  There were no transfers of securities available-for-sale to held-to-maturity during the year ended June 30, 2024 or 2023. During the year ended June 30, 2024, there were no sales of securities and no gains or losses recognized. During the year ended June 30, 2023, a loss of $251,000 was recognized from a sale of one security available-for-sale. The proceeds were used to fund higher-yielding loans.

  At June 30, 2024 and 2023, loans to related parties including officers and directors were immaterial as a percentage of our loan portfolio.
  Non-accrual Loans
  Management places loans on non-accrual status once the loans have become 90 days or more delinquent. A non-accrual loan is defined as a loan in which collectability is questionable and therefore interest on the loan will no longer be recognized on an accrual basis. A loan is not placed back on accrual status until the borrower has demonstrated the ability and willingness to make timely payments on the loan. A loan does not have to be 90 days delinquent in order to be classified as non-accrual. Loans on non-accrual status totaled $3.7 million at June 30, 2024 of which there were four residential real estate loans totaling $686,000 and three commercial real estate loans totaling $1.6 million in the process of foreclosure. At June 30, 2024, there were three commercial real estate loans totaling $1.5 million and four residential real estate loans totaling $596,000 in the process of foreclosure. Included in non-accrual loans were $3.7 million of loans which were less than 90 days past due at June 30, 2024, but have a recent history of delinquency greater than 90 days past due. These loans will be returned to accrual status once they have demonstrated a history of timely payments. Loans on non-accrual status totaled $5.5 million at June 30, 2023 of which $2.0 million were in the process of foreclosure. At June 30, 2023, there were three residential real estate loans totaling $625,000 and two commercial real estate loans totaling $1.4 million in the process of foreclosure. Included in non-accrual loans were $3.1 million of loans which were less than 90 days past due at June 30, 2023, but have a recent history of delinquency greater than 90 days past due. These loans will be returned to accrual status once they have demonstrated a history of timely payments.
  The following table sets forth information regarding delinquent and/or non-accrual loans as of June 30, 2024. <table cellpadding="0" cellspacing="0" class="cfttable" style="font-family: 'Times New Roman'; font-size: 10pt; text-align: left; color: #000000; width: 100%;"> <tr> <td rowspan="1" style="vertical-align: bottom; padding-bottom: 2px; white-space: nowrap;" valign="bottom"> </td> <td colspan="1" rowspan="1" style="vertical-align: bottom; padding-bottom: 2px; white-space: nowrap;" valign="bottom"> </td> <td colspan="2" rowspan="1" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); text-align: center; white-space: nowrap;"> </td> <td colspan="1" rowspan="1" style="text-align: center; vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;"> </td> <td colspan="1" rowspan="1" style="vertical-align: bottom; text-align: center; vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;"> </td> <td colspan="2" rowspan="1" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); text-align: center; white-space: nowrap;"> </td> <td colspan="1" rowspan="1" style="text-align: center; vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;"> </td> <td colspan="1" rowspan="1" style="vertical-align: bottom; text-align: center; vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;"> </td> <td colspan="2" rowspan="1" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); text-align: center; white-space: nowrap;"> </td> <td colspan="1" rowspan="1" style="text-align: center; vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;"> </td> <td colspan="1" rowspan="1" style="vertical-align: bottom; text-align: center; vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;"> </td> <td colspan="2" rowspan="1" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); text-align: center; white-space: nowrap;"> </td> <td colspan="1" rowspan="1"

  The Company had no accruing loans delinquent 90 days or more at June 30, 2024 and June 30, 2023. The borrowers have made arrangements with the Bank to bring the loans current within a specified time period and have made a series of payments as agreed.
  Allowance for Credit Losses on Loans
  The Company's July 1, 2023 adoption of CECL resulted in a significant change to our methodology for estimating the allowance for credit losses. The allowance for credit losses for the loan portfolio is established through a provision for credit losses based on the results of life of loan quantitative models, reserves associated with collateral-dependent loans evaluated individually and adjustments for the impact of current economic conditions not accounted for in the quantitative models. The discounted cash flow methodology is used to calculate the CECL reserve for the residential real estate, commercial real estate, home equity and commercial loan segments. The Company uses a four-quarter reasonable and supportable forecast period based on the one year percent change in national GDP and the national unemployment rate, as economic variables. The forecast will revert to long-term economic conditions over a four-quarter reversion period on a straight-line basis. The remaining life method will be utilized to determine the CECL reserve for the consumer loan segment. A qualitative factor framework has been developed to adjust the quantitative loss rates for asset-specific risk characteristics or current conditions at the reporting date. The Company elected to use the practical expedient to evaluate loans individually, if they are collateral dependent loans that are on nonaccrual status with a balance of $250,000 or greater, which is consistent with regulatory requirements. The fair value of the collateral dependent loan less selling expenses will be compared to the loan balance to determine if a CECL reserve is required. While management uses available information to recognize losses on loans, additions or reductions to the allowance may fluctuate from one reporting period to another. These fluctuations are reflective of changes in the reasonable and supportable forecast, analysis of loans evaluated individually, and/or changes in management's assessment of the qualitative factors.
  In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for credit losses. Such agencies may require the Company to recognize additions to the allowance based on their judgment about information available to them at the time of their examination. The Company charges loans off against the allowance for credit losses when it becomes evident that a loan cannot be collected within a reasonable amount of time, or that it will cost the Company more than it will receive and all possible avenues of repayment have been analyzed, including the potential of future cash flow, the value of the underlying collateral, and strength of any guarantors or co-borrowers. Generally, consumer loans and smaller business loans (not secured by real estate) in excess of 90 days are charged-off against the allowance for credit losses, unless equitable arrangements are made. Included within consumer loan charge-offs and recoveries are deposit accounts that have been overdrawn in excess of 60 days. For loans secured by real estate, a charge-off is recorded when it is determined that the collection of all or a portion of a loan may not be collected and the amount of that loss can be reasonably estimated. The allowance for credit losses is increased by a provision for credit losses (which results in a charge to expense) and recoveries of loans previously charged off, and is reduced by charge-offs.
  The following tables set forth the activity and allocation of the allowance for credit losses on loans by segment:

  The allowance for credit losses on unfunded commitments as of June 30, 2024 was $1.3 million.
  Credit monitoring process
  Management closely monitors the quality of the loan portfolio and has established a loan review process designed to help monitor any change in borrower risk during the life cycle of their loan. The Company utilizes a credit quality grading system that is used at loan inception and updated as appropriate based on an annual review process. The credit quality grade helps management make a consistent assessment of each loan relationship's credit risk and identify any portfolio trends that could impact profitability. Consistent with regulatory guidelines, the Company provides for classification of loans, such as "Pass," Special Mention," "Substandard," "Doubtful" and "Loss" classifications.
  Commercial grading system
  Loss
  Loss ratings are loans that are considered uncollectible and of such little value that their continuance as active assets of the Company is not warranted. Loss rating does not necessarily mean that the loan has no recovery or salvage value, however, it is not practical or desirable to defer charging off the loan.
  Doubtful
  Doubtful ratings are loans that have all the weakness inherent in loans classified as substandard with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, highly questionable and improbable. Doubtful ratings generally are non-performing and considered to have a high risk of default.
  Substandard
  Substandard ratings are loans that possess well defined weaknesses that jeopardize the orderly liquidation of debt, and are characterized by the distinct possibility that the Company will sustain some loss, if the deficiencies are not corrected. Substandard ratings are inadequately protected by the current sound worth and paying capacity of the borrower or the collateral pledged, if any.
  Special mention
  Special mention ratings are loans that have potential weaknesses or emerging problems which require close attention. These weaknesses, if left uncorrected, could lead to deterioration in the repayment prospects for the loan or the Company's collateral position in the future. Special mention loans are less risky than substandard assets as no loss of principal or interest is anticipated unless, the potential problems continue for a prolonged basis.
  Pass
  Pass ratings are loans that do not encompass loans graded as Loss, Doubtful, Substandard, or Special mention. Pass loans range from Pass/Watch, Acceptable, Average, Satisfactory, Good and Excellent. Pass loans demonstrate sufficient cash flow to ensure full repayment of the loan with Pass ratings being determined by the quality of the collateral and equity position, stability of operations or management, and the guarantors. <span style="background-color: rgb(255, 255, 255); font-weight: normal; color: rgb(0, 0, 0); font-family: 'Times New Roman'; font-size: 10pt; font-style: italic; font-variant: normal; text-transform: none;">
   <span style="background-color: rgb(255, 255, 255); font-weight: normal; color: rgb(0, 0, 0); font-family: 'Times New Roman'; font-size: 10pt; font-style: italic; font-variant: normal; text-transform: none;"> <div style="text-align: left; font-family: 'Times New Roman'; font-size: 10pt; background-color: rgb(255, 255, 255); font-weight: normal; color: rgb(0, 0, 0); font-style: italic; font-variant: normal; text-transform: none;">Residential and consumer grading system
  Residential real estate, home equity and consumer loans are graded as either non-performing or performing.
  Non-performing
  Nonperforming loans are loans in which the borrower has not made the scheduled payments of principal or interest, and are generally loans over 90 days past due and still accruing interest, and loans on nonaccrual status.
  Performing
  Performing loans are those loans in which the borrower is making timely payments of both principal and interest as upon the agreed loan terms.
  The following tables illustrate the Company's credit quality by loan class by vintage:
  <table cellpadding="0" cellspacing="0" class="cfttable" style="font-family: 'Times New Roman'; font-size: 10pt; text-align: left; color: #000000; width: 100%;"> <tr> <td colspan="36" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0);" valign="bottom"> At June 30, 2024 </td> <td colspan="1" style="text-align: left; vertical-align: bottom; padding-bottom: 2px; white-space: nowrap;" valign="bottom"> </td> </tr> <tr> <td style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> (In thousands) </td> <td colspan="1" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> 2024 </td> <td colspan="1" style="text-align: center; vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="1" style="vertical-align: bottom; text-align: center; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> 2023 </td> <td colspan="1" style="text-align: center; vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="1" style="vertical-align: bottom; text-align: center; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> 2022 </td> <td colspan="1" style="text-align: center; vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="1" style="vertical-align: bottom; text-align: center; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> 2021 </td> <td colspan="1" style="text-align: center; vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="1" style="vertical-align: bottom; text-align: center; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> 2020 </td> <td colspan="1" style="text-align: center; vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="1" style="vertical-align: bottom; text-align: center; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> Prior </td> <td colspan="1" style="text-align: center; vertical-align: bottom; border-bottom: 2px

  The Company had no loans classified doubtful or loss at June 30, 2024 or June 30, 2023. During the year ended June 30, 2024, the Company downgraded 12 commercial and commercial real estate relationships from special mention to substandard, and downgraded 14 commercial and commercial real estate relationships from pass to special mention, due to the deterioration in the borrower cash flows and financial performance. This was offset by 14 commercial and commercial real estate relationships that were either upgraded, paid-off, or charged-off during the year ended June 30, 2024. During the year ended June 30, 2023, the Company further downgraded commercial real estate, commercial loans, and residential loans from pass and special mention to substandard due to deterioration in borrower cash flows, delinquent payments and further financial deterioration or not improving financial performance. Management continues to monitor these loan relationships closely. In total, there were seven commercial real estate loan relationships, two commercial loan relationship and three residential loans that have been downgraded to substandard, and there were nine commercial real estate loan relationships, three commercial loan relationship and two residential loans that have been downgraded to special mention during the year ended June 30, 2023. At June 30, 2023, these loans were all performing. The Company upgraded one commercial real estate relationship and one residential loan to pass, and one commercial real estate relationship to special mention during the year ended June 30, 2023. This was due to improvements in cash flows, timely payments and improving financial performance.
  Individually Evaluated Loans
  As of June 30, 2024, loans evaluated individually had an amortized cost basis of $1.4 million, with an allowance for credit losses on loans of $662,000. At June 30, 2024, the amortized cost basis of collateral dependent loans was $631,000 and $774,000 for commercial real estate and residential loans, respectively. The allowance for credit loss for collateral dependent loans is individually assesses based on the fair value of the collateral less costs to sell at the reporting date. At June 30, 2024, the collateral value associated with collateral dependent loans was $662,000.</div> <div style="font-family: 'Times New Roman'; font-size: 10pt;">

When the Company modifies a loan for borrowers experiencing financial difficulty, such modifications generally include one or a combination of the following: an extension of the maturity date; a stated rate of interest not at the market rate for new debt with similar risk; a change in the scheduled payment amount; or principal forgiveness. The Company works with loan customers experiencing financial difficulty and may enter into loan modifications to achieve the best mutual outcome given the financial circumstances of the borrower.</div> <div style="font-family: 'Times New Roman'; font-size: 10pt;">

  Advance payments by borrowers for taxes and insurance totaled $10.0 million at June 30, 2024 and 2023, respectively, which are included in savings deposits.
  The Bank and Commercial Bank (the "Banks") accepts brokered deposits, generally in denominations of less than $250,000, from national brokerage networks, custodial deposit networks or through IntraFi's one-way CDARS and ICS products, including IntraFi's Insured Network Deposits ("IND"). The Banks combined can place and obtain brokered deposits up to 30% of total deposits, in the amount of $716.8 million based on policy. Additionally, both Banks participate in the IntraFi reciprocal ("two-way") CDARS and the ICS products, which provides for reciprocal two-way transactions among other institutions, facilitated by IntraFi, for the purpose of maximizing FDIC insurance for depositors.
     The Company had zero brokered deposits as of June 30, 2024 and $60.0 million as of June 30, 2023, which was included in certificates of deposits. The Company maintains and utilizes brokered deposits from several available sources as an alternative to borrowed funds, and uses the funds to support loan growth, overall liquidity and a higher cash position.
     The Bank held deposits of $13.3 million and $66.4 million as of June 30, 2024 and 2023, respectively, for related-parties, which primarily consisted of directors and their affiliates.
  The following indicates the amount of certificates of deposit by time remaining to maturity as of June 30, 2024.

1278240001476000790000755900084400013849300 <table cellpadding="0" cellspacing="0" class="DSPFListTable" style="font-family: 'Times New Roman'; font-size: 10pt; width: 100%; text-align: left; color: #000000;"> <tr> <td style="width: 36pt; vertical-align: top; font-weight: bold;">Note 7.</td> <td style="width: auto; vertical-align: top;"> Borrowings </td> </tr> </table>
  <span style="background-color: rgb(255, 255, 255); font-weight: normal; color: rgb(0, 0, 0); font-family: 'Times New Roman'; font-size: 10pt; font-style: normal; font-variant: normal; text-transform: none;">At June 30, 2024, the Bank had pledged approximately $601.6 million of its residential and commercial mortgage portfolios as collateral for borrowings and irrevocable municipal letters of credit at the Federal Home Loan Bank of New York ("FHLB"). The maximum amount of funding available from the FHLB was $372.1 million at June 30, 2024, of which there were $9.2 million long-term fixed rate borrowings, $90.0 million irrevocable municipal letters of credit and $115.3 million in overnight borrowings outstanding at June 30, 2024. At June 30, 2023, the Bank had zero overnight or long-term borrowings outstanding and $110.0 million in irrevocable municipal letters of credit at the FHLB. Interest rates on overnight borrowings are determined at the time of borrowing. The irrevocable municipal letters of credit with the FHLB have been issued to secure municipal transactional deposit accounts, on behalf of Greene County Commercial Bank.
  The FHLB term borrowings

include long-term fixed rate borrowings from the "FHLB 0% Development Advance (ZDA) Program." The Company receives a corresponding credit related to the FHLB term fixed rate borrowings, which effectively reduces the interest rate paid to zero percent. At June 30, 2024, the Bank had a FHLB long-term fixed rate borrowing of $4.4 million at a stated rate of 5.7%, maturing September 2024, and a FHLB long-term fixed rate borrowing of $4.8 million at a stated rate of 5.2%, maturing March 2025.
  The Bank also pledges securities and certificates of deposit as collateral at the Federal Reserve Bank discount window for overnight borrowings and the "Bank Term Funding Program" (BTFP). The BTFP was established by the Federal Reserve Bank to provide additional funding to eligible depository institutions to meet the needs of their depositors. At June 30, 2024, approximately $46.7 million of collateral was available to be pledged against potential borrowings at the Federal Reserve Bank discount window and the BTFP, of which there were zero overnight borrowings outstanding with the discount window and $25.0 million outstanding with the BTFP. At June 30, 2023, there were zero overnight borrowings outstanding with the discount window and zero outstanding with the BTFP.
  At June 30, 2024, the BTFP consisted of $25.0 million long-term borrowing at a stated rate of 4.8%, maturing in January 2025.
  The Bank has established unsecured lines of credit with Atlantic Community Bankers Bank for $15.0 million and three other financial institutions for $75.0 million. The lines of credit provide for overnight borrowing and the interest rate is determined at the time of the borrowing. There were zero borrowings outstanding with these lines of credit for the Bank at June 30, 2024 and June 30, 2023.
  On September 17, 2020, the Company entered into Subordinated Note Purchase Agreements ("SNPA") with 14 qualified institutional investors, issued at 4.75% Fixed-to-Floating Rate due September 17, 2030, in the aggregate principal amount of $20.0 million, carried net of issuance costs of $424,000 amortized over a period of 60 months. These notes are callable on September 15, 2025. At June 30, 2024, there were $19.9 million of these SNPAs outstanding, net of issuance costs.
  On September 15, 2021, the Company entered into SNPAs with 18 qualified institutional investors, issued at 3.00% Fixed-to-Floating Rate due September 15, 2031, in the aggregate principal amount of $30.0 million, carried net of issuance costs of $499,000 amortized over a period of 60 months. These notes are callable on September 15, 2026. At June 30, 2024, there were $29.8 million of these SNPAs outstanding, net of issuance costs.
  The sales of the SNPAs were made in a private placement to accredited investors under the exemption from registration provided under Securities and Exchange Commission Rule 506. The Notes are not registered under the Securities Act of 1933, as amended ("Securities Act"), and may not be offered or sold in the United States absent registration or an applicable exemption from registration requirements.
  For regulatory purposes, the Company allocated the SNPAs to The Bank of Greene County to qualify as Tier 1 capital subject to a 25% of capital limitation under risk-based capital guidelines. The portion that exceeds the 25% of capital limitation qualifies as Tier 2 capital.
  At June 30, 2024, there were zero other long-term borrowings and therefore no scheduled maturities of long-term borrowings.

 </div> <div style="text-align: justify; font-weight: bold; font-family: 'Times New Roman'; font-size: 10pt;">Defined Benefit Plan</div> <div style="font-family: 'Times New Roman'; font-size: 10pt;">
 </div> <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt;">The Bank maintains a single-employer defined benefit pension plan (the “Pension Plan”). Effective January 1, 2006, the Board of Directors of the Bank resolved to exclude from membership in the Pension Plan employees hired on or after January 1, 2006 and elected to cease additional benefit accruals to existing Pension Plan participants effective July 1, 2006. Substantially all Bank employees who were hired before January 1, 2006 and attained the age of 21 are covered by the Pension Plan. Under the Pension Plan, retirement benefits are primarily a function of both years of service and level of compensation, at July 1, 2006. This defined benefit pension plan is accounted for in accordance with FASB ASC Topic 715 guidance on “Compensation – Retirement Benefits, Defined Benefit Plans - Pension”, which requires the Company to recognize in its consolidated financial statements an asset for a plan’s overfunded status or a liability for a plan’s underfunded status. Changes in the funded status of the single-employer defined benefit pension plan are reported as a component of other comprehensive income, net of applicable taxes, in the year in which changes occur.</div> <div>
</div> <div style="font-family: 'Times New Roman'; font-size: 10pt;">Information regarding the Pension Plan at June 30, 2024 and 2023 is as follows:</div> <div style="font-family: 'Times New Roman'; font-size: 10pt;">

  The discount rate used in the measurement of the Bank's pension obligation is based on the FTSE Pension Discount Curve and Liability index based on expected benefit payments of the pension plan. The discount rates are evaluated at each measurement date to give effect to changes in the general interest rates. The expected long-term rate of return on plan assets reflects the average rate of earnings expected on the funds invested or to be invested to provide for the benefits included in the projected benefit obligation. The selected rate considers the historical and expected future investment trends of the present and expected assets in the plan. Since this is a frozen plan, the compensation rate is zero percent.

 The weighted average asset allocation and fair value of our pension plan assets at June 30, 2024 and 2023 was as follows:
  <table cellpadding="0" cellspacing="0" class="cfttable" style="font-family: 'Times New Roman'; font-size: 10pt; text-align: left; color: #000000; width: 100%;"> <tr> <td style="vertical-align: bottom;" valign="bottom"> (Dollars in thousands) </td> <td colspan="1" style="vertical-align: bottom;" valign="bottom"> </td> <td colspan="6" style="vertical-align: bottom;" valign="bottom"> 2024

  The fair value of assets within the pension plan was determined utilizing a quoted price in active markets at the measurement date. As such, these assets are classified as Level 1 within the "Fair Value Measurement" hierarchy.
  The target allocation for investment in mutual funds is 60% consisting of short-term and intermediate-term fixed income bond funds and 40% large cap value funds. This allocation is consistent with the Company's goal of preserving capital while achieving investment results that will contribute to the proper funding of pension obligations and cash flow requirements. Asset rebalancing is performed on a quarterly basis, with adjustments made when the investment mix varies by more than 5% from the target.
  Expected benefit payments under the pension plan over the next ten years at June 30, 2024 are as follows:

  Defined Contribution Plan
  The Bank of Greene County also participates in a defined contribution plan (the "Contribution Plan") covering substantially all employees who have completed three months of service. The plan includes Section 401(k) and thrift provisions as defined under the Internal Revenue Code. The provisions permit employees to contribute up to 50% of their total compensation on a pre-tax basis. The Bank of Greene County matches employee contributions dollar for dollar for the first 3% and then 50% of the employee contributions up to the next 3%. The Company contributions associated with the contribution plan amounted to $520,000 and $483,000 in the years ended June 30, 2024 and 2023, respectively. <div style="font-family: 'Times New

Roman'; font-size: 10pt;">
  Employee Stock Ownership Plan ("ESOP")
  All Bank employees meeting certain age and service requirements are eligible to participate in the ESOP. Participants' benefits become fully vested after three years of service. During the years ended June 30, 2024 and 2023, the Board of Directors authorized the payment of $180,000 and $170,000, respectively, to the ESOP trustee for the purposes of purchasing additional shares of stock to be allocated to employees as of December 2024 and 2023, respectively. ESOP expense was $186,000 and $164,000 for the years ended June 30, 2024 and 2023, respectively. There were no unearned shares at June 30, 2024 or 2023.
 Supplemental Executive Retirement Plan
  On June 21, 2010, the Board of Directors of The Bank of Greene County adopted The Bank of Greene County Supplemental Executive Retirement Plan (the "SERP Plan"), effective as of July 1, 2010. The SERP Plan provides a benefit from the Bank upon retirement, death or disability or voluntary or involuntary termination of service (other than "for cause") to certain key senior executives of the Bank who are selected by the Board to participate. Accordingly, the SERP Plan obligates the Bank to make an allocation to each executive's account on the first business day of each July and permits each executive to defer up to 50% of his or her base salary and 100% of his or her annual bonus to the SERP Plan, subject to the requirements of Section 409A of the Internal Revenue Code ("Code"). In addition, the Bank may, but is not required to, make additional discretionary contributions to the executives' accounts from time to time. An executive becomes vested in the Bank's contributions after 10 calendar years of service following the effective date of the SERP Plan, and is fully vested immediately for all deferral of salary and bonus. However, the Executive will vest in the present value of his or her account in the event of death, disability or a change in control of the Bank or the Company. In the event the executive is terminated involuntarily or resigns for good reason following a change in control, the present value of all remaining Bank contributions is accelerated and paid to the executive's account, subject to potential reduction to avoid an excess parachute payment under Code Section 280G. In the event of the executive's death, disability or termination within two years after a change in control, executive's account will be paid in a lump sum to the executive or his beneficiary, as applicable. In the event the executive is entitled to a benefit from the SERP Plan due to retirement or other termination of employment, the benefit will be paid in 10 annual installments.
  The net periodic pension costs related to the SERP Plan for the years ended June 30, 2024 and 2023 were $2.2 million and $1.8 million, respectively, consisting primarily of service and interest costs. The total liability for the SERP was $15.2 million and $12.3 million as of June 30, 2024 and June 30, 2023, respectively, and is included in accrued expenses and other liabilities.</div> P21Y <div style="font-family: 'Times New Roman'; font-size: 10pt;">Information regarding the Pension Plan at June 30, 2024 and 2023 is as follows:</div> <div style="font-family: 'Times New Roman'; font-size: 10pt;">

  Phantom Stock Option Plan and Long-term Incentive Plan
  The Greene County Bancorp, Inc. 2011 Phantom Stock Option and Long Term Incentive Plan (the "Plan") was adopted effective July 1, 2011, to promote the long-term financial success of the Company and its subsidiaries by providing a means to attract, retain and reward individuals who contribute to such success and to further align their interests with those of the Company's shareholders. At June 30, 2024 and 2023, the Plan had 16,000,000 options authorized, of which, 13,026,099 and 12,354,004 options had been granted, respectively. The Plan is intended to provide benefits to employees and directors of the Company or any subsidiary as designated by the Compensation Committee of the Board of Directors of the Company ("Committee"). A phantom stock option represents the right to receive a cash payment on the date the award vests. The participant receives an amount equal to the positive difference between the strike price on the grant date and the book value of a share of the Company stock on the determination date, which is the last day of the plan year that is the end of the third plan year after the grant date of the award, unless otherwise specified by the Committee. The strike price will be the price established by the Committee, which will not be less than 100% of the book value of a share on a specified date, as determined under generally accepted accounting principles (GAAP) as of the last day of the quarter ending on or immediately preceding the valuation date with adjustments made, in the sole discretion of the Committee, to exclude accumulated other comprehensive income (loss). The liability for the phantom stock option plan is re-measured at each reporting period based on the difference between the strike price and the current period end book value per share of the Company's common stock, excluding accumulated other comprehensive income (loss).

  A summary of the Company's phantom stock option activity and related information for its option plan for the years ended June 30, 2024 and 2023 is as follows:

  Income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. The Company determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases at currently enacted income tax rates applicable to the period in which the deferred tax assets and liabilities are expected to be realized or settled.
  Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are reduced by a valuation allowance if, based on the weight of the evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized.
  The Company accounts for uncertain tax positions if it is more likely than not, based on technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances, and information available at the reporting date and is subject to management's judgments.
  The Company recognizes interest and penalties on income taxes, if any, as a component of the provision for income taxes.
  As of June 30, 2024 and 2023, the Company did not have any uncertain tax positions. The Company does not expect to have any changes in unrecognized tax benefits as a result of settlements with taxing authorities during the next twelve months. At June 30, 2024, The Bank of Greene County had an unrecaptured pre-1988 Federal bad debt reserve of approximately $1.8 million for which no Federal income tax provision has been made. A deferred tax liability has not been provided on this amount as management does not intend to redeem stock, make distributions or take other actions that would result in recapture of the reserve. As of June 30, 2024, tax years ended June 30, 2021 through June 30, 2023, remain open and are subject to Federal and New York State taxing authority examination.</div> <div style="font-family: 'Times New Roman'; font-size: 10pt; text-align: justify;">The provision for income taxes consists of the following for the years ended June 30, 2024 and 2023:</div> <div style="font-family: 'Times New Roman'; font-size: 10pt;">

  In the normal course of business, the Company offers financial instruments with off-balance sheet risk to meet the financing needs of its customers. These transactions include commitments to extend credit, standby letters of credit, and lines of credit, which involve, to varying degrees, elements of credit risk, which are not reflected in the accompanying consolidated financial statements.

 The Company's unfunded loan commitments and unused lines of credit are as follows at June 30, 2024 and 2023:
  <table cellpadding="0" cellspacing="0" class="cfttable" style="font-family: 'Times New Roman'; font-size: 10pt; text-align: left; color: #000000; width: 100%;"> <tr> <td style="vertical-align: bottom; padding-bottom: 2px;" valign="bottom"> (In thousands) </td> <td colspan="1" style="vertical-align: bottom; padding-bottom: 2px;" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0);" valign="bottom"> 2024 </td> <td colspan="1" style="text-align: left; vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="1" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0);" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0);" valign="bottom"> 2023 </td> <td colspan="1" style="text-align: left; vertical-align: bottom; padding-bottom: 2px; white-space: nowrap;" valign="bottom"> </td> </tr> <tr> <td style="vertical-align: bottom; width: 76%; background-color: #CCEEFF;" valign="bottom"> Unfunded loan commitments </td> <td colspan="1" style="text-align: right; vertical-align: bottom; width: 1%; background-color: #CCEEFF;" valign="bottom"> </td> <td colspan="1" style="text-align: left; vertical-align: bottom; width: 1%; background-color: #CCEEFF;" valign="bottom"> $ </td> <td colspan="1" style="vertical-align: bottom; text-align: right; width: 9%; background-color: #CCEEFF;" valign="bottom"> 107,966 </td> <td colspan="1" style="text-align: left; vertical-align: bottom; width: 1%; background-color: #CCEEFF; white-space: nowrap;" valign="bottom"> </td> <td colspan="1" style="text-align: right; vertical-align: bottom; width: 1%; background-color:

  The Company enters into contractual commitments to extend credit to its customers in the form of loan commitments and lines of credit, generally with fixed expiration dates and other termination clauses, and may require payment of a fee. Substantially all of the Company's commitments to extend credit are contingent upon its customers maintaining specific credit standards at the time of loan funding, and are often secured by real estate collateral. Since the majority of the Company's commitments typically expire without being funded, the total contractual amount does not necessarily represent the Company's future payment requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral, if any, required upon an extension of credit is based on management's evaluation of customer credit. Commitments to extend mortgage credit are primarily collateralized by first liens on real estate. Collateral on extensions of commercial lines of credit vary but may include accounts receivable, inventory, property, plant and equipment, and income producing commercial property.
  Allowance for Credit Losses on Unfunded Commitments
  The Company estimates expected credit losses over the contractual period in which the Company has exposure to a contractual obligation to extend credit, unless that obligation is unconditionally cancellable by the Company. The allowance for credit losses on unfunded commitments exposure is recognized in other liabilities and is adjusted as an expense in other noninterest expense. At June 30, 2024, the allowance for credit losses on unfunded commitments totaled $1.3 million.</div> <div>
 </div> <div style="text-align: justify; font-family: 'Times New Roman', Times, serif; font-size: 10pt;">The Company and its subsidiaries are, from time to time, parties to various legal proceedings arising out of their businesses. The Company believes that it is not a party to any pending legal, arbitration, or regulatory proceedings that would have a material adverse impact on the business, consolidated financial condition, results of operations or cash flows of the Company or any of its subsidiaries.</div> <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt;">The Company's unfunded loan commitments and unused lines of credit are as follows at June 30, 2024 and 2023:</div> <div style="font-family: 'Times New Roman'; font-size: 10pt;">

The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Company manages economic risks, including interest rate, primarily by managing the amount, sources and duration of its assets and liabilities. The Company has interest rate derivatives that result from a service provided to certain qualifying customers and, therefore, are not used to manage interest rate risk in the Company's assets or liabilities. The Company manages a matched book with respect to its derivative instruments in order to minimize its net risk exposure resulting from such transactions.

 <div style="color: rgb(0, 0, 0); font-family: 'Times New Roman', Times, serif; font-size: 13.3333px; font-style: normal; font-variant-ligatures: normal; font-variant-caps: normal; font-weight: 400; letter-spacing: normal; orphans: 2; text-indent: 0px; text-transform: none; widows: 2; word-spacing: 0px; -webkit-text-stroke-width: 0px; white-space: normal; text-decoration-thickness: initial; text-decoration-style: initial; text-decoration-color: initial; text-align: justify;">The Company enters into interest rate swap agreements with its commercial customers to provide them with a long-term fixed rate, while simultaneously entering into offsetting interest rate swap agreements with a counterparty to swap the fixed rate to a variable rate to manage interest rate exposure. These interest rate swap agreements are not designated as hedges for accounting purposes. As the interest rate swap agreements have substantially equivalent and offsetting terms, they do not present any material exposure to the Company's consolidated statements of income. The Company records its interest rate swap agreements at fair value and are presented within other assets and other liabilities on the consolidated statements of financial condition. Changes in the fair value of assets and liabilities arising from these derivatives are included, net, in other operating income in the consolidated statements of income. Under terms of the agreements with the third-party counterparties, the Company provides cash collateral to the counterparty, when required, for the initial trade. Subsequent to the trade, the margin is exchanged in either direction, based upon the estimated fair value of the underlying contracts. Cash collateral represents the amount that is exchanged under master netting agreements that allows the Company to offset the derivative position with the related collateral. The notional amount of the interest rate swaps does not represent amounts exchanged by the parties. The amount exchanged is determined by reference to the notional amount and the other terms of the individual interest rate swap agreements.

Under the terms of these agreements, the “participating bank” receives a fee from the “lead bank” in exchange for the guarantee of reimbursement if the customer defaults on an interest rate swap. The interest rate swap is transacted such that any and all exchanges of interest payments (favorable and unfavorable) are made between the lead bank and the customer. In the event that an early termination of the swap occurs and the customer is unable to make a required close out payment, the participating bank assumes that obligation and is required to make this payment.
 <div style="color: rgb(0, 0, 0); font-family: 'Times New Roman', Times, serif; font-size: 13.3333px; font-style: normal; font-variant-ligatures: normal; font-variant-caps: normal; font-weight: 400; letter-spacing: normal; orphans: 2; text-align: left; text-indent: 0px; text-transform: none; widows: 2; word-spacing: 0px; -webkit-text-stroke-width: 0px; white-space: normal; text-decoration-thickness: initial; text-decoration-style: initial; text-decoration-color: initial;">

 <div style="color: rgb(0, 0, 0); font-family: 'Times New Roman', Times, serif; font-size: 13.3333px; font-style: normal; font-variant-ligatures: normal; font-variant-caps: normal; font-weight: 400; letter-spacing: normal; orphans: 2; text-indent: 0px; text-transform: none; widows: 2; word-spacing: 0px; -webkit-text-stroke-width: 0px; white-space: normal; text-decoration-thickness: initial; text-decoration-style: initial; text-decoration-color: initial; text-align: justify;">RPAs in which the Company acts as the lead bank are referred to as “participations-out,” in reference to the credit risk associated with the customer derivatives being transferred out of the Company. Participations-out generally occur concurrently with the sale of new customer derivatives. At June 30, 2024, the Company’s exposure was reduced due to participations-outs in the amount of $105,000, with a notional amount of $8.0 million. There were no participations-out at June 30, 2023.
 <div style="color: rgb(0, 0, 0); font-family: 'Times New Roman', Times, serif; font-size: 13.3333px; font-style: normal; font-variant-ligatures: normal; font-variant-caps: normal; font-weight: 400; letter-spacing: normal; orphans: 2; text-align: left; text-indent: 0px; text-transform: none; widows: 2; word-spacing: 0px; -webkit-text-stroke-width: 0px; white-space: normal; text-decoration-thickness: initial; text-decoration-style: initial; text-decoration-color: initial;">

 <div style="color: rgb(0, 0, 0); font-family: 'Times New Roman', Times, serif; font-size: 13.3333px; font-style: normal; font-variant-ligatures: normal; font-variant-caps: normal; font-weight: 400; letter-spacing: normal; orphans: 2; text-indent: 0px; text-transform: none; widows: 2; word-spacing: 0px; -webkit-text-stroke-width: 0px; white-space: normal; text-decoration-thickness: initial; text-decoration-style: initial; text-decoration-color: initial; text-align: justify;">RPAs where the Company acts as the participating bank are referred to as “participations-in,” in reference to the credit risk associated with the counterparty’s derivatives being assumed by the Company. The Company’s maximum credit exposure is based on its proportionate share of the settlement amount of the referenced interest rate swap. Settlement amounts are generally calculated based on the fair value of the swap plus outstanding accrued interest receivables from the customer. The credit exposure associated with risk participations-ins was $276,000 and zero as of June 30, 2024 and June 30, 2023, respectively. The RPAs participations-ins are spread out over four financial institution counterparties and terms range between 4 to 13 years. At June 30, 2024 and June 30, 2023, the Company held RPAs with a notional amount of $112.3 million and $82.0 million, respectively.

 The Company leases certain branch properties under long-term, operating lease agreements. The Company's operating lease agreements contain non-lease components, which are generally accounted for separately. The Company's lease agreements do not contain any residual value guarantees. The following includes quantitative data related to the Company's operating leases as of June 30, 2024 and 2023:

   The Company grants residential, consumer and commercial loans to customers primarily located in the Hudson Valley and Capital District Regions of New York State, including Greene County. Over the last several years the Company has emphasized expansion into new markets in southern Albany, Columbia, Ulster and Rensselaer counties. Although the Company has a diversified loan portfolio, a substantial portion of its debtors' ability to honor their contracts is dependent upon employment and other economic factors throughout Greene and its contiguous counties. <table cellpadding="0" cellspacing="0" class="DSPFListTable" style="font-family: 'Times New Roman'; font-size: 10pt; width: 100%; text-align: left; color: #000000;"> <tr> <td style="width: 45pt; vertical-align: top; font-weight: bold;">Note 17.</td> <td style="width: auto; vertical-align: top;"> Fair Value Measurements and Fair Value of Financial Instruments </td> </tr> </table>
  Management uses its best judgment in estimating the fair value of the Company's financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Company could have realized in a sale transaction on the dates indicated. The estimated fair value amounts have been measured as of June 30, 2024 and 2023 and have not been re-evaluated or updated for purposes of these consolidated financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each period-end.
  The following information should not be interpreted as an estimate of the fair value of the entire Company since a fair value calculation is only provided for a limited portion of the Company's assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Company's disclosures and those of other companies may not be meaningful.
  The FASB ASC Topic on "Fair Value Measurement" established a fair value hierarchy that prioritized the inputs to valuation techniques used to measure fair value. The fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Fair value measurements are not adjusted for transaction costs. A fair value hierarchy exists within GAAP that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows: Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.   Level 2: Quoted prices for similar assets or liabilities in active markets, quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability.   Level 3: Prices or valuation techniques that require inputs that are both significant to the

fair value measurement and unobservable (i.e., supported with little or no market activity).   An asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.
  For assets measured at fair value on a recurring basis, the fair value measurements by level within the fair value hierarchy used are as follows:
  <table cellpadding="0" cellspacing="0" class="cfttable" style="font-family: 'Times New Roman'; font-size: 10pt; text-align: left; color: #000000; width: 100%;"> <tr> <td style="vertical-align: middle; padding-bottom: 2px;" valign="bottom"> </td> <td colspan="1" style="vertical-align: bottom; padding-bottom: 2px;" valign="bottom"> </td> <td colspan="2" style="vertical-align: middle;" valign="bottom"> </td> <td colspan="1" style="text-align: left; vertical-align: bottom; padding-bottom: 2px; white-space: nowrap;" valign="bottom"> </td> <td colspan="1" style="vertical-align: bottom; padding-bottom: 2px;" valign="bottom"> </td> <td colspan="10" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); border-top: 2px solid rgb(0, 0, 0);" valign="bottom"> Fair Value Measurements Using </td> <td colspan="1" style="text-align: left; vertical-align: bottom; padding-bottom: 2px; white-space: nowrap;" valign="bottom"> </td> </tr> <tr> <td style="vertical-align: middle;" valign="bottom"> </td> <td colspan="1" style="vertical-align: bottom;" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom;" valign="bottom"> </td> <td colspan="1" style="text-align: left; vertical-align: bottom; white-space: nowrap;" valign="bottom"> </td> <td colspan="1" style="text-align: center; vertical-align: bottom; white-space: nowrap;" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom; text-align: center; white-space: nowrap;" valign="bottom"> Quoted prices in active markets for identical assets </td> <td colspan="1" style="text-align: left; vertical-align: bottom; white-space: nowrap;" valign="bottom"> </td> <td colspan="1" style="text-align: center; vertical-align: bottom; white-space: nowrap;" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom; text-align: center; white-space: nowrap;" valign="bottom"> Significant other observable inputs </td> <td colspan="1" style="text-align: left; vertical-align: bottom; white-space: nowrap;" valign="bottom"> </td> <td colspan="1" style="text-align: center; vertical-align: bottom; white-space: nowrap;" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom; text-align: center; white-space: nowrap;" valign="bottom"> Significant unobservable inputs </td> <td colspan="1" style="text-align: left; vertical-align: bottom; white-space: nowrap;" valign="bottom"> </td> </tr> <tr> <td style="vertical-align: middle; border-bottom: 2px solid rgb(0, 0, 0);" valign="bottom"> (In thousands) </td> <td colspan="1" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> </td> <td colspan="2" style="vertical-align: bottom; border-bottom: 2px solid rgb(0, 0, 0); white-space: nowrap;" valign="bottom"> June 30, 2024

Other investment securities available-for-sale have been valued by reference to prices for similar securities or through model-based techniques in which all significant inputs are observable and, therefore, such valuations have been classified as Level 2.
  In addition to disclosures of the fair value of assets on a recurring basis, FASB ASC Topic on "Fair Value Measurement" requires disclosures for assets and liabilities measured at fair value on a nonrecurring basis, such as loans evaluated individually for expected credit losses in the period in which a re-measurement at fair value is performed. The Company uses the fair value of underlying collateral, less costs to sell, to estimate the allowance for credit losses for individually evaluated loans. Management may modify the appraised values, for qualitative factors such as economic conditions and estimated liquidation expenses ranging from 10% to 40%. Such modifications to the appraised values could result in lower valuations of such collateral. Based on the valuation techniques used, the fair value measurements for loans evaluated individually are classified as Level 3.
  Fair values for foreclosed real estate are initially recorded at the estimated fair value of the property less estimated costs to dispose at the time of acquisition to establish a new carrying value. Values are derived from appraisals, similar to loans evaluated individually for expected credit loss, of underlying collateral. Any write downs from the carrying value of the loan to estimated fair value, which are required at the time of foreclosure, are charged to the allowance for credit losses. Subsequent adjustments to the carrying value of such properties resulting from declines in fair value result in the establishment of a valuation allowance and are charged to operations in the period in which the declines occur. In the determination of fair value subsequent to foreclosure, management may modify the appraised values, for qualitative factors such as economic conditions and estimated liquidations expenses ranging from 10% to 60%. Such modifications to the appraised values could result in lower valuations of such collateral. Based on the valuation techniques used, the fair value measurements for foreclosed real estate are classified as Level 3.

*The carrying amounts reported in the statements of financial condition for total cash and cash equivalents, long term certificates of deposit, accrued interest receivable and accrued interest payable approximate their fair values. Fair values of securities are based on quoted market prices (Level 1), where available, or matrix pricing (Level 2), which is a mathematical technique, used widely in the industry to value debt securities without relying exclusively on quoted market prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted prices. The carrying amount of Federal Home Loan Bank stock approximates fair value due to its restricted nature. The fair values for loans are measured using the "exit price" notion which is a reasonable estimate of what another party might pay in an orderly transaction. Fair values for variable rate loans that reprice frequently, with no significant credit risk, are based on carrying value. Fair values for fixed rate loans are estimated using discounted cash flows and interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Fair values disclosed for demand and savings deposits are equal to carrying amounts at the reporting date. The carrying amounts for variable rate money market deposits approximate fair values at the reporting date. Fair values for long term certificates of deposit are estimated using discounted cash flows and interest rates currently being offered in the market on similar certificates. Fair value for Federal Home Loan Bank long term borrowings are estimated using discounted cash flows and interest rates currently being offered on similar borrowings. The carrying value of short-term Federal Home Loan Bank borrowings approximates its fair value. Fair value for subordinated notes payable is estimated based on a discounted cash flow methodology or observations of recent highly-similar transactions. Fair value for interest rate swaps include any accrued interest and are valued using the present value of cash flows discounted using observable forward rate assumptions. The Company has determined that the majority of the inputs used to value its derivatives fall within Level 2 of the fair value hierarchy.
  The carrying amounts and estimated fair value of financial instruments are as follows:
  <table cellpadding="0" cellspacing="0" class="cfttable" style="font-family: 'Times New Roman'; font-size: 10pt; text-align: left; color: #000000; width: 100%;"> <tr> <td style="vertical-align: middle; padding-bottom: 2px;" valign="bottom">

In addition to disclosures of the fair value of assets on a recurring basis, FASB ASC Topic on “Fair Value Measurement” requires disclosures for assets and liabilities measured at fair value on a nonrecurring basis, such as loans evaluated individually for expected credit losses in the period in which a re-measurement at fair value is performed. The Company uses the fair value of underlying collateral, less costs to sell, to estimate the allowance for credit losses for individually evaluated loans. Management may modify the appraised values, for qualitative factors such as economic conditions and estimated liquidation expenses ranging from 10% to 40%. Such modifications to the appraised values could result in lower valuations of such collateral. Based on the valuation techniques used, the fair value measurements for loans evaluated individually are classified as Level 3.

  Fair values for foreclosed real estate are initially recorded at the estimated fair value of the property less estimated costs to dispose at the time of acquisition to establish a new carrying value. Values are derived from appraisals, similar to loans evaluated individually for expected credit loss, of underlying collateral. Any write downs from the carrying value of the loan to estimated fair value, which are required at the time of foreclosure, are charged to the allowance for credit losses. Subsequent adjustments to the carrying value of such properties resulting from declines in fair value result in the establishment of a valuation allowance and are charged to operations in the period in which the declines occur. In the determination of fair value subsequent to foreclosure, management may modify the appraised values, for qualitative factors such as economic conditions and estimated liquidations expenses ranging from 10% to 60%. Such modifications to the appraised values could result in lower valuations of such collateral. Based on the valuation techniques used, the fair value measurements for foreclosed real estate are classified as Level 3.

  The Bank of Greene County and its wholly-owned subsidiary, Greene County Commercial Bank, are subject to various regulatory capital requirements administered by federal banking agencies. Failure to meet minimum capital requirements can result in certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material impact on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank and the Commercial Bank must meet specific guidelines that involve quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.
  Quantitative measures established by regulation to ensure capital adequacy require The Bank of Greene County and Greene County Commercial Bank to maintain minimum amounts and ratios (set forth in the table below) of Total and Tier 1 Capital to risk-weighted assets and a Leverage Ratio of Tier 1 capital to average assets. The rules also requires unrealized gains and losses on certain security holdings "available-for-sale" to be included for purposes of calculating regulatory capital unless a one-time opt-out is exercised. In addition to maintaining minimum capital ratios, the Bank and Commercial Bank are subject to a capital conservation buffer ("Buffer") of 2.50% above the minimum to avoid restriction on capital distributions and certain discretionary bonus payments. Management believes that, as of June 30, 2024, The Bank of Greene County and Greene County Commercial Bank met all capital adequacy requirements to which they are subject.
   Under their prompt corrective action regulations, regulatory authorities are required to take certain supervisory actions (and may take additional discretionary actions) with respect to an undercapitalized institution. Such actions could have a direct material effect on an institution's financial statements. The regulations establish a framework for the classification of banks into five categories: well-capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized. As of June 30, 2024, the most recent notification from regulators categorized the Bank and Commercial Bank as "well capitalized" under the regulatory framework for prompt corrective action. There are no conditions or events since that notification that management believes have changed either Bank's category.
