MISSOURI BANCORP,Â INC.NOTESÂ TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)NoteÂ 1: Â Basis of PresentationThe accompanying unaudited interim condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Securities and Exchange Commission (â€œSECâ€) Regulation SX. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all material adjustments (consisting only of normal recurring accruals) considered necessary for a fair presentation have been included. The condensed consolidated balance sheet of the Company as of June 30, 2024, has been derived from the audited consolidated balance sheet of the Company as of that date. Operating results for the three-month period ended September 30, 2024, are not necessarily indicative of the results that may be expected for the entire fiscal year. For additional information, refer to the audited consolidated financial statements included in the Companyâ€™s June 30, 2024, Form 10-K, which was filed with the SEC.The accompanying condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.Certain amounts reported in prior periods have been reclassified to conform to the September 30, 2024 presentation. These reclassifications did not materially impact the Companyâ€™s consolidated financial statements.â€‹Correction of an Immaterial Error in Prior Period Financial Statements:â€‹Certain prior period amounts in the Consolidated Balance Sheets, Consolidated Statements of Income and Note 12: Fair Value Measurements have been corrected as discussed below. No other financial statements or notes were impacted by these corrections. â€‹The Company has corrected its Consolidated Balance Sheet at June 30, 2024, the Consolidated Statement of Income for the three-month period ended September 30, 2023, and the Fair Value of Financial Instruments table at June 30, 2024 in Note 12: Fair Value Measurements, within this Quarterly Report on Form 10-Q for an error in classification between deposits and securities sold under agreements to repurchase. â€‹The balance of securities sold under agreements to repurchase is now being presented as a separate line item on the Consolidated Balance Sheet and Fair Value of Financial Instruments table included in the notes to the financial statements. The Company had previously included the agreements with deposits. The interest expense associated with the securities is now being presented as a separate line on the Consolidated Statements of Income. Previously, the Company included this in deposits interest expense.â€‹The Company assessed the materiality of this change in presentation on prior period consolidated financial statements in accordance with SEC Staff Accounting Bulletin No. 99, â€œMateriality,â€ (ASC Topic 250, Accounting Changes and Error Corrections). Based on this assessment, the Company concluded that these error corrections in its Consolidated Balance Sheets, Consolidated Statements of Income, and Notes to the Financial Statements are not material to any previously presented financial statements. The corrections had no impact on the Consolidated Statements of Comprehensive Income, Consolidated Statements of Stockholdersâ€™ Equity, or Consolidated Statement of Cash Flow, for any previously presented interim or annual financial statements. Accordingly, the Company corrected the previously reported immaterial errors for the year ended June 30, 2024 and the three-months ended September 30, 2023 in this Quarterly Report on Form 10-Q.â€‹-8- Table of Contentsâ€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Consolidated Balance Sheetâ€‹â€‹June 30, 2024â€‹Â As PreviouslyÂ NetÂ â€‹(dollars in thousands)Â Â Â Â PresentedÂ Â Â Â ChangeÂ Â Â Â As Correctedâ€‹â€‹â€‹â€‹â€‹â€‹â€‹Liabilities and Stockholders' Equity:â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Depositsâ€‹$ 3,952,457â€‹$ (9,398)â€‹$ 3,943,059Securities sold under agreements to repurchaseâ€‹â€‹ -â€‹â€‹ 9,398â€‹â€‹ 9,398â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Consolidated Statement of Incomeâ€‹â€‹For the three-month period ended September 30, 2023â€‹Â As PreviouslyÂ NetÂ â€‹(dollars in thousands)Â Â Â Â PresentedÂ Â Â Â ChangeÂ Â Â Â As Correctedâ€‹â€‹â€‹â€‹â€‹â€‹â€‹Interest expense:â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Depositsâ€‹$ 20,440â€‹$ (72)â€‹$ 20,368Securities sold under agreements to repurchaseâ€‹â€‹ -â€‹â€‹ 72â€‹â€‹ 72â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Fair Value of Financial Instrumentsâ€‹â€‹June 30, 2024â€‹Â As PreviouslyÂ NetÂ â€‹(dollars in thousands)Â Â Â Â PresentedÂ Â Â Â ChangeÂ Â Â Â As Correctedâ€‹â€‹â€‹â€‹â€‹â€‹â€‹Carrying Amount:â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Depositsâ€‹$ 3,952,457â€‹$ (9,398)â€‹$ 3,943,059Securities sold under agreements to repurchaseâ€‹â€‹ -â€‹â€‹ 9,398â€‹â€‹ 9,398â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Significant Other Observable Inputs (Level 2):â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Securities sold under agreements to repurchaseâ€‹â€‹ -â€‹â€‹ 9,398â€‹â€‹ 9,398â€‹â€‹â€‹NoteÂ 2: Â Organization and Summary of Significant Accounting Policies Organization. Southern Missouri Bancorp,Â Inc., a Missouri corporation (the Company) was organized in 1994 and is the parent company of Southern Bank (the Bank). Substantially all of the Companyâ€™s consolidated revenues are derived from the operations of the Bank, and the Bank represents substantially all of the Companyâ€™s consolidated assets and liabilities. SB Real Estate Investments, LLC is a wholly-owned subsidiary of the Bank formed to hold Southern Bank Real Estate Investments,Â LLC. Southern Bank Real Estate Investments, LLC is a real estate investment trust (REIT) which is controlled by SB Real Estate Investments, LLC, and has other preferred shareholders in order to meet the requirements to be a REIT. At September 30, 2024, assets of the REIT were approximately $1.3 billion, and consisted primarily of real estate loan participations acquired from the Bank.The Bank is primarily engaged in providing a full range of banking and financial services to individuals and corporate customers in its market areas. The Bank and Company are subject to competition from other financial institutions. The Bank and Company are subject to the regulation of certain federal and state agencies and undergo periodic examinations by those regulatory authorities.Basis of Financial Statement Presentation. The condensed consolidated financial statements of the Company have been prepared in conformity with accounting principles generally accepted in the United States of America and general practices within the banking industry. In the normal course of business, the Company encounters two significant types of risk: economic and regulatory. Economic risk is comprised of interest rate risk, credit risk, and market risk. The Company is subject to interest rate risk to the degree that its interest-bearing liabilities reprice on a different basis than its interest-earning assets. Credit risk is the risk of default on the Companyâ€™s investment or loan portfolios resulting from the borrowersâ€™ inability or unwillingness to make contractually required payments. Market risk reflects changes in the -9- Table of Contentsvalue of the investment portfolio, collateral underlying loans receivable, and the value of the Companyâ€™s investments in real estate.Principles of Consolidation. The condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated.Use of Estimates. The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for credit losses.Cash and Cash Equivalents. For purposes of reporting cash flows, cash and cash equivalents includes cash, due from depository institutions and interest-bearing deposits in other depository institutions with original maturities of threeÂ months or less. Interest-bearing deposits in other depository institutions were $20.4 million and $7.7 million at September 30, 2024 and JuneÂ 30, 2024, respectively. The deposits are held in various commercial banks with a total of $1.8 million and $2.3 million exceeding the FDICâ€™s deposit insurance limits at September 30, 2024 and JuneÂ 30, 2024, respectively, as well as at the Federal Reserve and the Federal Home Loan Banks of Des Moines and Chicago.Interest-bearing Time Deposits. Interest bearing time deposits in banks mature within three years and are carried at cost.Available for Sale Securities. Available for sale securities (AFS), which include any security for which the Company has no immediate plan to sell but which may be sold in the future, are carried at fair value. Unrealized gains and losses, net of tax, are reported in accumulated other comprehensive loss, a component of stockholdersâ€™ equity. All securities have been classified as available for sale.Premiums and discounts on debt securities are amortized or accreted as adjustments to income over the estimated life of the security using the level yield method. Realized gains or losses on the sale of securities is based on the specific identification method. The fair value of securities is based on quoted market prices or dealer quotes. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.The Company does not invest in collateralized mortgage obligations that are considered high risk.For AFS securities with fair value less than amortized cost that management has no intent to sell and believes that it more likely than not will not be required to sell prior to recovery, only the credit loss component of the impairment is recognized in earnings, while the noncredit loss is recognized in accumulated other comprehensive loss. The credit loss component recognized in earnings is identified as the amount of principal cash flows not expected to be received over the remaining term of the security as projected based on cash flow projections, and is recorded to the Allowance for Credit Losses (â€œACLâ€), by a charge to provision for credit losses. Accrued interest receivable is excluded from the estimate of credit losses. Both the ACL and the adjustment to net income may be reversed if conditions change. However, if the Company intends to sell an impaired AFS security, or, if it is more likely than not the Company will be required to sell such a security before recovering its amortized cost basis, the entire impairment amount would be recognized in earnings with a corresponding adjustment to the securityâ€™s amortized cost basis. Because the securityâ€™s amortized cost basis is adjusted to fair value, there is no ACL in this situation.The Company evaluates impaired AFS securities at the individual level on a quarterly basis, and considers factors including, but not limited to: the extent to which the fair value of the security is less than the amortized cost basis; adverse conditions specifically related to the security, an industry, or geographic area; the payment structure of the security and likelihood of the issuer to be able to make payments that may increase in the future; failure of the issuer to make scheduled interest or principal payments; any changes to the rating of the security by a rating agency; and the ability and intent to hold the security until maturity. A qualitative determination as to whether any portion of the -10- Table of Contentsimpairment is attributable to credit risk is acceptable. There were no credit-related factors underlying unrealized losses on AFS securities at September 30, 2024, or JuneÂ 30, 2024.Changes in the ACL are recorded as expense. Losses are charged against the ACL when management believes the uncollectability of an AFS debt security is confirmed or when either of the criteria regarding intent or requirement to sell is met.Federal Reserve Bank and Federal Home Loan Bank Stock. The Bank is a member of the Federal Reserve and the Federal Home Loan Bank (FHLB) systems. Capital stock of the Federal Reserve and the FHLB is a required investment of the Bank based upon a predetermined formula and is carried at cost.Loans. Loans are generally stated at unpaid principal balances, less the ACL, any net deferred loan origination fees, and unamortized premiums or discounts on purchased loans.Interest on loans is accrued based upon the principal amount outstanding. The accrual of interest on loans is discontinued when, in managementâ€™s judgment, the collectability of interest or principal in the normal course of business is doubtful. The Company complies with regulatory guidance which indicates that loans should be placed in nonaccrual status when 90Â days past due, unless the loan is both well-secured and in the process of collection. A loan that is â€œin the process of collectionâ€ may be subject to legal action or, in appropriate circumstances, through other collection efforts reasonably expected to result in repayment or restoration to current status in the near future. A loan is considered delinquent when a payment has not been made by the contractual due date. Interest income previously accrued but not collected at the date a loan is placed on nonaccrual status is reversed against interest income. Cash receipts on a nonaccrual loan are applied to principal and interest in accordance with its contractual terms unless full payment of principal is not expected, in which case cash receipts, whether designated as principal or interest, are applied as a reduction of the carrying value of the loan. A nonaccrual loan is generally returned to accrual status when principal and interest payments are current, full collectability of principal and interest is reasonably assured, and a consistent record of performance has been demonstrated.The ACL is a valuation account that is deducted from the loansâ€™ amortized cost basis to present the net amount expected to be collected on the loans, and is established through a provision for credit losses (PCL) charged to current earnings. The ACL is increased by the provision for credit losses on loans charged to expense and reduced by loans charged off, net of recoveries. Loans are charged off in the period deemed uncollectible, based on managementâ€™s analysis of expected cash flows (for non-collateral dependent loans) or collateral value (for collateral-dependent loans). Subsequent recoveries of loans previously charged off, if any, are credited to the allowance when received.Management estimates the ACL using relevant available information, from internal and external sources, relating to past events, current conditions, and reasonable and supportable forecasts. Adjustments may be made to historical loss information for differences identified in current loan-specific risk characteristics, such as differences in underwriting standards or terms; lending review systems; experience, ability, or depth of lending management and staff; portfolio growth and mix; delinquency levels and trends; as well as for changes in environmental conditions, such as changes in economic activity or employment, agricultural economic conditions, property values, or

other relevant factors. The Company generally incorporates a reasonable and supportable forecast period of four quarters, and a four-quarter, straight-line reversion period to return to long-term historical averages.The ACL is measured on a collective (pool) basis when similar risk characteristics exist. For loans that do not share general risk characteristics with the collectively evaluated pools, the Company estimates credit losses on an individual loan basis, and these loans are excluded from the collectively evaluated pools. An ACL for an individually evaluated loan is recorded when the amortized cost basis of the loan exceeds the discounted estimated cash flows using the loanâ€™s initial effective interest rate or the fair value, less estimated costs to sell, of the collateral for certain collateral dependent loans. For the collectively evaluated pools, the Company segments the loan portfolio primarily by loan purpose and collateral into 24 pools, which are homogeneous groups of loans that possess similar loss potential characteristics. The Company primarily utilizes the discounted cash flow (DCF) methodology for measurement of the required ACL.Â For a limited number of pools with a relatively small balance of unpaid principal, the Company utilizes the remaining life method. The DCF model implements probability of default (PD) and loss given default (LGD) calculations at the instrument level. PD and LGD are determined based on statistical analysis and correlation of historical losses with -11- Table of Contentsvarious economic factors over time. In general, the Companyâ€™s losses have not correlated well with economic factors, and the Company has utilized peer data where more appropriate. The Company defines a default to include an event of charge off, an adverse (substandard or worse) internal credit rating, becoming delinquent 90Â days or more, or being placed on nonaccrual status. A PD/LGD estimate is applied to a projected model of the loanâ€™s cashflow, including principal and interest payments, with consideration for prepayment speeds, principal curtailments, and recovery lag. Loans acquired in a business combination that have experienced more-than-insignificant deterioration in credit quality since origination are considered purchased credit deteriorated (PCD) loans. At the acquisition date, an estimate of expected credit losses is made for groups of PCD loans with similar risk characteristics and individual PCD loans without similar risk characteristics. This initial ACL is allocated to individual PCD loans and added to the purchase price or acquisition date fair values to establish the initial amortized cost basis of the PCD loans. As the initial ACL is added to the purchase price, there is no credit loss expense recognized upon acquisition of a PCD loan. Any difference between the unpaid principal balance of PCD loans and the amortized cost basis is considered to relate to non-credit factors and results in a discount or premium. Discounts and premiums are recognized through interest income on a level-yield method over the life of the loans.Loan fees and certain direct loan origination costs are deferred, and the net fee or cost is recognized as an adjustment to interest income using the interest method over the contractual life of the loans.Off-Balance Sheet Credit Exposures. Off-balance sheet credit instruments include commitments to make loans, and commercial letters of credit, issued to meet customer financing needs. The Companyâ€™s exposure to credit loss in the event of non-performance by the other party to the financial instrument for off-balance sheet loan commitments is represented by the contractual amount of those instruments. Such financial instruments are recorded when they are funded. The ACL on off-balance sheet credit exposures is estimated by loan pool on a quarterly basis under the current CECL model using the same methodologies as portfolio loans, taking into consideration the likelihood that funding will occur and is included in other liabilities on the Companyâ€™s consolidated balance sheets. The Company records an ACL on off-balance sheet credit exposures, unless the commitments to extend credit are unconditionally cancelable. Foreclosed Real Estate. Real estate acquired by foreclosure or by deed in lieu of foreclosure is initially recorded at fair value less estimated selling costs, establishing a new cost basis. Any costs for development and improvement of the property that are warranted are capitalized.Valuations are periodically performed by management, and an allowance for losses is established by a charge to operations if the carrying value of a property exceeds its estimated fair value, less estimated selling costs.Loans to facilitate the sale of real estate acquired in foreclosure are discounted if made at less than market rates. Discounts are amortized over the fixed interest period of each loan using the interest method.Premises and Equipment. Premises and equipment are stated at cost less accumulated depreciation and include expenditures for major betterments and renewals. Maintenance, repairs, and minor renewals are expensed as incurred. When property is retired or sold, the retired asset and related accumulated depreciation are removed from the accounts and the resulting gain or loss taken into income. The Company reviews property and equipment for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If such assets are considered to be impaired, the impairment loss recognized is measured by the amount by which the carrying amount exceeds the fair value of the assets.Depreciation is computed by use of straight-line and accelerated methods over the estimated useful lives of the assets. Estimated lives are generally seven to forty years for premises, three to seven years for equipment, and three years for software.Bank Owned Life Insurance. Bank owned life insurance policies are reflected in the condensed consolidated balance sheets at the estimated cash surrender value. Changes in the cash surrender value of these policies, as well as a portion of the insurance proceeds received, are recorded in noninterest income in the condensed consolidated statements of income.-12- Table of ContentsGoodwill. The Companyâ€™s goodwill is evaluated annually for impairment or more frequently if impairment indicators are present. A qualitative assessment is performed to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value is less than the carrying amount, including goodwill. If, based on the evaluation, it is determined to be more likely than not that the fair value is less than the carrying value, then goodwill is tested further for impairment. If the implied fair value of goodwill is lower than its carrying amount, a goodwill impairment is indicated and goodwill is written down to its implied fair value. Subsequent increases in goodwill value are not recognized in the financial statements. As of JuneÂ 30, 2024, the date of the Companyâ€™s annual test, there was no impairment indicated, based on a qualitative assessment of goodwill, which considered: the market value of the Companyâ€™s common stock; concentrations of credit; profitability; nonperforming assets; capital levels; and results of recent regulatory examinations. There was no impairment of goodwill at September 30, 2024.Intangible Assets. The Companyâ€™s intangible assets at September 30, 2024 included gross core deposit intangibles of $39.1 million with $18.9 million accumulated amortization, gross other identifiable intangibles of $6.4 million with accumulated amortization of $4.3 million, and mortgage and SBA servicing rights of $3.0 million. At JuneÂ 30, 2024, the Companyâ€™s intangible assets included gross core deposit intangibles of $39.1 million with $17.8 million accumulated amortization, gross other identifiable intangibles of $6.4 million with accumulated amortization of $4.2 million, and mortgage and SBA servicing rights of $3.0 million. The Companyâ€™s core deposit and other intangible assets are being amortized using the straight line method, in accordance with ASC 350, over periods ranging from five to tenÂ years, with amortization expense expected to be approximately $2.6 million in the remainder of fiscal 2025, $3.0 million in fiscal 2026, $2.7 million in fiscal 2027, $2.7 million in fiscal 2028, $2.6 million in fiscal 2029, and $8.8 million thereafter. As of September 30, 2024 and JuneÂ 30, 2024, there was no impairment of other intangible assets indicated.The Company records mortgage servicing rights (MSR) at fair value for all mortgage loans sold on a servicing retained basis with subsequent adjustments to fair value of MSR in accordance with FASB ASC 860. An estimate of the fair value of the Companyâ€™s MSR is determined utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. Changes in the fair value of MSR are recorded in loan servicing fees in the consolidated statements of income.Income Taxes. The Company accounts for income taxes in accordance with income tax accounting guidance (ASC 740, Income Taxes). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. The Company determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur.Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50Â percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50Â percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances, and information available at the reporting date and is subject to managementâ€™s judgment. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized.The Company recognizes interest and penalties, if any, on income taxes as a component of income tax expense.The Company files consolidated income tax returns with its subsidiaries, the Bank and SB Real Estate Investments, LLC, with a tax year ended June 30. Southern Bank Real Estate Investments, LLC files a separate REIT return for federal tax purposes, and also files state income tax returns, with a tax year ended December 31.-13- Table of ContentsDerivative Financial Instruments and Hedging Activities. The Company enters into derivative financial instruments, primarily interest rate swaps, to manage interest rate risk, facilitate asset/liability management strategies and manage other exposures. Derivative instruments are accounted pursuant to ASC Topic 815, â€œDerivatives and Hedgingâ€, which requires companies to recognize derivative instruments as either assets or liabilities in the consolidated balance sheet. All derivative financial instruments are recognized as other assets or other liabilities, as applicable, at estimated fair value. The change in each of these financial statement line items is included as operating cash flows in the accompanying consolidated statements of cash flows. The Company does not speculate using derivative instruments. Derivative financial instruments are more fully described in Note 13.Incentive Plans. The Company accounts for its Equity Incentive Plan (EIP), and Omnibus Incentive Plan (OIP) in accordance with ASC 718, â€œShare-Based Payment.â€ Compensation expense is based on the market price of the Companyâ€™s stock on the date the shares are granted and is recorded over the vesting period. The difference between the grant-date fair value and the fair value on the date the shares are considered earned represents a tax benefit to the Company that is recorded as an adjustment to income tax expense. Non-Employee Directorsâ€™ Retirement. The Bank entered into directorsâ€™ retirement agreements beginning in AprilÂ 1994 for non-employee directors and continued to do so for new non-employee directors joining the Bankâ€™s board through December 2014. These directorsâ€™ retirement agreements provide that each participating non-employee director (participant) shall receive, upon termination of service on the Board on or after age 60, other than termination for cause, a benefit in equal annual installments over a five year period. The benefit will be based upon the product of the participantâ€™s vestingÂ percentage and the total Board fees paid to the participant during the calendarÂ year preceding termination of service on the Board. The vestingÂ percentage shall be determined based upon the participantâ€™sÂ years of service on the Board.In the event that the participant dies before collecting any or all of the benefits, the Bank shall pay the participantâ€™s beneficiary. Benefits shall not be payable to anyone other than the beneficiary, and shall terminate on the death of the beneficiary.Stock Options. Compensation cost is measured based on the grant-date fair value of the equity instruments issued, and recognized over the vesting period during which an employee provides service in exchange for the award.Earnings Per Share. Basic earnings per share available to common stockholders is computed using the weighted-average number of common shares outstanding. Diluted earnings per share available to common stockholders includes the effect of all weighted-average dilutive potential common shares (stock options and restricted stock grants) outstanding during each period.Comprehensive Income. Comprehensive income consists of net income and other comprehensive income (loss), net of applicable income taxes. Other comprehensive income (loss) includes unrealized depreciation on available-for-sale securities, unrealized depreciation on available-for-sale securities for which a portion of an other-than-temporary impairment has been recognized in income, and changes in the funded status of defined benefit pension plans.Transfers Between Fair Value Hierarchy Levels. Transfers in and out of Level 1 (quoted market prices), Level 2 (other significant observable inputs) and Level 3 (significant unobservable inputs) are recognized on the period ending date.Wealth Management Assets and Fees. Assets managed in fiduciary or investment management accounts by the Company are not included in the consolidated balance sheets since such items are not assets of the Company or its subsidiaries. Fees from fiduciary or investment management activities are recorded on a cash basis over the period in which the service is provided. Fees are generally a function of the market value of assets managed and administered, the volume of transactions, and fees for other services rendered, as set forth in the agreement between the customer and the Company. This revenue recognition involves the use of estimates and assumptions, including components that are calculated based on asset valuations and transaction volumes. Any out-of-pocket expenses or services not typically covered by the fee schedule for fiduciary activities are charged directly to the account on a gross basis as revenue is incurred. The Southern Wealth Management division, which is a division of the Bank, held fiduciary assets totaling -14- Table of Contents$113.1 million and $100.9 million as of September 30, 2024 and June 30, 2024, respectively, and investment management assets totaling $516.9 million and $474.7 million as of September 30, 2024 and June 30, 2024, respectively. New Accounting Pronouncements:In January 2021, the FASB published ASU 2021-01, â€œReference Rate Reform. (Topic 848)â€. ASU 2021-01 clarified that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The ASU also amended the expedients and exceptions in Topic 848 to capture the incremental consequences of the scope clarification and to tailor the existing guidance to derivative instruments affected by the discounting transition. An entity may elect to apply the amendments in this update on a full retrospective basis as of any date from the beginning of an interim period that includes or is subsequent to March 12, 2020, or on a prospective basis to new modifications from any date within an interim period that includes or is subsequent to the date of the issuance of a final update, up to the date that financial statements are available to be issued. If an entity elects to apply any of the amendments in this update for an eligible hedging relationship, any adjustments as a result of those elections must be reflected as of the date the entity applies the election. Originally, the amendments in this update did not apply to contract modifications made after December 31, 2022, new hedging relationships entered into after December 31, 2022, and existing hedging relationships evaluated for effectiveness in periods after December 31, 2022 except for hedging relationships existing as of December 31, 2022, that apply certain optional expedients in which the accounting effects are recorded through the end of the hedging relationship (including periods after December 31, 2022). With the issuance of ASU 2022-06 Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848, the sunset date for adoption of ASU 2021-01 was extended from December 31, 2022 to December 31, 2024. The Company is evaluating the impact of this ASU but does not expect it to have a material impact on the Companyâ€™s consolidated financial statements. â€‹In November 2023, the FASB issued ASU 2023-07, â€œSegment Reporting (Topic 280): Improvements to Reportable Segment Disclosures.â€ The amendments in this update improve financial reporting by requiring disclosure of incremental segment information on an annual and interim basis for all public entities to enable investors to develop more decision-useful financial analyses. The amendments in this update do not change how a public entity identifies its operating segments, aggregates those operating segments, or applies the quantitative thresholds to determine its reportable segments. The amendments of this ASU are effective for fiscal years beginning after December 15, 2023 and interim periods within fiscal years beginning after December 15, 2024. Adoption of this ASU is not expected to have a material impact on Companyâ€™s consolidated financial statements.â€‹On December 14, 2023, the FASB published ASU 2023-02, â€œInvestments - Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method.â€ This ASU permits reporting entities to elect to account for tax equity investments, regardless of the tax credit program for which the income tax credits are received, using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the income tax credits and other income tax benefits received and recognizes the net amortization and income tax credits and other income tax benefits in the income statement as a component of income tax expense. A reporting entity makes an accounting policy election to apply the proportional amortization method on a tax-credit-program-by-tax-credit-program basis rather than electing to apply the proportional amortization method at the reporting entity level or to individual investments. This ASU also requires specific disclosures of investments that generate income tax credits and other income tax benefits from a tax credit program for which the entity has elected to apply the proportional amortization method. The ASU was effective for fiscal years beginning after December 15, 2023, and was effective for the Company beginning July 1, 2024. The adoption of ASU 2023-02 did not have a material impact on the Companyâ€™s consolidated financial statements.â€‹In December 2023, the FASB issued ASU 2023-09, â€œIncome Taxes - Improvements to Income Tax Disclosures (Topic 740)â€. ASU 2023-09 was issued to address requests by investors and creditors for enhanced transparency and decision usefulness of income tax disclosures. Public business entities (PBEs) would be required to prepare an annual detailed, tabular tax rate reconciliation. All other entities would be required to provide qualitative disclosure on specific categories and individual jurisdictions that result in significant differences between the statutory and effective tax rates. All entities would be required to annually disclose taxes paid disaggregated by federal, state, and foreign taxes, as well as disaggregating taxes by individual jurisdiction if taxes paid exceed 5% of total income taxes paid. The ASU is effective -15- Table of Contentsfor PBEs for fiscal years beginning after December 15, 2024. The Company does not expect adoption of ASU 2023-09 to have a material impact on its consolidated financial statements.â€‹In November 2024, the FASB issued ASU 2024-03, â€œIncome Statementâ€”Reporting Comprehensive Incomeâ€”Expense Disaggregation Disclosures (Subtopic 220-40)â€. ASU 2024-03 was issued to improve the disclosures about a public business entityâ€™s expenses and address requests from investors for more detailed information about the types of expenses (including purchases of inventory, employee compensation,

depreciation, amortization, and depletion) in commonly presented expense captions (such as cost of sales, SG&A, and research and development). The ASU is effective for PBEs for fiscal years beginning after December 15, 2026. The Company does not expect adoption of ASU 2024-03 to have a material impact on its consolidated financial statements.â€‹â€‹-16- Table of ContentsNoteÂ 3: Â Available for Sale Securities The amortized cost, gross unrealized gains, gross unrealized losses, ACL, and approximate fair value of securities available for sale consisted of the

At September 30, 2024, the Bank had purchased participations in 78 loans totaling $208.5 million, as compared to 71 loans totaling $178.5 million at June 30, 2024.1-4 Residential Real Estate Lending. The Company actively originates loans for the acquisition or refinance of one- to four-family residences. This category includes both fixed-rate and adjustable-rate mortgage (â€œARMâ€) loans amortizing over periods of up to 30 years, and the properties securing such loans may be owner-occupied or non-owner-occupied. Single-family residential loans do not generally exceed 90% of the lower of the appraised value or purchase price of the secured property. Substantially all of the one- to four-family residential mortgage originations in the Companyâ€™s portfolio are located within the Companyâ€™s primary lending area. General risks related to one- to four-family residential lending include stability of borrower income and collateral values. Home equity lines of credit (HELOCs) are secured with a deed of trust and are generally issued up to 90% of the appraised or estimated value of the property securing the line of credit, less the outstanding balance on the first mortgage and are typically issued for a term of tenÂ years. Interest rates on HELOCs are generally adjustable. Interest rates are based upon the loan-to-value ratio of the property with better rates given to borrowers with more equity. Risks related to HELOC lending generally include the stability of borrower income and collateral values.Non-Owner Occupied and Owner Occupied Commercial Real Estate Lending. The Company actively originates loans secured by owner- and non-owner-occupied commercial real estate including single- and multi-tenant retail properties, restaurants, hotels, land (improved and unimproved), nursing homes and other healthcare facilities, warehouses and distribution centers, convenience stores, automobile dealerships and other automotive-related services, and other businesses. These properties are typically owned and operated by borrowers headquartered within the Companyâ€™s primary lending area, however, the property may be located outside the Companyâ€™s primary lending area. Approximately $626.3 million of the Companyâ€™s $1.6 billion in commercial real estate loans are secured by properties located outside our primary lending area. Risks to owner-occupied commercial real estate lending generally include the continued profitable operation of the borrowerâ€™s enterprise, as well as general collateral values, and may be heightened by unique, specific uses of the property serving as collateral. Non-owner-occupied commercial real estate lending risks include tenant demand and performance, lease rates, and vacancies, as well as collateral values and borrower leverage. These factors may be influenced by general economic conditions in the region, or in the United States generally. Most commercial real estate loans originated by the Company generally are based on amortization schedules of up to 25 years withÂ monthly principal and interest payments. Generally, the interest rate received on these loans is fixed for a maturity for up to tenÂ years, with a balloon payment due at maturity. Alternatively, for some loans, the interest rate adjusts at least annually after an initial period up to seven years. The Company typically includes an interest rate â€œfloorâ€ in the loan agreement. Generally, improved commercial real estate loan amounts do not exceed 80% of the lower of the appraised value or the purchase price of the secured property. Multi-family Real Estate Lending. The Company originates loans secured by multi-family residential properties that are often located outside the Companyâ€™s primary lending area but made to borrowers who operate within the Companyâ€™s primary market area. The majority of the multi-family residential loans that are originated by the Company are amortized over periods generally up to 25 years, with balloon maturities typically up to ten years. Both fixed and adjustable interest rates are offered and it is typical for the Company to include an interest rate â€œfloorâ€ and â€œceilingâ€ in the loan agreement. Generally, multi-family residential loans do not exceed 85% of the lower of the appraised value or purchase price of the secured property. General risks related to multi-family residential lending include rental demand and supply, rental rates, and vacancies, as well as collateral values and borrower leverage.Construction and Land Development Lending. The Company originates real estate loans secured by property or land that is under construction or development. Construction and land development loans originated by the Company are generally to finance the construction of owner occupied residential real estate, or to finance speculative construction of residential real estate, land development, or owner-operated or non-owner occupied commercial real estate. During construction, these loans typically requireÂ monthly interest-only payments, with single-family residential construction loans having maturities ranging from six to twelveÂ months, while multi-family or commercial construction loans typically mature in 12 to 36 months. Once construction is completed, construction loans may be converted toÂ permanent -20- Table of Contentsfinancing with monthly payments using amortization schedules of up to 30 years on residential and generally up to 25 years on commercial real estate. Construction and land development lending risks generally include successful timely and on-budget completion of the project, followed by the sale of the property in the case of land development or non-owner-occupied real estate, or the long-term occupancy of the property by the builder in the case of owner-occupied construction. Changes in real estate values or other economic conditions may impact the ability of a borrower to sell property developed for that purpose.While the Company typically utilizes relatively short maturity periods to closely monitor the inherent risks associated with construction loans for these loans, weather conditions, change orders, availability of materials and/or labor, and other factors may contribute to the lengthening of a project, thus necessitating the need to renew the construction loan at the balloon maturity. Such extensions are typically executed in incremental three month periods to facilitate project completion. During construction, loans typically requireÂ monthly interest only payments which may allow the Company an opportunity to monitor for early signs of financial difficulty should the borrower fail to make a requiredÂ monthly payment. Additionally, during the construction phase, the Company typically performs interim inspections which further provide the Company an opportunity to assess risk. Agriculture Production and Agriculture Real Estate Lending. Agriculture production and agriculture real estate loans are generally comprised on seasonal operating lines to farmers to plant crops and term loans to fund the purchase of equipment, farmland, or livestock. This segment of lending includes pastureland and row crop ground. The Company originates substantially all agriculture production and agriculture real estate lending to borrowers headquartered in the Companyâ€™s primary lending area. Specific underwriting standards have been established for agricultural-related loans including the establishment of projections for each operating year based on industry developed estimates of farm input costs and expected commodity yields and prices. Agriculture production operating lines are typically written for one year and secured by the crop. Agricultural real estate terms offered usually have amortization schedules of up to 25 years with an 80% loan-to-value ratio, or 30 years with a 75% loan-to-value ratio. Risks to agricultural lending include unique factors such as commodity prices, yields, input costs, and weather, as well as farmland and farm equipment values. â€‹Commercial and Industrial Lending. The Companyâ€™s commercial and industrial lending activities encompass loans with a variety of purposes and security, including loans to finance accounts receivable, inventory, equipment and operating lines of credit. The Company offers both fixed and adjustable rate commercial and industrial loans. Generally, commercial loans secured by fixed assets are amortized over periods up to five years. Commercial and industrial lending risk is primarily driven by the borrowerâ€™s successful generation of cash flow from their business enterprise sufficient to service debt, and may be influenced by factors specific to the borrower and industry, or by general economic conditions in the region or in the United States generally. Consumer Lending. The Company offers a variety of secured consumer loans, including home equity, direct and indirect automobile loans, second mortgages, recreational vehicle loans and loans secured by deposits. The Company originates substantially all of its consumer loans in its primary lending area. Usually, consumer loans are originated with fixed rates for terms of up to 66 months, with the exception of home equity lines of credit, which are variable, tied to the prime rate of interest and are for a period of ten years.Automobile loans originated by the Company include both direct loans and a smaller amount of loans originated by auto dealers. Typically, automobile loans are made for terms of up to 66 months for new and used vehicles. Loans secured by automobiles have fixed rates and are generally made in amounts up to 100% of the purchase price of the vehicle. Risks to automobile and other consumer lending generally include the stability of borrower income and borrower willingness to repay.Allowance for Credit Losses. The PCL for the three-month period ended September 30, 2024, was $2.2 million compared to $900,000 in the same period of the prior fiscal year. The current period PCL was the result of a $2.0 million provision attributable to the ACL

for loan balances outstanding, and a $138,000 provision attributable to the allowance for off-balance sheet credit exposures. The Company has estimated its expected credit losses as of September 30, 2024, under ASC 326-20, and management believes the ACL as of that date was adequate based on that estimate. There remains, however, significant uncertainty as the Federal Reserve has tightened monetary policy to address inflation risks. Qualitative adjustments in the Companyâ€™s ACL model were slightly decreased compared to June 30, 2024. The Company increased the allowance attributable to classified hotel loans that have been slow to recover from -21- Table of Contentsthe COVID-19 pandemic. Additionally, PCL was required due to loan growth in the first quarter of fiscal year 2025 and a slight increase in modeled expected losses due to a modest increase in the unemployment rate expectations. As a percentage of average loans outstanding, the Company recorded net charge offs of 0.01% (annualized) during the current period, as compared to 0.03% for the same period of the prior fiscal year. Specifically, management considered the following primary qualitative items in its estimate of the ACL: â€‹â—Â Â economic conditions and projections as provided by the Federal Open Market Committee (FOMC) were utilized in the Companyâ€™s estimate at September 30, 2024. Economic factors considered in the projections included national levels of unemployment using the high bound of the FOMCâ€™s central tendency, and national rates of inflation-adjusted growth in the gross domestic product using the low bound of the FOMCâ€™s central tendency. Economic conditions are considered to be a moderate and stable risk factor, relative to June 30, 2024;â€‹â— the pace of growth of the Companyâ€™s loan portfolio, exclusive of acquisitions, relative to overall economic growth. This measure is considered to be a moderate and slightly decreasing risk factor, relative to June 30, 2024;â€‹â— levels and trends for loan delinquencies nationally and in the region. This is considered to be a low and stable risk factor, relative to June 30, 2024;â€‹â— quantified supported model adjustments and general imprecision adjustments. This factor was added for the June 30, 2024, ACL estimate as certain model adjustments capture highly specific issues or events that are not adequately captured in model outcomes. General imprecision adjustments address other sources of imprecision that are not specifically identifiable or quantifiable to a particular loan portfolio and have not been captured by the model or by a specific model adjustment. The Company considers general imprecision in three dimensions; economic forecast imprecision, model imprecision, and process imprecision. â€‹PCD Loans. In connection with the acquisition of Citizens Bancshares Co. (Citizens) on January 20, 2023, and Fortune Financial Corporation (Fortune) on February 25, 2022, the Company acquired loans both with and without evidence of credit quality deterioration since origination. Acquired loans are recorded at their fair value at the time of acquisition with no carryover from the acquired institutionâ€™s previously recorded allowance for loan and lease losses. Acquired loans are accounted for under ASC 326, Financial Instruments â€“ Credit Losses. â€‹The fair value of acquired loans recorded at the time of acquisition is based upon several factors, including the timing and payment of expected cash flows, as adjusted for estimated credit losses and prepayments, and then discounting these cash flows using comparable market rates. The resulting fair value adjustment is recorded in the form of a premium or discount to the unpaid principal balance of the respective loans. As it relates to acquired loans that, as of the date of acquisition, have experienced a more-than-insignificant deterioration in credit quality since origination, the net premium or net discount is adjusted to reflect the Companyâ€™s allowance for credit losses recorded for PCD loans at the time of acquisition, and the remaining fair value adjustment is accreted or amortized into interest income over the remaining life of the respective loans. As it relates to loans not classified as PCD (non-PCD) loans, the credit loss and yield components of their fair value adjustment are aggregated, and the resulting net premium or net discount is accreted or amortized into interest income over the remaining life of the respective loans. The Company records an ACL for non-PCD loans at the time of acquisition through provision expense, and therefore, no further adjustments are made to the net premium or net discount for non-PCD loans.â€‹Loans that the Company acquired from Citizens and Fortune, that at the time of acquisition had more-than-insignificant deterioration of credit quality since origination, are classified as PCD The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. This analysis is performed on all loans at origination and is updated on a quarterly basis for loans risk rated Watch, Special Mention, Substandard, or Doubtful. In addition, lending relationships of $3 million or more, exclusive of any consumer or owner-occupied residential loan, are subject to an annual credit analysis which is prepared by the loan administration department and presented to a loan committee with appropriate lending authority. A sample of lending relationships in excess of $1 million (exclusive of single-family residential real estate loans) are subject to an independent loan review annually, in order to verify risk ratings. The Company uses the following definitions for risk ratings:WatchÂ â€“ Loans classified as watch exhibit weaknesses that require more than usual monitoring. Issues may include deteriorating financial condition, payments made after due date but within 30Â days, adverse industry conditions or management problems.Special MentionÂ â€“Â Loans classified as special mention exhibit signs of further deterioration but still generally make payments within 30Â days. This is a transitional rating and loans should typically not be rated Special Mention for more than 12Â months.SubstandardÂ â€“Â Loans classified as substandard possess weaknesses that jeopardize the ultimate collection of the principal and interest outstanding. These loans exhibit continued financial losses, ongoing delinquency, overall poor financial condition, and insufficient collateral. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.DoubtfulÂ â€“Â Loans classified as doubtful have all the weaknesses of substandard loans, and have deteriorated to the level that there is a high probability of substantial loss.Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be Pass rated loans.A periodic review of selected credits (based on loan size and type) is conducted to identify loans with heightened risk or probable losses and to assign risk grades. The primary responsibility for this review rests with loan administration personnel. This review is supplemented with periodic examinations of both selected credits and the credit review process by the Companyâ€™s internal audit function and applicable regulatory agencies. The information from these reviews assists management in the timely identification of problems and potential problems and provides a basis for deciding whether the credit continues to share similar risk characteristics with collectively evaluated loan pools, or whether credit losses for the loan should be evaluated on an individual loan basis.The following table presents the credit risk profile of the Companyâ€™s loan portfolio (excluding deferred loan fees) based on rating category andÂ fiscal year of origination as of September 30, 2024. This table includes PCD loans, which are reported according to risk categorization after acquisition based on the Companyâ€™s standards for such classification: â€‹-25- Table of Contentsâ€‹Revolvingâ€‹â€‹â€‹(dollars in thousands)Â Â Â Â 2025Â Â Â Â 2024Â Â Â Â 2023Â Â Â Â 2022Â Â Â Â 2021Â Â Â Â PriorÂ Â Â Â loansÂ Â Â Â Total1-4 residential real estateâ€‹Passâ€‹$ 59,431â€‹$ 152,857â€‹$ 148,199â€‹$ 185,830â€‹$ 138,617â€‹$ 153,107â€‹$ 99,379â€‹$ 937,420Watchâ€‹Â 60â€‹Â 809â€‹Â 287â€‹Â 238â€‹Â 391â€‹Â 118â€‹Â â€”â€‹Â 1,903Special Mentionâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Substandardâ€‹Â 960â€‹Â 758â€‹Â 623â€‹Â 326â€‹Â 176â€‹Â 750â€‹Â â€”â€‹Â 3,593Doubtfulâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Total 1-4 residential real estateâ€‹$ 60,451â€‹$ 154,424â€‹$ 149,109â€‹$ 186,394â€‹$ 139,184â€‹$ 153,975â€‹$ 99,379â€‹$ 942,916â€‹Non-owner occupied commercial real estateâ€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹Passâ€‹$ 20,261â€‹$ 106,090â€‹$ 242,653â€‹$ 291,892â€‹$ 99,987â€‹$ 84,799â€‹$ 7,178â€‹$ 852,860Watchâ€‹Â 5,071â€‹Â 207â€‹Â 13,206â€‹Â 206â€‹Â 1,510â€‹Â 5,202â€‹Â â€”â€‹Â 25,402Special Mentionâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Substandardâ€‹Â â€”â€‹Â â€”â€‹Â 43â€‹Â 25,373â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â 25,416Doubtfulâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Total Non-owner occupied commercial real estateâ€‹$ 25,332â€‹$ 106,297â€‹$ 255,902â€‹$ 317,471â€‹$ 101,497â€‹$ 90,001â€‹$ 7,178â€‹$ 903,678â€‹Owner occupied commercial real estateâ€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹Passâ€‹$ 26,210â€‹$ 58,846â€‹$ 90,859â€‹$ 86,849â€‹$ 83,070â€‹$ 55,857â€‹$ 20,518â€‹$ 422,209Watchâ€‹Â 587â€‹Â 629â€‹Â 6,663â€‹Â 1,164â€‹Â 150â€‹Â 1,169â€‹Â 519â€‹Â 10,881Special Mentionâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Substandardâ€‹Â â€”â€‹Â 3,318â€‹Â â€”â€‹Â 625â€‹Â â€”â€‹Â 425â€‹Â 572â€‹Â 4,940Doubtfulâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Total Owner occupied commercial real estateâ€‹$ 26,797â€‹$ 62,793â€‹$ 97,522â€‹$ 88,638â€‹$ 83,220â€‹$ 57,451â€‹$ 21,609â€‹$ 438,030â€‹Multi-family real estateâ€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹Passâ€‹$ 15,824â€‹$ 24,791â€‹$ 156,181â€‹$ 81,520â€‹$ 73,648â€‹$ 18,832â€‹$ 381â€‹$ 371,177Watchâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Special Mentionâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Substandardâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Doubtfulâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Total Multi-family real estateâ€‹$ 15,824â€‹$ 24,791â€‹$ 156,181â€‹$ 81,520â€‹$ 73,648â€‹$ 18,832â€‹$ 381â€‹$ 371,177â€‹Construction and land developmentâ€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹Passâ€‹$ 51,908â€‹$ 97,383â€‹$ 159,720â€‹$ 27,195â€‹$ 2,463â€‹$ 4,388â€‹$ 1,794â€‹$ 344,851Watchâ€‹Â 4,949â€‹Â 275â€‹Â â€”â€‹Â 128â€‹Â â€”â€‹Â 85â€‹Â â€”â€‹Â 5,437Special Mentionâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Substandardâ€‹Â â€”â€‹Â 1,161â€‹Â 32â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â 1,193Doubtfulâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Total Construction and land developmentâ€‹$ 56,857â€‹$ 98,819â€‹$ 159,752â€‹$ 27,323â€‹$ 2,463â€‹$ 4,473â€‹$ 1,794â€‹$ 351,481â€‹Agriculture real estateâ€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹Passâ€‹$ 13,804â€‹$ 37,392â€‹$ 44,730â€‹$ 55,391â€‹$ 47,698â€‹$ 18,522â€‹$ 18,484â€‹$ 236,021Watchâ€‹Â â€”â€‹Â 252â€‹Â 121â€‹Â 192â€‹Â â€”â€‹Â 259â€‹Â â€”â€‹Â 824Special Mentionâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Substandardâ€‹Â 35â€‹Â 2,265â€‹Â 316â€‹Â â€”â€‹Â 279â€‹Â â€”â€‹Â 47â€‹Â 2,942Doubtfulâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Total Agriculture real estateâ€‹$ 13,839â€‹$ 39,909â€‹$ 45,167â€‹$ 55,583â€‹$ 47,977â€‹$ 18,781â€‹$ 18,531â€‹$ 239,787â€‹Commercial and industrialâ€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹Passâ€‹$ 31,499â€‹$ 100,314â€‹$ 56,216â€‹$ 40,472â€‹$ 41,221â€‹$ 9,206â€‹$ 173,034â€‹$ 451,962Watchâ€‹Â 1,906â€‹Â 201â€‹Â 257â€‹Â 43â€‹Â 8â€‹Â 209â€‹Â 286â€‹Â 2,910Special Mentionâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Substandardâ€‹Â â€”â€‹Â 201â€‹Â 259â€‹Â 859â€‹Â â€”â€‹Â 752â€‹Â 75â€‹Â 2,146Doubtfulâ€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”â€‹Â â€”Total Commercial and industrialâ€‹$ 33,405â€‹$ 100,716â€‹$ 56,732â€‹$ 41,374â€‹$ 41,229â€‹$ 10,167â€‹$ 173,395â€‹$ 457,018â€‹Agriculture productionâ€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹â€‹Â â€‹Passâ€‹$ 13,323â€‹$ 37,828â€‹$ 10,533â€‹$ 3,926â€‹$ 5,851â€‹$ 2,114â€‹$ 126,123â€‹$ 199,698Watchâ€‹Â

shortfalls generally are not adversely classified or determined to not share similar risk characteristics with collectively evaluated pools of loans for determination of the ACL estimate.
Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the
borrower, including the length of the delay, the reasons for the delay, the borrowerâ€™s prior payment record and the amount of the shortfall in relation to the principal and interest owed.
Significant payment delays or shortfalls may lead to a determination that a loan should be individually evaluated for estimated credit losses.-29- Table of ContentsCollateral Dependent Loans.

The Company elected certain relief options under ASU 2016-02, Leases (Topic 842), including the option not to recognize right of use asset and lease liabilities that arise from short-term leases (leases with terms of twelveÂ months or less). At September 30, 2024, the Company had ten leased properties, which included banking facilities, administrative offices and ground leases, and numerous office equipment lease agreements in which it was the lessee, with lease terms exceeding twelveÂ months.All of the Companyâ€™s leases are classified as operating leases. These operating leases are included as a ROU asset in the premises and equipment line item on the Companyâ€™s consolidated balance sheets. The corresponding lease liability is included in the accounts payable and other liabilities line item on the Companyâ€™s consolidated balance sheets. In the February 2022 acquisition of Fortune, the Company assumed a ground lease with an entity that is controlled by a Company insider. This property is in St. Louis County, MO and is in its fourth year of a twenty year term. ASU 2016-02 also requires certain other accounting elections. The Company elected the short-term lease recognition exemption for all leases that qualify, meaning those with terms under twelveÂ months. ROU assets or lease liabilities are not to be recognized for short-term leases. The calculated amount of the ROU assets and lease liabilities in the table below are impacted by the length of the lease term and the discount rate used to present value the minimum lease payments. The Companyâ€™s lease agreements often include one or more options to renew at the Companyâ€™s discretion. If at lease inception, the Company considers the exercising of a renewal option to be reasonably certain, the Company will include the extended term in the calculation of the ROU asset and lease liability. Regarding the discount rate, the ASU requires the use of the rate implicit in the lease whenever this rate is readily determinable. As this rate is rarely determinable, the Company utilizes its incremental borrowing rate at lease inception over a similar term. The expected lease terms range from 18 months to 20 years.â€‹-31- Table of Contentsâ€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Â Â Â Â SeptemberÂ 30,Â 2024Â Â Â Â JuneÂ 30,Â 2024Consolidated Balance SheetÂ â€‹Â Â Â â€‹Â Â Operating leases ROU assetâ€‹$ 7,048â€‹$ 6,669Operating leases liabilityâ€‹$ 7,048â€‹$ 6,669â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Â Â Â Â For the three-month periods endedâ€‹Â Â Â Â SeptemberÂ 30,Â (dollars in thousands)Â Â Â Â 2024Â Â Â Â 2023Consolidated Statement of IncomeÂ â€‹Â Â Â â€‹Â Â Operating lease costs classified as occupancy and equipment expenseâ€‹$ 298â€‹$ 280(includes short-term lease costs)â€‹Â Â Â â€‹Â Â Â â€‹â€‹â€‹â€‹â€‹â€‹â€‹Supplemental disclosures of cash flow informationâ€‹Â Â Â â€‹Â Â Â Cash paid for amounts included in the measurement of lease liabilities:â€‹Â Â Â â€‹Â Â Â Operating cash flows from operating leasesâ€‹$ 206â€‹$ 187ROU assets obtained in exchange for operating lease obligations:â€‹$ â€”â€‹$ 2,445â€‹â€‹At September 30, 2024, future expected lease payments for leases with terms exceeding oneÂ year were as follows:â€‹â€‹â€‹â€‹â€‹(dollars in thousands)Â Â Â Â Â Â â€‹2025â€‹$ 5962026â€‹Â 7202027â€‹Â 7142028â€‹Â 7292029â€‹Â 748Thereafterâ€‹Â 8,298Future lease payments expectedâ€‹$ 11,805â€‹The Company leases facilities it owns or portions of facilities it owns to other third parties. The securities mature in 2034, became redeemable after five years, and bear interest at a floating rate based on SOFR. The securities represent undivided beneficial interests in the trust, which was established by the Company for the purpose of issuing the securities. The Trust Preferred Securities were sold in a private transaction exempt from registration under the Securities Act of 1933, as amended (the â€œActâ€) and have not been registered under the Act. The securities may not be offered or sold in the United States absent registration or an applicable exemption from registration requirements. Southern Missouri Statutory Trust I used the proceeds from the sale of the Trust Preferred Securities to purchase Junior Subordinated Debentures (the â€œDebenturesâ€) of the Company which have terms identical to the Trust Preferred Securities. At September 30, 2024, the Debentures carried an interest rate of 7.95%. The balance of the Debentures outstanding was $7.2 million at both September 30, 2024 and June 30, 2024. Topic 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:Level 1 Quoted prices in active markets for identical assets or liabilitiesLevel 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in active markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilitiesLevel 3 Unobservable inputs supported by little or no market activity that are significant to the fair value of the assets or liabilitiesRecurring Measurements. There have been no significant changes in the valuation techniques during the three months ended September 30, 2024.-36- Table of ContentsAvailable-for-sale Securities. When quoted market prices are available in an active market, securities are classified within Level 1. If quoted market prices are not available, then fair values are estimated using pricing models, or quoted prices of securities with similar characteristics. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bondâ€™s terms and conditions, among other things. Â In certain cases where Level 1 or Level 2 inputs are not available, securities are classified within Level 3 of the hierarchy.Derivative financial instruments. The Companyâ€™s derivative financial instruments consist of interest rate swaps on loans accounted for as fair value hedges. The fair value of interest rate swaps was determined by discounting the expected cash flows of the interest rate swaps. This valuation reflects the contractual terms of the interest rate swaps, including the period to maturity, and uses observable market-based inputs. The inputs used to value the Companyâ€™s interest rate swaps fall within Level 2 of the fair value hierarchy and, as a result, the interest rate swaps were categorized as Level 2 within the fair value hierarchy. There were no transfers between levels of the fair value hierarchy during the period ended September 30, 2024. See information regarding the Companyâ€™s derivative financial agreements in Note 13: Derivative Financial Instruments of these Notes to Consolidated Financial Statements.Mortgage servicing rights. The Company records MSR at fair value on a recurring basis with subsequent remeasurement of MSR based on change in fair value. An estimate of the fair value of the Companyâ€™s MSR is determined by utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. All of the Companyâ€™s MSR are classified as Level 3.Nonrecurring Measurements. Foreclosed and repossessed assets held for sale are valued at the time the loan is foreclosed upon or collateral is repossessed and the asset is transferred to foreclosed or repossessed assets held for sale. The value of the asset is based on third party or internal appraisals, less estimated costs to sell and appropriate discounts, if any. The appraisals are generally discounted based on current and expected market conditions that may impact the sale or value of the asset and managementâ€™s knowledge and experience with similar assets. Such discounts typically may be significant and result in a Level 3 classification of the inputs for determining fair value of these assets. Foreclosed and repossessed assets held for sale are continually evaluated for additional impairment and are adjusted accordingly if impairment is identified.Unobservable (Level 3) Inputs. The unrealized gains and losses, representing the change in fair value of the derivative, are being recorded in interest income in the consolidated statements of income. The ineffective portions of the unrealized gains or losses, if any, are recorded in interest income and interest expense in the consolidated statements of income.The Company executed one interest rate swap, with an original notional amount of $10.0 million, during the first quarter of fiscal 2025, and executed two interest rate swaps, with original notional amounts of $20.0 million each, during the fourth quarter of fiscal 2024, for a total of $50.0 million, designated as fair value hedges, to convert certain long-term fixed rate 1-4 family loans to floating rates to hedge interest rate risk exposure. The portfolio layer method is being used, which allows the Company to designate a stated amount of the assets that are not expected to be affected by prepayments, defaults or other factors that could affect the timing and amount of the cash flow, as the hedged item. Management of the Company must use assumptions and estimates to apply these principles where actual measurement is not possible or practical. Financial Statementsâ€ in the Companyâ€™s 2024 Annual Report on Form 10-K and Note 2 of the Notes to the Consolidated Financial Statements in the form 10-Q. Certain policies are considered critical because they are highly dependent upon subjective or complex judgments, assumptions and estimates. Changes in such estimates may have a significant impact on the financial statements. Management has reviewed the application of these policies with the Audit Committee of the Companyâ€™s Board of Directors. For a discussion of applying critical accounting policies, see â€œCritical Accounting Policies and Estimatesâ€ beginning on page 62 in the Companyâ€™s 2024 Annual Report. â€‹Executive Summary Our results of operations depend primarily on our net interest margin, which is directly impacted by the interest rate environment. The net interest margin represents interest income earned on interest-earning assets (primarily real estate loans, commercial and agricultural loans, and the investment portfolio), less interest expense paid on interest-bearing liabilities (primarily interest-bearing transaction accounts, certificates of deposit, savings and money market deposit accounts, and borrowed funds), as a percentage of average interest-earning assets. Net interest margin is directly impacted by the spread between long-term interest rates and short-term interest rates, as our interest-earning assets, particularly those with initial terms to maturity or repricing greater than one year, generally price off longer term rates while our interest-bearing liabilities generally price off shorter term interest rates. This difference in longer term and shorter term interest rates is often referred to as the steepness of the yield curve. A steep yield curve â€“ in which the difference in interest rates between short term and long term periods is relatively large â€“ could be beneficial to our net interest income, as the interest rate spread between our interest-earning assets and interest-bearing liabilities would be larger. Conversely, a flat or flattening yield curve, in which the difference in rates between short term and long term periods is relatively small or shrinking, or an inverted yield curve, in which short term rates exceed long term rates, could have an adverse impact on our net interest income, as our interest rate spread could decrease.â€‹Our results of operations may also be affected significantly by general and local economic and competitive conditions, particularly those with respect to changes in market interest rates, government policies and actions of regulatory authorities.â€‹During the first three months of fiscal 2025, total assets increased by $124.9 million. The increase was primarily attributable to increases in loans, net of the allowance for credit losses (ACL), and cash equivalents, partially offset by a decrease in available-for-sale (AFS) securities. Loans, net of the ACL, increased $114.8 million; cash equivalents increased $14.4 million; and AFS securities decreased $7.7 million. Liabilities increased $108.0 million, as deposits increased $97.1 million; securities sold under agreements to repurchase increased $5.6 million; and advances from the Federal Home Loan Bank (FHLB) increased $5.0 million. Equity increased $16.9 million, attributable primarily to earnings retained after cash dividends paid and a decrease of $6.9 million in accumulated other comprehensive loss as the market value of the Companyâ€™s investments appreciated due to decreases in market interest rates. For more information, see â€œComparison of Financial Condition at September 30, 2024 and June 30, 2024.â€â€‹Net income for the first three months of fiscal 2025 was $12.5 million, a decrease of $693,000, or 5.3% as compared to the same period of the prior fiscal year. Compared to the year-ago period, the Companyâ€™s decrease in net income was attributable to an increase in noninterest expense and an increase in provision for credit losses (PCL), partially offset by increases in net interest income and noninterest income. Diluted net income was $1.10 per common share for the first three months of fiscal 2025, as compared to $1.16 per common share for the same period of the prior fiscal year. For the first three months of fiscal 2025, as compared to the same period of the prior fiscal year, net interest income increased $1.3 million, or 3.6%; PCL increased $1.3 million, or 139.9%; noninterest income increased $1.3 million, or 22.6%; noninterest expense increased $2.1 million, or 9.0%; and provision for income tax decreased $110,000, or 3.2%. During the first quarter of fiscal 2025, the Company engaged with a consultant to complete a performance improvement project to enhance operations and revenues of the Bank. The one-time cost associated with this review totaled $840,000, -45- Table of Contentsreduced after-tax net income by $652,000, or $0.06 per fully diluted common share, and was a primary reason for the increase in non-interest expense and the decrease in net income during the current period. For more information see â€œResults of Operations.â€â€‹Interest rates during the first three months of fiscal 2025 remained volatile and moved lower at the end of the period. As a result the yield curve remained inverted, with shorter-term obligations yielding more than longer-term obligations. However, the two-year part of the curve compared to the longer end of the curve uninverted, with a small positive slope. The Federal Reserveâ€™s Open Market Committee (FOMC) decreased the federal funds rate in September 2024, and market expectations are for additional reductions over the next year. At September 30, 2024, as compared to June 30, 2024, the yield on two-year treasuries decreased from 4.72% to 3.62%; the yield on five-year treasuries decreased from 4.33% to 3.52%; the yield on ten-year treasuries decreased from 4.34% to 3.74%; and the yield on 30-year treasuries decreased from 4.50% to 4.08%. â€‹As compared to the first three months of the prior fiscal year, our average yield on earning assets increased by 54 basis points, primarily attributable to increases during the period in market interest rates at which earning assets were originated, or renewed, as well as a shift in the earning asset mix to loans receivable from cash and cash equivalents from year-ago levels. Our average cost of interest-bearing liabilities increased by 70 basis points, as the Company increased offering rates on nonmaturity accounts and time deposits to adjust to the higher rate environment. Special deposit rates and brokered CD funding was utilized to fund loan growth as noninterest bearing and lower cost nonmaturity deposits decreased. The impact of the rapid increase in the level of short-term market interest rates over the prior two fiscal years, along with the yield curve inversion, caused our cost of funds to increase at a faster pace than our asset yields over prior periods. However, the September federal funds decrease, relatively stable price competition for deposits, and the increased percentage of our deposits that have already repriced in the current higher rate environment, in combination with new loan originations at higher market rates allowed the net interest margin to increase over the linked June 30, 2024, quarter, as upward pressure on deposit pricing has subsided and loan portfolio yields have continued to increase due to loan renewals and repricing, as well as new loan originations at higher long term rates.â€‹The Companyâ€™s net income is also affected by the level of its noninterest income and noninterest expense. Noninterest income generally consists primarily of deposit account service charges, bank card interchange income, loan-related fees, earnings on bank-owned life insurance, gains on sales of loans, and other general operating income. Noninterest expense consists primarily of compensation and employee benefits, occupancy-related expenses, data processing expense, telecommunications expense, deposit insurance assessments, professional fees, advertising, postage and office expenses, other insurance expenses, the amortization of intangible assets, and other general operating expenses.â€‹The Companyâ€™s noninterest income for the three-month period ended September 30, 2024, was $7.2 million, an increase of $1.3 million, or 22.6%, as compared to the same period of the prior fiscal year. In the current period, the increase was primarily attributable to increases in other loan fees, deposit account charges and related fees, bank card interchange income, and net realized gains on sale of loans. Net realized gains on sale of loans increased due to sales of Small Business Administration loans. These increases were partially offset by lower loan late charges, wealth management fees, and other noninterest income. Other noninterest income decreased primarily due to modest losses on the disposal of fixed assets, which were comprised of various equipment. â€‹Noninterest expense for the three-month period ended September 30, 2024, was $25.8 million, an increase of $2.1 million, or 9.0%, as compared to the same period of the prior fiscal year. In the current quarter, this increase in noninterest expense was attributable primarily to increases in compensation and benefits, legal and professional fees, occupancy and equipment, and advertising expenses. The increase in compensation and benefits expense was primarily due to a trend increase in employee headcount, as well as annual merit increases. Legal and professional expenses increased primarily due to a one-time expense associated with a performance improvement project that started during the first fiscal quarter of 2025, as discussed above. This expense was fully realized in the September quarter, with only modest reimbursables remaining to be recognized in later quarters. Occupancy and equipment expenses increased primarily due to depreciation on recent capitalized expenditures, including buildings, equipment, and signage. Advertising activity in the current quarter increased marketing expenses compared to the same quarter of the prior fiscal year.â€‹-46- Table of ContentsWe expect, over time, to continue to grow our assets through the origination and occasional purchase of loans, and purchases of investment securities. The primary funding for this asset growth is expected to come through deposits from retail and commercial clients, as well as public units. In addition, we will utilize brokered funding and short- and long-term FHLB borrowings. We have grown and intend to continue to grow deposits by offering desirable deposit products for our current customers and by attracting new depository relationships. We will also continue to explore strategic expansion opportunities in market areas that we believe will be attractive to our business model.â€‹â€‹Comparison of Financial Condition at September 30, 2024 and JuneÂ 30, 2024The Company experienced balance sheet growth in the first three months of fiscal 2025, with total assets of $4.7 billion at September 30, 2024, reflecting an increase of $124.9 million, or 2.7%, as compared to June 30, 2024. Growth primarily reflected an increase in net loans receivable and cash equivalents and time deposits. â€‹Cash equivalents were $75.3 million at September 30, 2024, an increase of $14.4 million, or 23.7%, as compared to June 30, 2024. AFS securities were $420.2 million at September 30, 2024, down $7.7 million, or 1.8%, as compared to June 30, 2024, as the Company was less active in reinvesting principal payments received. â€‹Loans, net of the ACL, were $3.9 billion at September 30, 2024, increasing by $114.8 million, or 3.0%, as compared to June 30, 2024. The Company noted growth in both the real estate and commercial portfolios. Real estate loan growth was primarily driven by drawn construction, 1-4 family residential, and owner occupied commercial real estate loan balances. This was somewhat offset by a decrease in loans secured by multi-family real estate. In the commercial portfolio, growth was driven by seasonal agricultural production loan draws and modest growth in commercial and industrial loan balances.â€‹Loans anticipated to fund in the next 90 days totaled $168.0 million at September 30, 2024, as compared to $157.1 million at June 30, 2024, and $158.2 million at September 30, 2023.â€‹Deposits were $4.0 billion at September 30, 2024, an increase of $97.1 million, or 2.5%, as compared to June 30, 2024. The deposit portfolio saw increases in certificates of deposit and savings accounts, as customers remained willing to move balances into high yield savings accounts and special rate time deposits during the higher rate environment. Public unit balances totaled $510.5 million at September 30, 2024, a decrease of $84.1 million compared to June 30, 2024, due to the Company losing the bid to retain a large local public unit depositor, and also experienced expected seasonal decreases in these accounts generally. Brokered deposits totaled $273.2 million at September 30, 2024, an increase of $99.4 million compared to June 30, 2024. The Company increased brokered deposits in the quarter due to more attractive pricing for brokered certificates of deposits relative to local market rates and the need to fund seasonal loan demand. The average loan-to-deposit ratio for the first quarter of fiscal 2025 was 98.5%, as compared to 96.3% for the linked quarter.â€‹FHLB advances were $107.1 million at September 30, 2024, a decrease of $5.0 million, or 4.9%, from June 30, 2024, due to maturing advances which were not renewed. At both September 30 and June 30, 2024, the Company had no FHLB overnight borrowings at period end. â€ƒ â€‹The Companyâ€™s stockholdersâ€™ equity was $505.6 million at September 30, 2024, an increase of $16.9 million, or 3.5%, as compared to June 30, 2024. The increase was attributable primarily to earnings retained after cash dividends paid, in combination with a decrease in accumulated other comprehensive losses (AOCL) as the market value of the Companyâ€™s investments appreciated due to decreases in market interest rates. The AOCL decreased from $17.4 million at June 30, 2024, to $10.6 million at September 30, 2024. The Company does not hold any securities classified as held-to-maturity. â€‹-47- Table of ContentsAverage Balance Sheet, Interest, and Average Yields and Rates for the Three-Month Periods Ended September 30, 2024 and 2023The tables below present certain information regarding our financial condition and net interest income for the three-month periods ended September 30, 2024 and 2023. The tables present the annualized average yield on interest-earning assets and the annualized average cost of interest-bearing liabilities. Net income for the first three months of fiscal 2025 was $12.5 million, a decrease of $693,000 or 5.3%, as compared to the same period of the prior fiscal year. The decrease was due primarily to higher PCL expense, as well as higher noninterest expense. Included in noninterest expense was a one-time expense to complete a performance improvement project to enhance operations and revenues of the Bank. This was partially offset by increases in noninterest income and net interest income.â€‹For the three-month period ended September 30, 2024, basic and fully-diluted net

income per share available to common shareholders was $1.10 under both measures, as compared to $1.16 under both measures for the same period of the prior fiscal year, which represented decreases of $0.06, or 5.2% under both measures. Our annualized return on average assets (ROA) for the three-month period ended September 30, 2024, was 1.07%, as compared to 1.20% for the same period of the prior fiscal year. Our return on average common stockholdersâ€™ equity (ROE) for the three-month period ended September 30, 2024, was 10.0%, as compared to 11.7% for the same period of the prior fiscal year. The one-time cost for the performance improvement review totaled $840,000, reduced after-tax net income by $652,000, or $0.06 per fully diluted common share, and reduced after-tax ROA by six basis points and ROE by 52 basis points.â€‹Net Interest Income. Net interest income for the three-month period ended September 30, 2024, was $36.7 million, an increase of $1.3 million, or 3.6%, as compared to the same period of the prior fiscal year. The increase was attributable to a 5.9% increase in the average balance of interest-earning assets in the current three-month period, as compared to the same period a year ago, partially offset by a seven basis point decrease in net interest margin, from 3.44% to 3.37%, as -49- Table of Contentsthe cost of interest-bearing liabilities increased by 70 basis points, outpacing the 54-basis point increase in the yield earned on interest earning assets.â€‹Loan discount accretion and deposit premium amortization related to the November 2018 acquisition of First Commercial Bank, the May 2020 acquisition of Central Federal Savings & Loan Association, the February 2022 merger of FortuneBank, and the January 2023 acquisition of Citizens Bank & Trust resulted in $975,000 in net interest income for the three-month period ended September 30, 2024, as compared to $1.7 million in net interest income for the same period a year ago. Combined, this component of net interest income contributed nine basis points to net interest margin in the three-month period ended September 30, 2024, as compared to a 16 basis point contribution for the same period of the prior fiscal year, and as compared to a ten basis point contribution in the linked quarter ended June 30, 2024, when net interest margin was 3.25%.â€‹Provision for Credit Losses. The PCL was $2.2 million in the three-month period ended September 30, 2024, as compared to a PCL of $900,000 in the same period of the prior fiscal year. The current period PCL was the result of a $2.0 million provision attributable to the ACL for loan balances outstanding and a $138,000 provision attributable to the allowance for off-balance sheet credit exposures. (See â€œCritical Accounting Policiesâ€, â€œAllowance for Credit Loss Activityâ€ and â€œNonperforming Assetsâ€).â€‹Noninterest Income. Noninterest income for the three-month period ended September 30, 2024, was $7.2 million, an increase of $1.3 million, or 22.6%, as compared to the same period of the prior fiscal year. The increase was primarily attributable to increases in other loan fees, deposit account charges and related fees, bank card interchange income, and net realized gains on sale of loans. Net realized gains on sale of loans increased due to sales of Small Business Administration loans. These increases were partially offset by lower loan late charges, wealth management fees, and other noninterest income. Other noninterest income decreased primarily due to modest losses on the disposal of fixed assets, which were comprised of various equipment.â€‹Noninterest Expense. Noninterest expense for the three-month period ended September 30, 2024, was $25.8 million, an increase of $2.1 million, or 9.0%, as compared to the same period of the prior fiscal year. In the current quarter, this increase was attributable primarily to increases in compensation and benefits, legal and professional fees, occupancy and equipment, and advertising expenses. The increase in compensation and benefits expense was primarily due to a trend increase in employee headcount, as well as annual merit increases. Legal and professional expenses increased primarily due to a one-time expense for a performance improvement project that started during the first fiscal quarter of 2025, as discussed above. This expense was fully realized in the September quarter, with only modest reimbursables remaining to be recognized in later quarters. Occupancy and equipment expenses increased primarily due to depreciation on recent capitalized expenditures, including buildings, equipment, and signage. Advertising activity in the current quarter increased marketing expenses compared to the same quarter of the prior fiscal year.â€‹Income Taxes. The income tax provision for the three-month period ended September 30, 2024, was $3.4 million, a decrease of 3.2%, as compared to the same period of the prior fiscal year, primarily due to the decrease in net income before income taxes. The effective tax rate was 21.3% as compared to 21.0% in the same quarter of the prior fiscal year. â€ƒâ€‹â€‹Allowance for Credit Loss ActivityThe Company regularly reviews its ACL and makes adjustments to its balance based on managementâ€™s estimate of (1) the total expected losses included in the Companyâ€™s financial assets held at amortized cost, which is limited to the Companyâ€™s loan portfolio, and (2) any credit deterioration in the Companyâ€™s available-for-sale securities as of the balance sheet date. The Company does not hold any securities classified as held-to-maturity.â€‹Although the Company maintains its ACL at a level that it considers sufficient to provide for losses, there can be no assurance that future losses will not exceed internal estimates. In addition, the amount of the ACL is subject to review by regulatory agencies, which can order the Company to record additional allowances. The required ACL has been estimated based upon the guidelines in ASC Topic 326, Financial Instruments â€“ Credit Losses.â€‹-50- Table of ContentsThe estimate involves consideration of quantitative and qualitative factors relevant to the loan portfolio as segmented by the Company, and is based on an evaluation, at the reporting date, of historical loss experience, coupled with qualitative adjustments to address current economic conditions and credit quality, and reasonable and supportable forecasts. Specific qualitative factors considered include, but may not be limited to:â€‹â€¢Changes in lending policies and/or loan review systemâ€¢National, regional, and local economic trends and/or conditionsâ€¢Changes and/or trends in the nature, volume, or terms of the loan portfolioâ€¢Experience, ability, and depth of lending management and staffâ€¢Levels and/or trends of delinquent, non-accrual, problem assets, or charge offs and recoveriesâ€¢Concentrations of creditâ€¢Changes in collateral valuesâ€¢Agricultural economic conditionsâ€¢Risks from regulatory, legal, or competitive factorsâ€‹The following table summarizes changes in the ACL over the three-month periods ended September 30, 2024 and 2023: â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹ForÂ theÂ three months ended â€‹â€‹SeptemberÂ 30,Â (dollars in thousands)Â Â Â Â 2024Â Â Â Â 2023Balance, beginning of periodâ€‹$ 52,516â€‹$ 47,820Loans charged off:â€‹Â â€‹â€‹Â â€‹1-4 residential real estateâ€‹Â (48)â€‹Â (35)Non-owner occupied commercial real estateâ€‹Â â€”â€‹Â â€”Owner occupied commercial real estateâ€‹Â â€”â€‹Â â€”Multi-family real estateâ€‹Â â€”â€‹Â (97)Construction and land developmentâ€‹Â â€”â€‹Â (111)Agriculture real estateâ€‹Â â€”â€‹Â â€”Commercial and industrialâ€‹Â (39)â€‹Â (4)Agriculture productionâ€‹Â â€”â€‹Â â€”Consumerâ€‹Â (72)â€‹Â (88)All other loansâ€‹Â â€”â€‹Â â€”Gross charged off loansâ€‹Â (159)â€‹Â (335)Recoveries of loans previously charged off:â€‹Â â€‹â€‹Â â€‹1-4 residential real estateâ€‹Â â€”â€‹Â 33Non-owner occupied commercial real estateâ€‹Â â€”â€‹Â â€”Owner occupied commercial real estateâ€‹Â â€”â€‹Â â€”Multi-family real estateâ€‹Â 47â€‹Â â€”Construction and land developmentâ€‹Â â€”â€‹Â 18Agriculture real estateâ€‹Â â€”â€‹Â â€”Commercial and industrialâ€‹Â 5â€‹Â 3Agriculture productionâ€‹Â â€”â€‹Â â€”Consumerâ€‹Â 7â€‹Â 13All other loansâ€‹Â â€”â€‹Â â€”Gross recoveries of charged off loansâ€‹Â 59â€‹Â 67Net charge offsâ€‹Â (100)â€‹Â (268)Provision charged to expenseâ€‹Â 2,021â€‹Â 1,570Balance, end of periodâ€‹$ 54,437â€‹$ 49,122â€‹Our ACL at September 30, 2024, totaled $54.4 million, representing 1.37% of gross loans and 663% of nonperforming loans, as compared to an ACL of $52.5 million, representing 1.36% of gross loans and 786% of nonperforming loans, at June 30, 2024. The Company has estimated its expected credit losses as of September 30, 2024, under ASC 326-20, and management believes the ACL as of that date was adequate based on that estimate. There remains, however, significant uncertainty as the Federal Reserve has tightened monetary policy to address inflation risks. The PCL was based on the estimated required ACL, reflecting managementâ€™s estimate of the current expected credit losses in the Companyâ€™s loan portfolio at September 30, 2024. Qualitative adjustments in the Companyâ€™s ACL model were slightly decreased compared to June 30, 2024. In addition, Company increased the allowance attributable to classified hotel loans that have been slow to recover from the COVID-19 pandemic. The PCL was also increased due to loan growth in the first quarter of fiscal year 2025 and a slight increase in modeled expected losses due to a modest increase in the unemployment rate -51- Table of Contentsexpectations. As a percentage of average loans outstanding, the Company recorded net charge offs of 0.01% (annualized) during the current period, as compared to 0.03% (annualized) for the same period of the prior fiscal year.â€‹At September 30, 2024, the Bank had accrued within other liabilities an allowance for off-balance sheet credit exposures of $3.4 million, as compared to $3.3 million at June 30, 2024. The increase reflects the component of the PCL attributable to off-balance sheet credit exposures noted above. This amount is maintained as a separate liability account to cover estimated credit losses associated with off-balance sheet credit instruments such as off-balance sheet loan commitments, standby letters of credit, and guarantees. The $138,000 increase in the estimated allowance for off-balance sheet credit exposures was primarily the result of an expected increase in credit utilization based on historical usage of these off-balance sheet credit exposures.â€‹The following table sets forth the sum of the amounts of the ACL attributable to individual loans within each category, or the loan categories in general, and the percentage of the ACL that is attributable to each category, as of the reporting date. Loans that are classified with an adverse internal credit rating or identified as modifications to borrowers experiencing financial difficulty are most commonly considered for individual evaluation. The ACL for individually evaluated loans may be estimated based on the fair value of the underlying collateral, or based on the present value of expected cash flows.â€‹At September 30, 2024, the Company had loans of $40.4 million, or 1.02% of total loans, adversely classified ($40.4 million classified â€œsubstandardâ€; none classified â€œdoubtfulâ€), as compared to loans of $40.9 million, or 1.06% of total loans, adversely classified ($40.9 million classified â€œsubstandardâ€; none classified â€œdoubtfulâ€) at June 30, 2024, and $42.5 million, or 1.15% of total loans, adversely classified ($42.5 million classified â€œsubstandardâ€; none classified â€œdoubtfulâ€) at September 30, 2023. Classified loans were generally comprised of loans secured by commercial and residential real estate, and other commercial purpose collateral. All of these loans were classified due to concerns as to the borrowersâ€™ ability to continue to generate sufficient cash flows to service the debt. Of our classified loans, the Company had ceased recognition of interest on loans with a carrying value of $8.2 million at September 30, 2024. As reported in Note 4 of the Notes to Consolidated Financial Statements, the Companyâ€™s total past due loans increased from $9.2 million at June 30, 2024, to $13.4 million at September 30, 2024. This increase was primarily from loans collateralized by 1-4 family real estate and agricultural real estate. Total past due loans were $28.4 million at September 30, 2023. See Note 4 â€“ â€œLoans and Allowance for Credit Losses â€“ Past Due Loansâ€ in the Notes to Consolidated Financial Statements.-52- Table of ContentsNonperforming AssetsThe ratio of nonperforming assets to total assets and nonperforming loans to net loans receivable is another measure of asset quality. At September 30, 2024, modifications to borrowers experiencing financial difficulty totaled $25.2 million, of which $891,000 was considered nonperforming and included in the nonaccrual loan total above. The remaining $24.3 million in modified loans have complied with the modified terms for a reasonable period of time and are therefore considered by the Company to be accrual status loans. On the basis of guidance under ASU No. 2022-02, in general, these loans were subject to classification as modifications due to payment delays and term extensions given to borrowers experiencing financial difficulty at September 30, 2024. At June 30, 2024, these modifications totaled $25.5 million, of which $895,000 was considered nonperforming and included in the nonaccrual loan total above. The remaining $24.6 million in modifications at June 30, 2024, had complied with the modified terms for a reasonable period of time and were therefore considered by the Company to be accrual status loans.-53- Table of Contentsâ€‹At September 30, 2024, nonperforming assets totaled $12.1 million, as compared to $10.6 million at June 30, 2024, and $10.8 million at September 30, 2023. The change in nonperforming assets was attributable to the increase of $1.5 million in nonperforming loans, of which the largest individual loan was collateralized by a single-family residential property.â€‹â€‹Liquidity ResourcesThe term â€œliquidityâ€ refers to our ability to generate adequate amounts of cash to fund loan originations, loans purchases, deposit withdrawals and operating expenses. Our primary sources of funds include deposit growth, FHLB advances, brokered deposits, amortization and prepayment of loan principal and interest, investment maturities and sales, and funds provided by our operations. While the scheduled loan repayments and maturing investments are relatively predictable, deposit flows, FHLB advance redemptions, and loan and security prepayment rates are significantly influenced by factors outside of the Bankâ€™s control, including interest rates, general and local economic conditions and competition in the marketplace. The Bank relies on FHLB advances and brokered deposits as additional sources for funding cash or liquidity needs.â€‹The Company uses its liquid resources principally to satisfy its ongoing cash requirements, which include funding loan commitments, funding maturing certificates of deposit and deposit withdrawals, maintaining liquidity, funding maturing or called FHLB advances, purchasing investments, and meeting operating expenses.â€‹At September 30, 2024, the Company had outstanding commitments and approvals to extend credit of approximately $902.0 million (including $605.5 million in unused lines of credit) in mortgage and non-mortgage loans. These commitments and approvals are expected to be funded through existing cash balances, cash flow from normal operations and, if needed, advances from the FHLB or the Federal Reserveâ€™s discount window. At September 30, 2024, the Bank had pledged $1.5 billion of its single-family residential, home equity, and commercial real estate loan portfolios to the FHLB for available credit of approximately $870.3 million, of which $107.1 million was advanced, while $479,000 was encumbered by residential real estate loans sold onto the secondary market through the FHLB, and none was utilized as collateral for the issuance of letters of credit to secure public unit deposits. The Bank has the ability to pledge other assets, including, for example, additional unpledged real estate loans held by the Bank or the Bankâ€™s REIT, and the unpledged securities in the Bankâ€™s portfolio, which could provide additional collateral for additional borrowings. In total, FHLB borrowings are generally limited to 45% of bank assets, or approximately $2.0 billion, subject to available collateral. Also, at September 30, 2024, the Bank had pledged a total of $415.0 million in loans secured by farmland and agricultural production loans to the Federal Reserve, providing access to $357.9 million in primary credit borrowings from the Federal Reserveâ€™s discount window, none of which was advanced at September 30, 2024. In addition, the Bank has other assets available to pledge to the Federal Reserve, such as commercial loans, which could provide additional collateral for additional borrowings. Management believes its liquid resources will be sufficient to meet the Companyâ€™s liquidity needs.â€‹Regulatory CapitalThe Company and Bank are subject to various regulatory capital requirements administered by the Federal banking agencies. Failure to meet minimum capital requirements can result in certain mandatory â€“ and possibly additional discretionary â€“ actions by regulators that, if undertaken, could have a direct material effect on the Companyâ€™s financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and Bank must meet specific capital guidelines that involve quantitative measures of the Company and the Bankâ€™s assets, liabilities, and certain off-balance sheet items as calculated under U.S. GAAP, regulatory reporting requirements and regulatory capital standards. The Company and Bankâ€™s capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Furthermore, the Company and Bankâ€™s regulators could

require adjustments to regulatory capital not reflected in the consolidated financial statements.â€‹Quantitative measures established by regulatory capital standards to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the table below) of total capital, Tier 1 capital (as defined), and common equity Tier 1 capital (as defined) to risk-weighted assets (as defined) and of Tier 1 capital (as -54- Table of Contentsdefined) to average total assets (as defined). Additionally, to make distributions or discretionary bonus payments, the Company and Bank must maintain a capital conservation buffer of 2.5% of risk-weighted assets. Management believes, as of September 30, 2024 and June 30, 2024, that the Company and the Bank met all capital adequacy requirements to which they are subject.â€‹In August 2020, the Federal banking agencies adopted a final rule updating a December 2018 rule regarding the impact on regulatory capital of adoption of the CECL standard. The rule allows institutions that adopted the CECL standard in 2020 a five-year transition period to recognize the estimated impact of adoption on regulatory capital. The Company and the Bank elected to exercise the option to recognize the impact of adoption over the five-year period.â€‹As of September 30, 2024, the most recent notification from the Federal banking agencies categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier 1 risk-based, common equity Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the table below. There are no conditions or events since that notification that management believes have changed the Bankâ€™s category.â€‹The tables below summarize the Companyâ€™s and Bankâ€™s actual and required regulatory capital at the dates indicated:

The Company employs various strategies intended to manage the potential effect that changing interest rates may have on future operating results. The primary asset/liability management strategy has been to focus on matching the anticipated repricing intervals of interest-earning assets and interest-bearing liabilities. At times, however, depending on the level of general interest rates, the relationship between long- and short-term interest rates, market conditions and competitive factors, the Company may increase its interest rate risk position in order to maintain its net interest margin.In an effort to manage the interest rate risk resulting from fixed rate lending, the Company has at times utilized longer term (up to 10 year maturities), fixed-rate FHLB advances, which may be subject to early redemption, to offset interest rate risk. Other elements of the Companyâ€™s current asset/liability strategy include: (i) increasing originations of commercial real estate loans, commercial business loans, agricultural real estate loans, and agricultural operating lines, which typically provide higher yields and shorter repricing periods, but inherently increase credit risk, (ii) limiting the price volatility of the investment portfolio by maintaining a relatively short weighted average maturity, (iii) actively soliciting less rate-sensitive nonmaturity deposits, and (iv) offering competitively priced money market accounts and CDs with maturities of up to five years. The degree to which each segment of the strategy is achieved will affect profitability and exposure to interest rate risk.The Company continues to originate long-term, fixed-rate residential loans. During the first three months of fiscal year 2025, fixed rate 1-to 4-family residential loan production totaled $31.1 million (of which $4.6 million was originated for sale into the secondary market), as compared to $36.4 million during the same period of the prior fiscal year (of which $5.6 million was originated for sale into the secondary market). At September 30, 2024, the fixed rate 1-4 family residential loan portfolio was $624.1 million with a weighted average maturity of 172 months, as compared to $599.6 million at September 30, 2023, with a weighted average maturity of 186 months. The Company originated $11.1 million in adjustable-rate 1- to 4-family residential loans during the three-month period ended September 30, 2024, as compared to $20.4 million during the same period of the prior fiscal year. The Company originated $95.2 million in fixed rate commercial and commercial real estate loans during the three-month period ended September 30, 2024, as compared to $60.8 million during the same period of the prior fiscal year. The Company also originated $32.2 million in adjustable rate commercial and commercial real estate loans during the three-month period ended September 30, 2024, as compared to $21.3 million during the same period of the prior fiscal year. At September 30, 2024, adjustable-rate home equity lines of credit increased to $77.4 million, as compared to $67.0 million at September 30, 2023. At September 30, 2024, all fixed rate loans with remaining maturities in excess of 10 years totaled $365.8 million, or 9.4% of net loans receivable, as compared to $370.4 million, or 10.1% of net loans receivable at September 30, 2023. At September 30, 2024, the Companyâ€™s investment portfolio had a weighted-average life of 4.8 years, compared to 5.2 years at September 30, 2023, while the effective duration of the portfolio declined to 2.4% per 100 basis points movement in market rates at September 30, 2024, as compared to 2.7% at September 30, 2023. Management continues to focus on customer retention, customer satisfaction, and offering new products to customers in order to increase the Companyâ€™s amount of less rate-sensitive deposit accounts. -56- Table of ContentsInterest Rate Sensitivity AnalysisThe following table sets forth as of September 30, 2024 and June 30, 2024, managementâ€™s estimates of the projected changes in net portfolio value (NPV) in the event of 100, 200, and 300 basis point (bp) instantaneous, permanent, and parallel increases, and 100, 200, and 300 basis point instantaneous, permanent, and parallel decreases in market interest rates. Further, the computations do not contemplate any actions the Bank may undertake in response to changes in interest rates.â€‹Management cannot predict future interest rates or their effect on the Bankâ€™s NPV in the future. Certain shortcomings are inherent in the method of analysis presented in the computation of NPV. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in differing degrees to changes in market interest rates. Additionally, certain assets, such as adjustable-rate loans, have an initial fixed rate period typically from one to seven years and over the remaining life of the asset changes in the interest rate are restricted. In addition, the proportion of adjustable-rate loans in the Bankâ€™s portfolios could decrease in future periods due to refinancing activity if market interest rates remain steady in the future. Further, in the event of a change in interest rates, prepayment and early withdrawal levels could deviate significantly from those assumed in the table. Finally, the ability of many borrowers to service their adjustable-rate debt may decrease in the event of an interest rate increase.â€‹The Companyâ€™s growth strategy has included origination of fixed-rate loans, as discussed under â€œQuantitative and Qualitative Disclosures About Market Risk,â€ above. Our fixed rate loan portfolio and the behavior of fixed-rate borrowers in a higher interest rate environment, especially over the course of fiscal 2023 and 2024, pressured our NPV. Since June 30, 2024, market interest rates have decreased, positively impacting our underlying NPV, attributable to the impact of lower rates on our longer-term fixed rate loans as of September 30, 2024. The Companyâ€™s sensitivity has also decreased in this period due to an increase in cash balances, a slight decrease in the percentage of total fixed rate loans, and a small reduction in the weighted-average life of the fixed rate loan portfolio. In addition to these on-balance sheet -57- Table of Contentschanges, the Company also increased the notional amount of its pay-fixed/receive-floating interest rate swaps, designed to hedge the residential loan portfolio against the risk of rising interest rates, to $50 million at September 30, 2024, as compared to $40 million in similar interest rate swaps outstanding at June 30, 2024. The Company continues to manage its balance sheet to maximize earnings through interest rate cycles, while maintaining safe and sound risk management practices. Over time, the Company has worked to limit its exposure to rising rates by increasing the share of funding on its balance sheet obtained through lower cost non-maturity transaction accounts and retail time deposits, and by limiting short-term FHLB borrowings.â€‹The Bankâ€™s board of directors is responsible for reviewing the Bankâ€™s asset and liability policies. The Bankâ€™s Asset/Liability Committee meets monthly to review interest rate risk and trends, as well as liquidity and capital ratios and requirements. The Bankâ€™s management is responsible for administering the policies and determinations of the board of directors with respect to the Bankâ€™s asset and liability goals and strategies.â€‹â€‹-58- Table of ContentsPARTÂ I: ItemÂ 4: Â Controls and ProceduresSOUTHERN MISSOURI BANCORP,Â INC.An evaluation of Southern Missouriâ€™s disclosure controls and procedures (as defined in RuleÂ 13a-15(e)Â under the Securities and Exchange Act of 1934, as amended, (the â€œActâ€)) as of September 30, 2024 was carried out under the supervision and with the participation of our Chief Executive Officer, our Chief Administrative Officer, our Chief Financial Officer, and several other members of our senior management. Our Chief Executive Officer, our Chief Administrative Officer, and our Chief Financial Officer concluded that, as of September 30, 2024, the Companyâ€™s disclosure controls and procedures were effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Act is (i)Â accumulated and communicated to management (including our Chief Executive Officer, our Chief Administrative Officer and our Chief Financial Officer) in a timely manner, and (ii)Â recorded, processed, summarized and reported within the time periods specified in the SECâ€™s rulesÂ and forms. There have been no changes in our internal control over financial reporting (as defined in RuleÂ 13a-15(f)Â under the Act) that occurred during the quarter ended September 30, 2024, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.The Company does not expect that its disclosures and procedures will prevent all errors and all fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any control procedure also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.â€‹-59- Table of ContentsPARTÂ II: Other InformationSOUTHERN MISSOURI BANCORP,Â INC.ItemÂ 1: Â Legal ProceedingsIn the opinion of management, the Company is not a party to any pending claims or lawsuits that are expected to have a material effect on the Companyâ€™s financial condition or operations. Operating results for the three-month period ended September 30, 2024, are not necessarily indicative of the results that may be expected for the entire fiscal year. For additional information, refer to the audited consolidated financial statements included in the Companyâ€™s June 30, 2024, Form 10-K, which was filed with the SEC.The accompanying condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.Certain amounts reported in prior periods have been reclassified to conform to the September 30, 2024 presentation. These reclassifications did not materially impact the Companyâ€™s consolidated financial statements.â€‹Correction of an Immaterial Error in Prior Period Financial Statements:â€‹Certain prior period amounts in the Consolidated Balance Sheets, Consolidated Statements of Income and Note 12: Fair Value Measurements have been corrected as discussed below. No other financial statements or notes were impacted by these corrections. â€‹The Company has corrected its Consolidated Balance Sheet at June 30, 2024, the Consolidated Statement of Income for the three-month period ended September 30, 2023, and the Fair Value of Financial Instruments table at June 30, 2024 in Note 12: Fair Value Measurements, within this Quarterly Report on Form 10-Q for an error in classification between deposits and securities sold under agreements to repurchase. â€‹The balance of securities sold under agreements to repurchase is now being presented as a separate line item on the Consolidated Balance Sheet and Fair Value of Financial Instruments table included in the notes to the financial statements. The Company had previously included the agreements with deposits. The interest expense associated with the securities is now being presented as a separate line on the Consolidated Statements of Income. Previously, the Company included this in deposits interest expense.â€‹The Company assessed the materiality of this change in presentation on prior period consolidated financial statements in accordance with SEC Staff Accounting Bulletin No. 99, â€œMateriality,â€ (ASC Topic 250, Accounting Changes and Error Corrections). Based on this assessment, the Company concluded that these error corrections in its Consolidated Balance Sheets, Consolidated Statements of Income, and Notes to the Financial Statements are not material to any previously presented financial statements. The corrections had no impact on the Consolidated Statements of Comprehensive Income, Consolidated Statements of Stockholdersâ€™ Equity, or Consolidated Statement of Cash Flow, for any previously presented interim or annual financial statements. Accordingly, the Company corrected the previously reported immaterial errors for the year ended June 30, 2024 and the three-months ended September 30, 2023 in this Quarterly Report on Form 10-Q.â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Consolidated Balance Sheetâ€‹â€‹June 30, 2024â€‹Â As PreviouslyÂ NetÂ â€‹(dollars in thousands)Â Â Â Â PresentedÂ Â Â Â ChangeÂ Â Â Â As Correctedâ€‹â€‹â€‹â€‹â€‹â€‹â€‹Liabilities and Stockholders' Equity:â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Depositsâ€‹$ 3,952,457â€‹$ (9,398)â€‹$ 3,943,059Securities sold under agreements to repurchaseâ€‹â€‹ -â€‹â€‹ 9,398â€‹â€‹ 9,398â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Consolidated Statement of Incomeâ€‹â€‹For the three-month period ended September 30, 2023â€‹Â As PreviouslyÂ NetÂ â€‹(dollars in thousands)Â Â Â Â PresentedÂ Â Â Â ChangeÂ Â Â Â As Correctedâ€‹â€‹â€‹â€‹â€‹â€‹â€‹Interest expense:â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Depositsâ€‹$ 20,440â€‹$ (72)â€‹$ 20,368Securities sold under agreements to repurchaseâ€‹â€‹ -â€‹â€‹ 72â€‹â€‹ 72â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Fair Value of Financial Instrumentsâ€‹â€‹June 30, 2024â€‹Â As PreviouslyÂ NetÂ â€‹(dollars in thousands)Â Â Â Â PresentedÂ Â Â Â ChangeÂ Â Â Â As Correctedâ€‹â€‹â€‹â€‹â€‹â€‹â€‹Carrying Amount:â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Depositsâ€‹$ 3,952,457â€‹$ (9,398)â€‹$ 3,943,059Securities sold under agreements to repurchaseâ€‹â€‹ -â€‹â€‹ 9,398â€‹â€‹ 9,398â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Significant Other Observable Inputs (Level 2):â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹Securities sold under agreements to repurchaseâ€‹â€‹ -â€‹â€‹ 9,398â€‹â€‹ 9,398â€‹ X - ReferencesNo definition available. + Details Name: smbc_BasisOfPresentationAbstract Namespace Prefix: smbc_ Data Type: xbrli:stringItemType Balance Type: na Period Type: duration X - DefinitionThe entire disclosure for the business description and basis of presentation concepts. Southern Missouri Bancorp,Â Inc., a Missouri corporation (the Company) was organized in 1994 and is the parent company of Southern Bank (the Bank). Substantially all of the Companyâ€™s consolidated revenues are derived from the operations of the Bank, and the Bank represents substantially all of the Companyâ€™s consolidated assets and liabilities. SB Real Estate Investments, LLC is a wholly-owned subsidiary of the Bank formed to hold Southern Bank Real Estate Investments,Â LLC. Southern Bank Real Estate Investments, LLC is a real estate investment trust (REIT) which is controlled by SB Real Estate Investments, LLC, and has other preferred shareholders in order to meet the requirements to be a REIT. At September 30, 2024, assets of the REIT were approximately $1.3 billion, and consisted primarily of real estate loan participations acquired from the Bank.The Bank is primarily engaged in providing a full range of banking and financial services to individuals and corporate customers in its market areas. The Bank and Company are subject to competition from other financial institutions. The Bank and Company are subject to the regulation of certain federal and state agencies and undergo periodic examinations by those regulatory authorities.Basis of Financial Statement Presentation. The condensed consolidated financial statements of the Company have been prepared in conformity with accounting principles generally accepted in the United States of America and general practices within the banking industry. In the normal course of business, the Company encounters two significant types of risk: economic and regulatory. Economic risk is comprised of interest rate risk, credit risk, and market risk. The Company is subject to interest rate risk to the degree that its interest-bearing liabilities reprice on a different basis than its interest-earning assets. Credit risk is the risk of default on the Companyâ€™s investment or loan portfolios resulting from the borrowersâ€™ inability or unwillingness to make contractually required payments. Market risk reflects changes in the value of the investment portfolio, collateral underlying loans receivable, and the value of the Companyâ€™s investments in real estate.Principles of Consolidation. The condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated.Use of Estimates. The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for credit losses.Cash and Cash Equivalents. For purposes of reporting cash flows, cash and cash equivalents includes cash, due from depository institutions and interest-bearing deposits in other depository institutions with original maturities of threeÂ months or less. Interest-bearing deposits in other depository institutions were $20.4 million and $7.7 million at September 30, 2024 and JuneÂ 30, 2024, respectively. The deposits are held in various commercial banks with a total of $1.8 million and $2.3 million exceeding the FDICâ€™s deposit insurance limits at September 30, 2024 and JuneÂ 30, 2024, respectively, as well as at the Federal Reserve and the Federal Home Loan Banks of Des Moines and Chicago.Interest-bearing Time Deposits. Interest bearing time deposits in banks mature within three years and are carried at cost.Available for Sale Securities. Available for sale securities (AFS), which include any security for which the Company has no immediate plan to sell but which may be sold in the future, are carried at fair value. Unrealized gains and losses, net of tax, are reported in accumulated other comprehensive loss, a component of stockholdersâ€™ equity. All securities have been classified as available for sale.Premiums and discounts on debt securities are amortized or accreted as adjustments to income over the estimated life of the security using the level yield method. Realized gains or losses on the sale of securities is based on the specific identification method. The fair value of securities is based on quoted market prices or dealer quotes. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.The Company does not invest in collateralized mortgage obligations that are considered high risk.For AFS securities with fair value less than amortized cost that management has no intent to sell and believes that it more likely than not will not be required to sell prior to recovery, only the credit loss component of the impairment is recognized in earnings, while the noncredit loss is recognized in accumulated other comprehensive loss. The credit loss component recognized in earnings is identified as the amount of principal cash flows not expected to be received over the remaining term of the security as projected based on cash flow projections, and is recorded to the Allowance for Credit Losses (â€œACLâ€), by a charge to provision for credit losses. Accrued interest receivable is excluded from the estimate of credit losses. Both the ACL and the adjustment to net income may be reversed if conditions change. However, if the Company intends to sell an impaired AFS security, or, if it is more likely than not the Company will be required to sell such a security before recovering its amortized cost basis, the entire impairment amount would be recognized in earnings with a corresponding adjustment to the securityâ€™s amortized cost basis. Because the securityâ€™s amortized cost basis is adjusted to fair value, there is no ACL in this situation.The Company evaluates impaired AFS securities at the individual level on a quarterly basis, and considers factors including, but not limited to: the extent to which the fair value of the security is less than the amortized cost basis; adverse conditions specifically related to the security, an industry, or geographic area; the payment structure of the security and likelihood of the issuer to be able to make payments that may increase in the future; failure of the issuer to make scheduled interest or principal payments; any changes to the rating of the security by a rating agency; and the ability and intent to hold the security until maturity. A qualitative determination as to whether any portion of the impairment is attributable to credit risk is acceptable. There were no credit-related factors underlying unrealized losses on AFS securities at September 30, 2024, or JuneÂ 30, 2024.Changes in the ACL are recorded as expense. Losses are charged against the ACL when management believes the uncollectability of an AFS debt security is confirmed or when either of the criteria regarding intent or requirement to sell is met.Federal Reserve Bank and Federal Home Loan Bank Stock. The Bank is a member of the Federal Reserve and the Federal Home Loan Bank (FHLB) systems. Capital stock of the Federal Reserve and the FHLB is a required investment of the Bank based upon a predetermined formula and is carried at cost.Loans. Loans are generally stated at unpaid principal balances, less the ACL, any net deferred loan origination fees, and unamortized premiums or discounts on purchased loans.Interest on loans is accrued based upon the principal amount outstanding. The accrual of interest on loans is discontinued when, in managementâ€™s judgment, the collectability of interest or principal in the normal course of business is doubtful. The Company complies with regulatory guidance which indicates that loans should be placed in nonaccrual status when 90Â days past due, unless the loan is both well-secured and in the process of collection. A loan that is â€œin the process of collectionâ€ may be subject to legal action or, in appropriate circumstances, through other collection efforts reasonably expected to result in repayment or restoration to current status in the near future. A loan is considered delinquent when a payment has not been made by the contractual due date. Interest income previously accrued but not collected at the date a loan is placed on nonaccrual status is reversed against interest income. Cash receipts on a nonaccrual loan are applied to principal and interest in accordance with its contractual terms unless full payment of principal is not expected, in which case cash receipts, whether designated as principal or interest, are applied as a reduction of the carrying value of the loan. A nonaccrual loan is generally returned to accrual status when principal and interest payments are current, full collectability of principal and interest is reasonably assured, and a consistent record of performance has been demonstrated.The ACL is a valuation account that is deducted from the loansâ€™ amortized cost basis to present the net amount expected to be collected on the loans, and is established through a provision for credit losses (PCL) charged to current earnings. The ACL is increased by the provision for credit losses on loans charged to expense and reduced by loans charged off, net of recoveries. Loans are charged off in the period deemed uncollectible, based on managementâ€™s analysis of expected cash flows (for non-collateral dependent loans) or collateral value (for collateral-dependent loans). Subsequent recoveries of loans previously charged off, if any, are credited to the allowance when received.Management estimates the ACL using relevant available information, from internal and external sources, relating to past events, current conditions, and reasonable and supportable forecasts. Adjustments may be made to historical loss information for differences identified in current loan-specific risk characteristics, such as differences in underwriting standards or terms; lending review systems; experience, ability, or depth of lending management and staff; portfolio growth and mix; delinquency levels and trends; as well as for changes in environmental conditions, such as changes in economic activity or employment, agricultural economic conditions, property values, or other relevant factors. The Company generally incorporates a reasonable and supportable forecast period of four quarters, and a four-quarter, straight-line reversion period to return to long-term historical averages.The ACL is measured on a collective (pool) basis when similar risk characteristics exist. For loans that do not share general risk characteristics with the collectively evaluated pools, the Company estimates credit losses on an individual loan basis, and these loans are excluded from the collectively evaluated pools. An ACL for an individually evaluated loan is recorded when the amortized cost basis of the loan exceeds the discounted estimated cash flows using the loanâ€™s initial effective interest rate or the fair value, less estimated costs to sell, of the collateral for certain collateral dependent loans. For the collectively evaluated pools, the Company segments the loan portfolio primarily by loan purpose and collateral into 24 pools, which are homogeneous groups of loans that possess similar loss potential characteristics. The Company primarily utilizes the discounted cash flow (DCF) methodology for measurement of the required ACL.Â For a limited number of pools with a relatively small balance of unpaid principal, the Company utilizes the remaining life method. The DCF model implements probability of default (PD) and loss given default (LGD) calculations at the instrument level. PD and LGD are determined based on statistical analysis and correlation of historical losses with various economic factors over time. In general, the Companyâ€™s losses have not correlated well with economic factors, and the Company has utilized peer data where more appropriate. The Company defines a default to include an event of charge off, an adverse (substandard or worse) internal credit rating, becoming delinquent 90Â days or more, or being placed on nonaccrual status. A PD/LGD estimate is applied to a projected model of the loanâ€™s cashflow, including principal and interest payments, with consideration for prepayment speeds, principal curtailments, and recovery lag. Loans acquired in a business combination that have experienced more-than-insignificant deterioration in credit quality since origination are considered purchased credit deteriorated (PCD) loans. At the acquisition date, an estimate of expected credit losses is made for groups of PCD loans with similar risk characteristics and individual PCD loans without similar risk characteristics. This initial ACL is allocated to individual PCD loans and added to the purchase price or acquisition date fair values to establish the initial amortized cost basis of the PCD loans. As the initial ACL is added to the purchase price, there is no credit loss expense recognized upon acquisition of a PCD loan. Any difference between the unpaid principal balance of PCD loans and the amortized cost basis is considered to relate to non-credit

factors and results in a discount or premium. Discounts and premiums are recognized through interest income on a level-yield method over the life of the loans.Loan fees and certain direct loan origination costs are deferred, and the net fee or cost is recognized as an adjustment to interest income using the interest method over the contractual life of the loans.Off-Balance Sheet Credit Exposures. Off-balance sheet credit instruments include commitments to make loans, and commercial letters of credit, issued to meet customer financing needs. The Companyâ€™s exposure to credit loss in the event of non-performance by the other party to the financial instrument for off-balance sheet loan commitments is represented by the contractual amount of those instruments. Such financial instruments are recorded when they are funded. The ACL on off-balance sheet credit exposures is estimated by loan pool on a quarterly basis under the current CECL model using the same methodologies as portfolio loans, taking into consideration the likelihood that funding will occur and is included in other liabilities on the Companyâ€™s consolidated balance sheets. The Company records an ACL on off-balance sheet credit exposures, unless the commitments to extend credit are unconditionally cancelable. Foreclosed Real Estate. Real estate acquired by foreclosure or by deed in lieu of foreclosure is initially recorded at fair value less estimated selling costs, establishing a new cost basis. Any costs for development and improvement of the property that are warranted are capitalized.Valuations are periodically performed by management, and an allowance for losses is established by a charge to operations if the carrying value of a property exceeds its estimated fair value, less estimated selling costs.Loans to facilitate the sale of real estate acquired in foreclosure are discounted if made at less than market rates. Discounts are amortized over the fixed interest period of each loan using the interest method.Premises and Equipment. Premises and equipment are stated at cost less accumulated depreciation and include expenditures for major betterments and renewals. Maintenance, repairs, and minor renewals are expensed as incurred. When property is retired or sold, the retired asset and related accumulated depreciation are removed from the accounts and the resulting gain or loss taken into income. The Company reviews property and equipment for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If such assets are considered to be impaired, the impairment loss recognized is measured by the amount by which the carrying amount exceeds the fair value of the assets.Depreciation is computed by use of straight-line and accelerated methods over the estimated useful lives of the assets. Estimated lives are generally seven to forty years for premises, three to seven years for equipment, and three years for software.Bank Owned Life Insurance. Bank owned life insurance policies are reflected in the condensed consolidated balance sheets at the estimated cash surrender value. Changes in the cash surrender value of these policies, as well as a portion of the insurance proceeds received, are recorded in noninterest income in the condensed consolidated statements of income.Goodwill. The Companyâ€™s goodwill is evaluated annually for impairment or more frequently if impairment indicators are present. A qualitative assessment is performed to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value is less than the carrying amount, including goodwill. If, based on the evaluation, it is determined to be more likely than not that the fair value is less than the carrying value, then goodwill is tested further for impairment. If the implied fair value of goodwill is lower than its carrying amount, a goodwill impairment is indicated and goodwill is written down to its implied fair value. Subsequent increases in goodwill value are not recognized in the financial statements. As of JuneÂ 30, 2024, the date of the Companyâ€™s annual test, there was no impairment indicated, based on a qualitative assessment of goodwill, which considered: the market value of the Companyâ€™s common stock; concentrations of credit; profitability; nonperforming assets; capital levels; and results of recent regulatory examinations. There was no impairment of goodwill at September 30, 2024.Intangible Assets. The Companyâ€™s intangible assets at September 30, 2024 included gross core deposit intangibles of $39.1 million with $18.9 million accumulated amortization, gross other identifiable intangibles of $6.4 million with accumulated amortization of $4.3 million, and mortgage and SBA servicing rights of $3.0 million. At JuneÂ 30, 2024, the Companyâ€™s intangible assets included gross core deposit intangibles of $39.1 million with $17.8 million accumulated amortization, gross other identifiable intangibles of $6.4 million with accumulated amortization of $4.2 million, and mortgage and SBA servicing rights of $3.0 million. The Companyâ€™s core deposit and other intangible assets are being amortized using the straight line method, in accordance with ASC 350, over periods ranging from five to tenÂ years, with amortization expense expected to be approximately $2.6 million in the remainder of fiscal 2025, $3.0 million in fiscal 2026, $2.7 million in fiscal 2027, $2.7 million in fiscal 2028, $2.6 million in fiscal 2029, and $8.8 million thereafter. As of September 30, 2024 and JuneÂ 30, 2024, there was no impairment of other intangible assets indicated.The Company records mortgage servicing rights (MSR) at fair value for all mortgage loans sold on a servicing retained basis with subsequent adjustments to fair value of MSR in accordance with FASB ASC 860. An estimate of the fair value of the Companyâ€™s MSR is determined utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. Changes in the fair value of MSR are recorded in loan servicing fees in the consolidated statements of income.Income Taxes. The Company accounts for income taxes in accordance with income tax accounting guidance (ASC 740, Income Taxes). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. The Company determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur.Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50Â percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50Â percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances, and information available at the reporting date and is subject to managementâ€™s judgment. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized.The Company recognizes interest and penalties, if any, on income taxes as a component of income tax expense.The Company files consolidated income tax returns with its subsidiaries, the Bank and SB Real Estate Investments, LLC, with a tax year ended June 30. Southern Bank Real Estate Investments, LLC files a separate REIT return for federal tax purposes, and also files state income tax returns, with a tax year ended December 31.Derivative Financial Instruments and Hedging Activities. The Company enters into derivative financial instruments, primarily interest rate swaps, to manage interest rate risk, facilitate asset/liability management strategies and manage other exposures. Derivative instruments are accounted pursuant to ASC Topic 815, â€œDerivatives and Hedgingâ€, which requires companies to recognize derivative instruments as either assets or liabilities in the consolidated balance sheet. All derivative financial instruments are recognized as other assets or other liabilities, as applicable, at estimated fair value. The change in each of these financial statement line items is included as operating cash flows in the accompanying consolidated statements of cash flows. The Company does not speculate using derivative instruments. Derivative financial instruments are more fully described in Note 13.Incentive Plans. The Company accounts for its Equity Incentive Plan (EIP), and Omnibus Incentive Plan (OIP) in accordance with ASC 718, â€œShare-Based Payment.â€ Compensation expense is based on the market price of the Companyâ€™s stock on the date the shares are granted and is recorded over the vesting period. The difference between the grant-date fair value and the fair value on the date the shares are considered earned represents a tax benefit to the Company that is recorded as an adjustment to income tax expense. Non-Employee Directorsâ€™ Retirement. The Bank entered into directorsâ€™ retirement agreements beginning in AprilÂ 1994 for non-employee directors and continued to do so for new non-employee directors joining the Bankâ€™s board through December 2014. These directorsâ€™ retirement agreements provide that each participating non-employee director (participant) shall receive, upon termination of service on the Board on or after age 60, other than termination for cause, a benefit in equal annual installments over a five year period. The benefit will be based upon the product of the participantâ€™s vestingÂ percentage and the total Board fees paid to the participant during the calendarÂ year preceding termination of service on the Board. The vestingÂ percentage shall be determined based upon the participantâ€™sÂ years of service on the Board.In the event that the participant dies before collecting any or all of the benefits, the Bank shall pay the participantâ€™s beneficiary. Benefits shall not be payable to anyone other than the beneficiary, and shall terminate on the death of the beneficiary.Stock Options. Compensation cost is measured based on the grant-date fair value of the equity instruments issued, and recognized over the vesting period during which an employee provides service in exchange for the award.Earnings Per Share. Basic earnings per share available to common stockholders is computed using the weighted-average number of common shares outstanding. Diluted earnings per share available to common stockholders includes the effect of all weighted-average dilutive potential common shares (stock options and restricted stock grants) outstanding during each period.Comprehensive Income. Comprehensive income consists of net income and other comprehensive income (loss), net of applicable income taxes. Other comprehensive income (loss) includes unrealized depreciation on available-for-sale securities, unrealized depreciation on available-for-sale securities for which a portion of an other-than-temporary impairment has been recognized in income, and changes in the funded status of defined benefit pension plans.Transfers Between Fair Value Hierarchy Levels. Transfers in and out of Level 1 (quoted market prices), Level 2 (other significant observable inputs) and Level 3 (significant unobservable inputs) are recognized on the period ending date.Wealth Management Assets and Fees. Assets managed in fiduciary or investment management accounts by the Company are not included in the consolidated balance sheets since such items are not assets of the Company or its subsidiaries. Fees from fiduciary or investment management activities are recorded on a cash basis over the period in which the service is provided. Fees are generally a function of the market value of assets managed and administered, the volume of transactions, and fees for other services rendered, as set forth in the agreement between the customer and the Company. This revenue recognition involves the use of estimates and assumptions, including components that are calculated based on asset valuations and transaction volumes. Any out-of-pocket expenses or services not typically covered by the fee schedule for fiduciary activities are charged directly to the account on a gross basis as revenue is incurred. The Southern Wealth Management division, which is a division of the Bank, held fiduciary assets totaling $113.1 million and $100.9 million as of September 30, 2024 and June 30, 2024, respectively, and investment management assets totaling $516.9 million and $474.7 million as of September 30, 2024 and June 30, 2024, respectively. New Accounting Pronouncements:In January 2021, the FASB published ASU 2021-01, â€œReference Rate Reform. (Topic 848)â€. ASU 2021-01 clarified that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The ASU also amended the expedients and exceptions in Topic 848 to capture the incremental consequences of the scope clarification and to tailor the existing guidance to derivative instruments affected by the discounting transition. An entity may elect to apply the amendments in this update on a full retrospective basis as of any date from the beginning of an interim period that includes or is subsequent to March 12, 2020, or on a prospective basis to new modifications from any date within an interim period that includes or is subsequent to the date of the issuance of a final update, up to the date that financial statements are available to be issued. If an entity elects to apply any of the amendments in this update for an eligible hedging relationship, any adjustments as a result of those elections must be reflected as of the date the entity applies the election. Originally, the amendments in this update did not apply to contract modifications made after December 31, 2022, new hedging relationships entered into after December 31, 2022, and existing hedging relationships evaluated for effectiveness in periods after December 31, 2022 except for hedging relationships existing as of December 31, 2022, that apply certain optional expedients in which the accounting effects are recorded through the end of the hedging relationship (including periods after December 31, 2022). With the issuance of ASU 2022-06 Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848, the sunset date for adoption of ASU 2021-01 was extended from December 31, 2022 to December 31, 2024. The Company is evaluating the impact of this ASU but does not expect it to have a material impact on the Companyâ€™s consolidated financial statements. â€‹In November 2023, the FASB issued ASU 2023-07, â€œSegment Reporting (Topic 280): Improvements to Reportable Segment Disclosures.â€ The amendments in this update improve financial reporting by requiring disclosure of incremental segment information on an annual and interim basis for all public entities to enable investors to develop more decision-useful financial analyses. The amendments in this update do not change how a public entity identifies its operating segments, aggregates those operating segments, or applies the quantitative thresholds to determine its reportable segments. The amendments of this ASU are effective for fiscal years beginning after December 15, 2023 and interim periods within fiscal years beginning after December 15, 2024. Adoption of this ASU is not expected to have a material impact on Companyâ€™s consolidated financial statements.â€‹On December 14, 2023, the FASB published ASU 2023-02, â€œInvestments - Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method.â€ This ASU permits reporting entities to elect to account for tax equity investments, regardless of the tax credit program for which the income tax credits are received, using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the income tax credits and other income tax benefits received and recognizes the net amortization and income tax credits and other income tax benefits in the income statement as a component of income tax expense. A reporting entity makes an accounting policy election to apply the proportional amortization method on a tax-credit-program-by-tax-credit-program basis rather than electing to apply the proportional amortization method at the reporting entity level or to individual investments. This ASU also requires specific disclosures of investments that generate income tax credits and other income tax benefits from a tax credit program for which the entity has elected to apply the proportional amortization method. The ASU was effective for fiscal years beginning after December 15, 2023, and was effective for the Company beginning July 1, 2024. The adoption of ASU 2023-02 did not have a material impact on the Companyâ€™s consolidated financial statements.â€‹In December 2023, the FASB issued ASU 2023-09, â€œIncome Taxes - Improvements to Income Tax Disclosures (Topic 740)â€. ASU 2023-09 was issued to address requests by investors and creditors for enhanced transparency and decision usefulness of income tax disclosures. Public business entities (PBEs) would be required to prepare an annual detailed, tabular tax rate reconciliation. All other entities would be required to provide qualitative disclosure on specific categories and individual jurisdictions that result in significant differences between the statutory and effective tax rates. All entities would be required to annually disclose taxes paid disaggregated by federal, state, and foreign taxes, as well as disaggregating taxes by individual jurisdiction if taxes paid exceed 5% of total income taxes paid. The ASU is effective for PBEs for fiscal years beginning after December 15, 2024. The Company does not expect adoption of ASU 2023-09 to have a material impact on its consolidated financial statements.â€‹In November 2024, the FASB issued ASU 2024-03, â€œIncome Statementâ€”Reporting Comprehensive Incomeâ€”Expense Disaggregation Disclosures (Subtopic 220-40)â€. ASU 2024-03 was issued to improve the disclosures about a public business entityâ€™s expenses and address requests from investors for more detailed information about the types of expenses (including purchases of inventory, employee compensation, depreciation, amortization, and depletion) in commonly presented expense captions (such as cost of sales, SG&A, and research and development). The ASU is effective for PBEs for fiscal years beginning after December 15, 2026. The Company does not expect adoption of ASU 2024-03 to have a material impact on its consolidated financial statements.â€‹ X - ReferencesNo definition available. + Details Name: smbc_OrganizationAndSummaryOfSignificantAccountingPoliciesAbstract Namespace Prefix: smbc_ Data Type: xbrli:stringItemType Balance Type: na Period Type: duration X - DefinitionThe entire disclosure for the organization, consolidation and basis of presentation of financial statements disclosure, and significant accounting policies of the reporting entity. following:â€‹â€‹â€‹

substantially all agriculture production and agriculture real estate lending to borrowers headquartered in the Companyâ€™s primary lending area. Specific underwriting standards have been established for agricultural-related loans including the establishment of projections for each operating year based on industry developed estimates of farm input costs and expected commodity yields and prices. Agriculture production operating lines are typically written for one year and secured by the crop. Agricultural real estate terms offered usually have amortization schedules of up to 25 years with an 80% loan-to-value ratio, or 30 years with a 75% loan-to-value ratio. Risks to agricultural lending include unique factors such as commodity prices, yields, input costs, and weather, as well as farmland and farm equipment values. â€‹Commercial and Industrial Lending. The Companyâ€™s commercial and industrial lending activities encompass loans with a variety of purposes and security, including loans to finance accounts receivable, inventory, equipment and operating lines of credit. The Company offers both fixed and adjustable rate commercial and industrial loans. Generally, commercial loans secured by fixed assets are amortized over periods up to five years. Commercial and industrial lending risk is primarily driven by the borrowerâ€™s successful generation of cash flow from their business enterprise sufficient to service debt, and may be influenced by factors specific to the borrower and industry, or by general economic conditions in the region or in the United States generally. Consumer Lending. The Company offers a variety of secured consumer loans, including home equity, direct and indirect automobile loans, second mortgages, recreational vehicle loans and loans secured by deposits. The Company originates substantially all of its consumer loans in its primary lending area. Usually, consumer loans are originated with fixed rates for terms of up to 66 months, with the exception of home equity lines of credit, which are variable, tied to the prime rate of interest and are for a period of ten years.Automobile loans originated by the Company include both direct loans and a smaller amount of loans originated by auto dealers. Typically, automobile loans are made for terms of up to 66 months for new and used vehicles. Loans secured by automobiles have fixed rates and are generally made in amounts up to 100% of the purchase price of the vehicle. Risks to automobile and other consumer lending generally include the stability of borrower income and borrower willingness to repay.Allowance for Credit Losses. The PCL for the three-month period ended September 30, 2024, was $2.2 million compared to $900,000 in the same period of the prior fiscal year. The current period PCL was the result of a $2.0 million provision attributable to the ACL for loan balances outstanding, and a $138,000 provision attributable to the allowance for off-balance sheet credit exposures. The Company has estimated its expected credit losses as of September 30, 2024, under ASC 326-20, and management believes the ACL as of that date was adequate based on that estimate. There remains, however, significant uncertainty as the Federal Reserve has tightened monetary policy to address inflation risks. Qualitative adjustments in the Companyâ€™s ACL model were slightly decreased compared to June 30, 2024. The Company increased the allowance attributable to classified hotel loans that have been slow to recover from the COVID-19 pandemic. Additionally, PCL was required due to loan growth in the first quarter of fiscal year 2025 and a slight increase in modeled expected losses due to a modest increase in the unemployment rate expectations. As a percentage of average loans outstanding, the Company recorded net charge offs of 0.01% (annualized) during the current period, as compared to 0.03% for the same period of the prior fiscal year. Specifically, management considered the following primary qualitative items in its estimate of the ACL: â€‹â—Â Â economic conditions and projections as provided by the Federal Open Market Committee (FOMC) were utilized in the Companyâ€™s estimate at September 30, 2024. Economic factors considered in the projections included national levels of unemployment using the high bound of the FOMCâ€™s central tendency, and national rates of inflation-adjusted growth in the gross domestic product using the low bound of the FOMCâ€™s central tendency. Economic conditions are considered to be a moderate and stable risk factor, relative to June 30, 2024;â€‹â— the pace of growth of the Companyâ€™s loan portfolio, exclusive of acquisitions, relative to overall economic growth. This measure is considered to be a moderate and slightly decreasing risk factor, relative to June 30, 2024;â€‹â— levels and trends for loan delinquencies nationally and in the region. This is considered to be a low and stable risk factor, relative to June 30, 2024;â€‹â— quantified supported model adjustments and general imprecision adjustments. This factor was added for the June 30, 2024, ACL estimate as certain model adjustments capture highly specific issues or events that are not adequately captured in model outcomes. General imprecision adjustments address other sources of imprecision that are not specifically identifiable or quantifiable to a particular loan portfolio and have not been captured by the model or by a specific model adjustment. The Company considers general imprecision in three dimensions; economic forecast imprecision, model imprecision, and process imprecision. â€‹PCD Loans. In connection with the acquisition of Citizens Bancshares Co. (Citizens) on January 20, 2023, and Fortune Financial Corporation (Fortune) on February 25, 2022, the Company acquired loans both with and without evidence of credit quality deterioration since origination. Acquired loans are recorded at their fair value at the time of acquisition with no carryover from the acquired institutionâ€™s previously recorded allowance for loan and lease losses. Acquired loans are accounted for under ASC 326, Financial Instruments â€“ Credit Losses. â€‹The fair value of acquired loans recorded at the time of acquisition is based upon several factors, including the timing and payment of expected cash flows, as adjusted for estimated credit losses and prepayments, and then discounting these cash flows using comparable market rates. The resulting fair value adjustment is recorded in the form of a premium or discount to the unpaid principal balance of the respective loans. As it relates to acquired loans that, as of the date of acquisition, have experienced a more-than-insignificant deterioration in credit quality since origination, the net premium or net discount is adjusted to reflect the Companyâ€™s allowance for credit losses recorded for PCD loans at the time of acquisition, and the remaining fair value adjustment is accreted or amortized into interest income over the remaining life of the respective loans. As it relates to loans not classified as PCD (non-PCD) loans, the credit loss and yield components of their fair value adjustment are aggregated, and the resulting net premium or net discount is accreted or amortized into interest income over the remaining life of the respective loans. The Company records an ACL for non-PCD loans at the time of acquisition through provision expense, and therefore, no further adjustments are made to the net premium or net discount for non-PCD loans.â€‹Loans that the Company acquired from Citizens and Fortune, that at the time of acquisition had more-than-insignificant deterioration of credit quality since origination, are classified as PCD loans and presented in the tables below at acquisition carrying value: â€‹â€‹â€‹â€‹â€‹(dollars in thousands)Â Â Â Â January 20, 2023PCD Loans â€“ Citizensâ€‹â€‹â€‹Purchase price of PCD loans at acquisitionâ€‹$ 27,481Allowance for credit losses at acquisitionâ€‹Â (1,121)Fair value of PCD loans at acquisitionâ€‹$ 26,360â€‹â€‹â€‹â€‹â€‹â€‹(dollars in thousands)Â Â Â Â February 25, 2022PCD Loans â€“ Fortune â€‹â€‹â€‹Purchase price of PCD loans at acquisitionâ€‹$ 15,055Allowance for credit losses at acquisitionâ€‹Â (120)Fair value of PCD loans at acquisitionâ€‹$ 14,935â€‹â€‹The following tables present the balance in the ACL based on portfolio segment as of September 30, 2024 and 2023, and activity in the ACL for the three-month periods ended September 30, 2024 and 2023: â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹At period end and for the three months ended SeptemberÂ 30,Â 2024â€‹Â BalanceÂ Provisionâ€‹â€‹Â â€‹â€‹â€‹Balanceâ€‹â€‹beginningâ€‹(benefit) chargedâ€‹Lossesâ€‹â€‹â€‹â€‹end(dollars in thousands)Â Â Â Â of periodÂ Â Â Â to expenseÂ Â Â Â charged offÂ Â Â Â RecoveriesÂ Â Â Â of periodAllowance for credit losses on loans:â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹1-4 residential real estateâ€‹$ 10,528â€‹$ 157â€‹$ (48)â€‹$ â€”â€‹$ 10,637Non-owner occupied commercial real estateâ€‹â€‹ 19,055â€‹â€‹ 1,673â€‹â€‹ â€”â€‹â€‹ â€”â€‹â€‹ 20,728Owner occupied commercial real estateâ€‹â€‹ 4,815â€‹â€‹ (1)â€‹â€‹ â€”â€‹â€‹ â€”â€‹â€‹ 4,814Multi-family real estateâ€‹â€‹ 5,447â€‹â€‹ (376)â€‹â€‹ â€”â€‹â€‹ 47â€‹â€‹ 5,118Construction and land developmentâ€‹â€‹ 2,901â€‹â€‹ 774â€‹â€‹ â€”â€‹â€‹ â€”â€‹â€‹ 3,675Agriculture real estateâ€‹â€‹ 2,107â€‹â€‹ (80)â€‹â€‹ â€”â€‹â€‹ â€”â€‹â€‹ 2,027Commercial and industrialâ€‹â€‹ 6,233â€‹â€‹ (85)â€‹â€‹ (39)â€‹â€‹ 5â€‹â€‹ 6,114Agriculture productionâ€‹â€‹ 835â€‹â€‹ (51)â€‹â€‹ â€”â€‹â€‹ â€”â€‹â€‹ 784Consumerâ€‹â€‹ 578â€‹â€‹ 13â€‹â€‹ (72)â€‹â€‹ 7â€‹â€‹ 526All other loansâ€‹â€‹ 17â€‹â€‹ (3)â€‹â€‹ â€”â€‹â€‹ â€”â€‹â€‹ 14Totalâ€‹$ 52,516â€‹$ 2,021â€‹$ (159)â€‹$ 59â€‹$ 54,437â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹At period end and for the three months ended SeptemberÂ 30,Â 2023â€‹Â BalanceÂ Provisionâ€‹â€‹Â â€‹â€‹â€‹Balanceâ€‹â€‹beginningâ€‹(benefit) chargedâ€‹Lossesâ€‹â€‹â€‹â€‹end(dollars in thousands)Â Â Â Â of periodÂ Â Â Â to expenseÂ Â Â Â charged offÂ Â Â Â RecoveriesÂ Â Â Â of periodAllowance for credit losses on loans:â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹â€‹1-4 residential real estateâ€‹$ 9,474â€‹$ (101)â€‹$ (35)â€‹$ 33â€‹$ 9,371Non-owner occupied commercial real estateâ€‹â€‹ 13,863â€‹â€‹ 2,641â€‹â€‹ â€”â€‹â€‹ â€”â€‹â€‹ 16,504Owner occupied commercial real estateâ€‹â€‹ 5,168â€‹â€‹ (289)â€‹â€‹ â€”â€‹â€‹ â€”â€‹â€‹ 4,879Multi-family real estateâ€‹â€‹ 6,806â€‹â€‹ (612)â€‹â€‹ (97)â€‹â€‹ â€”â€‹â€‹ 6,097Construction and land developmentâ€‹â€‹ 3,414â€‹â€‹ 224â€‹â€‹ (111)â€‹â€‹ 18â€‹â€‹ 3,545Agriculture real estateâ€‹â€‹ 2,567â€‹â€‹ (141)â€‹â€‹ â€”â€‹â€‹ â€”â€‹â€‹ 2,426Commercial and industrialâ€‹â€‹ 5,235â€‹â€‹ (100)â€‹â€‹ (4)â€‹â€‹ 3â€‹â€‹ 5,134Agriculture productionâ€‹â€‹ 782â€‹â€‹ (85)â€‹â€‹ â€”â€‹â€‹ â€”â€‹â€‹ 697Consumerâ€‹â€‹ 490â€‹â€‹ 38â€‹â€‹ (88)â€‹â€‹ 13â€‹â€‹ 453All other loansâ€‹â€‹ 21â€‹â€‹ (5)â€‹â€‹ â€”â€‹â€‹ â€”â€‹â€‹ 16Totalâ€‹$ 47,820â€‹$ 1,570â€‹$ (335)â€‹$ 67â€‹$ 49,122â€‹â€‹The following tables present the balance in the allowance for off-balance sheet credit exposure based on portfolio segment as of September 30, 2024 and 2023, and activity in the allowance for the three-month periods ended September 30, 2024 and 2023:

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. This analysis is performed on all loans at origination and is updated on a quarterly basis for loans risk rated Watch, Special Mention, Substandard, or Doubtful. In addition, lending relationships of $3 million or more, exclusive of any consumer or owner-occupied residential loan, are subject to an annual credit analysis which is prepared by the loan administration department and presented to a loan committee with appropriate lending authority. A sample of lending relationships in excess of $1 million (exclusive of single-family residential real estate loans) are subject to an independent loan review annually, in order to verify risk ratings. The Company uses the following definitions for risk ratings:WatchÂ â€“ Loans classified as watch exhibit weaknesses that require more than usual monitoring. Issues may include deteriorating financial condition, payments made after due date but within 30Â days, adverse industry conditions or management problems.Special MentionÂ â€“Â Loans classified as special mention exhibit signs of further deterioration but still generally make payments within 30Â days. This is a transitional rating and loans should typically not be rated Special Mention for more than 12Â months.SubstandardÂ â€“Â Loans classified as substandard possess weaknesses that jeopardize the ultimate collection of the principal and interest outstanding. These loans exhibit continued financial losses, ongoing delinquency, overall poor financial condition, and insufficient collateral. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.DoubtfulÂ â€“Â Loans classified as doubtful have all the weaknesses of substandard loans, and have deteriorated to the level that there is a high probability of substantial loss.Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be Pass rated loans.A periodic review of selected credits (based on loan size and type) is conducted to identify loans with heightened risk or probable losses and to assign risk grades. The primary responsibility for this review rests with loan administration personnel. This review is supplemented with periodic examinations of both selected credits and the credit review process by the Companyâ€™s internal audit function and applicable regulatory agencies. The information from these reviews assists management in the timely identification of problems and potential problems and provides a basis for deciding whether the credit continues to share similar risk characteristics with collectively evaluated loan pools, or whether credit losses for the loan should be evaluated on an individual loan basis.The following table presents the credit risk profile of the Companyâ€™s loan portfolio (excluding deferred loan fees) based on rating category andÂ fiscal year of origination as of September 30, 2024. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrowerâ€™s prior payment record and the amount of the shortfall in relation to the principal and interest owed. Significant payment delays or shortfalls may lead to a determination that a loan should be individually evaluated for estimated credit losses.Collateral Dependent Loans. The Company elected certain relief options under ASU 2016-02, Leases (Topic 842), including the option not to recognize right of use asset and lease liabilities that arise from short-term leases (leases with terms of twelveÂ months or less). At September 30, 2024, the Company had ten leased properties, which included banking facilities, administrative offices and ground leases, and numerous office equipment lease agreements in which it was the lessee, with lease terms exceeding twelveÂ months.All of the Companyâ€™s leases are classified as operating leases. These operating leases are included as a ROU asset in the premises and equipment line item on the Companyâ€™s consolidated balance sheets. The corresponding lease liability is included in the accounts payable and other liabilities line item on the Companyâ€™s consolidated balance sheets. In the February 2022 acquisition of Fortune, the Company assumed a ground lease with an entity that is controlled by a Company insider. This property is in St. Louis County, MO and is in its fourth year of a twenty year term. ASU 2016-02 also requires certain other accounting elections. The Company elected the short-term lease recognition exemption for all leases that qualify, meaning those with terms under twelveÂ months. ROU assets or lease liabilities are not to be recognized for short-term leases. The calculated amount of the ROU assets and lease liabilities in the table below are impacted by the length of the lease term and the discount rate used to present value the minimum lease payments. The Companyâ€™s lease agreements often include one or more options to renew at the Companyâ€™s discretion. If at lease inception, the Company considers the exercising of a renewal option to be reasonably certain, the Company will include the extended term in the calculation of the ROU asset and lease liability. Regarding the discount rate, the ASU requires the use of the rate implicit in the lease whenever this rate is readily determinable. As this rate is rarely determinable, the Company utilizes its incremental borrowing rate at lease inception over a similar term. Company established Southern Missouri Statutory Trust I as a statutory business trust, to issue Floating Rate Capital Securities (the â€œTrust Preferred Securitiesâ€). The securities mature in
2034, became redeemable after five years, and bear interest at a floating rate based on SOFR. The securities represent undivided beneficial interests in the trust, which was established by the
Company for the purpose of issuing the securities. The Trust Preferred Securities were sold in a private transaction exempt from registration under the Securities Act of 1933, as amended (the
â€œActâ€) and have not been registered under the Act. The securities may not be offered or sold in the United States absent registration or an applicable exemption from registration
requirements. Southern Missouri Statutory Trust I used the proceeds from the sale of the Trust Preferred Securities to purchase Junior Subordinated Debentures (the â€œDebenturesâ€) of the
Company which have terms identical to the Trust Preferred Securities. At September 30, 2024, the Debentures carried an interest rate of 7.95%. The balance of the Debentures outstanding was
$7.2 million at both September 30, 2024 and June 30, 2024. The Company used its net proceeds for working capital and investment in its subsidiaries. In connection with the October 2013
Ozarks Legacy Community Financial, Inc. (OLCF) merger, the Company assumed $3.1 million in floating rate junior subordinated debt securities. The debt securities had been issued in June
2005 by OLCF in connection with the sale of trust preferred securities, bear interest at a floating rate based on SOFR, are now redeemable at par, and mature in 2035. At September 30, 2024,
the current rate was 7.66%. The carrying value of the debt securities was approximately $2.8 million at both September 30, 2024 and June 30, 2024.In connection with the August 2014 Peoples
Service Company, Inc. (PSC) merger, the Company assumed $6.5 million in floating rate junior subordinated debt securities. The debt securities had been issued in 2005 by PSCâ€™s subsidiary
bank holding company, Peoples Banking Company, in connection with the sale of trust preferred securities, bear interest at a floating rate based on SOFR, are now redeemable at par, and
mature in 2035. At September 30, 2024, the current rate was 7.01%. The carrying value of the debt securities was approximately $5.5 million at September 30, 2024 and $5.6 million at June 30,
2024.The Companyâ€™s investment at a face amount of $505,000 in these trusts is included with Prepaid Expenses and Other Assets in the consolidated balance sheets, and is carried at a
value of $468,000 and $467,000 at September 30, 2024 and June 30, 2024, respectively.In connection with the February 2022 Fortune merger, the Company assumed $7.5 million in fixed-to-
floating rate subordinated notes. The notes had been issued in May 2021 by Fortune to a multi-lender group, bear interest through May 2026 at a fixed rate of 4.5% and will bear interest
thereafter at SOFR plus 3.77%. The notes will be redeemable at par beginning in May 2026, and mature in May 2031. The carrying value of the notes was approximately $7.6 million at both
September 30, 2024 and June 30, 2024. X - ReferencesNo definition available. + Details Name: us-gaap_DebtDisclosureAbstract Namespace Prefix: us-gaap_ Data Type: xbrli:stringItemType

31 R20.htm IDEA: XBRL DOCUMENT v3.24.3 Fair Value Measurements 3 Months Ended Sep. 30, 2024 Fair Value Measurements Â Fair Value Measurements â€‹â€‹NoteÂ 12: Â Fair Value
Measurements ASC Topic 820, Fair Value Measurements, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between
market participants at the measurement date. Topic 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of
unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:Level 1 Quoted prices in active markets for identical assets
or liabilitiesLevel 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in active markets that are not active; or other inputs that are
observable or can be corroborated by observable market data for substantially the full term of the assets or liabilitiesLevel 3 Unobservable inputs supported by little or no market activity that
are significant to the fair value of the assets or liabilitiesRecurring Measurements. The following table presents the fair value measurements recognized in the accompanying condensed
consolidated balance sheets measured at fair value on a recurring basis and the level within the fair value hierarchy in which the fair value measurements fall at September 30, 2024 and

methodologies and inputs used for assets measured at fair value on a recurring basis and recognized in the accompanying consolidated balance sheets, as well as the general classification of
such assets pursuant to the valuation hierarchy. There have been no significant changes in the valuation techniques during the three months ended September 30, 2024.Available-for-sale
Securities. When quoted market prices are available in an active market, securities are classified within Level 1. If quoted market prices are not available, then fair values are estimated using
pricing models, or quoted prices of securities with similar characteristics. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value
measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus
prepayment speeds, credit information and the bondâ€™s terms and conditions, among other things. Â In certain cases where Level 1 or Level 2 inputs are not available, securities are classified
within Level 3 of the hierarchy.Derivative financial instruments. The Companyâ€™s derivative financial instruments consist of interest rate swaps on loans accounted for as fair value hedges.
The fair value of interest rate swaps was determined by discounting the expected cash flows of the interest rate swaps. This valuation reflects the contractual terms of the interest rate swaps,
including the period to maturity, and uses observable market-based inputs. The inputs used to value the Companyâ€™s interest rate swaps fall within Level 2 of the fair value hierarchy and, as a
result, the interest rate swaps were categorized as Level 2 within the fair value hierarchy. There were no transfers between levels of the fair value hierarchy during the period ended September
30, 2024. See information regarding the Companyâ€™s derivative financial agreements in Note 13: Derivative Financial Instruments of these Notes to Consolidated Financial
Statements.Mortgage servicing rights. The Company records MSR at fair value on a recurring basis with subsequent remeasurement of MSR based on change in fair value. An estimate of the
fair value of the Companyâ€™s MSR is determined by utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and
industry demand. All of the Companyâ€™s MSR are classified as Level 3.Nonrecurring Measurements. The following tables present the fair value measurement of assets measured at fair value
on a nonrecurring basis and the level within the ASC 820 fair value hierarchy in which the fair value measurements fell at September 30, 2024 and JuneÂ 30, 2024:

accompanying consolidated balance sheets, as well as the general classification of such assets and liabilities pursuant to the valuation hierarchy. For assets classified within Level 3 of fair value
hierarchy, the process used to develop the reported fair value process is described below.Foreclosed and Repossessed Assets Held for Sale. Foreclosed and repossessed assets held for sale are
valued at the time the loan is foreclosed upon or collateral is repossessed and the asset is transferred to foreclosed or repossessed assets held for sale. The value of the asset is based on third
party or internal appraisals, less estimated costs to sell and appropriate discounts, if any. The appraisals are generally discounted based on current and expected market conditions that may
impact the sale or value of the asset and managementâ€™s knowledge and experience with similar assets. Such discounts typically may be significant and result in a Level 3 classification of the
inputs for determining fair value of these assets. Foreclosed and repossessed assets held for sale are continually evaluated for additional impairment and are adjusted accordingly if impairment
is identified.Unobservable (Level 3) Inputs. The following tables present quantitative information about unobservable inputs used in nonrecurring Level 3 fair value measurements at September

30, 2024 Derivative Financial Instruments Â Derivative Financial Instruments Note 13: Derivative Financial Instrumentsâ€‹The Company enters into derivative financial instruments, primarily
interest rate swaps, to convert certain long term fixed rate loans to floating rates to manage interest rate risk, facilitate asset/liability management strategies and manage other exposures. The
fair value of derivative positions outstanding is included in other assets and other liabilities in the accompanying consolidated balance sheets and in the net change in each of these line items in
the operating section of the accompanying consolidated statements of cash flows. The unrealized gains and losses, representing the change in fair value of the derivative, are being recorded in
interest income in the consolidated statements of income. The ineffective portions of the unrealized gains or losses, if any, are recorded in interest income and interest expense in the
consolidated statements of income.The Company executed one interest rate swap, with an original notional amount of $10.0 million, during the first quarter of fiscal 2025, and executed two
interest rate swaps, with original notional amounts of $20.0 million each, during the fourth quarter of fiscal 2024, for a total of $50.0 million, designated as fair value hedges, to convert certain
long-term fixed rate 1-4 family loans to floating rates to hedge interest rate risk exposure. The portfolio layer method is being used, which allows the Company to designate a stated amount of
the assets that are not expected to be affected by prepayments, defaults or other factors that could affect the timing and amount of the cash flow, as the hedged item. The effect of the swaps on
loan interest income in the income statement during the three-month period ended September 30, 2024, totaled $178,000, and none in the same period of the prior year.The notional amounts
and estimated fair values of the Companyâ€™s interest rate swaps at September 30, 2024 and June 30, 2024 are presented in the tables below:

Bank & Trust Company (Citizens Bank), in a stock and cash transaction. In late February 2023, the Company merged Citizens Bank with and into Southern Bank, coincident to the data systems
conversion. For the three-month period ended September 30, 2023, the Company incurred $125,000, compared to none in the same period of the current fiscal year, of third-party acquisition-
related costs, included in noninterest expense in the Companyâ€™s condensed consolidated statements of income. â€‹Under the acquisition method of accounting, the total purchase price is
allocated to the net tangible and intangible assets acquired based on their estimated fair values on the date of the acquisition. Based on preliminary valuations of the fair value of tangible and
intangible assets acquired and liabilities assumed, the purchase price for the Citizens acquisition is detailed in the following table. If, prior to the end of the one-year measurement period for
finalizing the purchase price allocation, information becomes available about facts and circumstances that existed as of the acquisition date, which would indicate adjustments are required to
the purchase price allocation, such adjustments will be included in the purchase price allocation retrospectively. â€‹â€‹â€‹â€‹â€‹Citizens Bancshares Companyâ€‹â€‹â€‹Fair Value of

business line and is being amortized over ten years on a straight line basis, and $23.4 million was allocated to goodwill. None of the purchase price is deductible. Goodwill is attributable to
synergies and economies of scale expected from combining the operations of the Bank and Citizens Bank. To the extent that management revises any of the fair value of the above fair value
adjustments as a result of continuing evaluation, the amount of goodwill recorded in the merger will change.â€‹The Company acquired the $461.5 million loan portfolio at an estimated fair

loans in accordance with ASC 310-30. Loans acquired that were not subject to guidance relating to PCD loans include loans with a fair value of $419.5 million and gross contractual amounts
receivable of $520.0 million at the date of acquisition. Management identified 48 PCD loans, with a book balance of $27.5 million, associated with the Citizens acquisition (ASC 310-

Months Ended Sep. 30, 2024 Organization and Summary of Significant Accounting Policies Â Organization Organization. Southern Missouri Bancorp,Â Inc., a Missouri corporation (the Company) was organized in 1994 and is the parent company of Southern Bank (the Bank). Substantially all of the Companyâ€™s consolidated revenues are derived from the operations of the Bank, and the Bank represents substantially all of the Companyâ€™s consolidated assets and liabilities. SB Real Estate Investments, LLC is a wholly-owned subsidiary of the Bank formed to hold Southern Bank Real Estate Investments,Â LLC. Southern Bank Real Estate Investments, LLC is a real estate investment trust (REIT) which is controlled by SB Real Estate Investments, LLC, and has other preferred shareholders in order to meet the requirements to be a REIT. At September 30, 2024, assets of the REIT were approximately $1.3 billion, and consisted primarily of real estate loan participations acquired from the Bank.The Bank is primarily engaged in providing a full range of banking and financial services to individuals and corporate customers in its market areas. The Bank and Company are subject to competition from other financial institutions. The Bank and Company are subject to the regulation of certain federal and state agencies and undergo periodic examinations by those regulatory authorities. Basis of Financial Statement Presentation Basis of Financial Statement Presentation. The condensed consolidated financial statements of the Company have been prepared in conformity with accounting principles generally accepted in the United States of America and general practices within the banking industry. In the normal course of business, the Company encounters two significant types of risk: economic and regulatory. Economic risk is comprised of interest rate risk, credit risk, and market risk. The Company is subject to interest rate risk to the degree that its interest-bearing liabilities reprice on a different basis than its interest-earning assets. Credit risk is the risk of default on the Companyâ€™s investment or loan portfolios resulting from the borrowersâ€™ inability or unwillingness to make contractually required payments. Market risk reflects changes in the value of the investment portfolio, collateral underlying loans receivable, and the value of the Companyâ€™s investments in real estate. Principles of Consolidation Principles of Consolidation. The condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. Cash and Cash Equivalents Cash and Cash Equivalents. For purposes of reporting cash flows, cash and cash equivalents includes cash, due from depository institutions and interest-bearing deposits in other depository institutions with original maturities of threeÂ months or less. Interest-bearing deposits in other depository institutions were $20.4 million and $7.7 million at September 30, 2024 and JuneÂ 30, 2024, respectively. The deposits are held in various commercial banks with a total of $1.8 million and $2.3 million exceeding the FDICâ€™s deposit insurance limits at September 30, 2024 and JuneÂ 30, 2024, respectively, as well as at the Federal Reserve and the Federal Home Loan Banks of Des Moines and Chicago. Interest-bearing Time Deposits Interest-bearing Time Deposits. Interest bearing time deposits in banks mature within three years and are carried at cost. Available for Sale Securities Available for Sale Securities. Available for sale securities (AFS), which include any security for which the Company has no immediate plan to sell but which may be sold in the future, are carried at fair value. Unrealized gains and losses, net of tax, are reported in accumulated other comprehensive loss, a component of stockholdersâ€™ equity. All securities have been classified as available for sale.Premiums and discounts on debt securities are amortized or accreted as adjustments to income over the estimated life of the security using the level yield method. Realized gains or losses on the sale of securities is based on the specific identification method. The fair value of securities is based on quoted market prices or dealer quotes. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.The Company does not invest in collateralized mortgage obligations that are considered high risk.For AFS securities with fair value less than amortized cost that management has no intent to sell and believes that it more likely than not will not be required to sell prior to recovery, only the credit loss component of the impairment is recognized in earnings, while the noncredit loss is recognized in accumulated other comprehensive loss. The credit loss component recognized in earnings is identified as the amount of principal cash flows not expected to be received over the remaining term of the security as projected based on cash flow projections, and is recorded to the Allowance for Credit Losses (â€œACLâ€), by a charge to provision for credit losses. Accrued interest receivable is excluded from the estimate of credit losses. Both the ACL and the adjustment to net income may be reversed if conditions change. However, if the Company intends to sell an impaired AFS security, or, if it is more likely than not the Company will be required to sell such a security before recovering its amortized cost basis, the entire impairment amount would be recognized in earnings with a corresponding adjustment to the securityâ€™s amortized cost basis. Because the securityâ€™s amortized cost basis is adjusted to fair value, there is no ACL in this situation.The Company evaluates impaired AFS securities at the individual level on a quarterly basis, and considers factors including, but not limited to: the extent to which the fair value of the security is less than the amortized cost basis; adverse conditions specifically related to the security, an industry, or geographic area; the payment structure of the security and likelihood of the issuer to be able to make payments that may increase in the future; failure of the issuer to make scheduled interest or principal payments; any changes to the rating of the security by a rating agency; and the ability and intent to hold the security until maturity. A qualitative determination as to whether any portion of the impairment is attributable to credit risk is acceptable. There were no credit-related factors underlying unrealized losses on AFS securities at September 30, 2024, or JuneÂ 30, 2024.Changes in the ACL are recorded as expense. Losses are charged against the ACL when management believes the uncollectability of an AFS debt security is confirmed or when either of the criteria regarding intent or requirement to sell is met. Federal Reserve Bank and Federal Home Loan Bank Stock Federal Reserve Bank and Federal Home Loan Bank Stock. The Bank is a member of the Federal Reserve and the Federal Home Loan Bank (FHLB) systems. Capital stock of the Federal Reserve and the FHLB is a required investment of the Bank based upon a predetermined formula and is carried at cost. Loans Loans. Loans are generally stated at unpaid principal balances, less the ACL, any net deferred loan origination fees, and unamortized premiums or discounts on purchased loans.Interest on loans is accrued based upon the principal amount outstanding. The accrual of interest on loans is discontinued when, in managementâ€™s judgment, the collectability of interest or principal in the normal course of business is doubtful. The Company complies with regulatory guidance which indicates that loans should be placed in nonaccrual status when 90Â days past due, unless the loan is both well-secured and in the process of collection. A loan that is â€œin the process of collectionâ€ may be subject to legal action or, in appropriate circumstances, through other collection efforts reasonably expected to result in repayment or restoration to current status in the near future. A loan is considered delinquent when a payment has not been made by the contractual due date. Interest income previously accrued but not collected at the date a loan is placed on nonaccrual status is reversed against interest income. Cash receipts on a nonaccrual loan are applied to principal and interest in accordance with its contractual terms unless full payment of principal is not expected, in which case cash receipts, whether designated as principal or interest, are applied as a reduction of the carrying value of the loan. A nonaccrual loan is generally returned to accrual status when principal and interest payments are current, full collectability of principal and interest is reasonably assured, and a consistent record of performance has been demonstrated.The ACL is a valuation account that is deducted from the loansâ€™ amortized cost basis to present the net amount expected to be collected on the loans, and is established through a provision for credit losses (PCL) charged to current earnings. The ACL is increased by the provision for credit losses on loans charged to expense and reduced by loans charged off, net of recoveries. Loans are charged off in the period deemed uncollectible, based on managementâ€™s analysis of expected cash flows (for non-collateral dependent loans) or collateral value (for collateral-dependent loans). Subsequent recoveries of loans previously charged off, if any, are credited to the allowance when received.Management estimates the ACL using relevant available information, from internal and external sources, relating to past events, current conditions, and reasonable and supportable forecasts. Adjustments may be made to historical loss information for differences identified in current loan-specific risk characteristics, such as differences in underwriting standards or terms; lending review systems; experience, ability, or depth of lending management and staff; portfolio growth and mix; delinquency levels and trends; as well as for changes in environmental conditions, such as changes in economic activity or employment, agricultural economic conditions, property values, or other relevant factors. The Company generally incorporates a reasonable and supportable forecast period of four quarters, and a four-quarter, straight-line reversion period to return to long-term historical averages.The ACL is measured on a collective (pool) basis when similar risk characteristics exist. For loans that do not share general risk characteristics with the collectively evaluated pools, the Company estimates credit losses on an individual loan basis, and these loans are excluded from the collectively evaluated pools. An ACL for an individually evaluated loan is recorded when the amortized cost basis of the loan exceeds the discounted estimated cash flows using the loanâ€™s initial effective interest rate or the fair value, less estimated costs to sell, of the collateral for certain collateral dependent loans. For the collectively evaluated pools, the Company segments the loan portfolio primarily by loan purpose and collateral into 24 pools, which are homogeneous groups of loans that possess similar loss potential characteristics. The Company primarily utilizes the discounted cash flow (DCF) methodology for measurement of the required ACL.Â For a limited number of pools with a relatively small balance of unpaid principal, the Company utilizes the remaining life method. The DCF model implements probability of default (PD) and loss given default (LGD) calculations at the instrument level. PD and LGD are determined based on statistical analysis and correlation of historical losses with various economic factors over time. In general, the Companyâ€™s losses have not correlated well with economic factors, and the Company has utilized peer data where more appropriate. The Company defines a default to include an event of charge off, an adverse (substandard or worse) internal credit rating, becoming delinquent 90Â days or more, or being placed on nonaccrual status. A PD/LGD estimate is applied to a projected model of the loanâ€™s cashflow, including principal and interest payments, with consideration for prepayment speeds, principal curtailments, and recovery lag. Loans acquired in a business combination that have experienced more-than-insignificant deterioration in credit quality since origination are considered purchased credit deteriorated (PCD) loans. At the acquisition date, an estimate of expected credit losses is made for groups of PCD loans with similar risk characteristics and individual PCD loans without similar risk characteristics. This initial ACL is allocated to individual PCD loans and added to the purchase price or acquisition date fair values to establish the initial amortized cost basis of the PCD loans. As the initial ACL is added to the purchase price, there is no credit loss expense recognized upon acquisition of a PCD loan. Any difference between the unpaid principal balance of PCD loans

and the amortized cost basis is considered to relate to non-credit factors and results in a discount or premium. Discounts and premiums are recognized through interest income on a level-yield method over the life of the loans.Loan fees and certain direct loan origination costs are deferred, and the net fee or cost is recognized as an adjustment to interest income using the interest method over the contractual life of the loans. Off-Balance Sheet Credit Exposures Off-Balance Sheet Credit Exposures. Off-balance sheet credit instruments include commitments to make loans, and commercial letters of credit, issued to meet customer financing needs. The Companyâ€™s exposure to credit loss in the event of non-performance by the other party to the financial instrument for off-balance sheet loan commitments is represented by the contractual amount of those instruments. Such financial instruments are recorded when they are funded. The ACL on off-balance sheet credit exposures is estimated by loan pool on a quarterly basis under the current CECL model using the same methodologies as portfolio loans, taking into consideration the likelihood that funding will occur and is included in other liabilities on the Companyâ€™s consolidated balance sheets. The Company records an ACL on off-balance sheet credit exposures, unless the commitments to extend credit are unconditionally cancelable. Foreclosed Real Estate Foreclosed Real Estate. Real estate acquired by foreclosure or by deed in lieu of foreclosure is initially recorded at fair value less estimated selling costs, establishing a new cost basis. Any costs for development and improvement of the property that are warranted are capitalized.Valuations are periodically performed by management, and an allowance for losses is established by a charge to operations if the carrying value of a property exceeds its estimated fair value, less estimated selling costs.Loans to facilitate the sale of real estate acquired in foreclosure are discounted if made at less than market rates. Discounts are amortized over the fixed interest period of each loan using the interest method. Premises and Equipment Premises and Equipment. Premises and equipment are stated at cost less accumulated depreciation and include expenditures for major betterments and renewals. Maintenance, repairs, and minor renewals are expensed as incurred. When property is retired or sold, the retired asset and related accumulated depreciation are removed from the accounts and the resulting gain or loss taken into income. The Company reviews property and equipment for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If such assets are considered to be impaired, the impairment loss recognized is measured by the amount by which the carrying amount exceeds the fair value of the assets.Depreciation is computed by use of straight-line and accelerated methods over the estimated useful lives of the assets. Estimated lives are generally seven to forty years for premises, three to seven years for equipment, and three years for software. Bank Owned Life Insurance Bank Owned Life Insurance. Bank owned life insurance policies are reflected in the condensed consolidated balance sheets at the estimated cash surrender value. Changes in the cash surrender value of these policies, as well as a portion of the insurance proceeds received, are recorded in noninterest income in the condensed consolidated statements of income. Goodwill Goodwill. The Companyâ€™s goodwill is evaluated annually for impairment or more frequently if impairment indicators are present. A qualitative assessment is performed to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value is less than the carrying amount, including goodwill. If, based on the evaluation, it is determined to be more likely than not that the fair value is less than the carrying value, then goodwill is tested further for impairment. If the implied fair value of goodwill is lower than its carrying amount, a goodwill impairment is indicated and goodwill is written down to its implied fair value. Subsequent increases in goodwill value are not recognized in the financial statements. As of JuneÂ 30, 2024, the date of the Companyâ€™s annual test, there was no impairment indicated, based on a qualitative assessment of goodwill, which considered: the market value of the Companyâ€™s common stock; concentrations of credit; profitability; nonperforming assets; capital levels; and results of recent regulatory examinations. There was no impairment of goodwill at September 30, 2024. Intangible Assets Intangible Assets. The Companyâ€™s intangible assets at September 30, 2024 included gross core deposit intangibles of $39.1 million with $18.9 million accumulated amortization, gross other identifiable intangibles of $6.4 million with accumulated amortization of $4.3 million, and mortgage and SBA servicing rights of $3.0 million. At JuneÂ 30, 2024, the Companyâ€™s intangible assets included gross core deposit intangibles of $39.1 million with $17.8 million accumulated amortization, gross other identifiable intangibles of $6.4 million with accumulated amortization of $4.2 million, and mortgage and SBA servicing rights of $3.0 million. The Companyâ€™s core deposit and other intangible assets are being amortized using the straight line method, in accordance with ASC 350, over periods ranging from five to tenÂ years, with amortization expense expected to be approximately $2.6 million in the remainder of fiscal 2025, $3.0 million in fiscal 2026, $2.7 million in fiscal 2027, $2.7 million in fiscal 2028, $2.6 million in fiscal 2029, and $8.8 million thereafter. As of September 30, 2024 and JuneÂ 30, 2024, there was no impairment of other intangible assets indicated.The Company records mortgage servicing rights (MSR) at fair value for all mortgage loans sold on a servicing retained basis with subsequent adjustments to fair value of MSR in accordance with FASB ASC 860. An estimate of the fair value of the Companyâ€™s MSR is determined utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. Changes in the fair value of MSR are recorded in loan servicing fees in the consolidated statements of income. Income Taxes The Company records mortgage servicing rights (MSR) at fair value for all mortgage loans sold on a servicing retained basis with subsequent adjustments to fair value of MSR in accordance with FASB ASC 860. An estimate of the fair value of the Companyâ€™s MSR is determined utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. Changes in the fair value of MSR are recorded in loan servicing fees in the consolidated statements of income. Incentive Plans Derivative Financial Instruments and Hedging Activities. The Company enters into derivative financial instruments, primarily interest rate swaps, to manage interest rate risk, facilitate asset/liability management strategies and manage other exposures. Derivative instruments are accounted pursuant to ASC Topic 815, â€œDerivatives and Hedgingâ€, which requires companies to recognize derivative instruments as either assets or liabilities in the consolidated balance sheet. All derivative financial instruments are recognized as other assets or other liabilities, as applicable, at estimated fair value. The change in each of these financial statement line items is included as operating cash flows in the accompanying consolidated statements of cash flows. The Company does not speculate using derivative instruments. Derivative financial instruments are more fully described in Note 13.Incentive Plans. The Company accounts for its Equity Incentive Plan (EIP), and Omnibus Incentive Plan (OIP) in accordance with ASC 718, â€œShare-Based Payment.â€ Compensation expense is based on the market price of the Companyâ€™s stock on the date the shares are granted and is recorded over the vesting period. The difference between the grant-date fair value and the fair value on the date the shares are considered earned represents a tax benefit to the Company that is recorded as an adjustment to income tax expense. Non-Employee Directors' Retirement Non-Employee Directorsâ€™ Retirement. The Bank entered into directorsâ€™ retirement agreements beginning in AprilÂ 1994 for non-employee directors and continued to do so for new non-employee directors joining the Bankâ€™s board through December 2014. These directorsâ€™ retirement agreements provide that each participating non-employee director (participant) shall receive, upon termination of service on the Board on or after age 60, other than termination for cause, a benefit in equal annual installments over a five year period. The benefit will be based upon the product of the participantâ€™s vestingÂ percentage and the total Board fees paid to the participant during the calendarÂ year preceding termination of service on the Board. The vestingÂ percentage shall be determined based upon the participantâ€™sÂ years of service on the Board.In the event that the participant dies before collecting any or all of the benefits, the Bank shall pay the participantâ€™s beneficiary. Benefits shall not be payable to anyone other than the beneficiary, and shall terminate on the death of the beneficiary. Stock Options Stock Options. Compensation cost is measured based on the grant-date fair value of the equity instruments issued, and recognized over the vesting period during which an employee provides service in exchange for the award. Earnings Per Share Earnings Per Share. Basic earnings per share available to common stockholders is computed using the weighted-average number of common shares outstanding. Diluted earnings per share available to common stockholders includes the effect of all weighted-average dilutive potential common shares (stock options and restricted stock grants) outstanding during each period. Comprehensive Income Comprehensive Income. Comprehensive income consists of net income and other comprehensive income (loss), net of applicable income taxes. Other comprehensive income (loss) includes unrealized depreciation on available-for-sale securities, unrealized depreciation on available-for-sale securities for which a portion of an other-than-temporary impairment has been recognized in income, and changes in the funded status of defined benefit pension plans. Transfers Between Fair Value Hierarchy Levels Transfers Between Fair Value Hierarchy Levels. Transfers in and out of Level 1 (quoted market prices), Level 2 (other significant observable inputs) and Level 3 (significant unobservable inputs) are recognized on the period ending date. Wealth Management Assets and Fees Wealth Management Assets and Fees. Assets managed in fiduciary or investment management accounts by the Company are not included in the consolidated balance sheets since such items are not assets of the Company or its subsidiaries. Fees from fiduciary or investment management activities are recorded on a cash basis over the period in which the service is provided. Fees are generally a function of the market value of assets managed and administered, the volume of transactions, and fees for other services rendered, as set forth in the agreement between the customer and the Company. This revenue recognition involves the use of estimates and assumptions, including components that are calculated based on asset valuations and transaction volumes. Any out-of-pocket expenses or services not typically covered by the fee schedule for fiduciary activities are charged directly to the account on a gross basis as revenue is incurred. The Southern Wealth Management division, which is a division of the Bank, held fiduciary assets totaling $113.1 million and $100.9 million as of September 30, 2024 and June 30, 2024, respectively, and investment management assets totaling $516.9 million and $474.7 million as of September 30, 2024 and June 30, 2024, respectively. Correction of an Immaterial Error in Prior Period Financial Statements and New Accounting Pronouncements New Accounting Pronouncements:In January 2021, the FASB published ASU 2021-01, â€œReference Rate Reform. (Topic 848)â€. ASU 2021-01 clarified that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The ASU also amended the expedients and exceptions in Topic 848 to capture the incremental consequences of the scope clarification and to tailor the existing guidance to derivative instruments affected by the discounting transition. An entity may elect to apply the amendments in this update on a full retrospective basis as of any date from the beginning of an interim period that includes or is subsequent to March 12, 2020, or on a prospective basis to new modifications from any date within an interim period that includes or is subsequent to the date of the issuance of a final update, up to the date that financial statements are available to be issued. If an entity elects to apply any of the amendments in this update for an eligible hedging relationship, any adjustments as a result of those elections must be reflected as of the date the entity applies the election. Originally, the amendments in this update did not apply to contract modifications made after December 31, 2022, new hedging relationships entered into after December 31, 2022, and existing hedging relationships evaluated for effectiveness in periods after December 31, 2022 except for hedging relationships existing as of December 31, 2022, that apply certain optional expedients in which the accounting effects are recorded through the end of the hedging relationship (including periods after December 31, 2022). With the issuance of ASU 2022-06 Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848, the sunset date for adoption of ASU 2021-01 was extended from December 31, 2022 to December 31, 2024. The Company is evaluating the impact of this ASU but does not expect it to have a material impact on the Companyâ€™s consolidated financial statements. â€‹In November 2023, the FASB issued ASU 2023-07, â€œSegment Reporting (Topic 280): Improvements to Reportable Segment Disclosures.â€ The amendments in this update improve financial reporting by requiring disclosure of incremental segment information on an annual and interim basis for all public entities to enable investors to develop more decision-useful financial analyses. The amendments in this update do not change how a public entity identifies its operating segments, aggregates those operating segments, or applies the quantitative thresholds to determine its reportable segments. The amendments of this ASU are effective for fiscal years beginning after December 15, 2023 and interim periods within fiscal years beginning after December 15, 2024. Adoption of this ASU is not expected to have a material impact on Companyâ€™s consolidated financial statements.â€‹On December 14, 2023, the FASB published ASU 2023-02, â€œInvestments - Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method.â€ This ASU permits reporting entities to elect to account for tax equity investments, regardless of the tax credit program for which the income tax credits are received, using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the income tax credits and other income tax benefits received and recognizes the net amortization and income tax credits and other income tax benefits in the income statement as a component of income tax expense. A reporting entity makes an accounting policy election to apply the proportional amortization method on a tax-credit-program-by-tax-credit-program basis rather than electing to apply the proportional amortization method at the reporting entity level or to individual investments. This ASU also requires specific disclosures of investments that generate income tax credits and other income tax benefits from a tax credit program for which the entity has elected to apply the proportional amortization method. The ASU was effective for fiscal years beginning after December 15, 2023, and was effective for the Company beginning July 1, 2024. The adoption of ASU 2023-02 did not have a material impact on the Companyâ€™s consolidated financial statements.â€‹In December 2023, the FASB issued ASU 2023-09, â€œIncome Taxes - Improvements to Income Tax Disclosures (Topic 740)â€. ASU 2023-09 was issued to address requests by investors and creditors for enhanced transparency and decision usefulness of income tax disclosures. Public business entities (PBEs) would be required to prepare an annual detailed, tabular tax rate reconciliation. All other entities would be required to provide qualitative disclosure on specific categories and individual jurisdictions that result in significant differences between the statutory and effective tax rates. All entities would be required to annually disclose taxes paid disaggregated by federal, state, and foreign taxes, as well as disaggregating taxes by individual jurisdiction if taxes paid exceed 5% of total income taxes paid. The ASU is effective for PBEs for fiscal years beginning after December 15, 2024. The Company does not expect adoption of ASU 2023-09 to have a material impact on its consolidated financial statements.â€‹In November 2024, the FASB issued ASU 2024-03, â€œIncome Statementâ€”Reporting Comprehensive Incomeâ€”Expense Disaggregation Disclosures (Subtopic 220-40)â€. ASU 2024-03 was issued to improve the disclosures about a public business entityâ€™s expenses and address requests from investors for more detailed information about the types of expenses (including purchases of inventory, employee compensation, depreciation, amortization, and depletion) in commonly presented expense captions (such as cost of sales, SG&A, and research and development). The ASU is effective for PBEs for fiscal years beginning after December 15, 2026. The Company does not expect adoption of ASU 2024-03 to have a material impact on its consolidated financial statements.â€‹ X - DefinitionRepresents the textual narrative disclosure of Bank Owned Life Insurance, during the indicated time period. + ReferencesNo definition available. + Details Name: smbc_BankOwnedLifeInsurancePolicyTextBlock Namespace Prefix: smbc_ Data Type: dtr-types:textBlockItemType Balance Type: na Period Type: duration X - DefinitionRepresents the information pertaining to foreclosed real estate policy. + ReferencesNo definition available. + Details Name: smbc_ForeclosedRealEstatePolicyTextBlock Namespace Prefix: smbc_ Data Type: dtr-types:textBlockItemType Balance Type: na Period Type: duration X - DefinitionRepresents the textual narrative disclosure of Interest-Bearing Time Deposits, during the indicated time period. + ReferencesNo definition available. + Details Name: smbc_InterestBearingTimeDepositsTextBlock Namespace Prefix: smbc_ Data Type: dtr-types:textBlockItemType Balance Type: na Period Type: duration X - DefinitionDisclosure of accounting policy for non-employee directors retirement. + ReferencesNo definition available. + Details Name: smbc_NonEmployeeDirectorsRetirementPolicyPolicyTextBlock Namespace Prefix: smbc_ Data Type: dtr-types:textBlockItemType Balance Type: na Period Type: duration X - ReferencesNo definition available. + Details Name: smbc_OrganizationAndSummaryOfSignificantAccountingPoliciesAbstract Namespace Prefix: smbc_ Data Type: xbrli:stringItemType Balance Type: na Period Type: duration X - DefinitionDisclosure of accounting policy for wealth management assets and fees. + ReferencesNo definition available. + Details Name: smbc_WealthManagementAssetsAndFeesPolicyPolicyTextBlock Namespace Prefix: smbc_ Data Type: dtr-types:textBlockItemType Balance Type: na Period Type: duration X - DefinitionDisclosure of accounting policy for basis of accounting, or basis of presentation, used to prepare the financial statements (for example, US Generally Accepted Accounting Principles, Other Comprehensive Basis of Accounting, IFRS). + ReferencesNo definition available. + Details Name: us-gaap_BasisOfAccountingPolicyPolicyTextBlock Namespace Prefix: us-gaap_ Data Type: dtr-types:textBlockItemType Balance Type: na Period Type: duration X - DefinitionThe entire disclosure for the business description and accounting policies concepts.
