Disclaimer

This presentation contains “forward-looking information” or “forward-looking statements” within the meaning of Canadian securities legislation. All statements included herein, other than statements of historical fact, including without limitation, statements relating to the impact of the Company’s expansion projects on gold production, estimated guidance for 2026, targeted production in 2026, the Marmato Bulk Mining Zone construction and enhanced expansion and the details and timing thereof, the potential of and plans pertaining to the Company’s growth projects, plans pertaining to Soto Norte and Toroparu and the benefits and timing thereof, the timing for filing of the Toroparu pre-feasibility study, the potential to reach the Company’s production goals, the benefits derived from the Company’s CMP model, the potential to reach 1 million oz annual production, and the Company’s goals and objectives, are forward-looking statements. Generally, the forward-looking information and forward-looking statements can be identified by the use of forward-looking terminology such as “become”, “believe”, “estimate”, “expect”, “forward”, “intend”, “plan”, “potential” or variations of such words and phrases or state that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, “occur” or “be achieved”. Statements concerning mineral reserve estimates and mineral resource estimates may also be deemed to constitute forward looking information to the extent that they involve estimates of the mineralization that will be encountered. The material factors or assumptions used to develop forward looking information or statements are disclosed throughout this presentation.

Forward looking information and forward looking statements, while based on management’s best estimates and assumptions, are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Aris Mining to be materially different from those expressed or implied by such forward-looking information or forward looking statements, including but not limited to: local environmental and regulatory requirements and delays in obtaining required environmental and other licenses, changes in national and local government legislation, taxation, controls and regulations, political or economic developments and permits, uncertainties and hazards associated with gold exploration, development and mining, risks associated with tailings management, risks associated with operating in foreign jurisdictions, risks associated with capital cost estimates, dependence of operations on infrastructure, costs associated with the decommissioning of the Company’s properties, fluctuations in foreign exchange or interest rates and stock market volatility, operational and technical problems, the ability to maintain good relations with employees and labour unions, competition; reliance on key personnel, litigation risks, uncertainties relating to title to property and mineral resource and mineral reserve estimates, risks associated with acquisitions and integration, risks associated with the Company’s ability to meet its financial obligations as they fall due, volatility in the price of gold, or certain other commodities, risks that actual production may be less than estimated, risks associated with servicing indebtedness, additional funding requirements, risks associated with general economic factors, risks associated with secured debt, changes in the accessibility and availability of insurance for mining operations and property, environmental, sustainability and governance practices and performance, risks associated with climate change, risks associated with the reliance on experts outside of Canada, pandemics, epidemics and public health crises, potential conflicts of interest, uncertainties relating to the enforcement of civil liabilities outside of Canada, cyber-security risks, volatility of the share price, the ability to pay dividends in the future, as well as those factors discussed in the section entitled “Risk Factors” in Aris Mining’s most recent AIF and Management’s Discussion and Analysis available on SEDAR+ at www.sedarplus.ca and in the Company’s filings with the U.S. Securities and Exchange Commission (“SEC”) at www.sec.gov.

Although Aris Mining has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information and forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information or statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information or statements. The Company has and continues to disclose in its Management’s Discussion and Analysis and other publicly filed documents, changes to material factors or assumptions underlying the forward-looking information and forward-looking statements and to the validity of the information, in the period the changes occur.

The forward-looking statements and forward-looking information are made as of the date hereof and Aris Mining disclaims any obligation to update any such factors or to publicly announce the result of any revisions to any of the forward-looking statements or forward-looking information contained herein to reflect future results. Accordingly, readers should not place undue reliance on forward-looking statements and information.

All-in sustaining cost (AISC) (\$ per oz sold), AISC margin, EBITDA, adjusted EBITDA, adjusted earnings, net debt, total leverage and net leverage are non-GAAP financial measures and non-GAAP ratios in this document. These measures do not have any standardized meaning prescribed under GAAP, and therefore may not be comparable to other issuers. For full details on non-GAAP financial measures and non-GAAP ratios, refer to the Non-GAAP Measures section of the Company’s Management’s Discussion and Analysis for the years ended December 31, 2025 and 2024, which are available on SEDAR+ at www.sedarplus.ca and in the Company’s filings with the SEC at www.sec.gov.

Certain information contained in this presentation includes market and industry data that has been obtained from or is based upon estimates derived from third party sources. Although the data is believed to be reliable, Aris Mining has not independently verified such information and cannot provide any assurance of its accuracy, currency, reliability, or completeness.

This presentation contains information that may constitute future-orientated financial information or financial outlook information (collectively, “FOFI”) about the Company’s prospective financial performance, financial position or cash flows, all of which is subject to the same assumptions, risk factors, limitations and qualifications as set forth above. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise or inaccurate and, as such, undue reliance should not be placed on FOFI. The Company’s actual results, performance and achievements could differ materially from those expressed in, or implied by, FOFI. The Company has included FOFI in order to provide readers with a more complete perspective on the Company’s future operations and management’s current expectations relating to the Company’s future performance. Readers are cautioned that such information may not be appropriate for other purposes. FOFI contained herein was made as of the date of this presentation. Unless required by applicable laws, the Company does not undertake any obligation to publicly update or revise any FOFI statements, whether as a result of new information, future events or otherwise.

2025 Production and Costs on Target

Delivered on guidance in 2025

	2025 Actuals	2025 Guidance Range	Performance Relative to Guidance
Aris Mining			
Gold Production (koz) – Consolidated	257	230 to 275	✓
Segovia			
Gold production (koz)	228	210 to 250	✓
Cash cost (US\$/oz) – Owner Mining¹	\$1,050	\$1,050 to \$1,150	✓
AISC (US\$/oz) – Owner Mining¹	\$1,534	\$1,450 to \$1,600	✓
AISC sales margin (%) – CMPs¹	44%	35% to 40%	✓
Marmato			
Gold Production (koz)	29	20 to 25	✓

1. 2025 cash cost and AISC guidance are provided separately for Owner Mining and CMP operations, given their different primary cost drivers. Owner Mining costs are primarily driven by conventional mining expenditures such as labour, consumables (including explosives and fuel), and power. In contrast, CMP costs are mainly determined by the cost of purchasing mill feed, which depends on material volume, recoverable gold grade, and the prevailing spot price of gold. Given the current rise in gold prices, forecasting the cost of CMP operations is more challenging, making this distinction important. As a result, we believe the performance of CMP operations is best measured on a sales margin basis to provide a clearer representation of its financial performance and contribution to the Company's overall results

Marmato Expansion: Construction Update

UNDERGROUND DEVELOPMENT

- Active mining in the wider porphyry hosted areas is already underway, materially de-risking the project, via existing access
- Main decline is 60% complete (>1,000 metres advanced of full length 1.7km) with completion targeted for Q3 2026
- The Los Indios crosscut expected to be completed in April 2026

SURFACE ACTIVITIES

- The main civil, mechanical, and electrical works are advancing, with foundations for the mills, tailings thickener, and leach and CIP tanks completed
 - Over 2.8 million workhours completed to date

EQUIPMENT

- Major equipment for first gold, including the primary crusher, SAG mill, ball mill, and filter presses, are ready to be moved from storage in Cartagena and Medellin to Marmato site, starting in May

WHEATON STREAM FINANCING

- \$40M received subsequent to Dec 31, 2025 following 50% completion milestone
- Remaining \$42M instalment is payable upon 75% spend completion

CIP COMMISSIONING ON SCHEDULE FOR Q4 2026

- CIP plant is expected to be commissioned in Q4 2026
- Progressive, staged ramp-up:
 - 3,000 tpd by end of 2026
 - 4,000 tpd by mid-2027
 - 5,000 tpd by end of 2027

First gold pour expected in Q4 2026, followed by a staged ramp-up during 2027

1. Includes potential production from Toroparu, which is based on a preliminary economic assessment and is preliminary in nature. It includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the preliminary economic assessment will be realized. Mineral resources that are not mineral reserves do not have demonstrated economic viability. There can be no assurance that the projected production will be achieved. Such production also remains subject to obtaining all necessary permits for both Soto Norte and Toroparu

2. Soto Norte is expected to have annual average production of 263 koz (years 2 to 10)
