The Company's ABS, held to maturity consist of CLO debt tranched securities. The Company uses a scenario-based approach to review its CLO debt portfolio and reviews subordination levels of these securities to determine their ability to absorb credit losses of the underlying collateral. If losses are forecast to be below the subordination level for a tranche held by the Company, the security is determined not to have a credit loss. At September 30, 2024, the allowance for credit losses expected to be recognized over the life of the Company's ABS, held to maturity was $nil.To estimate expected credit losses for corporate debt securities, held to maturity, the Company's projected cash flows are primarily driven by assumptions regarding the severity of loss, which is a function of the probability of default and projected recovery rates. The Company's default and recovery rates are based on credit ratings, credit analysis and macroeconomic forecasts. At September 30, 2024, the allowance for credit losses expected to be recognized over the life of the Company's corporate debt, held to maturity was $nil.Contractual MaturitiesExpected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. The debt service coverage ratio and loan-to-value ratio, as well as the values utilized in calculating these ratios, are updated quarterly.The Company has a high quality commercial mortgage loan portfolio with a weighted average debt service coverage ratio of 1.9x (2023: 1.9x) and a weighted average loan-to-value ratio of 78% (2023: 71%). At September 30, 2024, and 2023, there were no past due amounts associated with the commercial mortgage loans held by the Company.20Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)4.Â Â Â Â INVESTMENTS (CONTINUED)On a quarterly basis the Company's exposure to commercial mortgage loans in the office sector, which represents 44% (2023: 41%) of the total mortgage loan portfolio, is evaluated for credit losses based on inputs unique to this sector. This assessment utilizes historical credit loss experience adjusted to reflect current conditions and management forecasts. Further, collateral dependent commercial mortgage loans (e.g., when the borrower is experiencing financial difficulty, including when foreclosure is reasonably possible or probable) are evaluated individually for credit losses. The allowance for expected credit losses for a collateral dependent loan is established as the excess of amortized cost over the estimated fair value of the loan's underlying collateral, less selling cost when foreclosure is probable. Accordingly, any change in estimated credit losses are recognized as a change in the allowance for expected credit losses which is recorded in net investment gains (losses).At SeptemberÂ 30, 2024, the Company's mortgage loan portfolio had an allowance for expected credit loss of $22 million (2023: $6 million).e) Â Â Â Â Other InvestmentsThe following table provides a summary of the Company's other investments, together with additional information relating to the liquidity of each category:Fair valueRedemption frequency(if currently eligible)Â Â RedemptionÂ Â Â Â noticeÂ periodÂ Â At September 30, 2024Â Â Â Â Multi-strategy funds$24,302Â 3Â %Quarterly60-90 daysDirect lending funds174,441Â 19Â %Quarterly(1)90 daysPrivate equity funds314,444Â 33Â %n/an/aReal estate funds310,130Â 33Â %Quarterly(2), Annually(3)45-90 daysCLO-Equities4,133Â â€”Â %n/an/aOther privately held investments112,284Â 12Â %n/an/aTotal other investments$939,734Â 100Â %Â At December 31, 2023Â Â Â Â Multi-strategy funds$24,619Â 3Â %Quarterly60-90 daysDirect lending funds192,270Â 20Â %Quarterly(1)90 daysPrivate equity funds301,712Â 32Â %n/an/aReal estate funds317,325Â 33Â %Quarterly(2), Annually(3)45-90 daysCLO-Equities5,300Â 1Â %n/an/aOther privately held investments108,187Â 11Â %n/an/aTotal other investments$949,413Â 100Â %Â Â Â Â Â Â Â n/a - not applicable (1) Applies to one fund with a fair value of $4 million (2023: $17 million).(2) Applies to one fund with a fair value of $54 million (2023: $66 million).(3) Applies to one fund with a fair value of $23 million (2023: $25 million).21Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)4.Â Â Â Â INVESTMENTS (CONTINUED)Two common redemption restrictions which may impact the Company's ability to redeem multi-strategy funds are gates and lockups. A gate is a suspension of redemptions which may be implemented by the general partner or investment manager of the fund in order to defer, in whole or in part, the redemption request in the event the aggregate amount of redemption requests exceeds a predetermined percentage of the fund's net assets which may otherwise hinder the general partner or investment manager's ability to liquidate holdings in an orderly fashion in order to generate the cash necessary to fund extraordinarily large redemption payouts. A lockup period is the initial amount of time an investor is contractually required to hold the security before having the ability to redeem. During the nine months ended September 30, 2024 and 2023, neither of these restrictions impacted the Company's redemption requests. At September 30, 2024, there were no multi-strategy fund holdings (2023: $nil) where the Company is still within the lockup period.Â At September 30, 2024, the Company had $28 million (2023: $28 million) of unfunded commitments as a limited partner in multi-strategy hedge funds. Once the full amount of committed capital has been called by the General Partner of each of these funds, the assets will not be fully returned until after the completion of the funds' investment term. These funds have investment terms ranging from two years to the dissolution of the underlying fund.At September 30, 2024, the Company had $259 million (2023: $192 million) of unfunded commitments as a limited partner in direct lending funds. Once the full amount of committed capital has been called by the General Partner of each of these funds, the assets will not be fully returned until the completion of the fund's investment term. These funds have investment terms ranging from four to ten years and the General Partners of certain funds have the option to extend the term by up to three years.At September 30, 2024, the Company had $117 million (2023: $145 million) of unfunded commitments as a limited partner in private equity funds. The life of the funds is subject to the dissolution of the underlying funds. The Company expects the overall holding period to be over six years.At September 30, 2024, the Company had $95 million (2023: $107 million) of unfunded commitments as a limited partner in real estate funds. These funds include an open-ended fund and funds with investment terms ranging from two years to the dissolution of the underlying fund.At September 30, 2024, the Company had $23Â million (2023: $30Â million) of unfunded commitments as a limited partner in three private company investment funds focusing on financial services technology companies with an emphasis on insurance technology companies ("private company investment funds"). Two of these funds have investment terms of 5 years and one fund has an investment term of 10 years.f) Â Â Â Â Equity Method InvestmentsDuring 2023, the Company paid $22Â million to acquire 18% of the common equity of Monarch Point Re (ISAC) Ltd. and Monarch Point Re (ISA 2023) Ltd., a collateralized reinsurance company formed under the laws of Bermuda as an incorporated segregated accounts company under the Incorporated Segregated Accounts Companies Act 2019, as amended (the "ISAC Act"). Monarch Point Re is not a Variable Interest Entity ("VIE") that is required to be included in the Company's consolidated financial statements. The Company accounts for its ownership interest in Monarch Point Re under the equity method of accounting.22Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)4.Â Â Â Â INVESTMENTS (CONTINUED)During 2016, the Company paid $108Â million including direct transaction costs to acquire 19% of the common equity of Harrington Reinsurance Holdings Limited ("Harrington"), the parent company of Harrington Re Ltd. ("Harrington Re"), an independent reinsurance company jointly sponsored by the Company and The Blackstone Group L.P. ("Blackstone"). During 2023, following a share tender offer, the Company's ownership interest in Harrington increased to 20%.Through long-term service agreements, the Company serves as Harrington Re's reinsurance underwriting manager and Blackstone serves as exclusive investment management service provider. As an investor, the Company expects to benefit from underwriting profit generated by Harrington Re and the income and capital appreciation Blackstone seeks to deliver through its investment management services. In addition, the Company has entered into an arrangement with Blackstone under which underwriting and investment related fees will be shared equally. Harrington is not a VIE that is required to be included in the Company's consolidated financial statements. The Company accounts for its ownership interest in Harrington under the equity method of accounting. The Company's proportionate share of the underlying equity in net assets resulted in a basis difference of $5Â million which represents initial transactions costs.g) Â Â Â Â Variable Interest EntitiesIn the normal course of investing activities, the Company actively manages allocations to non-controlling tranches of structured securities which are variable interests issued by VIEs. These structured securities include RMBS, CMBS and ABS.The Company also invests in limited partnerships which represent 76% of the Company's other investments. The investments in limited partnerships include multi-strategy funds, direct lending funds, private equity funds, real estate funds and CLO equity tranched securities, which are variable interests issued by VIEs (refer to NoteÂ 4(e) 'Other Investments'). The Company does not have the power to direct the activities that are most significant to the economic performance of these VIEs. Therefore, the Company is not the primary beneficiary of these VIEs. The maximum exposure to loss on these interests is limited to the amount of commitment made by the Company. These loans are fully collateralized, are generally outstanding for a short period of time and are presented on a gross basis as part of cash and cash equivalents in the Company's consolidated balance sheets. The required collateral for these loans is either cash or U.S. Treasuries at a minimum rate of 102% of the loan principal. Upon maturity, the Company receives principal and interest income. The Company monitors the estimated fair value of the securities loaned and borrowed on a daily basis with additional collateral obtained as necessary throughout the duration of the transaction.24Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)5.Â Â Â Â FAIR VALUE MEASUREMENTSFair Value HierarchyFair value is defined as the price to sell an asset or transfer a liability (i.e., the "exit price") in an orderly transaction between market participants. U.S. GAAP prescribes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data. The level in the hierarchy within which a given fair value measurement falls is determined

based on the lowest level input that is significant to the measurement. The hierarchy is broken down into three levels as follows: â€¢Level 1 - Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. â€¢Level 2 - Valuations based on quoted prices in active markets for similar assets or liabilities, quoted prices for identical assets or liabilities in inactive markets, or for which significant inputs are observable (e.g., interest rates, yield curves, prepayment speeds, default rates, loss severities, etc.) or can be corroborated by observable market data. â€¢Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement. The unobservable inputs reflect the Company's judgments about assumptions that market participants might use. The availability of observable inputs can vary from financial instrument to financial instrument and is affected by a wide variety of factors including, for example, the type of financial instrument, whether the financial instrument is new and not yet established in the marketplace, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires significantly more judgment. Accordingly, the degree of judgment exercised by management in determining fair value is greatest for financial instruments categorized as Level 3. In periods of market dislocation, the observability of prices and inputs may be reduced for many financial instruments. This may lead the Company to change the selection of valuation technique (from market to cash flow approach) or may cause the Company to use multiple valuation techniques to estimate the fair value of a financial instrument. This circumstance could cause an instrument to be reclassified between levels within the fair value hierarchy. Valuation TechniquesThe valuation techniques, including significant inputs and assumptions generally used to determine the fair values of the Company's financial instruments as well as the classification of the fair values of its financial instruments in the fair value hierarchy are described in detail below.Fixed MaturitiesAt each valuation date, the Company uses the market approach valuation technique to estimate the fair value of its fixed maturities portfolio, where possible. The market approach includes, but is not limited to, prices obtained from third-party pricing services for identical or comparable securities and the use of "pricing matrix models" using observable market inputs such as yield curves, credit risks and spreads, measures of volatility, and prepayment speeds. Pricing from third-party pricing services is sourced from multiple vendors, where available, and the Company maintains a vendor hierarchy by asset type based on historical pricing experience and vendor expertise. Where prices are unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers who are active in the corresponding markets. The valuation techniques including significant inputs and assumptions generally used to determine the fair values of the Company's fixed maturities by asset class as well as the classifications of the fair values of these securities in the fair value hierarchy are described in detail below.25Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)5.Â Â Â Â FAIR VALUE MEASUREMENTS (CONTINUED)U.S. Government and Agency U.S. government and agency securities consist primarily of bonds issued by the U.S. Treasury and mortgage pass-through agencies such as the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and the Government National Mortgage Association. As the fair values of U.S. Treasury securities are based on unadjusted quoted market prices in active markets, the fair values of these securities are classified as Level 1. The fair values of U.S. government agency securities are determined using the spread above the risk-free yield curve. As the yields for the risk-free yield curve and the spreads are observable market inputs, the fair values of U.S. government agency securities are classified as Level 2. Non-U.S. Government Non-U.S. government securities include bonds issued by non-U.S. governments and their agencies along with supranational organizations (collectively also known as sovereign debt securities). The fair values of these securities are based on prices obtained from international indices or valuation models that include inputs such as interest rate yield curves, cross-currency basis index spreads and country credit spreads for structures similar to the sovereign bond in terms of issuer, maturity and seniority. As the significant inputs used to price these securities are observable market inputs, the fair values of non-U.S. government securities are classified as Level 2. Corporate Debt Corporate debt securities consist primarily of investment grade debt of a wide variety of corporate issuers and industries. The fair values of these securities are generally determined using the spread above the risk-free yield curve. These spreads are generally obtained from the new issue market, secondary trading and broker-dealer quotes. As the yields for the risk-free yield curve and the spreads are observable market inputs, the fair values of corporate debt securities are generally classified as Level 2. Where pricing is unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, the fair values of these securities are classified as Level 3. Agency RMBSAgency RMBS consist of bonds issued by the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and the Government National Mortgage Association. The fair values of these securities are priced using a mortgage pool specific model which uses daily inputs from the active to be announced market and the spread associated with each mortgage pool based on vintage. As the significant inputs used to price these securities are observable market inputs, the fair values of Agency RMBS are classified as Level 2.CMBSCMBS mainly include investment grade bonds originated by non-agencies. The fair values of these securities are determined using a pricing model which uses dealer quotes and other available trade information along with security level characteristics to determine deal specific spreads. As the significant inputs used to price these securities are observable market inputs, the fair values of CMBS are generally classified as Level 2. Where pricing is unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, the fair values of these securities are classified as Level 3.26Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)5.Â Â Â Â FAIR VALUE MEASUREMENTS (CONTINUED)Non-agency RMBSNon-agency RMBS mainly include investment grade bonds originated by non-agencies. The fair values of these securities are determined using an option adjusted spread model or other relevant models, which use inputs including available trade information or broker quotes, prepayment and default projections based on historical statistics of the underlying collateral and current market data. As the significant inputs used to price these securities are observable market inputs, the fair values of non-agency RMBS are generally classified as Level 2. Where pricing is unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, the fair values of these securities are classified as Level 3.ABS ABS mainly include investment grade bonds backed by pools of loans with a variety of underlying collateral, including auto loans, student loans, credit card receivables and collateralized loan obligations ("CLOs"), originated by a variety of financial institutions. The fair values of these securities are determined using a model which uses prepayment speeds and spreads sourced primarily from the new issue market. As the significant inputs used to price these securities are observable market inputs, the fair values of ABS are generally classified as Level 2. Where pricing is unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, the fair values of these securities are classified as Level 3.Municipals Municipals comprise revenue bonds and general obligation bonds issued by U.S. domiciled state and municipal entities. The fair values of these securities are determined using spreads obtained from the new issue market, trade prices and broker-dealers quotes. As the significant inputs used to price these securities are observable market inputs, the fair values of municipals are classified as Level 2. Equity SecuritiesEquity securities include common stocks, preferred stocks, exchange-traded funds and bond mutual funds. As the fair values of common stocks and exchange-traded funds are based on unadjusted quoted market prices in active markets, the fair values of these securities are classified as Level 1. As the significant inputs used to price preferred stocks are observable market inputs, the fair value of these securities are classified as Level 2. As bond mutual funds have daily liquidity, the fair values of these securities are classified as Level 2.Other InvestmentsThe fair value of an indirect investment in CLO-Equities is estimated using an income approach valuation technique, specifically an externally developed discounted cash flow model due to the lack of observable and relevant trades in secondary markets. As the significant inputs used to price this security are unobservable, the fair value of the indirect investment in CLO-Equities is classified as Level 3.Other privately held investments include common shares, preferred shares, convertible notes, convertible preferred shares, a variable yield security and private company investment funds. These investments are initially valued at cost, which approximates fair value. In subsequent measurement periods, the fair values of these investments are generally derived from one or a combination of valuation methodologies which consider factors including recent capital raises by the investee companies, comparable precedent transaction multiples, comparable publicly traded multiples, third-party valuations, discounted cash-flow models, and other techniques that consider the industry and development stage of each investee company. The fair value of the variable yield security is determined using an externally developed discounted cash flow model. In order to assess the reasonableness of the information received from investee companies, the Company maintains an understanding of current market conditions, historical results, and emerging trends that may impact the results of operations, financial condition or liquidity of these companies. In addition, the Company engages in regular communication with management at investee companies. As the significant inputs used to price these investments are unobservable, the fair values of other privately held investments are classified as Level 3. The fair values of private company investment funds are estimated using net asset valuations ("NAVs") as advised by external fund managers or third-party administrators.27Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)5.Â Â Â Â FAIR VALUE MEASUREMENTS (CONTINUED)Short-term InvestmentsShort-term investments primarily comprise highly liquid securities with maturities greater than three months but less than one year from the date of purchase. These securities are typically not actively traded due to their approaching maturity, therefore their amortized cost approximates fair value. The fair values of short-term investments are classified as Level 2.Derivative InstrumentsDerivative instruments include foreign exchange forward contracts that are customized to the Company's economic hedging strategies and trade in the over-the-counter derivative market. The fair values of these derivatives are determined using a market approach valuation technique based on significant observable market inputs from third-party pricing vendors, non-binding broker-dealer quotes and/or recent trading activity. As the significant inputs used to price these derivatives are observable market inputs, the fair values of these derivatives are classified as Level 2. 28Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)5.Â Â Â Â FAIR VALUE MEASUREMENTS (CONTINUED)The tables below present the financial instruments measured at fair value on a recurring basis for the periods indicated:

In addition, other privately held investments of $69Â million that are classified as Level 3 are excluded from the above table as these investments are priced using capital statements received from investee companies.Other Investments - CLO-EquitiesThe CLO-Equities market continues to be relatively inactive with only a small number of transactions being observed, particularly related to transactions involving CLO-Equities held by the Company. Accordingly, the fair value of the Company's indirect investment in CLO-Equities is determined using a discounted cash flow model prepared by an external investment manager.The default and loss severity rates are the most judgmental unobservable market inputs to the discounted cash flow model to which the valuation of the Company's indirect investment in CLO-Equities is most sensitive. A significant increase (decrease) in either of these significant inputs in isolation would result in a lower (higher) fair value estimate for the investment in CLO-Equities and, in general, a change in default rate assumptions would be accompanied by a directionally similar change in loss severity rate assumptions. Collateral spreads and estimated maturity dates are less judgmental inputs as they are based on the historical average of actual spreads and the weighted average life of the current underlying portfolios, respectively. A significant increase (decrease) in either of these significant inputs in isolation would result in a higher (lower) fair value estimate for the investment in CLO-Equities. In general, these inputs have no significant interrelationship with each other or with default and loss severity rates.On a quarterly basis, the Company's valuation process for its indirect investment in CLO-Equities includes a review of the underlying cash flows and key assumptions used in the discounted cash flow model. The above significant unobservable inputs are reviewed and updated based on information obtained from secondary markets, including information received from the managers of the Company's CLO-Equities investment. In order to assess the reasonableness of the inputs the Company uses in the discounted cash flow model, the Company maintains an understanding of current market conditions, historical results, and emerging trends that may impact future cash flows. In addition, the assumptions the Company uses in its models are updated through regular communication with industry participants and ongoing monitoring of the deals in which the Company participates. Other Investments - Other Privately Held SecuritiesOther privately held securities are initially valued at cost which approximates fair value. In subsequent measurement periods, the fair value of the variable yield security was determined using an externally developed discounted cash flow model. This model includes inputs that are specific to that investment. The inputs used in the fair value measurement include an appropriate discount rate, default rate, loss absorption rate and estimated maturity date. The selection of an appropriate discount rate is judgmental and is the most significant unobservable input used in the valuation of this investment. A significant increase (decrease) in this input in isolation could result in significantly lower (higher) fair value measurement for this investment. In order to assess the reasonableness of the inputs the Company uses in the discounted cash flow model, the Company maintains an understanding of current market conditions, historical results, as well as investee specific information that may impact future cash flows.31Table of ContentsAXIS CAPITAL

Transfers out of Level 3 into Level 2There were no transfers out of Level 3 into Level 2 during the three and nine months ended SeptemberÂ 30, 2024 and 2023. Other Transfers out of Level 3During the nine months ended SeptemberÂ 30, 2024, one private company investment fund included in other privately held investments in the consolidated balance sheets was transferred from Level 3 to the NAV practical expedient. During the nine months ended September 30, 2023, two early-stage venture capital funds included in other privately held investments in the consolidated balance sheets were transferred from Level 3 to the NAV practical expedient. In addition, the Company's investment in Monarch Point Re was transferred from Level 3 to Equity method investments.33Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)5.Â Â Â Â FAIR VALUE MEASUREMENTS (CONTINUED)Measuring the Fair Value of Other Investments Using Net Asset ValuationsThe fair values of multi-strategy funds, direct lending funds, private equity funds, real estate funds and private company investment funds are estimated using NAVs as advised by external fund managers or third-party administrators. For these funds, NAVs are based on the manager's or administrator's valuation of the underlying holdings in accordance with the fund's governing documents and in accordance with U.S. GAAP.For multi-strategy funds, direct lending funds, private equity funds, real estate funds and private company investment funds, valuation statements are typically released on a reporting lag. Therefore, the Company estimates the fair value of these funds by starting with the most recent fund valuations and adjusting for capital calls, redemptions, drawdowns and distributions. Return estimates are not available from the relevant fund managers for these funds, therefore the Company typically has a reporting lag in its fair value measurements of these funds. At SeptemberÂ 30, 2024 and DecemberÂ 31, 2023 all funds measured at fair value using NAVs are reported generally on a one quarter lag.The Company often does not have access to financial information relating to the underlying securities held within the funds, therefore, management is unable to corroborate the fair values placed on the securities underlying the asset valuations provided by fund managers or fund administrators. In order to assess the reasonableness of the NAVs, the Company performs a number of monitoring procedures on a quarterly basis, to assess the quality of the information provided by fund managers and fund administrators. These procedures include, but are not limited to, regular review and discussion of each fund's performance with its manager, regular evaluation of fund performance against applicable benchmarks and the backtesting of the Company's fair value estimates against subsequently received NAVs. Backtesting involves comparing the Company's previously reported fair values for each fund against NAVs per audited financial statements (for year-end values) and final NAVs from fund managers and fund administrators (for interim values).The fair values of multi-strategy funds, direct lending funds, private equity funds, real estate funds and private company investment funds, are measured using the NAV practical expedient, therefore the fair values of these funds have not been categorized within the fair value hierarchy.34Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)5.Â Â Â Â FAIR VALUE MEASUREMENTS (CONTINUED)Financial Instruments Disclosed, But Not Carried, at Fair ValueThe fair value of financial instruments accounting guidance also applies to financial instruments disclosed, but not carried, at fair value, except for certain financial instruments, including insurance contracts. At SeptemberÂ 30, 2024, the carrying values of cash and cash equivalents including restricted amounts, accrued investment income, receivable for investments sold, certain other assets, payable for investments purchased and certain other liabilities approximated fair values due to their short maturities. As these financial instruments are not actively traded, their fair values are classified as Level 2. At SeptemberÂ 30, 2024, the Company's fixed maturities, held to maturity, were recorded at amortized cost with a carrying value of $504Â million (2023: $686Â million) and a fair value of $500Â million (2023: $676Â million). The fair values of these securities are determined using a model which uses prepayment speeds and spreads sourced primarily from the new issue market. As the significant inputs used to price these securities are observable market inputs, their fair values are classified as Level 2.At SeptemberÂ 30, 2024, the carrying value of mortgage loans, held for investment, approximated fair value. The fair values of mortgage loans are primarily determined by estimating expected future cash flows and discounting them using current interest rates for similar mortgage loans with similar credit risk or are determined from pricing for similar loans. As mortgage loans are not actively traded, their fair values are classified as Level 3.At SeptemberÂ 30, 2024, the Company's debt was recorded at amortized cost with a carrying value of $1,315 million (2023: $1,314 million) and a fair value of $1,276 million (2023: $1,198 million). The fair value of the Company's debt is based on prices obtained from a third-party pricing service and is determined using the spread above the risk-free yield curve. These spreads are generally obtained from the new issue market, secondary trading and broker-dealer quotes. As the yields for the risk-free yield curve and the spreads are observable market inputs, the fair value of this debt is classified as Level 2.At SeptemberÂ 30, 2024, Federal Home Loan Bank advances were recorded at amortized cost with a carrying value of $76 million (2023: $86 million) and a fair value of $76 million (2023: $86 million). As these advances are not actively traded, their fair values are classified as Level 2.35Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)6.Â Â Â Â DERIVATIVE INSTRUMENTSThe following table provides the balance sheet classifications of derivatives recorded at fair value:Â Â September 30, 2024December 31, 2023Â Â DerivativenotionalamountDerivativeassetfairvalue(1)Derivativeliabilityfairvalue(1)DerivativenotionalamountDerivativeassetfairvalue(1)Derivativeliabilityfairvalue(1)Relating to investment portfolio:Foreign exchange forward contracts$66,668Â $37Â $106Â $49,307Â $66Â $274Â Relating to underwriting portfolio:Foreign exchange forward contracts1,373,176Â 1,072Â 3,847Â 1,347,559Â 4,358Â 9,891Â Total derivatives$1,109Â $3,953Â $4,424Â $10,165Â (1)Derivative assets and derivative liabilities are classified within other assets and other liabilities in the consolidated balance sheets.The notional amounts of derivative contracts represent the basis on which amounts paid or received are calculated and are presented in the above table to quantify the volume of the Company's derivative activities. Notional amounts are not reflective of credit risk. None of the Company's derivative instruments are designated as hedges.Offsetting Assets and LiabilitiesThe Company's derivative instruments are generally traded under International Swaps and Derivatives Association master netting agreements which establish terms that apply to all transactions. In the event of a bankruptcy or other stipulated event, master netting agreements provide that individual positions be replaced with a new amount, usually referred to as the termination amount, determined by taking into account market prices and converting into a single currency. Effectively, this contractual close-out netting reduces credit exposure from gross to net exposure. The following table provides a reconciliation of gross derivative assets and liabilities to the net amounts presented in the consolidated balance sheets, with the difference being attributable to the impact of master netting agreements:September 30, 2024December 31, 2023Gross amountsGross amounts offsetNetamounts(1)Gross amountsGross amounts offsetNetamounts(1)Derivative assets$4,087Â $(2,978)$1,109Â $8,708Â $(4,284)$4,424Â Derivative liabilities$6,931Â $(2,978)$3,953Â $14,449Â $(4,284)$10,165Â (1)Net asset and liability derivatives are classified within other assets and other liabilities in the consolidated balance sheets.Refer to Note 4 'Investments' for information on reverse repurchase agreements.a) Relating to Investment PortfolioForeign Currency RiskThe Company's investment portfolio is exposed to foreign currency risk. Therefore, the fair values of its investments are partially influenced by changes in foreign exchange rates. The Company may enter into foreign exchange forward contracts to manage the effect of this foreign currency risk. These foreign currency hedging activities are not designated as specific hedges for financial reporting purposes.36Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)6.Â Â Â Â DERIVATIVE INSTRUMENTS (CONTINUED)b) Relating to Underwriting PortfolioForeign Currency RiskThe Company's insurance and reinsurance subsidiaries and branches operate in various countries. Some of its business is written in currencies other than the U.S. dollar, therefore the underwriting portfolio is exposed to significant foreign currency risk. The Company manages foreign currency risk by seeking to match its foreign-denominated net liabilities under insurance and reinsurance contracts with cash and investments that are denominated in the same currencies. The Company uses derivative instruments, specifically, forward contracts to economically hedge foreign currency exposures.The following table provides the total unrealized and realized gains (losses) recognized in net income (loss) for derivatives not designated as hedges:Â Â Consolidated statement of operations line item that includes gain (loss) recognized in net income (loss)Three months ended September 30,Nine months ended September 30,Â Â 2024202320242023Relating to investment portfolio:Foreign exchange forward contractsNet investment gains (losses)(870)1,692Â $153Â $218Â Relating to underwriting portfolio:Foreign exchange forward contractsForeign exchange (losses) gains6,906Â (7,208)7,987Â 1,030Â Total$6,036Â $(5,516)$8,140Â $1,248Â 37Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)7.Â Â Â Â RESERVE FOR LOSSES AND LOSS EXPENSESReserve Roll-ForwardThe following table presents a reconciliation of the Company's beginning and ending gross reserve for losses and loss expenses and net reserve for unpaid losses and loss expenses:Nine months ended September 30,20242023Gross reserve for losses and loss expenses, beginning of period$16,434,018Â $15,168,863Â Less reinsurance recoverable on unpaid losses and loss expenses, beginning of period(6,323,083)(5,831,172)Net reserve for unpaid losses and loss expenses, beginning of period10,110,935Â 9,337,691Â Net incurred losses and loss expenses related to:Current year2,334,543Â 2,253,958Â Prior years(8,011)(13,118)Â 2,326,532Â 2,240,840Â Net paid losses and loss expenses related to:Current year(308,581)(272,260)Prior years(1,769,278) (1,730,640)Â (2,077,859)(2,002,900)Foreign exchange and other124,792Â (51,902)Net reserve for unpaid losses and loss expenses, end of period10,484,400Â 9,523,729Â Reinsurance recoverable on unpaid losses and loss expenses, end of period6,810,929Â 6,031,527Â Gross reserve for losses and loss expenses, end of period$17,295,329Â $15,555,256Â On September 22, 2023, the Company entered into a retrocession reinsurance agreement with a third-party reinsurer which was deemed to have met the established criteria for retroactive reinsurance accounting. At September 30, 2023, foreign exchange and other included an increase in reinsurance recoverable on unpaid losses of $76Â million related to this transaction (refer to NoteÂ 4(f) 'Equity Method Investments' and Note 5 'Fair Value Measurements').Estimates for Significant Catastrophe EventsAt SeptemberÂ 30, 2024, net reserves for losses and loss expenses included estimated amounts for numerous catastrophe events. The magnitude and complexity of losses arising from certain of these events inherently increase the level of uncertainty and, therefore, the level of management judgment involved in arriving at estimated net reserves for losses and loss expenses. These events include Hurricane Helene, Hurricane Ian, Winter Storm Elliot, June European Convective Storms, the Russia-Ukraine war and the COVID-19 pandemic. As a result, actual losses for these events may ultimately differ materially from current estimates. During the nine months ended SeptemberÂ 30, 2024, the Company recognized catastrophe and weather-related losses, net of reinsurance, of $145Â million (2023: $112Â million).38Table of ContentsAXIS CAPITAL HOLDINGS LIMITEDNOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)7.Â Â Â Â RESERVE FOR LOSSES AND LOSS EXPENSES (CONTINUED)Prior Year Reserve DevelopmentThe Company's net prior year reserve development arises from changes to estimates of losses and loss expenses related to loss events that occurred in previous calendar years. During the three months ended March 31, 2023, the transition in our senior leadership resulted in a modification of the previously existing vesting terms of the outstanding restricted stock units and performance restricted stock units granted in 2022 and earlier of one senior leader, and a modification of the performance period of that leader's performance restricted stock units granted in 2022. The modifications did not result in incremental compensation expense.Performance Restricted Stock Units granted in 2024 with a performance conditionThe fair value of these performance restricted stock units was determined based on the closing price of the Company's common shares on the grant date, and compensation expense is recognized on a straight-line basis over the requisite service period, and is subject to periodic adjustment based on the achievement of established performance criteria during the performance period. Our underwriting operations are organized around our global underwriting platforms, AXIS Insurance and AXIS Re.We provide our clients and distribution partners with a broad range of risk transfer products and services, and strong capacity, backed by excellent financial strength. We manage our portfolio holistically, aiming to construct the optimum portfolio of risks, consistent with our risk appetite and the development of our franchise. We nurture an ethical, entrepreneurial, disciplined and diverse culture that promotes outstanding client service, intelligent risk taking, operating efficiency, corporate citizenship and the achievement of superior risk-adjusted returns for our shareholders. We believe that the achievement of our objectives will position us as a global leader in specialty risks. The execution of our business strategy for the first nine months of 2024 included the following:â€¢growing in a number of attractive specialty insurance and reinsurance markets including U.S. excess and surplus lines and Lloyd's specialty insurance business;â€¢re-balancing our portfolio towards less volatile lines of business, that carry attractive returns while deploying capital within risk limit tolerance, diversification criteria and risk management strategy;â€¢investing in attractive growth markets and advancing capabilities to address more transactional specialist business targeting the lower middle market with our key distribution partners;â€¢leveraging our global platform to introduce our products and services to new regions including the expansion of our London specialty lines to North America markets;â€¢continuing the implementation of a more focused distribution strategy while building mutually beneficial relationships with clients and partners;â€¢improving the effectiveness and efficiency of our operating platforms and processes through our "How We Work" program;â€¢investing in data and technology capabilities, and tools to empower our underwriters and enhance the service that we provide to our customers; â€¢utilizing reinsurance markets and third-party capital relationships;â€¢fostering a positive workplace environment that enables us to attract, retain and develop top talent; andâ€¢growing our corporate citizenship program to give back to our communities and help contribute to a more sustainable future.56Table of ContentsOutlookWe are committed to advancing AXIS as a specialty underwriting leader that delivers consistent, profitable growth. We believe our market positioning, diversified book of business, specialty underwriting acumen, global platform, claims management capabilities, and deep distribution relationships, supported by a conservative and well performing investment portfolio, provides opportunity for continued and increased profitability.Overall, the current property and casualty market trends continue to be favorable for specialty insurance and reinsurance carriers. We anticipate market rate change to continue to exceed loss cost trends across the casualty classes but do expect to experience moderate rate erosion in the first party as well as financial lines sectors. Following multiple years of rate increases outpacing loss cost trends across the specialty sector, pricing has moderated in these distinct areas due to the emergence of new capital creating an increase in available capacity. We will continue to lean into sectors, and sub sectors, where premium adequacy metrics remain strong and where we see market dislocations creating opportunity for additional profitable growth. The wholesale channel continues to experience growth due to market dislocations in the admitted market. We anticipate this continuing throughout 2024 with market opportunities arising predominantly in Specialty and Excess and Surplus lines. We continue to pursue targeted growth opportunities by employing a disciplined underwriting appetite and strategy.Pricing momentum in non-proportional reinsurance continues to be strong while our proportional reinsurance business is benefiting from rate increases in the underlying business. We expect these market conditions to persist in the near term. We continue to focus on underwriting discipline to drive targeted profitable growth among the specialty and casualty reinsurance lines that we offer.Across the business, we will continue to pursue targeted growth opportunities by employing a disciplined underwriting strategy and appetite. Where prices continue to deliver adequate profitability, we will look to grow within our risk and volatility guidelines. With a strengthened book of business, and an expanding footprint in specialty markets experiencing favorable conditions, we believe AXIS is well positioned to drive profitable growth within the current environment.Recent Developments AXIS Syndicate 2050On February 15, 2024, Lloyd's granted AXIS Energy Transition Syndicate 2050 ("AXIS Syndicate 2050") permission to underwrite and on April 1, 2024, AXIS Syndicate 2050, which is dedicated to providing capacity for new energy projects with a critical role in supporting the transition to net zero, commenced underwriting. For the three months ended SeptemberÂ 30, 2023, the net investment losses were primarily due to net realized losses on the sale of U.S. government and corporate debt securities, and net unrealized losses on equity securities.For the nine months ended SeptemberÂ 30, 2024, the net investment losses were primarily due to net realized losses on the sale of Agency RMBS, U.S. government and corporate debt securities, partially offset by net unrealized gains on equity securities and realized gains on the sale of equity securities. For the nine months ended SeptemberÂ 30, 2023, the net investment losses were primarily due to net realized losses on the sale of corporate debt and U.S. government securities.(Increase) decrease in allowance for expected credit losses, fixed maturities, available for saleFor the nine months ended SeptemberÂ 30, 2024, the allowance for expected credit losses decreased by $6 million, primarily related to the sale of securities. Foreign exchange losses of $92 million for the three months ended SeptemberÂ 30, 2024 reflected the impact of the weakening of the U.S. dollar on the remeasurement of net insurance-related liabilities denominated in pound sterling and euro. Foreign exchange losses of $61 million for the nine months ended SeptemberÂ 30, 2024 reflected the impact of the weakening of the U.S. dollar on the remeasurement of net insurance-related liabilities primarily denominated in pound sterling and euro.Foreign exchange gains of $51 million for the three months ended SeptemberÂ 30, 2023 reflected the impact of the strengthening of the U.S. dollar on the remeasurement of net insurance-related liabilities denominated in pound sterling, euro and Canadian dollar.Foreign exchange gains of $12 million for the nine months ended SeptemberÂ 30, 2023 reflected the impact of the strengthening of the U.S. dollar on the remeasurement of net insurance-related liabilities denominated in pound sterling and Turkish lira.74Table of ContentsInterest Expense and Financing CostsInterest expense and financing costs are related to interest due on the 5.150% senior unsecured notes ("5.150% Senior Notes") issued in 2014, the 4.000% senior unsecured notes ("4.000% Senior Notes") issued in 2017, the 3.900% senior unsecured notes ("3.900% Senior Notes"), the 4.900% fixed-rate reset junior subordinated notes ("Junior Subordinated Notes") issued in 2019, and the Federal Home Loan advances ("FHLB advances") received in 2022 and 2023.Interest expense and financing costs were $17 million and $51 million for the three and nine months ended SeptemberÂ 30, 2024, respectively, and $16 million and $50 million for the three and nine months ended SeptemberÂ 30, 2023, respectively. Income Tax Expense (Benefit)Income tax expense (benefit) primarily results from income (loss) in our foreign operations in the U.S., U.K., and Europe. Our effective tax rate which is calculated as income tax expense (benefit) divided by income (loss) before tax including interest in income (loss) of equity method investments was 21.0% and (4.8%) for the three and nine months ended SeptemberÂ 30, 2024, and 11.6% for the three and nine months ended SeptemberÂ 30, 2023. This effective rate can vary between periods depending on the distribution of net income (loss) among tax jurisdictions, as well as other factors. The income tax expense of $48Â million for the three months ended SeptemberÂ 30, 2024 was principally due to pre-tax income in our U.S. and U.K. operations.The income tax benefit of $36Â million for the nine months ended SeptemberÂ 30, 2024 was due to the recognition of an income tax benefit of $163 million related to a future Bermuda corporate income tax rate of 15%, pursuant to the Corporate Income Tax Act 2023, partially offset by income tax expense associated with pre-tax income in our U.S., U.K. and European operations.The income tax expense of $25Â million for the three months ended SeptemberÂ 30, 2023 was due to pre-tax income in our U.S., U.K. and European operations.The income tax expense of $68Â million for the nine months ended SeptemberÂ 30, 2023 was due to pre-tax income in our U.S., U.K. and European operations.75Table of ContentsFINANCIAL MEASURESWe believe the following financial indicators are important in evaluating performance and measuring the overall growth in value generated for common shareholders:Â Â Three months ended September 30,Nine months ended September 30,Â Â 2024202320242023Annualized return on average common equity(1)13.0Â %16.1Â %19.9Â %15.4Â %Annualized operating return on average common equity(2)17.3Â %18.0Â %18.2Â %18.4Â %Book value per diluted common share(3)$64.65$51.17$64.65$51.17Cash dividends declared per common share$0.44$0.44$1.32$1.32Increase (decrease) in book value per diluted common share adjusted for dividends$5.80$0.63$11.91$5.54(1)Annualized return on average common equity ("ROACE") is calculated by dividing annualized net income (loss) available (attributable) to common shareholders for the period by the average common shareholders' equity determined using the common shareholders' equity balances at the beginning and end of the period.(2)Annualized operating return on average common equity ("operating ROACE") is a non-GAAP financial measure as defined in Item 10(e) of SEC Regulation S-K. The reconciliation to the most comparable GAAP financial measure, annualized ROACE, and a discussion of the rationale for its presentation is provided in 'Management's Discussion and Analysis of Financial Condition and Results of Operations â€” Non-GAAP Financial Measures Reconciliation'.(3)Book value per diluted common share represents total common shareholdersâ€™ equity divided by the number of diluted common share outstanding, determined using the treasury stock method. Return on Average Common EquityOur objective is to generate superior returns on capital that appropriately reward common shareholders for the risks we assume and to grow revenue only when we expect the returns will meet or exceed our requirements. We recognize that the nature of underwriting cycles and the frequency or severity of large loss events in any one year may challenge the ability to achieve a profitability target in any specific period. ROACE reflects the impact of net income (loss) available (attributable) to common shareholders, including net investment gains (losses), foreign exchange losses (gains), reorganization expenses, interest in income (loss) of equity method investments and Bermuda net deferred tax asset.The decrease in ROACE for the three months ended SeptemberÂ 30, 2024, compared to the three months ended SeptemberÂ 30, 2023, was primarily driven by foreign exchange losses, increases in average common shareholders' equity and income tax expense and a decrease in underwriting income, partially offset by net investment gains, an increase in net investment income and decreases in reorganization expenses and corporate expenses.The increase in ROACE for the nine months ended SeptemberÂ 30, 2024, compared to the nine months ended SeptemberÂ 30, 2023, was primarily driven by an increase in net investment income, an income tax benefit, decreases in net investment losses and corporate expenses, and increases in interest in income of equity method investments and underwriting income, partially offset by an increase in average common shareholders' equity and foreign exchange losses.Operating ROACE excludes the impact of net investment gains (losses), foreign exchange losses (gains), reorganization expenses, interest in income (loss) of equity method investments and Bermuda net deferred tax asset.The decrease in operating ROACE for the three months ended SeptemberÂ 30, 2024, compared to the three months ended SeptemberÂ 30, 2023, was primarily driven by increases in average common shareholders' equity and income tax expense and a decrease in underwriting income, partially offset by an increase in net investment income and a decrease in corporate expenses.Operating ROACE for the nine months ended SeptemberÂ 30, 2024, was comparable to the nine months ended SeptemberÂ 30, 2023, primarily driven by an increase in average common shareholders' equity, largely offset by an increase in net investment income, an income tax benefit, a decrease in corporate expenses and an increase in underwriting income.76Table of ContentsBook Value per Diluted Common ShareWe consider book value per diluted common share to be an appropriate measure of returns to common shareholders, as we believe growth in book value on a diluted basis will ultimately translate into appreciation of our stock price.During the three months ended SeptemberÂ 30, 2024, book value per diluted common share increased by 9.0% due to net income for the period, and net unrealized investment gains recognized in accumulated other comprehensive income (loss), partially offset by common dividends declared.During the nine months ended SeptemberÂ 30, 2024, book value per diluted common share increased by 19.6% due to net income for the period, and net unrealized investment gains recognized in accumulated other comprehensive income (loss), partially offset by common dividends declared.Cash Dividends Declared per Common Share and Common Share RepurchasesWe believe in returning excess capital to shareholders by way of dividends and share repurchases. Accordingly, dividend policy is an integral part of the value we create for shareholders. Our Board of Directors has approved quarterly common share dividends for twenty-one consecutive years.Book Value per Diluted Common Share Adjusted for DividendsTaken together, we believe that growth in book value per diluted common share and common share dividends declared represent the total value created for common shareholders. As companies in the insurance industry have differing dividend payout policies, we believe investors use the book value per diluted common share adjusted for dividends metric to measure comparable performance across the industry.During the three months ended SeptemberÂ 30, 2024, the increase in total value of $5.80, or 10%, was driven by net income for the period, and net unrealized investment gains recognized in accumulated other comprehensive income (loss).During the nine months ended SeptemberÂ 30, 2024, the increase in total value of $11.91, or 22%, was driven by net income for the period, and net unrealized investment gains recognized in accumulated other comprehensive income (loss).During the three months ended SeptemberÂ 30, 2023, the increase in total value of $0.63, or 1%, was driven by net income for the period, partially offset by net unrealized investment losses recognized in accumulated other comprehensive income (loss).During the nine months ended SeptemberÂ 30, 2023, the increase in total value of $5.54, or 12%, was driven by net income for the period.77Table of ContentsNON-GAAP FINANCIAL MEASURES RECONCILIATIONThree months ended September 30,Nine months ended September 30,2024202320242023Net income available to common shareholders$173,165$180,535$765,465$496,182Net investment (gains) losses(32,182)53,11430,50397,671Foreign exchange losses (gains)92,204(50,570)61,268(11,755)Reorganization expensesâ€”28,99726,31228,997Interest in income of equity method investments(1,621)(2,940)(10,689)(2,835)Bermuda net deferred tax asset(1)â€”â€”(162,705)â€”Income tax benefit(2)(1,503)(7,245)(9,938)(15,138)Operating income$230,063$201,891$700,216$593,122Earnings per diluted common share$2.04$2.10$8.97$5.77Net investment (gains) losses(0.38)0.620.361.14Foreign exchange losses (gains)1.08(0.59)0.72(0.14)Reorganization expensesâ€”0.340.310.34Interest in income of equity method investments(0.02)(0.03)(0.13)(0.03)Bermuda net deferred tax assetâ€”â€”(1.91)â€”Income tax benefit(0.01)(0.10)(0.11)(0.18)Operating income per diluted common share$2.71$2.34$8.21$6.90Weighted average diluted common shares outstanding(3)85,00086,10885,33885,927Average common shareholders' equity$5,321,349$4,477,086$5,123,212$4,286,559Annualized return on average common equity13.0Â %16.1Â %19.9Â %15.4Â %Annualized operating return on average common equity(4)17.3Â %18.0Â %18.2Â %18.4Â %(1)Net deferred tax benefit due to the recognition of deferred tax assets net of deferred tax liabilities related to a future Bermuda corporate income tax rate of 15%, pursuant to the Corporate Income Tax Act 2023.(2)Tax expense (benefit) associated with the adjustments to net income (loss) available (attributable) to common shareholders. The reconciliation to the most comparable GAAP financial measure, annualized ROACE, is presented above, and a discussion of the rationale for its presentation is provided below.78Table of ContentsRationale for the Use of Non-GAAP Financial MeasuresWe present our results of operations in a way we believe will be meaningful and useful to investors, analysts, rating agencies and others who use our financial information to evaluate our performance. Some of the measurements we use are considered non-GAAP financial measures under SEC rules and regulations. In this Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), we present underwriting-related general and administrative expenses, consolidated underwriting income (loss), current accident year loss ratio, catastrophe and weather-related losses ratio, current accident year loss ratio, excluding catastrophe and weather-related losses, operating income (loss) (in total and on a per share basis), annualized operating return on average common equity ("operating ROACE"), amounts presented on a constant currency basis and pre-tax total return on cash and investments excluding foreign exchange movements, which are non-GAAP financial measures as defined in Item 10(e) of SEC Regulation S-K. We believe that these non-GAAP financial measures, which may be defined and calculated differently by other companies, help explain and enhance the understanding of our results of operations. However, these measures should not be viewed as a substitute for those determined in accordance with accounting principles generally accepted in the United States of America

("U.S. GAAP"). Underwriting-Related General and Administrative ExpensesUnderwriting-related general and administrative expenses include those general and administrative expenses that are incremental and/or directly attributable to our underwriting operations. While this measure is presented in Item 1, Note 3 to the Consolidated Financial Statements 'Segment Information', it is considered a non-GAAP financial measure when presented elsewhere on a consolidated basis.Corporate expenses include holding company costs necessary to support our worldwide insurance and reinsurance operations and costs associated with operating as a publicly-traded company. As these costs are not incremental and/or directly attributable to our underwriting operations, these costs are excluded from underwriting-related general and administrative expenses, and therefore, consolidated underwriting income (loss). General and administrative expenses, the most comparable GAAP financial measure to underwriting-related general and administrative expenses, also includes corporate expenses. The reconciliation of underwriting-related general and administrative expenses to general and administrative expenses, the most comparable GAAP financial measure, is presented in 'Management's Discussion and Analysis of Financial Condition and Results of Operations â€“ Consolidated Results of Operations'.Consolidated Underwriting Income (Loss)Consolidated underwriting income (loss) is a pre-tax measure of underwriting profitability that takes into account net premiums earned and other insurance related income (loss) as revenues and net losses and loss expenses, acquisition costs and underwriting-related general and administrative expenses as expenses. While this measure is presented in Item 1, Note 3 to the Consolidated Financial Statements 'Segment Information', it is considered a non-GAAP financial measure when presented elsewhere on a consolidated basis.We evaluate our underwriting results separately from the performance of our investment portfolio. As a result, we believe it is appropriate to exclude net investment income and net investment gains (losses) from our underwriting profitability measure.Foreign exchange losses (gains) in our consolidated statements of operations primarily relate to the impact of foreign exchange rate movements on our net insurance-related liabilities. However, we manage our investment portfolio in such a way that unrealized and realized foreign exchange losses (gains) on our investment portfolio, including unrealized foreign exchange losses (gains) on our equity securities, and foreign exchange losses (gains) realized on the sale of our available for sale investments and equity securities recognized in net investment gains (losses), and unrealized foreign exchange losses (gains) on our available for sale investments in other comprehensive income (loss), generally offset a large portion of the foreign exchange losses (gains) arising from our underwriting portfolio, thereby minimizing the impact of foreign exchange rate movements on total shareholders' equity. As a result, we believe that foreign exchange losses (gains) in our consolidated statements of operations in isolation are not a meaningful contributor to our underwriting performance. Therefore, foreign exchange losses (gains) are excluded from consolidated underwriting income (loss).Interest expense and financing costs primarily relate to interest payable on our debt and Federal Home Loan Bank advances. As these expenses are not incremental and/or directly attributable to our underwriting operations, these expenses are excluded from underwriting-related general and administrative expenses and, therefore, consolidated underwriting income (loss).79Table of ContentsReorganization expenses in 2024 primarily relate to severance costs attributable to our "How We Work" program which is focused on simplifying our operating structure. Reorganization expenses in 2023 primarily related to impairments of computer software assets and severance costs attributable to the Company's "How We Work" program which is focused on simplifying the Companyâ€™s operating structure. Reorganization expenses are primarily driven by business decisions, the nature and timing of which are not related to the underwriting process. Therefore, these expenses are excluded from consolidated underwriting income (loss).Amortization of intangible assets arose from business decisions, the nature and timing of which are not related to the underwriting process. Therefore, these expenses are excluded from consolidated underwriting income (loss).We believe that the presentation of underwriting-related general and administrative expenses and consolidated underwriting income (loss) provides investors with an enhanced understanding of our results of operations, by highlighting the underlying pre-tax profitability of our underwriting activities. The reconciliation of consolidated underwriting income (loss) to net income (loss), the most comparable GAAP financial measure, is presented in 'Management's Discussion and Analysis of Financial Condition and Results of Operations â€“ Consolidated Results of Operations'. Current Accident Year Loss RatioCurrent accident year loss ratio represents net losses and loss expenses ratio exclusive of net favorable (adverse) prior year reserve development. We believe that the presentation of current accident year loss ratio provides investors with an enhanced understanding of our results of operations by highlighting net losses and loss expenses associated with our underwriting activities excluding the impact of volatile prior year reserve development. The reconciliation of current accident year loss ratio to net losses and loss expenses ratio, the most comparable GAAP financial measure, is presented in 'Management's Discussion and Analysis of Financial Condition and Results of Operations â€“ Consolidated Results of Operations'.Catastrophe and Weather-Related Losses Ratio and Current Accident Year Loss Ratio, excluding Catastrophe and Weather-Related LossesCatastrophe and weather-related losses ratio represents net losses and loss expenses ratio associated with natural disasters, man-made catastrophes, other catastrophe events and other weather-related events exclusive of net favorable (adverse) prior year reserve development. Current accident year loss ratio, excluding catastrophe and weather-related losses represents net losses and loss expenses ratio exclusive of net favorable (adverse) prior year reserve development and net losses and loss expenses associated with natural disasters, man-made catastrophes, other catastrophe events and other weather-related events. We believe that the presentation of these ratios that separately identify net losses and loss expenses associated with catastrophe and weather-related events provide investors with an enhanced understanding of our results of operations due to the inherently unpredictable nature of the occurrence of these events, the potential magnitude of these losses and the complexity that affects our ability to accurately estimate ultimate losses associated with these events.The reconciliation of catastrophe and weather-related losses ratio and current accident year loss ratio, excluding catastrophe and weather-related losses to net losses and loss expenses ratio, the most comparable GAAP financial measure, is presented in 'Management's Discussion and Analysis of Financial Condition and Results of Operations â€“ Consolidated Results of Operations'.Operating Income (Loss)Operating income (loss) represents after-tax operational results exclusive of net investment gains (losses), foreign exchange losses (gains), reorganization expenses, interest in income (loss) of equity method investments and Bermuda net deferred tax asset. Although the investment of premiums to generate income and investment gains (losses) is an integral part of our operations, the determination to realize investment gains (losses) is independent of the underwriting process and is heavily influenced by the availability of market opportunities. Furthermore, many users believe that the timing of the realization of investment gains (losses) is somewhat opportunistic for many companies.Foreign exchange losses (gains) in our consolidated statements of operations primarily relate to the impact of foreign exchange rate movements on net insurance-related liabilities. However, we manage our investment portfolio in such a way that unrealized and realized foreign exchange losses (gains) on our investment portfolio, including unrealized foreign exchange losses (gains) on our 80Table of Contentsequity securities and foreign exchange losses (gains) realized on the sale of our available for sale investments and equity securities recognized in net investment gains (losses) and unrealized foreign exchange losses (gains) on our available for sale investments in other comprehensive income (loss), generally offset a large portion of the foreign exchange losses (gains) arising from our underwriting portfolio, thereby minimizing the impact of foreign exchange rate movements on total shareholders' equity. As a result, we believe that foreign exchange losses (gains) in our consolidated statements of operations in isolation are not a meaningful contributor to the performance of our business. Therefore, foreign exchange losses (gains) are excluded from operating income (loss).Reorganization expenses in 2024 primarily relate to severance costs attributable to our "How We Work" program which is focused on simplifying our operating structure. Reorganization expenses in 2023 primarily related to impairments of computer software assets and severance costs attributable to the Company's "How We Work" program which is focused on simplifying the Companyâ€™s operating structure. Reorganization expenses are primarily driven by business decisions, the nature and timing of which are not related to the underwriting process. Therefore, these expenses are excluded from operating income (loss).Interest in income (loss) of equity method investments is primarily driven by business decisions, the nature and timing of which are not related to the underwriting process. Therefore, this income (loss) is excluded from operating income (loss).Bermuda net deferred tax asset is due to the recognition of deferred tax assets net of deferred tax liabilities related to a future Bermuda corporate income tax rate of 15%, pursuant to the Corporate Income Tax Act 2023 effective for fiscal years beginning on or after January 1, 2025. The Bermuda net deferred tax asset is not related to the underwriting process. Therefore, this income is excluded from operating income (loss).Certain users of our financial statements evaluate performance exclusive of after-tax net investment gains (losses), foreign exchange losses (gains), reorganization expenses, interest in income (loss) of equity method investments and Bermuda net deferred tax asset in order to understand the profitability of recurring sources of income.We believe that showing net income (loss) available (attributable) to common shareholders exclusive of after-tax net investment gains (losses), foreign exchange losses (gains), reorganization expenses, interest in income (loss) of equity method investments and Bermuda net deferred tax asset reflects the underlying fundamentals of our business. In addition, we believe that this presentation enables investors and other users of our financial information to analyze performance in a manner similar to how our management analyzes the underlying business performance. We also believe this measure follows industry practice and, therefore, facilitates comparison of our performance with our peer group. We believe that equity analysts and certain rating agencies that follow us, and the insurance industry as a whole, generally exclude these items from their analyses for the same reasons. The reconciliation of operating income (loss) to net income (loss) available (attributable) to common shareholders, the most comparable GAAP financial measure, is presented above. We also present operating income (loss) per diluted common share and annualized operating ROACE, which are derived from the operating income (loss) measure and are reconciled above to the most comparable GAAP financial measures, earnings (loss) per diluted common share and annualized return on average common equity ("ROACE"), respectively. Constant Currency BasisWe present gross premiums written and net premiums earned on a constant currency basis in this MD&A. The amounts presented on a constant currency basis are calculated by applying the average foreign exchange rate from the current year to the prior year amounts. We believe this presentation enables investors and other users of our financial information to analyze growth in gross premiums written and net premiums earned on a constant basis. The reconciliation to gross premiums written and net premiums earned on a GAAP basis is presented in 'Management's Discussion and Analysis of Financial Condition and Results of Operations â€“ Results by Segment'.Pre-Tax Total Return on Cash and Investments excluding Foreign Exchange MovementsPre-tax total return on cash and investments excluding foreign exchange movements measures net investment income (loss), net investments gains (losses), interest in income (loss) of equity method investments, and change in unrealized gains (losses) generated by average cash and investment balances. We believe this presentation enables investors and other users of our financial information to analyze the performance of our investment portfolio. The FHLB advances have maturities in 2024 and 2025 and interest payable at interest rates between 5.1% and 5.5% (2023: interest rates between 5.5% and 5.7%). The Company incurred interest expense of $1Â million (2023: $1Â million) for the three months ended SeptemberÂ 30, 2024 and $3Â million (2023: $3Â million) for the nine months ended SeptemberÂ 30, 2024. The borrowings under the FHLB program are secured by investments with a fair value of $83Â million (2023: $95Â million).Line of credit On March 26, 2024, the $500Â million Facility was amended to reduce the committed utilization capacity available under the Facility to $300Â million, enter into an uncommitted secured letter credit facility with Citibank Europe plc, and extend the tenors of issuable letters of credit to March 31, 2026 and make certain updates

At September 30, 2024, we had $260Â million of remaining authorization under our open-ended Board-authorized share repurchase program for common share repurchases (refer to Part II, Item 2 'Unregistered Sales of Equity Securities and Use of Proceeds' for further details). We expect cash flows generated from operations, combined with liquidity provided by our investment portfolio, will be sufficient to cover cash outflows and other contractual commitments through the foreseeable future. 86Table of ContentsCRITICAL ACCOUNTING ESTIMATESThe consolidated financial statements include certain amounts that are inherently uncertain and judgmental in nature. As a result, we are required to make assumptions and best estimates in order to determine the reported values. We consider an accounting estimate to be critical if: (1) it requires that significant assumptions be made in order to deal with uncertainties and (2) changes in the estimate could have a material impact on our results of operations, financial condition or liquidity.We believe the material items requiring such subjective and complex estimates are:â€¢reserves for losses and loss expenses;â€¢reinsurance recoverable on unpaid losses and loss expenses, including the allowance for expected credit losses;â€¢gross premiums written and net premiums earned;â€¢fair value measurements of financial assets and liabilities; andâ€¢the allowance for expected credit losses associated with fixed maturities, available for sale.We believe that the critical accounting estimates discussion in ItemÂ 7 of our Annual Report on Form 10-K for the year ended DecemberÂ 31, 2023, continues to describe the significant estimates and judgments included in the preparation of the consolidated financial statements.RECENT ACCOUNTING PRONOUNCEMENTSAt SeptemberÂ 30, 2024, there were no recently issued accounting pronouncements that we have not yet adopted that we expect could have a material impact on our results of operations, financial condition or liquidity.87Table of ContentsITEM 3. Accordingly, they do not include all of the information and notes required by U.S. GAAP for complete financial statements. This Quarterly Report on Form 10-Q should be read in conjunction with the financial statements and related notes included in AXIS Capital's Annual Report on Form 10-K for the year ended DecemberÂ 31, 2023, as filed with the SEC. In the opinion of management, these financial statements reflect all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation of the Company's financial position and results of operations for the periods presented.The results of operations for any interim period are not necessarily indicative of the results for a full year. All inter-company accounts and transactions have been eliminated. To facilitate comparison of information across periods, certain reclassifications have been made to prior year amounts to conform to the current year's presentation. At September 30, 2024, the Company presented loan advances made in 2023 separately in the consolidated statements of cash flows. These loan advances made were included in other assets, insurance and reinsurance balances payable, net, and reinsurance recoverable on paid losses and loss expenses in the consolidated statements of cash flows in 2023. This presentation was adopted to facilitate comparison to loan advances made in 2024. This reclassification did not impact results of operations, financial condition or liquidity. Tabular dollar and share amounts are in thousands, with the exception of per share amounts. All amounts are reported in U.S. dollars. Significant Accounting Policies There were no notable changes to the Company's significant accounting policies subsequent to its Annual Report on Form 10-K for the year ended DecemberÂ 31, 2023. The unrealized losses of $256 million (2023: $481 million) were due to non-credit factors and were expected to be recovered as the related securities approach maturity.At September 30, 2024, the Company did not intend to sell the securities in an unrealized loss position and it is more likely than not that the Company will not be required to sell these securities before the anticipated recovery of their amortized costs.b) Â Â Â Â Fixed Maturities, Held to MaturityThe following table provides the amortized cost and fair values of the Company's fixed maturities classified as held to maturity:AmortizedcostAllowance for expected credit lossesNet carrying valueGrossunrealizedgainsGrossunrealizedlossesFairvalueAt September 30, 2024Held to maturityCorporate debt$123,992Â $â€”Â $123,992Â $1,654Â $(6,327)$119,319Â ABS(1)379,784Â â€”Â 379,784Â 566Â (131)380,219Â Total fixed maturities, held to maturity$503,776Â $â€”Â $503,776Â $2,220Â $(6,458)$499,538Â At December 31, 2023Â Â Â Â Held to maturityCorporate debt$95,200Â $â€”Â $95,200Â $298Â $(8,827)$86,671Â ABS(1)591,096Â â€”Â 591,096Â 5Â (1,921)589,180Â Total fixed maturities, held to maturity$686,296Â $â€”Â $686,296Â $303Â $(10,748)$675,851Â (1)Asset-backed securities ("ABS") include debt tranched securities collateralized primarily by collateralized loan obligations ("CLOs").At September 30, 2024, fixed maturities, held to maturity of $504 million (2023: $686 million) were presented net of an allowance for expected credit losses of $nil (2023: $nil). The Company's ABS, held to maturity consist of CLO debt tranched securities. The Company uses a scenario-based approach to review its CLO debt portfolio and reviews subordination levels of these securities to determine their ability to absorb credit losses of the underlying collateral. If losses are forecast to be below the subordination level for a tranche held by the Company, the security is determined not to have a credit loss. At September 30, 2024, the allowance for credit losses expected to be recognized over the life of the Company's ABS, held to maturity was $nil.To estimate expected credit losses for corporate debt securities, held to maturity, the Company's projected cash flows are primarily driven by assumptions regarding the severity of loss, which is a function of the probability of default and projected recovery rates. The Company's default and recovery rates are based on credit ratings, credit analysis and macroeconomic forecasts. At September 30, 2024, the allowance for credit losses expected to be recognized over the life of the Company's corporate debt, held to maturity was $nil.Contractual MaturitiesExpected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. ABS classified as held to maturity had a carrying value of $380 million (2023: $591Â million). Corporate debt classified as held to maturity with a net carrying value of $28 million (2023: $nil) is due between 1 year and 3 years and corporate debt classified as held to maturity with a net carrying value of $96 million (2023: $95 million) is due between 3 years and 10 years.c) Â Â Â Â Equity SecuritiesThe following table provides the cost and fair values of the Company's equity securities:CostGrossunrealizedgainsGrossunrealizedlossesFairvalueAt September 30, 2024Equity securitiesCommon stocks$2,843Â $76Â (418)2,501Â Preferred stocks5,843Â 341Â (100)6,084Â Exchange-traded funds188,625Â 125,072Â (473)313,224Â Bond mutual funds320,779Â 4,896Â (42,650)283,025Â Total equity securities$518,090Â $130,385Â $(43,641)$604,834Â At December 31, 2023Â Â Â Equity securitiesCommon stocks$2,843Â $101Â (398)2,546Â Preferred stocks5,496Â 218Â (113)5,601Â Exchange-traded funds182,989Â 105,858Â (1,572)287,275Â Bond mutual funds352,505Â 4,119Â (63,535)293,089Â Total equity securities$543,833Â $110,296Â $(65,618)$588,511Â d) Â Â Â Â Mortgage LoansThe following table provides details of the Company's mortgage loans, held for investment:Â Â September 30, 2024December 31, 2023Â Â Carrying value% of TotalCarrying value% of TotalMortgage loans, held for investment:Commercial$546,953Â 104Â %$616,368Â 101Â %Allowance for expected credit losses (22,024)(4Â %)(6,220)(1)%Total mortgage loans, held for investment$524,929Â 100Â %$610,148Â 100Â %The primary credit quality indicators for commercial mortgage loans are the debt service coverage ratio which compares a propertyâ€™s net operating income to amounts needed to service the principal and interest due under the loan, (generally, the lower the debt service coverage ratio, the higher the risk of experiencing a credit loss) and the loan-to-value ratio which compares the unpaid principal balance of the loan to the estimated fair value of the underlying collateral (generally, the higher the loan-to-value ratio, the higher the risk of experiencing a credit loss). The debt service coverage ratio and loan-to-value ratio, as well as the values utilized in calculating these ratios, are updated quarterly.The Company has a high quality commercial mortgage loan portfolio with a weighted average debt service coverage ratio of 1.9x (2023: 1.9x) and a weighted average loan-to-value ratio of 78% (2023: 71%). At September 30, 2024, and 2023, there were no past due amounts associated with the commercial mortgage loans held by the Company.On a quarterly basis the Company's exposure to commercial mortgage loans in the office sector, which represents 44% (2023: 41%) of the total mortgage loan portfolio, is evaluated for credit losses based on inputs unique to this sector. This assessment utilizes historical credit loss experience adjusted to reflect current conditions and management forecasts. Further, collateral dependent commercial mortgage loans (e.g., when the borrower is experiencing financial difficulty, including when foreclosure is reasonably possible or probable) are evaluated individually for credit losses. The allowance for expected credit losses for a collateral dependent loan is established as the excess of amortized cost over the estimated fair value of the loan's underlying collateral, less selling cost when foreclosure is probable. Accordingly, any change in estimated credit losses are recognized as a change in the allowance for expected credit losses which is recorded in net investment gains (losses).At SeptemberÂ 30, 2024, the Company's mortgage loan portfolio had an allowance for expected credit loss of $22 million (2023: $6 million).e) Â Â Â Â Other InvestmentsThe following table provides a summary of the Company's other investments, together with additional information relating to the liquidity of each category:Fair valueRedemption frequency(if currently eligible)Â Â RedemptionÂ Â Â Â noticeÂ periodÂ Â At September 30, 2024Â Â Â Â Multi-strategy funds$24,302Â 3Â %Quarterly60-90 daysDirect lending funds174,441Â 19Â %Quarterly(1)90 daysPrivate equity funds314,444Â 33Â %n/an/aReal estate funds310,130Â 33Â %Quarterly(2), Annually(3)45-90 daysCLO-Equities4,133Â â€”Â %n/an/aOther privately held investments112,284Â 12Â %n/an/aTotal other investments$939,734Â 100Â %Â At December 31, 2023Â Â Â Â Multi-strategy funds$24,619Â 3Â %Quarterly60-90 daysDirect lending funds192,270Â 20Â %Quarterly(1)90 daysPrivate equity funds301,712Â 32Â %n/an/aReal estate funds317,325Â 33Â %Quarterly(2), Annually(3)45-90 daysCLO-Equities5,300Â 1Â %n/an/aOther privately held investments108,187Â 11Â %n/an/aTotal other investments$949,413Â 100Â %Â Â Â Â Â Â Â Â n/a - not applicable (1) Applies to one fund with a fair value of $4 million (2023: $17 million).(2) Applies to one fund with a fair value of $54 million (2023: $66 million).(3) Applies to one fund with a fair value of $23 million (2023: $25 million).Two common redemption restrictions which may impact the Company's ability to redeem multi-strategy funds are gates and lockups. A gate is a suspension of redemptions which may be implemented by the general partner or investment manager of the fund in order to defer, in whole or in part, the redemption request in the event the aggregate amount of redemption requests exceeds a predetermined percentage of the fund's net assets which may otherwise hinder the general partner or investment manager's ability to liquidate holdings in an orderly fashion in order to generate the cash necessary to fund extraordinarily large redemption payouts. A lockup period is the initial amount of time an investor is contractually required to hold the security before having the ability to redeem. During the nine months ended September 30, 2024 and 2023, neither of these restrictions impacted the Company's redemption requests. At September 30, 2024, there were no multi-strategy fund holdings (2023: $nil) where the Company is still within the lockup period.Â At September 30, 2024, the Company had $28 million (2023: $28 million) of unfunded commitments as a limited partner in multi-strategy hedge funds. Once the full amount of committed capital has been called by the General Partner of each of these funds, the assets will not be fully returned until after the completion of the funds' investment term. These funds have investment terms ranging from two years to the dissolution of the underlying fund.At September 30, 2024, the Company had $259 million (2023: $192 million) of unfunded commitments as a limited partner in direct lending funds. Once the full amount of committed capital has been called by the General Partner of each of these funds, the assets will not be fully returned until the completion of the fund's investment term. These funds have investment terms ranging from four to ten years and the

General Partners of certain funds have the option to extend the term by up to three years.At September 30, 2024, the Company had $117 million (2023: $145 million) of unfunded commitments as a limited partner in private equity funds. The life of the funds is subject to the dissolution of the underlying funds. The Company expects the overall holding period to be over six years.At September 30, 2024, the Company had $95 million (2023: $107 million) of unfunded commitments as a limited partner in real estate funds. These funds include an open-ended fund and funds with investment terms ranging from two years to the dissolution of the underlying fund.At September 30, 2024, the Company had $23Â million (2023: $30Â million) of unfunded commitments as a limited partner in three private company investment funds focusing on financial services technology companies with an emphasis on insurance technology companies ("private company investment funds"). Two of these funds have investment terms of 5 years and one fund has an investment term of 10 years.f) Â Â Â Â Equity Method InvestmentsDuring 2023, the Company paid $22Â million to acquire 18% of the common equity of Monarch Point Re (ISAC) Ltd. and Monarch Point Re (ISA 2023) Ltd., a collateralized reinsurance company formed under the laws of Bermuda as an incorporated segregated accounts company under the Incorporated Segregated Accounts Companies Act 2019, as amended (the "ISAC Act"). During 2024, the Company paid $12Â million to acquire 18% of the common equity of Monarch Point Re (ISA 2024) Ltd., (Monarch Point Re (ISAC) Ltd., Monarch Point Re (ISA 2023) Ltd. and Monarch Point Re (ISA 2024) Ltd., individually or collectively "Monarch Point Re").Monarch Point Re is an independent reinsurer jointly sponsored by the Company and Stone Point Credit, LLC ("Stone Point").The Company retrocedes a diversified portfolio of casualty reinsurance business to Monarch Point Re and Stone Point serves as its investment manager. As an investor, the Company expects to benefit from underwriting fees generated by Monarch Point Re and the income and capital appreciation Stone Point seeks to deliver through its investment management services. Monarch Point Re is not a Variable Interest Entity ("VIE") that is required to be included in the Company's consolidated financial statements. The Company accounts for its ownership interest in Monarch Point Re under the equity method of accounting.During 2016, the Company paid $108Â million including direct transaction costs to acquire 19% of the common equity of Harrington Reinsurance Holdings Limited ("Harrington"), the parent company of Harrington Re Ltd. ("Harrington Re"), an independent reinsurance company jointly sponsored by the Company and The Blackstone Group L.P. ("Blackstone"). During 2023, following a share tender offer, the Company's ownership interest in Harrington increased to 20%.Through long-term service agreements, the Company serves as Harrington Re's reinsurance underwriting manager and Blackstone serves as exclusive investment management service provider. As an investor, the Company expects to benefit from underwriting profit generated by Harrington Re and the income and capital appreciation Blackstone seeks to deliver through its investment management services. In addition, the Company has entered into an arrangement with Blackstone under which underwriting and investment related fees will be shared equally. Harrington is not a VIE that is required to be included in the Company's consolidated financial statements. The Company accounts for its ownership interest in Harrington under the equity method of accounting. The Company's proportionate share of the underlying equity in net assets resulted in a basis difference of $5Â million which represents initial transactions costs.g) Â Â Â Â Variable Interest EntitiesIn the normal course of investing activities, the Company actively manages allocations to non-controlling tranches of structured securities which are variable interests issued by VIEs. These structured securities include RMBS, CMBS and ABS.The Company also invests in limited partnerships which represent 76% of the Company's other investments. The investments in limited partnerships include multi-strategy funds, direct lending funds, private equity funds, real estate funds and CLO equity tranched securities, which are variable interests issued by VIEs (refer to NoteÂ 4(e) 'Other Investments'). The Company does not have the power to direct the activities that are most significant to the economic performance of these VIEs. Therefore, the Company is not the primary beneficiary of these VIEs. The maximum exposure to loss on these interests is limited to the amount of commitment made by the Company. The Company has not provided financial or other support to these structured securities other than the original investment.h) Â Â Â Â Net Investment IncomeNet investment income was derived from the following sources:Â Â Three months ended September 30,Nine months ended September 30,Â Â 2024202320242023Fixed maturities$163,002Â $133,006Â $456,421Â $375,659Â Other investments19,594Â 312Â 39,569Â (4,543)Equity securities3,529Â 3,050Â 9,348Â 8,495Â Mortgage loans8,175Â 8,892Â 26,412Â 26,158Â Cash and cash equivalents14,402Â 14,465Â 41,796Â 35,638Â Short-term investments3,919Â 2,195Â 11,148Â 5,984Â Gross investment income212,621Â 161,920Â 584,694Â 447,391Â Investment expenses(7,521)(7,719)(21,236)(22,589)Net investment income$205,100Â $154,201Â $563,458Â $424,802Â i) Â Â Â Â Net Investment Gains (Losses)The following table provides an analysis of net investment gains (losses):Â Â Three months ended September 30,Nine months ended September 30,Â Â 2024202320242023Gross realized investment gainsFixed maturities and short-term investments$22,649Â $4,143Â $43,232Â $27,973Â Equity securities1,667Â 8,433Â 32,292Â 9,968Â Gross realized investment gains24,316Â 12,576Â 75,524Â 37,941Â Gross realized investment lossesFixed maturities and short-term investments(22,589)(31,390)(119,108)(128,733)Equity securities(7,539)(4)(15,251)(400)Mortgage loans(4,275)â€”Â (4,275)â€”Â Gross realized investment losses(34,403)(31,394)(138,634)(129,133)(Increase) decrease in allowance for expected credit losses, fixed maturities, available for sale209Â 1,618Â 6,338Â 2,800Â (Increase) decrease in allowance for expected credit losses, mortgage loans(1,343)(541)(15,771)(4,179)Impairment losses(1)(14)(41)(178)(9,124)Change in fair value of investment derivatives(2)(870)1,692Â 153Â 218Â Net unrealized gains (losses) on equity securities44,287Â (37,024)42,065Â 3,806Â Net investment gains (losses)$32,182Â $(53,114)$(30,503)$(97,671)(1) Related to instances where the Company intends to sell securities or it is more likely than not that the Company will be required to sell securities before their anticipated recovery.(2) Refer to Note 6 'Derivative Instruments'.The following table provides a reconciliation of the beginning and ending balances of the allowance for expected credit losses on fixed maturities classified as available for sale:Â Â Three months ended September 30,Nine months ended September 30,Â Â 2024202320242023Balance at beginning of period$4,631Â $10,551Â $10,759Â $11,733Â Expected credit losses on securities where credit losses were not previously recognized325Â 21Â 604Â 4,376Â Additions (reductions) for expected credit losses on securities where credit losses were previously recognized(451)708Â (1,858)404Â Impairments of securities which the Company intends to sell or more likely than not will be required to sellâ€”Â â€”Â â€”Â â€”Â Securities sold/redeemed/matured(83)(2,347)(5,083)(7,580)Balance at end of period$4,422Â $8,933Â $4,422Â $8,933Â j)Â Â Â Â Reverse Repurchase AgreementsAt SeptemberÂ 30, 2024, the Company held $26Â million (2023: $12Â million) of reverse repurchase agreements. U.S. GAAP prescribes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data. The level in the hierarchy within which a given fair value measurement falls is determined based on the lowest level input that is significant to the measurement. The hierarchy is broken down into three levels as follows: â€¢Level 1 - Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. â€¢Level 2 - Valuations based on quoted prices in active markets for similar assets or liabilities, quoted prices for identical assets or liabilities in inactive markets, or for which significant inputs are observable (e.g., interest rates, yield curves, prepayment speeds, default rates, loss severities, etc.) or can be corroborated by observable market data. â€¢Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement. The unobservable inputs reflect the Company's judgments about assumptions that market participants might use. The availability of observable inputs can vary from financial instrument to financial instrument and is affected by a wide variety of factors including, for example, the type of financial instrument, whether the financial instrument is new and not yet established in the marketplace, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires significantly more judgment. Accordingly, the degree of judgment exercised by management in determining fair value is greatest for financial instruments categorized as Level 3. In periods of market dislocation, the observability of prices and inputs may be reduced for many financial instruments. This may lead the Company to change the selection of valuation technique (from market to cash flow approach) or may cause the Company to use multiple valuation techniques to estimate the fair value of a financial instrument. This circumstance could cause an instrument to be reclassified between levels within the fair value hierarchy. Valuation TechniquesThe valuation techniques, including significant inputs and assumptions generally used to determine the fair values of the Company's financial instruments as well as the classification of the fair values of its financial instruments in the fair value hierarchy are described in detail below.Fixed MaturitiesAt each valuation date, the Company uses the market approach valuation technique to estimate the fair value of its fixed maturities portfolio, where possible. The market approach includes, but is not limited to, prices obtained from third-party pricing services for identical or comparable securities and the use of "pricing matrix models" using observable market inputs such as yield curves, credit risks and spreads, measures of volatility, and prepayment speeds. Pricing from third-party pricing services is sourced from multiple vendors, where available, and the Company maintains a vendor hierarchy by asset type based on historical pricing experience and vendor expertise. Where prices are unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers who are active in the corresponding markets. The valuation techniques including significant inputs and assumptions generally used to determine the fair values of the Company's fixed maturities by asset class as well as the classifications of the fair values of these securities in the fair value hierarchy are described in detail below.U.S. Government and Agency U.S. government and agency securities consist primarily of bonds issued by the U.S. Treasury and mortgage pass-through agencies such as the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and the Government National Mortgage Association. As the fair values of U.S. Treasury securities are based on unadjusted quoted market prices in active markets, the fair values of these securities are classified as Level 1. The fair values of U.S. government agency securities are determined using the spread above the risk-free yield curve. As the yields for the risk-free yield curve and the spreads are observable market inputs, the fair values of U.S. government agency securities are classified as Level 2. Non-U.S. Government Non-U.S. government securities include bonds issued by non-U.S. governments and their agencies along with supranational organizations (collectively also known as sovereign debt securities). The fair values of these securities are based on prices obtained from international indices or valuation models that include inputs such as interest rate yield curves, cross-currency basis index spreads and country credit spreads for structures similar to the sovereign bond in terms of issuer, maturity and seniority. As the significant inputs used to price these securities are observable market inputs, the fair values of non-U.S. government securities are classified as Level 2. Corporate Debt Corporate debt securities consist primarily of investment grade debt of a wide variety of corporate issuers and industries. The fair values of these securities are generally determined using the spread above the risk-free yield curve. These spreads are generally obtained from the new issue market, secondary trading and broker-dealer quotes. As the yields for the risk-free yield curve and the spreads are observable market inputs, the fair values of corporate debt securities are generally classified as Level 2. Where pricing is unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, the fair values of these securities are classified as Level 3. Agency RMBSAgency RMBS consist of bonds issued by the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and the Government National Mortgage Association. The fair values of these securities are priced using a mortgage pool specific model which uses daily inputs from the active to be announced market and the spread associated with each mortgage pool based on vintage. As the significant inputs used to price these securities are observable market inputs, the fair values of Agency RMBS are classified as Level 2.CMBSCMBS mainly include investment grade bonds originated by non-agencies. The fair values of these securities are determined using a pricing model which uses dealer quotes and other available trade information along with security level characteristics to determine deal specific spreads. As the significant inputs used to price these securities are observable market inputs, the fair values of CMBS are generally classified as Level 2. Where pricing is unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, the fair values of these securities are classified as Level 3.Non-agency RMBSNon-agency RMBS mainly include investment grade bonds originated by non-agencies. The fair values of these securities are determined using an option adjusted spread model or other relevant models, which use inputs including available trade information or broker quotes, prepayment and default projections based on historical statistics of the underlying collateral and current market data. As the significant inputs used to price these securities are observable market inputs, the fair values of non-agency RMBS are generally classified as Level 2. Where pricing is unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, the fair values of these securities are classified as Level 3.ABS ABS mainly include investment grade bonds backed by pools of loans with a variety of underlying collateral, including auto loans, student loans, credit card receivables and collateralized loan obligations ("CLOs"), originated by a variety of financial institutions. The fair values of these securities are determined using a model which uses prepayment speeds and spreads sourced primarily from the new issue market. As the significant inputs used to price these securities are observable market inputs, the fair values of ABS are generally classified as Level 2. Where pricing is unavailable from pricing services, the Company obtains non-binding quotes from broker-dealers to estimate fair value. This is generally the case when there is a low volume of trading activity and current transactions are not orderly. In this event, the fair values of these securities are classified as Level 3.Municipals Municipals comprise revenue bonds and general obligation bonds issued by U.S. domiciled state and municipal entities. The fair values of these securities are determined using spreads obtained from the new issue market, trade prices and broker-dealers quotes. As the significant inputs used to price these securities are observable market inputs, the fair values of municipals are classified as Level 2. Equity SecuritiesEquity securities include common stocks, preferred stocks, exchange-traded funds and bond mutual funds. As the fair values of common stocks and exchange-traded funds are based on unadjusted quoted market prices in active markets, the fair values of these securities are classified as Level 1. As the significant inputs used to price preferred stocks are observable market inputs, the fair value of these securities are classified as Level 2. As bond mutual funds have daily liquidity, the fair values of these securities are classified as Level 2.Other InvestmentsThe fair value of an indirect investment in CLO-Equities is estimated using an income approach valuation technique, specifically an externally developed discounted cash flow model due to the lack of observable and relevant trades in secondary markets. As the significant inputs used to price this security are unobservable, the fair value of the indirect investment in CLO-Equities is classified as Level 3.Other privately held investments include common shares, preferred shares, convertible notes, convertible preferred shares, a variable yield security and private company investment funds. These investments are initially valued at cost, which approximates fair value. In subsequent measurement periods, the fair values of these investments are generally derived from one or a combination of valuation methodologies which consider factors including recent capital raises by the investee companies, comparable precedent transaction multiples, comparable publicly traded multiples, third-party valuations, discounted cash-flow models, and other techniques that consider the industry and development stage of each investee company. The fair value of the variable yield security is determined using an externally developed discounted cash flow model. In order to assess the reasonableness of the information received from investee companies, the Company

maintains an understanding of current market conditions, historical results, and emerging trends that may impact the results of operations, financial condition or liquidity of these companies. In addition, the Company engages in regular communication with management at investee companies. As the significant inputs used to price these investments are unobservable, the fair values of other privately held investments are classified as Level 3. The fair values of private company investment funds are estimated using net asset valuations ("NAVs") as advised by external fund managers or third-party administrators.Short-term InvestmentsShort-term investments primarily comprise highly liquid securities with maturities greater than three months but less than one year from the date of purchase. These securities are typically not actively traded due to their approaching maturity, therefore their amortized cost approximates fair value. The fair values of short-term investments are classified as Level 2.Derivative InstrumentsDerivative instruments include foreign exchange forward contracts that are customized to the Company's economic hedging strategies and trade in the over-the-counter derivative market. The fair values of these derivatives are determined using a market approach valuation technique based on significant observable market inputs from third-party pricing vendors, non-binding broker-dealer quotes and/or recent trading activity. As the significant inputs used to price these derivatives are observable market inputs, the fair values of these derivatives are classified as Level 2. Liabilities$â€”Â $10,165Â $â€”Â $â€”Â $10,165Â The following table quantifies the significant unobservable inputs used in estimating fair values at September 30, 2024 of investments classified as Level 3 in the fair value hierarchy:Asset fairÂ valueValuation techniqueUnobservable inputAmount / RangeWeighted averageOther investments - CLO-Equities$4,133Â Discounted cash flowDefault rate4.5%4.5%Â Â Loss severity rate50.0%50.0%Â Â Collateral spread3.0%3.0%EstimatedÂ maturityÂ date4 years4 yearsOther investments - Other privately held investments$15,472Â Discounted cash flowDiscount rate6.3%6.3%Default rate0.5%0.5%Loss absorption yield1.0%1.0%Estimated maturity date0-1 year1 yearNote: Fixed maturities of $134Â million that are classified as Level 3 are excluded from the above table as these securities are priced using broker-dealer quotes. In addition, other privately held investments of $69Â million that are classified as Level 3 are excluded from the above table as these investments are priced using capital statements received from investee companies.Other Investments - CLO-EquitiesThe CLO-Equities market continues to be relatively inactive with only a small number of transactions being observed, particularly related to transactions involving CLO-Equities held by the Company. Accordingly, the fair value of the Company's indirect investment in CLO-Equities is determined using a discounted cash flow model prepared by an external investment manager.The default and loss severity rates are the most judgmental unobservable market inputs to the discounted cash flow model to which the valuation of the Company's indirect investment in CLO-Equities is most sensitive. A significant increase (decrease) in either of these significant inputs in isolation would result in a lower (higher) fair value estimate for the investment in CLO-Equities and, in general, a change in default rate assumptions would be accompanied by a directionally similar change in loss severity rate assumptions. Collateral spreads and estimated maturity dates are less judgmental inputs as they are based on the historical average of actual spreads and the weighted average life of the current underlying portfolios, respectively. A significant increase (decrease) in either of these significant inputs in isolation would result in a higher (lower) fair value estimate for the investment in CLO-Equities. In general, these inputs have no significant interrelationship with each other or with default and loss severity rates.On a quarterly basis, the Company's valuation process for its indirect investment in CLO-Equities includes a review of the underlying cash flows and key assumptions used in the discounted cash flow model. The above significant unobservable inputs are reviewed and updated based on information obtained from secondary markets, including information received from the managers of the Company's CLO-Equities investment. In order to assess the reasonableness of the inputs the Company uses in the discounted cash flow model, the Company maintains an understanding of current market conditions, historical results, and emerging trends that may impact future cash flows. In addition, the assumptions the Company uses in its models are updated through regular communication with industry participants and ongoing monitoring of the deals in which the Company participates. Other Investments - Other Privately Held SecuritiesOther privately held securities are initially valued at cost which approximates fair value. In subsequent measurement periods, the fair value of the variable yield security was determined using an externally developed discounted cash flow model. This model includes inputs that are specific to that investment. The inputs used in the fair value measurement include an appropriate discount rate, default rate, loss absorption rate and estimated maturity date. The selection of an appropriate discount rate is judgmental and is the most significant unobservable input used in the valuation of this investment. A significant increase (decrease) in this input in isolation could result in significantly lower (higher) fair value measurement for this investment. In order to assess the reasonableness of the inputs the Company uses in the discounted cash flow model, the Company maintains an understanding of current market conditions, historical results, as well as investee specific information that may impact future cash flows.The following table presents changes in Level 3 for financial instruments measured at fair value on a recurring basis:OpeningbalanceTransfersintoLevel 3Transfersout ofLevel 3IncludedÂ in net

Transfers out of Level 3 into Level 2There were no transfers out of Level 3 into Level 2 during the three and nine months ended SeptemberÂ 30, 2024 and 2023. Other Transfers out of Level 3During the nine months ended SeptemberÂ 30, 2024, one private company investment fund included in other privately held investments in the consolidated balance sheets was transferred from Level 3 to the NAV practical expedient. During the nine months ended September 30, 2023, two early-stage venture capital funds included in other privately held investments in the consolidated balance sheets were transferred from Level 3 to the NAV practical expedient. In addition, the Company's investment in Monarch Point Re was transferred from Level 3 to Equity method investments.Measuring the Fair Value of Other Investments Using Net Asset ValuationsThe fair values of multi-strategy funds, direct lending funds, private equity funds, real estate funds and private company investment funds are estimated using NAVs as advised by external fund managers or third-party administrators. For these funds, NAVs are based on the manager's or administrator's valuation of the underlying holdings in accordance with the fund's governing documents and in accordance with U.S. GAAP.For multi-strategy funds, direct lending funds, private equity funds, real estate funds and private company investment funds, valuation statements are typically released on a reporting lag. Therefore, the Company estimates the fair value of these funds by starting with the most recent fund valuations and adjusting for capital calls, redemptions, drawdowns and distributions. Return estimates are not available from the relevant fund managers for these funds, therefore the Company typically has a reporting lag in its fair value measurements of these funds. At SeptemberÂ 30, 2024 and DecemberÂ 31, 2023 all funds measured at fair value using NAVs are reported generally on a one quarter lag.The Company often does not have access to financial information relating to the underlying securities held within the funds, therefore, management is unable to corroborate the fair values placed on the securities underlying the asset valuations provided by fund managers or fund administrators. In order to assess the reasonableness of the NAVs, the Company performs a number of monitoring procedures on a quarterly basis, to assess the quality of the information provided by fund managers and fund administrators. These procedures include, but are not limited to, regular review and discussion of each fund's performance with its manager, regular evaluation of fund performance against applicable benchmarks and the backtesting of the Company's fair value estimates against subsequently received NAVs. Backtesting involves comparing the Company's previously reported fair values for each fund against NAVs per audited financial statements (for year-end values) and final NAVs from fund managers and fund administrators (for interim values).The fair values of multi-strategy funds, direct lending funds, private equity funds, real estate funds and private company investment funds, are measured using the NAV practical expedient, therefore the fair values of these funds have not been categorized within the fair value hierarchy.Financial Instruments Disclosed, But Not Carried, at Fair ValueThe fair value of financial instruments accounting guidance also applies to financial instruments disclosed, but not carried, at fair value, except for certain financial instruments, including insurance contracts. At SeptemberÂ 30, 2024, the carrying values of cash and cash equivalents including restricted amounts, accrued investment income, receivable for investments sold, certain other assets, payable for investments purchased and certain other liabilities approximated fair values due to their short maturities. As these financial instruments are not actively traded, their fair values are classified as Level 2. At SeptemberÂ 30, 2024, the Company's fixed maturities, held to maturity, were recorded at amortized cost with a carrying value of $504Â million (2023: $686Â million) and a fair value of $500Â million (2023: $676Â million). The fair values of these securities are determined using a model which uses prepayment speeds and spreads sourced primarily from the new issue market. As the significant inputs used to price these securities are observable market inputs, their fair values are classified as Level 2.At SeptemberÂ 30, 2024, the carrying value of mortgage loans, held for investment, approximated fair value. The fair values of mortgage loans are primarily determined by estimating expected future cash flows and discounting them using current interest rates for similar mortgage loans with similar credit risk or are determined from pricing for similar loans. As mortgage loans are not actively traded, their fair values are classified as Level 3.At SeptemberÂ 30, 2024, the Company's debt was recorded at amortized cost with a carrying value of $1,315 million (2023: $1,314 million) and a fair value of $1,276 million (2023: $1,198 million). The fair value of the Company's debt is based on prices obtained from a third-party pricing service and is determined using the spread above the risk-free yield curve. These spreads are generally obtained from the new issue market, secondary trading and broker-dealer quotes. As the yields for the risk-free yield curve and the spreads are observable market inputs, the fair value of this debt is classified as Level 2.At SeptemberÂ 30, 2024, Federal Home Loan Bank advances were recorded at amortized cost with a carrying value of $76 million (2023: $86 million) and a fair value of $76 million (2023: $86 million). Notional amounts are not reflective of credit risk. None of the Company's derivative instruments are designated as hedges.Offsetting Assets and LiabilitiesThe Company's derivative instruments are generally traded under International Swaps and Derivatives Association master netting agreements which establish terms that apply to all transactions. In the event of a bankruptcy or other stipulated event, master netting agreements provide that individual positions be replaced with a new amount, usually referred to as the termination amount, determined by taking into account market prices and converting into a single currency. Effectively, this contractual close-out netting reduces credit exposure from gross to net exposure. The following table provides a reconciliation of gross derivative assets and liabilities to the net amounts presented in the consolidated balance sheets, with the difference being attributable to the impact of master netting agreements:September 30, 2024December 31, 2023Gross amountsGross amounts offsetNetamounts(1)Gross amountsGross amounts offsetNetamounts(1)Derivative assets$4,087Â $(2,978)$1,109Â $8,708Â $(4,284)$4,424Â Derivative liabilities$6,931Â $(2,978)$3,953Â $14,449Â $(4,284)$10,165Â (1)Net asset and liability derivatives are classified within other assets and other liabilities in the consolidated balance sheets.Refer to Note 4 'Investments' for information on reverse repurchase agreements.a) Relating to Investment PortfolioForeign Currency RiskThe Company's investment portfolio is exposed to foreign currency risk. Therefore, the fair values of its investments are partially influenced by changes in foreign exchange rates. The Company may enter into foreign exchange forward contracts to manage the effect of this foreign currency risk. These foreign currency hedging activities are not designated as specific hedges for financial reporting purposes.b) Relating to Underwriting PortfolioForeign Currency RiskThe Company's insurance and reinsurance subsidiaries and branches operate in various countries. Some of its business is written in currencies other than the U.S. dollar, therefore the underwriting portfolio is exposed to significant foreign currency risk. The Company manages foreign currency risk by seeking to match its foreign-denominated net liabilities under insurance and reinsurance contracts with cash and investments that are denominated in the same currencies. The Company uses derivative instruments, specifically, forward contracts to economically hedge foreign currency exposures.The following table provides the total unrealized and realized gains (losses) recognized in net income (loss) for derivatives not designated as hedges:Â Â Consolidated statement of operations line item that includes gain (loss) recognized in net income (loss)Three months ended September 30,Nine months ended September 30,Â Â 2024202320242023Relating to investment portfolio:Foreign exchange forward contractsNet investment gains (losses)(870)1,692Â $153Â $218Â Relating to underwriting portfolio:Foreign exchange forward contractsForeign exchange (losses) gains6,906Â (7,208)7,987Â 1,030Â Total$6,036Â $(5,516)$8,140Â $1,248Â X - ReferencesNo definition available. + Details Name: us-gaap_DerivativeInstrumentsAndHedgingActivitiesDisclosureAbstract Namespace Prefix: us-gaap_ Data Type: xbrli:stringItemType Balance Type: na Period Type: duration X - DefinitionThe entire disclosure for derivative instruments and hedging activities including, but not limited to, risk management strategies, non-hedging derivative instruments, assets, liabilities, revenue and expenses, and methodologies and assumptions used in determining the amounts. + ReferencesReference 1: http://www.xbrl.org/2003/role/disclosureRef -Topic 815 -SubTopic 40 -Name Accounting Standards Codification -Section 50 -Paragraph 5 -Subparagraph (f) -Publisher FASB -URI https://asc.fasb.org/1943274/2147480237/815-40-50-5Reference 2: http://www.xbrl.org/2003/role/disclosureRef -Topic 815 -SubTopic 10 -Name Accounting Standards Codification -Section 50 -Paragraph 5C -Subparagraph (b) -Publisher FASB -URI https://asc.fasb.org/1943274/2147480434/815-10-50-5CReference 3: http://fasb.org/us-gaap/role/ref/legacyRef -Topic 815 -Name Accounting Standards Codification -Publisher FASB -URI https://asc.fasb.org/815/tableOfContent + Details Name: us-gaap_DerivativeInstrumentsAndHedgingActivitiesDisclosureTextBlock Namespace Prefix: us-gaap_ Data Type: dtr-types:textBlockItemType Balance Type: na Period Type: duration XML 26 R15.htm IDEA: XBRL DOCUMENT v3.24.3 RESERVE FOR LOSSES AND LOSS EXPENSES 9 Months Ended Sep. 30, 2024 Insurance [Abstract] Â RESERVE FOR LOSSES AND LOSS EXPENSES RESERVE FOR LOSSES AND LOSS EXPENSESReserve Roll-ForwardThe following table presents a reconciliation of the Company's beginning and ending gross reserve for losses and loss expenses and net reserve for unpaid losses and loss expenses:Nine months ended September 30,20242023Gross reserve for losses and loss expenses, beginning of period$16,434,018Â $15,168,863Â Less reinsurance recoverable on unpaid losses and loss expenses, beginning of period(6,323,083)(5,831,172)Net reserve for unpaid losses and loss expenses, beginning of period10,110,935Â 9,337,691Â Net incurred losses and loss expenses related to:Current year2,334,543Â 2,253,958Â Prior years(8,011)(13,118)Â 2,326,532Â 2,240,840Â Net paid losses and loss expenses related to:Current year(308,581)(272,260)Prior years(1,769,278)(1,730,640)Â (2,077,859)(2,002,900)Foreign exchange and other124,792Â (51,902)Net reserve for unpaid losses and loss expenses, end of period10,484,400Â 9,523,729Â Reinsurance recoverable on unpaid losses and loss expenses, end of period6,810,929Â 6,031,527Â Gross reserve for losses and loss expenses, end of period$17,295,329Â $15,555,256Â On September 22, 2023, the Company entered into a retrocession reinsurance agreement with a third-party reinsurer which was deemed to have met the established criteria for retroactive reinsurance accounting. The magnitude and complexity of losses arising from certain of these events inherently increase the level of uncertainty and, therefore, the level of management judgment involved in arriving at estimated net reserves for losses and loss expenses. These events include Hurricane Helene, Hurricane Ian, Winter Storm Elliot, June European Convective Storms, the Russia-Ukraine war and the COVID-19 pandemic. As a result, actual losses for these events may ultimately differ materially from current estimates. During the nine months ended SeptemberÂ 30, 2024, the Company recognized catastrophe and weather-related losses, net of reinsurance, of $145Â million (2023: $112Â million).Prior Year Reserve DevelopmentThe Company's net prior year reserve development arises from changes to estimates of losses and loss expenses related to loss events that occurred in previous calendar years. Relative TSR is calculated in accordance with the terms of the applicable award agreement. If performance goals are achieved, these awards will cliff vest at the end of a three-year performance period within a range of 0% to 200% of target. Performance Restricted Stock Units granted in 2024 with a performance conditionCertain share-settled performance restricted stock units granted in 2024 include a performance condition which is the Companyâ€™s average annual growth in book value per diluted common share, plus accumulated dividends over the performance period, adjusted to exclude unrealized investment gains (losses) recognized in accumulated other comprehensive income (loss), and share repurchases during the performance period ("Adjusted DBVPS"). Adjusted DBVPS is calculated in accordance with the terms of the applicable award agreement. If performance goals are achieved, these awards will cliff vest at the end of a three-year performance period within a range of 0% to 200% of target. Valuation assumptionsPerformance Restricted Stock Units granted in 2024 and 2023 with a market conditionThe fair value of these performance restricted stock units was measured on the grant date using a Monte Carlo simulation model.The following table provides details of the significant inputs used in the Monte Carlo simulation model:Nine months ended September 30,20242023 (1)2023 (2)2023 (3)Expected volatility 26.00%36.24%29.30%30.05%Expected term (in years)3.03.01.03.0Expected dividend yieldn/an/an/aRisk-free interest rate4.06%3.79%4.61%3.39%n/a - not applicable (1) Performance restricted stock units granted in the ordinary course of business(2) Performance restricted stock units granted in the three months ended March 31, 2023 in relation to senior leadership transition(3) Performance restricted stock units granted in the three months ended June 30, 2023 in relation to senior leadership transitionBeginning share price, Ending share price and Expected termPerformance restricted stock units granted in 2024The beginning share price for awards was based on the average closing share price over the 30 trading days preceding and including the start of the performance period. The ending share price was based on the average projected closing share price over the 30 trading days preceding and including the end of the performance period. Performance for these awards is measured from January 1, 2024 to December 31, 2026.Performance restricted stock units granted in 2023 and performance restricted stock units granted in the three months ended March 31, 2023 in relation to senior leadership transitionThe beginning share price for awards was based on the average closing share price over the 10 trading days preceding and including the start of the performance period. The ending share price was based on the projected average closing share price over the 10 trading days preceding and including the end of the performance period. Performance for awards granted in 2023 is generally measured from January 1, 2023 to December 31, 2025, with performance for awards granted to one senior leader being measured from January 1, 2023 to December 31, 2023.Performance restricted stock units granted in 2023 in the three months ended June 30, 2023 in relation to senior leadership transitionThe beginning share price for awards was based on the average closing share price over the 30 trading days preceding and including the start of the performance period. The ending share price of the awards was based on the average closing share price over the 30 trading days preceding and including the end of the performance period. Performance for awards being measured from May 4, 2023 to May 4, 2026Expected volatilityThe expected volatility is estimated based on the Company's historical share price volatility.Expected dividend yieldThe expected dividend yield is not applicable to the performance restricted stock units as dividends are paid at the end of the vesting period and do not affect the value of the performance restricted stock units.Risk-free interest rateThe risk-free rate is estimated based on the yield on a U.S. treasury zero-coupon bond issued with a remaining term equal to the vesting period of the performance restricted stock units.Compensation expense associated with performance restricted stock units granted in 2024 and 2023 is determined on the grant date based on the fair value calculated by the Monte Carlo simulation model, and is recognized on a straight-line basis over the requisite service period. During the three months ended March 31, 2023, the transition in our senior leadership resulted in a modification of the previously existing vesting terms of the outstanding restricted stock units and performance restricted stock units granted in 2022 and earlier of one senior leader, and a modification of the performance period of that leader's performance restricted stock units granted in 2022. The modifications did not result in incremental compensation expense.Performance Restricted Stock Units granted in 2024 with a performance conditionThe fair value of these performance restricted stock units was determined based on the closing price of the Company's common shares on the grant date, and compensation expense is recognized on a straight-line basis over the requisite service period, and is subject to periodic adjustment based on the achievement of established performance criteria during the performance period. Volatility also may be defined as a probability-weighted measure of the dispersion of returns about the mean. The volatility of a share price is the standard deviation of the continuously compounded rates of return on the share over a specified period. That is the same as the standard deviation of the differences in the natural logarithms of the stock prices plus dividends, if any, over the period. + ReferencesReference 1: http://www.xbrl.org/2003/role/disclosureRef -Topic 718 -SubTopic 10 -Name Accounting Standards Codification -Section 50 -Paragraph 2 -Subparagraph (f)(2)(ii) -Publisher FASB -URI https://asc.fasb.org/1943274/2147480429/718-10-50-2 + Details Name: us-gaap_ShareBasedCompensationArrangementByShareBasedPaymentAwardFairValueAssumptionsExpectedVolatilityRate Namespace Prefix: us-gaap_ Data Type: dtr-types:percentItemType Balance Type: na Period Type: duration X - DefinitionThe risk-free interest rate assumption that is used in valuing an option on its own shares. + ReferencesReference 1: http://www.xbrl.org/2003/role/disclosureRef -Topic 718 -SubTopic 10 -Name Accounting Standards Codification -Section 50 -Paragraph 2 -Subparagraph (f)(2)(iv) -Publisher FASB -URI https://asc.fasb.org/1943274/2147480429/718-10-50-2 + Details Name: us-gaap_ShareBasedCompensationArrangementByShareBasedPaymentAwardFairValueAssumptionsRiskFreeInterestRate Namespace Prefix: us-gaap_ Data Type: dtr-types:percentItemType Balance Type: na Period Type: duration X - DefinitionLine items represent financial concepts included in a table.
