Accordingly, the statements do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation were included. The results of operations for the three and nine months ended September 30, 2024 are not necessarily indicative of the results that may be expected for the year ending DecemberÂ 31, 2024. Certain items in prior periods were reclassified to conform to the current presentation. The accompanying unaudited financial statements should be read in conjunction with the consolidated financial statements and footnotes included in the Annual Report on Form 10-K of Comerica Incorporated and Subsidiaries (the Corporation) for the year ended DecemberÂ 31, 2023 (2023 Annual Report).Accounting Pronouncements Recently AdoptedEffective January 1, 2024, the Corporation adopted the provisions of Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) No. 2023-02, "Investments-Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method (a consensus of the Emerging Issues Task Force)" (ASU 2023-02). ASU 2023-02 expanded the permitted use of the proportional amortization method, which was previously only available to low-income housing tax credit investments, to other tax equity investments if certain conditions are met. Under the proportional amortization method, the initial cost of an investment is amortized in proportion to the income tax benefits received and both the amortization of the investment and the income tax benefits received are recognized as a component of income tax expense. ASU 2023-02 was adopted on a modified retrospective basis of transition or, for certain changes, a prospective basis and resulted in a reduction to retained earnings as of January 1, 2024 of $4 million.Recently Issued Accounting PronouncementsIn November 2023, the FASB issued ASU No. 2023-07 "Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures" (ASU 2023-07). The update requires enhanced disclosures about significant segment expenses, enhanced interim disclosure requirements, clarification for when multiple segment measures of profit or loss can be disclosed and other requirements intended to improve overall reportable segment disclosures in annual and interim periods. ASU 2023-07 is effective for the Corporation in the annual period beginning on January 1, 2024 and interim periods beginning on January 1, 2025 with retrospective application to all prior periods presented. Early adoption is permitted. The Corporation will provide the enhanced disclosures, including expanded expense categories by segment, beginning with the Annual Report on Form 10-K for the year ended December 31, 2024.In December 2023, the FASB issued ASU No. 2023-09 "Income Taxes (Topic 740): Improvements to Income Tax Disclosures" (ASU 2023-09). ASU 2023-09 requires additional annual disclosures including further disaggregation of information in the rate reconciliation, additional information for reconciling items meeting a quantitative threshold, further disaggregation of income taxes paid and other required disclosures. ASU 2023-09 is effective for the Corporation in the annual period beginning on January 1, 2025 and applied on a prospective basis with both early adoption and retrospective application permitted. The Corporation is evaluating the impact of ASU 2023-09 on its income tax disclosures. NOTE 2 â€“ FAIR VALUE MEASUREMENTSThe Corporation utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. The determination of fair values of financial instruments often requires the use of estimates. In cases where quoted market values in an active market are not available, the Corporation uses present value techniques and other valuation methods to estimate the fair values of its financial instruments. These valuation methods require considerable judgment and the resulting estimates of fair value can be significantly affected by the assumptions made and methods used.Investment securities available-for-sale, derivatives, deferred compensation plans and equity securities with readily determinable fair values (primarily money market mutual funds) are recorded at fair value on a recurring basis. Additionally, from time to time, the Corporation may be required to record other assets and liabilities at fair value on a nonrecurring basis, such as impaired loans, loans held for sale, other real estate (primarily foreclosed property), nonmarketable equity securities and certain other assets and liabilities. These nonrecurring fair value adjustments typically involve write-downs of individual assets or application of lower of cost or fair value accounting.5Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and SubsidiariesRefer to Note 1 to the consolidated financial statements in the Corporation's 2023 Annual Report for further information about the fair value hierarchy, descriptions of the valuation methodologies and key inputs used to measure financial assets and liabilities recorded at fair value, as well as a description of the methods and significant assumptions used to estimate fair value disclosures for financial instruments not recorded at fair value in their entirety on a recurring basis.Assets and Liabilities Recorded at Fair Value on a Recurring BasisThe following tables present the recorded amount of assets and liabilities measured at fair value on a recurring basis as of SeptemberÂ 30, 2024 and DecemberÂ 31, 2023.(in millions)TotalLevelÂ 1LevelÂ 2LevelÂ 3September 30, 2024Deferred compensation plan assets$91Â $91Â $â€”Â $â€”Â Equity securities47Â 47Â â€”Â â€”Â Investment securities available-for-sale:U.S. Treasury securities1,169Â 1,169Â â€”Â â€”Â Residential mortgage-backed securities (a)9,825Â â€”Â 9,825Â â€”Â Commercial mortgage-backed securities (a)4,892Â â€”Â 4,892Â â€”Â Total investment securities available-for-sale15,886Â 1,169Â 14,717Â â€”Â Derivative assets:Interest rate contracts197Â â€”Â 197Â â€”Â Energy contracts593Â â€”Â 593Â â€”Â Foreign exchange contracts42Â â€”Â 42Â â€”Â Total derivative assets832Â â€”Â 832Â â€”Â Total assets at fair value$16,856Â $1,307Â $15,549Â $â€”Â Derivative liabilities:Interest rate contracts$340Â $â€”Â $340Â $â€”Â Energy contracts572Â â€”Â 572Â â€”Â Foreign exchange contracts37Â â€”Â 37Â â€”Â Other financial derivative liabilities11Â â€”Â â€”Â 11Â Total derivative liabilities960Â â€”Â 949Â 11Â Deferred compensation plan liabilities91Â 91Â â€”Â â€”Â Total liabilities at fair value$1,051Â $91Â $949Â $11Â December 31, 2023Deferred compensation plan assets$104Â $104Â $â€”Â $â€”Â Equity securities39Â 39Â â€”Â â€”Â Investment securities available-for-sale:U.S. Treasury securities1,605Â 1,605Â â€”Â â€”Â Residential mortgage-backed securities (a)10,519Â â€”Â 10,519Â â€”Â Commercial mortgage-backed securities (a)4,745Â â€”Â 4,745Â â€”Â Total investment securities available-for-sale16,869Â 1,605Â 15,264Â â€”Â Derivative assets:Interest rate contracts225Â â€”Â 225Â â€”Â Energy contracts758Â â€”Â 758Â â€”Â Foreign exchange contracts36Â â€”Â 36Â â€”Â Total derivative assets1,019Â â€”Â 1,019Â â€”Â Total assets at fair value$18,031Â $1,748Â $16,283Â $â€”Â Derivative liabilities:Interest rate contracts$435Â $â€”Â $435Â $â€”Â Energy contracts736Â â€”Â 736Â â€”Â Foreign exchange contracts35Â â€”Â 35Â â€”Â Other financial derivative liabilities12Â â€”Â â€”Â 12Â Total derivative liabilities1,218Â â€”Â 1,206Â 12Â Deferred compensation plan liabilities104Â 104Â â€”Â â€”Â Total liabilities at fair value$1,322Â $104Â $1,206Â $12Â (a)Issued and/or guaranteed by U.S. government agencies or U.S. government-sponsored enterprises.6Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and SubsidiariesÂ Â Â Â There were no transfers of assets or liabilities recorded at fair value on a recurring basis into or out of Level 3 fair value measurements during the three- and nine-month periods ended September 30, 2024 and 2023.The following table summarizes the changes in Level 3 assets and liabilities measured at fair value on a recurring basis for the three- and nine-month periods ended September 30, 2024 and 2023.Net Realized/Unrealized Gains (Losses) (Pretax) Recorded in Earnings (a)(in millions)BalanceÂ at Beginning of PeriodRealizedUnrealizedBalanceÂ at End of PeriodThree Months Ended September 30, 2024Derivative liabilities:Other financial derivative liabilities(6)â€”Â (5)(11)Three Months Ended September 30, 2023Derivative liabilities:Other financial derivative liabilities(14)â€”Â 1Â (13)Nine Months Ended September 30, 2024Derivative liabilities:Other financial derivative liabilities(12)6Â (5)(11)Nine Months Ended September 30, 2023Derivative liabilities:Other financial derivative liabilities(12)â€”Â (1)(13)(a)Realized and unrealized gains and losses due to changes in fair value are recorded in other noninterest income on the Consolidated Statements of Comprehensive Income.Assets and Liabilities Recorded at Fair Value on a Nonrecurring BasisThe Corporation may be required to record certain assets and liabilities at fair value on a nonrecurring basis. The unobservable inputs were the additional adjustments applied by management to the appraised values to reflect such factors as non-current appraisals and revisions to estimated time to sell. These adjustments are determined based on qualitative judgments made by management on a case-by-case basis and are not observable inputs, although they are used in the determination of fair value. At SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, loans held-for-sale classified as Level 3 represented loans held-for-sale in less liquid markets requiring significant management assumptions when determining fair value.8Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and SubsidiariesEstimated Fair Values of Financial Instruments Not Recorded at Fair Value on a Recurring BasisThe Corporation typically holds the majority of its financial instruments until maturity and thus does not expect to realize many of the estimated fair value amounts disclosed. The disclosures do not include estimated fair value amounts for items that are not defined as financial instruments, but which have significant value. These include such items as core deposit intangibles, the future earnings potential of significant customer relationships and the value of trust operations and other fee generating businesses. The Corporation believes the imprecision of an estimate could be significant. The disclosures also do not include a limited amount of nonmarketable equity securities (primarily indirect private equity and venture capital investments) that do not have a readily determinable fair value and whose fair values are based on net asset value. The Corporationâ€™s portfolio is comprised of securities issued or guaranteed by U.S. government agencies or government-sponsored enterprises. As such, it is expected that the securities would not be settled at a price less than the amortized cost of the investments. Further, the Corporation does not intend to sell the investments, and it is not more-likely-than-not that it will be required to sell the investments before recovery of amortized costs. No allowance for credit losses was recorded on securities in an unrealized loss position at SeptemberÂ 30, 2024 or DecemberÂ 31, 2023.Interest receivable on investment securities totaled $36 million at SeptemberÂ 30, 2024 and $40 million at DecemberÂ 31, 2023 and was included in accrued income and other assets on the Consolidated Balance Sheets. The investment securities portfolio included floating-rate securities with a fair value of $3 million and $4 million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively.There were no sales, calls or write-downs of investment securities available-for-sale during the three- and nine-month periods ended September 30, 2024 or SeptemberÂ 30, 2023. 10Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and SubsidiariesThe following table summarizes the amortized cost and fair values of investment securities by contractual maturity. Securities with multiple maturity dates are classified in the period of final maturity. The actual cash flows of mortgage-backed securities may differ as borrowers of the underlying loans may exercise prepayment options. (b)Includes loans with an internal rating of special mention, substandard loans for which the accrual of interest has not been discontinued and nonaccrual loans. Special mention loans have potential credit weaknesses that deserve managementâ€™s close attention, such as loans to borrowers who may be experiencing financial difficulties that may result in deterioration of repayment prospects from the borrower at some future date. Accruing substandard loans have a well-defined weakness, or weaknesses, such as loans to borrowers who may be experiencing losses from operations or inadequate liquidity of a degree and duration that jeopardizes the orderly repayment of the loan. Substandard loans are also distinguished by the distinct possibility of loss in the future if these weaknesses are not corrected. Nonaccrual loans are loans for which the accrual of interest has been discontinued. For further information regarding nonaccrual loans, refer to the Nonperforming Assets subheading in Note 1 - Basis of Presentation and Accounting Policies on page F-52 in the Corporation's 2023 Annual Report. These categories are generally consistent with the "special mention" and "substandard" categories as defined by regulatory authorities. A minority of nonaccrual loans are consistent with the "doubtful" category.14Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and SubsidiariesLoan interest receivable totaled $277 million and $313 million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively, and was included in accrued income and other assets on the Consolidated Balance Sheets.Allowance for Credit LossesThe following table details the changes in the allowance for credit losses.Â 20242023(in millions)Business LoansRetail LoansTotalBusiness LoansRetail LoansTotalThree Months Ended September 30Balance at beginning of period:Allowance for loan losses$620Â $66Â $686Â $614Â $70Â $684Â Allowance for credit losses on lending-related commitments23Â 8Â 31Â 34Â 10Â 44Â Allowance for credit losses643Â 74Â 717Â 648Â 80Â 728Â Loan charge-offs(23)â€“Â (23)(13)(1)(14)Recoveries on loans previously charged-off12Â â€“Â 12Â 7Â 1Â 8Â Net loan charge-offs(11)â€“Â (11)(6)â€“Â (6)Provision for credit losses:Provision for loan losses9Â 2Â 11Â 18Â (2)16Â Provision for credit losses on lending-related commitments3Â â€“Â 3Â (1)(1)(2)Provision for credit losses12Â 2Â 14Â 17Â (3)14Â Balance at end of period:Allowance for loan losses618Â 68Â 686Â 626Â 68Â 694Â Allowance for credit losses on lending-related commitments26Â 8Â 34Â 33Â 9Â 42Â Allowance for credit losses$644Â $76Â $720Â $659Â $77Â $736Â Nine Months Ended September 30Balance at beginning of periodAllowance for loan losses$620Â $68Â $688Â $541Â $69Â $610Â Allowance for credit losses on lending-related commitments31Â 9Â 40Â 40Â 11Â 51Â Allowance for credit losses651Â 77Â 728Â 581Â 80Â 661Â Loan charge-offs(71)(1)(72)(34)(3)(37)Recoveries on loans previously charged-off34Â 2Â 36Â 33Â 2Â 35Â Net loan (charge-offs) recoveries(37)1Â (36)(1)(1)(2)Provision for credit losses:Provision for loan losses35Â (1)34Â 86Â â€“Â 86Â Provision for credit losses on lending-related commitments(5)(1)(6)(7)(2)(9)Provision for credit losses30Â (2)28Â 79Â (2)77Â Balance at end of period:Allowance for loan losses618Â 68Â 686Â 626Â 68Â 694Â Allowance for credit losses on lending-related commitments26Â 8Â 34Â 33Â 9Â 42Â Allowance for credit losses$644Â $76Â $720Â $659Â $77Â $736Â Allowance for loan losses as a percentage of total loans1.33Â %1.63Â %1.36Â %1.27Â %1.62Â %1.30Â %Allowance for credit losses as a percentage of total loans1.39Â 1.83Â 1.43Â 1.34Â 1.84Â 1.38Â 15Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and SubsidiariesNonaccrual LoansThe following table presents additional information regarding nonaccrual loans. (a)Primarily loans secured by owner-occupied real estate.(b)Primarily loans to real estate developers. On an ongoing basis, the Corporation monitors the performance of modified loans related to their restructured terms. Loans restructured during the three- and nine-month periods ended September 30, 2024 and 2023 were current under modified terms at SeptemberÂ 30, 2024 and SeptemberÂ 30, 2023. Nonperforming restructured loans are classified as nonaccrual loans and are individually evaluated for the allowance for loan losses.For restructured loans, a subsequent payment default is defined in terms of delinquency, when a principal or interest payment is 90 days past due or classified into nonaccrual status during the reporting period. Of the loans restructured during the nine-month period ended September 30, 2024, there were $7 million of commercial loans that subsequently defaulted. There were no subsequent defaults on loans restructured during the three-month period ended September 30, 2024 and three- and nine-month periods ended September 30, 2023.20Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and SubsidiariesNOTE 5 - GOODWILL AND INTANGIBLESThe following table summarizes the carrying value of goodwill by reporting unit at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023.(in millions)September 30, 2024December 31, 2023Commercial Bank$473Â $473Â Retail Bank101Â 101Â Wealth Management61Â 61Â Total$635Â $635Â The annual test of goodwill impairment was performed as of the beginning of the third quarter 2024. The Corporation first assessed qualitative factors to determine whether it was more likely than not that the fair value of any reporting unit was less than its carrying amount, including goodwill. Qualitative factors included economic conditions, industry and market considerations, cost factors, overall financial performance and performance of the Corporation's stock, among other events and circumstances. At the conclusion of the qualitative assessment in third quarter 2024, the Corporation determined that it was more likely than not that the fair value of each reporting unit exceeded its carrying value.Analyzing goodwill includes consideration of various factors that involve a degree of uncertainty, including the impacts of monetary policy actions, foreign developments, and unanticipated legislative or regulatory changes, among other factors that could cause the fair value of one or more of the reporting units to fall below their carrying value, resulting in a goodwill impairment charge in the future. Any impairment charge would not affect the Corporation's regulatory capital ratios, tangible equity ratio or liquidity position.NOTE 6 â€”DERIVATIVES AND CREDIT-RELATED FINANCIAL INSTRUMENTSIn the normal course of business, the Corporation enters into various transactions involving derivative and credit-related financial instruments to manage exposure to fluctuations in interest rate, foreign currency and other market risks and to meet the financing needs of customers (customer-initiated derivatives). These financial instruments involve, to varying degrees, elements of market and credit risk. Market and credit risk are included in the determination of fair value.Market risk is the potential loss that may result from movements in interest rates, foreign currency exchange rates or energy commodity prices that cause an unfavorable change in the value of a financial instrument. The Corporation manages this risk by establishing monetary exposure limits and monitoring compliance with those limits. Market risk inherent in interest rate and energy contracts entered into on behalf of customers is mitigated by taking offsetting positions, except in those circumstances when the amount, tenor and/or contract rate level results in negligible economic risk, whereby the cost of purchasing an offsetting contract is not economically justifiable. The Corporation mitigates most of the inherent market risk in foreign exchange contracts entered into on behalf of customers by taking offsetting positions and manages the remainder through individual foreign currency position limits and aggregate value-at-risk limits. Position and value-at-risk limits are established annually and monitored daily. Market risk inherent in derivative instruments held or issued for risk management purposes is typically offset by changes in the fair value of the assets or liabilities being hedged.Credit risk is the possible loss that may occur in the event of nonperformance by the counterparty to a financial instrument. The Corporation attempts to minimize credit risk arising from customer-initiated derivatives by evaluating the creditworthiness of each customer, adhering to the same credit approval process used for traditional lending activities and obtaining collateral as deemed necessary. Derivatives with dealer counterparties are either cleared through a clearinghouse or settled directly with a single counterparty. For derivatives settled directly with dealer counterparties, the Corporation utilizes counterparty risk limits and monitoring procedures as well as master netting arrangements and bilateral collateral agreements to facilitate the management of credit risk.Included in the fair value of derivative instruments are credit valuation adjustments reflecting counterparty credit risk. These adjustments are determined by applying a credit spread for the counterparty or the Corporation, as appropriate, to the total expected exposure of the derivative. Master netting arrangements effectively reduce credit valuation adjustments by permitting settlement of positive and negative positions and offset cash collateral held with the same counterparty on a net basis. Bilateral collateral agreements require daily exchange of cash or highly rated securities issued by the U.S. Treasury or other U.S. government entities to collateralize amounts due to either party. At SeptemberÂ 30, 2024, counterparties with bilateral collateral agreements deposited $59 million of cash with the Corporation to secure the fair value of contracts in an unrealized gain position, and the Corporation had pledged $4 million of marketable investment securities and posted $5 million of cash as collateral for contracts in an unrealized loss position. For those counterparties not covered under bilateral collateral agreements, 21Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and Subsidiariescollateral is obtained, if deemed necessary, based on the results of managementâ€™s credit evaluation of the counterparty. Collateral varies, but may include cash, investment securities, accounts receivable, equipment or real estate. Derivative InstrumentsDerivative instruments utilized by the Corporation are negotiated over-the-counter and primarily include swaps, caps and floors, forward contracts and options, each of which may relate to interest rates, energy commodity prices or foreign currency exchange rates. Swaps are agreements in which two parties periodically exchange cash payments based on specified indices applied to a specified notional amount until a stated maturity. Caps and floors are agreements which entitle the buyer to receive cash payments based on the difference between a specified reference rate or price and an agreed strike rate or price, applied to a specified notional amount until a stated maturity. Forward contracts are over-the-counter agreements to buy or sell an asset at a specified future date and price. Options are similar to forward contracts except the purchaser has the right, but not the obligation, to buy or sell the asset during a specified period or at a specified future date.Over-the-counter contracts are tailored to meet the needs of the counterparties involved and, therefore, contain a greater degree of credit risk and liquidity risk than exchange-traded contracts, which have standardized terms and readily available price information. The Corporation reduces exposure to market and liquidity risks from over-the-counter derivative instruments entered into for risk management purposes, and transactions entered into to mitigate the market risk associated with customer-initiated transactions, by taking offsetting positions with investment grade domestic and foreign financial institutions and subjecting counterparties to credit approvals, limits and collateral monitoring procedures similar to those used in making other extensions of credit. In addition, certain derivative contracts executed bilaterally with a dealer counterparty in the over-the-counter market are cleared through a clearinghouse, whereby the clearinghouse becomes the counterparty to the transaction.22Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and SubsidiariesThe following table presents the composition of the Corporationâ€™s derivative instruments held or issued for risk management purposes or in connection with customer-initiated and other activities at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023. For each de-designated swap, settlement of interest payments and changes in fair value were recorded as risk management hedging losses within noninterest income instead of net interest income until re-designation. As all impacted swaps were re-designated as of April 1, 2024, there was no impact to noninterest income for the three-month periods ended SeptemberÂ 30, 2024 and JuneÂ 30, 2024. A total of $130Â million in net losses were included in noninterest income as a result of the de-designations, consisting of $39Â million during the first quarter 2024 and $91Â million during the fourth quarter 2023.Amounts in accumulated other comprehensive income related to cash flows that continued to be probable of occurring were amortized out of accumulated other comprehensive income and into earnings, which resulted in pre-tax losses of $52Â million recorded in interest and fees on loans during both three-month periods ended SeptemberÂ 30, 2024 and JuneÂ 30, 2024. Additionally, the fair value of swaps at re-designation date were accreted back into accumulated other comprehensive income, resulting in benefits of $43Â million for the three months ended September 30, 2024 and $49 million for the three months ended June 30, 2024. The amortization of probable cash flows and fair value accretion resulted in net losses of $9 million and $3 million included in net interest income for the three months ended September 30, 2024 and JuneÂ 30, 2024, respectively. BSBY cessation and the related de-designation and re-designation of interest rate swaps led to net increases in accumulated other comprehensive income of $7 million and $2 million for the three months ended September 30, 2024 and JuneÂ 30, 2024, respectively.For more information on accumulated net losses on cash flow hedges, refer to Note 9.Risk management hedging income (loss) also includes price alignment income, which is income received on payments made to a central clearing party for centrally cleared derivatives. Positions are settled daily based on derivative fair values and the party receiving net settlement amounts pays price alignment, based on an earning rate, to the party making settlement payments. Price alignment income totaled $8 million and $17 million for the three-month periods ended September 30, 2024 and 2023, respectively, and $38 million and $32 million for the nine-month periods ended September 30, 2024 and 2023.Customer-Initiated and OtherThe Corporation enters into derivative transactions at the request of customers and generally takes offsetting positions with dealer counterparties to help mitigate the inherent market risk. Income primarily results from the spread between the customer derivative and the offsetting dealer position.For customer-initiated foreign exchange contracts where offsetting positions have not been taken, the Corporation manages the remaining inherent market risk through individual foreign currency position limits and aggregate value-at-risk limits. Position and value-at-risk limits are established annually and monitored daily. For foreign exchange derivative contracts which were not offset or where the Corporation holds a position within the limits described above, the Corporation did not recognize any net gains or losses for the three months ended September 30, 2024 and 2023. The Corporation did not recognize any gains or loss for the nine months ended September 30, 2024, compared to a net loss of $1 million for the nine months ended September 30, 2023.25Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and SubsidiariesFair values of customer-initiated and other derivative instruments represent the net unrealized gains or losses on such contracts and are recorded on the Consolidated Balance Sheets. Changes in fair value are recognized on the Consolidated Statements of Comprehensive Income. The allowance for credit losses on lending-related commitments, included in accrued expenses and other liabilities on the Consolidated Balance Sheets, was $34 million and $40 million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively.Unused Commitments to Extend CreditCommitments to extend credit are legally binding agreements to lend to a customer, provided there is no violation of any condition established in the contract. These commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many commitments expire without being drawn upon, the total contractual amount of commitments does not necessarily represent future cash requirements of the

Corporation. Commercial and other unused commitments are primarily variable rate commitments. The allowance for credit losses on lending-related commitments included $31 million at SeptemberÂ 30, 2024 and $38 million at DecemberÂ 31, 2023 for expected credit losses inherent in the Corporationâ€™s unused commitments to extend credit.Standby and Commercial Letters of CreditStandby letters of credit represent conditional obligations of the Corporation which guarantee the performance of a customer to a third party. Standby letters of credit are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing and similar transactions. Commercial letters of credit are issued to finance foreign or domestic trade transactions. These contracts expire in decreasing amounts through the year. The Corporation may enter into participation arrangements with third parties that effectively reduce the maximum amount of future payments which may be required under standby and commercial letters of credit. These risk participations covered $73 million and $85 million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively, of the $3.8 billion and $3.6Â billion of standby and commercial letters of credit outstanding at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively.The carrying value of the Corporationâ€™s standby and commercial letters of credit, included in accrued expenses and other liabilities on the Consolidated Balance Sheets, totaled $35 million at SeptemberÂ 30, 2024, including $32 million in deferred fees and $3 million in the allowance for credit losses on lending-related commitments. At DecemberÂ 31, 2023, the comparable amounts were $34 million, $32 million and $2 million, respectively.The following table presents a summary of criticized standby and commercial letters of credit at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023. The Corporation's criticized list is consistent with the Special Mention, Substandard and Doubtful 26Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and Subsidiariescategories defined by regulatory authorities. The Corporation manages credit risk through underwriting, periodically reviewing and approving its credit exposures using Board committee approved credit policies and guidelines.(dollar amounts in millions)September 30, 2024December 31, 2023Total criticized standby and commercial letters of credit$45Â $50Â As a percentage of total outstanding standby and commercial letters of credit1.2Â %1.4Â %Other Credit-Related Financial InstrumentsThe Corporation enters into credit risk participation agreements, under which the Corporation assumes credit exposure associated with a borrowerâ€™s performance related to certain interest rate derivative contracts. The Corporation is not a party to the interest rate derivative contracts and only enters into these credit risk participation agreements in instances in which the Corporation is also a party to the related loan participation agreements for such borrowers. The Corporation manages its credit risk on the credit risk participation agreements by monitoring the creditworthiness of the borrowers, which is based on the normal credit review process as if the Corporation had entered into the derivative instruments directly with the borrower. The notional amount of such credit risk participation agreements reflects the pro-rata share of the derivative instrument, consistent with its share of the related participated loan. The total notional amount of the credit risk participation agreements was approximately $1.0 billion at both SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, and the fair value was insignificant at both SeptemberÂ 30, 2024 and DecemberÂ 31, 2023. The maximum estimated exposure to these agreements, as measured by projecting a maximum value of the guaranteed derivative instruments, assuming 100 percent default by all obligors on the maximum values, was $8Â million and $2Â million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively. In the event of default, the lead bank has the ability to liquidate the assets of the borrower, in which case the lead bank would be required to return a percentage of the recouped assets to the participating banks. As of SeptemberÂ 30, 2024, the weighted average remaining maturity of outstanding credit risk participation agreements was 4.6 years.In 2008, the Corporation sold its remaining ownership of Visa Class B shares and entered into a derivative contract. Under the terms of the derivative contract, the Corporation will compensate the counterparty primarily for dilutive adjustments made to the conversion factor of the Visa Class B shares to Class A shares based on the ultimate outcome of litigation involving Visa. Conversely, the Corporation will be compensated by the counterparty for any increase in the conversion factor from anti-dilutive adjustments. The fair value of the derivative liability, included in accrued expenses and other liabilities on the Consolidated Balance Sheets, was $11Â million and $12Â million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively.NOTE 7 - VARIABLE INTEREST ENTITIES (VIEs)The Corporation evaluates its interest in certain entities to determine if these entities meet the definition of a VIE and whether the Corporation is the primary beneficiary and should consolidate the entity based on the variable interests it held both at inception and when there is a change in circumstances that requires a reconsideration. The Corporation holds ownership interests in funds in the form of limited partnerships or limited liability companies (LLCs) investing in affordable housing projects that qualify for the low-income housing tax credit (LIHTC). The Corporation also directly invests in limited partnerships and LLCs which invest in community development projects, which generate similar tax credits to investors (other tax credit entities). As an investor, the Corporation obtains income tax credits and deductions from the operating losses of these tax credit entities. These tax credit entities meet the definition of a VIE; however, the Corporation is not the primary beneficiary of the entities, as the general partner or the managing member has both the power to direct the activities that most significantly impact the economic performance of the entities and the obligation to absorb losses or the right to receive benefits that could be significant to the entities.The Corporation accounts for its interests in LIHTC entities and, upon adoption of ASU 2023-02 as discussed in Note 1, other tax credit entities that meet certain criteria using the proportional amortization method. Ownership interests in tax credit entities that do not qualify for the proportional amortization method are accounted for under either the cost or equity method. Exposure to loss as a result of the Corporation's involvement in entities using the proportional amortization method and other tax credit entities at SeptemberÂ 30, 2024 was limited to $579 million and $1 million, respectively. Investment balances, including all legally binding commitments to fund future investments that are accounted for using the proportional amortization method, are included in accrued income and other assets on the Consolidated Balance Sheets. A liability is recognized in accrued expenses and other liabilities on the Consolidated Balance Sheets for all legally binding unfunded commitments to fund tax credit entities that are accounted for using the proportional amortization method ($255 million at SeptemberÂ 30, 2024). Amortization and other write-downs of tax credit investments for which the proportional amortization method is applied are presented on a net basis as a component of the provision for income taxes on the Consolidated Statements of Comprehensive Income, while amortization and write-downs of other tax credit investments are 27Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and Subsidiariesrecorded in other noninterest income. The income tax credits and deductions are recorded as a reduction of income tax expense and a reduction of federal income taxes payable. The cash flows related to the total income tax benefits are presented in the "net income," "benefit for deferred income taxes" and "other, net" line items within the operating activities section of the Consolidated Statements of Cash Flows.The Corporation provided no financial or other support that was not contractually required to any of the above VIEs during the nine months ended September 30, 2024 and 2023.The following table summarizes the impact of these tax credit investments under the proportional amortization method on the Corporationâ€™s Consolidated Statements of Comprehensive Income.Three Months Ended September 30,Nine Months Ended September 30,(in millions)20242024Provision for income taxes:Amortization of investments$16Â $55Â Tax credits(17)(55)Other income tax benefits related to tax credit entities(3)(11)Total provision for income taxes(4)(11)Prior to the adoption of ASU 2023-02, only LIHTC investments qualified for the proportional amortization method of accounting. Borrowing capacity is contingent on the amount of collateral available to be pledged to the FHLB. At SeptemberÂ 30, 2024, FHLB borrowings were $4.0Â billion, with remaining capacity for future borrowing of $13.3 billion, secured by real estate-related loans and investment securities collateral. The Corporation does not anticipate any final settlements of federal or state tax issues to result in a change of net unrecognized tax benefits within the next twelve months. The liability for tax-related interest and penalties, included in accrued expenses and other liabilities on the Consolidated Balance Sheets, was less than $1 million at both SeptemberÂ 30, 2024 and DecemberÂ 31, 2023. 32Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and SubsidiariesNet deferred tax assets were $789Â million at SeptemberÂ 30, 2024, compared to $1.0 billion at DecemberÂ 31, 2023. The decrease of approximately $206Â million in net deferred tax assets resulted primarily from decreases to deferred tax assets related to hedging gains and losses, net unrealized losses on investment securities available-for-sale and an increase in deferred tax liabilities related to defined benefit plans. Included in deferred tax assets at SeptemberÂ 30, 2024 were $2 million of state net operating loss (NOL) carryforwards and $6Â million of federal foreign tax carryforwards, compared to $2 million and $5Â million at DecemberÂ 31, 2023, respectively. State NOL carryforwards expire between 2024 and 2042 and federal foreign tax credit carryforwards expire between 2028 and 2034. The Corporation believes that it is more likely than not that the benefit from federal foreign tax credits and certain state NOL carryforwards will not be realized and, accordingly, maintained a federal valuation allowance of $6Â million at SeptemberÂ 30, 2024, compared to $5Â million at DecemberÂ 31, 2023. The Corporation maintained a state valuation allowance of $1 million at both SeptemberÂ 30, 2024 and DecemberÂ 31, 2023. The determination regarding valuation allowance was based on evidence of loss carryback capacity, projected future reversals of existing taxable temporary differences to absorb the deferred tax assets and assumptions made regarding future events. In the ordinary course of business, the Corporation enters into certain transactions that have tax consequences. From time to time, the Internal Revenue Service (IRS) or other tax jurisdictions may review and/or challenge specific interpretive tax positions taken by the Corporation with respect to those transactions. The Corporation believes its tax returns were filed based upon applicable statutes, regulations and case law in effect at the time of the transactions. The IRS or other tax jurisdictions, an administrative authority or a court, if presented with the transactions, could disagree with the Corporationâ€™s interpretation of the tax law.Based on current knowledge and probability assessment of various potential outcomes, the Corporation believes that current tax reserves are adequate, and the amount of any potential incremental liability arising is not expected to have a material adverse effect on the Corporationâ€™s consolidated financial condition or results of operations. Probabilities and outcomes are reviewed as events unfold, and adjustments to the reserves are made when necessary.NOTE 13 - CONTINGENT LIABILITIESLegal Proceedings and Regulatory MattersThe Corporation is subject to various pending or threatened legal proceedings arising out of the normal course of business or operations. Use of the term "Corporation" in this note should not be read to infer that Comerica, Incorporated or any of its subsidiaries that is not named in any legal or regulatory proceeding undertakes any responsibility or liability for any other affiliate that is actually named in any legal or regulatory proceeding. The Corporation believes it has meritorious defenses to the claims asserted against it in its currently outstanding legal proceedings and, with respect to such legal proceedings, intends to continue to defend itself vigorously, litigating or settling cases according to managementâ€™s judgment as to what is in the best interests of the Corporation and its shareholders. Settlement

may result from the Corporation's determination that it may be more prudent financially to settle, rather than litigate, and should not be regarded as an admission of liability. Further, from time to time, the Corporation is also subject to examinations, inquiries and investigations by regulatory authorities in areas including, but not limited to, compliance, risk management and consumer protection, which could lead to administrative or legal proceedings or settlements. For example, the Consumer Financial Protection Bureau (CFPB) is investigating certain of the Corporation's practices, and the Corporation has responded and continues to respond to the CFPB. The Corporation is unable to predict the outcome of these discussions at this time. Remedies in these proceedings or settlements may include fines, penalties, restitution or alterations in the Corporation's business practices and may result in increased operating expenses or decreased revenues. On at least a quarterly basis, the Corporation assesses its potential liabilities and contingencies in connection with outstanding legal proceedings and regulatory matters utilizing the latest information available. On a case-by-case basis, accruals are established for those legal claims and regulatory matters for which it is probable that a loss will be incurred and the amount of such loss can be reasonably estimated. The actual costs of resolving these claims and regulatory matters may be substantially higher or lower than the amounts accrued. Based on current knowledge, and after consultation with legal counsel, management believes current accruals are adequate, and the amount of any incremental liability arising from these matters is not expected to have a material adverse effect on the Corporationâ€™s consolidated financial condition, results of operations or cash flows. 33Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and SubsidiariesFor matters where a loss is not probable, the Corporation has not established an accrual. The Corporation believes the estimate of the aggregate range of reasonably possible losses, in excess of established accruals, for all legal proceedings and regulatory matters in which it is involved is from zero to approximately $172 million at SeptemberÂ 30, 2024. This estimated aggregate range of reasonably possible losses is based upon currently available information for those legal proceedings and regulatory matters in which the Corporation is involved, taking into account the Corporationâ€™s best estimate of such losses for those legal proceedings and regulatory matters for which such estimate can be made. For certain legal proceedings and regulatory matters, the Corporation does not believe that an estimate can currently be made. The Corporationâ€™s estimate involves significant judgment, given the varying stages of the legal proceedings and regulatory matters (including the fact that many are currently in preliminary stages), the existence in certain legal proceedings of multiple defendants (including the Corporation) whose share of liability has yet to be determined, the numerous yet-unresolved issues in many of the legal proceedings and regulatory matters (including issues regarding class certification and the scope of many of the claims) and the attendant uncertainty of the various potential outcomes of such legal proceedings and regulatory matters. Accordingly, the Corporationâ€™s estimate will change from time to time, and actual losses may be more or less than the current estimate.In the event of unexpected future developments, it is possible the ultimate resolution of these matters, if unfavorable, may be material to the Corporation's consolidated financial condition, results of operations or cash flows.For information regarding income tax contingencies, refer to Note 12.NOTE 14 - STRATEGIC LINES OF BUSINESSThe Corporation has strategically aligned its operations into three major business segments: the Commercial Bank, the Retail Bank and WealthÂ Management. These business segments are differentiated based on the type of customer and the related products and services provided. In addition to the three major business segments, the Finance Division is also reported as a segment. The Other category includes items not directly associated with the business segments or the Finance segment. Business segment results are produced by the Corporationâ€™s internal management accounting system. This system measures financial results based on the internal business unit structure of the Corporation. The performance of the business segments is not comparable with the Corporation's consolidated results and is not necessarily comparable with similar information for any other financial institution. Additionally, because of the interrelationships of the various segments, the information presented is not indicative of how the segments would perform if they operated as independent entities. The management accounting system assigns balance sheet and income statement items to each business segment using certain methodologies, which are regularly reviewed and refined. From time to time, the Corporation may make reclassifications among the segments to more appropriately reflect management's current view of the segments, and methodologies may be modified as the management accounting system is enhanced and changes occur in the organizational structure and/or product lines. For comparability purposes, amounts in all periods are based on business unit structure and methodologies in effect at SeptemberÂ 30, 2024. The following discussion provides information about the activities of each business segment. A discussion of the financial results and the factors impacting performance can be found in "Business Segments" in the "Strategic Lines of Business" section of the financial review.The Commercial Bank meets the needs of small and middle market businesses, multinational corporations and governmental entities by offering various products and services including commercial loans and lines of credit, deposits, cash management, payment solutions, card services, capital market products, international trade finance and letters of credit.The Retail Bank includes a full range of personal financial services, consisting of consumer lending, consumer deposit gathering and mortgage loan origination. This business segment offers a variety of consumer products including deposit accounts, installment loans, credit cards, home equity lines of credit and residential mortgage loans. In addition, this business segment offers products and services to small businesses who are serviced through a team of dedicated business bankers and our branch network.WealthÂ Management provides products and services to affluent, high-net worth and ultra-high net worth individuals and families, business owners and executives, and institutional clients, including comprehensive financial planning, trust and fiduciary services, investment management and advisory, brokerage, private banking and business transition planning services. The Finance segment includes the Corporationâ€™s securities portfolio and asset and liability management activities. This segment is responsible for managing the Corporationâ€™s funding, liquidity and capital needs, performing interest sensitivity analysis and executing various strategies to manage the Corporationâ€™s exposure to liquidity, interest rate risk and foreign exchange risk.34Table of ContentsNotes to Consolidated Financial Statements (unaudited)Comerica Incorporated and SubsidiariesThe Other category includes tax benefits not assigned to specific business segments, charges of an unusual or infrequent nature that are not reflective of the normal operations of the business segments and miscellaneous other expenses of a corporate nature.For further information on the methodologies which form the basis for these results refer to Note 22 to the consolidated financial statements in In addition, the Corporation may make other written and oral communications from time to time that contain such statements. All statements regarding the Corporation's expected financial position, strategies and growth prospects and general economic conditions expected to exist in the future are forward-looking statements. The words, "anticipates," "believes," "contemplates," "feels," "expects," "estimates," "enhances," "seeks," "strives," "plans," "intends," "outlook," "forecast," "position," "target," "mission," "assume," "achievable," "potential," "strategy," "goal," "aspiration," "opportunity," "initiative," "outcome," "continue," "remain," "maintain," "on track," "trend," "objective," "looks forward," "projects," "models," and variations of such words and similar expressions, or future or conditional verbs such as "will," "would," "should," "could," "might," "can," "may" or similar expressions, as they relate to the Corporation or its management, are intended to identify forward-looking statements. These forward-looking statements are predicated on the beliefs and assumptions of the Corporation's management based on information known to the Corporation's management as of the date of this report and do not purport to speak as of any other date. Forward-looking statements may include descriptions of plans and objectives of the Corporation's management for future or past operations, products or services and forecasts of the Corporation's revenue, earnings or other measures of economic performance, including statements of profitability, business segments and subsidiaries as well as estimates of credit trends and global stability. Such statements reflect the view of the Corporation's management as of this date with respect to future events and are subject to risks and uncertainties. Should one or more of these risks materialize or should underlying beliefs or assumptions prove incorrect, the Corporation's actual results could differ materially from those discussed. Factors that could cause or contribute to such differences include credit risks (changes in customer behavior; unfavorable developments concerning credit quality; and declines or other changes in the businesses or industries of the Corporation's customers); market risks (changes in monetary and fiscal policies; fluctuations in interest rates and their impact on deposit pricing; and transitions away from the Bloomberg Short Term Bank Yield Index towards new interest rate benchmarks); liquidity risks (the Corporation's ability to maintain adequate sources of funding and liquidity; reductions in the Corporation's credit rating; and the interdependence of financial service companies and their soundness); technology risks (cybersecurity risks and heightened legislative and regulatory focus on cybersecurity and data privacy); operational risks (operational, systems or infrastructure failures; reliance on other companies to provide certain key components of business infrastructure; the impact of legal and regulatory proceedings or determinations; losses due to fraud; and controls and procedures failures); compliance risks (changes in regulation or oversight, or changes in the Corporationâ€™s status with respect to existing regulations or oversight; the effects of stringent capital requirements; and the impacts of future legislative, administrative or judicial changes to tax regulations); strategic risks (damage to the Corporation's reputation; the Corporation's ability to utilize technology to efficiently and effectively develop, market and deliver new products and services; competitive product and pricing pressures among financial institutions within the Corporation's markets; the implementation of the Corporation's strategies and business initiatives; management's ability to maintain and expand customer relationships; management's ability to retain key officers and employees; and any future strategic acquisitions or divestitures); and other general risks (changes in general economic, political or industry conditions; negative effects from inflation; the effectiveness of methods of reducing risk exposures; the effects of catastrophic events, including pandemics; physical or transition risks related to climate change; changes in accounting standards; the critical nature of the Corporation's accounting policies, processes and management estimates; the volatility of the Corporation's stock price; and that an investment in the Corporation's equity securities is not insured or guaranteed by the FDIC). The Corporation cautions that the foregoing list of factors is not all-inclusive. For discussion of factors that may cause actual results to differ from expectations, please refer to our filings with the Securities and Exchange Commission. In particular, please refer to â€œItem 1A. Risk Factorsâ€ beginning on page 14 of the Corporation's 2023 Annual Report on Form 10-K for the year ended DecemberÂ 31, 2023. Forward-looking statements speak only as of the date they are made. The Corporation does not undertake to update forward-looking statements to reflect facts, circumstances, assumptions or events that occur after the date the forward-looking statements are made. For any forward-looking statements made in this report or in any documents, the Corporation claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.38Table of ContentsRESULTS OF OPERATIONSIn accordance with Item 303(c) of Regulation S-K, the Corporation is providing a comparison of the quarter ended SeptemberÂ 30, 2024 against the preceding sequential quarter. The Corporation believes providing a sequential discussion of its results of operations provides more relevant information for investors and stakeholders to understand and analyze the business. Balance sheet items are discussed in terms of average balances unless otherwise noted.Three Months Ended September 30, 2024

Net interest income was impacted by an increase of $1.3Â billion in deposits held with the Federal Reserve Bank (FRB), declines of $589 million in short-term borrowings and $233 million in medium- and long-term debt and the impact of one additional day in the quarter, offset by a $1.8Â billion increase in interest-bearing deposits, the net impact of lower short-term rates, lower nonaccrual loan interest and a $210 million decline in loan volume. The decrease in net interest margin reflected higher interest-bearing deposit costs and lower nonaccrual interest, partially offset by higher deposits held with the FRB and the decline in debt balances.For further discussion of the effects of market rates on net interest income, refer to the "Market and Liquidity Risk" section of this financial review.Provision for Credit LossesThe provision for credit losses, which includes the provision for loan losses and the provision for credit losses on lending-related commitments, was $14 million for the three months ended September 30, 2024, compared to no provision in the previous quarter. The allowance for credit losses increased $3 million to $720 million at SeptemberÂ 30, 2024, compared to $717 million at JuneÂ 30, 2024, reflecting changes in loan portfolio composition and a relatively consistent economic outlook. As a percentage of total loans, the allowance for credit losses increased 5 basis points to 1.43% at SeptemberÂ 30, 2024, compared to 1.38% at JuneÂ 30, 2024. Net loan charge-offs were $11 million for both three-month periods, reflecting improvements in Corporate Banking and Mortgage Banker Finance, offset by a decline in Energy net recoveries. The provision for credit losses on lending-related commitments was an expense of $3 million for the three months ended September 30, 2024, compared to a benefit of $6 million for the three months ended June 30, 2024.An analysis of the allowance for credit losses and a summary of nonperforming assets are presented under the "Credit Risk" subheading in the "Risk Management" section of this financial review. 41Table of ContentsNoninterest IncomeThree Months Ended(in millions)September 30, 2024June 30, 2024Card fees$64Â $64Â Fiduciary income57Â 58Â Service charges on deposit accounts46Â 46Â Capital markets income 39Â 37Â Commercial lending fees 17Â 17Â Brokerage fees13Â 14Â Bank-owned life insurance12Â 11Â Letter of credit fees10Â 10Â Risk management hedging income7Â 17Â Other noninterest income (a)12Â 17Â Total noninterest income$277Â $291Â (a)The table below provides further details on certain categories included in other noninterest income.Noninterest income decreased $14 million to $277 million for the three months ended September 30, 2024, driven by a decrease in risk management hedging income mostly from lower price alignment income due to changes in cash balances held with the Chicago Mercantile Exchange (CME), as well as a loss on a derivative related to Visa's Class B shares, partially offset by increases in deferred compensation asset returns (offset in noninterest expenses) and capital markets income, as well as smaller increases in other categories. The decrease in cash balances held with the CME resulted in an increase in FRB deposits (reported within interest-bearing deposits with banks), which resulted in a corresponding increase to interest income. Other noninterest income is detailed in the table below.Three Months Ended(in millions)September 30, 2024June 30, 2024FHLB and FRB stock dividends$4Â $4Â Deferred compensation asset returns (a)4Â 1Â All other noninterest income (b)4Â 12Â Other noninterest income$12Â $17Â (a)Compensation deferred by the Corporation's officers and directors is invested based on investment selections of the officers and directors. Salaries and benefits expense included increases in deferred compensation asset returns (mostly offset in other noninterest income) and staff additions, as well as impacts from an additional day in the quarter, higher incentive compensation and stock-based compensation. Other noninterest expenses included an increase in operational losses, partially offset by a decrease in consulting expenses.42Table of ContentsNine Months Ended September 30, 2024 Compared to Nine Months Ended September 30, 2023Nine Months Ended September 30,(dollar amounts in millions, except per share data)20242023Net interest income$1,615Â $1,930Â Provision for credit losses28Â 77Â Noninterest income804Â 880Â Noninterest expenses1,720Â 1,641Â Income before income taxes671Â 1,092Â Provision for income taxes143Â 244Â Net income $528Â $848Â Diluted earnings per common share$3.80Â $6.24Â Net income decreased $320 million to $528 million for the nine months ended September 30, 2024, compared to $848 million for the nine months ended September 30, 2023, driven by a decline in net interest income, higher noninterest expenses and lower noninterest income, partially offset by a decline in provision for credit losses. The decrease in net interest income was primarily due to lower loan volumes, higher interest-bearing deposit balances and the net impact of higher short-term rates, partially offset by a decline in FHLB advances. Net income per diluted common share decreased $2.44 to $3.80 for the nine months ended September 30, 2024, compared to $6.24 for the nine months ended September 30, 2023.43Table of ContentsAnalysis of Net Interest IncomeNine Months EndedSeptember 30, 2024September 30, 2023(dollar amounts in millions)AverageBalanceInterestAverageRateAverageBalanceInterestAverageRateCommercial loans (a)$26,305Â $1,035Â 5.26Â %$30,631Â $1,263Â 5.52Â %Real estate construction loans4,642Â 292Â 8.41Â 3,786Â 228Â 8.05Â Commercial mortgage loans14,104Â 788Â 7.46Â 13,694Â 723Â 7.06Â Lease financing (b)804Â 37Â 6.14Â 770Â 25Â 4.24Â International loans1,096Â 64Â 7.85Â 1,245Â 73Â 7.89Â Residential mortgage loans1,895Â 55Â 3.84Â 1,869Â 49Â 3.47Â Consumer loans2,254Â 138Â 8.20Â 2,281Â 130Â 7.65Â Total loans (c)51,100Â 2,409Â 6.30Â 54,276Â 2,491Â 6.14Â Mortgage-backed securities (d)14,560Â 298Â 2.29Â 15,865Â 318Â 2.28Â U.S. Treasury securities (e)1,425Â 4Â 0.38Â 1,966Â 8Â 0.53Â Total investment securities15,985Â 302Â 2.14Â 17,831Â 326Â 2.10Â Interest-bearing deposits with banks (f)6,112Â 250Â 5.45Â 7,815Â 300Â 5.14Â Other short-term investments381Â 11Â 3.94Â 319Â 9Â 3.57Â Total earning assets73,578Â 2,972Â 5.19Â 80,241Â 3,126Â 5.03Â Cash and due from banks711Â 1,251Â Allowance for loan losses(688)(646)Accrued income and other assets7,415Â 7,383Â Total assets$81,016Â $88,229Â Money market and interest-bearing checking deposits (g)$29,585Â 724Â 3.26Â $25,519Â 419Â 2.18Â Savings deposits2,277Â 4Â 0.21Â 2,886Â 5Â 0.20Â Customer certificates of deposit3,797Â 103Â 3.61Â 2,414Â 42Â 2.35Â Other time deposits3,035Â 120Â 5.30Â 3,247Â 123Â 5.08Â Foreign office time deposits22Â 1Â 4.39Â 27Â 1Â 3.90Â Total interest-bearing deposits38,716Â 952Â 3.28Â 34,093Â 590Â 2.30Â Federal funds purchased9Â â€”Â 5.39Â 34Â 1Â 4.68Â Other short-term borrowings1,095Â 47Â 5.65Â 8,268Â 332Â 5.37Â Medium- and long-term debt6,944Â 358Â 6.87Â 5,772Â 273Â 6.31Â Total interest-bearing sources46,764Â 1,357Â 3.86Â 48,167Â 1,196Â 3.30Â Noninterest-bearing deposits25,371Â 31,916Â Accrued expenses and other liabilities2,588Â 2,466Â Shareholdersâ€™ equity6,293Â 5,680Â Total liabilities and shareholdersâ€™ equity$81,016Â $88,229Â Net interest income/rate spread$1,615Â 1.33Â $1,930Â 1.73Â Impact of net noninterest-bearing sources of fundsÂ 1.49Â 1.38Â Net interest margin (as a percentage of average earning assets)Â Â 2.82Â %Â Â 3.11Â %(a)Interest income on commercial loans included net expense from cash flow swaps of $522 million and $432 million for the nine months ended September 30, 2024 and 2023, respectively.(b)The nine months ended September 30, 2023 included residual value adjustments totaling $7 million, which impacted the average yield on loans by 3 basis points.(c)Nonaccrual loans are included in average balances reported and in the calculation of average rates.(d)Average balances included $2.8 billion of unrealized losses for both the nine months ended September 30, 2024 and 2023; yields calculated gross of these unrealized losses.(e)Average balances included $55Â million and $122Â million of unrealized losses for the nine months ended September 30, 2024 and 2023, respectively; yields calculated gross of these unrealized losses.(f)Average balances included $2Â million of collateral posted and netted against derivative liability positions for both the nine months ended September 30, 2024 and 2023; yields calculated gross of derivative netting amounts.(g)Average balances excluded $108Â million and $213Â million of collateral received and netted against derivative asset positions for the nine months ended September 30, 2024 and 2023, rates calculated gross of derivative netting amounts.44Table of ContentsRate/Volume AnalysisNine Months EndedSeptember 30, 2024/September 30, 2023(in millions)Increase (Decrease) Due to Rate (a)(Decrease) Increase Due to Volume (a)Net (Decrease) IncreaseInterest Income:Loans $101Â (183)(82)Investment securities(3)(21)(24)Interest-bearing deposits with banks17Â (67)(50)Other short-term investments1Â 1Â 2Â Total interest income116Â (270)(154)Interest Expense:Interest-bearing deposits206Â 156Â 362Â Short-term borrowings24Â (310)(286)Medium- and long-term debt43Â 42Â 85Â Total interest expense273Â (112)161Â Net interest income(157)(158)$(315)(a)Impact of additional days, other portfolio dynamics and interest rate swaps reflected as part of rate impact, rate/volume variances are allocated to variances due to volume.Net interest income decreased $315 million, and net interest margin decreased 29 basis points, driven by a $3.2 billion decline in loan balances, a $4.6 billion increase in interest-bearing deposits and the net impact of higher short-term rates, partially offset by a $7.2 billion decrease in short-term FHLB advances. Other noninterest income for the 2024 period included a $5 million negotiated vendor payment, while other noninterest income for the 2023 period was reduced by $5 million in losses on assets held for sale.The following table presents certain categories included in other noninterest income on the Consolidated Statements of Comprehensive Income.Nine Months Ended September 30,(in millions)20242023FHLB and FRB stock dividends$13Â $24Â Deferred compensation asset returns (a)11Â 5Â Securities trading income â€”Â 12Â Insurance commissions â€”Â 10Â All other noninterest income28Â 9Â Other noninterest income$52Â $60Â Â Â Â Â (a)Compensation deferred by the Corporation's officers and directors is invested based on investment selections of the officers and directors. The increase in salaries and benefits expense reflected the impact of annual merit-based salary increases and staff additions, as well as increases in deferred compensation expense (mostly offset in other noninterest income), staff insurance and payroll taxes, partially offset by lower severance costs. Other noninterest expenses included decreases in litigation-related expenses and non-salary pension expense, as well as a contract termination cost recorded in the 2023 period, partially offset by gains on the sale of real estate recorded in the 2023 period.STRATEGIC LINES OF BUSINESSThe Corporation has strategically aligned its operations into three major business segments: the Commercial Bank, the Retail Bank and Wealth Management. These business segments are differentiated based on the type of customer and the related products and services provided. In addition to the three major business segments, the Finance Division is also reported as a segment. The Other category includes items not directly associated with the business segments or the Finance segment. The performance of the business segments is not comparable with the Corporation's consolidated results and, because of the interrelationships of the various segments, the information presented is not indicative of how the segments would perform if they operated as independent entities. Note 14 to the consolidated

financial statements describes the business activities of each business segment and presents financial results of the business segments for the three- and nine-month periods ended September 30, 2024 and 2023.The Corporation's management accounting system assigns balance sheet and income statement items to each segment using certain methodologies, which are regularly reviewed and refined. These methodologies may be modified as the management accounting system is enhanced and changes occur in the organizational structure and/or product lines. Note 22 to the consolidated financial statements in the Corporation's 2023 Annual Report describes the Corporation's segment reporting methodology.46Table of ContentsNet interest income for each segment reflects the interest income generated by earning assets less interest expense on interest-bearing liabilities plus the net impact from associated internal funds transfer pricing (FTP) funding credits and charges. The FTP methodology allocates credits to each business segment for deposits and other funds provided as well as charges for loans and other assets being funded. FTP crediting rates on deposits and other funds provided reflect the long-term value of deposits and other funding sources based on their implied maturities. Due to the longer-term nature of implied maturities, FTP crediting rates are generally less volatile than changes in interest rates observed in the market. FTP charge rates for funding loans and other assets reflect a matched cost of funds based on the pricing and duration characteristics of the assets. As a result of applying matched funding, interest revenue for each segment resulting from loans and other assets is generally not impacted by changes in interest rates. Therefore, net interest income for each segment primarily reflects the volume of loans and other earning assets at the spread over the matched cost of funds, as well as the volume of deposits at the associated FTP crediting rates. Generally, in periods of rising interest rates, FTP charge rates for funding loans and FTP crediting rates on deposits will increase, with FTP crediting rates for deposits typically repricing at a slower pace than FTP charge rates for funding loans. Conversely, in periods of declining interest rates, FTP charge rates for funding loans and FTP crediting rates on deposits will decrease, with FTP crediting rates for deposits typically repricing at a slower pace than FTP charge rates for funding loans. Average deposits decreased $1.4 billion, primarily driven by lower noninterest-bearing deposits, with the largest declines in Technology and Life Sciences, Energy and Mortgage Banker Finance. The Commercial Bank's net income decreased $80 million to $824 million. Net interest income decreased $144 million due to higher interest expense on deposits and higher allocated net FTP charges. The provision for credit losses decreased $59 million, reflecting changes in portfolio composition, lower loan balances and an improved economic outlook. Net charge-offs increased $31 million to $32 million, driven by general Middle Market, partially offset by improvements in Energy and Technology and Life Sciences. Noninterest income decreased $18 million primarily due to lower capital markets income and card fees, partially offset by a $5 million negotiated vendor payment recorded in the first quarter of 2024. Noninterest expenses increased $21 million, primarily reflecting increases in salaries and benefits expense and FDIC insurance expense (related to special assessment), partially offset by lower operational losses and litigation and regulatory-related expenses.47Table of ContentsRetail BankNine Months Ended September 30,PercentChange(dollar amounts in millions)20242023ChangeEarnings summary:Net interest income$609Â $644Â $(35)(5)%Provision for credit losses4Â 2Â 2Â n/mNoninterest income85Â 89Â (4)(3)Noninterest expenses533Â 511Â 22Â 4Â Provision for income taxes34Â 53Â (19)(35)Net income$123Â $167Â $(44)(26)%Net charge-offs$3Â $â€”Â $3Â n/mSelected average balances:Loans $2,322Â $2,223Â $99Â 4Â %Deposits24,400Â 24,394Â 6Â â€”Â n/m - not meaningfulAverage loans increased $99 million, while average deposits increased $6 million. Under the terms of the ASR agreement, the Corporation received an initial delivery of common shares representing approximately 80% of the expected total to be repurchased. Subject to certain adjustments pursuant to the ASR agreement, the final number of shares repurchased and delivered under the ASR agreement will be based on the volume weighted average share price of the Corporation's common stock during the term of the transaction, which is expected to be completed in the fourth quarter of 2024. Since the inception of the share repurchase program in 2010, a total of 97.2 million shares have been authorized for repurchase. There is no expiration date for the share repurchase program, which may be effectuated through open market repurchases, privately negotiated transactions, structured repurchase agreements with third parties and/or otherwise, including utilizing Rule 10b5-1 plans. The timing and actual amount of additional share repurchases are subject to various factors, including the Corporation's earnings generation, capital needs to fund future loan growth and market conditions.The Corporation has a long-term CET1 capital ratio target of approximately 10 percent with capital deployment. At SeptemberÂ 30, 2024, the Corporation's estimated CET1 capital ratio was 11.97 percent, up from 11.09 percent at DecemberÂ 31, 2023.51Table of ContentsThe following table presents the minimum ratios required.Common equity tier 1 capital to risk-weighted assets4.5Â %Tier 1 capital to risk-weighted assets6.0Â Total capital to risk-weighted assets8.0Â Capital conservation buffer (a)2.5Â Tier 1 capital to adjusted average assets (leverage ratio)4.0Â (a)In addition to the minimum risk-based capital requirements, the Corporation is required to maintain a minimum capital conservation buffer, in the form of common equity, in order to avoid restrictions on capital distributions and discretionary bonuses.The Corporation's capital ratios exceeded minimum regulatory requirements as follows:September 30, 2024December 31, 2023(dollar amounts in millions)Capital/AssetsRatioCapital/AssetsRatioCommon equity tier 1 (a), (b)$8,684Â 11.97Â %$8,414Â 11.09Â %Tier 1 risk-based (a), (b)9,078Â 12.51Â 8,808Â 11.60Â Total risk-based (a) 10,375Â 14.30Â 10,263Â 13.52Â Leverage (a) 9,078Â 11.02Â 8,808Â 10.06Â Common shareholders' equity 6,972Â 8.75Â 6,012Â 7.00Â Tangible common equity (b)6,331Â 8.01Â 5,369Â 6.30Â Risk-weighted assets (a)72,576Â 75,901Â (a)Â Â Â Â SeptemberÂ 30, 2024 capital, risk-weighted assets and ratios are estimated.(b)Â Â Â Â See Supplemental Financial Data section for reconciliations of non-GAAP financial measures and regulatory ratios.Common shareholdersâ€™ equity included $2.4 billion in accumulated other comprehensive losses, with approximately $2.0 billion of those losses relating to balances recorded in total assets, comprised of valuation adjustments to available-for-sale securities and pension assets, as well as related deferred tax assets. These amounts impacted the common shareholdersâ€™ equity ratio by 267 basis points; the impact on the tangible common equity ratio using the same calculation method was 271 basis points. Average common shareholders' equity and return on average common shareholders' equity for the three months ended September 30, 2024 was $6.5 billion and 10.88%, respectively, compared to $4.9 billion and 2.17%, respectively, for the three months ended December 31, 2023.Basel III Endgame FrameworkOn July 27, 2023, the federal banking agencies issued a notice of proposed rulemaking, commonly referred to as Basel III Endgame (the Capital Proposal) that would significantly increase the capital requirements applicable to large banking organizations with total assets of $100 billion or more. The Capital Proposal would align the regulatory capital calculation and the calculation of risk-weighted assets across large banking organizations subject to the Capital Proposal and require Category III and IV banking organizations to include most components of AOCI, including net unrealized gains and losses on available-for-sale securities, in their regulatory capital ratios. The Capital Proposal was subject to a public comment period, which ended on January 16, 2024. If adopted as proposed, the Capital Proposal would include a three-year transition period beginning July 1, 2025. As of SeptemberÂ 30, 2024, the Corporation had total assets of $79.7 billion. While the Capital Proposal would not apply to the Corporation as it is currently proposed, if the Corporation becomes subject to the requirements of the Capital Proposal in the future or becomes subject to any other new laws or regulations related to capital and liquidity, such requirements could limit the Corporationâ€™s ability to pay dividends or make share repurchases or require Comerica to reduce business levels or to raise capital, which would have a material adverse effect on the Corporationâ€™s financial condition and results of operations. If subject to the Capital Proposal, the estimated impact related to proposed inclusion of most components of AOCI would be an approximate 285 basis point decrease to common equity tier-1 capital based on SeptemberÂ 30, 2024 financials. RISK MANAGEMENTThe following updated information should be read in conjunction with the "Risk Management" section on pages F-18 through F-34 in the Corporation's 2023 Annual Report.Credit RiskAllowance for Credit LossesThe allowance for credit losses includes both the allowance for loan losses and the allowance for credit losses on lending-related commitments. The allowance for credit losses decreased $8 million from $728Â million at DecemberÂ 31, 2023 to $720 million at SeptemberÂ 30, 2024. 52Table of ContentsThe following table presents metrics of the allowance for credit losses and nonperforming loans.September 30, 2024December 31, 2023Allowance for credit losses as a percentage of total loans1.43Â %1.40Â %Allowance for credit losses as a multiple of total nonperforming loans2.9x4.1xThe economic forecasts informing the current expected credit loss (CECL) model reflects the FRB's pivot to monetary policy recalibration and lower interest rates, consumer spending growth moderation and slower, albeit continued, growth of the real economy. Inflation is gradually moderating as a modest margin of slack capacity opens in the labor market. Energy prices are projected to level off despite continued crosswinds from the Russia-Ukraine and Mideast wars, as U.S. crude production holds near a record high. Residential real estate property prices are expected to rise at more moderate rates, while commercial real estate prices face headwinds, both reflecting the long and variable lags of the FRB's tighter monetary policy prior to the beginning of rate cuts in the third quarter of 2024.Downside risks to growth from geopolitical risks, cost-of-living pressures on household finances and less expansionary fiscal policy are projected to collectively contribute to slower growth in 2024 and 2025. Reduced demand for office space and subdued economic activity in the central business districts of major metro areas persist as drags on the broader economy. The FRB's gradual rate cuts

driven by a softening labor market and disinflation aim to contain the risk of recession.These factors shaped the 2-year reasonable and supportable forecasts used by the Corporation in its CECL estimate at SeptemberÂ 30, 2024. The U.S. economy is projected to grow at a below-trend rate through 2024 and 2025, before gradually normalizing to its trend growth rate. The unemployment rate is expected to hold below 5 percent and oil prices are expected to decline, while interest rate forecasts reflect market expectations and guidance from the FRB available during the third quarter of 2024. The following table summarizes select variables representative of the economic forecasts used to develop the CECL estimate at SeptemberÂ 30, 2024.Economic VariableBase ForecastReal Gross Domestic Product (GDP) growthGrowth slows to 1.3 percent in the fourth quarter 2024 before recovering to approximately 2.0 percent by the end of the forecast period.Unemployment rateExpected to hold at approximately 4.2 percent through fourth quarter 2025 followed by a modest decline in 2026 to 4.1 percent by the end of the forecast period.Spread of Corporate BBB bond to 10-year Treasury bondSpread widens to 2.1 percent during second half of 2025 before normalizing to approximately 2.0 percent by third quarter 2026.Oil PricesPrices generally decline from $77 per barrel to approximately $73 per barrel over the forecast period.Due to the high level of uncertainty regarding assumptions used as inputs to the forecast, the Corporation evaluated a range of economic scenarios, including more benign and more severe economic forecasts. In a more severe scenario, real GDP is projected to contract through the second quarter 2025, subsequently recovering growth of 1.7 percent by the end of the forecast period. Oil prices fall to below $58 per barrel by first quarter 2026 followed by an increase to $63 per barrel by the end of the forecast period, while the unemployment rate remains elevated through the end of the forecast period. Selecting the more severe forecast would result in an increase in the quantitative calculation of allowance for credit losses of approximately $361 million as of SeptemberÂ 30, 2024. However, factoring in model overlays and qualitative adjustments could result in a materially different estimate under a more severe scenario. The Corporation monitors evolving economic conditions for impacts to the allowance for credit losses.Allowance for Loan LossesThe allowance for loan losses represents managementâ€™s estimates of current expected credit losses in the Corporationâ€™s loan portfolio. The allowance for loan losses, which totaled $686 million at SeptemberÂ 30, 2024, was relatively stable compared to $688 million at DecemberÂ 31, 2023. Collective loss estimates are determined by applying reserve factors, designed to estimate current expected credit losses, to amortized cost balances over the remaining contractual life of the collectively evaluated portfolio. Loans with similar risk characteristics are aggregated into homogeneous pools. The allowance for loan losses also includes qualitative adjustments to bring the allowance to the level management believes is appropriate based on factors that have not otherwise been fully accounted for, including adjustments for foresight risk, input imprecisions and model imprecision. Credit losses for loans that no longer share risk characteristics with the loan pools are estimated on an individual basis. Individual credit loss estimates are typically performed for nonaccrual loans and are based on one of several methods, including the estimated fair value of the underlying collateral, observable market value of similar debt or the present value of expected cash flows.Â Â Â Â 53Table of ContentsAllowance for Credit Losses on Lending-Related CommitmentsThe allowance for credit losses on lending-related commitments estimates current expected credit losses on collective pools of letters of credit and unused commitments to extend credit based on reserve factors, determined in a manner similar to business loans, multiplied by a probability of draw estimate based on historical experience and credit risk, applied to commitment amounts. The allowance for credit losses on lending-related commitments totaled $34 million and $40Â million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023.For additional information regarding the allowance for credit losses, refer to the "Critical Accounting Estimates" section and pages F-51 through F-52 in Note 1 to the consolidated financial statements of the Corporation's 2023 Annual Report.Nonperforming AssetsNonperforming assets include loans on nonaccrual status and foreclosed assets. Commercial real estate loans, consisting of real estate construction and commercial mortgage loans, totaled $18.6 billion at SeptemberÂ 30, 2024. Commercial real estate loans made to borrowers in the Commercial Real Estate business line, which includes loans to real estate developers, totaled $9.8 billion, or 52 percent of total commercial real estate loans, an increase of $470 million compared to DecemberÂ 31, 2023. The Commercial Real Estate business line at SeptemberÂ 30, 2024 was predominantly secured by multi-family and industrial properties, comprising 50% and 28% of the portfolio, respectively, with only 4% secured by office properties. Commercial real estate loans in other business lines totaled $8.9 billion, or 48 percent of total commercial real estate loans, at SeptemberÂ 30, 2024, a decrease of $606 million compared to DecemberÂ 31, 2023. These loans consisted primarily of owner-occupied commercial mortgages, which bear credit characteristics similar to non-commercial real estate business loans. Generally, loans previously reported as real estate construction are classified as commercial mortgage loans upon receipt of a certificate of occupancy.The real estate construction loan portfolio primarily contains loans made to long-tenured customers with satisfactory completion experience. There were $36Â million in criticized real estate construction loans in the Commercial Real Estate business line and $2 million in other business lines at SeptemberÂ 30, 2024, compared to $86 million in the Commercial Real Estate business line and $12 million in other business lines at DecemberÂ 31, 2023. For the three month periods ended SeptemberÂ 30, 2024 and JuneÂ 30, 2024, as well as the nine months ended September 30, 2024 and 2023, there were no net charge-offs of real estate construction loans.Commercial mortgage loans are loans where the primary collateral is a lien on any real property and are primarily loans secured by owner-occupied real estate. Real property is generally considered primary collateral if the value of that collateral represents more than 50 percent of the commitment at loan approval. Loans in the commercial mortgage portfolio generally mature within three to five years. Criticized commercial mortgage loans in the Commercial Real Estate business line totaled $392 million and $378 million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively. In other business lines, $556 million and $395 million of commercial mortgage loans were criticized at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively, with the increase primarily in senior housing properties, largely managed in the Corporate Banking line of business. Senior housing loans totaled $722 million at SeptemberÂ 30, 2024, of which 44% were criticized, compared to $796 million at DecemberÂ 31, 2023, of which 11% were criticized.Commercial mortgage net charge-offs were $9 million and $5Â million for the three months ended September 30, 2024 and JuneÂ 30, 2024, respectively. Of the $1.9 billion of residential mortgage loans outstanding, $36 million were on nonaccrual status at SeptemberÂ 30, 2024, an increase of $17 million compared to DecemberÂ 31, 2023. The home equity portfolio totaled $1.8 billion at SeptemberÂ 30, 2024, of which 95 percent was outstanding under primarily variable-rate, interest-only home equity lines of credit and 5 percent were in amortizing status. Of the $1.8 billion of home equity loans outstanding, $25 million were on nonaccrual status at SeptemberÂ 30, 2024. A majority of the home equity portfolio was secured by junior liens at SeptemberÂ 30, 2024.Â Energy LendingThe Corporation has a portfolio of Energy loans that are included entirely in commercial loans in the Consolidated Balance Sheets. Customers in the Corporation's Energy business line are engaged in exploration and production (E&P) and midstream. E&P generally includes such activities as searching for potential oil and gas fields, drilling exploratory wells and operating active wells. Commitments to E&P borrowers are generally subject to semi-annual borrowing base re-determinations based on a variety of factors including updated prices (reflecting market and competitive conditions), energy reserve levels and the impact of hedging. The midstream sector is generally involved in the transportation, storage and marketing of crude and/or refined oil and gas products. Approximately 95% of loans in the Energy business line are Shared National Credits (SNC), which are facilities greater than or equal to $100 million shared by three or more federally supervised institutions, reflecting the Corporation's focus on larger middle market companies that have financing needs that generally exceed internal individual borrower credit risk limits. The Corporation seeks to develop full relationships with SNC borrowers. Energy net recoveries were $9 million for the nine months ended September 30, 2024 compared to net recoveries of $1 million for the nine months ended September 30, 2023.Leveraged LoansCertain loans in the Corporation's commercial portfolio are considered leveraged transactions. These loans are typically used for mergers, acquisitions, business recapitalizations, refinancing and equity buyouts. To help mitigate the risk associated with these loans, the Corporation focuses on middle market companies with highly capable management teams, strong sponsors and solid track records of financial performance. Industries prone to cyclical downturns and acquisitions with a high degree of integration risk are generally avoided. Other considerations include the sufficiency of collateral, the level of balance sheet leverage and the adequacy of financial covenants. During the underwriting process, cash flows are stress-tested to evaluate the borrowers' abilities to handle economic downturns and an increase in interest rates. The FDIC defines higher-risk commercial and industrial (HR C&I) loans for assessment purposes as loans generally with leverage of four times total debt to earnings before interest, taxes and depreciation (EBITDA) as well as three times senior debt to EBITDA, excluding certain collateralized loans. The following tables summarize information about HR C&I loans, which represented 5 percent of total loans at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023.(in millions)September 30, 2024December 31, 2023Outstandings$2,604Â $2,814Â Criticized262Â 332Â 58Table of ContentsThere were $14 million in net charge-offs of leveraged loans during the three months ended September 30, 2024, compared to $3 million for the three months ended June 30, 2024, and $23 million for the nine months ended September 30, 2024, compared to $1 million for the nine months ended September 30, 2023.Market and Liquidity RiskMarket risk represents the risk of loss due to adverse movement in prices, including interest rates, foreign exchange rates, commodity prices and equity prices. Liquidity risk represents the risk that the Corporation does not have sufficient access to funds to maintain its normal operations at all times or does not have the ability to raise or borrow funds at a reasonable cost at all times.The Asset Liability Management Committee (ALCO) of the Corporation establishes and monitors compliance with the policies and risk limits pertaining to market and liquidity risk management activities. ALCO meets regularly to discuss and review market and liquidity risk management strategies and consists of executive and senior management from various areas of the Corporation, including treasury, finance, economics, lending, deposit gathering and risk management. Corporate Treasury helps mitigate market and liquidity risk under the direction of ALCO through the actions it takes to manage the Corporation's market, liquidity and capital positions.The Corporation performs monthly liquidity stress testing to evaluate its ability to meet funding needs in hypothetical stressed environments. Such environments cover a series of scenarios, including both idiosyncratic and market-wide in nature, which vary in terms of duration and severity. The Corporation's evaluation as of SeptemberÂ 30, 2024 projected that sufficient sources of liquidity were available under each series of events.In addition to assessing liquidity risk on a consolidated basis, Corporate Treasury also monitors the parent company's liquidity and has established liquidity coverage requirements for meeting expected obligations without the support of additional dividends from subsidiaries. ALCO's policy on liquidity risk management requires the parent company to maintain sufficient liquidity to meet expected cash obligations, such as debt service, dividend payments and normal operating expenses, over a period of no less than 12 months. The Corporation had liquid assets of $1.3 billion on an unconsolidated basis at SeptemberÂ 30, 2024.Corporate Treasury and the Enterprise Risk Division support ALCO in measuring, monitoring and managing interest rate risk as well as all other market risks. Key activities encompass: (i) providing information and analyses of the Corporation's balance sheet structure and measurement of interest rate and all other market risks; (ii) monitoring and reporting of the Corporation's positions relative to established policy limits and guidelines; (iii) developing and presenting analyses and strategies to adjust risk positions; (iv) reviewing and presenting policies and authorizations for approval; and (v) monitoring of industry trends and analytical tools to be used in the management of interest rate and all other market and liquidity risks.Interest Rate RiskÂ Â Â Â Net interest income is the primary source of revenue for the Corporation. Interest rate risk arises in the normal course of business due to differences in the repricing and cash flow characteristics of assets and liabilities, primarily through the Corporation's core business activities of extending loans and acquiring deposits. The Corporation's balance sheet is predominantly characterized by floating-rate loans funded by core deposits. Including the impact of interest rate swaps converting floating-rate loans to fixed, the Corporation's loan composition at SeptemberÂ 30, 2024 was 56 percent fixed-rate, 35 percent overnight to 30-day rate, 6 percent 90-day and greater rates and 3 percent prime. The composition of the loan portfolio creates sensitivity to interest rate movements due to the imbalance between the faster repricing of the floating-rate loan portfolio versus deposit products. In addition, the growth and/or contraction in the Corporation's loans and deposits may lead to changes in sensitivity to interest rate movements in the absence of mitigating actions. Examples of such actions are purchasing fixed-rate investment securities, which provide liquidity to the balance sheet and act to mitigate the inherent interest rate sensitivity, as well as hedging with interest rate swaps and options. Other mitigating factors include interest rate floors on a portion of the loan portfolio.The Corporation actively manages its exposure to interest rate risk with the principal objective of optimizing net interest income and the economic value of equity while operating within acceptable limits established for interest rate risk and maintaining adequate levels of funding and liquidity.Since no single measurement system satisfies all management objectives, a combination of techniques is used to manage interest rate risk. These techniques examine the impact of interest rate risk on net interest income and the economic value of equity under a variety of alternative scenarios, including changes in the level, slope and shape of the yield curve utilizing multiple simulation analyses. Simulation analyses produce only estimates of net interest income as the assumptions used are inherently uncertain. Actual results may differ from simulated results due to many factors, including, but not limited to, the timing, magnitude and frequency of changes in interest rates, market conditions, regulatory impacts and management strategies.59Table of ContentsSensitivity of Net Interest Income to Changes in Interest RatesThe analysis of the impact of changes in interest rates on net interest income under various interest rate scenarios is management's principal risk management technique. Management models a base-case net interest income under an unchanged interest rate environment using a static balance sheet and generates sensitivity scenarios by changing certain model assumptions. Each scenario includes assumptions such as loan growth, investment security prepayment levels, depositor behavior and overall balance sheet mix and growth which are in line with historical patterns. Additionally, the analysis assumes that all loan hedges qualify for hedge accounting. Changes in actual economic activity may result in a materially different interest rate environment as well as a balance sheet structure that is different from the changes management included in its simulation analysis. Model assumptions in the sensitivity scenarios at SeptemberÂ 30, 2024 included for the rising rate scenarios, a modest increase in loan balances and a moderate decrease in deposit balances, and for the declining rate scenarios, a modest decrease in loan balances and a moderate increase in deposit balances. In addition, both scenarios assumed loan spreads held at current levels, an incremental interest-bearing deposit beta of approximately 47%, deposit mix shifts based on historical observations, partial reinvestment of securities portfolio cash flows and no additions to interest rate swaps. The average balance of the securities portfolio included in the analysis was $15.9 billion for the three months ended September 30, 2024 with an average yield of 2.17% and effective duration of 5.6 years.The table below details components of the variable-rate loan swap portfolio at SeptemberÂ 30, 2024.Variable-Rate Loan Swaps(dollar amounts in millions)Notional AmountWeighted Average YieldYears to Maturity (a)Swaps under contract at SeptemberÂ 30, 2024 (b)$29,500Â 2.48Â %2.7Â Swaps under contract at SeptemberÂ 30, 2024, excluding bridge swaps with CME (c)23,9002.53Â 2.6Weighted average notional active per period:Full year 202423,5752.50Â 2.6Full year 202522,9732.57Â 3.4(a)Years to maturity calculated from a starting date of SeptemberÂ 30, 2024.(b)Includes forward starting swaps of $6.1 billion starting in fourth quarter 2024. Excluding forward starting swaps, the weighted average yield was 2.51%. (c)Excludes $5.6 billion of bridge swaps used for BSBY transition purposes by the CME. See "BSBY Cessation" section for more information.The analysis also includes interest rate swaps that convert $6.8 billion of fixed-rate medium- and long-term debt and FHLB advances to variable rates through fair value hedges. Additionally, included in this analysis are $15.0 billion of loans that were subject to an average interest rate floor of 51 basis points at SeptemberÂ 30, 2024. This base-case net interest income is then compared against interest rate scenarios in which short-term rates rise or decline 100 or 200 basis points (with a floor of zero percent) in a linear, non-parallel fashion from the base case over 12 months, resulting in an average change of 50 or 100 basis points over the period.The table below, as of SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, displays the estimated impact on net interest income during the next 12 months by relating the base case scenario results to those from the rising and declining rate scenarios described above.Estimated Annual ChangeSeptember 30, 2024December 31, 2023(dollar amounts in millions)Amount%Amount%Change in Interest Rates:Change in Interest Rates:Rising 100 basis points$(21)(1Â %)Rising 100 basis points$(36)(2Â %)(50 basis points on average)(50 basis points on average)Declining 100 basis points9Â â€”Â Declining 100 basis points23Â 1Â (50 basis points on average)(50 basis points on average)Rising 200 basis points(57)(2)Rising 200 basis points(87)(4)(100 basis points on average)(100 basis points on average)Declining 200 basis points6Â â€”Â Declining 200 basis points33Â 1Â (100 basis points on average)(100 basis points on average)Sensitivity to both rising and declining interest rates decreased from DecemberÂ 31, 2023 to SeptemberÂ 30, 2024 due to changes in balance sheet mix dynamics.60Table of ContentsAt SeptemberÂ 30, 2024, additional sensitivity scenarios applied the rising and declining 100 basis point scenario assumptions with a 60% incremental deposit beta relative to the base case scenario to assess the impact of the Corporation's deposit beta assumptions. In these rising and declining scenarios, net interest income decreased by $50 million and increased by $31 million, respectively, due to a more rapid repricing pace compared to the standard model assumptions. Sensitivity of Economic Value of Equity to Changes in Interest RatesIn addition to the simulation analysis on net interest income, an economic value of equity analysis provides an alternative view of the interest rate risk position. The economic value of equity is the difference between the estimate of the economic value of the Corporation's financial assets, liabilities and off-balance sheet instruments, derived through discounting cash flows based on actual rates at the end of the period, and the estimated economic value after applying the estimated impact of rate movements. The Corporation primarily monitors the percentage change on the base-case economic value of equity. The economic value of equity analysis is based on an immediate parallel 100 or 200 basis point shock with a floor of zero percent.The table below, as of SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, displays the estimated impact on the economic value of equity from the interest rate scenario described above.September 30, 2024December 31, 2023(dollar amounts in millions)Amount%Amount%Change in Interest Rates:Change in Interest Rates:Rising 100 basis points$(586)(5Â %)Rising 100 basis points$(567)(4Â %)Declining 100 basis points700Â 5Â Declining 100 basis points794Â 6Â Rising 200 basis points(1,239)(10)Rising 200 basis points(1,254)(10)Declining 200 basis points1,260Â 10Â Declining 200 basis points1,363Â 11Â The sensitivity of economic value of equity to rising and declining rates was largely unchanged from DecemberÂ 31, 2023 to SeptemberÂ 30, 2024.BSBY CessationOn November 15, 2023, the Bloomberg Index Services Limited (Bloomberg) announced that it will discontinue publishing BSBY on November 15, 2024; accordingly, the Corporation was required to â€œde-designateâ€ $7.0 billion of interest rate swaps used in cash flow hedges of certain BSBY-indexed loans and reclassify amounts recognized in accumulated other comprehensive income into earnings. For each de-designated swap, settlement of interest payments and changes in fair value were recorded as risk management hedging losses within other noninterest income instead of net interest income until re-designation. All impacted swaps were re-designated as of April 1, 2024.BSBY cessation negatively impacted interest income on commercial loans by $9Â million for the three months ended September 30, 2024, compared to $3Â million for the three months ended June 30, 2024. Refer to Note 6 to the consolidated financial statements for further discussion of re-designated interest rate hedges.At SeptemberÂ 30, 2024, the Corporation had $22.8 billion of exposure to BSBY-based products, including $12.4Â billion in loans and $10.4 billion in interest rate swaps. The Corporation ceased originating BSBY-based products and is working to convert BSBY-based loans to other indices as repricing opportunities occur. The Corporation expects any BSBY-based contracts that do not organically transition to SOFR by November 15, 2024, will transition to SOFR through existing fallback language, which for loans is the first repricing date after BSBY cessation occurs in November 2024. For interest rate swaps, the Corporation plans to enact the International Swaps and Derivatives Association (ISDA) Definition and Benchmark Supplement language, as applicable.In the third quarter of 2023, as part of the transition from BSBY to SOFR, the CME converted existing BSBY swaps into two swaps: a short-dated BSBY swap (bridge swap) and a forward starting SOFR swap (surviving swap). The two swaps are designed to cover the same period of time as the original BSBY swap. As a result of this approach, the conversion resulted in a temporary $9.3 billion increase in notional balances when compared to the former BSBY-based swaps cleared through the CME, which consisted of $5.6 billion in cash flow swaps and $3.7 billion in customer-initiated swaps. This temporary increase in notional amounts due to the bridge swaps is expected to resolve in the fourth quarter of 2024.61Table of Contents Sources of LiquidityThe Corporation maintains a liquidity position that it believes will adequately satisfy its financial obligations while taking into account potential commitment draws and deposit run-off that may occur in the normal course of business. The majority of the Corporation's balance sheet is funded by customer deposits. Cash flows from loan repayments, increases in deposit accounts (including brokered deposits), activity in the securities portfolio and wholesale funding channels serve as the Corporation's primary liquidity sources.The Corporation satisfies incremental liquidity needs with either liquid assets or external funding sources. Available liquidity includes cash, FHLB advances and FRB borrowing through the discount window, as well as the market value of unencumbered investment securities, which, if needed, could be utilized as collateral for FHLB advances and FRB borrowings. The Corporation has pledged a portion of its investment securities portfolio to access wholesale funding as needed.The Bank is a member of the FHLB of Dallas, Texas, which provides short- and long-term funding to its members through advances collateralized by real estate-related loans, certain government agency-backed securities and other eligible assets. Actual borrowing capacity is contingent on the amount of collateral pledged to the FHLB and the fair value of pledged assets, as well as applicable FHLB haircuts.At SeptemberÂ 30, 2024, the Bank had pledged real estate-related loans totaling $22.5 billion and investment securities totaling $6.4 billion to the FHLB, which provided for up to $17.3 billion of collateralized borrowing with the FHLB.The FRB provides liquidity through its discount window, where banks may borrow funds based on the discounted fair value of pledged assets. At SeptemberÂ 30, 2024, the Bank pledged $20.3 billion of loans to the FRB, which provided for up to $16.8 billion of collateralized borrowing through the discount window.The table below details the Corporation's sources of available liquidity at SeptemberÂ 30, 2024.(dollar amounts in millions)Total CapacityBorrowings OutstandingAvailable LiquidityCash on deposit with FRB (a)$5,374Â Unencumbered investment securities (b)8,575Â Secured borrowing facilities:FHLB$17,311Â $4,000Â 13,311Â FRB16,804Â â€”Â 16,804Â Total available liquidity$44,064Â (a)Included in interest-bearing deposits with banks on the Consolidated Balance Sheet. The ability of the Corporation and the Bank to raise unsecured funding at competitive rates is impacted by rating agencies' views of the credit quality, liquidity, capital, earnings and other relevant factors related to the Corporation and the Bank. As of SeptemberÂ 30, 2024, the three major rating agencies had assigned the following ratings to long-term senior unsecured obligations of the Corporation and the Bank, as well as long-term deposits at the Bank. A security rating is not a recommendation to buy, sell, or hold securities and may be subject to revision or withdrawal at any time by the assigning rating agency. Each rating should be evaluated independently of any other rating.Debt RatingsDeposit RatingsComericaÂ IncorporatedComericaÂ BankComericaÂ BankSeptember 30, 2024RatingRatingOutlookRatingMoodyâ€™s Investors Service (a)Baa1Baa1Negative A1Fitch Ratings A-A-NegativeAStandard and Poorâ€™sBBBBBB+Stablenot rated(a)In September 2024, Moody's Investors Service placed the Corporation and Bank's ratings on review for downgrade. 62Table of ContentsDeposit Concentrations and Uninsured DepositsThe Corporation's uninsured deposits are well-diversified between geographies, industries and customers. At SeptemberÂ 30, 2024, the Retail Bank and general Middle Market segments, both highly diversified and granular, accounted for 38% and 27% of the total deposit base, respectively. Corporate Banking and Technology and Life Sciences comprised 6% and 5% each of total deposits, respectively, which were the largest deposit concentrations of the more specialized business lines. Uninsured deposits are defined as the portion of deposit accounts in U.S. offices that exceed the FDIC insurance limit and amounts in any other uninsured investment or deposit account that are classified as deposits and are not subject to any federal or state deposit insurance regimes.September 30, 2024December 31, 2023(Dollar amount in millions)AmountPercentage of total depositsAmountPercentage of total depositsTotal uninsured deposits, as calculated per regulatory guidelines$31,926Â 51Â %$31,485Â 47Â %Less: affiliate deposits(3,839)(4,064)Total uninsured deposits, excluding affiliate deposits$28,087Â 45Â %$27,421Â 41Â %Time deposits otherwise uninsured, which consist of foreign office time deposits, totaled $25Â million at SeptemberÂ 30, 2024 and all mature in three months or less. As financial agent, the Bank has been the exclusive issuer of the Direct Express prepaid debit card for federal benefit recipients. The contract provides for a potential extension of the contract term for up to three years past January 2, 2025, to facilitate an orderly transition. Under the contract, Treasury will use reasonable efforts to notify the Bank by December 3, 2024, of its exercise of the transition period

extension option. While the length of the transition is currently unknown, the Corporation believes it may take some time given the scale and complexity of the program as well as its own transition experience.For the three months ended September 30, 2024, average deposits related to the Direct Express program were $3.4 billion, all of which were noninterest-bearing. Card fee income related to the Direct Express program was $137 million and $30 million for the year ended DecemberÂ 31, 2023 and the three months ended September 30, 2024, respectively. Outside processing expenses related to the Direct Express program were $138 million and $29 million, respectively, for the same periods. The Corporation cannot currently predict the impact that the loss of this contract and the related deposits could have on its financial statements as it will be subject to many factors, including the timing, costs and extent of securing any necessary alternative sources of funding. However, such impact could be material.63Table of ContentsCRITICAL ACCOUNTING ESTIMATESThe Corporationâ€™s consolidated financial statements are prepared based on the application of accounting policies, the most significant of which are described in Note 1 to the consolidated financial statements included in the Corporation's 2023 Annual Report. These policies require numerous estimates and strategic or economic assumptions, which may prove inaccurate or subject to variations. Changes in underlying factors, assumptions or estimates could have a material impact on the Corporationâ€™s future financial condition and results of operations. At DecemberÂ 31, 2023, the most critical of these estimates related to the allowance for credit losses, fair value measurement, goodwill, pension plan accounting and income taxes. These estimates were reviewed with the Audit Committee of the Corporationâ€™s Board of Directors and are discussed more fully on pages F-35 through F-38 in the Corporation's 2023 Annual Report. As of the date of this report, there have been no significant changes to the Corporation's critical accounting estimates as disclosed in the Corporation's 2023 Annual Report.64Table of ContentsSUPPLEMENTAL FINANCIAL DATAThe Corporation believes non-GAAP measures are meaningful because they reflect adjustments commonly made by management, investors, regulators and analysts to evaluate the adequacy of common equity and our performance trends. Tangible common equity is used by the Corporation to measure the quality of capital and the return relative to balance sheet risk. Common equity tier 1 capital ratio removes preferred stock from the Tier 1 capital ratio as defined by and calculated in conformity with bank regulations. The tangible common equity ratio removes the effect of intangible assets from capital and total assets. Tangible common equity per share of common stock removes the effect of intangible assets from common shareholders' equity per share of common stock. The Corporation maintains a set of disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) that are designed to ensure that information required to be disclosed by the Corporation in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Corporation's management, including the Corporation's Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Management has evaluated, with the participation of the Corporation's Chief Executive Officer and Chief Financial Officer, the effectiveness of the Corporation's disclosure controls and procedures as of the end of the period covered by this quarterly report (the Evaluation Date). Based on the evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer have concluded that, as of the Evaluation Date, the Corporation's disclosure controls and procedures are effective.(b)Changes in Internal Control Over Financial Reporting. During the period to which this report relates, there have not been any changes in the Corporation's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that have materially affected, or that are reasonably likely to materially affect, such controls. HerzogSenior Executive Vice President and Chief Financial Officer EX-99.1 5 a2024q310q_ex991.htm EX-99.1 DocumentExhibit 99.1COMERICA INCORPORATED COMPENSATION RECOVERY POLICY1.Purpose. This Policy sets forth the terms on which the Company may recover erroneously awarded compensation to its executive officers. This Policy is intended to comply with Section 10D of the Exchange Act and Section 303A.14 of the NYSE Listed Company Manual.2.Definitions. Unless the context otherwise requires, the following terms used in this Policy shall have the following meanings:(a)â€œBoardâ€ means the Board of Directors of the Company.(b)â€œCommitteeâ€ means the Governance, Compensation and Nominating Committee of the Board.(c)â€œCompanyâ€ means Comerica Incorporated.(d)â€œEffective Dateâ€ means October 2, 2023.(e)â€œExchangeâ€ means the New York Stock Exchange.(f)â€œExchange Actâ€ means the Securities Exchange Act of 1934, as amended from time to time, and any successor thereto.(g)â€œerroneously awarded compensationâ€ has the meaning set forth in Section 3(c).(h)â€œexecutive officerâ€ means the Companyâ€™s president, principal financial officer, principal accounting officer (or if there is no such accounting officer, the controller), any vice-president of the Company in charge of a principal business unit, division or function (such as sales, administration or finance), any other officer who performs a policy-making function, or any other person who performs similar policy-making functions for the Company. Executive officers of the Companyâ€™s parent(s) or subsidiaries are deemed executive officers of the Company if they perform such policy-making functions for the Company. In addition, (i)Â if the Company became a limited partnership, officers or employees of the general partner(s) of the Company who perform policy-making functions for the Company are deemed executive officers of the Company and (ii)Â if the Company became a trust, officers or employees of the trustee(s) of the Company who perform policy-making functions for the Company are deemed executive officers of the Company. Policy-making function is not intended to include policy-making functions that are not significant. An â€œexecutive officerâ€ for

purposes of this Policy includes at a minimum executive officers identified pursuant to Item 401(b) of SEC Regulation S-K.(i)â€œfinancial reporting measuresâ€ means measures that are determined and presented in accordance with the accounting principles used in preparing the Companyâ€™s financial statements, and any measures that are derived wholly or in part from such measures. Stock price and total shareholder return are also financial reporting measures.(j)â€œincentive-based compensationâ€ means any compensation that is granted, earned or vested based wholly or in part upon the attainment of a financial reporting measure.(k)â€œPolicyâ€ means this Comerica Incorporated Compensation Recovery Policy, as in effect from time to time.(l)â€œreceivedâ€ has the following meaning: incentive-based compensation is deemed received in the Companyâ€™s fiscal period during which the financial reporting measure specified in the incentive-based compensation award is attained, even if the payment or grant of the incentive-based compensation occurs after the end of that period.(m)â€œSECâ€ means the U.S. Securities and Exchange Commission.3.Recovery of Erroneously Awarded Compensation. The Company shall recover reasonably promptly the amount of erroneously awarded compensation in the event that the Company is required to prepare an accounting restatement due to the material noncompliance of the Company with any financial reporting requirement under the securities laws, including any required accounting restatement to correct an error in previously issued financial statements that is material to the previously issued financial statements, or that would result in a material misstatement if the error were corrected in the current period or left uncorrected in the current period.(a)Scope of Policy. This Policy shall apply to all incentive-based compensation received after the Effective Date by a person:(i)After beginning service as an executive officer;(ii)Who served as an executive officer at any time during the performance period for that incentive-based compensation;(iii)While the Company has a class of securities listed on a national securities exchange or a national securities association; and(iv)During the three completed fiscal years immediately preceding the date that the Company is required to prepare an accounting restatement as described in the first paragraph of this Section 3. In addition to these last three completed fiscal years, this Policy shall apply to any transition period (that results from a change in the Companyâ€™s fiscal year) within or immediately following those three completed fiscal years. However, a transition period between the last day of the Companyâ€™s previous fiscal year end and the first day of its new fiscal year that comprises a period of nine to 12 months would be deemed a completed fiscal year. The Companyâ€™s obligation to recover erroneously awarded compensation is not dependent on if or when the restated financial statements are filed.(b)Date of Accounting Restatement. The date that the Company is required to prepare an accounting restatement as described in the first paragraph of this Section 3 is the earlier to occur of:(i)the date on which the Board, a committee thereof or the Companyâ€™s officer(s) authorized to take such action if Board action is not required, concludes, or reasonably should have concluded, that the Company is required to prepare an accounting restatement as described in the first paragraph of this Section 3; and(ii)the date a court, regulator or other legally authorized body directs the Company to prepare an accounting restatement as described in the first paragraph of this Section 3.(c)Amount Subject to Recovery. The amount of incentive-based compensation subject to this Policy (â€œerroneously awarded compensationâ€) is the amount of incentive-based compensation received that exceeds the amount of incentive-based compensation that otherwise would have been received had it been determined based on the restated amounts, and shall be computed without regard to any taxes paid. For incentive-based compensation based on stock price or total shareholder return, where the amount of erroneously awarded compensation is not subject to mathematical recalculation directly from the information in an accounting restatement: (i)Â the amount shall be based on a reasonable estimate of the effect of the accounting restatement on the stock price or total shareholder return upon which the incentive-based compensation was received; and (ii)Â the Company shall maintain documentation of the determination of that reasonable estimate and provide such documentation to the Exchange.(d)Impracticability of Recovery. The Company shall recover erroneously awarded compensation in compliance with this Policy except to the extent that the conditions of clauses (i), (ii) or (iii) below are met, and the Committee (or in the absence thereof, a majority of the independent directors serving on the Board) has made a determination that recovery would be impracticable.(i)The direct expense paid to a third party to assist in enforcing this Policy would exceed the amount to be recovered. Before concluding that it would be impracticable to recover any amount of erroneously awarded compensation based on expense of enforcement, the Company shall make a reasonable attempt to recover such erroneously awarded compensation, document such reasonable attempt(s) to recover, and provide that documentation to the Exchange.(ii)Recovery would violate home country law where that law was adopted prior to November 28, 2022. Before concluding that it would be impracticable to recover any amount of erroneously awarded compensation based on violation of home country law, the Company shall obtain an opinion of home country counsel, acceptable to the Exchange, that recovery would result in such a violation, and shall provide such opinion to the Exchange.(iii)Recovery would likely cause an otherwise tax-qualified retirement plan, under which benefits are broadly available to employees of the Company, to fail to meet the requirements of 26 U.S.C. 401(a)(13) or 26 U.S.C. 411(a) and regulations thereunder.(e)Prohibition on Indemnification. The Company shall not indemnify any current or former executive officer against the loss of erroneously awarded compensation.(f)Method of Recovery. The Committee shall determine, in its sole and exclusive discretion, the method or methods for recovering any erroneously awarded compensation, which methods need not be the same, or applied in the same manner, to each executive officer, provided that any such method shall provide for reasonably prompt recovery and otherwise comply with any requirements of the Exchange.4.Disclosure. The Company shall file all disclosures with respect to this Policy in accordance with the requirements of the Federal securities laws, including the disclosure required by the applicable rules of the SEC.5.Administration.(a)Effective Date. This Policy shall take effect on the Effective Date and shall supplement the Companyâ€™s Recoupment Policy (as in effect from time to time, the â€œExisting Policyâ€).(b)Authority of Committee. This Policy shall be administered and interpreted by the Committee in accordance with Section 303A.14 of the NYSE Listed Company Manual, Section 10D of the Exchange Act and other applicable Federal securities laws and regulations. Except as limited by applicable law, and subject to the provisions of this Policy, the Committee shall have full power, authority and sole and exclusive discretion to construe, interpret and administer this Policy, and to delegate its authority pursuant to this Policy. In addition, the Committee shall have full and exclusive power to adopt such rules, regulations and guidelines for carrying out this Policy and to amend this Policy, in each case, as it may deem necessary or proper. Subject to Section 3(d), this Policy also may be administered by the Board, and references in this Policy to the â€œCommitteeâ€ shall be understood to refer to the full Board.(c)Decisions Binding. In making any determination or in taking or not taking any action under this Policy, the Committee may obtain and rely on the advice of experts, including employees of, and professional advisors to, the Company. Any action taken by, or inaction of, the Committee or its delegates relating to or pursuant to this Policy shall be within the absolute discretion of the Committee or its delegates. Such action or inaction of the Committee or its delegates shall be conclusive and binding on the Company and any current or former executive officer affected by such action or inaction.(d)Policy Not Exclusive. Any right of recovery under this Policy is in addition to, and not in lieu of, any other remedies or rights of recovery, recoupment, forfeiture or offset that may be available to the Company pursuant to the terms of any other applicable Company policy (including the Existing Policy), compensation or benefit plan, agreement or arrangement or other agreement or applicable law; provided, however, that there shall be no duplication of recovery of the same compensation.

Accordingly, the statements do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation were included. The results of operations for the three and nine months ended September 30, 2024 are not necessarily indicative of the results that may be expected for the year ending DecemberÂ 31, 2024. Certain items in prior periods were reclassified to conform to the current presentation. The accompanying unaudited financial statements should be read in conjunction with the consolidated financial statements and footnotes included in the Annual Report on Form 10-K of Comerica Incorporated and Subsidiaries (the Corporation) for the year ended DecemberÂ 31, 2023 (2023 Annual Report).Accounting Pronouncements Recently AdoptedEffective January 1, 2024, the Corporation adopted the provisions of Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) No. 2023-02, "Investments-Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method (a consensus of the Emerging Issues Task Force)" (ASU 2023-02). ASU 2023-02 expanded the permitted use of the proportional amortization method, which was previously only available to low-income housing tax credit investments, to other tax equity investments if certain conditions are met. Under the proportional amortization method, the initial cost of an investment is amortized in proportion to the income tax benefits received and both the amortization of the investment and the income tax benefits received are recognized as a component of income tax expense. ASU 2023-02 was adopted on a modified retrospective basis of transition or, for certain changes, a prospective basis and resulted in a reduction to retained earnings as of January 1, 2024 of $4 million.Recently Issued Accounting PronouncementsIn November 2023, the FASB issued ASU No. 2023-07 "Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures" (ASU 2023-07). The update requires enhanced disclosures about significant segment expenses, enhanced interim disclosure requirements, clarification for when multiple segment measures of profit or loss can be disclosed and other requirements intended to improve overall reportable segment disclosures in annual and interim periods. ASU 2023-07 is effective for the Corporation in the annual period beginning on January 1, 2024 and interim periods beginning on January 1, 2025 with retrospective application to all prior periods presented. Early adoption is permitted. The Corporation will provide the enhanced disclosures, including expanded expense categories by segment, beginning with the Annual Report on Form 10-K for the year ended December 31, 2024.In December 2023, the FASB issued ASU No. 2023-09 "Income Taxes (Topic 740): Improvements to Income Tax Disclosures" (ASU 2023-09). ASU 2023-09 requires additional annual disclosures including further disaggregation of information in the rate reconciliation, additional information for reconciling items meeting a quantitative threshold, further disaggregation of income taxes paid and other required disclosures. ASU 2023-09 is effective for the Corporation in the annual period beginning on January 1, 2025 and applied on a prospective basis with both early adoption and retrospective application permitted. The Corporation is evaluating the impact of ASU 2023-09 on its income tax disclosures. The determination of fair values of financial instruments often requires the use of estimates. In cases where quoted market values in an active market are not available, the Corporation uses present value techniques and other valuation methods to estimate the fair values of its financial instruments. These valuation methods require considerable judgment and the resulting estimates of fair value can be significantly affected by the assumptions made and methods used.Investment securities available-for-sale, derivatives, deferred compensation plans and equity securities with readily determinable fair values (primarily money market mutual funds) are recorded at fair value on a recurring basis. Additionally, from time to time, the Corporation may be required to record other assets and liabilities at fair value on a nonrecurring basis, such as impaired loans, loans held for sale, other real estate (primarily foreclosed property), nonmarketable equity securities and certain other assets and liabilities. These nonrecurring fair value adjustments typically involve write-downs of individual assets or application of lower of cost or fair value accounting.Refer to Note 1 to the consolidated financial statements in the Corporation's 2023 Annual Report for further information about the fair value hierarchy, descriptions of the valuation methodologies and key inputs used to measure financial assets and liabilities recorded at fair value, as well as a description of the methods and significant assumptions used to estimate fair value disclosures for financial instruments not recorded at fair value in their entirety on a recurring basis.Assets and Liabilities Recorded at Fair Value on a Recurring BasisThe following tables present the recorded amount of assets and liabilities measured at fair value on a recurring basis as of SeptemberÂ 30, 2024 and DecemberÂ 31, 2023.(in millions)TotalLevelÂ 1LevelÂ 2LevelÂ 3September 30, 2024Deferred compensation plan assets$91Â $91Â $â€”Â $â€”Â Equity securities47Â 47Â â€”Â â€”Â Investment securities available-for-sale:U.S. Treasury securities1,169Â 1,169Â â€”Â â€”Â Residential mortgage-backed securities (a)9,825Â â€”Â 9,825Â â€”Â Commercial mortgage-backed securities (a)4,892Â â€”Â 4,892Â â€”Â Total investment securities available-for-sale15,886Â 1,169Â 14,717Â â€”Â Derivative assets:Interest rate contracts197Â â€”Â 197Â â€”Â Energy contracts593Â â€”Â 593Â â€”Â Foreign exchange contracts42Â â€”Â 42Â â€”Â Total derivative assets832Â â€”Â 832Â â€”Â Total assets at fair value$16,856Â $1,307Â $15,549Â $â€”Â Derivative liabilities:Interest rate contracts$340Â $â€”Â $340Â $â€”Â Energy contracts572Â â€”Â 572Â â€”Â Foreign exchange contracts37Â â€”Â 37Â â€”Â Other financial derivative liabilities11Â â€”Â â€”Â 11Â Total derivative liabilities960Â â€”Â 949Â 11Â Deferred compensation plan liabilities91Â 91Â â€”Â â€”Â Total liabilities at fair value$1,051Â $91Â $949Â $11Â December 31, 2023Deferred compensation plan assets$104Â $104Â $â€”Â $â€”Â Equity securities39Â 39Â â€”Â â€”Â Investment securities available-for-sale:U.S. Treasury securities1,605Â 1,605Â â€”Â â€”Â Residential mortgage-backed securities (a)10,519Â â€”Â 10,519Â â€”Â Commercial mortgage-backed securities (a)4,745Â â€”Â 4,745Â â€”Â Total investment securities available-for-sale16,869Â 1,605Â 15,264Â â€”Â Derivative assets:Interest rate contracts225Â â€”Â 225Â â€”Â Energy contracts758Â â€”Â 758Â â€”Â Foreign exchange contracts36Â â€”Â 36Â â€”Â Total derivative assets1,019Â â€”Â 1,019Â â€”Â Total assets at fair value$18,031Â $1,748Â $16,283Â $â€”Â Derivative liabilities:Interest rate contracts$435Â $â€”Â $435Â $â€”Â Energy contracts736Â â€”Â 736Â â€”Â Foreign exchange contracts35Â â€”Â 35Â â€”Â Other financial derivative liabilities12Â â€”Â â€”Â 12Â Total derivative liabilities1,218Â â€”Â 1,206Â 12Â Deferred compensation plan liabilities104Â 104Â â€”Â â€”Â Total liabilities at fair value$1,322Â $104Â $1,206Â $12Â (a)Issued and/or guaranteed by U.S. government agencies or U.S. government-sponsored enterprises.Â Â Â Â There were no transfers of assets or liabilities recorded at fair value on a recurring basis into or out of Level 3 fair value measurements during the three- and nine-month periods ended September 30, 2024 and 2023.The following table summarizes the changes in Level 3 assets and liabilities measured at fair value on a recurring basis for the three- and nine-month periods ended September 30, 2024 and 2023.Net Realized/Unrealized Gains (Losses) (Pretax) Recorded in Earnings (a)(in millions)BalanceÂ at Beginning of PeriodRealizedUnrealizedBalanceÂ at End of PeriodThree Months Ended September 30, 2024Derivative liabilities:Other financial derivative liabilities(6)â€”Â (5)(11)Three Months Ended September 30, 2023Derivative liabilities:Other financial derivative liabilities(14)â€”Â 1Â (13)Nine Months Ended September 30, 2024Derivative liabilities:Other financial derivative liabilities(12)6Â (5)(11)Nine Months Ended September 30, 2023Derivative liabilities:Other financial derivative liabilities(12)â€”Â (1)(13)(a)Realized and unrealized gains and losses due to changes in fair value are recorded in other noninterest income on the Consolidated Statements of Comprehensive Income.Assets and Liabilities Recorded at Fair Value on a Nonrecurring BasisThe Corporation may be required to record certain assets and liabilities at fair value on a nonrecurring basis. These include assets that are recorded at the lower of cost or fair value, and were recognized at fair value since it was less than cost at the end of the period. The following table presents assets recorded at fair value on a nonrecurring basis at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023. The unobservable inputs were the additional adjustments applied by management to the appraised values to reflect such factors as non-current appraisals and revisions to estimated time to sell. These adjustments are determined based on qualitative judgments made by management on a case-by-case basis and are not observable inputs, although they are used in the determination of fair value. At SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, loans held-for-sale classified as Level 3 represented loans held-for-sale in less liquid markets requiring significant management assumptions when determining fair value.Estimated Fair Values of Financial Instruments Not Recorded at Fair Value on a Recurring BasisThe Corporation typically holds the majority of its financial instruments until maturity and thus does not expect to realize many of the estimated fair value amounts disclosed. The disclosures do not include estimated fair value amounts for items that are not defined as financial instruments, but which have significant value. These include such items as core deposit intangibles, the future earnings potential of significant customer relationships and the value of trust operations and other fee generating businesses. The Corporation believes the imprecision of an estimate could be significant. The disclosures also do not include a limited amount of nonmarketable equity securities (primarily indirect private equity and venture capital investments) that do not have a readily determinable fair value and whose fair values are based on net asset value. The carrying amount and estimated fair value of financial instruments not recorded at fair value in their entirety on a recurring basis on the Corporationâ€™s Consolidated Balance Sheets are as follows:Â CarryingAmountEstimated FairÂ Value(in millions)TotalLevel 1Level 2Level 3September 30, 2024AssetsCash and due from banks$870Â $870Â $870Â $â€”Â $â€”Â Interest-bearing deposits with banks5,523Â 5,523Â 5,523Â â€”Â â€”Â Other short-term investments21Â 21Â 21Â â€”Â â€”Â Total loans, net of allowance for loan losses (a)49,831Â 50,043Â â€”Â â€”Â 50,043Â LiabilitiesDemand deposits57,443Â 57,443Â â€”Â 57,443Â â€”Â Time deposits5,634Â 5,673Â â€”Â 5,673Â â€”Â Total deposits63,077Â 63,116Â â€”Â 63,116Â â€”Â Medium- and long-term debt6,786Â 6,867Â â€”Â 6,867Â â€”Â Credit-related financial instruments(66)(66)â€”Â â€”Â (66)December 31, 2023AssetsCash and due from banks$1,443Â $1,443Â $1,443Â $â€”Â $â€”Â Interest-bearing deposits with banks8,059Â 8,059Â 8,059Â â€”Â â€”Â Other short-term investments 24Â 24Â 24Â â€”Â â€”Â Total loans, net of allowance for loan losses (a)51,425Â 50,633Â â€”Â â€”Â 50,633Â LiabilitiesDemand deposits58,476Â 58,476Â â€”Â 58,476Â â€”Â Time deposits8,286Â 8,391Â â€”Â 8,391Â â€”Â Total deposits66,762Â 66,867Â â€”Â 66,867Â â€”Â Short-term borrowings3,565Â 3,565Â 3,565Â â€”Â â€”Â Medium- and long-term debt6,206Â 6,207Â â€”Â 6,207Â â€”Â Credit-related financial instruments(72)(72)â€”Â â€”Â (72)(a)Included $105 million and $44 million of loans recorded at fair value on a nonrecurring basis at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively. The Corporationâ€™s portfolio is comprised of securities issued or guaranteed by U.S. government agencies or government-sponsored enterprises. As such, it is expected that the securities would not be settled at a price less than the amortized cost of the investments. Further, the Corporation does not intend to sell the investments, and it is not more-likely-than-not that it will be required to sell the investments before recovery of amortized costs. No allowance for credit losses was recorded on securities in an unrealized loss position at SeptemberÂ 30, 2024 or DecemberÂ 31, 2023.Interest receivable on investment securities totaled $36 million at SeptemberÂ 30, 2024 and $40 million at DecemberÂ 31, 2023 and was included in accrued income and other assets on the Consolidated Balance Sheets. The investment securities portfolio included floating-rate securities with a fair value of $3 million and $4 million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively.There were no sales, calls or write-downs of investment securities available-for-sale during the three- and nine-month periods ended September 30, 2024 or SeptemberÂ 30, 2023. The following table summarizes the amortized cost and fair values of investment securities by contractual maturity. Securities with multiple maturity dates are classified in the period of final maturity. The actual cash flows of mortgage-backed securities may differ as borrowers of the underlying loans may exercise prepayment options. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.(in millions)September 30, 2024Amortized CostFair ValueContractual maturityOne year or less$992Â $972Â After one year through five years553Â 531Â After five years through ten years5,149Â 4,783Â After ten years11,445Â 9,600Â Total investment securities$18,139Â $15,886Â At SeptemberÂ 30, 2024, investment securities with a carrying value of $7.3 billion were pledged where permitted or required by law. (b)Includes loans with an internal rating of special mention, substandard loans for which the accrual of interest has not been discontinued and nonaccrual loans. Special mention loans have potential credit weaknesses that deserve managementâ€™s close attention, such as loans to borrowers who may be experiencing financial difficulties that may result in deterioration of repayment prospects from the borrower at some future date. Accruing substandard loans have a well-defined weakness, or weaknesses, such as loans to borrowers who may be experiencing losses from operations or inadequate liquidity of a degree and duration that jeopardizes the orderly repayment of the loan. Substandard loans are also distinguished by the distinct possibility of loss in the future if these weaknesses are not corrected. Nonaccrual loans are loans for which the accrual of interest has been discontinued. For further information regarding nonaccrual loans, refer to the Nonperforming Assets subheading in Note 1 - Basis of Presentation and Accounting Policies on page F-52 in the Corporation's 2023 Annual Report. These categories are generally consistent with the "special mention" and "substandard" categories as defined by regulatory authorities. A minority of nonaccrual loans are consistent with the "doubtful" category.Loan interest receivable totaled $277 million and $313 million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively, and was included in accrued income and other assets on the Consolidated Balance Sheets.Allowance for Credit LossesThe following table details the changes in the allowance for credit losses.Â 20242023(in millions)Business LoansRetail LoansTotalBusiness LoansRetail LoansTotalThree Months Ended September 30Balance at beginning of period:Allowance for loan losses$620Â $66Â $686Â $614Â $70Â $684Â Allowance for credit losses on lending-related commitments23Â 8Â 31Â 34Â 10Â 44Â Allowance for credit losses643Â 74Â 717Â 648Â 80Â 728Â Loan charge-offs(23)â€”Â (23)(13)(1)(14)Recoveries on loans previously charged-off12Â â€”Â 12Â 7Â 1Â 8Â Net loan charge-offs(11)â€”Â (11)(6)â€”Â (6)Provision for credit losses:Provision for loan losses9Â 2Â 11Â 18Â (2)16Â Provision for credit losses on lending-related commitments3Â â€”Â 3Â (1)(1)(2)Provision for credit losses12Â 2Â 14Â 17Â (3)14Â Balance at end of period:Allowance for loan losses618Â 68Â 686Â 626Â 68Â 694Â Allowance for credit losses on lending-related commitments26Â 8Â 34Â 33Â 9Â 42Â Allowance for credit losses$644Â $76Â $720Â $659Â $77Â $736Â Nine Months Ended September 30Balance at beginning of periodAllowance for loan losses$620Â $68Â $688Â $541Â $69Â $610Â Allowance for credit losses on lending-related commitments31Â 9Â 40Â 40Â 11Â 51Â Allowance for credit losses651Â 77Â 728Â 581Â 80Â 661Â Loan charge-offs(71)(1)(72)(34)(3)(37)Recoveries on loans previously charged-off34Â 2Â 36Â 33Â 2Â 35Â Net loan (charge-offs) recoveries(37)1Â (36)(1)(1)(2)Provision for credit losses:Provision for loan losses35Â (1)34Â 86Â â€”Â 86Â Provision for credit losses on lending-related commitments(5)(1)(6)(7)(2)(9)Provision for credit losses30Â (2)28Â 79Â (2)77Â Balance at end of period:Allowance for loan losses618Â 68Â 686Â 626Â 68Â 694Â Allowance for credit losses on lending-related commitments26Â 8Â 34Â 33Â 9Â 42Â Allowance for credit losses$644Â $76Â $720Â $659Â $77Â $736Â Allowance for loan losses as a percentage of total loans1.33Â %1.63Â %1.36Â %1.27Â %1.62Â %1.30Â %Allowance for credit losses as a percentage of total loans1.39Â 1.83Â 1.43Â 1.34Â 1.84Â 1.38Â Nonaccrual LoansThe following table presents additional information regarding nonaccrual loans. On an ongoing basis, the Corporation monitors the performance of modified loans related to their restructured terms. Loans restructured during the three- and nine-month periods ended September 30, 2024 and 2023 were current under modified terms at SeptemberÂ 30, 2024 and SeptemberÂ 30, 2023. Nonperforming restructured loans are classified as nonaccrual loans and are individually evaluated for the allowance for loan losses.For restructured loans, a subsequent payment default is defined in terms of delinquency, when a principal or interest payment is 90 days past due or classified into nonaccrual status during the reporting period. Of the loans restructured during the nine-month period ended September 30, 2024, there were $7 million of commercial loans that subsequently defaulted. There were no subsequent defaults on loans restructured during the three-month period ended September 30, 2024 and three- and nine-month periods ended September 30, 2023. The Corporation first assessed qualitative factors to determine whether it was more likely than not that the fair value of any reporting unit was less than its carrying amount, including goodwill. Qualitative factors included economic conditions, industry and market considerations, cost factors, overall financial performance and performance of the Corporation's stock, among other events and circumstances. At the conclusion of the qualitative assessment in third quarter 2024, the Corporation determined that it was more likely than not that the fair value of each reporting unit exceeded its carrying value.Analyzing goodwill includes consideration of various factors that involve a degree of uncertainty, including the impacts of monetary policy actions, foreign developments, and unanticipated legislative or regulatory changes, among other factors that could cause the fair value of one or more of the reporting units to fall below their carrying value, resulting in a goodwill impairment charge in the future. Any impairment charge would not affect the Corporation's regulatory capital ratios, tangible equity ratio or liquidity position. These financial instruments involve, to varying degrees, elements of market and credit risk. Market and credit risk are included in the determination of fair value.Market risk is the potential loss that may result from movements in interest rates, foreign currency exchange rates or energy commodity prices that cause an unfavorable change in the value of a financial instrument. The Corporation manages this risk by establishing monetary exposure limits and monitoring compliance with those limits. Market risk inherent in interest rate and energy contracts entered into on behalf of customers is mitigated by taking offsetting positions, except in those circumstances when the amount, tenor and/or contract rate level results in negligible economic risk, whereby the cost of purchasing an offsetting contract is not economically justifiable. The Corporation mitigates most of the inherent market risk in foreign exchange contracts entered into on behalf of customers by taking offsetting positions and manages the remainder through individual foreign currency position limits and aggregate value-at-risk limits. Position and value-at-risk limits are established annually and monitored daily. Market risk inherent in derivative instruments held or issued for risk management purposes is typically offset by changes in the fair value of the assets or liabilities being hedged.Credit risk is the possible loss that may occur in the event of nonperformance by the counterparty to a financial instrument. The Corporation attempts to minimize credit risk arising from customer-initiated derivatives by evaluating the creditworthiness of each customer, adhering to the same credit approval process used for traditional lending activities and obtaining collateral as deemed necessary. Derivatives with dealer counterparties are either cleared through a clearinghouse or settled directly with a single counterparty. For derivatives settled directly with dealer counterparties, the Corporation utilizes counterparty risk limits and monitoring procedures as well as master netting arrangements and bilateral collateral agreements to facilitate the management of credit risk.Included in the fair value of derivative instruments are credit valuation adjustments reflecting counterparty credit risk. These adjustments are determined by applying a credit spread for the counterparty or the Corporation, as appropriate, to the total expected exposure of the derivative. Master netting arrangements effectively reduce credit valuation adjustments by permitting settlement of positive and negative positions and offset cash collateral held with the same counterparty on a net basis. Bilateral collateral agreements require daily exchange of cash or highly rated securities issued by the U.S. Treasury or other U.S. government entities to collateralize amounts due to either party. At SeptemberÂ 30, 2024, counterparties with bilateral collateral agreements deposited $59 million of cash with the Corporation to secure the fair value of contracts in an unrealized gain position, and the Corporation had pledged $4 million of marketable investment securities and posted $5 million of cash as collateral for contracts in an unrealized loss position. For those counterparties not covered under bilateral collateral agreements, collateral is obtained, if deemed necessary, based on the results of managementâ€™s credit evaluation of the counterparty. Collateral varies, but may include cash, investment securities, accounts receivable, equipment or real estate. Derivative InstrumentsDerivative instruments utilized by the Corporation are negotiated over-the-counter and primarily include swaps, caps and floors, forward contracts and options, each of which may relate to interest rates, energy commodity prices or foreign currency exchange rates. Swaps are agreements in which two parties periodically exchange cash payments based on specified indices applied to a specified notional amount until a stated maturity. Caps and floors are agreements which entitle the buyer to receive cash payments based on the difference between a specified reference rate or price and an agreed strike rate or price, applied to a specified notional amount until a stated maturity. Forward contracts are over-the-counter agreements to buy or sell an asset at a specified future date and price. Options are similar to forward contracts except the purchaser has the right, but not the obligation, to buy or sell the asset during a specified period or at a specified future date.Over-the-counter contracts are tailored to meet the needs of the counterparties involved and, therefore, contain a greater degree of credit risk and liquidity risk than exchange-traded contracts, which have standardized terms and readily available price information. The Corporation reduces exposure to market and liquidity risks from over-the-counter derivative instruments entered into for risk management purposes, and transactions entered into to mitigate the market risk associated with customer-initiated transactions, by taking offsetting positions with investment grade domestic and foreign financial institutions and subjecting counterparties to credit approvals, limits and collateral monitoring procedures similar to those used in making other extensions of credit. In addition, certain derivative contracts executed bilaterally with a dealer counterparty in the over-the-counter market are cleared through a clearinghouse, whereby the clearinghouse becomes the counterparty to the transaction.The following table presents the composition of the Corporationâ€™s derivative instruments held or issued for risk management purposes or in connection with customer-initiated and other activities at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023. Included in the fair value of net derivative assets and net derivative liabilities are credit valuation adjustments reflecting counterparty credit risk and credit risk of the Corporation. The fair value of net derivative assets included credit valuation adjustments for counterparty credit risk of $3Â million at both SeptemberÂ 30, 2024 and DecemberÂ 31, 2023.Risk ManagementThe Corporation's derivative instruments used for managing interest rate risk include cash flow hedging strategies that convert variable-rate loans to fixed rates and fair value hedging strategies that convert fixed-rate medium- and long-term debt to variable rates. Interest and fees on loans included $178 million and $163 million of cash flow hedge losses for the three-month periods ended September 30, 2024 and 2023, respectively, and $522Â million and $432 million of cash flow hedge losses for the nine-month periods ended September 30, 2024 and 2023, respectively.The following table details the effects of fair value hedging on the Consolidated Statements of Comprehensive Income.Interest on Medium- and Long-Term DebtÂ Three Months Ended September 30,Nine Months Ended September 30,(in millions)20242023202420232024Total interest on medium- and long-term debt (a)$117Â $106Â $358Â $273Â Fair value hedging relationships: Interest rate contracts:Hedged items84Â 74Â 252Â 194Â Derivatives designated as hedging instruments33Â 32Â 106Â 79Â (a) Includes the effects of hedging.Â Â Â Â The following tables summarize the expected weighted average remaining maturity of the notional amount of risk management interest rate swaps, the weighted average interest rates associated with amounts expected to be received or paid on interest rate swap agreements, and for fair value swaps, the weighted average carrying amount of the related hedged items, as of SeptemberÂ 30, 2024 and DecemberÂ 31, 2023.Cash flow swaps - receive fixed/pay floating rate on variable-rate loansSeptember 30, 2024December 31, 2023Weighted average:Â Â Â Time to maturity (inÂ years)2.7Â 3.9Â Â Â Â Receive rate (a)2.51Â %2.43Â %Â Â Â PayÂ rate (a), (b)5.19Â 5.38Â (a)Excludes forward starting swaps not effective as of the period shown. Re-designated Interest Rate Swaps and Price Alignment IncomeOn November 15, 2023, the Bloomberg Index Services Limited (Bloomberg) announced that it will discontinue publishing the Bloomberg Short-Term Bank Yield Index (BSBY) on November 15, 2024; accordingly, the Corporation was required to â€œde-designateâ€ $7.0 billion of interest rate swaps used in cash flow hedges of certain BSBY-indexed loans and reclassify amounts recognized in accumulated other comprehensive income into earnings. For each de-designated swap, settlement of interest payments and changes in fair value were recorded as risk management hedging losses within noninterest income instead of net interest income until re-designation. As all impacted swaps were re-designated as of April 1, 2024, there was no impact to noninterest income for the three-month periods ended SeptemberÂ 30, 2024 and JuneÂ 30, 2024. A total of $130Â million in net losses were included in noninterest income as a result of the de-designations, consisting of $39Â million during the first quarter 2024 and $91Â million during the fourth quarter 2023.Amounts in accumulated other comprehensive income related to cash flows that continued to be probable of occurring were amortized out of accumulated other comprehensive income and into earnings, which resulted in pre-tax losses of $52Â million recorded in interest and fees on loans during both three-month periods ended SeptemberÂ 30, 2024 and JuneÂ 30, 2024. Additionally, the fair value of swaps at re-designation date were accreted back into accumulated other comprehensive income, resulting in benefits of $43Â million for the three months ended September 30, 2024 and $49 million for the three months ended June 30, 2024. The amortization of probable cash flows and fair value accretion resulted in net losses of $9 million and $3 million included in net interest income for the three months ended September 30, 2024 and JuneÂ 30, 2024, respectively. BSBY cessation and the related de-designation and re-designation of interest rate swaps led to net increases in accumulated other comprehensive income of $7 million and $2 million for the three months ended September 30, 2024 and JuneÂ 30, 2024, respectively.For more information on accumulated net losses on cash flow hedges, refer to Note 9.Risk management hedging income (loss) also includes price alignment income, which is income received on payments made to a central clearing party for centrally cleared derivatives. Positions are settled daily based on derivative fair values and the party receiving net settlement amounts pays price alignment, based on an earning rate, to the party making settlement payments. Price alignment income totaled $8 million and $17 million for the three-month periods ended September 30, 2024 and 2023, respectively, and $38 million and $32 million for the nine-month periods ended September 30, 2024 and 2023.Customer-Initiated and OtherThe Corporation enters into derivative transactions at the request of customers and generally takes offsetting positions with dealer counterparties to help mitigate the inherent market risk. Income primarily results from the spread between the customer derivative and the offsetting dealer position.For customer-initiated foreign exchange contracts where offsetting positions have not been taken, the Corporation manages the remaining inherent market risk through individual foreign currency position limits and aggregate value-at-risk limits. Position and value-at-risk limits are established annually and monitored daily. For foreign exchange derivative contracts which were not offset or where the Corporation holds a position within the limits described above, the Corporation did not recognize any net gains or losses for the three months ended September 30, 2024 and 2023. The Corporation did not recognize any gains or loss for the nine months ended September 30, 2024, compared to a net loss of $1 million for the nine months ended September 30, 2023.Fair values of customer-initiated and other derivative instruments represent the net unrealized gains or losses on such contracts and are recorded on the Consolidated Balance Sheets. Changes in fair value are recognized on the Consolidated Statements of Comprehensive Income. The net gains recognized in income on customer-initiated derivative instruments, net of the impact of offsetting positions included in capital markets income, were as follows:Three Months Ended September 30,Nine Months Ended September 30,(in millions)20242023202420232024Interest rate contracts$7Â $5Â $15Â $17Â Energy contracts5Â 4Â 13Â 17Â Foreign exchange contracts11Â 12Â 35Â 40Â Total$23Â $21Â $63Â $74Â Credit-Related Financial InstrumentsThe Corporation issues off-balance sheet financial instruments in connection with commercial and consumer lending activities. The allowance for credit losses on lending-related commitments, included in accrued expenses and other liabilities on the Consolidated Balance Sheets, was $34 million and $40 million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively.Unused Commitments to Extend CreditCommitments to extend credit are legally binding agreements to lend to a customer, provided there is no violation of any condition established in the contract. These commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many commitments expire without being drawn upon, the total contractual amount of commitments does not necessarily represent future cash requirements of the Corporation. Commercial and other unused commitments are primarily variable rate commitments. The allowance for credit losses on lending-related commitments included $31 million at SeptemberÂ 30, 2024 and $38 million at DecemberÂ 31, 2023 for expected credit losses inherent in the Corporationâ€™s unused commitments to extend credit.Standby and Commercial Letters of CreditStandby letters of credit represent conditional obligations of the Corporation which guarantee the performance of a customer to a third party. Standby letters of credit are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing and similar transactions. Commercial letters of credit are issued to finance foreign or domestic trade transactions. These contracts expire in decreasing amounts through the year. The Corporation may enter into participation arrangements with third parties that effectively reduce the maximum amount of future payments which may be required under standby and commercial letters of credit. These risk participations covered $73 million and $85 million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively, of the $3.8 billion and $3.6Â billion of standby and commercial letters of credit outstanding at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively.The carrying value of the Corporationâ€™s standby and commercial letters of credit, included in accrued expenses and other liabilities on the Consolidated Balance Sheets, totaled $35 million at SeptemberÂ 30, 2024, including $32 million in deferred fees and $3 million in the allowance for credit losses on lending-related commitments. At DecemberÂ 31, 2023, the comparable amounts were $34 million, $32 million and $2 million, respectively.The following table presents a summary of criticized standby and commercial letters of credit at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023. The Corporation's criticized list is consistent with the Special Mention, Substandard and Doubtful categories defined by regulatory authorities. The Corporation is not a party to the interest rate derivative contracts and only enters into these credit risk participation agreements in instances in which the Corporation is also a party to the related loan participation agreements for such borrowers. The Corporation manages its credit risk on the credit risk participation agreements by monitoring the creditworthiness of the borrowers, which is based on the normal credit review process as if the Corporation had entered into the derivative instruments directly with the borrower. The notional amount of such credit risk participation agreements reflects the pro-rata share of the derivative instrument, consistent with its share of the related participated loan. The total notional amount of the credit risk participation agreements was approximately $1.0 billion at both SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, and the fair value was insignificant at both SeptemberÂ 30, 2024 and DecemberÂ 31, 2023. The maximum estimated exposure to these agreements, as measured by projecting a maximum value of the guaranteed derivative instruments, assuming 100 percent default by all obligors on the maximum values, was $8Â million and $2Â million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively. In the event of default, the lead bank has the ability to liquidate the assets of the borrower, in which case the lead bank would be required to return a percentage of the recouped assets to the participating banks. As of SeptemberÂ 30, 2024, the weighted average remaining maturity of outstanding credit risk participation agreements was 4.6 years.In 2008, the Corporation sold its remaining ownership of Visa Class B shares and entered into a derivative contract. Under the terms of the derivative contract, the Corporation will compensate the counterparty primarily for dilutive adjustments made to the conversion factor of the Visa Class B shares to Class A shares based on the ultimate outcome of litigation involving Visa. Conversely, the Corporation will be compensated by the counterparty for any increase in the conversion factor from anti-dilutive adjustments. The fair value of the derivative liability, included in accrued expenses and other liabilities on the Consolidated Balance Sheets, was $11Â million and $12Â million at SeptemberÂ 30, 2024 and DecemberÂ 31, 2023, respectively. The Corporation holds ownership interests in funds in the form of limited partnerships or limited liability companies (LLCs) investing in affordable housing projects that qualify for the low-income housing tax credit (LIHTC). The Corporation also directly invests in limited partnerships and LLCs which invest in community development projects, which generate similar tax credits to investors (other tax credit entities). As an investor, the Corporation obtains income tax credits and deductions from the operating losses of these tax credit entities. These tax credit entities meet the definition of a VIE; however, the Corporation is not the primary beneficiary of the entities, as the general partner or the managing member has both the power to direct the activities that most significantly impact the economic performance of the entities and the obligation to absorb losses or the right to receive benefits that could be significant to the entities.The Corporation accounts for its interests in LIHTC entities and, upon adoption of ASU 2023-02 as discussed in Note 1, other tax credit entities that meet certain criteria using the proportional amortization method. Ownership interests in tax credit entities that do not qualify for the proportional amortization method are accounted for under either the cost or equity method. Exposure to loss as a result of the Corporation's involvement in entities using the proportional amortization method and other tax credit entities at SeptemberÂ 30, 2024 was limited to $579 million and $1 million, respectively. Investment balances, including all legally binding commitments to fund future investments that are accounted for using the proportional amortization method, are included in accrued income and other assets on the Consolidated Balance Sheets. A liability is recognized in accrued expenses and other liabilities on the Consolidated Balance Sheets for all legally binding unfunded commitments to fund tax credit entities that are accounted for using the proportional amortization method ($255 million at SeptemberÂ 30, 2024). Amortization and other write-downs of tax credit investments for which the proportional amortization method is applied are presented on a net basis as a component of the provision for income taxes on the Consolidated Statements of Comprehensive Income, while amortization and write-downs of other tax credit investments are recorded in other noninterest income. The income tax credits and deductions are recorded as a reduction of income tax expense and a reduction of federal income taxes payable. The cash flows related to the total income tax benefits are presented in the "net income," "benefit for deferred income taxes" and "other, net" line items within the operating activities section of the Consolidated Statements of Cash Flows.The Corporation provided no financial or other support that was not contractually required to any of the above VIEs during the nine months ended September 30, 2024 and 2023.The following table summarizes the impact of these tax credit investments under the proportional amortization method on the Corporationâ€™s Consolidated Statements of Comprehensive Income.Three Months Ended September 30,Nine Months Ended September 30,(in millions)20242024Provision for income taxes:Amortization of investments$16Â $55Â Tax credits(17)(55)Other income tax benefits related to tax credit entities(3)(11)Total provision for income taxes(4)(11)Prior to the adoption of ASU 2023-02, only LIHTC investments qualified for the proportional amortization method of accounting. The Corporation does not anticipate any final settlements of federal or state tax issues to result in a change of net unrecognized tax benefits within the next twelve months. The liability for tax-related interest and penalties, included in accrued expenses and other liabilities on the Consolidated Balance Sheets, was less than $1 million at both SeptemberÂ 30, 2024 and DecemberÂ 31, 2023. Net deferred tax assets were $789Â million at SeptemberÂ 30, 2024, compared to $1.0 billion at DecemberÂ 31, 2023. The decrease of approximately $206Â million in net deferred tax assets resulted primarily from decreases to deferred tax assets related to hedging gains and losses, net unrealized losses on investment securities available-for-sale and an increase in deferred tax liabilities related to defined benefit plans. Included in deferred tax assets at SeptemberÂ 30, 2024 were $2 million of state net operating loss (NOL) carryforwards and $6Â million of federal foreign tax carryforwards, compared to $2 million and $5Â million at DecemberÂ 31, 2023, respectively. State NOL carryforwards expire between 2024 and 2042 and federal foreign tax credit carryforwards expire between 2028 and 2034. The Corporation believes that it is more likely than not that the benefit from federal foreign tax credits and certain state NOL carryforwards will not be realized and, accordingly, maintained a federal valuation allowance of $6Â million at SeptemberÂ 30, 2024, compared to $5Â million at DecemberÂ 31, 2023. The Corporation maintained a state valuation allowance of $1 million at both SeptemberÂ 30, 2024 and DecemberÂ 31, 2023. The determination regarding valuation allowance was based on evidence of loss carryback capacity, projected future reversals of existing taxable temporary differences to absorb the deferred tax assets and assumptions made regarding future events. In the ordinary course of business, the Corporation enters into certain transactions that have tax consequences. From time to time, the Internal Revenue Service (IRS) or other tax jurisdictions may review and/or challenge specific interpretive tax positions taken by the Corporation with respect to those transactions. The Corporation believes its tax returns were filed based upon applicable statutes, regulations and case law in effect at the time of the transactions. The IRS or other tax jurisdictions, an administrative authority or a court, if presented with the transactions, could disagree with the Corporationâ€™s interpretation of the tax law.Based on current knowledge and probability assessment of various potential outcomes, the Corporation believes that current tax reserves are adequate, and the amount of any potential incremental liability arising is not expected to have a material adverse effect on the Corporationâ€™s consolidated financial condition or results of operations. Probabilities and outcomes are reviewed as events unfold, and adjustments to the reserves are made when necessary. Settlement may result from the Corporation's determination that it may be more prudent financially to settle, rather than litigate, and should not be regarded as an admission of liability. Further, from time to time, the Corporation is also subject to examinations, inquiries and investigations by regulatory authorities in areas including, but not limited to, compliance, risk management and consumer protection, which could lead to administrative or legal proceedings or settlements. For example, the Consumer Financial Protection Bureau (CFPB) is investigating certain of the Corporation's practices, and the Corporation has responded and continues to respond to the CFPB. The Corporation is unable to predict the outcome of these discussions at this time. Remedies in these proceedings or settlements may include fines, penalties, restitution or alterations in the Corporation's business practices and may result in increased operating expenses or decreased revenues. On at least a quarterly basis, the Corporation assesses its potential liabilities and contingencies in connection with outstanding legal proceedings and regulatory matters utilizing the latest information available. On a case-by-case basis, accruals are established for those legal claims and regulatory matters for which it is probable that a loss will be incurred and the amount of such loss can be reasonably estimated. The actual costs of resolving these claims and regulatory matters may be substantially higher or lower than the amounts accrued. Based on current knowledge, and after consultation with legal counsel, management believes current accruals are adequate, and the amount of any incremental liability arising from these matters is not expected to have a material adverse effect on the Corporationâ€™s consolidated financial condition, results of operations or cash flows. For matters where a loss is not probable, the Corporation has not established an accrual. The Corporation believes the estimate of the aggregate range of reasonably possible losses, in excess of established accruals, for all legal proceedings and regulatory matters in which it is involved is from zero to approximately $172 million at SeptemberÂ 30, 2024. This estimated aggregate range of reasonably possible losses is based upon currently available information for those legal proceedings and regulatory matters in which the Corporation is involved, taking into account the Corporationâ€™s best estimate of such losses for those legal proceedings and regulatory matters for which such estimate can be made. For certain legal proceedings and regulatory matters, the Corporation does not believe that an estimate can currently be made. The Corporationâ€™s estimate involves significant judgment, given the varying stages of the legal proceedings and regulatory matters (including the fact that many are currently in preliminary stages), the existence in certain legal proceedings of multiple defendants (including the Corporation) whose share of liability has yet to be determined, the numerous yet-unresolved issues in many of the legal proceedings and regulatory matters (including issues regarding class certification and the scope of many of the claims) and the attendant uncertainty of the various potential outcomes of such legal proceedings and regulatory matters. Accordingly, the Corporationâ€™s estimate will change from time to time, and actual losses may be more or less than the current estimate.In the event of unexpected future developments, it is possible the ultimate resolution of these matters, if unfavorable, may be material to the Corporation's consolidated financial condition, results of operations or cash flows.For information regarding income tax contingencies, refer to Note 12. These business segments are differentiated based on the type of customer and the related products and services provided. In addition to the three major business segments, the Finance Division is also reported as a segment. The Other category includes items not directly associated with the business segments or the Finance segment. Business segment results are produced by the Corporationâ€™s internal management accounting system. This system measures financial results based on the internal business unit structure of the Corporation. The performance of the business segments is not comparable with the Corporation's consolidated results and is not necessarily comparable with similar information for any other financial institution. Additionally, because of the interrelationships of the various segments, the information presented is not indicative of how the segments would perform if they operated as independent entities. The management accounting system assigns balance sheet and income statement items to each business segment using certain methodologies, which are regularly reviewed and refined. From time to time, the Corporation may make reclassifications among the segments to more appropriately reflect management's current view of the segments, and methodologies may be modified as the management accounting system is enhanced and changes occur in the organizational structure and/or product lines. For comparability purposes, amounts in all periods are based on business unit structure and methodologies in effect at SeptemberÂ 30, 2024. The following discussion provides information about the activities of each business segment. A discussion of the financial results and the factors impacting performance can be found in "Business Segments" in the "Strategic Lines of Business" section of the financial review.The Commercial Bank meets the needs of small and middle market businesses, multinational corporations and governmental entities by offering various products and services including commercial loans and lines of credit, deposits, cash management, payment solutions, card services, capital market products, international trade finance and letters of credit.The Retail Bank includes a full range of personal financial services, consisting of consumer lending, consumer deposit gathering and mortgage loan origination. This business segment offers a variety of consumer products including deposit accounts, installment loans, credit cards, home equity lines of credit and residential mortgage loans. In addition, this business segment offers products and services to small businesses who are serviced through a team of dedicated business bankers and our branch network.WealthÂ Management provides products and services to affluent, high-net worth and ultra-high net worth individuals and families, business owners and executives, and institutional clients, including comprehensive financial planning, trust and fiduciary services, investment management and advisory, brokerage, private banking and business transition planning services. The Finance segment includes the Corporationâ€™s securities portfolio and asset and liability management activities. This segment is responsible for managing the Corporationâ€™s funding, liquidity and capital needs, performing interest sensitivity analysis and executing various strategies to manage the Corporationâ€™s exposure to liquidity, interest rate risk and foreign exchange risk.The Other category includes tax benefits not assigned to specific business segments, charges of an unusual or infrequent nature that are not reflective of the normal operations of the business segments and miscellaneous other expenses of a corporate nature.For further information on the methodologies which form the basis for these results refer to Note 22 to the consolidated financial statements in the Corporation's 2023 Annual Report.Business segment financial results were as follows:CommercialBankRetailBankWealth ManagementFinanceOtherTotal(dollar amounts in millions)Three Months Ended September 30, 2024Earnings Summary:Net interest income (expense)$464Â $205Â $46Â (220)39Â $534Provision for credit losses6Â 4Â 3Â â€”Â 1Â 14Noninterest income149Â 24Â 73Â 26Â 5Â 277Noninterest expenses252Â 175Â 90Â 1Â 44Â 562Provision (benefit) for income taxes83Â 12Â 7Â (48)(3)51Net income (loss)$272Â $38Â $19Â (147)2Â $184Net charge-offs$10Â $1Â $â€”Â $â€”Â $â€”Â $11Selected Average Balances:Assets $45,669Â $3,045Â $5,296Â $18,277Â $7,944Â $80,231Loans 43,462Â 2,347Â 5,042Â â€”Â 10Â 50,861Deposits32,261Â 24,224Â 3,844Â 3,300Â 267Â 63,896Statistical Data:Return on average assets (a)2.36Â %0.63Â %1.47Â %n/mn/m0.92Â %Efficiency ratio (b)41.23Â 74.24Â 75.35Â n/mn/m68.80Â Three Months Ended September 30, 2023Earnings Summary:Net interest income (expense)$505Â $208Â $49Â (187)26Â $601Provision (benefit) for credit losses22Â â€”Â (9)â€”Â 1Â 14Noninterest income150Â 31Â 78Â 40Â (4)295Noninterest expenses257Â 175Â 102Â 1Â 20Â 555Provision (benefit) for income taxes89Â 16Â 9Â (37)(1)76Net income (loss)$287Â $48Â $25Â (111)2Â $251Net charge-offs$6Â $â€”Â $â€”Â $â€”Â $6Selected Average Balances:Assets$49,459Â $2,985Â $5,557Â $19,832Â $11,317Â $89,150Loans46,477Â 2,250Â 5,227Â â€”Â 33Â 53,987Deposits31,868Â 24,034Â 3,950Â 5,711Â 320Â 65,883Statistical Data:Return on average assets (a)2.30Â %0.79Â %1.81Â %n/mn/m1.12Â %Efficiency ratio (b)39.34Â 72.71Â 79.99Â n/mn/m61.86Â (a)Return on average assets is calculated based on the greater of average assets or average liabilities and attributed equity.(b)Noninterest expenses as a percentage of the sum of net interest income and noninterest income excluding net gains (losses) from securities, a derivative contract tied to the conversion rate of Visa Class B shares and changes in the value of shares obtained through monetization of warrants. n/m â€“ not meaningful X - ReferencesNo definition available. + Details Name: us-gaap_SegmentReportingAbstract Namespace Prefix: us-gaap_ Data Type: xbrli:stringItemType Balance Type: na Period Type: duration X - DefinitionThe entire disclosure for reporting segments including data and tables. ASU 2023-02 expanded the permitted use of the proportional amortization method, which was previously only available to low-income housing tax credit investments, to other tax equity investments if certain conditions are met. Under the proportional amortization method, the initial cost of an investment is amortized in proportion to the income tax benefits received and both the amortization of the investment and the income tax benefits received are recognized as a component of income tax expense. ASU 2023-02 was adopted on a modified retrospective basis of transition or, for certain changes, a prospective basis and resulted in a reduction to retained earnings as of January 1, 2024 of $4 million.Recently Issued Accounting PronouncementsIn November 2023, the FASB issued ASU No. 2023-07 "Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures" (ASU 2023-07). The update requires enhanced disclosures about significant segment expenses, enhanced interim disclosure requirements, clarification for when multiple segment measures of profit or loss can be disclosed and other requirements intended to improve overall reportable segment disclosures in annual and interim periods. ASU 2023-07 is effective for the Corporation in the annual period beginning on January 1, 2024 and interim periods beginning on January 1, 2025 with retrospective application to all prior periods presented. Early adoption is permitted. The Corporation will provide the enhanced disclosures, including expanded expense categories by segment, beginning with the Annual Report on Form 10-K for the year ended December 31, 2024.In December 2023, the FASB issued ASU No. 2023-09 "Income Taxes (Topic 740): Improvements to Income Tax Disclosures" (ASU 2023-09). ASU 2023-09 requires additional annual disclosures including further disaggregation of information in the rate reconciliation, additional information for reconciling items meeting a quantitative threshold, further disaggregation of income taxes paid and other required disclosures. ASU 2023-09 is effective for the Corporation in the annual period beginning on January 1, 2025 and applied on a prospective basis with both early adoption and retrospective application permitted. The Corporation is evaluating the impact of ASU 2023-09 on its income tax disclosures. Loans By Credit Quality Indicator and Vintage Year The following table presents loans by credit quality indicator and vintage year. Credit quality indicator is based on internal risk ratings assigned to each business loan at the time of approval and subjected to subsequent reviews, generally at least annually, and to pools of retail loans with similar risk characteristics. Vintage year is the year of origination or major modification. (b)Includes loans with an internal rating of special mention, substandard loans for which the accrual of interest has not been discontinued and nonaccrual loans. Special mention loans have potential credit weaknesses that deserve managementâ€™s close attention, such as loans to borrowers who may be experiencing financial difficulties that may result in deterioration of repayment prospects from the borrower at some future date. Accruing substandard loans have a well-defined weakness, or weaknesses, such as loans to borrowers who may be experiencing losses from operations or inadequate liquidity of a degree and duration that jeopardizes the orderly repayment of the loan. Substandard loans are also distinguished by the distinct possibility of loss in the future if these weaknesses are not corrected. Nonaccrual loans are loans for which the accrual of interest has been discontinued. For further information regarding nonaccrual loans, refer to the Nonperforming Assets subheading in Note 1 - Basis of Presentation and Accounting Policies on page F-52 in the Corporation's 2023 Annual Report. These categories are generally consistent with the "special mention" and "substandard" categories as defined by regulatory authorities. A minority of nonaccrual loans are consistent with the "doubtful" category. [2] Includes loans with an internal rating of special mention, substandard loans for which the accrual of interest has not been discontinued and nonaccrual loans. Special mention loans have potential credit weaknesses that deserve managementâ€™s close attention, such as loans to borrowers who may be experiencing financial difficulties that may result in deterioration of repayment prospects from the borrower at some future date. Accruing substandard loans have a well-defined weakness, or weaknesses, such as loans to borrowers who may be experiencing losses from operations or inadequate liquidity of a degree and duration that jeopardizes the orderly repayment of the loan. Substandard loans are also distinguished by the distinct possibility of loss in the future if these weaknesses are not corrected. Nonaccrual loans are loans for which the accrual of interest has been discontinued. For further information regarding nonaccrual loans, refer to the Nonperforming Assets subheading in Note 1 - Basis of Presentation and Accounting Policies on page F-52 in the Corporation's 2023 Annual Report. These categories are generally consistent with the "special mention" and "substandard" categories as defined by regulatory authorities. A minority of nonaccrual loans are consistent with the "doubtful" category. $ 3 [2] $ 0 [1] Represents loan balances where terms were extended or payments were delayed by a more than an insignificant time period, typically more than 180 days, at or above contractual interest rates. [2] Relates to FDMs where more than one type of modification was made. For the three- and nine-month periods ended September 30, 2024 and 2023, this primarily related to modifications where the interest rate was reduced and the term was extended. [3] Primarily loans secured by owner-occupied real estate. These amounts are typically not exchanged, significantly exceed amounts subject to credit or market risk and are not reflected in the Consolidated Balance Sheets. [2] Net derivative assets are included in accrued income and other assets and net derivative liabilities are included in accrued expenses and other liabilities on the Consolidated Balance Sheets. Included in the fair value of net derivative assets and net derivative liabilities are credit valuation adjustments reflecting counterparty credit risk and credit risk of the Corporation. The fair value of net derivative assets included credit valuation adjustments for counterparty credit risk of $3Â million at both SeptemberÂ 30, 2024 and DecemberÂ 31, 2023. [3] SeptemberÂ 30, 2024 included $6.1Â billion of forward starting swaps that will become effective on their contractual start dates in 2024. Forward starting SOFR swaps with a notional amount of $5.6 billion will replace existing short-dated BSBY swaps.(c)SeptemberÂ 30, 2024 included a temporary increase of $3.7 billion to notional amounts related to the transition from BSBY to SOFR.
