2023). Under the export incentive VAT regime, this amount would have needed to be repaid if the project did not evidence
exports for an amount of $3,538 million within a term that was due to expire on December 31, 2026, unless extended. On September 11, 2024, the Minister of Economy, Development and Tourism issued an order to terminate the export incentive VAT regime with respect to the Chilean
side of the project with immediate effect. This required us to repay the VAT refunds received under the export incentive VAT regime and subsequently recover them through the normal VAT regime, both of which occurred in Q4 2024. This resolves the matter and there is no further
exposure for the Company.</div></div><div style="display:inline-block;max-width:7.017%;min-width:6.017%;vertical-align:top"></div><div style="display:inline-block;vertical-align:top;width:46.492%"><div style="text-align:justify;text-indent:36pt">In addition, we have recorded $8 million in VAT recoverable in Argentina as at December 31, 2024 ($9 million as at December 31, 2023) relating to the development of the
Argentinean side of the project. This balance may not be fully recoverable if the project does not enter into production and is subject to foreign currency risk as the amounts are recoverable in Argentine pesos.</div><div style="text-align:justify">

</div><div style="text-align:justify">Streaming Transactions</div><div style="text-align:justify"><span style="color:#000000;font-family:'Arial',sans-serif;font-
size:9pt;font-weight:400;line-height:115%">The upfront cash deposit received from Royal Gold on the gold and silver streaming transaction for production linked to Barrick’s 60% interest in the Pueblo Viejo mine has been accounted for as deferred revenue since we have
determined that it is not a derivative as it will be satisfied through the delivery of non-financial items (i.e., gold and silver) rather than cash or financial assets. It is our intention to settle the obligations under the streaming arrangement through our own production and
if we were to fail to settle the obligations with Royal Gold through our own production, this would lead to the streaming arrangement becoming a derivative. This would cause a change to the accounting treatment, resulting in the revaluation of the fair value of the agreement
through profit and loss on a recurring basis. Refer to note 29 for further details.</div><div style="text-align:justify;text-indent:36pt">The deferred revenue
component of our streaming agreements is considered variable and is subject to retroactive adjustment when there is a change in the timing of the delivery of ounces or in the underlying production profile of the relevant mine. The impact of such a change in the timing or
quantity of ounces to be delivered under a streaming agreement will result in retroactive adjustments to both the deferred revenue recognized and the accretion recorded prior to the date of the change. Refer to note 2e. For further details on streaming transactions, including
our silver sale agreement with Wheaton Precious Metals Corp. (“Wheaton”), refer to note 29.</div><div style="text-align:justify">
</div><div style="text-align:justify"><span style="color:#a39161;font-family:'Arial',sans-serif;font-size:9pt;font-
weight:400;line-height:115%">Consolidation of Reko Diq</div><div style="text-align:justify">The Reko Diq project is 50% held by Barrick and 50% by Pakistani
stakeholders, comprising a 10% free-carried, non-contributing share held by the Provincial Government of Balochistan, an additional 15% held by a special purpose company owned by the Provincial Government of Balochistan and 25% owned by other federal state-owned enterprises.
Pursuant to the joint venture agreement, Barrick has power over the relevant activities of the project, including operatorship of the project, the decision to proceed with development of the project, subject to a sufficient expected rate of return, as well as development and
approval of LOM plans. Therefore Barrick has concluded that it controls Reko Diq and it is consolidated in Barrick’s consolidated financial statements with a 50% non-controlling interest.</div><div style="text-align:justify">

equalize the difference between prior year's tax return and the year-end provision. (b)We operate in multiple foreign tax jurisdictions that have tax rates different than the Canadian statutory rate. Currency Translation Current and deferred tax balances are subject to remeasurement for changes in foreign currency exchange rates each period. This is required in countries where tax is paid in local currency and the subsidiary has a different functional currency (typically US dollars). The most significant foreign currency exposures to deferred tax balances are the Canadian dollar, Chilean peso, Argentine peso and Australian dollar. In 2024, we recorded a foreign exchange loss of $52 million on translation losses on tax balances, mainly due to the weakening of the Argentine peso and the West African CFA franc against the US dollar. In 2023, a tax expense of $209 million arose from translation losses on tax balances, mainly due to the weakening of the Argentine peso and strengthening of the West African CFA franc against the US dollar. These net translation losses are included within income tax expense.
 Withholding Taxes In 2024, we have recorded $3 million (2023: $5 million related to Saudi Arabia) of dividend withholding taxes related to the undistributed earnings of our subsidiaries in Saudi Arabia. We have also recorded $45 million (2023: $26 million related to Saudi Arabia, Tanzania and the United States) of dividend withholding taxes on the distributed earnings of Saudi Arabia, Tanzania and the United States. United States Tax Reform In August 2022, President Joe Biden signed the Inflation Reduction Act ("the Act") into law. The Act includes a 15% corporate alternative minimum tax ("CAMT") that is imposed on applicable financial statement income and therefore would be considered in scope for IAS 12 given it is a tax on profits. The CAMT is effective for tax years beginning after December 31, 2022 and CAMT credit carryforwards have an indefinite life. Barrick is subject to CAMT because the Company meets the applicable income thresholds for a foreign-parented multinational group. In Q3 2024, the US Treasury and IRS released proposed regulations detailing the application of CAMT followed by some technical corrections released on December 23, 2024. Some rules would apply to tax years ending after September 13, 2024, while the rest would generally apply to tax years ending after the final regulations are published. Comments on the technical corrections were due on January 16, 2025 and we are still awaiting the final regulations. Based on the proposed regulations, we have assessed that we will not be subject to CAMT in 2025 and have not recognized any deferred tax assets arising from the CAMT credit carryforwards has been recognized on the basis we expect that it will be recovered against US Federal Income Tax in the future.
 Nevada Gold Mines ("NGM") NGM is a limited liability company treated as a flow through partnership for US tax purposes. The partnership is not subject to federal income tax directly, but each of its partners is liable for tax on its share of the profits of the partnership. As such, Barrick accounts for its current and deferred income tax associated with the investment (61.5% share) following the principles in IAS 12.

 Organisation for Economic Co-operation and Development ("OECD") Pillar Two model rules In December 2021, the OECD published the Global Anti-Base Erosion Model Rules (Pillar Two) Second Edition and Profit Shifting Statement on a Two-Pillar Solution to Address the Tax Challenges Arising from the Digitalisation of the Economy. Since then, the OECD has published model rules and other documents related to the second pillar of this solution (the Pillar Two model rules). The Pillar Two model rules provide a template that jurisdictions can translate into domestic tax law and implement as part of an agreed common approach. Pillar Two legislation in Canada has been enacted in Q2 2024 and came into effect for fiscal years commencing on or after December 31, 2023. Other jurisdictions where the group operates have either enacted legislation or are in the process of doing so. In terms of the potential implications for income tax accounting, we have applied the exception available under the amendments to IAS 12 published by the IASB in May 2023 and are not recognizing or disclosing information about deferred tax assets and liabilities related to the Pillar Two income taxes. We have completed a review of the current year using the OECD's Pillar Two Transitional Safe Harbour rules implemented in the Global Minimum Tax Act in Canada, and have identified no material amount that should be recognized. Pillar Two purposes of the law governing, both in Canada and elsewhere, we will continue to monitor the impact of this legislation.
 Mining Taxes In addition to corporate income tax, we pay mining taxes in the United States (Nevada), the Dominican Republic, and Canada (Ontario). NGM is subject to a Net Proceeds of Minerals tax in Nevada at a rate of 5% and the tax expense recorded in 2024 was $145 million (2023: $105 million). The other significant mining tax is the Dominican Republic's Net Profits Interest tax, which is determined based on cash flows as defined by the underlying agreement. The Dominican Republic mining tax expense recorded in 2024 was $4 tax expense of $134 million (2023: $nil) was recorded for this in 2024. Both taxes are included on a consolidated basis in the Company's consolidated statements of income
 Impairments In 2024, we recorded net impairment reversals of $941 million (2023: net impairment charges of $312 million) for non-current assets. Refer to note 21 for further information. A deferred tax expense of $321 million (2023: deferred tax recovery of $55 million primarily related to the impairment at Long Canyon) was recorded primarily related to the impairment reversal at our Lumwana and Veladero mines. <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:99.605%"> <tr> <td style="width:1.6%"></td> <td style="width:61.615%"></td> <td style="width:1.6%"></td> <td style="width:11.111%"></td> <td style="width:1.6%"></td> <td style="width:11.111%"></td> <td style="width:1.6%"></td> <td style="width:11.111%"></td></tr> <tr> <td colspan="3" style="border-top:0.5pt solid #a39161;padding:2px 1pt;text-align:left;vertical-align:bottom">For the years ended December 31</td> <td colspan="3" style="border-top:0.5pt solid #a39161;padding:2px 1pt;text-align:right;vertical-align:bottom">2024</td> <td colspan="3" style="border-top:0.5pt solid #a39161;padding:2px 1pt;text-align:right;vertical-align:bottom">2023</td></tr> <tr> <td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:left;vertical-align:top">Net profit</td> <td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:right;vertical-align:top">1,221</td> <td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:right;vertical-align:top">3,</td></tr> <tr> <td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:top">Increase (decrease) due to:</td> <td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:right;vertical-align:top"></td> <td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:right;vertical-align:top"></td></tr> <tr> <td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:left;vertical-align:top">Allowances and special tax deductions</td> <td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:right;vertical-align:top">2</td> <td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:right;vertical-align:top">(21)</td></tr> <tr> <td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:top">Impact of foreign tax rates</td> <td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:right;vertical-align:top">(79)</td> <td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:right;vertical-align:top"></td></tr> <tr> <td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:left;vertical-align:top">Non-deductible expenses / (non-taxable income)</td> <td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:right;vertical-align:top">111 </td> <td style="background-color:#f2f2f2;padding:2px 1pt 2px 0;text-align:right;vertical-align:top"></td></tr> <tr> <td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:top">72 </td> <td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:right;vertical-align:top"></td> <td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:right;vertical-align:top"></td></tr> <tr> <td colspan="3" style="display:none"></td> <td colspan="3" style="display:none"></td> <td colspan="3" style="display:none"></td> <td colspan="3" style="display:none"></td> <td colspan="3" style="display:none"></td></tr> <tr> <td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:left;vertical-align:top">Goodwill impairment not tax deductible</td> <td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:right;vertical-align:top"></td> <td colspan="3" style="background-color:#f2f2f2;padding:2px 1pt;text-align:right;vertical-align:top"></td></tr> <tr>

weight:400;line-height:120%">We record deferred income tax assets and liabilities where temporary differences exist between the carrying amounts of assets and liabilities in our balance sheet and their tax bases. The measurement and recognition of deferred income tax assets
and liabilities takes into account: substantively enacted rates that will apply when temporary differences reverse; interpretations of relevant tax legislation; estimates of the tax bases of assets and liabilities; and the deductibility of expenditures for income tax purposes.
In addition, the measurement and recognition of deferred tax assets takes into account tax planning strategies. We recognize the effect of changes in our assessment of these estimates and factors when they occur. Changes in deferred income tax assets and liabilities are
allocated between net income, other comprehensive income, equity and goodwill based on the source of the change.</div><div style="text-align:justify;text-indent:36pt"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-weight:400;line-
height:120%">Current income taxes of $3 million have been provided in the year on the undistributed earnings of certain foreign subsidiaries. Our total income tax provision for these items as at December 31, 2024 is $7 million. Deferred income taxes have not been provided on
the undistributed earnings of all other foreign subsidiaries for which we are able to control the timing of the remittance, and it is probable that there will be no remittance in the foreseeable future. These undistributed earnings amounted to $16,974 million as at
December 31, 2024.</div><div style="text-align:justify">
