 Transfers into Level 3 from Level 2
 There were no transfers into Level 3 from Level 2 during the three and nine months ended September 30, 2024 and 2023.
 Transfers out of Level 3 into Level 2
 There were no transfers out of Level 3 into Level 2 during the three and nine months ended September 30, 2024 and 2023.
 Other Transfers out of Level 3 During the nine months ended September 30, 2024, one private company investment fund included in other privately held investments in the consolidated balance sheets was transferred from Level 3 to the NAV practical expedient.
 During the nine months ended September 30, 2023, two early-stage venture capital funds included in other privately held investments in the consolidated balance sheets were transferred from Level 3 to the NAV practical expedient. In addition, the Company's investment in Monarch Point Re was transferred from Level 3 to Equity method investments. Measuring the Fair Value of Other Investments Using Net Asset Valuations
 The fair values of multi-strategy funds, direct lending funds, private equity funds, real estate funds and private company investment funds are estimated using NAVs as advised by external fund managers or third-party administrators. For these funds, NAVs are based on the manager's or administrator's valuation of the underlying holdings in accordance with the fund's governing documents and in accordance with U.S. GAAP.
 For multi-strategy funds, direct lending funds, private equity funds, real estate funds and private company investment funds, valuation statements are typically released on a reporting lag. Therefore, the Company estimates the fair value of these funds by starting with the most recent fund valuations and adjusting for capital calls, redemptions, drawdowns and distributions. Return estimates are not available from the relevant fund managers for these funds, therefore the Company typically has a reporting lag in its fair value measurements of these funds. At September 30, 2024 and December 31, 2023 all funds measured at fair value using NAVs are reported generally on a one quarter lag.
 The Company often does not have access to financial information relating to the underlying securities held within the funds, therefore, management is unable to corroborate the fair values placed on the securities underlying the asset valuations provided by fund managers or fund administrators. In order to assess the reasonableness of the NAVs, the Company performs a number of monitoring procedures on a quarterly basis, to assess the quality of the information provided by fund managers and fund administrators. These procedures include, but are not limited to, regular review and discussion of each fund's performance with its manager, regular evaluation of fund performance against applicable benchmarks and the backtesting of the Company's fair value estimates against subsequently received NAVs. Backtesting involves comparing the Company's previously reported fair values for each fund against NAVs per audited financial statements (for year-end values) and final NAVs from fund managers and fund administrators (for interim values).
 The fair values of multi-strategy funds, direct lending funds, private equity funds, real estate funds and private company investment funds, are measured using the NAV practical expedient, therefore the fair values of these funds have not been categorized within the fair value hierarchy. Financial Instruments Disclosed, But Not Carried, at Fair Value
 The fair value of financial instruments accounting guidance also applies to financial instruments disclosed, but not carried, at fair value, except for certain financial instruments, including insurance contracts. At September 30, 2024, the carrying values of cash and cash equivalents including restricted amounts, accrued investment income, receivable for investments sold, certain other assets, payable for investments purchased and certain other liabilities approximated fair values due to their short maturities. As these financial

instruments are not actively traded, their fair values are classified as Level 2. </div><div style="text-align:justify">
</div><div style="text-align:justify">At September 30, 2024, the Company's fixed maturities, held to maturity, were recorded at amortized cost with a carrying value of $504 million (2023: $686 million) and a fair value of $500 million (2023: $676 million). The fair values of these securities are determined using a model which uses prepayment speeds and spreads sourced primarily from the new issue market. As the significant inputs used to price these securities are observable market inputs, their fair values are classified as Level 2.</div><div style="text-align:justify">
</div><div style="text-align:justify">At September 30, 2024, the carrying value of mortgage loans, held for investment, approximated fair value. The fair values of mortgage loans are primarily determined by estimating expected future cash flows and discounting them using current interest rates for similar mortgage loans with similar credit risk or are determined from pricing for similar loans. As mortgage loans are not actively traded, their fair values are classified as Level 3. </div><div style="text-align:justify">
</div><div style="text-align:justify">At September 30, 2024, the Company's debt was recorded at amortized cost with a carrying value of $1,315 million (2023: $1,314 million) and a fair value of $1,276 million (2023: $1,198 million). The fair value of the Company's debt is based on prices obtained from a third-party pricing service and is determined using the spread above the risk-free yield curve. These spreads are generally obtained from the new issue market, secondary trading and broker-dealer quotes. As the yields for the risk-free yield curve and the spreads are observable market inputs, the fair value of this debt is classified as Level 2.</div><div style="text-align:justify">

 The notional amounts of derivative contracts represent the basis on which amounts paid or received are calculated and are presented in the above table to quantify the volume of the Company's derivative activities. Notional amounts are not reflective of credit risk.
 None of the Company's derivative instruments are designated as hedges.
 Offsetting Assets and Liabilities
 The Company's derivative instruments are generally traded under International Swaps and Derivatives Association master netting agreements which establish terms that apply to all transactions. In the event of a bankruptcy or other stipulated event, master netting agreements provide that individual positions be replaced with a new amount, usually referred to as the termination amount, determined by taking into account market prices and converting into a single currency. Effectively, this contractual close-out netting reduces credit exposure from gross to net exposure.
 The following table provides a reconciliation of gross derivative assets and liabilities to the net amounts presented in the consolidated balance sheets, with the difference being attributable to the impact of master netting agreements:<table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:99.861%"><tr><td style="width:0.1%"></td><td style="width:0.495%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:41.876%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:7.801%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:7.801%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:7.801%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.608%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:7.801%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:7.801%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:8.218%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.498%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="border-left:1pt solid #000000;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="9" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:center;vertical-align:bottom">September 30, 2024</td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="9" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:center;vertical-align:bottom">December 31, 2023</td><td colspan="3" style="border-right:1pt solid #000000;border-top:1pt solid #000000;padding:0 1pt"></td></tr><tr><td colspan="3" style="border-left:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:center;vertical-

 On September 22, 2023, the Company entered into a retrocession reinsurance agreement with a third-party reinsurer which was deemed to have met the established criteria for retroactive reinsurance accounting. At September 30, 2023, foreign exchange and other included an increase in reinsurance recoverable on unpaid losses of $76 million related to this transaction (refer to Note 4(f) 'Equity Method Investments' and Note 5 'Fair Value Measurements').
 Estimates for Significant Catastrophe Events
 At September 30, 2024, net reserves for losses and loss expenses included estimated amounts for numerous catastrophe events. The magnitude and complexity of losses arising from certain of these events inherently increase the level of uncertainty and, therefore, the level of management judgment involved in arriving at estimated net reserves for losses and loss expenses. These events include Hurricane Helene, Hurricane Ian, Winter Storm Elliot, June European Convective Storms, the Russia-Ukraine war and the COVID-19 pandemic. As a result, actual losses for these events may ultimately differ materially from current estimates. During the nine months ended September 30, 2024, the Company recognized catastrophe and weather-related losses, net of reinsurance, of $145 million (2023: $112 million). Prior Year Reserve Development
 The Company's net prior year reserve development arises from changes to estimates of losses and loss expenses related to loss events that occurred in previous calendar years. The following table presents net prior year reserve development by segment: <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:99.722%"><tr><td style="width:0.1%"></td><td style="width:0.357%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:44.443%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.713%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.496%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.713%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.496%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.713%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.357%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.713%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.499%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="border-left:1pt solid #000;border-top:1pt solid #000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000;padding:2px 1pt;text-align:left;vertical-align:bottom"> </td><td colspan="9" style="border-top:1pt solid #000;padding:2px 1pt;text-align:center;vertical-align:bottom">Three months ended September 30,</td><td colspan="3" style="border-top:1pt solid #000;padding:0 1pt"></td><td colspan="12" style="border-right:1pt solid #000;border-top:1pt solid #000;padding:2px 1pt;text-align:center;vertical-align:bottom">Nine months ended September 30,</td></tr><tr><td colspan="3" style="border-left:1pt solid #000;padding:0 1pt"></td><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="background-color:#ffffff;border-top:1pt solid #000;padding:2px 1pt;text-align:center;vertical-align:bottom">2024</td><td colspan="3" style="background-color:#ffffff;border-top:1pt solid #000;padding:0 1pt"></td><td colspan="3" style="background-color:#ffffff;border-top:1pt solid #000;padding:2px 1pt;text-align:center;vertical-align:bottom">2023</td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="3" style="background-color:#ffffff;border-top:1pt solid #000;padding:2px 1pt;text-align:center;vertical-align:bottom">2024</td><td colspan="3" style="background-color:#ffffff;border-top:1pt solid #000;padding:0 1pt"></td><td colspan="3" style="background-color:#ffffff;border-top:1pt solid #000;padding:2px 1pt;text-align:center;vertical-align:bottom"><span style="color:#000000;font-family:'Times New*

 Performance Restricted Stock Units granted in 2024 with a market condition
 Certain share-settled performance restricted stock units granted in 2024 include a market condition which is the Company's total shareholder return relative to its peer group ("Relative TSR") over the performance period. Relative TSR is calculated in accordance with the terms of the applicable award agreement. If performance goals are achieved, these awards will cliff vest at the end of a three-year performance period within a range of 0% to 200% of target.
 Performance Restricted Stock Units granted in 2024 with a performance condition
 Certain share-settled performance restricted stock units granted in 2024 include a performance condition which is the Company's average annual growth in book value per diluted common share, plus accumulated dividends over the performance period, adjusted to exclude unrealized investment gains (losses) recognized in accumulated other comprehensive income (loss), and share repurchases during the performance period ("Adjusted DBVPS"). Adjusted DBVPS is calculated in accordance with the terms of the applicable award agreement. If performance goals are achieved, these awards will cliff vest at the end of a three-year performance period within a range of 0% to 200% of target. Valuation assumptions
 Performance Restricted Stock Units granted in 2024 and 2023 with a market condition
 The fair value of these performance restricted stock units was measured on the grant date using a Monte Carlo simulation model.

 Beginning share price, Ending share price and Expected term
 Performance restricted stock units granted in 2024 The beginning share price for awards was based on the average closing share price over the 30 trading days preceding and including the start of the performance period. The ending share price was based on the average projected closing share price over the 30 trading days preceding and including the end of the performance period. Performance for these awards is measured from January 1, 2024 to December 31, 2026.
 Performance restricted stock units granted in 2023 and performance restricted stock units granted in the three months ended March 31, 2023 in relation to senior leadership transition The beginning share price for awards was based on the average closing share price over the 10 trading days preceding and including the start of the performance period. The ending share price was based on the projected average closing share price over the 10 trading days preceding and including the end of the performance period. Performance for awards granted in 2023 is generally measured from January 1, 2023 to December 31, 2025, with performance for awards granted to one senior leader being measured from January 1, 2023 to December 31, 2023.
 Performance restricted stock units granted in 2023 in the three months ended June 30, 2023 in relation to senior leadership transition The beginning share price for awards was based on the average closing share price over the 30 trading days preceding and including the start of the performance period. The ending share price of the awards was based on the average closing share price over the 30 trading days preceding and including the end of the performance period. Performance for awards being measured from May 4, 2023 to May 4, 2026 Expected volatility The expected volatility is estimated based on the Company's historical share price volatility.
 Expected dividend yield The expected dividend yield is not applicable to the performance restricted stock units as dividends are paid at the end of the vesting period and do not affect the value of the performance restricted stock units.
 Risk-free interest rate The risk-free rate is estimated based on the yield on a U.S. treasury zero-coupon bond issued with a remaining term equal to the vesting period of the performance restricted stock units.
 Compensation expense associated with performance restricted stock units granted in 2024 and 2023 is determined on the grant date based on the fair value calculated by the Monte Carlo simulation model, and is recognized on a straight-line basis over the requisite service period. During the three months ended March 31, 2023, the transition in our senior leadership resulted in a modification of the previously existing vesting terms of the outstanding restricted stock units and performance restricted stock units granted in 2022 and earlier of one senior leader, and a modification of the performance period of that leader's performance restricted stock units granted in 2022. The modifications did not result in incremental compensation expense.
 Performance Restricted Stock Units granted in 2024 with a performance condition
 The fair value of these performance restricted stock units was determined based on the closing price of the Company's common shares on the grant date, and compensation expense is recognized on a straight-line basis over the requisite service period, and is subject to periodic adjustment based on the achievement of established performance criteria during the performance period.
