UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

**FORM 10-Q**

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended **March 31, 2024** **June 30, 2024**  
or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number 1-12291

**THE AES CORPORATION**

(Exact name of registrant as specified in its charter)

Delaware

**54-1163725**

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

4300 Wilson Boulevard

**22203**

Arlington, Virginia

(Zip Code)

(Address of principal executive offices)

Registrant's telephone number, including area code: (703) 522-1315

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of Each Class</u>	<u>Trading Symbol(s)</u>	<u>Name of Each Exchange on Which Registered</u>
Common Stock, par value \$0.01 per share	AES	New York Stock Exchange

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer", "accelerated filer", "smaller reporting company", and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer  Smaller reporting company  Emerging growth company  Non-accelerated filer

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

The number of shares outstanding of Registrant's Common Stock, par value \$0.01 per share, on **April 30, 2024** **July 30, 2024** was **710,666,647**, **710,924,314**.

---

**The AES Corporation**

## Glossary of Terms

The following terms and acronyms appear in the text of this report and have the definitions indicated below:

<b>2024 Base Rate Order</b>	The order issued in April 2024 by the IURC authorizing AES Indiana to, among other things, increase its basic rates and charges by \$71 million annually
Adjusted EBITDA	Adjusted earnings before interest income and expense, taxes, depreciation and amortization, a non-GAAP measure of operating performance
Adjusted EBITDA with Tax Attributes	Adjusted earnings before interest income and expense, taxes, depreciation and amortization, adding back the pre-tax effect of Production Tax Credits, Investment Tax Credits and depreciation tax deductions allocated to tax equity investors, a non-GAAP measure
Adjusted EPS	Adjusted Earnings Per Share, a non-GAAP measure
Adjusted PTC	Adjusted Pre-tax Contribution, a non-GAAP measure of operating performance
AES	The Parent Company and its subsidiaries and affiliates
AES Andes	AES Andes S.A., formerly AES Gener
AES Brasil	AES Brasil Operações S.A., formerly branded as AES Tietê
AES Clean Energy Development	AES Clean Energy Development, LLC
AES Indiana	Indianapolis Power & Light Company, formerly branded as IPL. AES Indiana is wholly-owned by IPALCO
AES Ohio	The Dayton Power & Light Company, formerly branded as DP&L. AES Ohio is wholly-owned by DPL
AES Renewable Holdings	AES Renewable Holdings, LLC, formerly branded as AES Distributed Energy
AFUDC	Allowance for Funds Used During Construction
AGIC	AES Global Insurance Company, AES' captive insurance company
AOCL	Accumulated Other Comprehensive Loss
ASC	Accounting Standards Codification
ASU	Accounting Standards Update
BESS	Battery Energy Storage System
CAA	United States Clean Air Act
CCR	Coal Combustion Residuals, which includes bottom ash, fly ash, and air pollution control wastes generated at coal-fired generation plant sites
CECL	Current Expected Credit Loss
CO <sub>2</sub>	Carbon Dioxide
CSAPR	Cross-State Air Pollution Rule
CWA	U.S. Clean Water Act
DG Comp	Directorate-General for Competition
DIR	Distribution Investment Rider - established in the ESP 4 to recover certain distribution capital investments placed in service beginning June 30, 2020, for three years, and subject to increasing annual revenue limits and other terms. The annual revenue limit for 2024 is \$38.4 million.
DPL	DPL Inc.
EBITDA	Earnings before interest income and expense, taxes, depreciation and amortization, a non-GAAP measure of operating performance
<b>ENSO ECCRA</b>	<b>EI Niño-Southern Oscillation Environmental Compliance Cost Recovery Adjustment</b>
EPA	United States Environmental Protection Agency
EPC	Engineering, Procurement and Construction
ESP	Electric Security Plan
EU	European Union
FASB	Financial Accounting Standards Board
Fluence	Fluence Energy, Inc and its subsidiaries, including Fluence Energy, LLC, which was previously our joint venture with Siemens (NASDAQ: FLNC)
GAAP	Generally Accepted Accounting Principles in the United States
GHG	Greenhouse Gas
GILTI	Global Intangible Low Taxed Income
GW	Gigawatts
GWh	Gigawatt Hours
HLBV	Hypothetical Liquidation at Book Value
IPALCO	IPALCO Enterprises, Inc.

ITC	Investment Tax Credit
IURC	Indiana Utility Regulatory Commission
LNG	Liquid Natural Gas
MMBtu	Million British Thermal Units
MW	Megawatts
MWh	Megawatt Hours
NAAQS	National Ambient Air Quality Standards
NCI	Noncontrolling Interest
NEK	Natsionalna Elektricheska Kompania (state-owned electricity public supplier in Bulgaria)
NM	Not Meaningful
NOV	Notice of Violation
NOx	Nitrogen Oxide
NPDES	National Pollutant Discharge Elimination System
Parent Company	The AES Corporation
Pet Coke	Petroleum Coke

---

2 | The AES Corporation | June 30, 2024 Form 10-Q

PPA	Power Purchase Agreement
PREPA	Puerto Rico Electric Power Authority
PUCO	The Public Utilities Commission of Ohio
RSU	Restricted Stock Unit
SBU	Strategic Business Unit

---

2 | The AES Corporation | March 31, 2024 Form 10-Q

SEC	United States Securities and Exchange Commission
SO <sub>2</sub>	Sulfur Dioxide
TDSIC	Transmission, Distribution, and Storage System Improvement Charge
TEG	Termoeléctrica del Golfo, S. de R.L. de C.V.
TEP	Termoeléctrica Peñoles, S. de R.L. de C.V.
U.S.	United States
USD	United States Dollar
VIE	Variable Interest Entity

9 | Notes to Condensed Consolidated Financial Statements | March 31, 2024 June 30, 2024 and 2023

**Notes to Condensed Consolidated Financial Statements**  
**For the Three and Six Months Ended March 31, 2024 June 30, 2024 and 2023**  
**(Unaudited)**

**1. FINANCIAL STATEMENT PRESENTATION**

**Consolidation** — In this Quarterly Report, the terms “AES,” “the Company,” “us” or “we” refer to the consolidated entity, including its subsidiaries and affiliates. The terms “The AES Corporation” or “the Parent Company” refer only to the publicly held holding company, The AES Corporation, excluding its subsidiaries and affiliates. Furthermore, VIEs in which the Company has a variable interest have been consolidated where the Company is the primary beneficiary. Investments in which the Company has the ability to exercise significant influence, but not control, are accounted for using the equity method of accounting, except for our investment in Alto Maipo, for which we have elected the fair value option as permitted under ASC 825. All intercompany transactions and balances have been eliminated in consolidation.

**Interim Financial Presentation** — The accompanying unaudited condensed consolidated financial statements and footnotes have been prepared in accordance with GAAP, as contained in the FASB ASC, for interim financial information and Article 10 of Regulation S-X issued by the SEC. Accordingly, they do not include all the information and footnotes required by GAAP for annual fiscal reporting periods. In the opinion of management, the interim financial information includes all adjustments of a normal recurring nature necessary for a fair presentation of the results of operations, financial position, comprehensive income, changes in equity, and cash flows. The results of operations for the three and six months ended March 31, 2024 June 30, 2024 are not necessarily indicative of expected results for the year ending December 31, 2024. The accompanying condensed consolidated financial statements are unaudited and should be read in conjunction with the 2023 audited consolidated financial statements and notes thereto, which are included in the 2023 Form 10-K filed with the SEC on February 29, 2024 (the “2023 Form 10-K”).

**Cash, Cash Equivalents, and Restricted Cash** — The following table provides a summary of cash, cash equivalents, and restricted cash amounts reported on the Condensed Consolidated Balance Sheets that reconcile to the total of such amounts as shown on the Condensed Consolidated Statements of Cash Flows (in millions):

	March 31, 2024	December 31, 2023
	June 30, 2024	December 31, 2023
Cash and cash equivalents		
Restricted cash		
Debt service reserves and other deposits		
Cash, Cash Equivalents, and Restricted Cash		

**ASC 450—Liabilities—Supplier Finance Programs** — With some purchases, AES enters into supplier financing arrangements. The Company generally uses an intermediary entity between the supplier and the Company, but sometimes enters into these agreements directly with the supplier, with the goal of securing improved payment terms. These arrangements are included in *Supplier financing arrangements* on the Condensed Consolidated Balance Sheets as the amounts are all due in less than a year; the related interest expense is recorded on the Condensed Consolidated Statements of Operations within *Interest expense*. The company had 3226 supplier financing arrangements with a total outstanding balance of \$875 \$553 million as of March 31, 2024 June 30, 2024, and 4628 supplier financing arrangements with a total outstanding balance of \$974 million as of December 31, 2023. The agreements ranged from less than \$1 million to \$96 million with a weighted average interest rate of 7.60% 7.38% as of March 31, 2024 June 30, 2024; as of December 31, 2023, the agreements ranged from less than \$1 million to \$69 million with a weighted average interest rate of 7.51%. Of the amounts outstanding under supplier financing arrangements, \$725 million \$344 million and \$814 million were guaranteed by the Company as of March 31, 2024 June 30, 2024 and December 31, 2023, respectively.

**New Accounting Pronouncements Adopted in 2024** — The following table provides a brief description of recent accounting pronouncements that had an impact on the Company’s condensed consolidated financial statements. Accounting pronouncements not listed below were assessed and determined to be either not applicable or did not have a material impact on the Company’s condensed consolidated financial statements.

10 | Notes to Condensed Consolidated Financial Statements—(Continued) | March 31, 2024 June 30, 2024 and 2023

#### New Accounting Standards Adopted

ASU Number and Name	Description	Date of Adoption	Effect on the financial statements upon adoption
2022-04 Liabilities - Supplier Finance Programs (Topic 450-50): Disclosure of Supplier Finance Program Obligations	This update is to provide additional information and disclosures about an entity's use of supplier finance programs to see how these programs will affect an entity's working capital, liquidity, and cash flows. Entities that use supplier finance programs as the buyer party should disclose (1) the key terms of the payment terms and assets pledged as security or other forms of guarantees provided and (2) the unpaid amount outstanding, a description of where those obligations are presented on the balance sheet, and a rollforward of those obligations during the annual period.	January 1, 2023, except for the rollforward information, which is effective for fiscal years beginning after December 15, 2023.	The ASU only requires disclosures related to the Company's supplier finance programs and does not affect the recognition, measurement, or presentation of supplier finance program obligations on the balance sheet or cash flow statement. The Company adopted the new disclosure requirements in the first quarter of 2023, except for the annual requirement to disclose rollforward information, which the Company expects to adopt and present prospectively beginning in the 2024 annual financial statements.

**New Accounting Pronouncements Issued But Not Yet Effective** — The following table provides a brief description of recent accounting pronouncements that could have a material impact on the Company's condensed consolidated financial statements once adopted. Accounting pronouncements not listed below were assessed and determined to be either not applicable or are expected to have no material impact on the Company's condensed consolidated financial statements.

#### New Accounting Standards Issued But Not Yet Effective

ASU Number and Name	Description	Date of Adoption	Effect on the financial statements upon adoption
2023-07 Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures	The amendments in this section are designed to improve the disclosures related to segment reporting on an interim and annual basis. Public companies must disclose significant segment expenses and an amount for other segment items. This will also require that a company disclose its annual disclosures under Topic 280 in each interim period. Furthermore, companies will need to disclose the Chief Operating Decision Maker ("CODM") and how the CODM assesses the performance of a segment. Lastly, public companies that have a single reportable segment must report the required disclosures under Topic 280.	The amendments in this Update are effective for December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024. Early adoption is permitted.	This ASU only affects disclosures, which will be provided when the amendment becomes effective.
2023-09 Income Taxes (Topic 740): Improvements to Income Tax Disclosures	The amendments in this Update require that public business entities on an annual basis (1) disclose specific categories in the rate reconciliation and (2) provide additional information for reconciling items that meet a quantitative threshold. Furthermore, companies are required to disclose a disaggregated amount of income taxes paid at a federal, state, and foreign level as well as a breakdown of income taxes paid in a jurisdiction that comprises 5% of a company's total income taxes paid. Lastly, this ASU requires that companies disclose income (loss) from continuing operations before income tax at a domestic and foreign level and that companies disclose income tax expense from continuing operations on a federal, state, and foreign level.	The amendments in this Update are effective for December 15, 2024	This ASU only affects disclosures, which will be provided when the amendment becomes effective.

## 2. INVENTORY

The following table summarizes the Company's inventory balances as of the periods indicated (in millions):

	March 31, 2024	December 31, 2023
	June 30, 2024	December 31, 2023
Fuel and other raw materials		
Spare parts and supplies		
Total		

## 3. FAIR VALUE

The fair value of current financial assets and liabilities, debt service reserves, and other deposits approximate their reported carrying amounts. The estimated fair values of the Company's assets and liabilities have been determined using available market information. Because these amounts are estimates and based on hypothetical transactions to sell assets or transfer liabilities, the use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. For further information on our valuation techniques and policies, see Note 5—*Fair Value* in Item 8—*Financial Statements and Supplementary Data* of our 2023 Form 10-K.

### Recurring Measurements

The following table presents, by level within the fair value hierarchy, the Company's financial assets and liabilities that were measured at fair value on a recurring basis as of the dates indicated (in millions). For the Company's investments in marketable debt securities, the security classes presented were determined based on the nature and risk of the security and are consistent with how the Company manages, monitors, and measures its marketable securities:

(1) Includes \$360 million reported in *Current held-for-sale assets* on the Condensed Consolidated Balance Sheets related to AES Brasil as of June 30, 2024.

(2) Includes \$111 million of derivative assets reported in *Current held-for-sale assets* and \$116 million of derivative liabilities reported in *Current held-for-sale liabilities* on the Condensed Consolidated Balance Sheets related to AES Brasil as of June 30, 2024.

As of **March 31, 2024** June 30, 2024, all available-for-sale debt securities had stated maturities within one year. There were no other-than-temporary impairments of marketable securities during the three and six months ended **March 31, 2024** June 30, 2024. The level 3 contingent consideration relates mainly to the acquisition of Bellefield in June 2023. Credit-related impairments are recognized in earnings under ASC 326. Gains and losses on the sale of investments are determined using the specific-identification method. The following table presents gross proceeds from the sale of available-for-sale securities during the periods indicated (in millions):

	Three Months Ended March 31,	
	2024	2023
Gross proceeds from sale of available-for-sale securities	\$ 119	\$ 369

Total losses for the period included in earnings attributable to the change in unrealized gains (losses) relating to assets and liabilities held at the end of the period	\$ —	\$ (1)	\$ (1)	\$ (8)	\$ (10)				

The following table summarizes the significant unobservable inputs used for Level 3 derivative assets (liabilities) as of March 31, 2024 June 30, 2024 (in millions, except range amounts):

Type of Derivative	Fair Value	Unobservable Input	Amount or Range (Average)
Interest rate	\$ (2)	Subsidiary credit spread	0.7% 0.8% to 3.0% (2.1% 3.1% (2.2%)
Foreign currency:			
Argentine peso	64.60	Argentine peso to U.S. dollar currency exchange rate after one year	1,339 1,187 to 1,657 (1,514) 1,592 (1,376)
Commodity:			
CAISO Energy Swap energy swap	(79) (75)	Forward energy prices per MWh after 2030	\$11.58 12.39 to \$121.53 (\$62.03) 62.15
Other	4		
Total	\$ (17) (13)		

For the Argentine peso foreign currency derivatives, increases in the estimate of the above exchange rate would increase the value of the derivative. For the CAISO Energy Swap, energy swap, increases in the estimate above would decrease the value of the derivative.

Contingent consideration is primarily related to future milestone payments associated with acquisitions of renewables development projects. The estimated fair value of contingent consideration is determined using probability-weighted discounted cash flows based on internal forecasts, which are considered Level 3 inputs. Changes in Level 3 inputs, particularly changes in the probability of achieving development milestones, could result in material changes to the fair value of the contingent consideration and could materially impact the amount of expense or income recorded each reporting period. Contingent consideration is updated quarterly with any prospective changes in fair value recorded through earnings.

#### Nonrecurring Measurements

The Company measures fair value using the applicable fair value measurement guidance. Impairment expense, shown as pre-tax loss below, is measured by comparing the fair value at the evaluation date to the then-latest available carrying amount and is included in *Asset impairment expense* on the Condensed Consolidated Statements of Operations. The following table summarizes our major categories of asset groups measured at fair value on a nonrecurring basis and their level within the fair value hierarchy (in millions):

Three Months Ended March 31, 2024	Measurement Date	Measurement Date	Carrying Amount <sup>(1)</sup>	Fair Value	Pre-tax Loss	Measurement Date	Carrying Amount <sup>(1)</sup>	Fair Value	Pre-tax Loss

Six Months Ended June 30, 2023									
Six Months Ended June 30, 2023									
Six Months Ended June 30, 2023			Level 1	Level 2	Level 3	Pre-tax Loss			
Long-lived asset groups held and used:									
Norgener <sup>(5)</sup>									
Norgener <sup>(5)</sup>									
Norgener <sup>(5)</sup>									
GAF Projects (AES Renewable Holdings)									
Held-for-sale businesses: <sup>(2)</sup>									
Held-for-sale businesses: <sup>(2)</sup>									

Held-for-sale businesses: (2)	
Jordan (3)	
Jordan (3)	
Jordan (3)	
Jordan (6)	

(1) Represents the carrying values of the asset groups at the dates of measurement, before fair value adjustment.

(2) See Note 18—*Held-for-Sale and Dispositions* for further information.

(3) The pre-tax loss recognized was calculated using the \$1,352 million fair value of the AES Brasil disposal group less costs to sell of \$13 million. For purposes of the impairment analysis, the Company used the carrying value of the disposal group as of April 30, 2024. A subsequent impairment analysis was performed as of June 30, 2024 and no additional impairment was identified.

(4) The pre-tax loss recognized was calculated using the \$389 million fair value of the Mong Duong disposal group less costs to sell of \$5 million.

(5) The Norgener asset group includes long-lived assets, inventory, land, and other working capital, however per ASC 360-10, the pre-tax impairment expense is limited to the carrying amount of the long-lived assets. See Note 16—*Asset Impairment Expense* for further information. The Company evaluated the carrying amount of the assets outside the scope of ASC 360-10 and determined that the carrying value of the other assets should not be reduced.

(6) The pre-tax loss recognized was calculated using the \$170 million fair value of the Jordan disposal group less costs to sell of \$5 million, and \$6 million for the March 31, 2023 and June 30, 2023 measurement dates, respectively.

The following table summarizes the significant unobservable inputs used in the Level 3 measurement of long-lived assets held and used measured on a nonrecurring basis during the six months ended June 30, 2023 (in millions, except range amounts):

Six Months Ended June 30, 2023	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
Long-lived asset groups held and used:				
Norgener (1)	\$ 24	Discounted cash flow	Annual revenue growth	(90)% to 994% (85%)
			Annual variable margin	(75)% to 276% (16%)
GAF Projects (AES Renewable Holdings)	11	Discounted cash flow	Annual revenue growth	(42)% to 44% (1%)
			Discount rate	9%
<b>Total</b>	<b>\$ 35</b>			

(1) The fair value of the Norgener asset group is mainly related to existing coal inventory not subject to impairment under ASC 360-10.

#### Financial Instruments Not Measured at Fair Value in the Condensed Consolidated Balance Sheets

The following table presents (in millions) the carrying amount, fair value, and fair value hierarchy of the Company's financial assets and liabilities that are not measured at fair value in the Condensed Consolidated Balance Sheets as of the periods indicated, but for which fair value is disclosed:

March 31, 2024						
Fair Value						
	Carrying Amount	Total	Level 1	Level 2	Level 3	
<b>15   Notes to Condensed Consolidated Financial Statements—(Continued)   June 30, 2024 and 2023</b>						
<b>Assets:</b> Accounts receivable — noncurrent (1)	\$ 91	\$ 148	\$ —	\$ —	\$ 148	
<b>Liabilities:</b> Non-recourse debt	23,924	23,695	—	22,165	1,530	
Recourse debt	5,295	4,995	June 30, 2024	—	4,995	—
Fair Value						
	Carrying Amount	Total	Level 1	Level 2	Level 3	
<b>Assets:</b> Accounts receivable — noncurrent (1)	\$ 96	\$ 157	\$ —	\$ —	\$ 157	
<b>Liabilities:</b> Non-recourse debt	22,004	22,294	—	20,241	2,053	
Recourse debt	6,146	5,896	—	5,896	—	—
December 31, 2023						
	Carrying Amount	Total	Level 1	Level 2	Level 3	
<b>Assets:</b> Accounts receivable — noncurrent (1)	\$ 193	\$ 239	\$ —	\$ —	\$ 239	
<b>Liabilities:</b> Non-recourse debt	22,144	22,174	—	20,676	1,498	
Recourse debt	4,464	4,210	—	4,210	—	—

(1) These amounts primarily relate to the sale of the Redondo Beach land, in the U.S. and the amounts impacted by the Stabilization Funds enacted by the Chilean government, and for December 31, 2023 only, the receivables under the Warrior Run PPA termination agreement. These are included in Other noncurrent assets in the accompanying Condensed Consolidated Balance Sheets. See Note 5—*Financing Receivables* for further information.

#### 4. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

For further information on the Company's derivative and hedge accounting policies, see Note 1—General and Summary of Significant Accounting Policies—Derivatives and Hedging Activities of Item 8.—Financial Statements and Supplementary Data in the 2023 Form 10-K.

13 | Notes to Condensed Consolidated Financial Statements—(Continued) | March 31, 2024 and 2023

**Volume of Activity** — The following tables present the Company's maximum notional (in millions) over the remaining contractual period by type of derivative as of **March 31, 2024** June 30, 2024, and the dates through which the maturities for each type of derivative range:

U.S.												
Chile												
Other												
Other												
Other												
Total												

**U.S.** — AES has recorded non-current receivables pertaining to the sale of the Redondo Beach land. The anticipated collection period extends beyond **March 31, 2025** **June 30, 2025**. As of December 31, 2023, a significant financing receivable existed for the Warrior Run PPA termination agreement where \$108 million was recorded in *Other non-current assets* on the Consolidated Balance Sheets. On February 1, 2024, the Company executed an agreement to sell all remaining future cash flows under the termination agreement. At the time of execution, the transaction was considered a sale of future revenue under U.S. GAAP. **As Upon completion of March 31, 2024, the remaining performance obligation in May 2024, the corresponding receivables met the held-for-sale criteria and were classified as Current held-for-sale assets on the Condensed Consolidated Balance Sheets** receivable balance of \$267 million, net of valuation allowance of \$7 million, was derecognized. See Note 14—Revenue and Note 18—Held-For-Sale and Dispositions for further details regarding the Warrior Run PPA termination agreement.

**Chile** — AES Andes has recorded receivables pertaining to revenues recognized on regulated energy contracts that were impacted by the Stabilization Funds created by the Chilean government in October 2019 and August 2022, in conjunction with the Tariff Stabilization Laws. Historically, the government updated the prices for

[17 | Notes to Condensed Consolidated Financial Statements—\(Continued\) | June 30, 2024 and 2023](#)

these contracts every six months to reflect the contracts' indexation to exchange rates and commodities prices. The Tariff Stabilization Laws do not allow the pass-through of these contractual indexation updates to customers beyond the pricing in effect at July 1, 2019, until new lower-cost renewables contracts are incorporated to supply regulated contracts. Consequently, costs incurred in excess of the July 1, 2019 price are accumulated and borne by generators. As of **March 31, 2024** **June 30, 2024**, AES Andes aims to reduce its exposure through the sale of receivables.

[15 | Notes to Condensed Consolidated Financial Statements—\(Continued\) | March 31, 2024 and 2023](#)

On August 14, 2023, AES Andes executed an agreement to sell up to \$227 million of receivables pursuant to the Stabilization Funds, of which **\$135 million** **\$149 million** was sold and collected as of **March 31, 2024** **June 30, 2024**. Through different agreements and programs, as of **March 31, 2024** **June 30, 2024**, **\$20 million** **\$11 million** of current receivables and **\$7 million** **\$8 million** of noncurrent receivables were recorded in *Accounts receivable* and *Other noncurrent assets*, respectively. Additionally, **\$29 million** **\$32 million** of payment deferrals granted to mining customers as part of our green blend agreements were recorded as financing receivables included in *Other noncurrent assets* at **March 31, 2024** **June 30, 2024**.

---

[18 | Notes to Condensed Consolidated Financial Statements—\(Continued\) | June 30, 2024 and 2023](#)

**Jordan** — In March 2024, the Company completed the sale of approximately 26% ownership interest in Amman East and IPP4 for a sale price of \$58 million. After adjusting for dividends received since the execution of the sale and purchase agreement, the Company received a net cash payment of \$45 million. After completion of the sale, the Company retained 10% ownership interest in each of the businesses, which are accounted for as equity method investments. See Note 18—*Held-for-Sale and Dispositions* for further information. Amman East and IPP4 are reported in the Energy Infrastructure SBU reportable segment.

**Uplight** — In February 2024, Uplight acquired AutoGrid, a market leader in the Virtual Power Plant ("VPP") space, from Schneider Electric. As part of the transaction, Schneider contributed an additional \$40 million to Uplight, and Uplight issued approximately 91 million additional common units to Schneider as consideration for the acquisition. No incremental investment was required from AES or any other investor. As a result, AES' 29.41% ownership interest in Uplight was diluted to 24.65%. The transaction was accounted for as a partial disposition in which AES recognized a gain of \$52 million in *Gain (loss) on disposal and sale of business interests*. As the Company still

---

[16 | Notes to Condensed Consolidated Financial Statements—\(Continued\) | March 31, 2024 and 2023](#)

does not control but has significant influence over Uplight after the transaction, it continues to be accounted for as an equity method investment and is reported in the New Energy Technologies SBU reportable segment.

**sPower** — In December 2022, the Company agreed to sell 49% of its indirect interest in a portfolio of sPower's operating assets ("OpCo B"). On February 28, 2023, sPower closed on the sale for \$196 million. As a result of the transaction, the Company received \$98 million in sales proceeds and recorded a pre-tax gain on sale of \$5 million, recorded in *Gain (loss) on disposal and sale of business interests*. After the sale, the Company's ownership interest in OpCo B decreased from 50% to approximately 26%. As the Company still does not control but has significant influence over sPower after the transaction, it continues to be accounted for as an equity method investment and is reported in the Renewables SBU reportable segment.

**Alto Maipo** — In May 2022, Alto Maipo emerged from bankruptcy in accordance with Chapter 11 of the U.S. Bankruptcy Code. Alto Maipo, as restructured, is considered a VIE. As the Company lacks the power to make significant decisions, it does not meet the criteria to be considered the primary beneficiary of Alto Maipo and therefore does not consolidate the entity. The Company has elected the fair value option to account for its investment in Alto Maipo as management believes this approach will better reflect the economics of its equity interest. As of [March 31, 2024](#) [June 30, 2024](#), the fair value is insignificant. Alto Maipo is reported in the Energy Infrastructure SBU reportable segment.

---

[19 | Notes to Condensed Consolidated Financial Statements—\(Continued\) | June 30, 2024 and 2023](#)

## 8. DEBT

### Recourse Debt

**Subordinated Notes due 2055** — In May 2024, the Company issued \$950 million aggregate principal of 7.60% fixed-to-fixed reset rate subordinated notes due in 2055. AES intends to allocate the net proceeds from this offering to one or more eligible green projects, which may include the development or redevelopment of such projects. Pending such

allocation, AES intends to use the net proceeds from the offering for general corporate purposes.

**Senior Notes due 2028** — In May 2023, the Company issued \$900 million aggregate principal of 5.45% senior notes due in 2028. The Company used the proceeds from this issuance for general corporate purposes and to fund investments in the Company's Renewables and Utilities SBUs.

**AES Clean Energy Development** — In March 2023, AES Clean Energy Development Holdings, LLC executed a \$500 million bridge loan due in December 2023 and used the proceeds for general corporate purposes. The obligations under the bridge loan were unsecured and fully guaranteed by the Parent Company. The bridge loan was repaid in December 2023.

**Commercial Paper Program** — In March 2023, the Company established a commercial paper program under which the Company may issue unsecured commercial paper notes (the "Notes") up to a maximum aggregate face amount of \$750 million outstanding at any time. The maturities of the Notes may vary but will not exceed 397 days from the date of issuance. The proceeds of the Notes will be used for general corporate purposes. The Notes will be sold on customary terms in the U.S. commercial paper market on a private placement basis. The commercial paper program is backed by the Company's \$1.5 billion revolving credit facility, and the Company cannot issue commercial paper in an aggregate amount exceeding the then available capacity under its revolving credit facilities. For the **three six** months ended **March 31, 2024** **June 30, 2024**, the Company borrowed approximately **\$10.1 billion** **\$25.4 billion** and repaid approximately **\$9.3 billion** **\$24.7 billion** under the commercial paper program, with average daily outstanding borrowings of **\$486 million** **\$595 million**. As of **March 31, 2024** **June 30, 2024**, the Company had **\$110 million** **\$50 million** outstanding drawings under its revolving credit facility, and **\$719 million** **\$690 million** outstanding borrowings under the commercial paper program with a weighted average interest rate of **5.97%** **5.94%**. The Notes are classified as **noncurrent** **current**.

#### Non-Recourse Debt

During the **three six** months ended **March 31, 2024** **June 30, 2024**, the Company's following subsidiaries had significant debt issuances (in millions):

Subsidiary	Issuances
AES Andes	\$ 1,060 <sup>(1)</sup>
AES Indiana <sup>(2)</sup>	\$ 1,050
AES Andes Clean Energy	500 996

<sup>(1)</sup> These amounts do not include revolving credit facility activity at the Company's subsidiaries.

<sup>(2)</sup> Issuances relate to both AES Indiana and its parent company, IPALCO.

17 20 | Notes to Condensed Consolidated Financial Statements—(Continued) | **March 31, 2024** **June 30, 2024** and 2023

**AES Andes** — In March 2024, AES Andes issued \$500 million aggregate principal of 6.30% senior unsecured notes due in 2029. The net proceeds from the issuance were used to purchase via tender offer \$100 million and \$43 million aggregate principal of its 6.35% and 5.00% notes due in 2079 and 2025, respectively, and repay other existing indebtedness.

In June 2024, AES Andes issued \$530 million in Junior Subordinated Notes at 8.15%, due in 2055. The proceeds were used to repay its 7.125% notes due in 2079. As a result of the transaction, the Company recognized a loss on extinguishment of debt of \$8 million.

**AES Puerto Rico** — On June 1, 2023, AES Puerto Rico was unable to pay principal and interest obligations on its Series A Bond Loans due to insufficient funds resulting from financial difficulties at the business. AES Puerto Rico signed forbearance and standstill agreements with its noteholders in July 2023 because of the insufficiency of funds to meet these obligations. On March 5, 2024, AES Puerto Rico and its noteholders executed a financial restructuring, under which the \$156 million (including interest) of 6.625% Series A Bond Loans due 2026 was exchanged for \$112 million of 6.625% senior secured bonds due January 2028 and \$44 million of preferred shares in AES Puerto Rico. The preferred shares bear interest at 3.125% and contains an option whereby AES may call the preferred shares to be converted into 99.9% of the ordinary shares of AES Puerto Rico between December 30, 2025 and December 30, 2027, or would have the option to settle the preferred shares in cash. The noteholders also provided a \$23 million bridge loan due March 2026 bearing interest at prime plus 4%. AES Puerto Rico is required to make mandatory prepayments through cash sweeps based on excess cash (as defined in the loan agreements) available from operations on the bridge loan, senior secured bonds, and preferred shares interest. The financial restructuring was accounted for as a troubled debt restructuring in accordance with ASC 470-60, "Troubled Debt Restructurings by Debtors" as AES Puerto Rico was experiencing financial difficulties and the lenders granted a concession. No gain was recognized for the **three six** months ended **March 31, 2024** **June 30, 2024** as a result of this transaction. As of **March 31, 2024** **June 30, 2024**, cash settlement of the preferred shares is contingent, as the amounts would not be required to be settled in cash if the option to settle the preferred shares with common shares is exercised.

**AES Indiana** — In March 2024, AES Indiana issued \$650 million aggregate principal of 5.70% First Mortgage Bonds due April 2054. The net proceeds from this issuance were used to repay existing indebtedness, including its unsecured \$300 million term loan due in November 2024 and amounts outstanding under its \$350 million revolving credit agreement maturing in December 2027, and for general corporate purposes.

In March 2024, IPALCO issued \$400 million aggregate principal of 5.75% senior secured notes due April 2034. In April 2024, the net proceeds from this issuance, together with cash on hand, were used to redeem the outstanding \$405 million in 3.70% senior secured notes due in September 2024.

**AES Andes** — In March 2024, AES Andes issued \$500 million aggregate principal of 6.30% senior unsecured notes due in 2029. The net proceeds from the issuance were used to purchase via tender offer \$100 million and \$43 million aggregate principal of its senior unsecured notes due in 2079 and 2025, respectively, and repay other existing indebtedness.

*Netherlands and Colon* — In January 2023, AES Hispanola Holdings BV, a Netherlands-based company, and Colon, as co-borrowers, executed a \$350 million credit agreement at 8.85%, due in 2028. The Company allocated \$300 million and \$50 million of the proceeds from the agreement to AES Hispanola Holdings BV and Colon, respectively. The net proceeds from the agreement were used to repay existing indebtedness. As a result of the transaction, the Company recognized a loss on extinguishment of debt of \$1 million.

*AES Clean Energy* — In December 2023, Bellefield Portfolio Seller, LLC and Bellefield 1 Finco, LLC, subsidiaries of AES Clean Energy Development, executed a construction, tax equity bridge, and letter of credit financing agreement for commitments of up to \$2.4 billion due in 2026. As of June 30, 2024, there was \$1.3 billion in outstanding borrowings under the facilities, and the net proceeds were used primarily to repay existing indebtedness and to fund development of renewables projects.

In December 2022, AES Clean Energy Development, AES Renewable Holdings, and sPower, an equity method investment, collectively referred to as the Issuers, entered into a Master Indenture agreement whereby long-term notes will be issued from time to time to finance or refinance operating wind, solar, and energy storage projects that are owned by the Issuers. On December 13, 2022, the Issuers entered into the Note Purchase Agreement for the issuance of up to \$647 million of 6.55% Senior Notes due in 2047. The notes were sold on December 14, 2022, at par for \$647 million. In 2023, The Issuers have executed amendments to the Issuers sold Note Purchase Agreement, which have resulted in an additional \$246 million in 6.37% notes, resulting in aggregate principal amount of notes issued of \$884 million. \$1.4 billion as of June 30, 2024, including \$491 million of 6.81% notes issued in 2024. Each of the Issuers is considered a "Co-Issuer" and will be jointly and severally liable with each other Co-Issuer for all obligations under the facility. As of March 31, 2024, the aggregate carrying amount a result of the notes attributable to issued in 2024, AES Clean Energy Development and AES Renewable Holdings was \$252 million recorded, in aggregate, an increase in liabilities of \$302 million, resulting in an aggregate carrying amount of notes of \$554 million as of June 30, 2024.

In 2021, AES Clean Energy Development, AES Renewable Holdings, and sPower, collectively referred to as the Borrowers, executed two Credit Agreements with aggregate commitments of \$1.2 billion and maturity dates in December 2024 and September 2025. The Borrowers executed amendments to the revolving credit facilities, which

---

21 | Notes to Condensed Consolidated Financial Statements—(Continued) | June 30, 2024 and 2023

resulted in an aggregate increase in the commitments of \$2.6 billion, bringing the total commitments under the new agreements to \$3.8 billion. Under a 2023 amendment, 2024 amendments, the maturity date of one of the Credit Agreements was extended from December 2024 to May 2026, 2027 and June 2028. Each of the Borrowers is considered a "Co-Borrower" and will be jointly and severally liable with each other Co-Borrower for all obligations under the facilities. As a result of increases in commitments used, AES Clean Energy Development and AES Renewable Holdings recorded, in aggregate, an increase in liabilities of \$547 million \$1.2 billion in 2024, resulting in total commitments used under the revolving credit facilities, as of March 31, 2024 June 30, 2024, of \$2.8 billion \$3.5 billion. As of March 31, 2024 June 30, 2024, the aggregate commitments used under the revolving credit facilities for the Co-Borrowers was \$3.4 billion \$3.7 billion.

---

18 | Notes to Condensed Consolidated Financial Statements—(Continued) | March 31, 2024 and 2023

*Non-Recourse Debt Covenants, Restrictions, and Defaults* — The terms of the Company's non-recourse debt include certain financial and nonfinancial covenants. These covenants are limited to subsidiary activity and vary among the subsidiaries. These covenants may include, but are not limited to, maintenance of certain reserves and financial ratios, minimum levels of working capital, and limitations on incurring additional indebtedness.

As of March 31, 2024 June 30, 2024 and December 31, 2023, approximately \$363 million \$182 million and \$341 million, respectively, of restricted cash was maintained in accordance with certain covenants of the non-recourse debt agreements. These amounts were included within *Restricted cash and Debt service reserves and other deposits* in the accompanying Condensed Consolidated Balance Sheets. As of March 31, 2024 June 30, 2024 and December 31, 2023, approximately \$118 million and \$90 million, respectively, of the restricted cash balances were for collateral held to cover potential liability for current and future insurance claims being assumed by AGIC, AES' captive insurance company.

Various lender and governmental provisions restrict the ability of certain of the Company's subsidiaries to transfer their net assets to the Parent Company. Such restricted net assets of subsidiaries amounted to approximately \$1.1 billion at March 31, 2024 June 30, 2024.

The following table summarizes the Company's subsidiary non-recourse debt in default (in millions) as of March 31, 2024 June 30, 2024. Due to the defaults, these amounts are included in the current portion of non-recourse debt unless otherwise indicated:

Subsidiary	Subsidiary	Primary Nature of Default	Debt in Default	Net Assets	Subsidiary	Primary Nature of Default	Debt in Default	Net Assets
AES Mexico Generation Holdings (TEG and TEP)								
AES Ilumina (Puerto Rico)								
AES Jordan Solar								
Lafayette Solar (AES Clean Energy Development) (1)								
Mount Olive Solar (AES Clean Energy Development) (1)								
Total								

(1) Debt in default at AES Clean Energy Development project entities is less than \$1 million individually and in aggregate.

None of the defaults are payment defaults, but are instead technical defaults triggered by failure to comply with covenants or other requirements contained in the non-recourse debt documents of the applicable subsidiary.

The AES Corporation's recourse debt agreements include cross-default clauses that will trigger if a subsidiary provides 20% or more of the Parent Company's total cash distributions from businesses for the four most recently completed fiscal quarters and has an outstanding principal in excess of \$200 million in default. As of **March 31, 2024** **June 30, 2024**, the Company's subsidiaries had no defaults which resulted in a cross-default under the recourse debt of the Parent Company. In the event the Parent Company is not in compliance with the financial covenants of its revolving credit facility, restricted payments will be limited to regular quarterly shareholder dividends at the then-prevailing rate. Payment defaults and bankruptcy defaults would preclude the making of any restricted payments.

## 9. COMMITMENTS AND CONTINGENCIES

**Parent Guarantees, Letters of Credit, and Commitments** — In connection with certain project financings (including tax equity transactions), acquisitions and dispositions, power purchases, EPC contracts, and other agreements, the Parent Company has expressly undertaken limited obligations and commitments, most of which will only be effective or will be terminated upon the occurrence of future events. In the normal course of business, the Parent Company has entered into various agreements, mainly guarantees and letters of credit, to provide financial or performance assurance to third parties on behalf of AES businesses. These agreements are entered into primarily to support or enhance the creditworthiness otherwise achieved by a business on a stand-alone basis, thereby facilitating the availability of sufficient credit to accomplish their intended business purposes. Most of the contingent obligations relate to future performance commitments which the Company or its businesses expect to

22 | Notes to Condensed Consolidated Financial Statements—(Continued) | June 30, 2024 and 2023

fulfill within the normal course of business. The expiration dates of these guarantees vary from less than 1 year to no more than **33** **32** years.

The following table summarizes the Parent Company's contingent contractual obligations as of **March 31, 2024** **June 30, 2024**. Amounts presented in the following table represent the Parent Company's current undiscounted exposure to guaranteees and the range of maximum undiscounted potential exposure. The maximum exposure is not reduced by the amounts, if any, that could be recovered under the recourse or collateralization provisions in the guarantees.

19 | Notes to Condensed Consolidated Financial Statements—(Continued) | March 31, 2024 and 2023

Contingent Contractual Obligations	Contingent Contractual Obligations	Maximum Exposure (in millions)	Number of Agreements	Maximum Exposure Range for Each Agreement (in millions)	Contingent Contractual Obligations	Maximum Exposure (in millions)	Number of Agreements	Maximum Exposure Range for Each Agreement (in millions)	
Guarantees and commitments	Guarantees and commitments	\$ 3,566	84	<\$1 — 970	<\$1 — 970	Guarantees and commitments	\$3,271	84	<\$1 — 970
Letters of credit under the unsecured credit facilities		224	34	<\$1 — 70					
Letters of credit under bilateral agreements	Letters of credit under bilateral agreements	234	4	\$54 — 64	\$54 — 64	Letters of credit under bilateral agreements	220	4	\$52 — 58

Surety bonds	Surety bonds	2	2	<\$1 — 1	<\$1 — 1	Surety bonds	2	2	<\$1 — 1
Total									
Total									
Total									

During the **three** **six** months ended **March 31, 2024** **June 30, 2024**, the Company paid letter of credit fees ranging from 1% to 3% per annum on the outstanding amounts of letters of credit.

**Subsidiary Guarantees and Letters of Credit** — In connection with certain project financings (including tax equity transactions), acquisitions and dispositions, power purchases, EPC contracts, and other agreements, certain of the Company's subsidiaries have expressly undertaken limited obligations and commitments, most of which will only be effective or will be terminated upon the occurrence of future events, or are customary payment guarantees for amounts due under existing contracts in the normal course of business. These contingent contractual obligations are issued at the subsidiary level and are non-recourse to the Parent Company. As of **March 31, 2024** **June 30, 2024**, the maximum undiscounted potential exposure to guaranteees issued by our subsidiaries was **\$2.6 billion** **\$1.5 billion**, including **\$1.6 billion** **\$866 million** of customary payment guarantees under EPC contracts and other agreements, and **\$995 million** **\$647 million** of tax equity financing related guarantees. In addition, as of **March 31, 2024** **June 30, 2024**, our subsidiaries had **\$643 million** **\$1.9 billion** of letters of credit outstanding.

### Contingencies

**Environmental** — The Company periodically reviews its obligations as they relate to compliance with environmental laws, including site restoration and remediation. For the periods ended **March 31, 2024** **June 30, 2024** and December 31, 2023, the Company recognized liabilities of **\$8 million** **\$4 million** and **\$9 million** for projected environmental remediation costs, respectively. Due to the uncertainties associated with environmental assessment and remediation activities, future costs of compliance or remediation could be higher or lower than the amount currently accrued. Moreover, where no liability has been recognized, it is reasonably possible that the Company may be required to incur remediation costs or make expenditures in amounts that could be material but could not be estimated as of **March 31, 2024** **June 30, 2024**. In aggregate, the Company estimates the range of potential losses related to environmental matters, where estimable, to be immaterial. The amounts considered reasonably possible do not include amounts accrued as discussed above.

**Litigation** — The Company is involved in certain claims, suits and legal proceedings in the normal course of business. The Company accrues for litigation and claims when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. The Company has recognized aggregate liabilities for all claims of approximately **\$16 million** **\$5 million** and **\$17 million** as of **March 31, 2024** **June 30, 2024** and December 31, 2023, respectively. These amounts are reported on the Condensed Consolidated Balance Sheets within *Accrued and other liabilities* and *Other noncurrent liabilities*. A significant portion of these accrued liabilities relate to regulatory matters and commercial disputes in international jurisdictions. There can be no assurance that these accrued liabilities will be adequate to cover all existing and future claims or that we will have the liquidity to pay such claims as they arise.

Where no accrued liability has been recognized, it is reasonably possible that some matters could be decided unfavorably to the Company and could require the Company to pay damages or make expenditures in amounts that could be material but could not be estimated as of **March 31, 2024** **June 30, 2024**. The material contingencies where a loss is reasonably possible primarily include disputes with offtakers, suppliers and EPC contractors; alleged breaches of contract; alleged violation of laws and regulations; income tax and non-income tax matters with tax authorities; and regulatory matters. In aggregate, the Company estimates the range of potential losses, where estimable, related to these reasonably possible material contingencies to be between **\$55 million** **\$52 million** and **\$91 million** **\$87 million**. The amounts considered reasonably possible do not include the amounts accrued, as discussed above. These material

23 | Notes to Condensed Consolidated Financial Statements—(Continued) | June 30, 2024 and 2023

contingencies do not include income tax-related contingencies which are considered part of our uncertain tax positions.

20 | Notes to Condensed Consolidated Financial Statements—(Continued) | March 31, 2024 and 2023

## 10. LEASES

**LESSOR** — The Company has operating leases for certain generation contracts that contain provisions to provide capacity to a customer, which is a stand-ready obligation to deliver energy when required by the customer. Capacity obligations are generally considered lease elements as they cover the majority of available output from a facility. The allocation of contract payments between the lease and non-lease elements is made at the inception of the lease. Lease receipts from such contracts are recognized as lease revenue on a straight-line basis over the lease term, whereas variable lease receipts are recognized when earned.

The following table presents lease revenue from operating leases in which the Company is the lessor, recognized in *Revenue* on the Condensed Consolidated Statements of Operations for the periods indicated (in millions):

Operating Lease Revenue	Three Months Ended March 31,	
	2024	2023
Total lease revenue	\$ 115	\$ 121
Less: Variable lease revenue	(13)	(8)
Total Non-variable lease revenue	\$ 102	\$ 113

Operating Lease Revenue	Three Months Ended June 30,		Six Months Ended June 30,	
	2024	2023	2024	2023
Non-variable lease revenue	\$ 135	\$ 112	\$ 237	\$ 225
Variable lease revenue	18	24	31	32
Total lease revenue	\$ 153	\$ 136	\$ 268	\$ 257

The following table presents the underlying gross assets and accumulated depreciation of operating leases included in *Property, plant and equipment* on the Condensed Consolidated Balance Sheets as of the periods indicated (in millions):

Property, Plant and Equipment, Net	Property, Plant and Equipment, Net	March 31, 2024	December 31, 2023	Property, Plant and Equipment, Net	June 30, 2024	December 31, 2023
Gross assets						

Less: Accumulated depreciation

Net assets

The option to extend or terminate a lease is based on customary early termination provisions in the contract, such as payment defaults, bankruptcy, and lack of performance on energy delivery. The Company has not recognized any early terminations as of **March 31, 2024** **June 30, 2024**. Certain leases may provide for variable lease payments based on usage or index-based (e.g., the U.S. Consumer Price Index) adjustments to lease payments.

The following table shows the future lease receipts as of **March 31, 2024** **June 30, 2024** for the remainder of 2024 through 2028 and thereafter (in millions):

	Future Cash Receipts for				
	Sales-Type Leases	Sales-Type Leases	Operating Leases	Sales-Type Leases	Operating Leases
2024					
2025					
2026					
2027					
2028					
Thereafter					
Total					
Less: Imputed interest					
Present value of total lease receipts					
Present value of total lease receipts					
Present value of total lease receipts					

**Battery Storage Lease Arrangements** — The Company constructs and operates projects consisting only of a stand-alone BESS facility, as well as projects that pair a BESS with solar energy systems. These projects allow more flexibility on when to provide energy to the grid. The Company will enter into PPAs for the full output of the facility that allow customers the ability to determine when to charge and discharge the BESS. These arrangements include both lease and non-lease elements under ASC 842, with the BESS component typically constituting a sales-type lease. The Company recognized lease revenue on sales-type leases through interest income of \$4 million and \$8 million for both the three and six months ended **March 31, 2024** **June 30, 2024** and **March 31, 2023**, \$3 million and \$7 million for the three and six months ended June 30, 2023, respectively.

The Company recorded a gain net losses at commencement of sales-type leases of \$5 million \$72 million and \$67 million for the three and six months ended **March 31, 2024** **June 30, 2024**, respectively. No gains or losses were recorded for the three and six months ended **March 31, 2023** **June 30, 2023**. This amount is Gains and losses at commencement of sales-type leases are recognized in *Other income* and *Other expense*, respectively, in the Condensed Consolidated Statement of Operations. See Note 15—*Other Income and Expense* for further information.

21 24 | Notes to Condensed Consolidated Financial Statements—(Continued) | **March 31, 2024** **June 30, 2024** and 2023

## 11. REDEEMABLE STOCK OF SUBSIDIARIES

Equity securities with redemption features that are not solely within the control of the issuer are classified as temporary equity and recorded in *Redeemable stock of subsidiaries* on the Condensed Consolidated Balance Sheets. Generally, these instruments are initially measured at fair value and are subsequently adjusted for income and dividends allocated to the noncontrolling interest. Subsequent measurement and classification may vary depending on whether the instrument is probable of becoming redeemable. For those securities that are currently redeemable or where it is probable that the instrument will become redeemable, any changes from the carrying value to redemption value are recognized in temporary equity against *Additional paid-in capital*. When the instrument is not probable of becoming redeemable, no adjustment to the carrying value is recognized.

The following table summarizes the Company's redeemable stock of subsidiaries balances as of the periods indicated (in millions):

	March 31, 2024	December 31, 2023
	June 30, 2024	December 31, 2023
IPALCO common stock		
AES Clean Energy tax equity partnerships		
Potengi common and preferred stock		
AES Clean Energy Development common stock		
AES Clean Energy tax equity partnerships		
Potengi common and preferred stock		
Potengi common and preferred stock		
Potengi common and preferred stock		
AES Clean Energy Development common stock		
AES Clean Energy Development common stock		

Total redeemable stock of subsidiaries
Total redeemable stock of subsidiaries
Total redeemable stock of subsidiaries

**AES Clean Energy Development** — As part of the formation of AES Clean Energy Development in February 2021, the noncontrolling interest partner received certain partnership rights that would enable them to exit in the future. As a result, the noncontrolling ownership interest was considered temporary equity. In May 2024, these redemption features expired without being exercised and the noncontrolling ownership interest was reclassified from *Redeemable stock of subsidiaries* to *Noncontrolling interests* on the Condensed Consolidated Balance Sheets. AES Clean Energy Development is reported in the Renewables SBU reportable segment.

**AES Clean Energy Tax Equity Partnerships** — The majority of solar projects in the U.S. have been financed with tax equity structures, in which tax equity investors receive a portion of the economic attributes of the facilities, including tax attributes, that vary over the life of the projects. In some cases, these agreements contain certain partnership rights, though not currently in effect, that may enable the tax equity investor to exit in the future. As a result, the noncontrolling ownership interest is considered temporary equity. During the six months ended June 30, 2024, AES Clean Energy, through multiple transactions, sold noncontrolling interests in project companies to tax equity investors, resulting in increases to *Redeemable stock of subsidiaries* of \$100 million.

During the second quarter of 2024, the Chevelon Butte Phase II and Kuihelani renewables projects reached commercial operations. The redemption features of these partnerships expired upon the projects being placed in service. As a result, the noncontrolling interest was reclassified from *Redeemable stock of subsidiaries* to *Noncontrolling interests* on the Condensed Consolidated Balance Sheets. AES Clean Energy is reported in the Renewables SBU reportable segment.

**IPALCO** — In May 2024, CDPQ made equity capital contributions of \$45 million to IPALCO as part of a capital call primarily for funding needs related to AES Indiana's capital expenditure program. The Company and CDPQ made capital contributions on a proportional share basis, therefore the contributions did not change the Company's ownership interest in IPALCO. IPALCO is reported in the Utilities SBU reportable segment.

## 12. EQUITY

### Equity Units

In March 2021, the Company issued 10,430,500 Equity Units with a total notional value of \$1,043 million. Each Equity Unit had a stated amount of \$100 and was initially issued as a Corporate Unit, consisting of a forward stock purchase contract ("2024 Purchase Contracts") and a 10% undivided beneficial ownership interest in one share of 0% Series A Cumulative Perpetual Convertible Preferred Stock, issued without par and with a liquidation preference of \$1,000 per share ("Series A Preferred Stock").

The Company concluded that the Equity Units should be accounted for as one unit of account based on the economic linkage between the 2024 Purchase Contracts and the Series A Preferred Stock, as well as the Company's assessment of the applicable accounting guidance relating to combining freestanding instruments. The Equity Units represent mandatorily convertible preferred stock. Accordingly, the shares associated with the combined instrument were reflected in diluted earnings per share using the if-converted method.

---

25 | Notes to Condensed Consolidated Financial Statements—(Continued) | June 30, 2024 and 2023

In conjunction with the issuance of the Equity Units, the Company received approximately **\$1 billion** in proceeds, net of underwriting costs and commissions, before offering expenses. The proceeds for the issuance of 1,043,050 shares were attributed to the Series A Preferred Stock for \$838 million and \$205 million for the present value of the quarterly payments due to holders of the 2024 Purchase Contracts ("Contract Adjustment Payments"). The proceeds were used for the development of the AES renewables businesses, U.S. utility businesses, LNG infrastructure, and for other developments determined by management.

The Series A Preferred Stock did not bear any dividends and the liquidation preference of the convertible preferred stock did not accrete. The Series A Preferred Stock had no maturity date and would remain outstanding unless converted by holders or redeemed by the Company. Holders of the preferred shares had limited voting rights. The Series A Preferred Stock was pledged as collateral to support holders' purchase obligations under the 2024 Purchase Contracts, which obligated the holders to purchase, on February 15, 2024, for a price of \$100 in cash, a maximum number of 57,467,883 shares of the Company's common stock (subject to customary anti-dilution adjustments). The initial settlement rate determining the number of shares that each holder must purchase could not exceed the maximum settlement rate and was determined over a market value averaging period preceding February 15, 2024. The initial maximum settlement rate of 3.864 was calculated using an initial reference price of \$25.88, equal to the last reported sale price of the Company's common stock on March 4, 2021. On February 15, 2024, the Series A Preferred Stock was tendered to satisfy the 2024 Purchase Contract's settlement price and the Corporate Units were converted into shares of the Company's common stock at the maximum settlement rate of 3.8859, equivalent to a reference price of \$25.73. The Series A Preferred Stock was canceled and 40,531,845 shares of AES common stock were issued upon conversion.

---

22 | Notes to Condensed Consolidated Financial Statements—(Continued) | March 31, 2024 and 2023

The Company paid Contract Adjustment Payments to the holders of the 2024 Purchase Contracts at a rate of 6.875% per annum, payable quarterly in arrears on February 15, May 15, August 15, and November 15, commencing on May 15, 2021. The \$205 million present value of the Contract Adjustment Payments at inception reduced the Series A Preferred Stock. As each quarterly Contract Adjustment Payment was made, the related liability was reduced and the difference between the cash payment and the present value accreted to interest expense, approximately \$5 million over the three-year term. The final Contract Adjustment Payments were made on February 15, 2024.

### Equity Transactions with Noncontrolling Interests

**U.S. Renewable Energy Tax Equity Partnerships** — The majority of solar projects in the U.S. have been financed with tax equity structures, in which tax equity investors receive a portion of the economic attributes of the facilities, including tax attributes, that vary over the life of the projects.

During the second quarters of 2024 and 2023, AES Clean Energy Development, through multiple transactions, sold noncontrolling interests in project companies to tax equity investors, resulting in increases to NCI of \$112 million and \$208 million, respectively. AES Clean Energy Development is reported in the Renewables SBU reportable segment.

In May 2024, the Hardy Hills solar project reached commercial operations and AES Indiana received an additional \$47 million from the tax equity investor, resulting in an increase to NCI. AES Indiana is reported in the Utilities SBU reportable segment.

**AES Puerto Rico Solar** — In May 2024, AES CFE Holding II entered into an agreement for the sale of a 30% ownership interest in the Marahu project for \$35 million, resulting in an increase to NCI. As the Company maintained control after this transaction, AES Puerto Rico Solar continues to be consolidated by the Company within the Renewables SBU reportable segment.

**Chile Renovables** — Under its renewables partnership agreement with Global Infrastructure Management, LLC ("GIP"), AES Andes will contribute a specified pipeline of renewables development projects to Chile Renovables as the projects reach commercial operations, and GIP may make additional contributions to maintain its 49% ownership interest. In February 2024, AES Andes completed the sale of Mesamávida to Chile Renovables for \$40 million, resulting in an increase to NCI of \$53 million and a decrease to additional paid-in capital of \$13 million. As the Company maintained control after this transaction, Chile Renovables continues to be consolidated by the Company within the Energy Infrastructure SBU reportable segment.

## 13. SEGMENTS

The segment reporting structure uses the Company's management reporting structure as its foundation to reflect how the Company manages the businesses internally. The management reporting structure is composed of four SBUs, mainly organized by technology, led by our President and Chief Executive Officer. Using the accounting guidance on segment reporting, the Company determined that its four operating segments are aligned with its four reportable segments corresponding to its SBUs.

- **Renewables** — Solar, wind, energy storage, and hydro generation facilities;
- **Utilities** — AES Indiana, AES Ohio, and AES El Salvador regulated utilities and their generation facilities;
- **Energy Infrastructure** — Natural gas, LNG, coal, pet coke, diesel, and oil generation facilities, and our businesses in Chile, which have a mix of generation sources, including renewables, that are pooled to service our existing PPAs; and
- **New Energy Technologies** — Green hydrogen initiatives and investments in Fluence, Uplight, 5B, and other new and innovative energy technology businesses.

Our Renewables, Utilities, and Energy Infrastructure SBUs participate in our generation business line, in which we own and/or operate power plants to generate and sell power to customers, such as utilities, industrial users, and other intermediaries. Our Utilities SBU participates in our utilities business line, in which we own and/or operate utilities to generate or purchase, distribute, transmit, and sell electricity to end-user customers in the residential, commercial, industrial, and governmental sectors within a defined service

area. In certain circumstances, our utilities also generate and sell electricity on the wholesale market. Our New Energy Technologies SBU includes investments in new and innovative technologies to support leading-edge greener energy solutions.

Included in "Corporate and Other" are the results of the AES self-insurance company, corporate overhead costs which are not directly associated with the operations of our four reportable segments, and certain intercompany charges such as self-insurance premiums which are fully eliminated in consolidation.

The Company uses Adjusted EBITDA as its primary segment performance measure. Adjusted EBITDA, a non-GAAP measure, is defined by the Company as earnings before interest income and expense, taxes, depreciation and amortization, adjusted for the impact of NCI and interest, taxes, depreciation and amortization of our equity affiliates, and adding back interest income recognized under service concession arrangements; excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits, and costs associated with dispositions and acquisitions of business interests, including early plant closures, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; and (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring.

The Company has concluded Adjusted EBITDA better reflects the underlying business performance of the Company and is the most relevant measure considered in the Company's internal evaluation of the financial performance of its segments. Additionally, given its large number of businesses and overall complexity, the Company concluded that Adjusted EBITDA is a more transparent measure that better assists investors in determining which businesses have the greatest impact on the Company's results.

Revenue and Adjusted EBITDA are presented before inter-segment eliminations, which includes the effect of intercompany transactions with other segments except for charges for certain management fees and the write-off of intercompany balances, as applicable. All intra-segment activity has been eliminated within the segment. Inter-segment activity has been eliminated within the total consolidated results.

(1) Other non-regulated revenue primarily includes lease and derivative revenue not accounted for under ASC 606.

**Contract Balances** — The timing of revenue recognition, billings, and cash collections results in accounts receivable and contract liabilities. The contract liabilities from contracts with customers were \$335 million \$184 million and \$328 million as of March 31, 2024 June 30, 2024 and December 31, 2023, respectively.

During the three six months ended March 31, 2024 June 30, 2024 and 2023, we recognized revenue of \$46 million \$70 million and \$7 million \$13 million, respectively, that was included in the corresponding contract liability balance at the beginning of the periods.

30 | Notes to Condensed Consolidated Financial Statements—(Continued) | June 30, 2024 and 2023

In June 2023, the Company closed on an agreement to terminate the PPA for the Warrior Run coal-fired power plant for total consideration of \$357 million, to be paid by the offtaker through the end of the previous contract term in January 2030. Under the termination agreement, the plant will continue continued providing capacity through May 2024. The termination represents represented a contract modification under which the discounted termination payments, as well as a pre-existing contract liability, will be were recognized as revenue on a straight-line basis over the remaining performance obligation period for approximately \$32 million per month. On February 1, 2024, the Company executed a receivable sale agreement to transfer all of its rights, title, and interest in the remaining future cash flows under this agreement. At the time of execution, the transaction was considered a sale of future revenue under U.S. GAAP, and as such, the net proceeds of \$273 million were recorded as debt. As Upon completion of March 31, 2024, \$267 million remains outstanding and is recorded the remaining performance obligation in the current portion of Non-recourse debt on the Condensed Consolidated Balance Sheets. As of March 31, 2024, May 2024, the corresponding receivables met the held-for-sale criteria and the receivable balance of \$214 million \$267 million, net of valuation allowance of \$6 million \$7 million, was classified as Current held-for-sale assets on the Condensed Consolidated Balance Sheets. See Note 18—Held-For-Sale and Dispositions for further information. remaining debt balance of \$260 million were derecognized.

A significant financing arrangement exists for our Mong Duong plant in Vietnam. The plant was constructed under a build, operate, and transfer contract and will be transferred to the Vietnamese government after the completion of a 25-year PPA. The performance obligation to construct the facility was substantially completed in 2015. Contract consideration related to the construction, but not yet collected through the 25-year PPA, was reflected on the Condensed Consolidated Balance Sheet. As of March 31, 2024 June 30, 2024 and December 31, 2023, Mong Duong met the held-for-sale criteria and the loan receivable balance of \$1 billion and \$1.1 billion, net of CECL reserves of \$25 million and \$26 million, respectively, was classified as held-for-sale assets. Of the loan receivable balance, \$111 million \$114 million and \$108 million, respectively, was classified as Current held-for-sale assets, and \$934 million

26 | Notes to Condensed Consolidated Financial Statements—(Continued) | March 31, 2024 and 2023

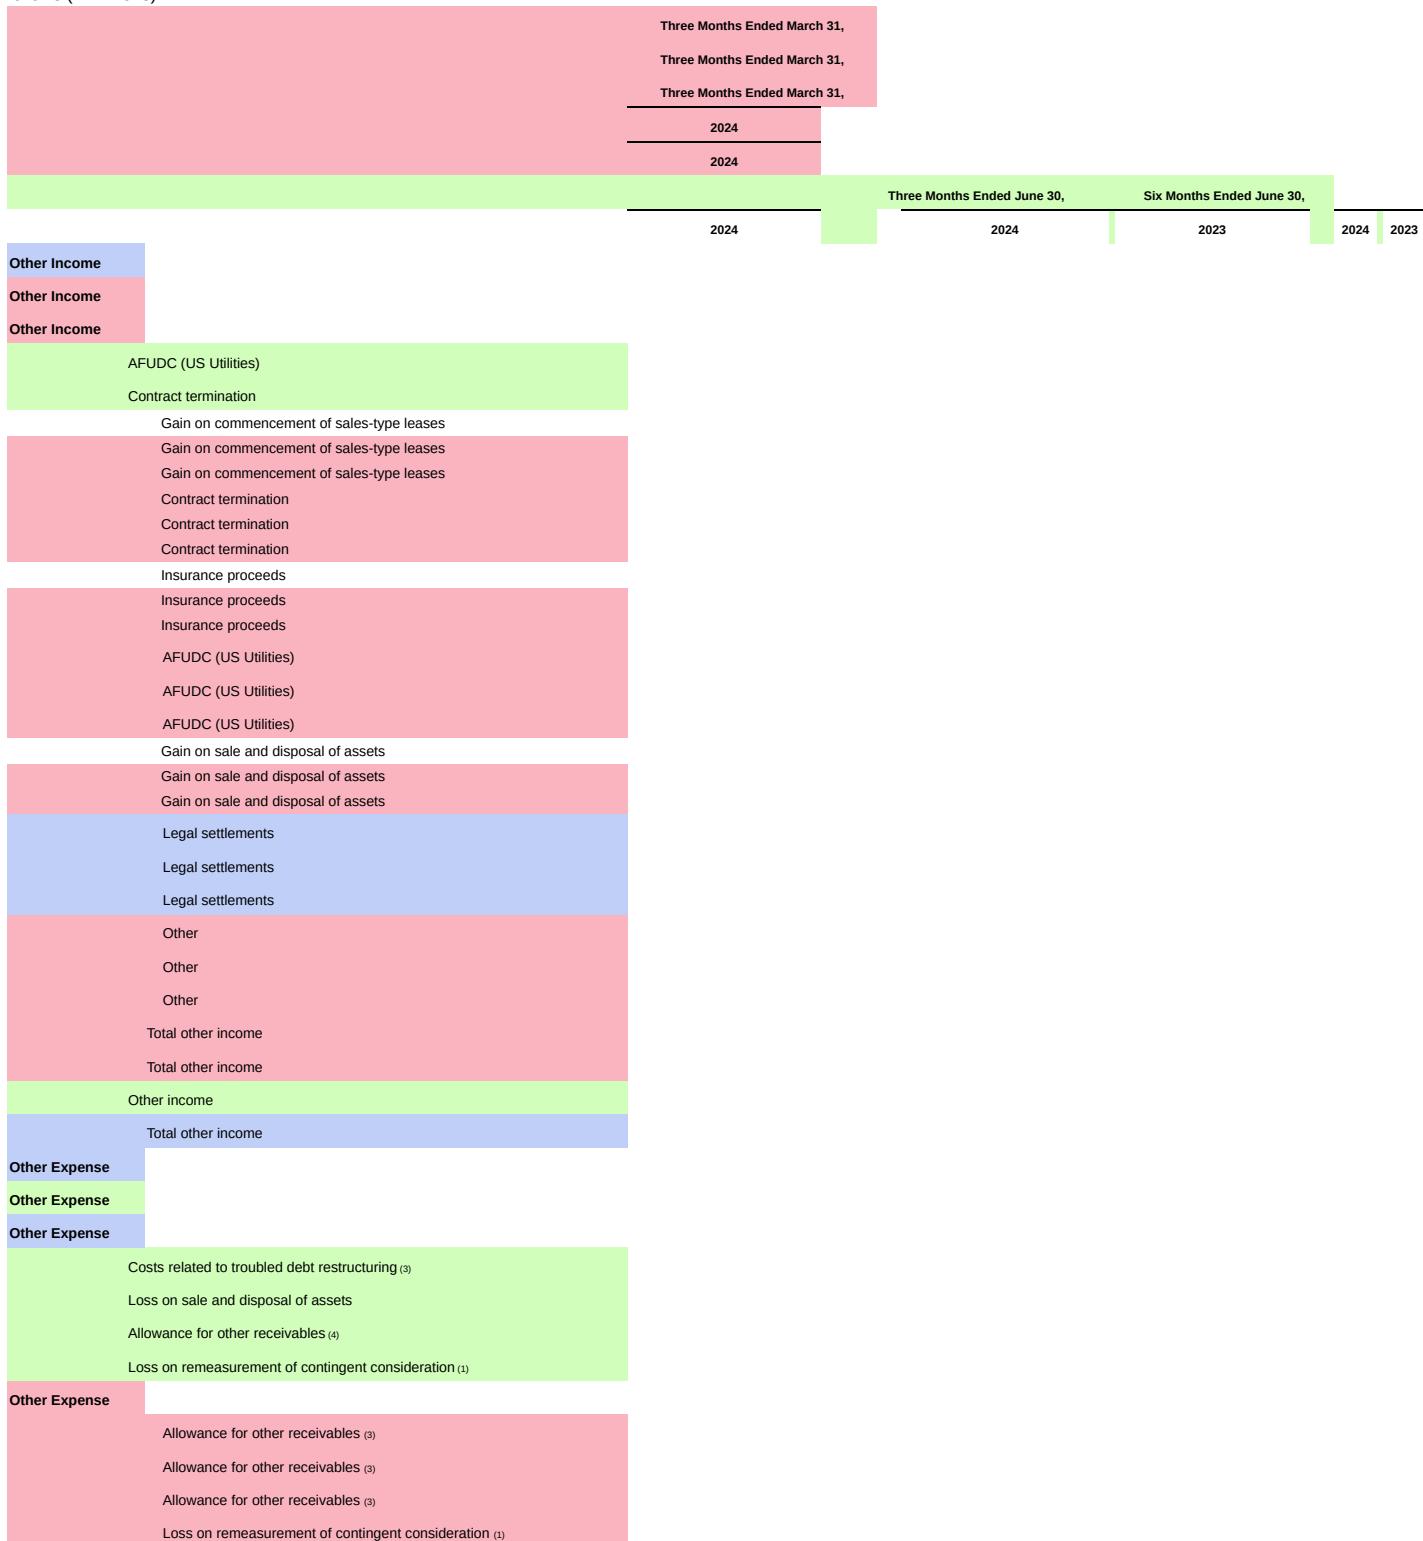

\$904 million and \$962 million, respectively, was classified as Noncurrent held-for-sale assets on the Condensed Consolidated Balance Sheets.

**Remaining Performance Obligations** — The transaction price allocated to remaining performance obligations represents future consideration for unsatisfied (or partially unsatisfied) performance obligations at the end of the reporting period. As of March 31, 2024 June 30, 2024, the aggregate amount of transaction price allocated to remaining performance obligations was \$7 million \$8 million, primarily consisting of fixed consideration for the sale of renewable energy credits in long-term contracts in the U.S. We expect to recognize revenue of approximately \$1 million per year between 2024 and 2028 and the remainder thereafter.

## 15. OTHER INCOME AND EXPENSE

Other income generally includes gains on insurance recoveries in excess of property damage, gains on asset sales and liability extinguishments, favorable judgments on contingencies, allowance for funds used during construction, gains on contingent consideration remeasurement, and other income from miscellaneous transactions. Other expense generally includes losses on asset sales and dispositions, losses on legal contingencies, losses on

remeasurement of contingent consideration, losses at commencement of sales-type leases, and losses from other miscellaneous transactions. The components are summarized as follows (in millions):

Loss on remeasurement of contingent consideration <sup>(1)</sup>
Loss on remeasurement of contingent consideration <sup>(1)</sup>
Loss on sale and disposal of assets
Loss on sale and disposal of assets
Loss on sale and disposal of assets
Other
Non-service pension and other postretirement costs
Other
Non-service pension and other postretirement costs
Non-service pension and other postretirement costs
Other
Total other expense
Total other expense
Total other expense

<sup>(1)</sup> Primarily related to certain remeasurements of contingent consideration on projects acquired at AES Clean Energy.

<sup>(2)</sup> Related to losses recognized at commencement of sales-type leases at AES Renewable Holdings. See Note 10—Leases for further information.

<sup>(3)</sup> Related to legal expenses and other direct costs associated with the troubled debt restructuring at Puerto Rico. See Note 8—Debt for further information.

<sup>(4)</sup> Related to a valuation allowance on receivables previously classified as held-for-sale at Warrior Run. See Note 18—14—Held-for-Sale and Dispositions Revenue for further information.

## 16. ASSET IMPAIRMENT EXPENSE

The following table presents our asset impairment expense for the periods indicated (in millions):

	Three Months Ended March 31,			Six Months Ended June 30,			
				2024		2023

Other							
Other							
Total							

**AES Brasil** — In May 2024, the Company entered into an agreement to sell its 47.3% controlling interest in AES Brasil, a 5.2 GW portfolio of renewable energy facilities. Upon meeting the held-for-sale criteria in May 2024, the Company performed an impairment analysis and determined that the carrying value of the disposal group of \$1,556 million, which includes cumulative translation losses of \$533 million, was greater than its fair value less costs to sell of \$1,339 million. As a result, the Company recognized pre-tax impairment expense of \$217 million. The Company expects to recognize an additional loss upon completion of the sale, primarily related to the reclassification of cumulative translation losses to earnings. See Note 18—Held-for-Sale and Dispositions for further information. AES Brasil is reported in the Renewables SBU reportable segment.

**Mong Duong** — In November 2023, the Company entered into an agreement to sell its entire 51% ownership interest in Mong Duong 2, a coal-fired plant in Vietnam, and 51% equity interest in Mong Duong Finance Holdings B.V., an SPV accounted for as an equity affiliate (collectively "Mong Duong"), and as of March 31, 2024 June 30, 2024, Mong Duong continued to be classified as held-for-sale. The carrying amount of the Mong Duong disposal group in subsequent periods exceeded the expected sales proceeds and as a result, the Company recognized total pre-tax impairment

expense of \$37 million \$43 million during the six months ended June 30, 2024. See Note 18—*Held-for-Sale and Dispositions* for further information. Mong Duong is reported in the Energy Infrastructure SBU reportable segment.

**Norgener** — In May 2023, AES Andes announced its intention to accelerate the retirement of the Norgener coal-fired plant in Chile in order to further advance its decarbonization strategy. Due to this strategic development and the resulting decrease in useful life of the generation facility, the Company performed an impairment analysis as of May 1, 2023, and determined that the carrying amount of the asset group was not recoverable. The Norgener asset group was determined to have a fair value of \$24 million, using the income approach. As a result, and since pre-tax losses are limited to the carrying amount of the long-lived assets, the Company recognized pre-tax asset impairment expense of \$137 million. Norgener is reported in the Energy Infrastructure SBU reportable segment.

**Jordan** — In November 2020, the Company signed an agreement to sell approximately 26% ownership interest in Amman East and IPP4 for \$58 million. The generation plants were classified as held-for-sale until the sale was completed in March 2024. Due to the delay in closing the transaction, the carrying amount of the asset disposal group in subsequent periods exceeded the agreed-upon sales price, and total pre-tax impairment expense of \$14 million \$29 million was

---

27 | Notes to Condensed Consolidated Financial Statements—(Continued) | March 31, 2024 and 2023

recorded during the three six months ended March 31, 2023 June 30, 2023. See Note 18—*Held-for-Sale and Dispositions* for further information. Amman East and IPP4 are reported in the Energy Infrastructure SBU reportable segment.

**GAF Projects** — During the second quarter of 2023, management concluded that the carrying value of six project companies at AES Renewable Holdings (the “GAF Projects”) may not be recoverable as the expected purchase price on the buyout of tax equity partners implied a loss on the transaction. The buyout was completed in July 2023. Management performed a recoverability test as of May 31, 2023 and concluded that the undiscounted cash flows of the GAF Projects did not exceed the carrying values of the asset groups for five of the six projects. The asset groups for the GAF Projects were determined to have a fair value of \$11 million, using the income approach. As a result, the Company recognized pre-tax asset impairment expense of \$18 million. AES Renewable Holdings is reported in the Renewables SBU reportable segment.

## 17. INCOME TAXES

The Company's provision for income taxes is based on the estimated annual effective tax rate, plus discrete items. The effective tax rates for the three and six months ended March 31, 2024 June 30, 2024 were 45% and March 31, 2023 (26)%, respectively. The effective tax rates for the three and six months ended June 30, 2023 were (6) (50)% and 27% 26%, respectively. The difference between the Company's effective tax rates for the 2024 and 2023 periods and the U.S. statutory tax rate of 21% related primarily to U.S. taxes on foreign earnings, foreign tax rate differentials, the impacts of foreign currency fluctuations at certain foreign subsidiaries, nondeductible expenses, valuation allowance, and the impacts of U.S. investment tax credits (“ITCs”), and non-controlling noncontrolling interest in our U.S. subsidiaries.

For During the three months ended March 31, 2024, first quarter of 2024, the Company recorded discrete tax benefit of approximately \$56 million related to U.S. capital losses associated with the restructuring of a foreign holding company. The

For the three and six months ended June 30, 2024, the Company also recognized approximately \$15 million of discrete tax expense of approximately \$13 million and \$28 million, respectively, resulting from allocations of losses to tax equity investors on renewables projects. Additionally, for the three and six months ended June 30, 2024, the Company recognized approximately \$59 million of discrete tax benefit, net of valuation allowance, for tax over book investment basis differences related to the AES Brasil held-for-sale classification. See Note 18—*Held-for-Sale and Dispositions* for further information on AES Brasil.

## 18. HELD-FOR-SALE AND DISPOSITIONS

### *Held-for-Sale*

**Warrior Run AES Brasil** — On February 1, 2024 May 15, 2024, the Company entered into an agreement to sell its 47.3% controlling interest in AES Brasil Energia S.A. (“AES Brasil”), Warrior Run executed a receivable sale agreement, 5.2 GW portfolio of renewable energy that is 51% hydroelectric, 43% wind, and 6% solar. The transaction is expected to close in which the remaining future cash flows from the Warrior Run termination agreement were assigned to a third party. The proceeds were used primarily to repay existing indebtedness and for general corporate purposes. Under the requirements second half of the PPA termination agreement, Warrior Run must satisfy performance obligations which continue through May 31, 2024 2024. As a result, Warrior Run reclassified the related financing receivable AES Brasil was classified as held-for-sale, given its intent and ability but did not meet the criteria to sell the receivable once the performance period has concluded. As of March 31, 2024, be reported as discontinued operations. On a consolidated basis, the carrying value of the receivable classified disposal group after impairments of the plants held-for-sale as held-for-sale of June 30, 2024 was \$214 million, including a valuation allowance of \$6 million \$1.3 billion. Warrior Run AES Brasil is reported in the Energy Infrastructure Renewables SBU reportable segment.

---

33 | Notes to Condensed Consolidated Financial Statements—(Continued) | June 30, 2024 and 2023

**Mong Duong** — In November 2023, the Company entered into an agreement to sell its entire 51% ownership interest in Mong Duong 2, a coal-fired plant in Vietnam, and 51% equity interest in Mong Duong Finance Holdings B.V., an SPV accounted for as an equity affiliate (collectively “Mong Duong”). The sale is subject to regulatory approval and is expected to close in mid-2025. As a result, Mong Duong was classified as held-for-sale, but did not meet the criteria to be reported as discontinued operations. On a consolidated

basis, the carrying value of net assets of the disposal group after impairment of the plant held-for-sale as of **March 31, 2024** **June 30, 2024** was **\$410 million** **\$384 million**. Mong Duong is reported in the Energy Infrastructure SBU reportable segment.

Excluding any impairment charges, pre-tax income (loss) attributable to AES of businesses held-for-sale as of **March 31, 2024** **June 30, 2024** was as follows:

		Three Months Ended March 31,	Three Months Ended March 31,	Three Months Ended March 31,
(in millions)				
		Three Months Ended June 30,		Six Months Ended June 30,
(in millions)	(in millions)	2024	2023	2024
Mong Duong				
Mong Duong				
Mong Duong				
AES Brasil				
Total				

Management has recorded pre-tax asset impairment expense of **\$37 million** **\$43 million** at Mong Duong, **Duong**, and **\$217 million** at AES Brasil. As of **March 31, 2024** **June 30, 2024**, the significant assets and liabilities of Mong Duong are a long-term financing receivable of \$1 billion and debt of **\$638 million** **\$583 million**, respectively. As of June 30, 2024, AES Brasil's major assets and liabilities include \$2.2 billion in both property, plant and equipment and debt. See Notes Note 16—Asset Impairment Expense and Note 14—Revenue for further information.

#### Dispositions

**Jordan** — In March 2024, the Company completed the sale of approximately 26% ownership interest in the Amman East and IPP4 generation plants for a sale price of \$58 million. After adjusting for dividends received since the execution of the sale and purchase agreement, the Company received a net cash payment of \$45 million. The transaction resulted in a pre-tax loss on sale of \$10 million, reported in *Gain on disposal and sale of business interests* on the Condensed Consolidated Statement of Operations. After completion of the sale, the Company retained 10% ownership interest in each of the businesses, resulting in deconsolidation and recognition as equity method investments. Amman East and IPP4 are reported in the Energy Infrastructure SBU reportable segment.

28 | Notes to Condensed Consolidated Financial Statements—(Continued) | March 31, 2024 and 2023

## 19. ACQUISITIONS

**Birdseye** — On April 5, 2024, the Company closed on the acquisition of 100% of Sol Madison Solar, LLC, a 63 MW construction-stage solar project in Virginia, and a pipeline of early-stage renewable energy development projects. The transaction was accounted for as a business combination at a purchase price of \$20 million; therefore, the assets acquired and liabilities assumed at the acquisition date, primarily consisting of CWIP and a PPA liability, were recorded at their fair values. No goodwill was recognized as a result of the acquisition. The Company has recorded preliminary amounts for the purchase price allocation; however, the Company may continue to make adjustments. Birdseye is reported in the Renewables SBU reportable segment.

**Hoosier Wind** — In August 2023, the Company, through its subsidiary AES Indiana, filed for IURC issuance of a Certificate of Public Convenience and Necessity ("CPCN") approving the acquisition of 100% of the interests in Hoosier Wind Project, LLC., which is an existing 106 MW wind facility located in Benton County, Indiana. IURC approval was received on January 24, 2024, and the transaction closed on February 29, 2024. The transaction was accounted for as an asset acquisition that did not meet the definition of a business. Of the total consideration transferred of \$93 million, including transaction costs, approximately \$49 million was allocated to the identifiable assets acquired on a relative fair value basis, primarily consisting of tangible wind farm assets and typical working capital items. The remaining consideration was allocated to the termination of the pre-existing PPA between AES Indiana and the Hoosier Wind Project, estimated using a discounted cash flow valuation methodology, which was deferred as a long-term regulatory asset. Hoosier Wind is reported in the Utilities SBU reportable segment.

## 20. EARNINGS PER SHARE

Basic and diluted earnings per share are based on the weighted average number of shares of common stock and potential common stock outstanding during the period. Potential common stock, for purposes of determining diluted earnings per share, includes the effects of dilutive RSUs, stock options, and equity units. The effect of such potential common stock is computed using the treasury stock method for RSUs and stock options, and is computed using the if-converted method for equity units.

34 | Notes to Condensed Consolidated Financial Statements—(Continued) | June 30, 2024 and 2023

The following table is a reconciliation of the numerator and denominator of the basic and diluted earnings per share computation for income from continuing operations for the three and six months ended **March 31, 2024** **June 30, 2024** and 2023, where income represents the numerator and weighted average shares represent the denominator.

Three Months Ended March 31,	2024			2023		
(in millions, except per share data)	Income	Shares	\$ per Share	Income	Shares	\$ per Share
<b>BASIC EARNINGS PER SHARE</b>						
Income from continuing operations attributable to The AES Corporation common stockholders	\$ 432	690	\$ 0.63	\$ 151	669	\$ 0.22
Less: Increase in redemption value of redeemable stock of subsidiaries	(6)		(0.01)	\$ —		\$ —

<b>EFFECT OF DILUTIVE SECURITIES</b>						
Stock options	—	—	—	—	1	—
Restricted stock units	—	2	—	—	2	—
Equity units	—	20	(0.02)	—	40	(0.01)
<b>DILUTED EARNINGS PER SHARE</b>	<b>\$ 426</b>	<b>712</b>	<b>\$ 0.60</b>	<b>\$ 151</b>	<b>712</b>	<b>\$ 0.21</b>

Three Months Ended June 30,	2024			2023		
(in millions, except per share data)	Income	Shares	\$ per Share	Loss	Shares	\$ per Share
<b>BASIC EARNINGS (LOSS) PER SHARE</b>						
Income (loss) from continuing operations attributable to The AES Corporation common stockholders	\$ 185	711	\$ 0.26	\$ (39)	669	\$ (0.06)
Add: Decrease in redemption value of redeemable stock of subsidiaries	6		0.01	—		—
Income (loss) available to The AES Corporation common stockholders	\$ 191	711	\$ 0.27	\$ (39)	669	\$ (0.06)
<b>EFFECT OF DILUTIVE SECURITIES</b>						
Stock options	—	—	—	—	—	—
Restricted stock units	—	2	—	—	—	—
Equity units	—	—	—	—	—	—
<b>DILUTED EARNINGS (LOSS) PER SHARE</b>	<b>\$ 191</b>	<b>713</b>	<b>\$ 0.27</b>	<b>\$ (39)</b>	<b>669</b>	<b>\$ (0.06)</b>

Six Months Ended	2024			2023		
(in millions, except per share data)	Income	Shares	\$ per Share	Income	Shares	\$ per Share
<b>BASIC EARNINGS PER SHARE</b>						
Income from continuing operations attributable to The AES Corporation common stockholders	\$ 617	700	\$ 0.88	\$ 112	669	\$ 0.17
Less: Increase in redemption value of redeemable stock of subsidiaries	—	—	—	—	—	—
Income available to The AES Corporation common stockholders	\$ 617	700	\$ 0.88	\$ 112	669	\$ 0.17
<b>EFFECT OF DILUTIVE SECURITIES</b>						
Stock options	—	—	—	—	1	—
Restricted stock units	—	2	—	—	2	—
Equity units	—	11	(0.01)	—	40	(0.01)
<b>DILUTED EARNINGS PER SHARE</b>	<b>\$ 617</b>	<b>713</b>	<b>\$ 0.87</b>	<b>\$ 112</b>	<b>712</b>	<b>\$ 0.16</b>

For the three months ended **March 31, 2024** June 30, 2024, income from continuing operations available to AES common stockholders included a \$6 million adjustment related to the **increase** **decrease** of the carrying value of redeemable stock of subsidiaries at AES Clean Energy Development, as a result of a non-fair value redemption feature. **This** adjustment is a recovery of the amount previously reflected in the computation of earnings per share in the first quarter of 2024. The Company has elected to administer the entire non-fair value redemption adjustment consistent with the treatment of dividends in the earnings per share calculation. While the adjustment **reduced** **increased** net income available to AES common stockholders and earnings per share, it did not impact **Net income** in the Condensed Consolidated Statement of Operations.

For the three and six months ended June 30, 2024, the calculation of diluted earnings per share excluded 2 million outstanding stock awards, respectively, which would be anti-dilutive. These stock awards could potentially dilute basic earnings per share in the future.

For the three months ended June 30, 2023, the calculation of diluted earnings per share excluded 3 million outstanding stock awards and 40 million shares underlying our March 2021 Equity Units because their impact would be anti-dilutive given the loss from continuing operations. These shares could potentially dilute basic earnings per share in the future. Had the Company generated income, 2 million and 40 million potential shares of common stock related to the stock awards and the Equity Units, respectively, would have been included in diluted weighted-average shares outstanding.

The calculation of diluted earnings per share excluded 2 million and 1 million outstanding stock awards for the **three** **six** months ended **March 31, 2024** and **March 31, 2023** June 30, 2023, which would be anti-dilutive. These stock awards could potentially dilute basic earnings per share in the future.

As described in Note 12—*Equity*, the Company issued 10,430,500 Equity Units in March 2021 with a total notional value of \$1,043 million. Each Equity Unit had a stated amount of \$100 and was initially issued as a Corporate Unit, consisting of a 2024 Purchase Contract and a 10% undivided beneficial ownership interest in one share of Series A Preferred Stock. The conversion rate was initially 31.5428 shares of common stock per one share of Series A Preferred Stock, which was equivalent to an initial conversion price of approximately \$31.70 per share of common stock. The Series A Preferred Stock and the 2024 Purchase Contracts were accounted for as one unit of account. In calculating diluted EPS, the Company has applied the if-converted method to determine the impact of the forward purchase feature and considered if there are incremental shares that should be included related to the Series A Preferred conversion value. On February 15, 2024, the Series A Preferred Stock was tendered to satisfy the 2024 Purchase Contract's settlement price and the Corporate Units were converted into shares of the Company's common stock at a settlement rate of 3.8859, equivalent to a reference price of \$25.73. The Series A Preferred Stock was canceled upon conversion.

## 21. RISKS AND UNCERTAINTIES

**Puerto Rico** — In 2023, AES Puerto Rico took certain measures to address identified liquidity challenges. On July 6, 2023, PREPA agreed to the release of funds in the escrow account guaranteeing AES Puerto Rico's obligations under the Power Purchase and Operating Agreement ("PPOA") in order to provide additional liquidity for the business. During the fourth quarter of 2023, a restructuring support agreement was executed by AES Puerto Rico and its noteholders and a PPOA amendment was approved by PREPA. The restructuring closed on March 5, 2024. See Note 8—*Debt included in Item 1.—Financial Statements* of this Form 10-Q for further information.

Considering the information available as of the filing date, management believes the carrying amount of our long-lived assets at AES Puerto Rico of \$78 million is recoverable as of March 31, 2024.

### ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The condensed consolidated financial statements included in Item 1.—*Financial Statements* of this Form 10-Q and the discussions contained herein should be read in conjunction with our 2023 Form 10-K.

#### Forward-Looking Information

The following discussion may contain forward-looking statements regarding us, our business, prospects and our results of operations, that are subject to certain risks and uncertainties posed by many factors and events that could cause our actual business, prospects and results of operations to differ materially from those that may be anticipated by such forward-looking statements. These statements include, but are not limited to, statements regarding management's intents, beliefs, and current expectations and typically contain, but are not limited to, the terms "anticipate," "potential," "expect," "forecast," "target," "will," "would," "intend," "believe," "project," "estimate," "plan," and similar words. Forward-looking statements are not intended to be a guarantee of future results, but instead constitute current expectations based on reasonable assumptions. Factors that could cause or contribute to such differences include, but are not limited to, those described in Item 1A.—*Risk Factors* of this Form 10-Q, Item 1A.—*Risk Factors* and Item 7.—*Management's Discussion and Analysis of Financial Condition and Results of Operations* of our 2023 Form 10-K and subsequent filings with the SEC.

Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date of this report. We undertake no obligation to revise any forward-looking statements in order to reflect events or circumstances that may subsequently arise. If we do update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements. Readers are urged to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the SEC that advise of the risks and factors that may affect our business.

#### Overview of Our Business

We are a diversified power generation and utility company organized into the following four SBUs, mainly organized by technology: **Renewables** (solar, wind, energy storage, and hydro), **Utilities** (AES Indiana, AES Ohio, and AES El Salvador), **Energy Infrastructure** (natural gas, LNG, coal, pet coke, diesel, and oil), and **New Energy Technologies** (green hydrogen, Fluence, Uplight, and 5B). Our businesses in Chile, which have a mix of generation sources, including renewables, are also included within the Energy Infrastructure SBU, as the generation from all sources is pooled to service our existing PPAs. For additional information regarding our business, see Item 1.—*Business* of our 2023 Form 10-K.

We have two lines of business: generation and utilities. Our Renewables, Utilities, and Energy Infrastructure SBUs participate in our first business line, generation, in which we own and/or operate power plants to generate and sell power to customers, such as utilities, industrial users, and other intermediaries. Our Utilities SBU participates in our second business line, utilities, in which we own and/or operate utilities to generate or purchase, distribute, transmit, and sell electricity to end-user customers in the residential, commercial, industrial, and governmental sectors within a defined service area. In certain circumstances, our utilities also generate and sell electricity on the wholesale market. Our New Energy Technologies SBU includes investments in new and innovative technologies to support leading-edge greener energy solutions.

#### Executive Summary

Compared with last year, **first** **second** quarter net **income** **loss** increased **\$89 million** **\$20 million**, from **\$189 million** **\$19 million** to **\$278 million** **\$39 million**. This increase is the result of losses at commencement of sales-type leases at the Renewables SBU, partially offset by favorable contributions at the Utilities and **New Energy Technologies** **Infrastructure**

SBUs partially offset by lower and higher contributions from renewables projects placed in service in the Renewables and Energy Infrastructure SBUs current year.

Adjusted EBITDA, a non-GAAP measure, increased \$7 million \$83 million, from \$628 million \$569 million to \$635 million \$652 million, mainly driven by higher contributions at the Utilities SBU, higher revenues under a PPA termination agreement at the Energy Infrastructure SBU, and higher contributions revenues from new projects at the Utilities SBU, and lower losses from affiliates at the New Energy Technologies Renewables SBU; partially offset by lower LNG transactions, higher contract generation cost, and outages at the Energy Infrastructure SBU, and worse hydrology and lower wind generation outages in Colombia at the Renewables SBU.

Adjusted EBITDA with Tax Attributes, a non-GAAP measure, increased \$222 \$236 million, from \$641 million \$607 million to \$863 million \$843 million primarily due to higher realized tax attributes driven by more renewables projects placed in service, and the drivers above.

Compared with last year, first second quarter diluted earnings per share from continuing operations increased \$0.39.

---

31 37 | The AES Corporation | March 31, 2024 June 30, 2024 Form 10-Q

\$0.33, from \$0.21 a loss of \$0.06 to \$0.60 earnings of \$0.27. This increase is mainly driven by higher contributions from renewables projects placed in service in the current year, prior year unrealized foreign currency losses at the Energy Infrastructure SBU, and higher margins at the Utilities and Energy Infrastructure SBUs; partially offset by losses at commencement of sales-type leases at the Renewables SBU.

Adjusted EPS, a non-GAAP measure, increased \$0.17 from \$0.21 to \$0.38, mainly driven by a lower adjusted tax rate, higher contributions from the Utilities SBU, and higher contributions from renewables projects placed in service in the current year.

Compared with last year, net income for the six months ended June 30, 2024 increased \$69 million, from \$170 million to \$239 million. This increase is the result of favorable contributions at the Utilities, Energy Infrastructure, and New Energy Technologies SBUs and higher contributions from renewables projects placed in service in the current year; partially offset by losses at commencement of sales-type leases at the Renewables SBU.

Adjusted EBITDA, a non-GAAP measure, increased \$90 million, from \$1,197 million to \$1,287 million, mainly driven by higher contributions at the Utilities SBU, higher revenues under a PPA termination agreement at the Energy Infrastructure SBU, higher revenues from new projects at the Renewables SBU, and lower losses from affiliates at the New Energy Technologies SBU; partially offset by higher outages at the Energy Infrastructure SBU, and higher fixed costs and outages in Colombia at the Renewables SBU.

Adjusted EBITDA with Tax Attributes, a non-GAAP measure, increased \$458 million, from \$1,248 million to \$1,706 million, primarily due to higher realized tax attributes driven by more renewables projects placed in service, and the drivers above.

Compared with last year, diluted earnings per share from continuing operations for the six months ended June 30, 2024 increased \$0.71, from \$0.16 to \$0.87. This increase is mainly driven by higher contributions from renewables projects placed in service in the current year, prior year unrealized foreign currency losses at the Energy Infrastructure SBU, higher margins at the Energy Infrastructure and Utilities SBUs, and lower income tax expense, expense; partially offset by losses at commencement of sales-type leases at the Renewables SBU.

Adjusted EPS, a non-GAAP measure, increased \$0.46 from \$0.43 to \$0.89, mainly driven by a lower adjusted tax rate, higher contributions from renewables projects placed in service in the current year, and a gain on dilution of our interest in Uplight; partially offset by higher asset impairments in the current year.

Adjusted EPS, a non-GAAP measure, increased \$0.28 from \$0.22 to \$0.50, mainly driven by a lower adjusted tax rate and higher contributions from renewables projects placed in service in the current year. Utilities SBU.

---

32 38 | The AES Corporation | March 31, 2024 June 30, 2024 Form 10-Q

(1) Non-GAAP measure. See Item 2.—Management's Discussion and Analysis of Financial Condition and Results of Operations—SBU Performance Analysis—Non-GAAP Measures for reconciliation and definition.

(2) GWh sold in 2023.

---

33 39 | The AES Corporation | March 31, 2024 June 30, 2024 Form 10-Q

## Overview of Strategic Performance

AES is leading the industry's transition to clean energy by investing in renewables, utilities, and technology businesses.

- As The Company has now signed 8.1 GW of agreements directly with technology customers, including through transmission and distribution, renewables PPAs, and retail supply. Since the end of the Company's first quarter of 2024 earnings call in May 2024, the Company signed 2.2 GW of agreements, including:

- 1.2 GW of new data center load at U.S. utilities, which should benefit rate base growth, but is not included in the Company's PPA backlog;
- 15-year PPAs for 727 MW of wind and solar to serve data center growth in Texas; and
- A 310 MW retail supply agreement to support data centers throughout Ohio, which is not included in the Company's PPA backlog.
- The Company's PPA backlog, which consists of projects with signed contracts, but which are not yet operational, is **12.7** **12.6** GW, including **5.8** **5.1** GW under construction.
- Since the Company's fourth quarter **2023** **2024** earnings call in February **May** 2024, the Company completed Company:
  - Signed 1 GW of long-term contracts for new renewables, including the acquisition of a 170 MW solar-plus-storage development project that will be added to AES Indiana's rate base.
  - Completed the construction or acquisition of **593** **976** MW of wind, solar, and energy storage and expects to add a total of 3.6 GW to its operating portfolio by year-end 2024.
- Since the Company's fourth quarter 2023 earnings call in February 2024, the Company signed 1.2 GW of long-term contracts for new renewables.
  - Including the 1 GW of Bellefield 2 signed in the first quarter of 2024, the Company has signed long-term PPAs for 5.9 GW of renewables to serve data center and technology customers in the U.S. and South America since 2018.
  - AES Indiana received approval from the IURC to implement new customer rates beginning in mid-May 2024. AES Indiana will continue to be among the lowest residential rates of any investor-owned utility in Indiana.

40 | The AES Corporation | June 30, 2024 Form 10-Q

*Components of Revenue, Cost of Sales, and Operating Margin* — Revenue includes revenue earned from the sale of energy from our utilities and the production and sale of energy from our generation plants, which are classified as regulated and non-regulated, respectively, on the Condensed Consolidated Statements of Operations. Revenue also includes the gains or losses on derivatives associated with the sale of electricity.

34 | The AES Corporation | March 31, 2024 Form 10-Q

Cost of sales includes costs incurred directly by the businesses in the ordinary course of business. Examples include electricity and fuel purchases, operations and maintenance costs, depreciation and amortization expenses, bad debt expense and recoveries, and general administrative and support costs (including employee-related costs directly associated with the operations of the business). Cost of sales also includes the gains or losses on derivatives associated with the purchase of electricity or fuel.

Operating margin is defined as revenue less cost of sales.

## Consolidated Revenue and Operating Margin

Three Months Ended **March 31, 2024** **June 30, 2024**

Revenue  
(in millions)  1066

**Consolidated Revenue** — Revenue decreased \$154 million \$85 million, or 5% 3%, for the three months ended March 31, 2024 June 30, 2024, compared to the three months ended March 31, 2023 June 30, 2023, driven by:

- \$110.185 million at Energy Infrastructure driven by lower regulated contract sales and prices, lower CO<sub>2</sub> purchases passed through due to lower production, the impact of the depreciation of the Argentine peso, and lower generation due to higher outages; unrealized derivative losses; partially offset by higher revenues due to a PPA termination agreement and realized and unrealized derivative gains; agreement.

This unfavorable impact was partially offset by increases of:

- \$96.55 million at Utilities mainly driven by lower Fuel Adjustment Charge rider revenue and lower wholesale revenue due to lower rates; partially offset by higher TDSIC rider and transmission revenues, and higher demand due to favorable weather; and
- \$74 million at New Energy Technologies mainly driven by the sale of the Fallbrook project in the prior year.

These unfavorable impacts were partially offset by an increase of \$124 million at Renewables mainly driven by higher spot sales prices, new projects placed in service, unrealized commodity derivative gains, and the impact of the appreciation of the Colombian peso; peso, and the impact of better hydrology; partially offset by the impact of the depreciation of the Argentine peso. outages; and

- \$44 million at Utilities mainly driven by an increase in transmission and distribution revenues due to higher rates and higher demand due to favorable weather; partially offset by lower Fuel Adjustment Charge rider revenue.

## Operating Margin (in millions)

**Consolidated Operating Margin** — Operating margin increased \$25 million \$55 million, or 4% 11%, for the three months ended March 31, 2024,

June 30, 2024, compared to the three months ended **March 31, 2023** June 30, 2023, driven by:

- \$70 million at Utilities mainly driven by higher demand due to favorable weather, increases in transmission and rider revenues due to higher TDSIC, ECCRA and DIR, and higher rates as a result of the 2024 Base Rate Order; and
- \$29.26 million at Energy Infrastructure mainly driven by higher revenues due to a PPA termination **agreement**

and **agreement**; partially offset by **unrealized derivative gains losses** as part of our commercial hedging **strategy**; **strategy**, higher outages, and impact of the selldown of Amman East and IPP4 in Jordan.

These favorable impacts were partially offset by **lower LNG transactions, higher contract generation costs, and higher outages**; **decreases of**:

- \$15.27 million at **Utilities Renewables** mainly driven by **higher demand outages** due to **favorable weather**, and an increase in **flooding incident** in **transmission and distribution revenues**; **Colombia**; partially offset by **higher fixed costs** **generation** due to **better hydrology** in **Panama** and **depreciation**; **unrealized derivative gains**; and
- \$14 million at Corporate and Other primarily driven by **higher charge-outs** of **people**, **IT**, and other **costs** **costs**.

#### Six Months Ended June 30, 2024

Revenue  
(in millions)  

**Consolidated Revenue**— Revenue decreased \$239 million, or 4%, for the six months ended June 30, 2024, compared to the **businesses** six months ended June 30, 2023, driven by:

- \$295 million at Energy Infrastructure primarily driven by lower regulated contract sales and prices, lower CO<sub>2</sub> purchases passed through due to lower production, the impact of the depreciation of the Argentine peso, unrealized derivative losses, and lower generation due to higher outages; partially offset by higher revenues due to a PPA termination **agreement**;
- \$75 million at New Energy Technologies mainly driven by the sale of the Fallbrook project in March 2023; and
- \$54 million at Utilities mainly driven by lower Fuel Adjustment Charge rider revenue; partially offset by an increase in transmission and distribution revenues due to higher rates, and higher **premiums** **earned** demand due to favorable weather.

These unfavorable impacts were partially offset by an increase of \$179 million at Renewables mainly driven by new projects in service, higher spot prices, and the appreciation of the Colombian peso; partially offset by higher outages.

Operating Margin  
(in millions)  

**Consolidated Operating Margin**— Operating margin increased \$80 million, or 7%, for the six months ended June 30, 2024, compared to the six months ended June 30, 2023, driven by:

- \$85 million at Utilities mainly driven by higher demand due to favorable weather, increases in transmission and rider revenues due to higher TDSIC, ECCRA and DIR, and higher retail rates as a result of the 2024 Base Rate Order; and
- \$55 million at Energy Infrastructure mainly driven by higher revenues due to a PPA termination **agreement**; partially offset by higher outages, lower LNG transactions, unrealized derivative losses, and impact of the selldown of Amman East and IPP4 in Jordan.

These favorable impacts were partially offset by a decrease of \$35 million \$62 million at Renewables mainly driven by worse hydrology, lower wind generation, higher energy purchase prices, and higher fixed costs, worse hydrology and depreciation related lower wind and solar availability, and outages due to new projects; a flooding incident in Colombia; partially offset by unrealized derivative gains.

See Item 2.—*Management's Discussion and Analysis of Financial Condition and Results of Operations*—SBU Performance Analysis of this Form 10-Q for additional discussion and analysis of operating results for each SBU.

## Consolidated Results of Operations — Other

### General and administrative expenses

General and administrative expenses increased \$20 million decreased \$6 million, or 36% 8%, to \$75 million \$66 million for the three months ended March 31, 2024 June 30, 2024, compared to \$55 million \$72 million for the three months ended March 31, 2023 June 30, 2023, primarily due to lower people costs and professional fees, partially offset by increased business development activity.

General and administrative expenses increased \$14 million, or 11%, to \$141 million for the six months ended June 30, 2024, compared to \$127 million for the six months ended June 30, 2023, primarily due to increased business development activity, and higher partially offset by lower people costs and professional fees.

### Interest expense

Interest expense increased \$27 million \$79 million, or 8% 25%, to \$357 million \$389 million for the three months ended March 31, 2024 June 30, 2024, compared to \$330 million \$310 million for the three months ended March 31, 2023 June 30, 2023. This increase is primarily due to new debt issued at the Renewables and Utilities SBUs, and a higher weighted average interest rate and debt balance at the Parent Company as well as new debt issued at the Utilities and Renewables SBUs; Company; partially offset by an increase in capitalized interest.

Interest expense increased \$106 million, or 17%, to \$746 million for the six months ended June 30, 2024, compared to \$640 million for the six months ended June 30, 2023. This increase is primarily due to the drivers above.

Interest capitalized during development and construction increased \$46 million \$34 million to \$157 million \$170 million for the three months ended March 31, 2024 June 30, 2024, compared to \$111 million \$136 million for the three months ended March 31, 2023 June 30, 2023, primarily due to more projects in development at the Renewables SBU and higher interest rates.

Interest capitalized during development and construction increased \$80 million to \$327 million for the six months ended June 30, 2024, compared to \$247 million for the six months ended June 30, 2023, primarily due to the drivers above.

---

43 | The AES Corporation | June 30, 2024 Form 10-Q

### Interest income

Interest income decreased \$18 million \$43 million, or 15% 33%, to \$105 million \$88 million for the three months ended March 31, 2024 June 30, 2024, compared to \$123 million \$131 million for the three months ended March 31, 2023 June 30, 2023, primarily due to lower short-term investments at the Renewables and Energy Infrastructure and Renewables SBUs.

Interest income decreased \$61 million, or 24%, to \$193 million for the six months ended June 30, 2024, compared to \$254 million for the six months ended June 30, 2023, primarily due to the drivers above.

### Loss on extinguishment of debt

Loss on extinguishment of debt was \$9 million and \$10 million for the three and six months ended June 30, 2024, respectively, primarily due to a prepayment at AES Andes. See Note 8—Debt included in Item 1.—Financial Statements of this Form 10-Q for further information.

### Other income and expense

Other income increased \$25 million \$7 million to \$35 million \$21 million for the three months ended March 31, 2024 June 30, 2024, compared to \$10 million \$14 million for the three months ended March 31, 2023 June 30, 2023, with no material drivers.

Other income increased \$32 million to \$56 million for the six months ended June 30, 2024, compared to \$24 million for the six months ended June 30, 2023, mainly due to gains on remeasurement of contingent consideration at AES Clean Energy, a gain on commencement of a sales-type lease on land, and insurance proceeds primarily associated with property damage at AES Andes.

Other expense increased \$24 million \$72 million to \$38 million \$84 million for the three months ended March 31, 2024 June 30, 2024, compared to \$14 million \$12 million for the three months ended March 31, 2023 June 30, 2023, primarily driven by losses on commencement of sales-type leases at AES Renewable Holdings.

Other expense increased \$96 million to \$122 million for the six months ended June 30, 2024, compared to \$26 million for the six months ended June 30, 2023, primarily driven by losses on commencement of sales-type leases at AES Renewable Holdings, legal expenses and other direct costs related to the troubled debt restructuring at Puerto Rico, and a valuation allowance on receivables previously classified as held-for-sale at Warrior Run.

See Note 15—Other Income and Expense included in Item 1.—Financial Statements of this Form 10-Q for further information.

### Gain (loss) on disposal and sale of business interests

Gain on disposal and sale of business interests was \$1 million for the three months ended June 30, 2024, compared to a loss of \$4 million for the three months ended June 30, 2023, with no material drivers.

Gain on disposal and sale of business interests was \$43 million \$44 million for the three six months ended March 31, 2024 June 30, 2024, compared to a loss of \$4 million for six months ended June 30, 2023, driven by the gain on dilution of AES' ownership interest in Uplight as a result of the AutoGrid acquisition, partially offset by the loss on the selldown of Amman East and IPP4 in Jordan, which is now accounted for as an equity method investment. See Note 7—Investments in and Advances to Affiliates and Note 18—Held-for-Sale and Dispositions for further information.

## Asset impairment expense

Asset impairment expense increased \$26 million to \$46 million for the three months ended March 31, 2024 June 30, 2024, compared to \$20 million \$174 million for the three months ended March 31, 2023 June 30, 2023. This increase was primarily the result of a \$37 million impairment at AES Brasil upon meeting held-for-sale criteria. This was partially offset by prior year impairments of \$137 million associated with the commitment to accelerate the retirement of the Norgener coal-fired plant in Chile, \$18 million at five project companies at AES Renewable Holdings associated with the buyout of tax equity partners, and \$15 million at Amman East and IPP4 in Jordan due to the delay in closing the sale transaction.

Asset impairment expense increased \$82 million to \$276 million for the six months ended June 30, 2024, compared to \$194 million for the six months ended June 30, 2023. This increase was primarily the result of a \$217 million impairment at AES Brasil upon meeting held-for-sale criteria and a \$43 million impairment at Mong Duong due to the carrying value exceeding the expected sales proceeds. This was partially offset by impairments in the prior year impairments of \$137 million at Norgener, \$29 million at Amman East and IPP4 in Jordan, and \$18 million at AES Renewable Holdings, due to the delay in closing the sale transaction. drivers discussed above.

See Note 16—Asset Impairment Expense included in Item 1.—Financial Statements of this Form 10-Q for further information.

## Foreign currency transaction losses/gains (losses)

		Three Months Ended March 31,		Three Months Ended March 31,		Three Months Ended June 30,		Six Months Ended June 30,

Other									
Other									
Other									
Total (1)									
Total (1)									
Total (1)									

(1) Includes gains of \$18 million \$90 million and losses of \$8 million \$31 million on foreign currency derivative contracts for the three months ended March 31, 2024 June 30, 2024 and 2023, respectively, and gains of \$109 million and losses of \$39 million on foreign currency derivative contracts for the six months ended June 30, 2024 and 2023, respectively.

The Company recognized net foreign currency transaction losses/gains of \$8 million \$38 million for the three months ended March 31, 2024 June 30, 2024, primarily driven by realized losses/unrealized gains on receivables denominated in the Chilean peso as well as unrealized losses on debt swaps and options denominated in the Brazilian real.

The Company recognized net foreign currency transaction gains of \$30 million for the six months ended June 30, 2024, primarily driven by unrealized gains on swaps and options denominated in the Brazilian real; partially offset by realized losses on receivables denominated in the Chilean peso.

The Company recognized net foreign currency transaction losses of \$42 million \$67 million for the three months ended March 31, 2023 June 30, 2023, primarily due to unrealized losses due to depreciating receivables denominated in driven by the depreciation of the Argentine peso and unrealized losses related to an intercompany loan denominated in the Colombian peso.

The Company recognized net foreign currency transaction losses of \$109 million for the six months ended June 30, 2023, primarily driven by the depreciation of the Argentine peso and unrealized losses related to an intercompany loan denominated in the Colombian peso; partially offset by unrealized gains on debt in Brazil.

#### Income tax benefit (expense)

Income tax benefit was \$16 million \$35 million for the three months ended March 31, 2024 June 30, 2024, compared to \$72 million of income tax expense \$2 million for the three months ended March 31, 2023 June 30, 2023. The Company's effective tax rates were (6)% 45% and 27%(50)% for the three months ended March 31, 2024 June 30, 2024 and 2023, respectively. This net decrease change in the effective tax rate was largely due to the current year benefits associated with U.S. investment tax credits ("ITCs"). Further, the effective tax rates were impacted by the AES Brasil held-for-sale reclassification in 2024 and the asset impairment of the Norgener coal-fired plant in Chile in 2023.

Income tax benefit was \$51 million for the six months ended June 30, 2024, compared to \$70 million of income tax expense for the six months ended June 30, 2023. The Company's effective tax rates were (26)% and 26% for the six months ended June 30, 2024 and 2023, respectively. This net change in the effective tax rate was largely due to the current year benefits associated with U.S. investment tax credits ("ITCs"), the AES Brasil held-for-sale reclassification, as well as the restructuring of a foreign holding company as well as U.S. investment tax credits ("ITCs"), in the first quarter of 2024.

See Note 16—*Asset Impairment Expense* included in Item 1.—*Financial Statements* of this Form 10-Q for details of the Norgener asset impairment and Note 18—*Held-for-Sale and Dispositions* for further information on AES Brasil.

Our effective tax rate reflects the tax effect of significant operations outside the U.S., which are generally taxed at rates different than the U.S. statutory rate of 21%. Furthermore, our foreign earnings may be subjected to incremental U.S. taxation under the GILTI rules. A future proportionate change in the composition of income before income taxes from foreign and domestic tax jurisdictions could impact our periodic effective tax rate.

#### Net equity in losses earnings (losses) of affiliates

Net equity in losses earnings of affiliates increased \$11 million \$28 million to \$15 million \$3 million for the three months ended March 31, 2024 June 30, 2024, compared to \$4 million losses of \$25 million for the three months ended March 31, 2023 June 30, 2023. This increase was primarily driven by a decrease in losses from Fluence, mainly attributable to improved margins on a new product line, and higher earnings from sPower, primarily due to contributions from new projects that came online, partially offset by a decrease in earnings from Mesa La Paz, primarily due to the prior year termination of derivative positions due to a contract amendment.

Net equity in losses of affiliates decreased \$17 million to \$12 million for the six months ended June 30, 2024, compared to \$29 million for the six months ended June 30, 2023, primarily due to the drivers above.

---

45 | The AES Corporation | June 30, 2024 Form 10-Q

See Note 7—*Investments in and Advances to Affiliates* included in Item 1.—*Financial Statements* of this Form 10-Q for further information.

#### Net income (loss) attributable to noncontrolling interests and redeemable stock of subsidiaries

Net income attributable to noncontrolling interests and redeemable stock of subsidiaries decreased \$192 million \$244 million to a \$154 million \$224 million loss for the three months ended March 31, 2024 June 30, 2024, compared to income of \$38 million \$20 million for the three months ended March 31, 2023 June 30, 2023. This decrease was primarily due to:

- Higher allocation of losses to tax equity investors on renewables projects placed in service and;
- Held-for-sale impairment at Brazil.

These decreases were partially offset by:

- Selldowns of business interests resulting in larger shares of income attributable to minority shareholders at the Energy Infrastructure SBU.

Net income attributable to noncontrolling interests and redeemable stock of subsidiaries decreased \$436 million to a \$378 million loss for the six months ended June 30, 2024, compared to income of \$58 million for the six months ended June 30, 2023. This decrease was primarily due to:

- Higher allocation of losses to tax equity investors on renewables projects placed in service;
- Lower earnings due to worse hydrology, lower wind generation and increased costs associated with the growth of our business at the Renewables SBU; and
- Held-for-sale impairment at Brazil and Mong Duong.

---

37 | The AES Corporation | March 31, 2024 Form 10-Q

These decreases were partially offset by:

- Prior year impairment at Jordan Selldowns of business interests resulting in larger shares of income attributable to minority shareholders at the Energy Infrastructure SBU.

#### Net income (loss) attributable to The AES Corporation

Net income attributable to The AES Corporation increased \$281 million \$224 million to \$432 million \$185 million for the three months ended March 31, 2024 June 30, 2024, compared to \$151 million a net loss of \$39 million for the three months ended March 31, 2023 June 30, 2023. This increase was primarily due to:

- Higher contributions from renewables projects placed in service in the current year;
- Higher earnings from the Energy Infrastructure SBU due to the PPA termination agreement at Warrior Run;
- Lower income tax expense;
- Gain on dilution of our interest in Uplight; and
- Lower unrealized foreign currency losses at the Energy Infrastructure SBU in the prior year;
- Higher earnings from the Utilities SBU; and
- Lower long-lived asset impairments in the current year.

These increases were partially offset by:

- Higher long-lived asset impairments outages at the Energy Infrastructure SBU;
- Losses on commencement of sales-type leases at AES Renewable Holdings; and
- Lower interest income in the current year.

Net income attributable to The AES Corporation increased \$505 million to \$617 million for the six months ended June 30, 2024, compared to \$112 million for the six months ended June 30, 2023. This increase was primarily due to:

- Higher contributions from renewables projects placed in service in the current year;
- Higher earnings from the Energy Infrastructure SBU due to the PPA termination agreement at Warrior Run;
- Unrealized foreign currency losses at the Energy Infrastructure SBU in the prior year;
- Higher earnings from the Utilities SBU;
- Lower income tax expense; and
- Gain on dilution of our interest in Uplight.

These increases were partially offset by:

- Lower LNG transactions and higher contract generation cost, and outages at the Energy Infrastructure SBU;

---

46 | The AES Corporation | June 30, 2024 Form 10-Q

- Losses on commencement of sales-type leases at AES Renewable Holdings; and
- Lower interest income in the current year.

## SBU Performance Analysis

### Non-GAAP Measures

EBITDA, Adjusted EBITDA, Adjusted EBITDA with Tax Attributes, Adjusted PTC, and Adjusted EPS are non-GAAP supplemental measures that are used by management and external users of our condensed consolidated financial statements such as investors, industry analysts, and lenders.

During the first quarter of 2024, the Company updated the definitions of Adjusted EBITDA, Adjusted PTC, and Adjusted EPS add-back (a) *unrealized gains or losses related to derivative transactions and equity securities* to include financial assets and liabilities measured using the fair value option, and updated add-back (e) *gains, losses, and costs due to the early retirement of debt* to include troubled debt restructuring. We believe excluding these gains or losses better reflects the underlying business performance of the Company. The Company also removed the adjustment for net gains at Angamos, one of our businesses in the Energy Infrastructure SBU, associated with the early contract terminations with Minera Escondida and Minera Spence. As this adjustment was specific to certain contract terminations that occurred in 2020, we believe removing this adjustment from our non-GAAP definitions provides simplification and clarity for our investors. There were no such impacts in 2023 or 2024 to date.

### EBITDA, Adjusted EBITDA and Adjusted EBITDA with Tax Attributes

We define EBITDA as earnings before interest income and expense, taxes, depreciation, and amortization. We define Adjusted EBITDA as EBITDA adjusted for the impact of NCI and interest, taxes, depreciation, and amortization of our equity affiliates, adding back interest income recognized under service concession arrangements, and excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits and costs associated with dispositions and acquisitions of business interests, including early plant closures, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; and (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring.

In addition to the revenue and cost of sales reflected in Operating Margin, Adjusted EBITDA includes the other components of our Consolidated Statement of Operations, such as *general and administrative expenses* in Corporate and Other as well as business development costs, *other expense* and *other income*, *realized foreign currency transaction gains and losses*, and *net equity in earnings (losses) of affiliates*.

We further define Adjusted EBITDA with Tax Attributes as Adjusted EBITDA, adding back the pre-tax effect of Production Tax Credits ("PTCs"), Investment Tax Credits ("ITCs"), and depreciation tax deductions allocated to tax equity investors, as well as the tax benefit recorded from tax credits retained or transferred to third parties.

The GAAP measure most comparable to EBITDA, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes is *Net income*. We believe that EBITDA, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes better reflect

38 | The AES Corporation | March 31, 2024 Form 10-Q

the underlying business performance of the Company. Adjusted EBITDA is the most relevant measure considered in the Company's internal evaluation of the financial performance of its segments. Factors in this determination include the variability due to unrealized gains or losses pertaining to derivative transactions, equity securities, or financial assets and liabilities remeasurement, unrealized foreign currency gains or losses, losses due to impairments, strategic decisions to dispose of or acquire business interests or retire debt, and the variability of allocations of earnings to tax equity investors, which affect results in a given period or periods. In addition, each of these metrics represents the business performance of the Company before the application of statutory income tax rates and tax adjustments, including the effects of tax planning, corresponding to the various jurisdictions in which the Company operates. Given its large number of businesses and overall complexity, the Company concluded that Adjusted EBITDA is a more transparent measure than *Net income* that better assists investors in determining which businesses have the greatest impact on the Company's results.

EBITDA, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes should not be construed as alternatives to *Net income*, which is determined in accordance with GAAP.

(1) The allocation of earnings and losses to tax equity investors from both consolidated entities and equity affiliates is removed from Adjusted EBITDA.

(2) Adjusted EBITDA with Tax Attributes includes the impact of the share of the ITCs, PTCs, and depreciation deductions allocated to tax equity investors under the HLBV accounting method and recognized as *Net loss (income) attributable to noncontrolling interests and redeemable stock of subsidiaries* on the Condensed Consolidated Statements of Operations. It also includes the tax benefit recorded from tax credits retained or transferred to third parties. The tax attributes are related to the Renewables and Utilities SBUs.

39 48 | The AES Corporation | March 31, 2024 June 30, 2024 Form 10-Q

### Adjusted PTC

We define Adjusted PTC as pre-tax income from continuing operations attributable to The AES Corporation excluding gains or losses of the consolidated entity due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits, and costs associated with dispositions and acquisitions of business interests, including early plant closures, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; and (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring. Adjusted PTC also includes net equity in earnings of affiliates on an after-tax basis adjusted for the same gains or losses excluded from consolidated entities.

Adjusted PTC reflects the impact of NCI and excludes the items specified in the definition above. In addition to the revenue and cost of sales reflected in Operating Margin, Adjusted PTC includes the other components of our Consolidated Statement of Operations, such as *general and administrative expenses* in Corporate and Other as well as *business development costs, interest expense and interest income, other expense and other income, realized foreign currency transaction gains and losses, and net equity in earnings (losses) of affiliates*.

The GAAP measure most comparable to Adjusted PTC is *Income from continuing operations attributable to The AES Corporation*. We believe that Adjusted PTC better reflects the underlying business performance of the Company and is a relevant measure considered in the Company's internal evaluation of the financial performance of its segments. Factors in this determination include the variability due to unrealized gains or losses pertaining to

49 | The AES Corporation | June 30, 2024 Form 10-Q

derivative transactions, equity securities, or financial assets and liabilities remeasurement, unrealized foreign currency gains or losses, losses due to impairments, and strategic decisions to dispose of or acquire business interests or retire debt, which affect results in a given period or periods. In addition, Adjusted PTC represents the business performance of the Company before the application of statutory income tax rates and tax adjustments, including the effects of tax planning, corresponding to the various jurisdictions in which the Company operates. Given its large number of businesses and complexity, the Company concluded that Adjusted PTC is a more transparent measure than *Income from continuing operations attributable to The AES Corporation* that better assists investors in determining which businesses have the greatest impact on the Company's results.

Adjusted PTC should not be construed as an alternative to *Income from continuing operations attributable to The AES Corporation*, which is determined in accordance with GAAP.

### Adjusted EPS

We define Adjusted EPS as diluted earnings per share from continuing operations excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses pertaining to derivative transactions, equity securities, and financial assets and liabilities measured using the fair value option; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits and costs associated with dispositions and acquisitions of business interests, including early plant closures, and the tax impact from the repatriation of sales proceeds, and gains and losses recognized at commencement of sales-type leases; (d) losses due to impairments; and (e) gains, losses, and costs due to the early retirement of debt or troubled debt restructuring.

The GAAP measure most comparable to Adjusted EPS is *Diluted earnings per share from continuing operations*. We believe that Adjusted EPS better reflects the underlying business performance of the Company and is considered in the Company's internal evaluation of financial performance. Factors in this determination include the variability due to unrealized gains or losses pertaining to derivative transactions, equity securities, or financial assets and liabilities remeasurement, unrealized foreign currency gains or losses, losses due to impairments, and strategic decisions to dispose of or acquire business interests or retire debt, which affect results in a given period or periods.

Adjusted EPS should not be construed as an alternative to *Diluted earnings per share from continuing operations*, which is determined in accordance with GAAP.

The Company reported diluted earnings per share of ~~\$0.60~~ \$0.27 for the three months ended ~~March 31, 2024~~ June 30, 2024. For purposes of measuring earnings per share under U.S. GAAP, income available to AES common stockholders is reduced by increases in the carrying amount of redeemable stock of subsidiaries to redemption ~~value~~ value, and increased by decreases in the carrying amount to the extent they represent recoveries of amounts previously reflected in the computation of earnings per share. While the adjustment ~~reduced~~ for the second quarter increased earnings per share, it did not impact *Net income* on the Condensed Consolidated Statement of Operations. For purposes of computing Adjusted EPS, the Company excluded the adjustment to redemption value from the numerator. The table below reconciles the income available to AES common stockholders used in GAAP diluted earnings per share to the income from continuing operations used in calculating the non-GAAP measure of Adjusted EPS.

Reconciliation of Numerator Used for Adjusted EPS (in millions, except per share data)	Three Months Ended June 30, 2024		
	Income	Shares	\$ per Share
<b>GAAP DILUTED EARNINGS PER SHARE</b>			
Income available to The AES Corporation common stockholders	\$ 191	713	\$ 0.27
Add back: Adjustment to redemption value of redeemable stock of subsidiaries	(6)	—	(0.01)
<b>NON-GAAP DILUTED EARNINGS PER SHARE</b>	<b>\$ 185</b>	<b>713</b>	<b>\$ 0.26</b>

The Company reported a loss from continuing operations of \$0.06 for the three months ended June 30, 2023. For purposes of measuring diluted loss per share under GAAP, common stock equivalents were excluded from weighted average shares as their inclusion would be anti-dilutive. However, for purposes of computing Adjusted

[1151](#) | The AES Corporation | ~~March 31, 2024~~ June 30, 2024 Form 10-Q

EPS, the Company has included the impact of dilutive common stock equivalents. The tables below reconcile the weighted average shares used in GAAP diluted loss per share to the weighted average shares used in calculating the non-GAAP measure of Adjusted EPS.

<b>Adjusted EPS</b>	<b>\$ 0.38</b>	<b>\$ 0.21</b>	<b>\$ 0.89</b>	<b>\$ 0.43</b>

(1) Amount primarily relates to unrealized gains on foreign currency derivatives at Corporate of \$34 million, or \$0.05 per share, and unrealized gains on cross currency swaps in Brazil of \$25 million, or \$0.03 per share.

(2) Amount primarily relates to recognition of unrealized losses due to the termination of a PPA of \$72 million, or \$0.10 per share, partially offset by unrealized derivative gains at the Energy Infrastructure SBU of \$37 million, or \$0.05 per share.

(3) Amount primarily relates to net unrealized derivative gains at the Energy Infrastructure SBU of \$68 million \$59 million, or \$0.10 \$0.08 per share, unrealized gains on foreign currency derivatives at Corporate of \$37 million, or \$0.05 per share, and unrealized gains on cross currency swaps in Brazil of \$28 million, or \$0.04 per share.

(4) Amount primarily relates to unrealized derivative gains at the Energy Infrastructure SBU of \$48 million \$87 million, or \$0.07 \$0.12 per share, partially offset by the recognition of unrealized losses due to the termination of a PPA of \$72 million, or \$0.10 per share.

(5) Amount primarily relates to unrealized foreign currency losses mainly associated with the devaluation of long-term receivables denominated in Argentine pesos of \$25 million \$24 million, or \$0.03 per share, and unrealized foreign currency losses at AES Andes due to the depreciating Colombian peso of \$15 million, or \$0.02 per share.

(6) Amount primarily relates to gain on dilution unrealized foreign currency losses mainly associated with the devaluation of ownership long-term receivables denominated in Uplight due to its acquisition Argentine pesos of AutoGrid of \$52 million \$49 million, or \$0.07 per share, partially offset by unrealized foreign currency losses at AES Andes due to the depreciation Colombian peso of \$31 million, or \$0.04 per share.

(7) Amount primarily relates to day-one losses at commencement of sales-type leases at AES Renewable Holdings of \$63 million, or \$0.09 per share.

(8) Amount primarily relates to day-one losses at commencement of sales-type leases at AES Renewable Holdings of \$63 million, or \$0.09 per share, and the loss on partial sale of our ownership interest in Amman East and IPP4 in Jordan of \$10 million, or \$0.01 per share, partially offset by a gain on dilution of ownership in Uplight due to its acquisition of AutoGrid of \$52 million, or \$0.07 per share.

(9) Amount primarily relates to impairment at Brazil of \$103 million, or \$0.14 per share.

(10) Amount primarily relates to asset impairments at the Norgener coal-fired plant in Chile of \$136 million, or \$0.19 per share, and the GAF Projects at AES Renewable Holdings of \$18 million, or \$0.03 per share for the three and six months ended June 30, 2023.

(11) Amount primarily relates to impairment at Brazil of \$103 million, or \$0.14 per share, and impairment at Mong Duong of \$19 million \$22 million, or \$0.03 per share.

(12) Amount primarily relates to losses incurred at AES Andes due to early retirement of debt of \$16 million, or \$0.02 per share.

(13) Amount primarily relates to losses incurred at AES Andes due to early retirement of debt of \$29 million, or \$0.04 per share, and costs incurred due to troubled debt restructuring at Puerto Rico of \$19 million \$20 million, or \$0.03 per share.

(14) Amount primarily relates to income tax benefits associated with the tax over book investment basis differences related to the AES Brasil held-for-sale classification of \$59 million, or \$0.08 per share, for the three and six months ended June 30, 2024.

(15) Amount primarily relates to income tax benefits associated with the asset impairment at the Norgener coal-fired plant in Chile of \$33 million, or \$0.05 per share, and income tax benefits associated with the recognition of unrealized losses due to the termination of a PPA of \$18 million, or \$0.02 per share, for the three and six months ended June 30, 2023.

## Renewables SBU

The following table summarizes Operating Margin, Adjusted EBITDA, and Adjusted EBITDA with Tax Attributes (in millions) for the periods indicated:

	Three Months Ended March 31,			Three Months Ended June 30,			Six Months Ended June 30,						
	2024		2024	2023	\$ Change	% Change	2024	2023	\$ Change

Adjusted EBITDA with Tax Attributes <sup>(1)</sup>													
Adjusted EBITDA with Tax Attributes <sup>(1)</sup>													

<sup>(1)</sup> A non-GAAP financial measure. See *SBU Performance Analysis—Non-GAAP Measures* for definition.

Operating Margin for the three months ended **March 31, 2024** June 30, 2024 decreased **\$35 million** \$27 million, driven primarily by worse hydrology, lower wind generation, higher energy purchase prices, and higher fixed costs and depreciation related outages at Colombia due to new projects. This decrease was a flooding incident at the Chivor plant, partially offset by better hydrology at Panama and unrealized derivative gains.

Adjusted EBITDA for the three months ended **March 31, 2024** June 30, 2024 decreased **\$22 million** \$24 million, primarily due to the drivers mentioned above, adjusted for NCI, unrealized derivatives, and depreciation.

Adjusted EBITDA with Tax Attributes for the three months ended **March 31, 2024** June 30, 2024 increased **\$191 million** \$115 million, primarily due to higher realized tax attributes driven by more renewables projects placed in service, partially offset by the decrease in Adjusted EBITDA. During the three months ended **March 31, 2024** June 30, 2024 and 2023, we realized **\$226 million** \$177 million and **\$13 million** \$38 million, respectively, from tax attributes earned by our U.S. renewables business.

Operating Margin for the six months ended June 30, 2024 decreased \$62 million, driven primarily by higher fixed costs due to an accelerated growth plan, worse hydrology and lower wind and solar availability, and higher outages at Colombia due to a flooding incident at the Chivor plant, partially offset by unrealized derivative gains.

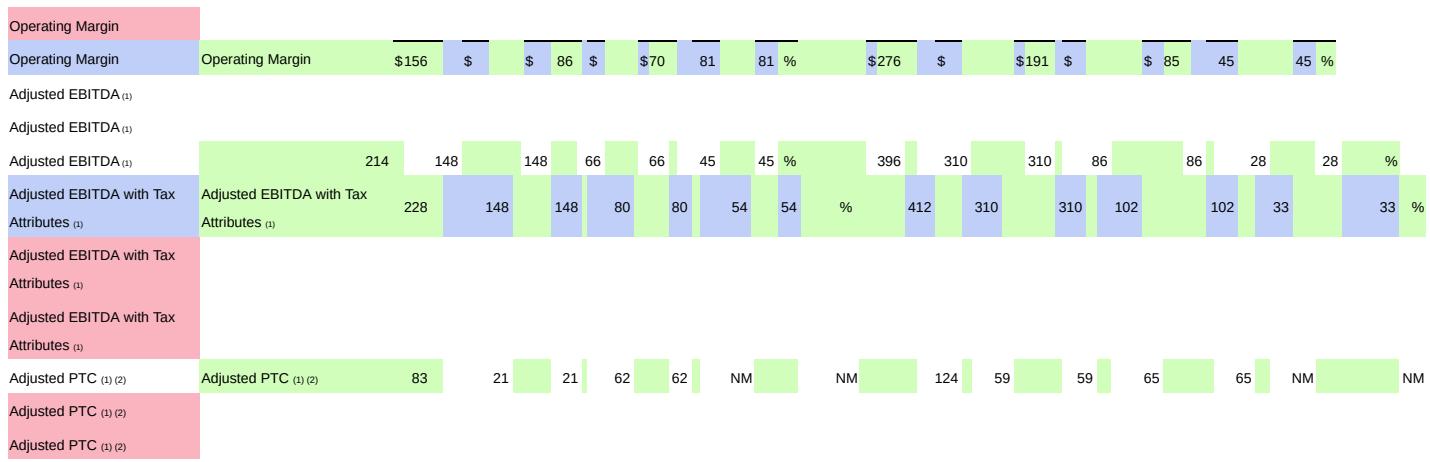

Adjusted EBITDA for the six months ended June 30, 2024 decreased \$46 million, primarily due to the drivers mentioned above, adjusted for NCI, unrealized derivatives, and depreciation.

Adjusted EBITDA with Tax Attributes for the six months ended June 30, 2024 increased \$306 million, primarily due to higher realized tax attributes driven by more renewables projects placed in service, partially offset by the decrease in Adjusted EBITDA. During the six months ended June 30, 2024 and 2023, we realized \$403 million and \$51 million, respectively, from tax attributes earned by our U.S. renewables business.

## Utilities SBU

The following table summarizes Operating Margin, Adjusted EBITDA, Adjusted EBITDA with Tax Attributes, and Adjusted PTC (in millions) for the periods indicated:

	Three Months Ended March 31,			Three Months Ended June 30,			Six Months Ended June 30,				
	2024		2024	2023	\$ Change	% Change	2024	2023	\$ Change

Operating Margin											
Operating Margin											
Operating Margin	Operating Margin	\$91	\$118	\$ (27)	-23	-23 %	\$144	\$206	\$ (62)	-30	-30 %

<sup>(1)</sup> A non-GAAP financial measure. See SBU Performance Analysis—Non-GAAP Measures for definition.

42 | The AES Corporation | March 31, 2024 Form 10-Q

<sup>(2)</sup> Adjusted PTC remains a key metric used by management for analyzing our businesses in the utilities industry.

Operating Margin for the three months ended **March 31, 2024** **June 30, 2024** increased **\$15 million**, **\$70 million**, mainly driven by higher demand due to the impact of **weather**, **weather**; increases in transmission and rider revenues due to higher distribution investment rider revenues **TDSIC**, **ECCRA** and **DIR**; and higher retail rates as a result of the **ESP 4** approved in the fourth quarter of 2023, and an increase in transmission and **TDSIC** rider revenues, partially offset by higher fixed costs. **2024 Base Rate Order**.

Adjusted EBITDA for the three months ended **March 31, 2024** **June 30, 2024** increased **\$20 million**, **\$66 million**, primarily due to the drivers above, adjusted for NCI and **depreciation expense**, **depreciation**.

Adjusted EBITDA with Tax Attributes increased **\$22 million**, **\$80 million** due to the drivers above, as well as **\$2 million**, **\$14 million** of realized tax attributes related to the **Hardy Hills** solar project in the current year.

Adjusted PTC for the three months ended **March 31, 2024** **June 30, 2024** increased **\$3 million**, **\$62 million** due to the drivers above, partially offset by higher depreciation expense and higher interest expense, primarily due to increased borrowings at **IPALCO**.

53 | The AES Corporation | June 30, 2024 Form 10-Q

Operating Margin for the six months ended June 30, 2024 increased **\$85 million**, mainly driven by higher demand due to the impact of **weather**; increases in transmission and rider revenues due to higher **TDSIC**, **ECCRA** and **DIR**; and higher retail rates as a result of the **2024 Base Rate Order**.

Adjusted EBITDA for the six months ended June 30, 2024 increased **\$86 million**, primarily due to the drivers above, adjusted for NCI and depreciation.

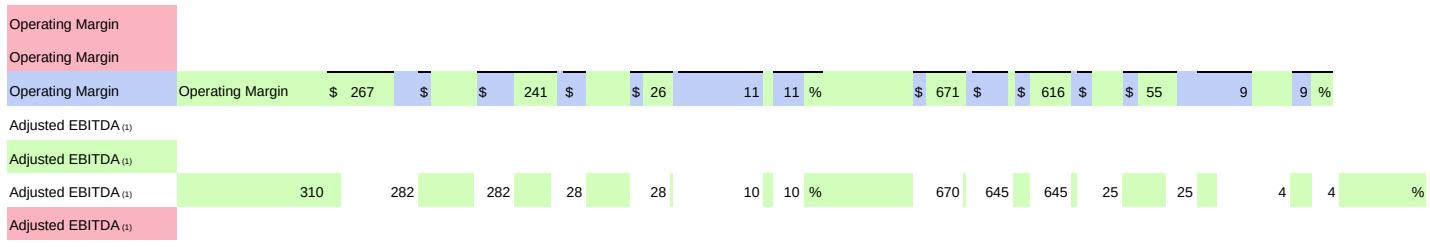

Adjusted EBITDA with Tax Attributes increased **\$102 million** due to the drivers above, as well as **\$16 million** of realized tax attributes related to the **Hardy Hills** solar project in the current year.

Adjusted PTC for the six months ended June 30, 2024 increased **\$65 million** due to the drivers above, partially offset by higher depreciation expense and higher interest expense, primarily due to increased borrowings at **IPALCO**.

## Energy Infrastructure SBU

The following table summarizes Operating Margin and Adjusted EBITDA (in millions) for the periods indicated:

Three Months Ended March 31,			Three Months Ended June 30,			Six Months Ended June 30,		
			2024	2023	\$ Change	2024	2023	\$ Change
			2024	2023	% Change	2024	2023	% Change
	2024							
	2024							
	2024							

(1) A non-GAAP financial measure. See SBU Performance Analysis—Non-GAAP Measures for definition.

Operating Margin for the three months ended **March 31, 2024** June 30, 2024 increased \$29 million, driven primarily by higher revenues due to a PPA termination agreement. This increase was partially offset by losses resulting from unrealized derivatives as part of our commercial strategy, higher outages, and impact of the selldown of Amman East and IPP4 in Jordan.

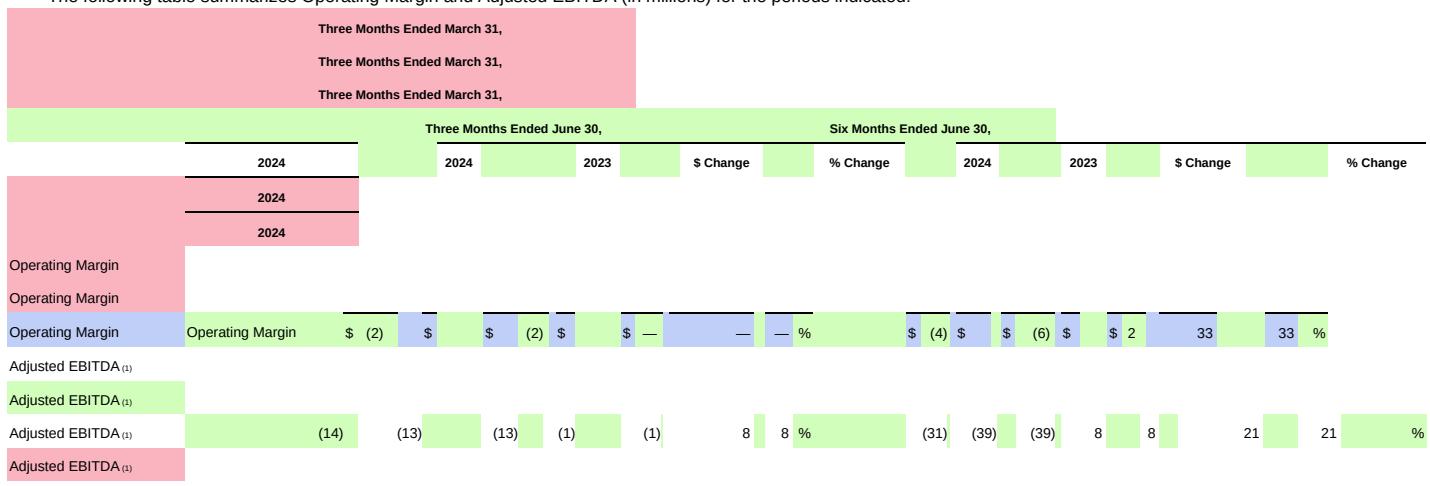

Adjusted EBITDA for the three months ended June 30, 2024 increased \$28 million, primarily due to the drivers above adjusted for NCI, depreciation, and unrealized derivatives, as well as lower realized foreign currency losses.

Operating Margin for the six months ended June 30, 2024 increased \$55 million, driven primarily by higher revenues due to a PPA termination agreement and gains termination. This increase was partially offset by higher outages, lower LNG transactions, losses resulting mainly from unrealized derivatives as part of our commercial hedging strategy. These increases were partially offset by lower LNG transactions, higher contract generation cost, strategy, and higher outages. impact of the selldown of Amman East and IPP4 in Jordan.

Adjusted EBITDA for the **three** six months ended **March 31, 2024** decreased \$3 million, June 30, 2024 increased \$25 million, primarily due to the drivers above, adjusted for NCI, depreciation, and unrealized derivative gains, as well as higher realized foreign currency losses.

## New Energy Technologies SBU

The following table summarizes Operating Margin and Adjusted EBITDA (in millions) for the periods indicated:

(1) A non-GAAP financial measure. See SBU Performance Analysis—Non-GAAP Measures for definition.

Operating Margin was flat for the three months ended **March 31, 2024** increased \$2 million June 30, 2024, with no material drivers.

Adjusted EBITDA for the three months ended **March 31, 2024** June 30, 2024 decreased \$1 million, with no material drivers.

Operating Margin for the six months ended June 30, 2024 increased \$9 million, with no material drivers.

Adjusted EBITDA for the six months ended June 30, 2024 increased \$8 million, primarily due to a reduction in losses at Fluence driven by increases in margin as a result of higher margins on the newer Gen 6 solutions projects. a new product line.

## Key Trends and Uncertainties

During 2024 and beyond, we expect to face the following challenges at certain of our businesses. Management expects that improved operating performance at certain businesses, growth from new businesses, and global cost reduction initiatives may lessen or offset their impact. If these favorable effects do not occur, or if the challenges described below and elsewhere in this section impact us more significantly than we currently anticipate,

or if volatile foreign currencies and commodities move more unfavorably, then these adverse factors (or other adverse factors unknown to us) may have a material impact on our operating margin, net income attributable to The AES Corporation, and cash flows. We continue to monitor our operations and address challenges as they arise. For the risk factors related to our business, see Item 1.—Business and Item 1A.—Risk Factors of our 2023 Form 10-K.

## Operational

---

43 | The AES Corporation | March 31, 2024 Form 10-Q

**Trade Restrictions and Supply Chain** — On March 29, 2022, the U.S. Department of Commerce (“Commerce”) announced the initiation of an investigation into whether imports into the U.S. of solar cells and panels imported from Cambodia, Malaysia, Thailand, and Vietnam (“Southeast Asia”) are circumventing antidumping and countervailing duty (“AD/CVD”) orders on solar cells and panels from China. This investigation resulted in significant systemic disruptions to the import of solar cells and panels from Southeast Asia. On June 6, 2022, President Biden issued a Proclamation waiving any circumvention duties on imported solar cells and panels from Southeast Asia that result from this investigation for a 24-month period ending June 6, 2024. Suppliers resumed importing cells and panels from Southeast Asia into the U.S. pursuant to a Commerce certification regime implementing the Proclamation.

On December 2, 2022, Commerce issued country-wide affirmative preliminary determinations that circumvention had occurred in each of the four Southeast Asian countries. Commerce also evaluated numerous individual companies and issued preliminary determinations that circumvention had occurred with respect to **many** **several** but not all of these companies. Additionally, Commerce issued a preliminary determination that circumvention would not be deemed to occur for any solar cells and panels imported from the four countries if the wafers comprising the cells and panels were manufactured outside of China or if no more than two out of six specifically identified panel components were produced in China. On August 18, 2023, Commerce issued its final determinations on the matter and affirmed its preliminary findings in most respects. Additionally, Commerce found that three of the specific companies it investigated were not circumventing. Several parties have challenged Commerce’s circumvention final determinations before the U.S. Court of International Trade (“CIT”), arguing that the determinations were not supported by substantial evidence or otherwise rendered in accordance with governing law.

On December 29, 2023, Auxin Solar and Concept Clean Energy filed a lawsuit **with the U.S. Court of International Trade**, before CIT, challenging certain aspects of the final rule promulgated by Commerce to implement the Proclamation. The lawsuit specifically challenges Commerce’s decisions not to suspend the final disposition of certain entries of imported solar cells and panels from Southeast Asia made prior to June 6, 2024, and not to collect AD/CVD deposits with respect to those entries. Certain U.S. developers, associations, and foreign solar producers have intervened in the case to support Commerce’s final rule. The CIT denied motions to dismiss filed by the U.S. Department of Justice, has responded by filing a motion to dismiss and the **lawsuit**, defendant-intervenors, and on July 22, 2024, plaintiffs filed their opening brief on the merits.

On April 24, 2024, new Commerce regulations with respect to the administration of AD/CVD cases went into effect, including regulations pertaining to transnational subsidization and particular market situations. On the same day, several companies filed a petition requesting that Commerce initiate an investigation into whether new AD/CVD duties should be imposed on cells and modules imported from Thailand, Cambodia, Malaysia, and Vietnam. If Commerce initiates such an investigation, it could cause disruptions to the import. These petitions cover exports of solar cells and panels from such countries. Southeast Asia that are not otherwise subject to the Commerce circumvention determinations. On May 14, 2024, Commerce initiated new AD/CVD investigations with respect to all four countries, and the U.S. International Trade Commission (the “ITC”) preliminarily voted to continue its investigations on June 7, 2024. Commerce is scheduled to announce its preliminary determinations and duty rates in these investigations in the fall of 2024. The ITC will conduct its final injury investigation with respect to these exports from Southeast Asia in the first half of 2024. If the Commerce and ITC investigations result in Commerce issuing AD/CVD orders, the orders are likely to be imposed in the second or third quarter of 2025.

Separately, the United States maintains a global tariff (currently 14.25% ad valorem) on solar cells and modules pursuant to the Section 201 Safeguard Action on crystalline silicon photovoltaic products, which became effective in February 2018. On June 21, 2024, President Biden issued Proclamation 10779, revoking the exclusion of bifacial panels from safeguard relief previously proclaimed in Proclamation 10339, and reinstating bifacial panels under the Section 201 Safeguard Action, subject to certain qualifications.

Additionally, the Uyghur Forced Labor Prevention Act (“UFLPA”) seeks to block the import of products made with forced labor in certain areas of China and may lead to certain suppliers being blocked from importing solar cells and panels to the U.S. While this has impacted the U.S. market, AES has managed this issue without significant impact to our projects. Further disruptions may impact our suppliers’ ability or willingness to meet their contractual agreements or to continue to supply cells or panels into the U.S. market on terms that we deem satisfactory.

---

55 | The AES Corporation | June 30, 2024 Form 10-Q

The impact of new Commerce investigations or any additional adverse Commerce determinations or other tariff disputes or litigation, the impact of the UFLPA, potential future disruptions to the solar panel supply chain and their effect on AES’ U.S. solar project development and construction activities remain uncertain. AES will continue to monitor developments and take prudent steps towards maintaining a robust supply chain for our renewables projects.

We To that end, we have contracted and secured our expected requirements for all of the necessary solar panels for U.S. our projects targeted in our backlog expected to achieve commercial operations come online through 2026. We expect to have all the 2024 panels and the majority of the 2025 and 2026 panels on site or in storage by September.

Additionally, as part of our supply chain strategy, we are well advanced in securing domestically manufactured modules to support our US solar growth from 2026 to 2028, with a contractual option to extend deliveries to 2030.

**Operational Sensitivity to Dry Hydrological Conditions**— Our hydroelectric generation facilities are sensitive to changes in the weather, particularly the level of water inflows into generation facilities. Dry hydrological conditions in Panama, Brazil, Colombia, and Chile can present challenges for our businesses in these markets. Low inflows can result in low reservoir levels, reduced generation output, and subsequently possible increased prices for electricity. If our hydroelectric generation facilities cannot generate sufficient energy to meet contractual arrangements, we may need to purchase energy to fulfill our obligations, which could have an adverse impact on AES. Asmitigation, AES has invested in

thermal, wind, and solar generation assets, which have a complementary profile to hydroelectric plants. These plants are expected to have increased generation in low hydrology scenarios, offsetting possible impacts described from hydro assets.

According to the National Oceanic and Atmospheric Administration ("NOAA"), El Niño neutral conditions are observed and forecasted through the beginning of Q3 of 2024. A transition from El Niño to ENSO-neutral is likely by mid-2024, with the indications of La Niña developing is expected by mid / late Q3 of 2024.

---

44 | The AES Corporation | March 31, 2024 Form 10-Q

In Panama, consistent with expected El Niño impacts, local hydrological forecasts indicate below historical average inflows persisting into Q2 of 2024, which could impact our results of operations. AES reduced its total generation exposure in Panama to dry hydrological conditions through investments in such complementary assets as the Colon LNG power facility, which commenced operations in 2018, the Penonome Wind Farm, and solar projects, providing a stable and independent diversified energy supply during periods of drought or when hydroelectric generation is limited. In Panama, the La Niña phenomenon in contrast to El Niño typically means wetter conditions than average, although local system impacts may vary due to other factors. Higher hydrology may result in energy surpluses after covering the contracted hydro positions, available to be sold in the spot market after fulfilling contract obligations.

In Colombia, El Niño is characterized by drought and may result in higher spot prices as observed in Q1 of 2024 and early Q2 2024. Lower overall AES Chivor hydrology may result in increased spot price energy exposure to cover contracted positions. The basin where AES Chivor is located typically experiences wet conditions from June through September in contrast with the broader system, which can result in additional energy available to sell in the spot market after fulfilling contract obligations. La Niña in Colombia is typically characterized by more rainfall, possibly leading to a decrease in spot prices. However, during La Niña, impacts vary and the basin where Chivor is located may experience drier conditions than the system.

In Brazil, El Niño generally means more rainfall in the South and higher temperatures in the central region of the country, as seen in the last quarter of 2023, while La Niña results in more rainfall in the North, drier conditions in the South, and milder temperatures in the central region, which could result in lower demand. Current system reservoir levels remain high, which supports lower spot market prices. However, inflows lower than expected may cause spot and future prices through the remainder of 2024 mitigating hydrological risk following a dry Q1, which led to higher power prices. Lower prices limit external thermal generation which, if dispatched, could impact demand for the AES hydro generation.

In Chile, the primary driver for AES' hydro assets is snowpack volumes. La Niña in Chile tends to divert the frontal systems to the south of Chile, reducing rainfall in the central area, possibly reducing the snowpack formation. Lower snowpack, together with reduced rainfall in the system, could increase both spot prices and energy purchase volumes required to meet contracted positions.

The exact behavior pattern and strength of El Niño and the potential evolution towards La Niña is unknown and therefore the impacts could vary from those described above, and may include impacts to our businesses beyond hydrology, including with respect to power generation from other renewable sources of energy and demand. Even if rainfall and water inflows return to or exceed historical averages, in some cases high market prices and low generation above or below the average could persist until reservoir levels are fully recovered. Further, investments made in thermal, wind, and solar power generation may benefit from uncontracted spot sales at higher market prices. Impacts may be material to our results of operations.

## Macroeconomic and Political

During the past few years, some countries where our subsidiaries conduct business have experienced macroeconomic and political changes. In the event these trends continue, there could be an adverse impact on our businesses.

**Inflation Reduction Act and U.S. Renewable Energy Tax Credits** — The U.S. Inflation Reduction Act of 2022 (the "IRA") was signed into law in the United States. The IRA includes provisions that are expected to benefit the U.S. clean energy industry, including increases, extensions, direct transfers, and/or new tax credits for onshore and offshore wind, solar, storage, and hydrogen projects. We expect that the extension of the current The IRA extends solar investment tax credits ("ITCs"), as well as and provides higher credits available for projects that satisfy wage and apprenticeship requirements, will increase demand for which benefit our U.S. renewables products, business.

Our U.S. renewables business has a 51 GW pipeline that we intend to utilize to continue to grow our business, and these changes in tax policy are supportive of this strategy. We account for U.S. renewables projects according to U.S. GAAP, which, when partnering with tax-equity investors to monetize tax benefits, utilizes the HLBV method.

---

56 | The AES Corporation | June 30, 2024 Form 10-Q

This method recognizes the tax-credit value that is transferred to tax equity investors at the time of its creation, which for projects utilizing the investment tax credit begins in the quarter the project is placed in service. For projects utilizing the production tax credit, this value is recognized over 10 years as the facility produces energy.

The IRA also allows us to directly transfer investment tax credits to unrelated tax credit buyers. We account for the transfer proceeds as tax benefit throughout the year the renewables project is placed in service.

In 2023, we realized \$611 million of earnings from Tax Attributes, tax attributes, comprised of \$593 million from the Renewables SBU and \$18 million from the Utilities SBU. In 2024, we expect an increase in Tax Attributes tax attributes earned by

---

45 | The AES Corporation | March 31, 2024 Form 10-Q

our U.S. renewables business in line with the growth in that business. Based on construction schedules, a significant portion of these earnings will be realized in the fourth quarter. For the six months ended June 30, 2024, we recognized \$419 million in tax attributes.

The implementation of the IRA requires substantial guidance from the U.S. Department of Treasury and other government agencies. While some of that guidance remains pending, there will be uncertainty with respect to the implementation of certain provisions of the IRA.

**Argentina** — The recent election of President Javier Milei was elected on December 10, 2023 and has instituted a series of reforms impacting the power sector.

On July 8, 2024, marks a pivotal moment the Argentine government enacted Law 27,742 or Ley Bases, translated in Argentina's economic landscape. The entering administration issued Decree No. 55/23, signaling a commitment to total economic deregulation. This decree English as Law of Bases and Starting Points for the Freedom of the Argentine People. Ley Bases declares a state of public emergency in administrative, economic, financial, and energy matters for a term of one year, grants delegated powers to the power sector, tariff revisions President, and contains a broad reform of the State in order to deregulate the economy, including measures such as labor reform, the implementation of the Incentive Regime for electric power Large Investments, and natural gas transport and distribution, and a broader proposal for sector-wide reform.

President Milei the modification of several tax measures. The law also proposed a new bill, currently under review by Congress, that seeks to overhaul the energy regulatory framework. Emphasizing deregulation, the bill opens avenues for privatization of state-owned energy companies.

In addition, the Ministry of Energy published Resolution 150/2024 on July 10, 2024 that repeals certain regulations from previous years that imply excessive involvement of the National State and CAMMESA in the operation and functioning of the wholesale electricity market.

These proposed changes may have a profound impact on the sector, influencing our operations and financial results. It is not yet possible to predict the impact of these regulations in our consolidated results of operations, cash flows, and financial condition.

**Global Tax** — The macroeconomic and political environments in the U.S. and in some countries where our subsidiaries conduct business have changed in recent years. This could result in significant impacts to future tax law. In the U.S., the IRA includes a 15% corporate alternative minimum tax based on adjusted financial statement income. Additional guidance is expected to be issued in 2024.

During 2023, the Netherlands, Bulgaria, and Vietnam adopted legislation to implement Pillar 2 effective as of January 1, 2024. We will continue to monitor the issuance of draft legislation in other non-EU countries where the Company operates that are considering Pillar 2 amendments and new interpretive guidance. The impact to the Company during 2024 is not expected to be material.

**Inflation** — In the markets in which we operate, there have been higher rates of inflation recently. While most of our contracts in our international businesses that are denominated in a currency other than the U.S. dollar are indexed to inflation, in general, our U.S.-based generation contracts are not indexed to inflation. If inflation continues to increase in our markets, it may increase our expenses that we may not be able to pass through to customers. It may also increase the costs of some of our development projects that could negatively impact their competitiveness. Our utility businesses do allow for recovering of operations and maintenance costs through the regulatory process, which may have timing impacts on recovery.

**Interest Rates** — In the U.S. and other markets in which we operate, there has been a rise in interest rates since 2021, and interest rates are expected to remain volatile in the near term.

As discussed in Item 3—Quantitative and Qualitative Disclosures about Market Risk, although most of our existing corporate and subsidiary debt is at fixed rates, an increase in interest rates can have several impacts on our business. For any existing debt under floating rate structures and any future debt refinancings, rising interest rates will increase future financing costs. In most cases in which we have floating rate debt, our revenues serving this debt are indexed to inflation, which helps mitigate the impact of rising rates. For future debt refinancings, AES actively manages a hedging program to reduce uncertainty and exposure to future interest rates. For new business, higher interest rates increase the financing costs for new projects under development and which have not yet secured financing.

---

57 | The AES Corporation | June 30, 2024 Form 10-Q

AES typically seeks to incorporate expected financing costs into our new PPA pricing such that we maintain our target investment returns, but higher financing costs may negatively impact our returns or the competitiveness of some of our development projects. Additionally, we typically seek to enter into interest rate hedges shortly after signing PPAs to mitigate the risk of rising interest rates prior to securing long-term financing.

**Puerto Rico** — As discussed in Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations—Key Trends and Uncertainties of the 2023 Form 10-K, our subsidiaries in Puerto Rico have long-term PPAs with state-owned PREPA, which has been facing economic challenges that could result in a material adverse effect on our business in Puerto Rico. Despite the Title III protection, PREPA has been making substantially all of its payments to the generators in line with historical payment patterns.

The Puerto Rico Oversight, Management, and Economic Stability Act ("PROMESA") was enacted to create a structure for exercising federal oversight over the fiscal affairs of U.S. territories and created procedures for adjusting debt accumulated by the Puerto Rico government and, potentially, other territories ("Title III"). PROMESA also expedites the approval of key energy projects and other critical projects in Puerto Rico.

---

46 | The AES Corporation | March 31, 2024 Form 10-Q

PROMESA allowed for the establishment of an Oversight Board with broad powers of budgetary and financial control over Puerto Rico. The Oversight Board filed for bankruptcy on behalf of PREPA under Title III in July 2017. As a result of the bankruptcy filing, AES Illumina's non-recourse debt of \$24 million \$23 million continues to be in

technical default and is classified as current as of **March 31, 2024** June 30, 2024.

On April 12, 2022, In 2022, a mediation team was appointed to prepare the plan commenced to resolve the PREPA Title III case and related proceedings. A disclosure statement hearing was held on April 28, 2023. The mediation was extended through August 4, 2023. On November 14, 2023, the Judge presiding over the case approved the supplemental disclosure statement for PREPA's Fourth Modified Third Amended Title III Plan of Adjustment. The confirmation trial ended on March 18, 2024, with in March 2024 and the Judge's decision is pending.

In 2023, AES Puerto Rico took certain measures to address identified liquidity challenges. On July 6, 2023, PREPA agreed to the release of funds in the escrow account guaranteeing AES Puerto Rico's obligations under the Power Purchase and Operating Agreement ("PPOA") in order to provide additional liquidity for the business. During the fourth quarter of 2023, a restructuring support agreement was executed by AES Puerto Rico and its noteholders and a PPOA amendment was approved by PREPA. Under this new agreement, PREPA's bankruptcy under Title III does not result in a technical default for AES Puerto Rico, and therefore its non-recourse debt of \$161 million is classified as long-term. The restructuring closed on March 5, 2024. See Note 8—Debt included in Item 1.—Financial Statements of this Form 10-Q for further information.

Despite these challenges and considering the information available as of the filing date, management believes the carrying amount of our long-lived assets at **AES** in Puerto Rico of **\$78** \$203 million is recoverable as of **March 31, 2024** June 30, 2024.

**Mexico Migration** — The interconnection agreements for TEG and TEP under the self-supply energy regime in Mexico were due to expire in April 2024. Consequently, TEG and TEP are required to migrate into the new energy regime established by the Electricity Industry Law of 2021 ("LIE") and to execute new interconnection agreements prior to the expiration of the current interconnection agreements. In February and September 2022, respectively, TEG and TEP made formal requests to the Mexican Comision Reguladora de Energia ("CRE") to update the projects' permits and allow them to migrate into the LIE ("Migration Requests"). On March 26, 2024, CRE granted the migration permits for TEG and TEP. On March 27, 2024, TEG and TEP filed their request with El Centro Nacional de Control de Energía (CENACE) for the execution of the new interconnection agreements, and on April 18, 2024, the agreements were executed.

## Decarbonization Initiatives

Our strategy involves shifting towards clean energy platforms, including renewable energy, energy storage, LNG, and modernized grids. It is designed to position us for continued growth while reducing our carbon intensity and to be in support of our mission of accelerating the future of energy, together. We have made significant progress on our exit of coal generation, and we intend to exit the substantial majority of our remaining coal facilities by year-end 2025 and intend to exit all of the coal facilities by year-end 2027, subject to necessary approvals.

In addition, initiatives have been announced by regulators, including in Chile, Puerto Rico, and Bulgaria, and offtakers in recent years, with the intention of reducing GHG emissions generated by the energy industry. In parallel, the shift towards renewables has caused certain customers to migrate to other low-carbon energy solutions and this trend may continue.

Although we cannot currently estimate the financial impact of these decarbonization initiatives, new legislative or regulatory programs further restricting carbon emissions or other initiatives to voluntarily exit coal generation could require material capital expenditures, resulting in a reduction of the estimated useful life of certain coal facilities, or have other material adverse effects on our financial results.

For further information about the risks associated with decarbonization initiatives, see Item 1A.—Risk Factors—Concerns about GHG emissions and the potential risks associated with climate change have led to increased regulation and other actions that could impact our businesses included in the 2023 Form 10-K.

## Regulatory

**El Salvador** — On July 17, 2024, the Government of El Salvador passed various changes to the electricity law impacting, among other things, tariff reset timing and the treatment of bi-lateral contracts. These changes are pending clarification once published in the electricity regulation. Pending completion of that process, the impact of these changes is unclear, but they may be adverse to the Company's financial condition and results.

**AES Maritza PPA Review** — DG Comp is conducting a preliminary review of whether AES Maritza's PPA with NEK is compliant with the European Union's State Aid rules. No formal investigation has been launched by DG Comp to date. AES Maritza has previously engaged in discussions with the DG Comp case team and the Government of Bulgaria ("GoB") to attempt to reach a negotiated resolution of the DG Comp's review ("PPA Discussions"). There are no active PPA Discussions at present but those discussions could resume at any time. The

---

58 | The AES Corporation | **March 31, 2024** June 30, 2024 Form 10-Q

PPA continues to remain in place. However, there can be no assurance that, in the context of DG Comp's preliminary review or any future PPA Discussions, the other parties will not seek a prompt termination of the PPA.

We do not believe termination of the PPA is justified. Nevertheless, the PPA Discussions involved a range of potential outcomes, including but not limited to the termination of the PPA and payment of some level of compensation to AES Maritza. Any negotiated resolution would be subject to mutually acceptable terms, tender consent, and DG Comp approval. At this time, we cannot predict whether and when the PPA Discussions might resume or the outcome of any such discussions. Nor can we predict how DG Comp might resolve its review if the PPA Discussions do not resume or if any such discussions fail to result in an agreement concerning the agency's review. AES Maritza believes that its PPA is legal and in compliance with all applicable laws, and it will take all actions necessary to protect its interests, whether through negotiated agreement or otherwise. However, there can be no assurance that this matter will be resolved favorably; if it is not, there could be a material adverse effect on the Company's financial condition, results of operations, and cash flows. As of **March 31, 2024** June 30, 2024, the carrying value of our long-lived assets at Maritza is **\$332 million** \$326 million.

**AES Indiana DSM Plan Petition** — On May 31, 2024, AES Indiana filed a petition with the IURC asking for approval of a two year Demand-Side Management (DSM) plan for the 2025-2026 program years. The petition includes requested cost recovery of programs as well as performance incentives, depending on the level of success of the programs consistent with prior DSM plans. We expect the IURC to issue an order on this proceeding by the end of 2024.

**AES Indiana Regulatory Rate Review** — On April 17, 2024, the IURC issued an order (the “2024 Rate Order”) approving the Stipulation and Settlement Agreement that AES Indiana entered into on November 22, 2023, with the Office of Utility Consumer Counselor (“OUCC”) and the other intervening parties in AES Indiana’s base rate case filing. Among other matters and consistent with the Stipulation and Settlement Agreement, the 2024 Rate Order approves an increase in AES Indiana’s total annual operating revenue of \$71 million for AES Indiana’s electric service and provides a return on common equity of 9.9% and cost of long-term debt of 4.90% on a rate base of approximately \$3.5 billion. Updated customer rates and charges ~~are expected to be~~ became effective ~~in May 2024~~ on May 9, 2024.

**AES Indiana Petersburg Repowering** — On March 11, 2024, AES Indiana filed for approval of a CPCN seeking for IURC approval to repower Petersburg Generation Units 3 & 4 from coal to natural gas and to recover costs through future rates. The conversion of Unit 3 is expected to begin in February 2026 and be completed by June 2026 and the conversion of Unit 4 is expected to begin in June 2026 and be completed by December 2026. A hearing for this case is expected to be held in August 2024, and we expect the IURC to issue an order on this proceeding during the fourth quarter of 2024.

**AES Ohio Smart Grid Phase 2 Filing** — In February 2024, AES Ohio filed a Smart Grid Phase 2 with the PUCO proposing to invest approximately \$683 million in capital projects over a 10-year period following the Smart Grid Phase 1, which ends June 2025.

## Foreign Exchange Rates

We operate in multiple countries and as such are subject to volatility in exchange rates at varying degrees at the subsidiary level and between our functional currency, the USD, and currencies of the countries in which we operate.

The overall economic climate in Argentina has deteriorated, resulting in volatility and increased the risk that a further significant devaluation of the Argentine peso against the USD, similar to the devaluations experienced by the country in 2018, 2019, and 2023, may occur. A continued trend of peso devaluation could result in increased inflation, a deterioration of the country’s risk profile, and other adverse macroeconomic effects that could significantly impact our results of operations. For additional information, refer to Item 3.—*Quantitative and Qualitative Disclosures About Market Risk*.

## Impairments

**Long-lived Assets and Current Assets Held-for-Sale** — During the ~~three~~<sup>six</sup> months ended ~~March 31, 2024~~ June 30, 2024, the Company recognized asset impairment expense of ~~\$46 million~~ \$276 million. See Note 16—*Asset Impairment Expense* included in Item 1.—*Financial Statements* of this Form 10-Q for further information. After recognizing this impairment expense, the carrying value of long-lived assets and current assets held-for-sale that were assessed for impairment totaled ~~\$78 million~~ \$2.3 billion at ~~March 31, 2024~~ June 30, 2024.

Events or changes in circumstances that may necessitate recoverability tests and potential impairments of

---

59 | The AES Corporation | June 30, 2024 Form 10-Q

long-lived assets may include, but are not limited to, adverse changes in the regulatory environment, unfavorable changes in power prices or fuel costs, increased competition due to additional capacity in the grid, technological advancements, declining trends in demand, evolving industry expectations to transition away from fossil fuel sources for generation, or an expectation it is more likely than not the asset will be disposed of before the end of its estimated useful life.

---

48 | The AES Corporation | March 31, 2024 Form 10-Q

## Environmental

The Company is subject to numerous environmental laws and regulations in the jurisdictions in which it operates. The Company faces certain risks and uncertainties related to these environmental laws and regulations, including existing and potential GHG legislation or regulations, and actual or potential laws and regulations pertaining to water discharges, waste management (including disposal of coal combustion residuals) and certain air emissions, such as SO<sub>2</sub>, NO<sub>x</sub>, particulate matter, mercury, and other hazardous air pollutants, and species and habitat protections. Such risks and uncertainties could result in increased capital expenditures or other compliance costs which could have a material adverse effect on certain of our U.S. or international subsidiaries and our consolidated results of operations. For further information about these risks, see Item 1A.—*Risk Factors*—*Our operations are subject to significant government regulation and could be adversely affected by changes in the law or regulatory schemes; Several of our businesses are subject to potentially significant remediation expenses, enforcement initiatives, private party lawsuits and reputational risk associated with CCR; Our businesses are subject to stringent environmental laws, rules and regulations; and Concerns about GHG emissions and the potential risks associated with climate change have led to increased regulation and other actions that could impact our businesses* included in the 2023 Form 10-K.

**CSAPR** — CSAPR addresses the “good neighbor” provision of the CAA, which prohibits sources within each state from emitting any air pollutant in an amount which will contribute significantly to any other state’s nonattainment, or interference with maintenance of, any NAAQS. The CSAPR required significant reductions in SO<sub>2</sub> and NO<sub>x</sub> emissions from power plants in many states in which subsidiaries of the Company operate. The Company is required to comply with the CSAPR in certain states, including Indiana and Maryland. The CSAPR is implemented, in part, through a market-based program under which compliance may be achievable through the acquisition and use of emissions allowances created by the EPA. The Company complies with CSAPR through operation of existing controls and purchases of allowances on the open market, as needed.

In October 2016, the EPA published a final rule to update the CSAPR to address the 2008 ozone NAAQS (“CSAPR Update Rule”). The CSAPR Update Rule found that NO<sub>x</sub> ozone season emissions in 22 states (including Indiana and Maryland) affected the ability of downwind states to attain and maintain the 2008 ozone NAAQS, and, accordingly, the EPA issued federal implementation plans that both updated existing CSAPR NO<sub>x</sub> ozone season emission budgets for electric generating units within these states and implemented

these budgets through modifications to the CSAPR NO<sub>x</sub> ozone season allowance trading program. Implementation started in the 2017 ozone season (May-September 2017). Affected facilities receive fewer ozone season NO<sub>x</sub> allowances in 2017 and later, possibly resulting in the need to purchase additional allowances. Following legal challenges to the CSAPR Update Rule, on April 30, 2021, the EPA issued the Revised CSAPR Update Rule. The Revised CSAPR Update Rule required affected EGUs within certain states (including Indiana and Maryland) to participate in a new trading program, the CSAPR NO<sub>x</sub> Ozone Season Group 3 trading program. These affected EGUs received fewer NO<sub>x</sub> Ozone Season allowances beginning in 2021.

On June 5, 2023, the EPA published a final Federal Implementation Plan to address air quality impacts with respect to the 2015 Ozone NAAQS. The rule establishes a revised CSAPR NO<sub>x</sub> Ozone Season Group 3 trading program for 22 states, including Indiana and Maryland, and became effective during 2023. The FIP also includes enhancements to the revised Group 3 trading program, which include a dynamic budget setting process beginning in 2026, annual recalibration of the allowance bank to reflect changes to affected sources, a daily backstop emissions rate limit for certain coal-fired electric generating units beginning in 2024, and a secondary emissions limit prohibiting certain emissions associated with state assurance levels. It is too early to determine the impact of this final rule, but it may result in the need to purchase additional allowances or make operational adjustments. On June 27, 2024, the U.S. Supreme Court issued an order granting a stay of the EPA's 2023 Federal Implementation Plan ("FIP") pending resolution of legal challenges to the FIP.

While the Company's additional CSAPR compliance costs to date have been immaterial, the future availability of and cost to purchase allowances to meet the emission reduction requirements is uncertain at this time, but it could be material.

---

60 | The AES Corporation | June 30, 2024 Form 10-Q

**Mercury and Air Toxics Standard** — In April 2012, the EPA's rule to establish maximum achievable control technology standards for hazardous air pollutants regulated under the CAA emitted from coal and oil-fired electric utilities, known as "MATS", became effective and AES facilities implemented measures to comply, as applicable. In June 2015, the U.S. Supreme Court remanded MATS to the D.C. Circuit due to the EPA's failure to consider costs before deciding to regulate power plants under Section 112 of the CAA and subsequently remanded MATS to the EPA without vacatur. On May 22, 2020, the EPA published a final finding that it is not "appropriate and necessary" to regulate hazardous air pollutant emissions from coal- and oil-fired electric generating units (EGUs) ("EGUs") (reversing its prior 2016 finding), but that the EPA would not remove the source category from the CAA Section 112(c) list of source categories and would not change the MATS requirements. On March 6, 2023, the EPA

---

29 | The AES Corporation | March 31, 2024 Form 10-Q

published a final rule to revoke its May 2020 finding and reaffirm its 2016 finding that it is appropriate and necessary to regulate these emissions. On April 24, 2023, the EPA published a proposed rule, the MATS Risk and Technology Review (RTR) ("RTR") Rule to lower certain emissions limits and revise certain other aspects of MATS. On April 25, 2024 May 7, 2024, the EPA released published a pre-publication version final rule to revise MATS for coal and oil-fired EGUs. The final rule became effective on July 8, 2024. The final rule lowers certain emissions limits and revises certain other aspects of the final MATS RTR Rule. MATS. We are currently still reviewing the final rule and it is too early to determine the potential impacts.

Further rulemakings and/or proceedings are possible; however, in the meantime, MATS remains in effect. We currently cannot predict the outcome of the regulatory or judicial process, or its impact, if any, on our MATS compliance planning or ultimate costs.

**Climate Change Regulation** — The final NSPS for CO<sub>2</sub> emissions from new, modified, and reconstructed fossil-fuel-fired power plants were published in the *Federal Register* on October 23, 2015. Several states and industry groups challenged the NSPS for CO<sub>2</sub> in the D.C. Circuit Court. On December 20, 2018, the EPA published proposed revisions to the final NSPS for new, modified, and reconstructed coal-fired electric utility steam generating units. The EPA proposed that the Best System of Emissions Reduction ("BSER") for these units is highly efficient generation that would be equivalent to supercritical steam conditions for larger units and sub-critical steam conditions for smaller units, and not partial carbon capture and sequestration ("CCS"), which had been the BSER for these units in the 2015 final NSPS. The EPA did not include revisions for natural-gas combined cycle or simple cycle units in the December 20, 2018 proposal. Challenges to the GHG NSPS remain held in abeyance at this time. On May 23, 2023, the EPA published a proposed rule that would establish CO<sub>2</sub> emissions limits for certain new fossil-fuel fired stationary combustion turbines that commence construction or are modified after May 23, 2023. On May 9, 2024, the EPA published the final NSPS requiring carbon capture and sequestration for new and reconstructed baseload stationary combustion turbines, among other requirements. The EPA did not finalize revisions to the NSPS for newly constructed or reconstructed coal-fired electric utility steam generating units as proposed in 2018.

On July 8, 2019, the EPA published the final Affordable Clean Energy ("ACE") Rule which would have established CO<sub>2</sub> emission rules for existing power plants under CAA Section 111(d) and would have replaced the EPA's 2015 Clean Power Plan Rule ("CPP"). However, on January 19, 2021, the D.C. Circuit vacated and remanded the ACE Rule. Subsequently, on June 30, 2022, the Supreme Court reversed the judgment of the D.C. Circuit Court and remanded for further proceedings consistent with its opinion holding that the "generation shifting" approach in the CPP exceeded the authority granted to the EPA by Congress under Section 111(d) of the CAA. As a result of the June 30, 2022 Supreme Court decision, on October 27, 2022, the D.C. Circuit issued a partial mandate, holding pending challenges to the ACE Rule in abeyance while the EPA developed a replacement rule. On May 23, 2023, the EPA published a proposed rule that would vacate the ACE Rule and proposed New Source Performance Standards ("NSPSs") that would establish emissions guidelines in the form of CO<sub>2</sub> emissions limitations for certain existing electric generating units ("EGUs") and would require states to develop State Plans that establish standards of performance for such EGUs that are at least as stringent as the EPA's emissions guidelines. Depending on various EGU-specific factors, the bases of proposed emissions guidelines range from routine methods of operation to carbon capture and sequestration or co-firing low-GHG hydrogen starting in the 2030s. On April 25, 2024 May 9, 2024, the EPA released a prepublication version published the final rule regulating GHGs from existing EGUs pursuant to Section 111(d) of the final NSPSs Clean Air Act and effective on July 8, 2024. Existing EGUs are those that were constructed prior to January 8, 2014. Depending on various EGU-specific factors, the bases of emissions guidelines for

GHGs for new, modified, natural gas-fired units include the use of uniform fuels and reconstructed fossil-fuel fired EGUs. Emissions Guidelines for existing fossil fuel-fired EGUs, routine methods of operation and maintenance and the Repeal bases of emissions guidelines for coal-fired units include 40% natural gas co-firing or carbon capture and sequestration with 90% capture of CO<sub>2</sub> depending on the ACE Rule. date that coal operations cease. Specific standards for performance for EGUs will be established through a State Plan (or a Federal Plan if a state were to not submit an approvable plan). We are currently still reviewing these rules. The impact of the rules, the results of further proceedings, and potential future greenhouse gas emissions regulations remain uncertain but could be material.

---

61 | The AES Corporation | June 30, 2024 Form 10-Q

**Waste Management** — On October 19, 2015, an EPA rule regulating CCR under the Resource Conservation and Recovery Act as nonhazardous solid waste became effective. The rule established nationally applicable minimum criteria for the disposal of CCR in new and currently operating landfills and surface impoundments, including location restrictions, design and operating criteria, groundwater monitoring, corrective action and closure requirements, and post-closure care. The primary enforcement mechanisms under this regulation would be actions commenced by the states and private lawsuits. On December 16, 2016, the Water Infrastructure Improvements for the Nation Act ("WIN Act") was signed into law. This includes provisions to implement the CCR rule through a state permitting program, or if the state chooses not to participate, a possible federal permit program. If this rule is finalized before Indiana or Puerto Rico establishes a state-level CCR permit program, AES CCR units in those locations could eventually be required to apply for a federal CCR permit from the EPA. The EPA has indicated that it will implement a phased approach to amending the CCR Rule, which is ongoing. On August 28, 2020, the EPA published final amendments to the CCR Rule titled "A Holistic Approach to Closure Part A: Deadline to Initiate Closure," that, among other amendments, required certain CCR units to cease waste receipt and initiate closure by April 11, 2021. The CCR Part A Rule also allowed for extensions of the April 11, 2021 deadline if the EPA determines certain criteria are met. Facilities seeking such an extension were required to submit a demonstration to the EPA by November 30, 2020. On January 11, 2022, the EPA released the first in a series of proposed determinations regarding CCR Part A Rule demonstrations and compliance-related letters notifying certain other facilities of their compliance obligations under the federal CCR regulations. The determinations and letters include interpretations regarding implementation of the CCR Rule. On April 8, 2022, petitions for review were filed challenging these EPA actions. The petitions are consolidated in *Electric Energy, Inc. v. EPA*. On June 28, 2024, the D.C. Circuit dismissed the challenges. It is too early to determine the direct or indirect impact of these letters or any determinations that may be made.

On May 18, 2023, the EPA published a proposed rule that would expand the scope of CCR units regulated by the CCR Rule to include inactive surface impoundments at inactive generating facilities as well as additional inactive and closed landfills and certain other accumulations of CCR. On April 25, 2024 May 8, 2024, the EPA released published final revisions to the pre-publication version CCR rule which are effective on November 8, 2024. The final revisions expand the scope of CCR units regulated by the CCR rule to include legacy surface impoundments, inactive surface impoundments, and CCR management units. We are still reviewing the final rule, which we are currently reviewing. revisions. It is too early to determine the potential impact.

The CCR rule, current or proposed amendments to or interpretations of the CCR rule, the results of groundwater monitoring data, or the outcome of CCR-related litigation could have a material impact on our business, financial condition, and results of operations. AES Indiana would seek recovery of any resulting expenditures; however, there is no guarantee we would be successful in this regard.

---

50 | The AES Corporation | March 31, 2024 Form 10-Q

**Cooling Water Intake** — The Company's facilities are subject to a variety of rules governing water use and discharge. In particular, the Company's U.S. facilities are subject to the CWA Section 316(b) rule issued by the EPA effective in 2014 that seeks to protect fish and other aquatic organisms drawn into cooling water systems at power plants and other facilities. These standards require affected facilities to choose among seven BTA options to reduce fish impingement. In addition, certain facilities must conduct studies to assist permitting authorities to determine whether and what site-specific controls, if any, would be required to reduce entrainment of aquatic organisms. It is possible that this process, which includes permitting and public input, could result in the need to install closed-cycle cooling systems (closed-cycle cooling towers) or other technology. Finally, the standards require that new units added to an existing facility to increase generation capacity are required to reduce both impingement and entrainment. It is not yet possible to predict the total impacts of this final rule at this time, including any challenges to such final rule and the outcome of any such challenges. However, if additional capital expenditures are necessary, they could be material.

Certain AES Southland's current plan is to comply with the SWRCB OTC Policy by shutting down and permanently retiring all existing generating units at AES Alamitos, AES Huntington Beach, and AES Redondo Beach that utilize OTC by the compliance dates included in the OTC Policy.

The Company's California subsidiaries have signed 20-year term PPAs with Southern California Edison for new generating capacity, which have been approved by the California Public Utilities Commission. Construction of new generating capacity began in June 2017 at AES Huntington Beach and July 2017 at AES Alamitos. The new air-cooled combined cycle gas turbine generators and battery energy storage systems were constructed at the AES Alamitos and AES Huntington Beach generating stations. The new air-cooled combined cycle gas turbine generators at the AES Alamitos and AES Huntington Beach generating stations began commercial operation in early 2020 and there is currently no plan to replace the OTC generating units at the AES Redondo Beach generating station following the retirement. Certain Southland OTC units were required to be retired in 2019 to provide interconnection capacity and/or emissions credits prior to startup of the new (air cooled) generating units, and the remaining AES OTC generating units in California have been or will be shut down and permanently retired by the applicable OTC Policy compliance dates for these respective units. The SWRCB OTC Policy required currently requires the shutdown and permanent retirement of all the remaining OTC generating units at AES Alamitos, AES Huntington Beach, and AES Redondo Beach by December 31, 2020. The initial amendment extended the deadline for shutdown and retirement of AES Alamitos and AES Huntington Beach's remaining OTC generating units to December 31, 2023 and extended the deadline for shutdown and retirement of AES Redondo Beach's remaining OTC generating units to December 31, 2021 (the "AES Redondo Beach Extension"). In October 2020, the cities of Redondo Beach and Hermosa Beach filed a state court lawsuit challenging the AES Redondo Beach Extension. AES opposed the action and the court

granted an order dismissing the matter. The case remains open subject to the resolution of counter claims between parties other than AES. Plaintiffs have initiated an additional challenge to the permit, and the outcome of that lawsuit is unclear. On March 16, 2021, the SACCWIS released their draft 2021 report to SWRCB. The report summarizes the State of California's current electrical grid reliability needs and recommended a two-year extension to the compliance schedule for AES Redondo Beach to address system-wide grid reliability needs. The SWRCB public hearing regarding the final decision on the amendment of the OTC policy was held on October 19, 2021 and the Board voted in favor of extending the compliance date for AES Redondo Beach to December 31, 2023. The AES Redondo Beach NPDES permit has been administratively extended. On September 30, 2022, the Statewide Advisory Committee on Cooling Water Intake Structures approved a recommendation to the SWRCB to consider an extension of the OTC compliance dates for AES Huntington Beach, LLC and AES Alamitos, LLC to by December 31, 2026, as extended in support of grid reliability. On August 15, 2023, the State Water Board considered the SACCWIS recommendation and adopted an amendment to the OTC Policy that established a final This extension compliance date of December 31, 2026 for the Alamitos and Huntington Beach facilities. This extension is contingent upon the facilities participating in the Strategic Reserve established by AB 205.

Power plants are required to comply with the more stringent of state or federal requirements. At present, the California state requirements are more stringent and have earlier compliance dates than the federal EPA requirements, and are therefore applicable to the Company's California assets. The Company anticipates that compliance with CWA Section 316(b) regulations and associated costs could have a material impact on our consolidated financial condition or results of operations.

---

62 | The AES Corporation | June 30, 2024 Form 10-Q

**Water Discharges** — In June 2015, the EPA and the U.S. Army Corps of Engineers ("the Agencies") published a rule defining federal jurisdiction over waters of the U.S., known as the "Waters of the U.S." ("WOTUS") rule. WOTUS defines the geographic reach and authority of the Agencies to regulate streams, wetlands, and other water bodies under the CWA. There have been multiple Supreme Court decisions and dueling regulatory definitions over the past several years concerning the proper standard for how to properly determine whether a wetland or

---

51 | The AES Corporation | March 31, 2024 Form 10-Q

stream that is not navigable is considered a WOTUS. On May 25, 2023, the U.S. Supreme Court rendered a decision ("Decision") in the case of *Sackett v. Environmental Protection Agency*, addressing the definition of WOTUS with regards to the CWA. This decision provides a clear standard that substantially restricts the Agencies' ability to regulate certain types of wetlands and streams. Specifically, under this decision, wetlands that do not have a continuous surface connection with traditional interstate navigable water are not federally jurisdictional.

On September 8, 2023, the Agencies published final rule amendments in the Federal Register to amend the final "Revised Definition of 'Waters of the United States'" rule. This final rule conforms the definition to the definition adopted in the Decision. The Agencies have amended key aspects of the regulatory text to conform the rule to the Decision. It is too early to determine whether the outcome of litigation or current or future revisions to rules interpreting federal jurisdiction over WOTUS may have a material impact on our business, financial condition, or results of operations.

In November 2015, the EPA published its final ELG rule to reduce toxic pollutants discharged into waters of the U.S. by steam-electric power plants through technology applications. These effluent limitations for existing and new sources include dry handling of fly ash, closed-loop or dry handling of bottom ash, and more stringent effluent limitations for flue gas desulfurization wastewater. AES Indiana Petersburg has installed a dry bottom ash handling system in response to the CCR rule and wastewater treatment systems in response to the NPDES permits in advance of the ELG compliance date. Other U.S. businesses already include dry handling of fly ash and bottom ash and do not generate flue gas desulfurization wastewater. Following the 2019 U.S. Court of Appeals vacatur and remand of portions of the 2015 ELG rule related to leachate and legacy water, on March 29, 2023, the EPA published a proposed rule revising the 2020 Reconsideration Rule. On May 9, 2024, the EPA published a final rule which became effective on July 8, 2024. The proposed final rule would establish new established more stringent best available technology economically achievable effluent limits for flue gas desulfurization wastewater, bottom ash treatment transport water, and combustion residual leachate. On April 25, 2024, the EPA released leachate and established a pre-publication version new set of the final rule. definitions and new limits for combustion residual leachate and legacy wastewater. We are currently still reviewing this rule. It the rule and it is too early to determine whether any outcome of litigation or current or future revisions to the ELG rule might have a material impact on our business, financial condition, and results of operations.

## Capital Resources and Liquidity

### Overview

As of March 31, 2024 June 30, 2024, the Company had unrestricted cash and cash equivalents of \$2 billion \$1.8 billion, of which \$90 million \$53 million was held at the Parent Company and qualified holding companies. The Company had \$394 million \$61 million in short-term investments, held primarily at subsidiaries, and restricted cash and debt service reserves of \$561 million \$375 million. The Company also had non-recourse and recourse aggregate principal amounts of debt outstanding of \$23.9 billion \$22 billion and \$5.3 billion \$6.1 billion, respectively. Of the \$4 billion \$2.2 billion of our current non-recourse debt, \$3.9 billion \$2 billion was presented as such because it is due in the next twelve months and \$174 million \$166 million relates to debt considered in default. None of the defaults are payment defaults but are instead technical defaults triggered by failure to comply with covenants or other requirements contained in the non-recourse debt documents. As of March 31, 2024 June 30, 2024, the Company also had \$875 \$553 million outstanding related to supplier financing arrangements, which are classified as *Supplier financing arrangements* on the Condensed Consolidated Balance Sheets.

We expect current maturities of non-recourse debt, recourse debt, and amounts due under supplier financing arrangements to be repaid from net cash provided by operating activities of the subsidiary to which the liability relates, through opportunistic refinancing activity, or some combination thereof. We have \$200 million \$890 million in recourse debt which matures within the next twelve months, including \$690 million in outstanding borrowings under the commercial paper program, as well as amounts due under supplier financing arrangements, of which \$725 million \$344 million has a Parent Company guarantee. From time to time, we may elect to repurchase our outstanding debt through cash

purchases, privately negotiated transactions, or otherwise when management believes that such securities are attractively priced. Such repurchases, if any, will depend on prevailing market conditions, our liquidity requirements, and other factors. The amounts involved in any such repurchases may be material.

We rely mainly on long-term debt obligations to fund our construction activities. We have, to the extent available at acceptable terms, utilized non-recourse debt to fund a significant portion of the capital expenditures and

---

63 | The AES Corporation | June 30, 2024 Form 10-Q

investments required to construct and acquire our electric power plants, distribution companies, and related assets. Our non-recourse financing is designed to limit cross-default risk to the Parent Company or other subsidiaries and affiliates. Our non-recourse long-term debt is a combination of fixed and variable interest rate instruments. Debt is typically denominated in the currency that matches the currency of the revenue expected to be generated from the benefiting project, thereby reducing currency risk. In certain cases, the currency is matched through the use of derivative instruments. The majority of our non-recourse debt is funded by international commercial banks, with debt

---

52 | The AES Corporation | March 31, 2024 Form 10-Q

capacity supplemented by multilaterals and local regional banks.

Given our long-term debt obligations, the Company is subject to interest rate risk on debt balances that accrue interest at variable rates. When possible, the Company will borrow funds at fixed interest rates or hedge its variable rate debt to fix its interest costs on such obligations. In addition, the Company has historically tried to maintain at least 70% of its consolidated long-term obligations at fixed interest rates, including fixing the interest rate through the use of interest rate swaps. These efforts apply to the notional amount of the swaps compared to the amount of related underlying debt. Presently, the Parent Company's only material unhedged exposure to variable interest rate debt relates to \$200 million in senior unsecured term loans. Additionally, commercial paper issuances are short term in nature and subject the Parent Company to interest rate risk at the time of refinancing the paper. On a consolidated basis, of the Company's **\$29.6 billion** \$28.5 billion of total gross debt outstanding as of **March 31, 2024** June 30, 2024, approximately **\$10.2 billion** \$8.8 billion accrues interest at variable rates. Brazil holds \$2.3 billion of our floating rate non-recourse exposure as variable rate instruments act as a natural hedge against inflation in Brazil. The Company actively hedges its current and expected variable rate exposure through a combination of currently effective and forward starting interest rate swaps. As of **March 31, 2024** June 30, 2024, the total maximum outstanding amount of hedges protecting the company against variable rate exposure was **\$7.7 billion** \$7.6 billion. These hedges generally provide economic protection through the entire expected life of the projects, regardless of the type of debt issued to finance construction or refinance the projects in the future. In addition, AES Brasil holds \$2.2 billion of floating rate non-recourse debt, which is classified in *Current held-for-sale liabilities* and *Noncurrent held-for-sale liabilities* on the Condensed Consolidated Balance Sheets as of June 30, 2024, as variable rate instruments act as a natural hedge against inflation in Brazil.

In addition to utilizing non-recourse debt at a subsidiary level when available, the Parent Company provides a portion, or in certain instances all, of the remaining long-term financing or credit required to fund development, construction, or acquisition of a particular project. These investments have generally taken the form of equity investments or intercompany loans, which are subordinated to the project's non-recourse loans. We generally obtain the funds for these investments from our cash flows from operations, proceeds from the sales of assets and/or the proceeds from our issuances of debt, common stock and other securities. Similarly, in certain of our businesses, the Parent Company may provide financial guarantees or other credit support for the benefit of counterparties who have entered into contracts for the purchase or sale of electricity, equipment, or other services with our subsidiaries or lenders. In such circumstances, if a business defaults on its payment or supply obligation, the Parent Company will be responsible for the business' obligations up to the amount provided for in the relevant guarantee or other credit support. As of **March 31, 2024** June 30, 2024, the Parent Company had provided outstanding financial and performance-related guarantees or other credit support commitments to or for the benefit of our businesses, which were limited by the terms of the agreements, of approximately **\$3.6 billion** \$3.3 billion in aggregate (excluding those collateralized by letters of credit and other obligations discussed below).

Some counterparties may be unwilling to accept our general unsecured commitments to provide credit support. Accordingly, with respect to both new and existing commitments, the Parent Company may be required to provide some other form of assurance, such as a letter of credit, to backstop or replace our credit support. The Parent Company may not be able to provide adequate assurances to such counterparties. To the extent we are required and able to provide letters of credit or other collateral to such counterparties, this will reduce the amount of credit available to us to meet our other liquidity needs. As of **March 31, 2024** June 30, 2024, we had **\$234 million** in letters of credit under bilateral agreements, **\$210 million** \$224 million in letters of credit outstanding provided under our unsecured credit facilities, **\$220 million** in letters of credit under bilateral agreements, and **\$29 million** \$23 million in letters of credit outstanding provided under our revolving credit facility. These letters of credit operate to guarantee performance relating to certain project development and construction activities and business operations. During the quarter ended **March 31, 2024** June 30, 2024, the Company paid letter of credit fees ranging from 1% to 3% per annum on the outstanding amounts.

Additionally, in connection with certain project financings, some of the Company's subsidiaries have expressly undertaken limited obligations and commitments. These contingent contractual obligations are issued at the subsidiary level and are non-recourse to the Parent Company. As of **March 31, 2024** June 30, 2024, the maximum undiscounted potential exposure to guarantees issued by our subsidiaries was **\$2.6 billion** \$1.5 billion, including **\$1.6 billion** \$866 million of customary payment guarantees under EPC contracts and other agreements, and **\$995 million** \$647 million of tax equity financing related guarantees. In addition, as of **March 31, 2024** June 30, 2024, our subsidiaries had **\$643 million** \$1.9 billion of letters of credit outstanding.

---

64 | The AES Corporation | June 30, 2024 Form 10-Q

We expect to continue to seek, where possible, non-recourse debt financing in connection with the assets or businesses that we or our affiliates may develop, construct, or acquire. However, depending on local and global market conditions and the unique characteristics of individual businesses, non-recourse debt may not be available on economically attractive terms or at all. If we decide not to provide any additional funding or credit support to a subsidiary project that is under construction or has near-term debt payment obligations and that subsidiary is unable to obtain additional non-recourse debt, such subsidiary may become insolvent, and we may lose our investment in that subsidiary. Additionally, if any of our subsidiaries lose a significant customer, the subsidiary may need to withdraw from a project or restructure the non-recourse debt financing. If we or the subsidiary choose not to

---

53 | The AES Corporation | March 31, 2024 Form 10-Q

proceed with a project or are unable to successfully complete a restructuring of the non-recourse debt, we may lose our investment in that subsidiary.

Many of our subsidiaries depend on timely and continued access to capital markets to manage their liquidity needs. The inability to raise capital on favorable terms, to refinance existing indebtedness, or to fund operations and other commitments during times of political or economic uncertainty may have material adverse effects on the financial condition and results of operations of those subsidiaries. In addition, changes in the timing of tariff increases or delays in the regulatory determinations under the relevant concessions could affect the cash flows and results of operations of our businesses.

## Long-Term Receivables

As of **March 31, 2024** June 30, 2024, the Company had approximately **\$92 million** **\$96 million** of gross accounts receivable classified as *Other noncurrent assets*. These noncurrent receivables mostly consist of accounts receivable in the U.S. and Chile that, pursuant to amended agreements or government resolutions, have collection periods that extend beyond **March 31, 2025** June 30, 2025, or one year from the latest balance sheet date. Noncurrent receivables in the U.S. pertain to the sale of the Redondo Beach land. Noncurrent receivables in Chile pertain primarily to revenues recognized on regulated energy contracts that were impacted by the Stabilization Funds created by the Chilean government. See Note 5—*Financing Receivables* in Item 1.—*Financial Statements* of this Form 10-Q for further information.

As of **March 31, 2024** June 30, 2024, the Company had approximately \$1 billion of loans receivable primarily related to the Mong Duong facility in Vietnam, which was constructed under a build, operate, and transfer contract. This loan receivable represents contract consideration related to the construction of the facility, which was substantially completed in 2015, and will be collected over the 25-year term of the plant's PPA. As of **March 31, 2024** June 30, 2024, Mong Duong met the held-for-sale criteria and the loan receivable balance of \$1 billion, net of CECL reserves of \$25 million, was classified in held-for-sale assets. Of the loan receivable balance, **\$111 million** **\$114 million** was classified as *Current held-for-sale assets*, and **\$934 million** **\$904 million** was classified as *Noncurrent held-for-sale assets* on the Condensed Consolidated Balance Sheets. See Note 14—*Revenue* in Item 1.—*Financial Statements* of this Form 10-Q for further information.

## Cash Sources and Uses

The primary sources of cash for the Company in the **three** **six** months ended **March 31, 2024** June 30, 2024 were debt financings, purchases under supplier financing arrangements, and cash flows from operating activities, and purchases under supplier financing arrangements. The primary uses of cash in the **three** **six** months ended **March 31, 2024** June 30, 2024 were capital expenditures, repayments of debt, and repayments of obligations under supplier financing arrangements.

The primary sources of cash for the Company in the **three** **six** months ended **March 31, 2023** June 30, 2023 were debt financings, cash flows from operating activities, purchases under supplier financing arrangements, and sales of short-term investments. The primary uses of cash in the **three** **six** months ended **March 31, 2023** June 30, 2023 were repayments of debt, capital expenditures, repayments of obligations under supplier financing arrangements, and purchases of short-term investments.

---

65 | The AES Corporation | March 31, 2024 June 30, 2024 Form 10-Q

A summary of cash-based activities is as follows (in millions):

Cash Sources:	Three Months Ended March 31,		Six Months Ended June 30,			
	Cash Sources:	2024	2023	Cash Sources:	2024	2023
Borrowings under the revolving credit facilities						
Issuance of non-recourse debt						
Borrowings under the revolving credit facilities						
Issuance of recourse debt						
Purchases under supplier financing arrangements						
Commercial paper borrowings (repayments), net						
Purchases under supplier financing arrangements						
Net cash provided by operating activities						
Sale of short-term investments						
Sale of short-term investments						
Sale of short-term investments						

## Consolidated Cash Flows

The following table reflects the changes in operating, investing, and financing cash flows for the comparative three-month six-month period (in millions):

Three Months Ended March 31,
Three Months Ended March 31,
Three Months Ended March 31,
Six Months Ended June 30,
Six Months Ended June 30,
Six Months Ended June 30,
<b>Cash flows provided by (used in):</b>

Financing activities

## Operating Activities

Net cash provided by operating activities decreased **\$338 million** **\$508 million** for the **three six** months ended **March 31, 2024** **June 30, 2024**, compared to the **three six** months ended **March 31, 2023** **June 30, 2023**.

### Operating Cash Flows (in millions)

 141

(1) The change in adjusted net income is defined as the variance in *net income*, net of the total *adjustments to net income* as shown on the Condensed Consolidated Statements of Cash Flows in Item 1—*Financial Statements* of this Form 10-Q.

(2) The change in working capital is defined as the variance in total *changes in operating assets and liabilities* as shown on the Condensed Consolidated Statements of Cash Flows in Item 1—*Financial Statements* of this Form 10-Q.

---

 66 | The AES Corporation | **March 31, 2024** **June 30, 2024** Form 10-Q

- Adjusted net income increased **\$277 million** **\$114 million**, primarily due to higher margins at our **Utilities** and **Energy Infrastructure** and **Utilities** SBUs; partially offset by lower margins at our **Renewables** SBU, an increase in interest expense, and a decrease in interest income.
- Working capital requirements increased **\$615 million** **\$622 million**, primarily due to an increase in **accounts receivable** resulting from **receivables** due to timing of billings and **collections**, a decrease in **inventory** in the prior year due to higher **coal consumption** and **lower collections** **coal prices**, and an increase in **receivables** under the **Warrior Run PPA** termination agreement; **regulatory assets**; partially offset by a decrease in **accounts payable** due to lower **inventory** **coal purchases at lower prices**, and the sale of the **financing receivables** under the **Warrior Run PPA** termination agreement.

## Investing Activities

Net cash used in investing activities increased **\$762 million** **\$474 million** for the **three six** months ended **March 31, 2024** **June 30, 2024**, compared to the **three six** months ended **March 31, 2023** **June 30, 2023**.

### Investing Cash Flows (in millions)

 144

- Cash used for short-term investing activities increased \$156 million, primarily as a result of lower net short-term investment sales at our **Renewables** SBU.
- Proceeds from sales of business interests decreased \$87 million, primarily due to the selldown of sPower OpCo B in 2023.
- Cash used for short-term investing activities Acquisitions of business interests decreased **\$59 million** **\$217 million**, primarily as a result due to the prior year acquisitions of lower net short-term investment purchases **Bellefield** and **Bolero Solar Park** at our **Renewables** SBU, **AES Clean Energy** and **AES Andes**, respectively, partially offset by the current year acquisition of **Hoosier Wind** at **AES Indiana**.
- Capital expenditures increased **\$597 million** **\$437 million**, discussed further below.

### Capital Expenditures (in millions)

 504

---

67 | The AES Corporation | June 30, 2024 Form 10-Q

(1) Growth expenditures generally include expenditures related to development projects in construction, expenditures that increase capacity of a facility beyond the original design, and investments in general load growth or system modernization.

(2) Maintenance expenditures generally include expenditures that are necessary to maintain regular operations or net maximum capacity of a facility.

(3) Environmental expenditures generally include expenditures to comply with environmental laws and regulations, expenditures for safety programs and other expenditures to ensure a facility continues to operate in an environmentally responsible manner.

- Growth expenditures increased \$585 million \$410 million, primarily driven by an increase in U.S. renewables projects.
- Maintenance expenditures increased \$13 million, primarily due to projects and higher transmission and distribution project investments at our Utilities SBU.
- Environmental Maintenance expenditures decreased \$1 million increased \$27 million, with no material drivers, primarily due to higher maintenance expenditures at Southland due to the extension of compliance dates for the OTC units.

---

56 | The AES Corporation | March 31, 2024 Form 10-Q

## Financing Activities

Net cash provided by financing activities increased \$1.6 billion \$1.2 billion for the three six months ended March 31, 2024 June 30, 2024, compared to the three six months ended March 31, 2023 June 30, 2023.

### Financing Cash Flows

(in millions)

148

See [Notes Note 8—Debt and 12—Equity](#) in Item 1—*Financial Statements* of this Form 10-Q for more information regarding significant debt and equity transactions.

- The \$1.2 billion \$655 million impact from non-recourse revolving credit facilities is primarily due to an increase in borrowings at our Renewables SBU to fund capital expenditures of renewables projects.
- The \$559 million impact from non-recourse debt transactions is mainly due to the issuances of the 5.70% First Mortgage Bonds due April 2054 and the 5.75% senior secured notes due April 2034 an increase in borrowings at AES Indiana and the issuance of the 6.30% senior unsecured notes due April 2029 at AES Andes.
- The \$369 million \$376 million impact from the Parent Company revolver and the \$173 million impact from commercial paper is due to higher net borrowings in the current period.
- The \$275 million impact from the Parent Company revolver is primarily due to higher net repayments in the prior period.
- The \$125 million impact from sales to noncontrolling interests is primarily due to proceeds received at AES Clean Energy from the sales of ownership in project companies to tax equity investors, and the sale of Mesamávida under the Chile Renewables partnership with GIP.
- The \$500 million \$450 million impact from recourse debt is primarily due to the prior year issuance of a bridge loan at AES Clean Energy, which was fully guaranteed by the Parent Company, partially offset by a decrease in issuances at AES Clean Energy in March 2023. the Parent Company.
- The \$303 million impact from supplier financing arrangements is primarily due to higher net repayments at our Renewables SBUs.

## Parent Company Liquidity

The following discussion is included as a useful measure of the liquidity available to The AES Corporation, or the Parent Company, given the non-recourse nature of most of our indebtedness. Parent Company Liquidity, as outlined below, is a non-GAAP measure and should not be construed as an alternative to *Cash and cash equivalents*, which is determined in accordance with GAAP. Parent Company Liquidity may differ from similarly titled measures used by other companies. The principal sources of liquidity at the Parent Company level are dividends and other distributions from our subsidiaries, including refinancing proceeds; proceeds from debt and equity financings at the Parent Company level, including availability under our revolving credit facility and commercial paper program; and proceeds from asset sales. The Parent Company credit facility and commercial paper program are generally used for short-term cash needs to bridge the timing of distributions from subsidiaries. Cash requirements at the Parent Company level are primarily to fund interest and principal repayments of debt, construction commitments, other equity commitments, acquisitions, taxes, Parent Company overhead and development costs, and dividends on common stock.

---

68 | The AES Corporation | June 30, 2024 Form 10-Q

The Company defines Parent Company Liquidity as cash available to the Parent Company, including cash at qualified holding companies, plus available borrowings under our existing credit facility and commercial paper program. The cash held at qualified holding companies represents cash sent to subsidiaries of the Company domiciled outside of the U.S. Such subsidiaries have no contractual restrictions on their ability to send cash to the Parent Company. Parent Company Liquidity is reconciled to its most directly comparable GAAP financial measure, *Cash and cash equivalents*, at the periods indicated as follows (in millions):

---

57 | The AES Corporation | March 31, 2024 Form 10-Q

	March 31, 2024	December 31, 2023
	June 30, 2024	December 31, 2023
Consolidated cash and cash equivalents		
Less: Cash and cash equivalents at subsidiaries		
Parent Company and qualified holding companies' cash and cash equivalents		
Commitments under the Parent Company credit facility		
Less: Letters of credit under the credit facility		
Less: Borrowings under the credit facility		
Less: Borrowings under the commercial paper program		
Borrowings available under the Parent Company credit facility		
<b>Total Parent Company Liquidity</b>		

The Parent Company paid dividends of \$0.1725 per outstanding share to its common stockholders during the first quarter and second quarters of 2024 for dividends declared in December 2023, 2023 and February 2024. While we intend to continue payment of dividends and believe we will have sufficient liquidity to do so, we can provide no assurance that we will continue to pay dividends, or if continued, the amount of such dividends.

## Recourse Debt

Our total recourse debt was \$5.3 billion \$6.1 billion and \$4.5 billion as of March 31, 2024 June 30, 2024 and December 31, 2023, respectively. See Note 8—Debt in Item 1—Financial Statements of this Form 10-Q and Note 11—Debt in Item 8.—Financial Statements and Supplementary Data of our 2023 Form 10-K for additional detail.

We believe that our sources of liquidity will be adequate to meet our needs for the foreseeable future. This belief is based on a number of material assumptions, including, without limitation, assumptions about our ability to access the capital markets, the operating and financial performance of our subsidiaries, currency exchange rates, power market pool prices, and the ability of our subsidiaries to pay dividends. In addition, our subsidiaries' ability to declare and pay cash dividends to us (at the Parent Company level) is subject to certain limitations contained in loans, governmental provisions and other agreements. We can provide no assurance that these sources will be available when needed or that the actual cash requirements will not be greater than anticipated. We have met our interim needs for shorter-term and working capital financing at the Parent Company level with our revolving credit facility and commercial paper program. See Item 1A.—Risk Factors—The AES Corporation's ability to make payments on its outstanding indebtedness is dependent upon the receipt of funds from our subsidiaries of the Company's 2023 Form 10-K for additional information.

Various debt instruments at the Parent Company level, including our revolving credit facility and commercial paper program, contain certain restrictive covenants. The covenants provide for, among other items, limitations on other indebtedness, liens, investments and guarantees; limitations on dividends, stock repurchases and other equity transactions; restrictions and limitations on mergers and acquisitions, sales of assets, leases, transactions with affiliates and off-balance sheet and derivative arrangements; maintenance of certain financial ratios; and financial and other reporting requirements. As of March 31, 2024 June 30, 2024, we were in compliance with these covenants at the Parent Company level.

## Non-Recourse Debt

While the lenders under our non-recourse debt financings generally do not have direct recourse to the Parent Company, defaults thereunder can still have important consequences for our results of operations and liquidity, including, without limitation:

- reducing our cash flows as the subsidiary will typically be prohibited from distributing cash to the Parent Company during the time period of any default;
- triggering our obligation to make payments under any financial guarantee, letter of credit, or other credit support we have provided to or on behalf of such subsidiary;
- causing us to record a loss in the event the lender forecloses on the assets; and
- triggering defaults in our outstanding debt at the Parent Company.

---

69 | The AES Corporation | June 30, 2024 Form 10-Q

For example, our revolving credit facility and outstanding debt securities at the Parent Company include events of default for certain bankruptcy-related events involving material subsidiaries. In addition, our revolving credit agreement at the Parent Company includes events of default related to payment defaults and accelerations of outstanding debt of material subsidiaries.

Some of our subsidiaries are currently in default with respect to all or a portion of their outstanding indebtedness. The total non-recourse debt classified as current in the accompanying Condensed Consolidated Balance Sheets amounts to \$4 billion \$2.2 billion. The portion of current debt related to such defaults was \$174 million \$166 million at March

---

58 | The AES Corporation | March 31, 2024 Form 10-Q

31, 2024, June 30, 2024, all of which was non-recourse debt related to three four subsidiaries: AES Mexico Generation Holdings, AES Ilumina, and AES Jordan Solar. Solar, and certain project entities at AES Clean Energy Development. None of the defaults are payment defaults, but are instead technical defaults triggered by failure to comply with other covenants or other conditions contained in the non-recourse debt documents. See Note 8—Debt in Item 1.—Financial Statements of this Form 10-Q for additional detail.

None of the subsidiaries that are currently in default are subsidiaries that met the applicable definition of materiality under the Parent Company's debt agreements as of March 31, 2024 June 30, 2024, in order for such defaults to trigger an event of default or permit acceleration under the Parent Company's indebtedness. However, as a result of additional dispositions of assets, other significant reductions in asset carrying values or other matters in the future that may impact our financial position and results of operations or the financial position of the individual subsidiary, it is possible that one or more of these subsidiaries could fall within the definition of a "material subsidiary" and thereby trigger an event of default and possible acceleration of the indebtedness under the Parent Company's outstanding debt securities. A material subsidiary is defined in the Parent Company's revolving credit agreement as any business that contributed 20% or more of the Parent Company's total cash distributions from businesses for the four most recently ended fiscal quarters. As of March 31, 2024 June 30, 2024, none of the defaults listed above resulted in a cross-default under the recourse debt of the Parent Company. Furthermore, none of the non-recourse debt in default listed above is guaranteed by the Parent Company.

## Critical Accounting Policies and Estimates

The condensed consolidated financial statements of AES are prepared in conformity with U.S. GAAP, which requires the use of estimates, judgments, and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the periods presented.

The Company's significant accounting policies are described in Note 1 — General and Summary of Significant Accounting Policies of our 2023 Form 10-K. The Company's critical accounting estimates are described in Item 7.—Management's Discussion and Analysis of Financial Condition and Results of Operations in the 2023 Form 10-K. An accounting estimate is considered critical if the estimate requires management to make an assumption about matters that were highly uncertain at the time the estimate was made, if different estimates reasonably could have been used, or if changes in the estimate that would have a material impact on the Company's financial condition or results of operations are reasonably likely to occur from period to period. Management believes that the accounting estimates employed are appropriate and resulting balances are reasonable; however, actual results could differ from the original estimates, requiring adjustments to these balances in future periods. The Company has reviewed and determined that these remain as critical accounting policies as of and for the three six months ended March 31, 2024 June 30, 2024.

### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

#### Overview Regarding Market Risks

Our businesses are exposed to, and proactively manage, market risk. Market risk is the potential loss that may result from market changes associated with AES power generation or with existing or forecasted financial or commodity transactions. Our primary market risk exposure is to the price of commodities, particularly electricity, natural gas, coal, and environmental credits. AES is also exposed to fluctuations in interest rates and foreign currency exchange rates associated primarily with outstanding and expected future issuances and borrowing, and from investments in foreign subsidiaries and affiliates. We enter into various transactions, including derivatives, in order to hedge our exposure to these market risks.

The disclosures presented in this Item 3 are based upon a number of assumptions; actual effects may differ. The safe harbor provided in Section 27A of the Securities Act of 1933 and Section 21E of the Exchange Act shall apply to the disclosures contained in this Item 3. For further information regarding market risk, see Item 1A.—Risk Factors, *Fluctuations in currency exchange rates may impact our financial results and position; Wholesale power prices may experience significant volatility in our markets which could impact our operations and opportunities for*

---

70 | The AES Corporation | June 30, 2024 Form 10-Q

*future growth; We may not be adequately hedged against our exposure to changes in commodity prices or interest rates; and Certain of our businesses are sensitive to variations in weather and hydrology of the 2023 Form 10-K.*

#### Commodity Price Risk

Although we prefer to hedge our exposure to the impact of market fluctuations in the price of commodities, some of our generation businesses operate under short-term sales, have contracted electricity obligations greater than supply, or operate under contract sales that leave an unhedged exposure on some of our capacity or through

---

59 | The AES Corporation | March 31, 2024 Form 10-Q

imperfect fuel pass-throughs. These businesses subject our operational results to the volatility of prices for electricity, fuels, and environmental credits in competitive markets. In addition, our businesses are exposed to lower electricity prices due to increased competition, including from renewable sources such as wind and solar, because of lower costs of entry and lower variable costs. We employ risk management strategies to hedge our financial performance against these effects. The implementation of these strategies can involve the use of physical and financial commodity contracts, futures, swaps, and options. We have some natural offsets across our businesses such that low commodity prices may benefit certain businesses and be a cost to others. Exposures are not perfectly linear or symmetric. The sensitivities are affected by a number of local or indirect market factors. Examples of these factors include hydrology, local energy market supply/demand balances, regional fuel supply issues, regional competition, bidding strategies, and regulatory interventions such as price caps. Volume variation also affects our commodity exposure. The volume sold under contracts or retail concessions can vary based on weather and

economic conditions, resulting in a higher or lower volume of sales in spot markets. Thermal unit availability and hydrology can affect the generation output available for sale and can affect the marginal unit setting power prices.

As of **March 31, 2024** **June 30, 2024**, we project pre-tax earnings exposure on a 10% increase in commodity prices to be less than a **\$15 million** **\$20 million** gain for power, less than a **\$5 million** **\$10 million** loss for gas, and less than a **\$5 million** gain for coal. The sensitivities are calculated using industry-standard valuation techniques to revalue all transactions (physical and financial commodity transactions) in the portfolio for a change in the underlying prices the transactions are exposed to and exclude correlation effects, including those due to renewable resource availability. The models reference market prices of commodities across future periods and associated volatility of these market prices. Prices and volatilities are predominantly based on observable market prices.

Exposures at individual businesses will change as new contracts or financial hedges are executed, and our sensitivity to changes in commodity prices generally increases in later years with reduced hedge levels at some of our businesses.

In the Energy Infrastructure SBU, the generation businesses are largely contracted, but may have residual risk to the extent contracts are not perfectly indexed to the business drivers. In California, our Southland once-through cooling generation units ("Legacy Assets") in Long Beach and Huntington Beach have been extended to operate through 2026 under capacity contracts with the State as part of the Strategic Reserve program. Our facility in Redondo Beach has been retired effective January 1, 2024. Our ability to operate the Long Beach facility at full capacity through 2025 was approved under Tentative Time Schedule Order coverage in November 2023. Approval to operate Long Beach **through** **at full capacity** in 2026 will be subject to review with State Agencies. Our Southland combined cycle gas turbine (Southland Energy) units benefit from higher power and lower gas prices, depending on the contracted or hedge position. The AES Andes business in Chile owns assets in the central and northern regions of the country and has a portfolio of contract sales in both. A significant portion of our PPAs through 2024 include mechanisms of indexation that adjust the price of energy based on fluctuations in the price of coal, with an index defined by the National Energy Commission based on the physical coal imports for the energy system. This mechanism mitigates exposures to changes in the price of fuel. The increasing share of renewable energy in Chile's power market may reduce reliance on thermal units and impact power price volatility, which could impact our cost to serve certain unregulated PPAs. In the Dominican Republic, we own natural gas plants contracted under a portfolio of contract sales, and both contract and spot prices may move with commodity prices through 2024. Our thermal asset in Panama has PPAs with distribution companies that match the term of the LNG supply agreement of such thermal assets. New entrants into the Panama thermal generation market could impact the dispatch of existing generation, requiring purchases in the spot market to satisfy the PPA obligations. Contract levels do not always match our generation availability or needs, and our assets may be sellers of spot prices in excess of contract levels or a net buyer in the spot market to satisfy contract obligations, which could impact existing fuel supply commitments. Our assets operating in Vietnam and Bulgaria have minimal exposure to commodity price risk as they have no or minor merchant exposure and fuel is subject to a pass-through mechanism.

In the Renewables SBU, our businesses have commodity exposure on unhedged volumes and resource volatility and benefit from higher power prices, where generation exceeds contracted levels. In Colombia, we operate under a shorter-term sales strategy with spot market exposure for uncontracted volumes. Because we own

---

71 | The AES Corporation | June 30, 2024 Form 10-Q

hydroelectric assets there, contracts are not indexed to fuel. In Brazil, the majority of the hydroelectric and other renewable generating facility volumes are covered by contract sales. Under normal hydrological volatility, spot price risk is mitigated through a regulated sharing mechanism across all hydroelectric generators in the country. Under drier conditions, the sharing mechanism may not be sufficient to cover the business' contract position, and therefore it may have to purchase power at spot prices driven by the cost of thermal generation. Our Renewables businesses in Panama are highly contracted under financial and load-following PPA-type structures, exposing the business to hydrology-based variance. To the extent hydrological inflows are greater than or less than the contract volumes, the

---

60 | The AES Corporation | March 31, 2024 Form 10-Q

business will be sensitive to changes in spot power prices which may be driven by oil and natural gas prices in some time periods.

### Foreign Exchange Rate Risk

We operate in multiple countries and as such are subject to volatility in exchange rates at varying degrees at the subsidiary level and between our functional currency, the USD, and currencies of the countries in which we operate.

In the normal course of business, we are exposed to foreign currency risk and other foreign operations risks that arise from investments in foreign subsidiaries and affiliates. A key component of these risks stems from the fact that some of our foreign subsidiaries and affiliates utilize currencies other than our consolidated reporting currency, the USD. Additionally, certain of our foreign subsidiaries and affiliates have entered into monetary obligations in USD or currencies other than their own functional currencies. Certain of our foreign subsidiaries calculate and pay taxes in currencies other than their own functional currency. We have varying degrees of exposure to changes in the exchange rate between the USD and the following currencies: Argentine peso, Brazilian real, Chilean peso, Colombian peso, Dominican peso, Euro, and Mexican peso. Our exposure to certain of these currencies may be material. These subsidiaries and affiliates attempt to limit potential foreign exchange exposure by entering into revenue contracts that adjust to changes in foreign exchange rates. We also use foreign currency forwards, swaps, and options where possible to manage our risk related to certain foreign currency fluctuations.

AES enters into foreign currency hedges to protect economic value of the business and minimize the impact of foreign exchange rate fluctuations to AES' portfolio. While protecting cash flows, the hedging strategy is also designed to reduce forward-looking earnings foreign exchange volatility. Due to variation of timing and amount between cash distributions and earnings exposure, the hedge impact may not fully cover the earnings exposure on a realized basis, which could result in greater volatility in earnings.

AES has unhedged forward-looking earnings foreign exchange deterioration risk from the Argentine peso that could be material. Additionally, as of **March 31, June 30, 2024**, assuming a 10% USD appreciation, cash distributions attributable to foreign subsidiaries may be exposed to exchange rate movement of less than a **\$5 million gain, individually in the Brazilian real and loss from Euro and less than a \$5 million loss gain from the Colombian peso**.

These numbers have been produced by applying a one-time 10% USD appreciation to forecasted exposed cash distributions for 2024 coming from the respective subsidiaries exposed to the currencies listed above, net of the impact of outstanding hedges and holding all other variables constant. The numbers presented above are net of any transactional gains or losses. These sensitivities may change in the future as new hedges are executed or existing hedges are unwound. Additionally, updates to the forecasted cash distributions exposed to foreign exchange risk may result in further modification. The sensitivities presented do not capture the impacts of any administrative market restrictions or currency inconvertibility.

## Interest Rate Risks

We are exposed to risk resulting from changes in interest rates primarily because of our current and expected future issuance of debt and borrowing.

Decisions on the fixed-floating debt mix are made to be consistent with the risk factors faced by individual businesses or plants. Depending on whether a plant's capacity payments or revenue stream is fixed or varies with inflation, we partially hedge against interest rate fluctuations by arranging fixed-rate or variable-rate financing. In certain cases, particularly for non-recourse financing, we execute interest rate swap, cap, and floor agreements to effectively fix or limit the interest rate exposure on the underlying financing. Most of our interest rate risk is related to non-recourse financings at our businesses.

As of **March 31, 2024** **June 30, 2024**, the portfolio's pre-tax earnings exposure to a one-time 100-basis-point increase in interest rates for our Argentine peso, Brazilian real, Chilean peso, Colombian peso, Euro, and USD denominated debt would be less than **\$25 million** **\$10 million** on interest expense for the debt denominated in these currencies. These

---

72 | The AES Corporation | June 30, 2024 Form 10-Q

amounts represent the exposure for the remainder of 2024 full-year exposure and do not take into account the historical correlation between these interest rates.

---

61 | The AES Corporation | March 31, 2024 Form 10-Q

## ITEM 4. CONTROLS AND PROCEDURES

### Evaluation of Disclosure Controls and Procedures

The Company, under the supervision and with the participation of its management, including the Company's Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), evaluated the effectiveness of its "disclosure controls and procedures," as such term is defined in Rule 13a-15(e) under the Exchange Act, as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on that evaluation, our CEO and CFO have concluded that our disclosure controls and procedures were effective as of **March 31, 2024** **June 30, 2024**, to ensure that information required to be disclosed by the Company in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and include controls and procedures designed to ensure that information required to be disclosed by us in such reports is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow timely decisions regarding required disclosures.

### Changes in Internal Controls over Financial Reporting

There were no changes that occurred during the fiscal quarter covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

---

62 73 | The AES Corporation | **March 31, 2024** **June 30, 2024** Form 10-Q

## PART II: OTHER INFORMATION

### ITEM 1. LEGAL PROCEEDINGS

The Company is involved in certain claims, suits and legal proceedings in the normal course of business. The Company has accrued for litigation and claims when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. The Company believes, based upon information it currently possesses and taking into account established reserves for estimated liabilities and its insurance coverage, that the ultimate outcome of these proceedings and actions is unlikely to have a material adverse effect on the Company's condensed consolidated financial statements. It is reasonably possible, however, that some matters could be decided unfavorably to the Company and could require the Company to pay damages or make expenditures in amounts that could be material, but cannot be estimated as of **March 31, 2024** **June 30, 2024**. Pursuant to SEC amendments Item 103 of SEC Regulation S-K, AES' policy is to disclose environmental legal proceedings to which a governmental authority is a party if such proceedings are reasonably expected to result in monetary sanctions of greater than or equal to \$1 million.

In December 2001, Grid Corporation of Odisha ("GRIDCO") served a notice to arbitrate pursuant to the Indian Arbitration and Conciliation Act of 1996 on the Company, AES Orissa Distribution Private Limited ("AES ODPL"), and Jyoti Structures ("Jyoti") pursuant to the terms of the shareholders agreement between GRIDCO, the Company, AES ODPL, Jyoti and the Central Electricity Supply Company of Orissa Ltd. ("CESCO"), an affiliate of the Company. In the arbitration, GRIDCO asserted that a comfort letter issued by the Company in connection with the Company's indirect investment in CESCO obligates the Company to provide additional financial support to cover all of CESCO's financial obligations to GRIDCO. GRIDCO appeared to be seeking approximately \$189 million in damages, plus undisclosed penalties and interest, but a detailed alleged damage analysis was not filed by GRIDCO. The Company counterclaimed against GRIDCO for damages. In June 2007, a 2-to-1 majority of the arbitral tribunal rendered its award rejecting

GRIDCO's claims and holding that none of the respondents, the Company, AES ODPL, or Jyoti, had any liability to GRIDCO. The respondents' counterclaims were also rejected. A majority of the tribunal later awarded the respondents, including the Company, some of their costs relating to the arbitration. GRIDCO filed challenges of the tribunal's awards with the local Indian court. GRIDCO's challenge of the costs award has been dismissed by the court, but its challenge of the liability award remains pending. A hearing on the liability award has not taken place to date. The Company believes that it has meritorious defenses to the claims asserted against it and will defend itself vigorously in these proceedings; however, there can be no assurances that it will be successful in its efforts.

Pursuant to their environmental audit, AES Sul and AES Florestal discovered 200 barrels of solid creosote waste and other contaminants at a pole factory that AES Florestal had been operating. The conclusion of the audit was that a prior operator of the pole factory, Companhia Estadual de Energia ("CEEE"), had been using those contaminants to treat the poles that were manufactured at the factory. On their initiative, AES Sul and AES Florestal communicated with Brazilian authorities and CEEE about the adoption of containment and remediation measures. In March 2008, the State Attorney of the state of Rio Grande do Sul, Brazil filed a public civil action against AES Sul, AES Florestal and CEEE seeking an order requiring the companies to mitigate the contaminated area located on the grounds of the pole factory and an indemnity payment of approximately R\$6 million (\$1 million). In October 2011, the State Attorney filed a request for an injunction ordering the defendant companies to contain and remove the contamination immediately. The court granted injunctive relief on October 18, 2011, but determined that only CEEE was required to perform the removal work. In May 2012, CEEE began the removal work in compliance with the injunction. The case is now awaiting judgment. The removal and remediation costs are estimated to be approximately R\$15 million to R\$60 million (\$3 million to **\$12 million** \$11 million), and there could be additional costs which cannot be estimated at this time. In June 2016, the Company sold AES Sul to CPFL Energia S.A. and as part of the sale, AES Guaiba, a holding company of AES Sul, retained the potential liability relating to this matter. The Company believes that there are meritorious defenses to the claims asserted against it and will defend itself vigorously in these proceedings; however, there can be no assurances that it will be successful in its efforts.

In September 2015, AES Southland Development, LLC and AES Redondo Beach, LLC filed a lawsuit against the California Coastal Commission (the "CCC") over the CCC's determination that the site of AES Redondo Beach included approximately 5.93 acres of CCC-jurisdictional wetlands. The CCC has asserted that AES Redondo Beach has improperly installed and operated water pumps affecting the alleged wetlands in violation of the California Coastal Act and Redondo Beach Local Coastal Program ("LCP"). Potential outcomes of the CCC determination could include an order requiring AES Redondo Beach to perform a restoration and/or pay fines or penalties. AES Redondo Beach believes that it has meritorious arguments concerning the underlying CCC determination, but there can be no assurances that it will be successful. On March 27, 2020, AES Redondo Beach, LLC sold the site to an unaffiliated third-party purchaser that assumed the obligations contained within these proceedings. On May 26, 2020, CCC staff sent AES an NOV directing AES to discontinue any operation of the water pumps in the alleged

---

74 | The AES Corporation | March 31, 2024 June 30, 2024 Form 10-Q

wetlands and to submit a Coastal Development Permit ("CDP") application for the removal of the water pumps within the alleged wetlands. The NOV also directed AES to submit technical analysis regarding additional water pumps located within onsite electrical vaults and, if necessary, a CDP application for their continued operation. With respect to the vault pumps, AES provided the CCC, with the requested analysis, and the CCC has not required further action. With respect to the pumps in the alleged wetlands, AES locked out those pumps to prevent further operation and submitted the CDP to the permitting authority, the City of Redondo Beach (the "City"), with respect to AES' plans to disable or remove the pumps. On October 14, 2020, the City deemed the CDP application to be complete and indicated a public hearing will be required. AES submitted all required information and waited for the City to continue processing the application. In December 2023, the City indicated it would continue processing the CDP application. AES will vigorously defend its interests with regard to the NOV, but we cannot predict the outcome of the matter at this time. However, settlements and litigated outcomes of Coastal Act and LCP claims alleged against other companies have required them to pay significant civil penalties and undertake remedial measures.

In October 2015, AES Indiana received an NOV alleging violations of the Clean Air Act ("CAA"), the Indiana State Implementation Plan ("SIP"), and the Title V operating permit related to alleged particulate and opacity violations at Petersburg Station Unit 3. In addition, in February 2016, AES Indiana received an NOV from the EPA alleging violations of New Source Review and other CAA regulations, the Indiana SIP, and the Title V operating permit at Petersburg Station. On August 31, 2020, AES Indiana reached a settlement with the EPA, the DOJ and the Indiana Department of Environmental Management ("IDEM"), resolving these purported violations of the CAA at Petersburg Station. The settlement agreement, in the form of a proposed judicial consent decree, was approved and entered by the U.S. District Court for the Southern District of Indiana on March 23, 2021, and includes, among other items, the following requirements: annual caps on NO<sub>x</sub> and SO<sub>2</sub> emissions and more stringent emissions limits than AES Indiana's current Title V air permit; payment of civil penalties totaling \$1.5 million; a \$5 million environmental mitigation project consisting of the construction and operation of a new, non-emitting source of generation at the site; expenditure of \$0.3 million on a state-only environmentally beneficial project to preserve local, ecologically-significant lands; and retirement of Units 1 and 2 prior to July 1, 2023.

In December 2018, a lawsuit was filed in Dominican Republic civil court against the Company, AES Puerto Rico, and three other AES affiliates. The lawsuit purports to be brought on behalf of over 100 Dominican claimants, living and deceased, and appears to seek relief relating to CCRs that were delivered to the Dominican Republic in 2004. The lawsuit generally alleges that the CCRs caused personal injuries and deaths and demands \$476 million in alleged damages. The lawsuit does not identify, or provide any supporting information concerning, the alleged injuries of the claimants individually. Nor does the lawsuit provide any information supporting the demand for damages or explaining how the quantum was derived. The relevant AES companies believe that they have meritorious defenses to the claims asserted against them and will defend themselves vigorously in this proceeding; however, there can be no assurances that they will be successful in their efforts.

In February 2019, a separate lawsuit was filed in Dominican Republic civil court against the Company, AES Puerto Rico, two other AES affiliates, and an unaffiliated company and its principal. Subsequently, the claimants withdrew the lawsuit with respect to AES Puerto Rico. The lawsuit remains pending against the other AES defendants ("AES Defendants") and the unaffiliated defendants. The lawsuit purports to be brought on behalf of over 200 Dominican claimants, living and deceased, and appears to seek relief relating to CCRs that were delivered to the Dominican Republic in 2003 and 2004. The lawsuit generally alleges that the CCRs caused personal injuries and deaths and demands over \$900 million in alleged damages. The lawsuit does not identify, or provide any supporting information concerning, the alleged injuries of the claimants individually, nor does the lawsuit provide any information supporting the demand for damages or explaining how the quantum was derived. In August 2020, at the request of the relevant AES companies, the case was transferred to a different civil court, namely, the Civil Court of La Vega. Preliminary hearings have taken place. Vega ("CFI"). In May 2024, the CFI dismissed the entire case due to the expiry of the statute of limitations. The parties are awaiting the Civil Court's ruling on the AES Defendants' motions claimants may seek to dismiss the lawsuit appeal. The AES Defendants believe that they have meritorious defenses to the claims asserted against them and will defend themselves vigorously in this proceeding; however, there can be no assurances that they will be successful in their efforts.

In October 2019, the Superintendency of the Environment (the "SMA") notified AES Andes of certain alleged breaches associated with the environmental permit of the Ventanas Complex, initiating a sanctioning process through Exempt Resolution N° 1 / ROL D-129-2019. The alleged charges include exceeding generation limits, failing to reduce emissions during episodes of poor air quality, exceeding limits on discharges to the sea, and exceeding noise limits. AES Andes has submitted a proposed "Compliance Program" to the SMA for the Ventanas Complex. The latest version of this Compliance Program was submitted on May 26, 2021. On December 30, 2021, the Compliance Program was approved by the SMA. However an ex officio action was brought by the SMA due to alleged exceedances of generation limits, which would require the Company to reduce SO<sub>2</sub>, NO<sub>x</sub> and PM emissions in order to achieve the emissions offset established in the Compliance Program. On January 6, 2022, AES Andes

---

75 | The AES Corporation | March 31, 2024 June 30, 2024 Form 10-Q

filed a reposition with the SMA seeking modification of the means for compliance with the ex officio action. On January 17, 2023, the SMA approved street paving measures, or alternatively a program providing heaters for community members, as the means to satisfy the air emissions offsets in the approved Compliance Plan. The cost of the proposed Compliance Program is approximately \$10.8 million USD and is in the execution stage. Fines are possible if the SMA determines there is an unsatisfactory execution of the Compliance Program. On April 21, 2023, the SMA notified AES Andes of a resolution alleging an additional "serious" non-compliance of the Ventanas Complex failing to reduce emissions during episodes of poor air quality. On May 24, 2023, AES Andes submitted disclaimers to the SMA in response to this resolution. On April 17, 2024 May 10, 2024, AES Andes received notice the Company was notified of a fine for \$180,515 USD. On June 3, 2024, the Company appealed this fine to the Environmental Court. The Company believes that the SMA it has closed the investigation of the sanctioning process meritorious defenses and the next step is for the SMA will continue to draft the final resolution. AES Andes plans to assert them vigorously defend itself through the administrative process, but in this dispute; however, there are can be no guarantees assurances that it will be successful. Fines are possible if AES Andes is unsuccessful in its defense of the April 2023 resolution and/or if the SMA determines there is an unsatisfactory execution of the Compliance Program approved in connection with the October 2019 sanctioning process.

In March 2020, Mexico's Comisión Federal de Electricidad ("CFE") served an arbitration demand upon AES Mérida III. CFE made allegations that AES Mérida III was in breach of its obligations under a power and capacity purchase agreement ("Contract") between the two parties, which allegations related to CFE's own failure to provide fuel within the specifications of the Contract. CFE sought to recover approximately \$200 million in payments made to AES Mérida under the Contract as well as approximately \$480 million in alleged damages for having to acquire power from alternative sources in the Yucatan Peninsula. AES Mérida filed an answer denying liability to CFE and asserted a counterclaim for damages due to CFE's breach of its obligations. The evidentiary hearing took place in November 2021. Closing arguments were heard in May 2022. In November 2022, the arbitration Tribunal issued its decision in the case, rejecting CFE's claims for damages and granting AES Mérida a net amount of damages on AES Mérida's counterclaims ("Award"). There are ongoing proceedings in the Mexican courts concerning AES Mérida's attempt to enforce the Award and CFE's attempt to challenge the Award. In March 2024, the relevant Court of First Instance rejected denied CFE's challenge of request to nullify the award. CFE may attempt to appeal that decision. Award ("March 2024 Decision"). The March 2024 Decision has been affirmed by the relevant federal District Court and is currently under review by the Collegiate Court. AES Mérida believes that it has meritorious claims and defenses and will assert them vigorously in this dispute; however, there can be no assurances that it will be successful in its efforts.

On May 12, 2021, the Mexican Federal Attorney for Environmental Protection (the "Authority") initiated an environmental audit at the TEP thermal generating facility. On January 20, 2023, TEP was notified of the resolution issued by the Authority, which alleges breaches of air emission regulations, including the failure to submit reports. The resolution imposes a fine of \$27,615,140 pesos (approximately USD \$1.7 million \$1.5 million). On March 3, 2023, the facility filed a nullity judgment to challenge such resolution, which has been admitted by the local judge with an injunction granted against execution of the proposed fine during the course of the underlying proceedings. However, the local tax authority rejected receiving the bond that is required to guarantee the injunction, and as a result, on September 18, 2023, TEP filed a complaint seeking to compel the tax authority to accept the bond and recognize the validity of the injunction. The Specialized Chamber has not issued a response to the complaint, and therefore on January 12, 2024, TEP filed a request for the Specialized Chamber to rule on the admission of the complaint. On February 2, 2024, TEP filed an amparo lawsuit on the basis that no resolution has been issued regarding TEP's May 2023 filing with the Chamber to inform if the Authority had submitted its response to the nullity lawsuit, and if not, to declare that the Authority's right precluded. The Company believes that it has meritorious defenses to the claims asserted against it and will defend itself vigorously in these proceedings; however, there can be no assurances that it will be successful in its efforts.

In February 2022, a lawsuit was filed in Dominican Republic civil court against the Company. The lawsuit purports to be brought on behalf of over 425 Dominican claimants, living and deceased, and appears to seek relief relating to CCRs that were delivered to the Dominican Republic in 2003 and 2004. The lawsuit generally alleges that the CCRs caused personal injuries and deaths and demands over \$600 million in alleged damages. The lawsuit does not identify or provide any supporting information concerning the alleged injuries of the claimants individually. Nor does the lawsuit provide any information supporting the demand for damages or explaining how the quantum was derived. In February 2024, at the request of the Company, the Dominican Supreme Court of Justice transferred the case to a different civil court, namely, the Civil Court of La Vega. The Company believes that it has meritorious defenses to the claims asserted against it and will defend itself vigorously in this proceeding; however, there can be no assurances that it will be successful in its efforts.

On July 25, 2022, AES Puerto Rico, LP ("AES-PR") received from the EPA an NOV alleging certain violations of the CAA at AES-PR's coal-fired power facility in Guayama, Puerto Rico. The NOV alleges AES-PR exceeded an emission limit and did not continuously operate certain monitoring equipment, conduct certain analyses and testing, maintain complete records, and submit certain reports as required by the EPA's Mercury and Air Toxics Standards. The NOV further alleges AES-PR did not comply fully with the facility's Title V operating permit. AES-PR is engaging in discussions with the EPA about the NOV. AES-PR will defend its interests, but we cannot predict the outcome of

---

76 | The AES Corporation | March 31, 2024 June 30, 2024 Form 10-Q

this matter at this time. However, settlements and litigated outcomes of CAA claims alleged against other coal-fired power plants have required companies to pay civil penalties and undertake remedial measures.

On January 26, 2023, the SMA notified Alto Maipo SpA of four alleged charges relating to the Alto Maipo facility, all of which are categorized by the SMA as "serious." The alleged charges include untimely completion of intake works and insufficient capture by the provisional works, irrigation water outlet and canal contemplated by an agreement with local communities; non-compliance with the details of the forest management plans and intervention in unauthorized areas; construction of a road in a restricted paleontological area; and unlawful moving of fauna. On February 16, 2023, the Alto Maipo project submitted a compliance program to which the SMA provided which has undergone two rounds of observations by the SMA and interested third parties. On June 19, 2024, the SMA issued new observations. On June 6, 2023 In response, on July 17, 2024, Alto Maipo responded to submitted an updated version of the SMA's observations by submitting a revised compliance program, which is currently under consideration review by the SMA. In late June and early July 2023, third-party opponents submitted observations to Environmental Authority. The costs associated with the compliance program claiming that are estimated to amount to approximately \$3 million USD. If the proposal to address the intake works charges is inadequate, Alto Maipo completed its submission of responses to these third-party observations in August 2023, and subsequently, new, additional observations were submitted by opponents to the project. In December 2023, Alto Maipo submitted responses to the opponents' latest observations. Review by the SMA is still pending. The costs of any such compliance program are uncertain. If a compliance program is not approved, by Alto Maipo reserves the right to appeal such a decision before the environmental courts. If such an appeal is unsuccessful - or if the compliance program is not executed to the satisfaction of the SMA - fines, revocation of the facility's RCA environmental permit, approved by the SMA, or facility closure are possible outcomes for such alleged serious violations under applicable regulations.

In May 2024, the Chilean competition agency (the Fiscalía Nacional Económica or "FNE") opened an investigation regarding AES Andes's declarations with respect to coal prices and coal blends used to generate electricity in Chile. The investigation was prompted by a confidential complaint filed in December 2023, which has not been disclosed to AES Andes. In general terms, the investigation seeks to determine whether the facts alleged in the complaint could be considered as an abuse of a dominant position by AES Andes. The investigation is at a very early stage; AES Andes is currently responding to the FNE's information requests. The FNE will independently conduct the investigation and will ultimately decide whether to dismiss the matter or initiate a judicial proceeding on the allegations in the confidential complaint. These types of investigations in Chile commonly last for years. AES Andes does not believe that it has violated any competition laws. Further, if the FNE ever initiates a judicial proceeding on this matter, AES Andes will defend itself vigorously. Given the early nature of this investigation, we are unable to estimate any potential impact of the investigation or its eventual outcome on our business, financial condition or results of operations.

#### ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors disclosed in Item 1A.—Risk Factors of our 2023 Form 10-K. Additional risks and uncertainties also may adversely affect our business and operations, including those discussed in Item 2.—Management's Discussion and Analysis of Financial Condition and Results of Operations in this Form 10-Q.

#### ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

##### Issuer Purchases of Equity Securities

The following table provides information relating to our purchases of AES Common Stock during the first second quarter of fiscal year 2024:

Period	Total Number of Shares Purchased (1)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares That May Yet Be Purchased Under the Plans or Programs (2)
January 1 — January 31	—	\$ —	—	\$ 264,000,000
February 1 — February 29	—	—	—	264,000,000
March 1 — March 31	165,335	16.24	—	264,000,000
<b>Total</b>	<b>165,335</b>	<b>\$ 16.24</b>	<b>—</b>	<b>\$ 264,000,000</b>

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares That May Yet Be Purchased Under the Plans or Programs (3)
April 1 — April 30	—	\$ —	—	\$ 264,000,000
May 1 — May 31	—	—	—	264,000,000
June 1 — June 30	—	—	—	264,000,000
<b>Total</b>	<b>—</b>	<b>\$ —</b>	<b>—</b>	<b>\$ 264,000,000</b>

(1) During the first quarter of fiscal year 2024, The AES Corporation purchased 165,335 shares of AES Common Stock in a privately negotiated affiliate transaction from a wholly-owned subsidiary that had acquired such shares as part of a share ownership plan offered to employees. The purchase price reflects the closing price per share of AES Common Stock on the New York Stock Exchange on March 22, 2024, the date of the transaction. This transaction was not effected pursuant to the publicly announced stock repurchase program described in footnote 2.

(2) On July 7, 2010, The AES Corporation announced that its Board of Directors approved a common stock repurchase program under which the Company may purchase up to \$500 million of shares of its outstanding common stock, depending on cash availability, market conditions, and other factors. The original authorization was set to expire on December 31, 2010, however, in December 2010, the Board authorized an extension of the stock repurchase program. The current program does not have a predetermined expiration date. Repurchases under this program may be made using a variety of methods, which may include open market repurchases, purchases by contract (including, without limitation, accelerated stock repurchase programs or 10b5-1 plans), and/or privately negotiated transactions. No repurchases were made under this program during the first second quarter of 2024. As of March 31, 2024 June 30, 2024, \$264 million remained available for purchase under this authorization.

## CERTIFICATIONS

I, Andrés Gluski, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of The AES Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
