# Forward-Looking Statements

Certain statements contained in this presentation include, and OPENLANE may make related oral, "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. In particular, statements made that are not historical facts (including but not limited to expectations, estimates, assumptions, projections and/or financial guidance) may be forward-looking statements. Words such as "should," "may," "will," "would," "anticipate," "expect," "project," "intend," "contemplate," "plan," "believe," "seek," "estimate," "assume," "can," "could," "continue," "outlook," "target" and similar expressions identify forward-looking statements. Such statements are based on management's current assumptions, expectations and/or beliefs, are not guarantees of future performance and are subject to substantial risks, uncertainties and changes that could cause actual results to differ materially from the results projected, expressed or implied by these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in the section entitled "Risk Factors" in OPENLANE's annual and quarterly periodic reports, and in OPENLANE's other filings and reports filed with the Securities and Exchange Commission. Many of these risk factors are outside of our control, and as such, they involve risks which are not currently known that could cause actual results to differ materially from those discussed or implied herein. The forward-looking statements are made as of the date of this presentation. OPENLANE undertakes no obligation to update any forward-looking statements.

# APPENDIX

# Non-GAAP Financial Measures

EBITDA is defined as net income (loss), plus interest expense net of interest income, income tax provision (benefit), depreciation and amortization. Adjusted EBITDA is EBITDA adjusted for the items of income and expense and expected incremental revenue and cost savings as described in the company's senior secured credit agreement covenant calculations. Management believes that the inclusion of supplementary adjustments to EBITDA applied in presenting Adjusted EBITDA is appropriate to provide additional information to investors about one of the principal measures of performance used by the company's creditors. In addition, management uses EBITDA and Adjusted EBITDA to evaluate the company's performance.

Depreciation expense for property and equipment and amortization expense of capitalized internally developed software costs relate to ongoing capital expenditures; however, amortization expense associated with acquired intangible assets, such as customer relationships, software, tradenames and non-compete agreements are not representative of ongoing capital expenditures but have a continuing effect on our reported results. Non-GAAP financial measures of operating adjusted net income (loss) and operating adjusted net income (loss) per share, in the opinion of the company, provide comparability to other companies that may not have incurred these types of non-cash expenses or that report a similar measure. In addition, net income (loss) and net income (loss) per share have been adjusted for certain other charges, as seen in the following reconciliation.

Adjusted gross profit is defined as gross profit excluding depreciation and amortization associated with cost of services. Adjusted gross profit eliminates potential differences between periods caused by historic cost, age of assets and amortization of intangible assets from prior acquisitions. Adjusted gross profit percentage is defined as adjusted gross profit divided by revenue excluding purchased vehicle sales. Adjusted gross profit percentage eliminates the impact of depreciation and amortization on gross profit and purchased vehicle sales on revenue, allowing for more meaningful comparisons of operational efficiency between periods. Management believes these measures provide useful information about the operating results and financial performance of the Marketplace segment.

EBITDA, Adjusted EBITDA, operating adjusted net income (loss), operating adjusted net income (loss) per share, adjusted gross profit and adjusted gross profit percentage have limitations as analytical tools, and should not be considered in isolation, or as a substitute for analysis of the results as reported under GAAP. These measures may not be comparable to similarly titled measures reported by other companies.

(1) For the three months ended March 31, 2025 and 2024, each tax deductible item was booked to the applicable statutory rate. The deferred tax benefits of \$52.5 million and \$6.5 million associated with the goodwill and tradename impairments in 2023, respectively, resulted in the U.S. being in a net deferred tax asset position. Due to the three-year cumulative loss related to U.S. operations, we currently have a \$36.7 million valuation allowance against the U.S. net deferred tax asset.

(2) The Series A Preferred Stock dividends and undistributed earnings allocated to participating securities have not been included in the determination of operating adjusted net income for purposes of calculating operating adjusted net income per diluted share.
