(Exact name of registrant as specified in its charter)   Delaware   2834   82-5089826 (State or other jurisdiction of incorporation or organization)   (Primary Standard Industrial Classification Code Number)   (I.R.S. Employer Identification Number)   401 Professional Drive, Suite 260 Gaithersburg, MD 20879 (240) 430-4212 (Address, including zip code, and telephone number, including area code, of registrant's principal executive office)   Anatoly Dritschilo, M.D. Chief Executive Officer Shuttle Pharmaceuticals Holdings, Inc. 401 Professional Drive, Suite 260 Gaithersburg, MD 20879 (240) 430-4212 (Name, address, including zip code, and telephone number, including area code, of agent for service)   Copies to:   Megan J. Penick, Esq. Joseph M. Lucosky, Esq. Dorsey & Whitney LLP Lucosky Brookman LLP 51 W. 52nd St 101 Wood Avenue South, 5th Floor New York, NY 10019 Woodbridge, NJ 08830 (212) 415-9200 (732) 395-4400   Approximate date of commencement of proposed sale to the public: As soon as practicable after this registration statement is declared effective.   If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933 check the following box:     If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.     If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.   If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.   Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "non-accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.   Large accelerated filer   Accelerated filer   Non-accelerated filer   Smaller reporting company   An Emerging Growth Company   If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 7(a)(2)(B) of the Securities Act.   The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until the registration statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.         The information in this preliminary prospectus is not complete and may be changed. We may not sell these securities nor may we accept offers to buy these securities until the registration statement filed with the Securities and Exchange Commission becomes effective. This preliminary prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.   PRELIMINARY PROSPECTUS SUBJECT TO COMPLETION, DATED FEBRUARY 12, 2025     SHUTTLE PHARMACEUTICALS HOLDINGS, INC.   Up to [*] Shares of Common Stock   Up to [*] Pre-Funded Warrants to Purchase up to [*] Shares of Common Stock   Up to [*] Shares of Common Stock Underlying the Pre-Funded Warrants   This is a firm commitment underwritten offering of up to [*] shares (the "Shares") of common stock, par value \$0.00001 per share ("common stock") or pre-funded warrants to purchase shares of common stock in lieu thereof (the "Pre-Funded Warrants").   The assumed public offering price for each share of common stock or each Pre-Funded Warrant is \$[*], which is the last reported sale price per share of our common stock on the Nasdaq Capital Market, or the Nasdaq, on [*,] 2025. The final public offering price per share or per Pre-Funded Warrant will be determined through negotiation between us and the Underwriter (as defined hereinafter) based upon a number of factors, including our history and our prospects, the industry in which we operate and other market conditions at the time of pricing and may be at a discount to the then current market price of our common stock. Therefore, the recent market price of our common stock referenced throughout this prospectus may not be indicative of the final offering price per share.   We are offering Pre-Funded Warrants to certain purchasers whose purchase of shares of common stock in this offering would otherwise result in the purchaser, together with its affiliates and certain related parties, beneficially owning more than 4.99% (or, at the election of the purchaser, 9.99%) of our outstanding common stock immediately following the consummation of this offering, the opportunity to purchase, if any such purchaser so chooses, Pre-Funded Warrants, in lieu of shares of common stock. The public offering price of each Pre-Funded Warrant will be equal to the price at which one share of common stock is sold to the public in this offering, minus \$0.001, and the exercise price of each Pre-Funded Warrant will be \$0.001 per share. The Pre-Funded Warrants will be immediately exercisable and may be exercised at any time until all of the Pre-Funded Warrants are exercised in full. For each Pre-Funded Warrant we sell, the number of shares of common stock we are offering will be decreased on a one-for-one basis.       This prospectus also includes the shares of common stock issuable upon exercise of the Pre-Funded Warrants. See "Description of Securities We Are Offering" in this prospectus for more information.   Our common stock trades on the Nasdaq under the symbol "SHPH." On February 10, 2025, the last reported sale price of our common stock was \$0.704 per share.   We have retained WestPark Capital, Inc. as the exclusive underwriter with respect to this offering (the "Underwriter"). We have agreed to pay the underwriter fees totaling 4.0% of the aggregate gross cash proceeds actually realized by the Company from the sale of the shares being offered hereby. See "Underwriting" beginning on page 97 of this prospectus for more information regarding these arrangements.   You should read this prospectus, together with additional information

This prospectus concerning our industry and the markets in which we operate or plan to operate, including our general expectations and market position, market opportunity and market share, is based on information from our own management estimates and research, as well as from industry and general publications and research, surveys and studies conducted by third parties. Management estimates are derived from publicly available information, our knowledge of our industry, and assumptions based on such information and knowledge which we believe to be reasonable. Our management estimates have not been verified by any independent source, and we have not independently verified any third-party information. In addition, assumptions and estimates of our company's future performance are necessarily subject to a high degree of uncertainty and risk due to a variety of factors, including those described in the section entitled "Risk Factors" beginning on page 13. These and other factors could cause our future performance to differ materially from our assumptions and estimates. See Special Note Regarding Forward-Looking Statements at page 42 below.

A Basis of Presentation

On August 6, 2024, we filed a Certificate of Amendment to our certificate of incorporation with the Secretary of State of the State of Delaware to effect a 1-for-8 reverse stock split of our issued and outstanding shares of common stock, par value \$0.00001 per share (the 2024 Reverse Stock Split), which became effective on August 13, 2024. All historical share and per share amounts reflected throughout this prospectus have been adjusted to reflect the 2024 Reverse Stock Split. However, our periodic and current reports, and all other documents that were filed prior to August 13, 2024, do not give effect to the 2024 Reverse Stock Split.

iii A PROSPECTUS SUMMARY

This summary highlights information contained in greater detail elsewhere in this prospectus from our filings with the SEC. This summary is not complete and does not contain all of the information you should consider in making your investment decision. You should read the entire prospectus carefully before making an investment in our securities. You should carefully consider, among other things, our financial statements and the related notes and the sections entitled "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" included elsewhere in this prospectus.

Unless the context otherwise requires, references in this prospectus to Shuttle Pharma, Shuttle Pharmaceuticals, the Company, we, us, and its subsidiaries refers to Shuttle Pharmaceuticals Holdings, Inc. and its subsidiaries, Shuttle Pharmaceuticals, Inc., and Shuttle Diagnostics, Inc.

Overview

Shuttle Pharma is a clinical stage pharmaceutical company leveraging our proprietary technology to develop novel therapies designed to cure cancers. Our goal is to extend the benefits of cancer treatments with surgery, radiation therapy, chemotherapy and immunotherapy. Radiation therapy (αRT) is one of the most effective modalities for treating cancers. We are developing a pipeline of products designed to address the limitations of the current cancer therapies as well as to extend to the new applications of RT. We believe that our product candidates will enable us to deliver cancer treatments that are safer, more reliable and at a greater scale than that of the current standard of care.

The corporate structure is based on Shuttle Pharmaceuticals Holdings, Inc. (Nasdaq SHPH) a Delaware Company with drug discovery and development performed in the wholly owned Shuttle Pharmaceuticals, Inc. (a Maryland Company) and diagnostics performed in the wholly owned Shuttle Diagnostics, Inc. (a Maryland Company). Our product candidates include Ropidoxuridine, a Phase II, clinical-stage radiation sensitizer, a platform of HDAC inhibitors (SP-1-161, SP-2-225 and SP-1-303) and two preclinical, prostate cancer-oriented diagnostic assets:

- i The PC-RAD Test, a blood test to predict clinical response to radiation therapy and the PSMA-B ligand for potential use as a theranostic agent.
- ii In December 2023, we submitted an Investigational New Drug (IND) application with the U.S. Food and Drug Administration (FDA) to support the next phase of development of Ropidoxuridine. In January 2024, we received the FDA's letter from the FDA for our IND application for the Phase II study of Ropidoxuridine (IPdR) as a radiation sensitizing agent during radiotherapy in patients with newly diagnosed IDH-wildtype glioblastoma with unmethylated MGMT promoter. Receipt of the letter allows us to commence the Phase II study of Ropidoxuridine (IPdR). Fifteen patients have enrolled in the study as of February 10, 2025 and half of those patients have now completed all seven courses of treatment with Ropidoxuridine. We have applied for and received FDA approval of Orphan designation for Ropidoxuridine and RT for treating brain cancer (glioblastoma).

The Phase II clinical trial was also approved by the Institutional Review Board (IRB) on June 21, 2024. We believe our management team's expertise in radiation therapy, combined modality cancer treatment and immuno-oncology will help drive the development and, if approved, the commercialization of these potentially curative therapies for patients with aggressive cancers.

Radiation Oncology has gone through transformative technological innovation over the last decade to better define tumors, allow improved shaping of radiation delivery and support dose escalation with shorter, more intensive courses of treatment. Furthermore, achieving higher dose distributions within tumor volumes has reached a practical plateau, since cancers are frequently integrated with or surrounded by more sensitive normal tissues and further dose escalation increases risks of tissue necrosis. To increase cancer cures at maximally tolerated radiation doses, pharmacological and biological modifications of cells are needed to sensitize cancers, protect normal tissues, and stimulate the immune system to react against antigens produced by irradiated, damaged cancer cells. Drugs that show sensitizing properties, or the ability to make cancer cells more sensitive to radiation, offer a solution to this problem. Currently, such drugs are chemotherapy agents used off-label, and many have inherent toxicities since they were designed for direct cancer treatments and not for sensitization. However, the clinical value of using radiation sensitizing drugs in combination with RT has been accepted in a variety of cancer types, including gynecological, gastro-intestinal, pulmonary and other malignancies. Hence, there is a critical need for new drugs that preferentially sensitize cancer cells to radiation therapy and that stimulate the innate immune response against irradiated cancer cells. Furthermore, to advance precision medicine in radiation oncology, there is a need for imaging and molecular diagnostic tests for determining the extent of cancer spread in the body and for predicting clinical responses to therapy.

We are developing our products with the goal of addressing the unmet need in cancer treatment for a commercially marketable radiation response modifier solution that leads to greater sensitivity of cancer cells to ionizing radiation therapy. The goal of our products is to increase the therapeutic index for patients receiving radiation and to decrease radiation-related toxicities in patients with solid tumors. Our products operate across three areas related to the treatment of cancer with RT:

- i Sensitization of growing cancer cells, rendering them more susceptible to the effects of radiation therapy.
- ii Activation of the DNA damage response pathway to kill cancer cells and protect adjacent normal cells.
- iii Activation of the immune system to kill any remaining cells after RT.

Our platform technology allows for the creation of an inventory of products for radiation sensitizing, immune modulation, and protection of healthy tissue.

Operations to date have focused on continuing our research and development efforts to advance Ropidoxuridine clinical testing and improved drug formulation, to advance HDAC inhibitor (SP-2-225) preclinical development and explore application of the PC-RAD Test, predictive biomarkers of radiation response. The clinical development of Ropidoxuridine has included completion of a Phase I clinical trial to establish drug bioavailability and a maximum tolerated dose for use in Phase II clinical trials. TCG GreenChem, Inc. (TCG GreenChem), with whom we have contracted for process research, development and cGMP compliant manufacture of IPdR, has manufactured the active pharmaceutical ingredient (API) of Ropidoxuridine and the University of Iowa Pharmaceuticals has formulated the drug product for use in the Company's upcoming Phase II clinical trial in brain cancer patients undergoing radiation therapy. The drug product (capsules) were shipped to contract research organization (CRO) Theradex Oncology and distributed to clinical trial sites that are fully approved to enroll patients in the trial. Shuttle received approval from the FDA to begin the clinical trial. The FDA made recommendations to expand the clinical trial to include a randomized dose optimization step and we agreed with the recommendation. Meetings with engaged clinical sites to review the protocol documents have occurred and FDA required Institutional Review Board, or IRB approvals have been received. With FDA recommended changes incorporated into the revised protocol and the completion of site initiation visits, the Company has commenced its Phase II clinical study. The radiation biomarker project and the health disparities project have been completed and the Company is proceeding with plans for clinical validation and potential for commercialization of Ropidoxuridine as a radiation sensitizer.

Our Pipeline

We are currently developing a pipeline of small molecule radiation sensitizers and immune response regulating drugs. Our most advanced product candidate is Ropidoxuridine, an orally available halogenated pyrimidine with strong cancer radiation sensitizing properties it is in preclinical studies. In addition, we have a pipeline of complimentary product candidates that we are developing to address solid tumor cancer indications by radiation sensitization or immune modification. Our therapeutic pipeline is represented in the diagram below:

Timeline for clinical phase (Ropidoxuridine) and pre-clinical phase (HDAC inhibitors) pipeline.

Our lead product candidates include:

- i Ropidoxuridine (IPdR)
- ii SP-2-225
- iii SP-1-303

are our lead candidate radiation sensitizer for use in combination with RT to treat brain tumors (glioblastoma) and sarcomas. Phase I clinical trial results supported by a National Institutes of Health, or NIH contract to Shuttle Pharma and the NCI (CTEP) were reported in the medical journal, Clinical Cancer Research, in July 2019, by our Small Business Innovation Research, or SBIR, subcontractor. Eighteen patients completed dose escalations to 1,800 mg/day for 30 days, establishing the maximum tolerated dose (MTD) of 1,200 mg/day in combination with RT. Four partial responses, nine stable disease and one progressive disease in target lesions were reported. Four patients did not have measurable disease and, as a result, were not evaluable. These Phase I trial results demonstrate oral bioavailability and an MTD of 1,200 mg per day for 28 days for use in combination with radiation for Phase II clinical trials that we propose to perform in brain tumors and in sarcomas. The brain tumor, glioblastoma multiforme (GB) is eligible for orphan disease designations. Shuttle Pharma has advanced drug manufacture and formulation and prepared a clinical protocol of a Single-Arm Study of IPdR as a Radiation Sensitizing Agent During Radiotherapy in Patients with Newly Diagnosed IDH-Wildtype MGMT Unmethylated Glioblastoma Multiforme. In December 2023, we submitted an IND application with the FDA to support the next phase of development of Ropidoxuridine. In January 2024, we received the FDA's letter from the FDA for our IND application for the Phase II study of Ropidoxuridine (IPdR) as a radiation sensitizing agent during radiotherapy in patients with newly diagnosed IDH-wildtype glioblastoma with unmethylated MGMT promoter. Receipt of the letter allows us to commence the Phase II study of Ropidoxuridine (IPdR). The clinical development of Ropidoxuridine has shown drug bioavailability and a maximum tolerated dose has been established for use in Phase II clinical trials. TCG GreenChem, Inc. (TCG GreenChem), with whom we have contracted for process research, development and cGMP compliant manufacture of IPdR, has successfully completed the manufacturing campaign for the active pharmaceutical ingredient (API) of Ropidoxuridine for use in the Company's upcoming Phase II clinical trial in brain cancer patients undergoing radiation therapy. Shuttle also worked with University of Iowa Pharmaceuticals to develop the formulation and produce the capsules, which have been shipped to contract research organization (CRO) Theradex Oncology for distribution to clinical trial sites. Both activities have now been completed. In addition, Shuttle received approval from the FDA to begin the clinical trial. The FDA made recommendations that led to an expanded clinical trial to include randomized dose optimization and we agreed with the recommendation. We met with representatives from six candidate clinical sites to review the protocol documents and FDA required IRB approvals have been obtained. With FDA recommended changes incorporated into the revised protocol, the Company has now contractually engaged all six of the planned research centers which have begun performing clinical trials in our Phase II clinical study. Fifteen patients have enrolled in the study as of February 10, 2025 and half of those patients have already completed all seven courses of treatment with Ropidoxuridine.

The Phase II clinical study is summarized below:

Schema for the Phase II clinical trial. The initial cohort of 40 patients will be randomized to one of two Ropidoxuridine doses. 20 patients will receive the 1200 mg dose and 20 patients will receive the 960 mg dose. The optimum dose will be determined by comparing drug bioavailability and side-effects. The optimum dose will then continue to enroll 14 additional patients to provide the required 34 patients for statistical significance in comparison to historical controls.

Ropidoxuridine and Tipiracil (IPdR/TPI) is a new combination formulation demonstrating extended bioavailability after oral administration in an animal model system. The IPdR/TPI formulation will undergo preclinical development for use as a radiation sensitizer and represents a next generation oral product for clinical evaluation.

SP-2-225 is Shuttle Pharma's pre-clinical class IIb selective HDAC inhibitor that affects histone deacetylase HDAC6 has been identified as the candidate lead molecule for development as a post-RT innate immune system activator. The macrophage is a key target for activating the innate immune system against cancer cells. SP-2-225 has effects on the regulation of the immune system by maintaining macrophage cells in an inflammatory, anti-cancer polarization. The interactions of RT with the immune response for cancer treatment are of great current interest, offering insight into potential mechanisms for primary site and metastatic cancer treatment. For this reason, Shuttle Pharma has selected SP-2-225 as the candidate lead HDAC inhibitor for preclinical development. We have contracted with investigators at Georgetown University to perform preclinical studies of immune activation after radiation therapy in an animal tumor model. These data have been published (Noonapalle SKR, Grindrod S, Aghdam N, Li X, Gracia-Hernandez M, Zevallos-Delgado C, Jung M, Villagra A, Dritschilo A. Radiotherapy-induced Immune Response Enhanced by Selective HDAC6 Inhibition. Mol Cancer Ther. 2023 Dec 1;2(12):1376-1389. doi: 10.1158/1535-7163.MCT-23-0215. PMID: 37586844; PMCID: PMC10878032) and additional preclinical studies are in progress with our contractors. With the introduction of check-point inhibitors, CAR-T therapies and personalized medicine in cancer, regulation of the immune response following RT is of significant clinical and commercial interest.

SP-1-303 is Shuttle Pharma's pre-clinical selective Class I HDAC inhibitor that preferentially affects histone deacetylases HDAC1 and HDAC3 members of the class I HDAC family of enzymes. SP-1-303 data show direct cellular toxicity in ER positive breast cancer cells. Furthermore, SP-1-303 increases PD-L1 expression. Completed preclinical in vitro studies have been published (Jung M, Nicholas N, Grindrod S, Dritschilo A. Dual-targeting class I HDAC inhibitor and ATM activator, SP-1-303, preferentially inhibits estrogen receptor positive breast cancer cell growth. PLoS One. 2024 Jul 15;19(7):e0306168. doi: 10.1371/journal.pone.0306168. PMID: 39008483; PMCID: PMC11249239.). We plan to seek university collaborations to complete SP-1-303 pre-clinical development in 2024.

Our Approach

We believe that we have established a leadership position in radiation sensitizer and response modifier discovery and development. We have identified a clinical phase product candidate and discovered new pre-clinical phase molecules using our proprietary platform technologies to increase the therapeutic index for patients receiving radiation for treatment of solid tumors. Our development strategy has four key pillars: (1) to improve the efficacy of RT by demonstrating improved disease-free survival rates in patients who undergo radiation therapy, (2) reduce the amount of radiation needed for a favorable tumor response, thereby limiting the potential for radiation related toxicities to healthy cells, (3) decrease the extent of surgery needed to remove cancers and improve quality of life, and (4) leverage our next generation technologies to create drugs that regulate the immune response assisting immune checkpoint and CAR-T therapies and other personalized medicines targeting cancers.

In addition to private and public investment into our candidate therapeutic technology, we have also competed for non-dilutive funding from the NIH to support our lead sensitizer and to explore development of complimentary diagnostic products. To date, we have completed three SBIR contracts awarded to Shuttle Pharma by the NIH to:

- i Develop IPdR as a radiation sensitizer. This funding provided partial support for the Phase I clinical trial of Ropidoxuridine and RT.
- ii Develop prostate cancer cell cultures from African-American men, with donor matched normal prostate cells, establishing 50 pairs for accelerating research to reduce prostate cancer health disparities in African-American men. This project was funded under Moonshot[®] designation. Shuttle Pharma is eligible to apply for additional SBIR (Phase IIb)

inhibitor (SP-2-225) and, if approved by the FDA, commercialize our product candidates for the treatment of cancers. While this process may require years to complete, we believe achieving this goal could result in new radiation sensitizer and immunotherapy products. Key elements of our strategy include:

 • Capitalize on Ropidoxuridine as an orally available, small molecule radiation sensitizer. To date, there is one drug (Cetuximab, a monoclonal antibody) approved by the FDA specifically as a radiation sensitizer. If we are successful in developing Ropidoxuridine and obtaining FDA approval, a small molecule sensitizer would then be enabled for clinical applications for radiation sensitization indications.

 • Expand our leadership position within radiation sensitizers. In addition to our traditional radiation sensitizers, we plan to advance our near-term pipeline to include radiation sensitizers for proton therapy. Proton Therapy is growing worldwide as a form of radiation therapy due to its unique beam shaping characteristics. As a result, this new technology offers a major opportunity for Shuttle Pharma to strive to develop an innovative and well-tolerated drug for proton therapy sensitization.

 • Execute a disciplined business development strategy to strengthen our portfolio of product candidates. We have built our current product pipeline through in-house discovery, development, partnerships with leading academic institutions and through in-licensing. We will continue to evaluate new in-licensing opportunities and collaboration agreements with leading academic institutions and other biotechnology companies around programs that seek to address areas of high unmet need and for which we believe there is a high probability of clinical success, including programs beyond our target franchise areas and current technology footprint.

 • Invest in our HDAC platform technology and maximize its utility across cancer therapies. We are initially applying the platform to develop drugs for cancer radiation sensitization, normal tissue radiation protection and post radiation immune stimulation. Based on the data we have obtained thus far, these drugs are immune regulatory. We intend to invest to develop other properties of our platform technology, as well.

 • Enter into collaborations to realize the full potential of our platform. The breadth of our HDAC technology platform enables other therapeutic applications, including radiation sensitization and immune therapy. We intend to seek collaborations centered on our platform to maximize applications for cancer treatment.

 • Establish Shuttle Diagnostics, Inc. as a subsidiary of SHPP to advance development of the predictive biomarker (PC-RAD Test) and the PSMA ligand (PSMA-B) to advance prostate cancer treatment.

 • Our management team has significant experience in radiation oncology and in progressing products from early-stage research through clinical trials. Our Chief Executive Officer, or CEO, Anatoly Dritschilo, M.D., is an experienced clinician and researcher who has held senior academic and management positions including serving as Department Chairman, Hospital Medical Director and Cancer Center Director at Georgetown University Medical Center. Prior to co-founding our Company, Dr. Dritschilo was a co-founder of Oncomed, Inc., a company that became public as NeoPharm, Inc. (Nasdaq: NEOL). He has experience in providing care for patients undergoing treatment for cancers of the prostate, breast, brain, lung, sarcomas and GI systems. Dr. Dritschilo has directed basic science research supported by grants from the National Cancer Institute and performed clinical trials using drugs and radiation therapy. In addition, Dr. Dritschilo served as the principal investigator of pharmaceutical industry sponsored clinical evaluations of human interferon alpha-2 (Bristol-Myers) with radiation therapy and antisense raf oligonucleotides, LERaFON (NeoPharm) with radiation therapy. He serves as a Radiation Biology and Radiation Oncology expert on committees of the NIH to review Program Project (P01) grant applications, Specialized Program of Research Excellence (SPORE) grant applications and investigator-initiated research project (R01) applications. Dr. Dritschilo is supported in our clinical development effort by Tyvin Rich, MD, our Chief Clinical Officer and Medical Director. Dr. Rich is the former Professor and Chairman of the Department of Therapeutic Radiology and Oncology at the University of Virginia Health Sciences Center and proton radiation therapy specialist at the Hampton Proton Therapy Center in Hampton, Virginia. Dr. Rich has served as principal investigator on multi-modality clinical trials for the treatment of gastrointestinal (GI) cancers and helped to develop treatment with 5-fluorouracil (5-FU) as a radiation sensitizer for use with RT in the treatment of GI cancers. He has extensive cancer clinical trial experience in developing radiation sensitizer applications through his participation in the Radiation Therapy Oncology Group (RTOG). Dr. Rich is a co-inventor with scientists at the University of Virginia of the Proton Activated Atomic Medicine technology.

 • Our administrative services are provided by Peter Dritschilo, MBA, who has served as our President and COO since 2012. Mr. Dritschilo’s experience in hospital administration and management of medical oncology clinical services and radiation therapy facilities, including management of day-to-day operations, human resources and financial oversight. Peter Dritschilo is the son of our Chairman and CEO, Dr. Anatoly Dritschilo. Mr. Timothy J. Lorber is our Chief Financial Officer, or CFO, a position he has served in since June 2024. Mr. Lorber is a CPA with more than 40 years of professional finance experience. We believe his extensive experience and expertise in the financial industry supports his service as our CFO. Michael Vander Hoek, our former CFO, as Vice President for Operations and Regulatory expands our capability to provide the level of management needed for the proposed expansion of clinical trials. Mr. Vander Hoek served as administrative director of the Lombardi Comprehensive Cancer Center (LCCC) for 12 years and has extensive experience in negotiations, management and supervision of Contract Research Organizations (CROs) and research contracts in general. As the administrative director of the Lombardi Comprehensive Cancer Center, Mr. Vander Hoek also served as the chief financial officer. Taken together, we believe our leadership team of highly qualified specialists will help us achieve the proposed milestones for the development of radiation sensitizer products.

 • Our common stock currently is listed for quotation on the Nasdaq Capital Market. We are required to meet Nasdaq listing rules in order to maintain such listing, including a requirement that the Company’s stockholders equity remain at or above \$2.5 million.

 • On September 10, 2024, we received a letter from The Nasdaq notifying the Company that it is no longer in compliance with the minimum stockholders’ equity requirement for continued listing on the Nasdaq Capital Market. Nasdaq Listing Rule 5550(b)(1) requires listed companies to maintain stockholders’ equity of at least \$2.5 million. In the Company’s Quarterly Report on Form 10-Q for the period ended June 30, 2024, the Company reported stockholders’ equity of \$801,434, which is below the minimum stockholders’ equity required for continued listing pursuant to Nasdaq Listing Rule 5550(b)(1). In addition, at present, the Company does not meet the alternatives of market value of listed securities or net income from continuing operations.

 • This Nasdaq notice had no immediate effect on the listing of the Company’s securities on the Nasdaq Capital Market. The Company subsequently submitted a revised plan of compliance to Nasdaq on November 14, 2024. The Company’s plan to regain compliance was accepted, and Nasdaq granted an extension of 180 calendar days from September 10, 2024 for the Company to regain compliance.

 • On December 31, 2024, the Company, received a letter from The Nasdaq stating that for the 30 consecutive business day period between November 15, 2024 to December 30, 2024 the Company’s common stock had failed to maintain a minimum closing bid price of \$1.00 per share, as required for continued listing on The Nasdaq Capital Market pursuant to Nasdaq Listing Rule 5550(a)(2) (the “Minimum Bid Price Requirement”). Pursuant to Nasdaq Listing Rule 5810(c)(3)(A), the Company has an initial period of 180 calendar days, or until June 30, 2025 (the “Compliance Period”), to regain compliance with the Minimum Bid Price Requirement. To regain compliance, the closing bid price of the Company’s common stock must meet or exceed \$1.00 per share for a minimum of 10 consecutive business days.

 • There can be no assurance that the Company will be able to regain compliance and maintain its listing on the Nasdaq Capital Market. If the Company fails to satisfy another Nasdaq requirement for continued listing, Nasdaq could provide notice that the Company’s securities will become subject to delisting. In such event, the Company will have an opportunity to appeal Nasdaq’s decision to a hearings panel.

 • 2024 Reverse Stock Split

 • On August 31, 2023 we received a letter from the Nasdaq Listing Qualifications Staff of the Nasdaq (the “Staff”) stating that for the 30 consecutive business day period the Company’s common stock had failed to maintain a minimum closing bid price of \$1.00 per share, as required for continued listing on The Nasdaq Capital Market pursuant to the “Minimum Bid Price Requirement.”

 • In order to regain compliance with the Minimum Bid Price Requirement, on August 6, 2024, we filed an amendment to our certificate of incorporation to effect a 1-for-8 reverse stock split of our outstanding common stock (the “2024 Reverse Stock Split”). The 2024 Reverse Stock Split became effective on August 13, 2024, when the Company’s common stock opened for trading on Nasdaq on a post-split basis under the Company’s existing trading symbol, **æSHPP.æ** Subsequently, on August 27, 2024, we received notice from Nasdaq that we regained compliance with the Minimum Bid Price Requirement.

 • All historical share and per share amounts reflected throughout this prospectus have been adjusted to reflect the 2024 Reverse Stock Split. However, our periodic and current reports, and all other documents that were filed prior to August 13, 2024 do not give effect to the 2024 Reverse Stock Split.

 • Going Concern Uncertainty

 • Our consolidated financial statements are prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The Company has incurred losses since inception and has a net loss of approximately \$7.5 million and no revenues for the nine months ended September 30, 2024 and has a working capital deficit of approximately \$1.3 million as of September 30, 2024.

 • The Company does not expect to generate positive cash flows from operating activities in the near future. In September 2024, the Company’s CEO provided \$250 thousand to the Company in exchange for a promissory note repayable in equal monthly installments of principal and interest over a term of one year. In October 2024, the Company completed an offering of senior secured convertible bridge notes, receiving \$790 thousand in cash. The notes have a term of one-year and were accompanied by 329,461 warrants with a weighted-average exercise price of \$1.42. Also in October 2024, the Company completed an equity raise that provided \$3.9 million net cash for the issuance of 2.9 million shares / pre-funded warrants, and by 2.9 million warrants with an exercise price of \$1.40. However, the Company’s existing cash resources and the cash received from the equity offering and senior convertible note are not expected to provide sufficient funds to carry out the Company’s operations and clinical trials through the next twelve months.

 • The Company’s capital raises have to date supported operations, the manufacture of drug product and FDA approval of the IND for the Phase II clinical trial of Ropidoxuridine and radiation therapy in glioblastoma and other radiation sensitizer discovery and therapy. The FDA recommended and the Company agreed to an expansion of the Phase II clinical trial, necessitating additional capital to complete the trial as well as fund ongoing operations. Additionally, the Phase II clinical trial of Ropidoxuridine has evolved with finalized agreements with all six of the planned site enrollment locations to administer the Phase II clinical trial of Ropidoxuridine and the enrollment of the first ten patients.

 • The ability of the Company to continue as a going concern is dependent upon its ability to continue to successfully raise additional equity or debt financing to allow it to fund ongoing operations, conduct clinical trials and bring a drug candidate to commercialization to generate revenues. These conditions raise substantial doubt about the Company’s ability to continue as a going concern within one year after the date that the unaudited condensed consolidated financial statements are issued.

 • If we fail to obtain additional material financing in the near-term, our clinical trials and targeted FDA submission timeline could be delayed, and we could be forced to abandon such activities entirely and cease operations, with the possible loss of such properties or assets. If we are unable to obtain a material quantum of financing in the imminent future or unable to continue to obtain additional financing over at least the next 12 months as we continue to generate negative cash flow, our board of directors could determine to cause the Company to undertake a process of liquidation under Chapter 7 of applicable U.S. bankruptcy laws, or otherwise seek other protection under such laws. In such event, we expect that holders of shares of our common stock would recoup little if any material value in such process.

 • Recent Financings

 • Our IPO and Post-2022 Financing

 • On September 2, 2022, we closed on our IPO of 1,225,888 units (each a **æIPO Unit,æ** and collectively, the **æIPO Unitsæ**), with each IPO Unit consisting of one share of the Company’s common stock and one warrant to purchase one share of common stock, at a public offering price of \$8.125 per IPO Unit (\$65 per IPO Unit, on a post-reverse split basis). Our IPO, which was underwritten by Boustead Securities, LLC (the “Boustead”), resulted in gross proceeds of \$9.96 million, before deducting underwriting discounts and commissions. On September 29, 2022, Boustead exercised its overallotment option, purchasing an additional 183,883 IPO Units, resulting in gross proceeds of \$1.49 million, before deducting underwriter commissions and discounts. As a result, our IPO raised a total of \$11.45 million, before deducting underwriting discounts, commissions and related IPO expenses. On a post Reverse Split basis, 352,443 shares (including exercised warrants) were issued under the IPO.

 • On January 11, 2023, we entered into a securities purchase agreement (the **æSPAæ**) with Alto Opportunity Master Fund, SPC **æ** Segregated Master Portfolio B, a Cayman entity (the **æInvestoræ**), as amended on May 10, 2023 and June 4, 2023, pursuant to which the Company sold to the Investor a \$4.3 million convertible note (the **æJanuary 2023 Convertible Noteæ**) and warrant (the **æJanuary 2023 Warrantæ**) to purchase 127,260 (post Reverse Split) shares of common stock of the Company, in exchange for gross proceeds of \$4.0 million (the **æInvestment Amountæ**). The January 2023 Convertible Note amortizes on a monthly basis and the Company can make such monthly amortization payments in cash or, subject to certain equity conditions, in registered shares of common stock or a combination thereof. For equity repayment, the January 2023 Convertible Note is convertible into shares of common stock at price per share equal to the lower of (i) \$18.8 (post Reverse Split) (ii) 90% of the three lowest daily VWAPs of the 15 trading days prior to the payment date or (iii) 90% of the VWAP of the trading day prior to payment date. The January 2023 Convertible Note is repayable over 26 months and bears interest at the rate of 5% per annum. The January 2023 Warrant is exercisable for four years from the date of closing and is exercisable at \$0.48 per share (post Reverse Split, and as subsequently adjusted pursuant to the SPA, as amended). In the event the Investor exercises the January 2023 Warrant in full, such exercise would result in additional gross proceeds to the Company of approximately \$61 thousand. As of the date of this filing, the January 2023 Convertible Note has been paid in full.

 • On September 4, 2024, the Company entered into a loan agreement with our Chief Executive Officer, Dr. Anatoly Dritschilo, pursuant to which Dr. Dritschilo loaned the Company \$250,000 (principal), bearing interest at the rate of 12% per annum and which is repayable in 12 substantially equal monthly installments over a one year period.

 • On October 14, 2024, the Company issued an aggregate of \$600,000 (of an up to \$1.3 million authorized financing) senior secured convertible notes due in October 2025, which accrue interest at 14.5% interest per year. The notes include a 5% original issue discount and the Company received \$570,000 in proceeds. The notes are convertible beginning three months after the date of issuance, and the conversion price will be the lower of a 15% discount to (i) the 5-day VWAP immediately prior to Closing or (ii) the price of any offering entered into by the Company during the term of the notes. The Company has the option to prepay the notes at any time for 107% of total outstanding balance and any outstanding principal will be paid in conversion of shares of common stock at the end of the term, subject to the Company’s exercise of the optional prepayment right. Any accrued interest will be repaid quarterly in cash. The Company also issued warrants to the lenders to purchase an aggregate 240,917 shares of common stock, exercisable at \$1.40 per share, with such warrants expiring five years from issuance. In addition, the Company’s Chief Executive Officer, Dr. Anatoly Dritschilo, invested a total of \$237,500 in this financing round, in exchange for a \$250,000 convertible note.

 • On October 21, 2024, the Company issued an additional \$231,579 in senior secured convertible notes due in October 2025, with substantially similar terms as the October 14, 2024, issuance. The notes include a 5% original issue discount and the Company received \$220,000 in proceeds. The Company also issued warrants to the lenders to purchase an aggregate 88,544 shares of common stock, exercisable at \$1.49 per share, with such warrants expiring five years from issuance. Upon completing this issuance, the Company closed the senior secured convertible note offering after receiving a total of \$790,000 in proceeds.

 • 8 Summary Risk Factors

 • Our business is subject to a number of risks you should be aware of before making an investment decision. These risks are discussed more fully in the **æRisk Factorsæ** section of this prospectus at page 13 immediately following this prospectus summary, and in Part I, Item 1A **æRisk Factorsæ** of our Amended Annual Report on Form 10-K/A for the fiscal year ended December 31, 2023, as amended on September 3, 2024, and in Part II, Item 1A **æRisk Factorsæ** of our Quarterly Report on Form 10-Q for the quarter ended September 30, 2024, which are each included in this prospectus. These risks include the following:

 • Our ability to continue as a going concern in the near term is dependent upon us successfully raising additional equity or debt financing to fund our operations.

 • Our success is primarily dependent on achieving the development, regulatory approval and commercialization of our product candidates, both of which are in the early stages of development.

 • Our approach to the discovery and development of innovative radiation oncology drugs based on our HDAC small molecule delivery platform, which is novel, unproven and may not result in marketable products.

 • We have no product revenue, have incurred significant losses since inception, may never become profitable and may incur substantial and increasing net losses for the foreseeable future as we continue the development of, and seek regulatory approvals for our product candidates.

 • If clinical trials of our product candidates fail to demonstrate safety and efficacy, which are ongoing determinations that are solely within the authority of the FDA, we may be unable to obtain regulatory approvals to commercialize our product candidates.

 • We are subject to regulatory approval processes that are lengthy, time-consuming and unpredictable. We may not obtain approval for any of our product candidates from the FDA or foreign regulatory authorities.

 • Even if we obtain regulatory approval, the market may not be receptive to our product candidates.

 • We may not be able to establish collaborative partnerships with other pharmaceutical companies, through which we expect to complete development of, obtain marketing approval for and, if approved, manufacture and market our product candidates.

 • We may encounter difficulties satisfying the requirements of clinical trial protocols, including patient enrollment.

 • We may face competition from other companies in our field or claims from third parties alleging infringement of their intellectual property.

 • We may be unable to recruit or retain key employees, including our senior management team.

 • Any drugs we develop may become subject to unfavorable pricing regulations, third-party reimbursement practices or healthcare reform initiatives, thereby harming our business.

 • We are a Phase II clinical stage pharmaceutical company with a limited operating history upon which you can evaluate our business and prospects. Specialty pharmaceutical product development is a highly speculative

undertaking and involves a substantial degree of risk. **9 A A** We do not currently have any product candidates in advanced clinical trials or approved for sale, and we continue to incur significant research and development and general and administrative expenses in relation to our operations. In addition, we have not yet demonstrated an ability to successfully overcome many of the risks and uncertainties frequently encountered by companies in new and rapidly evolving fields, particularly in the specialty pharmaceutical industry. **A A** We have not submitted an application or received marketing approval for any of our product candidates. Regulatory approval of our product candidates is not guaranteed, and the approval process is expensive and may take several years. **A A** It is difficult and costly to protect our intellectual property rights. **A A** If we are unable to protect the confidentiality of our trade secrets, our business and competitive position would be harmed. **A A** On September 4, 2024, we restated our annual report on Form 10-K for the year ended December 31, 2023, as a result of a re-audit of our 2022 financial statements, and there may be some risk of regulatory, shareholder / investor or other actions or consequences as a result of the restatement. **A A** The future issuance of equity or of debt securities that are convertible into common stock will dilute our share capital. **A** If we are unable to protect the confidentiality of our trade secrets, our business and competitive position would be harmed. **A** Implications of Being an Emerging Growth Company **A** As a smaller reporting company, and as a company with less than \$1.235 billion in revenue during our last fiscal year, we qualify as an “emerging growth company” as defined in the JOBS Act. For so long as we remain an emerging growth company, we are permitted and intend to rely on exemptions from specified disclosure and other requirements that are applicable to other public companies that are not emerging growth companies. These exemptions include: **A** being permitted to provide only two years of audited financial statements, in addition to any required unaudited interim financial statements, with correspondingly reduced “Management’s Discussion and Analysis of Financial Condition and Results of Operations” disclosure; **A** not being required to comply with the auditor attestation requirements in the assessment of our internal control over financial reporting; **A** not being required to comply with any mandatory audit firm rotation or a supplement to the auditor’s report providing additional information about the audit and the financial statements; **A** reduced disclosure obligations regarding executive compensation; and **A** exemptions from the requirements of holding a non-binding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. **10 A** We may take advantage of the above provisions for up to five years or until such earlier time that we are no longer an emerging growth company. We would cease to be an emerging growth company if we have more than \$1.235 billion in annual revenues, have more than \$700 million in market value of our capital stock held by non-affiliates or issue more than \$1.0 billion of non-convertible debt over a three-year period. We may also choose to take advantage of some, but not all, of the available exemptions. We have taken advantage of some reduced reporting requirements in this prospectus. Accordingly, the information contained in this prospectus may be different than the information you receive from other public companies in which you hold stock. **A** In addition, the JOBS Act provides that an emerging growth company can take advantage of an extended transition period for complying with new or revised accounting standards. This provision allows an emerging growth company to delay the adoption of some accounting standards until those standards would otherwise apply to private companies. We have irrevocably elected not to avail ourselves of this extended transition period for adopting new or revised accounting standards and, therefore, we will be subject to the same new or revised accounting standards as other public companies that are not emerging growth companies. **A Corporate Information** **The Company** was formed as a limited liability company in the state of Maryland in December 2012 and was converted to a C corporation in August 2016. In June 2018, Shuttle completed a share exchange with Shuttle Pharma Acquisition Corp. Inc. (“Acquisition Corp.”), pursuant to which Shuttle Pharmaceuticals, Inc. became a subsidiary of Acquisition Corp. and we subsequently changed the name of Acquisition Corp. to Shuttle Pharmaceuticals Holdings, Inc. **A** Our executive offices are located at 401 Professional Drive, Suite 260, Gaithersburg, MD 20879 and our telephone number is (240) 430-4212. Our corporate website is www.shuttlepharma.com. Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and all amendments to those reports, if any, are available to you free of charge through the “Investor Relations” section of our website as soon as reasonably practicable after such materials have been electronically filed with or furnished to the SEC. Information contained on our websites does not form a part of this prospectus. **11 A THE OFFERING** **A Common stock** we are offering: Up to [*] shares of common stock based on an assumed public offering price of \$[*] per share of common stock, which is equal to the last sale price of our common stock as reported by Nasdaq on [*], 2025. **A Pre-Funded Warrants** to be offered: We are also offering up to [*] Pre-Funded Warrants to purchase up to [*] shares of common stock in lieu of shares of common stock to each purchaser whose purchase of shares of common stock in this offering would otherwise result in the purchaser, together with its affiliates and certain related parties, beneficially owning more than 4.99% (or, at the election of the purchaser, 9.99%) of our outstanding common stock immediately following the consummation of this offering. The purchase price of each Pre-Funded Warrant will equal the price at which one share of common stock is being sold to the public in this offering, minus \$0.001, and the exercise price of each Pre-Funded Warrant will be \$0.001 per share. The Pre-Funded Warrants will be exercisable immediately and may be exercised at any time until all of the Pre-Funded Warrants are exercised in full. For each Pre-Funded Warrant we sell, the number of shares of Common Stock we are offering will be decreased on a one-for-one basis. **A** This prospectus also relates to the offering of our common stock issuable upon exercise of the Pre-Funded Warrants. See “Description of Securities We Are Offering” Pre-Funded Warrants. **A Common stock** outstanding before this offering: 4,076,568 shares of common stock (1) **A Common stock** outstanding immediately after this offering: [*] shares (assuming we sell only shares of common stock and no Pre-Funded Warrants). **A Dividend policy:** We have never paid cash dividends on our common stock and we do not anticipate paying any cash dividends in the foreseeable future. See the section entitled “Dividend Policy.” **A Use of proceeds:** We estimate that the net proceeds from this offering will be approximately \$[*] million, based on an assumed public offering price of \$[*] per share of common stock, which was the closing price of our common stock on Nasdaq on [*], 2025, after deducting the cash fees to be paid to the Underwriter and estimated offering expenses payable by us, and excluding the proceeds, if any, from the exercise of the Warrants in this offering. **A** We intend to use the net proceeds from this offering to fund IND-enabling and Phase I and II clinical trials of product candidates, including \$2.8 million in payments that will be owed to Theradex Systems, Inc., the clinical research organization (CRO) supporting our Phase II clinical trials for radiation sensitizer Ropidoxuridine. We anticipate that the funds raised from this offering will allow us to make substantial progress with the Phase II clinical trial, but we will likely require additional funds. See “Use of Proceeds” beginning on page 43 below. **A Nasdaq trading symbol:** Our common stock is listed on Nasdaq under the symbol “SHPH.” There is no established trading market for the Pre-Funded Warrants, and we do not expect a market to develop. In addition, we do not intend to apply for the listing of the Pre-Funded Warrants on any national securities exchange or other trading market. Without an active trading market, the liquidity of the Pre-Funded Warrants will be limited. **A Risk Factors:** See “Risk Factors” beginning on page 13 of this prospectus and other information included in this prospectus for a discussion of the risk factors you should consider carefully when making an investment decision. **A (1)** The number of shares of our common stock outstanding before this offering is based on 4,076,568 shares of our common stock outstanding as of February [*], 2025, and, unless otherwise indicated, excludes, as of that date: (i) 3,464,281 warrants to purchase common stock, exercisable at an average exercise price of \$1.89 per share; (ii) 1,826,000 pre-funded warrants issued in our October 2024 offering; and (iii) 732,134 shares issuable under the convertible bridge notes issued in the October 2024 Convertible Note Offering. **A** Except as otherwise indicated, the information in this prospectus assumes no exercise of any Warrants to be issued in this offering. **12 A RISK FACTORS** **A** An investment in our common stock involves a high degree of risk. You should carefully consider the following risk factors and all the other information in this registration statement before you decide to buy our common stock. If any of the following risks related to our business actually occurs, our business, financial condition, operating results, and prospects would be adversely affected. The market price of our common stock could decline due to any of these risks and uncertainties related to our business, or related to an investment in our common stock, and you may lose part or all of your investment. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also adversely affect our business. Certain statements below are forward-looking statements. **A Risks Related to this Offering** **A Sales** of substantial amounts of our securities in the public market could depress the market price of our common stock. **A** Our common stock is listed for trading on the Nasdaq Capital Market. If our stockholders sell substantial amounts of our common stock in the public market, or the market perceives that such sales may occur, the market price of our securities could fall and we may be unable to sell our securities in the future. **A** Our securities may experience extreme price and volume fluctuations, which could lead to costly litigation for us and make an investment in us less appealing. **A** The market price of our common stock may fluctuate substantially due to a variety of factors, including: **A** the status and results of our clinical trials for our product candidate; **A** our ability to fund and complete our study and, if such study provides data supporting an FDA submission, our ability to apply for and obtain clearance from the FDA; **A** our ability to remain a going concern; **A** our ability to maintain our Nasdaq listing; **A** our business strategy and plans; **A** the potential market for our product candidate, if approved for sale in the U.S.; **A** new regulatory pronouncements and changes in regulatory guidelines and timing of regulatory approvals; **A** general and industry-specific economic conditions; **A** variations in our quarterly financial and operating results, including the rate at which we incur negative cash flow in future periods; **A** additions to or departures of our key personnel; **A** changes in market valuations of other companies that operate in our business segments or in our industry; **A** lack of trading liquidity; **A** if our product is approved and becomes available for us to sell in the U.S., whether we ultimately achieve profitability or not; **A** changes in accounting principles; and **A** general market conditions, economic and other external factors. **A** The market prices of the securities of early-stage companies, particularly companies like ours that are seeking to obtain regulatory approval of their product candidate and do not yet generate operating revenue, have been highly volatile and are likely to remain highly volatile in the future. This volatility has often been unrelated to the operating performance of particular companies. In the past, companies that experience volatility in the market price of their securities have often faced securities class action litigation. Whether or not meritorious, litigation brought against us could result in substantial costs, divert our management’s attention and resources and harm our financial condition and results of operations. **13 A** Although we have no preferred stock outstanding as of the date hereof and we have currently no intention to issue any preferred stock, our common stockholders could be adversely affected by the issuance by us of preferred stock in the future, if any. **A** Our certificate of incorporation does not restrict our ability to offer one or more series of preferred stock, any or all of which could rank equally with or have preferences over our common stock as to dividend payments, voting rights, rights upon liquidation or other types of rights. Our board of directors has the authority, without further action by the stockholders, to issue shares of preferred stock in one or more series and to fix the rights, preferences and the number of shares constituting any series or the designation of such series. In the case our board of directors decides to issue any preferred stock, we would have no obligation to consider the specific interests of the holders of common stock in creating any such series of preferred stock or engaging in any such offering or transaction. Our creation of any series of preferred stock or our engaging in any such offering or transaction could have a material adverse effect on holders of our common stock. **A** We have broad discretion in how we use the net proceeds of this offering, and we may not use these proceeds effectively or in ways with which you agree. **A** Our management will have broad discretion as to the application of the net proceeds of this offering and could use them for purposes other than those contemplated at the time of the offering. We currently intend to use the net proceeds from the offering to fund IND-enabling and Phase I and II clinical trials of product candidates, including radiation sensitizer Ropidoxuridine, IPdR/TPi and the HDAC inhibitor small molecule technology platform, potential acquisition or in-licensing activities and working capital and general corporate purposes. Our stockholders may not agree with the manner in which our management chooses to allocate and spend the net proceeds. Moreover, our management may use the net proceeds for corporate purposes that may not increase the market price of our common stock. **A** If we fail to comply with the continued listing requirements of Nasdaq, it could result in our common stock being delisted, which could adversely affect the market price and liquidity of our securities and could have other adverse effects. **A** On September 10, 2024, we received a letter (the “Notification”) from Nasdaq notifying the Company that it is no longer in compliance with the minimum stockholders’ equity requirement for continued listing on the Nasdaq Capital Market. Nasdaq Listing Rule 5550(b)(1) requires listed companies to maintain stockholders’ equity of at least \$2,500,000. In the Company’s Quarterly Report on Form 10-Q for the period ended June 30, 2024, the Company reported stockholders’ equity of \$801,434, which is below the minimum stockholders’ equity required for continued listing pursuant to Nasdaq Listing Rule 5550(b)(1). In addition, presently, the Company does not meet the alternatives of market value of listed securities or net income from continuing operations. **A** This Company has since submitted to Nasdaq a plan to regain compliance with the stockholders’ equity requirement and Nasdaq has granted us until March 10, 2025 to raise additional capital to bring us back into compliance. In addition, we will be required to submit certain pro forma balance sheet information to Nasdaq on or prior to March 10, 2025 to show that our capital raise efforts have brought us back into compliance and will also be required to show compliance upon the filing of our Quarterly Report on Form 10-Q for the period ending March 31, 2025. **A** While we aim to regain compliance with Nasdaq’s stockholders equity requirement, we nonetheless run the risk that our stock may be delisted if we fail to comply with Nasdaq listing requirements. In the event our common stock is delisted, we may seek to have our common stock quoted on an over-the-counter marketplace, such as on the OTCQX. The OTCQX is not a stock exchange, and if our common stock trades on the OTCQX rather than a securities exchange, there may be significantly less trading volume and analyst coverage of, and significantly less investor interest in, our common stock, which may lead to lower trading prices for our common stock. **14 A** Any potential delisting of our common stock from the Nasdaq may have materially adverse consequences to our stockholders, including: **A** a reduced market price and liquidity with respect to our shares of common stock, which could make our ability to raise new investment capital more difficult; **A** limited dissemination of market price of our common stock; **A** limited news coverage; **A** limited interest by investors in our common stock; **A** volatility of the prices of our common stock, due to low trading volume; **A** our common stock being considered a “penny stock,” which would result in broker-dealers participating in sales of our common stock being subject to the regulations set forth in Rules 15c-2 through 15c-9 promulgated under the Exchange Act **A** increased difficulty in selling our common stock in certain states due to “blue sky” restrictions; and **A** limited ability to issue additional securities or to secure additional financing. **A** If you purchase our securities in this offering, you may experience future dilution as a result of future equity offerings or other equity issuances. **A** We may offer and issue additional shares of our common stock or other securities convertible into or exchangeable for our common stock in the future. We are generally not restricted from issuing additional securities, including shares of common stock, securities that are convertible into or exchangeable for, or that represent the right to receive, common stock or substantially similar securities. The issuance of securities in future offerings may cause dilution to our stockholders, including investors in this offering. We cannot assure you that we will be able to sell shares or other securities in any other offering at a price per share that is equal to or greater than the price per share paid by investors in this offering, and investors purchasing other securities in the future could have rights superior to existing stockholders. The price per share at which we sell additional shares of our common stock or other securities convertible into or exchangeable for our common stock in future transactions may be higher or lower than the price per share in this offering. **A** Trading of our common stock may be limited, making it difficult for our stockholders to sell their shares, and future sales of common stock could reduce our stock price. **A** Our common stock currently trades on Nasdaq under the ticker “SHPH.” The liquidity of our common stock may be limited, including in terms of the number of shares that can be bought and sold at a given price and reduction in security analysts’ and the media’s coverage of us, if any. These factors may result in different prices for our common stock than might otherwise be obtained in a more liquid market and could also result in a larger spread between the bid and asked prices for our common stock. In addition, in the absence of a large market capitalization, our common stock is less liquid than the stock of companies with broader public ownership, and, as a result, the trading prices of our common stock may be more volatile. In the absence of an active public trading market, an investor may be unable to liquidate his/her investment in our common stock. Trading of a relatively small volume of our common stock may have a greater impact on the trading price of our stock. We cannot predict the prices at which our common stock will trade in the future, if at all. **A** We do not currently intend to pay dividends on our common stock in the foreseeable future and, consequently, your ability to achieve a return on your investment will depend on appreciation in the price of our common stock. **A** We do not anticipate paying any cash dividends to holders of our common stock for the foreseeable future. Consequently, investors must rely on sales of their common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investments. There is no guarantee that shares of our common stock will appreciate in value or even maintain the price at which our stockholders have purchased their shares. **A** The offering price of the common stock or Pre-Funded Warrants may not be indicative of the value of our assets or the price at which securities can be resold. The offering price of the common stock or Pre-Funded Warrants may not be an indication of our actual value. **A** The public offering price per common stock or Pre-Funded Warrant is being determined based upon negotiations between the Company and the Underwriter. Factors taken into consideration include the trading volume of our common stock prior to this offering, the historical prices at which our shares of common stock have recently traded, the history and prospects of our business, the stage of development of our business, our business plans for the future

and the extent to which they have been implemented, an assessment of our management, general conditions of the securities markets at the time of the offering, and such other factors as we and the Underwriter deems relevant. No assurance can be given that our common stock can be resold at the public offering price for the shares. You may not receive a positive return on your investment when you sell your shares of common stock and you may lose the entire amount of your investment in the common stock and Pre-Funded Warrants. A 15 A The Pre-Funded Warrants are speculative in nature. A The Pre-Funded Warrants offered hereby do not confer any rights of common stock ownership on their holders, such as voting rights or the right to receive dividends, but rather merely represent the right to acquire shares of common stock at a fixed price. Specifically, commencing on the date of issuance, holders of the Pre-Funded Warrants may acquire the common stock issuable upon exercise of such warrants at an exercise price of \$[0.001] per share. Moreover, following this offering, the market value of the Pre-Funded Warrants will be uncertain and there can be no assurance that the market value of such Pre-Funded Warrants will equal or exceed their public offering price. A If securities or industry analysts do not publish research or publish inaccurate or unfavorable research about our business, our stock price and trading volume could decline. A The trading market for our common stock may depend in part on research and reports that securities or industry analysts publish about us or our business. Securities and industry analysts do not currently, and may never, publish research on us. If securities or industry analysts do not cover us or commence coverage of us, the trading price for our stock would likely be negatively impacted. In the event securities or industry analysts initiate coverage, if one or more of the analysts who covers us downgrades our stock or publishes inaccurate or unfavorable research about our business, our stock price may decline. If one or more of these analysts ceases coverage of us or fails to publish reports on us regularly, demand for our stock could decrease, which might cause our stock price and trading volume to decline. A FINRA sales practice requirements may limit a stockholder’s ability to buy and sell our securities. A Effective June 30, 2020, the SEC implemented Regulation Best Interest requiring that “a broker, dealer, or a natural person who is an associated person of a broker or dealer, when making a recommendation of any securities transaction or investment strategy involving securities (including account recommendations) to a retail customer, shall act in the best interest of the retail customer at the time the recommendation is made, without placing the financial or other interest of the broker, dealer, or natural person who is an associated person of a broker or dealer making the recommendation ahead of the interest of the retail customer.” This is a significantly higher standard for broker-dealers to recommend securities to retail customers than before under FINRA’s suitability rules. A FINRA suitability rules do still apply to institutional investors and require that in recommending an investment to a customer, a broker-dealer must have reasonable grounds for believing that the investment is suitable for that customer. Prior to recommending securities to their customers, broker-dealers must make reasonable efforts to obtain information about the customer’s financial status, tax status, investment objectives and other information, and for retail customers determine the investment is in the customer’s “best interest” and meet other SEC requirements. As a result, fewer broker-dealers may be willing to make a market in our common stock, reducing a stockholder’s ability to resell shares of our common stock. A This offering may cause the trading price of our shares of common stock to decrease. A The price per common stock or Pre-Funded Warrant, may result in an immediate decrease in the market price of our shares. This decrease may continue after the completion of this offering. A Resales of our shares of common stock in the public market by the stockholders as a result of this offering may cause the market price of our shares of common stock to decline. A Sales of substantial amounts of our shares of common stock in the public market, or the perception that such sales might occur, could adversely affect the market price of our shares of common stock. The issuance of new shares of common stock could result in resales of our shares of common stock by our current shareholders concerned about the potential ownership dilution of their holdings. Furthermore, in the future, we may issue additional shares of common stock or other equity or debt securities exercisable or convertible into shares of common stock. Any such issuance could result in substantial dilution to our existing shareholders and could cause our stock price to decline. A 16 A Risks Related to Our Business, Financial Condition and Capital Requirements A Our consolidated financial statements are prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business; our ability to continue as a going concern is dependent upon our ability to successfully conduct clinical trials, bring a drug candidate to commercialization, generate revenues, and to raise additional equity or debt financing to fund our operations. A Our consolidated financial statements are prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The Company has incurred losses since inception and has a net loss of approximately \$7.5 million and no revenues for the nine months ended September 30, 2024 and has a working capital deficit of approximately \$1.3 million as of September 30, 2024. The Company does not expect to generate positive cash flows from operating activities in the near future. In September 2024, the Company’s CEO provided \$250 thousand to the Company in exchange for a promissory note repayable in equal monthly installments of principal and interest over a term of one year. In October 2024, the Company completed an offering of senior secured convertible bridge notes, receiving \$790 thousand in cash. The notes have a term of one-year and were accompanied by 329,461 warrants with a weighted-average exercise price of \$1.42 per share. Also in October 2024, the Company completed an equity raise that provided \$3.9 million net cash in exchange for the issuance of 2.9 million shares / pre-funded warrants, and 2.9 million warrants with an exercise price of \$1.40 per share. However, the Company’s existing cash resources and the cash received from the equity offering and senior convertible note are not expected to provide sufficient funds to carry out the Company’s operations and clinical trials through the next 12 months. The Company’s capital raises have to date supported operations, the manufacture of drug product and FDA approval of the IND for the Phase II clinical trial of Ropidoxuridine and radiation therapy in glioblastoma and other radiation sensitizer discovery and therapy. The FDA recommended and the Company agreed to an expansion of the Phase II clinical trial, necessitating additional capital to complete the trial as well as fund ongoing operations. Additionally, the Phase II clinical trial of Ropidoxuridine has evolved with finalized agreements with all six of the planned site enrollment locations to administer the Phase II clinical trial of Ropidoxuridine and the enrollment of a total of 15 patients, representing 38% of the patients required to complete the first phase of the study. The ability of the Company to continue as a going concern is dependent upon our ability to continue to successfully raise additional equity or debt financing to fund ongoing operations, conduct clinical trials and bring a drug candidate to commercialization to generate revenues. A Our success is primarily dependent on the successful development, regulatory approval and commercialization of our product candidates, all of which are in the early stages of development. A We currently have one clinical stage product candidate in the early stages of development. Ropidoxuridine has undergone an SBIR funded Phase I clinical trial at Lifespan/Rhode Island Hospital. We also have an HDAC inhibitor small molecule platform. The three lead drug candidate molecules are in preclinical phases of development. None of our product candidates have gained marketing approval for sale in the United States or any other country, and we cannot guarantee that we will ever have marketable products. To date, we have invested substantially all of our efforts and financial resources in the research and development and commercial planning for our current product candidate and our HDAC small molecule delivery platform. Our near-term prospects, including our ability to finance our Company and generate revenue, as well as our future growth, will depend heavily on the development, marketing approval and commercialization of our product candidates. The clinical and commercial success of product candidates will depend on a number of factors, including the following: A A — building on favorable results from our Phase I clinical trial for IPdR and proceeding to Phase II and Phase III clinical trials, which may be slower or cost more than we currently anticipate; A A — our ability to demonstrate safety and efficacy of our product candidates, which are ongoing determinations that are solely within the authority of the FDA; A A — even if our clinical trials are completed, there can be no assurance that the FDA will agree that we have satisfactorily demonstrated safety or efficacy or that the FDA will not raise new issues regarding the design of our clinical trials; A 17 A A — whether we are required by the FDA to conduct additional clinical trials to support the approval of our product candidates; A A A — the acceptance by the FDA of our proposed parameters for regulatory approval, including our proposed indication, endpoints and endpoint measurement tools relating to our product candidates; A A A — the incidence, duration and severity of adverse side effects; A A A — the timely receipt of necessary marketing approvals from the FDA; A A A — whether we are able to secure collaborations for completing the development and, if approved, commercialization of our product candidates; A A — the effectiveness of our and our potential collaborators’ marketing, sales and distribution strategy and operations of product candidates that are approved; A A A — our success in educating physicians and patients about the benefits, administration and use of our product candidates; A A A — the ability of our third-party manufacturers and potential collaborators to manufacture clinical trial and commercial supplies of our product candidates to remain in good standing with regulatory bodies, and to develop, validate and maintain commercially viable manufacturing processes that are compliant with current Good Manufacturing Practices (“cGMP”) regulations; A A A — our ability to commercialize our product candidates, if approved for marketing; A A A — our ability to enforce our intellectual property rights; A A A — our ability to avoid third-party patent interference or patent infringement claims; A A A — acceptance of our product candidates as safe and effective by patients and the medical community; and A A A — a continued acceptable quality profile of our product candidates following approval. A Many of the above-listed risk factors are beyond our control. Accordingly, we cannot assure you that we will ever be able to generate revenue through the sale of our product candidates. Any one of these factors or other factors discussed in this registration statement could affect our ability to commercialize product candidates, which could impact our ability to earn sufficient revenues to transition from a developmental stage company and continue our business. If we do not obtain marketing approval of and commercialization of our product candidates, or are significantly delayed in doing so, our business will be materially harmed. We have a limited operating history and have incurred significant losses since our inception, and we anticipate that we will continue to incur losses for the foreseeable future and may never achieve or maintain profitability. A We are a clinical stage pharmaceutical company, preparing to commence Phase II clinical trials of our lead drug candidate, with a limited operating history upon which you can evaluate our business and prospects. Specialty pharmaceutical product development is a highly speculative undertaking and involves a substantial degree of risk. We do not currently have any product candidates in advanced clinical trials or approved for sale, and we continue to incur significant research and development and general and administrative expenses related to our operations. In addition, we have limited experience and have not yet demonstrated an ability to successfully overcome many of the risks and uncertainties frequently encountered by companies in new and rapidly evolving fields, particularly in the specialty pharmaceutical industry. We have not generated any revenue and have incurred losses in each year since our founding in December 2012. Our accumulated deficit as of December 31, 2023 was \$25.4 million. We expect to continue to incur significant losses for the foreseeable future. Even if we achieve profitability in the future, we may not be able to sustain profitability in subsequent periods. A 18 A We currently have no source of product sales revenue. A We have not yet completed clinical trials and thus do not yet have commercial sales of our products and have not yet generated any revenues from commercial sales of our product candidates. Our ability to generate product revenue depends upon our ability to develop and commercialize products, including any of our current product candidates or other product candidates that we may develop, in-license or acquire in the future. We do not anticipate generating revenue from the sale of products for the foreseeable future. Our ability to generate future product revenue from our current or future product candidates also depends on a number of additional factors, including our ability to: A A — complete research and clinical development of current and future product candidates, either directly or through collaborative relationships; A A A — establish and maintain supply and manufacturing relationships with third parties, and ensure adequate and legally compliant manufacturing of bulk drug substances and drug products to maintain that supply; A A A — obtain regulatory approval from relevant regulatory authorities in jurisdictions where we intend to market our product candidates, either directly or through collaborative relationships; A A A — launch and commercialize future product candidates for which we obtain marketing approval, if any, through collaborative partners; A A A — obtain coverage and adequate product reimbursement from third-party payors, including government payors; A A A — achieve market acceptance for our products, if any; A A A — establish, maintain and protect our intellectual property rights; and A A A — attract, hire and retain qualified personnel. A In addition, because of the numerous risks and uncertainties associated with clinical product development, including that our product candidates may not advance through development or achieve the endpoints of applicable clinical trials, we are unable to predict the timing or amount of any potential future product sales revenues. Our expenses also could increase beyond expectations if we decide to or are required by the FDA, or comparable foreign regulatory authorities, to perform studies or trials in addition to those that we currently anticipate. Even if we complete the development and regulatory processes described above, we anticipate incurring significant costs associated with launching and commercializing these products. A The market may not be receptive to our product candidates based on our novel therapeutic modality, and we may not generate any future revenue from the sale or licensing of product candidates. A Even if approval is obtained for a product candidate, we may not generate or sustain revenue from sales of the product due to factors such as whether the product can be sold at a competitive cost and otherwise accepted in the market. The product candidates that we are developing are based on new delivery platform therapeutic approaches (there currently is no drug which has FDA approval for indications of radiation sensitization). Market participants with significant influence over acceptance of new treatments, such as physicians and third-party payors, may not accept our delivery platform, and we may not be able to convince the medical community and third-party payors to accept and use, or to provide favorable reimbursement for, any product candidates developed by us. Market acceptance of our product candidates will depend on, among other factors: A A — timing of our receipt of any marketing and commercialization approvals; A A — terms of any approvals and the countries in which approvals are obtained; A A A — safety and efficacy of our product candidates, which are determinations solely within the authority of the FDA; A 19 A A — prevalence and severity of any adverse side effects associated with our product candidates; A A A — warnings contained in any labeling approved by the FDA or other regulatory authority; A A A — convenience and ease of administration of our product candidates; A A A — success of our physician education programs; A A A — availability of adequate government and third-party payor reimbursement; A A A — pricing of our products, particularly as compared to alternative treatments; and A A A — availability of alternative effective products for indications our product candidates are intended to treat. A We will require substantial additional financing in order to obtain marketing approval of our product candidates and commercialize our product candidates; a failure to obtain this necessary capital when needed on acceptable terms, or at all, could force us to delay, limit, reduce or terminate our product development, other operations or commercialization efforts. A Since our inception, substantially all of our resources have been dedicated to the preclinical and clinical development of our HDAC small molecule delivery platform and our initial product candidate, Ropidoxuridine. Our capital needs to date have been met by contributions from existing stockholders, as well as through private offerings and IPO of our securities and our SBIR contracts. We believe that we will continue to expend substantial resources for the foreseeable future on the completion of clinical development and regulatory preparedness of our product candidates, preparations for a commercial launch of our product candidates, if approved, and development of any other current or future product candidates we may choose to further develop. These expenditures will include costs associated with research and development, conducting preclinical studies and clinical trials, obtaining marketing approvals, and, if we are not able to enter into planned collaborations, manufacturing and supply as well as marketing and selling any products approved for sale. In addition, other unanticipated costs may arise. Because the outcome of any drug development process is highly uncertain, we cannot reasonably estimate the actual amounts necessary to complete the development and commercialization of our current product candidates, if approved, or future product candidates, if any. A We believe that the proceeds we received in our IPO and subsequent follow-on convertible note offerings and capital raises, for which we received additional net proceeds of \$8.4 million, and with our existing capital resources, will not be sufficient to fund our operations one year after the date that the consolidated financial statements are issued without additional capital infusion. We anticipate we will need to seek additional funding through public or private equity or debt financings or other sources, such as through a rights offering, strategic collaborations or grants and contracts. Such financing may result in dilution to stockholders, imposition of debt covenants and repayment obligations, or other restrictions that may adversely affect our business. In addition, we may seek additional capital due to favorable market conditions or strategic considerations even if we believe we have sufficient funds for our current or future operating plans. A Our future capital requirements depend on many factors, including: A A — the scope, progress, results and costs of researching and developing our current product candidates, future product candidates and conducting preclinical and clinical trials; A A A — the cost of commercialization activities if our current product candidates and future product candidates are approved for sale, including securing collaborative ventures for completing development of, securing marketing approval for and ultimately marketing, selling and distributing our product candidates, if approved or building a corporate infrastructure if we have to undertake these activities directly; A A — our ability to establish and maintain strategic collaborations, licensing or other arrangements and the financial terms of such agreements; A A A — the number and characteristics of any additional product candidates we may develop or acquire; A A A — any product liability or other lawsuits related to our products or commenced against us; A A A — the expenses needed to attract and retain skilled personnel; A A — the costs associated with being a public company; A A A — the costs involved in preparing, filing, prosecuting, maintaining, defending and enforcing patent claims, including litigation costs and the outcome of such litigation; and A A A — the timing, receipt and amount of sales of, or royalties on, any future approved products,

if any. A 20 A A Additional funds may not be available when we need them, on terms that are acceptable to us, or at all. If adequate funds are not available to us on a timely basis, we may be required to: A A A— delay, limit, reduce or terminate preclinical studies, clinical trials or other development activities for our current product candidates or future product candidates, if any; A A A A A— delay, limit, reduce or terminate our research and development activities; or A A A A A— delay, limit, reduce or terminate our establishment of sales and marketing capabilities or other activities that may be necessary to commercialize our current or future product candidates. A Raising additional capital may cause dilution to our existing stockholders, restrict our operations or require us to relinquish rights to our technologies or product candidates. A We may seek additional capital through a combination of public and private equity offerings, debt financings, strategic collaborations and alliances and licensing arrangements. To the extent that we raise additional capital through the sale of equity or convertible debt securities, your ownership interest will be diluted, and the terms may include liquidation or other preferences that adversely affect your rights as a stockholder. The incurrence of indebtedness would result in increased fixed payment obligations and could involve certain restrictive covenants, such as limitations on our ability to incur additional debt, limitations on our ability to acquire or license intellectual property rights and other operating restrictions that could adversely impact our ability to conduct our business. If we raise additional funds through strategic collaborations and alliances and licensing arrangements with third parties, we may have to relinquish valuable rights to our technologies or product candidates or grant licenses on terms unfavorable to us. A Unfavorable and/or unstable global market and economic conditions, including those caused by the ongoing conflicts between the Ukraine and Russia, Israel and Hamas, and any resurgence in the COVID-19 pandemic or development of new pandemic, could have serious adverse consequences on our business, financial condition and results of operations. A The global economy, including credit and financial markets, has experienced extreme volatility and disruptions as a result of the ongoing conflict between the Ukraine and Russia, Israel and Hamas, and challenges arising from any resurgence in the COVID-19 pandemic, or any other development of a new pandemic, including severely diminished liquidity and credit availability, declines in consumer confidence, declines in economic growth, increases in unemployment rates, increases in inflation rates and uncertainty about economic stability. Our results of operations could be adversely affected by the general conditions of the global economy and the global financial markets. In addition, any such volatility and disruptions may have adverse consequences on us or the third parties upon whom we rely. For example, in 2008, the global financial crisis caused extreme volatility and disruptions in the capital and credit markets and the COVID-19 pandemic caused significant volatility and uncertainty in U.S. and international markets. Inflation rates, particularly in the United States, have increased recently to levels not seen in years. Increased inflation may result in increased operating costs (including our labor costs), reduced liquidity, and limitations on our ability to access credit or otherwise raise debt and equity capital. In addition, the United States Federal Reserve has raised, and may again raise, interest rates in response to concerns about inflation. Increases in interest rates, especially if coupled with reduced government spending and volatility in financial markets, may have the effect of further increasing economic uncertainty and heightening these risks, which may impact our ability to raise additional capital in the future. A The March 2023 failure of Silicon Valley Bank, the pressure such failure has placed on other mid-sized banks, and its potential near- and long-term effects on the biotechnology industry and its participants such as our vendors, suppliers and investors, may also adversely affect our operations and stock price. In addition, U.S. and global markets are experiencing volatility and disruption following the escalation of geopolitical tensions and the wars between Russia and Ukraine and Israel and Hamas. On February 24, 2022, a full-scale military invasion of Ukraine by Russian troops began. Following the October 7, 2023 Hamas terrorist attacks in Israel, the Israel-Hamas war has had devastating impacts and caused destabilization in the Middle East. Although the length and impact of the ongoing military conflicts is highly unpredictable, the conflicts have led to market disruptions, including significant volatility in commodity prices, credit and capital markets, as well as supply chain disruptions. In addition, various of Russia’s actions have led to sanctions and other penalties being levied by the United States, Australia, the European Union and other countries, as well as other public and private actors and companies, against Russia and certain other geographic areas, including agreement to remove certain Russian financial institutions from the Society for Worldwide Interbank Financial Telecommunication payment system and restrictions on imports of Russian oil, liquefied natural gas and coal. Additional potential sanctions and penalties have also been proposed and/or threatened. Russian military actions and the resulting sanctions could disrupt or otherwise adversely impact our operations and the operations of third parties upon which we rely, as well as the global economy and financial markets, and lead to instability and lack of liquidity in capital markets, potentially making it more difficult for us to obtain additional funds. Related sanctions, export controls or other actions that may be initiated by nations including the United States, the European Union or Russia (e.g., potential cyberattacks, disruption of energy flows, etc.), which could adversely affect our business and/or our supply chain, our CROs, CMOs and other third parties with which we conduct business. A severe or prolonged economic downturn, inflationary environment, rising interest rates, or political unrest could result in a variety of risks to our business, including, weakened demand for our product candidates and our ability to raise additional capital when needed on acceptable terms, if at all. A weak or declining economy could also strain our suppliers, possibly resulting in supply disruption, or cause our customers to delay making payments for our services. The extent and duration of the military action, sanctions, and resulting market disruptions are impossible to predict, but could be substantial. Any such disruptions may also magnify the impact of other risks described in this registration statement and elsewhere herein. A 21 A A Our product candidates are in the early stages of development and may fail in development or suffer delays that materially adversely affect their commercial viability. A We have no products on the market and all of our product candidates are in the early stages of development. Our ability to achieve and sustain profitability depends on obtaining regulatory approvals, including IRB approval, for and commercializing our product candidates, either alone or with third parties. Before obtaining regulatory approval for the commercial distribution of our product candidates, we or one of our collaborators must conduct extensive preclinical tests and clinical trials to demonstrate the safety and efficacy in humans of our product candidates, the final determination of which rests solely in the authority of the FDA. Preclinical testing and clinical trials are expensive, difficult to design and implement, can take many years to complete and are uncertain as to outcome. The start or end of a clinical study is often delayed or halted due to changing regulatory requirements, manufacturing challenges, required clinical trial administrative actions, slower than anticipated patient enrollment, changing standards of care, availability or prevalence of use of a comparative drug or required prior therapy, clinical outcomes or financial constraints. For instance, delays or difficulties in patient enrollment or difficulties in retaining trial participants can result in increased costs, longer development times or termination of a clinical trial. Clinical trials of a new product candidate require the enrollment of a sufficient number of patients, including patients who are suffering from the disease the product candidate is intended to treat and who meet other eligibility criteria. Rates of patient enrollment are affected by many factors, including the size of the patient population, the eligibility criteria for the clinical trial, the age and condition of the patients, the stage and severity of disease, the nature of the protocol, the proximity of patients to clinical sites and the availability of effective treatments for the relevant disease. A product candidate can unexpectedly fail at any stage of preclinical and clinical development. The historical failure rate for product candidates is high due to scientific feasibility, lack of quality and effectiveness, changing standards of medical care and other variables. The results from preclinical or early clinical trials of a product candidate may not predict the results that will be obtained in later phase clinical trials of the product candidate. We, the FDA or other applicable regulatory authorities may suspend clinical trials of a product candidate at any time for various reasons, including a belief that subjects participating in such trials are being exposed to unacceptable health risks or adverse side effects. We may not have the financial resources to continue development of, or to enter into collaborations for, a product candidate if we experience any problems or other unforeseen events that delay or prevent regulatory approval of, or our ability to commercialize, product candidates, including: A A A— negative or inconclusive results from our clinical trials or the clinical trials of others for product candidates similar to ours, leading to a decision or requirement to conduct additional preclinical testing or clinical trials or abandon a program; A A A A A— serious and unexpected drug-related side effects experienced by participants in our clinical trials or by individuals using drugs similar to our product candidates; A A A A A— delays in submitting an Investigational New Drug application (aINDa) or delays or failure in obtaining the necessary approvals from regulators to commence a clinical trial, or a suspension or termination of a clinical trial once commenced; A A A A A— conditions imposed by the FDA or comparable foreign authorities regarding the scope or design of our clinical trials; A A A A A— delays in enrolling research subjects in clinical trials; A A A A A— high drop-out rates of research subjects; A A A A A— greater than anticipated clinical trial costs; A A A A A— poor effectiveness of our product candidates during clinical trials; A A A A A— unfavorable FDA or other regulatory agency inspection and review of a clinical trial site; A A A A A— failure of our third-party contractors or investigators to comply with regulatory requirements or otherwise meet their contractual obligations in a timely manner, or at all; A A A A A— delays and changes in regulatory requirements, policy and guidelines, including the imposition of additional regulatory oversight around clinical testing generally or with respect to our technology in particular; or A A A A A— varying interpretations of data by the FDA and similar foreign regulatory agencies. A 22 A A If third parties on which we depend to conduct our preclinical studies, or any future clinical trials, do not perform as contractually required, fail to satisfy regulatory or legal requirements or miss expected deadlines, our development program could be delayed with materially adverse effects on our business, financial condition, results of operations and prospects. A We are relying on third party collaborators to conduct our efficacy clinical trials for Ropidoxuridine and plan to rely on third party clinical investigators, CROs, clinical data management organizations and consultants to design, conduct, supervise and monitor preclinical studies of our product candidates and will do the same for any clinical trials. Because we plan to largely rely on third parties and do not have the ability to conduct preclinical studies or clinical trials independently, we have less control over the timing, quality and other aspects of preclinical studies and clinical trials than we would if we conducted them on our own. These investigators, CROs, and consultants are not our employees and we have limited control over the amount of time and resources that they dedicate to our programs. These third parties may have contractual relationships with other entities, some of which may be our competitors, which may draw time and resources from our programs. The third parties with whom we contract might not be diligent, careful or timely in conducting our preclinical studies or clinical trials, resulting in the preclinical studies or clinical trials being delayed or unsuccessful. A If we cannot contract with acceptable third parties on commercially reasonable terms, or at all, or if these third parties do not carry out their contractual duties, satisfy legal and regulatory requirements for the conduct of preclinical studies or clinical trials or meet expected deadlines, our clinical development programs could be delayed and otherwise adversely affected. In all events, we are responsible for ensuring that each of our preclinical studies and clinical trials is conducted in accordance with the general investigational plan and protocols for the trial. The FDA requires clinical trials to be conducted in accordance with good clinical practices, including for conducting, recording and reporting the results of preclinical studies and clinical trials to assure that data and reported results are credible and accurate and that the rights, integrity and confidentiality of clinical trial participants are protected. Our reliance on third parties that we do not control does not relieve us of these responsibilities and requirements. Any such event could have a material adverse effect on our business, financial condition, results of operations and/or prospects. A Because we rely on third party manufacturing and supply partners, our supply of research and development, preclinical and clinical development materials may become limited or interrupted or may not be of satisfactory quantity or quality. A We rely on third party supply and manufacturing partners to supply the materials and components for, and manufacture, our research and development, preclinical and clinical trial drug supplies. We do not own manufacturing facilities or supply sources for such components and materials. There can be no assurance that our supply of research and development, preclinical and clinical development drugs and other materials will not be limited, interrupted, restricted in certain geographic regions or of satisfactory quality or continue to be available at acceptable prices. In particular, any replacement of any drug product formulation manufacturer we may use could require significant effort and expertise in the event there are a limited number of qualified replacements for a particular product candidate. A The manufacturing process for a product candidate is subject to FDA and foreign regulatory authority review. Suppliers and manufacturers must meet applicable manufacturing requirements and undergo rigorous facility and process validation tests required by regulatory authorities in order to comply with regulatory standards, such as Current Good Manufacturing Practice (or cGMP). In the event that any of our suppliers or manufacturers fail to comply with such requirements or to perform its obligations to us in relation to quality, timing or otherwise, or if our supply of components or other materials becomes limited or interrupted for other reasons, we may be forced to manufacture the materials ourselves, for which we currently do not have the capabilities or resources, or enter into an agreement with another third party, which we may not be able to do on reasonable terms, if at all. In some cases, the technical skills or technology required to manufacture our product candidates may be unique or proprietary to the original manufacturer, and we may have difficulty, or there may be contractual restrictions prohibiting us from, transferring such skills or technology to another third party and a feasible alternative may not exist. These factors would increase our reliance on such manufacturer or require us to obtain a license from such manufacturer in order to have another third party manufacture our product candidates. If we are required to change manufacturers for any reason, we will be required to verify that the new manufacturer maintains facilities and procedures that comply with quality standards and with all applicable regulations and guidelines. The delays associated with the verification of a new manufacturer could negatively affect our ability to develop product candidates in a timely manner or within budget. A We expect to continue to rely on third party manufacturers if we receive regulatory approval for any product candidate. To the extent that we have existing or future manufacturing arrangements with third parties, we will depend on these third parties to perform their obligations in a timely manner consistent with contractual and regulatory requirements, including those related to quality control and assurance. If we are unable to obtain or maintain third-party manufacturing for product candidates, or to do so on commercially reasonable terms, we may not be able to fully develop and commercialize our product candidates. Our or a third party’s failure to execute on our manufacturing requirements could adversely affect our business in a number of ways, including: A A A— an inability to initiate or continue clinical trials of product candidates under development; A A A A A— delay in submitting regulatory applications, or receiving regulatory approvals, for product candidates; A 23 A A A A— loss of the cooperation of a collaborator; A A A A A— subjecting our product candidates to additional inspections by regulatory authorities; A A A A A— requirements to cease distribution or to recall batches of our product candidates; and A A A A A— in the event of approval to market and commercialize a product candidate, an inability to meet commercial demands for our products. A We may be unsuccessful in engaging in strategic transactions which could adversely affect our ability to develop and commercialize product candidates, impact our cash position, increase our expense and present significant distractions to our management. A From time to time, we may consider strategic transactions, such as collaborations, acquisitions of companies, asset purchases and out- or in-licensing of product candidates or technologies. In particular, we will evaluate and, if strategically attractive, seek to enter into additional collaborations, including with major biotechnology or pharmaceutical companies to complete development and marketing of our product candidates, if approved. The competition for collaborators is intense, and the negotiation process is time-consuming and complex. Any proposed collaboration may be on terms that are not optimal for us, and we may not be able to maintain any new or existing collaboration if, for example, development or approval of a product candidate is delayed, sales of an approved product candidate do not meet expectations or the collaborator terminates the collaboration. Any such collaboration, or other strategic transaction, may require us to incur non-recurring or other charges, increase our near- and long-term expenditures and pose significant integration or implementation challenges or disrupt our management or business. These transactions would entail numerous operational and financial risks, including exposure to unknown liabilities, disruption of our business and diversion of our management’s time and attention in order to manage a collaboration or develop acquired products, product candidates or technologies, incurrence of substantial debt or dilutive issuances of equity securities to pay transaction consideration or costs, higher than expected collaboration, acquisition or integration costs, write-downs of assets or goodwill or impairment charges, increased amortization expenses, difficulty and cost in facilitating the collaboration or combining the operations and personnel of any acquired business, impairment of relationships with key suppliers, manufacturers or customers of any acquired business due to changes in management and ownership and the inability to retain key employees of any acquired business. Accordingly, although there can be no assurance that we will undertake or successfully complete any transactions of the nature described above, any transactions that we do complete may be subject to the foregoing or other risks and have a material adverse effect on our business, results of operations, financial condition and prospects. Conversely, any failure to enter into any collaboration or other strategic transaction that would be beneficial to us could delay the development and potential commercialization of our product candidates and have a negative impact on the competitiveness of any product candidate that reaches market. A We face competition from entities that have developed or may develop product candidates for our target disease indications, including companies developing novel treatments and technology platforms based on modalities and technology similar to ours. If these companies develop technologies or product candidates more rapidly than we do or their technologies, including delivery technologies, are more effective, our ability to develop and commercialize product candidates may be adversely affected. A The development and commercialization of drugs is highly competitive. We compete with a variety of multinational pharmaceutical companies and specialized biotechnology companies, as well as with universities and other research institutions which are developing new technology. Our competitors have developed, are developing or will develop product candidates and processes competitive with our product candidates. Competitive therapeutic treatments include those that have already been

approved and accepted by the medical community and any new treatments that enter the market. We believe that a significant number of products are currently under development, and may become commercially available in the future, for the treatment of conditions for which we may try to develop product candidates. A 24 A Many of our competitors have significantly greater financial, technical, manufacturing, marketing, sales and supply resources or experience than we have. If we obtain approval for any product candidate, we will face competition based on many different factors, including the quality and effectiveness of our products, the ease with which our products can be administered and the extent to which patients accept relatively new routes of administration, the timing and scope of regulatory approvals for these products, the availability and cost of manufacturing, marketing and sales capabilities, price, reimbursement coverage and patent position. Competing products could present superior treatment alternatives, including by being more effective, safer, less expensive or marketed and sold more effectively than any products we may develop. Competitive products may make any products we develop obsolete or noncompetitive before we recover the expense of developing and commercializing our product candidates. Such competitors could also recruit our employees, which could negatively impact our level of expertise and our ability to execute our business plan. A Any inability to attract and retain qualified key management and technical personnel would impair our ability to implement our business plan. A Our success largely depends on the continued service of certain key management and other specialized personnel, including Anatoly Dritschilo, M.D., our Chief Executive Officer, Mira Jung, Ph.D., our Chief Scientific Officer, Timothy Lorber, our Chief Financial Officer, Michael Vander Hoek, our Vice President Operations and Regulatory, and Peter Dritschilo, our President and Chief Operating Officer. The loss of one or more members of our management team or other key employees or advisors could delay our research and development programs and materially harm our business, financial condition, results of operations and prospects. The relationships that our key managers have cultivated within our industry make us particularly dependent upon their continued employment with us. We are dependent on the continued service of our technical personnel because of the highly technical nature of our product candidates and technologies and the specialized nature of the regulatory approval process. Because our management team and key employees are not obligated to provide us with continued service, they could terminate their employment with us at any time without penalty. We do not maintain key person life insurance policies on any of our management team members or key employees. Our future success will depend in large part on our continued ability to attract and retain other highly qualified scientific, technical and management personnel, as well as personnel with expertise in clinical testing, manufacturing, governmental regulation and commercialization. We face competition for personnel from other companies, universities, public and private research institutions, government entities and other organizations. A If our product candidates advance into Phase II and Phase III clinical trials, we may experience difficulties in managing our growth and expanding our operations. A As our product candidates enter and advance through preclinical studies and any clinical trials, we will need to expand our development, regulatory and manufacturing capabilities or contract with other organizations to provide these capabilities for us. In the future, we expect to have to manage additional relationships with collaborators or partners, suppliers and other organizations. Our ability to manage our operations and future growth will require us to continue to improve our operational, financial and management controls, reporting systems and procedures. We may not be able to implement improvements to our management information and control systems in an efficient or timely manner and may discover deficiencies in existing systems and controls. A If any of our product candidates are approved for marketing and commercialization and we are unable to develop sales, marketing and distribution capabilities on our own or enter into agreements with third parties to perform these functions on acceptable terms, we will be unable to commercialize any such future products. A We currently have no sales, marketing or distribution capabilities or experience. If any of our product candidates is approved, we plan to enter into collaborations with third parties to sell, market and distribute our products. In the alternative, we would have to develop internal sales, marketing and distribution capabilities to commercialize any approved product, which would be expensive and time-consuming, or, as is more likely, enter into collaborations with third parties to perform these services. If we rely on third parties with sales, marketing and distribution capabilities to market our products or decide to co-promote products with collaborators, we will need to establish and maintain marketing and distribution arrangements with third parties, and there can be no assurance that we will be able to enter into such arrangements on acceptable terms, if, at all. In entering into third-party marketing or distribution arrangements, any revenue we receive will depend upon the efforts of the third parties and there can be no assurance that such third parties will establish adequate sales and distribution capabilities or be successful in gaining market acceptance of any approved product. If we decide to market our products directly, we will need to commit significant financial and managerial resources to develop a marketing and sales force with technical expertise and supporting distribution, administration and compliance capabilities. If we are not able to commercialize any product approved in the future, either on our own or through third parties, our business, financial condition, results of operations and prospects could be materially adversely affected. A 25 A If we fail to comply with U.S. and foreign regulatory requirements, regulatory authorities could limit or withdraw any marketing or commercialization approvals we may receive and subject us to other penalties that could materially harm our business. A Even if we receive marketing and commercialization approval of a product candidate, there can be no assurance we will not be subject to future or continuing regulatory review, including in relation to adverse patient experiences with the product and clinical results that are reported after a product is made commercially available, both in the U.S. and any foreign jurisdiction in which we seek regulatory approval. The FDA has significant post-market authority, including the authority to require labeling changes based on new safety information and to require post-market studies or clinical trials to evaluate safety risks related to the use of a product or to require withdrawal of the product from the market. The FDA also has the authority to require a risk evaluation and mitigation strategies (â€œREMSâ€) plan after approval, which may impose further requirements or restrictions on the distribution or use of an approved drug. The manufacturer and manufacturing facilities we use to make a future product, if any, will also be subject to periodic review and inspection by the FDA and other regulatory agencies, including for continued compliance with CGMP requirements. The discovery of any new or previously unknown problems with our third-party manufacturers, manufacturing processes or facilities may result in restrictions on the product, manufacturer or facility, including withdrawal of the product from the market. If we rely on third-party manufacturers, we will not have control over compliance with applicable rules and regulations by such manufacturers. Any product promotion and advertising will also be subject to regulatory requirements and continuing regulatory review. If we or our collaborators, manufacturers or service providers fail to comply with applicable continuing regulatory requirements in the U.S. or foreign jurisdictions in which we seek to market our products, we or they may be subject to, among other things, fines, warning letters, holds on clinical trials, refusal by the FDA to approve pending applications or supplements to approved applications, suspension or withdrawal of regulatory approval, product recalls and seizures, refusal to permit the import or export of products, operating restrictions, injunction, civil penalties and criminal prosecution. A Our business entails a significant risk of product liability and our ability to obtain sufficient insurance coverage could have a material effect on our business, financial condition, results of operations or prospects. A Our business exposes us to significant product liability risks inherent in the development, testing, manufacturing and marketing of therapeutic treatments. Product liability claims could delay or prevent completion of our development programs. If we succeed in marketing products, such claims could result in an FDA investigation of the quality and effectiveness of our products, our manufacturing processes and facilities or our marketing programs and potentially a recall of our products or more serious enforcement action, limitations on the approved indications for which they may be used or suspension or withdrawal of approvals. Regardless of the merits or eventual outcome, liability claims may also result in decreased demand for our products, injury to our reputation, costs to defend the related litigation, a diversion of managementâ€™s time and our resources, substantial monetary awards to trial participants or patients and a decline in our stock price. We currently have product liability insurance that we believe is appropriate for our stage of development and may need to obtain higher levels prior to marketing any of our product candidates. Any insurance we have or may obtain may not provide sufficient coverage against potential liabilities. Furthermore, clinical trial and product liability insurance is becoming increasingly expensive. As a result, we may be unable to obtain sufficient insurance at a reasonable cost to protect us against losses caused by product liability claims that could have a material adverse effect on our business. A Our employees, principal investigators, CROs and consultants may engage in misconduct or other improper activities, including noncompliance with regulatory standards and requirements. A We are exposed to the risk that our employees, principal investigators, CROs and consultants may engage in fraud, other misconduct or illegal activity. Misconduct by these parties could include intentional failures to comply with FDA regulations, provide accurate information to the FDA, comply with manufacturing standards we may establish, comply with federal and state healthcare fraud and abuse laws and regulations, report financial information or data accurately or disclose unauthorized activities to us. In particular, sales, marketing and business arrangements in the healthcare industry are subject to extensive laws and regulations, kickbacks, self-dealing and other abusive practices. These laws and regulations may restrict or prohibit a wide range of pricing, discounting, marketing and promotion, sales commission, customer incentive programs and other business arrangements. While we make an effort to maintain strict work processes and oversight of our employees, contractors and consultants, any misconduct could expose us to liability through the improper use of information obtained in the course of clinical trials, which could result in regulatory sanctions and serious harm to our reputation. Furthermore, it is not always possible to identify and deter such misconduct, and the precautions we take to detect and prevent this activity may not be effective in controlling unknown or unmanaged risks or losses or in protecting us from governmental investigations or other actions or lawsuits stemming from a failure to be in compliance with such laws or regulations. If any such actions are instituted against us, and we are not successful in defending ourselves or asserting our rights, those actions could have a significant impact on our business, including the imposition of significant fines or other sanctions. A 26 A A Our internal computer systems, or those of our CROs or other contractors or consultants, may fail or suffer security breaches, which could result in a material disruption of our product development programs. A Despite the implementation of cyber security measures, our internal computer systems and those of our CROs and other contractors and consultants are vulnerable to damage from computer viruses, unauthorized access, natural disasters, terrorism, war and telecommunication and electrical failures. Such events could cause interruptions of our operations. For example, the loss of preclinical data or data from any future clinical trial involving our product candidates could result in delays in our development and regulatory filing efforts and significantly increase our costs. To the extent that any disruption or security breach were to result in a loss of, or damage to, our data, or inappropriate disclosure of confidential or proprietary information, we could incur liability and the development of our product candidates could be delayed. A Our proprietary information, or that of our customers, suppliers and business partners, may be lost or we may suffer security breaches. A In the ordinary course of our business, we collect and store sensitive data, including intellectual property, clinical trial data, our proprietary business information and that of our customers, suppliers and business partners, and personally identifiable information of our customers, clinical trial subjects and employees, in our data centers and on our networks. The secure processing, maintenance and transmission of this information is critical to our operations. Despite our security measures, our information technology and infrastructure may be vulnerable to attacks by hackers or breached due to employee error, malfeasance or other disruptions. Although to our knowledge we have not experienced any such material security breach to date, any such breach could compromise our network, or the networks of our CROs or other third-party service providers, and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could result in legal claims or proceedings, liability under laws that protect the privacy of personal information, regulatory penalties, disrupt our operations, damage our reputation, and cause a loss of confidence in our products and our ability to conduct clinical trials, which could adversely affect our business and reputation and lead to delays in gaining regulatory approvals for our drugs. Although we maintain business interruption insurance coverage, our insurance might not cover all losses from any future breaches of our systems. A Failure of our information technology systems could significantly disrupt the operation of our business. A Our business increasingly depends on the use of information technologies, which means that certain key areas such as research and development, production and sales are to a large extent dependent on our information systems or those of third-party providers. Our ability to execute our business plan and to comply with regulatory requirements with respect to data control and data integrity, depends, in part, on the continued and uninterrupted performance of our information technology systems, or IT systems and the IT systems supplied by third-party service providers. These systems are vulnerable to damage from a variety of sources, including telecommunications or network failures, malicious human acts and natural disasters. Moreover, despite network security and backup measures, some of our servers are potentially vulnerable to physical or electronic break-ins, computer viruses and similar disruptive problems. Despite the precautionary measures we and our third-party service providers have taken to prevent unanticipated problems that could affect our IT systems, sustained or repeated system failures or problems arising during the upgrade of any of our IT systems that interrupt our ability to generate and maintain data, and in particular to operate our proprietary technology platform, could adversely affect our ability to operate our business. A 27 A If we do not comply with laws regulating the protection of the environment and health and human safety, our business could be adversely affected. A Our research, development and manufacturing involve the use of hazardous materials and various chemicals. We maintain quantities of various flammable and toxic chemicals in our facilities in Gaithersburg, Maryland that are required for our research, development and manufacturing activities. We are subject to federal, state and local laws and regulations governing the use, manufacture, storage, handling and disposal of these hazardous materials. We believe our procedures for storing, handling and disposing these materials in our Gaithersburg facilities comply with the relevant guidelines of Gaithersburg, the State of Maryland and the Occupational Safety and Health Administration of the U.S. Department of Labor. Although we believe that our safety procedures for handling and disposing of these materials comply with the standards mandated by applicable regulations, the risk of accidental contamination or injury from these materials cannot be eliminated. If an accident occurs, we could be held liable for resulting damages, which could be substantial. We are also subject to numerous environmental, health and workplace safety laws and regulations, including those governing laboratory procedures, exposure to blood-borne pathogens and the handling of animals and biohazardous materials. Although we maintain worksafeâ™ compensation insurance to cover us for costs and expenses, we may incur due to injuries to our employees resulting from the use of these materials, this insurance may not provide adequate coverage against potential liabilities. We do not maintain insurance for environmental liability or toxic tort claims that may be asserted against us in connection with our storage or disposal of biological or hazardous materials. Additional federal, state and local laws and regulations affecting our operations may be adopted in the future. We may incur substantial costs to comply with, and substantial fines or penalties if we violate any of these laws or regulations. A Our information technology systems could face serious disruptions that could adversely affect our business. A Our information technology and other internal infrastructure systems, including corporate firewalls, servers, leased lines and connection to the Internet, face the risk of systemic failure that could disrupt our operations. A significant disruption in the availability of our information technology and other internal infrastructure systems could cause interruptions in our collaborations with our partners and delays in our research and development work. A Changes in accounting rules and regulations, or interpretations thereof, could result in unfavorable accounting charges or require us to change our compensation policies. A Accounting methods and policies for pharmaceutical companies, including policies governing revenue recognition, research and development and related expenses and accounting for stock-based compensation are subject to review, interpretation and guidance from relevant accounting authorities, including the SEC. Changes to accounting methods or policies, or interpretations thereof, may require us to reclassify, restate or otherwise change or revise our financial statements, including those contained in this registration statement. A Risks Related to Our Intellectual Property A If we are not able to obtain and enforce patent protection for our technologies or product candidates, development and commercialization of our product candidates may be adversely affected. A Our success depends in part on our ability to obtain and maintain patents and other forms of intellectual property rights, including in-licenses of intellectual property rights of others, for our product candidates, methods used to manufacture our product candidates and methods for treating patients using our product candidates, as well as our ability to preserve our trade secrets, to prevent third parties from infringing upon our proprietary rights and to prevent without infringing upon the proprietary rights of others. As of the date of this registration statement, we have filed 6 patent applications with the U.S. Patent and Trademark Office (the â€œUSPTOâ€) with respect to various aspects of our HDAC inhibitor small molecule delivery platforms and Ropidoxuridine, our lead product candidate. A However, we may not be able to apply for patents on certain aspects of our product candidates or delivery technologies in a timely fashion or at all. To date, four U.S. patents and eighteen European patents have been granted. There is no guarantee that any of our pending patent applications will result in issued or granted patents, that any of our issued, granted or licensed patents will not later be found to be invalid or unenforceable or that any issued, granted or licensed patents will include claims that are sufficiently broad to cover our product candidates or delivery technologies or to provide meaningful protection from our competitors. Moreover, the patent position of specialty pharmaceutical companies can be highly uncertain because it involves complex legal and factual questions. We will be able to protect our proprietary rights from unauthorized use by third parties only to the extent that our current and future proprietary technology and product candidates are covered by valid and enforceable patents or are effectively maintained as trade secrets. If third parties disclose or misappropriate our proprietary rights, it may materially and adversely impact our position in the market. A 28 A The USPTO and various foreign governmental patent agencies require compliance with a number of procedural,

documentary, fee payment and other requirements during the patent process. There are situations in which noncompliance can result in abandonment or lapse of a patent or patent application, resulting in partial or complete loss of patent rights in the relevant jurisdiction. In such an event, competitors might be able to enter the market earlier than would otherwise have been the case. The standards applied by the USPTO and foreign patent offices in granting patents are not always applied uniformly or predictably. For example, there is no uniform worldwide policy regarding patentable subject matter or the scope of claims allowable in pharmaceutical patents. As such, we do not know the degree of future protection that we will have on our proprietary products and technology. While we will endeavor to try to protect our product candidates with intellectual property rights such as patents, as appropriate, the process of obtaining patents is time-consuming, expensive and sometimes unpredictable. Â We may decide for business reasons to no longer pursue or to abandon certain intellectual property rights in the U.S. or elsewhere, including due to non-cooperation of inventors or owners of such intellectual property, prior art, or scope of protection, or for other reasons. Â Once granted, patents may remain open to opposition, interference, re-examination, post-grant review, inter partes review, nullification or derivation action in court or before patent offices or similar proceedings for a given period after allowance or grant, during which time third parties can raise objections against such initial grant. In the course of such proceedings, which may continue for a protracted period of time, the patent owner may be compelled to limit the scope of the allowed or granted claims thus attacked, or may lose the allowed or granted claims altogether. In addition, there can be no assurance that: Â Â — others will not or may not be able to make, use or sell compounds that are the same as or similar to our product candidates but that are not covered by the claims of the patents that we own or license; Â Â — we or our licensors, collaborators or any future collaborators are the first to make the inventions covered by each of our issued patents and pending patent applications that we own or license; Â Â — we or our licensors, collaborators or any future collaborators are the first to file patent applications covering certain aspects of our inventions; Â Â — others will not independently develop similar or alternative technologies or duplicate any of our technologies without infringing our intellectual property rights; Â Â — A third party may not challenge our patents and, if challenged, a court may not hold that our patents are valid, enforceable and infringed; Â Â — any issued patents that we own or have licensed will provide us with any competitive advantages, or will not be challenged by third parties; Â Â — we may develop additional proprietary technologies that are patentable; Â Â — the patents of others will not have an adverse effect on our business; and Â Â — our competitors do not conduct research and development activities in countries where we do not have enforceable patent rights and then use the information learned from such activities to develop competitive products for sale in our major commercial markets. Â 29 Â We intend to license patent rights from third-party owners or licensees. If such owners or licensees do not properly or successfully obtain, maintain or enforce the patents underlying such licenses, or if they retain or license to others any competing rights, our competitive position and business prospects may be adversely affected. We may not be able to protect our intellectual property rights throughout the world. Â Obtaining a valid and enforceable issued or granted patent covering our technology in the U.S. and worldwide can be extremely costly. In jurisdictions where we have not obtained patent protection, competitors may use our technology to develop their own products and further, may export otherwise infringing products to territories where we have patent protection, but where it is more difficult to enforce a patent as compared to the U.S. Competitor products may compete with our future products in jurisdictions where we do not have issued or granted patents or where our issued or granted patent claims or other intellectual property rights are not sufficient to prevent competitor activities in these jurisdictions. The legal systems of certain countries, particularly certain developing countries, make it difficult to enforce patents and such countries may not recognize other types of intellectual property protection, particularly that relating to biopharmaceuticals. This could make it difficult for us to prevent the infringement of patents or marketing of competing products in violation of our proprietary rights generally in certain jurisdictions. Proceedings to enforce our patent rights in foreign jurisdictions could result in substantial cost and divert our efforts and attention from other aspects of our business. Â We generally file a provisional patent application first (a priority filing) at the USPTO. A U.S. utility application and international application under the Patent Cooperation Treaty (PCT) are usually filed within twelve months after the priority filing. Based on the PCT filing, national and regional patent applications may be filed in the European Union, Japan, Australia and Canada and other countries. We have so far not filed for patent protection in all national and regional jurisdictions where such protection may be available. In addition, we may decide to abandon national and regional patent applications before grant. Finally, the grant proceeding of each national or regional patent is an independent proceeding which may lead to situations in which applications might in some jurisdictions be refused by the relevant registration authorities, while granted by others. It is also quite common that depending on the country, various scopes of patent protection may be granted on the same product candidate or technology. The laws of some jurisdictions do not protect intellectual property rights to the same extent as the laws in the U.S., and many companies have encountered significant difficulties in protecting and defending such rights in such jurisdictions. If we or our licensors encounter difficulties in protecting, or are otherwise precluded from effectively protecting, the intellectual property rights important for our business in such jurisdictions, the value of these rights may be diminished, and we may face additional competition from others in those jurisdictions. Many countries have compulsory licensing laws under which a patent owner may be compelled to grant licenses to third parties. In addition, many countries limit the enforceability of patents against government agencies or government contractors. In these countries, the patent owner may have limited remedies, which could materially diminish the value of such patent. If we or any of our licensors are forced to grant a license to third parties with respect to any patents relevant to our business, our competitive position in the relevant jurisdiction may be impaired and our business and results of operations may be adversely affected. Â We or our licensors, or any future collaborators or a strategic partners may become subject to third party claims or litigation alleging infringement of patents or other proprietary rights or seeking to invalidate patents or other proprietary rights, and we may need to resort to litigation to protect or enforce our patents or other proprietary rights, all of which could be costly, time consuming, delay or prevent the development and commercialization of our product candidates, or put our patents and other proprietary rights at risk. Â We or our licensors, or any future collaborators or strategic partners may be subject to third-party claims for infringement or misappropriation of patent or other proprietary rights. We are generally obligated under our license or collaboration agreements to indemnify and hold harmless our licensors or collaborator for damages arising from intellectual property infringement by us. If we or our licensors, or any future collaborators or strategic partners are found to infringe a third-party patent or other intellectual property rights, we could be required to pay damages, potentially including treble damages, if we are found to have willfully infringed. In addition, we or our licensors, collaborators or any future strategic partners may choose to seek, or be required to seek, a license from a third party, which may not be available on acceptable terms, if at all. Even if a license can be obtained on acceptable terms, the rights may be non-exclusive, which could give our competitors access to the same technology or intellectual property rights licensed to us. If we fail to obtain a required license, we or our collaborator, or any future collaborator, may be unable to effectively market product candidates based on our technology, which could limit our ability to generate revenue or achieve profitability and possibly prevent us from generating revenue sufficient to sustain our operations. In addition, we may find it necessary to pursue claims or initiate lawsuits to protect or enforce our patent or other intellectual property rights. The cost to us in defending or initiating any litigation or other proceeding relating to patent or other proprietary rights, even if resolved in our favor, could be substantial, and litigation would divert our managementâ€™s attention. Some of our competitors may be able to sustain the costs of complex patent litigation more effectively than we can because they have substantially greater resources. Uncertainties resulting from the initiation and continuation of patent litigation or other proceedings could delay our research and development efforts and limit our ability to continue our operations. Â 30 Â If we were to initiate legal proceedings against a third party to enforce a patent covering one of our products or our technology, the defendant could counterclaim that our patent is invalid or unenforceable. In patent litigation in the U.S., defendant counterclaims alleging invalidity or unenforceability are commonplace. Grounds for a validity challenge could be an alleged failure to meet any of several statutory requirements, for example, lack of novelty, obviousness or non-enablement. Grounds for an unenforceability assertion could be an allegation that someone connected with prosecution of the patent withheld relevant information from the USPTO, or made a misleading statement, during prosecution. The outcome following legal assertions of invalidity and unenforceability during patent litigation is unpredictable. With respect to the validity question, for example, we cannot be certain that there is no invalidating prior art, of which we and the patent examiner were unaware during prosecution. If a defendant were to prevail on a legal assertion of invalidity or unenforceability, we would lose at least part, and perhaps all, of the patent protection on one or more of our products or certain aspects of our platform technology. Such a loss of patent protection could have a material adverse impact on our business. Patents and other intellectual property rights also will not protect our technology if competitors design around our protected technology without legally infringing our patents or other intellectual property rights. Â Intellectual property rights of third parties could adversely affect our ability to commercialize our product candidates, and we might be required to litigate or obtain licenses from third parties in order to develop or market our product candidates. Such litigation or licenses could be costly or not available on commercially reasonable terms. Â Our competitive position may suffer if patents issued to third parties or other third-party intellectual property rights cover our products or elements thereof, or our manufacture or uses relevant to our development plans. In such cases, we may not be in a position to develop or commercialize products or product candidates unless we successfully pursue litigation to nullify or invalidate the third-party intellectual property right concerned, or enter into a license agreement with the intellectual property right holder, if available on commercially reasonable terms. Â Third party intellectual property right holders may also actively bring infringement claims against us. We cannot guarantee that we will be able to successfully settle or otherwise resolve such infringement claims. If we are unable to successfully settle future claims on terms acceptable to us, we may be required to engage in or continue costly, unpredictable and time-consuming litigation and may be prevented from or experience substantial delays in marketing our products. If we fail in any such dispute, in addition to being forced to pay damages, we may be temporarily or permanently prohibited from commercializing any of our product candidates that are held to be infringing. We might, if possible, also be forced to redesign product candidates so that we no longer infringe the third-party intellectual property rights. Any of these events, even if we were ultimately to prevail, could require us to divert substantial financial and management resources that we would otherwise be able to devote to our business. Â If we fail to comply with our obligations under any license, collaboration or other agreements, we may be required to pay damages and could lose intellectual property rights that are necessary for developing and protecting our product candidates and delivery technologies or we could lose certain rights to grant sublicenses. Â Our current licenses impose, and any future licenses we enter into are likely to impose, various development, commercialization, funding, milestone, royalty, diligence, sublicensing, insurance, patent prosecution and enforcement, and other obligations on us. If we breach any of these obligations, or use the intellectual property licensed to us in an unauthorized manner, we may be required to pay damages and the licensor may have the right to terminate the license, which could result in us being unable to develop, manufacture and sell products that are covered by the licensed technology or enable a competitor to gain access to the licensed technology. Moreover, our licensors may own or control intellectual property that has not been licensed to us and, as a result, we may be subject to claims, regardless of their merit, that we are infringing or otherwise violating the licensorsâ€™ rights. In addition, while we cannot currently determine the amount of the royalty obligations we would be required to pay on sales of future products, if any, the amounts may be significant. The amount of our future royalty obligations will depend on the technology and intellectual property we use in products that we aim to develop and commercialize, if any. Therefore, even if we are able to develop and commercialize products, we may be unable to achieve or maintain profitability. Â 31 Â If we are unable to protect the confidentiality of our trade secrets, our business and competitive position would be harmed. Â In addition to seeking patent protection for certain aspects of our product candidates and delivery technologies, we also consider trade secrets, including confidential and unpatented know-how important to the maintenance of our competitive position. We protect trade secrets and confidential and unpatented know-how, in part, by entering into non-disclosure and confidentiality agreements with parties who have access to such knowledge, such as our employees, corporate collaborators, outside scientific collaborators, CROs, contract manufacturers, consultants, advisors and other third parties. We also enter into confidentiality and invention or patent assignment agreements with our employees and consultants that obligate them to maintain confidentiality and assign their inventions to us. Despite these efforts, any of these parties may breach the agreements and disclose our proprietary information, including our trade secrets, and we may not be able to obtain adequate remedies for such breaches. Enforcing a claim that a party illegally disclosed or misappropriated a trade secret is difficult, expensive and time-consuming, and the outcome is unpredictable. In addition, some courts in the U.S. and certain foreign jurisdictions are less willing or unwilling to protect trade secrets. If any of our trade secrets were to be lawfully obtained or independently developed by a competitor, we would have no right to prevent them from using that technology or information to compete with us. If any of our trade secrets were to be disclosed to or independently developed by a competitor, our competitive position would be harmed. Â We may be subject to claims that we or our employees or consultants have wrongfully used or disclosed alleged trade secrets of our employeesâ€™ or consultantsâ€™ former employers or their clients. These claims may be costly to defend and if we do not successfully do so, we may be required to pay monetary damages and may lose valuable intellectual property rights or personnel. Â Many of our employees were previously employed at universities or biotechnology or pharmaceutical companies, including our competitors or potential competitors. Although no claims against us are currently pending, we may be subject to claims that these employees or we have inadvertently or otherwise used or disclosed trade secrets or other proprietary information of their former employers. Litigation may be necessary to defend against these claims. If we fail in defending such claims, in addition to paying monetary damages, we may lose valuable intellectual property rights or personnel. A loss of key research personnel or their work product could hamper our ability to commercialize, or prevent us from commercializing, our product candidates, which could severely harm our business. Even if we are successful in defending against these claims, litigation could result in substantial costs and be a distraction to management. Â If our trademarks and trade names are not adequately protected, then we may not be able to build name recognition in our markets of interest and our business may be adversely affected. Â Our trademarks or trade names may be challenged, infringed, circumvented or declared generic or determined to be infringing on other marks. We may not be able to protect our rights to these trademarks and trade names or may be forced to stop using these names, which we need for name recognition by potential partners or customers in our markets of interest. If we are unable to establish name recognition based on our trademarks and trade names, we may not be able to effectively compete and our business may be adversely affected. Â Risks Related to Government Regulation and Product Approvals Â We may be unable to obtain U.S. or foreign regulatory approval and, as a result, unable to commercialize our product candidates. Â Our product candidates are subject to extensive governmental regulations relating to, among other things, research, testing, development, manufacturing, safety, efficacy, approval, recordkeeping, reporting, labeling, storage, packaging, advertising and promotion, pricing, marketing and distribution of drugs. Rigorous preclinical testing and clinical trials and an extensive regulatory approval process are required to be completed in the U.S. and in many foreign jurisdictions before a new drug can be marketed. Satisfaction of these and other regulatory requirements is costly, time-consuming, uncertain and subject to unanticipated delays. It is possible that none of the product candidates we may develop will obtain the regulatory approvals necessary for us or our collaborators to begin selling them. Â 32 Â We have very limited experience in conducting and managing the clinical trials necessary to obtain regulatory approvals, including approval by the FDA. The time required to obtain FDA and other approvals is unpredictable but typically takes many years following the commencement of clinical trials, depending upon the type, complexity and novelty of the product candidate. The standards that the FDA and its foreign counterparts use when regulating us are not always applied predictably or uniformly and can change. Any analysis we perform of data from preclinical and clinical activities is subject to confirmation and interpretation by regulatory authorities, which could delay, limit or prevent regulatory approval. We may also encounter unexpected delays or increased costs due to new government regulations, for example, from future legislation or administrative action, or from changes in FDA policy during the period of product development, clinical trials and FDA regulatory review. It is impossible to predict whether legislative changes will be enacted, or whether FDA or foreign regulations, guidance or interpretations will be changed, or what the impact of such changes, if any, may be. Â Any delay or failure in obtaining required approvals could have a material adverse effect on our ability to generate revenues from the particular product candidate for which we are seeking approval. Furthermore, any regulatory approval to market a product may be subject to limitations on the approved uses for which we may market the product or the labeling or other restrictions. In addition, the FDA has the authority to require a Risk Evaluation and Mitigation Strategy (REMS) plan as part of an NDA or biologics license application (BLA) or after approval, which may impose further requirements or restrictions on the distribution or use of an approved drug or biologic, such as limiting prescribing to certain physicians or medical centers that have undergone specialized training, limiting treatment to patients who meet certain safe-use criteria and requiring treated patients to enroll in a registry. These limitations and restrictions may limit the size of the market for the product and affect reimbursement by third-party payors. Â If we or our collaborators, manufacturers or service providers fail to comply with healthcare laws and regulations, we or they could be subject to enforcement actions, which could affect our ability to develop, market and sell our products and may harm our reputation. Â We and our collaborators are subject to federal, state, and foreign healthcare laws and regulations pertaining to fraud and abuse and patientsâ€™ rights. These laws and regulations include: Â Â — the

U.S. federal healthcare program anti-kickback law, which prohibits, among other things, persons from soliciting, receiving or providing remuneration, directly or indirectly, to induce either the referral of an individual for a healthcare item or service, or the purchasing or ordering of an item or service, for which payment may be made under a federal healthcare program such as Medicare or Medicaid; Â Â Â Â the U.S. federal false claims law, which prohibits, among other things, individuals or entities from knowingly presenting or causing to be presented, claims for payment by government funded programs such as Medicare or Medicaid that are false or fraudulent, and which may apply to us by virtue of statements and representations made to customers or third parties; Â Â Â Â the U.S. federal Health Insurance Portability and Accountability Act (HIPAA) and Health Information Technology for Economic and Clinical Health (HITECH) Act, which prohibit executing a scheme to defraud healthcare programs, impose requirements relating to the privacy, security, and transmission of individually identifiable health information, and require notification to affected individuals and regulatory authorities of certain breaches of security of individually identifiable health information; Â Â Â Â the federal Open Payments regulations under the National Physician Payment Transparency Program have been issued under the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Affordability Reconciliation Act, and will require that manufacturers of pharmaceutical and biological drugs covered by Medicare, Medicaid, and Childrenâ€™s Health Insurance Programs report all consulting fees, travel reimbursements, research grants, and other payments or gifts with values over \$10 made to physicians and teaching hospitals; and Â Â Â state laws comparable to each of the above federal laws, such as, for example, anti-kickback and false claims laws applicable to commercial insurers and other non-federal payors, requirements for mandatory corporate regulatory compliance programs, and laws relating to patient data privacy and security. Â 33 Â If our operations are found to be in violation of any such requirements, we may be subject to penalties, including civil or criminal penalties, monetary damages, the curtailment or restructuring of our operations, loss of eligibility to obtain approvals from the FDA, or exclusion from participation in government contracting, healthcare reimbursement or other government programs, including Medicare and Medicaid, any of which could adversely our financial results. Although effective compliance programs can mitigate the risk of investigation and prosecution for violations of these laws, these risks cannot be entirely eliminated. Any action against us for an alleged or suspected violation could cause us to incur significant legal expenses and could divert our managementâ€™s attention from the operation of our business, even if our defense is successful. In addition, achieving and sustaining compliance with applicable laws and regulations may be costly to us in terms of money, time, and resources. Â If we or our collaborators, manufacturers or service providers fail to comply with applicable federal, state, or foreign laws or regulations, we could be subject to enforcement actions, which could affect our ability to develop, market and sell our products successfully and could harm our reputation and lead to reduced acceptance of our products by the market. These enforcement actions include, among others: Â Â Â adverse regulatory inspection findings; Â Â Â warning letters; Â Â Â voluntary or mandatory product recalls or public notification or medical product safety alerts to healthcare professionals; Â Â Â restrictions on, or prohibitions against, marketing our products; Â Â Â restrictions on, or prohibitions against, importation or exportation of our products; Â Â Â suspension of review or refusal to approve pending applications or supplements to approved applications; Â Â Â exclusion from participation in government-funded healthcare programs; Â Â Â exclusion from eligibility for the award of government contracts for our products; Â Â Â suspension or withdrawal of product approvals; Â Â Â product seizures; Â Â Â injunctions; and Â Â Â civil and criminal penalties and fines. Â Any drugs we develop may become subject to unfavorable pricing regulations, third-party reimbursement practices or healthcare reform initiatives, thereby harming our business. Â The regulations that govern marketing approvals, pricing and reimbursement for new drugs vary widely from country to country. Some countries require approval of the sale price of a drug before it can be marketed. In many countries, the pricing review period begins after marketing or product licensing approval is granted. In some foreign markets, prescription pharmaceutical pricing remains subject to continuing governmental control even after initial approval is granted. Although we intend to monitor these regulations, our programs are currently in the early stages of development and we will not be able to assess the impact of price regulations for a number of years. As a result, we might obtain regulatory approval for a product in a particular country, but then be subject to price regulations that delay our commercial launch of the product and negatively impact the revenues we are able to generate from the sale of the product in that country. Â 34 Â Our ability to commercialize any products also will depend in part on the extent to which reimbursement for these products and related treatments will be available from government health administration authorities, private health insurers and other organizations. Even if we succeed in bringing one or more products to the market, these products may not be considered cost-effective, and the amount reimbursed for any products may be insufficient to allow us to sell our products on a competitive basis. Because our programs are in the early stages of development, we are unable at this time to determine their cost effectiveness or the likely level or method of reimbursement. Increasingly, the third-party payors who reimburse patients or healthcare providers, such as government and private insurance plans, are requiring that drug companies provide them with predetermined discounts from list prices and are seeking to reduce the prices charged or the amounts reimbursed for pharmaceutical products. If the price we are able to charge for any products we develop, or the reimbursement provided for such products, is inadequate in light of our development and other costs, our return on investment could be adversely affected. Â Our current product candidates will need to be administered under the supervision of a physician on an outpatient basis. Under currently applicable U.S. law, certain drugs that are not usually self-administered (including injectable drugs) may be eligible for coverage under the Medicare Part B program if: Â Â they are incident to a physicianâ€™s services; Â Â they are reasonable and necessary for the diagnosis or treatment of the illness or injury for which they are administered according to accepted standards of medical practice; and Â Â they have been approved by the FDA and meet other requirements of the statute. Â There may be significant delays in obtaining coverage for newly-approved drugs, and coverage may be more limited than the purposes for which the drug is approved by the FDA. Moreover, eligibility for coverage does not imply that any drug will be reimbursed in all cases or at a rate that covers our costs, including research, development, manufacture, sale and distribution. Interim payments for new drugs, if applicable, may also not be sufficient to cover our costs and may not be made permanent. Reimbursement may be based on payments allowed for lower-cost drugs that are already reimbursed, may be incorporated into existing payments for other services and may reflect budgetary constraints or imperfections in Medicare data. Net prices for drugs may be reduced by mandatory discounts or rebates required by government healthcare programs or private payors and by any future relaxation of laws that presently restrict imports of drugs from countries where they may be sold at lower prices than in the U.S. Third-party payors often rely upon Medicare coverage policy and payment limitations in setting their own reimbursement rates. Our inability to promptly obtain coverage and adequate reimbursement rates from both government-funded and private payors for new drugs that we develop and for which we obtain regulatory approval could have a material adverse effect on our operating results, our ability to raise capital needed to commercialize products and our financial condition. Â We believe that the efforts of governments and third-party payors to contain or reduce the cost of healthcare and legislative and regulatory proposals to broaden the availability of healthcare will continue to affect the business and financial condition of pharmaceutical and biopharmaceutical companies. A number of legislative and regulatory changes in the healthcare system in the U.S. and other major healthcare markets have been proposed in recent years, and such efforts have expanded substantially in recent years. These developments have included prescription drug benefit legislation that was enacted and took effect in January 2006, healthcare reform legislation enacted by certain states, and Patient Protection and Affordable Care Act, as amended by the Health Care and Education Affordability Reconciliation Act (the â€œACAâ€), a sweeping law intended to broaden access to health insurance, reduce or constrain the growth of healthcare spending and enhance remedies against fraud and abuse. The ACA also contains provisions that will affect companies in the pharmaceutical industry and other healthcare related industries by imposing additional costs and changes to business practices. Provisions affecting pharmaceutical companies include the following: Â Â mandatory rebates for drugs sold into the Medicaid program have been increased, and the rebate requirement has been extended to drugs used in risk-based Medicaid managed care plans; Â 35 Â Â the 340B Drug Pricing Program under the Public Health Services Act has been extended to require mandatory discounts for drug products sold to certain critical access hospitals, cancer hospitals and other covered entities; Â Â pharmaceutical companies are required to offer discounts on brand-name drugs to patients who fall within the Medicare Part D coverage gap, commonly referred to as the â€œDonut Holeâ€; and Â Â pharmaceutical companies are required to pay an annual non-tax deductible fee to the federal government based on each companyâ€™s market share of prior year total sales of branded products to certain federal healthcare programs, such as Medicare, Medicaid, Department of Veterans Affairs and Department of Defense. Since we expect our branded pharmaceutical sales to constitute a small portion of the total federal health program pharmaceutical market, we do not expect this annual assessment to have a material impact on our financial condition. Â Moreover, we cannot predict what healthcare reform initiatives may be adopted in the future. Further federal and state legislative and regulatory developments are likely, and we expect ongoing initiatives in the U.S. to increase pressure on drug pricing. Such reforms could have an adverse effect on anticipated revenues from product candidates that we may develop and for which we may obtain regulatory approval and may affect our overall financial condition and ability to develop product candidates. Â Our ability to obtain services, reimbursement or funding from the federal government may be impacted by possible reductions in federal spending. Â U.S. federal government agencies currently face potentially significant spending reductions. Under the Budget Control Act of 2011, the failure of Congress to enact deficit reduction measures of at least \$1.2 trillion for the years 2013 through 2021 triggered automatic cuts to most federal programs. These cuts would include aggregate reductions to Medicare payments to providers of up to two percent per fiscal year, starting in 2013. Under the American Taxpayer Relief Act of 2012, which was enacted on January 1, 2013, the imposition of these automatic cuts was delayed until March 1, 2013. Certain of these automatic cuts have been implemented. The full impact on our business of these automatic cuts is uncertain. If federal spending is reduced, anticipated budgetary shortfalls may also impact the ability of relevant agencies, such as the FDA or the NIH to continue to function at current levels. Amounts allocated to federal grants and contracts may be reduced or eliminated. These reductions may also impact the ability of relevant agencies to timely review and approve drug research and development, manufacturing, and marketing activities, which may delay our ability to develop, market and sell any products we may develop. Â If any of our product candidates receives marketing approval and we or others later identify undesirable side effects caused by the product candidate, our ability to market and derive revenue from the product candidates could be compromised. Â In the event that any of our product candidates receive regulatory approval and we or others identify undesirable side effects caused by one of our products, any of the following adverse events could occur, which could result in the loss of significant revenue to us and materially and adversely affect our results of operations and business: Â Â regulatory authorities may withdraw their approval of the product or seize the product; Â Â we may be required to recall the product or change the way the product is administered to patients; Â Â additional restrictions may be imposed on the marketing of the particular product or the manufacturing processes for the product or any component thereof; Â Â we may be subject to fines, injunctions or the imposition of civil or criminal penalties; Â Â regulatory authorities may require the addition of labeling statements, such as a â€œblack boxâ€ warning or a contraindication; Â Â we may be required to create a Medication Guide outlining the risks of such side effects for distribution to patients; Â 36 Â Â we could be sued and held liable for harm caused to patients; Â Â the product may become less competitive; and Â Â our reputation could be harmed. Â Risks Related to our Common Stock Â While our Companyâ€™s management is working to improve our internal controls and procedures, at present management has determined that our internal controls were deemed to be inadequate, which could cause our financial reporting to be unreliable and lead to misinformation being disseminated to the public. Â Our management is responsible for establishing and maintaining adequate internal control over financial reporting. As defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended (the â€œExchange Actâ€), internal control over financial reporting is a process designed by, or under the supervision of, the principal executive and principal financial officer and effected by the board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that: Â Â pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets; Â Â provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and/or directors of the Company; and Â Â provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Companyâ€™s assets that could have a material effect on the financial statements. Â We are required to include a report of management on the effectiveness of our internal control over financial reporting. We expect to incur additional expenses and diversion of managementâ€™s time as a result of performing the system and process evaluation, testing and remediation required in order to comply with the management certification requirements. Â Presently, we do not have a sufficient number of employees to segregate responsibilities and may be unable to afford increasing our staff or engaging outside consultants or professionals to overcome our lack of employees. During the course of our testing, we may identify other deficiencies that we may not be able to timely remediate. If we cannot provide reliable financial reports or prevent fraud, our business and operating results could be harmed, investors could lose confidence in our reported financial information, and the trading price of our common stock, if a market ever develops, could drop significantly. Â The JOBS Act has reduced the information that we are required to disclose. Â Under the JOBS Act, the information that we will be required to disclose has been reduced in a number of ways. Â As a company that had gross revenues of less than \$1.235 billion during the Companyâ€™s last fiscal year, the Company is an â€œemerging growth company,â€ as defined in the JOBS Act (an â€œEGCâ€). We will retain that status until the earliest of (a) the last day of the fiscal year which we have total annual gross revenues of \$1.235 billion (as indexed for inflation in the manner set forth in the JOBS Act) or more; (b) the last day of the fiscal year of following the fifth anniversary of the date of the first sale of the common stock pursuant to an effective registration statement under the Securities Act of 1933, as amended (the â€œSecurities Actâ€); (c) the date on which we have, during the previous three year period, issued more than \$1.0 billion in non-convertible debt; or (d) the date on which we are deemed to be a â€œlarge accelerated filer,â€ as defined in Rule 12b-2 under the Exchange Act or any successor thereto. As an EGC, the Company is relieved from the following: Â Â The Company is excluded from Section 404(b) of Sarbanes-Oxley Act (â€œSarbanes-Oxleyâ€), which otherwise would have required the Companyâ€™s auditors to attest to and report on the Companyâ€™s internal control over financial reporting. The JOBS Act also amended Section 103(a)(3) of Sarbanes-Oxley to provide that (i) any new rules adopted by the PCAOB requiring mandatory audit firm rotation or changes to the auditorâ€™s report to include auditor discussion and analysis (in the event the PCAOB adopts an auditor rotation requirement) will not apply to an audit of an EGC; and (ii) any other future rules adopted by the PCAOB will not apply to the Companyâ€™s audits unless the SEC determines otherwise. Â Â The JOBS Act amended Section 7(a) of the Securities Act to provide that the Company need not present more than two years of audited financial statements in an initial public offering registration statement and in any other registration statement, need not present selected financial data pursuant to Item 301 of Regulation S-K for any period prior to the earliest audited period presented in connection with such initial public offering. In addition, the Company is not required to comply with any new or revised financial accounting standard until such date as a private company (i.e., a company that is not an â€œissuerâ€ as defined by Section 2(a) of Sarbanes-Oxley) is required to comply with such new or revised accounting standard. Corresponding changes have been made to the Exchange Act, which relates to periodic reporting requirements, which would be applicable if the Company were required to comply with them. Â Â As long as we are an EGC, we may comply with Item 402 of Regulation S-K, which requires extensive quantitative and qualitative disclosure regarding executive compensation, by disclosing the more limited information required of a â€œsmaller reporting company.â€ Â 37 Â Â The JOBS Act will also exempt us from the following additional compensation-related disclosure provisions that were imposed on U.S. public companies pursuant to the Dodd-Frank Act: (i) the advisory vote on executive compensation required by Section 14A(a) of the Exchange Act; (ii) the requirements of Section 14A(b) of the Exchange Act relating to stockholders advisory votes on â€œgolden parachuteâ€ compensation; (iii) the requirements of Section 14(i) of the Exchange Act as to disclosure relating to the relationship between executive compensation and our financial performance; and (iv) the requirement of Section 953(b)(1) of the Dodd-Frank Act, which requires disclosure as to the relationship between the compensation of our chief executive officer and median employee pay. Â Our stock price may be volatile, and purchasers of our common stock could incur substantial losses. Â Since commencement of trading on Nasdaq Stock Market LLC or Nasdaq, on August 29, 2022, our stock price has been extremely volatile, having traded as high as \$1,010.08 and as low as \$0.58. As a result of this volatility, investors may not be able to sell their common stock at or above the price when they purchased our common stock. The market price for our common stock may be influenced by many factors, including the other risks described in this section of this registration statement entitled â€œRisk Factorsâ€ and the following: Â Â the success of competitive products or technologies; Â Â results of preclinical and clinical studies of our product candidates, or those of our competitors, our existing collaborator or any future collaborators; Â Â regulatory or legal developments in the U.S. and other countries, especially changes in laws or regulations applicable to our products; Â Â introductions and announcements of new products by us, our commercialization

partners, or our competitors, and the timing of these introductions or announcements; ~~our actions taken by regulatory agencies with respect to our products, clinical studies, manufacturing process or sales and marketing terms; actual or anticipated variations in our financial results or those of companies that are perceived to be similar to us; the success of our efforts to acquire or in-license additional technologies, products or product candidates; developments concerning our collaborations, including but not limited to those with our sources of manufacturing supply and our commercialization partners; announcements by us or our competitors of significant acquisitions, strategic partnerships, joint ventures or capital commitments; developments or disputes concerning patents or other proprietary rights, including patents, litigation matters and our ability to obtain patent protection for our products; our ability or inability to raise additional capital and the terms on which we raise it; the recruitment or departure of key personnel; changes in the structure of healthcare payment systems; market conditions in the pharmaceutical and biotechnology sectors; actual or anticipated changes in earnings estimates or changes in stock market analyst recommendations regarding our common stock, other comparable companies or our industry generally; our failure or the failure of our competitors to meet analysts' projections or guidance that we or our competitors may give to the market; fluctuations in the valuation of companies perceived by investors to be comparable to us; announcement and expectation of additional financing efforts; speculation in the press or investment community; trading volume of our common stock; sales of our common stock by us or our stockholders; the concentrated ownership of our common stock; changes in accounting principles; terrorist acts, acts of war or periods of widespread civil unrest; natural disasters and other calamities; and general economic, industry and market conditions.~~ 38 In addition, the stock markets in general, and the markets for pharmaceutical stocks, in particular, have experienced extreme volatility that has been often unrelated to the operating performance of the issuer. These broad market and industry factors may seriously harm the market price of our common stock, regardless of our operating performance. The future issuance of equity or of debt securities that are convertible into common stock will dilute our share capital. We may choose to raise additional capital in the future, depending on market conditions, strategic considerations and operational requirements. To the extent that additional capital is raised through the issuance of shares or other securities convertible into shares of our common stock, our stockholders will be diluted. Future issuances of our common stock or other equity securities, or the perception that such sales may occur, could adversely affect the trading price of our common stock and impair our ability to raise capital through future offerings of shares or equity securities. No prediction can be made as to the effect, if any, that future sales of common stock or the availability of common stock for future sales will have on the trading price of our common stock. If we fail to maintain applicable listing requirements, Nasdaq may delist our common stock from trading, in which case the liquidity and market price of our common stock could decline. We cannot assure you that we will be able to meet the continued listing standards of Nasdaq in the future. If we fail to comply with the applicable listing standards and Nasdaq delists our common stock, we and our stockholders could face significant material adverse consequences, including: a limited availability of market quotations for shares of our common stock; reduced liquidity for our common stock; a determination that our common stock is a penny stock, which would require brokers trading in our common stock to adhere to more stringent rules and possibly result in a reduced level of trading activity in the secondary trading market for shares of our common stock; a limited amount of news about us and analyst coverage of us; and a decreased ability for us to issue additional equity securities or obtain additional equity or debt financing in the future. The National Securities Markets Improvement Act of 1996, which is a federal statute, prevents or preempts the states from regulating the sale of certain securities, which are referred to as "covered securities." Because our common stock is listed on Nasdaq, such securities will be deemed covered securities. Although the states will be preempted from regulating the sale of our securities, the federal statute does allow states to investigate companies if there is a suspicion of fraud and, if there is a finding of fraudulent activity, then the states can regulate or bar the sale of covered securities in a particular case. Further, if we were no longer listed on Nasdaq, our securities would not be covered securities and we would be subject to regulations in each state in which we offer our securities. Because our management has broad discretion over the use of the net proceeds we received from our IPO and any follow-on offerings, you may not agree with how we use them and the proceeds may not be invested successfully. We intend to use the net proceeds to us from our IPO and any follow-on offerings to fund preclinical and clinical trials of product candidates, Ropidoxuridine and new formulations of Ropidoxuridine with Tipiracil, O-18 containing molecules for proton radiation sensitization, continued HDAC technology platform development, working capital and general corporate purposes, including the costs of operating as a public company, as well as potential acquisition or in-licensing activities. Therefore, our management has broad discretion as to the use of the IPO proceeds and proceeds from our subsequent private placements or follow-on offerings. Accordingly, you will be relying on the judgment of our management with regard to the use of these net proceeds, and you will not have the opportunity, as part of your investment decision, to assess whether the proceeds are being used appropriately. It is possible that the proceeds will be invested in a way that does not yield a favorable, or any, return for our Company. If securities or industry analysts do not publish research or reports about our business, or if they issue an adverse or misleading opinion regarding our stock, our stock price and trading volume could decline. The trading market for our common stock will be influenced by the research and reports that industry or securities analysts publish about us or our business. We do not currently have and may never obtain research coverage by securities and industry analysts. If no or few securities or industry analysts commence coverage of us, the trading price for our stock would be negatively impacted. In the event we obtain securities or industry analyst coverage, if any of the analysts who cover us issue an adverse or misleading opinion regarding us, our business model, our intellectual property or our stock performance, or if our target studies and operating results fail to meet the expectations of analysts, our stock price would likely decline. If one or more of these analysts cease coverage of us or fail to publish reports on us regularly, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline. Our board of directors has the authority, without stockholder approval, to issue preferred stock with terms that may not be beneficial to holders of our common stock and such issuance could potentially adversely affect stockholders' voting power and perpetuate their control over us. Our Certificate of Incorporation, as amended to date, allows us to issue shares of preferred stock without any vote or further action by our stockholders. Our board of directors has the authority to fix and determine the relative rights and preferences of any preferred stock. As a result, our board of directors could authorize the issuance of a series of preferred stock that would grant to holders the preferred right to our assets upon liquidation, the right to receive dividend payments before dividends are distributed to the holders of common stock and the right to the redemption of the shares, together with a premium, prior to the redemption of shares of our common stock. These rights and preferences could negatively affect the holders of our common stock. The ability of our executive officers and directors, who are our principal stockholders, to control our business may limit or eliminate the ability of minority stockholders to influence corporate affairs. Our executive officers and directors, who are our principal stockholders, own approximately 28.3% of our issued and outstanding common stock. Accordingly, they may be able to effectively control the election of directors, as well as all other matters requiring stockholder approval. The interests of our principal stockholders may differ from the interests of other stockholders with respect to the issuance of shares, business transactions with or sales to other companies, selection of other directors and other business decisions. The minority stockholders have no way of overriding decisions made by our principal stockholders. This level of control may also have an adverse impact on the market value of our shares because our principal stockholders may institute or undertake transactions, policies or programs that result in losses and may not take any steps to increase our visibility in the financial community and/or may sell sufficient numbers of shares to significantly decrease our price per share. 39 A Our Certificate of Incorporation and Bylaws, each as amended to date, provide for indemnification of officers and directors at the expense of the Company and limit their liability that may result in a major cost to us and hurt the interests of our stockholders because corporate resources may be expended for the benefit of officers and/or directors. A Our Certificate of Incorporation and Bylaws, each as amended to date, provide for the indemnification of our officers and directors. We have been advised that, in the opinion of the SEC, indemnification for liabilities arising under federal securities laws is against public policy as expressed in the Securities Act and is therefore, unenforceable. A Our Certificate of Incorporation, as amended to date, provides that disputes must be resolved in the Court of Chancery of the State of Delaware, except for cases brought under the Securities Act or Exchange Act. A Our Certificate of Incorporation, as amended to date, provides that the Court of Chancery in the State of Delaware will be the exclusive forum for dispute resolution for certain enumerated actions, excluding any actions brought under the Securities Act or Exchange Act, or unless the Company consents in writing to an alternative jurisdiction. This exclusive forum selection clause may cause inconvenience to our stockholders or other stakeholders, should they need to bring suit against the Company for an action other than one arising under the Securities Act or Exchange Act. A We do not expect to pay cash dividends in the foreseeable future. A We have never paid cash dividends on our common stock. We do not expect to pay cash dividends on our common stock at any time in the foreseeable future. The future payment of dividends on our common stock directly depends upon our future earnings, capital requirements, financial requirements and other factors that our board of directors will consider. Since we do not anticipate paying cash dividends on our common stock, return on your investment, if any, will depend solely on an increase, if any, in the market value of our common stock. A Provisions in our amended and restated certificate of incorporation, as amended, and bylaws, as amended, as well as Delaware law, might discourage, delay or prevent a change of control of our company or changes in our management and, therefore, depress the market price of our common stock. A Our Certificate of Incorporation and Bylaws, each as amended to date, and bylaws contain provisions that could depress the market price of our common stock by acting to discourage, delay, or prevent a change in control of our company or changes in our management that the stockholders of our company may deem advantageous. These provisions, among other things: A permit the board of directors to establish the number of directors; A provide that directors may only be removed "for cause" and only with the approval of 66 2/3 percent of our stockholders; A require super-majority voting to amend some provisions in our Certificate of Incorporation and Bylaws; A authorize the issuance of "blank check" preferred stock that our board of directors could use to implement a stockholder rights plan (also known as a "poison pill"); A eliminate the ability of our stockholders to call special meetings of stockholders; A prohibit stockholder action by written consent, which requires all stockholder actions to be taken at a meeting of our stockholders; A provide that the board of directors is expressly authorized to make, alter or repeal our bylaws; and A establish advance notice requirements for nominations for election to our board of directors or for proposing matters that can be acted upon by stockholders at annual stockholder meetings. A 40 A In addition, Section 203 of the Delaware General Corporation Law may discourage, delay or prevent a change in control of our company. Section 203 imposes certain restrictions on merger, business combinations and other transactions between us and holders of 15% or more of our common stock. A The restatement of our consolidated financial statements and identification of material weaknesses in our internal controls may result in additional risks and uncertainties, including regulatory, stockholder or other actions, loss of investor and counterparty confidence and negative impacts on our stock price. A On July 10, 2024, the Audit Committee and Company management, after consultation and discussion with our independent registered public accounting firm, concluded that certain of our previously issued audited consolidated financial statements and unaudited consolidated financial statements need to be restated and should no longer be relied on for the reasons described in the Current Report on Form 8-K dated July 10, 2024, and in "Explanatory Note" preceding Part I, Item 1 of this Form 10-K/A and Note 2 to the Consolidated Financial Statements under Part II, Item 8 of this Form 10-K/A. The accounting errors impacted the Company's consolidated financial statements for the year ended December 31, 2022. These errors further resulted in an impact to the Company's consolidated balance sheet for the year ended December 31, 2023 and the unaudited condensed consolidated balance sheet as of and for the periods ended March 31, 2023, June 30, 2023, and September 30, 2023, specific to Additional Paid In Capital and Accumulated Deficit. Additionally, the restatement constituted an event of default under the terms of one of the Company's financing arrangements that was subsequently waived, but required additional cash collateral from the Company. A In addition, in connection with the restatement of the previously issued financial statements for the fiscal year ended December 31, 2023 and December 31, 2022, and fiscal quarter ended March 31, 2024 (the "Affected Periods"), management identified certain material weaknesses in our internal control over financial reporting. Although we are taking remediation measures, including having hired a new Chief Financial Officer during the second quarter of 2024 to bolster the Company's internal technical accounting and financial reporting experience and provide bandwidth for the prior CFO to focus on the Company's expanding clinical trials, we can give no assurance that the measures we have taken, are taking and plan to take in the future will remediate the material weaknesses identified or that any additional material weaknesses or restatements of financial results will not arise in the future due to a failure to implement and maintain adequate internal control over financial reporting. In addition, even if we are successful in strengthening our controls and procedures, in the future those controls and procedures may not be adequate to prevent or identify irregularities or errors or to facilitate the fair presentation of our consolidated financial statements. A As a result of the restatement and associated non-reliance on the previously issued financial statements for the Affected Periods and the identified material weakness, we have become subject to a number of additional costs and risks, including unanticipated costs for accounting and legal fees in connection with or related to the restatement and the ongoing process of remediating the material weaknesses. We could also be subject to regulatory, stockholder or other actions in connection with the restatement and/or the material weaknesses, which would, regardless of the outcome, consume management's time and attention and may result in additional legal, accounting and other costs. If such proceedings arise and we do not prevail in such proceedings, we could be required to pay damages or settlement costs. In addition, the restatement and related matters could impair our reputation or could cause our stockholders or other counterparties to lose confidence in us. Any of these occurrences could adversely affect our business, financial condition, liquidity and results of operations. A 41 A SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS A This prospectus and the documents included herein contain forward-looking statements that involve risks and uncertainties. All statements other than statements of historical facts contained in this prospectus and the documents included herein are forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as "may," "could," "will," "would," "should," "expect," "plan," "anticipate," "believe," "estimate," "intend," "predict," "seek," "contemplate," "project," "continue," "potential," "ongoing" or the negative of these terms or other comparable terminology. These forward-looking statements include, but are not limited to, statements about: A the initiation, timing, progress and results of our research and development programs, preclinical studies, any clinical trials and INDs, NDAs or other regulatory submissions; A our expected dependence on third party collaborators for developing, obtaining regulatory approval for and commercializing product candidates; A our receipt and timing of any milestone payments or royalties under any research collaboration and license agreement we enter into; A our ability to identify and develop product candidates; A our or a collaborator's ability to obtain and maintain regulatory approval of any of our product candidates; A the rate and degree of market acceptance of any approved products candidates; A the commercialization of any approved product candidates; A our ability to establish and maintain additional collaborations and retain commercial rights for our product candidates subject to collaborations; A the implementation of our business model and strategic plans for our business, technologies and product candidates; A our estimates of our expenses, ongoing losses, future revenue and capital requirements; A our ability to obtain additional funds for our operations; A our ability to obtain and maintain intellectual property protection for our technologies and product candidates and our ability to operate our business without infringing the intellectual property rights of others; A our reliance on third parties to conduct our preclinical studies or any future clinical trials; A our reliance on third party supply and manufacturing partners to supply the materials and components for, and manufacture, our research and development, preclinical and clinical trial drug supplies; A our ability to attract and retain qualified key management and technical personnel; A our use of net proceeds to us from this offering; A our expectations regarding the time during which we will be an emerging growth company under the JOBS Act; A our financial performance; and A developments relating to our competitors or our industry. A These statements relate to future events or to our future financial performance and involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance, or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. Factors that may cause actual results to differ materially from current expectations include, among other things, those described in the section entitled "Risk Factors" in this prospectus and contained in our Amended Annual Report on Form 10-K/A for the fiscal year ended December 31, 2023, as amended, our Quarterly Report on Form 10-Q for the nine months ended September 30, 2024, which are included in this prospectus, together with the information included in this prospectus, and in any free writing prospectus that we have authorized for use in connection with this offering. A 42 A Any forward-looking statement in this prospectus and the documents included herein reflects our current view with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to our operations, results of operations, industry, and future growth. Given these uncertainties, you should not place undue reliance on these

forward-looking statements. Except as required by U.S. federal securities law, we assume no obligation to update or revise these forward-looking statements for any reason, even if new information becomes available in the future. A MARKET AND INDUSTRY DATA AND FORECASTS A We obtained the industry and market data used throughout this prospectus from our own internal estimates and research, as well as from independent market research, industry and general publications and surveys, governmental agencies, publicly available information and research, surveys and studies conducted by third parties. Internal estimates are derived from publicly available information released by industry analysts and third- party sources, our internal research and our industry experience, and are based on assumptions made by us based on such data and our knowledge of our industry and market, which we believe to be reliable and reasonable. In some cases, we do not expressly refer to the sources from which this data is derived. In addition, while we believe the industry and market data included in this prospectus is reliable and based on reasonable assumptions, such data involve material risks and other uncertainties and are subject to change based on various factors, including those discussed in the section entitled "Risk Factors" and "Special Note Regarding Forward-Looking Statements." These and other factors could cause results to differ materially from those expressed in the estimates made by the independent parties or by us. A SELECTED FINANCIAL DATA A The following selected financial data has been derived from our audited financial statements included in our Amended Annual Report on Form 10-K/A for the year ended December 31, 2023, as amended, filed with the SEC on September 4, 2024, and our unaudited financial statements included in our Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2024, filed with the SEC on November 13, 2024. A All historical share and per share amounts reflected throughout this prospectus have been adjusted to reflect the 2024 Reverse Stock Split. However, our periodic and current reports, and all other documents included in this prospectus that were filed prior to August 13, 2024 do not give effect to the 2024 Reverse Stock Split. A Our historical results are not indicative of the results that may be expected in the future, and results of interim periods are not indicative of the results for the entire year. A Statements of Operations Data: A A A For the Years Ended A A For the Nine Months Ended A A December 31, A A September 30, A A 2023 A A 2022 A A 2024 A A A A A (As Restated) A A A A A Revenue A A A A A Operating expenses A \$5,892,382 A A \$2,343,826 A A \$5,919,042 A A \$4,609,558 A Loss from operations A (\$5,892,382) A (\$2,343,826) A (\$5,919,042) A (\$4,609,558) Other income (expense) A (\$700,341) A \$(2,652,243) A \$(1,627,286) A \$(342,665) Net loss A (\$6,592,723) A (\$4,996,069) A (\$7,546,328) A (\$4,952,223) Weighted average common shares outstanding A basic and diluted A A 1,886,275 A A 1,337,742 A A A 2,189,366 A A 1,820,066 A Net loss per share A basic and diluted A (\$3.53) A (\$5.04) A (\$3.45) A (\$2.72) A USE OF PROCEEDS A We estimate that the net proceeds from this offering, after deducting underwriting fees and estimated offering expenses payable by us, will be approximately \$[*] million (based on an assumed public offering price of \$[*] per common stock, which was the last reported sales price of our common stock on Nasdaq on February [*], 2025, and assuming that all shares of common stock are sold). We intend to use the net proceeds from this offering to fund our Phase II clinical trial for our product candidate, including a revised work order for \$2.8 million in payments to Theradex Systems, Inc., the clinical research organization (CRO) supporting our Phase II clinical trials for our radiation sensitizer Ropidoxuridine, and for working capital and general corporate purposes. A The expected use of net proceeds from this offering represents our intentions based upon our current plans and business conditions, which could change in the future as our plans and business conditions evolve. While we anticipate that the majority of the net proceeds will be used to support our Phase II clinical trial for Ropidoxuridine, and the general corporate efforts required to support them, we cannot currently allocate specific percentages of the net proceeds to us from this offering that we may use for the purposes specified above. Our management will have broad discretion in the application of the net proceeds from this offering and could use them for purposes other than those contemplated at the time of this offering. Our stockholders may not agree with the manner in which our management chooses to allocate and spend the net proceeds. Moreover, our management may use the net proceeds for corporate purposes that may not result in our being profitable or that increases our market value. A Pending our use of the net proceeds from this offering, we intend to invest the net proceeds in a variety of capital preservation investments, including short-term, investment-grade, interest-bearing instruments and U.S. government securities. A 43 A A BUSINESS A Shuttle Pharma is a clinical stage pharmaceutical company leveraging our proprietary technology to develop novel therapies designed to cure cancers. Our goal is to extend the benefits of cancer treatments with surgery, radiation therapy, chemotherapy and immunotherapy. Radiation therapy ("RT") is one of the most effective modalities for treating cancers. We are developing a pipeline of products designed to address the limitations of the current cancer therapies as well as to extend to the new applications of RT. We believe that our product candidates will enable us to deliver cancer treatments that are safer, more reliable and at a greater scale than that of the current standard of care. A The corporate structure is based on Shuttle Pharmaceuticals Holdings, Inc. (Nasdaq SHPH A Delaware Company) with drug discovery and development performed in the wholly owned Shuttle Pharmaceuticals, Inc. (a Maryland Company) and diagnostics performed in the wholly owned Shuttle Diagnostics, Inc. (a Maryland Company). Our product candidates include Ropidoxuridine, a Phase II, clinical-stage radiation sensitizer, a platform of HDAC inhibitors (SP-1-161, SP-2-225 and SP-1-303), and two preclinical, prostate cancer-oriented diagnostics assets A the PC-RAD Test, a blood test to predict clinical response to radiation therapy and the PSMA-B ligand for potential use as a theranostic agent. A In December 2023, we submitted an Investigational New Drug ("IND") application with the U.S. Food and Drug Administration ("FDA") to support the next phase of development of Ropidoxuridine. In January 2024, we received the A "Safe to Proceed" letter from the FDA for our IND application for the Phase II study of Ropidoxuridine (IPdR) as a radiation sensitizing agent during radiotherapy in patients with newly diagnosed IDH-wildtype glioblastoma with unmethylated MGMT promoter. Receipt of the letter allows us to commence the Phase II study of Ropidoxuridine (IPdR). We have applied for and received FDA approval of Orphan designation for Ropidoxuridine and RT for treating brain cancer (glioblastoma). The Phase II clinical trial was also approved by the Institutional Review Board ("IRB") on June 21, 2024. The Phase II clinical trial is now being conducted at six cancer centers in the U.S., each of which are actively enrolling patients. To date, 15 patients have enrolled in total. We believe our management team's expertise in radiation therapy, combined modality cancer treatment and immuno-oncology will help drive the development and, if approved, the commercialization of these potentially curative therapies for patients with aggressive cancers. A Radiation Oncology has gone through transformative technological innovation over the last decade to better define tumors, allow improved shaping of radiation delivery and support dose escalation with shorter, more intensive courses of treatment. Furthermore, achieving higher dose distributions within tumor volumes has reached a practical plateau, since cancers are frequently integrated with or surrounded by more sensitive normal tissues and further dose escalation increases risks of tissue necrosis. To increase cancer cures at maximally tolerated radiation doses, pharmacological and biological modifications of cells are needed to sensitize cancers, protect normal tissues, and stimulate the immune system to react against antigens produced by irradiated, damaged cancer cells. Drugs that show sensitizing properties, or the ability to make cancer cells more sensitive to radiation, offer a solution to this problem. Currently, such drugs are chemotherapy agents used off-label, and many have inherent toxicities since they were designed for direct cancer treatments and not for sensitization. However, the clinical value of using radiation sensitizing drugs in combination with RT has been accepted in a variety of cancer types, including gynecological, gastro-intestinal, pulmonary and other malignancies. Hence, there is a critical need for new drugs that preferentially sensitize cancer cells to radiation therapy and that stimulate the innate immune response against irradiated cancer cells. Furthermore, to advance precision medicine in radiation oncology, there is a need for imaging and molecular diagnostic tests for determining the extent of cancer spread in the body and for predicting clinical responses to therapy. A 44 A A We are developing our products with the goal of addressing the unmet need in cancer treatment for a commercially marketable radiation response modifier solution that leads to greater sensitivity of cancer cells to ionizing radiation therapy. The goal of our products is to increase the therapeutic index for patients receiving radiation and to decrease radiation-related toxicities in patients with solid tumors. Our products operate across three areas related to the treatment of cancer with RT: A 1. Sensitization of growing cancer cells, rendering them more susceptible to the effects of radiation therapy. A 2. Activation of the DNA damage response pathway to kill cancer cells and protect adjacent normal cells. A 3. Activation of the immune system to kill any remaining cells after RT. A Our platform technology allows for the creation of an inventory of products for radiation sensitizing, immune modulation, and protection of healthy tissue. A Operations to date have focused on continuing our research and development efforts to advance Ropidoxuridine clinical testing and improved drug formulation, to advance HDAC6 inhibitor (SP-2-225) preclinical development and explore application of the PC-RAD Test, predictive biomarkers of radiation response. The clinical development of Ropidoxuridine has included completion of a Phase I clinical trial to establish drug bioavailability and a maximum tolerated dose for use in Phase II clinical trials. TCG GreenChem, Inc. (a TCG GreenChem), with whom we have contracted for process research, development and cGMP compliant manufacture of IPdR, has manufactured the active pharmaceutical ingredient (API) of Ropidoxuridine and the University of Iowa Pharmaceuticals has formulated the drug product for use in the Company's Phase II clinical trial in brain cancer patients undergoing radiation therapy. The drug product (capsules) were shipped to contract research organization (CRO) Theradex Oncology and distributed to clinical trial sites that are fully approved to enroll patients in the trial. Shuttle Pharma received approval from the FDA to begin the clinical trial. The FDA made recommendations to expand the clinical trial to include a randomized dose optimization step and we agreed with the recommendation. Meetings with engaged clinical sites to review the protocol documents have occurred and FDA required Institutional Review Board, or IRB approvals have been received. With FDA recommended changes incorporated into the revised protocol and the completion of site initiation visits, the Company has commenced its Phase II clinical study. The radiation biomarker project and the health disparities project have been completed and the Company is proceeding with plans for clinical validation and potential for commercialization of Ropidoxuridine as a radiation sensitizer. A Our Pipeline A We are currently developing a pipeline of small molecule radiation sensitizers and immune response regulating drugs. Our most advanced product candidate is Ropidoxuridine, an orally available halogenated pyrimidine with strong cancer radiation sensitizing properties is in preclinical studies. In addition, we have a pipeline of complimentary product candidates that we are developing to address solid tumor cancer indications by radiation sensitization or immune modification. Our therapeutic pipeline is represented in the diagram below: A Timeline for clinical phase (Ropidoxuridine) and pre-clinical phase (HDAC inhibitors) pipeline. A 45 A A Our lead product candidates include: A A Ropidoxuridine (IPdR) is our lead candidate radiation sensitizer for use in combination with RT to treat brain tumors (glioblastoma) and sarcomas. Phase I clinical trial results supported by an NIH contract to Shuttle Pharma and the NCI (CTEP) were reported in the medical journal, Clinical Cancer Research, in July 2019, by our SBIR subcontractor. Eighteen patients completed dose escalations to 1,800 mg/day for 30 days, establishing the maximum tolerated dose (MTD) of 1,200 mg/day in combination with RT. Four partial responses, nine stable disease and one progressive disease in target lesions were reported. Four patients did not have measurable disease and, as a result, were not evaluable. These Phase I trial results demonstrate oral bioavailability and an MTD of 1,200 mg per day for 28 days for use in combination with radiation for Phase II clinical trials that we propose to perform in brain tumors and in sarcomas. The brain tumor, glioblastoma multiforme (GB) is eligible for orphan disease designations. Shuttle Pharma has advanced drug manufacture and formulation and prepared a clinical protocol of a Phase 2 Single-Arm Study of IPdR as a Radiation Sensitizing Agent During Radiotherapy in Patients with Newly Diagnosed IDH-Wildtype MGMT Unmethylated Glioblastoma Multiforme. In December 2023, we submitted an IND application with the FDA to support the next phase of development of Ropidoxuridine. In January 2024, we received the A "Safe to Proceed" letter from the FDA for our IND application for the Phase II study of Ropidoxuridine (IPdR) as a radiation sensitizing agent during radiotherapy in patients with newly diagnosed IDH-wildtype glioblastoma with unmethylated MGMT promoter. Receipt of the letter allows us to commence the Phase II study of Ropidoxuridine (IPdR). The clinical development of Ropidoxuridine has shown drug bioavailability and a maximum tolerated dose has been established for use in Phase II clinical trials. TCG GreenChem, Inc. (a TCG GreenChem), with whom we have contracted for process research, development and cGMP compliant manufacture of IPdR, has successfully completed the manufacturing campaign for the active pharmaceutical ingredient (API) of Ropidoxuridine for use in the Company's upcoming Phase II clinical trial in brain cancer patients undergoing radiation therapy. Shuttle Pharma also worked with University of Iowa Pharmaceuticals to develop the formulation and produce the capsules, which have been shipped to contract research organization (CRO) Theradex Oncology for distribution to clinical trial sites. Both activities have now been completed. In addition, Shuttle received approval from the FDA to begin the clinical trial. The FDA made recommendations that led to an expanded clinical trial to include randomized dose optimization and we agreed with the recommendation. We met with representatives from six candidate clinical sites to review the protocol documents and FDA required IRB approvals have been obtained. With FDA recommended changes incorporated into the revised protocol, the Company has now contractually engaged all six of the planned research centers administering the clinical trials and achieved over 38% enrollment in the initial randomized portion of its Phase II clinical trial (15 patients). Thus far, half the patients enrolled have completed all seven courses of treatment with Ropidoxuridine. A A The Phase II clinical study is summarized below: A 46 A A Schema for the Phase II clinical trial. The initial cohort of 40 patients will be randomized to one of two Ropidoxuridine doses. 20 patients will receive the 1200 mg dose and 20 patients will receive the 960 mg dose. The optimum dose will be determined by comparing drug bioavailability and side-effects. The optimum dose will then continue to enroll 14 additional patients to provide the required 34 patients for statistical significance in comparison to historical controls. A A Ropidoxuridine and Tipiracil (IPdR/TPI) is a new combination formulation demonstrating extended bioavailability after oral administration in an animal model system. The IPdR/TPI formulation will undergo preclinical development for use as a radiation sensitizer and represents a A next generation drug product for clinical evaluation. A A SP-2-225 is Shuttle Pharma's pre-clinical class IIb selective HDAC inhibitor that affects histone deacetylase HDAC6 has been identified as the candidate lead molecule for development as a post-RT innate immune system activator. The macrophage is a key target for activating the innate immune system against cancer cells. SP-2-225 has effects on the regulation of the immune system by maintaining macrophage cells in an inflammatory, anti-cancer polarization. The interactions of RT with the immune response for cancer treatment are of great current interest, offering insight into potential mechanisms for primary site and metastatic cancer treatment. For this reason, Shuttle Pharma has selected SP-2-225 as the candidate lead HDAC inhibitor for preclinical development. We have contracted with investigators at Georgetown University to perform preclinical studies of immune activation after radiation therapy in an animal tumor model. These data have been published (Noonpalle SKR, Grindrod S, Aghdam N, Li X, Gracia-Hernandez M, Zevallos-Delgado C, Jung M, Villagra A, Dritschilo A. Radiotherapy-induced Immune Response Enhanced by Selective HDAC6 Inhibition. Mol Cancer Ther. 2023 Dec 1;22(12):1376-1389. doi: 10.1158/1535-7163.MCT-23-0215. PMID: 37586844; PMCID: PMC10878032) and additional preclinical studies are in progress with our contractors. With the introduction of check-point inhibitors, CART therapies and personalized medicine in cancer, regulation of the immune response following RT is of significant clinical and commercial interest. A A A SP-1-303 is Shuttle Pharma's pre-clinical selective Class I HDAC inhibitor that preferentially affects histone deacetylases HDAC1 and HDAC3 members of the class I HDAC family of enzymes. SP-1-303 data show direct cellular toxicity in ER positive breast cancer cells. Furthermore, SP-1-303 increases PD-L1 expression. Completed preclinical in vitro studies have been published (Jung M, Nicholas N, Grindrod S, Dritschilo A. Dual-targeting class I HDAC inhibitor and ATM activator, SP-1-303, preferentially inhibits estrogen receptor positive breast cancer cell growth. PLoS One. 2024 Jul 15;19(7):e0306168. doi: 10.1371/journal.pone.0306168. PMID: 39008483; PMCID: PMC11249239). We plan to seek university collaborations to complete SP-1-303 pre-clinical development in 2024. A Our Approach A We believe that we have established a leadership position in radiation sensitizer and response modifier discovery and development. We have identified a clinical phase product candidate and discovered new pre-clinical phase molecules using our proprietary platform technologies to increase the therapeutic index for patients receiving radiation for treatment of solid tumors. Our development strategy has four key pillars: (1) to improve the efficacy of RT by demonstrating improved disease-free survival rates in patients who undergo radiation therapy, (2) reduce the amount of radiation needed for a favorable tumor response, thereby limiting the potential for radiation related toxicities to healthy cells, (3) decrease the extent of surgery needed to remove cancers and improve quality of life, and (4) leverage our next generation technologies to create drugs that regulate the immune response assisting immune checkpoint and CART therapies and other personalized medicines targeting cancers. A In addition to private and public investment into our candidate therapeutic technology, we have also competed for non-dilutive funding from the NIH to support our lead sensitizer and to explore development of complimentary diagnostic products. To date, we have completed three SBIR contracts awarded to Shuttle Pharma by the NIH to: A A Develop IPdR as a radiation sensitizer. This funding provided partial support for the Phase I clinical trial of Ropidoxuridine and RT. A A A Develop prostate cancer cell cultures from African-American men, with donor matched normal prostate cells, establishing 50 pairs for accelerating research to reduce prostate cancer health disparities in African-American men. This project was funded under A Moonshot designation. Shuttle Pharma is eligible to apply for additional SBIR (Phase IIb) funding to commercialize these cells for research purposes. Currently, cells from African-American patients are distributed, on request, to investigators who are conducting health disparities research. We plan to test new small molecules using these cellular reagents for health disparities screening. A 47 A A A Develop a predictive biomarker for determining outcomes for prostate cancer patients following treatment with RT. This SBIR-funded project for blood test (PC-RAD Test) discovery and analytical validation were completed on March 15, 2022, and Shuttle Pharma intends to perform a clinical validation study. Shuttle Pharma has licensed the intellectual property for the

prostate cancer predictive biomarker test from Georgetown University and will seek additional investment from the public market to advance clinical development through its Shuttle Diagnostics entity. A All three SBIR funded projects have been completed. The Company is eligible to apply for SBIR Phase IIb funding to advance the “Moonshot” health disparities or the predictive biomarker project. The NIH SBIR program is designed to encourage small businesses to engage in Federal Research/Research and Development (“R&D”) that has the potential for commercialization. A Shuttle Pharma’s scientists have also developed collaborations to invent intellectual properties for prostate cancer theranostics. From a clinical perspective, prostate-specific membrane antigen (PSMA) is a valuable target for diagnosis and therapy of prostate cancer. In a discovery project to develop a novel, boron-containing PSMA ligand to enhance proton radiation therapy of prostate cancer, we discovered PSMA-B, a molecule containing boron and demonstrating nanomolar binding activity to PSMA. Preclinical evaluations have been initiated to explore the PSMA-B ligand as a potential prostate cancer sensitizer in combination with proton therapy, as well as a PET diagnostic reagent and as a targeted prostate cancer therapeutic. By in-licensing our collaborator’s shares of the intellectual property, Shuttle Pharma has an exclusive license to the PSMA-B intellectual property and has filed a patent application. Theranostic molecules are suitable for diagnosis and therapy of cancers. The PSMA ligand is a molecule that binds to the PSMA, an enzyme that is highly expressed in prostate cancer cells. The PSMA ligand is currently used for imaging and therapy to detect and treat prostate cancer. On December 16, 2024, the Company, entered into a sponsored research agreement with the Regents of the University of California, on behalf of its San Francisco campus (the “UCSF”), pursuant to which UCSF’s employee, Dr. Robert Flavell, will conduct research on a project entitled “Investigation of 18F-fluorodeboronation method for PSMA targeting ligand radiolabeling and evaluation in prostate cancer models” (the “Research Program”). Under the terms of the Sponsored Research Agreement, the Company will bear the total cost of \$291,607 of the Research Program. A A— Develop PSMA-B as a potential diagnostic and therapeutic molecule in pre-clinical models in collaboration with academic nuclear medicine programs. Shuttle Pharma has licensed the intellectual property for the prostate cancer predictive biomarker test from inventors and will seek additional investment from NIH by applying for grant applications and from the public market to advance clinical pre-development through its Shuttle Diagnostics entity. A Our Strategy A Our goal is to maintain and build upon our leadership position in radiation sensitization. We plan to develop Ropidoxuridine and the HDAC6 inhibitor (SP-2-225) and, if approved by the FDA, commercialize our product candidates for the treatment of cancers. While this process may require years to complete, we believe achieving this goal could result in new radiation sensitizer and immunotherapy products. Key elements of our strategy include: A A— Capitalize on Ropidoxuridine as an orally available, small molecule radiation sensitizer. To date, there is one drug (Cetuximab, a monoclonal antibody) approved by the FDA specifically as a radiation sensitizer. If we are successful in developing Ropidoxuridine and obtaining FDA approval, a small molecule sensitizer would then be enabled for clinical applications for radiation sensitization indications. A A A— Expand our leadership position within radiation sensitizers. In addition to our traditional radiation sensitizers, we plan to advance our near-term pipeline to include radiation sensitizers for proton therapy. Proton Therapy is growing worldwide as a form of radiation therapy due to its unique beam shaping characteristics. As a result, this new technology offers a major opportunity for Shuttle Pharma to strive to develop an innovative and well-tolerated drug for proton therapy sensitization. A A A— Execute a disciplined business development strategy to strengthen our portfolio of product candidates. We have built our current product pipeline through in-house discovery, development, partnerships with leading academic institutions and through in-licensing. We will continue to evaluate new in-licensing opportunities and collaboration agreements with leading academic institutions and other biotechnology companies around programs that seek to address areas of high unmet need and for which we believe there is a high probability of clinical success, including programs beyond our target franchise areas and current technology footprint. A 48 A A A— Invest in our HDAC platform technology and maximize its utility across cancer therapies. We are initially applying the platform to develop drugs for cancer radiation sensitization, normal tissue radiation protection and post radiation immune stimulation. Based on the data we have obtained thus far, these drugs are immune regulatory. We intend to invest to develop other properties of our platform technology, as well. A A A— Enter into collaborations to realize the full potential of our platform. The breadth of our HDAC technology platform enables other therapeutic applications, including radiation sensitization and immune therapy. We intend to seek collaborations centered on our platform to maximize applications for cancer treatment. A A A— Establish Shuttle Diagnostics, Inc. as a subsidiary of SHPH to advance development of the predictive biomarker (PC-RAD Test) and the PSMA ligand (PSMA-B) to advance prostate cancer treatment. A Radiation Therapy A Radiation Oncologists use Radiation Therapy (RT) to treat cancers that cannot be completely removed by surgery but have not yet spread to distant sites within the body. RT has been a mainstay for the treatment of cancer malignancies for more than half a century. The combination treatment of radiation therapy and chemotherapy has involved the use of cytotoxic drugs, targeted biologic agents and targeted external beam radiation to increase the destruction of tumor cells and cure or delay cancer progression. The low number of drugs and biologic agents under investigation as radiation sensitizing agents highlights an unmet need for new approaches and agents that provide greater effectiveness, increased quality and better tolerability for patients. A Currently, “chemo-radiation” treatments are established in cancers of the head and neck, esophagus, lung, stomach, breast, brain, pancreas, rectum and uterine cervix. The ideal radiation sensitizer would reach the tumor in adequate concentrations and act selectively in the tumor, as compared to surrounding normal tissues. It would have predictable pharmacokinetics for timing with radiation therapy and could be administered with every radiation treatment approach. The ideal radiation sensitizer would have minimal toxicity or manageable enhancement of radiation toxicity. A The U.S. market for radiation sensitizing agents is experiencing dynamic growth through development of new radiation technology, the introduction of new agents, growth in the number of diagnosed patients in a variety of cancer sites and changes in treatment patterns. New agents have been introduced, including bevacizumab (Avastin®, Roche), panitumumab (Vectibix®, Amgen), temozolomide (Temodar®, Merck) and cetuximab (Erbix®, Eli Lilly/Imclone), with potential as radiation sensitizing agents (though all but cetuximab are used off label); and all are recommended by the NCCN® (National Comprehensive Cancer Network) in clinical practice guidelines for use in combination with established therapies such as FOLFOX (leucovorin, 5-FU, oxaliplatin), CapeOX (capecitabine, oxaliplatin) and FOLFIRI (leucovorin, 5-FU, irinotecan). A The growth in the number of patients with cancers is being driven by an aging population and improved diagnostic tools. According to the National Cancer Institute (NCI), more than half (~50 - 60%) of all cancer patients undergo some type of radiotherapy during the course of their treatment. Confirming the patient estimate from the NCI, the American Society for Therapeutic Radiology and Oncology (ASTRO) factsheet states approximately 67% of approximately 1.25 million cancer patients are treated with radiation therapy annually, either one or more times. In addition, in a study published by the Journal of Clinical Oncology in 2016, it is estimated that the number of cancer patients needing radiation therapy will increase by 22% in the next 10 years. (See “The Future of Radiation Oncology in the United States From 2010 to 2020: Will Supply Keep Pace With Demand?” Benjamin D. Smith, Bruce G. Haffty, Lynn D. Wilson, Grace L. Smith, Akshar N. Patel, and Thomas A. Buchholz Journal of Clinical Oncology 2010 28:35, 5160-5165). A The American Society of Clinical Oncology (ASCO) estimates more than 80% of cancers in the U.S. occur in people in the age group of 50 and above with over 60% of cancers occurring in those 65 and over. (See, 2018 Clinical Cancer Advances Report, American College of Clinical Oncology, 2018). For example, according to the American Cancer Society (ACS), more than 90% of colorectal cancer patients are individuals aged 50 years and older, with approximately 40% of all cases occurring in patients aged 75 years and over. The Colon Cancer Alliance estimates that 90% of new cases and 95% of deaths from colorectal cancers occur in people aged 50 or older. Also, the U.S. Census estimates that the age group of 65-84 will grow by 23% within the next five years, indicating a likely increase in the overall number of cancer patients in the U.S. A 49 A A The table below details the number of cancers estimated in the United States in 2024: A Estimated New Cancer Cases in the U.S. A Male A Female Prostate A 299,010 A 27% Breast A 310,720 A 31% Lung & bronchus A 116,310 A 12% Lung & bronchus A 118,270 A 13% Colon & rectum A 81,540 A 8% Colon & rectum A 71,270 A 8% Urinary bladder A 118,330 A 6% Uterine corpus A 67,880 A 7% Melanoma of the skin A 59,170 A 6% Melanoma of the skin A 41,470 A 5% Kidney & renal pelvis A 52,380 A 5% Thyroid A 31,520 A 3% Non-Hodgkin lymphoma A 44,590 A 4% Non-Hodgkin lymphoma A 36,030 A 4% Oral cavity & pharynx A 41,510 A 4% Kidney & renal pelvis A 29,230 A 3% Leukemia A 36,450 A 4% Pancreas A 31,910 A 3% Pancreas A 34,530 A 3% Leukemia A 26,320 A 3% All sites A 983,160 A A A A All sites A 934,870 A A A ACS Facts & Figures, 2024 A The U.S. estimated incidence, deaths and five-year survival rate of cancer patients responsive to radiation therapy is significant (ACS Facts & Figures, 2024). The top cancers responsive to radiation are shown, based on the number of newly diagnosed patients. The incidence rates for some cancers are increasing by approximately 1-2% per year in the U.S. The number of newly diagnosed patients is significant and growing due to the aging of the population and improved diagnostic techniques. A The cancers listed above illustrate the opportunity presented for radiation sensitizers. Of note is the low five-year survival of pancreas, brain, lung and esophagus cancers—all are candidates for Shuttle Pharma’s pipeline of radiation sensitizing compounds. Cancers with low survival rates are of interest since they show a high unmet need for new therapeutics and an opportunity for Shuttle Pharma to gain significant uptake of their pipeline compounds. A Factors that present challenges and may restrict growth in the radiation sensitizer market include the safety and tolerability of many of the newer agents with radiation sensitizing properties; a regulatory environment that engenders greater levels of scrutiny of clinical practice issues; the high cost of newer agents; and the changing (and more restrictive) reimbursement environment in radiation oncology through CMS (Center for Medicare and Medicaid Services) and private payors. These factors may negatively impact the potential for growth in the U.S. market. A Many of the drugs used “off-label” as radiation sensitizers currently require close scrutiny of their potential for side effects that can affect the safety and tolerability of their use with patients. All of the current agents carry significant potential for side effects that can affect patients’ therapies and quality of life. Radiation sensitizing agents can cause both acute and chronic side effects in patients. Side effects can vary from person to person depending on age, sex, type of cancer, dose given per day, total dose given, and the patient’s general medical condition. Some common side effects of currently used radiation sensitizers include leukopenia, skin damage, hair loss, fatigue, bladder problems, nausea, fibrosis, memory loss, infertility, and enhanced risk of developing a second cancer, which may arise as a result of the patient’s weakened immune system due to cytotoxic drugs used in treatment or when newer biologic agents cause the over-production of specific cytokines or proteins, which can lead to developing secondary cancers. A Over the past five years, the FDA has taken an increasingly conservative approach to the approval of new agents for oncology treatment. There is greater scrutiny of results from clinical trials regarding progression free survival, overall survival, and safety and tolerability of new agents. Restrictions such as black box warnings and REMS (Risk Evaluation and Migration Strategies) are being applied to more new products over the past five years compared to the previous five years. These restrictions require physicians to be more careful in evaluating the use of newer agents and newer diagnostic tools to select the most appropriate patients for newer approved agents. A Many of the new agents are molecularly targeted therapies that are biologic in their development and manufacturing. The cost of the newer agents can be significant. For example, the cost for Avastin for one treatment course as a radiation sensitizer is estimated at \$9,000-12,000 according to one Key Opinion Leader in the U.S. (Carl Schmidt, Consultant, Shuttle Pharmaceuticals Holdings, Inc., Business Plan 2018). Recently, a CAR-T gene therapy from Novartis was launched with a yearly cost of \$475,000. Further, as many private payors scrutinize the cost and appropriate use of newer drugs, they require physicians to provide justification through prior authorization requests, use of step therapy and guidelines that delay treatment, increase administrative costs and limit the therapeutic choices for physicians and hospitals. A 50 A A Public payors for radiation oncology therapies such as CMS have instituted reimbursement reductions that potentially affect the overall cost of therapy and can limit the acceptance of newer agents. With CMS announced reductions in reimbursement for radiation oncology, there is increased pressure to find a more potent radiation sensitizer agent with reduced side effects, and greater cost-effectiveness. A Escalating healthcare spending is adding pressure on government and commercial payors to contain drug costs. While the oncology space is arguably not as tightly managed by payors as other therapeutic areas, utilization management of costly cancer therapeutics has become an increasing priority for U.S. payors, especially with the advent of biologics. Payors (and market access agencies in the EU) will most often restrict high-cost drugs, drugs with limited or no survival benefits, and drugs deemed to be at high risk for widespread off-label use. A Beyond efforts at cost containment by insurers (which often require patients to first be prescribed lower cost drugs to determine effectiveness prior to allowing for reimbursements for more expensive (or less cost effective) drugs), payors are also looking toward implementing clinical pathways as a way to maintain or improve health outcomes while lowering costs. Clinical pathways are designed to address the limitations of prior authorization and of reduced fee schedules, offering more durable cost containment to payors. These pathways may lead to cost savings by encouraging the use of generics, streamlining treatment choices, and reducing side effects while maintaining outcomes. A Engineered Radiation Sensitizers A The market for radiation sensitizers in selected cancer types is defined by the need to improve local-regional tumor control. Treatment regimens have been developed to address patient needs for tumor control and quality of life. Since the initial applications of Ropidoxuridine and selective HDAC inhibitors are as adjuncts to the standard of care for the treatment of radiation responsive cancers, the unmet needs of the market lie in the potential for the following: A A— Improvement in efficacy of radiation treatments as determined by overall survival, progression free survival and response rates in comparison to currently used “off-label” sensitizer drugs. A A A— Reduction in radiation doses needed to affect a positive clinical response for the patient. A A A— Reduction in the surgical extent that is needed to remove residual cancer. A A A— Improvement in quality-of-life outcomes. A Various sources have estimated that more than 800,000 patients in the U.S. are treated with radiation therapy for their cancers. According to the American Cancer Society, about 50% are treated for curative purposes and the balance for palliative care. The market opportunity for radiation sensitizers lies with the 400,000 patients treated for curative purposes. The number of patients being treated with RT is expected to grow by more than 22% over the next five years. Based on a rough estimate of a course of radiation sensitizing brand drug therapy (off label at this time) of \$12,000 per patient—the market size would exceed \$4.0 billion. This would represent about 4% of the annual cost of cancer care in the U.S. A In the past two decades, developments in the field of oncology have resulted in an increase in the number of clinical trials of marketed products that exhibit radiation sensitizing properties. The following are a few examples of recently approved products that exhibit radiation sensitizing properties: topotecan (Hycamtin®) was approved for ovarian and small-cell lung cancer and also in cervical cancer when used in combination with cisplatin. Irinotecan (Camptosar®) is used for metastatic colorectal carcinoma, trastuzumab (Herceptin®) for breast cancer, and gefitinib (Iressa®) for locally advanced non-small-cell lung cancer. However, the claims on radiation sensitization are anecdotal in the scientific literature. A In addition, clinical trials are in progress to develop novel molecules (such as poly (ADP-ribose) polymerase (PARP) inhibitors (such as Lynparza (olaparib)), histone deacetylase (HDAC) inhibitors (such as Zolinza® (vorinostat) and heat-shock protein 90 (hsp90) inhibitors with potential to increase the therapeutic use of compounds with radiation sensitizing properties for other cancers. Several drugs with radiation sensitizing properties are currently in Phase III clinical trials, such as nimorazole (for head and neck cancer), motexafin gadolinium (for brain metastases), and cisplatin (for cervical cancer); though none are likely to apply for a radiosensitizing claim with the FDA since the radiosensitizing element in their clinical trials are not primary endpoints. While additional drugs with radiation sensitizing properties are expected to be launched in the future, thereby driving the radiation sensitizers market further, to date, there is no indication that any drug in development is expected to be approved specifically as a radiation sensitizer. A 51 A A The competitive environment for “off-label” radiation sensitizers for solid tumor cancers is anticipated to become predominantly generic. Avastin, Erbitux, Camptosar and Xeloda have or will lose patent protection in the next three years. Newer products under investigation or approved, such as Vectibix® (panitumumab) from Amgen will be promoted as having radiation sensitizing properties, along with indications for treatment for specific cancers. The high cost of these new therapies coupled with limited efficacy compared to current standard of care will be constrained by both public and private payors. Other new agents are in development but will face similar challenges. A We anticipate that new products launching into the cancer market with anecdotal claims for use as radiation sensitizers with improved effectiveness, quality and tolerability will initially be limited in their growth until they have been added to established clinical pathways and guidelines. If their effectiveness, quality and tolerability are demonstrated clinically, as determined by the FDA, it is anticipated the National Comprehensive Cancer Network (NCCN), the leading authority in oncology drug evaluation for treatment guidelines, would issue a recommendation and addition to standard of care within approximately six to twelve months after launch. An NCCN recommendation would positively impact the growth potential for a new product entering the market. Also, payors, both public and private, would add the new product to their approved drug lists and provide reimbursement giving providers incentive to use the product as neoadjuvant and adjuvant therapy to standard of care. A As with many cancer therapies, side effects can often have a distinct impact on quality of life and influence the potential for market growth. Patients increasingly have a stronger voice in the decision-making process for the appropriate therapies and costs to treat their cancers. As payors are increasingly placing more of the financial burden of the cost of therapy directly on patients, patients are voicing their opinions to their physicians and payors which have a direct effect on which products are selected. Many of the current therapies have significant side effects: A Private insurers are expected to have more restrictive formularies and medical benefits in which patients will be expected to carry more of the burden of the cost of drugs. Also, it is anticipated that increased application of third party developed treatment guidelines, such

as those from the NCCN (National Comprehensive Cancer Network), are expected to be used by private payors to limit the access to products for specific conditions through prior authorizations and implementation of step therapy or increased out of pocket cost approaches. As many of the current drugs used as radiation sensitizers are expensive and not approved for use as radiation sensitizers (thus, such treatment is off-label), and as many of the products in clinical trials are expected to be at the current or higher price levels, new products that may be specifically approved for an indication as the only approved product as a radiation sensitizer will have increased consideration for reimbursement. A CMS is increasingly moving many patients to private insurance through Medicare Advantage and ACOs. Medicare Advantage plans are capitation HMO and PPO plans offered through private insurers to Medicare patients. ACOs are being developed to increase quality of care for their patients. Most of the new ACOs are initially positioned for Medicare patients with over 400 approved by CMS. Several studies from the Center for Health Strategies, 2017, Journal of American Medical Association, 2018 and the Brookings Institute, 2015 estimated that almost 1000 ACOs for Medicare and non-Medicare patient populations would be approved by CMS or developed by a variety of healthcare entities to begin operating under the ACA in 2017. We expect the growth in ACOs to continue, regardless of any changes that may be made to the ACA going forward. In early 2017, Health Affairs, a magazine tracking ACOs, estimated that over 22 million patients are enrolled in Medicare and private ACOs. To address the quality of care measures designated by CMS and to gain additional incentives, use of clinical pathways or treatment guidelines is anticipated to be increasingly instituted to manage patient care. The impact on the uptake of new products in this environment can be profound if the new product is first in class and is included in national guidelines from organizations such as the NCCN and/or approval by the regional CMS contracting groups. A ROPIDOXURIDINE A The halogenated thymidine (TdR) analogs, bromodeoxyuridine (BdUR) and iododeoxyuridine (IdUR), are a class of pyrimidine analogs that have been recognized as potent radiosensitizing agents since the early 1960s. (See Kinsella TJ. An Approach to the Radiosensitization of Human Tumors. Cancer J Sci Am. Jul-Aug 1996;2(4): 184-193). Their cellular uptake and metabolism are dependent on the TdR salvage pathway where they are initially phosphorylated to the monophosphate derivative by the rate-limiting enzyme, thymidine kinase (TK). (See Shewach DS, Lawrence TS. Antimetabolite radiosensitizers. J Clin Oncol, Sep 10 2007; 25(26):4043-4050). After sequential phosphorylation to triphosphates, they are then used in DNA replication, in competition with deoxythymidine triphosphate (dTTP), by DNA polymerase. DNA incorporation is a prerequisite for radiosensitization of human tumors by the halogenated TdR analogs, and the extent of radiosensitization correlates directly with the percentage TdR replacement in DNA. (See Lawrence TS, Davis MA, Maybaum J, Stetson PL, Ensinger WD. The Dependence of Halogenated Pyrimidine Incorporation and Radiosensitization on the Duration of Drug Exposure. International Journal of Radiation Oncology, Biology, Physics. Jun 1990; 18(6):1393-1398). The molecular mechanisms of radiosensitization are most likely the result of increased susceptibility of TdR analog-substituted DNA to the generation of highly reactive uracil free radicals by ionizing radiation (IR), which may also damage unsubstituted complementary-strand DNA. Repair of IR damage may also be reduced by pre-IR exposure to these analogs. A 52 A A The rationale for using Ropidoxuridine as a radiation sensitizer is based on prior clinical studies with the active metabolite IdUR, identified in NIH laboratories as a potent radiation sensitizer. Ropidoxuridine is an orally available prodrug of IdUR. In the body, Ropidoxuridine is metabolized in the liver into IdUR. IdUR is incorporated into the DNA of actively growing cells and when cells are exposed to ionizing radiation, DNA strand breaks are generated, resulting in more cell death and radiation sensitization. (See Gurken E, Schupp JE, Aziz MA, Kinsella TJ, Loparo KA. Probabilistic modeling of DNA mismatch repair effects on cell cycle dynamics and iododeoxyuridine-DNA incorporation. Cancer Res. Nov 15 2007; 67(22):10993-11000). A Most of the clinical efficacy data were obtained from NIH supported studies performed with IdUR, the active metabolite of Ropidoxuridine. However, IdUR requires constant infusion over six weeks of therapy which creates a significant compliance issue for patients. Ropidoxuridine can be given as a capsule for oral administration, resulting in greater ease of medication delivery and potentially improved compliance and fewer complications. A Over the last 20 years, there has been renewed interest in these halogenated TdR analogs as experimental radiation sensitizers in selected cancer patient groups. These analogs are rapidly metabolized in both rodents and humans, principally with cleavage of deoxyribose and subsequent dehalogenation by hepatic and extrahepatic metabolism, when given as a bolus infusion with a plasma half-life of <5 min. Consequently, prolonged continuous or repeated intermittent drug infusions over several weeks before and during irradiation are necessary, based on in vivo human tumor kinetics, to maximize the proportion of tumor cells that incorporate these analogs into DNA during the S phase of the cell cycle. (See Fowler JF, Kinsella TJ. The Limiting Radiosensitization of Tumors by S-phase Sensitizers. Br J Cancer. 1996;74 (Suppl)(27):294-296). Phase I and Phase II trials using prolonged continuous or repeated intermittent intravenous infusions of BdUR or IdUR before and during radiation therapy (RT) have focused principally on patients with high-grade brain tumors. These clinically radiation resistant tumors can have a rapid proliferation rate (potential tumor doubling times of 5d15 days) and are surrounded by non-proliferating normal brain tissues that show little to no DNA incorporation of the TdR analogs. As such, high-grade brain tumors are ideal targets for this approach to radiation sensitization. In Phase I/Phase II clinical trials, prolonged survival outcomes were observed compared to RT alone in patients with anaplastic astrocytomas and in patients with glioblastoma multiforme IdUR continuous IV infusion (1000 mg/m2/ day/ 14 days), Total 39 patients (F. Sullivan, et al. Int J Radiat Oncol Biol Phys. 1994; 30(3):583-90.) A therapeutic gain in clinical radiation sensitization using these halogenated TdR analogs was proposed for other types of poorly responsive (radiation resistant) cancers, including locally advanced cervical cancer, head and neck cancers, unresectable hepatic metastases from colorectal cancers, and locally advanced sarcomas, based on the results of other Phase I/Phase II clinical trials. A Target Indication: Glioblastoma, Sarcomas and Rectal Cancers A After completion of the Phase I clinical trial of Ropidoxuridine and RT in advanced GI cancers, we proposed to perform Phase II efficacy clinical trials in brain tumors (glioblastoma), soft tissue sarcomas, and rectal cancers. Glioblastoma multiforme is a deadly malignancy of the brain with no known cure. Radiation therapy provides delay of disease progression and is standard of care following surgical resection or biopsy. Radiation therapy is combined with Temodar, a drug that has shown activity (~ four months survival benefit) in treating brain tumors. Preliminary data using radiation therapy in combination with IdUR resulted in a delay of disease progression of up to six months. We propose to test IpDR in combination with radiation therapy in the Phase II clinical trial. Similarly, delay in disease progression has been observed following treatment of sarcomas by the combination of IdUR and RT. Based on the Phase I data of our clinical trial we know that therapeutic levels of IdUR are reached by administering the orally available prodrug, IpDR. A Clinical Data A The Phase I results of the clinical trial supported by an SBIR contract to Shuttle Pharma and a sub-contract to the Brown University Oncology Group (BrUOG) at the LifeSpan/Rhode Island Hospital were reported by the subcontractor at the 30th EORTC-NCI-ASCR Symposium in November 2018 and in the medical journal, Clinical Cancer Research, in 2019. Eighteen patients completed dose escalation to 1800 mg/day for 30 days, establishing the maximum tolerated dose (MTD) of 1,200 mg/day in combination with RT. Therapeutic blood levels of IdUR were achieved. Four patients were scored as partial responses, nine patients had stable disease and one patient progressed in the target lesions. These data support advancing IpDR and RT to clinical trials for the FDA to determine efficacy. A 53 A A Development Plan A A key to driving the Ropidoxuridine product forward is the development of a clinical plan with aggressive timelines and support within the radiation oncology community to participate in clinical trials with the appropriate patients to ensure a comprehensive NDA dossier for each product. Initially, the plan is focused on the Phase I and Phase II clinical trials. Upon completion of Phase II studies, we will determine whether to extend the Phase II study to a randomized Phase II, or to perform a randomized Phase III clinical trial. Such determination will be based on results of the initial clinical trials and the end of a Phase II meeting with the FDA. Shuttle Pharmaceuticals requested and received FDA orphan drug status for Ropidoxuridine as a clinical radiation sensitizer for treatment of glioblastoma and pre-operative treatment of soft tissue sarcomas. As a result, the application for orphan designation for Ropidoxuridine with RT for glioblastoma has been approved. The application for sarcomas, however, was not approved and will require addressing certain FDA comments and resubmission. The IpDR/TPI formulation clinical plan will focus on resectable stage II and III rectal cancer patients. A Our clinical plan for Ropidoxuridine development as implemented to date, includes: A A GMP manufacture and formulation of 24 kg of Ropidoxuridine for use in clinical trials has been completed. A A A The IND for a Phase II clinical trial of Ropidoxuridine and RT in glioblastoma has been approved for the study to proceed. A A A The contract research organizations (CRO), Theradex Oncology has been engaged to assist in the performance the Phase II clinical trial. A A A Completion of the Phase II clinical trial in glioblastomas to determine appropriate dosing, effectiveness and tolerability of the treatment. A The data obtained from the NIH/NCI SBIR funded Phase I clinical trial supported efforts to raise capital to enable performing the Phase II clinical trials of Ropidoxuridine. We aim to conduct and complete the Phase II clinical trial so that we may present data to the FDA for its determination of efficacy. We believe this will support our efforts to raise the additional required capital to complete Phase II and to fund the Phase III clinical trials and seek FDA approval of an NDA with orphan designation. A The clinical plan for the IpDR/TPI formulation will focus on resectable Stage II and Stage III rectal cancer patients and on recurrent glioblastoma treated with proton therapy. Nonetheless, we cannot guarantee the successful completion of any of these trials. Our inability to meet any of the aforementioned milestones in the Phase II or Phase III clinical trials will cause us to be unable to proceed with our present efforts and will likely cause us to be unable to raise additional funds. A Our HDAC Small Molecule Delivery Platform A General A Since the founding of Shuttle Pharma, our discovery research and development efforts have been focused on our small molecule technology delivery platform which uses HDAC inhibitors, designed to target cancer cells, while protecting healthy tissue. A HDACs are a class of enzymes that regulate gene expression through chemical modification of histones and non-histone proteins. Increased HDAC activity leads to a more condensed chromatin (which is a protein complex consisting of DNA and other proteins), decreased gene expression and loss of key gene products, including tumor suppressor gene function. Inhibition of HDAC activity leads to a more open chromatin and increased expression of the key gene products. This chromatin modification underlies the epigenetic cellular regulatory system and is an area of intense investigation. A Our research and development efforts to date have focused on the discovery of novel, dual functional molecules for potential use in cancer treatment as radiation sensitizers of cancers, protectors of normal tissues, and activators of the immune responses to cancers expressed by irradiated cancer cells. To date, we have produced three candidate molecules: A A Characterized by neurologist, immunological and radiobiological clinical features. A 54 A A A SP-2-225, a candidate lead of compounds demonstrating Class II (HDAC6) selective inhibition. HDAC6 is a molecule integral to the presentation of antigens by macrophages to T-lymphocytes. A A A SP-1-303 is a candidate Class I HDAC inhibitor with preferential efficacy against ER positive cancers. A SP-1-161 - A Dual Functional Agent A SP-1-161 is an HDAC inhibitor of the hydroxamate chemical class of compounds and an ATM activator of the indole chemical class. HDACs modify histones and non-histone proteins, which are key components of the chromatin structure, gene expression regulation, and cell growth. HDAC inhibitors inhibit cell proliferation, angiogenesis and immunity. Eighteen human HDACs have been identified, subdivided into four classes based on sequence and functional homology. In cancer cells, HDAC activity silences tumor suppressor genes important for cell growth regulation and to chromosomal instability. Abnormal HDAC activity is also associated with tumor cell growth, invasion, metastasis and resistance to therapy. Therefore, inhibitors of HDACs have emerged as anti-cancer agents for cancer therapy. Vorinostat and romidepsin have been approved by the FDA for treatment of patients with relapsed or refractory T-cell lymphomas. In addition, panobinostat received FDA approval for treatment of recurrent multiple myeloma in combination with bortezomib and dexamethasone. A In preclinical studies, SP-1-161 inhibited the activity of pan-HDACs and activated the ATM gene product. ATM is a critical protein for the activation of the cell stress response for cellular recovery from radiation exposure in normal cells, but not in cancer cells. ATM activates the P53 protein, referred to as the guardian of the genome, and serves as a tumor suppressor critical for normal cell function and activation of programmed cell death in cancer cells. A In preclinical studies, SP-1-161 protected normal breast epithelial cells (184A1) following exposure to ionizing radiation while increasing sensitivity of breast cancer cells (MCF7). SP-1-161 provides this dual function in a single molecule and this molecule is differentiated from other HDAC inhibitors by treatment of cancers while protecting normal cells. (See Grindrod S, Brown M, Jung M. Development of dual Function Small Molecules as Therapeutic Agents for Cancer Research, Poster presentation #A178, American Association of Cancer Research Oct 2017). A SP-2-225 A SP-2-225 is a selective HDAC inhibitor that affects histone deacetylase (HDAC6) and is a member of the class IIb HDAC family. Class II HDACs play important roles in cancer motility, invasion, neurological diseases, and immune checkpoint. HDAC6 inhibition has been most extensively studied for its role in the treatment of hematological cancers. HDAC6 is unique among HDAC enzymes in having two active catalytic domains and a unique physiological function. In addition to the modification of histones, HDAC6 targets specific substrates including 1-tubulin and HSP90, and are involved in protein trafficking and degradation, cell shape and migration. Selective HDAC6 inhibitors are an emerging class of pharmaceuticals due to the involvement of HDAC6 in pathways related to neurodegenerative diseases, cancer and immunology. Specifically, its potential to affect regulation of the immune system and enhance the immune response in cancer is of great interest. With the introduction of check-point inhibitors, CAR-T therapies and personalized medicine in cancer, regulation of the immune response to this therapy is of significant clinical and commercial interest. (See Noonepalle SKR, Grindrod S, Aghdam N, Li X, Gracia-Hernandez M, Zevallos-Delgado C, Jung M, Villagra A, Dritschilo A. Radiotherapy-induced Immune Response Enhanced by Selective HDAC6 Inhibition. Mol Cancer Ther. 2023 Dec 1;22(12):1376-1389. doi: 10.1158/1535-7163.) A Selective inhibition of HDAC6 reduces dose limiting side effects associated with non-selective HDAC inhibitors. Selective HDAC6 inhibitors may be combined with other cytotoxic agents. Shuttle's discovery of selective HDAC inhibitors has yielded several HDAC6 selective candidate molecules including SP-2-225. HDAC6 inhibitors are under investigation for roles in the treatment of diseases such as multiple myeloma. A 55 A A SP-1-303 - Target Indication: Breast Cancer A Histone deacetylase inhibitors sensitize cancers to the effects of radiation, protect normal tissues from radiation injury and activate the immune system. SP-1-303 is a selective Class I HDAC inhibitor that inhibits HDAC1, 3 and 6 and has direct cellular toxicity in ER positive breast cancer cells. Furthermore, SP-1-303 increases the PD-L1 expression level in a time-dependent manner, support combination of SP-1-303 with an immune checkpoint blocker to enhance the therapeutic benefits. We are currently conducting preclinical efficacy studies of these molecules. A Development Plan A The HDAC inhibitor platform of candidate molecules will require pre-clinical evaluation, completion of IND-enabling studies and the lead drug candidates will be tested in Phase I clinical trials for pharmacokinetics and MTD determination. We have three lead candidates for potential development for the treatment of solid tumors, including breast cancer, lung cancer and multiple myeloma. A The results of Phase I and Phase II clinical trials will determine further drug development and Shuttle will seek to establish collaborative partnerships with other pharmaceutical companies to complete pre-clinical and clinical development, drug manufacturing and marketing of our product candidates. In the event we are unsuccessful in completing our clinical trials at any stage, or in the event we obtain negative results, we will likely be unable to raise additional funding related to our HDAC studies or will have to change direction of our research efforts regarding the HDAC inhibitor platform of candidate molecules. A Our Manufacturing Strategy A We have no manufacturing facilities that are owned or operated by us. We have performed laboratory scale synthesis and testing in our research laboratories in Gaithersburg, Maryland. GMP synthesis of API, drug formulation and human dosage preparation will be performed under contracts with third-party manufacturers. A Strategic Agreements A We have developed important strategic agreements with academic institutions for access to resources such as intellectual property, core facilities and contracting relationships. In addition, we have established an agreement with Propagenix for intellectual property in-licensing. Our current and ongoing relationships include: A A Georgetown University A A Sub-contractor for the SBIR supported African American prostate cancer patient health disparities project (completed). The conditional reprogramming of cells (CRC) technology was invented at Georgetown University and Georgetown University owns the intellectual property. Propagenix holds the license for the intellectual property for the CRC technology from Georgetown University. The intellectual property for cells derived from African American patients under the Georgetown University subcontract belong to Shuttle Pharmaceuticals, Inc. based on our sub-licensing agreement with Propagenix. A A Sub-contractor for the SBIR supported metabolomic predictive biomarker project (completed). The metabolomic biomarker intellectual property belongs to Georgetown University and Shuttle Pharma holds an exclusive option to license the intellectual property. A A Exclusive licensing agreement with Georgetown University pursuant to which Georgetown University agreed to license the intellectual property known as Predictive Biomarkers for Adverse Effects of Radiation Therapy (U.S. Patent Application No. 17/476,184, filed on September 15, 2021) (the Patent Rights), which was developed by Dr. Anatoly Dritschilo, the Company's Chief Executive Officer, Dr. Scott Grindrod, the Company's Principal Scientist, and Drs. Amrita Chema and Yaoxiang Li, employees of Georgetown. The Patent Rights will be available for the Company's use worldwide. A A Shuttle Pharma entered into a research agreement (the Research Agreement) with Georgetown University for testing small molecule radiation sensitizers and immune activation candidates discovered and developed by Shuttle Pharma in cell-based and animal xenograft models. A A In conjunction with the Research Agreement, Shuttle Pharma also entered into a material transfer agreement (the MTA), dated March 21, 2023, with Georgetown University. Under the MTA, Shuttle Pharma agreed to transfer research quantities of candidate drug molecules to Georgetown University, which materials will be used by Georgetown University solely to carry out additional research for Shuttle Pharma and which materials shall at all times remain the property of Shuttle Pharma. A A Brown University A A Sub-contractor of the SBIR supported Phase I clinical trial of IpDR and RT (completed). A A University of

Virginia. Research collaboration to develop heavy oxygen molecules for proton radiation sensitizer applications. George Washington University. Material transfer agreement for testing HDAC inhibitor effects in immune model systems. The material transfer agreement that protects our HDAC inhibitor intellectual property is with George Washington University, transferring drugs for research purposes and sharing authorship on publications. There is no transfer of funds related to such activities. Propagenix, Inc. License agreement for conditional re-programmed cell (CRC) technology. The cells established by Shuttle Pharma scientists at Georgetown University belong to us, based on the sublicense from Propagenix, Inc. An up-front licensing fee of \$25,000 was paid to Propagenix. No other future milestone or royalty payments owed related to the Propagenix agreement. Competition Off-Label Use. A. Drugs with radiation sensitizing properties. B. Our Product Candidates. A. We are advancing a clinical stage product candidate, Ropidoxuridine, that we believe will target cancer cells while protecting healthy tissue when used in conjunction with RT. 56 A. Ropidoxuridine. Ropidoxuridine, an orally available halogenated pyrimidine with strong cancer radiation sensitizing properties, is our lead clinical phase product candidate. Halogenated pyrimidines are incorporated into DNA by rapidly growing cancer cells and become more sensitive to the effects of RT. We have received an SBIR contract from the NIH to fund a Phase I clinical trial in collaboration with Brown University at the Lifespan/Rhode Island Hospital to determine the maximum tolerated dose in patients with advanced gastrointestinal cancers. In connection with the trial, NCI approved the Phase I clinical protocol and provided drug and clinical data management support to Rhode Island Hospital. The Phase I clinical trial has been completed and the results support advancing Ropidoxuridine to Phase II clinical trials of brain tumors, sarcomas and other tumors. The following tables provide data from reported clinical trials of lododexuridine and RT therapy in brain cancers (glioblastoma multiforme) and high-grade sarcomas. Our primary strategy for Ropidoxuridine and RT therapy is to provide oral drug delivery to effect radiation sensitization of cancers and validate effectiveness in glioblastoma and sarcoma, potential Orphan indications. Brain Cancer Treatment Efficacy compared to historical RT-alone controls for treatment of high-grade primary brain tumors (RTOG*, NCI* trials). IuDr continuous IV infusion (1000 mg/m2/ day/ 14 days), Total of 39 patients (F. Sullivan, et al. Int J Radiat Oncol Biol Phys. 1994; 30(3):583-90). IuDr continuous IV infusion (2000 mg/m2/ 4 day infusion/ 6 week treatment), Total of 21 patients (R. Urtasun, et al. Int J Radiat Oncol Biol Phys. 1996;36(5):1163-7.) A. Sarcoma Treatment Efficacy compared to historical RT-alone controls for treatment of high-grade sarcomas (University of Michigan* trials). A. 16 patients were treated with continuous infusion (1000-1600 mg/m2/day) plus RT (J.M. Robertson, et al. Int J Radiat Oncol Biol Phys. 1995; 31(1):87-92). A. In addition to our primary product candidate, we are developing and planning to develop other cancer radiation sensitizers and radiation protectors, which target protecting normal tissue during the administration of RT, and other products utilizing our HDAC small molecule technology platform. SBIR Contracts. The SBIR Program. The Small Business Innovation Research program, as developed by Congress under the Small Business Innovation Development Act of 1982, is designed to encourage domestic small businesses to engage in Federal Research/Research and Development (R&D) that has the potential for commercialization. Through a competitive awards-based program, SBIR enables small businesses to explore their technological potential and provides the incentive to profit from its commercialization. Some of the SBIR's program goals include stimulating technological innovation, meeting Federal research and development needs and encouraging participation in innovation and entrepreneurship. A. The SBIR program is a three-phase program. Phase 1 is to establish the technical merit and commercial potential of the proposed R&D efforts. Phase 2 is to continue the R&D efforts initiated in Phase 1 and funding is based on the results achieved in Phase 1. Phase 3 allows for the small business to pursue commercialization objectives resulting from the Phase 1 and 2 R&D activities. In addition, companies that have successfully completed Phases I and II are also eligible to apply for Phase IIb funding. A. In addition to the SBIR contract to fund our Phase I clinical study on Ropidoxuridine in combination with RT for treatment of advanced gastrointestinal cancers, we have also received awards of SBIR contracts from the NIH to address prostate cancer health disparities and prostate cancer radiation biomarker development. A. As of the date of this registration statement, all SBIR contracts received by the Company have been completed. The Company submitted a final report for SBIR contract # 75N81018C00031 on March 28, 2022. The following summary of terms for the three Phase II SBIR contracts is provided below. A. Summary of SBIR Contracts. A. SBIR contract #261201400013C: Phase I (\$191,971) and Phase II (\$1,428,117) for Clinical Development of IPdR for Radiosensitization, dates September 19, 2014 through August 3, 2017. Subcontract to Brown University/Lifespan Rhode Island Hospital. No related intellectual property. A. SBIR contracts # HHNS261201600038C; Phase I (\$224,687) and #261201800016C: Cell-Based Models for Prostate Cancer Health Disparities Research - Moonshot Project (Phase II), award amount \$1,484,350, dates September 19, 2016 through September 16, 2021. Subcontract to Georgetown University. Intellectual property consists of cell cultures and is property of Shuttle Pharmaceuticals, Inc. via licensing agreement. A. SBIR contracts #HHNS261201600027C (\$299,502) and #75N81018C00031: Predictive Biomarkers of Prostate Cancer Patient Sensitivity for Radiation Late Effects, award amount \$1,903,095, dates September 16, 2019 through March 15, 2022. Subcontract to Georgetown University. Intellectual property is owned by subcontractor Georgetown University with option to license to Shuttle Pharmaceuticals, Inc. A. Prostate Cancer Studies to Address Health Disparities. A. Prostate cancer health disparities studies have shown that African American men are at higher risk for developing prostate cancer, as well as at higher risk of cancer specific death rates as compared to Caucasian American men. The causes of disparities have been attributed to socioeconomic differences, environmental exposures and biological factors. Most disparities studies have been population based, in part, due to the lack of relevant in vitro and in vivo models to support biological studies. A. 57 A. Shuttle Pharma has been awarded Phase I and II SBIR contracts entitled Cell-based models for prostate cancer health disparity research to develop African American prostate cancer cell lines with donor matched normal prostate epithelial cell lines from African American men. A. The commercialization of the prostate cells will require additional support through the SBIR funding mechanism. Companies that have completed Phase I and II SBIR awards are eligible to apply for Phase IIb SBIR funding. These awards were historically intended to de-risk a project by providing matching funding for product development to commercialization. We may apply for such government funding to advance laboratory facilities and to expand the availability of the cell cultures. We did not raise capital through our IPO for the health disparities project. Should we not be successful with SBIR IIb funding, we will pause and may have to terminate this project. A. Prostate Cancer Biomarker Development. A. Patients treated for prostate cancer may experience treatment related late effects that adversely affect quality of life and may prove life-threatening. Shuttle Pharma has been awarded a Phase I SBIR contract entitled Predictive biomarkers for prostate cancer patient sensitivity for radiation late effects to determine the technical and commercial feasibility of a biomarker panel predictive of radiation mediated late effects in patients treated for prostate cancer. A. Through collaboration with Georgetown University, patients treated with SBRT for prostate cancers were analyzed for urinary and rectal symptoms and their blood was analyzed by mass spectroscopy for predictive biomarkers. The discovery and validation of metabolite panels to serve as a predictive biomarker of patient outcomes following radiation therapy and supports future development and commercialization of a diagnostic product through a Phase 2 SBIR effort. A. The development to commercialization of the metabolite predictive biomarker panel requires additional support through the SBIR funding mechanism. We will be eligible to apply for Phase IIb SBIR funding the next round of solicitation. A. Phase IIb may help de-risk the project by providing up matching funds for performing the clinical validation trial for product development to commercialization. We may apply for such government funding to advance this project. We also intend to raise capital through the public market for predictive biomarker development through the Shuttle Diagnostics entity. Should we not be successful for SBIR IIb funding, we may terminate this project. A. Collaborative Arrangements. A. While we intend to enter into selective collaborative arrangements to further develop our drug candidates in the future, at present we have not entered into any collaborative arrangements with third parties to develop our drug candidates as we are still completing clinical trials and, as a result, there can be no assurance that we will be able to do so on commercially reasonable terms or otherwise. A. Intellectual Property. A. We invest significant amounts of funds in research and development. Our research and development expenses before contract reimbursements were \$3,517,093 and \$1,258,840 for the fiscal years ended December 31, 2023 and 2022 respectively. After reimbursements for contracts of \$0 and \$211,455 for the fiscal years ended December 31, 2023 and 2022, net research and development expenses were \$3,517,093 and \$1,047,385, respectively. For the nine months ended September 30, 2024 and 2023, our research and development expenses were \$2,632,387 and \$2,806,644, respectively, and there were no contract reimbursements for either period. A. We are seeking multifaceted protection for our intellectual property that includes licenses, confidentiality and non-disclosure agreements, copyrights, patents, trademarks and common law rights, such as trade secrets. We enter into confidentiality and proprietary rights agreements with our employees, consultants, collaborators, subcontractors and other third parties and generally control access to our documentation and proprietary information. A. 58 A. As of the date of this registration statement, we have filed five patent applications with the USPTO with respect to various aspects of our HDAC small molecule delivery platform and Ropidoxuridine, our lead product candidate. The following is the status of the patent applications Shuttle has filed to date: A. Summary of Shuttle Pharma's Intellectual Property Portfolio. A. Morgan, Lewis & Bockius LLP prepared patent applications related to Ropidoxuridine (IPdR) and HDAC inhibitors, and, in the fourth quarter of 2018, found no freedom to operate (FTO) issue for Ropidoxuridine used as radiosensitizer and used with tipiracil, and HDAC inhibitors SP-1161 and SP-2-225. A. Our strategy around protection of our proprietary technology, including any innovations and improvements, is to obtain worldwide patent coverage with a focus on jurisdictions that represent significant global pharmaceutical markets. Generally, patents have a term of twenty years from the earliest priority date, assuming that all maintenance fees are paid, no portion of the patent has been terminally disclaimed and the patent has not been invalidated. In certain jurisdictions, and in certain circumstances, patent terms can be extended or shortened. We are obtaining worldwide patent protection for at least novel molecules, composition of matter, pharmaceutical formulations, methods of use, including treatment of disease, methods of manufacture and other novel uses for the inventive molecules originating from our research and development efforts. We continuously assess whether it is strategically more favorable to maintain confidentiality for the know-how regarding a novel invention rather than pursue patent protection. For each patent application that is filed we strategically tailor our claims in accordance with the existing patent landscape around a particular technology. A. There can be no assurance that an issued patent will remain valid and enforceable in a court of law through the entire patent term. Should the validity of a patent be challenged, the legal process associated with defending the patent can be costly and time consuming. Issued patents can be subject to oppositions, interferences and other third-party challenges that can result in the revocation of the patent limit patent claims such that patent coverage lacks sufficient breadth to protect subject matter that is commercially relevant. Competitors may be able to circumvent our patents. Development and commercialization of pharmaceutical products can be subject to substantial delays and it is possible that at the time of commercialization any patent covering the product has expired or will be in force for only a short period of time following commercialization. We cannot predict with any certainty if any third-party U.S. or foreign patent rights or other proprietary rights will be deemed infringed by the use of our technology. Nor can we predict with certainty which, if any, of these rights will or may be asserted against us by third parties. Should we need to defend ourselves and our partners against any such claims, substantial costs may be incurred. Furthermore, parties making such claims may be able to obtain injunctive or other equitable relief, which could effectively block our ability to develop or commercialize some or all of our products in the U.S. and abroad and could result in the award of substantial damages. In the event of a claim of infringement, we or our partners may be required to obtain one or more licenses from a third party. There can be no assurance that we can obtain a license on a reasonable basis should we deem it necessary to obtain rights to an alternative technology that meets our needs. The failure to obtain a license may have a material adverse effect on our business, results of operations and financial condition. A. 59 A. We also rely on trade secret protection for our confidential and proprietary information. No assurance can be given that we can meaningfully protect our trade secrets on a continuing basis. Others may independently develop substantially equivalent confidential and proprietary information or otherwise gain access to our trade secrets. A. It is our policy to require our employees and consultants, outside scientific collaborators, sponsored researchers and other advisors who receive confidential information from us to execute confidentiality agreements upon the commencement of employment or consulting relationships. These agreements provide that all confidential information developed or made known to these individuals during the course of the individual's relationship with the company is to be kept confidential and is not to be disclosed to third parties except in specific circumstances. The agreements provide that all inventions conceived by an employee will be the property of our company. There can be no assurance, however, that these agreements will provide meaningful protection or adequate remedies for our trade secrets in the event of unauthorized use or disclosure of such information. A. Our success will depend in part on our ability to obtain and maintain patent protection, preserve trade secrets, prevent third parties from infringing upon our proprietary rights and operate without infringing upon the proprietary rights of others, both in the U.S. and other territories worldwide. A. Manufacturing and Supply. A. We do not currently own or operate manufacturing facilities for the production of preclinical, clinical or commercial quantities of any of our product candidates. We currently use a number of our suppliers for the raw materials and formulation to meet the preclinical and any clinical requirements of our product candidates. We do not have a long-term agreement with any of these parties and we believe alternative sources of supply exist. A. We intend to enter into collaborations for the manufacture of our product candidates, with our collaborators assuming responsibility for such manufacturing. Manufacturing is subject to extensive regulations that impose various procedural and documentation requirements, which govern record keeping, manufacturing processes and controls, personnel, quality control and quality assurance, among others. Any collaborator or third-party contract manufacturer we use would need to be compliant with cGMP. cGMP is a regulatory standard for the production of pharmaceuticals that will be used in humans. A. Sales and Marketing. A. Our current focus is on the development of our existing portfolio, the completion of clinical trials and, if and where appropriate, the registration of our product candidates. We currently do not have marketing, sales and distribution capabilities. If we receive marketing and commercialization approval for any of our product candidates, we intend to market the product either directly or through collaborations, strategic alliances and distribution agreements with third parties. The ultimate implementation of our strategy for realizing the financial value of our product candidates is dependent on the results of clinical trials for our product candidates, the availability of funds and the ability to negotiate acceptable commercial terms with third parties. A. Employees. A. As of the date of this registration statement, we have nine full-time employees, including our six executive officers, and three engaged in research and development. We consider our relationship with our employees to be good. A. Nasdaq Deficiency and 2024 Reverse Stock Split. A. Our common stock currently is listed for quotation on the Nasdaq Capital Market. We are required to meet Nasdaq listing rules in order to maintain such listing, including a requirement that the Company maintain stockholders' equity of at least \$2.5 million. A. 60 A. Our common stock currently is listed for quotation on the Nasdaq Capital Market. We are required to meet Nasdaq listing rules in order to maintain such listing, including a requirement that the Company's stockholders' equity remain at or above \$2.5 million. A. On September 10, 2024, we received a letter from Nasdaq notifying the Company that it is no longer in compliance with the minimum stockholders' equity requirement for continued listing on the Nasdaq Capital Market. Nasdaq Listing Rule 5550(b)(1) requires listed companies to maintain stockholders' equity of at least \$2.5 million. In the Company's Quarterly Report on Form 10-Q for the period ended June 30, 2024, the Company reported stockholders' equity of \$801,434, which is below the minimum stockholders' equity required for continued listing pursuant to Nasdaq Listing Rule 5550(b)(1). In addition, at present, the Company does not meet the alternatives of market value of listed securities or net income from continuing operations. A. In accordance with the requirements of the Nasdaq notice, the Company submitted to Nasdaq a plan to regain compliance with the minimum stockholders' equity standard and Nasdaq granted the Company an extension of up to 180 calendar days from September 10, 2024, or until March 10, 2025, for the Company to regain compliance. A. The Company intends to raise additional capital through this offering to bring the Company into compliance with Nasdaq's listing requirements prior to March 10, 2025. If the Company fails to satisfy another Nasdaq requirement for continued listing, Nasdaq could provide notice that the Company's securities will become subject to delisting. In that event, the Company will have an opportunity to appeal Nasdaq's decision to a hearings panel. A. On December 31, 2024, we received a letter from the Nasdaq Listing Qualifications Staff of the Nasdaq (the Staff) stating that for the 30 consecutive business day period the Company's common stock had failed to maintain a minimum closing bid price of \$1.00 per share, as required for continued listing on The Nasdaq Capital Market pursuant to Nasdaq Listing Rule 5550(a)(2) (the Minimum Bid Price Requirement). In accordance with Nasdaq rules, the Company was provided with an initial period of 180 calendar days, or until June 30, 2025, to regain compliance with the Minimum Bid Price Requirement (the Initial Grace Period). In the event the Company does not regain compliance with the Minimum Bid Price Requirement during the Initial Grace Period, the Company may be eligible for an additional 180-day period to regain compliance. To qualify, the Company will be required to meet all other continued listing requirements, save for the Minimum Bid Price Requirement and will be required to provide Nasdaq with a plan of compliance prior to the end of the Initial Grace Period. A. In addition, the Company had previously fallen out of compliance with the Minimum Bid Price Requirement during the year ended December 31, 2023. During the second of two 180-day compliance periods, still being unable to regain compliance with the Minimum Bid Price Requirement, on August 6, 2024, we filed an amendment to our certificate of incorporation to effect a 1-for-8 reverse stock split of our outstanding common stock (the 2024 Reverse Stock Split). The 2024 Reverse Stock Split became effective on August 13, 2024,

when the Company’s common stock opened for trading on Nasdaq on a post-split basis under the Company’s existing trading symbol, “SHPH.” Subsequently, on August 27, 2024, we received notice from Nasdaq that we had regained compliance with the Minimum Bid Price Requirement. All historical share and per share amounts reflected throughout this prospectus have been adjusted to reflect the 2024 Reverse Stock Split. However, our periodic and current reports, and all other documents included in this prospectus that were filed prior to August 13, 2024 do not give effect to the 2024 Reverse Stock Split. Liquidity and Going Concern Uncertainty Our unaudited condensed consolidated financial statements are prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The Company has incurred losses since inception and has a net loss of approximately \$7.5 million and no revenues for the nine months ended September 30, 2024 and has a working capital deficit of approximately \$1.3 million as of September 30, 2024. The Company does not expect to generate positive cash flows from operating activities in the near future. In September 2024, the Company’s CEO provided \$250 thousand to the Company in exchange for a promissory note repayable in equal monthly installments of principal and interest over a term of one year. In October 2024, the Company completed an offering of senior secured convertible bridge notes, receiving \$790 thousand in cash. The notes have a term of one-year and were accompanied by 329,461 warrants with a weighted-average exercise price of \$1.42. Also in October 2024, the Company completed an equity raise that provided \$3.9 million net cash for the issuance of 2.9 million shares / pre-funded warrants, along with 2.9 million warrants issued at an exercise price of \$1.40 per share. However, the Company’s existing cash resources and the cash received from the equity offering and senior convertible note are not expected to provide sufficient funds to carry out the Company’s operations and clinical trials through the next 12 months. The Company’s capital raises have to date supported operations, the manufacture of drug product and FDA approval of the IND for the Phase II clinical trial of Ropidoxuridine and radiation therapy in glioblastoma and other radiation sensitizer discovery and therapy. The FDA recommended and the Company agreed to an expansion of the Phase II clinical trial, necessitating additional capital to complete the trial as well as fund ongoing operations. Additionally, the Phase II clinical trial of Ropidoxuridine has evolved with finalized agreements with all six of the planned site enrollment locations to administer the Phase II clinical trial of Ropidoxuridine and the enrollment of the first 10 patients. The ability of the Company to continue as a going concern is dependent upon its ability to continue to successfully raise additional equity or debt financing to allow it to fund ongoing operations, conduct clinical trials and bring a drug candidate to commercialization to generate revenues. These conditions raise substantial doubt about the Company’s ability to continue as a going concern within one year after the date that the unaudited condensed consolidated financial statements are issued. The accompanying unaudited condensed consolidated financial statements do not include any adjustments to reflect the future effects on the recoverability and classification of assets or the amounts and classification of liabilities if the Company is unable to continue as a going concern. 61 MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS The following Management’s Discussion and Analysis should be read in conjunction with our financial statements and the related notes thereto included elsewhere in this registration statement. The discussion for the fiscal year ended December 31, 2023 has been impacted by the restatement described in the Explanatory Note and in Note 2 of the consolidated financial statements of this registration statement. Certain of the financial and other information provided in this Management’s Discussion and Analysis has been updated to reflect the restatement adjustments. The Management’s Discussion and Analysis contains forward-looking statements that involve risks and uncertainties, such as statements of our plans, objectives, expectations, and intentions. Any statements that are not statements of historical fact are forward-looking statements. When used, the words “believe,” “expect,” “anticipate,” “estimate,” “expect,” and the like, and/or future-tense or conditional constructions (“will,” “may,” “could,” “should,” etc.), or similar expressions, identify certain of these forward-looking statements. These forward-looking statements are subject to risks and uncertainties that could cause actual results or events to differ materially from those expressed or implied by the forward-looking statements in this registration statement. Our actual results and the timing of events could differ materially from those anticipated in these forward-looking statements as a result of several factors including, but not limited to, those noted under “Risk Factors” in this registration statement. We do not undertake any obligation to update forward-looking statements to reflect events or circumstances occurring after the date of this registration statement, except as required by U.S. federal securities laws. Overview Founded by Georgetown University Medical School faculty members, Shuttle Pharmaceuticals Holdings, Inc. (the “Company”) is a discovery and development stage pharmaceutical company leveraging our proprietary technology to develop novel therapies that are designed to cure cancer. Originally formed as Shuttle Pharmaceuticals, LLC in 2012, our goal is to extend the benefits of cancer treatments by leveraging insights into cancer therapy with surgery, radiation therapy, chemotherapy and immunotherapy. While there are several therapies being developed with the goal of curing cancer, one of the most effective and proven approaches to this is radiation therapy (RT). We are developing a pipeline of products designed to address the limitations of the current standard of cancer therapies. We believe that our product candidates will enable us to deliver cancer treatments that are safer, more reliable and at a greater scale than that of the current standard of care. Operations to date have focused on continuing our research and development efforts to advance Ropidoxuridine clinical testing and improved drug formulation, to advance HDAC6 inhibitor (SP-2-225) preclinical development and explore new Small Business Innovation Research (SBIR) contract work on predictive biomarkers of radiation response, as well as prostate cell lines for health disparities research. We received SBIR contract funding from the National Institutes of Health (NIH), for the aforementioned projects. The clinical development of Ropidoxuridine has shown drug bioavailability and a maximum tolerated dose has been established for use in Phase II clinical trials. TCG GreenChem, Inc. (“TCG GreenChem”), with whom we have contracted for process research, development and cGMP compliant manufacture of IPdR, has successfully completed the manufacturing campaign for the active pharmaceutical ingredient (API) of Ropidoxuridine for use in the Company’s upcoming Phase II clinical trial in brain cancer patients undergoing radiation therapy. Shuttle also worked with University of Iowa Pharmaceuticals to develop the formulation, produce the capsules, and which have been shipped to Contract Research Organization (CRO) Theradex Oncology for distribution to clinical trial sites. Both activities have now been completed. In addition, Shuttle received approval from the U.S. Food and Drug Administration (FDA) to begin the clinical trial. The FDA made recommendations to expand the clinical trial and the Company agreed with the recommendation. With this change incorporated into the revised protocol, the Company commenced its Phase II clinical study with finalized agreements with all six of the planned site enrollment locations to administer the Phase II clinical trial of Ropidoxuridine and has enrolled the first three patients in October 2024. The radiation biomarker project and the health disparities project have been completed and the Company is following up with plans for clinical validation and potential commercialization. Changes in operational, administrative, legal and professional expenses related to our operations are set forth in more detail in the discussion below. 62 Reverse Stock Split On August 13, 2024, in order to meet the Nasdaq minimum bid price requirement, the Company effectuated a 1-for-8 reverse stock split of its issued and outstanding common stock, rounding up to account for any fractional shares (the “Reverse Stock Split”). The Reverse Stock Split had no effect on the Company’s authorized shares of common stock or preferred stock. All share, option, warrant and per share amounts (except our authorized outstanding and previously reserved shares) have been retroactively recast in our most recent filings, and are presented as such in these financial statements and related disclosures. Nasdaq Listing Compliance On September 10, 2024, the Company received a letter (the “Notification”) from The Nasdaq Capital Market (“Nasdaq”), notifying the Company that it is no longer in compliance with the minimum stockholders’ equity requirement for continued listing on the Nasdaq Capital Market. Nasdaq Listing Rule 5550(b)(1) requires listed companies to maintain stockholders’ equity of at least \$2,500,000. In the Company’s Quarterly Report on Form 10-Q for the period ended June 30, 2024, the Company reported stockholders’ equity of \$801,434, which is below the minimum stockholders’ equity required for continued listing pursuant to Nasdaq Listing Rule 5550(b)(1). In addition, presently, the Company does not meet the alternatives of market value of listed securities or net income from continuing operations. This Notification has no immediate effect on the listing of the Company’s securities on the Nasdaq Capital Market. Nasdaq has provided the Company with 45 calendar days, or until October 25, 2024, to submit a plan to regain compliance with the minimum stockholders’ equity standard. If the Company’s plan to regain compliance is accepted, Nasdaq may grant an extension of up to 180 calendar days from September 10, 2024 for the Company to regain compliance. On October 15, 2024, the Company submitted a plan to Nasdaq to regain compliance and Nasdaq subsequently granted the Company up until March 10, 2025 to regain compliance. However, there can be no assurance that the Company will be able to regain compliance and maintain its listing on the Nasdaq Capital Market. If the Company’s plan to regain compliance by March 10, 2025, or if the Company fails to satisfy another Nasdaq requirement for continued listing, Nasdaq could provide notice that the Company’s securities will become subject to delisting. In that event, the Company will have an opportunity to appeal Nasdaq’s decision to a hearings panel. On December 31, 2024, the Company, received a letter from The Nasdaq stating that for the 30 consecutive business day period between November 15, 2024 to December 30, 2024 the Company’s common stock failed to maintain a minimum closing bid price of \$1.00 per share, as required for continued listing on The Nasdaq Capital Market pursuant to Nasdaq Listing Rule 5550(a)(2) (the “Minimum Bid Price Requirement”). Pursuant to Nasdaq Listing Rule 5810(c)(3)(A), the Company has an initial period of 180 calendar days, or until June 30, 2025 (the “Compliance Period”), to regain compliance with the Minimum Bid Price Requirement. To regain compliance, the closing bid price of the Company’s common stock must meet or exceed \$1.00 per share for a minimum of 10 consecutive business days. Results of Operations Comparison of the three months ended September 30, 2024 and 2023 The following table summarizes the results of our operations: Three Months Ended September 30, 2024 versus September 30, 2023 Revenue Change Revenue \$-A \$-A \$-A \$-A Operating expenses: \$-A \$-A \$-A \$-A Research and development \$1,400,564A \$1,045,177A \$355,387A \$34% General and administrative \$328,995A \$265,553A \$63,442A \$24% Legal and professional \$1,322,002A \$288,416A \$1,033,586A \$358% Total operating expenses and loss of operations \$3,051,561A \$1,599,146A \$1,452,415A \$91% Other income (expense) \$-A \$-A \$-A \$-A Interest expense - related parties \$ (2,137)A \$ (2,137)A \$ (100)% Interest expense \$ (270,538)A \$ (623,465)A \$ 352,927A \$ 56% Gain on sale of marketable securities \$ 56,398A \$ -A \$ 56,398A \$ 100% Change in fair value of marketable securities \$ (42,898)A \$ 9,606A \$ (52,504)A \$ (547)% Interest income \$ 2,524A \$ 20,765A \$ (18,241)A \$ (88)% Change in fair value of derivative liabilities \$ 286,316A \$ 442,900A \$ (156,584)A \$ (35)% Loss on settlement of convertible debt \$ (762,186)A \$ (43,414)A \$ (718,772)A \$ 1656% Total other expense \$ (732,521)A \$ (193,608)A \$ (538,913)A \$ 278% Net loss \$ (3,784,082)A \$ (1,792,754)A \$ (1,991,328)A \$ 111% Research and Development. Research and development (R&D) expenses were \$1.4 million for the three months ended September 30, 2024, as compared to \$1.0 million for three months ended September 30, 2023. The increase of \$0.4 million, or 34%, is primarily related to the Company having completed production of the drug product and the start of work related to the initiation of trials. 63 R&D compensation related expenses were \$0.3 million in the three months ended September 30, 2024 as compared to \$0.3 million in the three months ended September 30, 2023. Compensation related expenses were 22% for the three months ended September 30, 2024, representing a decrease from 29% of total R&D in the three months ended September 30, 2023. Subcontract work made up 73% of total R&D expenses in the three months ended September 30, 2024 and 65% of total R&D expenses during the three months ended September 30, 2023. General and Administrative Expenses. General and Administrative expenses in the three months ended September 30, 2024 increased by \$63 thousand, or 24% to \$0.33 million in the three months ended June 30, 2024, compared to \$0.27 million in the three months ended September 30, 2023, largely due to costs associated with the additional focus on financial reporting and capital needs. Legal and Professional Expenses. During the three months ended September 30, 2024, legal and professional expenses increased by \$1.0 million or 358% to \$1.3 million compared to \$0.3 million in the same period in the prior year. The increase in legal and professional fees was primarily due to increases in our expenses related to our public filing requirements, readouts, contracts, and financing related work. Other Income Expense. Other expense was \$0.7 million for the three months ended September 30, 2024, which consisted primarily of \$0.3 million in interest expense on convertible loans, loss on settlement of debt of \$0.8 million, and a gain on change in fair value of derivative liabilities of \$0.3 million. Other expense was \$0.2 million for the three months ended September 30, 2023, which consisted primarily of \$0.4 million in interest expense on convertible loans, loss on settlement of convertible debt of \$0.8 million, and a gain on change in fair value of derivative liabilities of \$0.4 million. The \$0.4 million gain in fair value of derivative liability resulted from the fair value measurement using the Monte Carlo pricing model and the impact of the decrease in the market price of warrant shares. These amounts were largely attributable to the Alto Convertible Note conversions and cash management activities. Comparison of the nine months ended September 30, 2024 and 2023 The following table summarizes the results of our operations: Nine Months Ended September 30, 2024 versus September 30, 2023 Revenue Change Revenue \$-A \$-A \$-A \$-A Operating expenses: \$-A \$-A \$-A \$-A Research and development \$2,632,387A \$2,806,644A \$ (174,257)A \$ (6)% General and administrative \$963,642A \$1,370,186A \$ 406,544A \$ 42% Legal and professional \$2,323,013A \$1,072,728A \$ 1,250,285A \$ 117% Total operating expenses and loss of operations \$5,919,042A \$4,609,558A \$ 1,309,484A \$ 28% Other income (expense) \$-A \$-A \$-A \$-A Interest expense - related parties \$ (2,137)A \$ (6,825)A \$ 4,688A \$ (69)% Interest expense \$ (1,198,738)A \$ (1,952,147)A \$ 753,409A \$ 39% Interest income \$ 38,135A \$ 56,720A \$ (18,585)A \$ (33)% Finance fee \$ -A \$ (104,245)A \$ 104,245A \$ (100)% Change in fair value of derivative liabilities \$ 340,405A \$ 2,118,175A \$ (1,777,770)A \$ (84)% Gain on sale of marketable securities \$ 100,118A \$ 1,744A \$ 98,374A \$ 5,641% Change in fair value of marketable securities \$ (71,568)A \$ 21,134A \$ (92,702)A \$ (439)% Loss on settlement of convertible debt \$ (833,501)A \$ (477,221)A \$ (356,280)A \$ (75)% Total other expense \$ (1,627,286)A \$ (342,665)A \$ (1,284,621)A \$ 375% Net loss \$ (2,594,105)A \$ (2,594,105)A \$ -A \$ 0% Research and Development. Research and development (R&D) expenses were \$2.6 million for the nine months ended September 30, 2024, as compared to \$2.8 million for nine months ended September 30, 2023. The decrease of \$0.2 million, or 6%, is primarily related to the Company having completed production of the drug product in the prior period substantially offset by costs incurred for the start of work related to the initiation of trials in the current period. 64 R&D compensation related expenses were \$0.9 million in the nine months ended September 30, 2024 as compared to \$1.2 million in the nine months ended September 30, 2023. Compensation related expenses were 36% for the nine months ended September 30, 2024, representing a decrease from 42% of total R&D in the nine months ended September 30, 2023. Subcontract work made up 57% of total R&D expenses in the nine months ended September 30, 2024 and 53% of total R&D expenses during the nine months ended September 30, 2023. General and Administrative Expenses. General and Administrative expenses in the nine months ended September 30, 2024 increased by \$0.2 million, or 32% to \$1.0 million in the nine months ended September 30, 2024. The increase in general and administrative expenses was primarily due to increases in marketing, advertising and filing expenses. Legal and Professional Expenses. During the nine months ended September 30, 2024, legal and professional expenses increased by \$1.3 million or 117%. The increase in legal and professional fees was primarily due to increases in our expenses related to our public filing requirements, readouts, contracts and financing related work. Other Income Expense. Other expense was \$1.6 million for the nine months ended September 30, 2024, which consisted primarily of \$1.2 million in interest expense on convertible loans, loss on settlement of convertible debt of \$0.8 million, change in marketable securities of \$0.1 million, and a gain on change in fair value of derivative liabilities of \$0.3 million. Other expense was \$0.3 million for the nine months ended September 30, 2023, which consisted primarily of \$2.0 million in interest expense on convertible loans, finance fee on convertible loans of \$0.1 million, loss on settlement of convertible debt of \$0.5 million, and a gain on change in fair value of derivative liabilities of \$2.1 million. The \$2.1 million gain in fair value of derivative liability resulted from the fair value measurement using the Monte Carlo pricing model and the impact of the decrease in the market price of warrant shares. These amounts were largely attributable to the Alto Convertible Note conversions and cash management activities. Liquidity and Capital Resources Our unaudited condensed consolidated financial statements are prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The Company has incurred losses since inception and has a net loss of approximately \$7.5 million and no revenues for the nine months ended September 30, 2024 and has a working capital deficit of approximately \$1.3 million as of September 30, 2024. The Company does not expect to generate positive cash flows from operating activities in the near future. 65 In September 2024, the Company’s CEO provided \$250 thousand to the Company in exchange for a promissory note repayable in equal monthly installments of principal and interest over a term of one year. In October 2024, the Company completed an offering of senior secured convertible bridge notes, receiving \$790 thousand in cash. The notes have a term of one-year and were accompanied by 329,461 warrants with a weighted-average exercise price of \$1.42. Also in October 2024, the Company completed an equity raise that provided \$3.9 million net cash for the issuance of 2.9 million shares / pre-funded warrants, and by 2.9 million warrants with an exercise price of \$1.40. However, the Company’s existing cash resources and the cash received from the equity offering and senior convertible note are not expected to provide sufficient funds to carry out the Company’s operations and clinical trials through the next twelve months. The Company’s capital raises have to date supported operations, the manufacture of drug product and FDA approval of the IND for the Phase II clinical trial of Ropidoxuridine and radiation

[illegible]

a Controlled Account Agreement (as defined in the Convertible Note), would no longer be applicable, (ii) that the Investor would stipulate the release to the Company of the remaining Cash Collateral totaling \$2.92 million (thus releasing the full amount of the Cash Collateral to the Company), and (iii) that, should the Investor exercise its option to purchase the Subsequent Notes and Subsequent Warrants, that such Subsequent Notes would omit Section 15(q) and that the Company would not be required to maintain any controlled accounts or otherwise be subject to any controlled account agreements. In August 2024, we entered into an additional Amendment Agreement pursuant to which the Investor waived certain defaults in exchange for the Company’s payment of \$0.6 million in collateral to be held against the Investment Amount pending the January 2023 Convertible Note’s maturity. As of September 30, 2024, the January 2023 Convertible Note had been paid off in full. A Off-Balance Sheet Arrangements A We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors. A Critical Accounting Policies and Significant Judgments and Estimates A This discussion and analysis of our financial condition and results of operations is based on our unaudited condensed consolidated financial statements, which have been prepared in accordance with generally accepted accounting principles in the United States (the GAAP). The preparation of these unaudited condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the unaudited condensed consolidated financial statements, as well as the reported expenses incurred during the reporting periods. Our estimates are based on our historical experience and on various other factors that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. While our significant accounting policies are described in more detail in the notes to our unaudited condensed consolidated financial statements included elsewhere in this report, we believe that the following accounting policies are critical to understanding our historical and future performance, as these policies relate to the more significant areas involving management’s judgments and estimates. A 71 A Our most critical accounting policies and estimates relate to the following: A A Research and Development Expenses A Fair Value of Common Stock (Common Stock Valuations) A Fair Value of Warrants to Purchase Common Stock A Fair Value of Bifurcated Derivative Liabilities and Other Financial Instruments A Fair Value of Preferred Stock (upon extinguishment) A Research and Development Expenses A Research and development expenses are expensed as incurred and, prior to our initial public offering in September 2022, have historically been offset by contract receivable payments from a NIH SBIR contract that has supported our scientific research. This is stated in the consolidated financial statements as research and development, net of contract expense reimbursements. A Fair Value of Common Stock (Common Stock Valuations) A For all periods prior to our initial public offering, there was no public market for our common stock, and, as a result, the fair value of the shares of common stock underlying our share-based awards, warrants and other financial instruments was estimated on each grant or measurement date by our board of directors. To determine the fair value of our common stock underlying these grants and financial instrument, our board of directors considered, among other things, input from management, input from investment banks and financial advisors, valuations of our common stock prepared by unrelated third-party valuation firms in accordance with the guidance provided by the American Institute of Certified Public Accountants 2013 Practice Aid, Valuation of Privately Held Company Equity Securities Issued as Compensation, and our board of directors’ assessment of additional objective and subjective factors that it believed were relevant and factors that may have changed from the date of the most recent valuation through the date of the grant. These factors included, but were not limited to: A A Our results of operations and financial position, including our levels of available capital resources; A A Our stage of development and material risk related to our business; A A Our business conditions and projections; A A The valuation of publicly traded companies in the life sciences and pharmaceuticals sectors, as well as recently completed mergers and acquisitions of peer companies; A A The lack of marketability of our common stock as a private company; A A The prices at which we sold shares of our Series A Preferred Stock to outside investors in arms-length transactions; A A The rights, preferences and privileges of our Series A Preferred Stock relative to those of our common stock; A A The likelihood of achieving a liquidity event for our securityholders, such as an initial public offering or a sale of our Company, given prevailing market conditions; A A Trends and developments in our industry; and A A External market conditions affecting the life sciences and pharmaceutical industry sectors. A As a result of the initial public offering in September 2022, it is not necessary to determine the fair value of our common stock for any fair value measurements subsequent to this date, as our shares are traded in the public market. A During the year ended December 31, 2022, and prior to the closing of our initial public offering, the estimated fair value of our common stock was utilized to: A A Measure stock compensation expense A Estimate the fair value of certain warrants to purchase common stock A Estimate the fair value of certain bifurcated derivative features in the Convertible Notes A Estimate the deemed dividends recorded related to the extinguishment of the Series A Preferred Stock and the modification of the December 2021 Warrants A Measure any final fair value adjustments upon the settlement, exercise or reclassification of certain financial instruments upon our initial public offering A In developing its fair value estimates, we performed certain sensitivity analysis around the estimated fair value of the common stock and how changes in this estimate could impact accounting conclusions. For most of these fair value measurements, we determined that \$1.00 to \$2.00 changes in the estimated fair value per share would not have material impacts on the measurements or ultimate accounting conclusions or entries. A 72 A In performing this sensitivity analysis, we identified two measurements that are the most sensitive to changes in our estimated stock price fair value measurement is the valuation of the Series A Preferred Stock post-extinguishment in April 2022 (upon the modification of terms that was determined to be substantive and represent an extinguishment) and the estimate of the incremental fair value provided to the holders of the December 2021 Warrants upon their modification in April 2022 (to allow the warrants to remain exercisable for same number of shares and at same exercise price as per the contract pre-April 2022 reverse stock split). We estimated that a \$1.00 per share increase or decrease in our estimated fair value of common stock could result in an increase or decrease in these measurements of approximately \$250,000. A The accounting for both transactions was to reflect the determined amounts as a deemed dividend, which would reduce the net loss attributable to common stockholders and increase the net loss per share available to common stockholders. These measurements are non-recurring fair value measurements in nature and did not impact any other balance sheet accounts or operating or non-operating income. A Fair Value of Warrants to Purchase Common Stock A We have issued warrants to investors in our debt and equity offerings. We have also issued warrants to service providers in relation to our financing offerings. A We evaluate all warrants issued to determine the appropriate classification under ASC 480 and ASC 815 (as well as under ASC 718 for warrants issued as share-based payments). In addition to determining classification, we evaluate these instruments to determine if such instruments meet the definition of a derivative. A For warrants that are determined to be equity-classified, we estimate the fair value at issuance and record the amounts to additional paid in capital (potentially on a relative fair value basis if issued in a basket transaction with other financial instruments). Warrants that are equity-classified are not subsequently remeasured unless modified or required to be reclassified as liabilities. For warrants that are determined to be liability-classified, we estimate the fair value at issuance and each subsequent reporting date, with changes in the fair value reported in the consolidated statements of operations. The classification of all outstanding warrants, including whether such instruments should be recorded as equity, is evaluated at the end of each reporting period. A For warrants issued with a vanilla or less complex terms, we use the Black Scholes valuation model to estimate fair value. Key inputs to the Black Scholes valuation model include the fair value of our stock, the exercise price and number of warrant shares of the contract, the remaining contractual term, stock price volatility (based on our stock price history as well as an analysis of the historical volatility of the common stock of a group of comparable entities) and a risk-free rate. A For warrants with uncertain or more complex terms (such as variability in the warrant shares or exercise price), we may utilize more complex models to address such provisions. These may include probability-weighted scenario models or Monte Carlo simulation models. Monte Carlo simulation models require the use of simulations that are weighted based on significant unobservable inputs including stock prices, the average volatility of a population set and probabilities assigned. Each simulation is based on the range of inputs in a scenario with the mean of the output on each simulation calculated as an average. A The use of these valuation models requires the input of highly subjective assumptions. Any change to these inputs could produce significantly higher or lower fair value measurements. A Fair Value of Bifurcated Derivative Liabilities and Other Financial Instruments A We evaluate all of our financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. For derivative financial instruments that are accounted for as liabilities, the derivative instrument is initially recorded at its fair value and is then re-valued at each reporting date, with changes in the fair value reported in the consolidated statements of operations. The classification of derivative instruments, including whether such instruments should be recorded as liabilities are evaluated at the end of each reporting period. A For our derivative financial instruments classified as a liability, the Company will select a valuation model that best aligns with the type of instrument and economic profile of the embedded feature being valued. This may include the use of Monte Carlo or other appropriate valuation models to value the derivative instruments at inception and on subsequent valuation dates. Monte Carlo simulation models require the use of simulations that are weighted based on significant unobservable inputs including the average volatility of a population set and probabilities assigned. Each simulation is based on the range of inputs in a scenario with the mean of the output on each simulation calculated as an average. For other embed features, the Company may utilize a with and without income-based valuation approach, designed to compare the fair value of a financial instrument with the embedded feature and the fair value of the financial instrument without the embedded feature, in order to isolate the fair value of the embedded feature, or certain probability-weighted scenario analyses to compare various potential settlement amounts. These complex valuations require the use of key inputs, some of which are based on estimates and judgements by management and/or external consultants, such as the fair value of the Company’s stock price, volatility, estimates of the occurrence or non-occurrence of certain events and estimates of the probability of default or other external impacts. A The use of these valuation models requires the input of highly subjective assumptions. Any change to these inputs could produce significantly higher or lower fair value measurements. A Fair Value of Preferred Stock (upon extinguishment) A During the year ended December 31, 2022, we agreed to modify the terms of the Series A Preferred Stock, resulting in the conclusion that the modification was a substantial change in fair value of the Series A Preferred Stock and that extinguishment accounting should be applied. In order to account for the extinguishment, we estimated the fair value of the Series A Preferred Stock based on the modified terms. The difference between the estimated fair value of the Series A Preferred Stock post-modification and its carrying value was recorded as a deemed dividend adjusting net loss available to common stockholders during the year ended December 31, 2022. A For this fair value measurement, we utilized a model that includes a Monte Carlo simulation to estimate the fair value of the Series A Preferred Stock in an initial public offering or other listing scenario and a discounted cash flow approach to estimate the fair value of the Series A Preferred Stock in a redemption (or non-conversion) scenario. The Monte Carlo simulation includes management inputs around the fair value of our common stock and the estimated initial public offering date. The simulation determines whether the estimated future initial public offering would be a Qualified IPO, as defined, or a Listing conversion, as these two conversion types represented different economic outcomes. The present value calculation for the redemption (or non-conversion scenario) assumes the future repayment of the Series A Preferred Stock stated value and accrued cumulative dividends, discounted to the date of the modification. The estimated fair values of these scenarios were then applied a probability of each event occurring (probability of initial public offering or redemption/non-conversion). These complex valuations require the use of key inputs, some of which are based on estimates and judgements by management assisted by external consultants, such as the fair value of the Company’s stock price, volatility, estimates of the occurrence or non-occurrence of certain events and estimates of the probability of default or other external impacts. A The use of these valuation models requires the input of highly subjective assumptions. Any change to these inputs could produce significantly higher or lower fair value measurements that could materially impact the financial statements. A 73 A MANAGEMENT A Our directors and executive officers and their respective ages and titles are as follows: A Name A Age A Position(s) and Office(s) Held A A Anatoly Dritschilo, M.D. A 80 A Chairman of the board of directors and Chief Executive Officer Timothy J. Lorber A 66 A Chief Financial Officer* Michael Vander Hoek A 65 A VP for Operations and Regulatory, former Chief Financial Officer* Peter Dritschilo A 55 A President and Chief Operating Officer Mira Jung, Ph.D. A 74 A Chief Scientific Officer Tyvin Rich, M.D. A 76 A Chief Clinical Officer Milton Brown, M.D., Ph.D. A 59 A Director Steven Richards A 55 A Independent Director (1)(2)(3) Joshua Schafer A 53 A Independent Director (2)(3) Chris H. Senanayake, Ph.D. A 66 A Independent Director (1) Bette Jacobs, Ph.D. A 73 A Independent Director (1)(3) A (1) Member of the Audit Committee (2) Member of the Compensation Committee (3) Member of the Nominating and Corporate Governance Committee A *Timothy Lorber became our Chief Financial Officer on June 13, 2024. Prior to that time, Michael Vander Hoek served as our Chief Financial Officer. A Set forth below is a description of the background and business experience of our directors and executive officers. A Anatoly Dritschilo, M.D. Dr. Dritschilo is a co-founder of the Company and has served as Chief Executive Officer and Chairman of the Board of Directors since the Company’s formation in December 2012. Dr. Dritschilo is a radiation oncologist by training and has held multiple leadership positions in health care. At Georgetown University Medical School in Washington, D.C., he served principally as Department Chair from 1980 to 2022; Chief of Radiation Oncology at MedStar-Georgetown University Hospital from 2005 to 2022; Medical Director of Georgetown University Hospital from 1994 to 1997; and Interim Director of the NCI-funded Lombardi Comprehensive Cancer Center from 2005 to 2007. He has also served on the boards of directors of MedStar-Georgetown University Hospital, the National Capital Rehabilitation Hospital, and the MedStar Health Research Institute. Previously, he was a founding director of Oncomed, Inc. and a member of the board of directors of Neopharm, Inc. His 250+ scientific publications and 12 issued patents have earned him election as a Fellow of the National Academy of Inventors. Dr. Dritschilo holds a Bachelor of Science degree in Chemical Engineering from the University of Pennsylvania, a medical degree from the College of Medicine of New Jersey and residency training from the Harvard Joint Center for Radiation Therapy. His qualifications support his service as our Chief Executive Officer and Chairman of the Board of Directors. A Timothy J. Lorber, CPA serves as the Company’s Chief Financial Officer, a position he assumed on a part-time basis on June 13, 2024 and on full-time basis on September 9, 2024. Mr. Lorber has more than 40 years of professional finance experience, including Legg Mason, Inc. (the Legg Mason), one of the world’s larger public global asset management firms, where he worked from March 2006 to July 2020 serving in various finance leadership roles, including Managing Director and Chief Accounting Officer until its sale in 2020. From August 2021 until June 2024, Mr. Lorber has served in leadership roles with several privately held businesses, overseeing finance, technology and human resources functions. Prior to Legg Mason, Mr. Lorber served as Internal Audit Director of Freddie Mac from August 2003 to March 2006 and has also worked for several international public accounting firms. Mr. Lorber has extensive experience with mergers and acquisitions, valuations and complex accounting and financial reporting matters and holds a Bachelor of Arts in Accounting from Loyola University, Maryland, and is a licensed CPA. A 74 A Michael P. Vander Hoek serves as the Company’s Vice President, Operations and Regulatory, a position he has held since 2019, and served as the Company’s Chief Financial Officer from 2019 until June 13, 2024. From November 2019 until April 2021, Mr. Vander Hoek served as Director, Finance and Business Development at Georgetown Lombardi Comprehensive Cancer Center (the LCCC), where he directed a new five-year \$221.9 million institutional commitment for cancer center research under a new NCI-approved cancer consortium arrangement and recruited scientists to fulfill strategic objectives with senior leaders to improve cancer research and treatment. From 2007 until November 2019, Mr. Vander Hoek served as Associate Director, Administration, at Georgetown’s LCCC, where he was responsible for direct administrative operations for more than 400 faculty and staff in the department of oncology, radiation medicine, pathology and biostatistics, bioinformatics and biomathematics, including managing \$216.9 million in institutional commitments to LCCC from Medstar Health, John Theurer Cancer Center (the JTCC), and Georgetown University, and implementing an enterprise-wide clinical trial management system for Georgetown University and Medstar Health. From 2004 until 2007, Mr. Vander Hoek served as Chief Financial Officer at Georgetown’s LCCC. During his time at Georgetown, Mr. Vander Hoek negotiated a series of 12 research integration agreements between LCCC and the JTCC that resulted in the approval of an NCI recognized Consortium in 2019. From 2001 until 2004, Mr. Vander Hoek served as Vice-Chair, Planning and Administration, at MedStar Georgetown University Hospital, where he was responsible for managing administrative and financial operations for some 440 staff, physicians, residents and fellows in the departments of Medicine and Neurology. From 1996 until 2001, Mr. Vander Hoek served as Senior Associate Administrator, Finance and Information Systems, for the Department of Medicine, Georgetown University Medical Center, where he designed and managed the faculty compensation system, while managing the finances and information systems for the department. His financial management experience in publicly held companies includes Director of Managed Care Reimbursement for Critical Care America from 1990 to 1993 and Regional Controller for Laboratory Corporation of America (LabCorp) from 1993 to 1996. His responsibilities at both companies included extensive financial management related to mergers, acquisitions, and start-up operations. Mr. Vander Hoek holds a Master’s in Health Services Administration from The George Washington University and a Bachelor of Arts in Biology and Psychology from Hope College. A Peter Dritschilo has served as our President and Chief Operating Officer since Shuttle was formed in

December 2012. He also served as our Chief Financial Officer until 2019. Mr. Dritschilo has more than 25 years of business management experience in medical services and cancer treatment. He has held administrative positions with Medstar-Rad America from 2001 to 2005, Georgetown University 2005 to 2006, Prince William Hospital and the Fauquier Hospital Cancer Center 2006 to 2011 and Inova Health System’s Schar Cancer Institute from 2011 to 2018. In 2014, Mr. Dritschilo filed for Chapter 7 bankruptcy protection due to the failure of a personal business venture. Mr. Dritschilo graduated from Georgetown University and received his MBA from the George Washington University. A Mira Jung, Ph.D., a co-founder of our company, has served as our Chief Scientific Officer for Biology since December 2012, and was a member of our board of directors from our formation in December 2012 until 2019. Since 2004, Dr. Jung has served as Professor of Radiation Medicine and Microbiology at Georgetown University Medical School. With over 30 years of experience in molecular radiation biology research, she is an expert in mechanisms of radiation resistance and on the roles of HDAC inhibitors in modifying the radiation response. Dr. Jung’s research has been funded by NIH and the DOD leading to 100+ publications and nine patents granted by the USPTO, including the first reports of HDAC inhibitor drug classes modifying cancer cell radiation resistance and protecting normal tissues from radiation damage. Dr. Jung holds an MA degree and a PhD in Microbiology and Molecular Virology from the University of Kansas, Lawrence. A Tyvin A. Rich, M.D. serves as our company’s Chief Medical Officer and is responsible for the clinical development of novel radiation sensitizers. Since 2010, Dr. Rich has served as a Staff Radiation Oncologist at the Hampton University Proton Therapy Institute in Hampton Virginia and Professor Emeritus at University of Virginia Health Sciences Center, Department of Radiation Oncology. From 1995 until 2010, Dr. Rich was a Professor and Chairman of the Department of Therapeutic Radiology and Oncology at the University of Virginia Health Sciences Center. Prior to that, from 1984 through 1995, Dr. Rich was a Professor of Radiotherapy and Director of Clinics in the Department of Radiotherapy of the University of Texas M. D. Anderson Cancer Center. He has served as the protocol chair for RTOG clinical trials that advanced the use of chemoradiation for the treatment of rectal and pancreatic cancers. He is an expert in the applications of infusional 5-Fluorouracil for chemoradiation therapy of gastro-intestinal cancers and has authored more than 200 scientific articles, reviews and book chapters. Dr. Rich received his undergraduate degree at Rutgers University, his medical degree at the University of Virginia, and completed residencies in internal medicine at Georgetown University Medical Center and radiation therapy at Massachusetts General Hospital, Harvard Medical School. A 75 A Milton Brown, M.D., Ph.D., FNAI. Dr. Brown is a co-founder of our Company, previously served as our Chief Scientific Officer for Chemistry, and has served as a member of our Board of Directors since the Company’s formation in December 2012. Since August 2022, Dr. Brown has also served as Vice Dean of Research, Professor of Internal Medicine and the Prudence and Louis Ryan endowed chair in translational research at Eastern Virginia Medical School. Previously, he was Director of the Center for Drug Discovery at the George Mason University from 2020 to 2022 and Director of the Inova Center for Drug Discovery and Development from 2016 to 2020. Dr. Brown was a founder of Rivanna Pharmaceuticals in 2004 and co-founder, Chairman and CEO of Trocar Pharma in 2020, both of which are Virginia-based biopharmaceutical companies engaged in the discovery and development of novel small molecule therapeutics for the treatment of neurological, oncological, and infectious diseases. Dr. Brown has also served as Director of the Drug Discovery Center at Georgetown University Medical School from 2012 to 2016 and principal investigator of the NIH/NCI funded Chemical Diversity Center from 2010 to 2015. Dr. Brown brings to Shuttle Pharma 25 years of experience in drug discovery with over 100 publications and 67 issued patents, including discovery of novel HDAC inhibitors. Dr. Brown was a 2015 recipient of the Percy Julian Award by the National Organization of Black Chemists and Chemical Engineers for significant contributions in pure and/or applied research in science. He has served on government committees including the NIH Experimental Therapeutics Study Section, the NIH Drug Discovery and Molecular Pharmacology Study Section and was a scientific counselor to the U.S. Secretary of Health. Dr. Brown holds a Ph.D. in synthetic chemistry from the University of Alabama, and an M.D. from the University of Virginia. He is an elected fellow of the National Academy of Inventors (FNAI). His extensive experience and expertise in drug discovery makes him uniquely qualified to guide the company’s drug discovery program as a member of our Board of Directors. A Steven Richards. Mr. Richards was appointed to be a member of our Board of Directors in 2019. He is CEO and Founder of Endurance Media, a media finance company based in Santa Monica, California, that launched in 2014 with a strategic alliance with eOne Entertainment and a mandate to produce and finance commercially driven feature films. From 2006 to 2014, Mr. Richards served as Co-President and Chief Operating Officer of Silver Pictures where he oversaw all business activities and managed a team of more than 20 people responsible for film development, production, and financial information. From 2000 to 2006, he served as Chief Financial Officer at Silver Pictures and from 1995 to 2000 as Vice President, Finance, at Silver Pictures. Mr. Richards holds an MBA in Finance from UCLA, a BBA in accounting from Temple University, and holds his CPA license. We believe his experience as a chief financial officer and his knowledge of accounting will assist in providing guidance and oversight to our Board of Directors as we grow our Company. A Joshua Schafer. Mr. Schafer was appointed to be a member of our Board of Directors in 2019. From January 2023 until present, Mr. Schafer has been serving as the Chief Commercial Officer, and EVP Business Development at Zevra Therapeutics, a rare disease company. From November 2022 until January 2023, Mr. Schafer was interim CEO and Chair of the board of directors at PHARNEXT, an entity he has served on the board of directors since July 2020. From December 2020 until November 2022, Mr. Schafer served as Senior Vice President and General Manager, Autoimmune and Rare Disease Business for Mallinckrodt Pharmaceuticals Incorporated. In addition, he served as Chief Strategy and Business Development Officer from September 2019 until December 2020, and from 2015 to September 2019 he was SCP of Business Development and General Manager of International Operations at Mallinckrodt Pharmaceuticals. From 2009 until 2015, he served as Vice President and Oncology Therapeutic Area Head at Astellas Pharmaceuticals Incorporated, where he was responsible for building the company’s global oncology franchise. From 2000 until 2009, Mr. Schafer served in positions of increasing seniority at Takeda Pharmaceuticals North America, including Manager and Senior Manager, New Product and New Business Development; Senior Product Manager, Gastrointestinal Marketing; and Director, Oncology and Renal Marketing and Commercial Development. He began working in the healthcare and pharmaceutical industry in 1998 and has served in various positions including management consulting at Accenture (formerly Anderson Consulting), G.D. Searle & Co. (later acquired by Pfizer) and Cognia Corporation. He received his Bachelor of Arts in Biology and German at the University of Notre Dame, his MS in Biotechnology from Northwestern University and his MBA from Northwestern University. We believe Mr. Schafer’s extensive experience in pharmaceutical strategy, marketing and business development will assist our Board of Directors’ oversight role as we build and develop our Company. A 76 A Chris H. Senanayake, Ph.D. Dr. Senanayake was appointed to be a member of the Company’s Board of Directors in 2021. In 2019, Dr. Senanayake founded TCG GreenChem, Inc., a U.S. subsidiary of TCG Lifesciences Pvt. Ltd., a leading global Contract Research and Manufacturing Services (CRAMS) company in the area of drug discovery, development and commercialization, where he serves as chief executive officer. Dr. Senanayake has more than 30 years of pharmaceutical industry experience, making him an invaluable asset to Shuttle Pharma’s mission as the Company advances its pharmaceutical candidates in clinical trials. He has held positions of Senior Scientist at Dow Chemical, and Research Fellow at Merck & Co, Inc. (from 1990 to 1996), Director and Executive Director of Process Research at Sepracor, Inc. (1996 to 2002), Director of Chemical Development and Vice President of Chemical Development for Boehringer Ingelheim Pharmaceuticals, Inc. In 2018, he was appointed as the CEO of Asta GreenChem, Inc in Richmond VA and Astatech (Chengdu) Biopharmaceuticals Corp. in China. He has a record of leading and delivering high complexity APIs for manufacturing. Dr. Senanayake participated in development activities of many drugs, including multi-billion-dollar blockbuster drugs, such as Crixivan, Lunesta, Jardiance, Formotorol, Desvenlafaxine and other drug candidates. He is co-author of 425 scientific publications and is co-inventor of more than 150 patents. Dr. Senanayake received his Ph.D. in synthetic organic chemistry at Wayne State University, where he developed the total synthesis of complex natural products and completed the first total synthesis of grossheimin at the guaniloidic family. In his postdoctoral fellowship, he conducted total synthesis of polyl systems such as amphotericin B, compactin and C-nucleosides. We believe Dr. Senanayake’s detailed and in-depth experience as an executive and developer of pharmaceuticals will enable him to provide value to us by introducing potential joint venture partners, as well as enhancing our oversight through his in-depth understanding of and experience in the pharmaceuticals industry. A Bette Jacobs, Ph.D. Dr. Jacobs was appointed to be a member of the Company’s Board of Directors in October 2022. Dr. Jacobs is an experienced researcher, administrator, and businesswoman currently serving as a professor in the department of health systems administration at Georgetown University and as a distinguished scholar at the O&T’s Neill Institute for National and Global Health Law. Dr. Jacobs holds her Ph.D. from the University of Texas and is noted for her groundbreaking transdisciplinary and cross-sector work in systems design. As a voting member of the Cherokee Nation, she has lifetime involvement in equity programs and has testified before Congress. In addition to serving on several start-up boards, Dr. Jacobs founded the National Coalition of Ethnic Minority Nurse Associations funded by the NIH National Institute of General Medical Sciences. Prior to her current role at Georgetown, she served as dean at the Georgetown School of Nursing and Health Studies, vice president for Honda of America Manufacturing, associate director of applied research at UAB Civitan International Research Center and acting dean of graduate studies and research at California State University. She has been a fellow and visiting professor at the University of Oxford and an academic guest scholar and lecturer at several acclaimed universities worldwide. Her wealth of experience in research, administration and serving on boards coupled with her unique background and perspectives makes her ideally suited to serving as a member of our Board of Directors. A Scientific Advisory Committee A Theodore L. Phillips, M.D. has served as the Chair of our Scientific Advisory Committee since 2018. He held the position of Chief Medical Officer and Clinical Director at Shuttle Pharmaceuticals from 2014 until 2018. Dr. Phillips’ distinguished career has included positions of Chair of the Department of Radiation Oncology (from 1978 to 1998) and Associate Director (from 1996 to 1999) of the UCSF Cancer Center at the University of California at San Francisco. He is highly experienced in radiation oncology clinical trials of hypoxic radiation sensitizers. Dr. Phillips served as the principal investigator of the SBIR contract for the Phase I clinical trial of Ropidoxuridine. He previously served as Associate Director of the Northern California Oncology Group from 1983-1990, president of the American Society of Therapeutic Radiation Oncologists from 1984 to 1985 and is an elected member of the Institute of Medicine of the National Academy of Science. Dr. Phillips holds a BS degree from Dickinson College in Carlisle, Pennsylvania and a MD from the University of Pennsylvania. He provides advice to the leadership team to help design and implement clinical trials of radiation therapy and radiation response modifying drugs. A Ralph R. Weichselbaum, M.D. has served as Scientific Advisor to Shuttle Pharmaceuticals for translational research for the discovery and development of radiation response modifiers since 2013. Dr. Weichselbaum is the Daniel K. Ludwig Professor and Chairman of the Department of Radiation and Cellular Oncology, the University of Chicago, a position he has held since 1985. He is also an elected member of the Institute of Medicine, National Academy of Sciences. He has devoted his career to translational research in cancer with combined radiotherapy and chemotherapy. Dr. Weichselbaum and his colleagues conceived a genetic radiotherapy and developed viral constructs for use in clinical tumor radiation sensitization. These were commercialized as TNFerade (GenVec, Inc.) and tested in a Phase I clinical trial in prostate cancer and a Phase III clinical trial for pancreatic cancer. A 77 A J. Martin Brown, Ph.D. has served as a Scientific Advisor to Shuttle Pharmaceuticals for translational research for the development of hypoxic radiation sensitizers since 2017. Dr. Brown received his Ph.D. in Cancer Biology from Oxford University in 1968 and was Director of the Division of Radiation and Cancer Biology at Stanford University from 1984 to 2004. He is an expert in the radiation biology of hypoxia in cancers and has more than 300 peer-reviewed published articles. He has received awards in recognition of his work, including the Gold Medal, American Society for Therapeutic Radiology and Oncology (1999), the Failla Memorial Award, Radiation Research Society (2000), the Weiss Medal, Association for Radiation Research (2001) and the Henry S. Kaplan Distinguished Scientist Award, International Association for Radiation Research (2007). He developed etanidazole, a hypoxic radiation sensitizer, and tirapazamine, a hypoxic cytotoxic drug, from bench to clinical trials. A Alejandro Villagra, Ph.D. has served as a Scientific Advisor to Shuttle Pharmaceuticals with expertise in cellular signaling pathways, epigenetics and immunology since 2017. Dr. Villagra received his Ph.D. in Molecular Biology from the University of Concepcion, in Chile in 2004 and completed post-graduate training at the H. Lee Moffitt Cancer Center and Research Institute in Tampa, Florida in Molecular Immunology in 2009, in the Laboratory of Eduardo Sotomayor, MD. He joined the faculty of the Moffitt Cancer Center and Research Institute, as a research scientist from 2009 through 2015 and advanced to Assistant Professor of Oncologic Sciences. He became an Assistant Professor in the Department of Biochemistry and Molecular Medicine at the George Washington University (GWU) School of Medicine and Health Sciences in 2015, as a member of the GWU Cancer Center. His research is focused on molecular and cellular roles of histone deacetylases (HDACs) in tumor immunology and as adjuvants for immunotherapy of cancers. A Joseph Armstrong, III, Ph.D. joined as a Scientific Advisor to Shuttle Pharmaceuticals in 2021. He received his Ph.D. from the University of Colorado in 1988, completed his post-doctoral work at the University of Virginia at Charlottesville and holds the position of Chief Operating Officer at and Global Head of Business Development TCG GreenChem, Inc. He provides industry experience in chemistry, drug development and process research, having previously held positions at Merck & Co. Inc. in Rahway, NJ and in the U.K. for two pharmaceutical companies in the areas of Pharmaceutical Research and Development. His primary areas of focus have been in the design and implementation of efficient synthesis of drug candidates amenable to large scale production. Dr. Armstrong led the development team that designed, developed and implemented the manufacturing process for the new treatment for Type II diabetes, Januvia TM. His team was awarded the Solvias Prize in 2004 (Basel, Switzerland), the IChemE Aztra-Zeneca Award for Green Chemistry and Engineering in 2005 (London, England), Dr. Armstrong has more than 40 publications and holds 10 patents. A Family Relationships A Dr. Anatoly Dritschilo and Peter Dritschilo are father and son. There are no other family relationships among our directors and executive officers. A Involvement in Certain Legal Proceedings A During the past ten years, other than Peter Dritschilo, our President, who filed for personal bankruptcy under Chapter 7 of the U.S. Bankruptcy Code in 2014, no director, executive officer, promoter, or control person of the Company has been involved in the following: A (1) A petition under the Federal bankruptcy laws or any state insolvency law which was filed by or against, or a receiver, fiscal agent or similar officer was appointed by a court for the business or property of such person, or any partnership in which he was a general partner at or within two years before the time of such filing, or any corporation or business association of which he was an executive officer at or within two years before the time of such filing; A A (2) Such person was convicted in a criminal proceeding or is a named subject of a pending criminal proceeding (excluding traffic violations and other minor offenses); A A A (3) Such person was the subject of any order, judgment, or decree, not subsequently reversed, suspended, or vacated, of any court of competent jurisdiction, permanently or temporarily enjoining him from, or otherwise limiting, the following activities: A A i. Acting as a futures commission merchant, introducing broker, commodity trading advisor, commodity pool operator, floor broker, leverage transaction merchant, any other person regulated by the Commodity Futures Trading Commission, or an associated person of any of the foregoing, or as an investment adviser, underwriter, broker or dealer in securities, or as an affiliated person, director or employee of any investment company, bank, savings and loan association or insurance company, or engaging in or continuing any conduct or practice in connection with such activity; A 78 A A ii. Engaging in any type of business practice; or A A A iii. Engaging in any activity in connection with the purchase or sale of any security or commodity or in connection with any violation of Federal or State securities laws or Federal commodities laws; A A (4) Such person was the subject of any order, judgment, or decree, not subsequently reversed, suspended or vacated, of any Federal or State authority barring, suspending or otherwise limiting for more than 60 days the right of such person to engage in any activity described in paragraph (f)(3)(i) below, or to be associated with persons engaged in any such activity; A A A (5) Such person was found by a court of competent jurisdiction in a civil action or by the Commission to have violated any Federal or State securities law, and the judgment in such civil action or finding by the Commission has not been subsequently reversed, suspended, or vacated; A A A (6) Such person was found by a court of competent jurisdiction in a civil action or by the Commodity Futures Trading Commission to have violated any Federal commodities law, and the judgment in such civil action or finding by the Commodity Futures Trading Commission has not been subsequently reversed, suspended, or vacated; A A A (7) Such person was the subject of, or a party to, any Federal or State judicial or administrative order, judgment, decree, or finding, not subsequently reversed, suspended, or vacated, relating to an alleged violation of: A A i. Any Federal or State securities or commodities law or regulation; or A A A ii. Any law or regulation respecting financial institutions or insurance companies including, but not limited to, a temporary or permanent injunction, order of disgorgement or restitution, civil money penalty or temporary or permanent cease-and-desist order, or removal or prohibition order; or A A A iii. Any law or regulation prohibiting mail or wire fraud or fraud in connection with any business entity; or A A (8) Such person was the subject of, or a party to, any sanction or order, not subsequently reversed, suspended or vacated, of any self-regulatory organization (as defined in Section 3(a)(26) of the Exchange Act (15 U.S.C. 78c(a)(26))), any registered entity (as defined in Section 1(a)(29) of the Commodity Exchange Act (7 U.S.C. 1(a)(29))), or any equivalent exchange, association, entity or organization that has disciplinary authority over its members or persons associated with a member. A Board of Directors A Our board of directors is responsible for overseeing the Company’s business consistent with its fiduciary duty to the stockholders. This significant responsibility requires highly skilled individuals with various qualities, attributes and professional experience. There are general requirements for service on the board of directors that are applicable to directors and there are other skills and experience that should be represented on the board of directors as a whole but not necessarily by each director. Our Corporate Governance and Nominating Committee, detailed

[illegible]

on the anniversary of the grant date. (2) These restricted stock units vest in three installments on the anniversary of the grant date. (3) 2018 Equity Incentive Plan (4) Our 2018 Equity Incentive Plan provides for equity incentives to be granted to our employees, executive officers or directors and to key advisers and consultants. Equity incentives may be in the form of stock options with an exercise price of not less than the fair market value of the underlying shares as determined pursuant to the 2018 Equity Incentive Plan, restricted stock awards, other stock-based awards, or any combination of the foregoing. The 2018 Equity Incentive Plan is administered by the Company's compensation committee or, alternatively, if there is no compensation committee, the Company's board of directors. We have reserved 3,000,000 shares of our common stock for issuance under the Plan, of which 1,187,189 shares have been granted under the Plan as of the date of this registration statement. (5) Director Compensation (6) Each of our non-employee directors, pursuant to the terms of director agreements (the "Director Agreements"), between each of the directors and the Company, receives compensation on an annual basis consisting of \$25,000 in cash, payable in quarterly installments commencing 90 days after completion of our initial public offering, and received RSUs upon their respective dates of election, three of whom received \$75,000 in RSUs and two of whom received \$100,000 in RSUs. The RSUs vest over a two-year period in one-third increments, with one-third vesting immediately upon signing and one-third vesting on each of the first and second anniversary of election. In addition, non-employee directors will also be reimbursed for out-of-pocket costs incurred in connection with attending meetings. (7) 85 (A) BENEFICIAL OWNERSHIP OF SECURITIES (8) The following table sets forth, as of the date of this registration statement, the beneficial ownership of our common stock by each director and executive officer, by each person known by us to beneficially own 5% or more of our common stock and by directors and executive officers as a group. Unless otherwise stated, the address of the persons set forth in the table is c/o Shuttle Pharmaceuticals Holdings, Inc., 401 Professional Drive, Suite 260, Gaithersburg, MD 20879. (9) Beneficial ownership is determined in accordance with SEC rules and generally includes voting or investment power with respect to securities. Unless otherwise indicated, the stockholders listed in the table below have sole voting and investment power with respect to the shares indicated. (10) All share ownership figures set forth in the below table include shares of our common stock issuable upon securities convertible or exchangeable into shares of our common stock, whether or not convertible or exchangeable within 60 days of the effective date of this registration statement. Such shares are deemed outstanding and beneficially owned by such person only for purposes of computing his or her percentage ownership, but not for purposes of computing the percentage ownership for any other person. (11) As of February 1, 2025, there were issued and outstanding 4,076,058 shares of common stock. (12) Names and addresses (13) Number of shares of common stock beneficially owned (14) % (15) Percentage of shares of common stock beneficially owned (16) Directors and Named Executive Officers (17) (18) Anatoly Dritschilo, M.D. (19) (20) 862,154 (21) 21.20% (22) Timothy Lorber (23) (24) (25) Milton Brown, M.D., Ph.D. (26) 137,869 (27) 3.4% (28) Mira Jung, Ph.D. (29) 135,715 (30) 3.3% (31) Michael Vander Hoeck (32) 12,982 (33) (34) Peter Dritschilo (35) 820 (36) (37) Tyvin A. Rich, M.D. (38) 304 (39) (40) Steven Richards (41) 214 (42) (43) Joshua Schafer (44) 214 (45) (46) Chris H. issue discount of \$300,000. As such, the Investor paid for the January 2023 Convertible Note by delivering \$4,000,000 in cash consideration to the Company. Boustead served as the sole placement agent for the private placement (the “January 2023 Private Placement”) of the January 2023 Convertible Note and January 2023 Warrant. Boustead received a placement agent fee of \$320,000 at the closing of the January 2023 Private Placement, representing 7.0% of the gross cash proceeds at the closing plus 1% in non-accountable expenses. In addition, Boustead received a placement agent warrant to purchase 71,266 shares (8,909 shares on a post-2024 Reverse Split basis) of common stock, representing 7.0% of the warrant shares issued in the January 2023 Private Placement. After deducting the placement agent fee and our estimated expenses associated with the January 2023 Private Placement, our net cash proceeds at the closing were approximately \$3,590,000. As of September 30, 2024, the January 2023 Convertible Note had been paid in full. A The SPA A The SPA contains certain representations and warranties, covenants and indemnities customary for similar transactions. Under the SPA, we also agreed to the following additional covenants: A — So long as the January 2023 Convertible Note remains outstanding, we will not effect or enter into an agreement to effect any variable rate transaction other than a bona fide at-the-market offering or equity line of credit. A A — We obtained majority stockholder consent approving the offering and the issuance of common stock upon conversion of the January 2023 Convertible Note and exercise of the January 2023 Warrant, as is required under the rules of the Nasdaq, and subsequently filed an information statement on Schedule 14C (the “Information Statement”) informing all stockholders of the action and mailed such Information Statement to all stockholders within 70 days of closing. A 91 A A In addition, we granted the Investor participation rights in future equity and equity-linked offerings of securities, subject to certain limited exceptions, during the two years after the later of (a) the closing or (b) the date the January 2023 Convertible Note no longer remains outstanding, in an amount of up to 30% of the securities being sold in such offerings. A January 2023 Convertible Note A General A The January 2023 Convertible Note was issued to the Investor on January 11, 2023 and matures on March 11, 2025 (subject to extension in certain circumstances, including bankruptcy and outstanding events of default). A Amortization A Starting on the earlier of (x) the date of a registration statement which registers the shares underlying the January 2023 Convertible Note is declared effective by the SEC and (y) February 28, 2023, then on the first trading day of the month for each month thereafter, and on the maturity date (each, an “Installment Date”), subject to certain exceptions and unless deferred as described below, the Company is required to make monthly amortization payments equal to 1/26th of the unrestricted principal (and related unrestricted original issue discount) and interest of the January 2023 Convertible Note payable (the “Installment Amount”), which must be satisfied in cash at a redemption price equal to 105% of such Installment Amount (each, an “Installment Redemption”). A Notwithstanding the foregoing, the noteholder may, at its sole option, elect to defer any Installment Amount until a subsequent Installment Date selected by the noteholder, provided that any such deferred amounts shall not continue to accrue interest unless the deferral is at the request of the Company. A Interest A The January 2023 Convertible Note bears interest at a rate of 5% per annum and, upon any conversion or redemption, shall include a make-whole of interest from such date of determination through the maturity date. After the occurrence and during the continuance of an Event of Default (as defined in the January 2023 Convertible Note), the January 2023 Convertible Note will accrue interest at the rate of 15% per annum. See “Events of Default” below. A Conversion; Alternate Conversion upon Event of Default A The January 2023 Convertible Note is convertible, at the option of the noteholder, into shares of our common stock at the lower of (i) \$18.80 per share (post Reverse Split), (ii) 90% of the three lowest VWAPs in the 15 trading days prior to the payment date or (iii) 90% of the VWAP on the trading day prior to the payment date. The conversion price is subject to full ratchet antidilution protection upon any subsequent transaction at a fixed price lower than the conversion price then in effect and standard adjustments in the event of any stock split, stock dividend, stock combination, recapitalization or other similar transaction. If we enter into any agreement to issue (or issue) any variable rate securities, other than a bona fide at-the-market offering or equity line of credit, the noteholder has the additional right to substitute such variable price (or formula) for the conversion price. A If an Event of Default has occurred under the January 2023 Convertible Note, the noteholder may elect to alternatively convert the January 2023 Convertible Note at a redemption premium of 115% of the conversion amount. As of September 30, 2024, the January 2023 Convertible Note was paid in full. A Subsequent Placement Optional Redemption and Future Right of Participation A At any time after the earlier of the date a noteholder becomes aware of any placement by us of equity or equity-linked securities or the date of consummation of such a placement, subject to certain limited exceptions, the noteholder will have the right to have us redeem a portion of each January 2023 Convertible Note not in excess of 30% of the net proceeds from such placement at a redemption price of 100% of the portion of the January 2023 Convertible Note subject to redemption. In addition, through March 11, 2026, the noteholder has the right to be notified of any future offering of securities and to participate in up to 30% of the total offering amount. A 92 A A Covenants A We are subject to certain customary affirmative and negative covenants regarding the incurrence of certain indebtedness, the existence of liens, the repayment of indebtedness, the payment of cash in respect of dividends, distributions or redemptions, and the transfer of assets, among other matters. A January 2023 Warrant A In addition to the January 2023 Convertible Note, we issued a January 2023 Warrant exercisable for four (4) years for the purchase of an aggregate of up to 127,260 shares of common stock (the “January 2023 Warrant Shares”), at an adjusted estimated exercise price of \$0.48 per share. The number of January 2023 Warrant Shares and exercise price are each subject to adjustment as provided under the terms of the January 2023 Warrant. If, at the time of exercise of the January 2023 Warrant, there is no effective registration statement registering, or no current prospectus available for, the issuance of the January 2023 Warrant Shares to the Investor, and the registration statement is not subject to SEC review and the Company has otherwise affirmatively failed to maintain such registration statement’s effectiveness, then the January 2023 Warrant may also be exercised, in whole or in part, by means of a “cashless exercise.” The January 2023 Warrant may not be exercised if, after giving effect to the exercise the Investor, would beneficially own in excess of 4.99% of the number of shares of common stock outstanding immediately after giving effect to the issuance of the January 2023 Warrant Shares. At the Investor’s option, the ownership limitation blocker may be raised or lowered to any other percentage not in excess of 9.99%, as applicable, except that any raise will only be effective upon 61-days’ prior notice to the Company. A If the Company issues or sells, or the Company publicly announces the issuance or sale of, any shares of common stock, or convertible securities or options issuable or exchangeable into common stock (a “New Issuance”), under which such common stock is sold for a consideration per share less than the exercise price then in effect, the exercise price of the January 2023 Warrant will be adjusted to the New Issuance price in accordance with the formulas provided in the January 2023 Warrant. Any such adjustment will not apply with respect to the issuance of Excluded Securities (as defined in the January 2023 Warrant). In addition, if the Company enters into a Fundamental Transaction (as defined in the January 2023 Warrants) at any time that a January 2023 Warrant is outstanding, then, upon any subsequent exercise of the January 2023 Warrant, the Investor will have the right to receive, for each January 2023 Warrant Share that would have been issuable upon such exercise immediately prior to the occurrence of such Fundamental Transaction, the number of shares of common stock of the successor or acquiring corporation or of the Company, if it is the surviving corporation, and any additional consideration receivable as a result of such Fundamental Transaction by a holder of the number of shares of common stock for which the January 2023 Warrant is exercisable immediately prior to such Fundamental Transaction, provided, further, that if holders of common stock are not offered or paid any consideration in such Fundamental Transaction, such holder of common stock will be deemed to have received common stock of the successor entity (which entity may be the Company following such Fundamental Transaction) in such Fundamental Transaction. A Registration Rights Agreement A Pursuant to a Registration Rights Agreement, dated as of January 11, 2023, between the Investor and the Company, we have granted certain registration rights to the noteholder and January 2023 Warrant holder. The Registration Rights Agreement requires us to have a registration statement declared effective by the 60th day following the date of the Registration Rights Agreement (of March 11, 2023), or the 90th day (or April 10, 2023) following the date of the Registration Rights Agreement in the event such registration statement is subject to SEC review. It also grants the Investor customary “piggyback” registration rights. A 93 A A Additional Information A The foregoing is only a summary of the material terms of the SPA, the January 2023 Convertible Note, the January 2023 Warrant, the Registration Rights Agreement, and the other ancillary transaction documents, and does not purport to be a complete description of the rights and obligations of the parties thereunder. A October 2024 Convertible Notes and Warrants Offering A In October 2024, we sold a total of \$831,579 of 5% original issue discount senior secured convertible notes, which notes convert into 732,134 shares of common stock, subject to adjustment, and warrants to purchase 329,469 shares of common stock exercisable at a variable-weighted average of \$1.42 per share. The convertible notes have a term of one year, are may be converted at any time by the holder and are subject to mandatory conversion at the end of the one-year holding period in the event the convertible notes are registered. The warrants have a term of five years and contain standard anti-dilution protections. A October 2024 Public Offering Warrants A In conjunction with our October 2024 public offering, we issued pre-funded warrants to purchase 2,555,246 shares of common stock exercisable at \$0.001 per share, and warrants to purchase a total of 2,950,820 shares of common stock exercisable at \$1.40 per share. The warrants are exercisable, at the option of the holder, for a period of five years and are subject to either a 4.99% or 9.99% ownership limitation. However, any holder may increase or decrease such percentage so long as it does not exceed 9.99%. The pre-funded warrants and warrants are not transferrable without the consent of the Company and the holders have no voting rights until the warrants are exercised. A Anti-Takeover Effects of Provisions of our Certificate of Incorporation, our Bylaws and Delaware Law A Some provisions of Delaware law, our certificate of incorporation and our bylaws contain provisions that could make the following transactions more difficult: acquisition of us by means of a tender offer; acquisition of us by means of a proxy contest or otherwise; or removal of our incumbent officers and directors. It is possible that these provisions could make it more difficult to accomplish or could deter transactions that stockholders may otherwise consider to be in their best interest or in our best interests, including transactions that might result in a premium over the market price for our shares. A These provisions, summarized below, are expected to discourage coercive takeover practices and inadequate takeover bids. These provisions are also designed to encourage persons seeking to acquire control of us to first negotiate with our Board of Directors. We believe that the benefits of increased protection of our potential ability to negotiate with the proponent of a non-friendly or unsolicited proposal to acquire or restructure us outweigh the disadvantages of discouraging these proposals because negotiation of these proposals could result in an improvement of their terms. A Delaware Anti-Takeover Statute A In general, Delaware corporations are subject to Section 203 of the DGCL, which prohibits a Delaware corporation from engaging in any business combination with any interested stockholder for a period of three years after the date that such stockholder became an interested stockholder, with the following exceptions: A A — before such date, the board of directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested holder; A A — upon completion of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction began, excluding for purposes of determining the voting stock outstanding (but not the outstanding voting stock owned by the interested stockholder) those shares owned (i) by persons who are directors and also officers and (ii) employee stock plans in which employee participants do not have the right to determine confidentially whether shares held subject to the plan will be tendered in a tender or exchange offer; A A — on or after such date, the business combination is approved by the board of directors and authorized at an annual or special meeting of the stockholders, and not by written consent, by the affirmative vote of at least 66 2/3% of the outstanding voting stock that is not owned by the interested stockholder; or A A — the corporation does not have a class of voting stock that is: (i) listed on a national securities exchange; or (ii) held of record by more than 2,000 stockholders, unless any of the foregoing results from action taken, directly or indirectly, by an interested stockholder or from a transaction in which a person becomes an interested stockholder. A In general, Section 203 defines business combination to include the following: A A — any merger or consolidation involving the corporation and the interested stockholder; A A — any sale, transfer, pledge, or other disposition of 10% or more of the assets of the corporation involving the interested stockholder; A A — subject to certain exceptions, any transaction that results in the issuance or transfer by the corporation of any stock of the corporation to the interested stockholder; A 94 A A — any transaction involving the corporation that has the effect of increasing the proportionate share of the stock or any class or series of the corporation beneficially owned by the interested stockholder; or A A — the receipt by the interested stockholder of the benefit of any loss, advances, guarantees, pledges or other financial benefits by or through the corporation. A Section 203 defines interested stockholder as an entity or person beneficially owning 15% or more of the outstanding voting stock of the corporation or any entity or person affiliated with or controlling or controlled by such entity or person. A Nasdaq Listing A Our shares of common stock are traded on The Nasdaq Capital Market under the symbol “SHPH.” We do not intend to apply for listing of the Warrants on any securities exchange or other nationally recognized trading system. A Transfer Agent A The transfer agent and registrar of our common stock is VStock Transfer, LLC, of Woodmere, New York. Our transfer agent’s telephone number is (212) 828-8436. A DESCRIPTION OF SECURITIES WE ARE OFFERING A We are offering, on a firm commitment underwritten basis up to [*] shares of common stock, or Pre-Funded Warrants in lieu thereof. A Common Stock A The material terms and provisions of our common stock are described under the caption “Description of Capital Stock” in this prospectus. A 95 A A Pre-Funded Warrants A The following summary of certain terms and provisions of the Pre-Funded Warrants that are being offered hereby is not complete and is subject to and qualified in its entirety by the provisions of the forms of Pre-Funded Warrants which is filed as an exhibit to the registration statement of which this prospectus is a part. Prospective investors should carefully review the terms and provisions of the form of Pre-Funded Warrant for a complete description of the terms and conditions of the Pre-Funded Warrants. A The term “pre-funded” refers to the fact that the purchase price of our common stock in this offering includes almost the entire exercise price that will be paid under the Pre-Funded Warrants, except for a nominal remaining exercise price of \$0.001 per share. The purpose of the Pre-Funded Warrants is to enable investors that may have restrictions on their ability to beneficially own more than 4.99% (or, upon election of the holder, 9.99%) of our outstanding shares of common stock following the consummation of this offering the opportunity to make an investment in the Company without triggering their ownership restrictions, by receiving Pre-Funded Warrants in lieu of our common stock which would result in such ownership of more than 4.99% (or 9.99%), and receive the ability to exercise their option to purchase the shares underlying the Pre-Funded Warrants at such nominal price at a later date. A Duration and Exercise Price A Each Pre-Funded Warrant offered hereby will have an initial exercise price of \$0.001 per share. The Pre-Funded Warrants will be immediately exercisable and may be exercised at any time until the Pre-Funded Warrants are exercised in full. The exercise price and number of shares of common stock issuable upon exercise is subject to appropriate adjustment in the event of stock dividends, stock splits, reorganizations or similar events affecting our common stock and the exercise price. A Exercise Limitation A The Pre-Funded Warrants will be exercisable, at the option of each holder, in whole or in part, by delivering a duly executed exercise notice accompanied by payment in full for the number of purchased upon such exercise (except in the case of a cashless exercise as discussed below). A holder (together with its affiliates) may not exercise any portion of the Pre-Funded Warrant to the extent that the holder would own more than 4.99% (or, at the election of a purchaser, 9.99%) of the outstanding common stock immediately after exercise, except that upon at least 61 days’ prior notice from the holder to us, the holder may increase the amount of ownership of outstanding stock after exercising the holder’s Pre-Funded Warrants up to 9.99% of the number of shares of common stock outstanding immediately after giving effect to the exercise, as such percentage ownership is determined in accordance with the terms of the Pre-Funded Warrants. No fractional shares of common stock will be issued in connection with the exercise of a Pre-Funded Warrant. In lieu of fractional shares, we will pay the holder an amount in cash equal to the fractional amount multiplied by the exercise price. A Fundamental Transaction A In the event of a fundamental transaction, as described in the Pre-Funded Warrants and generally including any reorganization, recapitalization or reclassification of our common stock, the sale, transfer or other disposition of all or substantially all of our properties or assets, our consolidation or merger with or into another person, the acquisition of more than 50% of our outstanding voting securities, the holders of the Pre-Funded Warrants will be entitled to receive upon exercise of the Pre-Funded Warrants the kind and amount of securities, cash or other property that the holders would have received had they exercised the Pre-Funded Warrants immediately prior to such fundamental transaction, other than one in which a successor entity that is a publicly traded corporation (whose stock is quoted or listed for trading on a national securities exchange, including, but not limited to, the New York Stock Exchange, the NYSE American, the Nasdaq Global Select Market, the Nasdaq Global Market or the Nasdaq Capital Market) assumes the common warrant such that the warrant shall be exercisable for the publicly traded common stock of such successor entity. A Transferability A Subject to applicable laws, a Pre-Funded Warrant may be transferred at the option of the holder upon surrender of the Pre-Funded Warrant to us together with the appropriate instruments of transfer. A Exchange Listing A We do not intend to list the Pre-Funded Warrants on any securities exchange or nationally recognized trading system. A No Rights as a Stockholder A Except as otherwise provided in the Pre-Funded Warrants or by virtue of such holder’s ownership of, the holders of the Pre-Funded Warrants do not have the rights or privileges of holders of our common stock, including any voting rights, until they exercise their Pre-Funded Warrants. A 96 A A UNDERWRITING A We have entered into an underwriting agreement with WestPark Capital, Inc., or the Underwriter, with respect to the securities subject to this offering. A Subject to certain conditions, we have agreed to sell to the Underwriter such securities listed next to their names in the below table at the public offering

price less the underlying discounts and commissions set forth on the cover page of this prospectus. We have agreed to indemnify the Underwriter against specified liabilities, including liabilities under the Securities Act, and to contribute to payments the Underwriter may be required to make in respect thereof. A UnderwriterA Number of Shares of Common StockA WestPark Capital, Inc.A A-A AAAAAAAA TotalA AAA Subject to the terms and conditions set forth under the underwriting agreement, the underwriter has agreed to purchase [*] shares of common stock and Pre-Funded Warrants offered by this prospectus. A The underwriter is offering the shares of common stock, and Pre-Funded Warrants in lieu thereof, subject to various conditions and may reject all or part of any order. The Underwriter has advised us that they propose initially to offer the shares of common stock to the public at the public offering price set forth on the cover page of this prospectus and to dealers at a price less a concession not in excess of \$[*] per share of common stock, or Pre-Funded Warrant in lieu thereof. After the shares of common stock and Pre-Funded Warrants are released for sale to the public, the Underwriter may change the offering price, the concession, and other selling terms at various times. A Discounts and Commissions A The following table provides information regarding the amount of the discounts and commissions to be paid to the Underwriter by us, before expenses. The information assumes either no exercise or full exercise of the over-allotment option we granted to the Underwriter: A Per Share or per Pre-Funded WarrantA TotalA Public offering priceA \$AA AAAAAAAAAA AAAAAAAAAA Underwriting discounts and commissions (4%)A \$AA \$A Proceeds, before expenses, to usA \$AA \$A A The Company has agreed to reimburse the Underwriter for: (i) reasonable fees of the UnderwriterA legal counsel up to \$80,000, and (ii) non-accountable expenses including background checks, road show expenses (travel, accommodations, means and entertainment), memento transaction memorabilia, and courier and postage expenses in the amount of \$45,000. Prior to the effective date of this prospectus, we will have paid the Underwriter advances of \$45,000, including a \$25,000 retainer for its legal counsel and a \$20,000 retainer for its anticipated out-of-pocket costs. Such advance payments will be returned to us to the extent such out-of-pocket expenses are not actually incurred in accordance with FINRA Rule 5110(g)(4)(A). A We estimate that our total expenses of the offering, excluding the estimated underwriting discounts and commissions and excluding the non-accountable expense allowance, will be approximately \$[*]. A Right of FirstA Refusal A We have granted the Underwriter a right of first refusal for a period of three months commencing on the closing of the offering to act as sole advisor, investment bank, book-running manager and/or placement agent, as applicable, at the UnderwriterA sole discretion, for each and every public and private equity or debt financing transaction or merger and acquisition transaction by us, a subsidiary or any successor, on compensation terms customary to the Underwriter. The Underwriter shall have the sole right to determine whether or not any other broker dealer shall have the right to participate in any such offering and the economic terms of any such participation and the UnderwriterA decision to not so act for any one or more of such offerings shall not be deemed a waiver of its continuing rights under the right of first refusal.A The UnderwriterA s right of first refusal set forth in this paragraph shall be subject to FINRA Rule 5110(g). A Lock-Up Agreements A Pursuant to certain lock-up agreements, our executive officers, directors and holders of at least 5% of our common stock and securities exercisable for or convertible into common stock outstanding immediately upon the closing of this offering, have agreed, subject to certain exceptions, not to offer, sell, assign, transfer, pledge, contract to sell, or otherwise dispose of or announce the intention to otherwise dispose of, or enter into any swap, hedge or similar agreement or arrangement that transfers, in whole or in part, the economic risk of ownership of, directly or indirectly, engage in any short selling of any shares of common stock or securities convertible into or exchangeable or exercisable for any shares of common stock, whether currently owned or subsequently acquired, without the prior written consent of the Underwriter, for a period of sixty (60) days after the closing date of the offering. A The Underwriter, in its sole discretion, may release the common stock and other securities subject to the lock-up agreements described above in whole or in part at any time. When determining whether or not to release common stock and other securities from lock-up agreements, the Underwriter will consider, among other factors, the holderA s reasons for requesting the release, the number of shares of common stock and other securities for which the release is being requested and market conditions at the time. A In addition, we have agreed that, subject to certain exceptions, we will not (i) conduct any issuances of our common stock for a period of 60 days following closing of this offering or (ii) enter into a variable rate transaction (as defined in the securities purchase agreement) for a period of 120 days following closing of this offering; provided that following the closing date of this offering we will be permitted to enter into an agreement with [*] in connection with an offer to the market offering under Rule 415(a)(4) under the Securities Act and make sales thereunder. A Other Relationships A The Underwriter is a full-service financial institution engaged in various activities, which may include sales and trading, commercial and investment banking, advisory, investment management, investment research, principal investment, hedging, market making, brokerage and other financial and non-financial activities and services. The Underwriter may in the future provide various investment banking, commercial banking and other financial services for us and our affiliates for which it may in the future receive customary fees. A In the ordinary course of their various business activities, the Underwriter and certain of its respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers, and such investment and securities activities may involve securities and/or instruments issued by us and our affiliates. If the Underwriter or its respective affiliates have a lending relationship with us, they routinely hedge their credit exposure to us consistent with their customary risk management policies. The Underwriter and its respective affiliates may hedge such exposure by entering into transactions that consist of either the purchase of credit default swaps or the creation of short positions in our securities or the securities of our affiliates, including potentially the common stock offered hereby. Any such short positions could adversely affect future trading prices of the common stock offered hereby. The Underwriter and certain of their respective affiliates may also communicate independent investment recommendations, market color or trading ideas and/or publish or express independent research views in respect of such securities or instruments and may at any time hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments. A 97 A Regulation M A The Underwriter may be deemed to be an underwriter within the meaning of Section 2(a)(11) of the Securities Act, and any commissions received by it and any profit realized on the resale of the shares sold by it while acting as principal might be deemed to be underwriting discounts or commissions under the Securities Act. As an underwriter, each Underwriter would be required to comply with the requirements of the Securities Act and the Exchange Act, including, without limitation, Rule 415(a)(4) under the Securities Act and Rule 10b-5 and Regulation M under the Exchange Act. These rules and regulations may limit the timing of purchases and sales of shares by the Underwriter acting as principal. Under these rules and regulations, the Underwriter: A - may not engage in any stabilization activity in connection with our securities; and A - may not bid for or purchase any of our securities or attempt to induce any person to purchase any of our securities, other than as permitted under the Exchange Act, until it has completed its participation in the distribution. A Trading Market A Our common stock is listed on the Nasdaq Capital Market under the symbol SHPH.A We do not intend to apply for listing of the Warrants on any securities exchange or other nationally recognized trading system. A LEGAL MATTERS A The validity of the securities offered hereby and certain legal matters in connection with this offering relating to U.S. law will be passed upon for us by Dorsey & Whitney LLP, New York, NY. The Underwriter is represented by Lucosky Brookman LLP, Woodbridge, NJ, in connection with this offering. A EXPERTS A The consolidated financial statements of Shuttle Pharmaceuticals Holdings, Inc. (the Company) as of December 31, 2023 and 2022 and for the fiscal years then ended, have been audited by Forvis Mazars LLP, independent registered public accounting firm, as set forth in their report thereon, included in the CompanyA Annual Report on Form 10-K/A for the fiscal year ended December 31, 2023, and included herein. Such consolidated financial statements have been included herein in reliance upon such report given on the authority of such firm as experts in accounting and auditing. The report of Forvis Mazars LLP contains an explanatory paragraph regarding substantial doubt about the CompanyA s ability to continue as a going concern and an explanatory paragraph regarding a restatement of previously issued consolidated financial statements to correct misstatements. A WHERE YOU CAN FIND MORE INFORMATION A We filed with the SEC a registration statement under the Securities Act for the securities offered by this prospectus. This prospectus does not contain all of the information in the registration statement and the exhibits and schedule that were filed with the registration statement. For further information with respect to us and our securities, we refer you to the registration statement and the exhibits and schedule that were filed with the registration statement. Statements contained in this prospectus about the contents of any contract or any other document that is filed as an exhibit to the registration statement are not necessarily complete, and we refer you to the full text of the contract or other document filed as an exhibit to the registration statement. The SEC maintains an Internet website at <http://www.sec.gov> that contains reports, proxy and information statements, and other information regarding registrants that file electronically with the SEC. A We file periodic reports and current reports under the Exchange Act, including Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, and other information with the SEC. These periodic reports and other information are available for inspection and copying at the SEC regional offices, public reference facilities and on the website of the SEC referred to above. A We make available free of charge on or through our internet website our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. The information found on our website, <https://shuttlepharma.com>, other than as specifically included in this prospectus, is not part of this prospectus. A F-5 A -A Shuttle Pharmaceuticals Holdings, Inc. Notes to Unaudited Condensed Consolidated Financial Statements September 30, 2024 A Note 1 â€ Organization and Liquidity A Organization and Line of Business A Shuttle Pharmaceuticals Holdings, Inc. (â€œwe,â€ â€œus,â€ â€œour,â€ or the â€œCompanyâ€) was originally formed as Shuttle Pharmaceuticals, LLC in the State of Maryland on December 18, 2012. On August 12, 2016, the Company filed articles of conversion with the State of Maryland to convert from an LLC to a C corporation, at which time the Company changed its name to Shuttle Pharmaceuticals, Inc. (â€œShuttleâ€). In connection with the conversion the Company issued 5,625,000 shares of common stock in exchange for 100% of the outstanding membership interests in Shuttle prior to conversion. On June 4, 2018, Shuttle completed a reverse merger with Shuttle Pharmaceuticals Holdings, Inc. (then known as Shuttle Pharma Acquisition Corp, Inc.), a Delaware corporation, pursuant to which Shuttle, our operating entity, became a wholly-owned subsidiary of the Company. All share numbers referenced herein reflect a 1-for-8 reverse split of our common stock on a post-split basis, which was effective as of August 13, 2024 (see Note 2). A The Companyâ€™s primary purpose is to develop and commercialize unique drugs for the sensitization of cancers and protection of normal tissues, with the goal of improving outcomes for cancer patients receiving radiation therapy. Shuttle has deployed its proprietary technology to develop novel cancer immunotherapies, producing a pipeline of selective HDAC inhibitors for cancer and immunotherapy applications. The Companyâ€™s HDAC platform is designed to target candidate molecules with potential roles in therapeutics beyond cancer, including autoimmune, inflammatory, metabolic, neurological and infectious diseases. The Companyâ€™s Ropidoxuridine product, which is used with radiation therapy to sensitize cancer cells, was initially funded by a Small Business Innovation Research (â€œSBIRâ€) contract provided by the National Cancer Institute (â€œNCIâ€), a unit of the National Institutes of Health (â€œNIHâ€). Ropidoxuridine has been further developed through the Companyâ€™s collaborations with scientists at the University of Virginia for use in combination with proton therapy to improve patient survival. Historically, and prior to the Companyâ€™s initial public offering in September 2022, the Company has obtained funding to develop products through NIH grants, including a product to predict late effects of radiation with metabolite biomarkers and develop prostate cancer cell lines in health disparities research. A The production and marketing of the Companyâ€™s products and its ongoing research and development activities will be and are subject to extensive regulation by numerous governmental authorities in the United States. Prior to marketing in the United States, any products or combination of products developed by the Company must undergo rigorous preclinical (animal) and clinical (human) testing and an extensive regulatory approval process implemented by the Food and Drug Administration (â€œFDAâ€) under the Food, Drug and Cosmetic Act. There can be no assurance that the Company will not encounter problems in its clinical trials that will cause the Company or the FDA to delay or suspend the clinical trials. A The Companyâ€™s success will depend in part on its ability to obtain patents and product license rights, maintain trade secrets, and operate without infringing on the proprietary rights of others, both in the United States and in other countries. There can be no assurance that patents issued to or licensed by the Company will not be challenged, invalidated or circumvented, or that the rights granted thereunder will provide proprietary protection or competitive advantages to the Company now or in the future. A Liquidity and Going Concern A Our unaudited condensed consolidated financial statements are prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The Company has incurred losses since inception and has a net loss of approximately \$7.5 million and no revenues for the nine months ended September 30, 2024 and has a working capital deficit of approximately \$1.3 million as of September 30, 2024. The Company does not expect to generate positive cash flows from operating activities in the near future. A F-6 A -A In September 2024, the Companyâ€™s CEO provided \$250 thousand to the Company in exchange for a promissory note repayable in equal monthly installments of principal and interest over a term of one year. In October 2024, the Company completed an offering of senior secured convertible bridge notes, receiving \$790 thousand in cash. The notes have a term of one-year and were accompanied by 329,461 warrants with a weighted-average exercise price of \$1.42. Also in October 2024, the Company completed an equity raise that provided \$3.9 million net cash for the issuance of 2.9 million shares / pre-funded warrants, and by 2.9 million warrants with an exercise price of \$1.40. However, the Companyâ€™s existing cash resources and the cash received from the equity offering and senior convertible note are not expected to provide sufficient funds to carry out the Companyâ€™s operations and clinical trials through the next twelve months. A The Companyâ€™s capital raises have to date supported operations, the manufacture of drug product and FDA approval of the IND for the Phase II clinical trial of Ropidoxuridine and radiation therapy in glioblastoma and other radiation sensitizer discovery and therapy. The FDA recommended and the Company agreed to an expansion of the Phase II clinical trial, necessitating additional capital to complete the trial as well as fund ongoing operations. Additionally, the Phase II clinical trial of Ropidoxuridine has evolved with finalized agreements with all six of the planned site enrollment locations to administer the Phase II clinical trial of Ropidoxuridine and the enrollment of the first three patients. A The ability of the Company to continue as a going concern is dependent upon its ability to continue to successfully raise additional equity or debt financing to allow it to fund ongoing operations, conduct clinical trials and bring a drug candidate to commercialization to generate revenues. These conditions raise substantial doubt about the Companyâ€™s ability to continue as a going concern within one year after the date that the unaudited condensed consolidated financial statements are issued. A The accompanying unaudited condensed consolidated financial statements do not include any adjustments to reflect the future effects on the recoverability and classification of assets or the amounts and classification of liabilities if the Company is unable to continue as a going concern. A Note 2 â€ Summary of Significant Accounting Policies A Basis of Presentation A The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (â€œGAAPâ€) for interim financial statements and with the instructions to Form 10-Q and Rule 8-03 of Regulation S-X of the United States Securities and Exchange Commission (â€œSECâ€). Accordingly, they do not contain all information and notes required by GAAP for annual financial statements. A complete discussion of the Companyâ€™s significant accounting policies is included in the Companyâ€™s Annual Report on Form 10-K/A for the year ended December 31, 2023. A In the opinion of the Companyâ€™s management, the accompanying unaudited condensed consolidated financial statements contain all of the adjustments necessary to present the financial position of the Company as of September 30, 2024 and the results of operations and cash flows for the periods presented. The accompanying condensed consolidated financial statements of the Company have not been audited by the Companyâ€™s independent registered public accounting firm, except that the year-end consolidated balance sheet was derived from audited financial statements. The results of operations for the nine months ended September 30, 2024 are not necessarily indicative of the operating results for the full fiscal year or any future period. These unaudited condensed consolidated financial statements should be read in conjunction with the restated financial statements and related notes thereto for the year ended December 31, 2023 included in the Companyâ€™s Annual Report on Form 10-K/A filed with the SEC on September 4, 2024. A Reverse Stock Split A On August 13, 2024, in order to meet Nasdaqâ€™s minimum bid price requirement of \$1.00 per share (the â€œMinimum Bid Price Requirementâ€), the Company effectuated a 1-for-8 reverse stock split of its issued and outstanding common stock, rounding up to account for any fractional shares (the â€œReverse Stock Splitâ€). The Reverse Stock Split had no effect on the Companyâ€™s authorized shares of common stock or preferred stock and the par value will remain unchanged at \$0.0001, respectively. All common stock share, option, warrant and per share amounts (except our authorized but unissued shares and previously reserved shares) have been retroactively adjusted in these financial statements and related disclosures. A F-7 A -A Basis of Consolidation A The unaudited condensed consolidated financial statements have been prepared on a consolidated basis with those of the Companyâ€™s wholly-owned subsidiaries, Shuttle Pharmaceuticals, Inc. and Shuttle Diagnostics, Inc. All intercompany transactions and balances have been eliminated. A Correction of an Immaterial Error in the Prior Period Financial Statements A During the fourth quarter of 2023, the Company determined that the prior year consolidated financial statements had a misstatement caused by an immaterial classification error of certain research and development expenses in accordance with Accounting Standards Codification (â€œASCâ€) 730. As a result, certain prior year amounts have been corrected for consistency with the current year presentation. The Company assessed the materiality of this change in presentation on prior period consolidated financial statements in accordance with SEC Staff Accounting Bulletin No. 99, â€œMaterialityâ€ (ASC Topic 250, Accounting Changes and Error Corrections). Based on this assessment, the Company concluded that these error corrections in its unaudited condensed consolidated statements of operations are not material to any previously presented financial statements based upon overall considerations of both quantitative and qualitative factors. The corrections had no impact on the unaudited condensed consolidated balance sheet, unaudited condensed consolidated statements of cash flows, or unaudited condensed consolidated statement of changes in stockholdersâ€™ equity, to these financial statements, or for any previously presented interim or annual financial statements. Further, the corrections did not result in a change in quarterly or year-to-date operating losses, basic or diluted earnings per share, or working capital. The quarterly correction required for the three and nine months ended September 30, 2023 was \$95,129 and \$277,844, respectively. Accordingly, the Company corrected the previously reported immaterial error for the three and nine months ended September 30, 2023 in this Quarterly Report on Form 10-Q. A Schedule of the Error Correction A September 30, 2023A A CorrectionA A Corrected September 30, 2023A Research and development expenseA \$3,084,488A A (\$277,844)A \$2,806,644A General and administrative expenseA A 452,342A A A 277,844A A 730,186A Net LossA \$3,536,830A A -\$A A \$3,536,830A A Use of Estimates A The preparation of unaudited condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the unaudited condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The Company regularly evaluates estimates and assumptions. The Company bases its estimates and assumptions on current facts, historical experience, and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by the Company may differ materially and

[illegible]

in an additional \$3,310,543 debt discount that is being amortized to interest expense over the term of the Alto Convertible Note. A On August 6, 2024, the Company entered into an amendment to the SPA with Alto. Under the Amendment Agreement, the Company and Alto agreed as follows: (i) that the Company would pay \$600,000 (the "Cash Collateral") in cash by wire transfer of immediately available funds to Alto, which would be held as collateral on the remaining \$1.2 million outstanding under the Alto Note; (ii) Alto will defer the monthly installment payment due on September 3, 2024 under the Alto Note until the Alto Note's March 11, 2025 maturity date; and (iii) Alto would grant a waiver of any default Section 4(a)(xvii) of the Note related to the restatement and audit of the Company's financial statements for the years ended December 31, 2022 and 2023. The amendment was accounted for as a troubled debt restructuring as the Company determined it was experiencing financial difficulties and was provided a concession through the deferral of one monthly principal and interest payment. As the future undiscounted cash flows exceeded the carrying value of the Alto Convertible Note, the Company did not recognize any gain or loss associated with the troubled debt restructuring. A During the three and nine months ended September 30, 2024, the Company recorded interest expense of \$270,538 and \$1,198,738, respectively, which included amortization of debt discount as interest expense of \$247,430 and \$1,079,444, respectively. During the three and nine months ended September 30, 2024, the Company settled \$1,172,850 and \$1,408,050 of principal, and \$35,888 and \$54,670 of accrued interest, which settlements were made in the form of 719,148 and 797,345 shares of common stock. During the three months ended September 30, 2024, the Company also paid \$345,139 of principal and \$22,724 of accrued interest for a total of \$367,863. During the nine months ended September 30, 2024, the Company paid \$846,806 of principal and \$79,682 of accrued interest for a total of \$926,488. In relation to the settlements described above, the Company recognized a loss on settlement of convertible debt of \$762,186 and \$833,501 for the three and nine months ended September 30, 2024. A During the three and nine months ended September 30, 2023, the Company recorded interest expense of \$623,465 and \$1,952,147 respectively, which included amortization of debt discount as interest expense of \$538,302 and \$1,550,479 respectively. During the three and nine months ended September 30, 2023, the Company settled \$331,800 and \$1,925,700 of principal, respectively, and settled \$54,096 and \$294,927, respectively, of accrued interest, which settlements were made in the form of 62,761 and 297,625 shares of common stock, respectively, during the three and nine months ended September 30, 2023. A As of September 30, 2024, the outstanding principal, debt discount and net carry value for the convertible note was \$0. A F-15 A A Note 6 "Stockholders' Equity A Common Stock A During the three and nine months ended September 30, 2024, the Company issued: A A 719,148 and 797,345 shares of common stock to settle \$1,172,850 and \$1,408,050 of principal and \$35,888 and \$54,670 of interest on a convertible note and incurred \$762,186 and \$833,501 of loss on settlement, respectively. A A 5,002 and 24,349 shares of common stock issued for vesting of restricted stock units, respectively. A A 115,716 shares of common stock issued for the round up of reverse split fractional shares. A During the three and nine months ended September 30, 2023, the Company issued: A A 62,761 and 297,625 shares of common stock to settle \$331,800 and \$1,925,700 of principal and \$54,096 and \$294,927 of interest, respectively, on a Convertible Note and incurred \$43,414 and \$477,221 of loss on settlement, respectively. A A 1,876 and 1,876 shares of common stock issued for vesting of restricted stock units. A Warrants A In connection with the January 2023 Alto Convertible Note, Boustead was granted warrants to purchase 8,909 shares of common stock, at an exercise price of \$18.80 per share (Note 5). Effective with the recent reverse split, the exercise price was adjusted to \$1.93 per share, as provided for in the underlying agreement. In addition, Alto was granted warrants to purchase 127,260 shares of common stock, at an exercise price of \$1.93 per share, as adjusted (Note 5, 7). A A summary of activity regarding all warrants issued for the nine months ended September 30, 2024 were as follows: A Schedule of Warrants Activity A A Number of A A Weighted Average A A Average A A A warrants A A Exercise Price A A Life (years) A Outstanding, December 31, 2023 A 184,000 A A \$23.20 A A 2.77 A Granted A A A A A Outstanding, September 30, 2024 A 184,000 A A \$11.54 A A 2.04 A The intrinsic value of the warrants as of September 30, 2024 is \$0. All of the outstanding warrants are exercisable as of September 30, 2024. A Equity Incentive Plan A Our 2018 Equity Incentive Plan (the "2018 Plan") provides for equity incentives to be granted to our employees, executive officers, directors and key advisers and consultants. Equity incentive grants may be made in the form of stock options with an exercise price of not less than the fair market value of the underlying shares as determined pursuant to the 2018 Equity Incentive Plan, restricted stock awards, other stock-based awards, or any combination of the foregoing. The 2018 Equity Incentive Plan is administered by the Company's compensation committee. We have reserved 3,000,000 shares of our common stock for issuance under the 2018 Equity Incentive Plan. As of September 30, 2024, 125,734 shares have been granted under the 2018 Equity Incentive Plan, of which 84,396 shares have vested. A Restricted Stock Units A We may grant restricted stock units ("RSUs") under our 2018 Plan. RSUs are bookkeeping entries representing an amount equal to the fair market value of one share of our common stock. Subject to the provisions of our 2018 Plan, the administrator determines the terms and conditions of RSUs, including the vesting criteria and the form and timing of payment. Notwithstanding the foregoing, the administrator, in its sole discretion, may accelerate the time at which any restrictions will lapse or be removed. RSUs granted typically vest annually in one third increments from the date of appointment. A During the three and nine months ended September 30, 2024 and 2023, pursuant to agreements with officers and consultants, 0 and 53,455, respectively and 12,500 and 19,916 RSUs, respectively with a value of \$0 and \$141,840, respectively, and \$196,000 and \$291,400, respectively, were granted and compensation expense for RSUs of \$45,275 and \$227,886, and \$37,583 and \$95,438 respectively, was incurred. During the three and nine months ended September 30, 2024 and 2023, \$13,033 and \$60,019, respectively, and \$0 and \$41,190, respectively was included in compensation under Research and Development. A F-16 A A As of September 30, 2024, there was \$145,504 of unrecognized RSU compensation cost related to non-vested stock-based compensation arrangements which is expected to be recognized over a weighted-average period of 2.14 years. A A summary of activity regarding the Restricted Stock Units issued follows: A Schedule of Restricted Stock Units (RSUs) A A Number of RSUs A A Weighted Average Fair Value Per RSU A Outstanding, December 31, 2023 A 24,731 A A \$11.76 A Granted A A A A A 53,455 A A 2.65 A Forfeiture A A (12,500) A A A Vested A A (24,348) A A 9.06 A Outstanding, September 30, 2024 A 41,383 A A \$5.14 A A Rights Offering and Financing Commitment A On February 7, 2024, the Company and its wholly-owned subsidiary, Shuttle Diagnostics, Inc., entered into a securities purchase agreement (the "Purchase Agreement") with SRO, LLC, a Nevada limited liability company, pursuant to which SRO LLC agreed to commit to purchasing from the Company \$2,250,000 of units from the Company, with each Unit consisting of (i) one share of the Company's common stock, (ii) a warrant to purchase one share of the Company's common stock exercisable at a purchase price of \$18.80 per share, and (iii) a percentage of equity interest in Diagnostics such that, assuming the sale of all \$2,250,000 of Units, SRO LLC will own a 22% interest in Diagnostics. Pursuant to the terms of the Purchase Agreement, the Units will be sold at a per Unit price equal to 90% of the VWAP of the Company's common stock for the five trading days immediately preceding closing. The parties entered into the Purchase Agreement in anticipation of the Company commencing a rights offering (the "Rights Offering") pursuant to which the Company intends to offer a total of \$4,500,000 of Units to existing stockholders, which includes the \$2,250,000 of Units being sold to SRO LLC, an entity which is controlled by Keith Moore, Executive Chairman of Boustead & Company Limited, an affiliate of Boustead. A The Company filed an initial registration statement on Form S-1 (the "Form S-1") with the SEC in April 2024 related to the registration of subscription rights to purchase the Units to be sold in the Rights Offering. The Form S-1 has not been declared effective as of the date these unaudited condensed consolidated financial statements were issued. Upon the Form S-1 being declared effective, the Purchase Agreement allows SRO LLC up to 60 days to raise the initial \$2,250,000, which funds will be placed in escrow with Sutter Securities, Inc. (the "Escrow Agent"), an affiliate of BSL, pursuant to the terms of an escrow agreement entered into between the Company, Shuttle Diagnostics, Inc., BSL and SSI on February 7, 2024 (the "Escrow Agreement"). The funds will remain in escrow up until closing on the Rights Offering. In addition, in the event the Company fails to raise the full \$4,500,000 in the Rights Offering, SRO LLC agreed to a backstop commitment pursuant to which it would have the right to purchase any remaining Units not purchased by existing Company stockholders in the Rights Offering, up to an additional \$2,250,000 (the "Backstop Contingency"). Unless the parties waive the conditions to closing, in the event the full \$4,500,000 is not raised, whether through SRO LLC or through the Company's existing stockholders, the Company will not close on the offering and any funds raised and held in escrow will be returned to investors. A In conjunction with its entry into the Purchase Agreement, on February 7, 2024, the Company entered into a placement agent and advisory services agreement (the "Placement Agent Agreement") with BSL, pursuant to which BSL and BSL's affiliates agreed to provide the Company with regular and customary financial consulting advice and act as placement agent, on a best efforts basis, for the Rights Offering. In exchange for its services, BSL will receive a commitment fee equal to \$112,500 upon the earlier of the Company filing the registration statement on Form S-1 registering the Rights Offering or upon such date as the Company terminates the Rights Offering, a commission equal 8% of the gross proceeds disbursed to the Company upon closing the Rights Offering, and \$40,000 in diligence and related expenses. A F-17 A A The Company has incurred \$142,000 in costs directly related to the planned Rights Offering and initially deferred these costs in 2024, then expensed them at June 30, 2024, as the Rights Offering has not yet consummated. A Alliance Global Partners A On July 30, 2024, the Company entered into an agreement with A.G.P./Alliance Global Partners (the "AGP"), as the exclusive underwriter, placement agent, or advisor in a public or private offering of up to \$10,000,000 of the Company's securities, and bridge financing of up to \$1,350,000. AGP was paid a \$50,000 retainer fee. A As of September 30, 2024, the Company has incurred \$101,651 of expenses included in deferred costs recorded on the Company's unaudited condensed consolidated balance sheet. A See Note 9, Subsequent Events, Alliance Global Partners. A Note 7 "Derivative Liabilities A Fair Value Assumptions Used in Accounting for Derivative Liabilities A ASC 815 requires us to assess the fair market value of derivative liabilities at the end of each reporting period and recognize any change in the fair market value as other income or expense. A In January 2023, in connection with the Alto Convertible Note, the Company issued warrants to purchase 127,260 shares of common stock, with an exercise price of \$1.93 per share, as adjusted for the recent reverse split, valued at inception at \$1,189,000 and as of September 30, 2024, at \$74,107. The Company determined our derivative liabilities from the warrants issued in relation to the Alto Convertible Note do not satisfy the classification as equity instruments due to the existence of a certain net cash settlement provision that is not within the sole control of the Company. In addition, there are certain down round provisions that could reduce the exercise price if the Company issues securities at lower prices in the future. A The Company has determined the Acceleration Option is an embedded derivative within the host instrument and has bifurcated it from the host instrument and recorded it as a derivative liability valued at \$1,442,000, using a Monte Carlo simulation model. The Company determined our derivative liability from the noteholder's Acceleration Option for the Alto Convertible Note is not clearly and closely related to the host and should be thus accounted for as a bifurcated derivative liability. A The Company classified these derivative liabilities as a Level 3 fair value measurement and used the Monte Carlo pricing model to calculate the fair value as of January 11, 2023 (\$2,631,000 included in debt discount) and September 30, 2024 (\$74,107). Key inputs for the simulation are summarized below. The Monte Carlo simulation uses an implied VWAP for the January 11, 2023 valuation date. The implied VWAP was back-solved by setting the summation of the parts (e.g., derivatives and debt without derivatives) equal to the cash proceeds. The simulation was then iterated and manipulated to solve for the implied share price, which was approximately \$12.64 per share (or an approximate 14% discount to the quoted market VWAP on January 11, 2023). A The key inputs for the Monte Carlo simulation as of September 30, 2024, were as follows: A Schedule of Monte Carlo Simulation Assumption Net cash settlement and down round key valuation inputs "warrants" A September 30, 2024 A Annualized volatility A 92.04% - 101.79% A Risk-free interest rate A 3.64% - 4.93% A Quoted VWAP A 1.31 A Exercise price A \$1.93 A Probability assessment A 0% - 40% A Illiquidity discount A (14%) Time period (years) A 0.08 - 2.28 A A *Based on a Monte Carlo simulation analysis of 250,000 iterations A F-18 A A The following table summarizes the changes in the derivative liabilities: Schedule of Derivative Liabilities A Fair Value Measurements Using Significant Unobservable Inputs (Level 3) A A Warrants A Accelerated Feature A Balance - December 31, 2023 A \$410,660 A A \$3,852 A Gain on change in fair value A (196,045) A (1,817) Balance - March 31, 2024 A \$214,615 A A \$2,035 A Loss (gain) on change in fair value A 145,304 A A (1,531) Balance - June 30, 2024 A \$359,919 A A \$504 A Gain on change in fair value of the derivative A (285,812) A (504) Balance - September 30, 2024 A \$74,107 A A \$ A Note 8 "Other Related Party transactions A Related Party Transactions A On September 14, 2022, we entered into a manufacturing agreement with TCG GreenChem, Inc. (the "TCG GreenChem"), the U.S. subsidiary of TCG Lifesciences Pvt Ltd., a global contract research and manufacturing services company located in India. Dr. Chis Senanayake, one of our independent directors, is CEO and CSO of TCG GreenChem and CSO of TCG Lifesciences Pvt Ltd. TCG GreenChem was contracted for process research, development and cGMP compliant manufacture of IPdR. During the nine months ended September 30, 2024 and 2023, the Company expended \$0 and \$1,058,348, respectively, related to these services. A Note 9 "Subsequent Events A Convertible Bridge Notes A On October 14, 2024, the Company issued an aggregate of \$600,000 (of an up to \$1.3 million authorized financing) in senior secured convertible notes due in October 2025, which accrue interest at 14.5% interest per year. The notes include a 5% original issue discount and the Company received \$570,000 in proceeds. The notes are convertible beginning three months after the date of issuance, and the conversion price will be the lower of a 15% discount to (i) the 5-day VWAP immediately prior to Closing or (ii) the price of any offering entered into by the Company during the term of the notes. The Company has the option to prepay the notes at any time for 107% of total outstanding balance and any outstanding principal will be paid in conversion of shares of common stock at the end of the term, subject to the Company's exercise of the optional prepayment right. Any accrued interest will be repaid quarterly in cash. The Company also issued warrants to the lenders to purchase an aggregate 240,917 shares of common stock, exercisable at \$1.40 per share, with such warrants expiring five years from issuance. In addition, the Company's Chief Executive Officer, Dr. Anatoly Dritschilo, invested a total of \$237,500 in this financing round, in exchange for a \$250,000 convertible note. A On October 21, 2024, the Company issued an additional \$231,579 in senior secured convertible notes due in October 2025, with substantially similar terms as the October 14, 2024, issuance. The notes include a 5% original issue discount and the Company received \$220,000 in proceeds. The Company also issued warrants to the lenders to purchase an aggregate 88,544 shares of common stock, exercisable at \$1.49 per share, with such warrants expiring five years from issuance. Upon completing this issuance, the Company closed the senior secured convertible note offering after receiving a total of \$790,000 in proceeds. A Alliance Global Partners A On October 31, 2024, the Company consummated a public offering of an aggregate of (i) 395,574 shares of common stock and 2,555,246 pre-funded warrants to purchase up to 2,555,246 shares of common stock, and (ii) 2,950,820 common stock purchase warrants to purchase up to 2,950,820 shares of common stock. Each share of common stock, or a pre-funded warrant in lieu thereof, was sold together with an accompanying warrant to purchase one share of common stock. AGP served as lead underwriter along with Boustead as co-underwriter. A The public offering price for each share of common stock and one accompanying warrant was \$1.525. The public offering price of each pre-funded warrant and one accompanying common warrant was \$1.524, which equals the price at which one share of common stock and accompanying warrant was sold to the public in this offering, minus \$0.001. The exercise price of each pre-funded warrant is \$0.001 per share. Each warrant offered in the offering is exercisable for one share of common stock and has an initial exercise price equal to \$1.40. The Company received aggregate gross proceeds from the offering of approximately \$4.5 million, before deducting placement agent's fees and other offering expenses. A F-19 A A Index to Financial Statements A A Page A A Report of Independent Registered Public Accounting Firm "Forvis Mazars, LLP (PCAOB ID 686) F-21 A A Consolidated Balance Sheets as of December 31, 2023 and 2022 F-22 A A Consolidated Statements of Operations and Comprehensive Income (Loss) for the years ended December 31, 2023 and 2022 F-23 A A Consolidated Statements of Changes in Stockholders' Equity for the years ended December 31, 2023 and 2022 F-24 A A Consolidated Statements of Cash Flows for the years ended December 31, 2023 and 2022 F-25 A A Notes to Consolidated Financial Statements F-26 A F-20 A A Report of Independent Registered Public Accounting Firm A To the Shareholders, Board of Directors, and Audit Committee of Shuttle Pharmaceuticals Holdings, Inc. A Opinion on the Consolidated Financial Statements A We have audited the accompanying consolidated balance sheets of Shuttle Pharmaceuticals Holdings, Inc. and subsidiaries (the "Company") as of December 31, 2023 and 2022, the related consolidated statements of operations, changes in stockholders' equity, and cash flows for each of the years in the two-year period ended December 31, 2023, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2023, in conformity with accounting principles generally accepted in the United States of America (the "U.S. GAAP"). A Restatement of Previously Issued Financial Statements A As discussed in Note 2 to the financial statements, the 2023 and 2022 financial statements have been restated to correct misstatements. A Going Concern A The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has suffered recurring losses and negative cash flows from operations since inception. These conditions, along with other matters as set forth in Note 1, raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty. A Basis for Opinion A These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. A We are a public accounting firm registered with the Public Company Accounting

[illegible]

Our II clinical trial of Ropidoxuridine and radiation therapy in glioblastoma. The FDA agreed to an expansion of the clinical trial, necessitating additional capital to complete the trial, as well as fund ongoing operations. As a result, management had initiated a \$4.5 million rights offering and submitted an application for a SBIR grant for non-dilutive funding for pre-clinical project through the NIH. The Company is also currently pursuing other financing. The ability of the Company to continue as a going concern is dependent upon its ability to successfully raise additional equity or debt financing to allow it to fund ongoing operations, conduct clinical trials and bring a drug candidate to commercialization to generate revenues. A F-26 A The accompanying consolidated financial statements do not include any adjustments to reflect the future effects on the recoverability and classification of assets or the amounts and classification of liabilities if the Company is unable to continue as a going concern. A Reverse Stock Split A On August 13, 2024, in order to meet Nasdaq's minimum bid price requirement of \$1.00 per share (the "Minimum Bid Price Requirement"), the Company effectuated a 1-for-8 reverse stock split of its issued and outstanding common stock, rounding up to account for any fractional shares (the "Reverse Stock Split"). The Reverse Stock Split had no effect on the Company's authorized shares of common stock or preferred stock. Following the reverse stock split on August 13, 2024, the Company had a total of 2,111,235 shares issued and outstanding (or 2,008,689 on a post-split basis as of December 31, 2023). The Reverse Stock Split also resulted in an adjustment to the consolidated balance sheets for the years ended December 31, 2023, December 31, 2022 and December 31, 2021 with an increase to additional paid in capital of \$141, \$119 and \$81, respectively, and an offsetting adjustment to the carrying value of common stock. All share, option, warrant and per share amounts (except our authorized outstanding) have been retroactively restated in these financial statements and related disclosures. The effect of the Reverse Stock Split has been included in Note 2 in the "As Reported" and in Note 11 in the "As Restated" amounts for additional paid in capital. A Note 2 A Restatement of Previously Issued Financial Statements A As previously disclosed in the Company's Quarterly Report on Form 10-Q for the period ended March 31, 2024, filed with the Securities and Exchange Commission ("SEC") on May 13, 2024, following the entry of a cease-and-desist order by the SEC against our former auditor, B.F. Borgers CPA PC ("B.F. Borgers"), we commenced the re-audit (the "Re-audit") of our consolidated financial statements for the year ended December 31, 2022, which had been audited by B.F. Borgers. Since that time and as a result of the Re-audit, and as initially disclosed on Form 8-K dated July 10, 2024, the Company and the Audit Committee have concluded and informed our current auditor, Forvis Mazars, LLP, that our audited consolidated financial statements for the year ended December 31, 2022 (the "2022 Financial Statements"), our audited consolidated financial statements for the year ended December 31, 2023 (the "2023 Financial Statements"), and the quarterly periods included in the Company's Annual Report for the year ended December 31, 2023, and the quarterly report for the period ended March 31, 2024 require restatement and are not reliable. A The accounting errors impacting our 2022 Financial Statements include: A Stock Compensation A Application of the incorrect grant date fair values in determining the value of certain equity awards granted during the years ended December 31, 2019 and 2020; A Miscalculation of the pattern of recognition of stock-based compensation over the requisite service periods for certain equity awards granted during the years ended December 31, 2019 and 2020; A Series A Convertible Preferred Stock A Utilization of incorrect inputs to the fair value estimates for the warrant obligation related to the Series A Convertible Preferred Stock; incorrectly recording the reclassification of the warrant obligation upon issuance as a gain and not as a reclassification to stockholders' equity; A Recording of accrued dividends on the Series A Convertible Preferred Stock as a liability prior to the dividends being declared; A Failure to recognize the accounting impact for the amendment to the terms of the Series A Convertible Preferred Stock in April 2022, which the Company subsequently concluded should have been recognized as an extinguishment; A Failure to recognize deemed contribution related to the settlement of the Series A Convertible Preferred Stock and accrued dividends; A Notes Payable A Misidentification of certain debt and equity issuance costs and incorrect association with certain of the Company's financings during the years ended December 31, 2022 and 2021; A Application of the incorrect amortization period and pattern of recognition for debt discounts recorded in relation to the Company's debt financings during the years ended December 31, 2022 and 2021; A Incorrect recognition of bifurcated derivative liabilities, as well as incorrect initial and subsequent fair value measurements, in relation to the December 2021 Notes, 2022 Convertible Notes and August 2022 Notes; A Misclassification of certain warrants issued with debt transactions during the year ended December 31, 2022; A Failure to recognize certain liability-classified warrants issued in exchange for services provided related to the Company's financing activities during the year ended December 31, 2022; A Incorrect application of extinguishment or conversion models in accounting for certain debt instruments upon their settlement; and A Initial Public Offering A Incorrect identification of deferred issuance costs incurred in relation to the initial public offering; Incorrect identification and classification of issuance costs incurred in relation to the initial public offering. A In addition to the restatement of the consolidated financial statements, the Company has also restated the following notes to reflect the errors described above: A Note 2 - Summary of Significant Accounting Policies (now Note 3) A Note 5 A Notes Payable-Related Party A Note 6 A Convertible Notes (now labeled Notes Payable) A Note 7 A Stockholders' Equity A Note 8 A Derivative Liabilities A Note 10 A Income Taxes A F-27 A The impact of the errors described above also impact the Company's Annual Report on Form 10-K for the years ended December 31, 2023 and December 31, 2022 within additional paid in capital and accumulated deficit, resulting in the preparation and filing of this Annual Report on Form 10-K/A. A Schedule of Error Corrections and Prior Period Adjustments Consolidated Balance Sheet as of December 31, 2023A As ReportedA AdjustmentA As RestatedA Additional paid in capitalA 19,543,363A A 9,945,692A A 29,489,055A Accumulated deficitA (15,487,612)A (9,945,692)A (25,433,304)A Additionally, the Company has provided Note 11 A Quarterly Financial Data (unaudited and restated) to present the impact of the above restatements on the unaudited quarterly financial information for the period ended September 30, 2023. A The Company's prior and updated accounting for the errors described above do not have any effect on the Company's previously reported cash or cash flows. A The following tables summarize the effect of the restatement on each financial statement line item as of the dates indicated: A Consolidated Balance Sheet as of December 31, 2022A As ReportedA AdjustmentA As RestatedA Additional paid in capitalA 16,572,741A A 9,945,692(1)A 26,518,433A Accumulated deficitA (8,894,889)A (9,945,692)(2)A (18,840,581)A (1) Adjustments include corrections for stock compensation errors (increase of \$7,843,052); recognition of Series A Preferred Stock accrued dividends (decrease of \$402,064); correction of issuance cost recognition related to financing transactions (decrease of \$174,082); corrections to the Company's initial classification and recognition of warrants issued in financing transactions (decrease of \$416,266); reclassifications of warrants from liability to equity (increase of \$881,554); correction in the application of extinguishment accounting upon settlement of debt instruments (increase of \$2,213,498). A (2) Adjustments include corrections for stock compensation errors (increase of \$8,009,461); adjustment of the estimated Series A Preferred Stock warrant obligation fair value (increase of \$240,930); reversal of accrued Series A Preferred Stock dividends (decrease of \$402,064); recognition of bifurcated derivatives and recording of loss at issuance (increase of \$296,151); correction of issuance cost recognition related to financing transactions (decrease of \$166,407); and the aggregate adjustments to 2022 net loss as detailed below (increase of \$1,967,621). unobservable inputs, such as the Company's pre-IPO stock price, probability of event occurrence and other management estimates. The key inputs for each of these warrant liabilities were as follows: A Schedule of Key Inputs of Warrant Liabilities Warrant Liability Series A Preferred Stock Obligation December 31, 2021A Reclassification DateA Estimated fair value of Company's stock \$40.00A \$32.50A Exercise price (based on estimated IPO or Listing terms at issuance) \$40.00 - \$166.56A \$32.00A Number of warrants (based on estimated Series A Preferred Stock conversion shares upon IPO or Listing at issuance) A 12,135 - 33,681 sharesA A 42,101 sharesA Annualized volatilityA 86.3%A 82.5% Risk-free interest rateA 1.08%A 3.44% Estimated IPO dateA 9/30/2022A A Estimated TermA 3.75 yearsA A 3.00 years Probability of IPO or Listing OccurringA 90%A A Series A Preferred Stock Obligation Balance, December 31, 2021 (as restated)A \$34,955A IssuedA A Exercised (settled)A A Loss on change in fair valueA \$421,768A August 2022 WarrantsA Issuance DatesA A Reclassification/Settlement DateA Estimated fair value of Company's stock \$32.00A \$32.50A Exercise priceA \$20.00A \$20.00A Number of warrantsA 6,250A A 6,250A Remaining termA 5.0 yearsA A 4.9 years VolatilityA 80.0%A 82.5% Risk-free interest rateA 2.7%A A 3.3% Estimated fair valueA \$146,624A A \$151,726A A Warrant LiabilityA Boustead Placement Agent WarrantsA Issuance DatesA A Reclassification DateA Estimated fair value of Company's stock \$32.00A \$32.50A Exercise price (based on estimated Convertible Note conversion terms at issuance) \$16.00A \$16.00A Number of warrants (based on estimated Convertible Note conversion terms at issuance) A 3,688A A 2,581A Remaining termA 5.0 yearsA A 4.4 years VolatilityA 86.1%A 82.5% Risk-free interest rateA 1.8% - 2.0%A A 3.4% Estimated fair valueA \$92,336A A \$64,140A A A rollforward of these warrant liabilities for the year ended December 31, 2022 is as follows: A Schedule of Warrant Liabilities A Warrant Liability Series A Preferred Stock Obligation Balance, December 31, 2021 (as restated)A \$34,955A IssuedA A Exercised (settled)A A Loss on change in fair valueA \$421,768A Reclassifications to stockholders' equityA (756,723) Balance, December 31, 2022A A Warrant LiabilityA August 2022 WarrantsA Balance, December 31, 2021 (as restated)A A IssuedA \$146,624A Exercised (settled)A (91,036) Loss on change in fair valueA \$5,102A Reclassifications to stockholders' equityA (60,690) Balance, December 31, 2022A A Warrant LiabilityA Boustead Placement Agent WarrantsA Balance, December 31, 2021 (as restated)A A IssuedA \$92,336A Exercised (settled)A A Gain on change in fair valueA (28,196) Reclassification to stockholders' equityA (64,140) Balance, December 31, 2022A A Refer to Note 7 for additional background on the reclassification of warrant liabilities to equity. See Note 8 for additional disclosures related to the fair value of the Company's derivative liabilities. F-31 A Leases A We determine if an arrangement is a lease at inception. Operating leases are included in operating lease right-of-use asset (ROU), operating lease liability - current, and operating lease liability - noncurrent on the consolidated balance sheets. Finance leases are included in property and equipment, other current liabilities, and other long-term liabilities in our consolidated balance sheets. The Company did not utilize any financing that required recognition of finance leases during the years ended December 31, 2023 and 2022. A ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. As our leases do not provide an implicit rate, we use our incremental borrowing rate based on the estimated rate of interest for collateralized borrowing, over a similar term of the lease payments at commencement date. The operating lease ROU asset also includes any lease payments made and excludes lease incentives. Our lease terms may include options to extend or terminate the lease when it is reasonably certain that we will exercise that option. Lease expense for lease payments is recognized on a straight-line basis over the lease term. A Leases with a lease term of 12 months or less at inception are not recorded on our consolidated balance sheets and are expensed on a straight-line basis over the lease term in our statement of operations. We have lease agreements with lease and non-lease components, which are generally accounted for separately. A The Company determines the present value of minimum future lease payments for operating leases by estimating a rate of interest that it would have to pay to borrow on a collateralized basis over a similar term, an amount equal to the lease payments and a similar economic environment (the incremental borrowing rate or IBR). The Company determines the appropriate IBR by identifying a reference rate and making adjustments that take into consideration financing options and certain lease-specific circumstances. For the reference rate, the Company used an equity built up, risk adjusted rate, as the implicit interest rate. A Property and Equipment A Property and equipment are stated at cost less accumulated depreciation. Expenditures for maintenance and repairs are charged to expense as incurred; additions, renewals and betterments are capitalized. When property and equipment are retired or otherwise disposed of, the related cost and accumulated depreciation are removed from the respective accounts, and any gain or loss is included in operations. Depreciation of property and equipment is provided using the straight-line method for substantially all assets with estimated lives as follows: A Schedule of Useful Lives for Property Plant Equipment FurnitureA 5 yearsA Computers and equipmentA 5 yearsA Research EquipmentA 10 yearsA A Derivative Financial Instruments A The Company does not use derivative instruments to hedge exposures to cash flow, market or foreign currency risks. We evaluate all of our financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. For derivative financial instruments that are accounted for as liabilities, the derivative instrument is initially recorded at its fair value and is then re-valued at each reporting date, with changes in the fair value reported in the consolidated statements of operations. A For our derivative financial instruments, the Company utilizes the most appropriate valuation model (such as Monte Carlo simulations or probability-weighted expected return models, based on the nature of the terms of the instrument) to value the derivative instruments at inception and on subsequent valuation dates. The classification of derivative instruments, including whether such instruments should be recorded as liabilities or as equity, is evaluated at the end of each reporting period. Derivative liabilities are classified in the consolidated balance sheet sheets as current or non-current based on whether or not net-cash settlement or conversion of the instrument could be required within twelve (12) months of the balance sheet date. A Convertible Notes A The Company evaluates its convertible notes for embedded features and bifurcates these features (such as conversion options and redemption options) from their host instruments and accounts for them as free standing derivative financial instruments if certain criteria are met. The criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument. A F-32 A Warrants A The Company accounts for warrants as either equity-classified or liability-classified instruments based on an assessment of the warrant's specific terms and applicable authoritative guidance in FASB ASC 480, Distinguishing Liabilities from Equity (ASC 480) and ASC 815, Derivatives and Hedging (ASC 815). The assessment considers whether the warrants are freestanding financial instruments pursuant to ASC 480, meet the definition of a liability pursuant to ASC 480, and whether the warrants meet all of the requirements for equity classification under ASC 815, including whether the warrants are indexed to the Company's own ordinary shares and whether the warrant holders could potentially require a net cash settlement in a circumstance outside of the Company's control, among other conditions for equity classification. Finally, the Company determines if the warrants meet the definition of a derivative based on their contractual terms. This assessment, which requires the use of professional judgment, is conducted at the time of warrant issuance and as of each subsequent quarterly period end date while the warrants are outstanding. A For issued or modified warrants that meet all of the criteria for equity classification, the warrants are required to be recorded as a component of additional paid-in capital at the time of issuance. For issued or modified warrants that do not meet all the criteria for equity classification, the warrants are required to be recorded at their initial fair value on the date of issuance, and at each balance sheet date thereafter. Changes in the estimated fair value of the warrants are recognized as a non-cash gain or loss on the consolidated statements of operations. The Company also evaluates if changes in contractual terms or other considerations would result in the reclassification of outstanding warrants from liabilities to stockholders' equity (or vice versa). A The fair value of the warrants is estimated using a Black-Scholes pricing model or a Monte Carlo simulation. A Impairment of Long-Lived Assets A The Company reviews its long-lived assets for impairment whenever events or changes in business circumstances indicate that the carrying amount of the asset may not be fully recoverable. Recoverability of assets is measured by a comparison of the carrying amount of an asset to the estimated undiscounted cash flows expected to be generated by the asset. If the carrying amount of the asset exceeds its estimated future cash flows, an impairment charge will be recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset. There were no impairments of long-lived assets during the periods presented. A Stock-Based Compensation A Compensation cost for stock awards, which include restricted stock units (RSUs), is measured at the fair value on the grant date and recognized as expense, over the related service or performance period. The fair value of stock awards is based on the quoted price of our common stock on the grant date. Compensation expense related to the RSUs is reduced by the fair value of the units that are forfeited by employees that leave the Company prior to vesting as they occur. Compensation cost for RSUs are recognized using the straight-line method over the requisite service period. A Research and Development Expenses A Research and development expenses are charged to expense as incurred. Research and development expenses include, but are not limited to, product development, clinical and regulatory expenses, payroll and other personnel expenses, which include a certain portion of our chief executive officer, chief operating officer, chief financial officer and directors' compensation. For the year ended December 31, 2023 and 2022, a portion of personnel-related expenses and stock-based compensation expense for these individuals totaling \$0.8 million and \$0.5 million, respectively, was included within research and development due to their active involvement in the research and development activities, materials, supplies, related subcontract expenses, and consulting costs. A Regarding the accounting treatment for reimbursements, GAAP provides limited guidance on the accounting for government grants received by for-profit companies. In accordance with ASC Topic 832, Government Assistance, as adopted January 1, 2022, we disclose certain types of government assistance received in the notes to the consolidated financial statements that includes: a) the nature of the transaction including the nature of the assistance being given, b) the accounting policies being used to account for the transaction and c) other provisions of relevance, where required. Depending on the type of grant or contract, we understand there is more than one acceptable alternative for the accounting treatment: a) a reduction of costs, a deferred credit to be amortized, revenue or other income. The Company has concluded that reimbursements received for R&D expenses incurred, are more akin to a reduction of costs and applies reimbursements against incurred research costs. For the years ended December 31, 2023 and 2022, we recorded \$3.5 million and \$1.0 million in Research and development, net of contract expense reimbursements, respectively. A Income Taxes A The Company accounts for income taxes in accordance with ASC Topic 740, Income Taxes. ASC 740 requires a company to use the asset and liability method of accounting for income taxes, whereby deferred tax assets are recognized for deductible temporary differences, and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, the Company does not foresee generating taxable income in the near future and utilizing its deferred tax asset, therefore, it is more likely than not that some portion, or all of, the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment. A Under ASC 740, a tax position is recognized as a benefit only if it is more likely than not that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the more likely than not test, no tax benefit is recorded. The Company has no material uncertain tax positions for any of the reporting periods presented. A F-33 A Segment Information A Operating segments are defined as components of an enterprise about which separate and discrete information is available for evaluation by the chief operating decision-maker (CODM) in deciding how to allocate resources and assess performance. The Company and the Company's CODM, the Company's chief executive officer, evaluates the Company's operations and manages its business as a single operating segment. All of the Company's long-lived assets are held in the United States. A Net Loss Per Common Stock A Net loss per share of common stock requires presentation of basic earnings per common share on the face of the statements of operations for all entities with complex capital structures and requires a reconciliation of the numerator and denominator of the basic earnings per share computation. In the accompanying consolidated financial statements, basic loss per common share is computed by dividing net loss attributable to common stockholders by the weighted average number of shares of common stock outstanding during the year. Diluted earnings per share is computed by dividing net income attributable to common stockholders by the weighted average number of shares of common stock outstanding and potentially dilutive shares of common stock during the period to reflect the potential dilution that could occur from common shares issuable through convertible securities, contingent share arrangements, stock options and warrants unless the result would be antidilutive. A The dilutive effect of restricted stock units and other stock-based payment awards subject to vesting and common stock warrants is calculated using the treasury stock method, which assumes that the proceeds are used to purchase common shares at the average market price for the period. The dilutive effect of convertible securities is calculated using the if-converted method. Under the if-converted method, securities are assumed to be converted at the beginning of the period, and the resulting shares of common stock are included in the denominator of the diluted calculation for the entire period being presented. A For the years ended December 31, 2023 and 2022, the following common stock equivalents were excluded from the computation of diluted net loss per share as the result of the computation was anti-dilutive. A Schedule of Anti-dilutive Securities Excluded from Computation of Earnings Per Share A December 31, A December 31, A 2023A A 2022A A (as restated) A Convertible notes (Note 6) A 119,939 A A Warrants (Note 7) A 184,000 A A 47,831 Restricted stock units (Note 7) A 24,731 A A 2,966 A A 328,670 A A 50,797 A A Recent Accounting Pronouncements A In December 2023, the FASB issued ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures, which requires disaggregated information about a reporting entity's effective tax rate reconciliation as well as information on income taxes paid. The guidance is effective for the Company's fiscal years beginning after February 1, 2025, with early adoption permitted. The Company does not expect the adoption of this standard to have any material impact on its financial statements. A There have been no other recent accounting pronouncements, changes in accounting pronouncements or recently adopted accounting guidance during the year ended December 31, 2023 that are of significance or potential significance to the Company. A Note 4 - Leases A The Company had two lease agreements during the year which allowed for the use of laboratory facilities. The first was for a monthly payment of \$6,480, with a security deposit of \$6,480 held for the duration of the lease, that commenced on October 1, 2018, with the first payment made on January 1, 2019 and ended on October 31, 2023. A On February 16, 2023, the Company entered into a new lease agreement for new office and laboratory space, with base rent of \$7,206 per month for a period of 64 months, which increases at the rate of 3% per year, that commenced June 1, 2023. The new lease included a six-month 50% rent abatement upon commencement. Additional common area maintenance (CAM) fees are charged monthly and revised annually. The estimated monthly CAM fees are \$3,300 per month for the first year of the lease, which are being expensed as incurred. An irrevocable letter of credit (LOC) for the security deposit of \$43,234 and base rent of \$3,891, including 50% abatement, and \$3,315 of CAM cost, was due and paid on execution of the lease agreement. Alexandria Real Estate (ARE-QRS-CORP) is the beneficiary of the LOC, and the expiry date of the LOC is February 15, 2024. Subsequent to December 31, 2023, the LOC was renewed with an updated expiry date of March 1, 2025. A The following summarizes the right-of-use asset and lease information for the Company's operating leases: A Schedule of Right-of-Use Asset and Lease Information about Operating Lease A 2023A A 2022A A Years Ended A December 31, A December 31, A 2023A A 2022A A A Operating lease cost A 112,022A A 70,175A Variable lease cost A 24,222A A Sublease income A (7,819)A A (7,070) Total lease cost 128,425A A 63,105A A A A A Other information A A A A Operating cash flows from operating leases 95,641A A 76,248A Right-of-use assets obtained in exchange for new operating lease liabilities 365,556A A A A A A A Weighted-average remaining lease term - operating leases (year) A 4.67A A 4.08A Weighted-average discount rate - operating leases A 10.48%A A 10% A F-34 A Future non-cancelable minimum lease payments under the operating lease liability as of December 31, 2023, are as follows: Schedule of Future Non-cancelable Minimum Lease Payments Under Operating Lease Liability Years ended December 31, A Remainder of fiscal year A A 2024A \$91,502A A 2025A \$94,247A A 2026A \$97,074A A 2027A \$99,986A A 2028A \$68,235A A Total future minimum lease payments A 451,044A Less: imputed interest A (94,438) Present value of payments A 356,606A A Note 5 - Notes Payable-Related Party A On December 1, 2020, the Company consolidated all of the outstanding loans owed to an officer of the Company and to his spouse, resulting in the following two loans: (i) a single loan from the spouse of an officer of the Company, dated December 1, 2020, with a principal balance of \$426,243, bearing interest at the rate of 7.5% per annum, with a maturity date of December 31, 2021; and (ii) a single loan owed to an officer of the Company in the principal amount of \$139,229, bearing interest at the rate of 7.5% per annum, with a maturity date of December 31, 2021. In December of 2021, the maturity dates of these loans were further extended to June 30, 2022. In July of 2022, the notes were extended to June 30, 2023. A On June 21, 2021, the Company entered into a loan from the spouse of

an officer of the Company in the amount of \$120,000 (principal) with an interest rate of 7.5% per annum due June 21, 2022. In July of 2022, the loan was extended to June 30, 2023. The Company accounted for these loan extensions during the year ended December 31, 2022, as a troubled debt restructuring as the Company was experiencing financial difficulties and the extensions represented a concession by the lenders. As the future undiscounted cash flows of these related party notes exceeded their carrying value, no gain or loss was recognized upon the extensions. As of June 30, 2023 principal payments of \$685,473 and interest of \$104,968 were paid. As of December 31, 2023, there were no outstanding principal or interest balances for these related party notes. On August 1, 2022, in conjunction with a private placement of notes and warrants (as detailed in Note 6 below), in exchange for a \$50,000 payment upon subscription, the Company issued a convertible note to the spouse of an officer of the Company in the amount of \$50,000 (principal) with an interest rate of 6% per annum, and warrants to purchase 2,500 shares of common stock. The loan was fully repaid, including \$822 of accrued interest, in September of 2022. A Note 6 - Notes Payable A Convertible Notes and Notes Payable Alto Opportunity Master Fund, SPC A On January 11, 2023, the Company entered into a securities purchase agreement (the SPA) and Alto Opportunity Master Fund, SPC A Segregated Master Portfolio B, a Cayman entity (the Investor), pursuant to which the Company sold to the Investor a \$4,300,000 convertible note (the Convertible Note) and warrant (the Alto Warrant) to purchase 127,260 shares of common stock, exercisable at \$18.80 per share, in exchange for gross proceeds of \$3,935,000 (the Investment Amount) (See Note 7). The Company determined that the Alto Warrant contains a net cash settlement feature at inception and categorized the Alto Warrant as a liability in the accompanying consolidated financial statements. The Alto Convertible Note matures on March 11, 2025, but may be extended at the option of the noteholder. The Alto Convertible Note amortizes on a monthly basis and the Company can make such monthly amortization payments in cash or, subject to certain equity conditions, in registered shares of common stock or a combination thereof. Installments may be deferred by the noteholder, resulting in a variable interest rate. However, the effective interest rate is approximately 346% based on the internal rate of return calculated on a series of cash flows that occur at regular intervals. For equity repayment, the Alto Convertible Note is convertible into shares of common stock at a price per share equal to the lower of (i) \$18.80, (ii) 90% of the three lowest daily VWAPs of the 15 trading days prior to the payment date, or (iii) 90% of the VWAP of the trading day prior to payment date. The noteholder may convert at any time at a fixed price of \$18.80 per share. The noteholder has an acceleration of installment amount conversion option (the Alto Acceleration Option), whereby the noteholder, with certain share percentage limitations, can convert to common stock any outstanding installment amount at an amount equal to the installment amount plus five times (5x) the installment amount at any time. The Company has determined the Alto Acceleration Option is an embedded derivative within the host instrument and has bifurcated it from the host instrument and recorded it as a derivative liability valued at \$1,442,000, using a Monte Carlo simulation model (Note 8). The Convertible Note is repayable over 26 months and bears interest at the rate of 5% per annum. Additionally, the note contains certain redemption options and Make Whole provisions. A F-35 A In conjunction with entry into the SPA, the Company entered into a series of related agreements, including a security agreement (the Security Agreement), an intellectual property security agreement (the IP Security Agreement) and a subsidiary guaranty (the Subsidiary Guaranty). The security agreements and guaranty allow, among other things, for the Investor to have a security interest in and place a lien on all of the Company's assets and intellectual property until such time as the Alto Convertible Note is paid off. In addition, the SPA called for the Company to enter into a springing deposit account control agreement (the Springing DACA), which, in the event the Company defaults on its repayment of the Alto Convertible Note, would allow the Investor to assume control of the Company's bank account only with regard to any funds remaining outstanding under the Alto Convertible Note. As such, in conjunction with entry into the SPA, the Company established a separate bank account in which it deposited the Investment Amount and pursuant to which the Company, the Investor and the bank holding the Investment Amount, First Republic Bank, entered into the Springing DACA agreement. As the Investment Amount had been held at First Republic Bank, in light of certain banking crises then affecting smaller banks, on March 12, 2023, the Company and the Investor moved the Investment Amount from First Republic Bank, after which time the Springing DACA was no longer in effect. Further, pursuant to amendments to the SPA entered into in May and June of 2023, the Company and the Investor agreed that all of the Investment Amount would be released to the Company and the relevant provision of the SPA which required the Springing DACA would no longer be deemed applicable. In addition, the Company granted the Investor the option to purchase up to an additional \$10 million in convertible notes and warrants on substantially the same terms as the Alto Convertible Note and Alto Warrant, excluding the Springing DACA requirement, with such option to be effective through December 31, 2025. The agreement offers the investor an opportunity to participate in future capital raises at substantially similar terms as the January 11, 2023 agreement. The Company expects that such subsequent convertible notes and warrants would be issued on substantially similar terms as the January 11, 2023 initial agreement, as amended, thus providing the Company the opportunity to negotiate certain aspects of the agreement. A Boustead Securities, LLC (the Boustead) served as a placement agent for the Alto Convertible Note and Warrant offering and received \$345,000 cash compensation and a warrant to purchase 8,909 shares of common stock, exercisable at \$18.80 per share. The Boustead warrant was determined to be an equity instrument valued on a non-recurring basis. The Company used the Black Scholes valuation model using a term of five years, volatility of 110%, a risk-free rate of 3.53% for a value of \$99,543. The Company allocated the finance costs related to the Boustead placement agent fee of \$345,000, based on the relative fair market values of the Convertible Note and warrants issued. The allocation of the financing costs applied \$232,027 to the debt component as a debt discount that is being amortized to interest expense over the term of the Convertible Note, \$104,245 to the warrant derivative liability component, expensed as a finance fee, and \$8,727 to the equity warrant as a reduction in additional paid in capital. A The Company allocated to the debt component of the note an original discount of \$300,000, legal fees of \$65,000, \$215,000 for additional interest fees on day one added to note principal, \$1,442,000 for the accelerated conversion feature, and \$1,288,543 for the fair value of warrants, resulting in an additional \$3,310,543 debt discount that is being amortized to interest expense over the term of the Alto Convertible Note. A During the year ended December 31, 2023, the Company recorded interest expense of \$2,484,193, which included amortization of debt discount as interest expense of \$2,123,049. During the year ended December 31, 2023, the Company settled \$1,925,700 of principal and settled \$294,927 of accrued interest, which settlements were made in the form of 297,625 shares of common stock during the year ended December 31, 2023. A As of December 31, 2023, the outstanding principal for the convertible note was \$2,254,856 and the debt discount remaining was \$1,523,768, with a net convertible note carrying value of \$731,088, which represents the current and non-current portions of the convertible note as of December 31, 2023. A F-36 A Subsequent to December 31, 2023, the Company and the Investor agreed to certain changes in terms of the Alto Convertible Note as well as the waiver of certain covenant violations. See Subsequent Events for further details. A Paycheck Protection Program Term Notes A On March 9, 2021, the Company obtained a \$73,007 term note issued under the Coronavirus Aid, Relief, and Economic Security Act's Paycheck Protection Program (the PPP). The note bore an interest rate of 1% per annum, had a six-month deferral period with payments due on the seventh month, with all outstanding principal and interest due and payable within two years from the note's inception date. Under its terms, all or a portion of the note may be forgiven in accordance with PPP requirements, with no more than 25% of the amount forgiven to be attributable to non-payroll costs. As of December 31, 2021, a Loan Forgiveness Application was submitted to PNC Bank along with the requested documentation. Thereafter, during the quarter ended March 31, 2022, the note liability was reduced in its entirety and the Company recognized a gain on forgiveness of \$73,007 in its statement of operations for the year ended December 31, 2022. (as restated) A December 2021 Promissory Notes A On December 28, 2021, the Company issued promissory note units, consisting of an aggregate \$500,000 in 10% unsecured promissory notes with a maturity date of December 28, 2022 (the December 2021 Promissory Notes) and warrants to purchase 62,500 shares of common stock exercisable at \$8.00 per share with an expiration date of December 28, 2026. The Company received net proceeds of \$494,925 upon the issuance of these promissory note units and incurred \$21,890 in additional issuance costs which were allocated between the December 2021 Promissory Notes and the warrants. The Company assessed the embedded features of the December 2021 Promissory Notes and determined that the accelerated repayment upon an initial public offering represented a derivative feature requiring bifurcation. The Company estimated the fair value of the derivative to be \$367,000 at issuance (see Note 8 for fair value considerations). A The Company determined that the warrants issued with the December 2021 Promissory Notes should be classified as equity. The Company measured the fair value of these warrants using a Black-Scholes model and allocated fair value to these warrants on a relative fair value basis. The proceeds from the December 2021 Promissory Notes allocated to the warrants at issuance was \$418,449. The inputs to the Black-Scholes model included an estimated fair value of the Company's common stock of \$40.00, the exercise price of \$8.00 per share, a five year term, 86.3% volatility and a risk free rate of 1.27%. A The discount on the December 2021 Promissory Notes was being amortized using the straight-line method as the initial proceeds received were fully allocated to the warrants and bifurcated derivative, through the maturity date of the notes. The Company recognized amortization expense of \$331,978 related to the discount on the December 2021 Promissory Notes as interest expense in its statement of operations for the year ended December 31, 2022. A In April 2022, the warrants were modified by the Company to nullify the effect of the April 2022 reverse stock split, allowing the warrant to remain outstanding and exercisable for 62,500 shares of common stock at an exercise price of \$8.00 per share. The Company calculated the incremental fair value provided to the holders of the warrants due to the modification as \$941,000, which was recorded as a deemed dividend during the year ended December 31, 2022. The incremental fair value was estimated using a Black-Scholes model, with inputs including the estimated fair value of the Company's common stock of \$32.00, the exercise price of either \$16.00 (pre-modification) or \$8.00 (post-modification), a remaining term of 4.75 years, volatility of 83.6% and a risk free rate of 2.55%. A In September 2022, the warrants were exercised by the lenders in exchange for tendering the outstanding principal balance (\$500,000) on the December 2021 Promissory Notes. The Company treated the settlement as a debt extinguishment for accounting purposes. The Company recognized a loss on extinguishment of \$1,531,852 upon this settlement and issuance of the 62,500 shares of common stock upon exercise, based on the difference between the estimated fair value of the common stock issued (\$2,311,250) and the carrying value of the December 2021 Promissory Notes. The Company paid all accrued interest under the December 2021 Promissory Notes from issuance through settlement to the lenders in cash during the year ended December 31, 2022. A 2022 Convertible Bridge Notes A On February 8, 2022 and March 11, 2022, the Company sold \$365,000 and \$225,000, respectively, in 6% convertible notes (the 2022 Convertible Notes), which bore 6% interest (which would be waived upon a conversion event), were repayable on December 31, 2024, and were convertible upon the completion of the Company's initial public offering or other liquidity event at 50% of the per share price paid by investors in such an event. In addition, if the 2022 Convertible Notes were not converted during the period 12 months after their initial issuance, the outstanding principal amount of the 2022 Convertible Notes would be increased by 10%. The Company received net proceeds of \$525,715 from the 2022 Convertible Notes, after deducting a total of \$64,285 in fees paid to Boustead Securities LLC for services provided as placement agent for the offering. Boustead also received warrants in connection with the issuances with a total estimated fair value of \$92,336 (see discussion below) and the Company incurred \$17,363 in additional costs which were recorded as debt issuance costs upon issuance of the 2022 Convertible Notes. A The Company assessed the embedded features of the 2022 Convertible Notes and determined that the automatic conversion feature with a 50% discount to per share price paid (a share-settled redemption feature) and the 10% principal increase feature were not clearly and closely related to the debt host instrument and met the definition of a derivative and as such, required bifurcation from the 2022 Convertible Notes. The Company estimated the fair value at issuance of these features to be \$221,000 and recorded as a discount to the 2022 Convertible Notes (see Note 8 for fair value considerations). Of the total \$173,984 of issuance costs incurred related to the 2022 Convertible Notes, the Company allocated \$108,858 of the debt issuance costs to the 2022 Convertible Notes (as a discount) and \$65,126 allocated to the derivative liability and expensed as a component of the finance fee (as restated) in the statement of operations. The discount on the 2022 Convertible Notes was amortized under the effective interest method through the maturity dates of the notes. The Company recognized amortization expense of \$37,745 related to the discount on the 2022 Convertible Notes as interest expense in its statement of operations for the year ended December 31, 2022. A F-37 A For services provided in the offering, Boustead Securities LLC also received warrants to purchase 10% of the shares of common stock issuable upon conversion of the 2022 Convertible Notes, at the conversion price of the notes. Upon conversion, the warrant became exercisable for a total of 2,582 shares of common stock at an exercise price of \$16.00 per share. These warrants were accounted for under ASC 718 and classified as liabilities due to the fact that the conversion of the 2022 Convertible Notes would impact their fair value. The fair value at issuance of the warrants was estimated as \$92,336 using a Black-Scholes model, with inputs that included an estimated fair value of the Company's common stock of \$32.00, an exercise price of \$16.00 per share (based on the estimated conversion terms), a five year term, 86.1% volatility and a risk free rate of 1.81% to 1.96%. A During the year ended December 31, 2022, the 2022 Convertible Notes were automatically converted into the securities issued by the Company to the investors in the initial public offering, at a discounted price of \$32.00 per unit. Consistent with the investors in the initial public offering, the 2022 Convertible Note holders received 18,438 shares of common stock and warrants to purchase 18,438 shares of common stock with an exercise price of \$0.08 per share. The warrants issued to the 2022 Convertible Note holders were immediately exercised. Pursuant to the automatic exercise of the share-settled redemption feature, the Company accounted for the conversion as an extinguishment of debt. The Company recognized the issuance of the shares of common stock and warrants at their estimated fair value, and recorded a loss on extinguishment of \$310,621 based on the difference between the estimated fair value (\$1,198,438) and the net carrying amount of the 2022 Convertible Notes (including the carrying value of the bifurcated derivative liabilities, which were adjusted to then fair value upon settlement). The accrued cash interest was waived upon conversion and was included as a component of the loss on extinguishment. A August 2022 Notes A On August 1, 2022, the Company issued promissory note units, consisting of an aggregate \$50,000 in 10% promissory notes with a maturity date of July 31, 2023 (the August 2022 Promissory Notes) and warrants to purchase 2,500 shares of common stock exercisable at a price of the lesser of \$20.00 per share or 50% of the per share price paid in the Company's initial public offering. In addition, the Company issued convertible note units, consisting of an aggregate of \$75,000 in 6% convertible notes with a maturity date of December 31, 2024 (the August 2022 Convertible Notes), and collectively, the August 2022 Notes and warrants to purchase 3,750 shares of common stock exercisable at a price of the lesser of \$20.00 per share or 50% of the per share price paid in the Company's initial public offering. The Company received net proceeds of \$50,000 upon the issuance of the August 2022 Promissory Notes, \$25,000 upon the issuance of the August 2022 Convertible Notes (non-related party) and \$50,000 upon the issuance of the August 2022 Convertible Notes issued to a related party (as detailed in Note 5 above). A The Company assessed the embedded features of the August 2022 Promissory Notes and determined that the accelerated repayment upon an initial public offering represented a derivative feature requiring bifurcation. The Company estimated the fair value of the derivative to be \$45,000 at issuance (see Note 8 for fair value considerations). The Company assessed the embedded features of the August 2022 Convertible Notes and determined that the automatic conversion feature with a 50% discount to per share price paid (a share-settled redemption feature) and the 10% principal increase feature were not clearly and closely related to the debt host instrument and met the definition of a derivative and as such, required bifurcation from the August 2022 Convertible Notes. The Company estimated the fair value at issuance of these features to be \$31,000 and recorded as a discount to the August 2022 Convertible Notes (see Note 8 for fair value considerations). A The Company determined that the warrants issued with the August 2022 Notes should be classified as liabilities under ASC 815, as the settlement amount could vary based on the occurrence of the initial public offering. The Company measured the fair value of these warrants using a Black-Scholes model with inputs that included an estimated fair value of the Company's common stock of \$32.00, an exercise price of \$20.00 per share, a five-year term, 80.0% volatility and a risk free rate of 2.66%, and recognized them at their full fair value of \$146,624. A The fair value of these warrants, the fair value of the bifurcated derivative liabilities and the other debt issuance costs incurred (totaling \$27,162, including the fair value of the Boustead warrants described below), exceeded the proceeds received and as such, the Company recorded a loss at issuance of \$124,786, in finance fee (as restated) in the statement of operations. The discount on the August 2022 Notes was being amortized under the straight-line method, as the initial carrying value was \$0, through the maturity date of the respective notes. The Company recognized amortization expense of \$7,661 related to the discount on the August 2022 Notes as interest expense in its statement of operations for the year ended December 31, 2022. A Boustead Securities LLC acted as placement agent for the August 2022 Notes and received warrants to purchase 625 shares of common stock at an exercise price of \$20.00 per share. The fair value of the warrants was estimated as \$14,662 using a Black-Scholes model with inputs that included an estimated fair value of the Company's common stock of \$32.00, an exercise price of \$20.00 per share, a five-year term, 80.0% volatility and a risk free rate of 2.66%, and recorded by the Company in stockholders' equity at issuance. A During the year ended December 31, 2022, the lender under the August 2022 Promissory Notes and one lender under the August 2022 Convertible Notes exercised warrants to purchase 3,750 shares of common stock in exchange for tendering their outstanding principal balance (\$75,000) on their respective notes. As the warrants being exercised were classified as liabilities, the Company accounted for the settlement as an extinguishment of debt. The Company recognized the issuance of the 3,750 shares of common stock at their estimated

fair value (\$121,875), and recorded a gain on extinguishment of \$44,614 based on the difference between the estimated fair value and the net carrying amount of the tendered August 2022 Notes. The remaining \$50,000 outstanding under the August 2022 Convertible Notes (and owed to the related party) was fully repaid in cash during the year ended December 31, 2022 (see Note 5), resulting in the recognition of a gain on extinguishment of \$2,206 based on the difference between the repayment in cash and the net carrying amount of the notes. A Note 7 - Stockholdersâ€™ Equity A Common Stock A During the year ended December 31, 2023, the Company issued: A A 297,625 shares of common stock to settle \$1,925,700 of principal and \$294,927 of interest on a Convertible Note and incurred \$477,221 of loss on settlement. A A 10,650 shares of common stock issued for vesting of restricted stock units. A F-38 A A During the year ended December 31, 2022, the Company issued: A A 105 shares of common stock for conversion of \$16,340 of accrued interest. A A 3,500 shares of common stock upon vesting of restricted stock units. A A 352,443 shares of common stock upon completion of the Companyâ€™s initial public offering (including the exercise of the underwriterâ€™s overallotment option), and the immediate exercise of warrants issued as part of the IPO Units, for net proceeds of \$9,951,356. A A 42,113 shares of common stock upon the automatic conversion of preferred shares and 12,553 shares of common stock to settle cumulative dividends on the preferred shares totaling \$402,064. A A Total of 36,876 shares of common stock issued to the lenders upon conversion of the 2022 Convertible Notes, including 18,438 shares of common stock issued upon the conversion of the 2022 Convertible Notes into units with an estimated fair value of \$1,198,438 at settlement, and 18,438 shares of common stock upon the exercise of the common stock warrants, for total proceeds of \$1,475. A A Total of 66,250 shares of common stock upon the exercise of warrants and settlement of the December 2021 Notes and certain August 2022 Notes. Includes 62,500 shares of common stock issued upon the exercise and settlement of the December 2021 Notes with an estimated fair value of \$2,031,249 and 3,750 shares of common stock issued upon the exercise and settlement of certain August 2022 Notes with an estimated fair value of \$121,875. A A 22,535 shares of common stock upon the cashless exercise of warrants issued to Boustead Securities LLC for placement agent and underwriter services provided to the Company A Series A Preferred Shares A The Series A Preferred Stock, in accordance with its terms, is automatically convertible into a number of shares of the Companyâ€™s common stock upon the closing of the sale of shares of common stock to the public in a qualified offering (at a 10% discount to the initial public offering price, as set forth in the Series A certificate of designation) or upon listing of the Companyâ€™s common stock on a national securities exchange at a fixed price. The Series A Preferred Stock, while outstanding, accrued cumulative dividends at a rate of 8.5% per annum. In addition, the Series A Preferred Stock is callable by the Company, at a price equal to the stated value of the Series A Preferred Stock (\$1,000 per share), plus accrued and unpaid cumulative dividends. A In April 2022, the Company and holders of the Series A Preferred Stock agreed to modifications of the Series A certificate of designation which changed the definition of a â€œQualified IPOâ€ by lowering the minimum required proceeds to \$10,000,000 and removing the minimum per share IPO price, and changed the conversion price upon the listing of the Companyâ€™s common stock from \$99.92 per share to \$40.00 per share. The Company determined that these changes represented a substantial change in the terms of the Series A Preferred Stock and accounted for the changes as an extinguishment. The Company recognized the excess of the post-amendment fair value of the Series A Preferred Stock over its carrying value as a deemed dividend of \$439,427, which increases net loss attributable to common stockholders during the year ended December 31, 2022. A During the year ended December 31, 2022 and upon completion of its initial public offering, the Company converted 1,213 shares of Series A Preferred Stock into 42,113 shares of common stock, based on a conversion price of 90% of the per share IPO price of \$32.00 per share, resulting in a discounted conversion price of \$28.80 per share. Based on the nature of the settlement (as the exercise of a share-settled redemption feature) the Company recognized a deemed contribution of \$31,423 during the year ended December 31, 2022. A During the year ended December 31, 2022, the Company accrued \$71,009 for the 8.5% cumulative dividends on the Series A Preferred stock, and as of the date of conversion of the Series A Preferred Stock, the total cumulative dividends accrued were equal to \$402,064. Upon the conversion of the Series A Preferred Stock, the cumulative dividends were also converted into 12,553 shares of the Companyâ€™s common stock. A As of December 31, 2023 and 2022, the Company had no shares of Series A Preferred Stock outstanding. A Warrants A The Series A Preferred Stock sold in the Companyâ€™s 2018 and 2019 private placement offerings included warrants to be issued upon the earlier of a closing of the sale of shares of common stock to the public or upon a listing of the Companyâ€™s common stock. The warrants will be exercisable for a period of three years after the date of issuance at an exercise price contingent on the terms of the public offering. The initial form of the warrants were expected to include contingent call features based on the terms of the public offering. As originally drafted, if an initial public offering occurs at a price at or above \$111.04, then the warrants are callable if the 20-day VWAP of the common stock in at or above 150% of the variable exercise price. In the scenario where the common stock is listed with a common stock issuance price below \$111.04, then the warrants are callable if the 20-day VWAP of the common stock is at or above the \$166.56 exercise price. Upon the issuance of the warrants in September 2022, the contingent call features were not included in the agreements. Given the variability in the number of warrants and exercise price, the detachable warrants contained terms and features that gave rise to liability classification. A In April 2022, the Company modified the terms of the Series A Preferred Stock as discussed above. These modifications impacted the potential terms of these contingently issuable warrants (potential warrant shares and exercise price). The impact of this modification was reflected in the fair value of the warrant obligation recorded during the interim periods within the year ended December 31, 2022. Upon completion of our initial public offering, the Series A Preferred Stock was converted, and warrants were issued in relation to the conversion, with each warrant then exercisable at the equivalent of the per share initial public offering price. In total, the Company issued warrants to purchase 42,113 shares of common stock, at an exercise price of \$32.00 per share in settlement of this warrant obligation. In addition, upon the issuance of these warrants, the Company reassessed the classification accounting and concluded that the issued warrants met the requirements for classification in stockholdersâ€™ equity. The Company reclassified the then fair value of these warrants, totaling \$756,723, to additional paid in capital in stockholdersâ€™ equity. A The warrant liability related to the Series A Preferred Stock was \$0 as of December 31, 2022. For the period ended December 31, 2022 (prior to reclassification), the change in fair value of warrant obligation liability was a loss of \$421,768. A F-39 A A Warrants Issued to Boustead as Placement Agent or Underwriter A For services provided in relation to the 2022 Convertible Notes and August 2022 Notes offerings, Boustead received warrants to purchase 10% of the shares of common stock issuable upon conversion of the 2022 Convertible Notes, at the conversion price of the notes. Upon conversion, the warrant became exercisable for a total of 2,582 shares of common stock at an exercise price of \$16.00 per share. These warrants were accounted for under ASC 718 and classified as liabilities due to the fact that the conversion of the 2022 Convertible Notes would impact their fair value. These warrants were exercised on a cashless basis in September 2022. The Company reclassified the then fair value of the warrants of \$64,140 at the initial public offering to equity, with the estimated fair value based on a Black-Scholes model, with inputs that included an estimated fair value of the Companyâ€™s common stock of \$32.50, an exercise price of \$16.00 per share, a remaining term of 4.5 years, 82.5% volatility and a risk free rate of 3.43%. A A Boustead acted as placement agent for the August 2022 Notes and received warrants to purchase 625 shares of common stock at an exercise price of \$20.00 per share. These warrants were classified in equity and exercised on a cashless basis in September 2022. A Boustead additionally received a warrant to purchase 21,453 shares of common stock at an exercise price of \$97.52 per share upon the closing of the IPO. These warrants were classified in equity and exercised on a cashless basis in September 2022. Upon the closing of the overallotment option to the IPO, Boustead received an additional warrant to purchase 3,218 shares of common stock at an exercise price of \$97.52 per share. The Company determined that these warrants should be classified in equity. The fair value of the warrant issued at the closing of the IPO was estimated to be \$426,752 using a Black-Scholes model, with inputs that included an estimated fair value of the Companyâ€™s common stock of \$32.50, an exercise price of \$97.52 per share, a five-year term, 101.8% volatility and a risk free rate of 3.27%. The fair value of the warrant issued at the closing of the overallotment option was estimated to be \$111,296 using a Black-Scholes model, with inputs that included an estimated fair value of the Companyâ€™s common stock of \$50.88, an exercise price of \$97.52 per share, a five-year term, 101.4% volatility and a risk free rate of 3.74%. The fair value of these warrants was recorded to additional paid in capital and represented an issuance cost of the initial public offering (recorded as a deduction to additional paid in capital). These warrants remain outstanding as of December 31, 2023. A Alto Opportunity Master Fund, SPC A In connection with the January 2023 Alto Convertible Note, Boustead was granted warrants to purchase 8,909 shares of common stock, at an exercise price of \$18.80 per share (Note 6). In addition, Alto was granted warrants to purchase 127,260 shares of common stock, at an exercise price of \$18.80 per share (Note 6, 8). A A summary of activity regarding all warrants issued for the year ended December 31, 2023 and 2022 were as follows: A Schedule of Warrants Activity A Number of A Weighted Average A Weighted Average A A Warrants A Exercise Price A Life (years) A A (as restated) A A (as restated) A Outstanding, December 31, 2021 A 62,500 A \$8.00 A A 4.99 A Granted (1) A 270,910 A A 14.57 A A 4.68 A Exercised (2) A A (285,579) A A 9.58 A A (as restated) A Outstanding, December 31, 2022 A 47,831 A 35.77 A A 2.78 A Granted - Boustead A 8,909 A A 18.80 A A 5.00 A Granted - Ayrton A 127,260 A A 18.80 A A 4.00 A Outstanding, December 31, 2023 A 184,000 A 32.21 A A 2.77 A A (1) Granted warrants include those granted on the issuance of the August 2022 Promissory Notes (3,750 warrants); Notes Payable â€ Related Parties (2,500 warrants); upon conversion of the Series A Preferred Shares (42,114 warrants); automatic conversion of the 2022 Convertible Notes (18,447 warrants); issued during the IPO, including overallotment option (176,222 warrants) and issued to Boustead Securities LLC (27,877 warrants). A (2) Exercised warrants include the exercise of the warrants issued with the December 2021 Notes (62,500 warrants); the exercise of the warrants issued with the August 2022 Notes (3,750 warrants); the exercise of the warrants issued upon conversion of the Convertible Notes (18,447 warrants); and the exercise of the warrants issued during the IPO, including overallotment option (176,222 warrants), and warrants exercised on a cashless basis (24,660 warrants). A The intrinsic value of the warrants as of December 31, 2023 is \$0. All of the outstanding warrants are exercisable as of December 31, 2023. A Equity Incentive Plan A Our 2018 Equity Incentive Plan (the â€2018 Planâ€) provides for equity incentives to be granted to our employees, executive officers, directors and key advisers and consultants. Equity incentive grants may be made in the form of stock options with an exercise price of not less than the fair market value of the underlying shares as determined pursuant to the 2018 Equity Incentive Plan, restricted stock awards, other stock-based awards, or any combination of the foregoing. The 2018 Equity Incentive Plan is administered by the Companyâ€™s compensation committee. We have reserved 3,000,000 shares of our common stock for issuance under the 2018 Equity Incentive Plan. As of December 31, 2023, 84,779 shares have been granted under the 2018 Equity Incentive Plan, of which 60,048 shares have vested. A Restricted Stock Units A We may grant restricted stock units (â€RSUsâ€) under our 2018 Plan. RSUs are bookkeeping entries representing an amount equal to the fair market value of one share of our common stock. Subject to the provisions of our 2018 Plan, the administrator determines the terms and conditions of RSUs, including the vesting criteria and the form and timing of payment. Notwithstanding the foregoing, the administrator, in its sole discretion, may accelerate the time at which any restrictions will lapse or be removed. RSUs granted typically vest annually in one third increments from the date of appointment. A During the years ended December 31, 2023 and 2022, pursuant to agreements with directors, officers and consultants, 32,415 and 4,449 RSUs with a value of \$352,400 and \$100,000 were granted, respectively. Compensation expense for the vesting RSUs were as follows: A A Schedule of Compensation Expense of Restricted Stock Units A A 2023 A 2022 A Year ended December 31, A A 2023 A 2022 A A (as restated) Recognized in general and administrative expense A \$115,000 A \$105,582 A Recognized in research and development expense A \$66,960 A \$131,965 A Total A \$181,960 A \$237,547 A As of December 31, 2023 and 2022, there was \$231,550 and \$61,111, respectively, of unrecognized stock-based compensation expense related to unvested RSUs, which is expected to be recognized over a weighted-average period of 1.06 years and 1.83 years, respectively. A F-40 A A summary of activity regarding the Restricted Stock Units issued follows: A Schedule of Restricted Stock Units (RSUs) A A Number of Shares A Weighted Average Grant Date Fair Value Per Share A Outstanding, December 31, 2021 (as restated) A 2,017 A \$185.60 A Granted A 4,449 A A 22.48 A Vested (as restated) A (3,500) A 116.48 A Outstanding, December 31, 2022 (as restated) A 2,966 A \$22.48 A Granted A 32,415 A A 10.88 A Vested (as restated) A (10,650) A 12.00 A Outstanding, December 31, 2023 A 24,731 A \$11.76 A Note 8 â€ Derivative Liabilities A Fair Value Assumptions Used in Accounting for Derivative Liabilities A ASC 815 requires us to assess the fair market value of derivative liabilities at the end of each reporting period and recognize any change in the fair market value as other income or expense. A Alto Opportunity Master Fund, SPC A In January 2023, in connection with the Alto Convertible Note, the Company issued warrants to purchase 127,260 shares of common stock, with an exercise price of \$18.80 per share, valued at inception at \$1,189,000 and as of December 31, 2023, at \$410,660. The Company determined our derivative liabilities from the warrants issued in relation to the Alto Convertible Note do not satisfy the classification as equity instruments due to the existence of a certain net cash settlement provision that is not within the sole control of the Company. In addition, there are certain down round provisions that could reduce the exercise price if the Company issues securities at lower prices in the future. A The Company determined our derivative liability from the noteholderâ€™s Acceleration Option for the Alto Convertible Note is not clearly and closely related to the host and should be thus accounted for as a bifurcated derivative liability. A We classified these derivative liabilities as a Level 3 fair value measurement and used the Monte Carlo pricing model to calculate the fair value as of January 11, 2023, and for each reporting period. Key inputs for the simulation are summarized below. The Monte Carlo simulation uses an implied VWAP for each valuation date. The implied VWAP was backsorted by setting the summation of the parts (e.g., derivatives and debt without derivatives) equal to the cash proceeds. The simulation was then iterated and manipulated to solve for the implied share price, which was approximately \$12.64 per share (or an approximate 14% discount to the quoted market VWAP on January 11, 2023). Additionally, the Company estimates probability for various specific scenarios impacting the warrant valuation. A The range of key inputs for the Monte Carlo simulation for the year ended December 31, 2023, were as follows: A Schedule of Monte Carlo Simulation Assumption Net cash settlement and down round key valuation inputs â€ Alto Warrants A A Annualized volatility A 77.51% - 92.33% Risk-free interest rate A 4.01% - 5.23% Quoted VWAP A \$4.72 A Exercise price A \$18.80 A Probability assessment A 5% - 25% Illiquidity discount A (17%) Time period (years) A 0.53 - 3.03 A Estimated fair value (issuance) A \$1,189,000 A Estimated fair value (December 31, 2023) A \$410,660 A A * Based on the Monte Carlo simulation analysis of 50,000 iterations A F-41 A A Alto Acceleration Option key valuation inputs A A A Annualized volatility A 34.23% - 59.15% Risk-free interest rate A 4.68% - 5.60% Quoted VWAP A \$4.72 A Illiquidity discount A (17%) Time period (years) A 0 - 1.2 A Estimated fair value (issuance) A \$1,442,000 A Estimated fair value (December 31, 2023) A \$3,852 A A * Based on the Monte Carlo simulation analysis of 50,000 iterations A December 2021 Notes A In connection with the issuance of the December 2021 Notes, the Company identified an accelerated repayment upon IPO feature that required bifurcation. We classified this derivative liability as a Level 3 fair value measurement and used a probability weighted scenario model to estimate the fair value of the derivative just prior to the settlement of the December 2021 Notes. Key inputs for this valuation model are summarized below. A A Schedule of Derivative Liability Valuation December 2021 Notes derivative key valuation inputs A Issuance Date A A Settlement Date A Amount due upon acceleration A \$533,699 A \$533,973 A Carrying value of December 2021 Notes at measurement date A \$ â€ A A 337,398 A IPO date A 8/31/2022 A A 9/2/2022 A Probability of IPO acceleration A 90 % A 100% Probability of maturity A 10 % A â€ Time period to maturity (years) A 1.00 years A A 0.32 years A Discount rate A 50.0 % A 50.0% Estimated fair value A \$367,000 A A 162,000 A A 2022 Convertible Bridge Notes A In connection with the issuance of the 2022 Convertible Notes in February and March 2022, the Company identified certain embedded features that required bifurcation as a combined derivative liability, including the share-settled redemption of the 2022 Convertible Notes at a 50% discount and the automatic increase in principal of 10% if conversion does not occur within 12 months. A We classified this derivative liability as a Level 3 fair value measurement and used the a with and without probability weighted scenario model to estimate the fair value as of each issuance date of the 2022 Convertible Notes, as well as just prior to their settlement upon the initial public offering. Key inputs for this valuation model are summarized below. A A Schedule of Derivative Key Valuation Inputs 2022 Convertible Notes derivative key valuation inputs A A Issuance Dates A Settlement Date Annualized volatility A 75.0% - 82.0% A â€ Risk-free interest rate A 0.6% - 1.2% A â€ Exercise price (implied) A \$45.52 - \$85.92 A â€ Estimated IPO date A 8/31/2022 A 9/2/2022 Probability of default A 50% A â€ Probability of IPO or Alternative Liquidity Event A 45% A 100% Probability of Maturity A 5% A â€ Time period (years) A 0.47 - 1.00 years A 0.00 years Estimated fair value A \$221,000 A \$571,000 A F-42 A A August 2022 Notes A In connection with the issuance of the August 2022 Promissory Note, the Company identified an accelerated repayment upon IPO feature that required bifurcation. We classified this derivative liability as a Level 3 fair value measurement and used a probability weighted scenario model to estimate the fair value of the derivative just prior to the settlement of the August 2022 Promissory Notes. Key inputs for this valuation model are summarized below. A A A Schedule of Derivative Issuance Valuation Inputs August 2022 Promissory Notes derivative key valuation inputs A Issuance Dates A Settlement Date Amount due upon acceleration (estimated at issuance) A \$50,411 A \$50,438 Carrying value of August 2022 Promissory Notes at measurement date A \$0 A \$4,521 IPO date A 8/31/2022 A 9/2/2022 Probability of IPO acceleration A 90% A 100% Probability of maturity A 10% A â€ Time period to maturity (years) A 1.00 years A 0.91 years Discount rate A 16.03% A 18.81% Estimated fair value A \$45,000 A \$45,000 A In connection with the issuance of the August 2022 Convertible Notes, the Company identified certain embedded features that required bifurcation as a

[illegible]

convertible notes (the “Notes”), which bore 6% interest, were repayable three years from the date of issuance, and converted automatically into shares of common stock or, in the event that units were sold in the offering, units, at a conversion price of \$4.00 per unit upon closing of our IPO (\$32.00 per unit on a post-reverse split basis). Such notes were sold to accredited investors pursuant to an exemption from registration under Rule 506(b) of the Securities Act. Boustead Securities LLC acted as placement agent and received compensation of (i) \$36,500 in cash and warrants to purchase 10% of the total number of shares issuable upon conversion of the Convertible Notes, exercisable at the conversion price of the Convertible Notes for the February offering and (ii) \$22,750 in cash and warrants to purchase 10% of the total number of shares issuable upon conversion of the Convertible Notes, exercisable at the conversion price of the Convertible Notes for the March offering. A Effective March 30, 2022, the Company issued a total of 220 shares (105 shares on a post-reverse split basis) of common stock (the “Issuance”) to some 23 existing shareholders in satisfaction of certain interest that had accrued as the result of an inaccurate conversion of convertible notes in our 2018 share exchange. The Issuance satisfied in full all interest owed or otherwise accruing as the result of the inaccurate conversion. Such issuance was made in accordance with Rule 506(b) of the Securities Act. A On August 1, 2022, in conjunction with entering into three loan agreements for a total of \$125,000, which were repayable following consummation of our IPO, we issued warrants to purchase a total of 50,000 shares of our common stock, exercisable at \$2.50 per share (6,250 shares at \$20.00 per share on a post-reverse split basis) Such warrants were sold to three accredited investors pursuant to an exemption from registration under Rule 506(b) of the Securities Act. Boustead Securities LLC acted as placement agent and received warrants to purchase 5,000 shares of common stock exercisable at \$2.50 per share (625 shares at \$20.00 per share on a post-reverse split basis), equal to 10% of the value of the note offering, and \$12,500 in cash compensation. A In October 2024, the Company completed two closing in an up to \$1.3 million 5% original issue discount (“OID”) senior secured convertible note warrant offering, pursuant to which the Company issued a total of \$831,579 notes and warrants to purchase 329,964 shares of common stock, exercisable at a weighted-average price of \$1.42 per share. The notes bear interest at the rate of 14.5% per annum, with the interest payable quarterly in cash, mature one year after the date of issuance, are redeemable at any time by the Company at a 107% premium to the principal value of the notes and, three months after issuance, can be converted at any time by the holder at a 110% premium to the principal value of the note. Of the above investment amount, the Company’s CEO purchased \$250,000 of notes and warrants in the October 2024 Bridge Offering. A II-1 A ITEM 16. EXHIBITS A Exhibit No. A Description A A 1.1* A Form of Underwriting Agreement 3.1 A Amended and Restated Certificate of Incorporation (incorporated by reference to Exhibit 3.1 to the Registration Statement on Form S-1 (File No. 333-265429) filed on June 3, 2022). 3.2 A Certificate of Amendment to Amended and Restated Certificate of Incorporation, effective March 30, 2022 (incorporated by reference to Exhibit 3.2 to the Registration Statement on Form S-1 (File No. 333-265429) filed on June 3, 2022). 3.3 A Amended and Restated Certificate of Designation for Series A Convertible Preferred Stock, effective April 6, 2022 (incorporated by reference to Exhibit 3.4 to the Registration Statement on Form S-1 (File No. 333-265429) filed on June 3, 2022). 3.4 A Certificate of Amendment to Amended and Restated Certificate of Incorporation, effective June 22, 2022 (incorporated by reference to Exhibit 3.5 to the Registration Statement on Form S-1/A (File No. 333-265429) filed on June 23, 2022). 3.5 A Second Amended and Restated By-Laws (incorporated by reference to Exhibit 3.1 to the current Report on Form 8-K filed on November 1, 2022). 3.6 A Certificate of Amendment to Amended and Restated Certificate of Incorporation, effective August 13, 2024 (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K filed on August 7, 2024). 4.1 A Form of Convertible Note, dated February 2022 (incorporated by reference to Exhibit 4.1 to the Registration Statement on Form S-1 (File No. 333-265429) filed on June 3, 2022). 4.2 A Form of 10% Promissory Note, dated August 2022 (incorporated by reference to Exhibit 4.2 to the Registration Statement on Form S-1/A (File No. 333-265429) filed on August 18, 2022). 4.3 A Form of Warrant, dated August 2022 (incorporated by reference to Exhibit 4.3 to the Registration Statement on Form S-1/A (File No. 333-265429) filed on August 18, 2022). 4.4 A Form of Public Offering Warrant (incorporated by reference to Exhibit 4.4 to the Registration Statement on Form S-1/A (File No. 333-265429) filed on August 18, 2022). 4.5 A Form of Underwriting Warrant issuable to Boustead Securities LLC (incorporated by reference to Exhibit 4.5 to the Registration Statement on Form S-1/A (File No. 333-265429) filed on August 18, 2022). 4.6 A Form of Common Warrants (incorporated by reference to Exhibit 10.3 to the Current Report on Form 8-K filed on October 17, 2024). 4.7 A Form of Common Warrant (incorporated by reference to Exhibit 4.1 to the Current Report on Form 8-K dated October 31, 2024). 4.8 A Form of Pre-Funded Warrant (incorporated by reference to Exhibit 4.2 to the Current Report on Form 8-K dated October 31, 2024). 4.9* A Form of Pre-Funded Warrants 5.1* A Opinion of Dorsey & Whitney LLP 10.1 A Form of Subscription Agreement for Series A Convertible Preferred Stock (incorporated by reference to Exhibit 10.1 to the Registration Statement on Form S-1 (File No. 333-265429) filed on June 3, 2022). 10.2 A 2018 Equity Incentive Plan (incorporated by reference to Exhibit 10.2 to the Registration Statement on Form S-1 (File No. 333-265429) filed on June 3, 2022). - Definition

Sum of the carrying values as of the balance sheet date of obligations incurred through
that date and due within one year (or the operating cycle, if longer), including
liabilities incurred (and for which invoices have typically been received) and payable to
vendors for goods and services received, taxes, interest, rent and utilities, accrued
salaries and bonuses, payroll taxes and fringe benefits.

No definition available.

+ Details

Name:us-gaap_AssetsCurrentAbstract Namespace Prefix:us-gaap_ Data Type: xbrli:stringItemType Balance Type:na Period Type:duration

- Definition

Amount of currency on hand as well as demand deposits with banks or financial institutions. Includes other kinds of accounts that have the general characteristics of demand deposits. Also includes short-term, highly liquid investments that are both readily convertible to known amounts of cash and so near their maturity that they present insignificant risk of changes in value because of changes in interest rates. Excludes cash and cash equivalents within disposal group and discontinued operation.

- Definition

Total number of common shares of an entity that have been sold or granted to shareholders (includes common shares that were issued, repurchased and remain in the treasury). These shares represent capital invested by the firm's shareholders and owners, and may be all or only a portion of the number of shares authorized. Shares issued include shares outstanding and shares held in the treasury.

- Definition

The per share liquidation preference (or restrictions) of nonredeemable preferred stock (or preferred stock redeemable solely at the option of the issuer) that has a preference in involuntary liquidation considerably in excess of the par or stated value of the shares. The liquidation preference is the difference between the preference in liquidation and the par or stated values of the share.

- Definition

Amount of cash and cash equivalents, and cash and cash equivalents restricted to withdrawal or usage; including, but not limited to, disposal group and discontinued operations. Cash includes, but is not limited to, currency on hand, demand deposits with banks or financial institutions, and other accounts with general characteristics of demand deposits. Cash equivalents include, but are not limited to, short-term, highly liquid investments that are both readily convertible to known amounts of cash and so near their maturity that they present insignificant risk of changes in value because of changes in interest rates.

Organization, Consolidation and Presentation of Financial Statements [Abstract]

Organization and Liquidity

Note 1 – Organization and Liquidity

Organization and Line of Business

Shuttle Pharmaceuticals Holdings, Inc. (“we,” “us,” “our,” or the “Company”) was originally formed as Shuttle Pharmaceuticals, LLC in the State of Maryland on December 18, 2012. On August 12, 2016, the Company filed articles of conversion with the State of Maryland to convert from an LLC to a C corporation, at which time the Company changed its name to Shuttle Pharmaceuticals, Inc. (“Shuttle”). In connection with the conversion the Company issued shares of common stock in exchange for % of the outstanding membership interests in Shuttle prior to conversion. On June 4, 2018, Shuttle completed a reverse merger with Shuttle Pharmaceuticals Holdings, Inc. (then known as Shuttle Pharma Acquisition Corp. Inc.), a Delaware corporation, pursuant to which Shuttle, our operating entity, became a wholly-owned subsidiary of the Company. All share numbers referenced herein reflect a 1-for-8 reverse split of our common stock on a post-split basis, which was effective as of August 13, 2024 (see Note 2). **5,625,000100**

The Company’s primary purpose is to develop and commercialize unique drugs for the sensitization of cancers and protection of normal tissues, with the goal of improving outcomes for cancer patients receiving radiation therapy. Shuttle has deployed its proprietary technology to develop novel cancer immunotherapies, producing a pipeline of selective HDAC inhibitors for cancer and immunotherapy applications. The Company’s HDAC platform is designed to target candidate molecules with potential roles in therapeutics beyond cancer, including autoimmune, inflammatory, metabolic, neurological and infectious diseases. The Company’s Ropidoxuridine product, which is used with radiation therapy to sensitize cancer cells, was initially funded by a Small Business Innovation Research (“SBIR”) contract provided by the National Cancer Institute (“NCI”), a unit of the National Institutes of Health (“NIH”). Ropidoxuridine has been further developed through the Company’s collaborations with scientists at the University of Virginia for use in combination with proton therapy to improve patient survival. Historically, and prior to the Company’s initial public offering in September 2022, the Company has obtained funding to develop products through NIH grants, including a product to predict late effects of radiation with metabolic biomarkers and develop prostate cancer cell lines in health disparities research.

The production and marketing of the Company’s products and its ongoing research and development activities will be and are subject to extensive regulation by numerous governmental authorities in the United States. Prior to marketing in the United States, any products or combination of products developed by the Company must undergo rigorous preclinical (animal) and clinical (human) testing and an extensive regulatory approval process implemented by the Food and Drug Administration (“FDA”) under the Food, Drug and Cosmetic Act. There can be no assurance that the Company will not encounter problems in its clinical trials that will cause the Company or the FDA to delay or suspend the clinical trials.

The Company’s success will depend in part on its ability to obtain patents and product license rights, maintain trade secrets, and operate without infringing on the proprietary rights of others, both in the United States and in other countries. There can be no assurance that patents issued to or licensed by the Company will not be challenged, invalidated or circumvented, or that the rights granted thereunder will provide proprietary protection or competitive advantages to the Company now or in the future.

Liquidity and Going Concern

Our unaudited condensed consolidated financial statements are prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The Company has incurred losses since inception and has a net loss of approximately \$ million and revenues for the nine months ended September 30, 2024 and has a working capital deficit of approximately \$ million as of September 30, 2024. The Company does not expect to generate positive cash flows from operating activities in the near future. **7.5no1.3**

In September 2024, the Company’s CEO provided \$ thousand to the Company in exchange for a promissory note repayable in equal monthly installments of principal and interest over a term of . In October 2024, the Company completed an offering of senior secured convertible bridge notes, receiving \$ thousand in cash. The notes have a term of and were accompanied by warrants with a weighted-average exercise price of \$. Also in October 2024, the Company completed an equity raise that provided \$ million net cash for the issuance of million shares / pre-funded warrants, and by million warrants with an exercise price of \$. However, the Company’s existing cash resources and the cash received from the equity offering and senior convertible note are not expected to provide sufficient funds to carry out the Company’s operations and clinical trials through the next twelve months. **250one year790one-year329,4611.423.92.92.91.40**

The Company’s capital raises have to date supported operations, the manufacture of drug product and FDA approval of the IND for the Phase II clinical trial of Ropidoxuridine and radiation therapy in glioblastoma and other radiation sensitizer discovery and therapy. The FDA recommended and the Company agreed to an expansion of the Phase II clinical trial, necessitating additional capital to complete the trial as well as fund ongoing operations. Additionally, the Phase II clinical trial of Ropidoxuridine has evolved with finalized agreements with all six of the planned site enrollment locations to administer the Phase II clinical trial of Ropidoxuridine and the enrollment of the first three patients.

The ability of the Company to continue as a going concern is dependent upon its ability to continue to successfully raise additional equity or debt financing to allow it to fund ongoing operations, conduct clinical trials and bring a drug candidate to commercialization to generate revenues. These conditions raise substantial doubt about the Company’s ability to continue as a going concern within one year after the date that the unaudited condensed consolidated financial statements are issued.

The accompanying unaudited condensed consolidated financial statements do not include any adjustments to reflect the future effects on the recoverability and classification of assets or the amounts and classification of liabilities if the Company is unable to continue as a going concern.

Note 1 – Organization and Liquidity

Organization and Line of Business

The Company was formed as Shuttle Pharmaceuticals, LLC, in the State of Maryland on December 18, 2012. On August 12, 2016, the Company filed articles of conversion with the State of Maryland to convert from an LLC to a C corporation, at which time the Company changed its name to Shuttle Pharmaceuticals, Inc. (“Shuttle”). In connection with the conversion the Company issued shares of common stock in exchange for % of the outstanding membership interests in Shuttle prior to conversion. On June 4, 2016, Shuttle completed a reverse merger with Shuttle Pharmaceuticals Holdings, Inc. (then known as Shuttle Pharma Acquisition Corp. Inc.), a Delaware corporation (the “Company”), pursuant to which Shuttle, our operating entity, became a wholly owned subsidiary of the Company. **5,625,000100**

The Company’s primary purpose is to develop and commercialize unique drugs for the sensitization of cancers and protection of normal tissues, with the goal of improving outcomes for cancer patients receiving radiation therapy. Shuttle has deployed its proprietary technology to develop novel cancer immunotherapies, producing a pipeline of selective HDAC inhibitors for cancer and immunotherapy applications. The Company’s HDAC platform is designed to target candidate molecules with potential roles in therapeutics beyond cancer, including autoimmune, inflammatory, metabolic, neurological and infectious diseases. The Company’s Ropidoxuridine product, which is used with radiation therapy to sensitize cancer cells, was funded by a Small Business Innovation Research (“SBIR”) contract provided by the National Cancer Institute (“NCI”), a unit of the National Institutes of Health (“NIH”). Ropidoxuridine has been further developed through the Company’s collaborations with scientists at the University of Virginia for use in combination with proton therapy to improve patient survival. Historically, and prior to the Company’s initial public offering, the Company has obtained funding to develop products through NIH grants, including a product to predict late effects of radiation with metabolic biomarkers and develop prostate cancer cell lines in health disparities research.

The production and marketing of the Company’s products and its ongoing research and development activities will be and are subject to extensive regulation by numerous governmental authorities in the United States. Prior to marketing in the United States, any products or combination of products developed by the Company must undergo rigorous preclinical (animal) and clinical (human) testing and an extensive regulatory approval process implemented by the Food and Drug Administration (“FDA”) under the Food, Drug and Cosmetic Act. There can be no assurance that the Company will not encounter problems in clinical trials that will cause the Company or the FDA to delay or suspend clinical trials.

The Company’s success will depend in part on its ability to obtain patents and product license rights, maintain trade secrets, and operate without infringing on the proprietary rights of others, both in the United States and in other countries. There can be no assurance that patents issued to or licensed by the Company will not be challenged, invalidated or circumvented, or that the rights granted thereunder will provide proprietary protection or competitive advantages to the Company now or in the future.

Liquidity and Going Concern

Our consolidated financial statements are prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The Company has incurred losses since inception and has a net loss of approximately \$ million and no revenues for the year ended December 31, 2023 and working capital of approximately \$ million as of December 31, 2023. In addition, the convertible note payable outstanding at December 31, 2023 includes covenants and certain cash payment requirements. On July 12, 2024, the Company informed the investor of its convertible note that the Company's expected restatement of its financial statements for the years ended December 31, 2022 and 2023 constituted an event of default under the terms of the convertible note. On August 6, 2024, the Company paid \$ million to the investor of the convertible note and received a waiver from the investor related to the default. The funds paid are restricted and will be held as collateral to the balance owed under the convertible note (see Note 12). These conditions, and the Company's ability to comply with such conditions, raise substantial doubt about the Company's ability to continue as a going concern within one year after the date that the consolidated financial statements are issued.

In January 2023, the Company entered into a securities purchase agreement with an institutional investor through which the Company sold a convertible note with a principal value of \$ million, along with a four-year warrant to purchase shares of common stock, exercisable at \$ per share, providing the Company with approximately \$ million in net proceeds. To date, the warrant has not yet been exercised. However, the Company's existing cash resources, marketable securities and the cash received from the equity offering and convertible note are not expected to provide sufficient funds to carry out the Company's operations and clinical trials through the next twelve months.

The IPO and subsequent capital raise have supported operations, the manufacture of drug product and FDA approval of the IND for the Phase II clinical trial of Ropidoxuridine and radiation therapy in glioblastoma. The FDA recommended and the company agreed to an expansion of the clinical trial, necessitating additional capital to complete the trial, as well as fund ongoing operations. As a result, management had initiated a \$ million rights offering and submitted an application for a SBIR grant for non-dilutive funding for pre-clinical project through the NIH. The Company is also currently pursuing other financing. The ability of the Company to continue as a going concern is dependent upon its ability to successfully raise additional equity or debt financing to allow it to fund ongoing operations, conduct clinical trials and bring a drug candidate to commercialization to generate revenues.

The accompanying consolidated financial statements do not include any adjustments to reflect the future effects on the recoverability and classification of assets or the amounts and classification of liabilities if the Company is unable to continue as a going concern.

Reverse Stock Split

On August 13, 2024, in order to meet Nasdaq's minimum bid price requirement of \$ per share (the "Minimum Bid Price Requirement"), the Company effectuated a of its issued and outstanding common stock, rounding up to account for any fractional shares (the "Reverse Stock Split"). The Reverse Stock Split had no effect on the Company's authorized shares of common stock or preferred stock. Following the reverse stock split on August 13, 2024, the Company had a total of shares issued and outstanding (or on a post-split basis as of December 31, 2023). The Reverse Stock Split also resulted in an adjustment to the consolidated balance sheets for the years ended December 31, 2023, December 31, 2022 and December 31, 2021 with an increase to additional paid in capital of \$, \$ and \$, respectively, and an offsetting adjustment to the carrying value of common stock. All share, option, warrant and per share amounts (except our authorized outstanding) have been retroactively restated in these financial statements and related disclosures. The effect of the Reverse Stock Split has been included in Note 2 in the "As Reported" and in Note 11 in the "As Reported" amounts for additional paid in capital.

Jun. 30, 2024
Dec. 31, 2023**

**Accounting Policies [Abstract] – Summary of Significant Accounting Policies
Note 2 – Summary of Significant Accounting Policies**

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial statements and with the instructions to Form 10-Q and Rule 8-03 of Regulation S-X of the United States Securities and Exchange Commission (“SEC”). Accordingly, they do not contain all information and notes required by GAAP for annual financial statements. A complete discussion of the Company’s significant accounting policies is included in the Company’s Annual Report on Form 10-K/A for the year ended December 31, 2023.

In the opinion of the Company’s management, the accompanying unaudited condensed consolidated financial statements contain all of the adjustments necessary to present the financial position of the Company as of September 30, 2024 and the results of operations and cash flows for the periods presented. The accompanying condensed consolidated financial statements of the Company have not been audited by the Company’s independent registered public accounting firm, except that the year-end consolidated balance sheet was derived from audited financial statements. The results of operations for the nine months ended September 30, 2024 are not necessarily indicative of the operating results for the full fiscal year or any future period. These unaudited condensed consolidated financial statements should be read in conjunction with the restated financial statements and related notes thereto for the year ended December 31, 2023 included in the Company’s Annual Report on Form 10-K/A filed with the SEC on September 4, 2024.

Reverse Stock Split

On August 13, 2024, in order to meet Nasdaq’s minimum bid price requirement of \$ per share (the “Minimum Bid Price Requirement”), the Company effectuated a reverse stock split of its issued and outstanding common stock, rounding up to account for any fractional shares (the “Reverse Stock Split”). The Reverse Stock Split had no effect on the Company’s authorized shares of common stock or preferred stock and the par value will remain unchanged at \$, respectively. All common stock share, option, warrant and per share amounts (except our authorized but unissued shares and previously reserved shares) have been retroactively adjusted in these financial statements and related disclosures: **1.001 for 80.00001**

Basis of Consolidation

The unaudited condensed consolidated financial statements have been prepared on a consolidated basis with those of the Company’s wholly-owned subsidiaries, Shuttle Pharmaceuticals, Inc. and Shuttle Diagnostics Inc. All intercompany transactions and balances have been eliminated.

Correction of an Immaterial Error in the Prior Period Financial Statements

During the fourth quarter of 2023, the Company determined that the prior year consolidated financial statements had a misstatement caused by an immaterial classification error of certain research and development expenses in accordance with Accounting Standards Codification (“ASC”) 730. As a result, certain prior year amounts have been corrected for consistency with the current year presentation. The Company assessed the materiality of this change in presentation on prior period consolidated financial statements in accordance with SEC Staff Accounting Bulletin No. 99, “Materiality,” (ASC Topic 250, Accounting Changes and Error Corrections). Based on this assessment, the Company concluded that these error corrections in its unaudited condensed consolidated statements of operations are not material to any previously presented financial statements based upon overall considerations of both quantitative and qualitative factors. The corrections had no impact on the unaudited condensed consolidated balance sheet, unaudited condensed consolidated statements of cash flows, or unaudited condensed consolidated statement of changes in stockholders’ equity, to these financial statements, or for any previously presented interim or annual financial statements. Further, the corrections did not result in a change in quarterly or year-to-date operating losses, basic or diluted earnings per share, or working capital. The quarterly correction required for the three and nine months ended September 30, 2023 was \$ and \$, respectively. Accordingly, the Company corrected the previously reported immaterial error for the three and nine months ended September 30, 2023 in this Quarterly Report on Form 10-Q: **95,129,277,844**

	September 30, 2023	Correction	Corrected September 30, 2023
Research and development expense	\$ 3,084,488	\$ (277,844)	\$ 2,806,644
General and administrative expense	452,342	277,844	730,186
Net Loss	\$ 3,536,830	\$	
– \$3,536,830			

Use of Estimates

The preparation of unaudited condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the unaudited condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The Company regularly evaluates estimates and assumptions. The Company bases its estimates and assumptions on current facts, historical experience, and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by the Company may differ materially and adversely from the Company’s estimates. To the extent there are material differences between the estimates and the actual results, future results of operations will be affected. Significant estimates are contained in the accompanying unaudited condensed consolidated financial statements for the recognition of research and development expenses, valuation of warrants and valuation of bifurcated derivative liabilities and other financial instruments.

Cash and cash equivalents include cash in bank accounts and money market funds with maturities of less than three months from inception, which are readily convertible to known amounts of cash and which, in the opinion of management, are subject to an insignificant risk of loss in value. As of September 30, 2024 and December 31, 2023, cash and cash equivalents consisted of the following:

Periodically, the Company may carry cash balances at financial institutions in excess of the federally insured limit of \$ per institution. The amount in excess of the FDIC insurance as of September 30, 2024 was \$.

The Company has not experienced losses on these accounts and management believes, based upon the quality of the financial institutions, that the credit risk with regard to these deposits is not significant.

Our investments in debt securities are carried at fair value. Investments in debt securities that are not classified as held-to-maturity are carried at fair value and classified as either trading or available-for-sale. Realized and unrealized gains and losses on trading of debt securities are charged to income.

The marketable securities held by the Company, which are classified as trading marketable securities, consisted of an outstanding balance of \$ and \$ million as of September 30, 2024 and December 31, 2023, respectively. During the three months ended September 30, 2024 and 2023, the Company recognized interest income of \$ and \$, realized gains of \$ and \$, and unrealized losses of \$ and unrealized gains of \$, respectively. During the nine months ended September 30, 2024 and 2023, the Company recognized interest income of \$ and \$, realized gains of \$ and \$, and unrealized loss of \$ and unrealized gain of \$, respectively. **02.92.52420.76556.398042.8989.60638.13556.720100.1181.74471.56821.134**

The Company follows accounting guidelines on fair value measurements for financial instruments measured on a recurring basis, as well as for certain assets and liabilities that are initially recorded at their estimated fair values. Fair Value is defined as the exit price, or the amount that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The Company uses the following three-level hierarchy that maximizes the use of observable inputs and minimizes the use of unobservable inputs to value its financial instruments:

• **Level 1: Observable inputs such as unadjusted quoted prices in active markets for identical instruments.** • **Level 2: Quoted prices for similar instruments that are directly or indirectly observable in the marketplace.** • **Level 3: Significant unobservable inputs which are supported by little or no market activity and that are financial instruments whose values are determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires a significant judgment or estimation.**

Financial instruments measured at fair value are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires the Company to make judgments and consider factors specific to the asset or liability. The use of different assumptions and/or estimation methodologies may have a material effect on estimated fair values. Accordingly, the fair value estimates disclosed, or initial amounts recorded, may not be indicative of the amount that the Company or holders of the instruments could realize in a current market exchange.

The carrying amounts of the Company's financial instruments including cash and cash equivalents, prepaid expenses, accounts payable and accrued liabilities approximate fair value due to the short-term maturities of these instruments.

Set out below are the Company's financial instruments that are required to be remeasured at fair value on a recurring basis and their fair value hierarchy as of September 30, 2024 and December 31, 2023:

Derivative Financial Instruments

The Company does not use derivative instruments to hedge exposures to cash flow, market or foreign currency risks. We evaluate all of our financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. For derivative financial instruments that are accounted for as liabilities, the derivative instrument is initially recorded at its fair value and is then re-valued at each reporting date, with changes in the fair value reported in the unaudited condensed consolidated statements of operations. For our liability classified derivative financial instruments, the Company used a Monte Carlo valuation model to value the derivative instruments at inception and on subsequent valuation dates. For our equity classified derivative financial instruments, we used a Black-Scholes option-pricing model at the grant date to value the derivative instrument. The classification of derivative instruments, including whether such instruments should be recorded as liabilities or as equity, is evaluated at the end of each reporting period. Derivative liabilities are classified in the unaudited condensed consolidated balance sheets as current or non-current based on whether or not net cash settlement or conversion of the instrument could be required within twelve (12) months of the balance sheet date.

Warrants

The Company accounts for warrants as either equity-classified or liability-classified instruments based on an assessment of the warrant's specific terms and applicable authoritative guidance in FASB ASC 480, ("ASC 480") and ASC 815, ("ASC 815"). The assessment considers whether the warrants are freestanding financial instruments pursuant to ASC 480, meet the definition of a liability pursuant to ASC 480, and whether the warrants meet all of the requirements for equity classification under ASC 815, including whether the warrants are indexed to the Company's own ordinary shares and whether the warrant holders could potentially require "net cash settlement" in a circumstance outside of the Company's control, among other conditions for equity classification. This assessment, which requires the use of professional judgment, is conducted at

the time of warrant issuance and as of each subsequent quarterly period end date while the warrants are outstanding.

Distinguishing Liabilities from EquityDerivatives and Hedging

For issued or modified warrants that meet all of the criteria for equity classification, the warrants are required to be recorded as a component of additional paid-in capital at the time of issuance. For issued or modified warrants that do not meet all the criteria for equity classification, the warrants are required to be recorded at their initial fair value on the date of issuance, and each balance sheet date thereafter. Changes in the estimated fair value of the warrants are recognized as a non-cash gain or loss on the unaudited condensed consolidated statements of operations. The fair value of the warrants is estimated using a Black-Scholes pricing model or a Monte-Carlo simulation.

Research and Development Expenses

Research and development expenses are charged to expense as incurred. Research and development expenses include, but are not limited to, product development, clinical and regulatory expenses, payroll and other personnel expenses, which include a certain portion of our chief executive officer, chief operating officer, chief financial officer and directors' compensation. For the three and nine months ended September 30, 2024 and 2023, a portion of personnel-related expenses and stock-based compensation expense for these individuals totaling \$ million and \$ million, respectively, and \$ million and \$ million, respectively, was included within research and development due to their active involvement in the research and development activities, materials, supplies, related subcontract expenses, and consulting costs. In June 2024, the Company recruited a new chief financial officer who is substantially devoted to administrative functions and our then existing chief financial officer, who also handled research and development compliance functions,

transitioned to substantially research and development functions.

Regarding the accounting treatment for reimbursements, GAAP provides limited guidance on the accounting for government grants received by for-profit companies. In accordance with ASC Topic 832, as adopted January 1, 2022, we disclose certain types of government assistance received in the notes to the consolidated financial statements that includes: a) the nature of the transaction including the nature of the assistance being given; b) the accounting policies being used to account for the transaction and c) other provisions of relevance, where required. Depending on the type of grant or contract, we understand there is more than one acceptable alternative for the accounting treatment – a reduction of costs, a deferred credit to be amortized, revenue or other income. The Company has concluded that reimbursements received for R&D expenses incurred, are more akin to a reduction of costs and applies reimbursements against incurred research costs. There were no reimbursements received for the three and nine months ended September 30,

2024 and 2023.

Government Assistance

Net Loss Per Common Stock

Net loss per share of common stock requires presentation of basic earnings per share on the face of the unaudited condensed consolidated statements of operations for all entities with complex capital structures and requires a reconciliation of the numerator and denominator of the basic earnings per share computation. In the accompanying unaudited condensed consolidated financial statements, basic loss per share is computed by dividing net loss by the weighted average number of shares of common stock outstanding during the year. Diluted earnings per share is computed by dividing net income by the weighted average number of shares of common stock and potentially dilutive outstanding shares of common stock during the period to reflect the potential dilution that could occur from common shares issuable through contingent share arrangements, stock options and warrants unless the result would be antidilutive.

The dilutive effect of restricted stock units subject to vesting and other stock-based payment awards is calculated using the "treasury stock method," which assumes that the "proceeds" from the exercise of these instruments are used to purchase common shares at the average market price for the period. The dilutive effect of convertible securities is calculated using the "if-converted method." Under the if-converted method, securities are assumed to be converted at the beginning of the period, and the resulting shares of common stock are included in the denominator of the diluted calculation for the entire period being presented.

For the nine months ended September 30, 2024 and 2023, the following common stock equivalents were excluded from the computation of diluted net loss per share as the result of the computation was anti-dilutive.

Deferred Offering Costs

Pursuant to ASC 340-10-S99-1, costs directly attributable to an offering of equity securities are deferred and would be charged against the gross proceeds of an offering as a reduction of additional paid-in capital. Deferred offering costs may consist of underwriting, legal, accounting, and other expenses incurred through the balance sheet date that are directly related to a proposed public offering. Should the proposed public offering prove to be unsuccessful, any deferred costs, as well as additional expenses to be incurred, will be expensed.

Recent Accounting Pronouncements

In November 2023, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2023-07, Segment Reporting Topic 280, "Segment Reporting-Improvements to Reportable Segment Disclosures," which allows disclosure of one or more measures of segment profit or loss used by the chief operating decision maker to allocate resources and assess performance. Additionally, the standard requires enhanced disclosures of significant segment expenses and other segment items, as well as incremental qualitative disclosures on both an annual and interim basis. This guidance is effective for annual reporting periods beginning after December 15, 2023, and interim reporting periods after December 15, 2024. Early adoption is permitted and retrospective application is required for all periods presented. The adoption of this new guidance is not expected to have a significant impact on our consolidated financial statements.

In December 2023, the FASB issued ASU No. 2023-09, Income Taxes Topic 740, "Income Tax-Improvements to Income Tax Disclosures," which requires enhanced disclosures, including specific categories and disaggregation of information in the effective tax rate reconciliation, disaggregated information related to income taxes paid, income or loss from continuing operations before income tax expense or benefit, and income tax expense or benefit from continuing operations. This guidance is effective for annual reporting periods beginning after December 15, 2024. Early adoption is permitted and should be applied on a prospective basis, however retrospective application is permitted. The Company is currently evaluating the impact of adopting this guidance on its consolidated and condensed financial statements and disclosures included within notes to consolidated and condensed financial statements.

[illegible]

Leases

-

We determine if an arrangement is a lease at inception. Operating leases are included in operating lease right-of-use asset ("ROU"), operating lease liability - current, and operating lease liability - noncurrent on the consolidated balance sheets. Finance leases are included in property and equipment, other current liabilities, and other long-term liabilities in our consolidated balance sheets. The Company did not utilize any financing that required recognition of finance leases during the years ended December 31, 2023 and 2022.

-

ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. As our leases do not provide an implicit rate, we use our incremental borrowing rate based on the estimated rate of interest for collateralized borrowing, over a similar term of the lease payments at commencement date. The operating lease ROU asset also includes any lease payments made and excludes lease incentives. Our lease terms may include options to extend or terminate the lease when it is reasonably certain that we will exercise that option. Lease expense for lease payments is recognized on a straight-line basis over the lease term.

-

Leases with a lease term of 12 months or less at inception are not recorded on our consolidated balance sheets and are expensed on a straight-line basis over the lease term in our statement of operations. We have lease agreements with lease and non-lease components, which are generally accounted for separately.

-

The Company determines the present value of minimum future lease payments for operating leases by estimating a rate of interest that it would have to pay to borrow on a collateralized basis over a similar term, an amount equal to the lease payments and a similar economic environment (the "incremental borrowing rate" or "IBR"). The Company determines the appropriate IBR by identifying a reference rate and making adjustments that take into consideration financing options and certain lease-specific circumstances. For the reference rate, the Company used an equity built up, risk adjusted rate, as the implicit interest rate.

Furniture	:	:	years 5
Computers and equipment	:	:	
years 5			years 10
Research Equipment—			

For our derivative financial instruments, the Company utilizes the most appropriate valuation model (such as Monte Carlo simulations or probability-weighted expected return models, based on the nature of the terms of the instrument) to value the derivative instruments at inception and on subsequent valuation dates. The classification of derivative instruments, including whether such instruments should be recorded as liabilities or as equity, is evaluated at the end of each reporting period. Derivative liabilities are classified in the consolidated balance sheet sheets as current or non-current based on whether or not net cash settlement or conversion of the instrument could be required within twelve (12) months of the balance sheet date.

The Company evaluates its convertible notes for embedded features and bifurcates these features (such as conversion options and redemption options) from their host instruments and accounts for them as free standing derivative financial instruments if certain criteria are met. The criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument.

Warrants

The Company accounts for warrants as either equity-classified or liability-classified instruments based on an assessment of the warrant's specific terms and applicable authoritative guidance in FASB ASC 480, Distinguishing Liabilities from Equity ("ASC 480") and ASC 815, Derivatives and Hedging ("ASC 815"). The assessment considers whether the warrants are freestanding financial instruments pursuant to ASC 480, meet the definition of a liability pursuant to ASC 480, and whether the warrants meet all of the requirements for equity classification under ASC 815, including whether the warrants are indexed to the Company's own ordinary shares and whether the warrant holders could potentially require "net cash settlement" in a circumstance outside of the Company's control, among other conditions for equity classification. Finally, the Company determines if the warrants meet the definition of a derivative based on their contractual terms. This assessment, which requires the use of professional judgment, is conducted at the time of warrant issuance and as of each subsequent quarterly period end date while the warrants are outstanding.

The fair value of the warrants is estimated using a Black-Scholes pricing model or a Monte Carlo simulation.

The Company reviews its long-lived assets for impairment whenever events or changes in business circumstances indicate that the carrying amount of the asset may not be fully recoverable. Recoverability of assets is measured by a comparison of the carrying amount of an asset to the estimated undiscounted cash flows expected to be generated by the asset. If the carrying amount of the asset exceeds its estimated future cash flows, an impairment charge will be recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset. There were no impairments of long-lived assets during the periods presented.

—

Stock-Based Compensation

Compensation cost for stock awards, which include restricted stock units (“RSUs”), is measured at the fair value on the grant date and recognized as expense, over the related service or performance period. The fair value of stock awards is based on the quoted price of our common stock on the grant date. Compensation expense related to the RSUs is reduced by the fair value of the units that are forfeited by employees that leave the Company prior to vesting as they occur. Compensation cost for RSUs are recognized using the straight-line method over the requisite service period.

Research and Development Expenses

Research and development expenses are charged to expense as incurred. Research and development expenses include, but are not limited to, product development, clinical and regulatory expenses, payroll and other personnel expenses, which include a certain portion of our chief executive officer, chief operating officer, chief financial officer and directors’ compensation. For the year ended December 31, 2023 and 2022, a portion of personnel-related expenses and stock-based compensation expense for these individuals totaling \$ million and \$ million, respectively, was included within research and development due to their active involvement in the research and development activities, materials, supplies, related subcontract expenses, and consulting costs. **0.80.5**

Regarding the accounting treatment for reimbursements, GAAP provides limited guidance on the accounting for government grants received by for-profit companies. In accordance with ASC Topic 832, as adopted January 1, 2022, we disclose certain types of government assistance received in the notes to the consolidated financial statements that includes: a) the nature of the transaction including the nature of the assistance being given; b) the accounting policies being used to account for the transaction and c) other provisions of relevance, where required. Depending on the type of grant or contract, we understand there is more than one acceptable alternative for the accounting treatment – a reduction of costs, a deferred credit to be amortized, revenue or other income. The Company has concluded that reimbursements received for R&D expenses incurred, are more akin to a reduction of costs and applies reimbursements against incurred research costs. For the years ended December 31, 2023 and 2022, we recorded \$ million and \$ million in

Research and development, net of contract expense reimbursements, respectively. **Government Assistance3.51.0**

Income Taxes

The Company accounts for income taxes in accordance with ASC Topic 740. ASC 740 requires a company to use the asset and liability method of accounting for income taxes, whereby deferred tax assets are recognized for deductible temporary differences, and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, the Company does not foresee generating taxable income in the near future and utilizing its deferred tax asset, therefore, it is more likely than not that some portion, or all of, the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment. **Income Taxes**

Under ASC 740, a tax position is recognized as a benefit only if it is “more likely than not” that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the “more likely than not” test, no tax benefit is recorded. The Company has no material uncertain tax positions for any of the reporting periods presented.

Segment Information

Operating segments are defined as components of an enterprise about which separate and discrete information is available for evaluation by the chief operating decision-maker (“CODM”) in deciding how to allocate resources and assess performance. The Company and the Company’s CODM, the Company’s chief executive officer, evaluates the Company’s operations and manages its business as a operating segment. All of the Company’s long-lived assets are held in the United States. **single**

Net Loss Per Common Stock

Net loss per share of common stock requires presentation of basic earnings per common share on the face of the statements of operations for all entities with complex capital structures and requires a reconciliation of the numerator and denominator of the basic earnings per share computation. In the accompanying consolidated financial statements, basic loss per common share is computed by dividing net loss attributable to common stockholders by the weighted average number of shares of common stock outstanding during the year. Diluted earnings per share is computed by dividing net income attributable to common stockholders by the weighted average number of shares of common stock outstanding and potentially dilutive shares of common stock during the period to reflect the potential dilution that could occur from common shares issuable through convertible securities, contingent share arrangements, stock options and warrants unless the result would be antidilutive.

The dilutive effect of restricted stock units and other stock-based payment awards subject to vesting and common stock warrants is calculated using the “treasury stock method,” which assumes that the “proceeds” from the exercise of these instruments are used to purchase common shares at the average market price for the period. The dilutive effect of convertible securities is calculated using the “if-converted method.” Under the if-converted method, securities are assumed to be converted at the beginning of the period, and the resulting shares of common stock are included in the denominator of the diluted calculation for the entire period being presented.

For the years ended December 31, 2023 and 2022, the following common stock equivalents were excluded from the computation of diluted net loss per share as the result of the computation was anti-dilutive.

Recent Accounting Pronouncements

In December 2023, the FASB issued ASU 2023-09, “Income Taxes (Topic 740): Improvements to Income Tax Disclosures,” which requires disaggregated information about a reporting entity’s effective tax rate reconciliation as well as information on income taxes paid. The guidance is effective for the Company’s fiscal years beginning after February 1, 2025, with early adoption permitted. The Company does not expect the adoption of this standard to have any material impact on its financial statements.

There have been no other recent accounting pronouncements, changes in accounting pronouncements or recently adopted accounting guidance during the year ended December 31, 2023 that are of significance or potential significance to the Company.

~~Note 5 - Convertible Notes~~

Alto Opportunity Master Fund, SPC

On January 11, 2023, the Company entered into a securities purchase agreement (the "SPA") with Alto Opportunity Master Fund, SPC – Segregated Master Portfolio B, a Cayman entity (the "Investor"), pursuant to which the Company sold to the Investor a \$ convertible note (the "Alto Convertible Note") and warrant (the "Warrant") to purchase shares of common stock, exercisable at \$ per share, as adjusted, in exchange for gross proceeds of \$ (the "Investment Amount") (See Note 7). The Company determined that the Warrant contains a net cash settlement feature at inception and categorized the Warrant as a liability in the accompanying unaudited condensed consolidated financial statements. The Alto Convertible Note matures on March 11, 2025, but may be extended at the option of the noteholder. The Alto Convertible Note amortizes on a monthly basis and the Company can make such monthly amortization payments in cash or, subject to certain equity conditions, in registered shares of common stock or a combination thereof. Installments may be deferred by the noteholder, resulting in a variable interest rate. However, the effective interest rate is approximately 214% based on the internal rate of return calculated on a series of cash flows that occur at regular intervals. For equity repayment, The noteholder has an acceleration of installment amount conversion option (the "Acceleration Option"), whereby the noteholder, with certain share percentage limitations, can convert to common stock any outstanding installment amount at an amount equal to the installment amount plus five times (5x) the installment amount at any time. The Company has determined the Acceleration Option is an embedded derivative within the host instrument and has bifurcated it from the host instrument and recorded it as a derivative liability valued at \$ at inception, using a Monte Carlo simulation model (Note 7). The Convertible Note is repayable over 26 months and bears interest at the rate of % per annum. Additionally, the note contains certain redemption options and "Make Whole"

provisions: 4,300,000127,2601.933,935,000the Alto Convertible Note is convertible into shares of common stock at a price per share equal to the lower of (i) \$18.80, (ii) 90% of the three lowest daily VWAPs of the 15 trading days prior to the payment date, or (iii) 90% of the VWAP of the trading day prior to payment date. The noteholder may convert at any time at a fixed price of \$18.80 per share.1,442,0005

In conjunction with entry into the SPA, the Company entered into a series of related agreements, including a security agreement (the "Security Agreement"), an intellectual property security agreement (the "IP Security Agreement") and a subsidiary guaranty (the "Subsidiary Guaranty"). The security agreements and guaranty allow, among other things, for the Investor to have a security interest in and place a lien on all of the Company's assets and intellectual property until such time as the Alto Convertible Note is paid off. In addition, the SPA called for the Company to enter into a springing deposit account control agreement (the "Springing DACA"), which, in the event the Company defaults on its repayment of the Alto Convertible Note, would allow the Investor to assume control of the Company's bank account only with regard to any funds remaining outstanding under the Alto Convertible Note. As such, in conjunction with entry into the SPA, the Company established a separate bank account in which it deposited the Investment Amount and pursuant to which the Company, the Investor and the bank holding the Investment Amount, First Republic Bank, entered into the Springing DACA agreement. As the Investment Amount had been held at First Republic Bank, in light of certain banking crises then affecting smaller banks, on March 12, 2023, the Company and the Investor moved the Investment Amount from First Republic Bank, after which time the Springing DACA was no longer in effect. Further, pursuant to amendments to the SPA entered into in May and June of 2023, the Company and the Investor agreed that all of the Investment Amount would be released to the Company and the relevant provision of the SPA which required the Springing DACA would no longer be deemed applicable. In addition, the Company granted the Investor the option to purchase up to an additional \$ million in convertible notes and warrants on substantially the same terms as the Alto Convertible Note and Warrant, excluding the Springing DACA requirement, with such option to be effective through December 31, 2025. The agreement offers the investor an opportunity to participate in future capital raises at substantially similar terms as the January 11, 2023 agreement. The Company expects that such subsequent convertible notes and warrants would be issued on substantially similar terms as the January 11, 2023 initial agreement, as amended, thus providing the Company the opportunity to negotiate certain aspects of the

agreement: 10.0
Boustead Securities, LLC ("Boustead") served as a placement agent for the Alto Convertible Note and Warrant offering and received \$ cash compensation and a warrant to purchase shares of common stock, exercisable at \$ per share. The Boustead warrant was determined to be an equity instrument valued on a non-recurring basis. The Company used the Black Scholes valuation model using a term of , volatility of %, a risk-free rate of % for a value of \$: 345,0008,90918.80five years1103.5399,543

The Company allocated the finance costs related to the Boustead placement agent fee of \$, based on the relative fair market values of the Convertible Note and warrants issued. The allocation of the financing costs applied \$ to the debt component as a debt discount that is being amortized to interest expense over the term of the Convertible Note, \$ to the warrant derivative liability component, expensed as a finance fee, and \$ to the equity warrant as a reduction in additional paid in capital. 345,000232,027104,2458,727
The Company allocated to the debt component of the note an original discount of \$, legal fees of \$, \$ for additional interest fees on day one added to note principal, \$ for the accelerated conversion feature, and \$ for the fair value of warrants, resulting in an additional \$ debt discount that is being amortized to interest expense over the term of the Alto Convertible Note. 300,00065,000215,0001,442,0001,288,5433,310,543

On August 6, 2024, the Company entered into an amendment to the SPA with Alto. Under the Amendment Agreement, the Company and Alto agreed as follows: (i) that the Company would pay \$ (the "Cash Collateral") in cash by wire transfer of immediately available funds to Alto, which would be held as collateral on the remaining \$ million outstanding under the Alto Note; (ii) Alto will defer the monthly installment payment due on September 3, 2024 under the Alto Note until the Alto Note's March 11, 2025 maturity date; and (iii) Alto would grant a waiver of any default Section 4(a)(xvi) of the Note related to the restatement and reaudit of the Company's financial statements for the years ended December 31, 2022 and 2023. The amendment was accounted for as a troubled debt restructuring as the Company determined it was experiencing financial difficulties and was provided a concession through the deferral of one monthly principal and interest payment. As the future undiscounted cash flows exceeded the carrying value of the Alto Convertible Note, the Company did not recognize any gain or loss associated with the troubled debt restructuring. 600,0001.2

During the three and nine months ended September 30, 2024, the Company recorded interest expense of \$ and \$, respectively, which included amortization of debt discount as interest expense of \$ and \$, respectively. During the three and nine months ended September 30, 2024, the Company settled \$ and \$ of principal, and \$ and \$ of accrued interest, which settlements were made in the form of and shares of common stock. During the three months ended September 30, 2024, the Company also paid \$ of principal and \$ of accrued interest for a total of \$. During the nine months ended September 30, 2024, the Company paid \$ of principal and \$ of accrued interest for a total of \$. In relation to the settlements described above, the Company recognized a loss on settlement of convertible debt of \$ and \$ for the three and nine months ended September 30, 2024. 270,5381,198,738247,4301,079,4441,172,8501,408,05035,88854,670719,148797,345. 926,488762,186833,501

Note 6 - Notes Payable

Alto Opportunity Master Fund, SPC

On January 11, 2023, the Company entered into a securities purchase agreement (the "SPA") with Alto Opportunity Master Fund, SPC – Segregated Master Portfolio B, a Cayman entity (the "Investor"), pursuant to which the Company sold to the Investor a \$ convertible note (the "Alto Convertible Note") and warrant (the "Alto Warrant") to purchase shares of common stock, exercisable at \$ per share, in exchange for gross proceeds of \$ (the "Investment Amount") (See Note 7). The Company determined that the Alto Warrant contains a net cash settlement feature at inception and categorized the Alto Warrant as a liability in the accompanying consolidated financial statements. The Alto Convertible Note matures on March 11, 2025, but may be extended at the option of the noteholder. The Alto Convertible Note amortizes on a monthly basis and the Company can make such monthly amortization payments in cash or, subject to certain equity conditions, in registered shares of common stock or a combination thereof. Installments may be deferred by the noteholder, resulting in a variable interest rate. However, the effective interest rate is approximately % based on the internal rate of return calculated on a series of cash flows that occur at regular intervals. For equity repayment, The noteholder has an acceleration of installment amount conversion option (the "Alto Acceleration Option"), whereby the noteholder, with certain share percentage limitations, can convert to common stock any outstanding installment amount at an amount equal to the installment amount plus five times (5x) the installment amount at any time. The Company has determined the Alto Acceleration Option is an embedded derivative within the host instrument and has bifurcated it from the host instrument and recorded it as a derivative liability valued at \$, using a Monte Carlo simulation model (Note 6). The Convertible Note is repayable over 26 months and bears interest at the rate of % per annum. Additionally, the note contains certain redemption options and "Make Whole"

provisions: 4,300,000127,26018.803,935,000346the Alto Convertible Note is convertible into shares of common stock at a price per share equal to the lower of (i) \$18.80, (ii) 90% of the three lowest daily VWAPs of the 15 trading days prior to the payment date, or (iii) 90% of the VWAP of the trading day prior to payment date. The noteholder may convert at any time at a fixed price of \$ per share.18.801,442,0005

In conjunction with entry into the SPA, the Company entered into a series of related agreements, including a security agreement (the "Security Agreement"), an intellectual property security agreement (the "IP Security Agreement") and a subsidiary guaranty (the "Subsidiary Guaranty"). The security agreements and guaranty allow, among other things, for the Investor to have a security interest in and place a lien on all of the Company's assets and intellectual property until such time as the Alto Convertible Note is paid off. In addition, the SPA called for the Company to enter into a springing deposit account control agreement (the "Springing DACA"), which, in the event the Company defaults on its repayment of the Alto Convertible Note, would allow the Investor to assume control of the Company's bank account only with regard to any funds remaining outstanding under the Alto Convertible Note. As such, in conjunction with entry into the SPA, the Company established a separate bank account in which it deposited the Investment Amount and pursuant to which the Company, the Investor and the bank holding the Investment Amount, First Republic Bank, entered into the Springing DACA agreement. As the Investment Amount had been held at First Republic Bank, in light of certain banking crises then affecting smaller banks, on March 12, 2023, the Company and the Investor moved the Investment Amount from First Republic Bank, after which time the Springing DACA was no longer in effect. Further, pursuant to amendments to the SPA entered into in May and June of 2023, the Company and the Investor agreed that all of the Investment Amount would be released to the Company and the relevant provision of the SPA which required the Springing DACA would no longer be deemed applicable. In addition, the Company granted the Investor the option to purchase up to an additional \$ million in convertible notes and warrants on substantially the same terms as the Alto Convertible Note and Alto Warrant, excluding the Springing DACA requirement, with such option to be effective through December 31, 2025. The agreement offers the investor an opportunity to participate in future capital raises at substantially similar terms as the January 11, 2023 agreement. The Company expects that such subsequent convertible notes and warrants would be issued on substantially similar terms as the January 11, 2023 initial agreement, as amended, thus providing the Company the opportunity to negotiate certain aspects of the

agreement: 10
Boustead Securities, LLC ("Boustead") served as a placement agent for the Alto Convertible Note and Warrant offering and received \$ cash compensation and a warrant to purchase shares of common stock,

exercisable at \$ per share. The Boustead warrant was determined to be an equity instrument valued on a non-recurring basis. The Company used the Black Scholes valuation model using a term of , volatility of % , a risk-free rate of % for a value of \$, **345,0008,90918.80five years1103.5399,543**

The Company allocated the finance costs related to the Boustead placement agent fee of \$, based on the relative fair market values of the Convertible Note and warrants issued. As of December 31, 2023, the outstanding principal for the convertible note was \$ and the debt discount remaining was \$, with a net convertible note carrying value of \$, which represents the current and non-current portions of the convertible note as of December 31, 2023. **2,254,8561,523,768731,088**

Subsequent to December 31, 2023, the Company and the investor agreed to certain changes in terms of the Alto Convertible Note as well as the waiver of certain covenant violations. See Subsequent Events for further details.

Paycheck Protection Program Term Notes

On March 9, 2021, the Company obtained a \$ term note issued under the Coronavirus Aid, Relief, and Economic Security Act's Paycheck Protection Program (the "PPP"). The note bore an interest rate of % per annum, had a six-month deferral period with payments due on the seventh month, with all outstanding principal and interest due and payable within two years from the note's inception date. Under its terms, all or a portion of the note may be forgiven in accordance with PPP requirements, with . As of December 31, 2021, a "Loan Forgiveness Application" was submitted to PNC Bank along with the requested documentation. Thereafter, during the quarter ended March 31, 2022, the note liability was reduced in its entirety and the Company recognized a gain on forgiveness of \$ in its statement of operations for the year ended December 31, 2022, (as restated) **73,0071no more than 25% of the amount forgiven to be attributable to non-payroll costs73,007**

December 2021 Promissory Notes

On December 28, 2021, the Company issued promissory note units, consisting of an aggregate \$ in % unsecured promissory notes with a maturity date of (the "December 2021 Promissory Notes") and warrants to purchase shares of common stock exercisable at \$ per share with an expiration date of December 28, 2026. The Company received net proceeds of \$ upon the issuance of these promissory note units and incurred \$ in additional issuance costs which were allocated between the December 2021 Promissory Notes and the warrants. The Company assessed the embedded features of the December 2021 Promissory Notes and determined that the accelerated repayment upon an initial public offering represented a derivative feature requiring bifurcation. The Company estimated the fair value of the derivative to be \$ at issuance (see Note 8 for fair value considerations). **500,00010December 28, 2022 62,5008.00494,92521,890367,000**

The Company determined that the warrants issued with the December 2021 Promissory Notes should be classified as equity. The Company measured the fair value of these warrants using a Black-Scholes model and allocated fair value to these warrants on a relative fair value basis. The proceeds from the December 2021 Promissory Notes allocated to the warrants at issuance was \$. The inputs to the Black-Scholes model included an estimated fair value of the Company's common stock of \$, the exercise price of \$ per share, a five year term, volatility and a risk free rate of **418,44940.008.0086.3%1.27%**

The discount on the December 2021 Promissory Notes was being amortized using the straight-line method as the initial proceeds received were fully allocated to the warrants and bifurcated derivative, through the maturity date of the notes. The Company recognized amortization expense of \$ **331,978** related to the discount on the December 2021 Promissory Notes as interest expense in its statement of operations for the year ended December 31, 2022.

In April 2022, the warrants were modified by the Company to nullify the effect of the April 2022 reverse stock split, allowing the warrant to remain outstanding and exercisable for shares of common stock at an exercise price of \$ per share. The Company calculated the incremental fair value provided to the holders of the warrants due to the modification as \$, which was recorded as a deemed dividend during the year ended December 31, 2022. The incremental fair value was estimated using a Black-Scholes model, with inputs including the estimated fair value of the Company's common stock of \$, the exercise price of either \$ (pre-modification) or \$ (post-modification), a remaining term of years, volatility of % and a risk free rate of %.

62,5008.00941,00032.0016.008.004.7583.62.55

In September 2022, the warrants were exercised by the lenders in exchange for tendering the outstanding principal balance (s **500,000**) on the December 2021 Promissory Notes. The Company treated the settlement as a debt extinguishment for accounting purposes. The Company recognized a loss on extinguishment of \$ upon this settlement and issuance of the **1,531,85262,500** shares of common stock upon exercise, based on the difference between the estimated fair value of the common stock issued (\$) and the carrying value of the December 2021 Promissory Notes. The Company paid all accrued interest under the December 2021 Promissory Notes from issuance through settlement to the lenders in cash during the year ended December 31, 2022. **2,031,250**

2022 Convertible Bridge Notes

On February 8, 2022 and March 11, 2022, the Company sold \$ and \$, respectively, in % convertible notes (the "2022 Convertible Notes"), which bore % interest (which would be waived upon a conversion event), were repayable on December 31, 2024, and were convertible upon the completion of the Company's initial public offering or other liquidity event at % of the per share price paid by investors in such an event. In addition, if the 2022 Convertible Notes were not converted during the period 12 months after their initial issuance, the outstanding principal amount of the 2022 Convertible Notes would be increased by % . The Company received net proceeds of \$ from the 2022 Convertible Notes, after deducting a total of \$ in fees paid to Boustead Securities LLC for services provided as placement agent for the offering. Boustead also received warrants in connection with the issuances with a total estimated fair value of \$ (see discussion below) and the Company incurred \$ in additional costs which were recorded as debt issuance costs upon issuance of the 2022 Convertible Notes. **365,000225,000665010525,71564,28592,33617,363**

The Company assessed the embedded features of the 2022 Convertible Notes and determined that the automatic conversion feature with a % discount to per share price paid (a share-settled redemption feature) and the % principal increase feature were not clearly and closely related to the debt host instrument and met the definition of a derivative and as such, required bifurcation from the 2022 Convertible Notes. The Company estimated the fair value at issuance of these features to be \$ and recorded as a discount to the 2022 Convertible Notes (see Note 8 for fair value considerations). Of the total \$ of issuance costs incurred related to the 2022 Convertible Notes, the Company allocated \$ of the debt issuance costs to the 2022 Convertible Notes (as a discount) and \$ allocated to the derivative liability and expensed as a component of the finance fee (as restated) in the statement of operations. The discount on the 2022 Convertible Notes was amortized under the effective interest method through the maturity dates of the notes. The Company recognized amortization expense of \$ related to the discount on the 2022 Convertible Notes as interest expense in its statement of operations for the year ended December 31, 2022. **5010221,000173,984108,85865,12637,745**

For services provided in the offering, Boustead Securities LLC also received warrants to purchase of the shares of common stock issuable upon conversion of the 2022 Convertible Notes, at the conversion price of the notes. Upon conversion, the warrant became exercisable for a total of shares of common stock at an exercise price of \$ per share. These warrants were accounted for under ASC 718 and classified as liabilities due to the fact that the conversion of the 2022 Convertible Notes would impact their fair value. The fair value at issuance of the warrants was estimated as \$ using a Black-Scholes model, with inputs that included an estimated fair value of the Company's common stock of \$, an exercise price of \$ per share (based on the estimated conversion terms), a five year term, volatility and a risk free rate of to **10%2,58216.0092,33632.0016.0086.1%1.81%1.96%**

During the year ended December 31, 2022, the 2022 Convertible Notes were automatically converted into the securities issued by the Company to the investors in the initial public offering, at a discounted price of \$ per unit. Consistent with the investors in the initial public offering, the 2022 Convertible Note holders received shares of common stock and warrants to purchase shares of common stock with an exercise price of \$ per share. The warrants issued to the 2022 Convertible Note holders were immediately exercised. Pursuant to the automatic exercise of the share-settled redemption feature, the Company accounted for the conversion as an extinguishment of debt. The Company recognized the issuance of the shares of common stock and warrants at their estimated fair value, and recorded a loss on extinguishment of \$ based on the difference between the estimated fair value (\$) and the net carrying amount of the 2022 Convertible Notes (including the carrying value of the bifurcated derivative liabilities, which were adjusted to then fair value upon settlement). The accrued cash interest was waived upon conversion and was included as a component of the loss on extinguishment. **32.0018,43818,4380.08**

310,6211,198,438

August 2022 Notes

On August 1, 2022, the Company issued promissory note units, consisting of an aggregate \$ in % promissory notes with a maturity date of July 31, 2023 (the "August 2022 Promissory Notes") and warrants to purchase shares of common stock exercisable at a price of the lesser of \$ per share or % of the per share price paid in the Company's initial public offering. In addition, the Company issued convertible note units, consisting of an aggregate of \$ in % convertible notes with a maturity date of December 31, 2024 (the "August 2022 Convertible Notes", and collectively, the "August 2022 Notes") and warrants to purchase shares of common stock exercisable at a price of the lesser of \$ per share or % of the per share price paid in the Company's initial public offering. The Company received net proceeds of \$ upon the issuance of the August 2022 Promissory Notes, \$ upon the issuance of the August 2022 Convertible Notes (non-related party) and \$ upon the issuance of the August 2022 Convertible Notes issued to a related party (as detailed in Note 5 above). **50,000102,50020.005075,00063,75020.005050,00025,00050,000**

The Company assessed the embedded features of the August 2022 Promissory Notes and determined that the accelerated repayment upon an initial public offering represented a derivative feature requiring bifurcation. The Company estimated the fair value of the derivative to be \$ at issuance (see Note 8 for fair value considerations). The Company assessed the embedded features of the August 2022 Convertible Notes and determined that the automatic conversion feature with a discount to per share price paid (a share-settled redemption feature) and the principal increase feature were not clearly and closely related to the debt host instrument and met the definition of a derivative and as such,

required bifurcation from the August 2022 Convertible Notes. The Company estimated the fair value at issuance of these features to be \$ and recorded as a discount to the August 2022 Convertible Notes (see Note 8 for fair value considerations).

45,00050%10%31,000

The Company determined that the warrants issued with the August 2022 Notes should be classified as liabilities under ASC 815, as the settlement amount could vary based on the occurrence of the initial public offering. The Company measured the fair value of these warrants using a Black-Scholes model with inputs that included an estimated fair value of the Company's common stock of \$, an exercise price of \$ per share,

a five-year term, volatility and a risk-free rate of, and recognized them at their full fair value of \$, **32.0020.0080.0%2.66%146,624**

The fair value of these warrants, the fair value of the bifurcated derivative liabilities and the other debt issuance costs incurred (totaling \$, including the fair value of the Boustead warrants described below), exceeded the proceeds received and as such, the Company recorded a loss at issuance of \$ **27,162124,786**, in finance fee (as restated) in the statement of operations. The discount on the August

2022 Notes was being amortized under the straight-line method, as the initial carrying value was \$ **0**, through the maturity date of the respective notes. The Company recognized amortization expense of

\$ **7,661** related to the discount on the August 2022 Notes as interest expense in its statement of operations for the year ended December 31, 2022.

Boustead Securities LLC acted as placement agent for the August 2022 Notes and received warrants to purchase shares of common stock at an exercise price of \$ per share. The fair value of the warrants was estimated as \$ using a Black-Scholes model with inputs that included an estimated fair value of the Company's common stock of \$, an exercise price of \$ per share, a five-year term, volatility and a risk-free rate of,

and recorded by the Company in stockholders' equity at issuance: **62520.0014,66232.0020.0080.0%2.66%**

During the year ended December 31, 2022, the lender under the August 2022 Promissory Notes and one lender under the August 2022 Convertible Notes exercised warrants to purchase shares of common stock in exchange for tendering their outstanding principal balance (\$) on their respective notes. As the warrants being exercised were classified as liabilities, the Company accounted for the settlement as an extinguishment of debt. The Company recognized the issuance of the shares of common stock at their estimated fair value (\$), and recorded a gain on extinguishment of \$ based on the difference between the estimated fair value and the net carrying amount of the tendered August 2022 Notes. The remaining \$ outstanding under the August 2022 Convertible Notes (and owed to the related party) was fully repaid in cash during the year ended December 31, 2022 (see Note 5), resulting in the recognition of a gain on extinguishment of \$ based on the difference between the repayment in cash and the net carrying amount of the

notes: **3,75075,0003,750121,87544,61450,0002,206**

Equity [Abstract] Stockholders' Equity
Note 6 – Stockholders' Equity

Common Stock

During the three and nine months ended September 30, 2024, the Company issued:
and shares of common stock to settle \$ and \$ of principal and \$ and \$ of interest on a convertible note and incurred \$ and \$ of loss on settlement,
respectively, 719,148797,3451,172,8501,408,05035,88854,670762,186833,501
and shares of common stock issued for vesting of restricted stock units, respectively, 5,00224,349 and shares of common stock issued for the round up of reverse split fractional
shares, 115,716
During the three and nine months ended September 30, 2023, the Company issued:
and shares of common stock to settle \$ and \$ of principal and \$ and \$ of interest, respectively, on a Convertible Note and incurred \$ and \$ of loss on settlement,
respectively, 62,761297,625331,8001,925,70054,096294,92743,414477,221
and shares of common stock issued for vesting of restricted stock units, 1,8761,876

Warrants

In connection with the January 2023 Alto Convertible Note, Boustead was granted warrants to purchase shares of common stock, at an exercise price of \$ per share (Note 5). Effective with the recent reverse split, the
exercise price was adjusted to \$ per share, as provided for in the underlying agreement. In addition, Alto was granted warrants to purchase shares of common stock, at an exercise price of \$ per share, as adjusted
(Note 5, 7): 8,90918.801.93127,2601.93
A summary of activity regarding all warrants issued for the nine months ended September 30, 2024 were as follows:

	<u>Number of</u>	<u>Weighted</u>	<u>Average</u>
	<u>warrants</u>	<u>Exercise</u>	<u>Life (years)</u>
		<u>Price</u>	
<u>Outstanding, December 31, 2023</u>	<u>184,000</u>	<u>\$ 23.20</u>	
<u>2.77</u>			
<u>Granted</u>			
		<u>2.04</u>	
<u>Outstanding, September 30, 2024</u>	<u>184,000</u>	<u>\$11.54</u>	

The intrinsic value of the warrants as of September 30, 2024 is \$. All of the outstanding warrants are exercisable as of September 30, 2024. 0

Equity Incentive Plan

Our 2018 Equity Incentive Plan (the "2018 Plan") provides for equity incentives to be granted to our employees, executive officers, directors and key advisers and consultants. Equity incentive grants may be made in
the form of stock options with an exercise price of not less than the fair market value of the underlying shares as determined pursuant to the 2018 Equity Incentive Plan, restricted stock awards, other stock-based
awards, or any combination of the foregoing. The 2018 Equity Incentive Plan is administered by the Company's compensation committee. We have reserved shares of our common stock for issuance under the 2018
Equity Incentive Plan. As of September 30, 2024, shares have been granted under the 2018 Equity Incentive Plan, of which shares have vested, 3,000,000125,73484,396

Restricted Stock Units

We may grant restricted stock units ("RSU") under our 2018 Plan. RSUs are bookkeeping entries representing an amount equal to the fair market value of one share of our common stock. Subject to the provisions of
our 2018 Plan, the administrator determines the terms and conditions of RSUs, including the vesting criteria and the form and timing of payment. Notwithstanding the foregoing, the administrator, in its sole
discretion, may accelerate the time at which any restrictions will lapse or be removed. RSUs granted typically vest annually in one third increments from the date of appointment.
During the three and nine months ended September 30, 2024 and 2023, pursuant to agreements with officers and consultants, and, respectively and and RSUs, respectively with a value of \$ and \$, respectively, and \$
and \$, respectively, were granted and compensation expense for RSUs of \$ and \$, and \$ and \$ respectively, was incurred. During the three and nine months ended September 30, 2024 and 2023, \$ and \$, respectively,

and \$ and \$, respectively was included in compensation under Research and Development. ~~053,455~~12,50019,9160141,840196,000291,40045,275227,88637,58395,43813,033

As of September 30, 2024, there was \$ of unrecognized RSU compensation cost related to non-vested stock-based compensation arrangements which is expected to be recognized over a weighted-average period of years. ~~145,504~~2.14

A summary of activity regarding the Restricted Stock Units issued follows:

	<u>Number of RSU</u>	<u>Weighted Average Fair Value Per RSU</u>
<u>Outstanding, December 31, 2023</u>	<u>24,731</u>	<u>\$ 11.76</u>
<u>Granted</u>	<u>53,455</u>	<u>2.65</u>
<u>Forfeiture</u>	<u>(12,500)</u>	
<u>Vested</u>	<u>(24,348)</u>	<u>9.06</u>
<u>Outstanding, September 30, 2024</u>	<u>41,338</u>	<u>\$5.14</u>

Rights Offering and Financing Commitment

On February 7, 2024, the Company and its wholly-owned subsidiary, Shuttle Diagnostics, Inc., entered into a securities purchase agreement (the "Purchase Agreement") with SRO, LLC, a Nevada limited liability company, pursuant to which SRO LLC agreed to commit to purchasing from the Company \$ of units from the Company, with each Unit consisting of Pursuant to the terms of the Purchase Agreement, the Units will be sold at a per Unit price equal to 90% of the VWAP of the Company's common stock for the five trading days immediately preceding closing. The parties entered into the Purchase Agreement in anticipation of the Company commencing a rights offering (the "Rights Offering") pursuant to which the Company intends to offer a total of \$ of Units to existing stockholders, which includes the \$ of Units being sold to SRO LLC, an entity which is controlled by Keith Moore, Executive Chairman of Boustead & Company Limited, an affiliate of Boustead. ~~2,250,000~~(i) one share of the Company's common stock, (ii) a warrant to purchase one share of the Company's common stock exercisable at a purchase price of \$18.80 per share, and (iii) a percentage of equity interest in Diagnostics such that, assuming the sale of all \$2,250,000 of Units, SRO LLC will own a 22% interest in Diagnostics. ~~4,500,000~~2,250,000

The Company filed an initial registration statement on Form S-1 (the "Form S-1") with the SEC in April 2024 related to the registration of subscription rights to purchase the Units to be sold in the Rights Offering. The Form S-1 has not been declared effective as of the date these unaudited condensed consolidated financial statements were issued. Upon the Form S-1 being declared effective, the Purchase Agreement allows SRO LLC up to 60 days to raise the initial \$, which funds will be placed in escrow with Sutter Securities, Inc. ("SSI"), an affiliate of BSL, pursuant to the terms of an escrow agreement entered into between the Company, Shuttle Diagnostics, Inc., BSL and SSI on February 7, 2024 (the "Escrow Agreement"). The funds will remain in escrow up until closing on the Rights Offering. In addition, in the event the Company fails to raise the full \$ in the Rights Offering, SRO LLC agreed to a backstop commitment pursuant to which it would have the right to purchase any remaining Units not purchased by existing Company stockholders in the Rights Offering, up to an additional \$ (the "Back-up Contingency"). ~~2,250,000~~4,500,0002,250,000 Unless the parties waive the conditions to closing, in the event the full \$4,500,000 is not raised, whether through SRO LLC or through the Company's existing stockholders, the Company will not close on the offering and any funds raised and held in escrow will be returned to investors

In conjunction with its entry into the Purchase Agreement, on February 7, 2024, the Company entered into a placement agent and advisory services agreement (the "Placement Agent Agreement") with BSL, pursuant to which BSL and BSL's affiliates agreed to provide the Company with regular and customary financial consulting advice and act as placement agent, on a best efforts basis, for the Rights Offering. In exchange for its services, BSL will receive a commitment fee equal to \$ upon the earlier of the Company filing the registration statement on Form S-1 registering the Rights Offering or upon such date as the Company terminates the Rights Offering, a commission equal 8% of the gross proceeds disbursed to the Company upon closing the Rights Offering, and \$ in diligence and related expenses. ~~112,500~~40,000

The Company has incurred \$ in costs directly related to the planned Rights Offering and initially deferred these costs in 2024, then expensed them at June 30, 2024, as the Rights Offering has not yet consummated. ~~142,000~~

Alliance Global Partners

On July 30, 2024, the Company entered into an agreement with A.G.P./Alliance Global Partners ("AGP"), as the exclusive underwriter, placement agent, or advisor in a public or private offering of up to \$ of the Company's securities, and bridge financing of up to \$; AGP was paid a \$ retainer fee. ~~10,000,000~~1,350,00050,000

As of September 30, 2024, the Company has incurred \$ of expenses included in deferred costs recorded on the Company's unaudited condensed consolidated balance sheet. ~~101,651~~

See Note 9 - Subsequent Events, Alliance Global Partners.

Note 7 - Stockholders' Equity

Common Stock

During the year ended December 31, 2023, the Company issued:

- shares of common stock to settle \$ of principal and \$ of interest on a Convertible Note and incurred \$ of loss on settlement. ~~297,625~~1,925,700294,927477,221
- shares of common stock issued for vesting of restricted stock units. ~~10,650~~

During the year ended December 31, 2022, the Company issued:

- ~~105~~ shares of common stock for conversion of \$ ~~16,340~~ of accrued interest. ● shares of common stock upon vesting of restricted stock units. ~~3,500~~ ● shares of common stock upon completion of the Company's initial public offering (including the exercise of the underwriter's overallotment option), and the immediate exercise of warrants issued as part of the IPO Units, for net proceeds of \$ ~~352,443~~9,951,356 ● shares of common stock upon the automatic conversion of preferred shares and shares of common stock to settle cumulative dividends on the preferred shares totaling \$ ~~42,113~~12,553402,064 ●

A total of shares of common stock issued to the lenders upon conversion of the 2022 Convertible Notes, including shares of common stock issued upon the conversion of the 2022 Convertible Notes into units with an estimated fair value of \$ at settlement, and shares of common stock upon the exercise of the common stock warrants, for total proceeds of \$.

~~36,876~~18,4381,198,43818,4381,475 ●

A total of shares of common stock upon the exercise of warrants and settlement of the December 2021 Notes and certain August 2022 Notes. Includes shares of common stock issued upon the exercise and settlement of the December 2021 Notes with an estimated fair value of \$ and shares of common stock issued upon the exercise and settlement of certain August 2022 Notes with an estimated fair value of \$.

Equity Incentive Plan

~~Our 2018 Equity Incentive Plan (the "2018 Plan") provides for equity incentives to be granted to our employees, executive officers, directors and key advisers and consultants. Equity incentive grants may be made in the form of stock options with an exercise price of not less than the fair market value of the underlying shares as determined pursuant to the 2018 Equity Incentive Plan, restricted stock awards, other stock-based awards, or any combination of the foregoing. The 2018 Equity Incentive Plan is administered by the Company's compensation committee. We have reserved shares of our common stock for issuance under the 2018~~

~~Equity Incentive Plan. As of December 31, 2023, shares have been granted under the 2018 Equity Incentive Plan, of which shares have vested:~~ ~~3,000,00084,77960,048~~

Restricted Stock Units

~~We may grant restricted stock units ("RSU") under our 2018 Plan. RSUs are bookkeeping entries representing an amount equal to the fair market value of one share of our common stock. Subject to the provisions of our 2018 Plan, the administrator determines the terms and conditions of RSUs, including the vesting criteria and the form and timing of payment. Notwithstanding the foregoing, the administrator, in its sole discretion, may accelerate the time at which any restrictions will lapse or be removed. RSUs granted typically vest annually in one third increments from the date of appointment.~~

~~During the years ended December 31, 2023 and 2022, pursuant to agreements with directors, officers and consultants, and RSUs with a value of \$ and \$ were granted, respectively. Compensation expense for the vesting RSUs were as follows:~~ ~~32,4154,449352,400100,000~~

	2023	2022
	Year ended December 31,	
	2023	2022
	-	(as restated)
Recognized in general and administrative expense	\$ 115,000	\$ 105,582
Recognized in research and development expense	\$ 66,960	\$ 131,965
Total	\$ 181,960	\$ 237,547

~~As of December 31, 2023 and 2022, there was \$ and \$, respectively, of unrecognized stock-based compensation expense related to unvested RSUs, which is expected to be recognized over a weighted-average period of years and years, respectively.~~ ~~231,55061,1111.061.83~~

Derivative Liabilities Derivative Liabilities

Note 7 – Derivative Liabilities

Fair Value Assumptions Used in Accounting for Derivative Liabilities

ASC 815 requires us to assess the fair market value of derivative liabilities at the end of each reporting period and recognize any change in the fair market value as other income or expense.

In January 2023, in connection with the Alto Convertible Note, the Company issued warrants to purchase shares of common stock, with an exercise price of \$ per share, as adjusted for the recent reverse split, valued at inception at \$ and as of September 30, 2024, at \$. The Company determined our derivative liabilities from the warrants issued in relation to the Alto Convertible Note do not satisfy the classification as equity instruments due to the existence of a certain net cash settlement provision that is not within the sole control of the Company. In addition, there are certain down round provisions that could reduce the exercise price

if the Company issues securities at lower prices in the future. 127,2601.931,189,00074,107

The Company has determined the Acceleration Option is an embedded derivative within the host instrument and has bifurcated it from the host instrument and recorded it as a derivative liability valued at \$, using a Monte Carlo simulation model. The Company determined our derivative liability from the noteholder's Acceleration Option for the Alto Convertible Note is not clearly and closely related to the host and should be

thus accounted for as a bifurcated derivative liability. 1,442,000

The Company classified these derivative liabilities as a Level 3 fair value measurement and used the Monte Carlo pricing model to calculate the fair value as of January 11, 2023 (\$ included in debt discount) and September 30, 2024 (\$). Key inputs for the simulation are summarized below. The Monte Carlo simulation uses an implied VWAP for the January 11, 2023 valuation date. The implied VWAP was backsolved by setting the summation of the parts (e.g., derivatives and debt without derivatives) equal to the cash proceeds. The simulation was then iterated and manipulated to solve for the implied share price, which was approximately

\$ per share (or an approximate % discount to the quoted market VWAP on January 11, 2023). 2,631,00074,10712.6414

The key inputs for the Monte Carlo simulation as of September 30, 2024, were as follows:

Net cash settlement and down round key valuation inputs – warrants*	=	September 30, 2024	=

Annualized volatility

% – % 92.04101.79 % – % 3.644.93

Risk-free interest rate

Quoted VWAP	=	\$

Loss (gain) on change in fair value	145,304	(1,531)	
Balance – June 30, 2024	\$ 359,919	\$ 504	
Gain on change in fair value of the derivative	(285,812)	(504)	
Balance – September 30, 2024	\$ 74,107	\$	

Note 8 – Derivative Liabilities

Fair Value Assumptions Used in Accounting for Derivative Liabilities

ASC 815 requires us to assess the fair market value of derivative liabilities at the end of each reporting period and recognize any change in the fair market value as other income or expense.

Alto Opportunity Master Fund, SPC

In January 2023, in connection with the Alto Convertible Note, the Company issued warrants to purchase shares of common stock, with an exercise price of \$ per share, valued at inception at \$ and as of December 31, 2023, at \$. The Company determined our derivative liabilities from the warrants issued in relation to the Alto Convertible Note do not satisfy the classification as equity instruments due to the existence of a certain net cash settlement provision that is not within the sole control of the Company. In addition, there are certain down round provisions that could reduce the exercise price if the Company issues securities at

lower prices in the future. 127,26018.801,189,000410,660

The Company determined our derivative liability from the noteholder's Acceleration Option for the Alto Convertible Note is not clearly and closely related to the host and should be thus accounted for as a bifurcated derivative liability.

We classified these derivative liabilities as a Level 3 fair value measurement and used the Monte Carlo pricing model to calculate the fair value as of January 11, 2023, and for each reporting period. Key inputs for the simulation are summarized below. The Monte Carlo simulation uses an implied VWAP for each valuation date. The implied VWAP was backsolved by setting the summation of the parts (e.g., derivatives and debt without derivatives) equal to the cash proceeds. The simulation was then iterated and manipulated to solve for the implied share price, which was approximately \$ 12.64 per share (or an approximate 14% discount to the quoted market VWAP on January 11, 2023). Additionally, the Company estimates probability for various specific scenarios impacting the warrant valuation.

The range of key inputs for the Monte Carlo simulation for the year ended December 31, 2023, were as follows:

in connection with the issuance of the August 2022 Promissory Note, the Company identified an accelerated repayment upon IPO feature that required bifurcation. We classified this derivative liability as a Level 3 fair value measurement and used a probability weighted scenario model to estimate the fair value of the derivative just prior to the settlement of the August 2022 Promissory Notes. Key inputs for this valuation model are summarized below:

Settlement
Date

~~**\$5,000**~~

~~**\$5,000**~~

—

In connection with the issuance of the August 2022 Convertible Notes, the Company identified certain embedded features that required bifurcation as a combined derivative liability, including the share settled redemption of the 2022 Convertible Notes at a 50% discount and the automatic increase in principal of 10% if conversion does not occur within 12 months. Key inputs for this valuation model are summarized below:

The following table summarizes the changes in the derivative liabilities:

Fair Value Measurements Using Significant Unobservable Inputs (Level 3)

Convertible Bridge Notes

~~—~~
On October 14, 2024, the Company issued an aggregate of \$ (of an up to \$ million authorized financing) senior secured convertible notes due in October 2025, which accrue interest at % interest per year. The notes include a % original issue discount and the Company received \$ in proceeds. The notes are convertible beginning three months after the date of issuance, and the conversion price will be the lower of a 15% discount to (i) the 5-day VWAP immediately prior to Closing or (ii) the price of any offering entered into by the Company during the term of the notes. The Company has the option to prepay the notes at any time for % of total outstanding balance and any outstanding principal will be paid in conversion of shares of common stock at the end of the term, subject to the Company's exercise of the optional prepayment right. Any accrued interest will be repaid quarterly in cash. The Company also issued warrants to the lenders to purchase an aggregate shares of common stock, exercisable at \$ per share, with such warrants expiring from issuance. In addition, the Company's Chief Executive Officer, Dr. Anatoly Dritschilo, invested a total of \$ in this financing round, in exchange for a \$ convertible

Alliance Global Partners

~~On October 31, 2024, the Company consummated a public offering of an aggregate of (i) shares of common stock and pre-funded warrants to purchase up to shares of common stock, and (ii) common stock purchase warrants to purchase up to shares of common stock. Each share of common stock, or a pre-funded warrant in lieu thereof, was sold together with an accompanying warrant to purchase one share of common stock.~~

~~AGP served as lead underwriter along with Boustead as co-underwriter.~~
~~395,5742,555,2462,555,2462,950,8202,950,820~~

~~The public offering price for each share of common stock and one accompanying warrant was \$1.525. The public offering price of each pre-funded warrant and one accompanying common warrant was \$1.524, which equals the price at which one share of common stock and accompanying warrant was sold to the public in this offering, minus \$0.001. The exercise price of each pre-funded warrant is \$0.001 per share. Each warrant offered in the offering is exercisable for one share of common stock and has an initial exercise price equal to \$1.40. The Company received aggregate gross proceeds from the offering of approximately \$4.5 million, before deducting placement agents' fees and other offering expenses.~~

~~**Note 12 – Subsequent Events**~~

~~Management evaluated all additional events subsequent to the balance sheet date through the date the consolidated financial statements were issued and determined that the following items are required to be disclosed.~~

~~**Restatement of Previously Issued Financial Statements**~~

~~See Note 2.~~

~~**Nasdaq Bid Price Requirement Extension Granted until August 26, 2024**~~

~~On August 31, 2023, after the Company's common stock had traded below \$1.00 per share for 30 consecutive trading days, the Company received notice from the Nasdaq Stock Market LLC ("Nasdaq") that it was not in compliance with Nasdaq Listing Rule 5550(a)(2) (the "Bid Price Requirement"). In accordance with Nasdaq Rules, the Company was provided with an initial period of 180 calendar days, or until February 27, 2024, to regain compliance with the Bid Price Requirement. On February 19, 2024, the Company submitted a plan of compliance to Nasdaq seeking an additional 180-day grace period to regain compliance with the Bid Price Requirement. On February 29, 2024, the Company received formal approval from Nasdaq granting it an additional 180 days, or until August 26, 2024, to regain compliance – whether organically through market forces or by effectuating a reverse stock split, should such action be required. On August 6, 2024, the Company filed a certificate of amendment to its certificate of incorporation, effective August 13, 2024, to effectuate a one-for-eight reverse stock split of its issued and outstanding common stock, rounding up to account for any fractional shares (the "Reverse Stock Split"). The Reverse Stock Split had no effect on the Company's authorized shares of common stock or preferred stock. Following the reverse stock split on August 13, 2024, the Company had a total of 2,111,235 shares issued and outstanding (or 2,008,689 on a post-split basis as of December 31, 2024) and trades under the new CUSIP number 925693302. All common stock share, option, warrant and per share amounts (except our authorized but unissued shares) have been retroactively restated in these consolidated financial statements and related disclosures. Following the Reverse Stock Split, on August 27, 2024, the Company received a written notice from Nasdaq informing the Company that it has regained compliance with the Bid Price Requirement for continued listing on the Nasdaq Capital Market.~~

~~**FDA Approval to Proceed with Phase II study of Ropidoxuridine (IPdR)**~~

~~The Phase II clinical trial was also approved by the Institutional Review Board "IRB" on June 21, 2024. On January 8, 2024, Shuttle Pharmaceuticals Holdings, Inc., a Delaware corporation (the "Company"), issued a press release announcing that the Company had received the "Safe to Proceed" letter from the U.S. Food and Drug Administration for the Company's investigational new drug (IND) application for its Phase II study of Ropidoxuridine (IPdR) as a radiation sensitizing agent during radiotherapy in patients with newly diagnosed IDH-wildtype glioblastoma with unmethylated MGMT promoter. Receipt of the letter allows Shuttle to commence the Phase II study and, as a result, the Company is currently finalizing site enrollment with "first patient, first dose" expected in the coming months. On August 8, 2024, the Company entered into a work order (the "Work Order") with Theradex Systems, Inc., a New Jersey contract research organization ("CRO") for purposes of supporting the Company's Phase II Study of Ropidoxuridine as a Radiation Sensitizing Agent During Radiotherapy in Patients with Newly Diagnosed IDH-Wildtype Glioblastoma with Unmethylated MGMT Promotor." As such, Shuttle Pharma is now in the process of signing up six clinical sites where the clinical studies will be performed – two of which have completed initial site initiation visits and one of which is ready to enroll patients – and where the CRO will oversee such studies. Under the terms of the Work Order, the CRO will oversee the studies for a period of 53 months (the "Term"), including overseeing and monitoring the regulatory aspects of the Phase II clinical trial, and managing the documentation surrounding the clinical trial in exchange for a fee of approximately \$2.3 million, payable in stages and based upon services performed during the Term of the study.~~

~~**Rights Offering**~~

~~Effective February 7, 2024, the Company and its wholly-owned subsidiary, Shuttle Diagnostics, Inc., entered into a securities purchase agreement (the "Purchase Agreement") with SRO, LLC, a Nevada limited liability company, pursuant to which SRO LLC agreed to commit to purchasing from the Company \$ of units from the Company, with each Unit consisting of Pursuant to the terms of the Purchase Agreement, the Units will be sold at a per Unit price equal to 90% of the VWAP of SHPH common stock for the five trading days immediately preceding closing. The parties entered into the Purchase Agreement in anticipation of the Company commencing a rights offering (the "Rights Offering") pursuant to which the Company intends to offer a total of \$ Units to existing stockholders, which includes the \$ Units being sold to SRO LLC, an entity which is owned by Keith Moore, CEO of Boustead Securities, LLC ("BSL"). 2,250,000(i) one share of SHPH common stock, (ii) a warrant to purchase one share of SHPH common stock exercisable at a purchase price of \$18.80 per share, and (iii) a percentage of equity interest in Diagnostics such that, assuming the sale of all \$2,250,000 of Units, SRO LLC will own a 22% interest in Diagnostics.4,500,0002,250,000~~

~~The Purchase Agreement allows SRO LLC up to 60 days to raise the initial \$, which funds will be placed in escrow with Sutter Securities, Inc. ("SSI"), an affiliate of BSL, pursuant to the terms of an escrow agreement entered into between the Company, Shuttle Diagnostics, Inc., BSL and SSI on February 7, 2024 (the "Escrow Agreement"). The funds will remain in escrow up until closing on the Rights Offering. In addition, in the event the Company fails to raise a full \$ in the Rights Offering, SRO LLC agreed to a backstop commitment pursuant to which it would have the right to purchase any remaining Units not purchased by existing SHPH stockholders in the Rights Offering, up to an additional \$ (the "Back-up Contingency"). 2,250,0004,500,0002,250,000Unless the parties waive the conditions to closing, in the event the full \$4,500,000 is not raised, whether through SRO LLC or through SHPH's existing stockholders, the Company will not close on the offering and any funds raised and held in escrow will be returned to investors.~~

~~**Restricted Stock Awarded to Chief Financial Officer**~~

~~On March 8, 2024, the Company's then CFO was awarded restricted stock units ("RSUs"), with a value of \$, with such RSUs vesting in full as of the date of issuance. Each RSU represents the right to receive one share of SHPH common stock. 12,50041,840~~

~~On June 13, 2024, the Company's newly appointed CFO was awarded restricted stock units ("RSUs"), with a value of \$, with such RSUs vesting annually in three equal installments following the date of issuance. Each RSU represents the right to receive one share of SHPH common stock. 28,455100,000~~

~~**Alto Opportunity Master Fund, SPC**~~

~~On July 12, 2024, the Company informed the Investor in the Alto Convertible Note that the Company's expected restatement of its consolidated financial statements for the years ended December 31, 2022 and 2023 constituted an event of default under the terms of the Alto Convertible Note. On August 6, 2024, the Company paid \$ to the Investor, which funds will be held as collateral to the balance owed under the Alto Convertible Note, and received a waiver from the Investor related to the default. 600,000~~

~~**Alliance Global Partners**~~

~~On July 30, 2024, the Company engaged A.G.P./Alliance Global Partners ("AGP") to serve as exclusive underwriter, placement agent or advisor in any public or private offering or financing (as defined, the "Offering") of up to \$million. 10~~

[Restatement of Previously Issued Financial Statements12 Months Ended Dec. 31, 2023](#)

[Accounting Changes and Error Corrections \[Abstract\]](#) [Restatement of Previously Issued Financial Statements](#)

[Note 2 – Restatement of Previously Issued Financial Statements](#)

As previously disclosed in the Company's Quarterly Report on Form 10-Q for the period ended March 31, 2024, filed with the Securities and Exchange Commission ("SEC") on May 13, 2024, following the entry of a cease-and-desist order by the SEC against our former auditor, B.F. Borgers CPA PC ("BF Borgers"), we commenced the re-audit (the "Re-audit") of our consolidated financial statements for the year ended December 31, 2022, which had been audited by BF Borgers. Since that time and as a result of the Re-audit, and as initially disclosed on Form 8-K dated July 10, 2024, the Company and the Audit Committee have concluded and informed our current auditor, Forvis Mazars, LLP, that our audited consolidated financial statements for the year ended December 31, 2022 (the "2022 Financial Statements"), our audited consolidated financial statements for the year ended December 31, 2023 (the "2023 Financial Statements"), and the quarterly periods included in the Company's Annual Report for the year ended December 31, 2023, and the quarterly report for the period ended March 31, 2024 require restatement and are not reliable.

The accounting errors impacting our 2022 Financial Statements include:

[Stock Compensation](#)

- Application of the incorrect grant date fair values in determining the value of certain equity awards granted during the years ended December 31, 2019 and 2020;
- Miscalculation of the pattern of recognition of stock-based compensation over the requisite service periods for certain equity awards granted during the years ended December 31, 2019 and 2020;

[Series A Convertible Preferred Stock](#)

- Utilization of incorrect inputs to the fair value estimates for the warrant obligation related to the Series A Convertible Preferred Stock, incorrectly recording the reclassification of the warrant obligation upon issuance as a gain and not as a reclassification to stockholders' equity;
- Recording of accrued dividends on the Series A Convertible Preferred Stock as a liability prior to the dividends being declared;
- Failure to recognize the accounting impact for the amendment to the terms of the Series A Convertible Preferred Stock in April 2022, which the Company subsequently concluded should have been recognized as an extinguishment;
- Failure to recognize deemed contribution related to the settlement of the Series A Convertible Preferred Stock and accrued dividends;

Notes Payable

- Misidentification of certain debt and equity issuance costs and incorrect association with certain of the Company's financings during the years ended December 31, 2022 and 2021;
- Application of the incorrect amortization period and pattern of recognition for debt discounts recorded in relation to the Company's debt financings during the years ended December 31, 2022 and 2021;
- Incorrect recognition of bifurcated derivative liabilities, as well as incorrect initial and subsequent fair value measurements, in relation to the December 2021 Notes, 2022 Convertible Notes and August 2022 Notes;
- Misclassification of certain warrants issued with debt transactions during the year ended December 31, 2022;
- Failure to recognize certain liability-classified warrants issued in exchange for services provided related to the Company's financing activities during the year ended December 31, 2022;
- Incorrect application of extinguishment or conversion models in accounting for certain debt instruments upon their settlement; and

Initial Public Offering

- **Incorrect identification of deferred issuance costs incurred in relation to the initial public offering; Incorrect identification and classification of issuance costs incurred in relation to the initial public offering;**

In addition to the restatement of the consolidated financial statements, the Company has also restated the following notes to reflect the errors described above:

- Note 2 – Summary of Significant Accounting Policies (now Note 3)
- Note 5 – Notes Payable-Related Party
- Note 6 – Convertible Notes (now-labeled Notes Payable)
- Note 7 – Stockholders' Equity
- Note 8 – Derivative Liabilities

Note 10 – Income Taxes

The impact of the errors described above also impact the Company's Annual Report on Form 10-K for the years ended December 31, 2023 and December 31, 2022 within additional paid in capital and accumulated deficit, resulting in the preparation and filing of this Annual Report on Form 10-K/A:

Consolidated Balance Sheet as of December 31, 2023:	As Reported	:	Adjustment	:	As Restated
Additional paid in capital	-	:	19,543,363	:	29,489,055
Accumulated deficit	-	:	(15,487,612)	:	(25,433,304)

Additionally, the Company has provided Note 11 – Quarterly Financial Data (unaudited and restated) to present the impact of the above restatements on the unaudited quarterly financial information for the period ended September 30, 2023:

The Company's prior and updated accounting for the errors described above do not have any effect on the Company's previously reported cash or cash flows:

The following tables summarize the effect of the restatement on each financial statement line item as of the dates indicated:

Consolidated Balance Sheet as of December 31, 2022	As Reported	:	Adjustment	:	As Restated
Additional paid in capital	-	:	16,572,741	:	26,518,433
Accumulated deficit	-	:	(8,894,889)	:	(9,945,692)
				:	(2)

(1) Adjustments include corrections for stock compensation errors (increase of \$); recognition of Series A Preferred Stock accrued dividends (decrease of \$); correction of issuance cost recognition related to financing transactions (decrease of \$); corrections to the Company's initial classification and recognition of warrants issued in financing transactions (decrease of \$); reclassifications of warrants from liability to equity (increase of \$); correction in the application of extinguishment accounting upon settlement of debt instruments (increase of

~~Summary of Significant Accounting Policies~~ ~~6 Months~~ ~~12 Months~~
~~(Policies)~~ ~~Ended~~ ~~Ended~~

~~Jun. 30, 2024~~

~~Dec. 31, 2023~~

~~Accounting Policies [Abstract]~~ ~~Basis of Presentation~~

~~Basis of Presentation~~

~~The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial statements and with the instructions to Form 10-Q and Rule 8-03 of Regulation S-X of the United States Securities and Exchange Commission ("SEC"). Accordingly, they do not contain all information and notes required by GAAP for annual financial statements. A complete discussion of the Company's significant accounting policies is included in the Company's Annual Report on Form 10-K/A for the year ended December 31, 2023.~~

~~In the opinion of the Company's management, the accompanying unaudited condensed consolidated financial statements contain all of the adjustments necessary to present the financial position of the Company as of September 30, 2024 and the results of operations and cash flows for the periods presented. The accompanying condensed consolidated financial statements of the Company have not been audited by the Company's independent registered public accounting firm, except that the year-end consolidated balance sheet was derived from audited financial statements. The results of operations for the nine months ended September 30, 2024 are not necessarily indicative of the operating results for the full fiscal year or any future period. These unaudited condensed consolidated financial statements should be read in conjunction with the restated financial statements and related notes thereto for the year ended December 31, 2023 included in the Company's Annual Report on Form 10-K/A filed with the SEC on September 4, 2024.~~

~~Basis of Presentation~~

~~These consolidated financial statements and related disclosures have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). The consolidated financial statements and disclosures have been prepared using the accrual basis of accounting in accordance with U.S. generally accepted accounting principles ("GAAP").~~

~~Reverse Stock Split~~

~~Reverse Stock Split~~

~~On August 13, 2024, in order to meet Nasdaq's minimum bid price requirement of \$ per share (the "Minimum Bid Price Requirement"), the Company effectuated a reverse stock split of its issued and outstanding common stock, rounding up to account for any fractional shares (the "Reverse Stock Split"). The Reverse Stock Split had no effect on the Company's authorized shares of common stock or preferred stock and the par value will remain unchanged at \$, respectively. All common stock share, option, warrant and per share amounts (except our authorized but unissued shares and previously reserved shares) have been retroactively adjusted in these financial statements and related disclosures. **1.001 for 80.00001**~~

~~-Basis of Consolidation~~

~~Basis of Consolidation~~

The unaudited condensed consolidated financial statements have been prepared on a consolidated basis with those of the Company's wholly-owned subsidiaries, Shuttle Pharmaceuticals, Inc. and Shuttle Diagnostics Inc. All intercompany transactions and balances have been eliminated.

Basis of Consolidation

The consolidated financial statements have been prepared on a consolidated basis with those of the Company's wholly-owned subsidiaries, Shuttle Pharmaceuticals, Inc. and Shuttle Diagnostics, Inc. All intercompany transactions and balances have been eliminated.

Reclassifications

Correction of an Immaterial Error in the Prior Period Financial Statements

During the fourth quarter of 2023, the Company determined that the prior year consolidated financial statements had a misstatement caused by an immaterial classification error of certain research and development expenses in accordance with Accounting Standards Codification ("ASC") 730. As a result, certain prior year amounts have been corrected for consistency with the current year presentation. The Company assessed the materiality of this change in presentation on prior period consolidated financial statements in accordance with SEC Staff Accounting Bulletin No. 99, "Materiality," (ASC Topic 250, Accounting Changes and Error Corrections). Based on this assessment, the Company concluded that these error corrections in its unaudited condensed consolidated statements of operations are not material to any previously presented financial statements based upon overall considerations of both quantitative and qualitative factors. The corrections had no impact on the unaudited condensed consolidated balance sheet, unaudited condensed consolidated statements of cash flows, or unaudited condensed consolidated statement of changes in stockholders' equity, to these financial statements, or for any previously presented interim or annual financial statements. Further, the corrections did not result in a change in quarterly or year-to-date operating losses, basic or diluted earnings per share, or working capital. The quarterly correction required for the three and nine months ended September 30, 2023 was \$ and \$, respectively. Accordingly, the Company corrected the previously reported immaterial error for the three and nine months ended September 30, 2023 in this Quarterly

Report on Form 10-Q: 95,129277,844

	September 30, 2023	Correction	Corrected September 30, 2023
Research and development expense	\$ 3,084,488	\$ (277,844)	\$ 2,806,644
General and administrative expense	452,342	277,844	730,186
Net Loss	\$ 3,536,830	\$	
	\$3,536,830		

Reclassifications

Certain prior year amounts have been reclassified for consistency with the current year presentation. These reclassifications had no effect on the reported results of operations.

Use of Estimates

Use of Estimates

The preparation of unaudited condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the unaudited condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The Company regularly evaluates estimates and assumptions. The Company bases its estimates and assumptions on current facts, historical experience, and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by the Company may differ materially and adversely from the Company's estimates. To the extent there are material differences between the estimates and the actual results, future results of operations will be affected. Significant estimates are contained in the accompanying unaudited condensed consolidated financial statements for the recognition of research and development expenses, valuation of warrants and valuation of bifurcated derivative liabilities and other financial instruments.

Use of Estimates

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates are contained in the accompanying consolidated financial statements for the recognition of research and development expenses, valuation of warrants and valuation of bifurcated derivative liabilities and other financial instruments.

Cash and Cash Equivalents

Cash and Cash Equivalents

Cash and cash equivalents include cash in bank accounts and money market funds with maturities of less than three months from inception, which are readily convertible to known amounts of cash and which, in the opinion of management, are subject to an insignificant risk of loss in value. As of September 30, 2024 and December 31, 2023, cash and cash equivalents consisted of the following:

	September 30, 2024	December 31, 2023
Cash	\$ 155,652	\$ 1,550,098
Money market funds	1,004	1,026,318
	\$ 156,656	\$ 2,576,416

Periodically, the Company may carry cash balances at financial institutions in excess of the federally insured limit of \$ per institution. The amount in excess of the FDIC insurance as of September 30, 2024 was \$. The Company has not experienced losses on these accounts and management believes, based upon the quality of the financial institutions, that the credit risk with regard to these deposits is not

significant: 250,0000

Cash and Cash Equivalents

Cash and cash equivalents include cash in bank accounts and money market funds with maturities of less than three months from inception, which are readily convertible to known amounts of cash and which, in the opinion of management, are subject to an insignificant risk of loss in value. As of December 31, 2023 and 2022, cash and cash equivalents consisted of the following:

	December 31, 2023	December 31, 2022
Cash	\$ 1,550,098	\$ 5,411,378
Money market funds	1,026,318	3,005,825
	\$ 2,576,416	\$ 8,417,203

Periodically, the Company may carry cash balances at financial institutions in excess of the federally insured limit of \$ per institution. The amount in excess of the FDIC insurance as of December 31, 2023 was approximately \$. The Company has not experienced losses on these accounts and management believes, based upon the quality of the financial institutions, that the credit risk with regard to these deposits is not

significant: 250,0001,849,000

Marketable Securities

Marketable Securities

Our investments in debt securities are carried at fair value. Investments in debt securities that are not classified as held-to-maturity are carried at fair value and classified as either trading or available-for-sale. Realized and unrealized gains and losses on trading of debt securities are charged to income.

The marketable securities held by the Company, which are classified as trading marketable securities, consisted of an outstanding balance of \$ and \$ million as of September 30, 2024 and December 31, 2023, respectively. During the three months ended September 30, 2024 and 2023, the Company recognized interest income of \$ and \$, realized gains of \$ and \$, and unrealized losses of \$ and unrealized gains of \$, respectively. During the nine months ended September 30, 2024 and 2023, the Company recognized interest income of \$ and \$, realized gains of \$ and \$, and unrealized loss of \$ and unrealized gain of \$,

respectively: 02.92,52420,76556,398042,8989,60638,13556,720100,1181,74471,56821,134

Fair Value of Financial Instruments

Fair Value of Financial Instruments

The Company follows accounting guidelines on fair value measurements for financial instruments measured on a recurring basis, as well as for certain assets and liabilities that are initially recorded at their estimated fair values. Fair Value is defined as the exit price, or the amount that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The Company uses the following three-level hierarchy that maximizes the use of observable inputs and minimizes the use of unobservable inputs to value its financial instruments:

- Level 1: Observable inputs such as unadjusted quoted prices in active markets for identical instruments;
- Level 2: Quoted prices for similar instruments that are directly or indirectly observable in the marketplace;
- Level 3: Significant unobservable inputs which are supported by little or no market activity and that are financial instruments whose values are determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires a significant judgment or estimation.

Financial instruments measured at fair value are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires the Company to make judgments and consider factors specific to the asset or liability. The use of different assumptions and/or estimation methodologies may have a material effect on estimated fair values. Accordingly, the fair value estimates disclosed, or initial amounts recorded, may not be indicative of the amount that the Company or holders of the instruments could realize in a current market exchange.

The carrying amounts of the Company's financial instruments including cash and cash equivalents, prepaid expenses, accounts payable and accrued liabilities approximate fair value due to the short-term maturities of these instruments.

Set out below are the Company's financial instruments that are required to be remeasured at fair value on a recurring basis and their fair value hierarchy as of September 30, 2024 and December 31, 2023:

September 30, 2024	Level 1	Level 2	Level 3	Carrying Value

Fair Value of Financial Instruments

The Company follows accounting guidelines on fair value measurements for financial instruments measured on a recurring basis, as well as for certain assets and liabilities that are initially recorded at their estimated fair values. Fair value is defined as the exit price, or the amount that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The Company uses the following three-level hierarchy that maximizes the use of observable inputs and minimizes the use of unobservable inputs to value its financial instruments:

- Level 1: Observable inputs such as unadjusted quoted prices in active markets for identical instruments;
- Level 2: Quoted prices for similar instruments that are directly or indirectly observable in the marketplace;
- Level 3: Significant unobservable inputs which are supported by little or no market activity and that are financial instruments whose values are determined using pricing models, discounted cash

The Company accounts for warrants as either equity-classified or liability-classified instruments based on an assessment of the warrant's specific terms and applicable authoritative guidance in FASB ASC 480, ("ASC 480") and ASC 815, ("ASC 815"). The assessment considers whether the warrants are freestanding financial instruments pursuant to ASC 480, meet the definition of a liability pursuant to ASC 480, and whether the warrants meet all of the requirements for equity classification under ASC 815, including whether the warrants are indexed to the Company's own ordinary shares and whether the warrant holders could potentially require "net cash settlement" in a circumstance outside of the Company's control, among other conditions for equity classification. This assessment, which requires the use of professional judgment, is conducted at

the time of warrant issuance and as of each subsequent quarterly period end date while the warrants are outstanding.

Distinguishing Liabilities from Equity

Derivatives and Hedging

For issued or modified warrants that meet all of the criteria for equity classification, the warrants are required to be recorded as a component of additional paid-in capital at the time of issuance. For issued or modified warrants that do not meet all the criteria for equity classification, the warrants are required to be recorded at their initial fair value on the date of issuance, and each balance sheet date thereafter. Changes in the estimated fair value of the warrants are recognized as a non-cash gain or loss on the unaudited condensed consolidated statements of operations. The fair value of the warrants is estimated using a Black-Scholes pricing model or a Monte Carlo simulation.

Warrants

The Company accounts for warrants as either equity-classified or liability-classified instruments based on an assessment of the warrant's specific terms and applicable authoritative guidance in FASB ASC 480, Distinguishing Liabilities from Equity ("ASC 480") and ASC 815, Derivatives and Hedging ("ASC 815"). The assessment considers whether the warrants are freestanding financial instruments pursuant to ASC 480, meet the definition of a liability pursuant to ASC 480, and whether the warrants meet all of the requirements for equity classification under ASC 815, including whether the warrants are indexed to the Company's own ordinary shares and whether the warrant holders could potentially require "net cash settlement" in a circumstance outside of the Company's control, among other conditions for equity classification. Finally, the Company determines if the warrants meet the definition of a derivative based on their contractual terms. This assessment, which requires the use of professional judgment, is conducted at the time of warrant issuance and as of each subsequent quarterly period end date while the warrants are outstanding.

For issued or modified warrants that meet all of the criteria for equity classification, the warrants are required to be recorded as a component of additional paid-in capital at the time of issuance. For issued or modified warrants that do not meet all the criteria for equity classification, the warrants are required to be recorded at their initial fair value on the date of issuance, and at each balance sheet date thereafter. Changes in the estimated fair value of the warrants are recognized as a non-cash gain or loss on the consolidated statements of operations. The Company also evaluates if changes in contractual terms or other considerations would result in the reclassification of outstanding warrants from liabilities to stockholders' equity (or vice versa).

The fair value of the warrants is estimated using a Black-Scholes pricing model or a Monte Carlo simulation.

Research and Development Expenses

Research and Development Expenses

Research and development expenses are charged to expense as incurred. Research and development expenses include, but are not limited to, product development, clinical and regulatory expenses, payroll and other personnel expenses, which include a certain portion of our chief executive officer, chief operating officer, chief financial officer and directors' compensation. For the three and nine months ended September 30, 2024 and 2023, a portion of personnel-related expenses and stock-based compensation expense for these individuals totaling \$ million and \$ million, respectively, and \$ million and \$ million, respectively, was included within research and development due to their active involvement in the research and development activities, materials, supplies, related subcontract expenses, and consulting costs. In June 2024, the Company recruited a new chief financial officer who is substantially devoted to administrative functions and our then existing chief financial officer, who also handled research and development compliance functions,

transitioned to substantially research and development functions. 0.10.40.10.7

Regarding the accounting treatment for reimbursements, GAAP provides limited guidance on the accounting for government grants received by for-profit companies. In accordance with ASC Topic 832, as adopted January 1, 2022, we disclose certain types of government assistance received in the notes to the consolidated financial statements that includes: a) the nature of the transaction including the nature of the assistance being given, b) the accounting policies being used to account for the transaction and c) other provisions of relevance, where required. Depending on the type of grant or contract, we understand there is more than one acceptable alternative for the accounting treatment - a reduction of costs, a deferred credit to be amortized, revenue or other income. The Company has concluded that reimbursements received for R&D expenses incurred, are more akin to a reduction of costs and applies reimbursements against incurred research costs. There were no reimbursements received for the three and nine months ended September 30,

Government Assistance

Research and Development Expenses

Research and development expenses are charged to expense as incurred. Research and development expenses include, but are not limited to, product development, clinical and regulatory expenses, payroll and other personnel expenses, which include a certain portion of our chief executive officer, chief operating officer, chief financial officer and directors' compensation. For the year ended December 31, 2023 and 2022, a portion of personnel-related expenses and stock-based compensation expense for these individuals totaling \$ million and \$ million, respectively, was included within research and development due to their active

involvement in the research and development activities, materials, supplies, related subcontract expenses, and consulting costs. 0.80.5

The Company has concluded that reimbursements received for R&D expenses incurred, are more akin to a reduction of costs and applies reimbursements against incurred research costs. For the years ended December 31, 2023 and 2022, we recorded \$ million and \$ million in

Research and development, net of contract expense reimbursements, respectively. Government Assistance3.51.0

Net Loss Per Common Stock

Net Loss Per Common Stock

Net loss per share of common stock requires presentation of basic earnings per share on the face of the unaudited condensed consolidated statements of operations for all entities with complex capital structures and requires a reconciliation of the numerator and denominator of the basic earnings per share computation. In the accompanying unaudited condensed consolidated financial statements, basic loss per share is computed by dividing net loss by the weighted average number of shares of common stock outstanding during the year. Diluted earnings per share is computed by dividing net income by the weighted average number of shares of common stock and potentially dilutive outstanding shares of common stock during the period to reflect the potential dilution that could occur from common shares issuable through contingent share arrangements, stock options and warrants unless the result would be antidilutive.

The dilutive effect of restricted stock units subject to vesting and other stock-based payment awards is calculated using the "treasury stock method," which assumes that the "proceeds" from the exercise of these instruments are used to purchase common shares at the average market price for the period. The dilutive effect of convertible securities is calculated using the "if-converted method." Under the if-converted method, securities are assumed to be converted at the beginning of the period, and the resulting shares of common stock are included in the denominator of the diluted calculation for the entire period being presented.

For the nine months ended September 30, 2024 and 2023, the following common stock equivalents were excluded from the computation of diluted net loss per share as the result of the computation was anti-dilutive.

Deferred Offering Costs

Deferred Offering Costs

Pursuant to ASC 340-10-599-1, costs directly attributable to an offering of equity securities are deferred and would be charged against the gross proceeds of an offering as a reduction of additional paid-in capital. Deferred offering costs may consist of underwriting, legal, accounting, and other expenses incurred through the balance sheet date that are directly related to a proposed public offering. Should the proposed public offering prove to be unsuccessful, any deferred costs, as well as additional expenses to be incurred, will be expensed.

Recent Accounting Pronouncements

Recent Accounting Pronouncements

In November 2023, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2023-07, Segment Reporting Topic 280, "Segment Reporting-Improvements to Reportable Segment Disclosures," which allows disclosure of one or more measures of segment profit or loss used by the chief operating decision maker to allocate resources and assess performance. Additionally, the standard requires enhanced disclosures of significant segment expenses and other segment items, as well as incremental qualitative disclosures on both an annual and interim basis. This guidance is effective for annual reporting periods beginning after December 15, 2023, and interim reporting periods after December 15, 2024. Early adoption is permitted and retrospective application is required for all periods presented. The adoption of this new guidance is not expected to have a significant impact on our consolidated financial statements.

In December 2023, the FASB issued ASU No. 2023-09, Income Taxes Topic 740, "Income Tax-Improvements to Income Tax Disclosures," which requires enhanced disclosures, including specific categories and disaggregation of information in the effective tax rate reconciliation, disaggregated information related to income taxes paid, income or loss from continuing operations before income tax expense or benefit, and income tax expense or benefit from continuing operations. This guidance is effective for annual reporting periods beginning after December 15, 2024. Early adoption is permitted and should be applied on a prospective basis, however retrospective application is permitted. The Company is currently evaluating the impact of adopting this guidance on its consolidated and condensed financial statements and disclosures included within notes to consolidated and condensed financial statements.

Recent Accounting Pronouncements

In December 2023, the FASB issued ASU 2023-09, "Income Taxes (Topic 740): Improvements to Income Tax Disclosures," which requires disaggregated information about a reporting entity's effective tax rate reconciliation as well as information on income taxes paid. The guidance is effective for the Company's fiscal years beginning after February 1, 2025, with early adoption permitted. The Company does not expect the adoption of this standard to have any material impact on its financial statements.

There have been no other recent accounting pronouncements, changes in accounting pronouncements or recently adopted accounting guidance during the year ended December 31, 2023 that are of significance or potential significance to the Company.

Leases

Leases

We determine if an arrangement is a lease at inception. Operating leases are included in operating lease right-of-use asset ("ROU"), operating lease liability - current, and operating lease liability - noncurrent on the consolidated balance sheets. Finance leases are included in property and equipment, other current liabilities, and other long-term liabilities in our consolidated balance sheets. The Company did not utilize any financing that required recognition of finance leases during the years ended December 31, 2023 and 2022.

ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. As our leases do not provide an implicit rate, we use our incremental borrowing rate based on the estimated rate of interest for collateralized borrowing, over a similar term of the lease payments at commencement date. The operating lease ROU asset also includes any lease payments made and excludes lease incentives. Our lease terms may include options to extend or terminate the lease when it is reasonably certain that we will exercise that option. Lease expense for lease payments is recognized on a straight-line basis over the lease term.

Leases with a lease term of 12 months or less at inception are not recorded on our consolidated balance sheets and are expensed on a straight-line basis over the lease term in our statement of operations. We have lease agreements with lease and non-lease components, which are generally accounted for separately.

The Company determines the present value of minimum future lease payments for operating leases by estimating a rate of interest that it would have to pay to borrow on a collateralized basis over a similar term, an amount equal to the lease payments and a similar economic environment (the "incremental borrowing rate" or "IBR"). The Company determines the appropriate IBR by identifying a reference rate and making adjustments that take into consideration financing options and certain lease-specific circumstances. For the reference rate, the Company used an equity built up, risk adjusted rate, as the implicit interest rate.

Property and Equipment

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Expenditures for maintenance and repairs are charged to expense as incurred; additions, renewals and betterments are capitalized. When property and equipment are retired or otherwise disposed of, the related cost and accumulated depreciation are removed from the respective accounts, and any gain or loss is included in operations. Depreciation of property and equipment is provided using the straight-line method for substantially all assets with estimated lives as follows:

Furniture

Computers and equipment

years ~~5~~ years ~~10~~
Research Equipment

Convertible Notes

Convertible Notes

The Company evaluates its convertible notes for embedded features and bifurcates these features (such as conversion options and redemption options) from their host instruments and accounts for them as free standing derivative financial instruments if certain criteria are met. The criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument.

Impairment of Long-Lived Assets

Impairment of Long-Lived Assets

The Company reviews its long-lived assets for impairment whenever events or changes in business circumstances indicate that the carrying amount of the asset may not be fully recoverable. Recoverability of assets is measured by a comparison of the carrying amount of an asset to the estimated undiscounted cash flows expected to be generated by the asset. If the carrying amount of the asset exceeds its estimated future cash flows, an impairment charge will be recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset. There were no impairments of long-lived assets during the periods presented.

Stock-Based Compensation

Stock-Based Compensation

Compensation cost for stock awards, which include restricted stock units ("RSUs"), is measured at the fair value on the grant date and recognized as expense, over the related service or performance period. The fair value of stock awards is based on the quoted price of our common stock on the grant date. Compensation expense related to the RSUs is reduced by the fair value of the units that are forfeited by employees that leave the Company prior to vesting as they occur. Compensation cost for RSUs are recognized using the straight-line method over the requisite service period.

Income Taxes

Income Taxes

The Company accounts for income taxes in accordance with ASC Topic 740. ASC 740 requires a company to use the asset and liability method of accounting for income taxes, whereby deferred tax assets are recognized for deductible temporary differences, and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, the Company does not foresee generating taxable income in the near future and utilizing its deferred tax asset, therefore, it is more likely than not that some portion, or all of, the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws

Income Taxes

and rates on the date of enactment. Under ASC 740, a tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded. The Company has no material uncertain tax positions for any of the reporting periods presented.

Segment Information

Segment Information

-

Operating segments are defined as components of an enterprise about which separate and discrete information is available for evaluation by the chief operating decision-maker ("CODM") in deciding how to allocate resources and assess performance. The Company and the Company's CODM, the Company's chief executive officer, evaluates the Company's operations and manages its business as a operating segment. All of the

Company's long-lived assets are held in the United States. **single**

Tabular disclosure of warrants or rights issued. Warrants and rights outstanding are derivative securities that give the holder the right to purchase securities (usually equity) from the issuer at a specific price within a certain time frame. Warrants are often included in a new debt issue to entice investors by a higher return potential. The main difference between warrants and call options is that warrants are issued and guaranteed by the company, whereas options are exchange instruments and are not issued by the company. Also, the lifetime of a warrant is often measured in years, while the lifetime of a typical option is measured in months. Disclose the title of issue of securities called for by warrants and rights outstanding, the aggregate amount of securities called for by warrants and rights outstanding, the date from which the warrants or rights are exercisable, and the price at which the warrant or right is exercisable.

August 2022 Notes [Member] Share-Based Compensation Arrangement by Share-Based Payment Award [Line Items] Schedule of Derivative Issuance Valuation Inputs

in connection with the issuance of the August 2022 Promissory Note, the Company identified an accelerated repayment upon IPO feature that required bifurcation. We classified this derivative liability as a Level 3 fair value measurement and used a probability weighted scenario model to estimate the fair value of the derivative just prior to the settlement of the August 2022 Promissory Notes. Key inputs for this valuation model are summarized below:

August

Restatement of Previously Issued Financial Statements (Tables) 12 Months Ended
Dec. 31, 2023
Accounting Changes and Error Corrections [Abstract] Schedule of Error Corrections
And Prior Period Adjustments

The impact of the errors described above also impact the Company's Annual Report on Form 10-K for the years ended December 31, 2023 and December 31, 2022 within additional paid-in capital and accumulated deficit, resulting in the preparation and filing of this Annual Report on Form 10-K/A.

Consolidated Balance Sheet as of December 31, 2023:	As Reported	::	Adjustment	::	As Restated	:
Additional paid-in capital	19,543,363	::	9,945,692	::	29,489,055	:
Accumulated deficit	(15,487,612)	::	(9,945,692)	::	(25,433,304)	:

The following tables summarize the effect of the restatement on each financial statement line item as of the dates indicated:

Consolidated Balance Sheet as of December 31, 2022	As Reported	Adjustment	As Restated
Additional paid-in capital	16,572,741	9,945,692(1)	26,518,433
Accumulated deficit	(8,894,889)	(9,945,692)	(18,840,581)
		(2)

+ Details

Name:us-gaap_CashAndCashEquivalentsAtCarryingValue Namespace Prefix:us-gaap_
Data Type:xbrli:monetaryItemType Balance Type:debit Period Type:instant

- Definition

Investment in short-term money-market instruments (such as commercial paper, banker's acceptances, repurchase agreements, government securities, certificates of deposit, and so forth) which are highly liquid (that is, readily convertible to known amounts of cash) and so near their maturity that they present an insignificant risk of changes in value because of changes in interest rates. Generally, only investments with original maturities of three months or less qualify as cash equivalents by definition. Original maturity means an original maturity to the entity holding the investment. For example, both a three-month US Treasury bill and a three-year Treasury note purchased three months from maturity qualify as cash equivalents. However, a Treasury note purchased three-years ago does not become a cash equivalent when its remaining maturity is three months.

[Member] Antidilutive Securities Excluded from Computation of Earnings Per Share

[Line Items] —Anti-dilutive securities41,33821,00624,7312,966

—Definition

Securities (including those issuable pursuant to contingent stock agreements) that could potentially dilute basic earnings per share (EPS) or earnings per unit (EPU) in the future that were not included in the computation of diluted EPS or EPU because to do so would increase EPS or EPU amounts or decrease loss per share or unit amounts for the period presented.
