Mr.Â Miguel Ângel Peirano Â "In the third quarter of 2024, sales volume increased by 5.7% compared to the same period in the previous year, reaching 214.4 million unit cases. The Brazilian market has experienced exceptional development, with a volume growth rate of 15.8% during the period, which is explained by favorable weather conditions, industry expansion, market share gains, and an increase in sales to other bottlers. Excluding sales to Coca-Cola Femsa's Rio Grande do Sul franchise in Brazil, which is temporarily facing production capacity issues due to the floods it experienced in May, sales volume still showed strong growth of 13.9%. In Paraguay, sales volumes increased by 6.3%, primarily driven by exports to Brazil for the previously mentioned reason. Excluding these exports, sales volume would have decreased by 0.8%, which is explained by less favorable weather than in the previous year. In contrast to the significant declines observed in the first half of the year, Argentina's sales volume decreased by only 4.3% (-10.0% excluding exports to Brazil). This improvement provides us with a sense of optimism for the remainder of 2024 and the upcoming year. Finally, in Chile, sales volume grew 1.7%. Â Consolidated Adjusted EBITDA reached CLP 114,634 million, an increase of 3.7% compared to the same quarter of the previous year. Adjusted EBITDA in local currency grew by 28.1% in Brazil and 4.4% in Paraguay, while it decreased in Chile by 3.1% and in Argentina by 21.4%. Net Income attributable to the owners of the controller for the quarter reached CLP 41,942 million, a 34.2% decrease compared to the same period of the previous year, which is mainly explained by a lower gain due to price-level restatement in Argentina. Â Â COCA-COLA ANDINA 3Q24 EARNINGS RELEASE www.koandina.com -2- Â Â Â The Re-Ciclar recycled resin plant in Santiago, Chile, was inaugurated in AugustÂ in collaboration with our partners at Coca-Cola Embonor. In this innovative facility, we reinvigorate beverage bottles by converting them into recycled food-grade resin. This resin is subsequently utilized to produce new PET containers. With an investment of USD 35 million, the plant has the capacity to recycle over 350 million bottles annually, thereby reducing the circulation of new plastic and creating over 25,000 indirect jobs throughout the recycling value chain. Its PET collection model is inclusive and collaborative, uniting grassroots recyclers, local governments, and territorial organizations. This facility is a trailblazer in the implementation of sustainable technologies. It is powered by solar energy via photovoltaic panels, and the water used in the production process is treated and subsequently repurposed for irrigation of gardens. The cranes are 100% electrical and operate on lithium batteries. Â First place was awarded to us in the Best Corporate-Startup Strategic Alliance category at the Innova Awards 2024 in September. This award recognizes our most innovative strategic alliances, assessing the strategic impact, economic return and value we generate for both our business and the startups that we collaborate with. Â Finally, in OctoberÂ for the second consecutive year we were awarded with the Most Innovative Companies award in the Beverages and Juices category. Organized by MIC Business Consulting, ESE Business School Chile and El Mercurio, this recognition underscores our constant effort to remain at the forefront of innovation and reaffirms the commitment we have as an organization to lead with creativity and passion in each of our processes." Â BASIS OF PRESENTATION Â Figures in the following analysis are expressed in accordance with IFRS, in nominal Chilean pesos, both for consolidated results and for the results of each of our operations. All variations with respect to 2023 are nominal. Â Since Argentina has been classified as a Hyperinflationary economy, pursuant to IAS 29, translation of figures from local to reporting currency was performed using the closing exchange rate for the translation to Chilean pesos. Local currency figures for both 2024 and 2023 referred to in the Argentina sections are expressed in SeptemberÂ 2024 currency. Â Finally, a devaluation of local currencies regarding the U.S. dollar has a negative impact on our dollarized costs and a devaluation of local currencies regarding the Chilean peso has a negative impact upon consolidating figures. Â When we refer to "Argentina", it includes our subsidiaries Embotelladora del AtlÂntico S.A. and Empaques Argentina S.A. When we refer to "Chile", it includes the operation in Chile of Embotelladora Andina S.A., as well as its subsidiaries VJ S.A., Vital Aguas S.A., Envases Central S.A. and Re-Ciclar S.A. increase in the Brazilian, Paraguayan and Chilean operations, partially offset by the volume decrease in the Argentine operation. The Non-Alcoholic Beverages Segment represented 94.8% of consolidated Sales Volume and grew 6.2%, mainly explained by the growth of the Segment in Brazil, Paraguay and Chile, partially offset by the decrease in Argentina. The Alcoholic Beverages Segment represented 5.2% of total volume and decreased 2.4%, explained by volume declines in Brazil, Argentina and Chile, partially offset by volume growth in Paraguay. Transactions reached 1,155.7 million during the quarter, representing an increase of 2.4% compared to the same quarter of the previous year. Consolidated Net Sales reached CLP 726,806 million, an increase of 8.4%, explained by revenue growth in Brazil, Chile and Paraguay, as well as the effect of translating figures from the local currencies of Argentina and Paraguay to the reporting currency, which was partially offset by lower revenues in Argentina and the effect of translating figures to the reporting currency of our Brazilian subsidiary. We continue to make steady progress on our digital transformation agenda. Our B2B platform is consistently growing in transactions in all our operations; today more than 60% of total Revenues are through our digital platforms (+30 percentage points compared to the same quarter of the previous year) and with customer satisfaction levels (Net Promoter Score) of around 55%. -3- Consolidated Cost of Sales increased 9.5%, which is mainly explained by (i) the effect of translating figures from our subsidiaries in Argentina and Paraguay to the reporting currency, (ii) the increase in sales volumes in Brazil and Paraguay, (iii) a higher cost of sugar in Chile and Paraguay, (iv) the effect of the shift in mix towards higher unit cost products in Chile and Paraguay, (v) a higher cost of labor in Argentina, and (vi) the effect of the devaluation of local currencies on our dollarized costs. This was partially offset by (i) the effect of translating figures from our Brazilian subsidiary to the reporting currency, (ii) a lower cost of Pet resin in Brazil and Chile, (iii) a lower cost of concentrate in Argentina and Chile, and (iv) the lower sales volume in Argentina. Consolidated Distribution Costs and Administrative Expenses increased 9.3%, which is mainly explained by (i) the effect of translating figures of our subsidiaries in Argentina and Paraguay to the reporting currency, (ii) higher labor expenses in Brazil, Chile and Paraguay, (iii) higher marketing expenses in Chile and Paraguay, and (iv) higher distribution expenses in Brazil, Chile and Paraguay, due to higher volumes sold. This was partially offset by (i) the effect of translating figures from our Brazilian subsidiary to the reporting currency, (ii) lower labor costs in Argentina, and (iii) lower marketing expenses in Argentina. The aforementioned effects led to a consolidated Operating Income of CLP 78,587 million, an increase of 0.6%. Operating Margin was 10.8%. Consolidated Adjusted EBITDA reached CLP 114,634 million, increasing by 3.7%. Adjusted EBITDA margin was 15.8%, a contraction of 72 basis points. Net income attributable to the owners of the controller for the quarter was CLP 41,942 million, a decrease of 34.2%, and Net Margin reached 5.8%, a contraction of 373 basis points. The Non-Alcoholic Beverages Segment represented 87.2% of total Sales Volume, and decreased 2.6%, which was explained by the decrease in all categories of the segment. The Alcoholic Beverages Segment represented 12.8% of total Sales Volume and decreased 1.1%, explained by the decrease in the Beer category, partially offset by the increase in the Other Alcoholic Beverages category. Transactions amounted to 1,300.4 million, representing a decrease of 1.4%. **Net Sales** amounted to CLP 880,104 million, an increase of 2.4%, which is explained by a higher average price in the period, due to the price increases made, partially offset by the aforementioned decrease in volume. Net Sales of the Non-Alcoholic Beverages segment increased 2.9%, representing 76.4% of total sales. Net Sales of the Alcoholic Beverages Segment increased 0.8%, representing 23.6% of total sales. **Cost of Sales** increased 2.4%, which is mainly explained by (i) a shift in the mix towards higher unit cost products, (ii) a higher cost of sugar and (iii) the negative effect of the devaluation of the Chilean peso on our dollarized costs. This was partially offset by (i) lower sales volume, and (ii) a lower cost of Pet resin. **Distribution Costs and Administrative Expenses** increased 5.0%, which is mainly explained by (i) a higher cost of labor and services provided by third parties, and (ii) higher marketing expenses. The aforementioned effects led to an Operating Income of CLP 82,152 million, 3.7% lower when compared to the previous year. Operating Margin was 9.3%. **Adjusted EBITDA** reached CLP 119,742 million, an increase of 1.4%. **Adjusted EBITDA Margin** was 13.6%, a contraction of 14 basis points. **COCA-COLA ANDINA 3Q24 EARNINGS RELEASE** www.koandina.com -9- **Paraguay** **9M23** **9M24** **Var %** (Figures in million CLP) **Net Sales** **154,610** **197,637** **27.8%** **1,365,085** **1,571,724** **15.1%** Operating Income **35,853** **45,572** **27.1%** **316,627** **361,111** **14.0%** Adjusted EBITDA **45,790** **57,673** **26.0%** **404,417** **457,482** **13.1%** Sales volume reached 59.4 million unit cases, an increase of 8.6%, explained by the increase in volume in all categories. In local currency, Net Sales increased 15.1%, which is explained by the aforementioned increase in Sales Volume and a higher average price. **Cost of Sales** increased 30.2% and in local currency it increased 17.4%, which is mainly explained by (i) the higher volume sold, (ii) a higher cost of sugar and fructose, and (iii) the shift in the mix towards higher unit cost products. This was partially offset by the lower cost of Pet resin. **Distribution Costs and Administrative Expenses** increased 22.3% in the reporting currency. In local currency, the increase was 10.4%, which is mainly explained by (i) higher labor expenses and services provided by third parties, (ii) higher distribution expenses, due to higher sales volumes, and (iii) higher marketing expenses. The aforementioned effects led to an Operating Income of CLP 45,572 million, 27.1% higher when compared to the previous year. Operating Margin reached 23.1%. In local currency, Operating Income increased 14.0%. **Adjusted EBITDA** reached CLP 57,673 million, 26.0% higher when compared to the previous year, and **Adjusted EBITDA Margin** was 29.2%, a contraction of 44 basis points. In local currency terms, **Adjusted EBITDA** increased 13.1%. **NON-OPERATING RESULTS FOR THE QUARTER** **Net Financial Income and Expenses** account recorded an expense of CLP 12,763 million, which compares with an expense of CLP 16,039 million in the same quarter of the previous year, mainly due to lower debt levels in Argentina and a higher cash level in Brazil. **Share of Profit or Loss from Investments** Accounted for by the Equity Method went from a loss of CLP 846 million to a profit of CLP 760 million, which is mainly explained by higher results of subsidiaries in Chile and Brazil. **Other Income and Expenses** account recorded a loss of CLP 4,937 million, compared to a loss of CLP 8,632 million in the same quarter of the previous year, the difference being mainly explained by a loss generated in the previous year due to a change in the useful life of containers in Paraguay. **Results by Adjustment Units and Exchange Rate Differences** account went from a profit of CLP 20,468 million to a loss of CLP 3,626 million. This is mainly explained by a non-cash flow gain in the same period of the previous year, due to price-level restatement in Argentina, which was substantially lower this year. **Income Tax** went from -CLP 9,541 million to -CLP 15,725 million, a variation that is mainly explained by a positive effect in the previous year due to the exchange rate difference in Chile. **COCA-COLA ANDINA 3Q24 EARNINGS RELEASE** www.koandina.com -10- **CONSOLIDATED BALANCE** The following are the balances of Assets and Liabilities as of the closing date of these financial statements: **12.31.2023** **09.30.2024** **Variation** **million CLP** **million CLP** **million CLP** **Assets** **Current assets** **981,771** **887,637** **-94,134** **Non-current assets** **1,939,750** **2,132,775** **193,025** **Total Assets** **2,921,521** **3,020,412** **98,891** **Liabilities** **Current liabilities** **692,871** **675,722** **-17,150** **Non-current liabilities** **1,307,664** **1,340,667** **33,003** **Total Liabilities** **2,000,535** **2,016,389** **15,853** **Equity** **34,695** **34,640** **-55** **Equity attributable to the owners of the controller** **886,291** **969,383** **83,093** **Total Equity** **920,985** **1,004,023** **83,038** **At the closing of September 2024, with respect to the closing of 2023, the Argentine peso, the Brazilian real and the Paraguayan guarani depreciated against the Chilean peso by 17.3%, 10.0% and 4.7%, respectively, which generated a decrease in assets, liabilities and equity accounts, due to the effect of translation of figures to the reporting currency. Additionally, the figures for Argentina, in accordance with IAS 29, prior to the translation of figures, are adjusted for accumulated inflation as of the end of 2023, until the closing currency of this report (September 2024), increasing the figures in local currency by 101.6%. Assets Total assets increased by CLP 98,891 million, up 3.4% compared to December 2023. Current assets decreased by CLP 94,134 million, 9.6% compared to December 2023, which is mainly explained by the decrease in Cash and cash equivalents (-CLP 92,998 million) due to the payment of dividends, and by the decrease in Trade and other current accounts receivable (-CLP 47,090 million), due to seasonal factors, as we are compared to December, the month of highest sales of the year and, as a result, of high accounts receivable in relation to an average month. The above decreases are partially offset by the increase in Inventories (CLP 41,207 million) due to higher purchases of raw materials and spare parts from our subsidiary in Argentina. Non-current assets increased by CLP 193,025 million, 10.0% compared to December 2023, mainly due to the increase in Property, plant and equipment (CLP 150,775 million), which is explained by investments made (CLP 210,424 million), added to IAS 29 restatements, which were partially offset by the Depreciation account and the negative effect of the translation of figures. In addition to the above increase, there was an increase in Other non-current financial assets (CLP 54,941 million). Liabilities and Equity Total liabilities increased by CLP 15,853 million, 0.8% over December 2023. Current liabilities decreased by CLP 17,150 million, by 2.5% compared to December 2023, mainly due to the decrease in Trade and other current accounts payable (-CLP 53,621 million), due to seasonal factors considering that December is the month with the highest sales of the year, and thus a month with high accounts payable to suppliers. The above decrease was partially offset by the increase in Other current financial liabilities (CLP 34,776 million), due to an increase in bank obligations in Argentina and Chile. On the other hand, non-current liabilities increased by CLP 33,003 million, by 2.5% compared to December 2023, mainly due to the increase in Deferred tax liabilities (CLP 26,069 million), which is mainly explained by the increase in deferred liabilities for distribution rights and fixed assets. Equity increased by CLP 83,038 million, 9.0% compared to December 2023, explained by the increase in Accumulated earnings from profits obtained in the period (CLP 132,988 million), the restatement of equity balances in our**

Relationship with The Coca-Cola Company Â A large part of the Company's sales derives from the sale of products whose trademarks are owned by The Coca-Cola Company, which has the ability to exert an important influence on the business through its rights under the Licensing or Bottling Agreements. Â In addition, we depend on The Coca-Cola Company to renew these Bottling Agreements. Â Non-alcoholic beverage business environment Â Consumers, public health officials, and government officials in our markets are increasingly concerned about the public health consequences associated with obesity, which can affect demand for our products, especially those containing sugar. Â The Company has developed a large portfolio of sugar-free products and has also made reformulations to some of its sugary products, significantly reducing sugar contents of its products. Â COCA-COLA ANDINA 3Q24 EARNINGS RELEASE www.koandina.com -14- Â Â Â Â Raw material prices and exchange rate Â Many raw materials are used in the production of beverages and packaging, including sugar and PET resin, the prices of which may present great volatility. In the case of sugar, the Company sets the price of a part of the volume that it consumes with some anticipation, in order to avoid having large fluctuations of cost that cannot be anticipated. Â In addition, these raw materials are traded in dollars; the Company has a policy of hedging in the futures market a portion of the dollars it uses to buy raw materials. Â Instability in the supply of utilities and raw materials Â In the countries in which we operate, our operations depend on a stable supply of utilities, fuel and raw materials. Power outages or water shut offs as well as the lack of raw materials may result in interruptions of our production. The Company has mitigation plans to reduce the effects of eventual interruptions in the supply of utilities and raw materials. Â Economic conditions of the countries where we operate Â The Company maintains operations in Argentina, Brazil, Chile and Paraguay. The demand for our products largely depends on the economic situation of these countries. Moreover, economic instability can cause depreciation of the currencies of these countries, as well as inflation, which may eventually affect the Company's financial situation. Â New tax laws or modifications to tax incentives Â We cannot ensure that any government authority in any of the countries in which we operate will not impose new taxes or increase existing taxes on our raw materials, products or containers. Likewise, we cannot assure that these authorities are going to uphold and/or renew tax incentives that currently benefit some of our operations. Â A devaluation of the currencies of the countries where we have our operations, regarding the Chilean peso, can negatively affect the results reported by the Company in Chilean pesos Â The Company reports its results in Chilean pesos, while a large part of its revenues and Adjusted EBITDA comes from countries that use other currencies. Should currencies devalue regarding the Chilean peso, this would have a negative effect on the results of the Company, upon the translation of results into Chilean pesos. Â The imposition of exchange controls could restrict the entry and exit of funds to and from the countries in which we operate, which could significantly limit our financial capacity Â The imposition of exchange controls in the countries in which we operate could affect our ability to repatriate profits, which could significantly limit our ability to pay dividends to our shareholders. Additionally, it may limit the ability of our foreign subsidiaries to finance payments of U.S. dollar denominated liabilities required by foreign creditors. Â Civil unrest in Chile could have a material adverse effect on general economic conditions in Chile and our business and financial condition Â We cannot predict whether the Chilean economy will be significantly impacted by any protests or demonstrations, which have been violent on occasion in the past, or whether the public policies that the government implements in response to these demonstrations will have a negative impact on the economy and our business. Neither can we assure that demonstrations and vandalism will not cause damage to our logistics and production infrastructure. So far, the Company has not been affected in any material respect. Â Our business is subject to risks from pandemics such as COVID-19. Â Pandemics pose the risk that we or our employees, contractors, suppliers and other partners may be limited or prevented from conducting business for an indefinite period of time, including due to shutdowns that may be requested or ordered by governmental authorities. In addition, we may experience disruptions in the supply of raw materials. Â Pandemics and related governmental actions could adversely affect our business and results of operations, potentially in a material way. Â A more detailed analysis of business risks is available in the Company's 20-F and Annual Report, available on our website. Â RECENT EVENTS Â Interim Dividend 232 Â On August 14, 2024, the Company paid Interim Dividend 232: CLP 32.0 per Series A share; and CLP 35.2 per Series B share. Â Interim Dividend 233 Â On October 24, 2024, the Company paid Interim Dividend 233: CLP 32.0 per Series A share; and CLP 35.2 per Series B share. Â COCA-COLA ANDINA 3Q24 EARNINGS RELEASE www.koandina.com -15- Â Â Â Â GLOSSARY Â Adjusted EBITDA: includes Revenue, Costs of Sales, Distribution Costs and Administrative Expenses, included in the Financial Statements submitted to Chile's Financial Market Commission and determined in accordance with IFRS, plus Depreciation. Â Currency-neutral of a quarter q for a Q year is calculated using the same ratio of local currencies to the Chilean peso as the q quarter of the Q-1 year. In the case of Argentina, given that it is a hyperinflationary economy, the result of the q quarter is also deflated by inflation of the last 12 months. Â Financial Expenses: correspond to interest generated by the Company's financial debt. Â Financial Income: corresponds to the interest generated by the Company's cash. Â Net Financial Debt: considers the consolidated financial liability that accrues interest, i.e.: (i) other current financial liabilities, plus (ii) other non-current financial liabilities, less (iii) the sum of cash and cash equivalent; plus other current financial assets; plus other non-current financial assets (to the extent that they correspond to the balances of assets for derivative financial instruments, taken to cover exchange rate risk and/or interest rate of financial liabilities). Â Operating Income: includes Revenue, Costs of Sales, Distribution Costs and Administrative Expenses, included in the Financial Statements submitted to Chile Financial Market Commission and determined in accordance with IFRS. Â Total Equity: corresponds to the equity attributable to the owners of the controller plus non-controlling interests. Â Transactions: refers to the number of units sold, regardless of size. Â Volume: expressed in Unit Cases (UCs), which is the conventional measurement used to measure sales volume in the Coca-Cola System worldwide. Coca-Cola Andina has the franchise to produce and commercialize Coca-Cola products in certain territories in Argentina (through Embotelladora del Atl ntico), in Brazil (through Rio de Janeiro Refrescos), in Chile, (through Embotelladora Andina) and in all of Paraguay (through Paraguay Refrescos). The Chadwick Claro, Garc s Silva, Said Handal and Said Somav a families control Coca-Cola Andina in equal parts. The Company's value generation proposal is to become a Total Beverage Company, using existing resources efficiently and sustainably, developing a relationship of excellence with consumers of its products, as well as with its collaborators, customers, suppliers, the community in which it operates and with its strategic partner The Coca-Cola Company, in order to increase ROIC for shareholders in the long term. For more company information visit www.koandina.com. Â This document may contain projections reflecting Coca-Cola Andina's good faith expectation and are based on currently available information. However, the results that are finally obtained are subject to diverse variables, many of which are beyond the Company's control, and which could materially impact the current performance. Among the factors that could change the performance are the political and economic conditions on mass consumption, pricing pressures resulting from competitive discounts of other bottlers, weather conditions in the Southern Cone and other risk factors that would be applicable from time to time, and which are periodically informed in reports filed before the appropriate regulatory authorities, and which are available on our website.
