A Business Overview About FIS FIS is a financial technology company providing solutions to financial institutions, businesses and developers. We unlock financial technology to the world across the money lifecycle underpinning the world's financial systems. Our people are dedicated to advancing the way the world pays, banks and invests, by helping our clients to confidently run, grow and protect their businesses. Our expertise comes from decades of experience helping financial institutions and businesses of all sizes adapt to meet the needs of their customers by harnessing where reliability meets innovation in financial technology. Headquartered in Jacksonville, Florida, FIS is a member of the Fortune 500® and the Standard & Poor's 500® Index. FIS is incorporated under the laws of the State of Georgia as Fidelity National Information Services, Inc., and our stock is traded under the trading symbol "FIS" on the New York Stock Exchange. Growth and Strategy Objectives Our growth has been driven by a number of factors, including growth of our customers' businesses, our internal development of new solutions that enhance our client offerings, and our sales and marketing efforts to expand our customer base and addressable markets. Acquisitions have also contributed additional solutions that complement or enhance our offerings, diversify our client base, expand our geographic coverage, and provide entry into new and attractive adjacent markets that align with our strategic objectives. We continue to strategically allocate resources to both internal and external growth initiatives to enhance the long-term value of our business. Worldpay Sale Summary On January 31, 2024, we completed the sale (the "Worldpay Sale") of a 55% equity interest in our Worldpay Merchant Solutions business to private equity funds managed by GTCR, LLC (such funds, the "Buyer"). FIS retained a non-controlling 45% equity interest in a new standalone joint venture, Worldpay Holdco, LLC ("Worldpay"), following the closing of the Worldpay Sale. Worldpay continues to provide merchant acquiring and related services to businesses of all sizes and across any industry globally, enabling them to accept, authorize and settle electronic payment transactions. In connection with the Worldpay Sale, FIS and Worldpay entered into commercial agreements, preserving a key value proposition for clients of both businesses and reducing potential dis-synergies. FIS and Worldpay also entered into additional agreements as described in Note 4 to the consolidated financial statements. Competitive Strengths We believe our competitive strengths include the following: ☐ Brand. FIS is a highly respected brand known globally for innovation and thought leadership in the financial services sector. ☐ Extensive Domain Expertise and Portfolio Breadth. FIS' significant expertise in the markets and domains we serve enables us to deliver a broad range of innovative software applications and flexible service offerings, ranging from managed processing arrangements, either at the client site or hosted at an FIS data center or in our private cloud, to traditional license and maintenance arrangements. Our expansive solution set allows us to bundle tailored or integrated services to compete effectively. ☐ Excellent and Long-term Relationships with Clients. A significant percentage of our business relates to solutions provided under multi-year, recurring contracts. The nature of these relationships allows us to develop close partnerships with our clients, resulting in high client retention rates. As the breadth of FIS' service offerings has expanded, we have found that our deep and broad access within our clients' organizations presents greater opportunities for cross-selling and up-selling solutions to our clients. ☐ Modern and Cloud-based Technologies. FIS leverages the modern architectures of our software applications and our ability to integrate many of our solutions with the solutions of others to provide customized solutions that respond to individualized client needs. We have made significant investment in modernizing our platforms and solutions and have moved substantially all of our server compute into our private cloud located in our strategic data centers, supplemented by public clouds in certain regions, to increase speed of delivery to clients and increase solution availability to industry-best levels. ☐ Global Distribution and Scale. We are a global leader in many of the markets we serve, supported by a large, knowledgeable talent pool of employees around the world. Our worldwide presence and global scale enable us to leverage our array of solution offerings, client relationships, and modern infrastructure to drive revenue growth and operating efficiency. Strategy Our mission is to deliver superior solutions to our clients and to expand our client base to generate sustained revenue and earnings growth for our shareholders. Our strategy to achieve this goal is built on the following pillars: ☐ Build, Buy, or Partner to Add Solutions to Win New Clients and Cross-sell to Existing Clients. We continue to invest in our solution portfolio through internal software development, as well as through acquisitions, equity investments and partnerships that complement and extend our existing solutions and capabilities, providing us with additional solutions to cross-sell to current clients and to capture the interest of new clients. By investing in solution innovation, we continue to expand our value proposition to our clients and prospects. ☐ Support Our Clients Through Innovation. Changing market dynamics, particularly in the areas of digital delivery, information security and regulation, are transforming the way our clients operate, which is driving incremental demand for our integrated solutions built around our intellectual property. As clients and prospects evaluate technology, business process changes and vendor risks, our depth of service capabilities enables us to become involved earlier in their planning and design process and assist them as they manage these changes. ☐ Drive Efficiency and Scalability. We strive to improve the efficiency of our operations through investments in new technologies, processes and infrastructure modernization. We also leverage a one-to-many operating model to drive high incremental margins on revenue growth, while also providing cost-effective solutions for our clients. ☐ Expand Distribution. Through our global sales force and strategic commercial partnerships, we drive growth through client additions and the expansion of existing client relationships in support of our clients' growth ambitions. Our clients range from large banks, financial institutions and other enterprises, including multi-national clients, to community or regional financial institutions and other businesses. ☐ Allocate Our Capital and Resources Strategically. As we make decisions with respect to building, buying or partnering to drive innovation in support of our clients, we prioritize the allocation of capital and other resources to the opportunities providing the highest client benefit and growth potential. We also continually review our portfolio of assets and businesses to assess their fit with our strategy and will, from time to time, decide to wind down or divest businesses or assets to redeploy capital to our areas of strategic focus. We believe that keeping our team and our capital strategically focused benefits our existing clients and our ability to win new clients. At the same time, to the extent our businesses generate excess cash, we strategically use it to repurchase shares, repay debt, pay dividends or for other corporate purposes. Segment Information FIS reports its financial performance based on the following segments: Banking Solutions ("Banking"), Capital Market Solutions ("Capital Markets") and Corporate and Other. The Worldpay Merchant Solutions business included the former Merchant Solutions segment in addition to a business previously included in the Corporate and Other segment. The results of the Worldpay Merchant Solutions business have been recast as discontinued operations for all periods presented. Accordingly, the Company no longer reports the Merchant Solutions Table of Contents segment. The assets and liabilities of the Worldpay Merchant Solutions business disposal group are presented separately on the consolidated balance sheets, and the operating results have been reflected as discontinued operations for all periods presented. As such, the related results have been excluded from continuing operations and segment results. See Notes 1 and 3 to the consolidated financial statements for further information regarding the Worldpay Merchant Solutions disposal group and its discontinued operations. FIS' share of the net income of Worldpay is reported as equity method investment earnings (loss). As a result of our ongoing portfolio assessments, the Company reclassified certain businesses from Capital Markets to Banking and to Corporate and Other during the quarter ended March 31, 2023, and reclassified certain non-strategic operations from Banking to Corporate and Other during the quarter ended December 31, 2023. The Company recast all prior-period segment information presented to reflect these reclassifications. See "Segment Information" below for additional discussion of our solutions and customers. See also Notes 6 and 22 to the consolidated financial statements for additional information about our segment revenue. Our consolidated results generally do not reflect pronounced seasonality. However, quarterly revenue and margins for each segment may vary based on the timing of recognition of certain non-recurring revenue, including software licenses and termination fees. For information about current trends in market demand, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Business Trends and Conditions." Revenue by Segment The table below summarizes our revenue by reporting segment (in millions):

2024	2023	2022
Banking Solutions	(1)\$6,892	\$6,743
Capital	\$6,625	\$6,625

Market Solutions2,979Â 2,766Â 2,631Â Corporate& Other256Â 322Â 464Â Total Consolidated Revenues\$10,127Â \$9,831Â \$9,720Â (1)During 2024, the Company revised its previously issued consolidated financial statements as of and for the annual periods ended December 31, 2023 and 2022, to correct certain immaterial misstatements. See Note 24 to the consolidated financial statements for information about our revision of prior-period consolidated financial statements.Banking Solutions ("Banking")The Banking segment is focused on serving financial institutions with core processing software, transaction processing software and complementary applications and services, many of which interact directly with core processing software. We sell these solutions on either a bundled or stand-alone basis. Clients in this segment include global financial institutions, U.S. regional and community banks, credit unions and commercial lenders, as well as government institutions and other commercial organizations. We provide our clients integrated solutions characterized by multi-year processing contracts that generate recurring revenue. The predictable nature of cash flows generated from the Banking segment provides opportunities for further investments in innovation, integration, information and security, and compliance in a cost-effective manner.Our solutions in this segment include the following:â€¢Core Processing and Ancillary Applications.Â Our core processing software applications, including deposit and lending, customer management and other central management systems, are designed to run banking processes for our financial institution clients. Clients use these applications to maintain the primary records of their customer accounts. Our diverse selection of market-focused core processing software applications enables FIS to compete effectively in a wide range of markets. We continue to invest in our core modernization efforts to further differentiate our offerings for the long term. We also offer a number of solutions that are ancillary to the primary applications listed above, including branch automation, back-office support systems and compliance support.â€¢Digital, including Mobile and Online.Â Our comprehensive suite of retail and commercial applications enables financial institutions to streamline and integrate customer-facing operations with back-office processes, thereby improving customer experience across channels (e.g., branch, internet, mobile, ATM, and call centers). FIS' focus on real-time consumer access has driven significant market innovation in multi-channel, API-enabled embedded and multi-hosted solutions, underpinned by a strategy that provides tight integration and a seamless customer experience. Our innovative digital banking capabilities are now available to financial institutions with continually expanding 4Table of Contentsfunctionality. Our digital offerings are integrated with core banking platforms offered by FIS and are also offered to customers of non-FIS core systems.â€¢Fraud, Risk Management and Compliance.Â Our decision solutions offer a spectrum of options that cover the account lifecycle from helping to identify qualified account applicants to managing existing customer accounts and fraud. Our applications enable Know Your Customer, new account decisioning and opening, account and transaction management, fraud management and collections. Our risk management solutions use our proprietary risk management models and data sources to assist in detecting fraud and assessing the risk of opening a new account. Our systems use a combination of advanced authentication procedures, predictive analytics, artificial intelligence modeling and proprietary and shared databases to assess and detect fraud risk for deposit, card and other transactions for financial institutions.â€¢Card and Retail Payments.Â Our card and retail payment technology solutions allow clients to issue VISAÂ®, MasterCardÂ® or other payment network-branded credit and debit cards or other electronic payment cards for use by both consumer and business accounts. Card-based volumes continue to increase, driven by both the number of transactions per month and the value of those transactions. We offer EMV (Europay, MasterCard and Visa) integrated circuit cards, often referred to as chip cards, as well as a variety of stored-value card types and loyalty programs, including our Premium Payback service that allows our financial institutions' customers to use loyalty points at a variety of merchant point-of-sale systems. Our integrated solutions range from card production and activation to processing to an extensive range of fraud management solutions and value-added loyalty programs designed to increase card usage and fee-based revenue for financial institutions and merchants. The majority of our programs are full service, including most of the operations and support necessary for an issuer to operate a credit card program. We do not make credit decisions for our card issuing clients. We are also a leading provider of prepaid card solutions, which include digital cards, gift cards and reloadable cards, with end-to-end solutions for the development, processing and administration of stored-value programs, including government benefit programs. Our closed-loop gift card solutions and loyalty programs provide merchants compelling solutions to drive consumer loyalty.â€¢Electronic Funds Transfer and Network.Â Our electronic funds transfer and debit card processing businesses offer settlement and card management solutions for financial institution card issuers. We offer a modern, core-agnostic payment hub with real-time fraud monitoring across payment rails. We own and operate several U.S. domestic debit, prepaid, ATM and credit networks that carry transactions for a variety of transaction modes. Our networks connect millions of cards and point-of-sale locations nationwide, providing consumers with secure, real-time access to their money. Also through our networks, clients such as financial institutions, retailers and independent ATM operators can capitalize on the efficiency, consumer convenience and security of electronic real-time payments, real-time account-to-account transfers, and strategic alliances, such as surcharge-free ATM network arrangements.â€¢Wealth and Retirement.Â We provide wealth and retirement solutions that help banks, trust companies, brokerage firms, insurance firms, retirement plan professionals, benefit administrators and independent advisors acquire, service and grow their client relationships. We provide solutions for client acquisition, transaction management, trust accounting and recordkeeping that can be deployed stand-alone, as part of an integrated wealth or retirement platform, or on an outsourced basis.â€¢Item Processing and Output Solutions.Â Our item processing solutions furnish financial institutions with the technology needed to capture data from checks, transaction tickets and other items; image and sort items; process exceptions through keying; and perform balancing, archiving and the production of statements. Our item processing services are performed at one of our multiple item processing centers located throughout the U.S.Â or on-site at client locations. Our extensive solutions include distributed (i.e., non-centralized) data capture, mobile deposit capture, check and remittance processing, fraud detection, and document and report management. Clients encompass banks and corporations of all sizes, from de novo banks to the largest financial institutions and corporations. We offer a number of output solutions that are ancillary to the primary solutions we provide, including print and mail capabilities, document composition software and solutions, and card personalization fulfillment solutions. Our print and mail solutions offer complete computer output solutions for the creation, management and delivery of print and fulfillment needs. We provide our card personalization fulfillment solutions for branded credit cards and branded and non-branded debit and prepaid cards.5Table of ContentsCapital Market Solutions ("Capital Markets")The Capital Markets segment is focused on serving global financial services clients and corporations with a broad array of buy- and sell-side, treasury, risk management and lending solutions. Clients in this segment include asset managers, private equity firms, sell-side securities brokerage and trading firms, insurers, asset and auto financiers and other commercial organizations. Our solutions include a variety of mission-critical buy- and sell-side applications for recordkeeping, data and analytics, trading and financing, as well as corporate treasury and risk management applications. Capital Markets clients purchase our solutions in various ways including licensing and managing technology "in-house," using consulting and third-party service providers, as well as procuring fully outsourced end-to-end solutions. Our long-established relationships with many of these financial and commercial institutions generate significant recurring revenue. We have made, and continue to make, investments in modern platforms, advanced technologies, open APIs, machine learning and artificial intelligence, and regulatory technology to support our Capital Markets clients.Our solutions in this segment include the following:â€¢Trading and Asset Services. We offer solutions that support our customers across the buy and sell sides of the capital markets industry, assisting them to control their front, middle and back office operations through integrated ecosystems. Our solutions support institutional investors, managers, broker-dealers, asset servicers and transfer agents across all asset classes including private equity, hedge, credit, and traditional. Our trading applications focus on advanced trade life-cycle management, including market making and risk management, cleared derivatives processing, securities processing and securities finance, tax processing, and regulatory compliance, including anti-money laundering (AML) and trade surveillance. Our Asset Servicing solutions support every stage of the investment process, from research and portfolio management to order and position management, valuation, risk management, corporate actions, reconciliation, investment accounting, investor accounting, transfer agency and client reporting. Our solutions improve both investment decision making and operational efficiency, while managing risk and increasing transparency across the industry.â€¢Lending. Our lending solutions offer full life-cycle commercial lending functionality from loan origination, commercial credit assessment and customer risk rating to loan servicing and data analytics. We also offer the leveraged and syndicated loan markets solutions that manage amendments, secondary market trading, deal management and bookrunning. In the asset finance space, we offer a single, end-to-end leasing platform that helps auto and equipment finance companies manage the entire financing process, supporting origination and pricing, credit decisioning, contract management, servicing and collections.â€¢Treasury and Risk. Our treasury solutions help chief financial officers and treasurers manage working capital by reducing risk and improving communication and response time between a company's buyers, suppliers, banks, and other stakeholders. Our end-to-end financial management framework helps bring together receivables, treasury, and payments for a single view of cash and risk, which helps our clients optimize business processes for enhanced liquidity management. Our risk portfolio of solutions manages market and credit risk and regulatory compliance for banks and actuarial risk for insurance firms.Corporate and OtherThe Corporate and Other segment consists of corporate overhead expense, certain leveraged functions and miscellaneous expenses that are not included in the operating segments, as well as certain non-strategic businesses that we plan to wind down or sell. The overhead and leveraged costs relate to corporate marketing, finance, accounting, human resources, legal, compliance and internal audit functions, as well as other costs, such as acquisition, integration and transformation-related expenses and amortization of acquisition-related intangibles, that are not considered when management evaluates revenue-generating segment performance. Our other operating income recorded in connection with our transaction services arrangements with Worldpay is also recorded in Corporate and Other. Sales and Marketing Our sales personnel have expertise in particular solutions, geographic markets and industry verticals, as well as across our various client segments. We believe that focusing our expertise on clients in specific markets and tailoring integrated solution sets to participants in those markets enables us to better serve our clients and makes our offerings more attractive to prospects. The majority of our prospects are identified via direct and/or indirect field sales, as well as inbound and outbound lead generation, telesales and virtual sales efforts.6Table of ContentsOur global marketing team develops and leads the execution of global, role-specific and geography-based strategic marketing plans in support of the segments' reputation and relationship building goals in addition to their revenue and profitability goals. Key components of our strategic plans include brand amplification and digital enablement; market and competitive research; voice of the customer and client engagement; thought leadership; integrated go-to-market programs; internal communications and readiness; journalists and social media engagement; industry analyst relations; client events; trade shows; high-touch client programs; demand generation campaigns; account- and deal-based marketing programs; collateral development and management across digital and online channels; and the launch of new products to market. Patents, Copyrights, Trademarks and Other Intellectual PropertyIn general, we own the intellectual property and proprietary rights that are necessary to conduct our business and are important to our future success, including trademarks, trade names, trade secrets, copyrights and patents. We license certain items from third parties under arms-length agreements for varying terms, including some "open source" licenses. We rely on a combination of contractual restrictions, internal security practices, patents, trade secrets, copyrights and applicable law to establish and protect our software, technology and expertise worldwide. We rely on trademark law to protect our rights in our brands. We intend to continue taking commercially reasonable measures to protect our intellectual property rights, including by legal action when necessary and appropriate.CompetitionThe markets for our solutions are intensely competitive across both established companies and new industry entrants. Depending on the business line, our primary competitors include, but are not limited to, internal technology or software development departments within financial institutions or other large companies; global and regional companies providing banking, payment and capital markets services; embedded payment solution providers; securities exchanges; asset managers; card associations; clearing networks or associations; trust companies; independent computer services firms; companies that develop virtualized software applications; companies owned by global banks selling competitive solutions; companies that provide customized

development, implementation and support services; emerging technology innovators and business process outsourcing companies. Many of these companies compete with us across multiple solutions, market segments and geographies to varying degrees based on solution strength and distribution strength. Competitive factors impacting the success of our solutions include the quality of the technology-based application or service, breadth of application features and functions, ease of delivery and integration, the ability to maintain, enhance and support the applications or solutions, price and overall client experience. We believe that we compete vigorously in each of these categories. In addition, we believe our domain expertise and the breadth and complementary nature of our portfolio of applications, services and integrated solutions enhances our competitiveness against companies with more limited offerings. Our ability to innovate and scale digital payments and solutions has been a competitive advantage as well. Technology Development Our technology development activities primarily relate to the modernization of our proprietary core processing software applications and the design and development of next generation digital solutions, processing systems, software applications and risk management platforms. We expect to continue our practice of investing an appropriate level of resources to maintain, enhance and extend the functionality of our proprietary systems and software applications, to develop new and innovative software applications and systems to address emerging technology trends in response to the needs of our clients and to enhance the capabilities of our outsourcing infrastructure. In addition, we intend to offer solutions compatible with new and emerging delivery channels. As part of our technology development process, we evaluate current and emerging technology for compatibility with our existing and future software platforms. To this end, we engage with various hardware and software vendors in the evaluation of various new and existing technologies. Where appropriate, we use third-party technology components in the development of our software applications and service offerings. We typically utilize enterprise license agreements or strive to ensure that either alternative suppliers or transfer rights exist in order to ensure the continuity of supply of third-party technology components used in the development of our software applications and service offerings. As a result, we are not materially dependent upon any third-party technology components. Third-party software may be used for highly specialized business functions depending on our ability to develop the functionality internally within time and budget constraints. Additionally, third-party software may be used for routine, commonplace functions within a technology platform environment. We work with our clients to determine the appropriate timing and approach to introduce technology or infrastructure changes to our solutions.

Table of Contents Government Regulation Our solutions are subject to a broad range of complex federal, state, and international regulations and requirements, as well as requirements under the rules of self-regulatory organizations including, without limitation, federal truth-in-lending and truth-in-savings rules, federal, state and international money transmission laws, state cybersecurity protection laws, data protection and privacy laws, cyber resilience laws, artificial intelligence laws, usury laws, laws governing state trust charters, the Equal Credit Opportunity Act, the Electronic Funds Transfer Act, the Fair Credit Reporting Act, the Fair Debt Collection Practices Act, the Bank Service Company Act, the Bank Secrecy Act, the USA Patriot Act, the United Kingdom ("U.K."). Money Laundering Regulations, the U.K. Proceeds of Crime Act, the U.K. Criminal Finances Act, the U.K. Sanctions and Anti-Money Laundering Act, the U.K. Economic Crime and Corporate Transparency Act, European Union ("E.U.") Anti-Money Laundering Directives, the Internal Revenue Code, the Employee Retirement Income Security Act, the Health Insurance Portability and Accountability Act, the Community Reinvestment Act and the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), the Securities Exchange Act of 1934, the Investment Advisors Act of 1940 (the "1940 Act"), anti-corruption laws including the U.S. Foreign Corrupt Practices Act of 1977 (the "FCPA") and the U.K. Bribery Act 2010 (the "U.K. Bribery Act"), the rules and regulations of the Financial Industry Regulatory Authority ("FINRA"), the Securities and Exchange Commission ("SEC"), the Federal Financial Institutions Examination Council ("FFIEC"), the Consumer Financial Protection Bureau ("CFPB"), the Financial Conduct Authority in the U.K. ("FCA"), the Central Bank of Ireland in the Republic of Ireland ("CBI"), the Commission de Surveillance du Secteur Financier in Luxembourg ("CSSF"), the Jersey Financial Services Commission in Jersey, Channel Islands ("JFSC") and state financial services regulators (including enforcement of state cybersecurity laws). The compliance of our solutions with these and other applicable laws and regulations depends on a variety of factors, including the manner in which our clients use them. In some cases, we are directly subject to regulatory oversight and examination. In other cases, our clients are contractually responsible for determining what is required of them under applicable laws and regulations and utilize our solutions to achieve compliance with those laws and regulations. In some cases, we may be required to support our clients in achieving compliance with certain laws and regulations by virtue of the services that we provide to them. For example, under the E.U. Digital Operational Resilience Act ("DORA"), which came into force in January 2025, our E.U. financial entity clients will require us, as a third-party provider of information and communication technology services, to contract with and manage our relationships with them (and, where applicable, our relationships with critical third-party technology vendors in our supply chain) in accordance with the requirements of DORA. Failure to support our clients in achieving compliance with DORA and similar global regulatory regimes may cause us to lose revenue or clients and/or result in damage to our reputation, and may also attract scrutiny from regulators. In any event, the failure of our solutions to comply with applicable laws and regulations may result in suspension or revocation of permission-based regulatory licenses, restrictions on our ability to provide those solutions, the imposition of civil fines and/or criminal penalties, loss of client trust, and/or reputational damage. Further, regulatory authorities have the power to, among other things, enjoin "unsafe or unsound" practices, require affirmative actions to correct any violation or practice, issue administrative orders that can be judicially enforced and direct the sale of subsidiaries or other assets. We may be adversely affected by increased regulatory scrutiny or related negative publicity. The principal areas of regulation impacting our business are the following:

- Oversight by Banking Regulators. As a provider of electronic data processing and back-office services to financial institutions, FIS is subject to regulatory oversight and examination by the FFIEC, an interagency body of federal banking regulators including the Federal Deposit Insurance Corporation ("FDIC"), the Office of the Comptroller of the Currency ("OCC"), the Board of Governors of the Federal Reserve System ("FRB"), the National Credit Union Administration ("NCUA") (collectively, the Federal Banking Agencies or "FBA") and the CFPB, including as part of the Multi-Regional Data Processing Servicer ("MDPS") program. The MDPS program includes technology suppliers that provide mission-critical applications for a large number of financial institutions that are regulated by multiple regulatory agencies. Periodic information technology examination assessments are performed using FFIEC Interagency guidelines to identify potential risks that could adversely affect serviced financial institutions, determine compliance with applicable laws and regulations that affect the services provided to financial institutions, and ensure the solutions we provide to financial institutions do not create systemic risk to the banking system or impact the safe and sound operation of the financial institutions for which we process. In addition, independent auditors annually review several of our operations to provide reports on internal controls for our clients. We are also subject to review and examination by state and international regulatory authorities under state and foreign laws and rules that regulate many of the same activities that are described above, including electronic data processing, payments and back-office services for financial institutions and the use of consumer information.
- Table of Contents Our U.S.-based wealth and retirement business holds a charter in the state of Georgia, which makes us subject to the regulatory compliance requirements of the Georgia Department of Banking and Finance. As a result, we are also authorized to provide trust services in various additional states subject to additional applicable state regulations.
- Payment Services Oversight. Our payment services businesses provide technology services to U.S. financial institutions and are, therefore, subject to oversight and examination by the FFIEC. Our payment services businesses are also subject to regulation, supervision, and enforcement authority of numerous governmental and regulatory bodies in the jurisdictions in which they operate, which include the CFPB and U.S. state regulators. These various regulatory regimes require compliance in respect of many aspects of our payment services businesses including without limitation corporate governance and oversight functions, capital requirements, liquidity, safeguarding, fee regulation adherence, technology and cyber resilience, anti-money laundering and sanctions.
- Anti-Money Laundering. The Company is subject to, both directly and indirectly, various anti-money laundering laws and regulations such as the Bank Secrecy Act in the United States and the Money Laundering Regulations and Proceeds of Crime Act in the U.K. These laws, among other requirements, impose obligations to develop and implement risk-based anti-money laundering programs, file regulatory reports on large cash transactions and suspicious activity, and collect and maintain certain records related to customers and transactions. Many U.S. states have similar laws that overlap with, and in some cases diverge from, U.S. federal and international laws. While these federal, state and international laws are broadly consistent, there may be circumstances where the requirements of a particular jurisdiction conflict with those of other jurisdictions. As these laws continue to develop and expand, our investment in compliance with these laws continues to grow, as does the cost of ongoing compliance.
- Sanctions. The Company is subject to certain U.S. federal, state and international economic and trade sanctions programs, such as those that are administered by the U.S. Treasury's Office of Foreign Assets Control (referred to as "OFAC"), which prohibit or restrict transactions to or from, or dealings with, specified countries and regions, their governments, and in certain circumstances, their nationals, and with individuals and entities that are specially-designated nationals, narcotics traffickers, and terrorists or terrorist organizations. Similar programs exist in a number of other jurisdictions, most notably those administered by the Office of Financial Sanctions Implementation ("OFSI") in the U.K., E.U. sanctions, and United Nations sanctions. We have implemented policies, procedures, and internal controls that are designed to comply with global economic sanctions programs which are increasingly complex and rapidly evolving in response to geopolitical events. Those policies and procedures require the screening of third parties with which the Company does business, including clients and vendors, and transactions where appropriate.
- Anti-Corruption. The Company is subject to applicable anti-corruption laws, including the FCPA and the U.K. Bribery Act, in the jurisdictions in which it operates. Anti-corruption laws generally prohibit offering, promising, giving, or authorizing others to give, anything of value, either directly or indirectly, to a government official or private party in order to influence official action or otherwise to gain an unfair business advantage, such as to obtain or retain business. The Company has implemented policies, procedures, training and internal controls that are designed to comply with such laws, rules and regulations.
- Privacy and Data Protection. The Company is subject to an increasing number of privacy and data protection laws, regulations and directives globally, including the General Data Protection Regulation ("GDPR") in the E.U., the California Consumer Privacy Act ("CCPA") as amended by the California Privacy Rights Act ("CPRA"), the Virginia Consumer Data Protection Act ("VCDPA"), the Colorado Privacy Act ("CPA"), the Connecticut Personal Data Privacy and Online Monitoring Act ("CTDPA"), the Utah Consumer Privacy Act, the Gramm-Leach-Bliley Act ("GLBA"), the Fair Credit Reporting Act ("FCRA"), and the Health Insurance Portability and Accountability Act ("HIPAA") in the United States; the U.K.'s General Data Protection Regulation ("U.K. GDPR") and Data Protection Act 2018; the General Personal Data Protection Act ("LGPD") in Brazil; the China Personal Information Protection Law ("PIPL"); and the Japanese Act on the Protection of Personal Information ("APPI") (referred to collectively as "Privacy Laws"). Many of these Privacy Laws place restrictions on the Company's ability to efficiently transfer, access and use personal data across its business. The legislative and regulatory landscape for privacy and data protection continues to evolve. Our financial institution clients operating in the U.S. are required to comply with privacy regulations imposed under the GLBA and numerous similar state laws. GLBA and those state laws place restrictions on the use of non-public personal information. All financial institutions must disclose detailed privacy policies to their customers and offer them the opportunity to direct the financial institution not to share information with third parties. The regulations under GLBA, however, permit financial institutions to share information with non-affiliated parties who perform services for the financial institutions. As a provider of solutions to financial institutions, we are required to comply with the

Table of Contents Privacy Laws and are bound by the same limitations on disclosure of the information received from our clients as apply to the financial institutions themselves. A determination that there have been violations of Privacy Laws could expose us to significant damage awards, fines and other penalties that could, individually or in the aggregate, materially harm our business and reputation. Certain operations of the Company are also subject to the newer, comprehensive, U.S. state-level Privacy Laws that provide consumers with additional data protection rights, including the right to be informed about the personal information collected by third parties and the use of that personal information, and which also

impose obligations on companies in connection with the use of personal information. The Company is subject to the E.U.'s GDPR, which applies to all organizations processing the personal data of individuals in the E.U., regardless of where such organization is based. The GDPR has heightened our privacy and data protection compliance obligations, impacted our businesses' collection, processing and retention of personal data and imposed stricter standards for reporting data breaches.

§ Oversight by Securities Regulators. Our subsidiary that conducts our broker-dealer business in the U.S. is registered as a broker-dealer with the SEC, is a member of FINRA, and is registered as a broker-dealer in numerous states. Our broker-dealer is subject to regulation and oversight by the SEC. In addition, FINRA, a self-regulatory organization that is subject to oversight by the SEC, adopts and enforces rules governing the conduct, and examines the activities, of its member firms, including our broker-dealer. State securities regulators and various exchanges, including the New York Stock Exchange, also have regulatory or oversight authority over our broker-dealer. Broker-dealers are subject to regulations that cover all aspects of the securities business, including sales methods, trade practices among broker-dealers, public and private securities offerings, use and safekeeping of customers' funds and securities, capital structure, record keeping, the financing of customers' purchases and the conduct and qualifications of directors, officers and employees. In particular, as a registered broker-dealer and member of a self-regulatory organization, we are subject to the SEC's uniform net capital rule, Rule 15c3-1. Rule 15c3-1 specifies the minimum level of net capital a broker-dealer must maintain and also requires that a significant part of a broker-dealer's assets be kept in relatively liquid form. The SEC and various self-regulatory organizations impose rules that require notification when net capital falls below certain predefined criteria, limit the ratio of subordinated debt to equity in the regulatory capital composition of a broker-dealer and constrain the ability of a broker-dealer to expand its business under certain circumstances. Additionally, the SEC's uniform net capital rule imposes certain requirements that may have the effect of prohibiting a broker-dealer from distributing or withdrawing capital and requiring prior notice to the SEC for certain withdrawals of capital. Our subsidiaries also include an SEC-registered transfer agent. Our registered transfer agent is subject to the Securities Exchange Act of 1934 and the rules and regulations promulgated thereunder. These laws and regulations generally grant the SEC and other supervisory bodies broad administrative powers to address non-compliance with regulatory requirements. Sanctions that may be imposed for non-compliance with these requirements include the suspension of individual employees, limitations on engaging in certain activities for specified periods of time or for specified types of clients, the revocation of registrations, other censures and significant fines. Subsidiaries engaged in activities outside the U.S. are regulated by various government agencies in the particular jurisdiction where they are chartered, incorporated and/or conduct their business activity. For example, pursuant to the U.K. Financial Services and Markets Act 2000 ("FSMA"), certain of our subsidiaries are subject to regulations promulgated and administered by the FCA. The FSMA and rules promulgated thereunder govern all aspects of the U.K. investment business, including sales, research and trading practices, provision of investment advice, use and safekeeping of client funds and securities, regulatory capital, recordkeeping, margin practices and procedures, approval standards for individuals, financial crime systems and controls, periodic reporting and settlement procedures.

§ Money Transfer. Elements of our cash access and money transmission businesses are registered as a Money Services Business and are subject to various federal, state and international laws governing money transmission, including but not limited to the USA PATRIOT Act and reporting requirements of the Bank Secrecy Act, as well as various U.S. federal, state and international sanctions requirements. These businesses may also be subject to certain state and local licensing requirements. The Financial Crimes Enforcement Network, state attorneys general, and other agencies have enforcement responsibility over laws relating to money laundering, currency transmission, and licensing. In applicable states, we have obtained money transmitter licenses. However, changes to state money transmission laws and regulations, including changing interpretations and the implementation of new or varying regulatory requirements, may result in the need for additional or expanded money transmitter licenses, additional capital allocations or changes in the way in which we deliver certain solutions.

10 Table of Contents

§ Consumer Reporting and Protection. Our decision solutions subsidiary, ChexSystems, maintains a database of consumer information used to provide various account opening services, including credit scoring analysis, and is subject to the Federal Fair Credit Reporting Act ("FCRA") and similar state laws. The FCRA regulates consumer reporting agencies ("CRAs"), including ChexSystems, and governs the accuracy, fairness, and privacy of information in the files of CRAs that engage in the practice of assembling or evaluating certain information relating to consumers for certain specified purposes. CRAs are required to follow reasonable procedures to ensure maximum possible accuracy of information concerning the individual to whom the report relates and, if a consumer disputes the accuracy of any information in the consumer's file, to conduct a reasonable investigation within statutory timelines. The FCRA imposes many other requirements on CRAs and users of consumer report information. Regulatory enforcement of the FCRA is under the purview of the United States Federal Trade Commission, the CFPB, and state attorneys general, acting alone or in concert with one another. CRAs are also regulated by a number of states, including New York, with consumer reporting laws that are not pre-empted by the FCRA. In furtherance of our objectives of data accuracy, fair treatment of consumers, protection of consumers' personal information, and compliance with these laws, we have made considerable investment to maintain a high level of security for our computer systems in which consumer data resides, and we maintain consumer relations call centers to facilitate accurate and timely handling of consumer requests for information and disputes. We also are focused on ensuring our operating environments safeguard and protect consumers' personal information in compliance with these laws. Our consumer reporting and consumer-facing businesses are subject to CFPB Bulletin 2013-7 (a successor to the former Regulation AA - Unfair Deceptive Acts or Practices), which defines Unfair, Deceptive or Abusive Acts or Practices ("UDAAP"). This specific bulletin states that UDAAPs can cause significant financial injury to consumers, erode consumer confidence, and undermine fair competition in the financial marketplace. Original creditors and other covered persons and service providers under the Dodd-Frank Act involved in collecting debt related to any consumer financial product or service are subject to the prohibition against UDAAPs in the Dodd-Frank Act. In addition, our U.K. regulated entity, Platform Securities LLP, is required to comply with the FCA's Consumer Duty (the "Duty") in connection with its Wealth business. The Duty sets high standards of consumer protection across financial services and requires firms to put their customers' needs first.

§ Debt Collection. Our collection services are subject to the Federal Fair Debt Collection Practices Act and various state collection laws and licensing requirements. The Federal Trade Commission, as well as state attorneys general and other agencies, have enforcement responsibility over the collection laws, as well as the various credit reporting laws. The foregoing list of laws and regulations to which our Company is subject is not exhaustive, and the regulatory framework governing our operations changes continuously. Enactment of new laws and regulations may increasingly affect the operations of our business, directly and indirectly, which could result in substantial regulatory compliance costs, litigation expense, adverse publicity, and/or loss of revenue.

Human Capital Management

Employee Population As of December 31, 2024, we had more than 50,000 employees, including over 32,000 employees principally employed outside of the U.S. None of our U.S. workforce currently is unionized. Approximately 6,000 of our employees, primarily in Brazil and Europe, are represented by labor unions or works councils as of December 31, 2024.

Health and Safety The health and safety of our employees is a key priority. We have implemented a comprehensive wellness program focused on all aspects of employee wellness – physical, mental, social, and financial. Initiatives under this program are designed to promote healthy lifestyle habits. We continue to operate FIS Cares, a global employee-funded giving program designed to help our employees in times of need. We remain committed to providing a safe working environment that minimizes health risks and prioritizes physical safety.

11 Table of Contents

Corporate Culture Our culture stems from embracing our corporate values as we work together to win as one team, lead with integrity and strive to "be the change" for our employees, clients and communities. We believe that inclusion and belonging are at the core of our corporate values. Our focus on continuous learning and a respectful, inclusive environment helps us use our collective strengths to innovate and deliver the best solutions for our clients and partners. The Chief Executive Officer and the Chief People Officer regularly update our Board of Directors on human capital management and culture.

Talent Management Along with our clients and communities, our employees are primary stakeholders in our organization, and so we place a strategic priority on developing our talent and fostering a culture aligned with our corporate values and in which employees receive the support needed to grow and develop their skills and capabilities. Our talent development program provides an enterprise-wide, systematic foundation for career development tied to learning paths that enable skills development. Our talent practices are based on a future-focused development approach to equip FIS leaders with the skills required to enable business growth and exceed the needs of our clients. Our employees have a learning roadmap to "Build our Leaders of Tomorrow" which is supported by access to an extensive selection of online self-paced learning resources, virtual instructor-led and face-to-face development offerings, and targeted development programs for high-potential and senior management employees. We engage in executive-level succession planning and provide extensive opportunities to apply for open roles within our organization. Our talent development practices are underpinned by a comprehensive talent planning and feedback culture. Available Information Our website address is www.fisglobal.com. We make our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K, and any amendments to those reports, available, free of charge, on that website as soon as reasonably practicable after we file or furnish them to the SEC. Our Corporate Governance Policy and Code of Business Conduct and Ethics are also available on our website and are available in print, free of charge, to any shareholder who mails a request to the Corporate Secretary, Fidelity National Information Services, Inc., 347 Riverside Avenue, Jacksonville, FL 32202 USA. Other corporate governance-related documents can be found at our website as well. However, the information found on our website is not a part of this or any other report.

Item 1A. Risk Factors In addition to the normal risks of business, we are subject to significant risks and uncertainties, including those listed below and others described elsewhere in this Annual Report on Form 10-K. Any of the risks described herein, as well as risks currently unknown or immaterial, could result in a significant adverse effect on our business, financial condition or results of operations.

Risks Related to Our Business and Operations

Security breaches, privacy breaches, cyberattacks, unintentional disclosures of confidential information, third-party breaches, service outages, or a failure to comply with information security laws or regulations, contractual provisions, or industry security requirements by us, our vendors, clients, or technology partners could harm our business by disrupting delivery of services, exposing sensitive or confidential information, or damaging our reputation, any of which could result in a breach of one or more client contracts or regulatory investigations, enforcement actions, fines or litigation. Cybersecurity is fundamental to our complex, global business. We and our vendors, service providers, technology partners, and clients electronically receive, process, store and transmit sensitive and confidential information of our business partners, clients and such clients' customers. We collect consumer personal data, such as names and addresses, Social Security Numbers, driver's license numbers, financial account numbers, transactional history, cardholder data and payment history records. Such information is necessary to support our clients' transaction processing and to conduct our check authorization and collection businesses. We also collect personal data from our employees and contractors as necessary to support those relationships, comply with legal obligations, manage our workforce, and provide compensation and benefits. Our information systems and networks are dependent upon hardware, software, communication infrastructure and other technological components that are both developed by us and provided by third parties. These components sometimes require patches, updates, or remediation of known or potential vulnerabilities. Implementation challenges in timely completing these tasks can lead to security vulnerabilities that expose us, our systems and data to potential compromise or interruption. Our information systems are also vulnerable to human error as well as malicious insider threats. Finally, the systems we rely on, which include hardware and software manufactured, developed or operated by third-party vendors and service providers, have in the past been subject to, and may in the future be subject to, cyber attacks or security incidents due to employee error or malfeasance, software bugs, hardware malfunctions or other security vulnerabilities. The uninterrupted operation of information systems operated by us, our vendors and service providers, and other third parties, as well as the confidentiality of the customer or consumer information that resides on such systems, is critical to the successful operation of our Company. For that reason, security or privacy breaches are some of the principal operational risks we face as a provider of services

to financial institutions and businesses. Like other such providers, we are a regular target of attempts to identify and exploit system vulnerabilities and/or penetrate or bypass our security measures to gain unauthorized access to our networks and systems. If we fail to maintain an adequate security infrastructure, adapt to emerging security threats (such as the use of artificial intelligence by threat actors in furtherance of cyber attacks), regularly identify security vulnerabilities, prevent unauthorized access, identity theft or other cybersecurity risks (e.g., distributed denial of service, ransomware, and other cyber attacks), manage vendor or supply chain cybersecurity risks, adequately train users of our information systems, or implement sufficient security standards and technology to protect against security or privacy breaches, then the confidentiality, integrity or availability of the information we secure could be compromised. Unauthorized access to, or abuse of authorized access to, our computer systems or databases or our vendors' computer systems or databases could result in the theft or publication of confidential information and personal data, the deletion or modification of records, disruption of service delivery, installation of malware, and the potential need to pay ransom or otherwise cause interruptions in our operations. These issues could give rise to legal actions from clients and/or such clients' customers, regulatory investigations or enforcement activity, losses and expenses associated with such events, and damage to our reputation. Because we serve a diverse client base with different technology and service needs, we must continue to enhance our ability to manage the risks from the resulting diversity in potential security attacks. As a provider of services to financial institutions and businesses, we are bound by many of the same limitations on disclosure of the information we receive from clients that apply to the clients themselves. If we fail to comply with these regulations and industry security requirements, including those imposed by the payment card industry through its digital security standards and other rules, we could be exposed to damages from legal actions from clients and/or their customers, governmental proceedings, public disclosure and consumer notification requirements, and the imposition of significant fines or prohibitions on providing services. We operate in a highly regulated environment and are subject to a myriad of complex, evolving regulations and standards, including cybersecurity and privacy laws, regulations and industry standards. In addition, if more restrictive privacy laws, data protection rules or industry security requirements are adopted in the future on the federal or state level, or by a non-U.S. jurisdiction in or from which we serve clients, or by a specific industry body, those changes could have an adverse impact on our Company through increased costs or by imposing changes or inefficiencies on business processes. A material privacy or security incident would trigger SEC disclosure obligations and could trigger other applicable disclosure requirements, or be disclosed publicly, even if there is no legally required disclosure. Incident disclosure may increase the risks of private lawsuits or government enforcement action related to incidents, increase attention from malicious actors, and lead to greater regulatory scrutiny. The occurrence of any such incidents, and the related responses (if any) by regulators or third parties, may result in adverse publicity and reputational harm to us. If we are unable, or appears to be unable, to prevent cybersecurity or privacy breaches, we risk reputational damage. Our existing clients could lose confidence in our information systems and consequently choose to terminate their agreements with us. Such reputational harm could also inhibit our ability to attract new clients; potentially increase government, regulatory, or media scrutiny; or give rise to new regulatory requirements that adversely affect our ability to do business in one or more parts of the world. If we fail to innovate or adapt our solutions to changes in technology or in the marketplace, or if our ongoing efforts to upgrade or implement our technology are not successful, we could lose clients, or our clients could lose customers, and we could have difficulty attracting new clients for our solutions. The markets for our solutions are characterized by constant technological changes, frequent introductions of new solutions and evolving industry standards. Our future success will be significantly affected by our ability to enhance our current solutions and develop and introduce new solutions and services that address the increasingly sophisticated needs of our clients and their customers. In addition, as more of our revenue and market demand shifts to software as a service ("SaaS"), business process as a service ("BPaaS"), cloud, and new emerging technologies, the need to keep pace with rapid technology changes becomes more acute. These initiatives carry the risks associated with any new solution development effort, including cost overruns, delays in delivery and implementation, and performance issues. There can be no assurance that we will be successful in developing, marketing and selling new solutions or enhancements that meet these changing demands. If we are not successful in these efforts, we could lose clients, or our clients could lose customers, and we could have difficulty attracting new clients for our solutions. Any of these developments could have an adverse impact on our future revenue and/or business prospects. We operate in a competitive business environment; if we are unable to compete effectively, our business, financial condition or results of operations may be adversely affected. The market for our solutions is intensely competitive. Our competitors in Banking and Capital Markets vary in size and in the scope and breadth of the solutions and services they offer. Some of our competitors have substantial resources. We face direct competition from third parties, and because many of our larger potential clients have historically developed their key applications in-house and, therefore, view their system requirements from a make-versus-buy perspective, we also often compete against our potential clients' in-house capacities. In addition, the markets in which we compete have recently attracted increasing competition from smaller start-ups with emerging technologies which are receiving increasing investments, as well as global banks (and businesses controlled by combinations of global banks) and global internet companies that are introducing competitive solutions and services into the marketplace, particularly in the payments area. Emerging technologies and increased competition may also have the effect of unbundling bank solutions and may result in displacing solutions that we are currently providing from our legacy systems. International competitors are also now targeting and entering the U.S. market with greater force. There can be no assurance that we will be able to compete successfully against current or future competitors or that the competitive pressures we face in the markets in which we operate will not materially adversely affect our business, financial condition, or results of operations. Global economic, political and other conditions, including business cycles and consumer confidence, as well as geopolitical conflicts, may adversely affect our clients or trends in consumer spending, which may adversely impact the demand for our services and our revenue and profitability. A significant portion of our revenue is derived from transaction processing fees. The global transaction processing industries depend heavily upon the overall level of consumer, business and government spending. Any change in economic factors, including a sustained deterioration in general economic conditions or consumer confidence, particularly in the U.S., or inflation and increases in interest rates in key countries in which we operate may adversely affect consumer spending, consumer debt levels and credit and debit card usage, and as a result, adversely affect our financial performance by reducing the number or average purchase amount of transactions that we service. In addition, the direct and indirect effects of geopolitical conflicts, such as the Russia-Ukraine war and conflicts in the Middle East, have adversely affected global economic activity and transaction processing volumes (particularly in our former Merchant segment). Worsening, or future, geopolitical conflicts could materially adversely affect global economic activity and our transaction volumes in the future. When there is a slowdown or downturn in the economy, a drop in stock market levels or trading volumes, or an event that disrupts the financial markets, our business, financial condition or results of operations may suffer for a number of reasons. Customers may react to worsening conditions by reducing or delaying their capital expenditures in general or by specifically reducing or delaying their information technology spending. In addition, customers may seek to curtail trading operations or to lower their costs by renegotiating vendor contracts. Moreover, competitors may respond to market conditions and attempt to lure away our customers by lowering prices on existing solutions or by offering new, lower-cost solutions. Any further protective trade policies or actions taken by the U.S. may also result in other countries reducing, or making more expensive, services permitted to be provided by U.S.-based companies. If any of these circumstances remain in effect for an extended period of time, there could be a material adverse effect on our business, financial condition or results of operations. Our business, financial condition or results of operations could be adversely affected by business interruptions, errors or failures in connection with our or third-party information technology and communication systems and other software and hardware used in connection with our business, or by design errors in the software solutions we offer, or more generally, by the unavailability of third-party vendors' services that we need to operate our business effectively. Many of our services are based on sophisticated software and computing systems, and we may encounter delays when developing new technology solutions and services. Further, the technology solutions underlying our services have occasionally contained, and may in the future contain, undetected errors or defects when first introduced or when new versions are released. In addition, we may experience difficulties in installing or integrating our technologies on platforms used by our clients, or our clients may cancel a project after we have expended significant effort and resources to complete an installation. Finally, our systems and operations have been, and in the future could be, exposed to damage or interruption from fire, floods, severe weather events, natural disasters, power loss, telecommunications failure, unauthorized entry and computer viruses. Defects in our technology solutions or those of our third-party partners or elsewhere in the global cyber environment, errors or delays in the processing of electronic transactions, or other difficulties have resulted, and in the future could result, in (i) an interruption of business operations; (ii) a delay in market acceptance; (iii) an additional development and remediation costs; (iv) a diversion of technical and other resources; (v) a loss of clients; (vi) a negative publicity; or (vii) an exposure to liability claims. Any one or more of the foregoing could have an adverse effect on our business, financial condition or results of operations. We cannot be certain that control measures, including system redundancies, security controls, and application development and testing controls, will be successful in preventing disruption or limiting our exposure. Further, most of the solutions we offer are very complex software systems that are regularly updated. No matter how careful the design and development, complex software often contains errors and defects when first introduced and when major new updates or enhancements are released. If errors or defects are discovered in current or future solutions, then we may not be able to correct them in a timely manner, if at all. In our development of updates and enhancements to our software solutions, we may make a major design error that causes the solution to operate incorrectly or less efficiently. The failure of software to perform properly could result in the Company and its clients being subjected to losses or liability, including censures, fines, or other sanctions by the applicable regulatory authorities, and we could be liable to parties who are financially harmed by those errors. In addition, such errors could cause the Company to lose revenue, lose clients or suffer damage to its reputation. In addition, we generally depend on a number of third parties, both in the United States and internationally, to supply elements of our systems, computers, research and market data, connectivity, communication network infrastructure, other equipment and related support and maintenance. We cannot be certain that any of these third parties will be able to continue providing these services to meet our evolving needs effectively. If our vendors, or in certain cases vendors of our customers, fail to meet their obligations, provide poor or untimely service or suffer operational disruptions, and we are unable to make alternative arrangements for the provision of these services, then we may in turn fail to provide our services or to meet our obligations to our customers, and our business, financial condition or results of operations could be adversely affected. Entity mergers or consolidations and business failures in the banking and financial services industry could adversely affect our business by eliminating some of our existing and potential clients and making us more dependent on a more limited number of clients. There has been, and may continue to be, substantial consolidation activity in the banking and financial services industry. In addition, certain financial institutions that experienced negative operating results, including some of our clients, have failed, leading to further consolidation. These consolidations, including those spurred by failures, reduce our number of potential clients and may reduce our number of existing clients, which could adversely affect our revenue, even if the events do not reduce the aggregate activities of the consolidated entities. Further, if our clients or our partners across any of our businesses fail, merge with or are acquired by other entities that are not our clients or our partners, or that use fewer of our services, they may discontinue or reduce use of our services. It is also possible that larger financial institutions resulting from consolidations would have greater leverage in negotiating terms or could decide to perform in-house some or all of the services we currently provide or could provide. Any of these developments could have an adverse effect on our business, financial condition or results of operations. Failure to obtain new clients or renew client contracts on favorable terms could adversely affect our business, financial condition or results of operations. We may face pricing pressure in obtaining and retaining our clients. Larger clients may use their negotiating leverage to seek price reductions from us when they renew a contract, when a contract is extended, or when the client's business has significant volume changes. Larger

clients may also reduce services if they decide to move services in-house. Further, our smaller and mid-size clients may also exert pricing pressure, particularly upon renewal, due to competition or other economic needs or pressures being experienced by the client. On some occasions, this pricing pressure results in lower revenue from a client than we had anticipated based on our previous agreement with that client. This reduction in revenue could adversely affect our business, financial condition or results of operations. Bank failures or sustained financial market disruptions could adversely affect our business, financial condition and results of operations. We regularly maintain domestic cash deposits in banks that are not subject to insurance protection against loss or exceed the deposit limits. We also maintain cash deposits in foreign banks where we operate, some of which are not insured or are only partially insured. The failure of a bank, or events involving limited liquidity, defaults, non-performance or other adverse conditions in the financial or credit markets impacting financial institutions at which we maintain balances, or concerns or rumors about such events, may lead to disruptions in access to our bank deposits or otherwise adversely impact our liquidity and financial performance. There can be no assurance that our deposits in excess of the insurance limits will be backstopped by the U.S. or applicable foreign government, or that any bank or financial institution with which we do business will be able to obtain needed liquidity from other banks, government institutions or otherwise in the event of a failure or liquidity crisis. Our clients, including those of our clients that are banks, may be similarly adversely affected by any bank failure or other event affecting financial institutions. Any resulting adverse effects to our clients' liquidity or financial performance could reduce the demand for our services or affect our allowance for credit losses and collectability of trade receivables. A significant change in the liquidity or financial position of our clients could cause unfavorable trends in receivable collections and cash flows and may necessitate additional allowances for anticipated losses. Any such additional allowances could materially and adversely affect our business, financial condition or results of operations. In addition, instability, liquidity constraints or other distress in the financial markets, including the effects of bank failures, defaults, non-performance or other adverse developments that affect financial institutions, could impair the ability of one or more of the banks participating in our current or any future credit facilities to honor their commitments. This could have an adverse effect on our business if we were not able to replace those commitments or to locate other sources of liquidity on acceptable terms. The Company is subject to regulation, supervision, and enforcement authority of numerous governmental and regulatory bodies in the jurisdictions in which it operates. Because the Company is a technology service provider to U.S. financial institutions, it is subject to regular oversight and examination by the FBA, each agency of which is a member of the FFIEC, an interagency body of federal banking regulators. The FBA have broad discretion in the implementation, interpretation and enforcement of banking and consumer protection laws and use the FFIEC's uniform principles, standards and report forms in their review of bank service providers like FIS. A failure to comply with these laws, or a failure to meet the supervisory expectations of the banking regulators, could result in adverse action against the Company. The regulators have the authority to, among other things, enjoin "unsafe or unsound" practices; require affirmative actions to correct any violation or practice; issue administrative orders that can be judicially enforced; direct the sale of subsidiaries or other assets; and assess civil money penalties. The Company is also subject to ongoing supervision by regulatory and governmental bodies across the world, including economic and conduct regulators, such as OFAC, BIS and FinCEN in the U.S., the FCA, OFSI and OTSI in the U.K., and regulatory and governmental bodies responsible for issuing anti-money laundering, anti-bribery, and global economic sanctions and export control regulations. These various regulatory regimes require compliance across many aspects of our activities. Among other things, such regulatory and financial crime compliance obligations require certain capital requirements; safeguarding, training, authorization, supervision and oversight of personnel, systems, processes, controls, and documentation; and reporting to government entities. As we continue to grow our global business around the world, we will become subject to additional countries' regulations governing critical third-party service providers, financial crime and other regulatory areas. Our failure to comply with any of these requirements could result in the suspension or revocation of a license, loss of consumer confidence, and/or the imposition of civil or criminal penalties. We also have business operations that store, process or transmit consumer information or have direct relationships with consumers. As such, we are obligated to comply with regulations, including, but not limited to, the FCRA, the Federal Fair Debt Collection Practices Act and applicable privacy requirements, and we are subject to examination and oversight by the CFPB. In addition, our wealth and retirement business holds a charter in the state of Georgia, which obligates us to comply with regulatory compliance requirements of the Georgia Department of Banking and Finance. Our U.S. wealth and retirement business is required to hold certain levels of regulatory capital as defined by the state banking regulator in Georgia. In the U.K., our Platform Securities and broker-dealer businesses are regulated by the FCA and are also subject to further regulatory capital requirements. The Consumer Financial Protection Bureau ("CFPB") continues to establish rules and regulations for regulating financial and non-financial institutions and providers to those institutions to ensure adequate protection of consumer privacy and to ensure consumers are not impacted by deceptive business practices, as well as to provide examination and supervisory authority over consumer reporting agencies, including ChexSystems. These rules and regulations govern our clients or potential clients and also govern certain of our businesses. These regulations have resulted, and may further result, in the need for us to make capital investments to modify our solutions to facilitate our clients' and potential clients' compliance, as well as to deploy additional processes or reporting to comply with these regulations. In the future, we may need to incur additional expenses to ensure continued compliance with applicable laws and regulations and to investigate, defend and/or remedy actual or alleged violations. Further, requirements of these regulations have resulted, and could further result, in changes in our business practices, our clients' business practices and those of other marketplace participants that may alter the delivery of services to consumers, which have impacted, and could further impact, the demand for our solutions and services, as well as alter the types or volume of transactions that we process on behalf of our clients. As a result, these requirements, or proposed or future requirements, could have an adverse impact on our financial condition, revenue, results of operations, prospects for future growth and overall business. The New York Department of Financial Services has enacted rules that require covered financial institutions to establish and maintain cybersecurity programs. Other states also have data security laws that vary in several respects, including with regard to specificity and detail of requirements and the extent to which such requirements apply to the data we collect from individuals. These rules subject us to additional regulation and require us to adopt additional business practices that could also require additional capital expenditures or impact our operating results. Changes to state money transmission laws and regulations, including changing interpretations and the implementation of new or varying regulatory requirements, may result in the need for additional money transmitter licenses. These changes could result in increased costs of compliance, as well as fines or penalties. One of our subsidiaries is an SEC-registered broker-dealer in the U.S. and is subject to the financial and operational rules of FINRA, and others are authorized by the FCA to conduct certain regulated business in the U.K. Our transfer agent business is also regulated by the SEC and other regulators around the world. Domestic and foreign regulatory and self-regulatory organizations, such as the SEC, FINRA, and the FCA, can, among other things, fine, censure, issue cease-and-desist orders against, and suspend or expel a broker-dealer or its officers or employees for failure to comply with the many laws and regulations that govern brokerage activities. Regulations affecting the brokerage industry may change, which could adversely affect our business, financial condition or results of operations. We are exposed to certain risks relating to the execution services provided by our brokerage operations to our customers and counterparties, which include other broker-dealers, active traders, hedge funds, asset managers, and other institutional and non-institutional clients. These risks include, but are not limited to, customers or counterparties failing to pay for or deliver securities, trading errors, the inability or failure to settle trades, and trade execution system failures. As trading in the U.S. securities markets has become more automated, the potential impact of a trading error or a rapid series of errors caused by a computer or human error or a malicious act has increased. In our other businesses, we generally can disclaim liability for trading losses that may be caused by our software, but in our brokerage operations, we may not be able to limit our liability for trading losses or failed trades, even when we are not at fault. As a result, we may suffer losses that are disproportionately large compared to the relatively modest profit contributions of our brokerage operations. Moreover, the legislative and regulatory landscape continues to evolve, and we expect that it may cover alternative payment types, including digital and crypto currencies. Any failure to comply with such laws and regulations could expose us to liability, regulatory scrutiny and/or reputational damage. Financial crimes laws may be interpreted and applied inconsistently from country to country and may impose inconsistent or conflicting requirements. Complying with varying jurisdictional requirements could increase the costs and complexity of compliance, including associated recordkeeping costs, or could require us to change our business practices in a manner adverse to our business. Further, our business may be constrained by current and future laws and regulations governing the development, use and deployment of artificial intelligence (including machine learning) ("AI") technologies. These laws and regulations are continuously and rapidly evolving, and there is no single global regulatory framework for AI, creating further uncertainties regarding compliance with such laws and regulations. As a result, our ability to leverage AI could be restricted by burdensome and costly regulatory requirements. Additionally, in some markets in which we operate, our clients will require us to support them in achieving compliance with increasingly complex and prescriptive regulatory requirements relating to digital operational resilience. For example, under DORA, our E.U. financial entity clients will require us, as a third-party provider of information and communication technology services, to contract with and manage our relationships with such clients (and, where applicable, our relationships with critical third-party technology vendors in our supply chain) in accordance with the requirements of DORA. Failure to support our clients in achieving compliance with DORA and similar global regulatory regimes may cause us to lose revenue, clients, and/or result in damage to our reputation, and may also attract scrutiny from regulators. If we fail to comply with relevant laws or regulations, then we risk reputational damage, potential civil and criminal sanctions, fines or other action imposed by regulatory or governmental authorities, including the potential suspension or revocation of the permission-based regulatory licenses which authorize the Company to provide core services to customers. Regulatory authorities subject our businesses, from time to time, to regulatory investigations, reviews, examinations and proceedings (both formal and informal), some of which have the potential to result in settlements, fines, penalties, injunctions or other adverse consequences to us. This could result in an adverse effect on FIS' business, reputation and customer relationships, which in turn could adversely affect its financial position and performance. Many of our clients are subject to a regulatory environment and to industry standards that may change in a manner that reduces the types or volume of solutions or services we provide or may reduce the types or number of transactions in which our clients engage, and therefore reduce our revenue. Our clients are subject to many, varied and evolving government regulations and industry standards with which our solutions must comply. Our clients must ensure that our solutions and related services work within the extensive and evolving regulatory and industry requirements applicable to them. Federal, state, foreign or industry authorities could adopt laws, rules or regulations affecting our clients' businesses that could lead to increased operating costs and could reduce the convenience and functionality of our solutions, possibly resulting in reduced market acceptance. In addition, action by regulatory authorities relating to credit availability, data usage, privacy, or other related regulatory developments could have an adverse effect on our clients and, therefore, could have a material adverse effect on our financial condition, revenue, results of operations, prospects for future growth and overall business. Elimination of regulatory requirements could also adversely affect the sales of our solutions designed to help clients comply with complex regulatory environments. Constantly evolving global privacy, data protection, cybersecurity, cyber resilience, and AI laws and regulations require the Company to adopt new business practices, update contractual provisions in existing and new contracts, and constantly update our global Privacy and Data Protection Program and our global Information Security Program, which may require transitional and incremental expenses and may impact our future operating results. The Company is subject to numerous global privacy, data protection, cybersecurity, cyber resilience, and AI laws and regulations, which are continuing to change in ways that impose increasingly complex and costly compliance obligations on us and that have had, and are expected to continue to have, a significant impact on our operations. Failure to comply with new and evolving laws and regulations in these areas could result in significant penalties, damage to our reputation, and loss of business. We have

incurred, and will continue to incur, costs to comply with these new laws and regulations. There are also several additional laws being considered by state legislatures, the U.S. Congress, and governments around the world. As a result, we expect that a more substantial compliance effort with varying regimes in different jurisdictions will continue to be necessary in the future, which has the potential to further increase the cost and complexity of our business. Moreover, privacy, data protection, cybersecurity, cyber resilience, and AI laws may be interpreted and applied inconsistently from country to country and may impose inconsistent or conflicting requirements. Complying with varying jurisdictional requirements could increase the costs and complexity of compliance and associated recordkeeping costs or require us to change our business practices in a manner adverse to our business and to incur additional costs. Data localization requirements in evolving privacy, data protection, cybersecurity, cyber resilience, and AI laws could also increase the cost and alter the approach to housing data around the world. In addition, our businesses are increasingly subject to laws and regulations relating to digital transformation, surveillance, encryption, and data onshoring in the jurisdictions in which we operate. For example, under DORA, E.U. regulators are increasingly seeking to mitigate cyber threats and enhance digital resilience within the financial system through new regulations targeting the provision of critical third-party technology services. Compliance with these laws and regulations may require us to change our technology for information security, operational infrastructure, policies, and procedures, which could be time-consuming and costly and may result in additional regulatory burdens for the Company. Furthermore, compliance with these laws and regulations may indirectly impact us in circumstances where we act as a third-party service provider to clients, who are themselves subject to these laws and regulations and who will expect us to take appropriate steps to support them in achieving compliance. High profile digital banking security breaches or information system failures could impact consumer payment behavior patterns in the future and reduce our transaction volumes. We are unable to predict whether or when high profile digital banking security breaches or other information system failures will occur and, if they occur, whether consumers will reduce their digital banking service. If consumers reduce digital banking services, and we are not able to adapt to offer our clients alternative technologies, then our revenue and related earnings could be adversely affected.

Table of Contents

Misappropriation of and infringement on our intellectual property and proprietary rights, or a finding that our patents are invalid, could impair our competitive position. Our ability to compete depends in some part upon our proprietary solutions and technology. Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy aspects of our solutions or to obtain and use information that we regard as proprietary or challenge the validity of our patents with governmental authorities. Policing unauthorized use of our proprietary rights is difficult. We cannot make any assurances that the steps we have taken will prevent misappropriation of, or infringement upon, technology or that the agreements entered into for that purpose will be enforceable. Effective patent, trademark, service mark, copyright, and trade secret protection may not be available in every country in which our applications and services are made available. Misappropriation of our intellectual property or potential litigation concerning such matters could have an adverse effect on our business, financial condition or results of operations. As we increase our international business, we are subject to further risks of misappropriation of, or infringement on, our intellectual property in countries which have laws that are less protective of intellectual property or are enforced in a less protective manner. If our applications or services are found to infringe the proprietary rights of others, then we may be required to change our business practices and may also become subject to significant costs and monetary penalties. As our information technology applications and services develop, we are increasingly subject to infringement claims. Any claims, whether with or without merit, could (i) be expensive and time-consuming to defend; (ii) result in an injunction or other equitable relief which could cause us to cease making, licensing or using applications that incorporate the challenged intellectual property; (iii) require us to redesign our applications, if feasible; (iv) divert management's attention and resources; and (v) require us to enter into royalty or licensing agreements in order to obtain the right to use necessary technologies or pay damages resulting from any infringing use. Some of our solutions contain "open source" software, and any failure to comply with the terms of one or more of these open source licenses could adversely affect our business. We use a limited amount of software licensed by its authors or other third parties under so-called "open source" licenses, and we may continue to use such software in the future. Some of these licenses contain requirements that we make available source code for modifications or derivative works we create based upon the open source software and that we license such modifications or derivative works under the terms of a particular open source license or other license granting third parties certain rights of further use. By the terms of certain open source licenses, we could be required to release the source code of our proprietary software if we combine our proprietary software with open source software in a certain manner. Additionally, the terms of many open source licenses have not been interpreted by U.S. or other courts, and there is a risk that these licenses could be construed in a manner that could impose unanticipated conditions or restrictions on our ability to commercialize our solutions. In addition to risks related to license requirements, usage of open source software can lead to greater risks than use of third-party commercial software, as open source licensors generally do not provide warranties or controls on the origin of the software. We have established processes to help alleviate these risks, including a review process for screening requests from our development organizations for the use of open source, but we cannot be sure that all open source is submitted for approval prior to use in our solutions. In addition, many of the risks associated with the use of open source cannot be eliminated, and could, if not properly addressed, adversely affect our business. Using and/or incorporating AI technologies into our business poses additional risks and uncertainties that have the potential to harm our reputation and could have a material adverse effect on our business, financial condition or results of operations. Incorporating AI technologies into our business offers significant potential to enhance the value of the solutions and services we provide to our clients. If we are unsuccessful in identifying opportunities to expand our portfolio with AI capabilities to strengthen or maintain our market position or enhance our customers' experiences, we may have a competitive disadvantage in developing new products and operating our business. However, AI algorithms may produce unfair, unintended, inaccurate, biased or discriminatory outcomes which could be difficult to detect or explain. Further, the training data underlying third-party AI models may also inadvertently breach intellectual property, privacy or other rights and result in the unauthorized use of confidential information. The integration of AI introduces a variety of risks and uncertainties that may harm our reputation, expose us to lawsuits from consumers or other third parties, introduce security vulnerabilities to our information systems, or have other unintended consequences if we are not successful in mitigating such risks. AI systems may have unintended societal impacts and negative outcomes, such as algorithmic errors that result in inadvertent discrimination or bias. Ensuring that our AI systems are used ethically and in a way that aligns with societal values is critical to maintaining trust with our clients, their customers, and regulators, and will likely be required under laws and regulations governing AI systems.

Table of Contents

Additionally, AI systems, whether developed internally or integrated from third-party suppliers, may be susceptible to security vulnerabilities. If these systems are targeted or exploited by cyberattacks, we may face financial and operational costs related to recovery and remediation, required public disclosure, as well as potential reputational damage. The increased sophistication of bad actors raises the risk of significant disruptions, which could impact our operations, as well as customer trust. The regulatory landscape surrounding AI is evolving quickly, and the jurisdictions in which we operate are increasingly implementing new, complex and sometimes conflicting compliance requirements. For instance, the E.U. AI Act imposes a number of requirements (some of which take effect in August 2025, August 2026 and August 2027) that differ depending on the type and use of a particular AI system, but which will at a minimum include extensive documentation and transparency requirements. These regulatory changes introduce additional risks, including the possibility of failing to meet compliance obligations, which could result in substantial fines, penalties or other regulatory actions. AI systems are also dependent on strong model governance, which includes the continuous monitoring, auditing and updating of models to reflect the continuous changes in laws, regulations, or legal precedent, and is paramount to managing these ethical and operational concerns. If we do not maintain an adequate model governance function, we may face regulatory risk, lawsuits, security vulnerabilities or other sources of liability and potentially diminish trust in our brand. Lack of system integrity, fraudulent payments, credit quality, and undetected errors related to funds settlement or the availability of clearing services could result in a financial loss. We settle funds on behalf of financial institutions, other businesses and consumers and receive funds from clients, card issuers, payment networks and consumers on a daily basis for a variety of transaction types. Transactions facilitated by us include debit card, credit card, electronic bill payment transactions, banking payments and check clearing that supports consumers, financial institutions and other businesses. These payment activities rely upon the technology infrastructure that facilitates the verification of activity with counterparties, the facilitation of the payment and the detection or prevention of fraudulent payments. A compromise of our continuity of operations, integrity of processing, or ability to detect or prevent fraudulent payments could result in a financial loss to us. In addition, we rely on various financial institutions to provide treasury services in support of funds settlement for certain of our solutions. An inability to obtain such treasury services in the future could have a material adverse effect on our business, financial condition or results of operations. Furthermore, if one of our clients, for which we facilitate settlement, defaults on settlement or suffers a fraudulent event due to a deficiency in their controls, then we may suffer a financial loss if the client does not have sufficient capital to cover the loss. Our business is subject to the risks of international operations, including movements in foreign currency exchange rates. Our international operations represented approximately 22% of our total 2024 revenue and are largely conducted in currencies other than the U.S. Dollar, including the British Pound Sterling, Euro, Brazilian Real, Australian Dollar, Swedish Krona, Swiss Franc and Indian Rupee. Our business, financial condition or results of operations could be adversely affected due to a variety of factors, including the following:

- changes in a specific country or region's political and cultural climate or economic condition, including a change in governmental regime;
- unexpected or unfavorable changes in foreign laws, regulatory requirements and related interpretations;
- difficulty of effective enforcement of contractual provisions in local jurisdictions;
- inadequate intellectual property protection in foreign countries;
- trade-protection measures, import or export licensing requirements, such as Export Administration Regulations promulgated by the U.S. Department of Commerce, and fines, penalties or suspension or revocation of export privileges;
- trade sanctions imposed by the U.S. or other governments with jurisdictional authority over our business operations;
- the effects of applicable and potentially adverse foreign tax law changes;
- significant adverse changes in foreign currency exchange rates;
- lesser enforcement of intellectual property laws and protections internationally;
- longer accounts receivable cycles;
- managing a geographically dispersed workforce;
- trade treaties, tariffs or agreements that could increase our costs or otherwise adversely affect our ability to do business in affected countries; and
- compliance with the FCPA and OFAC regulations and other applicable anti-corruption and sanctions laws and regulations, particularly in emerging markets.

Table of Contents

Our clients may pay us in foreign currencies. Conducting business in currencies other than the U.S. Dollar subjects us to foreign currency exchange rate fluctuations that can negatively impact our results, period to period, including relative to analyst estimates or guidance. Our primary exposure to movements in foreign currency exchange rates relates to the British Pound Sterling, Euro, Brazilian Real, Australian Dollar, Swedish Krona, Swiss Franc and Indian Rupee. The U.S. Dollar value of our net investments in foreign operations, the periodic conversion of foreign-denominated earnings to the U.S. Dollar (our reporting currency), and our results of operations and, in some cases, cash flows, could be adversely affected in a material manner by movements in foreign currency exchange rates. These risks could cause an adverse effect on our business, financial condition or results of operations. For more information on our exposure to foreign currency risk, see "Foreign Currency Risk" in "Item 7A. Quantitative and Qualitative Disclosures About Market Risk."

Failure to comply with anti-bribery and anti-corruption laws could subject us to penalties and other adverse consequences. We are subject to the FCPA, the U.K. Bribery Act, and other anti-bribery and anti-corruption laws in various countries around the world. The FCPA, the U.K. Bribery Act and similar applicable laws generally prohibit companies, as well as their officers, directors, employees and third-party intermediaries, business partners and agents, from making improper payments or providing other improper things of value to government officials or other persons for the purpose of obtaining or retaining business abroad or otherwise obtaining favorable treatment. The FCPA also requires that U.S. public companies maintain books and records that fairly and accurately reflect transactions and maintain an adequate system of internal accounting controls. We

conduct business in foreign countries, including a number of countries with developing economies, and many of our employees, third-party intermediaries and agents in such countries may have direct or indirect interactions with officials and employees of government agencies, state-owned or affiliated entities and other third parties. We may be held liable if they take actions in violation of these laws, even if we do not explicitly authorize them. Although our policies and procedures require compliance with these anti-bribery and anti-corruption laws and are designed to facilitate such compliance, we do business in many countries and cannot make any assurances that our employees, contractors or agents somewhere in the world will not take actions in violation of applicable laws or our policies, for which we may ultimately be held responsible. In the event that we believe or have reason to believe that our employees, contractors or agents have or may have violated such laws, we may be required to investigate (or to have outside counsel investigate) the relevant facts and circumstances. Detecting, investigating and resolving actual or alleged violations can be an extensive process and require a significant diversion of time, resources and attention from senior management. Further, we cannot assure that any such investigation will successfully uncover all relevant facts and circumstances. Any violation of the FCPA, the U.K. Bribery Act or other applicable anti-bribery or anti-corruption laws could result in whistleblower complaints, adverse media coverage, investigations, loss of export privileges, and criminal or civil sanctions, penalties and fines, any of which could adversely affect our business, financial condition or results of operations. We have businesses in emerging markets that may experience significant economic volatility. We have operations in emerging markets, primarily in Latin America, India, Southeast Asia, the Middle East and Africa. These emerging market economies tend to be more volatile than the more established markets we serve in North America and Europe, which could add volatility to our future revenue and earnings. Acts of war or terrorism, international conflicts, political instability, natural disasters, power or communications failures, or widespread outbreak of an illness could negatively affect various aspects of our business, including our workforce and our business partners, make it more difficult and expensive to meet our obligations to our customers, and result in reduced revenue from our customers. Our global operations are susceptible to global events, including threats or acts of war, such as the Russia-Ukraine war and the Israel-Hamas conflict, threats or acts of terrorism, international conflicts, political instability, natural disasters, and power or communications failures. We are also susceptible to a widespread outbreak of an illness or other health issue, such as the COVID-19 pandemic. These events can spread to different locations across the globe and can have an adverse effect on the global economy, reducing consumer and corporate spending upon which our revenue depends. Individual employees can become ill, quarantined, or otherwise unable to work and/or travel due to health reasons or governmental restrictions. Some of our operations are in countries where the effects of a widespread illness could be magnified due to health care systems that are less well-developed than in the U.S. The occurrence of any of these events could have an adverse effect on our business, financial condition or results of operations.

21 Table of Contents

The direct and indirect effects of climate change, including increased legal and regulatory requirements and stakeholder expectations, could adversely affect our business. We may be subject to increased costs, regulations, reporting or other requirements, standards or expectations regarding sustainability and climate change-driven impacts on our business. While we seek to mitigate our business risks associated with climate change, this may require us to incur substantial costs and some of these risks may persist. Changing market dynamics, global policy developments, heightened focus from governmental, media, community, industry and investor stakeholders, and increasing frequency and impact of extreme weather events all have the potential to disrupt our business or the businesses of our customers, vendors and technology partners. Further, there is increased scrutiny, including by governments, regulators, investors, employees, clients and other stakeholders, on sustainability matters, which has resulted in new or additional legal and regulatory requirements and may require increased compliance and operational costs. In addition, if we fail to comply with applicable legal requirements and maintain practices that meet our stakeholders' evolving expectations, it could harm our reputation, adversely affect our ability to attract and retain clients and expose us to increased scrutiny from investors and regulatory authorities. Any of these developments could adversely affect our business, financial condition or results of operations. Failure to attract and retain talent, including senior management and highly skilled technology personnel, could harm our ability to grow. Our future success depends upon our ability to attract and retain talent in a competitive market, including senior management personnel and highly-skilled technology personnel. The competitive nature of this market is also affected by wage inflation, which generally increases the cost of talent. Because the development of our solutions and services requires knowledge, skills and abilities to create, develop and implement our software solutions in new areas on a continuing basis, we are competing for talented people with such knowledge, skills and abilities in new and developing technologies. Competition for such technical personnel is intense, as is the competition for senior management to lead these efforts, and our failure to hire and retain talented personnel could have a material adverse effect on our business, financial condition or results of operations. Our future growth will also require sales and marketing, financial, legal and administrative personnel to develop and support new solutions and services, to enhance and support current solutions and services and to expand operational and financial systems. There can be no assurance that we will be able to attract and retain the necessary personnel to accomplish our growth strategies, and we may experience constraints that could adversely affect our ability to satisfy client demand in a timely fashion. Our ability to maintain compliance with applicable laws, rules and regulations and to manage and monitor the risks facing our business relies upon the ability to maintain skilled compliance, legal, security, risk and audit professionals. Competition for such skill sets is intense, and our failure to hire and retain talented personnel could have an adverse effect on our internal control environment and impact our operating results. Our senior management team has significant experience in the financial services industry, and the loss of this leadership could have an adverse effect on our business, operating results and financial condition. Further, the loss of this leadership may have an adverse impact on senior management's ability to provide effective oversight and strategic direction for all key functions within the Company, which could impact our future business, financial condition or results of operations. We are the subject of various legal proceedings that could have an adverse effect on us. We are involved in various litigation matters, including in some instances class-action cases and patent infringement litigation. If we are unsuccessful in our defense of litigation matters, we may be forced to pay damages and/or change our business practices, any of which could have an adverse effect on our business, financial condition or results of operations. Unfavorable resolution of tax contingencies or unfavorable future tax law changes could adversely affect our tax expense. Our tax returns and positions are subject to review and audit by federal, state, local and international taxing authorities. An unfavorable outcome to a tax audit could result in higher tax expense and could negatively impact our effective tax rate, financial position, results of operations and cash flows in the current and/or future periods. On December 15, 2022, the EU Member States formally adopted the EU's Pillar Two Directive, which generally provides for a minimum effective tax rate of 15%, as established by the Organization for Economic Co-operation and Development Pillar Two Framework that was supported by over 130 countries worldwide. A significant number of countries are also implementing similar legislation. We are monitoring developments, including in countries that have enacted legislation, and do not currently expect a material adverse impact to the financial statements. We will continue to evaluate Pillar Two legislation and other future tax law changes.

22 Table of Contents

that could result in negative impacts. In addition, tax-law amendments in the U.S. and other jurisdictions could significantly impact how U.S. multinational corporations are taxed. Although we cannot predict whether or in what form such legislation will pass, if enacted it could have an adverse effect on our business, financial condition or results of operations. A material weakness in our internal controls could have a material adverse effect on us. Effective internal controls are necessary for us to provide reasonable assurance with respect to our financial reports and to adequately mitigate the risk of fraud. If we cannot provide reasonable assurance with respect to our financial reports and adequately mitigate the risk of fraud, our reputation and results of operations could be harmed. Internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations, including the possibility of human error, the circumvention or overriding of controls, or fraud. Therefore, even effective internal controls can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements. In addition, projections of any evaluation of effectiveness of internal control over financial reporting to future periods are subject to the inherent risk that the control may become inadequate because of changes in conditions or because the degree of compliance with the policies or procedures may deteriorate. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. A material weakness in our internal control over financial reporting could adversely impact our ability to provide timely and accurate financial information. If we are unable to report financial information timely and accurately or to maintain effective disclosure controls and procedures, our business, financial condition or results of operations could be adversely affected.

Risks Related to Business Combinations and Ventures

We may not achieve the anticipated benefits of our recently completed Worldpay Sale, and we may also be exposed to new risks following the sale. We may not achieve the anticipated benefits of our Worldpay Sale, which we completed in January 2024. The anticipated strategic, financial, and operational gains may not materialize, and costs or revenue dis-synergies could exceed expectations. Additionally, we have entered into ongoing arrangements with Worldpay for transition services which have required, and are expected to continue to require, significant resources and could offset the impact of our cost-saving initiatives. While we retain a 45% equity interest in Worldpay, we do not have control of Worldpay, exposing us to certain risks including risks related to Worldpay's operations and merchant acquiring business. As a result of the Worldpay Sale, our revenue sources are less diversified, which could increase our exposure to adverse developments affecting financial institutions. Additionally, our common stock now represents a smaller company, with proportionally increased exposure to our remaining business risks. Strategic transactions, including acquisitions and divestitures, involve significant risks and uncertainties that could adversely affect our business, financial condition, results of operations and cash flows. Strategic acquisitions and divestitures we have made in the past, and may make in the future, present significant risks and uncertainties that could adversely affect our business, financial condition, results of operations and cash flows. A

These risks include the following:

- difficulty in evaluating potential acquisitions, including the risk that our due diligence does not identify or fully assess valuation issues, potential liabilities or other acquisition risks;
- difficulty and expense in integrating newly acquired businesses and operations, including combining solution and service offerings, and in entering into new markets in which we are not experienced, in an efficient and cost-effective manner while maintaining adequate standards, controls and procedures, and the risk that we may encounter significant unanticipated costs or other problems associated with integration;
- difficulty and expense in consolidating, integrating, and rationalizing IT infrastructure and integrating acquired software;
- challenges in achieving strategic objectives, cost savings and other benefits expected from acquisitions;
- risk that our markets do not evolve as anticipated and that the strategic acquisitions and divestitures do not prove to be those needed to be successful in those markets;
- risk that acquired systems expose us to cybersecurity and other data security risks;
- 23 Table of Contents
- costs to reach appropriate standards to protect against cybersecurity and other data security risks, or the timelines to achieve such standards, may exceed those estimated in diligence;
- risk that acquired companies are subject to new regulatory regimes or oversight where we have limited experience, which may result in additional compliance costs and potential regulatory penalties;
- risk that we assume or retain, or that companies we have acquired have assumed or retained or otherwise become subject to, significant liabilities that exceed the limitations of any applicable indemnification provisions or the financial resources of any indemnifying parties;
- risk that indemnification related to businesses divested or spun-off that we may be required to provide or otherwise bear may be significant and could negatively impact our business;
- risk of exposure to potential liabilities arising out of applicable state and federal fraudulent conveyance laws and legal distribution requirements from spin-offs in which we or companies we have acquired were involved;
- risk that we may be responsible for unanticipated U.S. federal income tax liabilities related to acquisitions or divestitures;
- risk that we are not able to complete strategic divestitures within expected time frames or on satisfactory terms and conditions, including obtaining enforceable non-competition arrangements applicable to certain of our business lines;
- potential loss of key employees or customers of the businesses acquired or to be divested; and
- risk of diverting the attention of senior management from our existing operations. We have substantial goodwill

and other intangible assets recorded as a result of acquisitions, and a severe or extended economic downturn could cause these assets to become impaired, requiring write-downs that would reduce our operating income. As of December 31, 2024, goodwill aggregated to \$17.3 billion, or 51% of total assets, and intangible assets aggregated to \$1.3 billion, or 4% of total assets. Current accounting rules require goodwill to be assessed for impairment at least annually or whenever changes in circumstances indicate potential impairment and require intangible assets with finite useful lives to be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Factors that may be considered a change in circumstance include significant underperformance relative to historical or projected future operating results, a significant decline in our stock price and market capitalization, and negative industry or economic trends. If worldwide or U.S. economic conditions decline significantly with prolonged negative impacts to bank spending and consumer behavior, or if other business or market changes significantly impact our outlook, then the remaining carrying amount of our goodwill and other intangible assets may no longer be recoverable, and we may be required to record an impairment charge, which would have a negative impact on our results of operations. We will continue to monitor the fair value of our reporting units and other intangible assets as well as our market capitalization and the impact of any prolonged economic downturn on our business to determine the likelihood of impairment. Risks Related to Our Indebtedness Our existing debt levels and future levels under existing facilities and debt service requirements may adversely affect us, including our financial condition or business flexibility, and prevent us from fulfilling our obligations under our outstanding indebtedness. As of December 31, 2024, we had total debt of approximately \$11.3 billion. Our level of debt, or any increase in our debt level, could adversely affect our business, financial condition, operating results and operational flexibility, including as follows: (i) the debt level may cause us to have difficulty borrowing money in the future for working capital, capital expenditures, acquisitions or other purposes; (ii) our debt level may limit operational flexibility and our ability to pursue business opportunities and implement certain business strategies; (iii) some of our debt has a variable rate of interest, which exposes us to the risk of increased interest rates; (iv) we have a higher level of debt than some of our competitors or potential competitors, which may cause a competitive disadvantage and may reduce flexibility in responding to changing business and economic conditions, including increased competition and vulnerability to general adverse economic and industry conditions; (v) there are significant debt maturities or maturities that may need to be refinanced, potentially at higher rates; and (vi) failure to satisfy our obligations under our outstanding debt or failure to comply with the financial or other restrictive covenants contained in the indenture governing our senior notes or in our credit facility could result in an event of default that could cause all of our debt to become due and payable.

Table of Contents We have exposure to fluctuations in the Euro-USD exchange rates, which could negatively affect our cost to service or refinance our Euro-denominated debt securities. At December 31, 2024, the Company had outstanding approximately \$4.0 billion aggregate principal amount of Euro-denominated senior notes and approximately \$0.1 billion aggregate principal amount of Euro-denominated commercial paper, or the combined equivalent of approximately \$4.3 billion aggregate principal amount. A vast majority of this EUR denominated indebtedness has been economically converted into USD through derivative instruments (see "Financial Instruments" in note 15 to the consolidated financial statements). If our cash flows generated in foreign currencies are insufficient to settle our foreign currency denominated indebtedness, then we may need to exchange U.S. Dollars or funds in other currencies to make such payments, which could result in increased costs to us in the event of adverse changes in currency exchange rates. We have utilized and expect to continue to utilize foreign currency forward contracts and other hedges in an effort to mitigate currency risk, but we cannot make assurances that such hedging arrangements will be effective or will remain available to us on acceptable terms, or at all. In addition, we cannot predict economic and market conditions (including prevailing interest rates and foreign currency exchange rates) at the applicable times when our various series of Euro-denominated indebtedness are scheduled to mature, nor can there be any assurance that we would be able to refinance any series of our Euro-denominated indebtedness on acceptable terms at any such time, all of which could have an adverse financial impact on us. Rising interest rates could increase our borrowing costs. Our exposure to market risk for changes in interest rates relates to our short-term commercial paper borrowings and Revolving Credit Facility. In the future, we may have additional borrowings under existing or new variable-rate debt. Increases in interest rates on variable-rate debt would increase our interest expense. A rising interest rate environment could increase the cost of refinancing existing debt and incurring new debt, which could have an adverse effect on our financing costs. Credit ratings, if lowered below investment grade, would adversely affect our cost of funds and liquidity. The Company maintains investment grade credit ratings from the major U.S. rating agencies on its senior unsecured debt (S&P BBB, Moody's Baa2, Fitch BBB), as well as its commercial paper program (S&P A-2, Moody's P-2, Fitch F2). Failure to maintain investment grade rating levels could adversely affect the Company's cost of funds and liquidity and access to certain capital markets but would not have an adverse effect on our ability to access our existing Revolving Credit Facility. Please note that a security rating is not a recommendation to buy, sell or hold securities, that it may be subject to revision or withdrawal at any time by the assigning rating organization, and that each rating should be evaluated independently of any other rating. **Statement Regarding Forward-Looking Information** The statements contained in this Form 10-K or in our other documents or in oral presentations or other management statements that are not purely historical are forward-looking statements within the meaning of the U.S. federal securities laws. Statements that are not historical facts, as well as other statements about our expectations, beliefs, intentions, or strategies regarding the future, or other characterizations of future events or circumstances, are forward-looking statements. Forward-looking statements include statements about anticipated financial outcomes, including any earnings outlook or projections, projected revenue or expense synergies or dis-synergies, business and market conditions, outlook, foreign currency exchange rates, deleveraging plans, expected dividends and share repurchases of the Company, the Company's sales pipeline and anticipated profitability and growth, plans, strategies and objectives for future operations, strategic value creation, risk profile and investment strategies, any statements regarding future economic conditions or performance and any statements with respect to the future impacts of the Worldpay Sale or any agreements or arrangements entered into in connection with such transaction. These statements may be identified by words such as "expect," "anticipate," "intend," "plan," "believe," "will," "should," "could," "would," "project," "continue," "likely," and similar expressions, and include statements reflecting future results or outlook, statements of outlook and various accruals and estimates. These statements relate to future events and our future results and involve a number of risks and uncertainties. Forward-looking statements are based on management's beliefs as well as assumptions made by, and information currently available to, management. Actual results, performance or achievement could differ materially from these forward-looking statements. The risks and uncertainties to which forward-looking statements are subject include the following, without limitation: changes in general economic, business and political conditions, a recession, intensified or expanded international hostilities, acts of terrorism, increased rates of inflation or interest, changes in either or both the United States and international lending, capital and financial markets or currency fluctuations; the risk that acquired businesses will not be integrated successfully or that the integration will be more costly or more time-consuming and complex than anticipated; the risk that cost savings and synergies anticipated to be realized from acquisitions may not be fully realized or may take longer to realize than expected or that costs may be greater than anticipated; the risks of doing business internationally; the effect of legislative initiatives or proposals, statutory changes, governmental or applicable regulations and/or changes in industry requirements, including privacy, data protection, cybersecurity, cyber resilience and AI laws and regulations; our ability to comply with climate change legal and regulatory requirements and to maintain practices that meet our stakeholders' evolving expectations; the risks of reduction in revenue from the elimination of existing and potential customers due to consolidation in, or new laws or regulations affecting, the banking, retail and financial services industries or due to financial failures or other setbacks suffered by firms in those industries; changes in the growth rates of the markets for our solutions; the amount, declaration and payment of future dividends is at the discretion of our Board of Directors and depends on, among other things, our investment opportunities, results of operations, financial condition, cash requirements, future prospects, and other factors that may be considered relevant by our Board of Directors, including legal and contractual restrictions; the amount and timing of any future share repurchases is subject to, among other things, our share price, our other investment opportunities and cash requirements, our results of operations and financial condition, our future prospects and other factors that may be considered relevant by our Board of Directors and management; failures to adapt our solutions to changes in technology or in the marketplace; internal or external security or privacy breaches of our systems, including those relating to unauthorized access, theft, corruption or loss of personal information and computer viruses and other malware affecting our software or platforms, and the reactions of customers, card associations, government regulators and others to any such events; the risk that implementation of software, including software updates, for customers or at customer locations or employee error in monitoring our software and platforms may result in the corruption or loss of data or customer information, interruption of business operations, outages, exposure to liability claims or loss of customers; the risk that partners and third parties may fail to satisfy their legal obligations to us; risks associated with managing pension cost, cybersecurity issues, IT outages experienced by us or by third parties and data privacy; our ability to navigate the opportunities and risks associated with using and/or incorporating AI technologies into our business; the reaction of current and potential customers to communications from us or regulators regarding information security, risk management, internal audit or other matters; competitive pressures on pricing related to the decreasing number of community banks in the U.S., the development of new disruptive technologies competing with one or more of our solutions, increasing presence of international competitors in the U.S. market and the entry into the market by global banks and global companies with respect to certain competitive solutions, each of which may have the impact of unbundling individual solutions from a comprehensive suite of solutions we provide to many of our customers; the failure to innovate in order to keep up with new emerging technologies, which could impact our solutions and our ability to attract new, or retain existing, customers; an operational or natural disaster at one of our major operations centers; failure to comply with applicable requirements of payment networks or changes in those requirements; fraud by bad actors; and other risks detailed elsewhere in the "Risk Factors" section and other sections of this report and in our other filings with the SEC. Other unknown or unpredictable factors also could have a material adverse effect on our business, financial condition, results of operations and prospects. Accordingly, readers should not place undue reliance on these forward-looking statements. These forward-looking statements are inherently subject to uncertainties, risks and changes in circumstances that are difficult to predict. Except as required by applicable law or regulation, we do not undertake (and expressly disclaim) any obligation and do not intend to publicly update or review any of these forward-looking statements, whether as a result of new information, future events or otherwise.

Item 1B. Unresolved Staff Comments None.

Table of Contents **Item 1C. Cybersecurity** Cybersecurity is fundamental to FIS' complex, global business. As part of our business, FIS and its vendors, technology partners, and clients electronically receive, process, store and transmit a wide range of confidential information, including sensitive customer information and consumer personal data. Our operations extend to managing payment systems, cash access and prepaid card systems. Cyberattacks on information technology systems and the vendors and technological supply chain they rely on continue to grow in frequency, complexity and sophistication. This is a trend we expect to continue. Cyberattacks have garnered significant attention from individuals, businesses, governmental entities and the media drawing the focus of a large ecosystem of criminal threat actors. The objectives of these cyberattacks include, among other things, gaining unauthorized access to systems to disrupt operations, steal information, seek ransom payments from victims, perpetrate financial fraud, or sell stolen information. Perpetrators of cyberattacks attempt to exploit technical, human, social, and organizational vulnerabilities to gain unauthorized access. There is a growing trend of identifying and exploiting vulnerabilities in widely used technologies or vendor systems, allowing a single compromise or failure to extend unauthorized access to numerous systems. FIS takes actions to assess, identify, and manage risks from cybersecurity threats to our information systems and those of our vendors and technology partners. A significant focus of our ongoing efforts is how we identify these vulnerabilities and prevent and respond to cyberattacks. Our processes include the activities of the FIS Cyber Fusion Center, which provides 24x7x365 cybersecurity threat monitoring and response. They

also include structured defense-in-depth initiatives, such as perimeter security, remote access security, endpoint security, application security and identity management. In addition, we engage in extensive information security training of our employees who use and access our information systems. Our process for identification and management of risks from cybersecurity threats includes regular communication with cyber experts, engagement of cybersecurity partners to review our systems, regular audits of our information security by third-party assessors and consultants, and regular interactions with vendors and technology partners to oversee and identify material risks associated with the information systems utilized by such persons. Our process of identifying and remediating cybersecurity risks has been integrated into our overall risk management system and processes. It is overseen by our Chief Information Security Officer and Chief Risk Officer, who report to our Board of Directors and its Risk and Technology Committee on a quarterly basis. The Chief Information Security Officer provides ongoing oversight for the management of cybersecurity risks across the firm leveraging a series of qualitative and quantitative risk assessment routines. Risk escalations are facilitated through the enterprise risk management framework, including the Company's Enterprise Risk Committee and the Board of Directors via the Risk and Technology Committee. Facilitated via regular updates on cybersecurity risk, our Board of Directors takes an active role in overseeing, managing, and setting risk tolerances for our cybersecurity program. Our Chief Information Security Officer has over 15 years of technology and cybersecurity experience, including previous senior leadership roles at major financial institutions and possesses industry certifications such as the Certified Information Systems Security Professional (CISSP). Additional leaders and key contributors composing the cybersecurity leadership team possess specific expertise, certifications, and previous work experience aligned to their assigned responsibilities. Our Enterprise Risk Committee, responsible for providing oversight for cybersecurity risks, is a cross-functional representation of senior leadership with requisite experience and expertise to provide risk oversight, including the Chief Risk Officer, Chief Legal Officer, Chief Technology Officer, Chief Compliance Officer, Chief Privacy Officer, and FIS Business Presidents. FIS remains focused on making additional strategic investments in information security to protect our clients and our information systems from risks from cybersecurity threats. This includes both capital expenditures and operating expenses on hardware, software, staff and consulting services. These investments in the past have been and are reasonably likely to continue to be material to our results of operations. Further, notwithstanding our investments and other processes and efforts described above and elsewhere in this Annual Report on Form 10-K, we cannot guarantee that FIS will not be the subject of a cyberattack that would have a material effect on its financial condition or results of operations. See "Risk Factors" in Item 1A. The continued growth in the frequency, complexity and sophistication of cyberattacks presents both a threat and an opportunity for FIS. Using expertise we have gained from our ongoing focus and investment, we have developed and we offer fraud, security, risk management and compliance solutions to target this growth opportunity in the financial services industry. We also use certain of these solutions to manage our own risks.

Table of Contents

We have not identified any previous cybersecurity incidents that have materially affected or are reasonably likely to materially affect us, including our business strategy, results of operations, or financial condition. For a full discussion of risks from cybersecurity threats, see the section entitled "Risk Factors" in Item 1A.

Item 2. Properties

FIS' corporate headquarters is located at 347 Riverside Avenue, Jacksonville, Florida. In addition, FIS owns or leases support centers, data processing facilities and other facilities at approximately 85 locations. We believe our facilities and equipment are generally well maintained and are in good operating condition. We believe that the equipment we own and our various facilities are adequate for our present and foreseeable business needs.

Item 3. Legal Proceedings

The Company is involved in various pending and threatened litigation matters related to its business and operations, some of which include claims for punitive or exemplary damages. The Company believes no such currently pending or threatened actions are likely to have a material adverse effect on its consolidated financial position. With respect to litigation in which the Company is involved generally, please note the following:

These matters raise difficult and complicated factual and legal issues and are subject to many uncertainties and complexities.

The Company reviews all of its litigation on an ongoing basis and follows the authoritative provision for accounting for contingencies when making accrual and disclosure decisions. A liability must be accrued if (a) it is probable that a liability has been incurred and (b) the amount of loss can be reasonably estimated. If one of these criteria has not been met, disclosure is required when there is at least a reasonable possibility that a material loss may be incurred. When assessing reasonably possible and probable outcomes, the Company bases decisions on the assessment of the ultimate outcome following all appeals. Legal fees associated with defending litigation matters are expensed as incurred. See Note 18 to the consolidated financial statements for information about certain legal matters and indemnifications and warranties.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock trades on the New York Stock Exchange under the ticker symbol "FIS." As of January 31, 2025, there were approximately 9,024 shareholders of record of our common stock. In January 2025, the Board of Directors approved a quarterly dividend of \$0.40 per share beginning with the first quarter of 2025. A regular quarterly dividend of \$0.40 per common share is payable on March 25, 2025, to shareholders of record as of the close of business on March 11, 2025. We currently expect to continue to pay quarterly dividends at a target payout ratio consistent with our capital allocation strategy, without regard to our equity method investment earnings (loss) attributable to our interest retained in Worldpay post-separation. However, the amount, declaration and payment of future dividends is at the discretion of the Board of Directors and depends on, among other things, our investment opportunities (including potential mergers and acquisitions), results of operations, financial condition, cash requirements, future prospects, and other factors, including legal and contractual restrictions, that may be considered relevant by our Board of Directors. Additionally, the payment of cash dividends may be limited by covenants in certain debt agreements.

Item 12 of Part III contains information concerning securities authorized for issuance under our equity compensation plans.

In January 2021, our Board of Directors approved a share repurchase program under which it authorized the Company to repurchase up to 100 million shares of our common stock. In August 2024, our Board of Directors approved a separate, incremental share repurchase program authorizing the repurchase of up to \$3.0 billion in aggregate value of shares of our common stock. Repurchases under these programs will be made at management's discretion from time to time on the open market or in privately negotiated transactions and through Rule 10b5-1 plans. Neither of these repurchase programs has an expiration date, and either program may be suspended for periods, amended or discontinued at any time. Under the January 2021 program, the Company repurchased approximately 54 million shares for an aggregate of \$4.0 billion in 2024, approximately 9 million shares for an aggregate of \$0.5 billion in 2023, and approximately 21 million shares for an aggregate of \$1.8 billion in 2022. Approximately 1 million shares remained available for repurchase under the January 2021 program as of December 31, 2024, and the Company will exhaust its authorization under this program in the first quarter of 2025, after which it will repurchase shares under the 2024 authorization. The following table summarizes the shares repurchased by the Company under the January 2021 program during the three-month period ended December 31, 2024, and the number of shares remaining authorized for repurchase by the Company. As of December 31, 2024, the Company had not repurchased any shares under the August 2024 program.

Maximum number of shares that may be repurchased as part of purchased under Total number of publicly announced plans or shares purchased	Average price per share or program	Period (in millions)	paid per share (in millions)
October 1-31, 2024	\$87.89	3.1	\$87.89
November 1-30, 2024	\$87.16	3.0	\$87.16
December 1-31, 2024	\$83.25	3.0	\$83.25
January 1-31, 2025	\$83.00	1.4	\$83.00

The graph below compares Fidelity National Information Services, Inc.'s cumulative 5-year total shareholder return on common stock with the cumulative total returns of the S&P 500 index and the S&P Supercap Data Processing & Outsourced Services index. The graph tracks the performance of a \$100 investment in our common stock and in each index (with the reinvestment of all dividends) from 12/31/2019 to 12/31/2024.

Period	Fidelity National Information Services, Inc.	S&P 500	S&P Supercap Data Processing & Outsourced Services
12/31/2019	\$100.00	\$100.00	\$100.00
12/31/2020	\$102.76	\$80.26	\$51.00
12/31/2021	\$80.26	\$46.83	\$64.14
12/31/2022	\$51.00	\$64.14	\$118.40
12/31/2023	\$46.83	\$118.40	\$152.39
12/31/2024	\$64.14	\$152.39	\$124.79

The stock price performance included in this graph is not necessarily indicative of future stock price performance.

Item 6. Reserved

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following section discusses management's view of the financial condition and results of operations of FIS and its consolidated subsidiaries as of December 31, 2024 and 2023, and for the years ended December 31, 2024, 2023 and 2022, unless otherwise noted. This section should be read in conjunction with our audited consolidated financial statements and related notes included elsewhere in this Annual Report. Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements. See "Statement Regarding Forward-Looking Information" and "Risk Factors" in Item 1A.

Table of Contents

This Annual Report for a discussion of the uncertainties, risks and assumptions associated with these forward-looking statements that could cause future results to differ materially from those reflected in this section.

Business Trends and Conditions

Revenue Sources and Markets

Our revenue from continuing operations is primarily derived from a combination of technology and processing solutions, transaction processing fees, professional services and software license fees. While we are a global company and do business around the world, the majority of our revenue is generated by clients in the U.S. The majority of our international revenue is generated by clients in the U.K., Germany, Canada, Australia, Brazil, Switzerland and France. In addition, the majority of our revenue has historically been recurring under multi-year Banking and Capital Markets contracts that contribute relative stability to our revenue stream. These solutions, in general, are considered critical to our clients' operations. Professional services revenue is typically non-recurring, though recognition often occurs over time rather than at a point in time. Sales of software licenses are typically non-recurring with point-in-time recognition and are less predictable. Economic Trends

We are experiencing relatively stable sales cycles and levels of client activity across our businesses. We have experienced, and continue to experience, relatively high inflation in our primary markets over the medium-term cycle. Relatively high interest rates have had, and may continue to have, a negative impact on our interest expense. However, during 2024, we used a portion of the net proceeds from the Worldpay Sale to repay our borrowings under our commercial paper programs and reduce our long-term debt, which has decreased our interest expense from previous levels. Impacts of foreign currency fluctuations remained slightly favorable during 2024. Given the volatility of exchange rates and the mix of currencies involved in both revenues and expenses, the direction and magnitude of future effects of currency fluctuations are uncertain. Worldpay Sale

On January 31, 2024, the Company completed the Worldpay Sale for cash consideration in a transaction valuing the Worldpay Merchant Solutions business at an enterprise value of \$18.5 billion, including \$1.0 billion of consideration contingent on the returns realized by Buyer exceeding certain thresholds. The net cash proceeds received by FIS at the closing were greater than \$12 billion, net of estimated closing adjustments, debt restructuring fees, taxes and transaction costs. We used a portion of the proceeds from the sale to retire debt and repurchase shares, and we plan to continue to use the remaining proceeds to return additional capital to shareholders through our existing share repurchase authorizations, as well as for general corporate purposes, including acquisitions, while maintaining an investment grade credit rating. In connection with the Worldpay Sale, FIS and Worldpay entered into commercial agreements, preserving a key value proposition for clients of both businesses and minimizing potential dis-synergies. FIS and Worldpay also entered into additional agreements as described in Note 4 to the consolidated financial statements. Upon closing of the Worldpay Sale, we retained a non-controlling 45% equity interest in Worldpay. FIS' share of the net income of Worldpay subsequent to the sale is reported as Equity method investment earnings (loss), net of tax. As a result of the Worldpay Sale, we recorded an estimated loss on sale of \$578 million during 2024. We also recorded a tax benefit of \$1.1 billion, primarily from the release of U.S. deferred tax liabilities that were not transferred in the Worldpay Sale, net of the estimated U.S. tax cost that we expect to incur as a result of the Worldpay Sale. Completion of remaining purchase agreement provisions in connection with the Worldpay Sale could result in further adjustments to the loss on sale amount and the estimated U.S. tax cost.

Investments in Innovation

We continue to assist financial institutions and other businesses in migrating to outsourced integrated technology solutions to improve their profitability and address increasing and ongoing regulatory requirements. We believe our integrated solutions and outsourced services are well-

positioned to address this outsourcing trend across the markets we serve. We continue to invest in modernization, innovation and integrated solutions to meet the demands of the markets we serve and to compete with global banks, financial and other technology providers, and emerging technology innovators. We invest both internally and through investment opportunities in companies building complementary technologies in the financial services space. Our internal development activities have related primarily to the modernization of our proprietary core systems in each of our segments, design and development of next-generation digital and innovative solutions and development of 31Table of Contents processing systems and related software applications and risk management platforms. We expect to continue to invest an appropriate level of resources to maintain, enhance and extend the functionality of our proprietary systems and existing software applications, to develop new and innovative software applications and systems to address emerging technology trends in response to the needs of our clients, and to enhance the capabilities of our outsourcing infrastructure. Digital One Platform Consumer preference, particularly in younger generations, continues to shift from traditional branch banking services to digital-first banking solutions. It is increasingly clear that a priority for our clients is to provide a unified, engaging and inclusive banking experience powered by digital capabilities across all channels and customer activities. Our Digital One platform helps our clients, from top-tier large financial institutions with over \$10 billion in assets to top-tier and mid-tier community banks, provide a set of modern digital solutions to support all customer types, including retail consumers, sole proprietors, small businesses and large corporations, through any channel, including desktop, tablet, smartphone, and branch. The uniform customer experience extends to support a broad range of financial services including opening new accounts, servicing existing accounts, money movement, and personal financial management, as well as other consumer, small business and commercial banking capabilities. The Digital One platform is host-agnostic, and our digital suite has been enabled across multiple FIS core banking platforms, including IBS, Horizon, Modern Banking Platform, AffinityEdge, and Systematics, in addition to non-FIS platforms run by banking financial institutions who demand market-leading digital capabilities. Banking Industry Consolidation Consolidation within the banking industry has occurred and may continue to occur, primarily in the form of merger and acquisition activity among financial institutions, which generally increases competition among financial technology providers. However, consolidation resulting from specific merger and acquisition transactions may be beneficial to our business. When consolidations of financial institutions occur, merger partners often operate systems obtained from competing service providers. The newly formed entity generally makes a determination to migrate its core and payments systems to a single platform. When a financial institution processing client is involved in a consolidation, we may benefit if the client retains our solutions and expands the use of them following the consolidation to support the newly combined entity. Conversely, we may lose revenue if we are providing solutions to both entities, or if a client of ours is involved in a consolidation and our solutions are not chosen to support the newly combined entity. It is also possible that larger financial institutions resulting from consolidation may have greater leverage in negotiating terms or could decide to perform in-house some or all of the solutions that we currently provide or could provide. We seek to mitigate the risks of consolidations by offering other competitive solutions to take advantage of specific opportunities at the surviving company. Demand in Payments Market We continue to see demand in the payments market for innovative solutions that will deliver faster, more convenient payment options in mobile channels, internet applications, in-store cards, and digital currencies. The payment processing industry is adopting new technologies, developing new solutions, evolving new business models, and is being affected by new market entrants and by an evolving regulatory environment. As financial institutions respond to these changes by seeking solutions to help them enhance their own offerings to consumers, including the ability to accept card-not-present payments in eCommerce and mobile environments, as well as contactless cards and mobile wallets at the point of sale, FIS believes that payment processors will seek to develop additional capabilities in order to serve clients' evolving needs. To facilitate this expansion, we believe that payment processors will need to enhance their technology platforms so they can deliver these capabilities and differentiate their offerings from other providers. We believe that these market changes present both an opportunity and a risk for us, and we cannot predict which emerging technologies or solutions will be successful. However, FIS believes that payment processors, like FIS, that have scalable, integrated business models, provide solutions across the payment processing value chain and utilize broad distribution capabilities will be best-positioned to enable emerging alternative electronic payment technologies in the long term. Further, FIS believes that its depth of capabilities and breadth of distribution will enhance its position as emerging payment technologies are adopted by merchants and other businesses. FIS' ability to partner with non-financial institution enterprises, such as mobile payment providers and internet, retail and social media companies, continues to create attractive growth opportunities as these new entrants seek to become more active participants in the development of alternative electronic payment technologies and to facilitate the convergence of retail, online, mobile and social commerce applications. 32Table of Contents Cybersecurity Threats and Solutions Cyberattacks on information technology systems and the vendors and technological supply chain on which they rely continue to grow in frequency, complexity and sophistication. This is a trend we expect to continue with widespread impacts, including potentially some pertinent to FIS. The continued growth in the frequency, complexity and sophistication of cyberattacks, coupled with the continued interconnection in the global technology ecosystem, present both a threat and an opportunity for FIS. Using expertise we have gained from our ongoing focus and investment, we have developed and we offer fraud, security, risk management and compliance solutions to target this growth opportunity in the financial services industry. We also use certain of these solutions to manage our own risks. See Item 1C for additional discussion of how the Company assesses, identifies, and manages cybersecurity risks. Critical Accounting Policies and Estimates The accounting policies and estimates described below are those we consider critical in preparing our consolidated financial statements. These policies require management to make estimates, judgments and assumptions that affect the reported amounts of assets and liabilities and disclosures with respect to contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual amounts could differ from those estimates. See Note 2 to the consolidated financial statements for a more detailed description of the significant accounting policies that have been followed in preparing our consolidated financial statements. Revenue Recognition Application of GAAP related to the measurement and recognition of revenue requires us to make judgments and estimates. Specifically, complex arrangements with nonstandard terms and conditions may require significant contract interpretation in the determination of distinct performance obligations. Other judgments may include the evaluation of the standalone selling price for each performance obligation and whether separate contracts with the same customer should be combined and considered part of one arrangement. The determination as to whether individual promised solutions or services can be considered distinct or should instead be combined with other promised solutions or services in a contract may require judgment. We assess the solutions and services promised in our contracts with customers and identify a performance obligation for each promise to transfer to the customer a solution or service (or bundle of solutions or services) that is distinct - i.e., if a solution or service is separately identifiable from other items in the bundled package and if a customer can benefit from it on its own or with other resources that are readily available to the customer. Due to the large number, broad nature and average size of our individual customer contracts, the impact of judgments and assumptions that we apply in recognizing revenue for any single contract is not likely to have a material effect on our consolidated operations or financial position. However, the accounting policies that we apply across similar contracts, products or classes of clients could significantly influence the timing and amount of revenue recognized in our historical and future results of operations or financial position. Purchase Accounting We allocate the purchase price of acquired businesses to the assets acquired and liabilities assumed in business combination transactions at their estimated fair values, except as otherwise required. Any portion of the purchase price in excess of the recorded amount of the net identifiable assets acquired is recognized as goodwill. The estimates used to determine the fair value of long-lived assets, such as customer relationships and software intangible assets, are complex and require a significant amount of management judgment. When necessary, we engage third-party valuation specialists to assist us in making these fair value determinations. We generally use discounted cash flow models, which require internally developed assumptions, to determine the acquisition fair value of customer relationship intangible assets and developed technology software assets. Assumptions for customer relationship asset valuations typically include forecasted revenue attributable to existing customer contracts and relationships, estimated annual attrition, forecasted margin, and estimated weighted average cost of capital and discount rates. Assumptions for software asset valuations typically include forecasted revenue attributable to the software assets, obsolescence rates, estimated royalty rates and estimated weighted average cost of capital and discount rates. The forecasted revenue and margins used in the discounted cash flow models are critical estimates in determining the fair value of customer relationships and developed technology software assets as these estimates are influenced by many factors including historical financial information and management's expectation for future operating results as a combined company. 33Table of Contents While we use our best estimates and assumptions to determine the fair values of the assets acquired and the liabilities assumed, our estimates are inherently uncertain and subject to refinement. As a result, during the measurement period, which may be up to one year from the acquisition date, we record adjustments to the assets acquired and liabilities assumed. Upon the conclusion of the measurement period, any subsequent adjustments are recorded to our consolidated statements of earnings. During the year ended December 31, 2024, we had three acquisitions that were accounted for as business combinations, as discussed in Note 5 to the consolidated financial statements. We had no material business combinations, individually or in the aggregate, during the years ended December 31, 2023 and 2022. Goodwill Impairment The Company assesses goodwill for impairment by reporting unit on an annual basis during the fourth quarter or more frequently if circumstances indicate potential impairment. Our reporting units are the same as our primary operating segments, with additional reporting units, as applicable, for certain non-strategic businesses within the Corporate and Other segment. Goodwill impairment assessments require a significant amount of management judgment, and a meaningful change in one or more of the underlying forecasts, estimates, or assumptions used in testing goodwill for impairment could result in a material impact on the Company's financial position or results of operations. Based on the results of our assessments, goodwill of the reporting units in our continuing operations was not impaired in any of the periods presented. Our annual impairment test may first consider qualitative factors to determine whether it is more likely than not that a reporting unit's carrying amount exceeds its fair value. Qualitative factors include macroeconomic conditions, industry and market conditions, cost factors, overall financial performance and events affecting the reporting unit or Company as a whole, including a sustained decrease in stock price. As a result of the qualitative assessment, if we conclude that it is more likely than not that the reporting unit's fair value is less than its carrying amount as a result of the qualitative assessment, or we elect to bypass the qualitative assessment for a reporting unit, then we must perform a quantitative assessment for that reporting unit. When a quantitative assessment is triggered or elected, we typically engage third-party valuation specialists to assist us in determining the fair value of the reporting unit based on the weighted average of two valuation techniques: an income approach (also known as the discounted cash flow method) and a market approach. The income approach calculates a value based upon the present value of estimated future cash flows, while the market approach uses earnings multiples of similarly situated guideline public companies. The income approach involves the use of significant estimates and assumptions regarding forecasted revenue, growth rates, operating margins, capital expenditures, and other factors used to calculate estimated future cash flows. In addition, risk-adjusted discount rates and future economic and market conditions and other assumptions are applied. The market approach involves the selection of guideline public companies and earnings multiples considering factors such as markets of operation, solutions offered, and risk profiles. The income approach used to assess goodwill for impairment is a critical estimate because the forecasted revenue growth rate and margin assumptions (including long-term growth assumptions) underlying the estimated future cash flows are subject to management's judgment based upon the best available market information, internal forecasts and operating plans. A deterioration in these assumptions could adversely impact our results. The income approach is also particularly sensitive to the risk-adjusted discount rate selected. For our Banking and Capital Markets reporting units, we performed a quantitative annual assessment in 2022 which concluded that the fair values of these reporting units substantially exceeded their respective carrying amounts. For 2023 and 2024, we performed a qualitative annual assessment of these

reporting units and concluded that it remained more likely than not that the fair values of these reporting units continued to exceed their respective carrying amounts. Given the substantial excess of fair value over carrying amounts, we believe the likelihood of obtaining materially different results based on a change of assumptions to be low.

Income Taxes There is inherent uncertainty in quantifying our income tax positions. Management judgment is required to determine our provision for income taxes and income tax assets and liabilities. Management assesses our tax positions based on the application of accounting principles to our facts and circumstances and our interpretation of the tax laws, treaties and regulations, which are complex, vary by jurisdiction and may be subject to different interpretation by relevant taxing authorities. We have various tax filing positions, including the allocation of income among various jurisdictions and the applicability of deductions and credits, which affect the timing and amount of our taxable income. We record a valuation allowance if it is more likely than not that some portion or all of a deferred tax asset will not be realized. We also evaluate and measure uncertain tax positions taken or expected to be taken on tax returns and record liabilities for such positions that in our judgment may not be sustained, or only partially sustained, upon examination by taxing authorities. Our assessment may change based on various factors, including changes in facts or circumstances, changes in tax law and audit activity. Although we believe that our estimates and judgments are reasonable, actual results may differ from these estimates. If one or more of the taxing authorities were to successfully challenge a position taken, it could have a material adverse effect on our financial condition, results of operations or cash flows.

Related-Party Transactions We are a party to related-party agreements with Worldpay as discussed in Note 4 to the consolidated financial statements. In connection with the closing of the Worldpay Sale, we entered into several agreements with certain Worldpay entities and entered into additional agreements with Worldpay during 2024, as further described in Note 4 to the consolidated financial statements.

	2024	2023	2022	2021	2020	2019	2018	2017	2016	2015	2014	2013	2012	2011	2010	2009	2008	2007	2006	2005	2004	2003	2002	2001	2000	1999	1998	1997	1996	1995	1994	1993	1992	1991	1990	1989	1988	1987	1986	1985	1984	1983	1982	1981	1980	1979	1978	1977	1976	1975	1974	1973	1972	1971	1970	1969	1968	1967	1966	1965	1964	1963	1962	1961	1960	1959	1958	1957	1956	1955	1954	1953	1952	1951	1950	1949	1948	1947	1946	1945	1944	1943	1942	1941	1940	1939	1938	1937	1936	1935	1934	1933	1932	1931	1930	1929	1928	1927	1926	1925	1924	1923	1922	1921	1920	1919	1918	1917	1916	1915	1914	1913	1912	1911	1910	1909	1908	1907	1906	1905	1904	1903	1902	1901	1900	1899	1898	1897	1896	1895	1894	1893	1892	1891	1890	1889	1888	1887	1886	1885	1884	1883	1882	1881	1880	1879	1878	1877	1876	1875	1874	1873	1872	1871	1870	1869	1868	1867	1866	1865	1864	1863	1862	1861	1860	1859	1858	1857	1856	1855	1854	1853	1852	1851	1850	1849	1848	1847	1846	1845	1844	1843	1842	1841	1840	1839	1838	1837	1836	1835	1834	1833	1832	1831	1830	1829	1828	1827	1826	1825	1824	1823	1822	1821	1820	1819	1818	1817	1816	1815	1814	1813	1812	1811	1810	1809	1808	1807	1806	1805	1804	1803	1802	1801	1800	1799	1798	1797	1796	1795	1794	1793	1792	1791	1790	1789	1788	1787	1786	1785	1784	1783	1782	1781	1780	1779	1778	1777	1776	1775	1774	1773	1772	1771	1770	1769	1768	1767	1766	1765	1764	1763	1762	1761	1760	1759	1758	1757	1756	1755	1754	1753	1752	1751	1750	1749	1748	1747	1746	1745	1744	1743	1742	1741	1740	1739	1738	1737	1736	1735	1734	1733	1732	1731	1730	1729	1728	1727	1726	1725	1724	1723	1722	1721	1720	1719	1718	1717	1716	1715	1714	1713	1712	1711	1710	1709	1708	1707	1706	1705	1704	1703	1702	1701	1700	1699	1698	1697	1696	1695	1694	1693	1692	1691	1690	1689	1688	1687	1686	1685	1684	1683	1682	1681	1680	1679	1678	1677	1676	1675	1674	1673	1672	1671	1670	1669	1668	1667	1666	1665	1664	1663	1662	1661	1660	1659	1658	1657	1656	1655	1654	1653	1652	1651	1650	1649	1648	1647	1646	1645	1644	1643	1642	1641	1640	1639	1638	1637	1636	1635	1634	1633	1632	1631	1630	1629	1628	1627	1626	1625	1624	1623	1622	1621	1620	1619	1618	1617	1616	1615	1614	1613	1612	1611	1610	1609	1608	1607	1606	1605	1604	1603	1602	1601	1600	1599	1598	1597	1596	1595	1594	1593	1592	1591	1590	1589	1588	1587	1586	1585	1584	1583	1582	1581	1580	1579	1578	1577	1576	1575	1574	1573	1572	1571	1570	1569	1568	1567	1566	1565	1564	1563	1562	1561	1560	1559	1558	1557	1556	1555	1554	1553	1552	1551	1550	1549	1548	1547	1546	1545	1544	1543	1542	1541	1540	1539	1538	1537	1536	1535	1534	1533	1532	1531	1530	1529	1528	1527	1526	1525	1524	1523	1522	1521	1520	1519	1518	1517	1516	1515	1514	1513	1512	1511	1510	1509	1508	1507	1506	1505	1504	1503	1502	1501	1500	1499	1498	1497	1496	1495	1494	1493	1492	1491	1490	1489	1488	1487	1486	1485	1484	1483	1482	1481	1480	1479	1478	1477	1476	1475	1474	1473	1472	1471	1470	1469	1468	1467	1466	1465	1464	1463	1462	1461	1460	1459	1458	1457	1456	1455	1454	1453	1452	1451	1450	1449	1448	1447	1446	1445	1444	1443	1442	1441	1440	1439	1438	1437	1436	1435	1434	1433	1432	1431	1430	1429	1428	1427	1426	1425	1424	1423	1422	1421	1420	1419	1418	1417	1416	1415	1414	1413	1412	1411	1410	1409	1408	1407	1406	1405	1404	1403	1402	1401	1400	1399	1398	1397	1396	1395	1394	1393	1392	1391	1390	1389	1388	1387	1386	1385	1384	1383	1382	1381	1380	1379	1378	1377	1376	1375	1374	1373	1372	1371	1370	1369	1368	1367	1366	1365	1364	1363	1362	1361	1360	1359	1358	1357	1356	1355	1354	1353	1352	1351	1350	1349	1348	1347	1346	1345	1344	1343	1342	1341	1340	1339	1338	1337	1336	1335	1334	1333	1332	1331	1330	1329	1328	1327	1326	1325	1324	1323	1322	1321	1320	1319	1318	1317	1316	1315	1314	1313	1312	1311	1310	1309	1308	1307	1306	1305	1304	1303	1302	1301	1300	1299	1298	1297	1296	1295	1294	1293	1292	1291	1290	1289	1288	1287	1286	1285	1284	1283	1282	1281	1280	1279	1278	1277	1276	1275	1274	1273	1272	1271	1270	1269	1268	1267	1266	1265	1264	1263	1262	1261	1260	1259	1258	1257	1256	1255	1254	1253	1252	1251	1250	1249	1248	1247	1246	1245	1244	1243	1242	1241	1240	1239	1238	1237	1236	1235	1234	1233	1232	1231	1230	1229	1228	1227	1226	1225	1224	1223	1222	1221	1220	1219	1218	1217	1216	1215	1214	1213	1212	1211	1210	1209	1208	1207	1206	1205	1204	1203	1202	1201	1200	1199	1198	1197	1196	1195	1194	1193	1192	1191	1190	1189	1188	1187	1186	1185	1184	1183	1182	1181	1180	1179	1178	1177	1176	1175	1174	1173	1172	1171	1170	1169	1168	1167	1166	1165	1164	1163	1162	1161	1160	1159	1158	1157	1156	1155	1154	1153	1152	1151	1150	1149	1148	1147	1146	1145	1144	1143	1142	1141	1140	1139	1138	1137	1136	1135	1134	1133	1132	1131	1130	1129	1128	1127	1126	1125	1124	1123	1122	1121	1120	1119	1118	1117	1116	1115	1114	1113	1112	1111	1110	1109	1108	1107	1106	1105	1104	1103	1102	1101	1100	1099	1098	1097	1096	1095	1094	1093	1092	1091	1090	1089	1088	1087	1086	1085	1084	1083	1082	1081	1080	1079	1078	1077	1076	1075	1074	1073	1072	1071	1070	1069	1068	1067	1066	1065	1064	1063	1062	1061	1060	1059	1058	1057	1056	1055	1054	1053	1052	1051	1050	1049	1048	1047	1046	1045	1044	1043	1042	1041	1040	1039	1038	1037	1036	1035	1034	1033	1032	1031	1030	1029	1028	1027	1026	1025 Operating Profitability

The following table summarizes our operating profitability metrics as presented in our consolidated financial statements:

(In millions)	Year ended December 31, 2023	Year ended December 31, 2022
Total Revenue	\$679.8	\$679.8
Adjusted EBITDA	\$159.1	\$139.0
EBITDA margin	23%	20%

In addition to existing cash balances and cash provided by operating activities, we used fixed-rate debt to finance our operations.

We are exposed to interest rate risk on our fixed-rate senior notes (as included in Note 14 to the consolidated financial statements) representing the majority of our fixed-rate long-term debt obligations as of December 31, 2024. The carrying value, excluding the fair value basis adjustments due to interest rate swaps described below and unamortized discounts, of our senior notes was \$10.7 billion as of December 31, 2024. The fair value of our senior notes was approximately \$9.9 billion as of December 31, 2024. The potential reduction in fair value of the senior notes from a hypothetical 10 percent increase in market interest rates would not be material to the overall fair value of the debt. Our variable-rate risk principally relates to borrowings under floating rate facilities which are subject to changes in benchmark interest rates.

Our principal sources of funds are cash generated by operations and borrowings, including the capacity under our Revolving Credit Facility, the U.S. commercial paper program and the Euro-commercial paper program discussed in Note 14 to the consolidated financial statements. The net proceeds from the Worldpay Sale also provided a significant source of funds during 2024. As of December 31, 2024, the Company had \$4.547 million of available liquidity, including \$834 million of cash and cash equivalents and \$3.713 million of capacity available under its Revolving Credit Facility. Approximately \$370 million of cash and cash equivalents is held by our foreign entities. A portion of our domestic cash and cash equivalents relates to net deposits-in-transit, which are typically settled within a few business days. Debt outstanding totaled \$11.3 billion, with an effective weighted average interest rate of 2.8%. Although we continue to evaluate the optimal capital structure for our business following the completion of the Worldpay Sale, we intend to maintain investment grade debt ratings for FIS. We believe that our current level of cash and cash equivalents plus cash flows from operations will be sufficient to fund our operating cash requirements, capital expenditures and debt service payments for the next 12 months and the foreseeable future. In January 2025, the Board of Directors approved a quarterly dividend of \$0.40 per share beginning with the first quarter of 2025. A regular quarterly dividend of \$0.40 per common share is payable on March 25, 2025, to shareholders of record as of the close of business on March 11, 2025. We currently expect to continue to pay quarterly dividends at a target payout ratio consistent with our capital allocation strategy, without regard to our equity method investment earnings (loss) attributable to our interest retained in Worldpay post-separation. However, the amount, declaration and payment of future dividends is at the discretion of the Board of Directors and depends on, among other things, our investment opportunities (including potential mergers and acquisitions), results of operations, financial condition, cash requirements, future prospects, and other factors, including legal and contractual restrictions, that may be considered relevant by our Board of Directors. Additionally, the payment of cash dividends may be limited by covenants in certain debt agreements. In January 2021, our Board of Directors approved a share repurchase program under which it authorized the Company to repurchase up to 100 million shares of our common stock. In August 2024, our Board of Directors approved a separate, incremental share repurchase program authorizing the repurchase of up to \$3.0 billion in aggregate value of shares of our common stock. Repurchases under these programs will be made at management's discretion from time to time on the open market or in privately negotiated transactions and through Rule 10b5-1 plans. Neither of these repurchase programs has an expiration date and either program may be suspended for periods, amended or discontinued at any time. Under these share repurchase programs, the Company repurchased approximately 54 million shares for an aggregate of \$4.0 billion in 2024, 9 million shares for an aggregate of \$0.5 billion in 2023 and 21 million shares for an aggregate of \$1.8 billion in 2022. Approximately 1 million shares remained available for repurchase under the January 2021 program as of December 31, 2024, and the Company will exhaust its authorization under this program in the first quarter of 2025, after which it will repurchase shares under the 2024 authorization. We intend to repurchase approximately \$1.2 billion of our shares during the year ending December 31, 2025.

Cash Flows from Operations

Our net cash provided by operating activities consists primarily of net earnings, adjusted to add back depreciation and amortization and other non-cash items including asset impairments, loss on extinguishment of debt, and loss from equity method investment. Cash flows from operations were \$2,175 million, \$2,078 million and \$1,622 million in 2024, 2023 and 2022, respectively. Cash flows from operations increased \$97 million in 2024 and increased \$456 million in 2023. The 2024 increase in cash flows from operations is primarily due to higher net earnings adjusted for non-cash items, partially offset by timing of working capital. The 2023 increase in cash flows from operations is primarily due to timing of working capital, partially offset by lower net earnings adjusted for non-cash items.

Cash Flows from Investing

Our principal investing activity relates to capital expenditures for software (purchased and internally developed) and property and equipment. We invested approximately \$817 million, \$780 million and \$996 million in capital expenditures (excluding purchases of certain hardware and software subject to financing or other long-term payment arrangements) during 2024, 2023 and 2022, respectively. We expect to continue investing in software and in property and equipment to support our business. We also invest in acquisitions that complement and extend our existing solutions and capabilities and provide additional solutions to our portfolio, and we dispose of assets that are no longer considered strategic. In 2024, we used approximately \$514 million of cash (net of cash acquired) related to new acquisitions. In 2024, in connection with the Worldpay Sale, we received \$12.8 billion in cash proceeds and divested \$3.1 billion in cash, cash equivalents and restricted cash included in current assets held for sale at the date of sale. In the fourth quarter of 2023, we paid \$202 million related to new acquisitions. We expect to continue to invest in acquisitions as part of our strategy to add solutions to help win new clients and cross-sell to existing clients. During the year ended December 31, 2024, we received distributions of \$47A million from Worldpay recorded as investing cash flows. We expect to continue to receive regular cash distributions from Worldpay pursuant to the terms of the Limited Liability Company Operating Agreement ("LLCA") described in Note 4 to the consolidated financial statements.

Cash flows from investing also occasionally include cash received or paid relative to other activities that are not regularly recurring in nature. In 2024 and 2023, we paid approximately \$8 million and \$20 million, respectively, and in 2022, we received approximately \$726 million, of net cash related to the settlement of cross-currency interest rate swaps.

Cash Flows from Financing

Cash flows from financing principally involve borrowing funds, repaying debt, repurchasing shares and paying dividends. For information regarding the Company's debt and financing activity, see "Risk Factors." Risks Related to Our Indebtedness

In Item 1A and "Quantitative and Qualitative Disclosures About Market Risk"

"Interest Rate Risk" in Item 7A of this Annual Report and Notes 14 and 15 to the consolidated financial statements. In 2023, we paid \$173 million related to the 2020 Virtus acquisition to redeem a put option exercised by the founders as described in Note 5 to the consolidated financial statements.

Contractual Obligations

FIS' long-term contractual obligations generally include its long-term debt, interest on long-term debt including the impact of accounting hedges, net coupon payments on undesignated interest rate swaps, lease payments on certain of its property and equipment and payments for certain purchase commitments and other obligations. See Notes 14, 15 and 16 to the consolidated financial statements for information on our long-term debt, financial instruments and operating leases, respectively. The following table summarizes FIS' other significant contractual obligations and commitments as of December 31, 2024 (in millions): Payments Due Less Than 1-Year Years 1-5 Interest (1) \$2,504A \$266A \$467A \$394A \$1,377A Purchase commitments (2) 696A 340A 286A 60A 10A Interest rate swap net coupons (3) 647A 108A 216A 205A 118A Total \$3,847A \$714A \$969A \$659A \$1,505A (1)The amounts above include the impact of accounting hedges and assume that (a) applicable margins and commitment fees remain constant; (b) variable-rates in effect as of December 31, 2024, remain constant; (c) no refinancing occurs at debt maturity; (d) only mandatory debt repayments are made; (e) no new hedging transactions are effected; and (f) there are no future currency effects. (2)Includes obligations principally for software, maintenance, and consulting and outsourced services, including cloud hosting and data centers. (3)The amounts above reflect the net coupon payments on the fixed-to-variable and offsetting variable-to-fixed interest rate swaps, as described in Note 15, that result in a net fixed coupon spread payable by the Company; the amounts also assume that there are no future currency effects.

Recent Accounting Pronouncements

Recently Adopted Accounting GuidanceSee Note 2 (v) to the consolidated financial statements for information on recently adopted accounting guidance.Recent Accounting Guidance Not Yet AdoptedSee Note 2 (v) to the consolidated financial statements for information on recent accounting guidance not yet adopted. No recently adopted accounting pronouncements or newly issued accounting pronouncements not yet effective during the fiscal year are expected to have a material impact on our consolidated financial statements or disclosures.

Item 7A.A Quantitative and Qualitative Disclosures About Market RiskMarket RiskWe are exposed to market risks primarily from changes in interest rates and foreign currency exchange rates. We periodically use certain derivative financial instruments, including interest rate swaps, cross-currency interest rate swaps and foreign currency forward contracts, to manage interest rate and foreign currency risk. We do not use derivatives for trading purposes, to generate income or to engage in speculative activity.

Table of ContentsInterest Rate RiskIn addition to existing cash balances and cash provided by operating activities, we use fixed-rate and variable-rate debt to finance our operations. We are exposed to interest rate risk on our fixed-rate senior notes (as included in Note 14 to the consolidated financial statements) representing the majority of our fixed-rate long-term debt obligations as of December 31, 2024. The carrying value, excluding the fair value basis adjustments due to interest rate swaps described below and unamortized discounts, of our senior notes was \$10.7 billion as of December 31, 2024. The fair value of our senior notes was approximately \$9.9 billion as of December 31, 2024. The potential reduction in fair value of the senior notes from a hypothetical 10 percent increase in market interest rates would not be material to the overall fair value of the debt. Our variable-rate risk principally relates to borrowings under floating rate facilities which are subject to changes in benchmark interest rates.

under our U.S. commercial paper program, Euro-commercial paper program and Revolving Credit Facility (as included in Note 14 to the consolidated financial statements) (collectively, "variable-rate debt"). As of December 31, 2024, our weighted-average cost of debt was 2.8% with a weighted-average maturity of 6.2 years; 93% of our debt was fixed rate, and the remaining 7% was variable-rate debt, inclusive of fair value basis adjustments due to interest rate swaps. A 100 basis-point increase in the weighted-average interest rate on our variable-rate debt would have increased our 2024 annual interest expense by \$8 million. We performed the foregoing sensitivity analysis based solely on the outstanding balance of our variable-rate debt as of December 31, 2024. This sensitivity analysis does not take into account any changes that occurred in the prior 12 months or that may take place in the next 12 months in the amount of our outstanding debt. Further, this sensitivity analysis assumes the change in interest rates is applicable for an entire year. For comparison purposes, based on the outstanding balance of our variable-rate debt as of December 31, 2023, and calculated in the same manner as set forth above, an increase of 100 basis points in the weighted-average interest rate would have increased our annual interest expense by approximately \$49 million.

Foreign Currency Risk We are exposed to foreign currency risks that arise from normal business operations. These risks include the translation of local currency balances of foreign subsidiaries, transaction gains and losses associated with intercompany loans with foreign subsidiaries and transactions denominated in currencies other than a location's functional currency. We manage the exposure to these risks through a combination of normal operating activities and the use of foreign currency forward contracts and non-derivative and derivative instruments. Our exposure to foreign currency exchange risks generally arises from our non-U.S. operations, to the extent they are conducted in local currency. Changes in foreign currency exchange rates affect translations of revenue denominated in currencies other than the U.S. Dollar. During the years ended December 31, 2024, 2023 and 2022, we generated approximately \$1,267 million, \$1,261 million and \$1,288 million, respectively, in revenue denominated in currencies other than the U.S. Dollar. The major currencies to which our revenue is exposed are the British Pound Sterling, Euro, Brazilian Real, Australian Dollar, Swedish Krona, Swiss Franc and Indian Rupee. A 10% movement in average exchange rates for these currencies (assuming a simultaneous and immediate 10% change in all of such rates for the relevant period) would have resulted in the following increase or decrease in our reported revenue for the years ended December 31, 2024, 2023 and 2022 (in millions):

Currency	2024	2023	2022
Pound Sterling	\$43A	\$43A	\$42A
Euro	27A	25A	26A
Real	12A	14A	15A
Australian Dollar	9A	7A	7A
Swedish Krona	8A	10A	7A
Swiss Franc	6A	5A	5A
Indian Rupee	5A	6A	9A

Total increase or decrease \$110A \$110A \$111A

While our results of operations have been impacted by the effects of currency fluctuations, our international operations' revenue and expenses are generally denominated in local currency, which reduces our economic exposure to foreign exchange risk in those jurisdictions.

Table of Contents Our foreign exchange risk management policy permits the use of derivative instruments, such as forward contracts and options, to reduce volatility in our results of operations and/or cash flows resulting from foreign exchange rate fluctuations. We do not enter into foreign currency derivative instruments for trading purposes or to engage in speculative activity. We do periodically enter into foreign currency forward contracts to hedge foreign currency exposure to intercompany loans, other balance sheet items or expected foreign currency cash flows resulting from forecasted transactions. The Company also utilizes foreign currency-denominated debt and cross-currency interest rate swaps designated as net investment hedges in order to reduce the volatility of the net investment value of certain of its non-U.S. dollar functional currency subsidiaries and utilizes cross-currency interest rate swaps designated as fair value hedges in order to mitigate the impact of foreign currency risk associated with our foreign currency-denominated debt (see Note 15 to the consolidated financial statements).

Table of Contents Item 8. Financial Statements and Supplementary Data FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES INDEX TO FINANCIAL INFORMATION A Page Number Report of Independent Registered Public Accounting Firm on Internal Control over Financial Reporting KPMG LLP, Jacksonville, Florida, Auditor Firm ID: 18546 Report of Independent Registered Public Accounting Firm on the Consolidated Financial Statements KPMG LLP, Jacksonville, Florida, Auditor Firm ID: 18547 Consolidated Balance Sheets as of December 31, 2024 and 2023 50 Consolidated Statements of Earnings (Loss) for the years ended December 31, 2024, 2023 and 2022 51 Consolidated Statements of Comprehensive Earnings (Loss) for the years ended December 31, 2024, 2023 and 2022 52 Consolidated Statements of Equity for the years ended December 31, 2024, 2023 and 2022 53 Consolidated Statements of Cash Flows for the years ended December 31, 2024, 2023 and 2022 54 Notes to Consolidated Financial Statements 55

Table of Contents Report of Independent Registered Public Accounting Firm To the Stockholders and Board of Directors Fidelity National Information Services, Inc.: Opinion on Internal Control Over Financial Reporting We have audited Fidelity National Information Services, Inc. and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control 86 "Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control 86 "Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2024 and 2023, the related consolidated statements of earnings (loss), comprehensive earnings (loss), equity, and cash flows for each of the years in the three-year period ended December 31, 2024, and the related notes (collectively, the consolidated financial statements), and our report dated February 13, 2025 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ KPMG LLP Jacksonville, Florida February 13, 2025

Table of Contents Report of Independent Registered Public Accounting Firm To the Stockholders and Board of Directors Fidelity National Information Services, Inc.: Opinion on the Consolidated Financial Statements We have audited the accompanying consolidated balance sheets of Fidelity National Information Services, Inc. and subsidiaries (the Company) as of December 31, 2024 and 2023, the related consolidated statements of earnings (loss), comprehensive earnings (loss), equity, and cash flows for each of the years in the three-year period ended December 31, 2024, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2024, in conformity with U.S. generally accepted accounting principles. We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control 86 "Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 13, 2025 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Sale of Worldpay Merchant Business As discussed in Notes 1 and 3 to the consolidated financial statements, the Company completed the sale of a 55% equity interest in their Worldpay Merchant Solutions business to private equity funds managed by GTCR, LLC on January 31, 2024.

Basis for Opinion These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Sufficiency of audit evidence over revenue As disclosed in Note 2 to the consolidated financial statements, the Company's revenue consists of the following types of revenue streams: i) transaction processing and services, ii) software maintenance, iii) software license, iv) professional services, and v) other recurring and non-recurring fees. We identified the sufficiency of audit evidence over revenue as a critical audit matter. Evaluating the sufficiency of audit evidence required subjective auditor judgment because of the number of revenue streams, related revenue recognition processes, and the number of information technology (IT) applications utilized in the revenue recognition process to capture and aggregate the data. The following are the primary procedures we performed to address this critical audit matter. Based on our knowledge of the Company, we applied auditor judgment to determine the nature and extent of procedures to be performed over revenue. Specifically, we: 1) evaluated the design and tested the operating effectiveness of certain internal controls within relevant revenue recognition processes, including general IT controls and IT application controls 2) involved IT professionals, who assisted in the identification and testing of certain IT systems and related controls that are used by the Company in its revenue recognition process 3) selected certain individual contracts and read the underlying contract and other documents that were part of the contract for each selection and

evaluated the consistency of the revenue recognition determinations with the Company's accounting policies and revenue recognition requirements as assessed the recorded revenue by selecting a sample of transactions and comparing the amounts recognized for consistency with the Company's accounting policies and underlying documentation, including contracts with customers and other relevant and reliable third-party data. We performed a software-assisted data analysis to test relationships among certain revenue transactions. For a selection of transactions, we compared the amounts recognized by the Company with underlying documentation, including contracts with customers and cash receipts. We evaluated the sufficiency of the audit evidence obtained by assessing the results of procedures performed over revenue. Evaluation of the accounting for income taxes As discussed in Note 17 to the consolidated financial statements, the Company's provision for income taxes for the year ended December 31, 2024 was \$362 million. The Company has deferred tax liabilities, net of \$849 million (including a valuation allowance of \$505 million) as of December 31, 2024. The Company has international operations and is subject to the tax laws and regulations of foreign jurisdictions. We identified the evaluation of the Company's accounting for income taxes as a critical audit matter. Challenging auditor judgment, and the involvement of tax professionals with specialized skills and knowledge, was required to evaluate the Company's interpretation and application of income tax regulations in certain foreign jurisdictions and the accounting for income taxes attributable to an internal legal entity restructuring. The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the Company's income tax process. This included certain controls related to the Company's interpretation and application of foreign tax regulations and the accounting for income taxes attributable to an internal legal entity restructuring. We involved tax professionals with specialized skills and knowledge in certain tax jurisdictions, who assisted in: assessing the Company's organization chart, correspondence and agreements with certain tax authorities, intercompany documentation, and correspondence with third parties. We evaluated the Company's interpretation and application of foreign jurisdictional tax regulations and the impact of these regulations on the Company's tax positions related to an internal legal entity restructuring. We evaluated the Company's accounting for income taxes attributable to an internal legal entity restructuring. Sufficiency of audit evidence over the Sale of the Worldpay Merchant Solutions business As discussed in Notes 1 and 3 to the consolidated financial statements, on January 31, 2024, the Company completed the sale (Worldpay Sale) of a 55% equity interest in its Worldpay Merchant Solutions business (the Disposal Group) to private equity funds managed by GTCR, LLC. The assets and liabilities of the Disposal Group were deconsolidated, and the retained 45% equity interest is accounted for as an equity method investment. The Company recorded a \$3,858 million loss on the sale for the year ended December 31, 2024. The results of the Disposal Group's operations prior to the sale were presented as discontinued operations. We identified the sufficiency of audit evidence over the deconsolidation of the Worldpay Merchant Solutions business and the recognition of the equity method investment as a critical audit matter. Evaluating the sufficiency of audit evidence required subjective auditor judgment due to the manual process and volume of financial information used to deconsolidate the Disposal Group's financial information from the continuing operations of the Company and recognize the retained equity interest in the equity method investment. The following are the primary procedures we performed to address this critical audit matter. We applied auditor judgment to determine the nature and extent of procedures to be performed over the deconsolidation and recognition of the equity method investment. Specifically, we: evaluated the design and tested the operating effectiveness of certain internal controls related to the Company's deconsolidation of the Disposal Group and recognition of the retained equity interest, including controls over the amounts disclosed; obtained and read the purchase and sale agreement for the Worldpay Sale and compared the terms of that agreement to the identification of the assets and liabilities included in the Disposal Group; assessed the Company's manual process to deconsolidate certain assets and liabilities of the Disposal Group by testing completeness and accuracy of certain accounting data and schedules of the Company used to deconsolidate the Disposal Group's financial information from the continuing operations of the Company; assessed the Company's manual process to recognize the retained equity interest by agreeing certain inputs to third party documentation and testing the completeness and accuracy of certain accounting data and schedules. We evaluated the sufficiency of audit evidence obtained by assessing the results of procedures performed, including the appropriateness of the nature and extent of audit effort. s/Â KPMG LLP We have served as the Company's auditor since 2004. FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unless stated otherwise or the context otherwise requires, all references to "FIS," "we," "our," "us," "the Company" or the "registrant" are to Fidelity National Information Services, Inc., a Georgia corporation, and its subsidiaries.

(1) **Organization**

FIS is a leading global provider of financial services technology solutions for financial institutions, businesses and developers. We improve the digital transformation of our financial economy, advancing the way the world pays, banks and invests. On January 31, 2024, the Company completed the sale (the "Worldpay Sale") of a 55% equity interest in its Worldpay Merchant Solutions business to private equity funds managed by GTCR, LLC (such funds, the "Buyer"). FIS retains a non-controlling 45% equity interest in a new standalone joint venture, Worldpay Holdco, LLC ("Worldpay"), following the closing of the Worldpay Sale. FIS' share of the net income (loss) of Worldpay is reported as equity method investment earnings (loss), net of tax. The net cash proceeds received by FIS, net of estimated closing adjustments and transaction costs, are presented as investing cash flows within continuing operations on the consolidated statement of cash flows. See Note 4 for information regarding the equity method investment earnings (loss), net of tax, for the period from February 1, 2024, through December 31, 2024. During the third quarter of fiscal year 2023, the Company analyzed quantitative and qualitative factors relevant to the Worldpay Merchant Solutions disposal group in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 205-20 and determined that the accounting criteria to be classified as held for sale were met, when a definitive purchase agreement was signed. Accordingly, the assets and liabilities of the disposal group are presented separately on the consolidated balance sheets for all periods presented. In addition, the disposition represents a strategic shift that will have a major impact on the Company's operations and financial results. As a result, the operating results of the Worldpay Merchant Solutions business prior to the closing of the Worldpay Sale have been reflected as discontinued operations for all periods presented and as such, have been excluded from continuing operations and segment results. The Worldpay Merchant Solutions business included the former Merchant Solutions segment in addition to a business previously included in the Corporate and Other segment, which have been reflected as discontinued operations for all periods presented. Accordingly, the Company no longer reports the Merchant Solutions segment; it now reports its financial performance based on the following segments: Banking Solutions ("Banking"), Capital Market Solutions ("Capital Markets") and Corporate and Other. As a result of its ongoing portfolio assessments, the Company reclassified certain businesses from Capital Markets to Banking and to Corporate and Other during the quarter ended March 31, 2023, and reclassified certain non-strategic operations from Banking to Corporate and Other during the quarter ended December 31, 2023. The Company recast all prior-period segment information presented to reflect these reclassifications. See Note 22 for more information regarding our segments. Amounts in tables in the financial statements and accompanying footnotes may not sum or calculate due to rounding.

Revision of Prior-Period Consolidated Financial Statements

During 2024, the Company identified immaterial misstatements affecting its previously issued consolidated financial statements as of and for the annual periods ended December 31, 2023 and 2022. The misstatements related primarily to the timing of the recognition of expenses associated with inventory-related accruals, along with their related balance sheet impacts, and the presentation of certain value-added tax balances in the consolidated financial statements. The Company has revised its prior-period financial statements to correct these misstatements, as well as other unrelated immaterial misstatements, including adjustments to Revenue and Other income (expense), net. The revisions ensure comparability across all periods reflected herein. A summary of the revisions to the previously reported financial statements is provided in Note 24.

(2) **Summary of Significant Accounting Policies**

The following describes the significant accounting policies of the Company used in preparing the accompanying consolidated financial statements.

FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

(a) **Principles of Consolidation and Management Estimates**

The consolidated financial statements include the accounts of FIS, its wholly-owned subsidiaries and subsidiaries that are majority-owned. Noncontrolling interests represent the minority shareholders' share of the net earnings or loss and equity in consolidated subsidiaries. The Company's noncontrolling interests presented in the consolidated statements of earnings (loss) include net earnings (loss) attributable to noncontrolling interests and redeemable noncontrolling interests. Noncontrolling interests are presented as a component of equity in the consolidated balance sheets. Noncontrolling interests that are redeemable upon the occurrence of an event that is not solely within the Company's control are presented outside of equity. All intercompany profits, transactions and balances have been eliminated in consolidation. The preparation of consolidated financial statements in conformity with United States ("U.S.") generally accepted accounting principles ("GAAP") and related rules and regulations of the U.S. Securities and Exchange Commission requires our management to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the related disclosure of contingent assets and liabilities. These estimates may change as new events occur and additional information is obtained. Future actual results could differ materially from these estimates. To the extent that there are differences between these estimates, judgments and assumptions and actual results, our consolidated financial statements will be affected.

(b) **Cash and Cash Equivalents**

The Company considers cash on hand, money market funds and other highly liquid investments with original maturities of three months or less to be cash and cash equivalents. As part of the Company's electronic funds transfer and network business, the Company provides cash settlement services to financial institutions and state and local governments. These services involve the movement of funds among the various parties associated with automated teller machines ("ATM") and point-of-sale or electronic benefit transactions ("EBT"). This activity results in a balance due to the Company at the end of each business day that it recoups over the next few business days. The net in-transit balances due to the Company are included in Cash and cash equivalents on the consolidated balance sheets. The carrying amounts reported in the consolidated balance sheets for these instruments approximate their fair value. The Company records restricted cash in captions other than Cash and cash equivalents in the consolidated balance sheets. The reconciliation between Cash and cash equivalents in the consolidated balance sheets and Cash, cash equivalents and restricted cash per the consolidated statements of cash flows is as follows (in millions):

	December 31, 2024	2023	Cash and cash equivalents on the consolidated balance sheets
Merchant float from discontinued operations included in current assets held for sale	(1)	1,074	2,594
Cash from discontinued operations included in current assets held for sale	38	1,380	Total Cash, cash equivalents and restricted cash per the consolidated statements of cash flows
Merchant float funds are considered restricted cash.	(1)	—	—

(c) **Fair Value Measurements**

Fair Value Hierarchy

The authoritative accounting literature defines fair value, establishes a framework for measuring fair value, and establishes a fair value hierarchy based on the quality of inputs used to measure fair value. The fair value hierarchy includes three levels that are based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). If the inputs used to measure the fair value fall within different levels of the hierarchy, the categorization is based on the lowest level input that is significant to the fair value measurement of the asset or liability. The three levels of the fair value hierarchy are described below.

FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Level 1. Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2. Inputs to the valuation methodology include the following:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from, or corroborated by, observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3. Inputs to the valuation methodology are unobservable and significant to the fair value measurement. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

Fair Value of Assets Acquired and Liabilities Assumed in Business Combinations

In a business combination transaction, an acquirer recognizes, separately from goodwill, the identifiable assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree and generally measures these items at their acquisition date fair values, except as otherwise required. Any portion of the purchase price in excess of the recorded amount of the net identifiable assets acquired is recognized as goodwill. Fair values are determined using the framework outlined above under Fair Value Hierarchy and the methodologies addressed in the individual subheadings. If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, we report provisional amounts in the financial statements for the items for which the accounting is incomplete. Adjustments to provisional amounts initially recorded that are identified during the measurement period are recognized in the reporting period in which the adjustment amounts are determined. This includes any effect on earnings of changes in depreciation, amortization, or other income effects as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. During the measurement period, we also recognize additional assets or liabilities if new information is obtained about facts and

circumstances that existed as of the acquisition date that, if known, would have resulted in the recognition of those assets and liabilities as of that date. The measurement period ends the sooner of one year from the acquisition date or when we receive the information we were seeking about facts and circumstances that existed as of the acquisition date or learn that more information is not obtainable. Contingent consideration liabilities or receivables recorded in connection with business acquisitions are also adjusted for changes in fair value until settled. Fair Value of Financial InstrumentsThe carrying amounts reported in the consolidated balance sheets for settlement assets and payables as well as short-term borrowings approximate their fair values because of their immediate or short-term maturities. The fair value of the Company's long-term debt is based on quoted prices of our senior notes and trades of our debt in close proximity to year end, which are considered Level 2-type measurements. The Company also holds, or has held, certain derivative instruments, specifically interest rate swaps, cross-currency interest rate swaps and foreign currency exchange forward contracts, which are also valued using Level 2-type measurements. These estimates are subjective in nature and involve uncertainties and significant judgment in the interpretation of current market data. The fair value of the contingent consideration from the Worldpay Sale, as discussed further in (d) Derivative Financial Instruments below, is based on unobservable inputs and assumptions with respect to the timing and level of returns that will be realized by the Buyer upon certain distribution events, which are considered Level 3-type measurements. As a result of these estimates, the value of financial instruments presented in the Company's consolidated financial statements may not necessarily be indicative of amounts the Company could realize or settle currently.(d)Derivative Financial InstrumentsThe Company enters into derivatives to manage foreign currency and interest rate risk; the Company does not use derivatives for trading purposes, to generate income or to engage in speculative activity. During all periods presented, the Company used cross-currency interest rate swaps to engage in hedging activities relating to changes in foreign currency exchange rates impacting its investment in certain foreign-currency-denominated operations. The Company designated these cross-currency interest rate swaps as net investment hedges. The Company also utilized foreign-57FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)currency-denominated debt as non-derivative net investment hedges. During 2023, the Company also began utilizing cross-currency interest rate swaps to engage in hedging activities relating to its exposure to foreign currency risk associated with its foreign currency-denominated debt. The Company designated these cross-currency interest rate swaps as fair value hedges. Prior to the quarter ended September 30, 2023, the Company used fixed-to-variable interest rate swaps to engage in hedging activities relating to changes in interest rates impacting the fair value of its fixed-rate long-term debt. The Company designated these interest rate swaps as fair value hedges. During the quarter ended September 30, 2023, the Company de-designated these interest rate swaps as fair value hedges and entered into offsetting variable-to-fixed interest rate swaps. The de-designated and new interest rate swaps are accounted for as economic hedges. During all periods presented, the Company used foreign currency forward contracts as economic hedges to reduce the foreign currency risk associated with payments due at maturity or extinguishment of the Company's foreign currency-denominated debt and cross-currency interest rate swaps.As part of the Worldpay Sale, the Company obtained the right to receive \$1.0A billion of consideration contingent on the returns realized by the Buyer exceeding certain thresholds. The Company recognized this financial instrument as a derivative. The Company records all derivatives, whether designated in accounting hedging relationships or not, on the consolidated balance sheets at fair value. The Company's derivative contracts are generally subject to master netting arrangements, which contain various netting and setoff provisions; however, the Company has elected to record derivative assets and liabilities on a gross basis in the accompanying consolidated balance sheets in Prepaid expenses and other current assets; Other noncurrent assets; Accounts payable, accrued and other liabilities; or Other noncurrent liabilities, as appropriate. See Notes 15 and 20 for additional details, including accounting policies. (e)Allowance for Credit LossesThe Company monitors trade receivable balances and contract assets as well as other receivables and estimates the allowance for lifetime expected credit losses. Estimates of expected credit losses are based on historical collection experience and other factors, including those related to current market conditions and events, changes in client creditworthiness, client payment terms and collection trends. (f)Settlement Assets and PayablesThe principal components of the Company's settlement assets and payables on the consolidated balance sheets are as follows (in millions):December 31,20242023Settlement assetsSettlement deposits\$353A \$463A Settlement receivables126A 154A Total Settlement assets\$479A \$617A Settlement payables\$500A \$635A The payment solutions that give rise to the settlement balances described below are separate and distinct from those settlement activities referred to under (b) Cash and Cash Equivalents, where the solutions we provide primarily facilitate the movement of funds.We manage certain payment solutions and programs and wealth management processes for our clients that require us to hold and manage client cash balances used to fund their daily settlement activity. Settlement deposits represent funds we hold that were drawn from our clients to facilitate settlement activities. Settlement receivables represent amounts funded by us. Settlement payables consist of settlement deposits from clients, settlement payables to third parties or clients, and outstanding checks related to our settlement activities for which the right of offset does not exist or we do not intend to exercise our right of offset. Our accounting policy for such outstanding checks is to include them in Settlement payables on the consolidated balance sheets and operating cash flows on the consolidated statements of cash flows. 58FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)(g)Contract Related BalancesThe payment terms and conditions in our customer contracts may vary. In some cases, customers pay in advance of our delivery of solutions or services; in other cases, payment is due as services are performed or in arrears following the delivery of the solutions or services. Differences in timing between revenue recognition and invoicing result in accrued trade receivables, contract assets, or deferred revenue on our consolidated balance sheets. Trade receivables are accrued when revenue is recognized prior to invoicing but the right to payment is unconditional (i.e., only the passage of time is required). This occurs most commonly when software term licenses recognized at a point in time are paid for periodically over the license term. Contract assets result when amounts allocated to distinct performance obligations are recognized when or as control of a solution or service is transferred to the customer but invoicing is contingent on performance of other performance obligations or on completion of contractual milestones. Contract assets are transferred to trade receivables when the rights become unconditional, typically upon invoicing of the related performance obligations in the contract or upon achieving the requisite project milestone. Deferred revenue results from customer payments in advance of our satisfaction of the associated performance obligation(s) and relates primarily to prepaid maintenance or other recurring services. Deferred revenue is relieved as revenue is recognized. Contract assets and deferred revenue are reported on a contract-by-contract basis at the end of each reporting period. At December 31, 2024 and 2023, contract assets of \$220 million and \$227 million, respectively, are included in Prepaid expenses and other current assets and \$308 million and \$240 million, respectively are included in Other noncurrent assets on the consolidated balance sheets. Noncurrent deferred revenue is included in Other noncurrent liabilities as detailed in Note 13. Changes in the contract assets and deferred revenue balances for the years ended December 31, 2024 and 2023, were not materially impacted by any factors other than those described above. In some cases, signing bonuses are paid, or credits are offered, to customers in connection with the origination or renewal of customer contracts. A These incentives are recorded as Other noncurrent assets on our consolidated balance sheets and amortized on a straight-line basis as a reduction of revenue over the lesser of the useful life of the solution or the expected customer relationship period for new contracts or over the contract period for renewal contracts. (h)GoodwillGoodwill represents the excess of the total consideration transferred in business combinations over the amount of the net identifiable assets acquired in accordance with the measurement guidance for such items. Goodwill is not amortized but is assessed for impairment by reporting unit. The Company assesses goodwill for impairment on an annual basis during the fourth quarter or more frequently if circumstances indicate potential impairment. An impairment charge is recognized when and to the extent a reporting unit's carrying amount is determined to exceed its estimated fair value. Our reporting units are the same as our primary operating segments, with additional reporting units for certain non-strategic businesses within the Corporate and Other segment. The Company has the option to first assess qualitatively whether it is more likely than not that a reporting unit's carrying amount exceeds its estimated fair value. The option of whether to perform the qualitative assessment is made annually and may vary by reporting unit. Events and circumstances that are considered in performing the qualitative assessment include macroeconomic conditions, industry and market conditions, cost factors, overall financial performance, events affecting the reporting unit or Company as a whole, including a sustained decrease in stock price. When performing the qualitative assessment, we examine those factors most likely to affect each reporting unit's fair value. If we conclude that it is more likely than not that the reporting unit's fair value is less than its carrying amount (that is, a likelihood of more than 50 percent) as a result of the qualitative assessment, or we elect to bypass the qualitative assessment for a reporting unit, then we perform a quantitative assessment for that reporting unit.In applying the quantitative assessment, we typically engage third-party valuation specialists to assist us in determining the fair value of a reporting unit based on a weighted average of valuation techniques, a combination of an income approach and a market approach, which are Level 3-type measurements. The income approach calculates a value based upon the present value of estimated future cash flows, while the market approach uses earnings multiples of similarly situated guideline public companies. If the fair value of the reporting unit determined using the quantitative analysis exceeds the carrying amount of the reporting unit's net assets, goodwill is not impaired.Both qualitative and quantitative assessments require a significant amount of management judgment involving the use of forecasts, estimates, and assumptions.59FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)(i)Impairment of Long-Lived Assets and Intangible Assets with Finite Useful LivesLong-lived assets and intangible assets with finite useful lives are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset, which are Level 3-type measurements. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset. There were no significant impairments of long-lived assets or intangible assets with finite useful lives during the years ended December 31, 2024 and 2023. During the year ended December 31, 2022, the Company recognized impairment losses totaling \$71 million on certain long-lived assets, primarily related to reducing office space, including \$43 million for operating lease right-of-use assets.(j)Intangible AssetsThe Company has intangible assets that consist primarily of customer relationships and trademarks (i.e., a collective term for trademarks, trade names, and related intellectual property rights) that are recorded in connection with acquisitions at their fair value based on the results of valuation analyses. Customer relationships and trademarks acquired in business combinations are generally valued using the multi-period excess earnings method and relief-from-royalty method, respectively, which are Level 3-type measurements. Customer relationships are amortized over their estimated useful lives using an accelerated method that takes into consideration expected customer attrition rates up to a 10-year period. Trademarks with finite lives are amortized over periods ranging up to five years. Intangible assets with finite lives are reviewed for impairment following the same approach as long-lived assets.(k)SoftwareSoftware includes software acquired in business combinations, purchased software and capitalized software development costs. Software acquired in business combinations is generally valued using the relief-from-royalty method, a Level 3-type measurement. Purchased software is recorded at cost and amortized using the straight-line method over its estimated useful life, and software acquired in business combinations is recorded at its fair value and amortized using straight-line or accelerated methods over its estimated useful life, typically ranging from one to 10 years.The capitalization of software development costs is based on whether the software is to be sold, leased or otherwise marketed, or if the software is for internal use. After the technological feasibility of the software has been established (for software to be marketed) or at the beginning of application development (for internal-use software), software development costs, which primarily include salaries and related payroll costs and costs of independent contractors incurred during development, are capitalized. Research and development costs incurred prior to the establishment of technological feasibility (for software to be marketed) or

prior to application development (for internal-use software) are expensed as incurred. Software development costs are amortized on a solution-by-solution basis commencing on the date of general release (for software to be marketed) or the date placed in service (for internal-use software). Software development costs for internal-use software are amortized using the straight-line method over its estimated useful life, which typically ranges from three to 10 years. Software development costs for software to be marketed are amortized using the greater of (1) the straight-line method over its estimated useful life, which typically ranges from three to 10 years, or (2) the ratio of current revenue to total anticipated revenue over its useful life. The Company reviews software assets for impairment at each reporting date. For software to be marketed, an impairment charge is recorded to the extent the carrying amount exceeds the net realizable value. Internal-use software is reviewed for impairment following the same approach as long-lived assets. Determining net realizable values and future cash flows involves judgments and the use of estimates and assumptions regarding future economic and market conditions. Adverse changes in these conditions could result in an impairment charge which could be material to our consolidated financial statements. See Note 10 for software asset impairment losses and incremental software amortization expense recognized during the years ended December 31, 2024, 2023 and 2022.

60 FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

(l) Deferred Contract Costs The Company incurs costs as a result of both the origination and fulfillment of our contracts with customers. Origination costs relate primarily to the payment of sales commissions that are directly related to sales transactions. Fulfillment costs include the cost of implementation services related to software as a service ("SaaS") and other cloud-based arrangements when the implementation service is not distinct from the ongoing service. When origination costs and fulfillment costs that will be used to satisfy future performance obligations are directly related to the execution of our contracts with customers, and the costs are recoverable under the contract, the costs are capitalized as a deferred contract cost. Impairment losses are recognized if the carrying amounts of the deferred contract costs are not recoverable. Origination costs for contracts that contain a distinct software license recognized at a point in time are allocated between the license and all other performance obligations of the contract and amortized according to the pattern of performance for the respective obligations. Otherwise, origination costs are capitalized as a single asset for each contract or portfolio of similar contracts and amortized using an appropriate single measure of performance considering all of the performance obligations in the contracts. The Company amortizes origination costs over the expected benefit period to which the deferred contract cost relates. Origination costs related to initial contracts with a customer are amortized over the lesser of the useful life of the solution or the expected customer relationship period. Commissions paid on renewals are amortized over the renewal period. Capitalized fulfillment costs are amortized over the lesser of the useful life of the solution or the expected customer relationship period. See Note 11 for deferred contract cost incremental amortization expense recognized during the years ended December 31, 2023 and 2022.

(m) Property and Equipment Property and equipment is recorded at cost, less accumulated depreciation and amortization. Depreciation and amortization are computed primarily using the straight-line method based on the estimated useful lives of the related assets typically as follows: 30 years for buildings and three to seven years for furniture, fixtures and computer equipment. Leasehold improvements are amortized using the straight-line method over the lesser of the initial term of the applicable lease or the estimated useful lives of such assets.

(n) Income Taxes The Company recognizes deferred income tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of the Company's assets and liabilities and expected benefits of using net operating loss and credit carryforwards. Deferred income tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The impact on deferred income taxes of changes in tax rates and laws, if any, is reflected in the consolidated financial statements in the period enacted. A valuation allowance is established for any portion of a deferred income tax asset for which management believes it is more likely than not that the Company will not be able to realize the benefits of all or a portion of that deferred income tax asset. The Company has provided for residual income tax on unremitted earnings related to certain foreign subsidiaries based on the Company's cash management strategy including consideration of needs and uses as set forth in "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" under "Liquidity and Capital Resources." Certain of the Company's earnings are indefinitely reinvested offshore and could be subject to additional income tax if repatriated. It is not practicable to determine the unrecognized deferred tax liability on a hypothetical distribution of those earnings.

(o) Operating Leases The Company leases certain of its property, primarily real estate, under operating leases. Operating lease right-of-use ("ROU") assets are included in Other noncurrent assets, and operating lease liabilities are included in Accounts payable, accrued and other liabilities and Other noncurrent liabilities on the consolidated balance sheets. ROU assets represent the Company's right to use an underlying asset for the lease term, and lease liabilities represent the Company's obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at commencement date based on the present value of fixed lease payments over the lease term. Operating lease ROU assets also include any prepaid lease payments and exclude lease incentives received. The Company uses an incremental borrowing rate based on information available at commencement date in determining the present value of lease payments. Lease term for accounting purposes may include options to extend (generally ranging from one to five years) or to terminate the lease when it is reasonably certain that

61 FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

the Company will exercise that option. For certain equipment leases, the Company applies a portfolio approach to effectively account for the operating lease ROU assets and liabilities. Lease agreements may include lease and related non-lease components, which are accounted for as a single lease component. Fixed costs included in the measurement of ROU assets are recognized as operating lease cost generally on a straight-line basis over the lease term. Certain leases require the Company to pay taxes, insurance, maintenance and other operating expenses associated with the leased asset. Such amounts are not included in the measurement of the ROU assets and lease liabilities to the extent they are variable in nature; instead, they are recognized as variable lease cost when incurred.

(p) Revenue Recognition The Company generates revenue in a number of ways, including from the delivery of account- or transaction-based processing, SaaS, business process as a service ("BPaaS"), cloud offerings, software licensing, software-related services and professional services. The Company enters into arrangements with customers to provide services, software and software-related services such as maintenance and implementation either individually or as part of an integrated offering. The Company assesses the solutions and services promised in its contracts with customers and identifies a performance obligation for each promise to transfer to the customer a solution or service (or bundle of solutions or services) that is distinct - i.e., if a solution or service is separately identifiable from other items in the bundled package and if a customer can benefit from it on its own or with other resources that are readily available to the customer. To identify its performance obligations, the Company considers all of the solutions or services promised in the contract regardless of whether they are explicitly stated or are implied by customary business practices. The Company recognizes revenue when or as it satisfies a performance obligation by transferring control of a solution or service to a customer. Revenue is measured based on the consideration that the Company expects to receive in a contract with a customer. The Company's contracts with its customers frequently contain variable consideration. Variable consideration exists when the amount which the Company expects to receive in a contract is based on the occurrence or non-occurrence of future events, such as processing services performed under usage-based pricing arrangements or professional services billed on a time-and-materials basis. Variable consideration is also present in certain transactions in the form of discounts, credits, price concessions, penalties, and similar items. If the amount of a discount or rebate in a contract is fixed and not contingent, that discount or rebate is not variable consideration. The Company estimates variable consideration in its contracts primarily using the expected value method. In some contracts, the Company applies the most likely amount method by considering the single most likely amount in a limited range of possible consideration amounts. The Company develops estimates of variable consideration on the basis of both historical information and current trends. Variable consideration included in the transaction price is constrained such that a significant revenue reversal is not probable. Taxes collected from customers and remitted to governmental authorities are not included in revenue. Postage costs associated with print and mail services are accounted for as a fulfillment cost and are included in cost of revenue. Technology or service components from third parties are frequently embedded in or combined with our applications or service offerings. We are often responsible for billing the client in these arrangements and transmitting the applicable fees to the third party. The Company determines whether it is responsible for providing the third-party solution or service as a principal or for arranging for the solution or service to be provided by the third party as an agent. Judgment is applied to determine whether we are the principal or the agent by evaluating whether the Company has control of the solution or service prior to it being transferred to the customer. The principal versus agent assessment is performed at the performance obligation level. Indicators that the Company considers in determining if it has control include whether the Company is primarily responsible for fulfilling the promise to provide the specified solution or service to the customer, the Company has inventory risk and the Company has discretion in establishing the price the customer ultimately pays for the solution or service. Depending upon the level of our contractual responsibilities and obligations for delivering solutions to end customers, we have arrangements where we are the principal and recognize the gross amount billed to the customer and other arrangements where we are the agent and recognize the net amount retained. The total transaction price of a contract is allocated to each performance obligation in a manner depicting the amount of consideration to which the Company expects to be entitled in exchange for transferring the solution(s) or service(s) to the customer (the "allocation objective"). If the allocation objective is met at contractual prices, no allocation adjustments from contract prices are made. Otherwise, the Company reallocates the transaction price to each performance obligation identified in the contract on a relative standalone selling price basis, except when the criteria are met for allocating variable consideration to

62 FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

one or more, but not all, performance obligations in the contract. The Company allocates variable consideration to one or more, but not all, performance obligations when the terms of the variable payment relate specifically to the Company's efforts to satisfy the performance obligation (or transfer the distinct solution or service) and when such allocation is consistent with the allocation objective when considering all performance obligations in the contract. Determining whether the criteria for allocating variable consideration to one or more, but not all, performance obligations in the contract requires judgment and may affect the timing and amount of revenue recognized. To determine the standalone selling price of its promised solutions or services, the Company conducts a regular analysis to determine whether various solutions or services have an observable standalone selling price. If the Company does not have an observable standalone selling price for a particular solution or service, then the standalone selling price for that particular solution or service is estimated using all information that is reasonably available and maximizing observable inputs using approaches including historical pricing, cost plus a margin, adjusted market assessment, and a residual approach. The following describes the nature of the Company's primary types of revenue and the revenue recognition policies and significant payment terms as they pertain to the types of transactions the Company enters into with its customers.

Transaction Processing and Services Revenue Transaction processing and services revenue is primarily comprised of payment processing, data processing, application management, and outsourced services, including our SaaS, BPaaS and cloud offerings. Transaction processing and services revenue is recurring and is typically volume or activity based depending on factors such as the number of payments, transactions, accounts or trades processed, number of users, number of hours of services or amount of computer resources used. Fees may include tiered pricing structures with the base tier representing a minimum monthly usage fee. Pricing within the tiers typically resets on a monthly basis, and minimum monthly volumes are generally met or exceeded. Contract lengths for processing services typically span one or more years; however, when distinct hosting services are offered, they are often cancelable without a significant penalty with 30-days' notice. Payment is generally due in advance or in arrears on a monthly or quarterly basis and may include fixed or variable payment amounts depending on the specific payment terms and activity in the period. In transaction processing and services contracts, the nature of the Company's promise to the customer is to stand ready to provide continuous access to the Company's

processing platforms and perform an unspecified quantity of transaction processing and outsourced services for a specified term or terms. Accordingly, transaction processing and services are generally viewed as stand-ready performance obligations comprised of a series of distinct daily services. The Company typically satisfies its transaction processing and services performance obligations over time as the services are provided. A time-elapsed output method is used to measure progress because the Company's efforts are expended evenly throughout the period given the nature of the promise is a stand-ready service. The Company has evaluated its variable payment terms related to its transaction processing and services revenue accounted for as a series of distinct days of service and concluded that they generally meet the criteria for allocating variable consideration entirely to one or more, but not all, performance obligations in a contract. Accordingly, when the criteria are met, variable amounts based on the number and type of services performed during a period are allocated to, and recognized on, the day in which the Company performs the related services. Fixed fees for processing services are generally recognized ratably over the contract period. Transaction processing and services revenue also includes network, interchange, and other pass-through fees. Pass-through fees generally represent variable consideration and are allocated to, and recognized on, the day on which the related services are performed. Pass-through fees are billed monthly. Network and interchange fees are presented on a net basis; other pass through fees may be recorded on either a gross or a net basis depending on whether the Company is acting as a principal or an agent. Software Maintenance Revenue Software maintenance is comprised of technical support services and unspecified software updates and upgrades provided on a when-and-if-available basis. Software maintenance revenue is generally based on fixed fees. Payment terms are typically annually, quarterly, or monthly in advance. Contract terms vary and can span multiple years. The Company generally satisfies its maintenance-related performance obligations evenly using a time-elapsed output method over the contract term given there is no discernible pattern of performance.

63 FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Other Recurring Revenue Other recurring revenue is comprised primarily of services provided by dedicated personnel resources who work full time at client sites and under the client's direction. Revenue from dedicated resource agreements is generally based on fixed monthly fees per resource. Payment terms are typically annually, quarterly, or monthly in advance. Contract terms vary and can span multiple years. The Company generally satisfies its dedicated resource obligations evenly using a time-elapsed output method over the contract term given there is no discernible pattern of performance.

Software License Revenue The Company's software licenses generally have significant stand-alone functionality to the customer upon delivery and are considered to be functional intellectual property. Additionally, the nature of the Company's promise in granting these software licenses to a customer is typically to provide the customer with a right to use the Company's intellectual property. The Company's software licenses are generally considered distinct performance obligations. Revenue allocated to software licenses is typically recognized at a point in time upon delivery of the license and is non-recurring. Contracts that contain software licenses often have non-standard terms that require significant judgments that may affect the amount and timing of revenue recognized. When a software license requires frequent updates that are integral to maintaining the utility of the license to the customer, the Company combines the software license and the maintenance into a single performance obligation, and revenue for the combined performance obligation is recognized in Transaction processing and services revenue as the maintenance is provided, consistent with the treatment described for maintenance above. When a software license contract also includes professional services that provide significant modification or customization of the software license, the Company combines the software license and professional services into a single performance obligation, and revenue for the combined performance obligation is recognized as the professional services are provided, consistent with the methods described below for professional services revenue. The Company has contracts where the licensed software is offered in conjunction with hosting services. The licensed software may be considered a separate performance obligation from the hosting services if the customer can take possession of the software during the contractual term without incurring a significant penalty and if it is feasible for the customer to run the software on its own infrastructure or hire a third party to host the software. If the licensed software and hosting services are separately identifiable, license revenue is recognized when the hosting services commence and it is within the customer's control to obtain a copy of the software. If the software license is not separately identifiable from the hosting service, then the related revenue for the combined performance obligation is recognized ratably over the hosting period and classified as processing revenue. Occasionally, the Company offers extended payment terms on its license transactions; however, such transactions are generally not considered to have a significant financing component. Professional Services Revenue Professional services revenue is comprised of implementation, conversion, and programming services associated with the Company's data processing and application management agreements and implementation or installation services related to licensed software. Although this revenue is non-recurring in nature, it is generally recognized over time, with service durations spanning from several weeks to several years, depending on the scope and complexity of the work. Payment terms for professional services may be based on an upfront fixed fee, fixed upon the achievement of milestones, or on a time-and-materials basis. In assessing whether implementation services provided on data processing, application management or software agreements are a distinct performance obligation, the Company considers whether the services are both capable of being distinct (i.e., the customer can benefit from the services alone or in combination with other resources that are readily available to the customer) and distinct within the context of the contract (i.e., the services are separately identifiable from the other performance obligations in the contract). Implementation services and other professional services are typically considered distinct performance obligations. However, when these services involve significant customization or modification of an underlying solution or offering, or if the services are complex and not available from a third-party provider and must be completed prior to a customer having the ability to benefit from a solution or offering, then such services and the underlying solution or offering will be accounted for as a combined performance obligation.

64 FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

The Company's professional services that are accounted for as distinct performance obligations and that are billed on a fixed fee basis are typically satisfied as services are rendered; thus, the Company uses a cost-based input method, such as cost-to-cost or efforts expended (labor hours), to provide a faithful depiction of the transfer of those services. For professional services that are distinct and billed on a time-and-materials basis, revenue is generally recognized using an output method that corresponds with the time and materials billed and delivered, which is reflective of the transfer of the services to the customer. Professional services that are not distinct from an associated solution or offering are recognized over the common measure of progress for the overall performance obligation (typically a time-elapsed output measure that corresponds to the period over which the solution or offering is made available to the customer).

Other Non-recurring Revenue Other non-recurring revenue is comprised primarily of hardware, one-time card production, and early termination fees. The Company typically does not stock in inventory the hardware solutions sold but arranges for delivery of hardware from third-party suppliers. The Company determines whether hardware delivered from third-party suppliers should be recognized on a gross or net basis by evaluating whether the Company has control of the solution or service prior to it being transferred to the customer. Equipment and one-time card production revenue is generally recognized at a point in time upon delivery. Early contract terminations are treated as contract modifications. Early termination fees are added to a contract's transaction price once it becomes likely that liquidated damages will be charged to a customer, typically upon notification of early termination. Early termination fees are recognized over the remaining period of the related performance obligation(s).

Material Rights Some of the Company's contracts with customers include options for the customer to acquire additional, or renew existing, solutions or services in the future. Options may represent a material right to acquire solutions or services if the discount is incremental to the range of discounts typically given for those solutions or services to that class of customer in that geographical area or market and if the customer would not have obtained the option without entering into the contract. If deemed to be a material right, the Company will account for the material right as a separate performance obligation and determine the standalone selling price based on directly observable prices when available. If the standalone selling price is not directly observable, then the Company estimates the standalone selling price to be equal to the discount that the customer would obtain by exercising the option, as adjusted for any discount that the customer would receive without exercising the option and for the likelihood that the option will be exercised.

(q) Cost of Revenue and Selling, General and Administrative Expenses Cost of revenue consists of costs directly associated with providing solutions or services to clients and includes payroll, employee benefits and other costs associated with personnel employed in customer service and service delivery roles as well as third-party costs involved in fulfillment of performance obligations for which the Company is acting as a principal. Cost of revenue also includes data processing costs, amortization of software, customer relationship and trademark intangible assets, and depreciation on operating assets. Selling, general and administrative expenses include payroll, employee benefits and other costs associated with personnel employed in sales, marketing, human resources, finance, risk management and other administrative roles, as well as acquisition, integration and certain other costs that are not considered when management evaluates revenue-generating segment performance. Selling, general and administrative expenses also include depreciation on non-operating corporate assets as well as advertising and other marketing-related program costs.

(r) Equity Method Investment The Company reports its investments in unconsolidated entities over whose operating and financial policies the Company has the ability to exercise significant influence, but not control, under the equity method of accounting. Equity method investments are initially recorded at cost and are included in Equity method investment on the consolidated balance sheet, and our share of the investee's earnings or losses is reported in Equity method investment earnings (loss), net of tax, in the consolidated statement of earnings (loss). Given Worldpay's capital structure under the terms of Limited Liability Company Operating Agreement ("LLCA"), which grants us a liquidation preference ahead of other unit holders, we apply the hypothetical liquidation book value ("HLBV") method to determine our share of the investee's earnings or losses because our liquidation rights and priorities differ from our underlying ownership interest. The HLBV method calculates the proceeds that would be

65 FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

attributable to each investor based on the change, during the reporting period, of the amount of net assets to which each investor would be entitled under the liquidation provisions of the governing contractual arrangements if the investment were to be liquidated at book value, excluding any contributions or distributions during the reporting period. The Company also reports its investor-level tax impact relating to equity method investments as a component of Equity method investment earnings (loss) in the consolidated statement of earnings (loss). The carrying values of our equity method investments are adjusted for our equity method investment earnings (loss) before application of investor-level taxes and for our pro rata share of the investee's other comprehensive earnings (loss). The Company monitors its investments for other-than-temporary impairment by considering factors, such as current economic and market conditions and the operating performance of the investees and records reductions in carrying values when necessary. Equity method investees are considered related parties of the Company. Distributions received from our equity method investments are recorded as reductions in the carrying value of such investments and are classified on the consolidated statement of cash flows pursuant to the cumulative earnings approach. Under this approach, the distributions should be classified as either a return on investment, which would be included in operating activities, or a return of investment, which would be included in investing activities. Any distributions received up to the amount of cumulative equity in earnings of the investee would be considered a return on investment and classified in operating activities. Any distributions in excess of cumulative equity in earnings of the investee would be considered a return of investment and classified in investing activities. Thus, to the extent our equity in earnings of the investee reflects cumulative losses, the distributions are considered a return of investment and classified in investing activities.

(s) Stock-Based Compensation Plans The Company accounts for stock-based compensation plans using the fair value method. Thus, compensation cost is measured based on the fair value of the award at the grant date and is recognized over the service period. For our service-based stock awards, we recognize the compensation cost on a straight-line basis over the award's service period, which is generally three years. For our performance-based stock awards with market conditions which typically cliff vest on the third anniversary date of the grant, we recognize the compensation cost on a

straight-line basis over the service period when it is probable the outcome of that performance condition will be achieved. The Company adjusts the compensation expense over the service period based upon the expected achievement level of the applicable performance condition. Certain of our stock awards contain only market conditions. In those circumstances, compensation cost is recognized over the service period and is not reversed even if the award does not become exercisable in the event the market condition is not achieved. The Company estimates future forfeitures at the time of grant and revises those estimates in subsequent periods if actual forfeitures differ significantly from those estimates.(t)Foreign Currency TranslationOur functional currency is the U.S. dollar. The functional currency of each of our operating subsidiaries is generally the currency of the economic environment in which the subsidiary primarily does business. Our foreign subsidiaries with non-U.S. dollar functional currencies are translated into U.S. dollars for consolidation purposes using the foreign exchange rates applicable to the dates of the financial statements. Generally, these consist of the exchange rates in effect at the balance sheet date for balance sheet accounts and the average exchange rates in effect during the relevant period for revenue and expense accounts. The adjustments resulting from the translation are included in Accumulated other comprehensive earnings (loss) in the consolidated statements of equity and consolidated statements of comprehensive earnings and are excluded from net earnings.Gains or losses resulting from measuring foreign currency transactions into the respective functional currency are included in Other income (expense), net in the consolidated statements of earnings (loss).(u)Net Earnings (Loss) per ShareThe basic weighted average shares and common stock equivalents for the years ended December 31, 2024, 2023 and 2022, are computed using the treasury stock method.66FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)Net earnings (loss) and earnings (loss) per share for the years ended December 31, 2024, 2023 and 2022, are as follows (in millions, except per share data):

	Year ended December 31, 2024	2023	2022
Net earnings (loss) from continuing operations attributable to FIS	\$787	\$502	\$576
Net earnings (loss) from discontinued operations attributable to FIS	663	(17,157)	(17,328)
Net earnings (loss) attributable to FIS	\$1,450	\$(6,655)	\$(16,752)
Weighted average shares outstanding-basic	555.591A	604.4	604.4
Net earnings (loss) per share-basic from continuing operations attributable to FIS	\$1.42A	\$0.85A	\$0.95A
Net earnings (loss) per share-basic from discontinued operations attributable to FIS	1.20A	(12.11)	(28.69)
Net earnings (loss) per share-basic attributable to FIS	\$2.62A	\$(11.26)	\$(27.74)
Net earnings (loss) per share-diluted from continuing operations attributable to FIS	\$1.42A	\$0.85A	\$0.95A
Net earnings (loss) per share-diluted from discontinued operations attributable to FIS	1.19A	(12.11)	(28.69)
Net earnings (loss) per share-diluted attributable to FIS	\$2.61A	\$(11.26)	\$(27.74)

The diluted net loss per share for the year ended December 31, 2023 and 2022, did not include the effect of common stock equivalent shares of 2A million and 3A million, respectively.Options to purchase approximately 7 million, 8 million and 5 million shares of our common stock for the years ended December 31, 2024, 2023 and 2022, respectively, were not included in the computation of diluted earnings (loss) per share because they were anti-dilutive.(v)Recent Accounting GuidanceRecently Adopted Accounting GuidanceIn November 2023, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures. The ASU expands annual and interim disclosure requirements for reportable segments, primarily through enhanced disclosures about significant segment expenses that are regularly provided to the chief operating decision maker. The update is required to be applied retrospectively to prior periods presented, based on the significant segment expense categories identified and disclosed in the period of adoption. The Company adopted the new standard for the fiscal year ending December 31, 2024 and expanded disclosures around significant segment expenses. See Note 22 for further information.Recent Accounting Guidance Not Yet AdoptedIn December 2023, the FASB issued ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures. The ASU requires that an entity disclose specific categories in the effective tax rate reconciliation as well as provide additional information for reconciling items that meet a quantitative threshold. Further, the ASU requires certain disclosures of state versus federal income tax expense and taxes paid. The amendments in this ASU are required to be adopted for fiscal years beginning after December 31, 2024. Early adoption is permitted for annual financial statements that have not yet been issued. The amendments should be applied on a prospective basis although retrospective application is permitted. The Company is currently evaluating the impact of adoption on our financial disclosures.In November 2024, the FASB issued ASU 2024-03, Income Statement-Reporting Comprehensive Income-Expense Disaggregation Disclosures (Subtopic 220-40): Disaggregation of Income Statement Expenses. The ASU requires disclosure on an annual and interim basis, in the notes to the financial statements, of disaggregated information about specific categories underlying certain income statement expense line items. This guidance is effective for annual periods beginning after December 15, 2026, and interim periods beginning after December 15, 2027. Early adoption is permitted and is effective on either a prospective basis or retrospective basis. The Company is currently evaluating the impact of adoption on our financial disclosures.67FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)(w)Certain ReclassificationsCertain reclassifications have been made in the 2023 and 2022 consolidated financial statements to conform to the classifications used in 2024 as described below.â€¢As a result of our ongoing portfolio assessments, the Company reclassified certain businesses from Capital Markets to Banking and to Corporate and Other during the quarter ended March 31, 2023, and reclassified certain non-strategic operations from Banking to Corporate and Other during the quarter ended December 31, 2023. The Company recast all prior-period segment information presented to reflect these reclassifications. See Note 22 for more information regarding our segments. â€¢December 31, 2023, was the final deadline for states to complete all benefit issuance under federally funded pandemic relief programs. Accordingly, revenue associated with services the Company provided related to these programs has been classified within the Banking segment as Other non-recurring commencing during the quarter ended December 31, 2023, and related prior-period amounts have been reclassified from Transaction processing and services to Other non-recurring for comparability. See Note 6 for further information.â€¢Revenue related primarily to software licenses requiring frequent, integral updates was classified as Transaction processing and services revenue during the quarter ended December 31, 2024, and related prior-period amounts have been reclassified from Other recurring revenue to Transaction processing and services for comparability. See Note 6 for further information.â€¢The consolidated statements of cash flows for the year ended December 31, 2024, are presented on a continuing operations basis, with summarized cash flows from discontinued operations for operating, investing and financing activities shown separately. The consolidated statements of cash flows for the year ended December 31, 2023 and 2022, have been reclassified to conform to the 2024 presentation.(3)Discontinued OperationsSale of Worldpay Merchant Solutions BusinessAs discussed in Note 1, the Company completed the Worldpay Sale on January 31, 2024. The results of the Worldpay Merchant Solutions business prior to the closing of the Worldpay Sale have been presented as discontinued operations. Certain assets and liabilities included as part of the Worldpay Sale have not yet been conveyed and continue to be reported as assets held for sale, and their related earnings (loss) are reported in Earnings (loss) from discontinued operations, net of tax, on the consolidated statements of earnings (loss). The following table presents a reconciliation of the major components of Earnings (loss) from discontinued operations, net of tax, presented in the consolidated statements of earnings (loss), reflecting activity for the year ended December 31, 2024, 2023 and 2022 (in millions). The Company's presentation of earnings (loss) from discontinued operations excludes general corporate overhead costs that were historically allocated to the Worldpay Merchant Solutions business. Additionally, beginning on July 5, 2023, the Company ceased amortization of long-lived assets held for sale in accordance with FASB ASC Topic 360, Property, Plant and Equipment.68FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Earnings (loss) from discontinued operations, net of tax, attributable to FIS	\$(663)	\$(7,157)	\$(17,328)	

During the year ended December 31, 2023, we recorded a \$1.9 billion loss on assets held for sale related to the Worldpay Merchant Solutions reporting unit to reduce its carrying value to its estimated fair value less estimated costs to sell, primarily as a result of the exclusion of certain deferred tax liabilities that were not expected to be transferred in the transaction. This amount was subsequently updated until the closing of the Worldpay Sale. As a result of the Worldpay Sale, during the year ended December 31, 2024, we recorded a loss on sale of disposal group of \$578A million, including the impact of post-closing adjustments recorded to date. We also recorded a cumulative tax benefit of \$1.1 billion in connection with the Worldpay Sale, primarily from the release of U.S. deferred tax liabilities that were not transferred in the Worldpay Sale, net of the estimated U.S. tax cost that the Company expects to incur as a result of the Worldpay Sale. Completion of remaining purchase agreement provisions in connection with the Worldpay Sale could result in further adjustments to the loss on sale amount and the estimated U.S. tax cost.Additionally, as part of the Worldpay Sale, the Company obtained the right to receive \$1.0A billion of consideration contingent on the returns realized by the Buyer exceeding certain thresholds ("Worldpay Sale contingent consideration"). The Company recognized this financial instrument as a derivative as discussed further in Note 15.The following table presents the major classes of assets and liabilities of the disposal group classified as held for sale presented in the consolidated balance sheets as of December 31, 2024, and December 31, 2023 (in millions). As of December 31, 2024, the table excludes the value of certain assets and liabilities held for sale related to the expected sale of a non-strategic business, unrelated to the Worldpay transaction, for which the results are not reported in discontinued operations. Assets held for sale are reported at the lower of their carrying value or fair value less cost to sell and are not depreciated or amortized.69FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Equity Method Investment	As discussed in Note 1, the Company completed the Worldpay Sale on January 31, 2024, retaining a non-controlling equity interest in Worldpay. We account for our 45% minority ownership in Worldpay using the equity method of accounting. This investment is reflected in Equity method investment on our December 31, 2024, consolidated balance sheet. During the eleven-month period from February 1, 2024, through December 31, 2024, the Company's share of the net income of Worldpay and our investor-level tax impact is reported as Equity method investment earnings (loss), net of tax, in the consolidated statement of earnings (loss). During the year ended December 31, 2024, we received distributions of \$47 million from Worldpay, which are recorded in Other investing activities, net on the consolidated statement of cash flows for the year ended December 31, 2024.70FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)Summary Worldpay financial information is as follows (in millions):	Eleven			

monthse-endedStatement of Earnings (Loss)December 31, 2024Revenue\$4,732Ã Gross profit\$2,422Ã Earnings (loss) before income taxes\$(342)Net earnings (loss) attributable to Worldpay\$(444)FIS share of net earnings (loss) attributable to Worldpay, net of tax (1)\$(145)(1)For the eleven months ended DecemberÃ 31, 2024, this amount is net of \$67 million of investor-level tax benefit, as well as intra-entity eliminations for timing differences between the Company and Worldpay's recognition of profits and losses on related-party transactions.Balance SheetDecember 31, 2024Current assets\$8,126Ã Noncurrent assets\$15,834Ã Current liabilities\$5,979Ã Noncurrent liabilities\$9,321Ã Noncontrolling interest\$1Ã Continuing Involvement with Discontinued Operations and Related-Party TransactionsIn connection with the closing of the Worldpay Sale, the Company entered into, and subsequently amended, an LLCa with respect to Worldpay, and a registration rights agreement with respect to the Company's retained equity interest in Worldpay. The LLCa provides that FIS has the right to appoint a minority of the board of managers of Worldpay and that FIS has customary consent and consultation rights with respect to certain material actions of Worldpay, in each case, subject to ownership stepdown thresholds. The LLCa contains, among other things, covenants and restrictions relating to other governance, liquidity and tax matters, including non-solicitation and noncompetition covenants, distribution mechanics, preemptive rights and follow-on equity funding commitments of the Buyer, and restrictions on transfer and associated tag-along and drag-along rights. Neither FIS nor the Buyer may transfer any of its interest in Worldpay prior to January 31, 2026, without the other's prior written consent. Each of FIS and the Buyer will have the right to require Worldpay to consummate an initial public offering ("IPO") or sale transaction after the fourth anniversary of the closing, subject to certain return hurdles and (in the case of an IPO) public float requirements, which requirements will fall away following the sixth anniversary of the closing.We have continuing involvement with Worldpay, primarily through our remaining interest, an employee leasing agreement ("ELA"), a transition services agreement ("TSA"), and various other commercial agreements. Under the terms of the ELA, which was substantially completed by July 1, 2024, the Company leased certain employees to Worldpay in the United States, China, Colombia and South Korea. The compensation and benefit costs paid by the Company for the leased employees was billed to and reimbursed by Worldpay. Under the terms of the TSA, the Company is procuring certain third-party services on behalf of Worldpay and providing technology infrastructure, risk and security, accounting and various other corporate services to Worldpay for a period of up to 24 months after the closing, subject to a six-month extension, and Worldpay is providing various corporate services to the Company, allowing it to maintain access to certain resources transferred in the Worldpay Sale. During the eleven months ended DecemberÃ 31, 2024, pass-through costs of \$247 million were incurred under the ELA, and third-party pass-through costs of \$159 million were incurred under the TSA, and were netted against the equal and offsetting reimbursement amounts due from Worldpay. Additionally, during the eleven months ended DecemberÃ 31, 2024, net TSA services income of \$142 million was recognized in Other operating (income) expense, net - related party, with approximately two-thirds of the corresponding expense recorded in Cost of revenue and the remainder recorded in Selling, general and administrative expense in the consolidated statement of earnings (loss). Revenue earned during the eleven months ended DecemberÃ 31, 2024, from various commercial services provided to Worldpay was \$140 million.For the eleven months ended DecemberÃ 31, 2024, we collected net cash of \$704 million related to the ELA, TSA and commercial agreements with Worldpay. As of DecemberÃ 31, 2024, we recorded a receivable of \$84 million in Receivable from FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)related party on the consolidated balance sheet in connection with the TSA and commercial agreements. Under the TSA and commercial agreements, amounts are generally invoiced monthly in arrears and are payable by electronic transfer within 30 days of invoice. As of DecemberÃ 31, 2024, we recorded a settlement payable of \$134 million in Current liabilities held for sale on the consolidated balance sheet for amounts to be settled to Worldpay. The settlement payable is generally paid within five business days. As of DecemberÃ 31, 2024, we also recorded other payables to Worldpay of \$25 million in Accounts payable, accrued and other liabilities on the consolidated balance sheet. These amounts are generally payable within 30 days.Prior to the Worldpay Sale, the Company issued standby letters of credit and made parental guarantees (collectively "Guarantees") in the ordinary course of its business to various counterparties on behalf of certain former subsidiaries included in the Worldpay Sale, including a guarantee of a liability that a Worldpay subsidiary owes to the former owners of Worldpay Group plc (the "CVR Liability"). FIS and Worldpay have agreed to maintain these Guarantees through January 31, 2026, affording Worldpay time to arrange for alternatives to the Guarantees. Worldpayâ€™s aggregate amount of borrowing capacity under the standby letters of credit guaranteed by FIS is \$273 million. As of DecemberÃ 31, 2024, there were no amounts outstanding under the standby letters of credit. As of DecemberÃ 31, 2024, Worldpayâ€™s CVR liability was \$378 million and is due on October 12, 2027. There is no limitation to the maximum potential future payments under the other remaining Guarantees, and such maximum potential amount of future payments cannot be estimated due to the conditional nature of the Company's obligations and the unique facts and circumstances involved in each agreement. As of DecemberÃ 31, 2024, there are no amounts drawn under any of the Guarantees. In the event a Worldpay subsidiary were to default on a performance obligation covered by the Guarantees, the Company could be required to make payment or be subject to claims; however, in any such case, Worldpay is required under the terms of the agreement governing the Worldpay Sale to fully reimburse and indemnify the Company. The Company considers the likelihood of incurring a loss under the Guarantees to be remote, and no amounts have been accrued with respect to these Guarantees.(5)Acquisitions2024 Business CombinationsDuring the year ended December 31, 2024, the Company completed acquisitions of three businesses for total cash consideration, net of cash acquired, of \$514 million. These acquisitions were recorded as business combinations. The results of operations and financial position of the acquisitions are included in the consolidated financial statements subsequent to the closing of each acquisition. We recorded an allocation of the purchase price to tangible and identifiable intangible assets acquired and liabilities assumed based on their fair values, consisting primarily of \$83 million of customer relationships and \$153 million of software assets. The Company also recorded \$351 million of goodwill for the residual amount by which the purchase price exceeded the fair value of the net assets acquired. The purchase price allocations are provisional as of December 31, 2024, and the Company expects to finalize them as soon as practicable, but no later than one year from each of the respective acquisition dates. There were no significant business combinations, individually or in the aggregate, completed during 2023 and 2022.Virtus AcquisitionOn January 2, 2020, FIS acquired a majority interest in Virtus Partners ("Virtus"), previously a privately held company that provides high-value managed services and technology to the credit and loan market. The acquisition was accounted for as a business combination. FIS acquired a 70% voting and financial interest in Virtus with 30% interest retained by the founders of Virtus ("Founders"). The agreement between FIS and the Founders provided FIS with a call option to purchase, and the Founders with a put option requiring FIS to purchase, all of the Founders' retained interest in Virtus at a redemption value determined pursuant to performance goals stated in the agreement, exercisable at any time after two years and three years, respectively, following the acquisition date. In January 2023, the Founders exercised their put option, and as a result, FIS paid the \$173 million redemption value, recorded as a financing activity in the consolidated statement of cash flows, and now owns 100% of Virtus.72FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)(6)RevenueAs a result of the Company's ongoing portfolio assessments, the Company reclassified certain businesses from Capital Markets to Banking and to Corporate and Other during the quarter ended March 31, 2023, and reclassified certain non-strategic operations from Banking to Corporate and Other during the quarter ended December 31, 2023. The Company recast all prior-period segment information presented to reflect these reclassifications.Disaggregation of RevenueÃ Ã Ã In the following tables, revenue is disaggregated by primary geographical market and type of revenue. Total Other noncurrent liabilities \$1,441.4 and \$1,446.4. (1) See Note 16, Operating Leases Equity Security Investments The Company holds various equity securities without readily determinable fair values. These securities primarily represent strategic investments made by the Company as well as investments obtained through acquisitions. Such investments totaled \$191 million and \$195 million at December 31, 2024 and 2023, respectively, and are included within Other noncurrent assets on the consolidated balance sheets. The Company accounts for these investments at cost, less impairment, and adjusts the carrying values for observable price changes from orderly transactions for identical or similar investments of the same issuer. These adjustments are generally considered Level 2-type fair value measurements. The Company records realized and unrealized gains and losses on these investments as well as impairment losses, as Other income (expense), net on the consolidated statements of earnings (loss) and recorded net (losses) gains of \$(5) million, \$(48) million and \$(31) million for the years ended December 31, 2024, 2023 and 2022, respectively, related to these investments. The net loss recorded for the 2023 period primarily relates to impairments. The net loss recorded during 2022 included a \$78.4 million impairment loss. (14) Debt Long-term debt as of December 31, 2024 and 2023, consisted of the following (in millions):

	December 31, 2024	Weighted Average Interest Rate	December 31, 2023	Weighted Average Interest Rate	1) Maturities	2024	2023	Fixed Rate Notes	Senior USD Notes	1.2% - 5.6%	3.7% 2025 - 2052	\$6,381.4	\$8,659.4	Senior Euro Notes	0.6% - 3.0%	2.7% 2025 - 2039	1,544.4	4,968.4	Senior GBP Notes	2.3% - 3.4%	9.6% 2029 - 2031	214.4	1,178.4	Revolving Credit Facility	(2)	5.6% 2029	151.4	127.4	Financing arrangements for certain hardware and software	66.4	96.4	Other	(3)	(312)	(710)	Total long-term debt, including current portion	10,654.4	14,318.4

2022	\$6,381.4	\$8,659.4	\$6,381.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	\$8,659.4	

Current portion of long-term debt (968) (1,348) Long-term debt, excluding current portion \$9,686.4 and \$12,970.4. (1) The weighted average interest rate includes the impact of the fair value basis adjustments due to interest rate swaps and the impact of cross-currency interest rate swaps designated as fair value hedges and excludes the impact of cross-currency interest rate swaps designated as net investment hedges (see Note 15). The impact of the included fair value basis adjustments and cross-currency interest rate swaps in certain cases results in an effective weighted average interest rate being outside the stated interest rate range on the fixed rate notes. (2) Interest on the Revolving Credit Facility is generally payable at Secured Overnight Financing Rate ("SOFR") plus a spread of 0.100% plus an applicable margin of up to 1.625% and an unused commitment fee of up to 0.200%, each based upon the Company's corporate credit ratings. The weighted average interest rate on the Revolving Credit Facility excludes fees. 78 FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued) (3) Other includes the amount of fair value basis adjustments due to interest rate swaps (see further discussion below and in Note 15), unamortized debt issuance costs and unamortized non-cash bond discounts. Short-term borrowings as of December 31, 2024 and 2023, consisted of the following (in millions):

	December 31, 2024	Weighted Average Interest Rate	December 31, 2023	Weighted Average Interest Rate	1) Maturities	2024	2023	Fixed Rate Notes	Senior USD Notes	1.2% - 5.6%	3.7% 2025 - 2052	\$6,381.4	\$8,659.4	Senior Euro Notes	0.6% - 3.0%	2.7% 2025 - 2039	1,544.4	4,968.4	Senior GBP Notes	2.3% - 3.4%	9.6% 2029 - 2031	214.4	1,178.4	Revolving Credit Facility	(2)	5.6% 2029	151.4	127.4	Financing arrangements for certain hardware and software	66.4	96.4	Other	(3)	(312)	(710)	Total long-term debt, including current portion	10,654.4	14,318.4

Thereafter \$4,878.4 Total principal payments \$10,966.4 Other debt per the long-term debt table \$10,966.4. (312) Total long-term debt, including current portion \$10,654.4. There are no mandatory principal payments on the Revolving Credit Facility and any balance outstanding on the Revolving Credit Facility will be due and payable at the Revolving Credit Facility's scheduled maturity date, which occurs on September 27, 2029. 79 FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued) Senior Notes FIS may redeem the Senior USD Notes, Senior Euro Notes and Senior GBP Notes (collectively, the "Senior Notes") at its option in whole or in part, at any time and from time to time, at a redemption price equal to the greater of 100% of the principal amount to be redeemed and a make-whole amount calculated as described in the related indenture in each case plus accrued and unpaid interest to, but excluding, the date of redemption, provided no make-whole amount will be paid for redemptions of the Senior Notes during the period described in the related indenture (ranging from one to six months) prior to their maturity. On July 15, 2024, FIS repaid an aggregate principal amount of approximately \$500.4 million in 1.100% Senior Euro Notes on their due date, pursuant to the related indenture. On March 7 and 8, 2024, pursuant to cash tender offers, FIS purchased and redeemed an aggregate principal amount of \$1.5 billion in Senior USD Notes and an aggregate principal amount of \$1.0 billion in Senior GBP Notes, with interest rates ranging from 2.25% to 5.625% and maturities ranging from 2025 to 2052, resulting in a loss on extinguishment of debt of approximately \$17.4 million, recorded in Other income (expense), net on the consolidated statement of earnings (loss), relating to tender discounts and fees; the write-off of unamortized bond discounts, debt issuance costs and fair value basis adjustments; and gains on related derivative instruments. The Company funded the purchase and redemption of the Senior Notes using a portion of the net proceeds from the Worldpay Sale. On March 1, 2024, FIS repaid an aggregate principal amount of \$750.4 million in Senior USD Notes, on their due date,

pursuant to the related indenture. On May 21, 2023, FIS repaid an aggregate principal amount of \$1.3 billion in Senior Euro Notes, on their due date, pursuant to the related indenture. On March 1, 2023, FIS repaid an aggregate principal amount of \$750 million in Senior USD Notes, on their due date, pursuant to the related indenture. On December 3, 2022, FIS repaid an aggregate principal amount of \$1.0 billion in Senior Euro Notes, on their due date, pursuant to the related indenture. On July 13, 2022, FIS completed the issuance and sale of Senior USD Notes with an aggregate principal amount of \$2.5 billion with interest rates ranging from 4.5% to 5.6% and maturities ranging from 2025 to 2052. The proceeds from the debt issuance were used for the repayment of debt under our commercial paper programs in the third quarter of 2022. The Senior Notes are subject to customary covenants, including, among others, customary events of default. Commercial Paper The Company has a Euro commercial paper ("ECP") and a U.S. commercial paper ("USCP") program for the issuance and sale of senior, unsecured commercial paper notes, up to a combined maximum aggregate amount outstanding at any time of \$4.5 billion. Borrowings are limited to the availability of funds under the Revolving Credit Facility, which backstops the commercial paper programs. The ECP and USCP programs are generally used for general corporate purposes. During the first quarter of 2024, the Company repaid its ECP Notes and USCP Notes using a portion of the net proceeds from the Worldpay Sale before resuming borrowings during the third quarter of 2024. Revolving Credit Facility On September 27, 2024, FIS entered into an amendment and restatement agreement to the Revolving Credit Facility to amend certain covenant provisions, revise lender commitments for certain counterparties, and extend the scheduled maturity date to September 27, 2029. As of December 31, 2024, the borrowing capacity under the Revolving Credit Facility was approximately \$3,713 million (net of \$636 million of capacity backstopping our commercial paper notes and \$151 million of Revolving Credit Facility outstanding balance). The Revolving Credit Facility is subject to customary covenants restricting, among other things, the incurrence of indebtedness, certain restricted payments and use of proceeds as well as requiring us to maintain certain financial ratios. We monitor the financial stability of our counterparties on an ongoing basis. The lender commitments under the undrawn portion of the Revolving Credit Facility are comprised of a diversified set of financial institutions, both domestic and international. The failure of any single lender to perform its obligations under the Revolving Credit Facility would not adversely impact our ability to fund our operations.

FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Fair Value of Debt The fair value of the Company's long-term debt is estimated to be approximately \$806 million and \$1,086 million lower than the carrying value, excluding the fair value basis adjustments due to interest rate swaps and unamortized discounts, as of December 31, 2024 and 2023, respectively.

(15) Financial Instruments Fair Value Hedges The Company held fixed-to-variable interest rate swaps with aggregate notional amounts of \$1,854 million, \$925 million and \$0 million at December 31, 2024 and \$1,854 million, \$925 million and \$0 million at December 31, 2023. Prior to the quarter ended September 30, 2023, these swaps were designated as fair value hedges for accounting purposes, converting the interest rate exposure on certain of the Company's Senior USD Notes, Senior GBP Notes and Senior Euro Notes, as applicable, from fixed to variable. While designated as fair value hedges, changes in fair value of these interest rate swaps were recorded as an adjustment to long-term debt. During the quarter ended September 30, 2023, the Company de-designated these swaps as fair value hedges. As a result of the de-designations, the final fair value basis adjustments recorded through the dates of de-designation as a decrease of the long-term debt are subsequently amortized as interest expense using the effective interest method over the remaining periods to maturity of the respective long-term debt. We amortized \$50 million and \$41 million of these balances as Interest expense during the years ended December 31, 2024 and 2023, respectively (see Note 14). During the quarter ended March 31, 2024, \$316 million of unamortized fair value basis adjustments recorded as a decrease of the long-term debt tendered was written-off and recorded as part of the loss on extinguishment of debt (see Note 13). The remaining unamortized fair value basis adjustments recorded as a decrease of the long-term debt totaled \$228 million and \$594 million at December 31, 2024 and 2023, respectively. Concurrently with the de-designations described above, the Company entered into new offsetting variable-to-fixed interest rate swaps with aggregate notional amounts of \$1,854 million, \$925 million and \$0 million. At December 31, 2024, the aggregate notional amounts remaining are \$1,854 million, \$925 million and \$0 million. The Company accounts for the de-designated fixed-to-variable and offsetting variable-to-fixed interest rate swaps as economic hedges; as such, effective as of the de-designation dates, changes in interest rates associated with the variable leg of the interest rate swaps do not affect the interest expense recognized, eliminating variable-rate risk on the fixed-to-variable interest rate swaps. The terms of the new interest rate swaps when matched against the terms of the existing fixed-to-variable interest rate swaps result in a net fixed coupon spread payable by the Company. The impact of the go-forward changes in fair values of the new and existing interest rate swaps, including the impact of the coupons, is recorded as Other income (expense), net pursuant to accounting for economic hedges and totaled \$(22) million and \$(52) million, for the years ended December 31, 2024 and 2023, respectively. The coupon payments are recorded within Cash flows from investing activities from continuing operations on the consolidated statements of cash flows and totaled \$122 million and \$28 million in cash outflows for the years ended December 31, 2024 and 2023, respectively. The new and existing interest rate swap fair values totaled assets of \$33 million and \$12 million and liabilities of \$(595) million and \$(675) million at December 31, 2024 and 2023, respectively. During the quarter ended September 30, 2023, the Company entered into an aggregate notional amount of \$3,375 million fixed-for-fixed cross-currency interest rate swaps to hedge its exposure to foreign currency risk associated with its Senior Euro Notes. During the quarter ended June 30, 2023, the Company entered into an aggregate notional amount of \$925 million fixed-for-fixed cross-currency interest rate swaps to hedge its exposure to foreign currency risk associated with its Senior GBP Notes. These swaps are designated as fair value hedges for accounting purposes. During March 2024, the Company partially terminated certain fixed-for-fixed cross-currency interest rate swaps that were hedging foreign currency risk associated with its Senior GBP Notes that were partially tendered (see Note 14). After such partial termination, there remained an aggregate notional amount of approximately \$170 million in fixed-for-fixed cross-currency interest rate swaps that hedge the Company's exposure to foreign currency risk associated with its Senior GBP Notes. The fair value of these swaps totaled assets of \$4 million and \$134 million and liabilities of \$(84) million and \$0 million at December 31, 2024 and 2023, respectively. Changes in the swap fair values attributable to changes in spot foreign currency exchange rates are recorded in Other income (expense), net and totaled \$(226) million and \$61 million for the years ended December 31, 2024 and 2023, respectively. This amount offset the impact of changes in spot foreign currency exchange rates on the Senior GBP Notes and Senior Euro Notes also recorded to Other income (expense), net during the hedge period. Changes in swap fair values attributable to excluded components, such as changes in fair value due to forward foreign currency exchange rates and cross-currency basis spreads, are recorded in Accumulated other comprehensive earnings (loss) ("AOCL"). The Company recorded \$32 million and \$74 million

FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

for the years ended December 31, 2024 and 2023, respectively, through Other comprehensive earnings (loss) for the changes in swap fair values attributable to excluded components. The amounts recorded in AOCL generally affect net earnings (loss) through Interest expense using the amortization approach. For the years ended December 31, 2024 and 2023, \$46 million and \$20 million, respectively, was recognized as Interest expense using the amortization approach. As a result of the partial terminations during March 2024, the Company received \$33 million in net proceeds recorded within Other financing activities, net on the consolidated statement of cash flows and recorded a \$19 million reduction to the loss on extinguishment of debt due to reclassifying the amount of AOCL related to the partially terminated hedges into earnings (see Note 14).

Net Investment Hedges The purpose of the Company's net investment hedges, as discussed below, is to reduce the volatility of FIS' net investment value in its Euro- and Pound Sterling-denominated operations due to changes in foreign currency exchange rates. Changes in fair value due to remeasurement of the effective portion are recorded as a component of AOCL for net investment hedges. The amounts included in AOCL for the net investment hedges will remain in AOCL until the complete or substantially complete liquidation of our investment in the underlying foreign operations. Any ineffective portion of these hedging instruments impacts net earnings when the ineffectiveness occurs. The Company assesses effectiveness of cross-currency interest rate swap hedging instruments using the spot method. Under this method, the periodic interest settlements are recorded directly in earnings through Interest expense (see Note 14). The Company recorded net investment hedge aggregate gain (loss) for the change in fair value and related income tax (expense) benefit within Other comprehensive earnings (loss), net of tax, on the consolidated statements of comprehensive earnings (loss) for its designated net investment hedges as follows (in millions). No ineffectiveness has been recorded on the net investment hedges.

Years ended December 31, 2024 2023 2022

Foreign currency-denominated debt designations \$43 \$138 \$534

Cross-currency interest rate swap designations 219 \$363 500

Total \$262 \$501 \$1,034

Foreign Currency-Denominated Debt Designations The Company has designated certain foreign currency-denominated debt as net investment hedges of its investment in Euro-denominated operations. An aggregate of \$250 million and \$1,115 million of Senior Euro Notes with maturities ranging from 2024 to 2025 was designated as a net investment hedge of the Company's investment in Euro-denominated operations as of December 31, 2024, and 2023, respectively. An aggregate of \$100 million and \$419 million of ECP Notes was also designated as a net investment hedge of the Company's investment in Euro-denominated operations as of December 31, 2024 and 2023, respectively. The Company held \$375 million and \$1,500 million aggregate notional amount of foreign currency forward contracts as of December 31, 2024 and 2023, respectively, to economically hedge its exposure to foreign currency risk associated with Senior Euro Notes and ECP Notes that were previously de-designated as net investment hedges. The foreign currency forward contract fair values totaled a net liability of \$(11) million and a net asset of \$41 million at December 31, 2024 and 2023, respectively. Upon maturity of the forward contracts, the Company records the net proceeds paid or received within Other financing activities, net on the consolidated statement of cash flows. During the year ended December 31, 2024, the Company received \$19 million in net proceeds. The change in fair value of the foreign currency forward contracts is recorded as Other income (expense), net pursuant to accounting for economic hedges and offsets the impact of the change in spot foreign currency exchange rates on the de-designated Senior Euro Notes and ECP Notes, which is also recorded as Other income (expense), net.

FIDELITY NATIONAL INFORMATION SERVICES, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Cross-Currency Interest Rate Swap Designations The Company holds cross-currency interest rate swaps designated as net investment hedges of its investment in Euro- and Pound Sterling-denominated operations. As a result of the Worldpay Sale, the Company terminated its outstanding cross-currency interest rate swaps designated as net investment hedges of its investment in Pound Sterling-denominated operations on January 31, 2024. As of December 31, 2024 and 2023, aggregate notional amounts of \$5,045 million and \$6,143 million, respectively, were designated as net investment hedges of the Company's investment in Euro-denominated operations, and aggregate notional amounts of \$0 million and \$2,180 million, respectively, were designated as net investment hedges of the Company's Pound Sterling-denominated operations. The cross-currency interest rate swap fair values totaled assets of \$128 million and \$38 million and liabilities of \$(12) million and \$(240) million at December 31, 2024 and 2023, respectively. During the years ended December 31, 2024 and 2023, the Company (paid) received net proceeds of approximately \$(8) million and \$(20) million, respectively, for the fair values of the cross-currency interest rate swaps as of the settlement dates. The proceeds were recorded within investing activities on the consolidated statements of cash flows.

Worldpay Sale Contingent Consideration As part of the Worldpay Sale, the Company obtained the right to receive \$1.0 billion of consideration contingent on the returns realized by the Buyer exceeding certain thresholds. The Company recognized this financial instrument as a derivative at fair value when it recorded the Worldpay Sale transaction. Subsequent changes in fair value are recorded through Other income (expense), net in the consolidated statement of earnings (loss). The fair value of the contingent consideration from the Worldpay Sale is \$108 million at December 31, 2024, included in Other noncurrent assets on the consolidated balance sheet. The Company recognized a \$37 million gain for the change in fair value for the eleven-month period from February 1, 2024, through December 31, 2024.

(16) Operating Leases The classification of the Company's operating lease ROU assets and liabilities in the consolidated balance sheets as of December 31, 2024 and 2023, is

as follows (in millions):December 31,Classification20242023Operating lease ROU assetsOther noncurrent assets\$230\$214\$ Operating lease liabilitiesAccounts payable, accrued and other liabilities\$74\$85\$ Other noncurrent liabilities17\$178\$ Total operating lease liabilities\$251\$263\$ Operating lease cost was \$73 million, \$90 million and \$157 million, and variable lease cost was \$27 million, \$27 million and \$29 million for the years ended December 31, 2024, 2023 and 2022, respectively. Operating lease cost for the year ended December 31, 2022, included \$43\$ million, in ROU asset impairment charges. There were no significant ROU asset impairment losses recognized during the years ended December 31, 2024 and 2023. Cash paid for amounts included in the measurement of operating lease liabilities included in operating cash flows was \$101 million, \$106 million and \$124 million for the years ended December 31, 2024, 2023 and 2022, respectively. Operating lease ROU assets obtained in exchange for operating lease liabilities was \$89 million and \$47 million for the years ended December 31, 2024 and 2023, respectively. The weighted average remaining operating lease term was 5.9 years and 4.4 years and the weighted average operating lease discount rate was 3.9% and 2.8% as of December 31, 2024 and 2023, respectively.83FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)Maturities of operating lease liabilities, as of December 31, 2024, are as follows (in millions):2025\$77\$202662\$202742\$202830\$202921\$ Thereafter62\$ Total lease payments294\$ Less: Imputed interest(43)\$ Total operating lease liabilities\$251\$ (17)\$ Income Taxes Income tax expense (benefit) attributable to continuing operations for the years ended December 31, 2024, 2023 and 2022, consists of the following (in millions): 202420232022Current provision (benefit): 202420232022Federal\$357\$235\$458\$ State103\$96\$130\$ Foreign109\$96\$84\$ Total current provision\$569\$427\$672\$ Deferred provision (benefit): 202420232022Federal\$(183)\$(193)\$(319)\$ State(41)\$(73)\$(54)\$ Foreign17\$ (4)\$15\$ Total deferred provision(207)\$(270)\$(358)\$ Total provision for income taxes\$362\$157\$314\$ The provision for income taxes is based on pre-tax income from continuing operations, which is as follows for the years ended December 31, 2024, 2023 and 2022 (in millions): 202420232022United States\$920\$330\$718\$ Foreign377\$332\$180\$ Total\$1,297\$662\$898\$ Total income tax expense (benefit) attributable to continuing and discontinued operations for the years ended December 31, 2024, 2023 and 2022, is allocated as follows (in millions): 202420232022Tax expense (benefit) per statements of earnings (loss)\$362\$157\$314\$ Tax expense (benefit) on income from discontinued operations(1,062)\$(301)52\$ Change in fair value of net investment hedges91\$ (176)361\$ Foreign currency translation adjustments\$ 40\$ (360)\$ Share of equity method investment(11)\$ 6\$ 6\$ Other components of other comprehensive earnings (loss)8\$ 20\$ 3\$ Total income tax expense (benefit) allocated to other comprehensive earnings88\$ (116)4\$ Total income tax expense (benefit)\$(612)\$(260)\$370\$ 84FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)A reconciliation of the federal statutory income tax rate to the Company's effective income tax rate for the years ended December 31, 2024, 2023 and 2022, is as follows: 202420232022Federal statutory income tax rate21.0% 21.0% 21.0% State income taxes4.7% 5.7% 6.5% Federal benefit of state taxes(1.0)(1.0)(1.3) Foreign rate differential1.1% 0.8% 2.9% Withholding on actual and estimated remittances2.4% 2.4% 1.2% Tax loss (benefit) from stock-based compensation0.7% 2.3% 4.0% U.K. tax rate adjustment\$ (0.1)0.3\$ Non-deductible executive compensation0.6% 0.6% 0.3% Foreign-derived intangible income deduction(2.3)(4.4)(2.4) U.S. tax on foreign earnings1.4% 1.0% 0.4% Research and development credit(1.1)(1.8)\$ 6\$ Unrecognized tax benefits(0.3)(0.4)(0.4) Return to provision\$ (1.7)\$ 6\$ Other0.7\$ (0.6)2.5\$ Effective income tax rate27.9% 23.8% 35.0% The significant components of deferred income tax assets and liabilities as of December 31, 2024 and 2023, consist of the following (in millions): 20242023Deferred income tax assets: 20242023Net operating loss carryforwards\$364\$219\$ Capital loss carryforwards220\$ 6\$ Employee benefit accruals115\$ 105\$ Outside basis difference\$ 6\$ 91\$ Other deferred tax assets170\$ 95\$ Total gross deferred income tax assets869\$ 1,338\$ Less valuation allowance(505)(1,055) Total deferred income tax assets364\$ 283\$ Deferred income tax liabilities: 20242023Equity method investments(15)\$ 6\$ Amortization of goodwill and intangible assets(707)(2,066) Deferred contract costs(259)(245) Other deferred tax liabilities(232)(121) Total deferred income tax liabilities(1,213)(2,432) Net deferred income tax liability\$(849)\$(2,149) Deferred income taxes are classified in the consolidated balance sheets as of December 31, 2024 and 2023, as follows (in millions): 20242023Noncurrent deferred income tax assets (included in Other noncurrent assets)\$14\$30\$ Noncurrent deferred income tax liabilities(863)(2,179) Net deferred income tax liability\$(849)\$(2,149)85FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)We believe that based on our historical pattern of taxable income, projections of future income, tax planning strategies as necessary and other relevant evidence, the Company will produce sufficient income in the future to realize its deferred income tax assets (net of valuation allowance). A valuation allowance is established for any portion of a deferred income tax asset for which we believe it is more likely than not that the Company will not be able to realize the benefits of all or a portion of that deferred income tax asset. We also receive periodic assessments from taxing authorities challenging our positions; these assessments must be taken into consideration in determining our tax accruals. Resolving these assessments, which may or may not result in additional taxes due, may require an extended period of time. Adjustments to the valuation allowance will be made if there is a change in our assessment of the amount of deferred income tax asset that is realizable.As of December 31, 2024 and 2023, the Company had net income taxes payable of \$236 million and \$3 million, respectively. As of December 31, 2024, \$279\$ million of income tax payable was included in Accounts payable, accrued and other liabilities and \$43\$ million of income tax receivable was included in Other receivables in the consolidated balance sheet. As of December 31, 2023, \$3\$ million of income tax payable was included in Accounts payable, accrued and other liabilities.As of December 31, 2024 and 2023, the Company has federal, state and foreign net operating loss carryforwards resulting in deferred tax assets of \$364 million and \$219 million, respectively. The federal and state net operating losses result in deferred tax assets as of December 31, 2024 and 2023, of \$70 million and \$72 million, respectively, which expire between 2025 and 2043. The Company has a valuation allowance related to these deferred tax assets for net operating loss carryforwards in the amounts of \$47 million and \$46 million as of December 31, 2024 and 2023. The Company has foreign net operating loss carryforwards resulting in deferred tax assets as of December 31, 2024 and 2023, of \$294 million and \$147 million, respectively. The increase in foreign net operating loss carryforwards is driven by an underlying change of facts arising during 2024 with respect to amounts previously restricted under local law. The Company maintains a valuation allowance against substantially all of the foreign net operating loss amounts as of December 31, 2024 and 2023. As a result of the Worldpay Merchant Solutions disposal group being classified as held for sale as of December 31, 2023, the Company recognized a deferred tax asset of \$919 million related to the excess tax-over-book outside basis difference for Worldpay Merchant Solutions' investment in foreign subsidiaries, offset by a valuation allowance of \$829 million for the portion of the outside basis difference for which it was not more likely than not to recognize a tax benefit. The net deferred tax asset of \$90 million at December 31, 2023, represented the portion of then-future capital loss for which we had an available capital gain against which the loss could be utilized. As of December 31, 2024, as a result of the Worldpay Sale, the Company recorded a deferred tax asset of \$220\$ million related to the U.S. capital loss recognized as part of the transaction, offset by a valuation allowance of \$130\$ million. Consistent with the amount recognized as of December 31, 2023, the net deferred tax asset of \$90 million represents the portion of the capital loss for which we have an available capital gain against which the loss can be utilized. Additionally, as a result of the Worldpay Sale, the Company recognized a \$15 million deferred tax liability for the difference between the tax basis of the Worldpay equity method investment and the corresponding financial statement carrying value. The measurement and character of this deferred tax liability is consistent with our current intention to hold the investment. We will continue to assess our intention at each future reporting period. If the manner or expected time of recovery of our investment in Worldpay changes, the amount or character of deferred taxes associated with our investment could change and result in an incremental deferred tax liability, which could be material.The Company participates in the IRS' Compliance Assurance Process ("CAP"), which is a real-time continuous audit. The IRS has completed its review for years through 2021. Currently, we believe the ultimate resolution of the IRS examinations will not result in a material adverse effect to the Company's financial position or results of operations. Tax years that remain subject to examination by major foreign and state tax jurisdictions are 2017 and forward. As of December 31, 2024 and 2023, the Company had gross unrecognized tax benefits of \$49 million and \$41 million of which \$41 million and \$38 million, respectively, would favorably impact our income tax rate in the event that the unrecognized tax benefits are recognized.86FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)The following table reconciles the gross amounts of unrecognized tax benefits at the beginning and end of the period (in millions): 20242023Gross AmountAmounts of unrecognized tax benefits as of December 31, 2022\$48\$ Amount of decreases due to lapse of the applicable statute of limitations(5)\$ Amount of decreases due to settlements(8)\$ Increases as a result of tax positions taken in the prior period4\$ Increases as a result of tax positions taken in the current period2\$ Amount of unrecognized tax benefit as of December 31, 202341\$ Amount of decreases due to lapse of the applicable statute of limitations(6)\$ Amount of decreases due to settlements4\$ Increases as a result of tax positions taken in prior period4\$ Increases as a result of tax positions taken in the current period6\$ Amount of unrecognized tax benefit as of December 31, 2024\$49\$ The total amount of interest expense recognized in the consolidated statements of earnings (loss) for unpaid taxes is \$3 million, \$2 million and \$3 million for the years ended December 31, 2024, 2023 and 2022, respectively. The total amount of interest and penalties included in the consolidated balance sheets is \$10 million and \$11 million as of December 31, 2024 and 2023, respectively. Interest and penalties are recorded as a component of income tax expense in the consolidated statements of earnings (loss).(18)Commitments and ContingenciesSecurities and Shareholder MattersOn March 6, 2023, a putative class action was filed in the United States District Court for the Middle District of Florida by a shareholder of the Company. The action was consolidated with another action and the consolidated case is now captioned In re Fidelity National Information Services, Inc. Securities Litigation. A lead plaintiff has been appointed, and a consolidated amended complaint was filed on August 2, 2023. The consolidated amended complaint names the Company and certain of its current and former officers as defendants and seeks damages for alleged violations of federal securities laws in connection with our disclosures relating to our former Merchant Solutions segment, including with respect to its valuation, integration, and synergies. On September 30, 2024, the court denied the defendants' motion to dismiss, and the case therefore has moved into the discovery phase. We intend to vigorously defend this case, but no assurance can be given as to the ultimate outcome.On April 27, 2023, a shareholder derivative action captioned Portia McCollum, derivatively on behalf of Fidelity National Information Services, Inc. v. Gary Norcross et al., was filed in the same court by a stockholder of the Company. Subsequently, that stockholder dismissed the suit without prejudice and sent a demand pursuant to Georgia Code 9-2-742 (the "McCollum Demand"). Another stockholder, City of Hialeah Employees' Retirement System, sent a similar demand (the "Hialeah Demand"), and two other stockholders, City of Southfield Fire and Police Retirement System and Young Family Living Trust, also subsequently sent similar demands (the "Southfield Demand" and the "Young Demand"). The demands claim that FIS officers and directors violated federal securities laws and breached fiduciary duties, including with respect to the valuation, integration, and synergies of our former Merchant Solutions segment, and they demand that the Board investigate and commence legal proceedings against officers and directors in connection with the purported wrongdoing. On August 25, 2023, the Board established a Demand Review Committee to consider the McCollum and Hialeah Demands and any related demands that are received (such as the Southfield Demand and the Young Demand), and make recommendations to the Board with respect to the demands. The Demand Review Committee has hired independent counsel. The Board has made no final decision with respect to the demands and has not rejected the demands.On October 18, 2023, a shareholder derivative action captioned City of Hialeah Employees' Retirement System v. Stephanie L. Ferris et al. (the "Hialeah Action") was filed in the same court by the stockholder that previously had sent the Hialeah Demand. The complaint in the Hialeah Action, which names certain of the Company's current and former officers and directors as defendants (the "Individual Defendants"), seeks to assert claims on behalf of the Company for violations of federal securities laws, breach of fiduciary duty, unjust enrichment, and contribution and indemnification, including with respect to the valuation, integration, and synergies of our

Merchant Solutions segment. On March 29, 2024, the Company and the Individual 87FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)Defendants filed a motion to stay or dismiss the action without prejudice pending the completion of the Board's consideration of the demands and the Individual Defendants concurrently filed a separate motion to dismiss.On October 22, 2024, another shareholder derivative action was filed in the same court by the stockholder who previously sent the McCollum Demand, captioned Portia McCollum, derivatively on behalf of Fidelity National Information Services, Inc. v. Gary Norcross et al. (the "McCollum Action"). The complaint in the McCollum Action, which names certain of the Company's current and former officers and directors as defendants, seeks to assert claims on behalf of the Company for violations of federal securities laws, breach of fiduciary duty, aiding and abetting breach of fiduciary duty, waste, and unjust enrichment, including with respect to the valuation, integration, and synergies of our former Merchant Solutions segment. On November 7, 2024, the court entered an order staying the McCollum Action.January 15, 2025, Partial System OutageOn January 15, 2025, a local area power disruption and coincident hardware failure resulted in a partial system outage that temporarily disrupted the operations of certain FIS clients. The outage was not the result of any cyber attack or other malicious conduct. FIS has restored impacted applications. In connection with this disruption, we have received a customer notice of its intent to seek indemnification relating to potential costs allegedly incurred as a result of this disruption, and a lawsuit was filed in state court in North Carolina by a purported class of customers of one of the affected banks. Although the Company is unable to estimate the impact of the incident, it does not believe that it will have a material impact on the Company or its financial condition or its results of operations.Indemnifications and WarrantiesThe Company generally indemnifies its clients, subject to certain limitations and exceptions, against damages and costs resulting from claims of patent, copyright, or trademark infringement associated solely with its customers' use of the Company's solutions. Historically, the Company has not made any material payments under such indemnifications but continues to monitor the conditions that are subject to the indemnifications to identify whether it is probable that a loss has occurred, in which case it would recognize any such losses when they are estimable. In addition, the Company warrants to customers that its software operates substantially in accordance with the software specifications. Historically, no material costs have been incurred related to software warranties, and no accruals for warranty costs have been made.Purchase CommitmentsThe Company has agreements with various vendors, generally with one- to five-year terms, principally for software, maintenance, and consulting and outsourced services, including cloud hosting and data centers. The Company's estimated aggregate contractual obligation remaining under these agreements is approximately \$696 million as of December 31, 2024. However, this amount could be more or less depending on various factors such as the inflation rate, foreign exchange rates, the introduction of significant new technologies, or changes in the Company's processing needs. The foregoing amounts do not include obligations of the Company under operating leases.(19)Employee Benefit Plans Stock Purchase PlanFIS employees participate in an Employee Stock Purchase Plan ("ESPP"). Eligible employees may voluntarily purchase, at current market prices, shares of FIS' common stock through payroll deductions. Pursuant to the ESPP, employees may contribute an amount between 3% and 15% of their base salary and certain commissions. Shares purchased are allocated to employees based upon their contributions. The Company contributes a matching amount as specified in the ESPP of 20% of the employee's contribution. The Company recorded expense in continuing operations of \$10 million, \$11 million, and \$17 million, respectively, for the years ended December 31, 2024, 2023 and 2022, relating to the participation of FIS employees in the ESPP. The Company recorded expense in discontinued operations of less than \$1 million, \$1 million and \$2 million, respectively, for the years ended December 31, 2024, 2023 and 2022, relating to the participation of Worldpay-related employees in the ESPP.88FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)401(k) Profit Sharing Plan and Non-U.S. Defined Contribution PlansThe Company's U.S. employees are covered by a qualified 401(k) plan. Eligible employees may contribute up to 40% of their eligible compensation, up to the annual amount allowed pursuant to the Internal Revenue Code. The Company generally matches 50% of each dollar of employee contribution up to 6% of the employee's total eligible compensation. The Company's non-U.S. employees are also covered by various defined contribution plans. The Company recorded expense in continuing operations of \$107 million, \$106 million and \$109 million, respectively, for the years ended December 31, 2024, 2023 and 2022, relating to the participation of FIS employees in the 401(k) plan and the Company's contributions to non-U.S. defined contribution plans. Stock Compensation PlansThe Company grants to certain employees equity awards pursuant to shares authorized under the FIS 2022 Omnibus Incentive Plan established in 2022 ("FIS Plan"). The number of shares available for future grants under the FIS Plan is 24 million as of December 31, 2024. Stock OptionsThe Company grants stock options which typically vest annually over three years. All stock options are non-qualified stock options, the stock options granted by the Company expire on the seventh anniversary of the grant date, and the stock options converted through the Company's 2019 acquisition of Worldpay expire on the tenth anniversary of the grant date.The following table summarizes stock option activity for the year ended December 31, 2024, which includes both continuing and discontinued operations (in millions except for per share amounts):

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value	Balance, December 31,
2023	38.1	\$100.19	3.3	\$6.2	\$103.85
2024	19.3	\$100.19	3.3	\$6.2	\$103.85
Granted	2.3	\$110.51	2.3	\$1.8	\$2.9
Exercised	(1.8)	\$65.23	1.1	\$118.42	\$186.42
Cancelled	(1.8)	\$100.19	3.3	\$1.8	\$103.85
Balance, December 31, 2024	19.3	\$100.19	3.3	\$6.2	\$103.85

The intrinsic value of the outstanding options and options exercisable is based on a closing stock price as of December 31, 2024, of \$80.77. The Company issues authorized but unissued shares or shares from treasury stock to settle stock options exercised.The number of options granted for the years ended December 31, 2023 and 2022, was 2 million and 1 million, respectively. The weighted average exercise price was \$78.42 and \$95.06 for the years ended December 31, 2023 and 2022, respectively. The Company did not grant any stock options during the year ended December 31, 2024.89FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)The weighted average fair value of options granted during the years ended December 31, 2023 and 2022, was \$12.91 and \$20.89, respectively, using the Black-Scholes option pricing model with the assumptions below:

	2023	2022
Risk free interest rate	4.2%	1.7%
Volatility	37.6%	30.5%
Dividend yield	3.3%	2.0%
Weighted average expected life (years)	4.1	1.1

The Company estimates future forfeitures at the time of grant and revises those estimates in subsequent periods if actual forfeitures differ significantly from those estimates. The Company bases the risk-free interest rate that is used in the Black-Scholes model on U.S. Treasury securities issued with maturities similar to the expected term of the options. The expected stock volatility factor is determined using historical daily price of the common stock and the impact of any expected trends. The dividend yield assumption is based on the current dividend yield at the grant date or management's forecasted expectations. The expected life assumption is determined by calculating the average term from the Company's historical stock option activity and considering the impact of future trends.Restricted Stock Units and Performance Stock UnitsThe Company issues restricted stock units, which typically vest annually over three years. The grant date fair value of the restricted stock units is based on the fair market value of our common stock on the grant date. The number of restricted stock units granted during the years ended December 31, 2024, 2023 and 2022, was 3 million, 3 million and 1 million, respectively. The weighted average grant date fair value of these awards granted during the years ended December 31, 2024, 2023 and 2022, was \$70.65, \$61.34 and \$92.07, respectively. The total fair value of restricted stock units that vested was \$93 million, \$40 million and \$261 million in 2024, 2023 and 2022, respectively. The Company grants performance-based stock units that typically cliff vest on the third anniversary date of the grant. The ultimate number of units to be earned depends on the achievement of performance conditions. Some performance-based stock units also include market conditions. The performance conditions are typically based on a measure of the Company's Adjusted revenue growth and Adjusted Earnings Per Share. In 2024, following the completion of the Worldpay Sale, the Company modified the performance criteria for the 2024 performance year under the outstanding 2022 performance stock units to match the performance criteria for the 2024 performance year included in the performance stock units granted in 2024, since the prior criteria were established when FIS owned Worldpay and were no longer appropriate following the sale. The modification did not result in significant incremental compensation costs. The market conditions are based on the Company's total shareholder return ranked against that of other companies that are included in the Standard & Poor's 500 Index. The fair value of each performance-based stock unit with only performance conditions is based on the fair value of our common stock on the grant date. The fair value of each performance-based stock unit with a market condition is estimated on the date of grant using a Monte Carlo simulation model with the following weighted-average assumptions:

	2024	2023	2022
Risk free interest rate	4.3%	4.6%	1.6%
Volatility	38.6%	37.2%	34.2%
Dividend yield	2.1%	3.3%	2.0%

The number of performance-based stock units granted during the years ended December 31, 2024, 2023 and 2022, was less than 1 million, 1 million and 2 million, respectively. The weighted average grant date fair value of these awards granted during the years ended December 31, 2024, 2023 and 2022, was \$69.75, \$65.43 and \$99.27, respectively. The total fair value of the performance-based stock units that vested was \$17 million, \$10 million and \$35 million in 2024, 2023 and 2022, respectively.90FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)The following table summarizes the restricted stock units and performance stock units activity for the year ended December 31, 2024, which includes both continuing and discontinued operations (in millions except for per share amounts):

	Restricted Stock Units	Performance Stock Units	(In millions)	Shares	Weighted Average Fair Value	Shares	Weighted Average Fair Value	Balance, December 31,

Stock Compensation CostThe Company recorded total stock compensation expense in continuing operations of \$186 million, \$120 million and \$189 million for the years ended December 31, 2024, 2023 and 2022, respectively, included in Selling, general, and administrative expenses in the consolidated statements of earnings (loss). The Company recorded total stock compensation expense in discontinued operations of \$3 million, \$34 million and \$26 million for the years ended December 31, 2024, 2023 and 2022, respectively. Stock compensation expense related to grants with performance conditions is recorded based on management's expected level of achievement of the financial performance measures during the performance period and is adjusted as appropriate throughout the performance period based on the shares expected to be earned. As of December 31, 2024, the total unrecognized compensation cost related to non-vested stock awards was \$222 million. As of December 31, 2023, the total unrecognized compensation cost, including continuing and discontinued operations, was \$219 million. The total unrecognized compensation cost as of December 31, 2024 and 2023, includes \$222 million and \$166 million, respectively, related to continuing operations, which is expected to be recognized in pre-tax income over a weighted average period of 1.5 years and 1.4 years, respectively. (20)Components of Other Comprehensive Earnings (Loss)The following table shows Accumulated other comprehensive earnings (loss) attributable to FIS by component, net of tax, for the years ended December 31, 2024, 2023 and 2022 (in millions):

	Change in

NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)(21)Concentration of RiskThe Company generates a significant amount of revenue from large clients; however, no individual client accounted for 10% or more of total revenue in the years ended December 31, 2024, 2023 and 2022. Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash equivalents and trade receivables, as well as derivatives in a net asset position. The Company places its cash equivalents with high credit-quality financial institutions and, by policy, limits the amount of credit exposure with any one financial institution. Concentrations of credit risk with respect to trade receivables are limited because a large number of geographically diverse clients make up the Company's client base, thus spreading the trade receivables credit risk. The Company seeks to minimize credit risk for derivatives by selecting counterparties with investment grade credit ratings. The Company also manages credit risk exposure through monitoring procedures.(22)Segment InformationAs described in Note 1, effective as of the third quarter of 2023, the Company reports its financial performance based on the following segments: Banking Solutions, Capital Market Solutions and Corporate and Other. Below is a summary of each segment. Banking Solutions ("Banking")The Banking segment is focused on serving financial institutions with core processing software, transaction processing software and complementary applications and services, many of which interact directly with core processing software. We sell these solutions on either a bundled or stand-alone basis. Clients in this segment include global financial institutions, U.S. regional and community banks, credit unions and commercial lenders, as well as government institutions and other commercial organizations. We provide our clients integrated solutions characterized by multi-year processing contracts that generate recurring revenue. The predictable nature of cash flows generated from the Banking segment provides opportunities for further investments in innovation, integration, information and security, and compliance in a cost-effective manner.Capital Market Solutions ("Capital Markets")The Capital Markets segment is focused on serving global financial services clients and corporations with a broad array of buy- and sell-side, treasury, risk management and lending solutions. Clients in this segment include asset managers, private equity firms, sell-side securities brokerage and trading firms, insurers, asset and auto financiers and other commercial organizations. Our solutions include a variety of mission-critical buy- and sell-side applications for recordkeeping, data and analytics, trading and financing as well as corporate treasury and risk management applications. Capital Markets clients purchase our solutions in various ways including licensing and managing technology "in-house," using consulting and third-party service providers, as well as procuring fully outsourced end-to-end solutions. Our long-established relationships with many of these financial and commercial institutions generate significant recurring revenue. We have made, and continue to make, investments in modern platforms, advanced technologies, open APIs, machine learning and artificial intelligence, and regulatory technology to support our Capital Markets clients.Corporate and OtherThe Corporate and Other segment consists of corporate overhead expense, certain leveraged functions and miscellaneous expenses that are not included in the operating segments, as well as certain non-strategic businesses that we plan to wind down or sell. The overhead and leveraged costs relate to corporate marketing, finance, accounting, human resources, legal, compliance and internal audit functions as well as other costs, such as acquisition, integration and transformation-related expenses and amortization of acquisition-related intangibles, that are not considered when management evaluates revenue-generating segment performance. Our other operating income recorded in connection with the TSA is also recorded in Corporate and Other. 92FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)In the Corporate and Other segment, the Company recorded acquisition, integration and other costs for the years ended December 31, 2024, 2023 and 2022, comprised of the following (in millions):202420232022Acquisition and integration\$88Â 48Â \$50Â Enterprise transformation, including Future Forward and platform modernization262Â 312Â 279Â Severance and other termination expenses56Â 70Â 89Â Separation of the Worldpay Merchant Solutions business148Â 17Â â€”Â Incremental stock compensation directly attributable to specific programs58Â 15Â 83Â Other, including divestiture-related expenses and enterprise cost control and other initiatives12Â 20Â 80Â Total acquisition, integration and other costs\$624Â \$482Â \$581Â Amounts in table may not sum due to rounding.Other costs in Corporate and Other also include incremental amortization expense associated with shortened estimated useful lives and accelerated amortization methods for certain software and deferred contract cost assets resulting from the Company's platform modernization, as described in Notes 10 and 11, impairment charges described in Notes 10 and 11 and costs that were previously incurred in support of the Worldpay Merchant Solutions business but are not directly attributable to it and thus were not recorded in discontinued operations.Adjusted EBITDAAdjusted EBITDA is a measure of segment profit or loss that is reported to the chief operating decision maker, the Company's Chief Executive Officer and President, who utilizes the measure for purposes of making decisions about allocating resources to the segments and assessing their performance. For this reason, Adjusted EBITDA, as it relates to our segments, is presented in conformity with FASB ASC Topic 280, Segment Reporting. Adjusted EBITDA is defined as net earnings (loss) before net interest expense, net other income (expense), income tax provision (benefit), equity method investment earnings (loss), and depreciation and amortization, and excludes certain costs that do not constitute normal, recurring, cash operating expenses necessary to operate our business. These excluded costs generally consist of the purchase price amortization of acquired intangible assets as well as acquisition, integration and certain other costs and asset impairments. These excluded costs are recorded in the Corporate and Other segment. After adjusting for the foregoing items, our significant segment expenses consist of the following categories:â€¢Direct cost of revenue, which consists primarily of the cost of shipping, equipment, third-party data processing, loyalty program redemptions, printing, and card stock;â€¢Net personnel costs, which consist primarily of employee compensation and benefits expense and third-party labor and outsourcing costs, net of capitalized amounts;â€¢Infrastructure expense, which consists primarily of software, hardware, facilities and network costs;â€¢Allocated costs, which consist primarily of shared infrastructure and related operational personnel costs that are allocated to Banking and Capital Markets from Corporate and Other according to estimated usage; and â€¢Other costs, which consists primarily of the cost of third-party consulting and advisory services, employee travel and training, marketing, insurance, and bad debt, offset by TSA services income.Summarized financial information for the Company's segments is shown in the following tables. The Company does not evaluate performance or allocate resources based on segment asset data; therefore, such information is not presented.93FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)For the year ended December 31, 2024 (in millions):BankingSolutionsCapitalMarketSolutionsCorporateand OtherTotalRevenue\$6,892Â \$2,979Â \$256Â \$10,127Â Direct cost of revenue(1,038)(168)(61)(1,267)Net personnel costs(1,867)(914)(889)(3,670)Infrastructure costs(255)(88)(571)(914)Allocated costs(554)(237)791Â â€”Â Other costs(146)(53)59Â (140)Adjusted EBITDA\$3,032Â \$1,519Â \$(415)\$4,136Â Adjusted EBITDA\$4,136Â Depreciation and amortization(1,062)Purchase accounting amortization(675)Acquisition, integration and other costs(624)Asset impairments(52)Indirect Worldpay business support costs(14)Interest expense, net(250)Other income (expense), netÂ (162)(Provision) benefit for income taxes(362)Equity method investment earnings (loss), net of tax(145)Net earnings (loss) from discontinued operations, net of tax\$63Â Net earnings attributable to noncontrolling interest(3)Net earnings (loss) attributable to FIS\$1,450Â Capital expenditures (1)\$625Â \$350Â \$29Â \$1,004Â Depreciation and amortization (including purchase accounting amortization)\$638Â \$387Â \$712Â \$1,737Â (1) Capital expenditures include \$187 million of certain hardware and software purchases subject to financing or other long-term payment arrangements. or calculate due to rounding.(24)Revision of Prior-Period Consolidated Financial StatementsAs discussed in Note 1, below is a summary of the revisions to the Company's previously reported financial statements. Revisions to our previously reported disclosures have also been reflected within the consolidated financial statements being filed with this Annual Report on Form 10-K. The misstatements created immaterial reclassifications within the Company's cash flows from operating activities of continuing operations on the consolidated statements of cash flows; however, there was no net impact to cash flows from operating activities, investing activities or financing activities of continuing operations on our consolidated statement of cash flows. Accordingly, a revision table for the consolidated statement of cash flows is not included below.97FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)The following tables set forth our revisions to the consolidated statement of earnings (loss) and comprehensive earnings (loss) for each of the years ended December 31, 2023 and 2022 (in millions).For the year ended December 31, 2023For the year ended December 31, 2022As reportedAdjustmentAs revisedAs reportedAdjustmentAs revisedRevenue\$9,821\$10A \$9,831\$9,719\$1A \$9,720\$ Cost of revenue6,145\$30A 6,175\$A 6,216\$43A 6,259\$ Operating income1,467\$ (20)1,447\$A 1,218\$ (42)1,176\$ Other income (expense), net(183)18\$A (164)\$4A (2)3\$ Earnings (loss) before income taxes and equity method investment earnings (loss)663\$A (2)662\$A 941\$ (44)898\$ Provision (benefit) for income tax157\$ (1)157\$A 325\$ (1)314\$ Net earnings (loss) from continuing operations506\$ (1)505\$A 616\$ (33)584\$ Net earnings (loss) attributable to FIS(6,654)(1)(6,655)(16,720)(33)(16,752)Net earnings (loss) attributable to FIS from continuing operations503\$ (1)502\$A 608\$ (33)576\$ Basic earnings (loss) per common share attributable to FIS from continuing operations0.85\$A 0.85\$A 1.01\$ (0.05)0.95\$ Basic earnings (loss) per common share attributable to FIS(11.26)\$A 11.26\$ (27.68)(0.05)(27.74)Diluted earnings (loss) per common share attributable to FIS from continuing operations0.85\$A 0.85\$A 1.01\$ (0.05)0.95\$ Diluted earnings (loss) per common share attributable to FIS(11.26)\$A 11.26\$ (27.68)(0.05)(27.74)Net earnings (loss)(6,647)(1)(6,648)(16,708)(33)(16,740)Comprehensive earnings (loss)(6,547)(1)(6,548)(17,320)(33)(17,352)Comprehensive earnings (loss) attributable to FIS(6,554)(1)(6,555)(17,332)(33)(17,364)Amounts in tables may not sum or calculate due to rounding.98FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)The following table sets forth our revisions to the consolidated balance sheet as of December 31, 2023 (in millions).December 31, 2023As reportedAdjustmentAs revisedTrade receivables, net of allowance for credit losses of \$31\$1,730\$8A \$1,738\$ Other receivables287\$ (178)109\$ Prepaid expenses and other current assets603\$38A 641\$ Total current assets13,788\$ (132)13,656\$ Total assets55,105\$ (132)54,973\$ Accounts payable, accrued and other liabilities1,859\$ (86)1,773\$ Deferred revenue832\$ (3)829\$ Total current liabilities18,318\$ (89)18,229\$ Total liabilities36,006\$ (89)35,917\$ (Accumulated deficit) retained earnings(22,864)(42)(22,905)Total FIS stockholders' equity19,093\$ (43)19,050\$ Total equity19,099\$ (43)19,056\$ Total liabilities and equity55,105\$ (132)54,973\$ Amounts in tables may not sum or calculate due to rounding.99FIDELITY NATIONAL INFORMATION SERVICES, INC.AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)The following table sets forth our revisions to the consolidated statements of equity (deficit) for years ended December 31, 2023 and 2022 (in millions).(Accumulated deficit) / Retained earningsTotal equityAs reportedAdjustmentAs revisedAs reportedAdjustmentAs revisedBalances at December 31, 2021\$2,889\$ (8)\$2,881\$ \$47,358\$ (8)\$47,350\$ Issuance of restricted stock\$A 5\$A 5\$ Exercise of stock options\$A 61\$A 61\$A 61\$A 61\$ Purchases of treasury stock\$A (1,829)\$A (1,829)\$ Treasury shares held for taxes due upon exercise of stock awards\$A (109)\$A (109)\$ Stock-based compensation\$A 215\$A 215\$ Cash dividends declared (\$1.88 per share) and other distributions(1,140)\$A (1,140)(1,150)\$A (1,150)Net earnings (loss)(16,720)(32)(16,752)(16,713)(32)(16,745)Other comprehensive earnings (loss), net of tax\$A (612)\$A (612)Balances at December 31, 2022(14,971)(40)(15,011)27,226\$ (40)27,186\$ Issuance of restricted stock\$A 40\$A 40\$ Exercise of stock options\$A 40\$A 40\$ Purchases of treasury stock\$A (510)\$A (510)\$ Treasury shares held for taxes due upon exercise of stock awards\$A (22)\$A (22)\$ Stock-based compensation\$A 153\$A 153\$ Cash dividends declared (\$2.08 per share) and other distributions(1,239)\$A (1,239)(1,248)\$A (1,248)Other\$A 7\$A 7\$ Net earnings (loss)(6,654)(1)(6,655)(6,647)(1)(6,648)Other comprehensive earnings (loss), net of tax\$A 100\$A 100\$ Balances at December 31, 2023(22,864)(41)(22,905)19,099\$ (43)19,056\$ Amounts in tables may not sum or calculate due to rounding.100Item 9. Changes in and Disagreements with Accountants on Accounting and Financial DisclosureNone.Item 9A. Controls and ProceduresAs of the end of the year covered by this report, we carried out an evaluation, under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined in Rule 13a-15 (e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is (a) recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms and (b) accumulated and communicated to management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. There have been no changes in our internal control over financial reporting that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTINGManagement is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f). Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting. Management has adopted the framework in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on our evaluation under this framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2024. KPMG LLP, an independent registered public accounting firm, has issued an attestation report on our internal control over financial reporting as set forth in Item 8. Item 9B. Other InformationDuring the quarter ended December 31, 2024, Mr. Jeffrey Goldstein, Independent Chair of the Company's Board of Directors, adopted a trading plan intended to satisfy the affirmative defense of Rule 10b5-1(c). Under the plan, which was adopted on November 18, 2024, Mr. Goldstein instructed his broker to purchase shares of FIS common stock each quarter in an amount approximately equal to his cash director fees, which are paid quarterly in equal installments. The aggregate purchase price for shares to be purchased under the plan is \$241,000. The trading plan will expire on the earlier of January 30, 2026 or the date on which all purchases under the plan have been completed. Mr. Goldstein has informed the Company that he intends to continue to use the full amount of his cash director fees to purchase FIS common stock for so long as he remains a Director of the Company. Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent InspectionsNot applicable.PART IIItems 10-14. Within 120 days after the close of its fiscal year, the Company intends to file with the SEC a definitive proxy statement pursuant to Regulation 14A of the Securities Exchange Act of 1934, as amended, which will include the matters required by these items and is incorporated herein by reference. PART IV10Item 15. Exhibits and Financial Statement Schedules(1)Financial Statement Schedules: All schedules have been omitted because they are not applicable, not material or the required information is included in the consolidated financial statements or notes thereto.(2)Exhibits: The following is a complete list of exhibits included as part of this report, including those incorporated by reference. "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in Best Current Practice Key Words. 03.01 Securities Trading Policy Purpose The purpose of this Securities Trading Policy (this "Policy") of Fidelity National Information Services, Inc. and its subsidiaries (collectively, FIS–" or the "Company") is to: promote compliance with federal and state securities laws governing: trading in securities of the Company while aware of material nonpublic information concerning the Company, and tipping or disclosing material nonpublic information to outsiders, prevent even the appearance of improper insider trading or tipping. The Company adopted this Policy for all of its directors, officers and employees, their immediate family members who reside with them (or who do not reside with them but whose transactions in Company securities are directed by them or subject to their influence or control, such as parents or children who consult with them before they trade in Company securities) and anyone else that resides in the same household as the director, officer or employee, as well as designated outsiders (including designated contractors and consultants) who have access to the Company's material nonpublic information. Immediate family member–" refers to an individual–"s spouse, parents, stepparents, grandparents, children, step-children, grandchildren, siblings, mothers and fathers-in-law, sons and daughters-in-law, and brothers and sisters-in-law. Statement This Policy principally covers all directors, officers and employees with regular access to material nonpublic information of the Company, and any other employees, contractors or consultants whom the Chief Legal Officer or Corporate Secretary may designate as Insiders because they have access to material nonpublic information concerning the Company (collectively referred to as "Insiders"). During any period in which an employee has material nonpublic information, such employee is deemed to be an Insider. This Policy applies to all (i) Company securities, including its common stock, and any other type of debt or equity securities that the Company may issue, such as preferred stock, convertible debentures, warrants and exchange-traded options or other derivative securities and (ii) transactions in the Company's securities, including sales, purchases, gifts, exchanges or any interest or position relating to the future price of Company securities, such as a put, call or short sale. This Policy will be delivered to all Insiders once they are designated as being Insiders and upon the adoption of significant updates to the Policy, as determined by the Chief Legal Officer. Each Insider that is a Company employee must complete a Regulatory University course on this Policy once so designated acknowledging that they have read the Policy and agree to comply with the Policy's terms. Section 16 Individuals and Key Employees (each as defined below) may be required to certify compliance with the Policy on an annual basis. All Company employees shall have access to this Policy on the Company's intranet. 03.01.01 Statement on Prohibited Activities Violation of any of the prohibited activities described in this Policy may result in termination of employment and, in the case of the improper use or disclosure of material nonpublic information, investigation and enforcement by federal prosecutors and/or the U.S. Securities and Exchange Commission (the "SEC"). 03.01 Securities Trading Policy Neither the Company, nor any Insider, may trade in Company securities while aware of material nonpublic information concerning the Company. This prohibition shall not apply, however, to trades by the Company or Insiders that are performed pursuant to a Pre-Approved Insider Trading Plan, as described in this Policy. No Insider may trade in Company securities outside of the applicable trading windows described in this Policy or during any special trading blackout periods designated by the Chief Legal Officer. This prohibition shall not apply, however, to trades by Insiders that are performed pursuant to a Pre-Approved Insider Trading Plan. No Insider or employee of the Company may trade in Company securities during any period in which the Company has imposed a ban on trading Company securities, including those held through any employee benefit plan administered by the Company. No Section 16 Individual or Key Employee may trade in Company securities unless the trade has been approved by the Chief Legal Officer (or his or her designee) in accordance with the procedures set forth in this Policy. Section 16 Individuals and Key Employees who wish to trade in Company securities may be required to sell their securities pursuant to a Pre-Approved Insider Trading Plan. The Chief Legal Officer may not trade in Company securities unless the trade has been approved by the Chief Financial Officer or Corporate Secretary in accordance with the procedures set forth in this Policy. If the Corporate Secretary is also the Chief Legal Officer, any such trades must be approved by the Chief Financial Officer. No Insider may tip or disclose material nonpublic information concerning the Company to any outside person (including, without limitation, family members, analysts, individual investors and members of the investment community and news media), unless such disclosure is required as part of that Insider's regular duties for the Company and is duly authorized. No Insider may give trading advice of any kind about the Company–"s securities to anyone while the Insider is aware of material nonpublic information about the Company. The Company strongly discourages all Insiders from giving trading advice concerning the Company's securities to third parties, even when the Insiders are not aware of material nonpublic information about the Company. No Insider may engage in hedging, pledging and short sale transactions involving Company securities, as provided in the Company–"s Hedging and Pledging Policy. No Insider who, in the course of his or her Board service or employment at the Company, acquires material non- public information, may: trade in the securities of any other public company while the Insider is aware of material nonpublic information concerning that company; or tip or disclose to anyone outside FIS the material nonpublic information concerning such other company; or give trading advice of any kind to anyone concerning the securities of such other company while the Insider is aware of material nonpublic information about that company; or trade in the securities of other public companies (linked companies–") in the same industry as FIS or as other companies with which FIS does business, where information relating to FIS or its business dealings with another company would be material with regard to an investment in the securities of the linked company. No Insider or employee shall communicate any nonpublic information about the Company on any social media platform (including, but not limited to, Facebook, LinkedIn, Yammer, Instagram and X (formerly known as Twitter)) 03.01 Securities Trading Policy or on any Internet message board at any time, unless such disclosure is required as part of that Insider's regular duties for the Company and is duly authorized. 03.01.02 Consult the Chief Legal Officer for Guidance Insiders are encouraged to take a cautious approach when in possession of information that may be construed as material–" and nonpublic.–" Except with regard to trades by Insiders that are performed pursuant to a Pre-Approved Insider Trading Plan, Insiders who are unsure whether the information that they are aware of is material and nonpublic should consult the Chief Legal Officer for guidance before trading in any Company securities. 03.01.03 Key Definitions 03.01.03.01 Section 16 Individuals The Company has and will from time to time as necessary designate certain persons (the "Section 16 Individuals") as the directors and officers who are subject to the reporting provisions and trading restrictions of Section 16 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the underlying rules and regulations promulgated by the SEC. Section 16 Individuals must obtain prior approval of all trades in Company securities from the Chief Legal Officer in accordance with the procedures set forth in this Policy. 03.01.03.02 Key Employees The Company has and will from time to time, as necessary, designate certain persons as "Key Employees" who, because of their position with the Company, may have access to material nonpublic information. Key Employees must obtain prior approval of all trades in Company securities from the Chief Legal Officer in accordance with the procedures set forth in this Policy. 03.01.03.03 Material Information Information about a company is material if there is a reasonable likelihood that it would be expected to affect the investment or voting decisions of a reasonable stockholder or investor, or if the disclosure of the information would be expected to significantly alter the total mix of the information in the marketplace about the company. In simple terms, material information is any type of information which could reasonably be expected to affect the price of a company–"s securities. Such information may be positive or negative, favorable or unfavorable. While it is not possible to identify all information that would be deemed "material," the following types of information ordinarily would be considered material: Financial performance, especially quarterly and year-end revenue and earnings, and significant changes in financial performance or liquidity; Projections and strategic plans; Potential significant mergers and acquisitions or the sale of significant company assets or subsidiaries; New major contracts, strategic partners, suppliers, customers or finance sources, or the loss thereof;

Significant actions by regulatory authorities; â€¢ Stock splits, public or private securities/debt offerings or changes in company dividend policies or amounts; â€¢ Significant changes in executive management; â€¢ Significant labor disputes or negotiations; â€¢ Significant cybersecurity or data breaches; or Â 03.01 Securities Trading Policy â€¢ Actual or threatened major litigation or the resolution of such litigation. 03.01.03.04 Nonpublic Information Material information is nonpublic if it has not been widely disseminated to the public through major newswire services, national news services, financial news services, filings with the SEC, and webcasts of publicly announced investor conferences that are posted on the Companyâ€™s website. For the purposes of this Policy, information generally will be considered public (i.e., no longer nonpublic), after the close of trading on the second full trading day following the Companyâ€™s widespread public release of the information. Any exception to this general rule must be approved in advance by the Chief Legal Officer. 03.01.03.05 Controlling Persons All individuals who supervise, direct or manage the activities of any other employee of the Company may be deemed a Controlling Person for purposes of insider trading liability. The Company may be a Controlling Person of its employees. A Controlling Person may be subject to liability for insider trading or tipping by a controlled person if the Controlling Person knows or recklessly disregarded that the controlled person was likely to violate insider trading laws and failed to take steps to prevent such activity. All Controlling Persons are encouraged to be vigilant in monitoring the activities of controlled persons that possess, have access to or are aware of material nonpublic information and promptly report any suspicious activity to the Chief Legal Officer. Penalties for trading on or communicating material nonpublic information are severe, both for individuals involved in such unlawful conduct and their employers and supervisors. Controlling Persons are subject to a civil penalty of \$1 million or three times the amount of profits realized or losses avoided due to insider trading or tipping of controlled persons. 03.01.04 Oversight The Company has designated its Chief Legal Officer to oversee this Policy. The Chief Legal Officer will review and either approve or prohibit all proposed trades by Section 16 Individuals and Key Employees in accordance with the procedures set forth below. In addition to the trading approval duties described in this Policy, the Chief Legal Officer shall have responsibility for: â€¢ Administering this Policy and monitoring and enforcing compliance with all Policy provisions and procedures. â€¢ Responding to all inquiries relating to this Policy and its procedures. â€¢ Designating and announcing special trading blackout periods during which no Insiders (including any employees that the Chief Legal Officer may designate as Insiders for the purposes of a particular blackout period because of their access to material non-public information) may trade in Company securities. At the discretion of the Chief Legal Officer, a special trading blackout period may be made applicable on a Company-wide basis to all employees. â€¢ Providing copies of this Policy and other appropriate materials to all current and new directors, officers and employees and such other persons who the Chief Legal Officer determines may have access to material nonpublic information concerning the Company. â€¢ Administering, monitoring, and enforcing compliance with all federal and state insider trading laws and regulations, including, without limitation, Sections 10(b), 16, 20A and 21A of the Exchange Act and the rules and regulations promulgated thereunder. Â 03.01 Securities Trading Policy â€¢ Maintaining as Company records originals or copies of all documents required by the provisions of this Policy or the procedures set forth herein. â€¢ Revising this Policy, as necessary, to reflect changes in federal or state insider trading laws and regulations. â€¢ Maintaining the accuracy of the list of Section 16 Individuals and Key Employees and updating them periodically, as necessary, to reflect additions to or deletions from each category of individuals. â€¢ Consulting at the Chief Legal Officerâ€™s discretion with outside legal counsel concerning compliance with all federal and state insider trading laws and regulations. The Chief Legal Officer may designate an alternate individual, preferably the Corporate Secretary or the Chief Financial Officer, who may perform the Chief Legal Officerâ€™s duties under this Policy in the event that the Chief Legal Officer is unable or unavailable to perform such duties. 03.01.05 Trading Windows and Blackout Periods 03.01.05.01 Blackout Periods for Section 16 Individuals and Key Employees Subject to obtaining trading approval from the Chief Legal Officer in accordance with the procedures set forth below, Section 16 Individuals and Key Employees may not trade in Company securities during a regularly recurring Blackout Period (i) commencing at the close of trading on the New York Stock Exchange on the fifteenth (15) calendar day of the third month of each quarter and (ii) ending at the close of trading on the New York Stock Exchange on the second full trading day following the Company's widespread public release of quarterly or year-end earnings. 03.01.05.02 No Trading During Trading Windows While in the Possession of Material Nonpublic Information No Insiders or other Company employees who are aware of material nonpublic information concerning the Company may trade in Company securities, even during applicable trading windows, except with respect to trades made pursuant to a Pre-Approved Insider Trading Plan. Persons who are aware of such information may only trade during a trading window after the close of trading on the second full trading day following the Company's widespread public release of the material nonpublic information at issue. 03.01.05.03 No Trading During Blackout Periods No Insiders may trade in Company securities outside of the applicable trading windows or during any special blackout periods that the Chief Legal Officer may designate. No Insiders may disclose to any outside third party that a special blackout period has been designated. Such blackout period shall not apply, however, to trades made pursuant to a Pre-Approved Insider Trading Plan. 03.01.05.04 Exceptions for Hardship Cases The Chief Legal Officer may, on a case-by-case basis, authorize trading in Company securities outside of the applicable trading windows (but not during special blackout periods) due to financial hardship or other hardships, but only in accordance with the procedures set forth below. 03.01.05.05 Special Blackout Periods Â 03.01 Securities Trading Policy The Chief Legal Officer may designate special blackout periods during which no Insiders may trade Company securities. 03.01.06 Employee Benefit Plans 03.01.06.01 Employee Stock Purchase Plans The trading prohibitions and restrictions set forth in this Policy do not apply to periodic contributions by the Company or employees to employee benefit plans (e.g., employee stock purchase plans) that are used to purchase Company securities pursuant to the employeeâ€™s advance instructions. Such trading prohibitions and restrictions will apply, however, to (i) any market sale of Company securities purchased through an employee benefit plan, unless the sale is made pursuant to a Pre-Approved Insider Trading Plan, and (ii) an employeeâ€™s election to participate in an employee stock purchase plan or to increase or decrease such employee's level of participation therein. 03.01.06.02 Stock Option Plans The trading prohibitions and restrictions of this Policy apply to all sales of securities acquired through or in connection with the exercise of stock options granted by the Company, including securities sold to effect a "cashless" exercise of such stock options, but not to a "net exercise" of stock options, in which the Insider surrenders shares to the Company to cover the option exercise price and taxes.. Such trading prohibitions and restrictions shall also not apply to Insider sales of securities that were acquired through an exercise of stock options granted by the Company where the sale is made pursuant to a Pre-Approved Insider Trading Plan. 03.01.06.03 Restricted Stock Awards, RSUs and PSUs The trading prohibitions and restrictions of this Policy do not apply to the vesting of restricted stock, restricted stock units or performance stock units, or the exercise of a tax withholding right pursuant to which an employee elects or the Company requires to have the Company withhold shares of stock to satisfy tax withholding requirements upon the vesting of any restricted stock, restricted stock units or performance stock units. Such trading prohibitions and restrictions will apply, however, to any market sale of Company securities. 03.01.06.04 Dividend Reinvestment Plans The trading prohibitions and restrictions of this Policy do not apply to purchases of Company securities under the Company's dividend reinvestment plan, if any, resulting from an employee's reinvestment of dividends paid on Company securities. Such trading prohibitions and restrictions will apply, however, to voluntary purchases of Company securities resulting from additional contributions an employee chooses to make to the dividend reinvestment plan, and to an employeeâ€™s election to participate in the plan or increase such employee's level of participation in the plan. Such prohibitions and restrictions also apply to an employee's sale of any Company securities purchased pursuant to the plan. 03.01.07 Procedures for Approving Trades by Section 16 Individuals, Key Employees and Hardship Cases 03.01.07.01 Section 16 Individual and Key Employee Trades No Section 16 Individual or Key Employee may trade in Company securities until: â€¢ The person trading has notified the Chief Legal Officer of the amount and nature of the proposed trade; and â€¢ The Chief Legal Officer (or his or her designee) has approved the trade. Â 03.01 Securities Trading Policy The Section 16 Individual or Key Employee must execute his or her trade within the period specified in the approval. 03.01.07.02 Hardship Cases The Chief Legal Officer may, on a case-by-case basis, authorize trading in Company securities outside of the applicable trading windows due to financial hardship or other hardship, only after: â€¢ The person trading has notified the Chief Legal Officer in writing of the circumstances of the hardship and the amount and nature of the proposed trade; â€¢ The person trading has certified to the Chief Legal Officer in writing no earlier than two (2) business days prior to the proposed trade that they are not aware of material nonpublic information concerning the Company; and â€¢ The Chief Legal Officer has approved the trade and has certified the approval in writing. The hardship applicant must execute his or her trade within the period specified in the approval. 03.01.07.03 No Obligation to Approve Trades The existence of the foregoing approval procedures does not in any way obligate the Chief Legal Officer to approve any trades requested by Section 16 Individuals, Key Employees or hardship applicants. The Chief Legal Officer may reject any trading requests at the Chief Legal Officerâ€™s sole, reasonable discretion. 03.01.07.04 Individual Responsibility Persons subject to this Policy have ethical and legal obligations to maintain the confidentiality of information about the Company and to not engage in transactions in Company securities while in possession of material nonpublic information. Each individual is responsible for making sure that they comply with this Policy, and that any immediate family member, household member or entity whose transactions are subject to this Policy, also comply with this Policy. In all cases, the responsibility for determining whether an individual is in possession of material nonpublic information rests with that individual, and any action on the part of the Company, the Chief Legal Officer or any other employee or director pursuant to this Policy (or otherwise) does not in any way constitute legal advice or insulate an individual from liability under applicable securities laws. Violators could be subject to severe legal penalties and disciplinary action by the Company for any conduct prohibited by this Policy or applicable securities laws. 03.01.08 Pre-Approved Insider Trading Plans 03.01.08.01 Trading Plans Approved by Chief Legal Officer Notwithstanding the trading restrictions set forth in this Policy, an Insider may elect to trade in Company securities pursuant to a written plan or set of instructions to another person that is approved in accordance with this Section (a "Trading Plan"). All Trading Plans are subject to prior approval by the Chief Legal Officer or his or her designee (if so approved, a "Pre-Approved Trading Plan"). In general, a Trading Plan must be entered into at a time when the person entering into the Trading Plan is not aware of material nonpublic information. Once the Trading Plan is adopted, the person must not exercise any influence over the amount of securities to be traded, the price at which they are to be traded or the date of the trade. 03.01.08.02 Requirements for a Trading Plan A Trading Plan must be in writing and signed by the person seeking to adopt the Trading Plan. A Trading Plan will not be approved unless it : Â 03.01 Securities Trading Policy â€¢ Specifies either the specific amount of securities to be traded (either a specified number of securities or a specified dollar value of securities); the price at which the securities are to be traded; and the date on which the order is to be executed (either the specific day of the year on which the order is to be executed or as soon thereafter as is practicable under ordinary principles of best execution-in the case of a market order, or, in the case of a limit order, a day of the year on which the limit order is in force); or â€¢ Includes a written formula or algorithm, or computer program for determining the amount of securities that are to be purchased or sold and the price at which and the date on which the securities are to be purchased or sold; or â€¢ Grants complete investment discretion to another person (a "Representative") and does not permit the Insider to exercise any subsequent influence over how, when, or whether to effect trades. Reliance upon this provision will also require a signed affirmation by the Representative that such Representative will not exercise this complete grant of discretion to trade on such securities while such Representative is aware of material nonpublic information about the Company or its securities. If a Trading Plan is adopted, all trades must be made pursuant to the Trading Plan, unless otherwise approved in advance by the Chief Legal Officer. Insiders seeking to utilize a Trading Plan may not, in any manner, alter or deviate from the trading instructions set forth in a Trading Plan, including changing the amount, price, or timing of the trade. Trading Plans may be terminated only with the prior approval of the Chief Legal Officer. Insiders may not in any way discuss with their designated Representative or stockbroker the Company, information about the Company, or the timing of the trading in the Company's securities (other than to confirm that they have given instructions and set forth their contents). After adopting a Trading Plan, Insiders are not allowed to enter into any corresponding or hedging transaction or

position with respect to the Company's securities. Any Section 16 individual will be required to include in the Trading Plan written representations certifying that he or she (i) is not aware of material nonpublic information about the Company or its securities and (ii) is adopting or modifying the plan in good faith and not as part of a plan or scheme to evade the prohibitions of Exchange Act Rule 10b-5-1. No person seeking to adopt a Trading Plan may do so if they are aware of any material nonpublic information about the Company or the Company's securities. Rule 10b5-1 of the Exchange Act requires that any Insider who enters into a Trading Plan act in good faith with respect to the Trading Plan and not as a part of a plan or scheme to evade the prohibitions of any insider trading laws, rules, or regulations. No Insider may enter into a Trading Plan outside of the applicable "trading windows" described in this Policy or during any special trading blackout periods designated by the Chief Legal Officer. All Trading Plans for Section 16 Individuals are subject to a "cooling off" period of the longer of: (a) 90 days following Trading Plan adoption or modification, or (b) two business days following disclosure in Form 10-K or 10-Q of the Company's financial results for the fiscal quarter in which the Trading Plan was adopted or modified (but not to exceed 120 days following Trading Plan adoption or modification) before any trade order may be executed. All Trading Plans for persons other than the Company and Section 16 Individuals are subject to a thirty (30) day "cooling off" period before any trade order may be executed. No Insider may enter into overlapping Trading Plans (subject to certain exceptions) and may only enter into one single-trade Trading Plan during any 12-month period (subject to certain exceptions). Notwithstanding anything in this Policy to the contrary, all Trading Plans are subject to the requirements set forth in Rule 10b5-1 of the Exchange Act and will be interpreted to ensure compliance with Rule 10b5-1 of the Exchange Act. The Company reserves the right to reject any Trading Plan which, in its judgment, does not satisfy the requirements above or that generally does not comply with the provisions of Rule 10b5-1 of the Exchange Act.

03.01 Securities Trading Policy 03.01.09 Priority of Statutory or Regulatory Trading Restrictions The trading prohibitions and restrictions set forth in this Policy will be superseded by any greater prohibitions or restrictions prescribed by federal or state securities laws and regulations (e.g., short-swing trading by Section 16 Individuals or restrictions on the sale of securities subject to Rule 144 under the Securities Act). Any Insider who is uncertain whether other prohibitions or restrictions apply should consult with the Chief Legal Officer or Corporate Secretary.

03.01.10 Potential Civil, Criminal and Disciplinary Sanctions 03.01.10.01 Civil and Criminal Penalties Penalties for trading on or communicating material nonpublic information are severe, both for individuals involved in such unlawful conduct and their employers and supervisors. Persons violating insider trading or tipping rules may be required to disgorge the profit made or the loss avoided by the trading, pay the loss suffered by the person who purchased securities from or sold securities to the insider or tip recipient, pay civil penalties up to three times the profit made or loss avoided, pay a criminal penalty of up to \$1,000,000, and serve a jail term of up to ten years. Controlling Persons of the person violating the rules may also be required to pay major penalties.

03.01.10.02 Company Discipline Violation of this Policy or federal or state insider trading or tipping laws by any director, officer or employee, or their immediate family, may subject the director to removal and the officer or employee to disciplinary action by the Company up to and including termination.

03.01.10.03 Reporting of Violations Any Insider who violates this Policy or any federal or state laws governing insider trading or tipping, or knows of any such violation by any other Insiders, must report the violation immediately to the Chief Legal Officer or through the Company's www.fnisethics.com website or hotline. Upon learning of any such violation, the Chief Legal Officer, in consultation with the Company's outside legal counsel, will determine whether the Company should release any material nonpublic information, or whether the Company should report the violation to the SEC or other appropriate governmental authority.

03.01.11 Inquiries Please direct all inquiries regarding any of the provisions or procedures of this Policy to the Chief Legal Officer. All FIS Colleagues, contractors, and applicable third-parties are required to adhere to established policies, procedures, and standards. Violation of Company Policies, procedures and/or standards MAY result in disciplinary action up to and including termination of employment, as permitted by local law. Any suspected violation of Company Policies, procedures, or standards SHOULD be reported to either an FIS manager or the Ethics Office at fisethicsoffice@fisglobal.com in accordance with the Code and Company Policies. Suspected violations of the Code MAY also be reported, through the FIS Ethics Helpline utilizing the phone numbers within the Code of Business Conduct and Ethics (Appendix A) or through the website at www.fnisethics.com. Concerns raised to the Ethics Helpline can be made anonymously where permitted under local laws. FIS does not tolerate any retaliation against anyone who, in good faith, reports a suspected violation of the Code, Company Policies, or the law or who cooperates with an investigation. Colleagues also have the option of raising employee relations concerns through TPO Support Center (Raise a Concern, Grievance or Complaint - Employee Service Center (service-now.com)). Concerns related to information security can be reported using Service Now (SNOW): Technology Service Catalog > Security Services > FIS Security Incident Reporting Form. For urgent or critical information security incidents, please call +1.414.357.FSIRT (3747) (U.S. and International). In addition, privacy incidents can be reported through FIS & me Workplace Services > RISC Resource Center > Report a Privacy Incident.

3.Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report; 4.The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have: a)designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;b)designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;c)evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; andd)disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and5.The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions): a)all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; andb)any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.Date:February 13, 2025By: /s/ Stephanie Ferris Stephanie Ferris Chief Executive Officer EX-31.2 6 exhibit31210k2024.htm EX-31.2 DocumentExhibitA 31.2 CERTIFICATIONS I, James Kehoe, certify that: 1.I have reviewed this annual report on Form 10-K of Fidelity National Information Services, Inc.; 2.Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report; 3.Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report; 4.The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have: a)designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;b)designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;c)evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; andd)disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and5.The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions): a)all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; andb)any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.Date:February 13, 2025By: /s/ James KehoeJames Kehoe Chief Financial Officer EX-32.1 7 exhibit32110k2024.htm EX-32.1 DocumentExhibitA 32.1 CERTIFICATION OF PERIODIC FINANCIAL REPORTS PURSUANT TO 18 U.S.C. §1350 The undersigned hereby certifies that he is the duly appointed and acting Chief Executive Officer of Fidelity National Information Services, Inc., a Georgia corporation (the "Company"), and hereby further certifies as follows. 1.The periodic report containing financial statements to which this certificate is an exhibit fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934.2.The information contained in the periodic report to which this certificate is an exhibit fairly presents, in all material respects, the financial condition and results of operations of the Company. 3. 4. In witness whereof, the undersigned has executed and delivered this certificate as of the date set forth opposite his signature below. -Definition

Amount of currency on hand as well as demand deposits with banks or financial institutions. Includes other kinds of accounts that have the general characteristics of demand deposits. Also includes short-term, highly liquid investments that are both readily convertible to known amounts of cash and so near their maturity that they present insignificant risk of changes in value because of changes in interest rates. Excludes cash and cash equivalents within disposal group and discontinued operation.
