#### 3. Business combinations and dispositions

##### *DeltaTek Oil Tools Limited*

On February 8, 2023 ("DeltaTek Closing Date"), DeltaTek Oil Tools Limited, a limited liability company registered in the United Kingdom, and its subsidiary ("DeltaTek"), was acquired ("the DeltaTek Acquisition") by our wholly owned subsidiary Exploration and Production Services (Holdings) Limited, a limited liability company registered in the United Kingdom ("EPSH"). DeltaTek has developed a number of innovative technologies and solutions and their range of low-risk open water cementing solutions increases clients' operational efficiency, delivers rig time and cost savings, and improves the quality of cementing operations of clients. The fair value of consideration for the DeltaTek Acquisition was \$18.4 million, including final cash consideration paid of \$9.9 million and contingent consideration which is estimated to be \$8.5 million.

The contingent consideration arrangement requires the Company to pay the former owners of DeltaTek a percentage of future revenues generated specifically from the acquired technology over a period of seven years. The fair value of the contingent consideration arrangement of \$8.5 million was estimated by applying the income approach and is reflected in "Other liabilities" on the **unaudited** condensed consolidated balance sheets. That measure is based on significant inputs that are not observable in the market, referred to as Level 3 inputs in accordance with ASC 820. To the extent our estimates and assumptions changed during the measurement period and such changes are based on facts and circumstances that existed as of the DeltaTek Closing Date, an adjustment to the contingent consideration liability was recorded with an offsetting adjustment to goodwill. To the extent our estimates and assumptions change based on facts and circumstances subsequent to the measurement period, an adjustment to the contingent consideration liability would be recorded with an offsetting adjustment to earnings during the applicable period.

The DeltaTek Acquisition is accounted for as a business combination and Expro has been identified as the acquirer for accounting purposes. As a result, the Company has in accordance with ASC 805, *Business Combinations*, applied the acquisition method of accounting to account for DeltaTek's assets acquired and liabilities assumed. Applying the acquisition method of accounting includes recording the identifiable assets acquired and liabilities assumed at their fair values and recording goodwill for the excess of the consideration transferred over the net aggregate fair value of the identifiable assets acquired and liabilities assumed.

The following table sets forth the allocation of the DeltaTek Acquisition consideration exchanged to the fair value of identifiable tangible and intangible assets acquired and liabilities assumed as of the DeltaTek Closing Date, with the recording of goodwill for the excess of the consideration transferred over the net aggregate fair value of the identifiable assets acquired and liabilities assumed (in thousands):

	Initial allocation of the consideration	Measurement period adjustments	Final allocation of the consideration

Other liabilities	831	(16 )	815
Total Liabilities	3,776	52	3,828
Fair value of net assets acquired	\$ 17,483	\$ 944	\$ 18,427

**Expro Group Holdings N.V.**  
**Notes to Unaudited Condensed Consolidated Financial Statements**

The preliminary valuation of the assets acquired and liabilities assumed, including other liabilities, in the DeltaTek Acquisition initially resulted in a goodwill of \$7.2 million. During the third quarter of 2023, the Company finalized the valuation and recorded measurement period adjustments to its preliminary estimates due to additional information received primarily related to a customary purchase price adjustment. The measurement period adjustments resulted in an increase in goodwill of \$1.0 million, for final total goodwill associated with the DeltaTek Acquisition of \$8.2 million.

The fair values of identifiable intangible assets were prepared using an income valuation approach, which requires a forecast of expected future cash flows either using the relief-from royalty method or the multi-period excess earnings method, which are discounted to approximate their current value. The estimated useful lives are based on management's historical experience and expectations as to the duration of time that benefits from these assets are expected to be realized.

The intangible assets will be amortized on a straight-line basis over an estimated 5 to 15 years life. We expect annual amortization to be approximately \$1.0 million associated with these intangible assets. An associated deferred tax liability has been recorded in regards to these intangible assets. Refer to Note 14 "*Intangible assets, net*" for additional information regarding the various acquired intangible assets.

The goodwill consists largely of the synergies and economies of scale expected from the technology providing more efficient services and expected future developments resulting from the assembled workforce. The goodwill is not subject to amortization but will be evaluated at least annually for impairment or more frequently if impairment indicators are present. Goodwill recorded in the DeltaTek Acquisition is not expected to be deductible for tax purposes.

The Company has determined the estimated unaudited pro forma information to be insignificant for the three months ended March 31, 2023, assuming the DeltaTek Acquisition were to have been completed as of January 1, 2023. This is not necessarily indicative of the results that would have occurred had the DeltaTek Acquisition been completed on the date indicated or of future operating results.

PRT Offshore

On October 2, 2023 ("PRT the "PRT Closing Date"), Professional Rental Tools, LLC ("PRT" or "PRT Offshore"), was acquired (the "PRT Acquisition") from PRT Partners, LLC by our wholly owned subsidiary, EPH. The acquisition will enable Expro to expand its portfolio of cost-effective, technology-enabled services and solutions within the subsea well access sector in the North and Latin America region and is expected to accelerate the growth of PRT Offshore's surface equipment offering in the Europe and Sub-Saharan Africa and Asia Pacific regions. We have estimated the fair value of consideration for the PRT Acquisition to be \$91.0 million, \$90.1 million, including cash consideration of \$21.7 million \$20.9 million, net of cash received, equity consideration of \$40.9 million, and contingent consideration of \$13.2 million, subject to a true-up for customary working capital adjustments. \$13.2 million. As of March 31, 2024 and December 31, 2023 the Company has we had accrued \$1.5 million of the cash consideration related to standard holdback provisions, provisions. During the second quarter, we paid \$0.6 million for the settlement of the true-up for working capital adjustments which is expected to be paid later resulted in 2024, a decrease in cash consideration transferred and goodwill of \$0.9 million.

The contingent consideration arrangement requires the Company to pay the former owners of PRT additional consideration based on PRT Offshore's financial performance during the four quarters following closing. The fair value of the contingent consideration arrangement of \$13.2 million was estimated by applying the income approach and is reflected in "Other current liabilities" on the unaudited condensed consolidated balance sheets. That measure is based on significant inputs that are not observable in the market, referred to as Level 3 inputs in accordance with ASC 820. To the extent our estimates and assumptions change during the measurement period and such changes are based on facts and circumstances that existed as of the PRT Closing Date, an adjustment to the contingent consideration liability would be recorded with an offsetting adjustment to goodwill. To the extent our estimates and assumptions change based on facts and circumstances subsequent to the PRT Closing Date or after the measurement period, an adjustment to the contingent consideration liability would be recorded with an offsetting adjustment to earnings during the applicable period.

**Expro Group Holdings N.V.**  
**Notes to Unaudited Condensed Consolidated Financial Statements**

The PRT Acquisition is accounted for as a business combination and Expro has been identified as the acquirer for accounting purposes. As a result, the Company has in accordance with ASC 805, *Business Combinations*, applied the acquisition method of accounting to account for PRT's assets acquired and liabilities assumed.

**6. Revenue**

*Disaggregation of revenue*

We disaggregate our revenue from contracts with customers by geography, as disclosed in Note 5 "Business segment reporting," as we believe this best depicts how the nature, amount, timing and uncertainty of our revenue and cash flows are affected by economic factors. Additionally, we disaggregate our revenue into main areas of capabilities.

The following table sets forth the total amount of revenue by main area of capabilities as follows (in thousands):

	Three Months Ended March 31,		Three Months Ended June 30,		Six Months Ended June 30,	
	2024	2023	2024	2023	2024	2023
Well construction	\$ 120,030	\$ 128,265	\$ 148,476	\$ 143,719	\$ 268,507	\$ 271,984
Well management	263,459	211,014	321,166	253,198	584,624	464,212
Total	\$ 383,489	\$ 339,279	\$ 469,642	\$ 396,917	\$ 853,131	\$ 736,196

*Contract balances*

We perform our obligations under contracts with our customers by transferring services and products in exchange for consideration. The timing of our performance often differs from the timing of our customer's payment, which results in the recognition of unbilled receivables and deferred revenue.

Unbilled receivables are initially recognized for revenue earned on completion of the performance obligation which are not yet invoiced to the customer. The amounts recognized as unbilled receivables are reclassified to trade receivable upon billing. Deferred revenue represents the Company's obligations to transfer goods or services to customers for which the Company has received consideration, in full or part, from the customer.

Contract balances consisted of the following as of **March 31, June 30, 2024**, and December 31, 2023 (in thousands):

	March 31,	December 31,	June 30,	December 31,
	2024	2023	2024	2023
Trade receivable, net	\$ 295,083	\$ 222,591	\$ 354,993	\$ 222,591
Unbilled receivables (included within accounts receivable, net)	\$ 136,417	\$ 203,689	\$ 170,410	\$ 203,689
Contract assets (included within accounts receivable, net)	\$ 16,620	\$ 52,607	\$ 16,922	\$ 52,607
Deferred revenue (included within other liabilities)	\$ 28,016	\$ 27,206	\$ 6,712	\$ 27,206

Contract assets include unbilled amounts resulting from sales under our long-term construction-type contracts when revenue recognized exceeds the amount billed to the customer and right to payment is conditional or subject to completing a milestone, such as a phase of the project. Contract assets are not considered a significant financing component, as they are intended to protect the customer in the event that we do not perform our obligations under the contract. Contract assets are generally classified as current, as it is very unusual for us to have contract assets with a term of greater than one year. Our contract assets are reported in a net position on a contract-by-contract basis at the end of each reporting period.

The Company recognized revenue during the three and six months ended June 30, 2024 of **\$5.9** **\$16.2** million and **\$25.2** million **\$22.1** million, respectively, and for the three and six months ended **March 31, 2024** June 30, 2023 of **\$17.1** million and **2023**, **\$42.3** million, respectively, out of the deferred revenue balance as of the beginning of the applicable year period.

As of **March 31, June 30, 2024**, **\$26.6** **\$5.2** million of our deferred revenue was classified as current and is included in "Other current liabilities" on the **unaudited** condensed consolidated balance sheets, with the remainder classified as non-current and included in "Other non-current liabilities" on the **unaudited** condensed consolidated balance sheets.

*Transaction price allocated to remaining performance obligations*

Remaining performance obligations represent firm contracts for which work has not been performed and future revenue recognition is expected. We have elected the practical expedient permitting the exclusion of disclosing remaining performance obligations for contracts that have an original expected duration of one year or less and for our long-term contracts we have a right to consideration from customers in an amount that corresponds directly with the value to the customer of the performance completed to date. With respect to our long-term construction contracts, revenue allocated to remaining performance obligations is **\$10.9** million. **\$0.9** million.

**7. Income taxes**

For interim financial reporting, the annual tax rate is based on pre-tax income (loss) before equity in income of joint ventures. We have historically calculated the income tax expense/(benefit) during interim reporting periods by applying a full year estimated Annual Effective Tax Rate ("AETR") to income (loss) before income taxes, excluding infrequent or unusual discrete items, for the reporting period. For the **three** **six** months ended **March 31, June 30, 2024**, we determined that using an AETR would not provide a reliable estimate of income taxes due to the forecasting methodology used to project income (loss) before income taxes, resulting in significant changes in the estimated AETR. Thus, we concluded to use a discrete effective tax rate, which treats the year-to-date period as an annual period, to calculate income taxes for the **three** **six** months ended **March 31, June 30, 2024**.

Our effective tax rates were **213.6%** **57.2%** and **(137.4)%** **87.1%** for the three and six months ended **March 31, June 30, 2024**, respectively, and were **65.9%** and **115.0%** for the three and six months ended **June 30, 2023** respectively.

Our effective tax rate was impacted primarily due to changes in the mix of taxable profits between jurisdictions with different tax regimes, in particular in **Asia Pacific**, **Latin America** and in our **ESSA** region.

**8. Investment in joint ventures**

We have investments in two joint venture companies, which together provide us access to certain Asian markets that otherwise would be challenging for us to penetrate or develop effectively on our own. COSL-Expro Testing Services (Tianjin) Co. Ltd ("CETS"), in which we have a 50% equity interest, has extensive offshore well testing and completions capabilities and a reputation for providing technology-driven solutions in China. Similarly, PV Drilling Expro International Co. Ltd. ("PVD-Expro") in which we have a 49% equity interest, offers the full suite of Expro products and services, including well testing and completions, in Vietnam. Both of these are strategic to our activities and offer the full capabilities and technology of Expro, but each company is independently managed.

The carrying value of our investment in joint ventures as of March 31, June 30, 2024, and December 31, 2023, was as follows (in thousands):

**16. Interest bearing loans**

On October 6, 2023, we amended and restated the previous revolving credit facility agreement pursuant to an amendment and restatement agreement (the "Amended and Restated Facility Agreement") with DNB Bank ASA, London Branch, as agent, in order to extend the maturity of the revolving credit facility agreement. The maturity date of the Amended and Restated Facility Agreement is October 6, 2026. The Amended and Restated Facility Agreement increased the total commitments to \$250.0 million, of which \$166.7 million was available for drawdowns as loans and \$83.3 million was available for letters of credit. The Company has the ability to increase the commitments to \$350.0 million.

Borrowings under the Amended and Restated Facility Agreement bear interest at a rate per annum of Term SOFR (as defined in the Amended and Restated Facility Agreement), subject to a 0.00% floor, plus an applicable margin of 3.75% (which is subject to a margin ratchet which reduces the margin in 4 step downs according to the Total Net Leverage Ratio (as defined in the Amended and Restated Facility Agreement)) for cash borrowings or 2.50% for letters of credit (which are similarly subject to a margin ratchet which reduces the margin in 4 step downs according to the Total Net Leverage Ratio). A 0.40% per annum fronting fee applies to letters of credit, and an additional 0.25% or 0.50% per annum utilization fee is payable on cash borrowings to the extent one-third or two-thirds, respectively, or more of Facility A (as defined in the Amended and Restated Facility Agreement) commitments are drawn. The unused portion of the Amended and Restated Facility Agreement is subject to a commitment fee of 35% per annum of the applicable margin.

The Amended and Restated Facility Agreement retains various undertakings and affirmative and negative covenants (with certain agreed amendments) which limit, subject to certain customary exceptions and thresholds, the Company and its subsidiaries' ability to, among other things, (1) enter into asset sales; (2) incur additional indebtedness; (3) make investments, acquisitions, or loans and create or incur liens; (4) pay certain dividends or make other distributions and (5) engage in transactions with affiliates. The Amended and Restated Facility Agreement amends certain of the financial covenants such that the Company is required to maintain (i) a minimum interest cover ratio of 4.0 to 1.0 based on the ratio of EBITDA to net finance charges and (ii) a maximum total net leverage ratio of 2.50 to 1.0 based on the ratio of total net debt to EBITDA, in each case tested quarterly on a last-twelve-months basis, subject to certain exceptions. We are in compliance with all our debt covenants as of **March 31, June 30, 2024**.

On May 15, 2024, the Company established an incremental facility under its Amended and Restated Facility Agreement, in order to increase its existing \$250.0 million revolving credit facility by an additional \$90.0 million in commitments, to a total of \$340.0 million, of which \$256.7 million was available for drawdowns as loans and \$83.3 million was available for letters of credit. The establishment of the incremental facility was accomplished by a notice entered into with DNB Bank ASA as Agent, together with a consortium of banks as lenders. The incremental facility has the same terms and conditions as the existing facility provided under the Amended and Restated Facility Agreement. The incremental facility is available for the same general corporate purposes as the existing facility provided under the Amended and Restated Facility Agreement, including acquisitions. On May 15, 2024, the Company drew down on the new facility in the amount of approximately \$76.1 million to partially finance the Coretrax Acquisition.

As of **March 31, June 30, 2024**, we had **\$40.0** **\$121.1** million of borrowings outstanding under the Amended and Restated Facility Agreement. The effective interest rate on our outstanding borrowings was 7.6%. As of December 31, 2023, we had \$20.0 million of borrowings outstanding. We utilized **\$44.6** **\$44.8** million and **\$50.4** million of the Amended and **\$50.4** million Restated Facility as of **March 31, June 30, 2024** and December 31, 2023, respectively, for bonds and guarantees.

**Notes to Unaudited Condensed Consolidated Financial Statements**

**17. Commitments and contingencies**

*Commercial Commitments*

During the normal course of business, we enter into commercial commitments in the form of letters of credit and bank guarantees to provide financial and performance assurance to third parties. We entered into contractual commitments for the acquisition of property, plant and equipment totaling ~~\$33.5~~ \$33.0 million and \$36.7 million as of ~~March 31, June 30, 2024~~ and December 31, 2023, respectively.

*Contingencies*

Certain conditions may exist as of the date our unaudited condensed consolidated financial statements are issued that may result in a loss to us, but which will only be resolved when one or more future events occur or fail to occur. Our management, with input from legal counsel, assesses such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal proceedings pending against us or unasserted claims that may result in proceedings, our management, with input from legal counsel, evaluates the perceived merits of any legal proceedings or unasserted claims as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates it is probable a material loss has been incurred and the amount of liability can be reasonably estimated, then the estimated liability would be accrued in our unaudited condensed consolidated financial statements. If the assessment indicates a potentially material loss contingency is not probable but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, together with an estimate of the range of possible loss if determinable and material, is disclosed.

Loss contingencies considered remote are generally not disclosed unless they involve guarantees, in which case the guarantees would be disclosed. We are the subject of lawsuits and claims arising in the ordinary course of business from time to time. A liability is accrued when a loss is both probable and can be reasonably estimated. We had no material accruals for loss contingencies, individually or in the aggregate, as of ~~March 31, June 30, 2024~~ and December 31, 2023. We believe the probability is remote that the ultimate outcome of these matters would have a material adverse effect on our financial position, results of operations or cash flows.

We have conducted an internal investigation of the operations of certain of the Company's foreign subsidiaries in West Africa including possible violations of the U.S. Foreign Corrupt Practices Act, our policies and other applicable laws. In June 2016, we voluntarily disclosed the existence of our internal review to the SEC and the U.S. Department of Justice ("DOJ"). The DOJ has provided a declination, subject to the Company and the SEC reaching a satisfactory settlement of civil claims. On the basis of discussions with the SEC up to the end of the first quarter of 2023, we believed that a final resolution of this matter was likely to include a civil penalty in the amount of approximately \$8.0 million and, accordingly, we had recorded a loss contingency in that amount within "Other current liabilities" on our unaudited condensed consolidated balance sheet, with the offset taken as an increase to goodwill as a measurement period adjustment associated with our 2021 business combination with Expro Group Holdings International Limited (the "Merger").

On April 26, 2023, the SEC issued a cease-and-desist order against the Company pursuant to section 21C of the Securities Exchange Act of 1934 ("Exchange Act"). Under this Order, the Company neither admitted nor denied any of the SEC's findings and agreed to cease and desist from committing or causing any violations and any future violations of the anti-bribery, books and records and internal accounting controls requirements of the FCPA and the Exchange Act. In accepting the Company's settlement offer, the SEC noted the Company's self-reporting, co-operation afforded to the SEC staff and remedial action including improving the Company's internal controls and further enhancements to its internal controls environment and compliance program following the Merger. The Company paid \$8.0 million to the SEC in respect of disgorgement, prejudgment interest and civil penalty during the second quarter of 2023.

Other than discussed above, we had no other material legal accruals for loss contingencies, individually or in the aggregate, as of ~~March 31, June 30, 2024~~ and December 31, 2023.

#### 19. Loss Earnings per share

Basic loss earnings per share attributable to Company stockholders is calculated by dividing net loss income attributable to the Company by the weighted-average number of common shares outstanding for the period. Diluted earnings per share attributable to Company stockholders is computed by dividing net loss income attributable to common stockholders by the weighted average number of common shares outstanding, assuming all potentially dilutive shares were issued. We apply the treasury stock method to determine the dilutive weighted average common shares represented by unvested restricted stock units, stock options and Employee Stock Purchase Program ("ESPP") shares.

The calculation of basic and diluted loss earnings per share attributable to Company stockholders for the three and six months ended March 31, June 30, 2024 and 2023, respectively, are as follows (in thousands):

	Three Months Ended March 31,

Basic and diluted weighted average number of shares outstanding	110,176,460	108,854,709
Total basic and diluted loss per share	\$ (0.02)	\$ (0.06)

Approximately 0.8 million and 0.7 million shares of unvested restricted stock units and stock to be issued pursuant to the ESPP have been excluded from the computation of diluted loss per share as the effect would be anti-dilutive for the three months ended March 31, 2024 and 2023 respectively.

### *Tax Receivable Agreement*

Mosing Holdings, LLC, a Delaware limited liability company ("Mosing Holdings"), converted all of its shares of Frank's International N.V. ("Frank's") Series A convertible preferred stock into shares of Frank's common stock on August 26, 2016, in connection with its delivery to Frank's of all of its interests in Frank's International C.V. ("FICV") (the "Conversion").

The tax receivable agreement (the "Original TRA") that Frank's entered into with FICV and Mosing Holdings in connection with Frank's initial public offering ("IPO") generally provided for the payment by Frank's to Mosing Holdings of 85% of the net cash savings, if any, in U.S. federal, state and local income tax and franchise tax that Frank's actually realized (or were deemed to be realized in certain circumstances) in periods after the IPO as a result of (i) tax basis increases resulting from the Conversion and (ii) imputed interest deemed to be paid by Frank's as a result of, and additional tax basis arising from, payments under the Original TRA. Frank's retained the benefit of the remaining 15% of these cash savings, if any.

In connection with the merger agreement providing for the Merger, Frank's, FICV and Mosing Holdings entered into the Amended and Restated Tax Receivable Agreement, dated as of March 10, 2021 (the "A&R TRA"). Pursuant to the A&R TRA, on October 1, 2021, the Company made a payment of \$15 million to settle the early termination payment obligations that would otherwise have been owed to Mosing Holdings under the Original TRA as a result of the Merger. As the payment was a condition precedent to effect the Merger, it was included in the determination of Merger consideration exchanged. The A&R TRA also provides for other contingent payments to be made by the Company to Mosing Holdings in the future in the event the Company realizes cash tax savings from tax attributes covered under the Original TRA during the ten-year period following October 1, 2021 in excess of \$18.1 million.

### Overview of Business

Working for clients across the entire well life cycle, we are a leading provider of energy services, offering cost-effective, innovative solutions and what we consider to be best-in-class safety and service quality. Our broad portfolio of products and services are designed to enhance production and improve recovery across the well lifecycle from exploration through abandonment.

With roots dating to 1938, we have approximately 8,000 employees and provide services and solutions to leading exploration and production companies in both onshore and offshore environments in approximately 60 countries.

The Company's extensive portfolio of capabilities spans well construction, well flow management, subsea well access, and well intervention and integrity solutions.

### Well Construction

- Our well construction products and services support customers' new wellbore drilling, wellbore completion and recompletion, and wellbore plug and abandonment requirements. In particular, we offer advanced technology solutions in drilling, tubular running services, tubular products, cementing, drilling and tubulars, wellbore cleanup. With a focus on innovation, we are continuing to advance the way wells are constructed by optimizing process efficiency on the rig floor, developing new methods to handle and install tubulars and mitigating well integrity risks. We believe we are a market leader in deepwater tubular running services and solutions. In recent years, we have added a range of lower-risk, open water cementing solutions, including the proprietary SeaCure® and QuikCure® solutions. We also offer a range of performance drilling tools designed to mitigate risk and optimize drilling efficiency, including proprietary downhole circulation tools and hydraulic pipe recovery systems.

### Well Management

Our well management offerings consist of well flow management, subsea well access and well intervention and integrity services:

- **Well flow management:** We gather valuable well and reservoir data, with a particular focus on well-site safety and environmental impact. We provide global, comprehensive well flow management systems for the safe production, measurement and sampling of hydrocarbons from a well during the exploration and appraisal phase of a new field; the flowback and clean-up of a new well prior to production; and in-line testing of a well during its production life. We also provide early production facilities to accelerate production; production enhancement packages to enhance reservoir recovery rates through the realization of production that was previously locked within the reservoir; and metering and other well surveillance technologies to monitor and measure flow and other characteristics of wells.
- **Subsea well access:** With over 40 years of experience providing a wide range of fit-for-purpose subsea well access solutions, our technology aims to provide safe well access and optimized production throughout the lifecycle of the well. We provide what we believe to be the most reliable, efficient and cost-effective subsea well access systems for exploration and appraisal, development, intervention and abandonment, including an extensive portfolio of standard and bespoke Subsea Test Tree Assemblies, Assemblies and a range motion-compensating and other surface handling equipment. We also provide services and solutions utilizing a rig-deployed Intervention Riser System ("IRS") owned by a third party and have capabilities for vessel-deployed light well intervention services. In addition, we provide systems integration and project management services.
- **Well intervention and integrity:** We provide well intervention solutions to acquire and interpret well data, maintain and restore well bore integrity and improve production. In addition to our extensive fleet of mechanical and cased hole wireline units, we have recently introduced and acquired a number of cost-effective, innovative well intervention services, including CoilHose™, a lightweight, small-footprint solution for wellbore lifting, cleaning and chemical treatments; Octopoda™, for fluid treatments in wellbore annuli; and Galea™, an autonomous well intervention solution, and expandable casing patches designed to repair damaged production casing or isolate existing perforations prior to refracturing a well (a so called "patch and perf"). We also possess several other distinct technical capabilities, including non-intrusive metering technologies and wireless telemetry systems for reservoir monitoring.

We operate a global business and have a diverse and relatively stable customer base that is comprised of national oil companies ("NOC"), international oil companies ("IOC"), independent exploration and production companies ("Independents") and service partners. We have strong relationships with a number of the world's largest NOCs and IOCs, some of which have been our customers for decades. We are dedicated to safely and sustainably delivering maximum value to our customers.

We organize and manage our operations on a geographical basis. Our reporting structure and the key financial information used by our management team is organized around our four operating segments: (i) North and Latin America ("NLA"), (ii) Europe and Sub-Saharan Africa ("ESSA"), (iii) Middle East and North Africa ("MENA") and (iv) Asia-Pacific ("APAC").

#### How We Generate Our Revenue

Our revenue is derived primarily from providing services in well construction, well flow management, subsea well access and well intervention and integrity to operators globally. Our revenue includes equipment service charges, personnel charges, run charges and consumables. Some of our contracts allow us to charge for additional deliverables, such as the costs of mobilization of people and equipment and customer specific engineering costs associated with a project. We also procure products and services on behalf of our customers that are provided by third parties for which we are reimbursed with a mark-up or in connection with an integrated services contract. We also design, manufacture and sell equipment, which is typically done in connection with a related operations and maintenance arrangement with a particular customer. In addition, we also generate revenue from the sale of certain well construction products.

#### Market Conditions and Price of Oil and Gas

The first second quarter of 2024 has seen continued a continuation of strong investment and activity growth as a result of stabilizing and strengthening driven by strong yet volatile commodity prices. Heightened tensions resulting from The volatility associated with prices have generally coincided with periods of escalation and de-escalation of the ongoing conflicts in Europe and the Middle East remains a source of uncertainty and volatility for energy and energy services market. There are a number of market factors that have had, and may continue to have, an effect on our business, including:

- The market for energy services and our business are substantially dependent on the price of oil and, to a lesser extent, the regional price of gas, which are both driven by market supply and demand. Changes in oil and gas prices impact customer willingness to spend on exploration and appraisal, development, production, and abandonment activities. The extent of the impact of a change in oil and gas prices on these activities varies extensively between geographic regions, types of customers, types of activities and the financial returns of individual projects.
- Average daily oil demand in the first second quarter of 2024 exceeded the average daily demand levels in the second quarter of 2023, as well as the full year average for 2023, with liquid demand expected to grow by 0.8 million 1.1 million b/d in 2024 over 2023. Brent crude oil prices have generally been increasing declining over the first second quarter, from an average of \$80/\$90/bbl in January increasing April decreasing to an average of \$85/\$82/bbl in March/May. The Brent price increase is attributable decrease has largely been due to the ongoing conflicts reduction in geopolitical risk premium amid a de-escalation of tensions in the Middle East since April as well as the Russia-Ukraine war, increasing demand in Asia and market perception that the recent announcement of an extension the unwinding of voluntary supply cuts by the Organization of Petroleum Exporting Countries and certain other oil producing nations ("OPEC+"). production cuts in the fourth quarter could cause a significant increase in global inventories.

- Activity related to gas and liquified natural gas ("LNG") production (and associated asset development) continues to grow within our ESSA and MENA regions in support of Europe's ongoing drive to diversify away from its reliance on Russian pipeline gas supplies over the long term. More broadly, the energy security and energy transition imperatives of policymakers in the U.S. and Europe are expected to result in increased investment in global gas development.
- International, offshore and deepwater activity has continued to strengthen throughout 2024 as operator upstream investments are expected to return to near 2015 levels. We also have experienced an increased demand for services and solutions related to brownfield and production enhancement and infield development programs as operators strive to maximize their previous investments and maintain production with a lower carbon footprint. In addition, we have seen an increase in demand for production optimization technologies, especially in support of gas and LNG developments.
- The clean energy transition continues to gain momentum. We believe, however, that hydrocarbons, and natural gas in particular, will continue to play a vital role in the transition towards more sustainable energy resources and that existing expertise and future innovation within the energy services sector, both to reduce emissions and enhance efficiency, will be critical. We are already active in the early-stage carbon capture and storage segment and have expertise and established operations within the geothermal and flare reduction segments. We continue to develop technologies to enhance the sustainability of our customers' operations which, along with our digital transformation initiatives, are expected to enable us to continue to support our customers' commercial and environmental initiatives. As the industry changes, we continue to evolve our approach to adapt and help our customers develop more sustainable energy solutions.

## Outlook

Global liquids demand growth slowed increased in the first second quarter of 2024 compared to the previous quarter however, and average year-on-year consumption is expected to continue to grow in 2024. Demand growth, particularly Persistent withdrawals from global inventories, stemming in Asia, along with an extension of voluntary part from OPEC+ production cuts by OPEC+, which the group announced in early June would remain until at least end of September, as well as escalating a strong rebound in demand and geopolitical tension in the Middle East have led are expected to a tightening of the market and supply concerns, adding upward pressure to prices, add upside price pressure.

The U.S. Energy Information Administration ("EIA") forecasts estimates that global liquids fuels consumption will average 102.9 million b/d in 2024, continuing growth from pre-pandemic levels and increasing by 0.9 million 1.1 million b/d over 2023. Global liquid fuels demand is then expected to grow by an additional 1.4 million a further 1.8 million b/d to reach 104.3 million 104.7 million b/d in 2025. Global liquids fuels demand growth is mostly driven by non-OECD Asian countries. In 2024, consumption of liquid fuels by non-OECD countries increases by 1.2 million b/d, offsetting a small decline in OECD, particularly in Europe and Japan. Consumption growth in 2025 is also largely driven by non-OECD countries, particularly China and India, with significant OECD consumption growth also expected in driven by the Middle East and United States, increasing industrial requirements and jet fuel consumption resulting from increasing global travel. States.

The EIA forecasts that global liquid fuels production will average 102.6 million 102.4 million b/d in 2024 - an increase of 0.8 million 0.6 million b/d over 2023 – and average 104.6 million b/d in 2025, a further 2.0 million 2.2 million b/d increase over 2024. Supply Although supply growth in 2024 is slowing from the increases seen in 2023 as limited by the extension of OPEC+ voluntary production cuts, are offset by supply growth outside of OPEC+. Although forecast the group is estimated to remain strong, OPEC+ crude oil liquids fuels production in 2024 is expected to decrease by 0.9 million 1.3 million b/d in 2024 compared to last year, forecast 2023, while production outside of OPEC+ is set to increase by 1.8 million 1.9 million b/d, led by growth in the United States, Canada, Guyana Brazil and Canada. Brazil. Global liquid fuels production growth in 2025 is predicted expected to be driven by the gradual unwinding of the OPEC+ voluntary supply cuts throughout the year with OPEC+ production expected to increase by 2.0 million 0.7 million b/d, in 2025 as the OPEC+ production cuts expire and supply growth well as a 1.4 million b/d increase from countries outside of OPEC+ continues to grow.

Oil prices rose declined in the first second quarter of 2024 driven by heightened geopolitical risk a de-escalation in the Middle East with conflict reducing the geopolitical risk premium, as well as the market perception that the recent extension announcement of the unwinding of OPEC+ voluntary production cuts adding further upward price pressure. The combination in the fourth quarter could cause a significant increase in global inventories. Since the end of flat production and rising consumption caused the EIA to forecast a reduction of global inventories for the second quarter, of 2024, with the tighter Brent spot price has increased, and the EIA expects this trend to continue as market balance keeping oil prices relatively elevated. participants have reassessed the announcement based on current global inventory levels and the indication by OPEC+ that production cuts remain subject to market conditions. As a result, the EIA expects oil prices to average \$90/\$89/bbl in for the second quarter half of 2024 and \$89/\$86/bbl for all of 2024. Inventories are forecast expected to build return to moderate builds in 2025 following the expected unwinding expiration of OPEC+ cuts and forecast supply cuts putting downward pressure on prices and as growth from non-OPEC+ countries expected to meet growth in global oil demand. As a result, the EIA estimates predicts oil prices will decline slightly to average \$87/\$88/bbl in for 2025.

In addition to the continued positive oil market outlook, global natural gas prices are expected to be generally constructive for development activity and investment by our customers. remain elevated as the market remains fundamentally tight.

The EIA estimates expects that annual average Henry Hub prices will remain under \$3.00 average almost \$2.90 per million British thermal unit ("MMBtu") for the second half of 2024 and 2025, averaging \$2.20/\$2.50/MMBtu for all of 2024, up from an average of \$2.10/MMBtu for the second quarter. The Henry Hub price is expected to average \$3.30/MMBtu in 2024 and \$2.90/MMBtu in 2025 respectively. The 2025. Prices are low prices are driven by due to high levels of natural gas in storage, inventories however, they are forecast to increase over the remainder of 2024 as production declines slightly due to a surplus at the start of winter and a milder winter resulting in below average less natural gas consumption directed drilling and production curtailments in the residential and commercial sectors. response to low prices. Rystad Energy predicts forecasts that prices at the

European Title Transfer Facility (TTF) ("TTF") and Northeast Asian LNG spot will average \$9.20/MMBtu and \$9.80/MMBtu respectively in 2024, remaining bullish as demand for 2024 as LNG recovers, particularly in China and India. European prices have declined in the first quarter driven by slightly due to muted demand, increased pipeline gas imports and healthy storage levels, milder weather and some bearish indicators leaving room for economic Asian demand growth. Despite muted demand growth globally and healthy European storage levels, muted LNG supply growth this year should maintain a price floor for gas and LNG.

Consequently, the market outlook for 2024 remains positive with strong prices driving growth in exploration and production expenditures, expenditures and the highest level of upstream investment since 2015 expected. Strong investment growth is expected in the deepwater and offshore shelf segments with support from large projects in the Middle East driven by Saudi Arabia and the UAE, and Qatar, as well as China, Norway, and Brazil Guyana and Guyana Brazil in Latin America.

As a result, we expect demand for our services and solutions to continue trending positively to trend upwards throughout 2024.

## How We Evaluate Our Operations

We use a number of financial and operational measures to routinely analyze and evaluate the performance of our business, including Revenue and Adjusted EBITDA.

**Revenue:** We analyze our performance by comparing actual monthly revenue by operating segments and areas of capabilities to our internal projections for each month. Our revenue is primarily derived from well construction, well flow management, subsea well access and well intervention and integrity solutions.

**Adjusted EBITDA:** We regularly evaluate our financial performance using Adjusted EBITDA. Our management believes Adjusted EBITDA is a useful financial performance measure as it excludes non-cash charges and other transactions not related to our core operating activities and allows more meaningful analysis of the trends and performance of our core operations.

Adjusted EBITDA is a non-GAAP financial measures. Please refer to the section titled "Non-GAAP Financial Measures" for a reconciliation of Adjusted EBITDA to net income (loss) income, the most directly comparable financial performance measure calculated and presented in accordance with GAAP.

Certain highlights of our financial results and other key developments include:

- Revenue for the three months ended March 31, 2024 June 30, 2024, decreased increased by \$23.3 \$86.2 million, or 5.7% 22.5%, to \$383.5 million \$469.6 million, compared to \$406.8 \$383.5 million for the three months ended December 31, 2023 March 31, 2024. The decrease increase in revenue was driven by lower activity primarily in is a result of higher revenue across all operating segments with the largest contributions from NLA and ESSA segments. Revenue for our segments is discussed separately below under the heading "Operating Segment Results." Second quarter operating results include \$21.1 million of revenue attributable to Coretrax.
- We reported net income for the three months ended June 30, 2024, of \$15.3 million, compared to a net loss of \$2.7 million for the three months ended March 31, 2024. Net income margin was 3.3% for the three months ended June 30, 2024 compared to (0.7)% for the three months ended March 31, 2024. The increase primarily reflected higher Adjusted EBITDA by \$27.1 million and lower severance and other expense by \$5.3 million, partially offset by higher merger and integration expense of \$6.6 million; higher stock-based compensation expense of \$2.3 million; higher foreign exchange loss of \$2.7 million; and higher income tax expense of \$1.6 million.

- Adjusted EBITDA for the three months ended June 30, 2024, increased by \$27.1 million, or 40.2%, to \$94.6 million from \$67.5 million for the three months ended March 31, 2024. Adjusted EBITDA margin increased to 20.1% during the three months ended June 30, 2024, as compared to 17.6% during the three months ended March 31, 2024. The increase in Adjusted EBITDA and Adjusted EBITDA margin is primarily attributable to higher revenue, better activity mix across all operating segments and contributions resulting from the Coretrax acquisition. The Company suspended vessel-deployed light well intervention ("LWI") operations during the third quarter of 2023 following a wire failure on the main crane of the third party-owned vessel working with Expro while the crane was suspending the subsea module ("SSM") of Expro's vessel-deployed LWI system. We are continuing to work with the relevant stakeholders and independent experts to assess the incident. The well control package and lubricator components of this vessel-deployed LWI system have been safely recovered. The subsea module was also subsequently recovered from the seabed but as we had abandoned it as a wreck we did not participate in its recovery. We are pursuing an insurance claim in respect of the subsea module and related umbilical and flushing lines. We are continuing to determine the path forward for our vessel-deployed LWI operations, including what alternative service delivery options and service partner options are available to the Company, and the timing and cost (including potential damage claims) of completing customer work scopes for which our vessel-deployed LWI system was integral. At this time, we are not able to assess the timing and potential cost of completing customer work scopes but do not expect such costs to be material to Expro's financial results.
- Net cash used in operating activities for the three months ended June 30, 2024, was \$13.2 million, a decrease compared to net cash provided by operating activities of \$29.9 million for the three months ended March 31, 2024, primarily driven by an increase in net working capital of \$62.0 million and an increase in cash paid for merger and integration expense and for severance and other expense by \$10.6 million compared to the prior quarter, partially offset by an increase in Adjusted EBITDA by \$27.1 million.

#### **Six months ended June 30, 2024, compared to six months ended June 30, 2023**

Certain highlights of our financial results and other key developments include:

- Revenue for the six months ended June 30, 2024, increased by \$116.9 million, or 15.9%, to \$853.1 million, compared to \$736.2 million for the six months ended June 30, 2023. The increase in revenue was negatively impacted by the winter season, higher activity across all segments, in the Northern Hemisphere, particularly in ESSA and the budget cycles of our NOC customers. MENA segments. Revenue for our segments is discussed separately below under the heading "Operating Segment Results."
- We reported net loss income for the three six months ended March 31, 2024 June 30, 2024, of \$2.7 million \$12.6 million, an increase of \$9.7 or 328.3% as compared to a net loss income of \$12.4 million \$2.9 million for the three six months ended December 31, 2023 June 30, 2023. Net loss income margin was (0.7)% 1.5% for the three six months ended March 31, 2024 June 30, 2024 compared to (3.1)% 0.4% for the three six months ended December 31, 2023 June 30, 2023. The change in net loss increase primarily reflected lower higher Adjusted EBITDA (which was up \$48.5 million) partially offset by higher depreciation and amortization expense of \$22.7 million, lower severance and other \$8.8 million; higher income tax expense of \$3.8 million and lower \$8.6 million; higher foreign exchange loss of \$7.8 million; higher merger and integration expense of \$3.3 million, partially offset by lower Adjusted EBITDA by \$17.6 million, as discussed below, \$7.4 million, which includes professional costs incurred in connection with the Coretrax Acquisition; higher interest and finance expense of \$5.5 million; and higher other income, net, stock-based compensation expense of \$4.3 million. \$2.7 million.
- Adjusted EBITDA for the three six months ended March 31, 2024 June 30, 2024, decreased increased by \$17.6 million, \$48.5 million, or 20.7% 42.8%, to \$67.5 million \$162.0 million from \$85.1 million \$113.5 million for the three six months ended December 31, 2023 June 30, 2023. Adjusted EBITDA margin decreased increased to 17.6% 19.0% during the three six months ended March 31, 2024 June 30, 2024, as compared to 20.9% 15.4% during the three six months ended December 31, 2023 June 30, 2023. The decrease increase in Adjusted EBITDA and Adjusted EBITDA margin is primarily attributable to lower higher revenue and an improved activity mix, primarily in NLA and ESSA segments, partially offset by increased activity on higher-margin projects in MENA. mix.

The Company suspended vessel-deployed light well intervention ("LWI") operations during the third quarter of 2023 following a wire failure on the main crane of the third party-owned vessel working with Expro while the crane was suspending the subsea module ("SSM") of Expro's vessel-deployed LWI system. We are continuing to work with the relevant stakeholders and independent experts to assess the incident. The well control package and lubricator components of this vessel-deployed LWI system have been safely recovered. The subsea module was also subsequently recovered from the seabed but as we had abandoned it as a wreck we did not participate in its recovery. We are pursuing an insurance claim in respect of the subsea module and related umbilical and flushing lines. We are continuing to determine the path forward for our vessel-deployed LWI operations, including what alternative service delivery options and service partner options are available to the Company, and the timing and cost (including potential damage claims) of completing customer work scopes for which our vessel-deployed LWI system was integral. At this time, we are not able to assess the timing and potential cost of completing customer work scopes but do not expect such costs to be material to Expro's financial results.

- Net cash provided by operating activities for the six months ended March 31, 2024 June 30, 2024, was \$29.9 million, compared to \$46.7 million during the six months ended June 30, 2023. The decrease in net cash provided by operating activities of \$16.8 million for the three six months ended December 31, 2023 June 30, 2024, with the change was primarily driven by a decrease unfavorable movement in Adjusted EBITDA net working capital of \$60.3 million, an increase in cash paid for merger and integration expense and for severance and other expense by \$17.6 million \$5.5 million, non-receipt of dividend income in the current quarter period of \$2.8 million and non-repeat higher payments for corporate taxes of dividends received from joint ventures of \$5.6 million \$1.0 million, partially offset by a favorable movement an increase in working capital of \$21.2 million compared to the prior quarter. Adjusted EBITDA.

#### **Non-GAAP Financial Measures**

We include in this Form 10-Q the non-GAAP financial measures Adjusted EBITDA and Adjusted EBITDA margin. We provide reconciliations of net income (loss), the most directly comparable financial performance measure calculated and presented in accordance with GAAP, to Adjusted EBITDA.

Adjusted EBITDA and Adjusted EBITDA margin are used as supplemental financial measures by our management and by external users of our financial statements, such as investors, commercial banks, research analysts and others. These non-GAAP financial measures allow our management and others to assess our financial and operating performance as compared to those of other companies in our industry, without regard to the effects of our capital structure, asset base, items outside the control of management and other charges outside the normal course of business.

We define Adjusted EBITDA as net income (loss) adjusted for (a) income tax expense (benefit), (b) depreciation and amortization expense, (c) impairment expense, (d) severance and other expense, net, (e) stock-based compensation expense, (f) merger and integration expense, (g) gain on disposal of assets, (h) other income (expense), net, (i) interest and finance (income) expense, net and (j) foreign exchange (gain) loss. Adjusted EBITDA margin reflects our Adjusted EBITDA as a percentage of revenues.

Adjusted EBITDA and Adjusted EBITDA margin have limitations as analytical tools and should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP. As Adjusted EBITDA may be defined differently by other companies in our industry, our presentation of Adjusted EBITDA may not be comparable to similarly titled measures of other companies, thereby diminishing their utility.

The following table presents a reconciliation of net **loss** **income (loss)** to Adjusted EBITDA for each of the three **and six** months presented (in thousands):

(1) Other **expense (income) income (expense)**, net, is comprised of immaterial, unusual or infrequently occurring transactions which, in management's view, do not provide useful measures of the underlying operating performance of the business.

We evaluate our business segment operating performance using segment revenue and Segment EBITDA, as described in Note 5 "Business segment reporting" in our consolidated financial statements. We believe Segment EBITDA is a useful operating performance measure as it excludes non-cash charges and other transactions not related to our core operating activities and corporate costs, and Segment EBITDA allows management to more meaningfully analyze the trends and performance of our core operations by segment as well as to make decisions regarding the allocation of resources to our segments.

Three months ended **March 31, 2024** June 30, 2024 compared to three months ended **December 31, 2023** March 31, 2024

## NLA

Revenue for the NLA segment was \$157.0 million for the three months ended June 30, 2024, an increase of \$26.6 million, or 20.4%, compared to \$130.4 million for the three months ended March 31, 2024, a decrease of \$15.1 million, or 10.4%, compared to \$145.5 million for the three months ended December 31, 2023. The decrease increase was primarily due to lower higher revenue from all product lines, in particular from higher well construction revenue activity in the United States, U.S., Guyana and Mexico, partially offset by increased well intervention and integrity revenue in the United States and Brazil Trinidad and higher well flow management activity in the U.S. and Argentina. The increase was supplemented by \$4.6 million of additional revenue in Colombia, as a result of the Coretrax Acquisition.

Segment EBITDA for the NLA segment was \$44.5 million, or 28.3% of revenues, during the three months ended June 30, 2024, an increase of \$10.1 million, or 29.4%, compared to \$34.4 million or 26.4% of revenues during the three months ended March 31, 2024, a decrease of \$9.9 million, or 22.3%, compared to \$44.3 million or 30.5% of revenues during the three months ended December 31, 2023. The decrease increase in Segment EBITDA and Segment EBITDA margin was attributable to lower higher activity and less more favorable activity mix during the three months ended March 31, 2024 June 30, 2024.

## ESSA

Revenue for the ESSA segment was \$168.4 million for the three months ended June 30, 2024, an increase of \$46.7 million, or 38.3%, compared to \$121.7 million for the three months ended March 31, 2024, a decrease of \$12.1 million, or 9.0%, compared to \$133.8 million for the three months ended December 31, 2023. The decrease increase in revenues was primarily driven by lower well flow management revenue in the Congo, lower increased subsea well access revenue in Western and Central Africa, and lower Well Construction revenue in the UK and Angola, partially offset by higher well intervention and integrity revenue in the UK and higher well flow management revenue in Norway and Denmark. Congo. The increase was supplemented by \$3.8 million of additional revenue as a result of the Coretrax Acquisition.

Segment EBITDA for the ESSA segment was \$35.0 million, or 20.8% of revenues, for the three months ended June 30, 2024, an increase of \$9.8 million, or 38.9%, compared to \$25.2 million, or 20.7% of revenues, for the three months ended March 31, 2024, a decrease of \$15.8 million, or 38.5%, compared to \$41.0 million, or 30.6% of revenues, for the three months ended December 31, 2023. The decrease increase in Segment EBITDA and Segment EBITDA margin was attributable to a combination of a less more favorable activity mix and decreased increased activities on higher margin services during the three months ended March 31, 2024 June 30, 2024.

## MENA

Revenue for the MENA segment was \$81.4 million for the three months ended June 30, 2024, an increase of \$9.9 million, or 13.9%, compared to \$71.5 million for the three months ended March 31, 2024, an increase of \$6.1 million, or 9.3%, compared to \$65.4 million for the three months ended December 31, 2023. The increase in revenue was driven higher well flow management by \$10.4 million of Coretrax revenue, in Algeria and Saudi Arabia, partially offset by lower well construction a slight decline in revenue in Morocco, across other product lines.

Segment EBITDA for the MENA segment was \$28.6 million, or 35.1% of revenues, for the three months ended June 30, 2024, an increase of \$4.1 million, or 16.6%, compared to \$24.5 million, or 34.3% of revenues, for the three months ended March 31, 2024, an increase of \$3.2 million, or 15.0%, compared to \$21.3 million, or 32.5% of revenues, for the three months ended December 31, 2023. The increase in Segment EBITDA and Segment EBITDA margin was primarily due to increased activity on higher-margin projects and more favorable activity mix during the three months ended March 31, 2024 June 30, 2024, including impacts of the Coretrax Acquisition.
