29000000 -29000000 7000000 -81000000 79000000 15000000 2000000 ORGANIZATION On April 1, 2024, AXIS Energy Transition Syndicate 2050 ("AXIS Syndicate 2050") commenced underwriting. AXIS Corporate Capital UK II Limited is the sole corporate member of AXIS Syndicate 2050. AXIS Managing Agency operates as managing agent for AXIS Syndicate 2050. BASIS OF PRESENTATION AND ACCOUNTING POLICIES Basis of Presentation
 These unaudited consolidated financial statements (the "financial statements") have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") for interim financial information and with the U.S. Securities and Exchange Commission's ("SEC") instructions to Form 10-Q and Article 10 of Regulation S-X and include AXIS Capital Holdings Limited ("AXIS Capital") and its subsidiaries (the "Company"). Accordingly, they do not include all of the information and notes required by U.S. GAAP for complete financial statements. This Quarterly Report on Form 10-Q should be read in conjunction with the financial statements and related notes included in AXIS Capital's Annual Report on Form 10-K for the year ended December 31, 2023, as filed with the SEC.
 In the opinion of management, these financial statements reflect all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation of the Company's financial position and results of operations for the periods presented.
 <span style="color:#000000;font-*

family:'Times New Roman',sans-serif;font-size:10pt;font-weight:400;line-height:120%">The results of operations for any interim period are not necessarily indicative of the results for a full year. All inter-company accounts and transactions have been eliminated.
 To facilitate comparison of information across periods, certain reclassifications have been made to prior year amounts to conform to the current year's presentation. At September 30, 2024, the Company presented loan advances made in 2023 separately in the consolidated statements of cash flows. These loan advances made were included in other assets, insurance and reinsurance balances payable, net, and reinsurance recoverable on paid losses and loss expenses in the consolidated statements of cash flows in 2023. This presentation was adopted to facilitate comparison to loan advances made in 2024. This reclassification did not impact results of operations, financial condition or liquidity. Tabular dollar and share amounts are in thousands, with the exception of per share amounts. All amounts are reported in U.S. dollars.
 Significant Accounting Policies
 There were no notable changes to the Company's significant accounting policies subsequent to its Annual Report on Form 10-K for the year ended December 31, 2023. Basis of Presentation
 These unaudited consolidated financial statements (the "financial statements") have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") for interim financial information and with the U.S. Securities and Exchange Commission's ("SEC") instructions to Form 10-Q and Article 10 of Regulation S-X and include AXIS Capital Holdings Limited ("AXIS Capital") and its subsidiaries (the "Company"). Accordingly, they do not include all of the information and notes required by U.S. GAAP for complete financial statements. This Quarterly Report on Form 10-Q should be read in conjunction with the financial statements and related notes included in AXIS Capital's Annual Report on Form 10-K for the year ended December 31, 2023, as filed with the SEC.
 In the opinion of management, these financial statements reflect all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation of the Company's financial position and results of operations for the periods presented.
 The results of operations for any interim period are not necessarily indicative of the results for a full year. All inter-company accounts and transactions have been eliminated.
 To facilitate comparison of information across periods, certain reclassifications have been made to prior year amounts to conform to the current year's presentation. At September 30, 2024, the Company presented loan advances made in 2023 separately in the consolidated statements of cash flows. These loan advances made were included in other assets, insurance and reinsurance balances payable, net, and reinsurance recoverable on paid losses and loss expenses in the consolidated statements of cash flows in 2023. This presentation was adopted to facilitate comparison to loan advances made in 2024. This reclassification did not impact results of operations, financial condition or liquidity. Tabular dollar and share amounts are in thousands, with the exception of per share amounts. All amounts are reported in U.S. dollars. SEGMENT INFORMATION The Company's underwriting operations are organized around its global underwriting platforms, AXIS Insurance and AXIS Re. The Company has determined that it has two reportable segments, insurance and reinsurance. The Company does not allocate its assets by segment, with the exception of goodwill and intangible assets.
 Insurance
 The Company's insurance segment offers specialty insurance products to a variety of niche markets on a worldwide basis. The product lines in this segment are professional lines, property, liability, cyber, marine and aviation, accident and health, and credit and political risk.
 Reinsurance
 The Company's reinsurance segment provides treaty reinsurance to insurance companies on a worldwide basis. The product lines in this segment are liability, accident and health, professional lines, credit and surety, motor, agriculture, marine and aviation, and run-off lines which include catastrophe and property lines of business that the Company placed into run-off in 2022 and engineering lines of business that the Company placed into run-off in 2020.
 The following tables present the underwriting results of the Company's reportable segments, as well as the carrying amounts of allocated goodwill and intangible assets: <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:0.1%"></td><td style="width:0.494%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:34.038%"></td><td style="width:0.1%">

style="border-bottom:1pt solid #000000;border-right:1pt solid #000000;padding:0 1pt"></td></tr></table> (1)Asset-backed securities ("ABS") include debt tranched securities collateralized

*primarily by collateralized loan obligations ("CLOs").
 At September 30, 2024, fixed maturities, held to maturity of $504 million (2023: $686 million) were presented net of an allowance for expected credit losses of $nil (2023: $nil).
 The Company's ABS, held to maturity consist of CLO debt tranched securities. The Company uses a scenario-based approach to review its CLO debt portfolio and reviews subordination levels of these securities to determine their ability to absorb credit losses of the underlying collateral. If losses are forecast to be below the subordination level for a tranche held by the Company, the security is determined not to have a credit loss. At September 30, 2024, the allowance for credit losses expected to be recognized over the life of the Company's ABS, held to maturity was $nil.
 To estimate expected credit losses for corporate debt securities, held to maturity, the Company's projected cash flows are primarily driven by assumptions regarding the severity of loss, which is a function of the probability of default and projected recovery rates. The Company's default and recovery rates are based on credit ratings, credit analysis and macroeconomic forecasts. At September 30, 2024, the allowance for credit losses expected to be recognized over the life of the Company's corporate debt, held to maturity was $nil. Contractual Maturities Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. ABS classified as held to maturity had a carrying value of $380 million (2023: $591 million). Corporate debt classified as held to maturity with a net carrying value of $28 million (2023: $nil) is due between 1 year and 3 years and corporate debt classified as held to maturity with a net carrying value of $96 million (2023: $95 million) is due between 3 years and 10 years. c) Equity Securities The following table provides the cost and fair values of the Company's equity securities: <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:99.722%"><tr><td style="width:0.1%"></td><td style="width:0.496%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:52.799%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:10.181%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.496%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:8.788%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.496%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:9.067%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.496%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:10.181%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.500%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="border-left:1pt solid #000000;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:center;vertical-align:bottom">Cost</td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:bottom"> Gross unrealized gains </td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:bottom"> Gross unrealized <span style="color:#000000;font-family:'Times New Roman',sans-serif;font-size:9pt;font-weight:700;line-*

 The primary credit quality indicators for commercial mortgage loans are the debt service coverage ratio which compares a property's net operating income to amounts needed to service the principal and interest due under the loan, (generally, the lower the debt service coverage ratio, the higher the risk of experiencing a credit loss) and the loan-to-value ratio which compares the unpaid principal balance of the loan to the estimated fair value of the underlying collateral (generally, the higher the loan-to-value ratio, the higher the risk of experiencing a credit loss). The debt service coverage ratio and loan-to-value ratio, as well as the values utilized in calculating these ratios, are updated quarterly.
 The Company has a high quality commercial mortgage loan portfolio with a weighted average debt service coverage ratio of 1.9x (2023: 1.9x) and a weighted average loan-to-value ratio of 78% (2023: 71%). At September 30, 2024, and 2023, there were no past due amounts associated with the commercial mortgage loans held by the Company. On a quarterly basis the Company's exposure to commercial mortgage loans in the office sector, which represents 44% (2023: 41%) of the total mortgage loan portfolio, is evaluated for credit losses based on inputs unique to this sector. This assessment utilizes historical credit loss experience adjusted to reflect current conditions and management forecasts. Further, collateral dependent commercial mortgage loans (e.g., when the borrower is experiencing financial difficulty, including when foreclosure is reasonably possible or probable) are evaluated individually for credit losses. The allowance for expected credit losses for a collateral dependent loan is established as the excess of amortized cost over the estimated fair value of the loan's underlying collateral, less selling cost when foreclosure is probable.
 Accordingly, any change in estimated credit losses are recognized as a change in the allowance for expected credit losses which is recorded in net investment gains (losses).
 At September 30, 2024, the Company's mortgage loan portfolio had an allowance for expected credit loss of $22 million (2023: $6 million).
 c) Other Investments
 The following table provides a summary of the Company's other investments, together with additional information relating to the liquidity of each category: <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:0.1%"></td><td style="width:0.494%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:31.261%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:9.038%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.911%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:8.066%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.050%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:27.372%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.050%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:13.761%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.497%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="border-left:1pt solid #000000;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="9" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:center;vertical-align:bottom">Fair value</td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:bottom"> Redemption frequency (if currently eligible) </td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:bottom"> Redemption notice period </td><td colspan="3" style="border-right:1pt solid #000000;border-top:1pt solid #000000;padding:0 1pt"></td></tr><tr style="height:6pt"><td colspan="3" style="border-left:1pt solid #000000;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td

Roman',sans-serif;font-

size:1pt;font-weight:400;line-height:100%"> </td><td colspan="3" style="border-bottom:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-bottom:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:bottom"> </td><td colspan="3" style="border-bottom:1pt solid #000000;border-right:1pt solid #000000;padding:0 1pt"></td></tr></table> n/a - not applicable (1) Applies to one fund with a fair value of $4 million (2023: $17 million). (2) Applies to one fund with a fair value of $54 million (2023: $66 million). (3) Applies to one fund with a fair value of $23 million (2023: $25 million). Two common redemption restrictions which may impact the Company's ability to redeem multi-strategy funds are gates and lockups. A gate is a suspension of redemptions which may be implemented by the general partner or investment manager of the fund in order to defer, in whole or in part, the redemption request in the event the aggregate amount of redemption requests exceeds a predetermined percentage of the fund's net assets which may otherwise hinder the general partner or investment manager's ability to liquidate holdings in an orderly fashion in order to generate the cash necessary to fund extraordinarily large redemption payouts. A lockup period is the initial amount of time an investor is contractually required to hold the security before having the ability to redeem.
 During the nine months ended September 30, 2024 and 2023, neither of these restrictions impacted the Company's redemption requests. At September 30, 2024, there were no multi-strategy fund holdings (2023: $nil) where the Company is still within the lockup period.
 At September 30, 2024, the Company had $28 million (2023: $28 million) of unfunded commitments as a limited partner in multi-strategy hedge funds. Once the full amount of committed capital has been called by the General Partner of each of these funds, the assets will not be fully returned until after the completion of the funds' investment term. These funds have investment terms ranging from two years to the dissolution of the underlying fund.
 At September 30, 2024, the Company had $259 million (2023: $192 million) of unfunded commitments as a limited partner in direct lending funds. Once the full amount of committed capital has been called by the General Partner of each of these funds, the assets will not be fully returned until the completion of the fund's investment term. These funds have investment terms ranging from four to ten years and the General Partners of certain funds have the option to extend the term by up to three years.
 At September 30, 2024, the Company had $117 million (2023: $145 million) of unfunded commitments as a limited partner in private equity funds. The life of the funds is subject to the dissolution of the underlying funds. The Company expects the overall holding period to be over six years. At September 30, 2024, the Company had $95 million (2023: $107 million) of unfunded commitments as a limited partner in real estate funds. These funds include an open-ended fund and funds with investment terms ranging from two years to the dissolution of the underlying fund. At September 30, 2024, the Company had $23 million (2023: $30 million) of unfunded commitments as a limited partner in three private

company investment funds focusing on financial services technology companies with an emphasis on insurance technology companies ("private company investment funds"). Two of these funds have investment terms of 5 years and one fund has an investment term of 10 years.
 f) Equity Method Investments
 During 2023, the Company paid $22 million to acquire 18% of the common equity of Monarch Point Re (ISAC) Ltd. and Monarch Point Re (ISA 2023) Ltd., a collateralized reinsurance company formed under the laws of Bermuda as an incorporated segregated accounts company under the Incorporated Segregated Accounts Companies Act 2019, as amended (the "ISAC Act"). During 2024, the Company paid $12 million to acquire 18% of the common equity of Monarch Point Re (ISA 2024) Ltd., (Monarch Point Re (ISAC) Ltd., Monarch Point Re (ISA 2023) Ltd. and Monarch Point Re (ISA 2024) Ltd., individually or collectively "Monarch Point Re").
 Monarch Point Re is an independent reinsurer jointly sponsored by the Company and Stone Point Credit, LLC ("Stone Point").
 The Company retrocedes a diversified portfolio of casualty reinsurance business to Monarch Point Re and Stone Point serves as its investment manager. As an investor, the Company expects to benefit from underwriting fees generated by Monarch Point Re and the income and capital appreciation Stone Point seeks to deliver through its investment management services.
 Monarch Point Re is not a Variable Interest Entity ("VIE") that is required to be included in the Company's consolidated financial statements. The Company accounts for its ownership interest in Monarch Point Re under the equity method of accounting. During 2016, the Company paid $108 million including direct transaction costs to acquire 19% of the common equity of Harrington Reinsurance Holdings Limited ("Harrington"), the parent company of Harrington Re Ltd. ("Harrington Re"), an independent reinsurance company jointly sponsored by the Company and The Blackstone Group L.P. ("Blackstone"). During 2023, following a share tender offer, the Company's ownership interest in Harrington increased to 20%.
 Through long-term service agreements, the Company serves as Harrington Re's reinsurance underwriting manager and Blackstone serves as exclusive investment management service provider. As an investor, the Company expects to benefit from underwriting profit generated by Harrington Re and the income and capital appreciation Blackstone seeks to deliver through its investment management services. In addition, the Company has entered into an arrangement with Blackstone under which underwriting and investment related fees will be shared equally.
 Harrington is not a VIE that is required to be included in the Company's consolidated financial statements. The Company accounts for its ownership interest in Harrington under the equity method of accounting. The Company's proportionate share of the underlying equity in net assets resulted in a basis difference of $5 million which represents initial transactions costs.
 g) Variable Interest Entities
 In the normal course of investing activities, the Company actively manages allocations to non-controlling tranches of structured securities which are variable interests issued by VIEs. These structured securities include RMBS, CMBS and ABS.
 The Company also invests in limited partnerships which represent 76% of the Company's other investments. The investments in limited partnerships include multi-strategy funds, direct lending funds, private equity funds, real estate funds and CLO equity tranched securities, which are variable interests issued by VIEs (refer to Note 4(e) 'Other Investments').
 The Company does not have the power to direct the activities that are most significant to the economic performance of these VIEs. Therefore, the Company is not the primary beneficiary of these VIEs. The maximum exposure to loss on these interests is limited to the amount of commitment made by the Company. The Company has not provided financial or other support to these structured securities other than the original investment.
 h) Net Investment Income
 Net investment income was derived from the following sources:<table style="border-

 j) Reverse Repurchase Agreements
 At September 30, 2024, the Company held $26 million (2023: $12 million) of reverse repurchase agreements. These loans are fully collateralized, are generally outstanding for a short period of time and are presented on a gross basis as part of cash and cash equivalents in the Company's consolidated balance sheets. The required collateral for these loans is either cash or U.S. Treasuries at a minimum rate of 102% of the loan principal. Upon maturity, the Company receives principal and interest income. The Company monitors the estimated fair value of the securities loaned and borrowed on a daily basis with additional collateral obtained as necessary throughout the duration of the transaction. The following table provides the amortized cost and fair values of the Company's fixed maturities classified as available for sale: <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:0.1%"></td><td style="width:0.494%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:37.372%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:10.983%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.494%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:10.983%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.494%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:9.316%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.494%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:9.594%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.494%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:10.983%"></td><td style="width:0.1%"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td><td style="width:0.1%"></td><td style="width:0.499%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="border-left:1pt solid #000;border-top:1pt solid #000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000;padding:2px 1pt;text-align:left;vertical-align:bottom"> Amortized cost </td><td colspan="3" style="border-top:1pt solid #000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000;padding:2px 1pt;text-align:center;vertical-align:bottom">Allowance for expected credit losses</td><td colspan="3" style="border-top:1pt solid #000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000;padding:2px 1pt;text-align:center;vertical-align:bottom">Gross

 Fair value is defined as the price to sell an asset or transfer a liability (i.e., the "exit price") in an orderly transaction between market participants. U.S. GAAP prescribes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data. The level in the hierarchy within which a given fair value measurement falls is determined based on the lowest level input that is significant to the measurement. The hierarchy is broken down into three levels as follows:
 •Level 1 - Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access.
 •Level 2 - Valuations based on quoted prices in active markets for similar assets or liabilities, quoted prices for identical assets or liabilities in inactive markets, or for which significant inputs are observable (e.g., interest rates, yield curves, prepayment speeds, default rates, loss severities, etc.) or can be corroborated by observable market data.
 •Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement. The unobservable inputs reflect the Company's judgments about assumptions that market participants might use.
 The availability of observable inputs can vary from financial instrument to financial instrument and is affected by a wide variety of factors including, for example, the type of financial instrument,*

*whether the financial instrument is new and not yet established in the marketplace, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires significantly more judgment.
 Accordingly, the degree of judgment exercised by management in determining fair value is greatest for financial instruments categorized as Level 3. In periods of market dislocation, the observability of prices and inputs may be reduced for many financial instruments. This may lead the Company to change the selection of valuation technique (from market to cash flow approach) or may cause the Company to use multiple valuation techniques to estimate the fair value of a financial instrument. This circumstance could cause an instrument to be reclassified between levels within the fair value hierarchy.
 Valuation Techniques
 The valuation techniques, including significant inputs and assumptions generally used to determine the fair values of the Company's financial instruments as well as the classification of the fair values of its financial instruments in the fair value hierarchy are described in detail below.
 Fixed Maturities
 At each valuation date, the Company uses the market approach valuation technique to estimate the fair value of its fixed maturities portfolio, where possible. The market approach includes, but is not limited to, prices obtained from third-party pricing services for identical or comparable securities and the use of "pricing matrix models" using observable market inputs such as yield curves, credit risks and spreads, measures of volatility, and prepayment speeds. Pricing from third-party pricing services is sourced from multiple vendors, where available, and the Company maintains a vendor hierarchy by asset type based on historical pricing experience and vendor expertise. Where prices are unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers who are active in the corresponding markets. The valuation techniques including significant inputs and assumptions generally used to determine the fair values of the Company's fixed maturities by asset class as well as the classifications of the fair values of these securities in the fair value hierarchy are described in detail below. U.S. Government and Agency
 U.S. government and agency securities consist primarily of bonds issued by the U.S. Treasury and mortgage pass-through agencies such as the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and the Government National Mortgage Association. As the fair values of U.S. Treasury securities are based on unadjusted quoted market prices in active markets, the fair values of these securities are classified as Level 1. The fair values of U.S. government agency securities are determined using the spread above the risk-free yield curve. As the yields for the risk-free yield curve and the spreads are observable market inputs, the fair values of U.S. government agency securities are classified as Level 2.
 Non-U.S. Government
 Non-U.S. government securities include bonds issued by non-U.S. governments and their agencies along with supranational organizations (collectively also known as sovereign debt securities). The fair values of these securities are based on prices obtained from international indices or valuation models that include inputs such as interest rate yield curves, cross-currency basis index spreads and country credit spreads for structures similar to the sovereign bond in terms of issuer, maturity and seniority. As the significant inputs used to price these securities are observable market inputs, the fair values of non-U.S. government securities are classified as Level 2.
 Corporate Debt
 Corporate debt securities consist primarily of investment grade debt of a wide variety of corporate issuers and industries. The fair values of these securities are generally determined using the spread above the risk-free yield curve. These spreads are generally obtained from the new issue market, secondary trading and broker-dealer quotes. As the yields for the risk-free yield curve and the spreads are observable market inputs, the fair values of corporate debt securities are generally classified as Level 2. Where pricing is unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, the fair values of these securities are classified as Level 3.
 Agency RMBS
 Agency RMBS consist of bonds issued by the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and the Government National Mortgage Association. The fair values of these securities are priced using a mortgage pool specific model which uses daily inputs from the active to be announced market and the spread associated with each mortgage pool based on vintage. As the significant inputs used to price these securities are observable market inputs, the fair values of Agency RMBS are classified as Level 2.
 CMBS
 CMBS mainly include investment grade bonds originated by non-agencies. The fair values of these securities are determined using a pricing model which uses dealer quotes and other available trade*

*information along with security level characteristics to determine deal specific spreads. As the significant inputs used to price these securities are observable market inputs, the fair values of CMBS are generally classified as Level 2. Where pricing is unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, the fair values of these securities are classified as Level 3. Non-agency RMBS
 Non-agency RMBS mainly include investment grade bonds originated by non-agencies. The fair values of these securities are determined using an option adjusted spread model or other relevant models, which use inputs including available trade information or broker quotes, prepayment and default projections based on historical statistics of the underlying collateral and current market data. As the significant inputs used to price these securities are observable market inputs, the fair values of non-agency RMBS are generally classified as Level 2. Where pricing is unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, the fair values of these securities are classified as Level 3.
 ABS
 ABS mainly include investment grade bonds backed by pools of loans with a variety of underlying collateral, including auto loans, student loans, credit card receivables and collateralized loan obligations ("CLOs"), originated by a variety of financial institutions. The fair values of these securities are determined using a model which uses prepayment speeds and spreads sourced primarily from the new issue market. As the significant inputs used to price these securities are observable market inputs, the fair values of ABS are generally classified as Level 2. Where pricing is unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, the fair values of these securities are classified as Level 3.
 Municipals
 Municipals comprise revenue bonds and general obligation bonds issued by U.S. domiciled state and municipal entities. The fair values of these securities are determined using spreads obtained from the new issue market, trade prices and broker-dealers quotes. As the significant inputs used to price these securities are observable market inputs, the fair values of municipals are classified as Level 2.
 Equity Securities
 Equity securities include common stocks, preferred stocks, exchange-traded funds and bond mutual funds. As the fair values of common stocks and exchange-traded funds are based on unadjusted quoted market prices in active markets, the fair values of these securities are classified as Level 1. As the significant inputs used to price preferred stocks are observable market inputs, the fair value of these securities are classified as Level 2. As bond mutual funds have daily liquidity, the fair values of these securities are classified as Level 2.
 Other Investments
 The fair value of an indirect investment in CLO-Equities is estimated using an income approach valuation technique, specifically an externally developed discounted cash flow model due to the lack of observable and relevant trades in secondary markets. As the significant inputs used to price this security are unobservable, the fair value of the indirect investment in CLO-Equities is classified as Level 3.
 Other privately held investments include common shares, preferred shares, convertible notes, convertible preferred shares, a variable yield security and private company investment funds. These investments are initially valued at cost, which approximates fair value. In subsequent measurement periods, the fair values of these investments are generally derived from one or a combination of valuation methodologies which consider factors including recent capital raises by the investee companies, comparable precedent transaction multiples, comparable publicly traded multiples, third-party valuations, discounted cash-flow models, and other techniques that consider the industry and development stage of each investee company. The fair value of the variable yield security is determined using an externally developed discounted cash flow model. In order to assess the reasonableness of the information received from investee companies, the Company maintains an understanding of current market conditions, historical results, and emerging trends that may impact the results of operations, financial condition or liquidity of these companies. In addition, the Company engages in regular communication with management at investee companies. As the significant inputs used to price these investments are unobservable, the fair values of other privately held investments are classified as Level 3. The fair values of private company investment funds are estimated using net asset valuations ("NAVs") as advised by external fund managers or third-party administrators. <span style="color:#000000;font-family:'Times New Roman',sans-*

serif;font-size:10pt;font-weight:700;line-height:120%;text-decoration:underline">Short-term Investments
</div><div>
</div><div style="text-align:justify"><span style="color:#000000;font-
family:'Times New Roman',sans-serif;font-size:10pt;font-weight:400;line-height:120%">Short-term investments
primarily comprise highly liquid securities with maturities greater than three months but less than one year from
the date of purchase. These securities are typically not actively traded due to their approaching maturity, therefore
their amortized cost approximates fair value. The fair values of short-term investments are classified as Level 2.
</div><div>

In addition, other privately held investments of $69 million that are classified as Level 3 are excluded from the above table as these investments are priced using capital statements received from investee companies.
 Other Investments - CLO-Equities
 The CLO-Equities market continues to be relatively inactive with only a small number of transactions being observed, particularly related to transactions involving CLO-Equities held by the Company. Accordingly, the fair value of the Company's indirect investment in CLO-Equities is determined using a discounted cash flow model prepared by an external investment manager.
 The default and loss severity rates are the most judgmental unobservable market inputs to the discounted cash flow model to which the valuation of the Company's indirect investment in CLO-Equities is most sensitive. A significant increase (decrease) in either of these significant inputs in isolation would result in a lower (higher) fair value estimate for the investment in CLO-Equities and, in general, a change in default rate assumptions would be accompanied by a directionally similar change in loss severity rate assumptions. Collateral spreads and estimated maturity dates are less judgmental inputs as they are based on the historical average of actual spreads and the weighted average life of the current underlying portfolios, respectively. A significant increase (decrease) in either of these significant inputs in isolation would result in a higher (lower) fair value estimate for the investment in CLO-Equities. In general, these inputs have no significant interrelationship with each other or with default and loss severity rates.
 On a quarterly basis, the Company's valuation process for its indirect investment in CLO-Equities includes a review of the underlying cash flows and key assumptions used in the discounted cash flow model. The above significant unobservable inputs are reviewed and updated based on information obtained from secondary markets, including information received from the managers of the Company's CLO-Equities investment. In order to assess the reasonableness of the inputs the Company uses in the discounted cash flow model, the Company maintains an understanding of current market conditions, historical results, and emerging trends that may impact future cash flows. In addition, the assumptions the Company uses in its models are updated through regular communication with industry participants and ongoing monitoring of the deals in which the Company participates.
 Other Investments - Other Privately Held Securities
 Other privately held securities are initially valued at cost which approximates fair value. In subsequent measurement periods, the fair value of the variable yield security was determined using an externally developed discounted cash flow model. This model includes inputs that are specific to that investment. The inputs used in the fair value measurement include an appropriate discount rate, default rate, loss absorption rate and estimated maturity date. The selection of an appropriate discount rate is judgmental and is the most significant unobservable input used in the valuation of this investment. A significant increase (decrease) in this input in isolation could result in significantly lower (higher) fair value measurement for this investment. In order to assess the reasonableness of the inputs the Company uses in the discounted cash flow model, the Company maintains an understanding of current market conditions, historical results, as well as investee specific information that may impact future cash flows. The following table presents changes in Level 3 for financial instruments measured at fair value on a recurring basis:<table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:99.861%"><tr><td style="width:0.1%"></td><td style="width:0.495%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:16.841%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.688%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.773%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:5.715%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.773%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:5.715%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.495%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:5.993%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.773%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:5.715%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.773%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.132%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.495%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:5.158%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.773%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:7.940%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.773%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:5.715%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.773%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.688%"></td><td style="width:0.1%"></td><td
