SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which statements involve substantial risks and uncertainties. Forward-looking statements generally relate to future events or our future financial or operating performance. In some cases, you can identify forward-looking statements because they contain words such as “may,” “will,” “should,” “expects,” “plans,” “anticipates,” “could,” “intends,” “target,” “projects,” “contemplates,” “believes,” “estimates,” “predicts,” “potential” or “continue” or the negative of these words or other similar terms or expressions that concern our expectations, strategy, plans or intentions. Forward-looking statements contained in this Quarterly Report on Form 10-Q include, but are not limited to, statements about:

- our future financial and operating results; including expectations regarding revenue, deferred revenue, billings, remaining performance obligations, gross margins, operating income, and net retention rate;
- our ability to maintain an adequate rate of revenue and billings growth and our expectations regarding such growth;
- our market opportunity, business plan and ability to effectively manage our growth;
- the effects of global economic conditions on our business and the impact of foreign exchange rates on our business
- our ability to achieve profitability and expand or maintain positive cash flow;
- our ability to achieve our long-term and short-term gross and operating margin objectives;

- our ability to grow our remaining performance obligations;
- our expectations regarding our revenue mix;
- our ability to maintain, protect and enhance our brand and intellectual property;
- costs associated with defending intellectual property infringement and other claims and the frequency of such claim
- our ability to attract and retain end-customers;
- our ability to further penetrate our existing customer base and expand their use of our services;
- our ability to displace existing products in established markets;
- our expectations regarding timing of new products, product bundles and features;
- our ability to expand our leadership position as a cloud content management platform;
- our ability to timely and effectively scale and adapt our new and existing technology;
- our ability to innovate new products and features and bring them to market in a timely manner and the expected benefits to customers and potential customers of our products;
- our investment strategy, including our plans to further invest in our business, including investment in research and development, sales and marketing, our data center infrastructure and our professional services organization, and our ability to effectively manage such investments;
- our ability to expand internationally;
- expectations about competition and its effect in our market and our ability to compete;
- use of non-GAAP financial measures;
- our belief regarding the sufficiency of our cash, cash equivalents and our credit facilities to meet our working capital and capital expenditure needs for at least the next 12 months;
- our expectations concerning relationships with third parties and our ability to realize the anticipated benefits thereof;
- our ability to attract and retain qualified employees and key personnel;
- the effects of new laws, policies, taxes and regulations on our business;
- management's plans, beliefs and objectives, including the importance of our brand and culture on our business;

- acquisitions of or investments in complementary companies, products, services or technologies and our ability to successfully integrate such companies or assets; and
- any potential repurchase of our Class A common stock.

These forward-looking statements are subject to a number of risks, uncertainties and assumptions, including those described in the section titled "Risk Factors" and elsewhere in this Quarterly Report on Form 10-Q. Moreover, we operate in a very competitive and rapidly changing environment, and new risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking

statements we may make. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this Quarterly Report on Form 10-Q may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

You should not rely upon forward-looking statements as predictions of future events. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that the future results, levels of activity, performance or events and circumstances reflected in the forward-looking statements will be achieved or occur. Moreover, neither we nor any other person assumes responsibility for the accuracy and completeness of the forward-looking statements. We undertake no obligation to update publicly any forward-looking statements for any reason after the date of this Quarterly Report on Form 10-Q to conform these statements to actual results or to changes in our expectations, except as required by law.

You should read this Quarterly Report on Form 10-Q and the documents that we reference in this Quarterly Report on Form 10-Q and have filed with the SEC as exhibits to this Quarterly Report on Form 10-Q with the understanding that our actual future results, levels of activity, performance, and events and circumstances may be materially different from what we expect.

BOX, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1. Description of Business and Basis of Presentation

Description of Business

We were incorporated in the state of Washington in April 2005, and were reincorporated in the state of Delaware in March 2008. Box provides a leading cloud content management platform that enables organizations of all sizes to securely manage cloud content while allowing easy, secure access and sharing of this content from anywhere, on any device.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements, which include the accounts of Box and its wholly owned subsidiaries, have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) and applicable rules and regulations of the Securities and Exchange Commission (SEC) for interim financial reporting. Accordingly, they do not include all of the financial information and footnotes required by GAAP for complete financial statements.

In the opinion of our management, the unaudited condensed consolidated financial statements include all adjustments necessary for the fair presentation of our balance sheets, statements of operations, statements of comprehensive income (loss), statements of convertible preferred stock and stockholders' deficit, and the statements of cash flows for the interim periods, but are not necessarily indicative of the results to be expected for any subsequent quarter or for the year ending January 31, 2024. The unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements in our Annual Report on Form 10-K for the year ended January 31, 2023, which was filed with the Securities and Exchange Commission (the SEC) on March 13, 2023.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with U.S. GAAP requires management to make, on an ongoing basis, estimates and assumptions that affect the amounts reported and disclosed in the financial statements and the accompanying notes. Actual results could differ from these estimates. Such estimates include, but are not limited to, the fair value of acquired intangible assets, useful lives of acquired intangible assets and property and equipment, the standalone selling price allocation included in contracts with multiple performance obligations, the expected benefit period for deferred commissions, the useful life of capitalized internal-use software costs, the incremental borrowing

rate we use to determine our lease liabilities, the valuation allowance of deferred income tax assets, and unrecognized tax benefits, among others. Management bases its estimates on historical experience and on various other assumptions which management believes to be reasonable, the results of which form the basis for making judgments about the carrying values of assets and liabilities.

Certain Risks and Concentrations

Our financial instruments that are exposed to concentrations of credit risk consist primarily of cash and cash equivalents, short-term investments, and accounts receivable. Although we deposit our cash with multiple financial institutions, our deposits, at times, may exceed deposit insurance coverage limits.

We sell to a broad range of customers. Our revenue is derived primarily from the United States across a multitude of industries. Accounts receivable are derived from the delivery of our services to customers primarily located in the United States. We accept and settle our accounts receivable using credit cards, electronic payments and checks. A majority of our lower dollar value invoices are settled by credit card on or near the date of the invoice. We do not require collateral from customers to secure accounts receivable. We believe collections of our accounts receivable are probable based on the size, industry diversification, financial condition and past transaction history of our customers. As of July 31, 2023 October 31, 2023, no single customer accounted for more than 10% of total accounts receivable. As of January 31, 2023 one reseller, which is also a customer, accounted for more than 10% of total accounts receivable. No single customer represented over 10% of our revenue for the three and six nine months ended July 31, 2023 October 31, 2023 and 2022.

We serve our customers and users from data center facilities and public cloud hosting operated by third parties. parties and data center facilities. In order to reduce the risk of down time of our subscription services, we have established data centers and third-party cloud computing and hosting providers in various locations in the United States and abroad. We have internal procedures to restore services in the event of disaster at any one of our current data center facilities and with our cloud providers. Even with these procedures for disaster recovery in place, our cloud services could be significantly interrupted during the implementation of the procedures to restore services.

Geographic Locations

For the three and six nine months ended July 31, 2023 October 31, 2023, revenue attributable to customers in the United States was 66 65% and 67 66%, respectively, and revenue attributable to customers in Japan was 21%. For each of the three and six nine months ended July 31, 2022 October 31, 2022, revenue attributable to customers in the United States was 68% and 67% respectively, and revenue attributable to customers in Japan was 20 19%.

As of July 31, 2023 October 31, 2023 and January 31, 2023, substantially all of our property and equipment was located in the United States.

Summary of Significant Accounting Policies

There have been no material changes to our significant accounting policies and estimates during the **six** **nine** months ended **July 31, 2023** **October 31, 2023** from those disclosed in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our Form 10-K for the year ended January 31, 2023. Additionally, we have a single reporting segment and all required segment information can be found in the condensed consolidated financial statements.

Recently Adopted and Issued Accounting Pronouncements

During the **six** **nine** months ended **July 31, 2023** **October 31, 2023**, there were no recently adopted or issued accounting pronouncements that had a material impact on our condensed consolidated financial statements.

Note 2. Revenue

Deferred Revenue

Deferred revenue was \$**479.3** **472.0** million and \$566.6 million as of **July 31, 2023** **October 31, 2023** and January 31, 2023, respectively. During the three months ended **July 31, 2023** **October 31, 2023** and 2022, we recognized \$**219.1** **212.9** million and \$**207.5** **210.9** million of revenue that was included in the deferred revenue balance as of **April 30, 2023** **July 31, 2023** and 2022, respectively. During the **six** **nine** months ended **July 31, 2023** **October 31, 2023** and 2022, we recognized \$**379.8** **491.4** million and \$**365.3** **472.2** million of revenue that was included in the deferred revenue balance as of January 31, 2023 and 2022, respectively.

Transaction Price Allocated to the Remaining Performance Obligations

As of **July 31, 2023** **October 31, 2023**, we had remaining performance obligations from contracts with customers of \$1.1 billion. We expect to recognize revenue on **60** **61**% of these remaining performance obligations over the next 12 months, with the substantial majority of the remaining balance expected to be recognized within 24 months.

Note 3. Fair Value of Financial Instruments

Fair Value Measurements of Assets and Liabilities Measured at Fair Value on a Recurring Basis

We measure our financial assets and liabilities at fair value at each reporting period using a fair value hierarchy which requires us to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. We define fair value as the exchange price that would be received from selling an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. A financial instrument's classification within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Three levels of inputs may be used to measure fair value:

- Level 1—Observable inputs are unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2—Observable inputs are quoted prices for similar assets and liabilities in active markets or inputs other than quoted prices which are observable for the assets or liabilities, either directly or indirectly through market corroborat for substantially the full term of the financial instruments.

- Level 3—Unobservable inputs that are supported by little or no market activity and are significant to the fair value of assets or liabilities. These inputs are based on our own assumptions used to measure assets and liabilities at fair value and require significant management judgment or estimation.

Financial assets subject to the fair value disclosure requirements are included in the table below. All of our financial assets are classified as Level 1. The estimated fair value of marketable securities were as follows (in thousands):

	July 31, 2023	January 31, 2023	October 31, 2023	January 31, 2023
Cash equivalents:				
Money market funds	\$ 172,091	\$ 181,513	\$ 168,033	\$ 181,513
U.S. treasury securities	—	16,906	1,993	16,906
Total cash equivalents	\$ 172,091	\$ 198,419	\$ 170,026	\$ 198,419
Short-term investments:				
U.S. treasury securities	\$ 49,438	\$ 32,783	\$ 55,692	\$ 32,783
Non-U.S. government issued securities			6,103	—
Total short-term investments	\$ 49,438	\$ 32,783	\$ 61,795	\$ 32,783
Total cash equivalents and short-term investments	\$ 221,529	\$ 231,202	\$ 231,821	\$ 231,202

There were no material differences between the estimated fair value and amortized cost of our marketable securities.

As of July 31, 2023 October 31, 2023, contractual maturities of marketable securities were all within one year.

As of July 31, 2023 October 31, 2023, we do not consider any portion of the unrealized losses to be credit losses.

As of July 31, 2023 October 31, 2023, we had a certificate of deposit for a total of \$30.0 million with original maturity of less than three months that is classified as a cash equivalent in our condensed consolidated balance sheet. We did not have any certificates of deposit as of January 31, 2023.

Fair Value Measurements of Other Financial Instruments

In November 2017, we entered into a secured credit agreement (as amended or otherwise modified from time to time, the "November 2017 Facility"). On June 30, 2023, we entered into an amended and restated credit agreement (the "June 2023 Facility") to amend and restate the November 2017 Facility. As of July 31, 2023 October 31, 2023 and January 31, 2023, we had total debt outstanding relating to the June 2023 Facility and the November 2017 Facility, respectively, with a

carrying amount of \$30.0 million. The estimated fair value of the November 2017 Facility, which we have classified as a Level 2 financial instrument, approximates its carrying value.

In January 2021, we issued \$345.0 million aggregate principal amount of 0.00% convertible senior notes due January 15, 2026 (the "Convertible Notes"). The fair value of the Convertible Notes is determined using observable market prices. The fair value of the Convertible Notes, which we have classified as a Level 2 instrument, was \$449.7 million and \$462.9 million as of July 31, 2023, October 31, 2023 and January 31, 2023, respectively.

Note 4. Balance Sheet Components

Property and Equipment, Net

Property and equipment, net consisted of the following (in thousands):

	July 31, 2023	January 31, 2023	October 31, 2023	January 31, 2023
Data center equipment	\$ 324,513	\$ 353,519	\$ 313,356	\$ 353,519
Leasehold improvements	72,057	79,319	73,231	79,319
Computer-related equipment and software	19,930	21,436	20,633	21,436
Furniture and fixtures	14,333	15,301	14,505	15,301
Construction in progress	5,383	2,362	4,656	2,362
Total property and equipment	436,216	471,937	426,381	471,937
Less: accumulated depreciation	(381,970)	(401,965)	(382,186)	(401,965)
Total property and equipment, net	\$ 54,246	\$ 69,972	\$ 44,195	\$ 69,972

As of July 31, 2023, October 31, 2023, the gross carrying amount of property and equipment included \$231.7 million of data center equipment acquired under finance leases and the accumulated depreciation of property and equipment acquired under these finance leases was \$213.3 million. As of January 31, 2023, the gross carrying amount of property and equipment included \$258.3 million of data center equipment acquired under finance leases and the accumulated depreciation of property and equipment acquired under these finance leases was \$226.2 million.

Depreciation expense related to property and equipment was \$8.0 million and \$14.0 million for the three months ended July 31, 2023, October 31, 2023 and 2022, respectively, and \$17.3 million and \$28.8 million for the six months ended July 31, 2023, October 31, 2023 and 2022, respectively.

Note 5. Leases

We have entered into various non-cancellable operating lease agreements for certain of our offices and data centers with lease periods expiring primarily between fiscal years 2024 and 2034. Certain of these arrangements have free or escalating rent payment provisions and optional renewal or termination clauses. Our operating leases typically include variable lease payments, which are primarily comprised of common area maintenance and utility charges for our offices and power and network connections for our data centers, that are determined based on actual consumption. Our operating lease agreements do not contain any residual value guarantees, covenants, or other restrictions.

We also entered into various finance lease arrangements to obtain servers and related equipment for our data center operations. These agreements are primarily for four years and certain of these arrangements have optional renewal or termination clauses. The leases are secured by the underlying leased servers and related equipment.

We sublease certain floors of our Redwood City and London offices. Our current subleases have total lease terms ranging from 30 to 96 months that will expire at various dates by fiscal year 2026.

The components of lease cost, which were included in operating expenses in our condensed consolidated statements of operations, were as follows (in thousands):

	Three Months Ended		Six Months Ended		Three Months Ended		Nine Months Ended	
	July 31,		July 31,		October 31,		October 31,

Less: imputed interest	<u>\$ (23,094)</u>	<u>\$ (236)</u>	<u>\$ (20,822)</u>	<u>\$ (100)</u>	
Present value of total lease liabilities	<u>\$ 156,370</u>	<u>\$ 13,303</u>	<u>\$ 143,296</u>	<u>\$ 6,157</u>	

(1) Non-cancellable sublease proceeds for the remainder of the year ending January 31, 2024 and years ending January 31, 2025 and 2026 of \$**3.2** **1.4** million, \$7.0 million, and \$1.0 million, respectively, are not included in the table above.

As of **July 31, 2023** **October 31, 2023**, we had one operating lease for an office space that has not yet commenced. This operating lease has aggregated undiscounted future payments of \$**20.1** **19.5** million and a lease term of nine years. This operating lease **will** is planned to commence during fiscal year 2025. We did not have any finance leases that had not yet commenced as of **July 31, 2023** **October 31, 2023**.

Note 6. Commitments and Contingencies

Letters of Credit

As of **July 31, 2023** **October 31, 2023** and January 31, 2023, we had letters of credit in the aggregate amount of \$14.6 million and \$18.6 million, respectively, in connection with our operating leases and voluntary disability insurance (VDI) program, which were primarily issued under the available sublimit for the issuance of letters of credit in conjunction with a secured credit agreement as disclosed in Note 7.

Purchase Obligations

Our purchase obligations relate primarily to infrastructure public cloud hosting services and IT software and support services costs. As of July 31, 2023 October 31, 2023, future payments under non-cancellable contractual purchases, which were not recognized on our condensed consolidated balance sheet, are as follows, shown in accordance with the payment due date (in thousands):

Years ending January 31:			
2024	\$	2,997	\$ 2,748
2025		82,298	61,658
2026		7,643	10,922
2027		264,954	267,187
2028			355
2029			355
Total	\$	357,892	\$ 343,225

Our contracts for infrastructure public cloud hosting services and IT software, which have terms ranging from 2 to 8 years, support our long-term goals of improving gross margin.

Legal Matters

From time to time, we are subject to litigation and claims that arise in the ordinary course of business. We investigate litigation and claims as they arise and accrue estimates for resolution of legal and other contingencies when losses are probable and estimable. Although the results of litigation and claims cannot be predicted with certainty, we believe there was not at least a reasonable possibility that we had incurred a material loss with respect to such loss contingencies as of July 31, 2023 October 31, 2023.

Note 7. Debt

Convertible Senior Notes

In January 2021, we issued \$345.0 million aggregate principal amount of 0.00% convertible senior notes due January 15, 2026. The Convertible Notes are senior unsecured obligations and do not bear regular interest. Each \$1,000 principal amount of the Convertible Notes will be convertible into 38.7962 shares of our Class A common stock, which is equivalent to a conversion price of approximately \$25.78 per share.

There have been no changes to the conversion or redemption terms of the Convertible Notes during the six nine months ended July 31, 2023 October 31, 2023 from those disclosed in Item 8. Financial Statements and Supplementary Data in our Form 10-K for the year ended January 31, 2023.

As of July 31, 2023 October 31, 2023, the conditions allowing holders of the Convertible Notes to convert were not met.

The net carrying amount of the Convertible Notes consisted of the following (in thousands):

	July 31, 2023	January 31, 2023	October 31, 2023	January 31, 2023
Principal	\$ 345,000	\$ 345,000	\$ 345,000	\$ 345,000
Unamortized issuance costs	(4,701)	(5,649)	(4,225)	(5,649)
Net carrying amount	<u>\$ 340,299</u>	<u>\$ 339,351</u>	<u>\$ 340,775</u>	<u>\$ 339,351</u>

15

Issuance costs are being amortized to interest expense over the term of the Convertible Notes using the effective interest rate method. The effective interest rate used to amortize the issuance costs is 0.56%. For the three and **six** **nine** months ended **July 31, 2023** **October 31, 2023** and 2022, interest expense recognized related to the Convertible Notes was not material.

15

Capped Calls

In connection with the pricing of the Convertible Notes, we entered into privately negotiated capped call transactions with certain counterparties (the “Capped Calls”). The Capped Calls each have a strike price of approximately \$25.80 per share, subject to certain adjustments, which correspond to the initial conversion price of the Convertible Notes. The Capped Calls have initial cap prices of \$35.58 per share, subject to certain adjustments. The Capped Calls cover, subject to anti-dilution adjustments, approximately 13.4 million shares of our Class A common stock. The Capped Calls are generally intended to reduce or offset the potential dilution to our common stock upon any conversion of the Convertible Notes with such reduction or offset, as the case may be, subject to a cap based on the cap price. The Capped Calls are separate transactions, and not part of the terms of the Convertible Notes. As these transactions meet certain accounting criteria, the Capped Calls are recorded in stockholders' deficit and are not accounted for as derivatives. The cost of \$27.8 million incurred in connection with the Capped Calls was recorded as a reduction to additional paid-in capital.

Line of Credit

On November 27, 2017, we entered into a secured credit agreement (as amended or otherwise modified from time to time, the “November 2017 Facility”), which provided for a \$65.0 million revolving loan facility with a \$45.0 million sublimit for the issuance of letters of credit. On June 30, 2023, we entered into an amended and restated credit agreement (the “June 2023 Facility”) to provide for a \$150.0 million revolving loan facility and maintain the \$45.0 million letter of credit sublimit. Pursuant to the terms of the June 2023 Facility, the maturity date of the revolving loan facility is the earlier of (i) June 30, 2028, (ii) October 16, 2025, except to the extent that both of the following conditions are satisfied as of such date: (x) the outstanding principal amount of the Convertible Notes as of such date is not greater than \$100.0 million and (y) our liquidity

(as determined in accordance with the June 2023 Facility) is greater than or equal to the outstanding principal amount of such Convertible Notes as of such date, and (iii) February 11, 2028, only in the event that any of our Series A Convertible Preferred Stock remains outstanding as of such date. In addition, the June 2023 Facility adopts the Secured Overnight Financing Rate ("SOFR") as the interest rate benchmark rather than the London Interbank Offered Rate ("LIBOR") implemented under the November 2017 Facility, with the revolving loans accruing interest at a rate per annum equal to, at our option, (a) an adjusted term SOFR rate (based on one, three, or six-month interest periods) plus a margin ranging from 1.35% to 1.85%, (b) a daily simple SOFR rate plus a margin ranging from 1.35% to 1.85%, or (c) a prime rate plus a margin of 0.35% to 0.85%. The June 2023 Facility provides for a commitment fee of 0.15% to 0.25% per annum, determined based upon our senior secured leverage ratio, on the average daily unused amount of the revolving committed amount, payable quarterly in arrears. The other material terms of the June 2023 Facility remain consistent with those of the November 2017 Facility disclosed in Item 8. Financial Statements and Supplementary Data in our Form 10-K for the year ended January 31, 2023.

As of July 31, 2023 October 31, 2023, we had total debt outstanding with a net carrying amount of \$29.5 million and we were in compliance with all financial covenants. Issuance costs, which are amortized to interest expense over the term of the June 2023 Facility, were not material.

Note 8. Redeemable Convertible Preferred Stock and Stockholders' Deficit

Series A Convertible Preferred Stock

On April 7, 2021, we entered into an investment agreement with a group of investors led by KKR & Co. Inc. (collectively "KKR") relating to the issuance and sale of 500,000 shares of our Series A Convertible Preferred Stock, par value \$0.0001 per share, for an aggregate purchase price of \$500 million, or \$1,000 per share.

There have been no changes to the terms and conditions of the Series A Preferred Stock for the six nine months ended July 31, 2023 October 31, 2023 from those disclosed in Item 8. Financial Statements and Supplementary Data in our Form 10-K for the year ended January 31, 2023.

During the six nine months ended July 31, 2023 October 31, 2023, we paid cash dividends to our Series A Preferred Stockholders in the amount of \$7.4 11.2 million and as of July 31, 2023 October 31, 2023, we had accrued dividends of \$1.3 million on the Series A Preferred Stock. Accrued dividends are recorded against additional paid-in capital due to Box being in an accumulated deficit position.

Share Repurchase Plan

During the three months ended July 31, 2023 October 31, 2023, we repurchased 2.2 1.9 million shares at a weighted average price of \$28.55 26.59 per share for a total amount of \$61.5 51.7 million. During the six nine months ended July 31, 2023 October 31, 2023, we repurchased 3.8 5.8 million shares at a weighted average price of \$27.63 27.28 per share for a

total amount of \$105.4 157.1 million. As of July 31, 2023 October 31, 2023, \$35.3 83.5 million remained available for additional repurchases.

On August 28, 2023, our board of directors authorized an expansion of the share repurchase plan. Under this expansion, an additional \$100 million of our Class A common stock may be repurchased in open market transactions through August 28, 2024.

Note 9. Stock-Based Compensation

Employee Equity Plans

We currently have two employee equity plans that have been adopted by our board of directors. These plans, the 2015 Equity Incentive Plan (the "2015 Plan") and the 2015 Employee Stock Purchase Plan (the "2015 ESPP"), are described in more detail in Item 8. Financial Statements and Supplementary Data in our Form 10-K for the year ended January 31, 2023. As of July 31, 2023 October 31, 2023, 32,470,894 33,072,517 shares and 4,550,504 4,036,633 shares were reserved for future issuance under the 2015 Plan and the 2015 ESPP, respectively.

Stock Options

The following table summarizes the stock option activity under the equity incentive plans and related information:

	Shares Subject to Options Outstanding				Shares Subject to Options Outstanding			
	Weighted-Average		Weighted-Average		Weighted-Average		Weighted-Average	
	Exercise Price		Contractual Life		Exercise Price		Contractual Life	
	Shares		Intrinsic Value		Shares		Intrinsic Value	
	(in thousands)		(in thousands)		(in thousands)		(in thousands)	
Balance as of January 31, 2023	2,373	\$ 17.32	3.81	\$ 820	2,373,063	\$ 17.32	3.81	\$ 34,820

Options exercised	(24,440)	6.02			(76,395)	6.67		
Balance as of July 31, 2023	2,348,623	17.4	32,					
	3	\$ 3	3.34	\$ 448				
Exercisable as of July 31, 2023	2,348,623	17.4	32,					
	3	\$ 3	3.34	\$ 448				
Balance as of October 31, 2023					2,296,668	\$ 17.67	3.16	\$ 16,587
Exercisable as of October 31, 2023					2,296,668	\$ 17.67	3.16	\$ 16,587

Restricted Stock Units

The following table summarizes the restricted stock unit activity under the equity incentive plans and related information:

	Number of Restricted Stock Units Outstanding	Weighted-Average Grant Date Fair Value	Number of Restricted Stock Units Outstanding	Weighted-Average Grant Date Fair Value
Unvested balance - January 31, 2023	14,665,753	\$ 24.89	14,665,753	\$ 24.89
Granted	7,521,191	26.60	7,937,761	26.51
Vested	(4,311,687)	23.77	(6,253,443)	23.93
Forfeited	(560,039)	25.37	(990,737)	25.60
Unvested balance - July 31, 2023	17,315,218	\$ 25.90		
Unvested balance - October 31, 2023			15,359,334	\$ 26.07

As of July 31, 2023 October 31, 2023, there was \$422.0 377.1 million of unrecognized stock-based compensation expense related to outstanding restricted stock units granted to employees that is expected to be recognized over a weighted-average period of 2.75 2.59 years.

Performance-Based Restricted Stock Units

We use performance-based incentives for certain employees, including our named executive officers, to achieve our annual financial and operational objectives, while making progress towards our longer-term strategic and growth goals. Based on a review of our actual achievement of the pre-established corporate financial objectives and additional inputs from our Compensation Committee, the executive bonus plan for fiscal year 2023 was determined, settled and paid out in the first quarter of fiscal year 2024 in the form of cash and fully vested restricted stock units. During the first quarter of fiscal year 2024, our Compensation Committee also adopted and approved the performance criteria and targets for the executive bonus plan for fiscal year 2024, which is expected to be paid out in the form of cash and fully vested restricted stock units in the first quarter of fiscal year 2025.

17

During the ~~six~~ nine months ended ~~July 31, 2023~~ October 31, 2023 we recognized stock-based compensation expense related to executive bonus plans in the amount of \$~~5.5~~ 7.2 million. The unrecognized compensation expense related to the ungranted and unvested executive bonus plan for fiscal year 2024 is \$~~7.4~~ 3.4 million, based on the expected performance against the pre-established corporate financial objectives as of ~~July 31, 2023~~ October 31, 2023, which is expected to be recognized over a remaining weighted-average period of less than one year.

17

2015 ESPP

As of ~~July 31, 2023~~ October 31, 2023, there was \$~~14.7~~ 18.5 million of unrecognized stock-based compensation expense related to the 2015 ESPP that is expected to be recognized over a weighted-average period of ~~1.36~~ 1.49 years.

Stock-Based Compensation

The following table summarizes the components of stock-based compensation expense recognized in the condensed consolidated statements of operations (in thousands):

	Three Months Ended		Six Months Ended		Three Months Ended		Nine Months Ended	
	July 31,		July 31,		October 31,		October 31,

18

Note 11. Income Taxes

The provision for income taxes was \$2.4 2.5 million and \$4.7 7.2 million for the three and six nine months ended July 31, 2023 October 31, 2023, respectively, and \$1.4 2.0 million and \$2.6 4.6 million for the three and six nine months ended July 31, 2022 October 31, 2022, respectively. Our income taxes for the three and six nine months ended July 31, 2023 October 31, 2023 and 2022 were primarily due to state income taxes and foreign income taxes.

For the three and six nine months ended July 31, 2023 October 31, 2023 and 2022, the difference between the U.S. statutory rate and our effective tax rate was primarily due to utilization of deferred tax assets in jurisdictions which have a full valuation allowance, state income taxes driven by the capitalization of research and development expenditures, and differing foreign tax rates.

We evaluate tax positions for recognition using a more-likely-than-not recognition threshold, and those tax positions eligible for recognition are measured as the largest amount of tax benefit that is greater than 50% likely of being realized upon the effective settlement with a taxing authority that has full knowledge of all relevant information. We believe that we have provided adequate reserves for our income tax uncertainties in all open tax years.

We file tax returns in the U.S. for federal, California, and other states. All tax years remain open to examination for both federal and state purposes as a result of our net operating loss and credit carryforwards. We file tax returns in the United Kingdom and other foreign jurisdictions in which we operate. Certain tax years remain open to examination.

19

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of our financial condition and results of operations together with the condensed consolidated financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q. This discussion contains forward-looking statements based upon current expectations that involve risks and uncertainties.

Our actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors, including those discussed in the section titled “Risk Factors” and in other parts of this Quarterly Report on Form 10-Q.

Overview

Box is the Content Cloud: a single secure, cloud-native platform for managing the entire content journey. Content – from blueprints to wireframes, videos to documents, proprietary formats to PDFs – is the source of an organization's unique value. The Box Content Cloud enables our customers, including 69% 68% of the Fortune 500, to securely manage the entire content lifecycle, from the moment a file is created or ingested to when it's shared, edited, published, approved, signed, classified, and retained. Box keeps content secure and compliant, while also allowing easy access and sharing of this content from anywhere, on any device – both within the organization and with external partners.

With our Software-as-a-Service (SaaS) platform, users can collaborate on content both internally and with external parties, automate content-driven business processes, develop custom applications, and implement data protection, security and compliance features to comply with legal and regulatory requirements, internal policies and industry standards and regulations. The Box Content Cloud accelerates business processes, improves employee productivity, enables secure hybrid work, and protects an organization's most valuable data. Our platform enables a broad set of high-value business use cases across enterprises and user experiences. Our platform integrates with more than 1,500 leading enterprise business applications, supports hundreds of file formats and media types, and is compatible with multiple application environments, operating systems and devices, ensuring that workers can securely access their critical business content whenever and wherever they need it.

In addition, we continue to innovate by expanding our core services and offerings with a focus on frictionless security and compliance, seamless internal and external collaboration and workflow, and integration with best-of-breed applications – all underpinned by a comprehensive set of application programming interfaces (APIs), developer tools, and intelligent infrastructure. We recently announced Box Hubs, to surface curated content quickly and securely through intelligent portals. Box Hubs will be available with Box AI, a new set of capabilities that will announced last quarter, to natively integrate advanced artificial intelligence (“AI”) models to uncover and share business insights, find models. Using Box Hubs with Box AI, customers can easily get answers to critical questions about their content in Box, and create content using an enterprise's their enterprise data. In addition, Moreover, Box Canvas, our natively integrated, interactive virtual whiteboarding tool, is now available to all customers. We also currently provide the following offerings: Box Sign, which enables customers to securely send documents for electronic signature directly from Box; Box Shield, our advanced security offering that helps customers reduce the risk of accidental content leakage and protect their business from insider threats and account compromise, as well as threat detection, response, and recovery for potential malware incidents, including ransomware; Box Relay, which allows our end users to easily build, manage and track workflows; Box Zones, which gives global customers the ability to store their content locally in certain regions; Box KeySafe, a solution that builds on top of Box's strong encryption and security capabilities to give customers greater control over the encryption keys used to secure the file contents that are stored with Box; Box Platform, which further enables customers and partners to build enterprise apps using our open APIs and developer tools; Box Governance, which gives customers a better way to comply with regulatory policies, help satisfy e-

discovery requests and effectively manage sensitive business information throughout its lifecycle; Box Notes, our native content authoring tool which enables users to seamlessly share and collaborate in real time; and Box Shuttle, which allows for easy, affordable, self-service content migration directly from the admin console from more than ten source systems, into Box. In addition, with Box Consulting, organizations can access professional services for critical topics like implementation, technology and app development, and change management and user training. The increasing traction of these product innovations allows our customers to realize the full set of capabilities of our Content Cloud.

We offer our solution to our customers as a subscription-based service, with subscription fees based on the requirements of our customers, including the number of users and functionality deployed. The majority of our customers subscribe to our service through one-year contracts, although we also offer our services for terms ranging from one month to three years or more. We typically invoice our customers at the beginning of the term, in multi-year, annual, quarterly or monthly installments. We recognize revenue as we satisfy our performance obligations. Accordingly, due to our subscription model, we recognize revenue for our subscription services ratably over the term of the contract.

20

Current Period Highlights

For the three months ended July 31, 2023 October 31, 2023 and 2022, our revenue was \$261.4 million \$261.5 million and \$246.0 million \$250.0 million, respectively, representing year-over-year growth of 6% 5%, or 7 growth on a constant currency basis. As of July 31, 2023 October 31, 2023, our remaining performance obligations were \$1.138 billion \$1.131 billion,

20

representing an 8% a 7% increase from our remaining performance obligations of \$1.051 billion \$1.056 billion as of July 31, 2022. October 31, 2022, or 8% growth on a constant currency basis. For the three months ended July 31, 2023 October 31, 2023, our gross profit was \$194.4 million \$192.3 million, and our gross margin was 74.4% 73.5%, compared to our gross profit of \$181.2 million \$185.5 million and our gross margin of 73.6% 74.2% for the three months ended July 31, 2022 October 31, 2022. For the three months ended July 31, 2023 October 31, 2023, our operating income was \$9.9 million \$11.4 million, and our operating margin was 3.8% 4.4%, compared to our operating income of \$3.1 million \$13.4 million and our operating margin of 1.3% 5.3% for the three months ended July 31, 2022 October 31, 2022. Our net cash provided by operating activities was \$32.7 million \$71.8 million for the three months ended July 31, 2023 October 31, 2023, an increase of 15% 3% from net cash provided by operating activities of \$28.3 million \$69.7 million for the three months ended July 31, 2022 October 31, 2022. Our non-GAAP free cash flow was \$20.6 million \$58.3 million for the three months ended July 31, 2023 October 31, 2023, an increase of 15% 6% from non-GAAP free cash flow of \$18.0 million \$55.0 million for the three months ended July 31, 2022 October 31, 2022.

Impact of Macroeconomic Factors on Our Business

Our overall performance depends in part on worldwide economic and geopolitical conditions and their impact on customer behavior. Worsening economic conditions, including impacts from inflation, higher interest rates, slower growth, the stronger dollar versus foreign currencies, particularly the Japanese Yen, the ongoing Hamas-Israel and Russia-Ukraine conflict conflicts and other changes in economic conditions, may adversely affect our results of operations and financial performance. During the three months ended July 31, 2023 October 31, 2023, in addition to headwinds from foreign exchange rate trends, we continued to see an impact from additional customer scrutiny being placed on larger deals and lower seat expansion rates due to the challenging macroeconomic environment. As a result, we have experienced, and may continue to experience, increased customer churn and delayed sales cycles, as well as customers and prospective customers reducing budgets related to services that we offer. While we believe IT budgets have tightened and some larger deals have required more scrutiny across verticals and geographies, we also believe we are well-positioned to execute through these dynamic times as the Box Content Cloud enables enterprises to streamline their businesses, drive up productivity, reduce risk, and lower costs.

Key Business Metrics

We use the key metrics below for financial and operational decision-making and as a means to evaluate period-to-period comparisons. We believe that these key metrics provide meaningful supplemental information regarding our performance. We believe that both management and investors benefit from referring to these key metrics in assessing our performance and when planning, forecasting, and analyzing future periods. These key metrics also facilitate management's internal comparisons to our historical performance as well as comparisons to certain competitors' operating results. We believe these key metrics are useful to investors both because (1) they allow for greater transparency with respect to key metrics used by management in its financial and operational decision-making and (2) they are used by institutional investors and the analyst community to help analyze the health of our business.

Remaining Performance Obligations

Remaining performance obligations (RPO) represent, at a point in time, contracted revenue that has not yet been recognized. RPO consists of deferred revenue and backlog. Backlog is defined as non-cancellable contracts deemed certain to be invoiced and recognized as revenue in future periods. Future invoicing is determined to be certain when we have an executed non-cancellable contract or a significant penalty is due upon cancellation. While Box believes RPO is a leading indicator of revenue as it represents sales activity not yet recognized in revenue, it is not necessarily indicative of future revenue growth as it is influenced by several factors, including seasonality, contract renewal timing, average contract terms and foreign currency exchange rates. Box monitors RPO to manage the business and evaluate performance.

RPO as of July 31, 2023 October 31, 2023 was \$1.138 billion \$1.131 billion, an increase of 8% 7% from July 31, 2022 October 31, 2022. The increase in RPO was primarily driven by expansion within existing customers as they broadened their deployment of our product offerings and the conversion to multi-product Suites, and extended customer contract durations. Suites. The increase in RPO was also driven by the addition of new customers and the timing of customer-driven renewals. RPO growth was partially offset by a negative impact of 70 basis points from foreign currency exchange rates.

Billings

Billings represent our revenue plus the changes in deferred revenue and contract assets in the period. Billings we record in any particular period primarily reflect subscription renewals and expansion within existing customers plus sales to new customers, and represent amounts invoiced for all of our products and professional services. We typically invoice our customers at the beginning of the term, in multi-year, annual, quarterly or monthly installments. If the customer negotiates to pay the full subscription amount at the

21

beginning of the period, the total subscription amount for the entire term will be reflected in billings. If the customer negotiates to be invoiced annually or more frequently, only the amount billed for such period will be included in billings.

21

Billings help investors better understand our sales activity for a particular period, which is not necessarily reflected in our revenue given that we recognize subscription revenue ratably over the contract term. We consider billings a significant performance measure. We monitor billings to manage our business, make planning decisions, evaluate our performance and allocate resources. We believe that billings offer valuable supplemental information regarding the performance of our business and will help investors better understand the sales volumes and performance of our business. We do not consider billings to be a non-GAAP financial measure because it is calculated using exclusively revenue, deferred revenue, and contract assets, all of which are financial measures calculated in accordance with GAAP.

Billings for the three and six nine months ended July 31, 2023 October 31, 2023 were \$232.5 million \$253.7 million and \$424.4 million \$678.2 million, respectively, representing a year-over-year decrease of 1% 2% for the three months ended July 31, 2023 October 31, 2023 and an increase of 4% 2% for the six nine months ended July 31, 2022 October 31, 2023. The decrease in billings for the three months ended July 31, 2023 October 31, 2023 was driven by particularly strong payment durations, including a particularly high volume of early renewals large multi-year customer prepayment, in the first quarter of fiscal year 2024 and a negative impact from foreign currency exchange rates. three months ended October 31, 2022. The increase in billings for the six nine months ended July 31, 2023 October 31, 2023 was primarily driven by expansion within existing customers as they broadened their deployment of our product offerings through the conversion to multi-product Suites, the addition of new customers, and the timing of customer-driven renewals. Billings growth was partially offset by a negative impact from foreign currency exchange rates.

Our use of billings has certain limitations as an analytical tool and should not be considered in isolation or as a substitute for revenue or an analysis of our results as reported under GAAP. Billings are recognized when invoiced, while the related subscription and premier services revenue is recognized ratably over the contract term as we satisfy a performance obligation. Also, other companies, including companies in our industry, may not use billings, may calculate billings differently, may have different billing frequencies, or may use other financial measures to evaluate their performance, all of which could reduce the usefulness of billings as a comparative measure.

Over time, we expect to continue to normalize payment durations. In addition, as we have gained and expect to continue to gain more traction with large enterprise customers, we also anticipate our quarterly billings to increasingly concentrate in the back half of our fiscal year, especially in the fourth quarter.

A calculation of billings starting with revenue, the most directly comparable GAAP financial measure, is presented below (in thousands):

Non-GAAP Free Cash Flow

We define non-GAAP free cash flow as cash flows from operating activities less purchases of property and equipment, principal payments of finance lease liabilities, capitalized internal-use software costs, and other items that did not or are not expected to require cash settlement and that management considers to be outside of our core business.

Net cash provided by operating activities for the three and nine months ended October 31, 2023 was \$71.8 million and \$229.4 million, respectively, representing an increase of 3% and 11% from the three and nine months ended October 31, 2022, respectively. Non-GAAP free cash flow for the three and six months ended July 31, 2023 October 31, 2023 was \$20.6 million \$58.3 million and \$128.8 million \$187.1 million, respectively, representing an increase of 15% 6% and 18% 14% from the three and six months ended July 31, 2022 October 31, 2022, respectively.

22

Net Retention Rate

Net retention rate is defined as the net percentage of Total Annual Recurring Revenue (Total ARR) retained from existing customers, including expansion. We define Total ARR as the annualized recurring revenue from all active customer contracts at the end of a reporting period. We calculate our net retention rate as of a period end by starting with the Total ARR from customers as of 12 months prior to such period end (Prior Period Total ARR). We then calculate Total ARR from these same customers as of the current period end (Current Period Total ARR). Finally, we divide the Current Period Total ARR by the Prior Period Total ARR to arrive at our net retention rate. In calculating our net retention rate, we include only

Total ARR associated with those customers who have subscribed to Box for at least 12 months. We believe our net retention rate is an important metric that provides insight into the long-term value of our subscription agreements and our ability to retain and grow revenue from our customer base. Net retention rate is an operational metric and there is no comparable GAAP financial measure to which we can reconcile this particular key metric.

Our net retention rate was 103% 102% and 112% 110% as of July 31, 2023 October 31, 2023 and 2022, respectively. Our The decline in our net retention rate as of July 31, 2023 October 31, 2023 was primarily attributable to heightened budget scrutiny putting pressure on seat expansion within existing customers. As our customers purchase add-on products or our bundled Enterprise Plus plan, we tend to realize significantly higher average contract values and stronger net retention rates as compared to customers who only purchase our core product. We believe our go-to-market efforts to deliver a solution selling strategy and our investments in product, customer success, and Box Consulting, including our Box Shuttle migration offering, have been significant factors in our customer retention results. As we penetrate customer accounts, we expect our net retention rate to remain above 100% for the foreseeable future.

Components of Results of Operations

Revenue

We derive our revenue primarily from three sources: (1) subscription revenue, which is comprised of subscription fees from customers who have access to our content cloud platform including routine customer support; (2) revenue from customers purchasing our premier services package; and (3) revenue from professional services such as implementing best practice use cases, project management and implementation consulting services.

To date, practically all of our revenue has been derived from subscription and premier services. Subscription and premier services revenue are driven primarily by the number of customers, the number of seats sold to each customer and the price of our services.

We recognize revenue as we satisfy our performance obligations. Accordingly, due to our subscription model, we recognize revenue for our subscription and premier services ratably over the contract term. We typically invoice our customers at the beginning of the term, in multi-year, annual, quarterly or monthly installments. Our subscription and premier services contracts are typically non-cancellable and do not contain refund-type provisions. The majority of our customers subscribe to our service through one-year contracts, although we also offer our services for terms ranging between one month to three years or more.

Professional services are generally billed on a fixed price basis, for which revenue is recognized over time based on the proportion performed. Professional services revenue was not material as a percentage of total revenue for all periods presented.

Revenue is presented net of sales and other taxes we collect on behalf of governmental authorities.

Cost of Revenue

Our cost of revenue consists primarily of costs related to providing our subscription services to our paying customers, including employee compensation and related expenses for data center operations, customer support and professional services personnel, public cloud infrastructure hosting costs, depreciation of servers and equipment, security services and other tools, as well as amortization expense

23

associated with acquired technology and capitalized internally developed software. We allocate overhead such as rent, information technology costs and employee benefit costs to all departments based on headcount. As such, general overhead expenses are reflected in cost of revenue and each of the operating expense categories set forth below.

Operating Expenses

Our operating expenses consist of research and development, sales and marketing, and general and administrative expenses. Personnel costs are the most significant component of each category of operating expenses. Operating expenses also include allocated overhead costs for facilities, information technology costs and employee benefit costs.

Research and Development. Research and development expense consists primarily of employee compensation and related expenses, as well as allocated overhead. Our research and development efforts are focused on scaling our platform, building an ecosystem of best-of-breed applications and platforms, infrastructure, adding enterprise grade features, functionality and enhancements such as workflow automation, intelligent content management capabilities, advanced security, e-signature capability, native visual collaboration and whiteboarding, and artificial intelligence to enhance the ease of use of our cloud content management services. We capitalize certain qualifying costs to develop software for internal use incurred during the application development stage.

Sales and Marketing. Sales and marketing expense consists primarily of employee compensation and related expenses, sales commissions, marketing programs, travel-related expenses, as well as allocated overhead. Marketing programs include but are not limited to advertising, events, corporate communications, brand building, and product marketing. Sales and marketing expense also consists of public cloud hosting, data center and customer support costs related to providing our cloud-based services to our free users. We market and sell our cloud content management services worldwide through our direct sales organization and through indirect distribution channels such as strategic resellers. Our sales and marketing expenses are generally higher for acquiring new, or expanding existing customers than for renewals of existing customer subscriptions.

General and Administrative. General and administrative expense consists primarily of employee compensation and related expenses for administrative functions including finance, legal, human resources, recruiting, information systems, enterprise security, compliance, fees for external professional services and cloud-based enterprise systems, as well as allocated overhead. External professional services fees are primarily comprised of outside legal, accounting, audit and outsourcing services.

Interest and Other Income (Expense), Net

Interest and other income (expense), net consists of interest expense, interest income, gains and losses from foreign currency transactions, and other income and expense. Interest expense consists primarily of interest charges for our line of credit and interest rate swap agreement, interest expense related to finance leases, and the amortization of issuance costs of our convertible senior notes. Interest income consists primarily of interest earned on our cash and cash equivalents and short-term investments. We have historically invested our cash and cash equivalents in overnight deposits, certificates of deposit, money market funds, and U.S. treasury securities and non-U.S. government issued securities.

Provision for Income Taxes

Provision for income taxes consists primarily of state income taxes and foreign income taxes and, as applicable, changes in our deferred taxes and related valuation allowance positions and uncertain tax positions.

Results of Operations

	Three Months Ended			
	October 31,		\$ Change	% Change
	2023	2022		
	(dollars in thousands)			
Revenue	\$ 261,537	\$ 249,951	\$ 11,586	5 %

The \$15.4 million \$11.6 million, or 5%, increase in revenue for the three months ended July 31, 2023 October 31, 2023 was primarily driven by seat growth in existing customers and continued strong attach rates of our multi-product Suites offerings, particularly Enterprise Plus. The increase was partially offset by the weakening of foreign currency exchange rates, which negatively impacted our revenue growth rate by 300 200 basis points, and customers partially churning their deployment with Box.

	(dollars in thousands)			
Revenue	\$ 774,863	\$ 734,398	\$ 40,465	6 %

The \$28.9 million \$40.5 million, or 6%, increase in revenue for the six nine months ended July 31, 2023 October 31, 2023 was primarily driven by seat growth in existing customers and continued strong attach rates of our multi-product Suites offerings, particularly Enterprise Plus. The increase was partially offset by the weakening of foreign currency exchange rates, which negatively impacted our revenue growth rate by 350 230 basis points, and customers partially churning their deployment with Box.

Cost of Revenue

	Three Months Ended				Three Months Ended			
	July 31,				October 31,			
	2023	2022	\$ Change	% Change	2023	2022	\$ Change	% Change
	(dollars in thousands)				(dollars in thousands)			
Cost of revenue	\$ 67,013	\$ 64,843	\$ 2,170	3 %	\$ 69,227	\$ 64,490	\$ 4,737	7 %
Percentage of revenue	26 %	26 %			26 %	26 %		
Gross margin	74.4 %	73.6 %			73.5 %	74.2 %		

The \$2.2 million \$4.7 million, or 7%, increase for the three months ended July 31, 2023 October 31, 2023 was primarily due to an increase increases of \$11.2 million \$9.3 million in public cloud infrastructure hosting costs, driven by our migration to the public cloud from our collocated data centers, which resulted in redundant expenses, and \$0.9 million in workforce reorganization costs. This was partially offset by a decrease decreases of \$5.8 million in depreciation expense, a decrease of \$1.7 million \$2.3 million in bandwidth and data center rent related expense, and a decrease of \$1.5 million \$2.0 million in

depreciation expense, \$0.8 million in subscription software contract expenses, and \$0.4 million in contractor related costs. Cost of revenue as a percentage of revenue remained flat year-over-year.

	Six Months Ended				Nine Months Ended			
	July 31,				October 31,			
				%				%
	2023	2022	\$ Change	Change	2023	2022	\$ Change	Change
	(dollars in thousands)				(dollars in thousands)			
Cost of revenue	128, \$ 664	127, \$ 052	1,6 \$ 12	1 %	\$ 197,891	\$ 191,542	\$ 6,349	3 %
Percentage of revenue	25 %	26 %			26 %	26 %		
Gross margin	74.9 %	73.8 %			74.5 %	73.9 %		

The \$1.6 million \$6.3 million, or 3%, increase for the six nine months ended July 31, 2023 October 31, 2023 was primarily due to an increase increases of \$17.0 million \$26.3 million in public cloud infrastructure hosting costs, driven by our migration to the public cloud from our collocated data centers, which resulted in redundant expenses, and an increase of \$0.8 million \$1.2 million in employee and contractor related stock-based compensation costs. The increase in cost of revenue was partially offset by a decrease decreases of \$10.7 million \$12.7 million in depreciation expense, a decrease of \$3.1 million \$6.1 million in bandwidth and data center rent related expense, a decrease of \$2.1 million and \$2.9 million in subscription software contract expenses, and a decrease of \$0.4 million in allocated overhead costs. expenses. Cost of revenue as a percentage of revenue decreased 100 basis points remained flat year-over-year.

Over time, we expect our cost of revenue to increase in absolute dollars but decrease as a percentage of revenue as we continue to optimize data center efficiencies and invest in public cloud infrastructure. hosting service optimization.

Research and Development

	Three Months Ended				Three Months Ended			
	July 31,				October 31,			
				%				%

	(dollars in thousands)			
Sales and marketing	\$ 174,815	\$ 166,509	\$ 8,306	5 %
Percentage of revenue	34 %	34 %		

The \$8.3 million increase for the six months ended July 31, 2023 was primarily due to an increase of \$2.8 million in stock-based compensation expense, increases of \$1.6 million and \$1.1 million in allocated overhead costs and employee related costs, respectively, driven by a 5% increase in headcount, and \$0.8 million in marketing expenses. Sales and marketing expenses as a percentage of revenue increased 100 basis points year-over-year.

	Nine Months Ended			
	October 31,			
	2023	2022	\$ Change	% Change
	(dollars in thousands)			
Sales and marketing	\$ 262,745	\$ 248,075	\$ 14,670	6 %
Percentage of revenue	34 %	34 %		

The \$14.7 million, or 6%, increase for the nine months ended October 31, 2023 was primarily due to increases of \$1.6 million in stock-based compensation expense, \$2.8 million and \$2.2 million in allocated overhead costs and employee related costs, respectively, driven by a 4% increase in headcount, \$2.4 million in marketing expenses, and an

increase of \$0.9 million \$1.1 million in commission expense. Sales and marketing expenses as a percentage of revenue remained flat year-over-year.

We expect to continue to invest in capturing our large market opportunity globally and capitalize on our competitive position with a continued focus on our profitability objectives. We expect our sales and marketing expenses to increase in absolute dollars but decrease as a percentage of revenue over time as our existing customer base grows and a relatively higher percentage of our revenue is attributable to renewals versus new or expanding Box deployments and as we continue to focus on improving sales productivity.

General and Administrative

Liquidity and Capital Resources

As of July 31, 2023 October 31, 2023, we had cash and cash equivalents, restricted cash, and short-term investments of \$446.1 million \$440.3 million. During the six nine months ended July 31, 2023 October 31, 2023, we generated operating cash flows of \$157.6 million \$229.4 million. Since our inception, we have financed our operations primarily through equity financing, cash generated from operations and debt financing. We believe our existing cash, cash equivalents and short-term investments, together with our credit facilities, will be sufficient to meet our working capital and capital expenditure needs for at least the next 12 months and beyond. Our long-term capital requirements will depend on many factors including our growth rate, subscription renewal activity, billing frequency, public cloud obligations, repayment or refinancing of our debt obligations, the timing and extent of spending to support development efforts, the expansion of international activities, the introduction of new and enhanced service offerings, and the continuing market acceptance of our services. We may in the future enter into arrangements to acquire or invest in complementary businesses, services and technologies, including intellectual property rights. We may be required to seek additional equity or debt financing. In the event that additional financing is required from outside sources, we may not be able to raise it on terms acceptable to us or at all.

Cash Flows

For the **six** **nine** months ended **July 31, 2023** **October 31, 2023** and 2022, our cash flows were as follows (in thousands):

	Six Months Ended		Nine Months Ended	
	July 31,		October 31,	
	2023	2022	2023	2022
Net cash provided by operating activities	\$ 157,606	\$ 136,069	\$ 229,388	\$ 205,795
Net cash (used in) provided by investing activities	(25,059)	119,228	(42,731)	115,383
Net cash used in financing activities	(160,057)	(310,844)	(227,516)	(360,181)

Operating Activities

For the **six** **nine** months ended **July 31, 2023** **October 31, 2023**, cash provided by operating activities was **\$157.6 million** **\$229.4 million**. The primary factors affecting our operating cash flows during this period were our net income of **\$19.1 million** **\$29.8 million**, stock-based compensation of **\$100.6 million** **\$151.5 million**, amortization of deferred commissions of **\$27.4 million** **\$40.8 million**, and depreciation and amortization of our property and equipment and capitalized software of **\$24.5 million** **\$39.0 million**. Cash provided by operating activities during the **six** **nine** months ended **July 31, 2023** **October 31, 2023** were further adjusted by net cash outflows of **\$15.7 million** **\$34.5 million** due to changes in our operating assets and liabilities.

The primary drivers for the changes in operating assets and liabilities include a **\$79.0 million** **\$81.5 million** decrease in deferred revenue, a **\$24.2 million** **\$35.7 million** decrease in operating lease liabilities due to recurring lease payments, a **\$17.3 million** **\$28.4 million** increase in deferred commissions resulting from capitalization of incremental commissions paid to our sales force, and a **\$6.1 million** **\$9.1 million** decrease in accounts payable, accrued expenses and other liabilities. This was partially offset by a **\$96.3 million** **\$93.3 million** decrease in accounts receivable primarily due to the timing of our cash collections and a **\$15.9 million** **\$26.3 million** decrease in operating right-of-use assets due to amortization.

29

Investing Activities

Cash used in investing activities of **\$25.1 million** **\$42.7 million** for the **six** **nine** months ended **July 31, 2023** **October 31, 2023** was primarily driven by **\$65.7 million** **\$106.4 million** in purchases of short-term investments, **\$8.4 million** **\$12.4 million** in capitalized internally developed software costs, and **\$0.7 million** **\$2.8 million** of fixed asset purchases, net of sale proceeds, partially offset by **\$50.0 million** **\$79.0 million** in maturities of short-term investments.

29

Financing Activities

Cash used in financing activities of \$160.1 million \$227.5 million for the six nine months ended July 31, 2023 October 31, 2023 was primarily driven by \$104.9 million \$155.9 million in repurchases of our common stock, \$42.0 million \$58.3 million of employee payroll taxes paid related to net share settlement of stock awards, \$19.0 million \$26.1 million of principal payments of finance lease liabilities, and \$7.4 million \$11.2 million of dividend payments to preferred stockholders. This was partially offset by \$16.8 million \$28.0 million from issuances of common stock under our employee equity plans.

Debt

In January 2021, we issued \$345.0 million aggregate principal amount of 0.00% convertible senior notes due January 15, 2026. The Convertible Notes are senior unsecured obligations and do not bear regular interest. Each \$1,000 principal amount of the Convertible Notes is convertible into 38.7962 shares of our Class A common stock, which is equivalent to a conversion price of approximately \$25.78 per share, subject to adjustment upon the occurrence of specified events. We have made an irrevocable election to settle the principal portion of the Convertible Notes only in cash. Accordingly, upon conversion, we will pay the principal in cash and we will pay or deliver, as the case may be, the conversion premium in cash, shares of common stock or a combination of cash and shares of common stock, at our election.

In connection with the pricing of the Convertible Notes, we entered into privately negotiated Capped Calls with certain counterparties. The Capped Calls each have a strike price of approximately \$25.80 and initial cap prices of \$35.58 per share, subject to certain adjustments.

On November 27, 2017, we entered into a secured credit agreement (as amended or otherwise modified from time to time, the "November 2017 Facility"), which provided for a \$65.0 million revolving loan facility with a \$45.0 million sublimit for the issuance of letters of credit. On June 30, 2023, we entered into an amended and restated credit agreement (the "June 2023 Facility") to provide for a \$150.0 million revolving loan facility and maintain the \$45.0 million letter of credit sublimit. Pursuant to the terms of the June 2023 Facility, the maturity date of the revolving loan facility is the earlier of (i) June 30, 2028, (ii) October 16, 2025, except to the extent that both of the following conditions are satisfied as of such date: (x) the outstanding principal amount of the Convertible Notes as of such date is not greater than \$100.0 million and (y) our liquidity (as determined in accordance with the June 2023 Facility) is greater than or equal to the outstanding principal amount of such Convertible Notes as of such date, and (iii) February 11, 2028, only in the event that any of our Series A Convertible Preferred Stock remains outstanding as of such date. As of July 31, 2023, debt outstanding under the June 2023 Facility was \$30.0 million. Refer to Note 7 for a detailed description of the November 2017 Facility and June 2023 Facilities.

Series A Convertible Preferred Stock

On April 7, 2021 we entered into an investment agreement with KKR and certain other investors relating to the issuance and sale of 500,000 shares of our Series A Convertible Preferred Stock, par value of \$0.0001 per share, for an aggregate purchase price of \$500 million, or \$1,000 per share. Refer to Note 8 for a detailed description of our Series A Convertible Preferred Stock.

Share Repurchase Plan

During the three months ended July 31, 2023 October 31, 2023, we repurchased 2.2 million 1.9 million shares at a weighted average price of \$28.55 \$26.59 per share for a total amount of \$61.5 million \$51.7 million. During the six nine months ended July 31, 2023 October 31, 2023, we repurchased 3.8 million 5.8 million shares at a weighted average price of \$27.63 \$27.28 per share for a total amount of \$105.4 million \$157.1 million. As of July 31, 2023 October 31, 2023, \$35.3 million \$83.5 million remained available for additional repurchases.

On August 28, 2023, our board of directors authorized an expansion of the share repurchase plan. Under this expansion, an additional \$100 million of our Class A common stock may be repurchased in open market transactions through August 28, 2024.

Off-Balance Sheet Arrangements

Through July 31, 2023 October 31, 2023, we did not have any relationships with unconsolidated entities that have, or are reasonably likely to have, a material effect on our financial statements.

30

Contractual Obligations and Commitments

Our principal commitments consist of (i) obligations under operating leases for office spaces and data centers, (ii) obligations under finance leases for servers and related equipment for our data center operations, (iii) purchase obligations not recognized on the condensed consolidated balance sheet as of July 31, 2023 October 31, 2023, which relate primarily to public cloud infrastructure hosting services and IT software and support services, and (iv) debt, including obligations under both our November 2017 June 2023 Facility and Convertible Notes. For more information regarding our obligations for leases, purchase agreements, and debt, refer to Notes 5, 6, and 7, respectively, in Part I, Item 1. Financial Statements.

Critical Accounting Policies and Estimates

Our condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States. The preparation of these condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses, and related disclosures. On an ongoing basis, we evaluate our estimates and assumptions. Our actual results may differ from these estimates under different assumptions or conditions.

30

There have been no material changes to our critical accounting policies and estimates during the six nine months ended July 31, 2023 October 31, 2023 from those disclosed in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended January 31, 2023.

Recent Accounting Pronouncements

Refer to Part I, Item 1. Financial Statements—Note 1 for information regarding the effect of new accounting pronouncements on our financial statements.

Non-GAAP Financial Measures

Regulation S-K Item 10(e), “Use of Non-GAAP Financial Measures in Commission Filings,” defines and prescribes the conditions for use of non-GAAP financial information. Our measure of non-GAAP free cash flow (as defined above) meets the definition of a non-GAAP financial measure.

We use non-GAAP financial measures and our key metrics for financial and operational decision-making (including for purposes of determining variable compensation of members of management and other employees) and as a means to evaluate period-to-period comparisons. We believe that these non-GAAP financial measures and key metrics provide meaningful supplemental information regarding our performance by excluding certain expenses that may not be indicative of our recurring core business operating results. We believe that both management and investors benefit from referring to these non-GAAP financial measures and key metrics in assessing our performance and when planning, forecasting, and analyzing future periods. These non-GAAP financial measures and key metrics also facilitate management’s internal comparisons to our historical performance as well as comparisons to our competitors’ operating results. We believe these non-GAAP financial measures and key metrics are useful to investors both because (1) they allow for greater transparency with respect to key metrics used by management in its financial and operational decision-making and (2) they are used by our institutional investors and the analyst community to help them analyze the health of our business.

Non-GAAP Free Cash Flow

We consider free cash flow to be a profitability and liquidity measure that provides useful information to management and investors about the amount of cash generated by the business that can possibly be used for investing in our business and strengthening the balance sheet; but it is not intended to represent the residual cash flow available for discretionary expenditures. The presentation of free cash flow is also not meant to be considered in isolation or as an alternative to cash flows from operating activities as a measure of liquidity.

Limitations on the use of non-GAAP financial measures

A limitation of our non-GAAP financial measures is that they do not have uniform definitions. Our definitions will likely differ from the definitions used by other companies, including peer companies, and therefore comparability may be limited. Thus, our non-GAAP financial measures should be considered in addition to, not as a substitute for, or in isolation from, measures prepared in accordance with GAAP.

We compensate for these limitations by reconciling non-GAAP financial measures to the most comparable GAAP financial measures. We encourage investors and others to review our financial information in its entirety, not to rely on any single financial measure and to view our non-GAAP financial measures in conjunction with the most comparable GAAP financial measures.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk

We had cash and cash equivalents, restricted cash, and short-term investments of \$446.1 million \$440.3 million as of July 31, 2023 October 31, 2023. Our cash and cash equivalents and short-term investments primarily consist of overnight cash deposits, money market funds, U.S. treasury securities, and certificates of deposit. deposit and non-U.S. government issued securities. We do not expect our operating results or cash flows to be materially affected by a sudden change in market interest rates and we do not enter into investments for trading or speculative purposes.

Interest rate risk also reflects our exposure to movements in interest rates associated with the November 2017 Facility. As of July 31, 2023 October 31, 2023, we had total debt outstanding with a carrying amount of \$30.0 million which approximates fair value. The revolving loans accrue interest at a SOFR rate plus a margin ranging from 1.45% to 1.95%.

Effective September 5, 2019, we entered into a swap agreement with Wells Fargo Bank, National Association (the "Swap Agreement") in order to minimize our interest rate risk exposure due to the volatility of LIBOR. Effective June 5, 2023, we amended the terms of the Swap Agreement to update our borrowing benchmark from LIBOR to SOFR, in line with our amended November 2017 Facility. Under the Swap Agreement, we have hedged a portion of the variable interest payments of our debt by effectively fixing our interest payments over the five-year term of the agreement. As of July 31, 2023 October 31, 2023, our interest rate swap had a notional value of \$30.0 million.

A hypothetical change in interest rates of 100 basis points after July 31, 2023 October 31, 2023 would not have a material impact on the combined net fair value of our outstanding debt and Swap Agreement.

Foreign Currency Risk

Approximately one-third of our revenue is represented by customer contracts denominated in foreign currencies, which include the Japanese Yen, Euro, and British Pound. As our foreign operations continue to grow, specifically in Japan, we have increasing exposure to fluctuations in foreign currency exchange rates.

These fluctuations can result in fluctuations in our total assets, liabilities, revenues, operating expenses and cash flows that we report for our foreign subsidiaries upon translation of these amounts into U.S. dollars. For the three and six nine months ended July 31, 2023 October 31, 2023, total revenue was negatively impacted by approximately 300200 basis points and 350230 basis points, respectively, compared to the corresponding prior period. For the three and six months ended July 31, 2023 October 31, 2023, total operating expenses were unfavorably impacted by approximately 50 basis points and for the nine months ended October 31, 2023, total operating expenses were favorably impacted by approximately 10 and 60 20 basis points, respectively, compared to corresponding prior periods.

Additionally, our international subsidiaries maintain certain asset and liability balances as well as operating expenses that are denominated in foreign currencies other than the functional currency and as a result, may cause us to recognize transaction gains and losses in our statement of operations impacting our operating expenses which are recognized in interest and other expense, net on our condensed consolidated statements of operations. For the three months ended July 31, 2023 and July 31, 2022, foreign currency exchange losses were not material. For the six months ended July 31, 2023 October 31, 2023 and 2022, we incurred \$1.6 million \$1.8 million and \$3.0 million \$1.7 million, respectively, in foreign currency exchange losses. For the nine months ended October 31, 2023 and 2022, we incurred \$3.4 million and \$4.7 million, respectively, in foreign currency exchange losses. To date we have managed our foreign currency risk by maintaining offsetting assets and liabilities and minimizing non-U.S. dollar cash balances and have not entered into derivatives or hedging transactions; however, we may do so in the future.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. The design of disclosure controls and procedures and internal control over financial reporting must reflect the fact that there are resource constraints and that management is required to apply judgment in evaluating the benefits of possible controls and procedures relative to their costs. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the period covered by this Quarterly Report on

PART II – OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Refer to Note 6 in Part I, Item 1 of this Quarterly Report on Form 10-Q under the subheading “Legal Matters,” which is incorporated herein by reference.

Item 1A. RISK FACTORS

Investing in our securities involves a high degree of risk. You should carefully consider the risks and uncertainties described below, together with all of the other information in this Quarterly Report on Form 10-Q, including in the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our condensed consolidated financial statements and related notes, before making a decision to invest in our securities. If any of the risks actually occur, our business, financial condition, operating results and prospects could be materially and adversely affected. In that event, the market price of our Class A common stock could decline, and you could lose part or all of your investment.

Risk Factors Summary

Our business is subject to a number of risks and uncertainties, including those risks discussed at length below. These risks include, among others, the following:

- If we do not compete effectively, our customers do not renew their subscriptions or expand their use of our services are unable to attract new customers at rates that are consistent with our expectations, or if the market for cloud-based enterprise services declines or develops more slowly than we expect, our business could be adversely affected.
- Because we recognize revenue from subscriptions for our services over the term of the subscription, downturns or upturns in new business may not be immediately reflected in our operating results.
- Adverse economic conditions could result in reduced sales, longer sales cycles, reduced renewal rates, slower adoption of new technologies and increased price competition, which may negatively impact our business.
- As a substantial portion of our sales efforts are increasingly focused on cloud content management use cases and targeted at enterprise and highly-regulated customers, our sales cycles may become longer and more expensive as we may encounter greater pricing pressure and implementation and customization challenges, all of which could harm our business and operating results.
- Issues relating to the use of artificial intelligence and machine learning in our offerings could adversely affect our business and operating results.
- If we fail to meet the service level commitments we provide under our subscription agreements, we could be obligated to provide credits or refunds for prepaid amounts related to unused subscription services or face subscription

terminations, which could adversely affect our revenue. Furthermore, any failure in our delivery of high-quality customer support services may adversely affect our relationships with our customers and our financial results.

- Our international operations expose us to significant risks, including the impact of fluctuations in currency exchange rates.
- Actual or perceived security vulnerabilities in our services or any breaches of our security controls and unauthorized access to our or a customer's data could harm our business and operating results.
- Privacy concerns and laws or other domestic or foreign regulations may reduce the effectiveness of our services and harm our business, and we may not be able to satisfy data protection, security, privacy, and other government- and industry-specific requirements, which may harm our growth.
- Our platform must integrate with a variety of operating systems, software applications and technologies that are developed by others, and if we are unable to ensure that our solutions interoperate with such systems, applications and technologies, our service may become less competitive, and our operating results may be harmed.
- If we fail to effectively manage our technical operations infrastructure or suffer from interruptions or delays in service from our third-party providers, the delivery of our services may be harmed, which may adversely affect our business.
- Our services are becoming increasingly mission-critical for our customers and if these services fail to perform properly or if we are unable to scale our services to meet the needs of our customers, our reputation could be adversely affected, our market share could decline and we could be subject to liability claims.
- Our growth depends in part on the success of our strategic relationships with third parties.

- We depend on our key employees and other highly skilled personnel to grow and operate our business, and if we are unable to hire, retain and motivate our personnel, including expanding and optimizing our direct sales force, we may not be able to grow effectively.
- We may be sued by third parties for alleged infringement of their proprietary rights.
- Any failure to protect our intellectual property rights could impair our ability to protect our proprietary technology and brand.
- Our Series A Convertible Preferred Stock has rights, preferences and privileges that are not held by, and are preferential to the rights of, our Class A common stockholders, which could adversely affect our liquidity and financial condition.

Risks Related to Our Business and Our Industry

The market in which we participate is intensely competitive, and if we do not compete effectively, our operating results could be harmed.

The market for cloud content management services is fragmented, rapidly evolving and highly competitive, with relatively low barriers to entry for certain applications and services. Many of our competitors and potential competitors are larger and have greater brand recognition, longer operating histories, and significantly greater resources than we do. Our primary competitors in the cloud content management market include Microsoft (SharePoint) and OpenText (Documentum).

In the enterprise file sync and share market, our primary competitors include Microsoft (OneDrive), Google (Drive) and, to a lesser extent, Dropbox. As we expand our product offerings and use cases, we also compete with companies in the e-signature, content collaboration, workflow automation, and security and governance markets. With the introduction of new technologies and market entrants, we expect competition to intensify in the future. For example, disruptive technologies such as generative AI may fundamentally alter the market for our services in unpredictable ways and reduce customer demand. If we fail to compete effectively, our business will be harmed. Some of our competitors offer their products or services at lower prices or for free as part of a broader bundled product sale or enterprise license arrangement, which has placed pricing pressure on our business. If we are unable to achieve our target pricing levels, our operating results will be negatively impacted. For us to compete effectively, we need to introduce new products and services in a timely and cost-effective manner, meet customer expectations and needs at prices that customers are willing to pay, and continue to enhance the features and functionalities of our cloud content management platform. In addition, pricing pressures and increased competition could result in reduced sales, lower margins, losses or the failure of our services to achieve or maintain widespread market acceptance, any of which could harm our business.

Many of our competitors are able to devote greater resources to the development, promotion and sale of their products or services. In addition, many of our competitors have established marketing relationships and major distribution agreements with channel partners, consultants, system integrators and resellers. Competitors may offer products or services at lower prices or with greater depth than our services. Our competitors may be able to respond more quickly and effectively to new or changing opportunities, technologies, standards or customer requirements. Furthermore, some potential customers, particularly large enterprises, may elect to develop their own internal solutions. For any of these reasons, we may not be able to compete successfully against our competitors.

Our business depends substantially on customers renewing their subscriptions with us and expanding their use of our services. Any decline in our customer renewals or failure to convince our customers to broaden their use of our services would harm our future operating results.

To improve our operating results, it is important that our customers renew their subscriptions with us when their existing subscription term expires. We cannot assure you that customers will renew their subscriptions upon expiration at the same or higher level of service, for the same number of seats or for the same duration of time, if at all. Our net retention rate has fluctuated from period to period and it may decrease again in the future if our customers do not renew their subscriptions with us or decrease their use of our services. Our net retention rate was approximately 103% 102% and 112% 110% as of July 31, 2023 October 31, 2023 and 2022, respectively.

Our net retention rate may decline or fluctuate as a result of a number of factors, including our customers' satisfaction with our services, the effectiveness of our customer support services, the performance of our partners and resellers, our pricing, the prices of competing products or services, mergers and acquisitions affecting our customer base, our ability to successfully integrate new or acquired technology into our products, our ability to execute on our product roadmap, our customers' budgets and spending levels, and the effects of global economic conditions, such as those that arose from the COVID-19 pandemic, or reductions in our customers' spending levels, especially if challenging macroeconomic conditions continue. If our customers do not renew their subscriptions, renew them on less favorable terms, purchase fewer seats, or

fail to purchase new product offerings, our revenue may decline, and we may not realize improved operating results from our customer base.

In addition, our business growth depends in part on our customers expanding their use of our services. The use of our cloud content management platform often expands within an organization as new users are added or as additional services are purchased by or for other departments within an organization. Further, as we have introduced new services throughout our operating history, our existing customers have constituted a significant portion of the users of such services. If our customers do not expand their use of our services, our operating results may be adversely affected.

If the market for cloud-based enterprise services declines or develops more slowly than we expect, our business could be adversely affected.

The market for cloud-based enterprise services is not as mature as the on-premise enterprise software market. Because we derive, and expect to continue to derive, substantially all of our revenue and cash flows from sales of our cloud content management solutions, our success will depend to a substantial extent on the widespread adoption of cloud computing in general and of cloud-based content management services in particular. Many organizations have invested substantial personnel and financial resources to integrate traditional enterprise software into their organizations and may be reluctant or unwilling to migrate to a cloud-based model for managing their content. It is difficult to predict customer adoption rates and demand for our services, the future growth rate and size of the cloud computing market or the entry of competitive services. The expansion of the cloud content management market depends on a number of factors, including the cost, performance and perceived value associated with cloud computing, as well as the ability of companies that provide cloud-based services to address security and privacy concerns. If there is a reduction in demand for cloud-based services, it could result in decreased revenue, harm our growth rates, and adversely affect our business and operating results.

Because we recognize revenue from subscriptions for our services over the term of the subscription, downturns or upturns in new business may not be immediately reflected in our operating results.

We generally recognize revenue from customers ratably over the terms of their subscription agreements, which range from one month to three years or more. As a result, most of the revenue we report in each quarter is the result of subscription agreements entered into during prior quarters. Consequently, a decline in new or renewed subscriptions in any one quarter may not be reflected in our revenue results for that quarter. However, any such decline will negatively affect our revenue in future quarters. Accordingly, the effect of significant downturns in sales, our failure to achieve our internal sales targets, a decline in the market acceptance of our services, or a decrease in our net retention rate may not be fully reflected in our operating results until future periods. Our subscription model also makes it difficult for us to rapidly increase our revenue through additional sales in any period, as revenue from additional sales must be recognized over the applicable subscription term.

If we are unable to attract new customers at rates that are consistent with our expectations, our future revenue and operating results could be adversely impacted.

To improve our operating results and continue growing our business, it is important that we continue to attract new customers and expand deployment of our solutions and products with existing customers. To the extent we are successful in increasing our customer base, we could incur increased losses because costs associated with new customers are generally incurred up front, while revenue is recognized ratably over the term of our subscription services. Alternatively, to the extent we are unsuccessful in increasing our customer base, we could also incur increased losses as costs associated with marketing programs and new products intended to attract new customers would not be offset by incremental revenue and cash flow. Changes in economic conditions may financially impact our existing and prospective customers and cause them to delay or reduce their technology spending, which may adversely affect our ability to attract new customers. For example, our business has been impacted by pressure from customers' lower headcount growth and greater budget scrutiny on IT decisions since the second half of fiscal year 2023. All of these factors could negatively impact our future revenue and operating results.

Adverse economic conditions could result in reduced sales, longer sales cycles, reduced renewal rates, slower adoption of new technologies and increased price competition, which may negatively impact our business.

Our business depends on the overall demand for cloud content management services and on the economic health of our current and prospective customers. The United States and other key international economies have experienced cyclical downturns from time to time that have resulted in a significant weakening of the economy, more limited availability of credit, a reduction in business confidence and activity, and other difficulties that may affect the industries to which we sell our services. An economic downturn, recession, or uncertainty about economic conditions, including volatility in the credit, equity and foreign exchange markets, inflation, rising interest rates, potential U.S. sovereign default, bank failures and financial instability, ongoing supply chain disruptions, unemployment trends, the adverse effects of pandemics (such as COVID-19) and geopolitical issues, such as the Russian invasion of Ukraine, Hamas-Israel and Russia-Ukraine conflicts, could cause customers to delay or reduce their information technology spending. This could result in reduced sales, longer sales cycles, reduced renewal rates, slower adoption of new technologies, and increased price competition. Any of these events would

likely have an adverse effect on our business, operating results and financial position. Since the second half of our fiscal year 2023, we have seen an impact from additional customer scrutiny being placed on deals due to the economic environment. In addition, there can be no assurance that cloud content management and collaboration spending levels will increase following any recovery.

If we are not able to successfully launch new products and services or provide enhancements or new features to our existing products and services, our business could be adversely affected.

Our industry is marked by rapid technological developments and new and enhanced applications and services. If we are unable to enhance our existing services or offer new services such as our electronic signature offering, Box Sign, our virtual whiteboarding offering, Box Canvas, or our recently announced plans to integrate advanced AI models into our new intelligence capability, Box AI, that achieve market acceptance or keep pace with rapid technological developments, our business could be adversely affected. The success of any new services or enhancements to our existing services, such as Box AI and Box Hubs, depends on several factors, including their timely completion, introduction and market acceptance. We also may experience business or economic disruptions that could adversely affect the productivity of our employees and result in delays in our product development process. For example, we have re-opened our offices globally and We maintain a hybrid workforce (with a mix of employees working from offices and others working remotely). This, which may lead to disruptions and decreased productivity that could result in delays in our product development process. Failure in this regard may significantly impair our revenue growth and our future financial results. Our product development efforts could also be impacted by our workforce location strategy as we hire an increasing number of our engineers in regions such as Poland and the Netherlands. In addition, because our services are designed to operate on a variety of systems, we must continuously modify and enhance our services to keep pace with changes in internet-related hardware, mobile operating systems, and other software, communication, browser and database technologies. We may not be successful in developing these modifications and enhancements or bringing them to market in a timely fashion, which may negatively impact our customer renewal rates, limit the market for our solutions, or impair our ability to attract new customers. Furthermore, modifications to existing platforms or technologies will increase our research and development expenses. Any failure of our services to operate effectively with existing or future network platforms and technologies could reduce the demand for our services, result in customer dissatisfaction and adversely affect our business.

Issues relating to the use of artificial intelligence and machine learning in our offerings could adversely affect our business and operating results.

Issues relating to the use of new and evolving technologies such as generative artificial intelligence (AI) powered by large language models and machine learning that we integrate into our product offerings may cause us to experience brand or reputational harm, competitive harm, legal liability, new or enhanced governmental or regulatory scrutiny, and to incur additional costs to resolve such issues. As with many innovations, AI presents risks and challenges that could undermine or slow its adoption, and therefore harm our business. For example, perceived or actual technical, legal, compliance, privacy, security, ethical or other issues relating to the use of AI may cause public confidence in AI to be undermined, which could slow our customers' adoption of our products and services that use AI. In addition, litigation or government regulation related to the use of AI may also adversely impact our and others' abilities to develop and offer products that use AI, as well as increase the cost and complexity of doing so. Developing, testing and deploying third-party AI systems may also increase the cost profile of our product offerings due to the nature of the computing costs involved in such systems, which could impact our project margin and adversely affect our business and operating results. Our business may be disrupted if any of the third-party AI services we use become unavailable due to extended outages or interruptions or because they are no longer available on commercially reasonable terms or prices. Further, market demand and acceptance of AI technologies are uncertain, and we may be unsuccessful in our product development efforts.

Our sales to government entities are subject to a number of additional challenges and risks.

We sell to government customers, which can be highly competitive, often requiring significant upfront time and expense without any assurance that these efforts will generate a sale. Government certification requirements may change, or we may lose one or more government certifications, and in doing so restrict our ability to sell into the government sector or maintain existing government customers until we attain revised certifications. Government demand and payment for our products and services are affected by public sector budgetary cycles and funding authorizations, with funding reductions or delays adversely affecting public sector demand for our solutions. Moreover, an extended federal government shutdown resulting from budgetary decisions, a prolonged continuing resolution, breach of the federal debt ceiling, or potential U.S. sovereign default may limit or delay federal government spending on our solutions and adversely affect our revenue. Government entities may also have statutory, contractual or other legal rights to terminate contracts with us for convenience or due to a default, and any such termination may adversely affect our future operating results.

37

As our sales efforts are increasingly focused on cloud content management use cases and are targeted at enterprise and highly-regulated customers, our sales cycles may become longer and more expensive, and we may encounter greater pricing pressure and implementation and customization challenges, all of which could harm our business and operating results.

As our sales efforts are increasingly focused on cloud content management use cases and are targeted at enterprise and highly-regulated customers, we face greater costs, longer sales cycles and less predictability in the completion of some of our sales. In this market segment, a customer's decision to use our services may be an enterprise-wide decision. These types of sales opportunities require us to provide greater levels of customer education regarding the uses and benefits of our services, as well as education regarding security, privacy, and data protection laws and regulations, especially for customers in more heavily regulated industries or with significant international operations. In addition, larger enterprises may demand more customization, integration, support services, and features. These factors could increase our costs, lengthen our sales cycles and leave fewer sales support and professional services resources for other customers. Professional services may also be performed by a third party or a combination of our own staff and a third party. Our strategy is to work with third parties to increase the breadth of capability and depth of capacity for delivery of these services to our customers. If a customer is not satisfied with the quality or interoperability of our services with their own IT environment, we could incur additional costs to address the situation, which could adversely affect our margins. Moreover, any customer dissatisfaction with our services could damage our ability to encourage broader adoption of our services by that customer. In addition, any negative publicity resulting from such situations, regardless of its accuracy, may further damage our business by affecting our ability to compete for new business with current and prospective customers.

If we fail to meet the service level commitments we provide under our subscription agreements, we could be obligated to provide credits or refunds for prepaid amounts related to unused subscription services or face subscription terminations, which could adversely affect our revenue. Furthermore, any failure in our delivery of

high-quality customer support services may adversely affect our relationships with our customers and our financial results.

Our customer subscription agreements provide service level commitments. If we are unable to meet our service level commitments or suffer periods of downtime that exceed the periods allowed under our customer agreements, we may be obligated to provide customers with service credits, which could significantly impact our revenue in the period in which the downtime occurs and the credits could be due. We have encountered issues in the past that have caused Box services to be temporarily unavailable, and we cannot assure you that we will not experience interruptions or delays in our service in the future. We could also face subscription terminations, which could significantly impact our current and future revenue. Any extended service outages could also adversely affect our reputation, which would also impact our future revenue and operating results.

Our customers depend on us to resolve technical issues relating to our services. We may be unable to respond quickly enough to accommodate short-term increases in customer demand for support services. Increased customer demand for these services, without corresponding revenue, could increase costs and adversely affect our operating results. In addition, our sales process is highly dependent on the ease of use of our services, our reputation and positive recommendations from our existing customers. Any failure to maintain, or a market perception that we do not maintain, high-quality customer support could adversely affect our reputation and our ability to sell our services to existing and prospective customers.

We are in the process of expanding our international operations, which exposes us to significant risks.

A key element of our growth strategy is to expand our international operations and develop a worldwide customer base. In addition, we have opened, and may continue to open, international offices and hire employees to work at these offices in order to gain access to additional talent. For example, in 2020, we established an office in Warsaw, Poland and, in 2021, we acquired SignRequest B.V., a company located in the Netherlands. We have continued to increase our headcount in these regions as we migrate a larger portion of our development to lower cost regions. We are currently committed to our presence in these regions and have entered into a long-term operating lease in Poland to support our growth. Operating in international markets requires significant resources and management attention and will subject us to regulatory, economic, geographic, social, and political risks that differ from those in the United States. Because of our limited experience with international operations and significant differences between international and U.S. markets, we may not succeed in creating demand for our services outside of the United States or in effectively selling our services in all of the international markets we enter. In addition, we will face challenges in doing business internationally that could adversely affect our business, including:

- the need to localize and adapt our services for specific countries, including translation into foreign languages and associated expenses;
- laws (and changes to such laws) relating to privacy, data protection and data transfer that, among other things, could require that customer data be stored and processed in a designated territory;
- difficulties in staffing and managing foreign operations especially in new markets with diverse cultures, languages, customs and legal systems;

- different pricing environments, longer sales cycles and longer accounts receivable payment cycles and collections issues;
- differing labor regulations, especially in Europe, where labor laws are generally more advantageous to employees as compared to the United States;
- new and different sources of competition;
- weaker protection for intellectual property and other legal rights than in the United States and practical difficulties in enforcing intellectual property and other rights outside of the United States;
- laws and business practices favoring local competitors, including economic tariffs;
- changes in the geopolitical environment, the perception of doing business with U.S. based companies, and changing regulatory requirements that impact our operating strategies, access to global markets or hiring;
- compliance challenges related to the complexity of multiple, conflicting and changing governmental laws and regulations, including employment, tax, privacy and data protection laws and regulations;
- increased financial accounting and reporting burdens and complexities;
- currency exchange rate fluctuations;
- restrictions on the transfer of funds;
- reliance on third-party resellers and other parties;
- adverse tax consequences; and
- unstable regional, economic, social and political conditions, such as the Russian invasion of Ukraine, Hamas-Israel Russia-Ukraine conflicts.

In addition, the United Kingdom's (UK) withdrawal from the European Union (EU), or Brexit, became effective on January 31, 2020. The UK and EU subsequently signed an EU-UK Trade and Cooperation Agreement. This agreement provides details on how some aspects of the UK and EU's relationship will operate going forward, however there continues to be uncertainty over the practical consequences of Brexit. The impact of Brexit depends on the implementation of this agreement, as well as the terms of the UK's future trade agreements with other countries, and such impact may not be fully realized for several years or more. This lack of clarity could lead to economic and legal uncertainty, including significant volatility in global stock markets and currency exchange rates, among other things. Any of these effects of Brexit, among others, could adversely affect our operations, especially in the United Kingdom where we have a significant employee and customer base, and our financial results.

We are exposed to fluctuations in currency exchange rates, which could adversely affect our operating results or financial position.

We sell our services and incur operating expenses in various currencies. Therefore, fluctuations in the relative value of the U.S. dollar and foreign currencies, particularly the Japanese Yen, and to a lesser extent, the British pound and the Euro, may impact our operating results. For example, the Japanese Yen, the British pound and the Euro have all experienced declines in value vis-à-vis the U.S. dollar, which negatively affected our results of operations during the year ended January

31, 2023 and the **six** **nine** months ended **July 31, 2023** **October 31, 2023** and could continue to negatively impact our results of operations in future periods. We currently manage our exchange rate risk by maintaining offsetting foreign currency assets and liabilities and by minimizing non-U.S. dollar cash balances, but we do not have any other hedging programs in place to limit the risk of exchange rate fluctuation. In the future, we may elect to deploy normal and customary hedging practices designed to more proactively mitigate such exposure. Such practices may not ultimately be available and/or effective at mitigating the foreign currency risk to which we are exposed. If we are unsuccessful in detecting material exposures in a timely manner, any hedging strategies we deploy are not effective, or there are no hedging strategies available for certain exposures that are prudent given the associated risks and the potential mitigation of the underlying exposure achieved, our operating results or financial position could be negatively affected in the future.

If we are unable to maintain and promote our brand, our business and operating results may be harmed.

We believe that maintaining and promoting our brand is critical to expanding our customer base. Maintaining and promoting our brand will depend largely on our ability to continue to provide useful, reliable and innovative services, which we may not do successfully. We may introduce new features, products, services or terms of service that our customers do not like, which may negatively affect our brand and reputation. Additionally, the actions of third parties may affect our brand and reputation if customers do not have a positive experience using third-party apps or other services that are integrated with Box. Maintaining and enhancing our brand may require us to make substantial investments, and these investments may not achieve the desired goals. If we fail to successfully promote and maintain our brand or if we incur excessive expenses in this effort, our business and operating results could be adversely affected.

We have a history of cumulative losses, and we may not be able to maintain profitability.

We generated a net income of \$26.8 million during the year ended January 31, 2023 and incurred net losses of \$41.5 million and \$43.4 million during the years ended January 31, 2022 and 2021, respectively. We generated net income of **\$19.1 million** **\$29.8 million** in the **six** **nine** months ended **July 31, 2023** **October 31, 2023**. As of **July 31, 2023** **October 31, 2023**, we had an accumulated deficit of \$1.3 billion. The losses in fiscal years 2022 and 2021 and related accumulated deficit reflect the substantial investments we made to acquire new customers and develop our services. We intend to continue scaling our business to increase our number of users and paying organizations and to meet the increasingly complex needs of our customers and may incur additional expenses as we make investments to scale our business. Further, it is difficult to predict the size and growth rate of our market, customer demand for our platform and for any new features or products we develop, and the success of competitive products or services. As a result, we may not maintain profitability in future periods.

Our quarterly results may fluctuate significantly and may not fully reflect the underlying performance of our business.

Our quarterly operating results may vary significantly in the future, and period-to-period comparisons of our operating results may not be meaningful. Accordingly, the results of any one quarter should not be relied upon as an indication of future performance. Our quarterly financial results may fluctuate as a result of a variety of factors, and as a result, may not fully reflect the underlying performance of our business. Factors that may cause fluctuations in our quarterly financial results include, but are not limited to:

- our ability to attract and retain new customers;
- our ability to convert users of our limited free version to paying customers;
- the addition or loss of large customers, including through acquisitions or consolidations;
- changes in our net retention rate;
- the timing of revenue recognition;
- the impact on billings of customer shifts between payment frequencies;
- the timing of cash collections and payments and its impact on cash flows;
- the amount and timing of operating expenses related to the maintenance and expansion of our business, operations and infrastructure;
- network or service outages, internet disruptions, disruptions to the availability of our service, or actual or perceived security breaches, incidents and vulnerabilities;
- general economic, industry and market conditions, including those caused by the Russian invasion of Ukraine, Hamas and Russia-Ukraine conflicts, and as a result of inflation, rising interest rates, or bank failures and financial instability;
- changes in our go-to-market strategies and/or pricing policies and/or those of our competitors;
- seasonal variations in our billings results and sales of our services, which have historically been highest in the fourth quarter of our fiscal year;
- the timing and success of new services and product introductions by us and our competitors or any other change in competitive dynamics of our industry, including consolidation or new entrants among competitors, customers or strategic partners;
- changes in usage or adoption rates of content management services;
- the success of our strategic partnerships, including the performance of our resellers; and
- the timing of expenses related to the development or acquisition of technologies or businesses and potential future charges for impairment of goodwill from acquired companies.

Risks Related to Data Privacy and Data Security

Actual or perceived security vulnerabilities in our services or any breaches of our security controls and unauthorized access to our or a customer's data could harm our business and operating results.

The services we offer involve the storage of large amounts of our and our customers' sensitive and proprietary information, some of which may be considered personally identifiable. Cyberattacks and other malicious internet-based activity, including ransomware, malware and viruses, continue to increase in frequency and magnitude and we face security

threats from malicious third parties that could obtain unauthorized access to, or disrupt, our systems, infrastructure and networks. These threats may come from a

40

variety of sources including nation-state sponsored espionage and hacking activities, industrial espionage, organized crime, sophisticated organizations, hacking groups and individuals and insider threats. These sources can also implement social engineering techniques, such as “phishing,” “smishing” or “vishing” attacks, to induce our partners, users, employees or customers to disclose

40

passwords or other sensitive information or take other actions to gain access to our data or our users’ data. Hackers that acquire user account information at other companies can attempt to use that information to compromise the accounts of our personnel, or our users’ accounts if an account shares the same sensitive information such as passwords. As we increase our customer base, our brand becomes more widely known and recognized, and our service is used in more heavily regulated industries where there may be a greater concentration of sensitive and protected data, such as healthcare, government, life sciences, and financial services, we have become more of a target for these malicious third parties.

In addition, because Box is configured by administrators and users to select their default settings, the third-party integrations they enable, and their privacy and permissions settings, an administrator or user could intentionally or inadvertently configure settings to share their sensitive data. For example, a Box user can choose to share the content they store in Box with third parties by creating a link that can be customized to be accessible by anyone with the link. While this feature is designed to be used for a variety of legitimate use cases in which a user wishes to share non-sensitive content with a broad or public audience, if a user were to intentionally or inadvertently configure a setting that allowed public access to their sensitive data, that data could be discovered and accessed by an unintended third party.

We cannot guarantee that any security measures that we or third parties on which we rely have implemented will be completely effective against current or future security threats, or that our systems and networks or those of such third parties have not been breached or otherwise compromised, or that they and any software in our or their supply chains do not contain bugs, vulnerabilities, or compromised code that could result in a breach of or disruption to our systems and networks or the systems and networks of third parties that support us or our products or services. Given that our customers manage significant amounts of sensitive and proprietary information on our platform, and many of our customers are in heavily regulated industries where there may be a greater concentration of sensitive and proprietary data, our reputation and market position are particularly sensitive to impacts from actual or perceived security breaches or incidents, security vulnerabilities, or concerns regarding security. If our security measures or those of third parties on which we rely are or are believed to be inadequate or breached or otherwise compromised as a result of third-party action, employee negligence, error or malfeasance, product defects, social engineering techniques, improper user configuration or otherwise, and this results in, or is believed to result in, unauthorized access to or disclosure, modification, misuse, loss, corruption, unavailability, or destruction of our data or our customers’ data, or any other disruption of the confidentiality, integrity or availability of our data

or our customers' data, we could incur significant liability to various parties, including our customers and individuals or organizations whose information is stored by our customers, and our business, reputation or competitive position may be harmed. Techniques used to obtain unauthorized access to, or to sabotage, systems or networks, are constantly evolving and generally are not recognized until launched against a target. Therefore, we may be unable to anticipate these techniques, react in a timely manner, or implement adequate preventive measures, and we may face delays in our detection or remediation of, or other responses to, security breaches and other security-related incidents or vulnerabilities. We have observed increased level of sophistication in the types of techniques, including social engineering techniques, that malicious third parties may use in an attempt to gain access to our or our users' data. Due to political uncertainty the Hamas-Israel and military actions associated with Russia's invasion Russia-Ukraine conflicts, or other areas of Ukraine, geopolitical tension around the world, we and the third parties on which we rely are vulnerable to a heightened risk of cybersecurity attacks, social engineering attacks, viruses, malware, ransomware, hacking or similar breaches and incidents from nation-state and affiliated actors, including attacks that could materially disrupt our supply chain and our systems, operations and platform. Additionally, many of our personnel and personnel of the third parties on which we rely work remotely at least part of the time, which imposes additional risks to our business, including increased risk of industrial espionage, theft of assets, phishing, and other cybersecurity attacks, and inadvertent or unauthorized access to or dissemination of sensitive, proprietary, or confidential information. We also expect to incur significant costs in our ongoing efforts to detect and prevent security breaches and other security-related incidents, and in the event of actual or perceived security breaches or other security-related incidents. Additionally, our service providers and other third parties on which we rely may suffer, or be perceived to suffer, data security breaches or other incidents that may compromise data stored or processed for us that may give rise to any of the foregoing.

Our customer contracts often include (i) specific obligations that we maintain the availability of the customer's data through our service and that we secure customer content against unauthorized access or loss, and (ii) provisions whereby we indemnify our customers for third-party claims asserted against them that result from our failure to maintain the availability of their content or securing the same from unauthorized access or loss. While our customer contracts generally contain limitations on our liability in connection with these obligations and indemnities, if an actual or perceived security breach or incident occurs, the market perception of the effectiveness of our security measures could be harmed, we could be subject to indemnity or damage claims in certain customer contracts, and we could lose future sales and customers, any of which could harm our business and operating results. Furthermore, while our errors and omissions insurance policies include liability coverage for certain of these matters, if we experience a security breach or other incident, we could be subject to indemnity claims or other damages that exceed our insurance coverage. We also cannot be certain that our insurance coverage will be adequate for data handling or data security liabilities actually incurred, that

41

insurance will continue to be available to us on economically reasonable terms, or at all, or that any insurer will not deny coverage as to any future claim. The successful assertion of one or more large claims against us that exceed available insurance coverage, or the

41

occurrence of changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could have a material adverse effect on our business, including our financial condition, operating results, and reputation.

Privacy concerns and laws or other regulations may reduce the effectiveness of our services and harm our business.

Users can use our services to store identifying information or information that otherwise is considered personal information. Federal, state and foreign government bodies and agencies have adopted or are considering adopting laws and regulations regarding the collection, use and disclosure of personal information obtained from consumers, businesses and other individuals and entities. Data protection, privacy, consumer protection, cybersecurity and other laws and regulations, particularly in Europe, are often more restrictive than those in the United States. The costs of compliance with, and other burdens imposed by, such laws, policies and regulations that apply to our business or our customers' businesses may limit the use and adoption of our services and reduce overall demand for them.

These laws and regulations, which may be enforceable by private parties and/or governmental entities, are constantly evolving and can be subject to significant change. A number of new laws coming into effect and/or proposals pending before federal, state and foreign legislative and regulatory bodies could affect our business. For example, the European Commission enacted the Union's General Data Protection Regulation (GDPR), which imposed imposes significant obligations on companies regarding the handling of personal data and penalties for noncompliance of up to the greater of 20 million Euros or four percent of a company's global revenue. Further, local data protection authorities in Europe may adopt regulations and/or guidance more stringent than the GDPR, which may impose additional compliance costs or other burdens that impact our business. In 2020, the Court of Justice of the European Union (CJEU) invalidated the EU-U.S. Privacy Shield framework, and imposed additional obligations on companies when relying on model contractual clauses approved by the European Commission (EC) to transfer personal data from the EU to the U.S. On September 8, 2020, the Swiss Federal Data Protection and Information Commissioner invalidated the Swiss-U.S. Privacy Shield in light of the CJEU's decision. These developments or other developments relating to cross-border data transfer may result in the EC, European Data Protection Board and/or other regulators applying differing standards for, and requiring ad hoc verification of, transfers of personal data from the European Economic Area (EEA), Switzerland, or the United Kingdom (UK) to the U.S. For example, on June 4, 2021, the EC published new standard contractual clauses (SCCs) that were required to be implemented by companies relying on the SCCs as a basis for cross-border transfers of personal data by December 27, 2022. These or other developments relating to cross-border data transfer required us to issue additional policies, update our data transfer agreements with applicable customers and third party service providers and assess our practices. This CJEU decision that invalidated the EU-U.S. Privacy Shield framework and/or other legal challenges relating to cross-border data transfers may serve as a basis for challenges to our personal data handling practices, or those of our customers, and may otherwise adversely impact our business, financial condition and operating results. Moreover, the EC European governments have adopted an adequacy decision for the EU-U.S. Data Privacy Framework, (EU-U.S. Framework) on July 10, 2023, allowing the EU-U.S. Framework to be utilized as a means to transfer EU personal data to U.S. participating entities. The UK and the U.S. also have agreed in principle to the EU-US Framework with a goal of creating a UK extension (the "UK-U.S. Data

Bridge”), and the Swiss Federal Data Protection and Information Commissioner issued a statement on July 11, 2023, acknowledging the EC’s adequacy decision regarding the EU-U.S. Framework and confirming that it is in discussions with the U.S. regarding a parallel framework entitled, the “Swiss-U.S. Framework.” While the EU-U.S. Framework, UK-U.S. Data Bridge and Swiss-U.S. Framework (together, the “Data Privacy Framework”) replacing the EU-U.S. Privacy Shield Framework. While the Data Privacy Framework could benefit the industry as a whole, and our company directly, there can be no assurance that the UK-U.S. Data Bridge or Swiss-U.S. Framework will be established, nor that we will find it appropriate to use, or be able to use or maintain any or all of these mechanisms noted above. Further, company’s certification, these mechanism could result in additional costs to ensure compliance, be subject to future reviews, and subject to suspension, amendment, repeal, or limitations to their scope.

Brexit has created uncertainty around data protection issues and could lead to further legislative and regulatory changes. For example, the UK Data Protection Act of 2018 substantially mirrors the EU GDPR in the UK and was the subject of statutory amendments that further aligned it with the GDPR in 2019. In June 2021, the EC announced a decision that the UK is an “adequate country” to which personal data could be exported from the EEA, but this decision must be renewed and may face challenges in the future, creating uncertainty regarding transfers of personal data to the UK from the EEA. It remains unclear how UK data protection laws or regulations will develop, and how data transfers to and from the United Kingdom will be regulated, over time. In 2022, the Information Commissioner’s Office (ICO) issued the UK SCCs as a valid data transfer mechanism for cross border data transfers from the UK to third countries. The UK-U.S. Data Bridge may serve as an additional data transfer mechanism to utilize, but this remains subject to the uncertainties described above. Additional or modified guidance regarding, or changes to, UK cross border data transfers and/or overall UK data protection laws and/or guidance could occur, which may require us to change our policies, practices and engage in additional contractual negotiations. Such legislative and regulatory changes may result in increased costs of compliance and limitations on our customers and us.

In 2018, the State of California enacted the California Consumer Privacy Act (CCPA), which became operative on January 1, 2020. The CCPA requires covered companies to, among other things, provide new disclosures to California consumers and afford such consumers new abilities to opt-out of certain sales of personal information. Additionally, the California Privacy Rights Act (CPRA) was approved by California voters in November 2020 and amended and expanded the CCPA. The CPRA’s substantive provisions became effective on January 1, 2023, and the newly formed California Privacy Protection Agency began its rulemaking

42

process to adopt proposed regulations. With a delay in CPRA enforcement until March 29, 2024, our readiness efforts are subject to change and may result in continued uncertainty and require additional costs and expenses to ensure readiness, compliance and decrease risks. Further, other states have been considering, and in some cases enacting, laws relating to privacy and cybersecurity,

42

many of which are comprehensive privacy statutes imposing obligations similar to the CCPA and CPRA. For example, Virginia's privacy law went into effect on January 1, 2023; Colorado and Connecticut's privacy laws went into effect on July 1, 2023, and Utah's privacy law will be effective December 31, 2023. In addition, Tennessee, Iowa, Indiana, Montana, Florida, Oregon, and Texas have enacted privacy laws that will become effective between 2024 and 2026. In addition, Delaware, has passed legislation that is awaiting signature by its state governor and that would go into effect in 2025. Other states, such as, Pennsylvania, Massachusetts, North Carolina, and New Jersey, have introduced comprehensive privacy bills, with amongst other U.S. states, are anticipated to follow suit. Efforts to comply with these laws and related fluctuations in laws relating to privacy and cybersecurity at the federal, state and local levels may impact readiness and compliance, along with the potential to incur additional costs. We cannot fully predict the impact of these laws and other proposed federal and state laws relating to privacy and cybersecurity on our business or operations, but they may require us to modify our data processing practices and policies and incur substantial costs and expenses in an effort to comply.

In addition, some countries such as member states of the European Economic Area (EEA) are considering or have enacted legislation requiring storage localization and/or the processing of more regulated types of data in region, along with other limitations that could impact U.S. technology companies and more specifically, Box. If we are unable to develop and offer services that meet these obligations or help our customers meet their requirements under the laws, regulations, case law or guidance issued relating to privacy, data protection, or information security, we may become unable to provide services in these regions and/or be subject to significant fines and penalties, which would harm our business.

We also expect laws, regulations, industry standards and other obligations worldwide relating to privacy, data protection, ransomware and cybersecurity to continue to evolve, and that there will continue to be new, modified, and re-interpreted laws, regulations, standards, and other obligations in these areas. We cannot yet determine the impact such future laws, regulations and standards, or amendments to or re-interpretations of, existing laws and regulations, industry standards, or other obligations may have on us or our business. Moreover, these existing and proposed laws, regulations, standards, and other actual or asserted obligations can be difficult and costly to comply with, delay or impede the development or adoption of our products and services, reduce the overall demand for our products and services, increase our operating costs, require modifications to our policies, practices, or products or services, require significant management time and attention, and slow the pace at which we close (or prevent us from closing) sales transactions. Additionally, any actual or alleged noncompliance with these laws, regulations, standards, or other actual or asserted obligations could result in negative publicity and subject us to investigations and other proceedings by regulatory authorities, claims, demands, and litigation by private entities, or other requested remedies or demands, including demands that we modify or cease existing business practices, and expose us to significant fines, penalties and other damages and liabilities. In addition to the possibility of fines, proceedings, demands, claims, and litigation, we may find it necessary or appropriate to fundamentally change our business activities and practices, including the establishment of in-region data storage or other data processing operations, or modify or cease offering certain products or services, any of which could have an adverse effect on our business. We may be unable to make such changes and modifications in a commercially reasonable manner or at all, and our ability to develop new offerings and features could be limited.

Furthermore, government agencies may seek to access sensitive information that our users upload to Box, or restrict users' access to Box. Laws and regulations relating to government access and restrictions are evolving, and compliance with

such laws and regulations could limit adoption of our services by users and create burdens on our business. Moreover, regulatory investigations into, or other proceedings by regulators or private entities involving, our compliance with privacy-related laws and regulations could increase our costs and divert management attention.

If we are not able to satisfy data protection, security, privacy, and other government- and industry-specific requirements, our growth could be harmed.

There are a number of data protection, security, privacy and other government- and industry-specific requirements, including those that require companies to notify individuals of data security incidents involving certain types of personal data. Security compromises experienced by our competitors, by our customers or by us may lead to public disclosures, which could harm our reputation, erode customer confidence in the effectiveness of our security measures, negatively impact our ability to attract new customers, or cause existing customers to elect not to renew their agreements with us. Our customers also expect, and in some instances require, us to meet voluntary certifications or adhere to guidelines or standards established by third parties, to offer particular controls, or otherwise support customer-specific requirements. Although we currently have certain certifications such as AICPA SOC 1, 2 and 3 reports, and ISO/IEC 27001, 27017, 27018, and 27701 we may not be successful in continuing to maintain these certifications or in obtaining other certifications or otherwise being able to adhere to or comply with all customer requirements. In addition, some of the industries and/or regions that we serve have specific requirements relating to security and regulatory standards, such as GxP, FedRAMP and StateRAMP, and those required by HIPAA, FINRA, HITECH Act, the Data Privacy Framework and Asia-Pacific Economic Cooperation Privacy Recognition for Processors and Cross Border Privacy Rules. As we expand into new industries and regions, we will likely need to comply with these and other new requirements to compete effectively. We may not always be able to support or

43

comply with all of these customer requirements. If we cannot adequately comply with these requirements, our growth could be adversely impacted, we may face a loss of customers or difficulty attracting new customers in impacted industries, and we could incur significant liability and our reputation and business could be harmed. In addition, as regulations in the EU and the UK continue to shift, it could impact our ability to comply with and maintain EU and UK Processor and Controller Binding Corporate Rules.

43

Risks Related to Our Technical Operations Infrastructure and Dependence on Third Parties

If we are unable to ensure that our solutions interoperate with operating systems, software applications and technologies developed by others, our service may become less competitive, and our operating results may be harmed.

We offer our services across a variety of operating systems and through the internet. We are dependent on the interoperability of our platform with third-party mobile devices, tablets, desktop and mobile operating systems, as well as web browsers that we do not control. Any changes in such systems, devices or web browsers that degrade the functionality of our

services or give preferential treatment to competitive services could adversely affect usage of our services and our ability to deliver high quality services. We may not succeed in developing relationships with key participants in the mobile industry or in developing services that operate effectively with these operating systems, networks, infrastructure, devices, web browsers and standards. In the event that our users experience difficulty accessing and using our services, our user growth may be harmed, and our business and operating results could be adversely affected.

If we fail to effectively manage our technical operations infrastructure, our customers may experience service outages and delays in the deployment of our services, which may adversely affect our business.

We have experienced significant growth in the number of users and the amount of data that our operations infrastructure supports. We seek to maintain sufficient excess capacity in our operations infrastructure to meet our customers' needs. We also seek to maintain excess capacity to facilitate the rapid provisioning of new customer deployments and the expansion of existing customer deployments. In addition, we need to properly manage our technological operations infrastructure in order to support version control, changes in hardware and software parameters and the evolution of our services. However, the provision of new hosting infrastructure requires significant lead-time. We have experienced, and may in the future experience, website disruptions, incidents of data corruption and loss, service outages and other performance problems. These problems may be caused by a variety of factors, including infrastructure changes, changes to our core services architecture, changes to our infrastructure necessitated by legal and compliance requirements governing the storage and transmission of data, human or software errors, viruses, security attacks, fraud, spikes in customer usage, primary and redundant hardware or connectivity failures, dependent data center and other service provider failures and denial of service issues. Additionally, our ability to properly manage our technical operations infrastructure depends on the reliability of the global supply chain for hardware, network, and platform infrastructure equipment. Significant and unforeseen disruptions to the supply chain may impede our ability to meet our infrastructure capacity requirements. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time, which may harm our reputation and operating results. Furthermore, if we encounter any of these problems in the future, our customers may lose access to important data or experience data corruption or service outages that may subject us to financial penalties, other liabilities and customer losses. If our operations infrastructure fails to keep pace with increased sales, customers may experience delays as we seek to obtain additional capacity, which could adversely affect our reputation and our business. Further, as we decommission on-premise infrastructure hosted in data centers, our sale of data center equipment could occur over a period longer than planned and result in lower than expected sale proceeds.

Interruptions or delays in service from our third-party data center hosting facilities and cloud computing and hosting providers could impair the delivery of our services and harm our business.

We currently store and process our customers' information within multiple third-party data center hosting facilities located in Nevada and, increasingly, in third-party cloud computing and hosting facilities inside and outside of the United States. As we continue to migrate more of have recently migrated our storage and processing operations to cloud computing and hosting facilities operated by third parties, our service will has become more susceptible to interruptions or delays that are out of our direct control. These third parties are vulnerable to operational and technological disruptions, including from cyber-attacks and security breaches and incidents, which may negatively impact our ability to provide services to our

customers and operate our business. Similarly, as part of our disaster recovery arrangements, our production environment and metadata related to our customers' data is currently replicated in near real time in facilities located in Nevada. In addition, all of our customers' data is typically replicated on third-party storage platforms located inside and outside of the United States. These facilities may be located in areas prone to natural disasters and may experience events such as earthquakes, floods, fires, power loss, telecommunications failures and similar events. They may also be subject to break-ins, sabotage, intentional acts of vandalism, cyber-attacks and similar misconduct, including by state-sponsored or otherwise well-funded actors. Any damage to, or failure of, our systems generally, or those of the third-party cloud computing and hosting providers, could result in interruptions in our service, which may reduce our revenue, cause us to issue credits or pay penalties, cause customers to terminate their subscriptions and adversely affect our renewal rate and our ability to attract new customers. We may only have limited remedies against third-party providers in the event of any service disruptions. In addition, we may not have adequate insurance coverage to compensate for losses from a major interruption. Our business will also be harmed if our customers and potential customers believe our service is unreliable. Despite precautions taken at our by these third-party data center hosting facilities, providers, the occurrence of disasters, security issues (including an act of terrorism or an armed conflict), certain geopolitical events, labor or trade disputes, or

44

pandemics, (such as COVID-19), could lead to a decision to close the facilities without adequate notice or other unanticipated problems that result in lengthy interruptions in our service or cause us to not comply with certification requirements. Even with the disaster recovery arrangements, we have never performed a full live failover of our services and, in an actual disaster, we could learn our recovery

44

arrangements are not sufficient to address all possible scenarios and our service could be interrupted for a longer period than expected. We have encountered issues in the past that have caused Box services to be temporarily unavailable, and we cannot assure you that we will not experience interruptions or delays in our service in the future. If third parties are unable to perform services for us because of service interruptions or extended outages, or because those services are no longer available on commercially reasonable terms, our expenses could increase and our customers' use of our products could be impaired until equivalent services, if available, are identified, obtained and implemented, all of which could adversely affect our business.

Moreover, we are currently executing on a long-term strategy to transition to third-party cloud computing and hosting providers and decommission on-premise infrastructure hosted in data centers. As we migrate from data centers we currently operate to third-party cloud computing and hosting providers, we are moving and transferring our data and our customers' data. Despite precautions taken during any of these data center moves and data transfers, any unsuccessful data transfers may impair the delivery of our service and materially and adversely disrupt our operations and our service delivery to our customers, which could result in contractual penalties or damage claims from customers. In addition, changes to our data center infrastructure could occur over a period longer than planned, require greater than expected investment and other internal and external resources, and cause

us to incur increased costs as we operate multiple data center facilities while we increase our third-party cloud computing capacity. It may also take longer than expected to realize the intended benefits from any data center infrastructure migrations and improvements, and disruptions or unexpected costs may continue to occur while we enhance our data center infrastructure.

Our services are becoming increasingly mission-critical for our customers and if these services fail to perform properly or if we are unable to scale our services to meet our customers' needs, our reputation could be adversely affected, our market share could decline and we could be subject to liability claims.

Our services are becoming increasingly mission-critical to our customers' business operations, as well as their ability to comply with legal requirements, regulations, and standards such as GxP, FINRA, HIPAA, FedRAMP and StateRAMP. These services and offerings are inherently complex and may contain material defects or errors that could cause interruptions in the availability of our services, as well as user error, which could result in loss or delayed market acceptance and sales, breach of contract or warranty claims, issuance of sales credits or refunds for prepaid amounts related to unused subscription services, loss of customers, diversion of development and customer service resources, and harm to our reputation. The costs incurred in correcting any material defects or errors might be substantial and could adversely affect our operating results. Further, our errors and omissions insurance may be inadequate or may not be available in the future on acceptable terms, or at all. In addition, our insurance may not cover all claims made against us and defending a lawsuit, regardless of its merit, could be costly and divert management's attention. Because of the large amount of data that we collect and manage, it is possible that hardware failures, software errors, errors in our systems, or by third-party service providers, user errors, or internet outages could result in significant data loss or corruption. Furthermore, the availability or performance of our services could be adversely affected by a number of factors, including customers' inability to access the internet, the failure of our network or software systems, security breaches or variability in customer traffic for our services. We have been, and in the future may be, required to issue credits or refunds for prepaid amounts related to unused services or otherwise be liable to our customers for damages they may incur resulting from some of these events.

Furthermore, we will need to ensure that our services can scale to meet the needs of our customers, particularly as we continue to focus on larger enterprise customers. If we are not able to provide our services at the scale required by our customers, potential customers may not adopt our solution and existing customers may not renew their agreements with us.

We rely on third parties for certain financial and operational services essential to our ability to manage our business. A failure or disruption in these services could materially and adversely affect our ability to manage our business effectively.

We rely on third parties for certain essential financial and operational services. We receive many of these services on a subscription basis from various software-as-a-service companies that are smaller and have shorter operating histories than traditional software vendors. Moreover, these vendors provide their services to us via a cloud-based model instead of software that is installed on our premises. We depend upon these vendors to provide us with services that are always available and are free of errors or defects that could cause disruptions in our business processes, and any failure by these

vendors to do so, or any disruptions in networks or the availability of the internet, would adversely affect our ability to operate and manage our operations.

We employ third-party software for use in or with our services, and the inability to maintain licenses to this software, or errors in the software, could result in increased costs, or reduced service levels, which would adversely affect our business.

Our services incorporate certain third-party software obtained under open source licenses or licenses from other companies. We anticipate that we will continue to rely on such third-party software and development tools in the future. Although we believe that there are commercially reasonable alternatives to the third-party software we currently license, this may not always be the case, or it may be difficult or costly to replace. In addition, integration of the software used in our services with new third-party software may require significant work and require substantial investment of our time and resources. Also, to the extent that our services depend upon

45

the successful operation of third-party software in conjunction with our software, any undetected errors or defects in this third-party software could prevent the deployment or impair the functionality of our services, delay the introduction of new services, result in a failure of our services, and injure our reputation. Our use of additional or alternative third-party software would require us to enter into additional license agreements with third parties. If we are unable to maintain licenses to software necessary to operate our business, or if third-party software that we use contains errors or defects, our costs may increase, or the services we provide may be harmed, which would adversely affect our business.

45

Our growth depends in part on the success of our strategic relationships with third parties.

In order to grow our business, we anticipate that we will continue to depend on our relationships with third parties, such as alliance partners, resellers, distributors, system integrators and developers. For example, we have entered into agreements with partners such as Adobe, Apple, Cisco, Cloudflare, Google, IBM, Macnica Networks, Microsoft, Mitsui Knowledge Industry, Okta, Palo Alto Networks, Salesforce, ServiceNow, Slack and Zoom to market, resell, integrate with or endorse our services. Identifying partners and resellers, and negotiating and documenting relationships with them, requires significant time and resources.

We also depend on our ecosystem of system integrators, partners and developers to create applications that will integrate with our platform or permit us to integrate with their product offerings. This presents certain risks to our business, including:

- we cannot provide any assurance that these third-party applications and products meet the same quality standards we apply to our own development efforts, and to the extent that they contain bugs or defects or otherwise fail to perform as expected, they may create disruptions in our customers' use of our services or negatively affect our brand and reputation;

- we do not currently provide support for software applications developed by our partner ecosystem, and users may be left without support and potentially cease using our services if these system integrators and developers do not provide adequate support for their applications;
- we cannot provide any assurance that we will be able to successfully integrate our services with our partners' products or that our partners will continue to provide us the right to do so; and
- these system integrators, partners and developers may not possess the appropriate intellectual property rights to develop and share their applications.

In addition, our competitors may be effective in providing incentives to third parties to favor their products or services, or to prevent or reduce subscriptions to our services. In some cases, we also compete directly with our partners' product offerings, and if these partners stop reselling or endorsing our services or impede our ability to integrate our services with their products, our business and operating results could be adversely affected. Moreover, competitor acquisitions of our partners could result in a decrease in the number of current and potential customers, as our partners may no longer facilitate the adoption of our services by potential customers.

If we are unsuccessful in establishing or maintaining our relationships with third parties, or realizing the anticipated benefits from such partnerships, our ability to compete in the marketplace or to grow our revenue could be impaired and our operating results may suffer. Even if we are successful, we cannot assure you that these relationships will result in increased customer usage of our services or increased revenue.

Our business is subject to the risks of natural disasters, pandemics and other catastrophic events that could disrupt our business operations and our business continuity and disaster recovery plans may not adequately protect us from a serious disaster.

The occurrence of any catastrophic event, including a pandemic (such as COVID-19), earthquake, fire, flood, tsunami, or other weather event, power loss, telecommunications failure, software or hardware malfunctions, cyber-attack, war, or terrorist attack, could result in lengthy interruptions in our service. Our corporate headquarters is located in the San Francisco Bay Area, a region known for seismic activity. Our insurance coverage may not compensate us for losses that may occur in the event of an earthquake or other significant natural disaster. In addition, pandemics, acts of terrorism or war could cause disruptions to the internet or the economy as a whole, which could have a significant impact on our business and operating results. If our or our partners' business continuity and disaster recovery arrangements prove to be inadequate, our services could be interrupted. Our partners, suppliers, and customers are also subject to the risk of catastrophic events. In those events, our ability to deliver our services in a timely manner, as well as the demand for our services, may be adversely impacted by factors outside our control. If our systems were to fail or be negatively impacted as a result of a natural disaster, pandemic or other catastrophic event, our ability to deliver our services to our customers would be impaired, we could lose critical data, our reputation could suffer and we could be subject to contractual penalties.

In addition, while the long-term effects of climate change on the global economy and the technology industry in particular are unclear, we recognize that there are inherent climate related risks wherever business is conducted. Any of our primary locations may be vulnerable to the adverse effects of climate change. For example, our California corporate offices have historically experienced,

and are projected to continue to experience, physical climate change risks, including drought and water scarcity, warmer temperatures, rising sea levels, wildfires and air quality impacts and power shut-offs associated with wildfire prevention. Climate-related events, including the increasing frequency of extreme weather events and their impact on critical infrastructure in the United States and elsewhere, have the potential to disrupt our business, our third-party suppliers, and/or the business of our customers, and may cause us to experience higher attrition, losses and additional costs to maintain and resume operations. Transitional climate change risks may subject us to increased regulations, reporting requirements, standards, or expectations regarding the environmental impacts of our business and untimely or inaccurate disclosure could adversely affect our reputation, business or financial performance.

If we overestimate or underestimate our data center cloud-based server capacity requirements, our operating results could be adversely affected.

We continuously evaluate our short- and long-term data center cloud-based server capacity requirements to ensure adequate capacity for new and existing customers while minimizing unnecessary excess capacity costs. If we overestimate the demand for our cloud content management services and therefore secure excess data center cloud-based server capacity, our operating margins could be reduced. If we underestimate our data center cloud-based server capacity requirements or if we are unable to meet our contractual minimum commitments, we may not be able to service the expanding needs of customers and may be required to limit new customer acquisition or provide credits or refunds to existing customers, which would impair our revenue growth and harm our operating results. We outsource a substantial majority of our cloud hosting to Google Cloud Platform (GCP), which hosts our products and platform. To the extent we do not effectively address capacity constraints, either through GCP or alternative providers of cloud hosting, or other risks are realized that may result in interruptions, delays and outages in service and availability of our products and/or services, our business and operating results may be adversely affected. Furthermore, regardless of our ability to appropriately manage our data center cloud-based server capacity requirements, only a small percentage of our customers currently use Box to organize all of their internal files, and an increase in the number of organizations, in particular large businesses and enterprises, that use our service as a larger component of their content storage requirements, could result in lower gross and operating margins or otherwise have an adverse impact on our financial condition and operating results.

Changes in laws and regulations related to the internet or changes in the internet infrastructure itself, or disruption in access to the internet or critical services on which the internet depends, may diminish the demand for our services, and could have a negative impact on our business.

The future success of our business depends upon the continued use and availability of the internet as a primary medium for commerce, communication and business services. Federal, state or foreign government bodies or agencies have in the past adopted, and may in the future adopt, laws or regulations affecting the use of the internet as a commercial medium. The adoption of any laws or regulations that adversely affect the growth, popularity or use of the internet, including

laws or practices limiting internet neutrality, could decrease the demand for, or the usage of, our services, increase our cost of doing business, adversely affect our operating results, and require us to modify our services in order to comply with these changes. In addition, government agencies or private organizations may begin to impose taxes, fees or other charges for accessing the internet or commerce conducted via the internet. These laws or charges could limit the growth of internet-related commerce or communications generally, or result in reductions in the demand for internet-based services such as ours.

In addition, the use of the internet and, in particular, the cloud as a business tool could be adversely affected due to delays in the development or adoption of new standards and protocols to handle increased demands of internet activity, security, reliability, cost, ease of use, accessibility, and quality of service. The performance of the internet and its acceptance as a business tool have been adversely affected by “viruses,” “worms,” “denial of service attacks” and similar malicious activity. The internet has also experienced a variety of outages, disruptions and other delays as a result of this malicious activity targeted at critical internet infrastructure. These service disruptions could diminish the overall attractiveness to existing and potential customers of services that depend on the internet and could cause demand for our services to suffer.

Risks Related to Employees and Managing Our Growth

We depend on our key employees and other highly skilled personnel to grow and operate our business, and if we are unable to hire, retain and motivate our personnel, we may not be able to grow effectively.

Our future success depends upon our continued ability to identify, hire, develop, motivate and retain highly skilled personnel, representing diverse backgrounds, experiences, and skill sets, including senior management, engineers, designers, product managers, sales representatives, and customer support representatives. Identifying, recruiting, training and integrating qualified individuals will require significant time, expense and attention. In addition to hiring new employees, we must continue to focus on retaining our best employees, and fostering a diverse and inclusive work environment that enables all of our employees to prosper. Competition for highly skilled personnel is intense, particularly in the San Francisco Bay Area, where our headquarters is located. We may need to invest significant amounts of cash and equity to attract new employees and retain existing employees, and we may never realize returns on these investments. Moreover, our ability to attract and hire personnel may be materially adversely affected by changes to immigration laws or the availability of work visas. Furthermore, as some of our employees work remotely from geographic areas across the globe and more of our employees work remotely on a permanent basis, we may need to reallocate our investment of resources and closely monitor a variety of local regulations and requirements, and we may experience unpredictability in our expenses

47

and employee work culture. If we are not able to effectively add and retain employees, or if our employees do not perform to the standards we expect of them, our ability to achieve our strategic objectives will be adversely impacted, and our business will be harmed.

47

Our success is also dependent upon contributions from our executive officers and other key employees and, in particular, Aaron Levie, our co-founder and Chief Executive Officer. There In addition, occasionally, there may be changes in our senior management team that could disrupt our business. For example, in November 2023, Olivia Nottebohm joined us as our Chief Operating Officer. The loss of one or more of our executive officers or key employees, or the failure of our senior management team to work together effectively and execute our plans and strategies, could harm our business.

Failure to adequately expand and optimize our direct sales force and successfully maintain our online sales experience could impede our growth.

We will need to continue to optimize our sales infrastructure in order to grow our customer base and business. As a result of weakened economic conditions, we have significantly curtailed our employees' business-related travel, which may negatively impact our ability to recruit and train our sales force. Our business may be adversely affected if our efforts to expand and train our direct sales force do not generate a corresponding increase in revenue. If we are unable to hire, develop and retain talented sales personnel or if new direct sales personnel are unable to achieve desired productivity levels in a reasonable period of time, we may not realize the intended benefits of this investment or increase our revenue.

We maintain our Box website to efficiently service our high volume, low dollar customer transactions and certain customer inquiries. Our goal is to continue to evolve this online experience so it effectively serves the increasing and changing needs of our growing customer base. If we are unable to maintain an effective online solution to meet the future needs of our online customers and to eliminate fraudulent transactions occurring in this channel, we could see reduced online sales volumes as well as a decrease in our sales efficiency, which could adversely affect our results of operations.

Any acquisitions and investments we make could disrupt our business and harm our financial condition and operating results.

We have acquired, and may in the future acquire, other companies, employee teams, or technologies to complement or expand our services and grow our business. We may not be able to successfully complete or integrate identified acquisitions. Moreover, we may not successfully evaluate or utilize the acquired technology or personnel, or accurately forecast the financial impact of an acquisition. The risks we face in connection with acquisitions include:

- diversion of management time and focus from operating our business to addressing acquisition integration challenge
- coordination of research and development and sales and marketing functions;
- retention of key employees from the acquired company;
- cultural challenges associated with integrating employees from the acquired company into our organization;
- integration of the acquired company's technology and products into our business, particularly if the acquired company's software and services are not easily adapted to work with our products;
- integration of the acquired company's accounting, management information, human resources and other administrative systems, as well as the acquired operations, and any unanticipated expenses related to such integration;
- the need to implement or improve controls, procedures, and policies at a business that prior to the acquisition may have lacked effective controls, procedures and policies;

- liability for activities of the acquired company before the acquisition, including intellectual property infringement claim violations of laws, commercial disputes, tax liabilities and other known and unknown liabilities;
- completing the transaction and achieving the anticipated benefits of the acquisition within the expected timeframe or all;
- unanticipated write-offs, expenses, charges or risks associated with the transaction;
- litigation or other claims in connection with the acquired company, including claims from terminated employees, customers, former stockholders or other third parties, which may differ from or be more significant than the risks our business faces; and
- acquisitions could result in dilutive issuances of equity securities or the incurrence of debt.

48

Our failure to address these risks or other problems encountered in connection with our past or future acquisitions and investments could cause us to fail to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally. Future acquisitions could also result in dilutive issuances of our equity securities, the incurrence of debt, contingent liabilities, amortization expenses, incremental operating expenses or the write-off of goodwill, any of which could harm our financial condition or operating results.

48

Our company culture has contributed to our success, and if we cannot maintain this culture, we could lose the innovation, creativity and teamwork fostered by our culture, and our business may be harmed.

We believe that our culture has been and will continue to be a key contributor to our success. We expect to continue to hire additional employees as we expand our business. As our organization expands globally and as employees' workplace expectations develop, we may find it increasingly difficult to maintain the beneficial aspects of our corporate culture globally. These difficulties may be further amplified by our decision to maintain a hybrid workforce. If we do not continue to develop our company culture or maintain our core values as we grow and evolve both in the United States and abroad, we may be unable to foster the innovation, creativity and teamwork we believe we need to support our growth.

Risks Related to Our Intellectual Property

We may be sued by third parties for alleged infringement of their proprietary rights.

There is considerable patent and other intellectual property development activity in our industry. Our success depends on developing or licensing our own intellectual property and not infringing upon the valid intellectual property rights of others. Our competitors, as well as a number of other entities, including non-practicing entities, and individuals, may own or claim to own intellectual property relating to our industry.

From time to time, third parties have claimed, and in the future may claim, that we are infringing upon their intellectual property rights, and we may be found to be infringing upon such rights. We may be unaware of the intellectual property rights

that others may claim cover some or all of our technology or services. Any claims or litigation could cause us to incur significant expenses and, if successfully asserted against us, could require that we pay substantial damages or ongoing royalty payments, prevent us from offering our services, or require that we comply with other unfavorable terms. We may also be obligated to indemnify our customers or business partners or pay substantial settlement costs, including royalty payments, in connection with any such claim or litigation and to obtain licenses, modify services, or refund fees, which could be costly. Even if we were to prevail in such a dispute, any litigation regarding our intellectual property could be costly and time consuming and divert the attention of our management and key personnel from our business operations. During the course of any litigation, we may make announcements regarding the results of hearings and motions, and other interim developments. If securities analysts or investors regard these announcements as negative, the market price of our Class A common stock may decline.

Any failure to protect our intellectual property rights could impair our ability to protect our proprietary technology and brand.

Our success and ability to compete depend in part on our intellectual property. We primarily rely on copyright, patent, trade secret and trademark laws, trade secret protection and confidentiality or license agreements with our employees, customers, partners and others to protect our intellectual property rights. However, the steps we take to protect our intellectual property rights may be inadequate. We may not be able to obtain any further patents, and our pending applications may not lead to the issuance of patents. We may also have to expend significant resources to obtain additional patents as we expand our international operations.

In order to protect our intellectual property rights, we may spend significant resources to monitor and protect these rights. Litigation brought to protect and enforce our intellectual property rights could be costly, time-consuming and distracting to management and may result in the impairment or loss of portions of our intellectual property. Furthermore, our efforts to enforce our intellectual property rights may be met with defenses, counterclaims and countersuits attacking the validity and enforceability of our intellectual property rights. Accordingly, we may not be able to prevent third parties from infringing upon or misappropriating our intellectual property. Our failure to secure, protect and enforce our intellectual property rights could materially adversely affect our brand and adversely impact our business.

Our services contain open source software, and we license some of our software through open source projects, which may pose particular risks to our proprietary software, products, and services in a manner that could have a negative impact on our business.

We use open source software in our services and will use open source software in the future. In addition, we regularly contribute software source code to open source projects under open source licenses or release internal software projects under open source licenses, and anticipate doing so in the future. The terms of many open source licenses to which we are subject have not been

interpreted by U.S. or foreign courts, and there is a risk that open source software licenses could be construed in a manner that imposes unanticipated conditions or restrictions on our ability to provide or distribute our services. Additionally, from time to time third parties may claim ownership of, or demand release of, the open source software or derivative works that we developed using such software, which could include our proprietary source code, or otherwise seek to enforce the terms of the applicable open source license. These claims could result in litigation and could require us to make our software source code freely available, purchase a costly license or cease offering the implicated services unless and until we can re-engineer them to avoid infringement. This re-engineering process could require significant additional research and development resources, and we may not be able to complete it

successfully. In addition to risks related to license requirements, use of certain open source software can lead to greater risks than use of third-party commercial software, as open source code may contain bugs or other defects and open source licensors generally do not provide warranties or controls on the functionality or origin of software. Additionally, because any software source code we contribute to open source projects is publicly available, our ability to protect our intellectual property rights with respect to such software source code may be limited or lost entirely, and we cannot prevent our competitors or others from using such contributed software source code. Any of these risks could be difficult to eliminate or manage and could have a negative effect on our business, financial condition and operating results.

Risks Related to Our Financial Position and Need for Additional Capital

We may require additional capital to support our liabilities, operations or the growth of our business, and we cannot be certain that this capital will be available on reasonable terms when required, or at all.

On occasion, we may need additional financing for a variety of reasons, including servicing our liabilities, operating or growing our business, responding to business opportunities, undertaking acquisitions, funding stock repurchases, or repaying our 0.00% convertible senior notes due January 15, 2026 (the “Convertible Notes”).

For example, in January 2021, we issued \$345.0 million aggregate principal amount of Convertible Notes, which we have irrevocably elected to settle in cash upon maturity. Additionally, in May 2021, we issued and sold 500,000 shares of our Series A Convertible Preferred Stock for an aggregate purchase price of \$500 million. Our ability to refinance or obtain additional financing, if and when required, will depend on investor and lender demand, our operating performance, the condition of the capital markets and other factors. We cannot guarantee that additional financing will be available to us on favorable terms when required, or at all. If we raise additional funds through the issuance of equity, equity-linked or debt securities, those securities may have rights, preferences or privileges senior to the rights of our Class A common stock, and our existing stockholders may experience dilution. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to continue to support the operation or growth of our business could be significantly impaired and our operating results may be harmed. Rising interest rates may reduce our access to equity-linked or debt capital and increase our cost of borrowings, which could adversely impact our business, operating results and financial position.

Financing agreements we are party to or may become party to may contain operating and financial covenants that restrict our business and financing activities.

Our senior credit facility contains certain operating and financial restrictions and covenants that may restrict our and our subsidiaries' ability to, among other things, incur indebtedness, grant liens on our assets, make loans or investments, consummate certain merger and consolidation transactions, dispose of assets, incur contractual obligations and commitments and enter into affiliate transactions, subject in each case to customary exceptions. We are also required to comply with a maximum senior secured leverage ratio, a maximum total leverage ratio and a minimum interest coverage ratio. These restrictions and covenants, as well as those contained in any future financing agreements that we may enter into, may restrict our ability to finance our operations, engage in, expand or otherwise pursue our business activities and strategies. Our ability to comply with these covenants may be affected by events beyond our control, and breaches of these covenants could result in a default under the senior credit facility and any future financial agreements that we may enter into and under other arrangements containing cross-default provisions. If not waived, defaults could cause our outstanding indebtedness under our senior credit facility and any future financing agreements that we may enter into to become immediately due and payable, and permit our lenders to terminate their lending commitments and to foreclose upon any collateral securing such indebtedness.

Risks Related to Financial, Accounting, Tax and Other Legal Matters

If we fail to maintain an effective system of disclosure controls and internal control over financial reporting, our ability to produce timely and accurate financial statements or comply with applicable regulations could be impaired.

As a public company, we are subject to the reporting requirements of the Securities Exchange Act of 1934, the Sarbanes-Oxley Act and the listing standards of the New York Stock Exchange (NYSE). We have expended, and anticipate that we will continue to expend, significant resources to comply with these rules and regulations.

50

The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures, and internal control over financial reporting. Our current controls and any new controls that we develop may become inadequate because of changes in conditions in our business, including increased complexity resulting from our international expansion. Further, weaknesses in our disclosure controls or our internal control over financial reporting may be discovered in the future. Additionally, to the extent that we acquire other businesses, the acquired company may not have a sufficiently robust system of internal controls and we may uncover new deficiencies. Any failure to develop or maintain effective controls, or any difficulties encountered in their

50

implementation or improvement, could harm our operating results or cause us to fail to meet our reporting obligations and may result in a restatement of our financial statements for prior periods. Any failure to implement and maintain effective internal control over financial reporting could also adversely affect the results of management reports and independent

registered public accounting firm audits of our internal control over financial reporting that we are required to include in our periodic reports that we file with the SEC. Ineffective disclosure controls and procedures, and internal control over financial reporting could also cause investors to lose confidence in our reported financial and other information, which would likely have a negative effect on the market price of our Class A common stock. In addition, if we are unable to continue to meet these requirements, we may not be able to remain listed on the NYSE.

Any failure to maintain effective disclosure controls and internal control over financial reporting could have a material and adverse effect on our business and operating results, and cause a decline in the market price of our Class A common stock.

Our reported financial results may be adversely affected by changes in accounting principles generally accepted in the United States.

Generally accepted accounting principles in the United States are subject to interpretation by the FASB, the SEC and various bodies formed to promulgate and interpret appropriate accounting principles. A change in these principles or interpretations could have a significant effect on our reported financial results, and could affect the reporting of transactions completed before the announcement of a change. These or other changes in accounting principles could adversely affect our financial results. Any difficulties in implementing these pronouncements could cause us to fail to meet our financial reporting obligations, which could result in regulatory discipline and harm investors' confidence in us.

Tax laws or regulations could be enacted or changed and existing tax laws or regulations could be applied to us or to our customers in a manner that could increase the costs of our services and adversely impact our business.

The application of federal, state, local and international tax laws to services provided electronically is unclear and continuously evolving. Income, sales, use, value added or other tax laws, statutes, rules, regulations or ordinances could be enacted or amended at any time, possibly with retroactive effect, and could be applied solely or disproportionately to services provided over the internet. These enactments or amendments could adversely affect our sales activity due to the inherent cost increase the taxes would represent and ultimately result in a negative impact on our operating results and cash flows.

Our future effective tax rates and results from operations could be unfavorably affected by changes in the tax rates in jurisdictions where our income is earned, or by changes in the tax rules and regulations in the jurisdictions in which we do business. For example, the Tax Cuts and Jobs Act of 2017 eliminated the option to deduct research and development expenditures currently and instead required taxpayers to capitalize and amortize them over five or fifteen years beginning in our fiscal year 2023. The Inflation Reduction Act of 2022 also imposed a 1% excise tax on certain repurchases of stock and a 15% alternative minimum tax on adjusted financial statement income.

Further, in 2021, the Organization for Economic Cooperation and Development ("OECD") introduced a framework, referred to as Pillar Two, which contemplates a global minimum effective tax rate of 15%. In December 2022, Pillar Two was adopted by the Council of the European Union for implementation by European Union member states by December 31, 2023 and similar directives under Pillar Two are already adopted or expected to be adopted by taxing authorities in other countries where we do business, including the United Kingdom. The OECD continues to release more guidance on these rules and

framework and we are evaluating the impact to our financial position. These enactments or amendments could adversely affect our tax rate and ultimately result in a negative impact on our operating results and cash flows.

In addition, existing tax laws, statutes, rules, regulations or ordinances could be interpreted or applied adversely to us, possibly with retroactive effect, which could require us or our customers to pay additional tax amounts, as well as require us or our customers to pay fines or penalties, as well as interest for past amounts. For example, we are subject to examination regarding our interpretation of tax laws by domestic and foreign tax authorities. If the taxing authorities do not agree with our interpretations, or if we become subject to an adverse tax assessment, we may incur significant liabilities and/or be required to change our practices going forward. Further, to the extent it is determined that our customers should have paid certain taxes, and if we are unsuccessful in collecting such

51

taxes due from our customers, we could be held liable for such costs and/or interest and penalties, thereby adversely impacting our operating results and cash flows.

51

We may be subject to additional tax liabilities resulting from changes in our provision for income taxes or an adverse tax ruling.

Judgment is required in determining our worldwide provision for income taxes. These determinations are highly complex and require detailed analysis of the available information and applicable statutes and regulatory materials. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. Although we believe our tax estimates are reasonable, the final determination of tax audits and any related litigation could be materially different from our historical tax practices, provisions and accruals. If we receive an adverse ruling as a result of an audit, or we unilaterally determine that we have misinterpreted provisions of the tax regulations to which we are subject, there could be a material effect on our tax provision, net loss or cash flows in the period or periods for which that determination is made. In addition, liabilities associated with taxes are often subject to an extended or indefinite statute of limitations period. Therefore, we may be subject to additional tax liability (including penalties and interest) for a particular year for extended periods of time.

Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited.

As of January 31, 2023, we had U.S. federal net operating loss carryforwards of approximately \$587.8 million, state net operating loss carryforwards of approximately \$557.1 million, and foreign net operating loss carryforwards of approximately \$304.8 million. Under Sections 382 and 383 of the Internal Revenue Code of 1986, as amended (the “Code”), if a corporation undergoes an “ownership change,” the corporation’s ability to use its pre-change net operating loss carryforwards and other pre-change tax attributes, such as research tax credits, to offset its post-change income and taxes may be limited. In general, an “ownership change” occurs if there is a cumulative change in our ownership by “5% shareholders” that exceeds

50 percentage points over a rolling three-year period. Similar rules may apply under state tax laws. If we experience ownership changes as a result of future transactions in our stock, then we may be further limited in our ability to use our net operating loss carryforwards and other tax assets to reduce taxes owed on the net taxable income that we earn. Any such limitations on the ability to use our net operating loss carryforwards and other tax assets could adversely impact our business, financial condition and operating results.

We are subject to governmental export controls that could impair our ability to compete in international markets due to licensing requirements and economic sanctions programs that subject us to liability if we are not in full compliance with applicable laws.

Certain of our services are subject to export controls, including the U.S. Department of Commerce's Export Administration Regulations and various economic and trade sanction regulations administered by the U.S. Treasury Department's Office of Foreign Assets Controls. The provision of our products and services must comply with these laws. The U.S. export control laws and U.S. economic sanctions laws include prohibitions on the sale or supply of certain products and services to U.S. embargoed or sanctioned countries, governments, persons and entities and also require authorization for the export of encryption items. In addition, various countries regulate the import of certain encryption technology, including through import permitting and licensing requirements, and have enacted laws that could limit our ability to distribute our services or could limit our customers' ability to implement our services in those countries.

Although we take precautions to prevent our services from being provided in violation of such laws, our solutions may have been in the past, and could in the future be, provided inadvertently in violation of such laws, despite the precautions we take. If we fail to comply with these laws, we and our employees could be subject to civil or criminal penalties, including the possible loss of export privileges, monetary penalties, and, in extreme cases, imprisonment of responsible employees for knowing and willful violations of these laws. We may also be adversely affected through penalties, reputational harm, loss of access to certain markets, or otherwise.

Changes in tariffs, sanctions, international treaties, export/import laws and other trade restrictions or trade disputes may delay the introduction and sale of our services in international markets, prevent our customers with international operations from deploying our services or, in some cases, prevent the export or import of our services to certain countries, governments, persons or entities altogether. Any change in export or import regulations, economic sanctions or related laws, shift in the enforcement or scope of existing regulations, or change in the countries, governments, persons or technologies targeted by such regulations, could result in decreased use of our services, or in our decreased ability to export or sell our services to existing or potential customers with international operations. Any decrease in the use of our services or limitation on our ability to export or sell our services would likely adversely affect our business, financial condition and operating results.

Failure to comply with anti-bribery, anti-corruption, and anti-money laundering laws could subject us to penalties and other adverse consequences.

We are subject to the Foreign Corrupt Practices Act (FCPA), the U.K. Bribery Act and other anti-corruption, anti-bribery and anti-money laundering laws in various jurisdictions both domestic and abroad. In addition to our own sales force, we also leverage third parties to sell our products and services and conduct our business abroad. We and our third-party intermediaries may have direct or indirect interactions with officials and employees of government agencies or state-owned or affiliated entities and may be held

52

liable for the corrupt or other illegal activities of these third-party business partners and intermediaries, our employees, representatives, contractors, channel partners, and agents, even if we do not explicitly authorize such activities. While we have policies and procedures to address compliance with such laws, we cannot assure you that our employees and agents will not take actions in violation of our policies or applicable law, for which we may be ultimately held responsible. Any violation of the FCPA or other applicable anti-bribery, anti-corruption, and anti-money laundering laws could result in whistleblower complaints, adverse media coverage, investigations, loss of export privileges, severe criminal or civil sanctions, or suspension or debarment from U.S. government contracts, all of which may have an adverse effect on our reputation, business, operating results and prospects.

Risks Related to Ownership of Our Class A Common Stock

Anti-takeover provisions contained in our amended and restated certificate of incorporation and amended and restated bylaws, as well as provisions of Delaware law, could impair a takeover attempt.

Our amended and restated certificate of incorporation, amended and restated bylaws and Delaware law contain provisions which could have the effect of rendering more difficult, delaying or preventing an acquisition deemed undesirable by our board of directors. Among other things, our amended and restated certificate of incorporation and amended and restated bylaws include provisions:

- authorizing a classified board of directors whose members serve staggered three-year terms;
- authorizing “blank check” preferred stock, which could be issued by our board of directors without stockholder approval and may contain voting, liquidation, dividend and other rights superior to our Class A common stock;
- limiting the liability of, and providing indemnification to, our directors and officers;
- limiting the ability of our stockholders to call and bring business before special meetings;
- requiring advance notice of stockholder proposals for business to be conducted at meetings of our stockholders and nominations of candidates for election to our board of directors; and
- controlling the procedures for the conduct and scheduling of board directors and stockholder meetings.

These provisions, alone or together, could delay or prevent hostile takeovers and changes in control or changes in our management.

As a Delaware corporation, we are also subject to provisions of Delaware law, including Section 203 of the Delaware General Corporation Law, which prevents certain stockholders holding more than 15% of the voting power of our outstanding capital stock from engaging in certain business combinations without approval of the holders of at least two-thirds of the voting power of our outstanding capital stock not held by such stockholder.

Any provision of our amended and restated certificate of incorporation, amended and restated bylaws or Delaware law that has the effect of delaying, preventing or deterring a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our capital stock, and could also affect the price that some investors are willing to pay for our Class A common stock.

Our bylaws designate a state or federal court located within the State of Delaware as the exclusive forum for substantially all disputes between us and our stockholders and also provide that the federal district courts will be the exclusive forum for resolving any complaint asserting a cause of action arising under the Securities Act of 1933, as amended, each of which could limit our stockholders' ability to choose the judicial forum for disputes with us or our directors, officers, stockholders or employees.

Our bylaws provide that, unless we consent in writing to the selection of an alternative forum, the sole and exclusive forum for (1) any derivative action or proceeding brought on our behalf, (2) any action asserting a claim of breach of a fiduciary duty owed by any of our directors, stockholders, officers or other employees to us or our stockholders, (3) any action arising pursuant to any provision of the Delaware General Corporation Law, our certificate of incorporation or our bylaws or (4) any other action asserting a claim that is governed by the internal affairs doctrine shall be the Court of Chancery of the State of Delaware (or, if the Court of Chancery does not have jurisdiction, another State court in Delaware or the federal district court for the District of Delaware), except

53

for any claim as to which such court determines that there is an indispensable party not subject to the jurisdiction of such court (and the indispensable party does not consent to the personal jurisdiction of such court within ten days following such determination), which is vested in the exclusive jurisdiction of a court or forum other than such court or for which such court does not have subject matter jurisdiction. This provision would not apply to any action brought to enforce a duty or liability created by the Securities Exchange Act of 1934, as amended, and the rules and regulations thereunder.

53

Section 22 of the Securities Act of 1933 establishes concurrent jurisdiction for federal and state courts over Securities Act claims. Accordingly, both state and federal courts have jurisdiction to hear such claims. To prevent having to litigate claims in multiple jurisdictions and the threat of inconsistent or contrary rulings by different courts, among other considerations, our bylaws also provide that, unless we consent in writing to the selection of an alternative forum, the federal district courts of the United States will be the sole and exclusive forum for resolving any complaint asserting a cause of action arising under the Securities Act against any person in connection with an offering of our securities.

Any person or entity purchasing or otherwise acquiring or holding or owning (or continuing to hold or own) any interest in any of our securities shall be deemed to have notice of and consented to the foregoing bylaw provisions. Although we believe these exclusive forum provisions benefit us by providing increased consistency in the application of Delaware law and federal securities laws in the types of lawsuits to which each applies, the exclusive forum provisions may limit a stockholder's ability to bring a claim in a judicial forum of its choosing for disputes with us or our current or former directors, officers, stockholders or other employees, which may discourage such lawsuits against us and our current and former directors, officers, stockholders and other employees. Our stockholders will not be deemed to have waived our compliance with the federal securities laws and the rules and regulations thereunder as a result of our exclusive forum provisions.

Further, the enforceability of similar exclusive forum provisions in other companies' organizational documents have been challenged in legal proceedings, and it is possible that a court of law could rule that these types of provisions are inapplicable or unenforceable if they are challenged in a proceeding or otherwise. If a court were to find either exclusive forum provision contained in our bylaws to be inapplicable or unenforceable in an action, we may incur significant additional costs associated with resolving such action in other jurisdictions, all of which could harm our results of operations.

We cannot guarantee that our stock repurchase program will be fully implemented or that it will enhance long-term stockholder value.

We repurchase shares of our Class A common stock in open market transactions from time to time pursuant to publicly announced stock repurchase program approved by our board of directors. During fiscal year 2023, we repurchased 10.2 million shares for a total amount of \$266.7 million and during fiscal year 2022, we repurchased 13.3 million shares for a total amount of \$328.5 million. For the **six nine** months ended **July 31, 2023** **October 31, 2023**, we repurchased **3.8 million** **5.8 million** shares for a total amount of **\$105.4 million** **\$157.1 million**. Any share repurchases remain subject to the circumstances in place at that time, including prevailing market prices, and we are not obligated to repurchase a specified number or dollar value of shares. As a result, there can be no guarantee around the timing or volume of our share repurchases. In addition, as part of the Inflation Reduction Act signed into law in August 2022, the United States implemented a 1% excise tax on the value of certain stock repurchases by publicly traded companies. This tax could increase the costs to us of any share repurchases. The stock repurchase program could affect the price of our Class A common stock, increase volatility and diminish our cash reserves. Our repurchase program may be suspended or terminated at any time and, even if fully implemented, may not enhance long-term stockholder value.

The market price of our Class A common stock has been and may continue to be volatile, and you could lose all or part of your investment.

The market price of our Class A common stock has been and may continue to be subject to wide fluctuations in response to various factors, some of which are beyond our control and may not be related to our operating performance. In addition to the factors discussed in this "Risk Factors" section and elsewhere in this Quarterly Report on Form 10-Q, factors that could cause fluctuations in the market price of our Class A common stock include the following:

- price and volume fluctuations in the overall stock market from time to time;
- volatility in the market prices and trading volumes of technology or other public company stocks;

- changes in operating performance and stock market valuations of other technology companies generally or those in industry in particular;
- general economic conditions and slow or negative growth of our markets;
- purchases and sales of shares of our Class A common stock by us or our stockholders;

54

-
- whether our results of operations meet the expectations of securities analysts or investors and changes in actual or future expectations of investors or securities analysts;
 - the financial projections we may provide to the public, any changes in those projections or our failure to meet those projections;

54

-
- announcements by us or our competitors of new products or services;
 - the public's reaction to our press releases, other public announcements and filings with the SEC;
 - rumors and market speculation involving us or other companies in our industry;
 - actual or anticipated changes in our operating results or fluctuations in our operating results;
 - actual or anticipated developments in our business, our competitors' businesses or the competitive landscape generally;
 - litigation involving us, our industry or both, or investigations by regulators into our operations or those of our competitors;
 - developments or disputes concerning our intellectual property or other proprietary rights;
 - announced or completed acquisitions of businesses or technologies by us or our competitors;
 - new laws or regulations or new interpretations of existing laws or regulations applicable to our business;
 - network or service outages, internet disruptions, the availability of our service, security breaches or perceived security breaches and vulnerabilities;
 - changes in accounting standards, policies, guidelines, interpretations or principles;
 - actions instituted by activist shareholders or others, and our response to such actions;
 - any significant change in our management;
 - fluctuations in foreign currency exchange rates; and
 - catastrophic events, including pandemics, earthquakes, fires, floods, tsunamis or other weather events, power loss, telecommunications failures, software or hardware malfunctions, cyber-attacks, wars, or terrorist attacks.

In addition, in the past, following periods of volatility in the overall market and the market price of a particular company's securities, securities class action litigation has often been instituted against these companies. Any future securities litigation could result in substantial costs and a diversion of our management's attention and resources.

Servicing our existing and future debt may require a significant amount of cash, and we may not have sufficient cash flow from our business to settle conversions of our Convertible Notes in cash, repay the Convertible Notes at maturity, or repurchase the Convertible Notes as required following a fundamental change.

In January 2021, we issued \$345.0 million aggregate principal amount of Convertible Notes. Prior to October 15, 2025, the Convertible Notes are convertible at the option of the holders only under certain conditions or upon occurrence of certain events as described in Note 10, Part II, Item 8 of our Annual Report on Form 10-K. We have made an irrevocable election to settle the principal of the Convertible Notes in cash upon any conversion of the Convertible Notes. As a result, if holders of the Convertible Notes elect to convert their Convertible Notes, we will be required to make cash payments in respect of the Convertible Notes being converted. Holders of the Convertible Notes also have the right to require us to repurchase all or a portion of their Convertible Notes upon the occurrence of a fundamental change (as defined in the indenture governing the Convertible Notes) at a repurchase price equal to 100% of the principal amount of the Convertible Notes to be repurchased, plus accrued and unpaid special interest, if any. If the Convertible Notes have not previously been converted or repurchased, we will be required to repay the outstanding principal amount of the Convertible Notes, plus accrued and unpaid special interest, if any, in cash at maturity. The Convertible Notes are scheduled to mature on January 15, 2026.

Our ability to make required cash payments in connection with conversions of the Convertible Notes, repurchase the Convertible Notes in the event of a fundamental change, or to repay or refinance the Convertible Notes at maturity will depend on market conditions and our past and expected future performance, which is subject to economic, financial, competitive, and other factors beyond our control. We also may not use the cash proceeds we raised through the issuance of the Convertible Notes in an optimally productive and profitable manner. Since inception, our business has generated net losses, and while we were profitable in fiscal year 2023, we may continue to incur significant losses in the future. As a result, we may not have enough available cash or be

55

able to obtain financing, or financing at acceptable terms, at the time we are required to repurchase or repay the Convertible Notes or pay cash with respect to Convertible Notes being converted.

55

In addition, our ability to repurchase or pay cash upon conversion or at maturity of the Convertible Notes may be limited by law or regulatory authority. Our failure to repurchase Convertible Notes following a fundamental change or to pay cash upon conversion or at maturity of the Convertible Notes as required by the indenture would constitute a default under such indenture. A default under the indenture or the fundamental change itself could also lead to a default under our senior credit facility, our other outstanding indebtedness, or agreements governing our future indebtedness and could have a material adverse effect on our business, results of operations, and financial condition. If the payment of the related indebtedness were to be accelerated after any applicable notice or grace periods, we may not have sufficient funds to repay the indebtedness and repurchase the Convertible Notes or to pay cash upon conversion or at maturity of the Convertible Notes.

Furthermore, if any of the conditions to the convertibility of the Convertible Notes are satisfied, then we may be required under applicable accounting standards to reclassify the carrying value of the Convertible Notes to current, rather than long-term. This reclassification could materially reduce our reported working capital.

The capped call transactions we entered into in connection with the issuance of the Convertible Notes may affect the value of our Class A common stock.

In connection with the issuance of the Convertible Notes, we entered into capped call transactions with various counterparties (the “Capped Calls”). The Capped Calls cover, subject to customary adjustments, the number of shares of our Class A common stock initially underlying the Convertible Notes. The Capped Calls are expected generally to reduce or offset the potential dilution to our Class A common stock upon any conversion of the Convertible Notes with such reduction or offset, as the case may be, subject to a cap based on the cap price.

From time to time, the counterparties to the Capped Calls or their respective affiliates may modify their hedge positions by entering into or unwinding various derivatives with respect to our Class A common stock and/or purchasing or selling our Class A common stock or other securities of ours in secondary market transactions prior to the maturity of the Convertible Notes. This activity could also cause or prevent an increase or a decrease in the market price of our Class A common stock or the Convertible Notes.

We are subject to counterparty risk with respect to the Capped Calls.

The counterparties to the Capped Calls that we entered into are financial institutions, and we will be subject to the risk that one or more of the counterparties may default or otherwise fail to perform, or may exercise certain rights to terminate, their obligations under the Capped Calls. Our exposure to the credit risk of the counterparties will not be secured by any collateral.

Global economic conditions have in the past resulted in the actual or perceived failure or financial difficulties of many financial institutions. If a counterparty to one or more Capped Calls becomes subject to insolvency proceedings, we will become an unsecured creditor in those proceedings with a claim equal to our exposure at the time under such transaction. Our exposure will depend on many factors but, generally, our exposure will increase if the market price or the volatility of our Class A common stock increases. In addition, upon a default or other failure to perform, or a termination of obligations, by a counterparty, the counterparty may fail to deliver the consideration required to be delivered to us under the Capped Calls and we may experience more dilution than we currently anticipate with respect to our Class A common stock. We can provide no assurances as to the financial stability or viability of the counterparties.

Our business could be negatively affected as a result of actions of activist shareholders.

We value constructive input from investors and regularly engage in dialogue with our shareholders regarding strategy and performance. Our board of directors and management team are committed to acting in the best interests of all of our shareholders.

Responding to actions by activist shareholders could be costly and time-consuming, disrupt our operations and divert the attention of management and our employees. For example, in 2021, we were engaged in a proxy contest with an activist shareholder that was very costly and diverted a significant amount of time from our board of directors and management. Additionally, perceived uncertainties as to our future direction as a result of shareholder activism or changes to the composition of our board of directors may lead to the perception of a change in the direction of our business or other instability, which may be exploited by our competitors and/or other activist shareholders and cause concern to our current or potential customers, employees, investors, strategic partners and other constituencies, which could result in lost sales and the loss of business opportunities and make it more difficult to attract and retain qualified personnel and business partners. If customers choose to delay, defer or reduce transactions with us or do business with our competitors instead of us, then our business, financial condition and operating results would be adversely affected. In addition, our share price could experience periods of increased volatility as a result of shareholder activism.

The holders of Series A Convertible Preferred Stock are entitled to vote on an as-converted to Class A common stock basis and have rights to approve certain actions. Additionally, KKR may exercise influence over us through their ability to designate a member of our board of directors.

In May 2021, we issued 500,000 shares of our Series A Convertible Preferred Stock to a group of investors led by KKR & Co. Inc. ("KKR," and such group of investors, the "Investors"). The holders of our Series A Convertible Preferred Stock are generally entitled to vote with the holders of our Class A common stock on all matters submitted for a vote of holders of shares of Class A common stock (voting together with the holders of shares of Class A common stock as one class) on an as-converted basis.

Pursuant to that certain Investment Agreement dated April 7, 2021, by and among Box, Inc. and Powell Investors III L.P., KKR-Milton Credit Holdings L.P., KKR-NYC Credit C L.P., Tailored Opportunistic Credit Fund, and CPS Holdings (US) L.P. (the "Investment Agreement"), KKR has the right to designate one candidate for nomination for election to our board of directors for so long as KKR and its permitted transferees maintain minimum aggregate holdings of our stock as described in further detail in the Investment Agreement. Notwithstanding the fact that all directors are subject to fiduciary duties to us and to applicable law, the interests of the KKR director designee may differ from the interests of our security holders as a whole or of our other directors.

Additionally, the consent of the holders of a majority of the outstanding shares of Series A Convertible Preferred Stock is required in order for us to take certain actions, including issuances of securities that are senior to, or equal in priority with, the Series A Convertible Preferred Stock, and payments of special dividends in excess of an agreed upon amount.

As a result, the holders of Series A Convertible Preferred Stock may in the future have the ability to influence the outcome of certain matters affecting our governance and capitalization.

The issuance of shares of our Series A Convertible Preferred Stock reduces the relative voting power of holders of our Class A common stock, and the conversion of those shares into shares of our Class A common stock would dilute the ownership of Class A common stockholders and may adversely affect the market price of our Class A common stock.

The holders of our Series A Convertible Preferred Stock are entitled to vote, on an as-converted basis, together with holders of our Class A common stock on all matters submitted to a vote of the holders of our Class A common stock, which reduces the relative voting power of the holders of our Class A common stock. In addition, the conversion of our Series A Convertible Preferred Stock into Class A common stock would dilute the ownership interest of existing holders of our Class A common stock, and any conversion of the Series A Convertible Preferred Stock would increase the number of shares of our Class A common stock available for public trading, which could adversely affect prevailing market prices of our Class A common stock.

Our Series A Convertible Preferred Stock has rights, preferences and privileges that are not held by, and are preferential to the rights of, our Class A common stockholders, which could adversely affect our liquidity and financial condition.

The holders of our Series A Convertible Preferred Stock have the right to receive a payment on account of the distribution of assets on any voluntary or involuntary liquidation, dissolution or winding up of our business before any payment may be made to holders of any other class or series of capital stock. In addition, dividends on the Series A Convertible Preferred Stock accrue and are cumulative at the rate of 3.0% per annum, compounding quarterly, and paid-in-kind or paid in cash, at our election.

The holders of our Series A Convertible Preferred Stock also have certain redemption rights, including the right to require us to repurchase all or any portion of the Series A Convertible Preferred Stock at any time following the seventh anniversary of the original issuance date, at 100% of the liquidation preference thereof plus all accrued but unpaid dividends. In addition, upon prior written notice of certain change of control events, the shares of the Series A Convertible Preferred Stock will automatically be redeemed by us for a repurchase price equal to the greater of (i) the value of the shares of Series A Convertible Preferred Stock as converted into Class A common stock at the then-current conversion price and (ii) an amount in cash equal to 100% of the then-current liquidation preference thereof plus all accrued but unpaid dividends. In the case of clause (ii) above, we will also be required to pay the holders of our Series A Convertible Preferred Stock a “make-whole” premium consisting of dividends that would have otherwise accrued from the effective date of such change of control through the fifth anniversary of the original issuance date.

These dividend and share repurchase obligations could impact our liquidity and reduce the amount of cash flows available for working capital, capital expenditures, growth opportunities, acquisitions, and other general corporate purposes. Our obligations to the holders of our Series A Convertible Preferred Stock could also limit our ability to obtain additional financing, which could have an adverse effect on our financial condition. The preferential rights could also result in divergent interests between the holders of our Series A Convertible Preferred Stock and holders of our Class A common stock.

If securities or industry analysts do not publish or cease publishing research or reports about us, our business, our market or our competitors, or if they adversely change their recommendations regarding our Class A common stock, the market price of our Class A common stock and trading volume could decline.

The trading market for our Class A common stock is influenced, to some extent, by the research and reports that securities or industry analysts publish about us, our business, our market or our competitors. If any of the analysts who cover us adversely change their recommendations regarding our Class A common stock or provide more favorable recommendations about our competitors, the market price of our Class A common stock would likely decline. If any of the analysts who cover us cease coverage of our company or fail to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause the market price of our Class A common stock or trading volume to decline.

We do not expect to declare any dividends to holders of our Class A common stock in the foreseeable future.

We do not anticipate declaring any cash dividends to holders of our Class A common stock in the foreseeable future. Consequently, investors may need to rely on sales of our Class A common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investment. Investors seeking cash dividends should not purchase shares of our Class A common stock.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

Share repurchase activity during the three months ended **July 31, 2023** **October 31, 2023** was as follows (in thousands, except per share data):

	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs ⁽¹⁾
May 1, 2023 to May 31, 2023	837	\$ 27.16	837	\$ 74,082
June 1, 2023 to June 30, 2023	847	\$ 29.12	847	\$ 49,425
July 1, 2023 to July 31, 2023	471	\$ 30.00	471	\$ 35,288
Total	2,155		2,155	

	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs ⁽¹⁾
August 1, 2023 to August 31, 2023	810	\$ 28.77	810	\$ 111,987
September 1, 2023 to September 30, 2023	558	\$ 25.48	558	\$ 97,732
October 1, 2023 to October 31, 2023	577	\$ 24.59	577	\$ 83,537
Total	1,945		1,945	

- (1) On August 28, 2023, our board of directors authorized the repurchase of additional \$100 million shares of our Class A common stock. During the three months ended July 31, 2023 October 31, 2023, we repurchased 2.2 million 1.9 million shares at a weighted average price of \$28.55 \$26.59 per share for a total amount of \$61.5 million \$51.7 million. We have entered into pre-set trading plans adopted in accordance with Rule 10b5-1 under the Exchange Act to effect such repurchases. The authorized repurchase plan will expire on August 28, 2024.

Items 3 and 4 are not applicable and have been omitted.

Item 5. OTHER INFORMATION

During the three months ended July 31, 2023 October 31, 2023, no director or officer, as defined in Rule 16a-1(f) under the Exchange Act, adopted or terminated a “Rule 10b5-1 trading arrangement” or a “non-Rule 10b5-1 trading arrangement,” as each term is defined in Item 408 of Regulation S-K.

Item 6. EXHIBITS

The documents listed in the Exhibit Index of this Quarterly Report on Form 10-Q are incorporated by reference or are filed with this Quarterly Report on Form 10-Q, in each case as indicated therein (numbered in accordance with Item 601 of Regulation S-K).

Exhibit 31.1

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER
PURSUANT TO
EXCHANGE ACT RULES 13a-14(a) AND 15d-14(a),
AS ADOPTED PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Aaron Levie, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Box, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

- (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
- (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
