CI&T Reports Strong Sequential Revenue Growth in 2Q24 Results

New York - August 16, 2024 /Business Wire/ - CI&T (NYSE: CINT, "Company"), a global technology transformation specialist and fast-growing technology company, today announces its results for the second quarter of 2024 (2Q24) in accordance with International Financial Reporting Standards (IFRS). For comparison purposes, we refer to the results for the second quarter of 2023 (2Q23) and the first quarter of 2024 (1Q24).

Second quarter of 2024 (2Q24) highlights

- Net Revenue was R\$565.7 million compared to R\$523.5 million in 1Q24, a sequential growth of 8.1% quarter-over-quarter.
- Net Profit grew 24.5% to R\$48.5 million in 2Q24 from R\$39.0 million in 2Q23.
- Adjusted EBITDA of R\$108.7 million and Adjusted EBITDA margin of 19.2%.
- Adjusted Net Profit was R\$65.4 million compared to R\$61.8 million in 2Q23, an increase of 5.8%. The Adjusted Net Profit margin was 11.6%.
- CI&T ended 2Q24 with 6,235 employees, 2.4% higher than 1Q24.

Cesar Gon, founder and CEO of CI&T, commented, "In 2Q24, we achieved an impressive net revenue growth of 8.1% quarter-over-quarter, accompanied by an adjusted EBITDA margin of 19.2%. These results reflect our ability to drive growth while maintaining solid profitability metrics. Looking ahead, our guidance indicates continued growth, bolstered by enduring relationships with our blue-chip clients, highlighting our commitment to delivering consistent value."

A year ago, we proudly launched CI&T Flow, our end-to-end AI-powered platform, initiating a transformative journey for CI&T. With over 100 clients onboarded, we are effectively navigating the hyper-productivity disruption. As we resume our growth trajectory, we are expanding our team to accelerate AI initiatives across the globe."

Comments on the 2Q24 financial performance

Net revenue was R\$565.7 million in 2Q24, compared to R\$571.8 million in 2Q23, a reduction of 1.1%, or a decline of 4.1% at constant currency. Compared to 1Q24, net revenue grew 8.1%, boosted by the performance of the top 10 clients, which grew 10.2% in the same period. The geographic distribution of net revenue in 2Q24 was 44.4% from North America, 40.0% from Latam, 11.0% from Europe, and 4.6% from Asia Pacific.

The cost of services provided in 2Q24 was R\$369.7 million, 1.2% lower than in 2Q23, and the gross profit was R\$196.0 million. The adjusted gross profit in 2Q24 was R\$209.2 million, with an adjusted gross profit margin of 37.0%, stable year-over-year.

In 2Q24, selling, general and administrative (SG&A) and other operating expenses totaled R\$119.0 million, a reduction of 0.9% compared to 2Q23, as a result of lower personnel expenses, partially offset by CI&T's continued investments in sales and AI initiatives in 2Q24. As a result, Adjusted EBITDA was R\$108.7 million, with an adjusted EBITDA margin of 19.2% in 2Q24.

In 2Q24, net finance costs were R\$11.6 million, 37.2% lower than in 2Q23, mainly driven by lower net debt position and interest rates. Income tax expense was R\$16.9 million in 2Q24, 16.3% lower than in 2Q23. The income tax paid (cash effect) was R\$3.8 million, equivalent to a cash tax rate of 5.8%.

The net profit was R\$48.5 million in 2Q24, 24.5% higher than in 2Q23. Adjusted net profit was R\$65.4 million, an increase of 5.8% compared to 2Q23. The adjusted net profit margin increased from 10.8% in 2Q23 to 11.6% in 2Q24, mainly due to lower net finance costs and income tax expenses, as explained above.

In 6M24, cash generated from operating activities was R\$131.3 million, 11.6% higher than in 6M23, mainly due to an improvement in working capital.

Business Outlook

We expect our net revenue in the third quarter of 2024 to be at least R\$591 million on a reported basis, equivalent to a 11.7% growth year-over-year or a 4.5% increase quarter-over-quarter. This assumes an average FX rate of BRL/USD 5.40 in 3Q24.

For the full year of 2024, we are increasing our guidance. We expect our net revenue growth at constant currency to be in the range of -0.5% to +2.5% year-over-year. In addition, we estimate our Adjusted EBITDA margin to be in the range of 17% to 19%.

These expectations are forward-looking statements, and actual results may differ materially. See "Cautionary Statement on Forward-Looking Statements" below.

Conference Call Information

Cesar Gon (CEO), Bruno Guicardi (President for North America and Europe operations), Stanley Rodrigues (CFO), and Eduardo Galvão (Head of Investor Relations), will host a video conference call to discuss the 2Q24 financial and operating results on August 16, at 8:00 a.m. Eastern Time / 09:00 a.m. BRT. Operating globally with over 6,200 professionals across 10 countries, CI&T is recognized by Forrester as a Leader in Modern Application Development Services.

Basis of accounting and functional currency

CI&T maintains its books and records in Brazilian *reais*, which is the presentation currency of its unaudited condensed consolidated interim financial statements, and the functional currency of our operations in Brazil. CI&T prepares its unaudited condensed consolidated interim financial statements in accordance with IFRS, as issued by the IASB, and International Financial Reporting Standard No 34—Interim Financial Reporting ("IAS 34").

Non-IFRS Financial Measures

We regularly monitor certain financial and operating metrics to evaluate our business, measure our performance, identify trends affecting our business, formulate financial projections, and make strategic decisions. These non-IFRS financial measures include Adjusted Gross Profit, Adjusted Gross Profit Margin, Adjusted EBITDA, Adjusted EBITDA Margin, Adjusted Net Profit, Adjusted Net Profit Margin, Net Revenue at Constant Currency, and Net Revenue Growth at Constant Currency. They should be considered in addition to results prepared in accordance with IFRS, but not as substitutes for IFRS results. In addition, our calculation of these non-IFRS financial measures may differ from those used by other companies, and therefore, comparability may be limited. These non-IFRS financial measures are provided as additional information to enhance investors' understanding of our operations' historical and current financial performance.

CI&T is not providing a quantitative reconciliation of its forward-looking non-IFRS Net Revenue Growth at Constant Currency and Adjusted EBITDA to the most directly comparable IFRS measure because it cannot reasonably predict the outcome of certain significant items without unreasonable efforts. These items include, but are not limited to, share-based compensation expenses, acquisition-related expenses, the tax effect of non-IFRS measures, foreign currency exchange gains/losses, and other items. These items are uncertain, depend on various factors, and could have a material impact on our IFRS-reported results for the guidance period.

We calculate Net Revenue at Constant Currency and Net Revenue Growth at Constant Currency by translating Net Revenue from entities reporting in foreign currencies into Brazilian reais using the comparable foreign currency exchange rates from the prior period to show changes in our revenue without giving effect to period-to-period currency fluctuations.

In calculating Adjusted Gross Profit, we exclude cost components unrelated to the direct management of our services. For the periods presented, the adjustments applied were: (i) depreciation and amortization related to the costs of services provided and (ii) share-based compensation expenses.

In calculating Adjusted EBITDA, we exclude components unrelated to the direct management of our services. We calculate Adjusted EBITDA for the periods presented as Net Profit, plus net finance costs, income tax expense, depreciation and amortization, plus: (i) share-based compensation expenses; (ii) government grants related to tax reimbursement in our Chinese subsidiary; (iii) acquisition-related expenses, including the present value and fair value adjustment to accounts payable for business acquired, consulting expenses, and retention packages; and (iv) business restructuring expenses, associated with employees' separation from acquired companies.

In calculating Adjusted Net Profit, we exclude components unrelated to the direct management of our services. For the periods presented, the adjustments have been made for (i) acquisition-related expenses (including amortization of intangible assets from acquired companies, present value and fair value adjustments to accounts payable for business acquired, consulting expenses, and retention packages); (ii) business restructuring expenses, associated with employees' separation from acquired companies; (iii) share-based compensation expenses; and (iv) the tax effects of non-IFRS adjustments.

Cautionary Statement on Forward-Looking Statements

This press release includes forward-looking statements within the meaning of the safe harbor provisions of the United States Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact that may be deemed forward-looking statements include, but are not limited to: the statements under Business Outlook, including expectations relating to revenues and other financial or business metrics; statements regarding relationships with clients; and any other statements of expectations or beliefs. The words "believe," "will," "may," "may have," "would," "estimate," "continues," "anticipates," "intends," "plans," "expects," "budget," "scheduled," "forecasts" and similar words are intended to identify estimates and forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking. Forward-looking statements represent our management's beliefs and assumptions only as of the date of this press release. You should read this press release with the understanding that our actual future results may be materially different from our expectations. These statements are subject to known and unknown risks, uncertainties, and other factors that may cause our actual results, levels of activity, performance, or achievements to be materially different from those expressed or implied by such statements in this press release. Such risk factors include, but are not limited to, those relating to: the ongoing war in Ukraine and the economic sanctions imposed by Western economies on Russia, as well as the conflict between Israel and Hamas, and their impact on our business and industry; the impact of competition on our business; uncertainty regarding the demand for and market utilization of our services; our ability to maintain or acquire new client relationships; general business and economic conditions; our ability to successfully integrate the recent-acquired business; the impact of pandemics, epidemics and disease outbreak; and our ability to successfully implement our growth strategy and strategic plans. Additional information about these and other risks and uncertainties is contained in the Risk Factors section of CI&T's annual report on Form 20-F. Additional information will be made available in our Annual Reports on Form 20-F, and other filings and reports that we may file from time to time with the SEC. Except as required by law, we assume no obligation to and do not intend to update these forward-looking statements or to update the reasons why actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.

Notes to the unaudited condensed consolidated interim financial statements

(Amounts in thousands of Brazilian Reais – R\$, unless otherwise stated)

1 Reporting entity

CI&T Inc. ("CI&T" or "Company"), is a publicly held company incorporated in the Cayman Islands in June 2021, headquartered at Estrada Giuseppina Vianelli Di Napoli, 1455, Polo II de Alta Tecnologia, in the City of Campinas, State of São Paulo, Brazil. As a holding Company, it is mainly engaged in the investment, as a partner or shareholder, in other companies, consortia or joint ventures in Brazil and other countries. The Company's subsidiaries are mainly engaged in the development of customizable software through implementation of software solutions, including machine learning, artificial intelligence (AI), analytics, cloud migration and mobility technologies.

These unaudited condensed consolidated interim financial statements comprise the Company and its subsidiaries (collectively referred to as the "Group").

Since November 10, 2021 CI&T has been a publicly-held company registered with the US Securities and Exchange Commission (the "SEC") and its shares are traded on the New York Stock Exchange ("NYSE") under the ticker symbol "CINT".

2 Basis of accounting

These unaudited condensed consolidated interim financial statements for the three months and six months ended June 30, 2024 have been prepared in accordance with IAS 34 – Interim Financial Reporting and should be read in conjunction with the Group's last annual consolidated financial statements as at and for the year ended December 31, 2023. This financial information does not include all the information required for a complete set of financial statements prepared in accordance with IFRS Accounting Standards. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group's financial position and performance since the last annual financial statements.

The accounting policies applied in these unaudited condensed consolidated interim financial statements are the same as those applied in the Group's consolidated financial statements as at and for the year ended December 31, 2023.

The new accounting standards and amendments to accounting standards that became effective after January 1, 2024, have not significantly affected these unaudited condensed consolidated interim financial statements.

As previously publicly available, these financial statements have been restated to reflect the correction of certain errors identified by the Company in its unaudited condensed consolidated interim financial statements for the three months and six months ended June 30, 2023 (see note 22).

These unaudited condensed consolidated interim financial statements were authorized for issue by the Company's Board of Directors on August 15, 2024.

(i) Accounting standards issued but not yet effective

A number of new accounting standards and amendments to accounting standards are effective for annual periods beginning after January 1, 2024 and earlier application is permitted. However, the Group has not early adopted any of the forthcoming new or amended accounting standards in preparing these unaudited condensed consolidated interim financial statements.

3 Functional and presentation currency

These unaudited condensed consolidated interim financial statements are presented in Brazilian Reais ("R\$"), which is the Company's functional currency. All balances are rounded to the nearest thousands, except when otherwise indicated.

The Company's subsidiaries functional currencies are:

4 Use of judgments and estimates

In preparing these unaudited condensed consolidated interim financial statements, management has made judgments and estimates about the future that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expense. Actual results may differ from these estimates.

The significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those described in the last annual consolidated financial statements.

a. Measurement of fair values

A number of the Group's accounting policies require the measurement of fair values, for both financial and non-financial assets and liabilities.

The Group has established an internal process with respect to the measurement of fair value. This includes the review of significant fair value measurements, significant unobservable data and valuation adjustments. If third-party information, such as broker quotes or pricing services, is used to measure fair values, this information is evaluated to support the conclusion that such valuations meet the requirements of the Accounting Standards, including the level in the fair value hierarchy in which the valuations should be classified.

When measuring the fair value of an asset or a liability, the Group uses observable market data as much as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- **Level 1:** Quoted prices (not adjusted) in active markets for identical assets or liabilities;
- **Level 2:** Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- **Level 3:** Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the changes have occurred.

Further information about the assumptions made in measuring fair values is included in note 19.

5 Cash and cash equivalents

	June 30, 2024	December 31, 2023
Cash and cash equivalents	77,233	63,690
Short-term financial investments	187,537	147,948
Total	264,770	211,638

Short-term financial investments are mainly represented by fixed income securities, with interest rates ranging from 100% to 102% on June 30, 2024 (100% to 101% as of December 31, 2023) of the changes of Interbank Deposit Certificate (CDI) variation which (i) management expects to use for short-term commitments; (ii) present daily liquidity; and (iii) are readily convertible into a known amount of cash, subject to an insignificant risk of change in value.

6 Trade receivables and contract assets

19.2 Measurement of fair values

The Group has financial instruments measured at fair value, which are classified as defined in the note 4.a, and all of them are under the Level 2 in the fair value hierarchy.

The estimated fair value of the Group's financial instruments considered the following methods and assumptions:

- Loans and borrowings: classified as financial liabilities measured at amortized cost and are recorded at their contractual values. The contractual flow of loans and borrowings is adjusted to the future value of the liabilities considering the interest until maturity.
- Leases liabilities: classified as financial liabilities measured at amortized cost and are recorded at their contractual values. The contractual flow of leases liabilities is adjusted to the future value of the liabilities considering the interest until maturity.
- Accounts payable for business acquired: the account was initially recognized as fair value through profit or loss and subsequently classified as financial liabilities measured at amortized cost and are recorded at their contractual values. Some contractual flow of this obligation is adjusted to the future value of the liabilities considering the interest until maturity. For some obligations, the contractual flow is adjusted considering the present value of expected payments, discounted using a risk-adjusted discount rate (discounted cash flows).
- Derivative financial instruments: The financial instruments were valued by calculating the present value using market curves that impact the specific instrument on the calculation dates. For this, future curves of CDI and SOFR, exchange coupon, and currency quotation are used. For interest rate swaps, the present value of the asset position and the liability position are both estimated by discounting cash flows at the interest rate of the currency in which the swap is denominated. The difference between the present value of the asset and the liability position of the swap generates its fair value. For exchange forward swaps, the present value of the asset position and the liability position are both estimated by discounting cash flows at the rate of currency in which the swap is denominated. The difference between the present value of the asset and the liability position of the swap generates its fair value.

19.3 Financial risk management

The Group has exposure to the following risk arising from financial instruments:

- Market risk;
- Credit risk; and
- Liquidity risk.

a. Market risks

The Group is exposed to market risks resulting from the normal course of its activities, such as inflation, interest rates and exchange rate changes.

Thus, the Group's operating results may be affected by changes in economic policies especially regarding short and long-term interest rates, inflation targets and exchange rate policy. Exposures to market risk are measured by sensitivity analysis.

a.1 Currency risk

The Group is exposed to foreign exchange risk to the extent that there is a mismatch between the currencies in which sales, purchases, receivables, and borrowings are denominated and the respective functional currencies of the Company and its subsidiaries.

Therefore, foreign exchange risk is inherent to the Group's business model. A significant part of the Group's revenue is denominated in foreign currency and, consequently, is exposed to exchange rate changes. The Group's expenses, on the other hand, are mainly denominated in the Group's functional currency (Brazilian Reais) and, consequently, are not exposed to exchange rate changes. See below the Group's total exposure to foreign currency:

	June 30, 2024			December 31, 2023		
	US\$	£	Other currencies	US\$	£	Other currencies

Cash flow hedge for the Group's future Revenues

The Group designates hedging relationships to account for the effects of the existing hedge between a foreign exchange gain or loss from proportions of its long-term debt obligations (denominated in U.S. dollars) and foreign exchange gain or loss of its highly probable future revenues denominated in U.S. dollar, so that gains or losses associated with the hedged transaction (the highly probable future revenues denominated U.S. dollar denominated) and the hedging instrument (debt obligations) are recognized in the statement of profit or loss in the same periods.

The schedule of cash flow hedge involving the Company's future revenues as of June 30, 2024 is set below:

Hedging instrument	Hedged transaction	Nature of the risk	Maturity date	Present value of hedging instrument notional value on June 30, 2024	
				US\$	R\$
Foreign exchange gains and losses on proportion of non-derivative financial instruments cash flows	Foreign exchange gains and losses of highly probable future monthly revenues	Foreign Currency - Real vs U.S. Dollar Spot Rate			
Export Credit Note (NCE)			2024 to 2026	22,500	125,075
Total amounts designated as of June 30, 2024				22,500	125,075

Changes in the fair value of US\$ foreign exchange debt obligation (non-derivative financial instruments) designated as effective cash flow hedges have their effective component recorded in equity, other comprehensive income ("OCI") and the ineffective component recorded in statement of profit or loss, in finance income (cost). The amounts accumulated in equity are recognized in the statement of profit or loss in the periods in which the hedged item affects the result, the effects of which are appropriated to the result, in order to minimize the variations in the hedged item.

The individual hedge relationships are established on a one-to-one basis, that is, the “highly probable revenue” of each month and the proportions of cash flows from foreign exchange debt obligation made abroad, used in each relationship and individual hedge, have the same face value in US dollars.

The exposure of the Group's future revenues in hard currency to the risk of variations in the R\$/US\$ exchange rate (liability position) is offset by an inverse exposure equivalent to its US dollars debt (asset position) to the same type of risk.

Hedge accounting effects

The movement of exchange variation accumulated in other comprehensive income as of June 30, 2024, resulting from completed and expected revenues are set out below:

	Exchange variation
Balance as of January 1, 2024	(2,329)
Recognized in other comprehensive income – future revenues denominated in U.S. dollar	(16,146)
Balance as of June 30, 2024	(18,475)
Balance as of January 1, 2023	(15,532)
Recognized in other comprehensive income – future revenues denominated in U.S. dollar	13,981
Reclassified to the statements of profit or loss - revenues denominated in U.S. dollar	1,796
Reclassified to the statements of profit or loss - ineffective portion	(2,443)
Balance as of June 30, 2023	(2,198)

As of June 30, 2024, the annual expectation of realization of the exchange rate variation balance accumulated in equity is R\$ 4,229.

a.2 Interest rate risk

Derives from the possibility of the Group incurring gains or losses resulting from changes in interest rates applicable to its financial assets and liabilities. The Group may also enter into derivative contracts in order to mitigate this risk.

a.3 Sensitivity analysis

The Company, based on information from rating agencies, estimates that in a reasonably possible scenario, the foreign exchange rate variation against the Real on June 30, 2024, will be a depreciation of 5.83% for the US dollar and depreciation of 9.52% for the British pound. The Company conducted a historical analysis of the last ten years of its exposure and impacts on the results due to currency volatility, considering an adverse scenario and a remote scenario compared to the reasonably possible scenario, and realized a variation of approximately 25% and 50%, respectively. The presentation considered these scenarios both in appreciation and depreciation, as the percentages in historical scenarios showed both types of fluctuations.

Sensitivity analysis for interest rate risk

The Company, based on information from rating agencies, estimates that in a reasonably possible scenario, the interest rates could decrease by up to 82 basis points for CDI and by up to 50 basis points for SOFR on June 30, 2024. The Company conducted a historical analysis of the last 10 years of its exposure and impacts on the results due to the interest rate changes, considering an

adverse scenario compared to the reasonably possible scenario, and estimated a variation by 294 basis points for CDI and by 50 basis points for SOFR (the same basis point of possible scenario). The Company also considered a remote scenario compared to the reasonably possible scenario and estimated a variation by 597 basis points for CDI. The presentation considered these scenarios both in increase and decrease, as the percentages in historical scenarios showed both types of fluctuations. The Company considers it unfeasible to contemplate the remote scenario for SOFR, given the brief adoption in the market (beginning in June 2023).

b. Credit risk

Credit risk refers to the risk that a counterparty will not comply with its contractual obligations, causing the Group to incur financial losses. Credit risk is the risk of a counterparty in a business transaction not complying with an obligation provided by a financial instrument or an agreement with a client, which would cause financial loss. To mitigate these risks, the Group analyzes the financial and equity condition of its counterparties, as well as the definition of credit limits and permanent monitoring of outstanding positions.

The Group applies the simplified standard approach to commercial financial assets, where the provision for losses is analyzed over the remaining life of the asset. For further details about the amounts related to the expected credit losses for trade receivables and contract assets, see note 6.

In addition, the Group is exposed to credit risk with respect to financial guarantees granted to banks.

The Group held cash and cash equivalents of R\$ 264,770 on June 30, 2024 (R\$ 211,638 as of December 31, 2023). The cash and cash equivalents are held with bank and financial institution counterparties, which are rated from BB+ to AAA, based on Standard & Poor's, Moodys and Fitch ratings.

The carrying amount of financial assets represents the maximum credit exposure. The maximum credit risk exposure on the date of the financial statements is:

	June 30, 2024	December 31, 2023
Derivatives	6,843	9,620
Cash and cash equivalents	264,770	211,638
Financial investments	-	3,164
Trade receivables	442,826	471,951
Contract assets	268,693	147,620
Other receivables (current and non-current)	36,199	28,099
	1,019,331	872,092

As of June 30, 2024, the exposure to credit risk for trade receivables, contract assets and other receivables by geographic region was as follows:

	June 30, 2024	December 31, 2023
Latin America	279,340	249,959
North America	358,609	293,195
Europe	98,718	91,471
Asia Pacific	11,051	13,045
Total	747,718	647,670

c. Liquidity risk

The Group monitors liquidity risk by managing its cash resources and financial investments.

Liquidity risk is also managed by the Group through its cash flow projection, which aims to ensure the availability of funds to meet the Group's both operational and financial obligations.

The Group also maintains approved credit lines with financial institutions to adequate levels of liquidity in the short, medium, and long terms.

The following table shows the contractual maturities of financial liabilities on the reporting date. The amounts are gross and undiscounted, including contractual interest payments and excluding the impact of netting agreements:

Transactions with key management personnel

The Group paid R\$ 4,615 as of June 30, 2024 (R\$ 6,831 as of June 30, 2023) as direct compensation to key management personnel. These amounts correspond to the executive board compensation, related social charges and short-term benefits and are recorded under line "General and administrative expenses".

The executive officers also participate in the Group's stock-based compensation program. For the period ended on June 30, 2024, the amount of R\$ 114 (R\$ 82 on June 30, 2023) were recognized in the statement of profit or loss.

The Group has no additional post-employment obligation, as well as no other long-term benefits, such as premium leave and other severance benefits. The Group also does not offer other benefits in connection with the dismissal of its Senior management's members.

21 Operating segments

Operating segments are defined based on business activities that reflect how CODM - Chief Operating Decision Maker reviews financial information for decision.

The Group's CODM is the Group's Board of Director. The CODM is in charge of the operational decisions of resource allocation and performance evaluation. The CODM considers the whole Group as a single operating and reportable segment, monitoring operations, making decisions on fund allocation, and evaluating performance based on a single operating segment.

22 Correction of errors

These unaudited condensed consolidated interim financial statements present the restated comparative information for the three months and six months periods ended June 30, 2023, to correct the following errors:

- (i) failure to recognize deferred tax liabilities related to the amortization of tax-deductible goodwill; and
- (ii) the amortization of the identifiable intangible assets arising from business combination was erroneously determined to be nondeductible in the income tax calculation.

The errors have been corrected by restating each of the affected financial statements line items for the three months and six months ended June 30, 2023.

The following tables summarize the impacts on the Group's unaudited condensed consolidated interim financial statements for the three months and six months ended June 30, 2023:
