Cash margin (in dollars) is defined by Osisko as revenues less cost of sales (excluding depletion). Cash margin (in percentage of revenues) is obtained from the cash margin (in dollars) divided by revenues. Management uses cash margin in dollars and in percentage of revenues to evaluate Osiskoâ€™s ability to generate positive cash flow from its royalty, stream and other interests. Management and certain investors also use this information, together with measures determined in accordance with IFRS Accounting Standards to evaluate Osiskoâ€™s performance relative to peers in the mining industry who present these measures on a similar basis. Cash margin in dollars and in percentage of revenues are only intended to provide additional information to investors and analysts and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS Accounting Standards. They do not have any standardized meaning under IFRS Accounting Standards and may not be comparable to similar measures presented by other issuers.A reconciliation of the cash margin (in thousands of dollars and in percentage of revenues) is presented below: Â Â Three months endedDecember 31, 2024Â Year endedDecember 31, 2024Â Â CADUSDÂ CADUSDÂ Â Â Â Â Revenues\$79,324Â Â \$56,742Â Â Â \$262,176Â Â \$191,157Â Â Â Less:
