style="font-family:'Times New Roman','Times','serif';font-size:10pt;margin:0pt 0pt 10pt 0pt;">Note 1: Basis of Presentation The accompanying unaudited interim condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Securities and Exchange Commission (“SEC”) Regulation SX. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all material adjustments (consisting only of normal recurring accruals) considered necessary for a fair presentation have been included. The condensed consolidated balance sheet of the Company as of June 30, 2024, has been derived from the audited consolidated balance sheet of the Company as of that date. Operating results for the three-month period ended September 30, 2024, are not necessarily indicative of the results that may be expected for the entire fiscal year. For additional information, refer to the audited consolidated financial statements included in the Company’s June 30, 2024, Form 10-K, which was filed with the SEC. The accompanying condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation. Certain amounts reported in prior periods have been reclassified to conform to the September 30, 2024 presentation. These reclassifications did not materially impact the Company’s consolidated financial statements. Correction of an Immaterial Error in Prior Period Financial Statements: Certain prior period amounts in the Consolidated Balance Sheets, Consolidated Statements of Income and Note 12: Fair Value Measurements have been corrected as discussed below. No other financial statements or notes were impacted by these corrections. The Company has corrected its Consolidated Balance Sheet at June 30, 2024, the Consolidated Statement of Income for the three-month period ended September 30, 2023, and the Fair Value of Financial Instruments table at June 30, 2024 in Note 12: Fair Value Measurements, within this Quarterly Report on Form 10-Q for an error in classification between

deposits and securities sold under agreements to repurchase. The balance of securities sold under agreements to repurchase is now being presented as a separate line item on the Consolidated Balance Sheet and Fair Value of Financial Instruments table included in the notes to the financial statements. The Company had previously included the agreements with deposits. The interest expense associated with the securities is now being presented as a separate line on the Consolidated Statements of Income. Previously, the Company included this in deposits interest expense. The Company assessed the materiality of this change in presentation on prior period consolidated financial statements in accordance with SEC Staff Accounting Bulletin No. 99, “Materiality,” (ASC Topic 250, Accounting Changes and Error Corrections). Based on this assessment, the Company concluded that these error corrections in its Consolidated Balance Sheets, Consolidated Statements of Income, and Notes to the Financial Statements are not material to any previously presented financial statements. The corrections had no impact on the Consolidated Statements of Comprehensive Income, Consolidated Statements of Stockholders’ Equity, or Consolidated Statement of Cash Flow, for any previously presented interim or annual financial statements. Accordingly, the Company corrected the previously reported immaterial errors for the year ended June 30, 2024 and the three-months ended September 30, 2023 in this Quarterly Report on Form 10-Q. <table style="border-collapse:collapse;font-size:16pt;height:max-content;margin-left:auto;margin-right:auto;padding-left:0pt;padding-right:0pt;width:100%;"><tr style="height:1pt;"><td style="vertical-align:bottom;width:60.84%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:2.33%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.48%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:9.22%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:2.33%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.48%;margin:0pt;padding:0pt;"> <span style="font-

space:nowrap;width:9.22%;margin:0pt;padding:0pt;"> 9,398 </td></tr></table> 3952457000-939800039430590009398000939800020440000-720002036800007200072000 3952457000-939800039430590000939800093980000939800093980000 Note 2: Organization and Summary of Significant Accounting Policies Organization. Southern Missouri Bancorp, Inc., a Missouri corporation (the Company) was organized in 1994 and is the parent company of Southern Bank (the Bank). Substantially all of the Company’s consolidated revenues are derived from the operations of the Bank, and the Bank represents substantially all of the Company’s consolidated assets and liabilities. SB Real Estate Investments, LLC is a wholly-owned subsidiary of the Bank formed to hold Southern Bank Real Estate Investments, LLC. Southern Bank Real Estate Investments, LLC is a real estate investment trust (REIT) which is controlled by SB Real Estate Investments, LLC, and has other preferred shareholders in order to meet the requirements to be a REIT. At September 30, 2024, assets of the REIT were approximately $1.3 billion, and consisted primarily of real estate loan participations acquired from the Bank. The Bank is primarily engaged in providing a full range of banking and financial services to individuals and corporate customers in its market areas. The Bank and Company are subject to competition from other financial institutions. The Bank and Company are subject to the regulation of certain federal and state agencies and undergo periodic examinations by those regulatory authorities. Basis of Financial Statement Presentation. The condensed consolidated financial statements of the Company have been prepared in conformity with accounting principles generally accepted in the United States of America and general practices within the banking industry. In the normal course of business, the Company encounters two significant types of risk: economic and regulatory. Economic risk is comprised of interest rate risk, credit risk, and market risk. The Company is subject to interest rate risk to the degree that its interest-bearing liabilities reprice on a different basis than its interest-earning assets. Credit risk is the risk of default on the Company’s investment or loan portfolios resulting from the borrowers’ inability or unwillingness to make contractually required payments. Market risk reflects changes in the value of the investment portfolio, collateral underlying loans receivable, and the value of the Company’s investments in real estate. Principles of Consolidation. The condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. Use of Estimates. The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. <span

style="color:#212529;">Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for credit losses. Cash and Cash Equivalents. For purposes of reporting cash flows, cash and cash equivalents includes cash, due from depository institutions and interest-bearing deposits in other depository institutions with original maturities of three months or less. Interest-bearing deposits in other depository institutions were $20.4 million and $7.7 million at September 30, 2024 and June 30, 2024, respectively. The deposits are held in various commercial banks with a total of $1.8 million and $2.3 million exceeding the FDIC's deposit insurance limits at September 30, 2024 and June 30, 2024, respectively, as well as at the Federal Reserve and the Federal Home Loan Banks of Des Moines and Chicago. Interest-bearing Time Deposits. Interest bearing time deposits in banks mature within three years and are carried at cost. Available for Sale Securities. Available for sale securities (AFS), which include any security for which the Company has no immediate plan to sell but which may be sold in the future, are carried at fair value. Unrealized gains and losses, net of tax, are reported in accumulated other comprehensive loss, a component of stockholders' equity. All securities have been classified as available for sale. Premiums and discounts on debt securities are amortized or accreted as adjustments to income over the estimated life of the security using the level yield method. Realized gains or losses on the sale of securities is based on the specific identification method. The fair value of securities is based on quoted market prices or dealer quotes. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities. The Company does not invest in collateralized mortgage obligations that are considered high risk. For AFS securities with fair value less than amortized cost that management has no intent to sell and believes that it more likely than not will not be required to sell prior to recovery, only the credit loss component of the impairment is recognized in earnings, while the noncredit loss is recognized in accumulated other comprehensive loss. The credit loss component recognized in earnings is identified as the amount of principal cash flows not expected to be received over the remaining term of the security as projected based on cash flow projections, and is recorded to the Allowance for Credit Losses ("ACL"), by a charge to provision for credit losses. Accrued interest receivable is excluded from the estimate of credit losses. Both the ACL and the adjustment to net income may be reversed if conditions change. However, if the Company intends to sell an impaired AFS security, or, if it is more likely than not the Company will be required to sell such a security before recovering its amortized cost basis, the entire impairment amount would be recognized in earnings with a corresponding adjustment to the security's amortized cost basis. Because the security's amortized cost basis is adjusted to fair value, there is no ACL in this situation. The Company evaluates impaired AFS securities at the individual level on a quarterly basis, and considers factors including, but not limited to: the extent to which the fair value of the security is less than the amortized cost basis; adverse conditions specifically related to the security, an industry, or geographic area; the payment structure of the security and likelihood of the issuer to be able to make payments that may increase in the future; failure of the issuer to make scheduled interest or principal payments; any changes to the rating of the security by a rating agency; and the ability and intent to hold the security until maturity. A qualitative determination as to whether any portion of the impairment is attributable to credit risk is

acceptable. There were no credit-related factors underlying unrealized losses on AFS securities at September 30, 2024, or June 30, 2024. Changes in the ACL are recorded as expense. Losses are charged against the ACL when management believes the uncollectability of an AFS debt security is confirmed or when either of the criteria regarding intent or requirement to sell is met. Federal Reserve Bank and Federal Home Loan Bank Stock. The Bank is a member of the Federal Reserve and the Federal Home Loan Bank (FHLB) systems. Capital stock of the Federal Reserve and the FHLB is a required investment of the Bank based upon a predetermined formula and is carried at cost. Loans. Loans are generally stated at unpaid principal balances, less the ACL, any net deferred loan origination fees, and unamortized premiums or discounts on purchased loans. Interest on loans is accrued based upon the principal amount outstanding. The accrual of interest on loans is discontinued when, in management's judgment, the collectability of interest or principal in the normal course of business is doubtful. The Company complies with regulatory guidance which indicates that loans should be placed in nonaccrual status when 90 days past due, unless the loan is both well-secured and in the process of collection. A loan that is "in the process of collection" may be subject to legal action or, in appropriate circumstances, through other collection efforts reasonably expected to result in repayment or restoration to current status in the near future. A loan is considered delinquent when a payment has not been made by the contractual due date. Interest income previously accrued but not collected at the date a loan is placed on nonaccrual status is reversed against interest income. Cash receipts on a nonaccrual loan are applied to principal and interest in accordance with its contractual terms unless full payment of principal is not expected, in which case cash receipts, whether designated as principal or interest, are applied as a reduction of the carrying value of the loan. A nonaccrual loan is generally returned to accrual status when principal and interest payments are current, full collectability of principal and interest is reasonably assured, and a consistent record of performance has been demonstrated. The ACL is a valuation account that is deducted from the loans' amortized cost basis to present the net amount expected to be collected on the loans, and is established through a provision for credit losses (PCL) charged to current earnings. The ACL is increased by the provision for credit losses on loans charged to expense and reduced by loans charged off, net of recoveries. Loans are charged off in the period deemed uncollectible, based on management's analysis of expected cash flows (for non-collateral dependent loans) or collateral value (for collateral-dependent loans). Subsequent recoveries of loans previously charged off, if any, are credited to the allowance when received. Management estimates the ACL using relevant available information, from internal and external sources, relating to past events, current conditions, and reasonable and supportable forecasts. Adjustments may be made to historical loss information for differences identified in current loan-specific risk characteristics, such as differences in underwriting standards or terms; lending review systems; experience, ability, or depth of lending management and staff; portfolio growth and mix; delinquency levels and trends; as well as for changes in environmental conditions, such as changes in economic activity or employment, agricultural economic conditions, property values, or other relevant factors. The Company generally incorporates a reasonable and supportable forecast period of four quarters, and a four-quarter, straight-line reversion period to return to long-term historical averages. The ACL is measured on a collective (pool) basis when similar risk characteristics exist. For loans that do not share general

risk characteristics with the collectively evaluated pools, the Company estimates credit losses on an individual loan basis, and these loans are excluded from the collectively evaluated pools. An ACL for an individually evaluated loan is recorded when the amortized cost basis of the loan exceeds the discounted estimated cash flows using the loan's initial effective interest rate or the fair value, less estimated costs to sell, of the collateral for certain collateral dependent loans. For the collectively evaluated pools, the Company segments the loan portfolio primarily by loan purpose and collateral into 24 pools, which are homogeneous groups of loans that possess similar loss potential characteristics. The Company primarily utilizes the discounted cash flow (DCF) methodology for measurement of the required ACL. For a limited number of pools with a relatively small balance of unpaid principal, the Company utilizes the remaining life method. The DCF model implements probability of default (PD) and loss given default (LGD) calculations at the instrument level. PD and LGD are determined based on statistical analysis and correlation of historical losses with various economic factors over time. In general, the Company's losses have not correlated well with economic factors, and the Company has utilized peer data where more appropriate. The Company defines a default to include an event of charge off, an adverse (substandard or worse) internal credit rating, becoming delinquent 90 days or more, or being placed on nonaccrual status. A PD/LGD estimate is applied to a projected model of the loan's cashflow, including principal and interest payments, with consideration for prepayment speeds, principal curtailments, and recovery lag. Loans acquired in a business combination that have experienced more-than-insignificant deterioration in credit quality since origination are considered purchased credit deteriorated (PCD) loans. At the acquisition date, an estimate of expected credit losses is made for groups of PCD loans with similar risk characteristics and individual PCD loans without similar risk characteristics. This initial ACL is allocated to individual PCD loans and added to the purchase price or acquisition date fair values to establish the initial amortized cost basis of the PCD loans. As the initial ACL is added to the purchase price, there is no credit loss expense recognized upon acquisition of a PCD loan. Any difference between the unpaid principal balance of PCD loans and the amortized cost basis is considered to relate to non-credit factors and results in a discount or premium. Discounts and premiums are recognized through interest income on a level-yield method over the life of the loans. Loan fees and certain direct loan origination costs are deferred, and the net fee or cost is recognized as an adjustment to interest income using the interest method over the contractual life of the loans. Off-Balance Sheet Credit Exposures. Off-balance sheet credit instruments include commitments to make loans, and commercial letters of credit, issued to meet customer financing needs. The Company's exposure to credit loss in the event of non-performance by the other party to the financial instrument for off-balance sheet loan commitments is represented by the contractual amount of those instruments. Such financial instruments are recorded when they are funded. The ACL on off-balance sheet credit exposures is estimated by loan pool on a quarterly basis under the current CECL model using the same methodologies as portfolio loans, taking into consideration the likelihood that funding will occur and is included in other liabilities on the Company's consolidated balance sheets. The Company records an ACL on off-balance sheet credit exposures, unless the commitments to extend credit are unconditionally cancelable. Foreclosed Real Estate. Real estate acquired by foreclosure or by deed in lieu of foreclosure is initially recorded at fair value less estimated selling costs, establishing a new cost basis. Any costs for development and improvement of the property that are warranted are capitalized. Valuations are

periodically performed by management, and an allowance for losses is established by a charge to operations if the carrying value of a property exceeds its estimated fair value, less estimated selling costs. Loans to facilitate the sale of real estate acquired in foreclosure are discounted if made at less than market rates. Discounts are amortized over the fixed interest period of each loan using the interest method. Premises and Equipment. Premises and equipment are stated at cost less accumulated depreciation and include expenditures for major betterments and renewals. Maintenance, repairs, and minor renewals are expensed as incurred. When property is retired or sold, the retired asset and related accumulated depreciation are removed from the accounts and the resulting gain or loss taken into income. The Company reviews property and equipment for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If such assets are considered to be impaired, the impairment loss recognized is measured by the amount by which the carrying amount exceeds the fair value of the assets. Depreciation is computed by use of straight-line and accelerated methods over the estimated useful lives of the assets. Estimated lives are generally seven to forty years for premises, three to seven years for equipment, and three years for software. Bank Owned Life Insurance. Bank owned life insurance policies are reflected in the condensed consolidated balance sheets at the estimated cash surrender value. Changes in the cash surrender value of these policies, as well as a portion of the insurance proceeds received, are recorded in noninterest income in the condensed consolidated statements of income. Goodwill. The Company's goodwill is evaluated annually for impairment or more frequently if impairment indicators are present. A qualitative assessment is performed to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value is less than the carrying amount, including goodwill. If, based on the evaluation, it is determined to be more likely than not that the fair value is less than the carrying value, then goodwill is tested further for impairment. If the implied fair value of goodwill is lower than its carrying amount, a goodwill impairment is indicated and goodwill is written down to its implied fair value. Subsequent increases in goodwill value are not recognized in the financial statements. As of June 30, 2024, the date of the Company's annual test, there was no impairment indicated, based on a qualitative assessment of goodwill, which considered: the market value of the Company's common stock; concentrations of credit; profitability; nonperforming assets; capital levels; and results of recent regulatory examinations. There was no impairment of goodwill at September 30, 2024. Intangible Assets. The Company's intangible assets at September 30, 2024 included gross core deposit intangibles of $39.1 million with $18.9 million accumulated amortization, gross other identifiable intangibles of $6.4 million with accumulated amortization of $4.3 million, and mortgage and SBA servicing rights of $3.0 million. At June 30, 2024, the Company's intangible assets included gross core deposit intangibles of $39.1 million with $17.8 million accumulated amortization, gross other identifiable intangibles of $6.4 million with accumulated amortization of $4.2 million, and mortgage and SBA servicing rights of $3.0 million. The Company's core deposit and other intangible assets are being amortized using the straight line

method, in accordance with ASC 350, over periods ranging from five to ten years, with amortization expense expected to be approximately $2.6 million in the remainder of fiscal 2025, $3.0 million in fiscal 2026, $2.7 million in fiscal 2027, $2.7 million in fiscal 2028, $2.6 million in fiscal 2029, and $8.8 million thereafter. As of September 30, 2024 and June 30, 2024, there was no impairment of other intangible assets indicated. The Company records mortgage servicing rights (MSR) at fair value for all mortgage loans sold on a servicing retained basis with subsequent adjustments to fair value of MSR in accordance with FASB ASC 860. An estimate of the fair value of the Company's MSR is determined utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. Changes in the fair value of MSR are recorded in loan servicing fees in the consolidated statements of income. Income Taxes. The Company accounts for income taxes in accordance with income tax accounting guidance (ASC 740, Income Taxes). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. The Company determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur. Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances, and information available at the reporting date and is subject to management's judgment. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized. The Company recognizes interest and penalties, if any, on income taxes as a component of income tax expense. The Company files consolidated income tax returns with its subsidiaries, the Bank and SB Real Estate Investments, LLC, with a tax year ended June 30. Southern Bank Real Estate Investments, LLC files a separate REIT return for federal tax purposes, and also files state income tax returns, with a tax year ended December 31. Derivative Financial Instruments and Hedging Activities. The Company enters into derivative financial instruments, primarily interest rate swaps, to manage interest rate risk, facilitate asset/liability management strategies and manage other exposures. Derivative instruments are accounted pursuant to ASC Topic 815, "Derivatives and Hedging", which requires companies to recognize derivative instruments as either assets or liabilities in the consolidated balance sheet. All derivative financial instruments are recognized as other assets or other liabilities, as

applicable, at estimated fair value. The change in each of these financial statement line items is included as operating cash flows in the accompanying consolidated statements of cash flows. The Company does not speculate using derivative instruments. Derivative financial instruments are more fully described in Note 13. Incentive Plans. The Company accounts for its Equity Incentive Plan (EIP), and Omnibus Incentive Plan (OIP) in accordance with ASC 718, "Share-Based Payment." Compensation expense is based on the market price of the Company's stock on the date the shares are granted and is recorded over the vesting period. The difference between the grant-date fair value and the fair value on the date the shares are considered earned represents a tax benefit to the Company that is recorded as an adjustment to income tax expense. Non-Employee Directors' Retirement. The Bank entered into directors' retirement agreements beginning in April 1994 for non-employee directors and continued to do so for new non-employee directors joining the Bank's board through December 2014. These directors' retirement agreements provide that each participating non-employee director (participant) shall receive, upon termination of service on the Board on or after age 60, other than termination for cause, a benefit in equal annual installments over a five year period. The benefit will be based upon the product of the participant's vesting percentage and the total Board fees paid to the participant during the calendar year preceding termination of service on the Board. The vesting percentage shall be determined based upon the participant's years of service on the Board. In the event that the participant dies before collecting any or all of the benefits, the Bank shall pay the participant's beneficiary. Benefits shall not be payable to anyone other than the beneficiary, and shall terminate on the death of the beneficiary. Stock Options. Compensation cost is measured based on the grant-date fair value of the equity instruments issued, and recognized over the vesting period during which an employee provides service in exchange for the award. Earnings Per Share. Basic earnings per share available to common stockholders is computed using the weighted-average number of common shares outstanding. Diluted earnings per share available to common stockholders includes the effect of all weighted-average dilutive potential common shares (stock options and restricted stock grants) outstanding during each period. Comprehensive Income. Comprehensive income consists of net income and other comprehensive income (loss), net of applicable income taxes. Other comprehensive income (loss) includes unrealized depreciation on available-for-sale securities, unrealized depreciation on available-for-sale securities for which a portion of an other-than-temporary impairment has been recognized in income, and changes in the funded status of defined benefit pension plans. Transfers Between Fair Value Hierarchy Levels. Transfers in and out of Level 1 (quoted market prices), Level 2 (other significant observable inputs) and Level 3 (significant unobservable inputs) are recognized on the period ending date. Wealth Management Assets and Fees. Assets managed in fiduciary or investment management accounts by the Company are not included in the consolidated balance sheets since such items are not assets of the Company or its subsidiaries. Fees from fiduciary or investment management activities are recorded on a cash basis over the period in which the service is provided. Fees are generally a function of the market value of assets managed and administered, the volume of

transactions, and fees for other services rendered, as set forth in the agreement between the customer and the Company. This revenue recognition involves the use of estimates and assumptions, including components that are calculated based on asset valuations and transaction volumes. Any out-of-pocket expenses or services not typically covered by the fee schedule for fiduciary activities are charged directly to the account on a gross basis as revenue is incurred. The Southern Wealth Management division, which is a division of the Bank, held fiduciary assets totaling $113.1 million and $100.9 million as of September 30, 2024 and June 30, 2024, respectively, and investment management assets totaling $516.9 million and $474.7 million as of September 30, 2024 and June 30, 2024, respectively. New Accounting Pronouncements: In January 2021, the FASB published ASU 2021-01, “Reference Rate Reform. (Topic 848)”. ASU 2021-01 clarified that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The ASU also amended the expedients and exceptions in Topic 848 to capture the incremental consequences of the scope clarification and to tailor the existing guidance to derivative instruments affected by the discounting transition. An entity may elect to apply the amendments in this update on a full retrospective basis as of any date from the beginning of an interim period that includes or is subsequent to March 12, 2020, or on a prospective basis to new modifications from any date within an interim period that includes or is subsequent to the date of the issuance of a final update, up to the date that financial statements are available to be issued. If an entity elects to apply any of the amendments in this update for an eligible hedging relationship, any adjustments as a result of those elections must be reflected as of the date the entity applies the election. Originally, the amendments in this update did not apply to contract modifications made after December 31, 2022, new hedging relationships entered into after December 31, 2022, and existing hedging relationships evaluated for effectiveness in periods after December 31, 2022 except for hedging relationships existing as of December 31, 2022, that apply certain optional expedients in which the accounting effects are recorded through the end of the hedging relationship (including periods after December 31, 2022). With the issuance of ASU 2022-06 Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848, the sunset date for adoption of ASU 2021-01 was extended from December 31, 2022 to December 31, 2024. The Company is evaluating the impact of this ASU but does not expect it to have a material impact on the Company’s consolidated financial statements. In November 2023, the FASB issued ASU 2023-07, “Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures.” The amendments in this update improve financial reporting by requiring disclosure of incremental segment information on an annual and interim basis for all public entities to enable investors to develop more decision-useful financial analyses. The amendments in this update do not change how a public entity identifies its operating segments, aggregates those operating segments, or applies the quantitative thresholds to determine its reportable segments. The amendments of this ASU are effective for fiscal years beginning after December 15, 2023 and interim periods within fiscal years beginning after December 15, 2024. Adoption of this ASU is not expected to have a material impact on Company’s consolidated financial statements. On December 14, 2023, the FASB published ASU 2023-02, “Investments - Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Tax

Credit Structures Using the Proportional Amortization Method." This ASU permits reporting entities to elect to account for tax equity investments, regardless of the tax credit program for which the income tax credits are received, using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the income tax credits and other income tax benefits received and recognizes the net amortization and income tax credits and other income tax benefits in the income statement as a component of income tax expense. A reporting entity makes an accounting policy election to apply the proportional amortization method on a tax-credit-program-by-tax-credit-program basis rather than electing to apply the proportional amortization method at the reporting entity level or to individual investments. This ASU also requires specific disclosures of investments that generate income tax credits and other income tax benefits from a tax credit program for which the entity has elected to apply the proportional amortization method. The ASU was effective for fiscal years beginning after December 15, 2023, and was effective for the Company beginning July 1, 2024. The adoption of ASU 2023-02 did not have a material impact on the Company's consolidated financial statements. In December 2023, the FASB issued ASU 2023-09, "Income Taxes - Improvements to Income Tax Disclosures (Topic 740)". ASU 2023-09 was issued to address requests by investors and creditors for enhanced transparency and decision usefulness of income tax disclosures. Public business entities (PBEs) would be required to prepare an annual detailed, tabular tax rate reconciliation. All other entities would be required to provide qualitative disclosure on specific categories and individual jurisdictions that result in significant differences between the statutory and effective tax rates. All entities would be required to annually disclose taxes paid disaggregated by federal, state, and foreign taxes, as well as disaggregating taxes by individual jurisdiction if taxes paid exceed 5% of total income taxes paid. The ASU is effective for PBEs for fiscal years beginning after December 15, 2024. The Company does not expect adoption of ASU 2023-09 to have a material impact on its consolidated financial statements. In November 2024, the FASB issued ASU 2024-03, "Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40)". ASU 2024-03 was issued to improve the disclosures about a public business entity's expenses and address requests from investors for more detailed information about the types of expenses (including purchases of inventory, employee compensation, depreciation, amortization, and depletion) in commonly presented expense captions (such as cost of sales, SG&A, and research and development). The ASU is effective for PBEs for fiscal years beginning after December 15, 2026. The Company does not expect adoption of ASU 2024-03 to have a material impact on its consolidated financial statements. Organization. Southern Missouri Bancorp, Inc., a Missouri corporation (the Company) was organized in 1994 and is the parent company of Southern Bank (the Bank). Substantially all of the Company's consolidated revenues are derived from the operations of the Bank, and the Bank represents substantially all of the Company's consolidated assets and liabilities. SB Real Estate Investments, LLC is a wholly-owned subsidiary of the Bank formed to hold Southern Bank Real Estate Investments, LLC. Southern Bank Real Estate Investments, LLC is a real estate investment trust (REIT) which is controlled by SB Real Estate Investments, LLC, and

*has other preferred shareholders in order to meet the requirements to be a REIT. At September 30, 2024, assets of the REIT were approximately $1.3 billion, and consisted primarily of real estate loan participations acquired from the Bank. The Bank is primarily engaged in providing a full range of banking and financial services to individuals and corporate customers in its market areas. The Bank and Company are subject to competition from other financial institutions. The Bank and Company are subject to the regulation of certain federal and state agencies and undergo periodic examinations by those regulatory authorities. 1300000000 Basis of Financial Statement Presentation. The condensed consolidated financial statements of the Company have been prepared in conformity with accounting principles generally accepted in the United States of America and general practices within the banking industry. In the normal course of business, the Company encounters two significant types of risk: economic and regulatory. Economic risk is comprised of interest rate risk, credit risk, and market risk. The Company is subject to interest rate risk to the degree that its interest-bearing liabilities reprice on a different basis than its interest-earning assets. Credit risk is the risk of default on the Company's investment or loan portfolios resulting from the borrowers' inability or unwillingness to make contractually required payments. Market risk reflects changes in the value of the investment portfolio, collateral underlying loans receivable, and the value of the Company's investments in real estate. Principles of Consolidation. The condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. Cash and Cash Equivalents. For purposes of reporting cash flows, cash and cash equivalents includes cash, due from depository institutions and interest-bearing deposits in other depository institutions with original maturities of three months or less. Interest-bearing deposits in other depository institutions were $20.4 million and $7.7 million at September 30, 2024 and June 30, 2024, respectively. The deposits are held in various commercial banks with a total of $1.8 million and $2.3 million exceeding the FDIC's deposit insurance limits at September 30, 2024 and June 30, 2024, respectively, as well as at the Federal Reserve and the Federal Home Loan Banks of Des Moines and Chicago.
2040000077000001800000230000 Interest-bearing Time Deposits. Interest bearing time deposits in banks mature within three years and are carried at cost. P3Y Available for Sale Securities. Available for sale securities (AFS), which include any security for which the Company has no immediate plan to sell but which may be sold in the future, are carried at fair value. Unrealized gains and losses, net of tax, are reported in accumulated other comprehensive loss, a component of stockholders' equity. All securities have been classified as available for sale. Premiums and discounts on debt securities are amortized or accreted as adjustments to income over the estimated life of the security using the level yield method. Realized gains or losses on the sale of securities is based on the specific identification method. The fair value of securities is based on quoted market prices or dealer quotes. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities. The Company does not invest in collateralized mortgage obligations that are considered high risk. <p style="font-family:'Times New Roman','Times','serif';font-*

size:10pt;margin:0pt 0pt 10pt 0pt;">For AFS securities with fair value less than amortized cost that management has no intent to sell and believes that it more likely than not will not be required to sell prior to recovery, only the credit loss component of the impairment is recognized in earnings, while the noncredit loss is recognized in accumulated other comprehensive loss. The credit loss component recognized in earnings is identified as the amount of principal cash flows not expected to be received over the remaining term of the security as projected based on cash flow projections, and is recorded to the Allowance for Credit Losses ("ACL"), by a charge to provision for credit losses. Accrued interest receivable is excluded from the estimate of credit losses. Both the ACL and the adjustment to net income may be reversed if conditions change. However, if the Company intends to sell an impaired AFS security, or, if it is more likely than not the Company will be required to sell such a security before recovering its amortized cost basis, the entire impairment amount would be recognized in earnings with a corresponding adjustment to the security's amortized cost basis. Because the security's amortized cost basis is adjusted to fair value, there is no ACL in this situation. The Company evaluates impaired AFS securities at the individual level on a quarterly basis, and considers factors including, but not limited to: the extent to which the fair value of the security is less than the amortized cost basis; adverse conditions specifically related to the security, an industry, or geographic area; the payment structure of the security and likelihood of the issuer to be able to make payments that may increase in the future; failure of the issuer to make scheduled interest or principal payments; any changes to the rating of the security by a rating agency; and the ability and intent to hold the security until maturity. A qualitative determination as to whether any portion of the impairment is attributable to credit risk is acceptable. There were no credit-related factors underlying unrealized losses on AFS securities at September 30, 2024, or June 30, 2024. Changes in the ACL are recorded as expense. Losses are charged against the ACL when management believes the uncollectability of an AFS debt security is confirmed or when either of the criteria regarding intent or requirement to sell is met. Federal Reserve Bank and Federal Home Loan Bank Stock. The Bank is a member of the Federal Reserve and the Federal Home Loan Bank (FHLB) systems. Capital stock of the Federal Reserve and the FHLB is a required investment of the Bank based upon a predetermined formula and is carried at cost. Loans. Loans are generally stated at unpaid principal balances, less the ACL, any net deferred loan origination fees, and unamortized premiums or discounts on purchased loans. Interest on loans is accrued based upon the principal amount outstanding. The accrual of interest on loans is discontinued when, in management's judgment, the collectability of interest or principal in the normal course of business is doubtful. The Company complies with regulatory guidance which indicates that loans should be placed in nonaccrual status when 90 days past due, unless the loan is both well-secured and in the process of collection. A loan that is "in the process of collection" may be subject to legal action or, in appropriate circumstances, through other collection efforts reasonably expected to result in repayment or restoration to current status in the near future. A loan is considered delinquent when a payment has not been made by the contractual due date. Interest income previously accrued but not collected at the date a loan is placed on nonaccrual status is reversed against interest income. Cash receipts on a nonaccrual loan are applied to principal and interest in accordance with its contractual terms unless full payment of principal is not expected, in which case cash receipts, whether designated as principal or interest, are applied as a reduction of the carrying value of the loan. A

nonaccrual loan is generally returned to accrual status when principal and interest payments are current, full collectability of principal and interest is reasonably assured, and a consistent record of performance has been demonstrated. The ACL is a valuation account that is deducted from the loans' amortized cost basis to present the net amount expected to be collected on the loans, and is established through a provision for credit losses (PCL) charged to current earnings. The ACL is increased by the provision for credit losses on loans charged to expense and reduced by loans charged off, net of recoveries. Loans are charged off in the period deemed uncollectible, based on management's analysis of expected cash flows (for non-collateral dependent loans) or collateral value (for collateral-dependent loans). Subsequent recoveries of loans previously charged off, if any, are credited to the allowance when received. Management estimates the ACL using relevant available information, from internal and external sources, relating to past events, current conditions, and reasonable and supportable forecasts. Adjustments may be made to historical loss information for differences identified in current loan-specific risk characteristics, such as differences in underwriting standards or terms; lending review systems; experience, ability, or depth of lending management and staff; portfolio growth and mix; delinquency levels and trends; as well as for changes in environmental conditions, such as changes in economic activity or employment, agricultural economic conditions, property values, or other relevant factors. The Company generally incorporates a reasonable and supportable forecast period of four quarters, and a four-quarter, straight-line reversion period to return to long-term historical averages. The ACL is measured on a collective (pool) basis when similar risk characteristics exist. For loans that do not share general risk characteristics with the collectively evaluated pools, the Company estimates credit losses on an individual loan basis, and these loans are excluded from the collectively evaluated pools. An ACL for an individually evaluated loan is recorded when the amortized cost basis of the loan exceeds the discounted estimated cash flows using the loan's initial effective interest rate or the fair value, less estimated costs to sell, of the collateral for certain collateral-dependent loans. For the collectively evaluated pools, the Company segments the loan portfolio primarily by loan purpose and collateral into 24 pools, which are homogeneous groups of loans that possess similar loss potential characteristics. The Company primarily utilizes the discounted cash flow (DCF) methodology for measurement of the required ACL. For a limited number of pools with a relatively small balance of unpaid principal, the Company utilizes the remaining life method. The DCF model implements probability of default (PD) and loss given default (LGD) calculations at the instrument level. PD and LGD are determined based on statistical analysis and correlation of historical losses with various economic factors over time. In general, the Company's losses have not correlated well with economic factors, and the Company has utilized peer data where more appropriate. The Company defines a default to include an event of charge off, an adverse (substandard or worse) internal credit rating, becoming delinquent 90 days or more, or being placed on nonaccrual status. A PD/LGD estimate is applied to a projected model of the loan's cashflow, including principal and interest payments, with consideration for prepayment speeds, principal curtailments, and recovery lag. Loans acquired in a business combination that have experienced more-than-insignificant deterioration in credit quality since origination are considered purchased credit deteriorated (PCD) loans. At the acquisition date, an estimate of expected credit losses is made for groups of PCD loans with similar risk characteristics and individual PCD loans without similar risk characteristics. This initial ACL is allocated to individual PCD loans and added to the purchase price or acquisition date fair values to establish the initial amortized cost basis of the PCD loans. As the initial ACL is added to the purchase price, there is no credit loss expense recognized upon acquisition of a

PCD loan. Any difference between the unpaid principal balance of PCD loans and the amortized cost basis is considered to relate to non-credit factors and results in a discount or premium. Discounts and premiums are recognized through interest income on a level-yield method over the life of the loans. Loan fees and certain direct loan origination costs are deferred, and the net fee or cost is recognized as an adjustment to interest income using the interest method over the contractual life of the loans. 24 Off-Balance Sheet Credit Exposures. Off-balance sheet credit instruments include commitments to make loans, and commercial letters of credit, issued to meet customer financing needs. The Company's exposure to credit loss in the event of non-performance by the other party to the financial instrument for off-balance sheet loan commitments is represented by the contractual amount of those instruments. Such financial instruments are recorded when they are funded. The ACL on off-balance sheet credit exposures is estimated by loan pool on a quarterly basis under the current CECL model using the same methodologies as portfolio loans, taking into consideration the likelihood that funding will occur and is included in other liabilities on the Company's consolidated balance sheets. The Company records an ACL on off-balance sheet credit exposures, unless the commitments to extend credit are unconditionally cancelable. Foreclosed Real Estate. Real estate acquired by foreclosure or by deed in lieu of foreclosure is initially recorded at fair value less estimated selling costs, establishing a new cost basis. Any costs for development and improvement of the property that are warranted are capitalized. Valuations are periodically performed by management, and an allowance for losses is established by a charge to operations if the carrying value of a property exceeds its estimated fair value, less estimated selling costs. Loans to facilitate the sale of real estate acquired in foreclosure are discounted if made at less than market rates. Discounts are amortized over the fixed interest period of each loan using the interest method. Premises and Equipment. Premises and equipment are stated at cost less accumulated depreciation and include expenditures for major betterments and renewals. Maintenance, repairs, and minor renewals are expensed as incurred. When property is retired or sold, the retired asset and related accumulated depreciation are removed from the accounts and the resulting gain or loss taken into income. The Company reviews property and equipment for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If such assets are considered to be impaired, the impairment loss recognized is measured by the amount by which the carrying amount exceeds the fair value of the assets. Depreciation is computed by use of straight-line and accelerated methods over the estimated useful lives of the assets. Estimated lives are generally seven to forty years for premises, three to seven years for equipment, and three years for software. P40YP7YP3Y Bank Owned Life Insurance. Bank owned life insurance policies are reflected in the condensed consolidated balance sheets at the estimated cash surrender value. Changes in the cash surrender value of these policies, as well as a

portion of the insurance proceeds received, are recorded in noninterest income in the condensed consolidated statements of income. Goodwill. The Company's goodwill is evaluated annually for impairment or more frequently if impairment indicators are present. A qualitative assessment is performed to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value is less than the carrying amount, including goodwill. If, based on the evaluation, it is determined to be more likely than not that the fair value is less than the carrying value, then goodwill is tested further for impairment. If the implied fair value of goodwill is lower than its carrying amount, a goodwill impairment is indicated and goodwill is written down to its implied fair value. Subsequent increases in goodwill value are not recognized in the financial statements. As of June 30, 2024, the date of the Company's annual test, there was no impairment indicated, based on a qualitative assessment of goodwill, which considered: the market value of the Company's common stock; concentrations of credit; profitability; nonperforming assets; capital levels; and results of recent regulatory examinations. There was no impairment of goodwill at September 30, 2024. 00 Intangible Assets. The Company's intangible assets at September 30, 2024 included gross core deposit intangibles of $39.1 million with $18.9 million accumulated amortization, gross other identifiable intangibles of $6.4 million with accumulated amortization of $4.3 million, and mortgage and SBA servicing rights of $3.0 million. At June 30, 2024, the Company's intangible assets included gross core deposit intangibles of $39.1 million with $17.8 million accumulated amortization, gross other identifiable intangibles of $6.4 million with accumulated amortization of $4.2 million, and mortgage and SBA servicing rights of $3.0 million. The Company's core deposit and other intangible assets are being amortized using the straight line method, in accordance with ASC 350, over periods ranging from five to ten years, with amortization expense expected to be approximately $2.6 million in the remainder of fiscal 2025, $3.0 million in fiscal 2026, $2.7 million in fiscal 2027, $2.7 million in fiscal 2028, $2.6 million in fiscal 2029, and $8.8 million thereafter. As of September 30, 2024 and June 30, 2024, there was no impairment of other intangible assets indicated. The Company records mortgage servicing rights (MSR) at fair value for all mortgage loans sold on a servicing retained basis with subsequent adjustments to fair value of MSR in accordance with FASB ASC 860. An estimate of the fair value of the Company's MSR is determined utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. Changes in the fair value of MSR are recorded in loan servicing fees in the consolidated statements of income.
* 391000001890000006400000430000030000000.039100000178000006400000420006the straight line methodP10Y26000003000000.027000002700000260000088000000000 The Company records mortgage servicing rights (MSR) at fair value for all mortgage loans sold on a servicing retained basis with subsequent adjustments to fair value of MSR in accordance with FASB ASC 860. An estimate of the fair value of the Company's MSR is determined utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. Changes in the fair value of MSR are recorded in loan servicing fees in the consolidated statements of income. Derivative Financial Instruments and Hedging Activities. The Company enters into derivative financial*

instruments, primarily interest rate swaps, to manage interest rate risk, facilitate asset/liability management strategies and manage other exposures. Derivative instruments are accounted pursuant to ASC Topic 815, “Derivatives and Hedging”, which requires companies to recognize derivative instruments as either assets or liabilities in the consolidated balance sheet. All derivative financial instruments are recognized as other assets or other liabilities, as applicable, at estimated fair value. The change in each of these financial statement line items is included as operating cash flows in the accompanying consolidated statements of cash flows. The Company does not speculate using derivative instruments. Derivative financial instruments are more fully described in Note 13. Incentive Plans. The Company accounts for its Equity Incentive Plan (EIP), and Omnibus Incentive Plan (OIP) in accordance with ASC 718, “Share-Based Payment.” Compensation expense is based on the market price of the Company’s stock on the date the shares are granted and is recorded over the vesting period. The difference between the grant-date fair value and the fair value on the date the shares are considered earned represents a tax benefit to the Company that is recorded as an adjustment to income tax expense. Non-Employee Directors’ Retirement. The Bank entered into directors’ retirement agreements beginning in April 1994 for non-employee directors and continued to do so for new non-employee directors joining the Bank’s board through December 2014. These directors’ retirement agreements provide that each participating non-employee director (participant) shall receive, upon termination of service on the Board on or after age 60, other than termination for cause, a benefit in equal annual installments over a five year period. The benefit will be based upon the product of the participant’s vesting percentage and the total Board fees paid to the participant during the calendar year preceding termination of service on the Board. The vesting percentage shall be determined based upon the participant’s years of service on the Board. In the event that the participant dies before collecting any or all of the benefits, the Bank shall pay the participant’s beneficiary. Benefits shall not be payable to anyone other than the beneficiary, and shall terminate on the death of the beneficiary. P5Y Stock Options. Compensation cost is measured based on the grant-date fair value of the equity instruments issued, and recognized over the vesting period during which an employee provides service in exchange for the award. Earnings Per Share. Basic earnings per share available to common stockholders is computed using the weighted-average number of common shares outstanding. Diluted earnings per share available to common stockholders includes the effect of all weighted-average dilutive potential common shares (stock options and restricted stock grants) outstanding during each period. Comprehensive Income. Comprehensive income consists of net income and other comprehensive income (loss), net of applicable income taxes. Other comprehensive income (loss) includes unrealized depreciation on available-for-sale securities, unrealized depreciation on available-for-sale securities for which a portion of an other-than-temporary impairment has been recognized in income, and changes in the funded status of defined benefit pension plans. Transfers Between Fair Value Hierarchy Levels. Transfers in and out of Level 1 (quoted market prices), Level 2 (other significant observable inputs) and Level 3 (significant unobservable inputs) are recognized on the period ending date. Wealth Management Assets and Fees. Assets managed in fiduciary

***or investment management accounts by the Company are not included in the consolidated balance sheets since such items are not assets of the Company or its subsidiaries. Fees from fiduciary or investment management activities are recorded on a cash basis over the period in which the service is provided. Fees are generally a function of the market value of assets managed and administered, the volume of transactions, and fees for other services rendered, as set forth in the agreement between the customer and the Company. This revenue recognition involves the use of estimates and assumptions, including components that are calculated based on asset valuations and transaction volumes. Any out-of-pocket expenses or services not typically covered by the fee schedule for fiduciary activities are charged directly to the account on a gross basis as revenue is incurred. The Southern Wealth Management division, which is a division of the Bank, held fiduciary assets totaling $113.1 million and $100.9 million as of September 30, 2024 and June 30, 2024, respectively, and investment management assets totaling $516.9 million and $474.7 million as of September 30, 2024 and June 30, 2024, respectively.11310000010090000051690000047470000 New Accounting Pronouncements: In January 2021, the FASB published ASU 2021-01, “Reference Rate Reform. (Topic 848)”. ASU 2021-01 clarified that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The ASU also amended the expedients and exceptions in Topic 848 to capture the incremental consequences of the scope clarification and to tailor the existing guidance to derivative instruments affected by the discounting transition. An entity may elect to apply the amendments in this update on a full retrospective basis as of any date from the beginning of an interim period that includes or is subsequent to March 12, 2020, or on a prospective basis to new modifications from any date within an interim period that includes or is subsequent to the date of the issuance of a final update, up to the date that financial statements are available to be issued. If an entity elects to apply any of the amendments in this update for an eligible hedging relationship, any adjustments as a result of those elections must be reflected as of the date the entity applies the election. Originally, the amendments in this update did not apply to contract modifications made after December 31, 2022, new hedging relationships entered into after December 31, 2022, and existing hedging relationships evaluated for effectiveness in periods after December 31, 2022 except for hedging relationships existing as of December 31, 2022, that apply certain optional expedients in which the accounting effects are recorded through the end of the hedging relationship (including periods after December 31, 2022). With the issuance of ASU 2022-06 Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848, the sunset date for adoption of ASU 2021-01 was extended from December 31, 2022 to December 31, 2024. The Company is evaluating the impact of this ASU but does not expect it to have a material impact on the Company’s consolidated financial statements. In November 2023, the FASB issued ASU 2023-07, “Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures.” The amendments in this update improve financial reporting by requiring disclosure of incremental segment information on an annual and interim basis for all public entities to enable investors to develop more decision-useful financial analyses. The amendments in this update do not change how a public entity identifies its operating segments, aggregates those operating segments, or applies the quantitative thresholds to determine its reportable segments. The amendments of this ASU are effective for fiscal years beginning after December 15, 2023 and interim periods within fiscal years beginning after December 15, 2024. Adoption of this ASU is not expected to have a material impact on Company’s consolidated financial statements. ***

* On December 14, 2023, the FASB published ASU 2023-02, “Investments - Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method.” This ASU permits reporting entities to elect to account for tax equity investments, regardless of the tax credit program for which the income tax credits are received, using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the income tax credits and other income tax benefits received and recognizes the net amortization and income tax credits and other income tax benefits in the income statement as a component of income tax expense. A reporting entity makes an accounting policy election to apply the proportional amortization method on a tax-credit-program-by-tax-credit-program basis rather than electing to apply the proportional amortization method at the reporting entity level or to individual investments. This ASU also requires specific disclosures of investments that generate income tax credits and other income tax benefits from a tax credit program for which the entity has elected to apply the proportional amortization method. The ASU was effective for fiscal years beginning after December 15, 2023, and was effective for the Company beginning July 1, 2024. The adoption of ASU 2023-02 did not have a material impact on the Company’s consolidated financial statements. In December 2023, the FASB issued ASU 2023-09, “Income Taxes - Improvements to Income Tax Disclosures (Topic 740)”. ASU 2023-09 was issued to address requests by investors and creditors for enhanced transparency and decision usefulness of income tax disclosures. Public business entities (PBEs) would be required to prepare an annual detailed, tabular tax rate reconciliation. All other entities would be required to provide qualitative disclosure on specific categories and individual jurisdictions that result in significant differences between the statutory and effective tax rates. All entities would be required to annually disclose taxes paid disaggregated by federal, state, and foreign taxes, as well as disaggregating taxes by individual jurisdiction if taxes paid exceed 5% of total income taxes paid. The ASU is effective for PBEs for fiscal years beginning after December 15, 2024. The Company does not expect adoption of ASU 2023-09 to have a material impact on its consolidated financial statements. In November 2024, the FASB issued ASU 2024-03, “Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40)”. ASU 2024-03 was issued to improve the disclosures about a public business entity’s expenses and address requests from investors for more detailed information about the types of expenses (including purchases of inventory, employee compensation, depreciation, amortization, and depletion) in commonly presented expense captions (such as cost of sales, SG&A, and research and development). The ASU is effective for PBEs for fiscal years beginning after December 15, 2026. The Company does not expect adoption of ASU 2024-03 to have a material impact on its consolidated financial statements. Note 3: Available for Sale Securities The amortized cost, gross unrealized*

gains, gross unrealized losses, ACL, and approximate fair value of securities available for sale consisted of the following: <table style="border-collapse:collapse;font-size:16pt;height:max-content;margin-left:auto;margin-right:auto;padding-left:0pt;padding-right:0pt;width:100%;"><tr style="height:1pt;"><td style="vertical-align:bottom;width:48.36%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.64%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.03%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:7.83%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.64%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.04%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:7.01%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.64%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.03%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:7.56%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.64%;margin:0pt;padding:0pt;"> <div

The unrealized losses on the Company’s investments in obligations of state and political subdivisions include four individual securities which have been in an unrealized loss position for less than 12 months and 40 individual securities which have been in an unrealized loss position for more than 12 months. The securities are performing and are of high credit quality. The unrealized losses were caused by increases in market interest rates since purchase or acquisition. Because the Company does not intend to sell these securities and it is more likely than not that the Company will not be required to sell these securities prior to recovery of their amortized cost basis, which may be maturity, the Company has not recorded an ACL on these securities. Corporate and Other Obligations. The unrealized losses on the Company’s investments in corporate obligations include one security which has been in an unrealized loss position for less than 12 months and 17 individual securities which have been in an unrealized loss position for more than 12 months. The securities are performing and are of high credit quality. The unrealized losses were caused by increases in market interest rates since purchase or acquisition. Because the Company does not intend to sell these securities and it is more likely than not that the Company will not be required to sell these securities prior to recovery of their amortized cost basis, which may be maturity, the Company has not recorded an ACL on these securities. Asset-Backed Securities. The unrealized losses on the Company’s investments in asset-backed securities include no individual securities which have been in an unrealized loss position for less than 12 months and five individual securities which have been in an unrealized loss position for more than 12 months. The securities are performing and are of high credit quality. The unrealized loss was caused by variations in market interest rates since purchase or acquisition. Because the Company does not intend to sell these securities and it is more likely than not that the Company will not be required to sell these securities prior to recovery of their amortized cost basis, which may be maturity, the Company has not recorded an ACL on these securities. MBS and CMOs. The unrealized losses on the Company’s investments in MBS and CMOs include six individual securities which have been in an unrealized

loss position for less than 12 months, and 107 individual securities which have been in an unrealized loss position for 12 months or more. The securities are performing and are of high credit quality. The unrealized losses were caused by increases in market interest rates since purchase or acquisition. Because the Company does not intend to sell these securities and it is more likely than not that the Company will not be required to sell these securities prior to recovery of their amortized cost basis, which may be maturity, the Company has not recorded an ACL on these securities. The Company does not believe that any individual unrealized loss as of September 30, 2024, is the result of a credit loss. However, the Company could be required to recognize an ACL in future periods with respect to its available for sale investment securities portfolio. Credit Losses Recognized on Investments. There were no credit losses recognized in income and other losses or recorded in other comprehensive loss for the three-month periods ended September 30, 2024 and 2023. <table style="border-collapse:collapse;font-size:16pt;height:max-content;margin-left:auto;margin-right:auto;padding-left:0pt;padding-right:0pt;width:100%;"><tr style="height:1pt;"><td style="vertical-align:bottom;width:48.36%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.64%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.03%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:7.83%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.64%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.04%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:7.01%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.64%;margin:0pt;padding:0pt;"> <p style="font-family:'Times New

At September 30, 2024, the Bank had purchased participations in 78 loans totaling $208.5 million, as compared to 71 loans totaling $178.5 million at June 30, 2024. 1-4 Residential Real Estate Lending. The Company actively originates loans for the acquisition or refinance of one- to four-family residences. This category includes both fixed-rate and adjustable-rate mortgage ("ARM") loans amortizing over periods of up to 30 years, and the properties securing such loans may be owner-occupied or non-owner-occupied.

Single-family residential loans do not generally exceed 90% of the lower of the appraised value or purchase price of the secured property. Substantially all of the one-to four-family residential mortgage originations in the Company's portfolio are located within the Company's primary lending area. General risks related to one- to four-family residential lending include stability of borrower income and collateral values. Home equity lines of credit (HELOCs) are secured with a deed of trust and are generally issued up to 90% of the appraised or estimated value of the property securing the line of credit, less the outstanding balance on the first mortgage and are typically issued for a term of ten years. Interest rates on HELOCs are generally adjustable. Interest rates are based upon the loan-to-value ratio of the property with better rates given to borrowers with more equity. Risks related to HELOC lending generally include the stability of borrower income and collateral values. Non-Owner Occupied and Owner Occupied Commercial Real Estate Lending. The Company actively originates loans secured by owner- and non-owner-occupied commercial real estate including single- and multi-tenant retail properties, restaurants, hotels, land (improved and unimproved), nursing homes and other healthcare facilities, warehouses and distribution centers, convenience stores, automobile dealerships and other automotive-related services, and other businesses. These properties are typically owned and operated by borrowers headquartered within the Company's primary lending area, however, the property may be located outside the Company's primary lending area. Approximately $626.3 million of the Company's $1.6 billion in commercial real estate loans are secured by properties located outside our primary lending area. Risks to owner-occupied commercial real estate lending generally include the continued profitable operation of the borrower's enterprise, as well as general collateral values, and may be heightened by unique, specific uses of the property serving as collateral. Non-owner-occupied commercial real estate lending risks include tenant demand and performance, lease rates, and vacancies, as well as collateral values and borrower leverage. These factors may be influenced by general economic conditions in the region, or in the United States generally. Most commercial real estate loans originated by the Company generally are based on amortization schedules of up to 25 years with monthly principal and interest payments. Generally, the interest rate received on these loans is fixed for a maturity for up to ten years, with a balloon payment due at maturity. Alternatively, for some loans, the interest rate adjusts at least annually after an initial period up to seven years. The Company typically includes an interest rate "floor" in the loan agreement. Generally, improved commercial real estate loan amounts do not exceed 80% of the lower of the appraised value or the purchase price of the secured property. Multi-family Real Estate Lending. The Company originates loans secured by multi-family residential properties that are often located outside the Company's primary lending area but made to borrowers who operate within the Company's primary market area. The majority of the multi-family residential loans that are originated by the Company are amortized over periods generally up to 25 years, with balloon maturities typically up to ten years. Both fixed and adjustable interest rates are offered and it is typical for the Company to include an interest rate "floor" and "ceiling" in the loan agreement. Generally, multi-family residential loans do not exceed 85% of the lower of the appraised value or purchase price of the secured property. General risks related to multi-family residential lending include rental demand and supply, rental rates, and vacancies, as well as collateral values and borrower leverage. Construction and Land Development Lending. The Company originates real estate loans secured by property or land that is under construction or development. Construction and land development loans originated by the Company are generally to finance the construction of owner occupied residential real estate, or to finance speculative

construction of residential real estate, land development, or owner-operated or non-owner occupied commercial real estate. During construction, these loans typically require monthly interest-only payments, with single-family residential construction loans having maturities ranging from six to twelve months, while multi-family or commercial construction loans typically mature in 12 to 36 months. Once construction is completed, construction loans may be converted to permanent financing with monthly payments using amortization schedules of up to 30 years on residential and generally up to 25 years on commercial real estate. Construction and land development lending risks generally include successful timely and on-budget completion of the project, followed by the sale of the property in the case of land development or non-owner-occupied real estate, or the long-term occupancy of the property by the builder in the case of owner-occupied construction. Changes in real estate values or other economic conditions may impact the ability of a borrower to sell property developed for that purpose. While the Company typically utilizes relatively short maturity periods to closely monitor the inherent risks associated with construction loans for these loans, weather conditions, change orders, availability of materials and/or labor, and other factors may contribute to the lengthening of a project, thus necessitating the need to renew the construction loan at the balloon maturity. Such extensions are typically executed in incremental three month periods to facilitate project completion. During construction, loans typically require monthly interest only payments which may allow the Company an opportunity to monitor for early signs of financial difficulty should the borrower fail to make a required monthly payment. Additionally, during the construction phase, the Company typically performs interim inspections which further provide the Company an opportunity to assess risk. Agriculture Production and Agriculture Real Estate Lending. Agriculture production and agriculture real estate loans are generally comprised on seasonal operating lines to farmers to plant crops and term loans to fund the purchase of equipment, farmland, or livestock. This segment of lending includes pastureland and row crop ground. The Company originates substantially all agriculture production and agriculture real estate lending to borrowers headquartered in the Company's primary lending area. Specific underwriting standards have been established for agricultural-related loans including the establishment of projections for each operating year based on industry developed estimates of farm input costs and expected commodity yields and prices. Agriculture production operating lines are typically written for one year and secured by the crop. Agricultural real estate terms offered usually have amortization schedules of up to 25 years with an 80% loan-to-value ratio, or 30 years with a 75% loan-to-value ratio. Risks to agricultural lending include unique factors such as commodity prices, yields, input costs, and weather, as well as farmland and farm equipment values. Commercial and Industrial Lending. The Company's commercial and industrial lending activities encompass loans with a variety of purposes and security, including loans to finance accounts receivable, inventory, equipment and operating lines of credit. The Company offers both fixed and adjustable rate commercial and industrial loans. Generally, commercial loans secured by fixed assets are amortized

over periods up to five years. Commercial and industrial lending risk is primarily driven by the borrower's successful generation of cash flow from their business enterprise sufficient to service debt, and may be influenced by factors specific to the borrower and industry, or by general economic conditions in the region or in the United States generally. Consumer Lending. The Company offers a variety of secured consumer loans, including home equity, direct and indirect automobile loans, second mortgages, recreational vehicle loans and loans secured by deposits. The Company originates substantially all of its consumer loans in its primary lending area. Usually, consumer loans are originated with fixed rates for terms of up to 66 months, with the exception of home equity lines of credit, which are variable, tied to the prime rate of interest and are for a period of ten years. Automobile loans originated by the Company include both direct loans and a smaller amount of loans originated by auto dealers. Typically, automobile loans are made for terms of up to 66 months for new and used vehicles. Loans secured by automobiles have fixed rates and are generally made in amounts up to 100% of the purchase price of the vehicle. Risks to automobile and other consumer lending generally include the stability of borrower income and borrower willingness to repay. Allowance for Credit Losses. The PCL for the three-month period ended September 30, 2024, was $2.2 million compared to $900,000 in the same period of the prior fiscal year. The current period PCL was the result of a $2.0 million provision attributable to the ACL for loan balances outstanding, and a $138,000 provision attributable to the allowance for off-balance sheet credit exposures. The Company has estimated its expected credit losses as of September 30, 2024, under ASC 326-20, and management believes the ACL as of that date was adequate based on that estimate. There remains, however, significant uncertainty as the Federal Reserve has tightened monetary policy to address inflation risks. Qualitative adjustments in the Company's ACL model were slightly decreased compared to June 30, 2024. The Company increased the allowance attributable to classified hotel loans that have been slow to recover from the COVID-19 pandemic. Additionally, PCL was required due to loan growth in the first quarter of fiscal year 2025 and a slight increase in modeled expected losses due to a modest increase in the unemployment rate expectations. As a percentage of average loans outstanding, the Company recorded net charge offs of 0.01% (annualized) during the current period, as compared to 0.03% for the same period of the prior fiscal year. Specifically, management considered the following primary qualitative items in its estimate of the ACL: - ● economic conditions and projections as provided by the Federal Open Market Committee (FOMC) were utilized in the Company's estimate at September 30, 2024. Economic factors considered in the projections included national levels of unemployment using the high bound of the FOMC's central tendency, and national rates of inflation-adjusted growth in the gross domestic product using the low bound of the FOMC's central tendency. Economic conditions are considered to be a moderate and stable risk factor, relative to June 30, 2024; - ● the pace of growth of the Company's loan portfolio, exclusive of acquisitions, relative to overall economic growth. This measure is considered to be a moderate and slightly decreasing risk factor, relative to June 30, 2024; -</

* ● levels and trends for loan delinquencies nationally and in the region. This is considered to be a low and stable risk factor, relative to June 30, 2024; ● quantified supported model adjustments and general imprecision adjustments. This factor was added for the June 30, 2024, ACL estimate as certain model adjustments capture highly specific issues or events that are not adequately captured in model outcomes. General imprecision adjustments address other sources of imprecision that are not specifically identifiable or quantifiable to a particular loan portfolio and have not been captured by the model or by a specific model adjustment. The Company considers general imprecision in three dimensions; economic forecast imprecision, model imprecision, and process imprecision. PCD Loans. In connection with the acquisition of Citizens Bancshares Co. (Citizens) on January 20, 2023, and Fortune Financial Corporation (Fortune) on February 25, 2022, the Company acquired loans both with and without evidence of credit quality deterioration since origination. Acquired loans are recorded at their fair value at the time of acquisition with no carryover from the acquired institution's previously recorded allowance for loan and lease losses. Acquired loans are accounted for under ASC 326, Financial Instruments – Credit Losses. The fair value of acquired loans recorded at the time of acquisition is based upon several factors, including the timing and payment of expected cash flows, as adjusted for estimated credit losses and prepayments, and then discounting these cash flows using comparable market rates. The resulting fair value adjustment is recorded in the form of a premium or discount to the unpaid principal balance of the respective loans. As it relates to acquired loans that, as of the date of acquisition, have experienced a more-than-insignificant deterioration in credit quality since origination, the net premium or net discount is adjusted to reflect the Company's allowance for credit losses recorded for PCD loans at the time of acquisition, and the remaining fair value adjustment is accreted or amortized into interest income over the remaining life of the respective loans. As it relates to loans not classified as PCD (non-PCD) loans, the credit loss and yield components of their fair value adjustment are aggregated, and the resulting net premium or net discount is accreted or amortized into interest income over the remaining life of the respective loans. The Company records an ACL for non-PCD loans at the time of acquisition through provision expense, and therefore, no further adjustments are made to the net premium or net discount for non-PCD loans. Loans that the Company acquired from Citizens and Fortune, that at the time of acquisition had more-than-insignificant deterioration of credit quality since origination, are classified as PCD loans and presented in the tables below at acquisition carrying value: <table style="border-collapse:collapse;font-size:16pt;height:max-content;padding-left:0pt;padding-right:0pt;width:100%;"><tr style="height:1pt;"><td style="vertical-align:bottom;white-space:nowrap;width:71.57%;margin:0pt;padding:0pt;"> <span style="font-*

Credit Quality Indicators. The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. This analysis is performed on all loans at origination and is updated on a quarterly basis for loans risk rated Watch, Special Mention, Substandard, or Doubtful. In addition, lending relationships of $3 million or more, exclusive of any consumer or owner-occupied residential loan, are subject to an annual credit analysis which is prepared by the loan administration department and presented to a loan committee with appropriate lending authority. A sample of lending relationships in excess of $1 million (exclusive of single-family residential real estate loans) are subject to an independent loan review annually, in order to verify risk ratings. The Company uses the following definitions for risk ratings: Watch – Loans classified as watch exhibit weaknesses that require more than usual monitoring. Issues may include deteriorating financial condition, payments made after due date but within 30 days, adverse industry conditions or management problems. Special Mention – Loans classified as special mention exhibit signs of further deterioration but still generally make payments within 30 days. This is a transitional rating and loans should typically not be rated Special Mention for more than 12 months. Substandard – Loans classified as substandard possess weaknesses that jeopardize the ultimate collection of the principal and interest outstanding. These loans exhibit continued financial losses, ongoing delinquency, overall poor financial condition, and insufficient collateral. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected. Doubtful – Loans classified as doubtful have all the weaknesses of substandard loans, and have deteriorated to the level that there is a high probability of substantial loss. Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be Pass rated loans. A periodic review of selected credits (based on loan size and type) is conducted to identify loans with heightened risk or probable losses and to assign risk grades. The

primary responsibility for this review rests with loan administration personnel. This review is supplemented with periodic examinations of both selected credits and the credit review process by the Company's internal audit function and applicable regulatory agencies. The information from these reviews assists management in the timely identification of problems and potential problems and provides a basis for deciding whether the credit continues to share similar risk characteristics with collectively evaluated loan pools, or whether credit losses for the loan should be evaluated on an individual loan basis. The following table presents the credit risk profile of the Company's loan portfolio (excluding deferred loan fees) based on rating category and fiscal year of origination as of September 30, 2024. This table includes PCD loans, which are reported according to risk categorization after acquisition based on the Company's standards for such classification: <table style="border-collapse:collapse;font-size:16pt;height:max-content;margin-left:-6.3981056%;padding-left:0pt;padding-right:0pt;width:112.79%;"><tr style="height:1pt;"><td style="vertical-align:bottom;white-space:nowrap;width:31.44%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.46%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:0.73%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:6.29%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.46%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:0.73%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:6.31%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.46%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:0.73%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:6.32%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.46%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:0.73%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:6.32%;margin:0pt;padding:0pt;"> </td><td style="vertical-align:bottom;white-space:nowrap;width:1.46%;margin:0pt;padding:0pt;"><p
