UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2023 September 30, 2023
or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to
Commission File Number: 001-36522

Investar Holding Corporation
(Exact name of registrant as specified in its charter)

Louisiana 27-1560715

(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

10500 Coursey Boulevard, Baton Rouge, Louisiana 70816

(Address of principal executive offices, including zip code)

(225) 227-2222

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Trading Symbol(s)

Name of each exchange on which registered

Common stock, \$1.00 par value per share

ISTR

The Nasdaq Global Market

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of the issuer's class of common stock, as of the latest practicable date, is as follows: Common stock, \$1.00 par value, **9,831,232** **9,759,688** shares outstanding as of **July 31, 2023** **October 30, 2023**.

INVESTAR HOLDING CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Uaudited)

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying unaudited consolidated financial statements of Investar Holding Corporation (the "Company") have been prepared in accordance with United States generally accepted accounting principles ("GAAP") for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include information or footnotes necessary for a complete presentation of financial position, results of operations, and cash flows in conformity with GAAP. However, in the opinion of management, all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation of the financial statements have been included. The results of operations for the three and **six** **nine** month periods ended **June** **September** 30, 2023 are not necessarily indicative of the results that may be expected for the entire fiscal year. These statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2022, including the notes thereto, which were included as part of the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission ("SEC") on March 8, 2023.

Nature of Operations

The Company is a financial holding company, headquartered in Baton Rouge, Louisiana that provides full banking services, excluding trust services, through its wholly-owned banking subsidiary, Investar Bank, National Association (the "Bank"), a national bank, primarily to meet the needs of individuals, professionals and small to medium-sized medium-sized businesses. The Company's primary markets are in south Louisiana, southeast Texas and Alabama. At **June** **September** 30, 2023, the Company operated 20 full service branches located in Louisiana, two full service branches located in Texas and **six** **seven** full service branches located in Alabama and had **338** **328** full-time equivalent equivalent employees.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, the Bank. All significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates, and such differences could be material.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for credit losses. While management uses available information to recognize credit losses on loans, future additions to the allowance may be necessary based on changes in economic conditions, changes in conditions of our borrowers' industries or changes in the condition of individual borrowers. As described below under "Accounting Standards Adopted in 2023," the Company adopted Accounting Standards Update ("ASU") 2016-13 effective January 1, 2023, which changed how the Company accounts for the allowance for credit losses. In addition, regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for credit losses. Such agencies may require the Company to recognize additions to the allowance based on their judgments about information available to them at the time of their examination. Because of these factors, it is reasonably possible that the allowance for credit losses may change materially in the near term. However, the amount of the change that is reasonably possible cannot be estimated.

Other estimates that are susceptible to significant change in the near term relate to the allowance for off-balance sheet credit losses, the fair value of stock-based compensation awards, the determination of other-than-temporary impairments of securities, and the fair value of financial instruments and goodwill. Rapidly changing inflation rates and rising interest rates have made certain estimates more challenging, including those discussed above.

Acquisition Accounting - Loan Purchase Agreement

In August 2023, the Company entered into a loan purchase agreement to acquire commercial and industrial revolving lines of credit, and related accrued interest, with an unpaid principal balance of \$162.7 million in two tranches. The purchase of the first tranche, consisting of revolving lines of credit with an unpaid principal balance of \$35.8 million and total commitments of \$61.1 million, was completed on September 15, 2023. The purchase of the second tranche, consisting of revolving lines of credit with an unpaid principal balance of \$127.0 million and total commitments of \$176.7 million, was completed on October 3, 2023. The revolving lines of credit are variable-rate and short-term in nature with varying renewal terms. See Note 12, Subsequent Events.

The Company follows the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 805, "Business Combinations" ("ASC 805") to determine the appropriate accounting treatment for an acquisition. ASC 805 prescribes an initial fair value screen to determine if substantially all of the fair value of the assets acquired is concentrated in a single asset or group of similar assets. If the initial screen test is met, the assets acquired represent an asset acquisition rather than a business combination. If the transaction is deemed to be an asset acquisition, the cost accumulation and allocation model is used in which the cost of the acquisition is allocated on a relative fair value basis to the assets acquired. The Company concluded that the loan purchase agreement did not qualify as a business combination as substantially all of the fair value of the assets acquired is concentrated in a single group of similar assets and accounted for it as an asset acquisition in accordance with ASC 805 using a cost accumulation and allocation model.

Reclassifications

Certain reclassifications have been made to prior period balances to conform to the current period presentation.

Accounting Standards Adopted in 2023

FASB ASC Topic 326 "Financial Instruments – Credit Losses: Measurement of Credit Losses on Financial Instruments" Update No. 2016-13 ("ASU 2016-13"). ASU 2016-13 became effective for the Company as a smaller reporting company on January 1, 2023. ASU 2016-13, also referred to as the Current Expected Credit Loss ("CECL") standard, requires financial assets measured on an amortized cost basis, including loans and held to maturity ("HTM") debt securities, to be presented at an amount net of an allowance for credit losses, which reflects expected losses for the full life of the financial asset. Unfunded lending commitments are also within the scope of this topic.

CECL requires the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts and requires enhanced disclosures related to the significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization's portfolio. The CECL methodology requires that lifetime expected credit losses be recorded at the time the financial asset is originated or acquired and be adjusted each period as a provision for credit losses for changes in expected lifetime credit losses. Under prior GAAP, credit losses were not recognized until the occurrence of the loss was probable, and entities, in general, did not attempt to estimate credit losses for the full life of financial assets.

ASU 2016-13 does not specify the method for measuring expected credit losses, and an entity is allowed to apply methods that reasonably reflect its expectations of the lifetime credit loss estimate. The Company developed a CECL model methodology that calculates expected credit losses over the life of the portfolio by analyzing the composition, characteristics and quality of the loan and securities portfolios, as well as prevailing economic conditions and forecasts. The Company's CECL calculation estimates loan losses using a combination of discounted cash flow and remaining life analyses. To the extent the lives of the loans in the portfolio extend beyond the period for which a reasonable and supportable forecast can be made, when necessary, the model reverts back to the historical loss rates adjusted for qualitative factors related to current conditions using a four-quarter reversion period. The Company adopted ASU 2016-13 using the modified retrospective approach for all loans and off-balance sheet credit exposures measured at amortized cost, other than purchased credit deteriorated ("PCD") financial assets. Results for reporting periods beginning after December 31, 2022 are presented in accordance with ASU 2016-13 while prior period amounts continue to be reported in accordance with previously applicable GAAP.

ASU 2016-13 also amended the accounting model for purchased financial assets and replaced the guidance for purchased credit impaired ("PCI") financial assets with the concept of PCDs. For PCD assets, the CECL estimate is recognized through the allowance for credit losses with an offset to the amortized cost basis of the PCD asset at the date of acquisition. Subsequent changes in the allowance for credit losses for PCD assets are recognized through a provision for credit losses on loans. The Company used the prospective transition approach for PCD loans that were previously classified as PCI and accounted for under ASC 310-30, *"Loans and Debt Securities Acquired with Deteriorated Credit Quality"* ("ASC 310-30"). As permitted under ASU 2016-13, the Company did not reassess whether PCI assets meet the criteria of PCD assets as of the date of adoption.

The Company adopted ASU 2016-13 on January 1, 2023, and recorded a one-time, cumulative effect adjustment as shown in the table below (dollars in thousands).

	Impact of ASU 2016-13		
	December 31, 2022	Adoption	January 1, 2023
Assets:			
Allowance for credit losses	\$ (24,364)	\$ (5,865)	\$ (30,229)
Deferred tax asset	16,438	1,142	17,580
Remaining purchase discount on loans(1)	(818)	422	(396)
Liabilities:			
Reserve for unfunded loan commitments(2)	372	(6)	366
Stockholders' Equity			
Retained earnings	108,206	(4,295)	103,911

(1) For PCD loans, formerly classified as PCI, the Company applied the guidance under CECL using the prospective transition approach. As a result, the Company adjusted the amortized cost basis of the PCD loans to reclassify the purchase discount to the allowance for credit losses on January 1, 2023.

(2) The allowance for credit losses on unfunded loan commitments is included in "Accrued taxes and other liabilities" in the accompanying consolidated balance sheets. The related provision for credit losses on unfunded loan commitments is included in "Provision for credit losses" in the accompanying consolidated statements of income for the three and **six nine** months ended **June** **September** 30, 2023.

In addition, ASU 2016-13 amends the accounting for credit losses on available for sale ("AFS") securities, requiring expected credit losses on AFS securities to be recorded in an allowance for credit losses rather than as a write-down of the securities' amortized cost basis when management does not intend to sell or believes that it is not more likely than not that they will be required to sell the securities prior to recovery of the securities' amortized cost basis. If management has the intent to sell or believes it is more likely than not the Company will be required to sell an impaired available for sale security before recovery of the amortized cost basis, the credit loss is recorded as a direct write-down of the amortized cost basis. Declines in the fair value of AFS securities that are not considered credit related are recognized in accumulated other comprehensive income. In addition, expected credit losses on HTM securities are required to be recorded in an allowance for credit losses rather than as a write-down of the securities' amortized cost basis. The Company's AFS and HTM securities portfolios were not materially impacted by the adoption of ASU 2016-13 due to the composition of the portfolios, which consists primarily of

U.S. Treasury and U.S. government agencies and corporations securities and mortgage-backed securities. Due to the nature of the investments, current market prices, and the current interest rate environment, the Company determined that the declines in the fair values of the HTM and AFS securities portfolio were not attributable to credit losses. The Company will apply the provisions of ASU 2016-13 to debt securities that have an other-than-temporary impairment on a prospective basis. Accordingly, there was no adjustment made to the amortized cost basis upon adoption. The adoption of ASU 2016-13 did not have a significant impact on the Company's regulatory capital ratios.

The allowance for credit losses is measured on a pool basis when similar risk characteristics exist and is maintained at an amount which management believes is a current estimate of the expected credit losses for the full life of the relevant pool of loans and related unfunded lending commitments. For modeling purposes, loan pools include: agriculture and farmland, automotive, commercial and industrial, construction and development, commercial real estate - non-owner occupied nonowner-occupied and multifamily, commercial real estate - owner occupied, owner-occupied, credit cards, home equity lines of credit and junior liens, consumer, residential senior liens, and other loans, which primarily consist of public finance. Management periodically reassesses each pool to confirm the loans within the pool continue to share similar characteristics and risk profiles and to determine whether further segmentation is necessary. The loss rates computed for each pool and expected pool-level funding rates are applied to the related unfunded lending commitments to calculate an allowance for credit losses.

Loans that do not share similar risk characteristics with other loans are excluded from the loan pools and individually evaluated for impairment. Individually evaluated loans are loans for which it is probable that all the amounts due under the contractual terms of the loan will not be collected.

FASB ASC Topic 326 "Financial Instruments – Credit Losses, Troubled Debt Restructurings and Vintage Disclosures" Update No. 2022-02 ("ASU 2022-02"). ASU 2022-02 became effective for the Company on January 1, 2023 and is applied prospectively. ASU 2022-02 amends Topic 326 to eliminate the accounting guidance for troubled debt restructurings ("TDRs") by creditors that have adopted ASU 2016-13 and, instead, requires that an entity evaluate whether the modification represents a new loan or a continuation of an existing loan. The amendment also requires that public business entities disclose current-period gross charge-offs by year of origination for financing receivables and net investments in leases. The adoption of ASU 2022-02 did not have a material impact on the Company's consolidated financial statements.

FASB ASC Topic 848 "Reference Rate Reform: Facilitation of the Effects of Reference Rate Reform on Financial Reporting" Update No. 2020-04 ("ASU 2020-04") and FASB ASC Topic 848 "Reference Rate Reform: Deferral of the Sunset Date" Update No. 2022-06 ("ASU 2022-06"). In March 2020, the FASB issued ASU 2020-04, which is intended to provide temporary optional expedients and exceptions to the GAAP guidance on contract modifications and hedge accounting to ease the financial reporting burdens related to the expected market transition from the London Interbank Offered Rate ("LIBOR") and other interbank offered rates to alternative reference rates. ASU 2020-04 became effective as of March 12, 2020 and could be adopted any time during the period of January 1, 2020 through December 31, 2022. In December 2022, the FASB issued ASU 2022-06, which deferred the sunset date of ASU 2020-04 from December 31, 2022 to December 31, 2024. The Company implemented a plan to transition all loans and other financial instruments, including certain indebtedness, with attributes that are either directly or indirectly influenced by LIBOR to its preferred replacement index, the Secured Overnight Financing Rate ("SOFR"). As of June September 30, 2023, the Company has transitioned all loans and certain indebtedness. The adoption of ASU 2022-06 did not have a material impact on the Company's consolidated financial statements.

Unrealized losses are generally due to changes in market interest rates. The Company has the intent to hold these securities either until maturity or a forecasted recovery, and it is more likely than not that the Company will not have to sell the securities before the recovery of their amortized cost basis. Due to the nature of the investments, current market prices, and the current interest rate environment, the Company determined that these declines were not attributable to credit losses at **June** **September** 30, 2023 or December 31, 2022.

Accrued interest receivable on the Company's investment securities was \$1.9 million and \$1.7 million at both **June** **September** 30, 2023 and December 31, 2022, respectively, and is included in "Accrued interest receivable" on the accompanying consolidated balance sheets.

At **June** **September** 30, 2023, securities with a carrying value of **\$357.0** **\$322.4** million were pledged to secure certain deposits, borrowings, and other liabilities, compared to \$165.7 million in pledged securities at December 31, 2022.

Equity Securities

Equity securities primarily consist of Federal Home Loan Bank ("FHLB") stock and Federal Reserve Bank of Atlanta ("FRB") stock. Members of the FHLB and FRB are required to own a certain amount of stock based on the level of borrowings and other factors and may invest in additional amounts. FHLB stock and FRB stock is carried at cost, is restricted as to redemption, and is periodically evaluated for impairment based on the ultimate recovery of par value. Both cash and stock dividends are reported as income. Equity securities also include investments in our other correspondent banks including Independent Bankers Financial Corporation and First National Bankers Bank stock. These investments are carried at cost which approximates fair value. The balance of equity securities in our correspondent banks at **June** **September** 30, 2023 and December 31, 2022 was **\$13.8** **\$12.2** million and \$26.0 million, respectively.

In addition, equity securities include marketable securities in corporate stocks and mutual funds and totaled **\$1.1** million and **\$1.2** million at **both** **June** **September** 30, 2023 and December 31, 2022, respectively.

Total loans	<hr/> \$ 2,084,863	<hr/> \$ 2,104,767	<hr/> \$ 2,103,022	<hr/> \$ 2,104,767

Interest on loans is calculated by using the simple interest method on daily balances of the principal amount outstanding. Loan origination fees, net of direct loan origination costs and commitment fees, are deferred and amortized as an adjustment to yield over the life of the loan, or over the commitment period, as applicable. Unamortized premiums and discounts on loans, included in the total loans balances above, were \$0.2 million and \$0.8 million at **June** **September** 30, 2023 and December 31, 2022, respectively, and unearned income, or deferred fees, on loans was **\$1.1** **\$1.2** million and \$1.3 million at **June** **September** 30, 2023 and December 31, 2022, respectively and is also included in the total loans balance in the table above.

Nonaccrual and Past Due Loans

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on nonaccrual status when, in management's opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by regulatory provisions. In determining whether or not a borrower may be unable to meet payment obligations for each class of loans, the borrower's debt service capacity is considered through the analysis of current financial information, if available, and/or current information with regard to the collateral position. Regulatory provisions would typically require the placement of a loan on nonaccrual status if (i) principal or interest has been in default for a period of 90 days or more unless the loan is both well secured and in the process of collection or (ii) full payment of principal and interest is not expected. Loans may be placed on nonaccrual status regardless of whether or not such loans are considered past due. When interest accrual is discontinued, all unpaid accrued interest is reversed. Interest income on nonaccrual loans is recognized only to the extent that cash payments are received in excess of principal due. A loan may be returned to accrual status when all the principal and interest amounts contractually due are brought current and payment of future principal and interest amounts contractually due are reasonably assured, which is typically evidenced by a sustained period (at least six months) of repayment performance by the borrower. No material interest income was recognized in the consolidated statements of income on nonaccrual loans for the nine months ended September 30, 2023 and 2022.

Collateral Dependent Loans

Collateral dependent loans are loans for which the repayments, on the basis of our assessment at the reporting date, are expected to be provided substantially through the operation or sale of the collateral and the borrower is experiencing financial difficulty. Loans that do not share risk characteristics are excluded from the loan pools and evaluated on an individual basis, and the Company has determined to evaluate collateral dependent loans individually for impairment. The allowance for credit losses for collateral dependent loans is measured based on the difference between the fair value of the collateral and the amortized cost basis of the asset as of the measurement date. When repayment is expected to be from the operation of the collateral, expected credit losses are calculated as the amount by which the amortized cost basis of the financial asset exceeds the present value of expected cash flows from the operation of the collateral. When repayment is expected to be from the sale of the collateral, expected credit losses are calculated as the amount by which the amortized cost basis of the financial asset exceeds the fair value of the underlying collateral less estimated cost to sell. The Company's collateral dependent loans include all nonaccrual loans shown in the table above. The types of collateral that secure collateral dependent loans are discussed under "Portfolio Segment Risk Factors" below.

INVESTAR HOLDING CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Portfolio Segment Risk Factors

The following describes the risk characteristics relevant to each of the Company's loan portfolio segments.

Construction and Development - Construction and development loans are generally made for the purpose of acquisition and development of land to be improved through the construction of commercial and residential buildings. The successful repayment of these types of loans is generally dependent upon a commitment for permanent financing from the Company, or from the sale of the constructed property. These loans carry more risk than commercial or residential real estate loans due to the dynamics of construction projects, changes in interest rates, the long-term financing market, and state and local government regulations. One such risk is that loan funds are advanced upon the security of the property under construction, which is of uncertain value prior to the completion of construction. Thus, it is more difficult to evaluate accurately the total loan funds required to complete a project and to calculate related loan-to-value ratios. The Company attempts to minimize the risks associated with construction lending by limiting loan-to-value ratios as described above. In addition, as to speculative development loans, the Company generally makes such loans only to borrowers that have a positive pre-existing relationship with us. The Company manages risk by using specific underwriting policies and procedures for these types of loans and by avoiding excessive concentrations in any one business or industry. Construction and development loans are primarily secured by residential and commercial properties, which are under construction and/or redevelopment.

1-4 Family - The 1-4 family portfolio mainly consists of residential mortgage loans to consumers to finance a primary residence. The majority of these loans are secured by first liens on residential properties located in the Company's market areas and carry risks associated with the creditworthiness of the borrower and changes in the value of the collateral and

loan-to-value-ratios. The Company manages these risks through policies and procedures such as limiting loan-to-value ratios at origination, employing experienced underwriting personnel, requiring standards for appraisers, and not making subprime loans.

Multifamily - Multifamily loans are normally made to real estate investors to support permanent financing for multifamily residential income producing properties that rely on the successful operation of the property for repayment. This management mainly involves property maintenance and collection of rents due from tenants. This type of lending carries a lower level of risk, as compared to other commercial lending. In addition, underwriting requirements for multifamily properties are stricter than for other non-owner-occupied property types. The Company manages this risk by avoiding concentrations with any particular customer. Multifamily loans are primarily secured by first liens on multifamily real estate.

Farmland - Farmland loans are often for land improvements related to agricultural endeavors and may include construction of new specialized facilities. These loans are usually repaid through the conversion to permanent financing, or if scheduled loan amortization begins, for the long-term benefit of the borrower's ongoing operations. Underwriting generally involves intensive analysis of the financial strength of the borrower and guarantor, liquidation value of the subject collateral, the associated unguaranteed exposure, and any available secondary sources of repayment, with the greatest emphasis given to a borrower's capacity to meet cash flow coverage requirements as set forth by Bank policies. Farmland loans are primarily secured by raw land.

Commercial Real Estate - Commercial real estate loans are extensions of credit secured by owner occupied and non-owner occupied nonowner-occupied collateral. Underwriting generally involves intensive analysis of the financial strength of the borrower and guarantor, liquidation value of the subject collateral, the associated unguaranteed exposure, and any available secondary sources of repayment, with the greatest emphasis given to a borrower's capacity to meet cash flow coverage requirements as set forth by Bank policies. Commercial real estate loans typically depend on the successful operation and management of the businesses that occupy these properties or the financial stability of tenants occupying the properties. Nonowner-occupied commercial real estate loans typically are dependent, in large part, on the owner's ability to rent the property and the ability of the tenants to pay rent, whereas owner-occupied commercial real estate loans typically are dependent, in large part, on the success of the owner's business. General market conditions and economic activity may impact the performance of these types of loans, including fluctuations in the value of real estate, new job creation trends, and tenant vacancy rates. The Company attempts to limit risk by analyzing a borrower's cash flow and collateral value on an ongoing basis. The Company also typically requires personal guarantees from the principal owners of the property, supported by a review of their personal financial statements, as an additional means of mitigating our risk. The Company manages risk by avoiding concentrations in any one business or industry. Commercial real estate loans are primarily secured by office and industrial buildings, warehouses, retail shopping facilities and various special purpose commercial properties.

INVESTAR HOLDING CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Commercial and Industrial - Commercial and industrial loans receive similar underwriting treatment as commercial real estate loans in that the repayment source is analyzed to determine its ability to meet cash flow coverage requirements as set forth by Bank policies. Repayment of these loans generally comes from the generation of cash flow as the result of the borrower's business operations. Commercial lending generally involves different risks from those associated with commercial real estate lending or construction lending. Although commercial loans may be collateralized by equipment or other business assets (including real estate, if available as collateral), the repayment of these types of loans depends primarily on the creditworthiness and projected cash flow of the borrower (and any guarantors). Thus, the general business conditions of the local economy and the borrower's ability to sell its products and services, thereby generating sufficient operating revenue to repay us under the agreed upon terms and conditions, are the chief considerations when assessing the risk of a commercial loan. The liquidation of collateral, if any, is considered a secondary source of repayment because equipment and other business assets may, among other things, be obsolete or of limited resale value. The Company actively monitors certain financial measures of the borrower, including advance rate, cash flow, collateral value and other appropriate credit factors. Commercial and industrial loans also include public finance loans made to governmental entities, which can be taxable or tax-exempt, and are generally repaid using pledged revenue sources including income tax, property tax, sales tax, and utility revenue, among other sources. Commercial and industrial loans are primarily secured by accounts receivable, inventory and equipment.

Consumer - Consumer loans are offered by the Company in order to provide a full range of retail financial services to its customers and include auto loans, credit cards, and other consumer installment loans. Typically, the Company evaluates the borrower's repayment ability through a review of credit scores and an evaluation of debt to income ratios. Repayment of consumer loans depends upon key consumer economic measures and upon the borrower's financial stability and is more likely to be adversely affected by divorce, job loss, illness and personal hardships than repayment of other loans. A shortfall in the value of any collateral also may pose a risk of loss to the Company for these types of loans. Consumer loans include loans primarily secured by vehicles and unsecured loans.

Refer to Note 1. Summary of Significant Accounting Policies – Accounting Standards Adopted in 2023 for loan pools used for modeling purposes, which are aggregated into the portfolio segments shown above.

Credit Quality Indicators

Loans are categorized into risk categories based on relevant information about the ability of borrowers to service their debt, such as current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The following definitions are utilized for risk ratings, which are consistent with the definitions used in supervisory guidance:

Pass - Loans not meeting the criteria below are considered pass. These loans have high credit characteristics and financial strength. The borrowers at least generate profits and cash flow that are in line with peer and industry standards and have debt service coverage ratios above loan covenants and our policy guidelines. For some of these loans, a guaranty from a financially capable party mitigates characteristics of the borrower that might otherwise result in a lower grade.

Special Mention - Loans classified as special mention possess some credit deficiencies that need to be corrected to avoid a greater risk of default in the future. For example, financial ratios relating to the borrower may have deteriorated. Often, a special mention categorization is temporary while certain factors are analyzed or matters addressed before the loan is re-categorized as either pass or substandard.

Substandard - Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the borrower or the liquidation value of any collateral. If deficiencies are not addressed, it is likely that this category of loan will result in the Bank incurring a loss. Where a borrower has been unable to adjust to industry or general economic conditions, the borrower's loan is often categorized as substandard.

Doubtful - Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loss - Loans classified as loss are considered uncollectible and of such little value that their continuance as recorded assets is not warranted. This classification does not mean that the assets have absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off these assets.

Loan Participations and Sold Loans

Loan participations and whole loans sold to and serviced for others are not included in the accompanying consolidated balance sheets. The balance of the participations and whole loans sold was \$25.0 million and \$16.9 million at June 30, 2023 and December 31, 2022, respectively. The unpaid principal balance of these loans was approximately \$104.6 million and \$92.9 million at June 30, 2023 and December 31, 2022, respectively.

Loans to Related Parties

In the ordinary course of business, the Company makes loans to related parties including its executive officers, principal stockholders, directors and their immediate family members, as well as to companies of which these individuals are principal owners. Loans outstanding to such related party borrowers amounted to approximately \$50.3 million and \$97.0 million as of June 30, 2023 and December 31, 2022, respectively.

The table below shows the aggregate principal balance of loans to such related parties as of the dates presented (dollars in thousands).

Allowance for Credit Losses

Effective January 1, 2023, the Company adopted ASU 2016-13, which uses the CECL accounting methodology for the allowance for credit losses. The CECL methodology requires that lifetime expected credit losses be recorded at the time the financial asset is originated or acquired, and be adjusted each period as a provision for credit losses for changes in expected lifetime credit losses. The Company developed a CECL model methodology that calculates expected credit losses over the life of the portfolio by analyzing the composition, characteristics and quality of the loan portfolio, as well as prevailing economic conditions and forecasts. The CECL calculation estimates credit losses using a combination of discounted cash flow and remaining life analyses. The Company evaluates the adequacy of the allowance for credit losses on a quarterly basis.

The allowance for credit losses is comprised of reserves measured on a collective (pool) basis based on a lifetime loss-rate model when similar risk characteristics exist. For each pool of loans, the Company evaluates and applies qualitative adjustments to the calculated allowance for credit losses based on several factors, including, but not limited to, changes in current and expected future economic conditions, changes in the nature and volume of the portfolio, changes in levels of concentrations, changes in the volume and severity of past due loans, changes in lending policies and personnel and changes in the competitive and regulatory environment of the banking industry. Loans that do not share similar risk characteristics with other loans are excluded from the loan pools and individually evaluated for impairment. For collateral dependent loans where the borrower is experiencing financial difficulty, which we evaluate independently from the loan pool, the expected credit loss is measured as the difference between the amortized cost basis of the loan and the fair value of the collateral, which is based on third party appraisals. Individually evaluated loans that are not collateral dependent are evaluated based on a discounted cash flow methodology. Credits deemed uncollectible are charged to the allowance for credit losses. Provisions for credit losses and recoveries on loans previously charged off are adjustments to the allowance for credit losses.

Refer to Note 1. Summary of Significant Accounting Policies for more information on the adoption of ASU 2016-13.

The Company made the accounting policy election to exclude accrued interest receivable from the amortized cost of loans and the estimate of the allowance for credit losses. Accrued interest receivable on the Company's loans was \$11.0 million and \$11.6 million and \$10.8 million at June 30, 2023 and December 31, 2022, respectively, and is included in "Accrued interest receivable" on the accompanying consolidated balance sheets.

The table below shows a summary of the activity in the allowance for credit losses for the three and **six nine** months ended **June September** 30, 2023 and 2022 (dollars in thousands).

Loan Modifications to Borrowers Experiencing Financial Difficulty

In January 2023, the Company adopted ASU 2022-02, which eliminated the accounting guidance for TDRs while enhancing disclosure requirements for certain loan refinancing and restructurings by creditors when a borrower is experiencing financial difficulty. ASU 2022-02 became effective for us on January 1, 2023. See Note 1. Summary of Significant Accounting Policies – Accounting Standards Adopted in 2023.

Occasionally, the Company modifies loans to borrowers in financial distress by providing certain concessions, such as principal forgiveness, term extension, an other-than-insignificant payment delay, an interest rate reduction, or a combination of such concessions. When principal forgiveness is provided, the amount of forgiveness is charged-off against the allowance for credit losses. Upon the Company's determination that a modified loan (or portion of a loan) has subsequently been deemed uncollectible, the loan (or portion of the loan) is written off. During the three and **six** **nine** months ended **June** **September** 30, 2023, the Company did not provide any modifications under these circumstances to borrowers experiencing financial difficulty.

INVESTAR HOLDING CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Uaudited)

The following disclosures are presented under GAAP in effect prior to the adoption of CECL that are no longer applicable or required. The Company has included these disclosures to address the applicable prior periods.

Pre-Adoption of CECL - Impaired Loans

The Company considered a loan to be impaired when, based on current information and events, the Company determined that it was probable that it would not be able to collect all amounts due according to the loan agreement, including scheduled interest payments. Determination of impairment was treated the same across all classes of loans. When the Company identified a loan as impaired, it measured the impairment based on the present value of expected future cash flows, discounted at the loan's effective interest rate, except when the sole (remaining) source of repayment for the loans was the operation or liquidation of the collateral. In these cases when foreclosure was probable, the Company used the current fair value of the collateral, less selling costs, instead of discounted cash flows. If the Company determined that the value of the impaired loan was less than the recorded investment in the loan (net of previous charge-offs, deferred loan fees or costs, and unamortized premium or discount), the Company recognized impairment through an allowance estimate or a charge-off to the allowance.

When the ultimate collectability of the total principal of an impaired loan was in doubt and the loan was on nonaccrual, all payments were applied to principal, under the cost recovery method. When the ultimate collectability of the total principal of an impaired loan was not in doubt and the loan was on nonaccrual, contractual interest was credited to

interest income when received, under the cash basis method.

The following table contains information on the Company's impaired loans at December 31, 2022 (dollars in thousands).

INVESTAR HOLDING CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Uaudited)

Pre-Adoption of CECL - Troubled Debt Restructurings

In situations where, for economic or legal reasons related to a borrower's financial difficulties, the Company granted a concession for other than an insignificant period of time to the borrower that the Company would not otherwise consider, the related loan was classified as a TDR. The Company strived to identify borrowers in financial difficulty early and work with them to modify their loans to more affordable terms before such loans reach nonaccrual status. These modified terms included rate reductions, principal forgiveness, payment forbearance and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of the collateral. In cases in which the Company granted the borrower new terms that provided for a reduction of either interest or principal, or otherwise included a concession, the Company identified the loan as a TDR and measured any impairment on the restructuring as previously noted for impaired loans.

During the **six** **nine** months ended **June** **September** 30, 2022, three loans were modified as TDRs through adjustments to maturity. There were no loans modified as TDRs during the previous twelve month period that subsequently defaulted during the **six** **nine** months ended **June** **September** 30, **2022**, **2022**.

At December 31, 2022, there were no available balances on loans classified as TDRs that the Company was committed to lend.

NOTE 5. BORROWINGS UNDER BANK TERM FUNDING PROGRAM

On March 12, 2023, the Federal Reserve established the Bank Term Funding Program ("BTFP"). The BTFP is a one-year program which provides additional liquidity through borrowings with a term of up to one year secured by the pledging of certain qualifying securities and other assets, valued at par value. At **June** **September** 30, 2023, outstanding borrowings under the BTFP were \$235.8 million secured by pledged securities with a remaining par value of \$243.8 million.

INVESTAR HOLDING CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 7. DERIVATIVE FINANCIAL INSTRUMENTS

As part of its liability management, the Company has historically utilized pay-fixed interest rate swaps to manage exposure against the variability in the expected future cash flows (future interest payments) attributable to changes in the 1-month LIBOR associated with the forecasted issuances of 1-month fixed rate debt arising from a rollover strategy. To mitigate credit risk, securities were pledged to the Company by the counterparties in an amount greater than or equal to the gain position of the derivative contracts. Conversely, securities were pledged to the counterparties by the Company in an amount greater than or equal to the loss position of the derivative contracts, if applicable. The derivative contracts were between the Company and two counterparties. At **June** **September** 30, 2023 and December 31, 2022, the Company had no current or forward starting interest rate swap agreements, other than interest rate swaps related to customer loans, described below. The interest rate swaps were determined to be fully effective during the periods presented, and therefore no amount of ineffectiveness has been included in net income.

During the **three and six** **nine** months ended **June** **September** 30, 2022, the Company voluntarily terminated interest rate swaps with a total notional amounts amount of \$60.0 million and \$115.0 million respectively, in response to market conditions. **Unrealized gains** For the nine months ended September 30, 2022, an unrealized gain of \$3.7 million and \$6.4 million, respectively, net of tax **expenses** **expense** of \$1.0 million and \$1.7 million, respectively, were was reclassified from "Accumulated other comprehensive loss" and recorded as "Swap termination fee income" in noninterest income in the accompanying consolidated statements of income for the three and six months ended June 30, 2022. **income**.

For the **three and six** **nine** months ended **June** **September** 30, 2022, **gains** a **gain** of \$1.2 million and \$4.3 million, net of tax **expenses** **expense** of \$0.3 million and \$1.2 million, respectively, have has been recognized in "Other comprehensive loss" in the accompanying consolidated statements of comprehensive (loss) income (loss) for the change in fair value of the interest rate swaps.

There were no assets or liabilities recorded in the accompanying consolidated balance sheets at **June** **September** 30, 2023 or December 31, 2022 associated with the swap contracts, other than interest rate swaps related to customer loans, described below.

Customer Derivatives – Interest Rate Swaps

The Company enters into interest rate swaps that allow commercial loan customers to effectively convert a variable-rate commercial loan agreement to a fixed-rate commercial loan agreement. Under these agreements, the Company enters into a variable-rate loan agreement with a customer in addition to an interest rate swap agreement, which serves to effectively swap the customer's variable-rate loan into a fixed-rate loan. The Company then enters into a corresponding swap agreement with a third party in order to economically hedge its exposure through the customer agreement. The interest rate swaps with both the customers and third parties are not designated as hedges under FASB ASC Topic 815, "Derivatives and Hedging", and are marked to market through earnings. As the interest rate swaps are structured to offset each other, changes to the underlying benchmark interest rates considered in the valuation of these instruments do not result in an impact to earnings; however, there may be fair value adjustments related to credit quality variations between counterparties, which may impact earnings as required by FASB ASC Topic 820, "Fair Value Measurement and Disclosure" ("ASC 820"). The Company did not recognize any gains or losses in other operating income resulting from fair value adjustments of these swap agreements during the three and **six** **nine** months ended **June** **September** 30, 2023 and 2022. At **June** **September** 30, 2023, the Company had notional amounts of \$144.7 \$143.3 million in interest rate swap contracts with customers and \$144.7 \$143.3 million in offsetting offsetting interest rate swap contracts with other financial institutions. The fair value of the swap contracts consisted of gross

assets assets of \$19.3 \$21.9 million and and gross liabilities of \$19.3 \$21.9 million recorded in "Other assets" and "Accrued taxes and other liabilities", respectively, in the accompanying consolidated balance sheet at June September 30, 2023.

INVESTAR HOLDING CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 8. FAIR VALUES OF FINANCIAL INSTRUMENTS

In accordance with ASC 820, disclosure of fair value information about financial instruments, whether or not recognized in the balance sheet, is required. The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. Fair value is best determined based upon quoted market prices or exit prices. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows, and the fair value estimates may not be realized in an immediate settlement of the instruments. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

If there has been a significant decrease in the volume and level of activity for the asset or liability, a change in valuation technique or the use of multiple valuation techniques may be appropriate. In such instances, determining the price at which willing market participants would transact at the measurement date under current market conditions depends on the facts and circumstances and requires use of significant judgment. The fair value is a reasonable point within the range that is most representative of fair value under current market conditions.

The Company holds Small Business Investment Company qualified funds and other investment funds that do not have a readily determinable fair value. In accordance with ASC 820, these investments are measured at fair value using the net asset value practical expedient and are not required to be classified in the fair value hierarchy. At June September 30, 2023 and December 31, 2022, the fair values of these investments were \$3.2 \$3.3 million and \$2.8 million, respectively, and are included in "Other assets" in the accompanying consolidated balance sheets.

Fair Value Hierarchy

In accordance with ASC 820, the Company groups its financial assets and financial liabilities measured at fair value in three levels, based on the markets in which the assets and liabilities are traded, and the reliability of the assumptions used to determine fair value.

Level 1 – Valuation is based upon quoted prices for identical assets or liabilities traded in active markets.

Level 2 – Valuation is based upon observable inputs other than quoted prices included in level 1, such as quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data.

Level 3 – Valuation is based upon unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies, and similar techniques that use significant unobservable inputs.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Fair Value of Assets and Liabilities Measured on a Recurring Basis

The following methods and assumptions were used by the Company in estimating the fair value disclosures for financial instruments: of assets and liabilities valued on a recurring basis:

Cash and Due from Banks – For these short-term instruments, fair value is the carrying value. Cash and due from banks is classified in level 1 of the fair value hierarchy.

Federal Funds Sold – The fair value is the carrying value. The Company classifies these assets in level 1 of the fair value hierarchy.

AFS Investment Securities and Exchange-Traded Equity Securities – Where quoted prices are available in an active market, the Company classifies the securities within level 1 of the valuation hierarchy. Securities are defined as both long and short positions. Level 1 securities include exchange-traded equity securities.

If quoted market prices are not available, the Company estimates fair values using pricing models and discounted cash flows that consider standard input factors such as observable market data, benchmark yields, interest rate volatilities, broker/dealer quotes, and credit spreads. Examples of such instruments, which would generally be classified within level 2 of the valuation hierarchy if observable inputs are available, include obligations of the U.S. Treasury and U.S. government agencies and corporations, obligations of

state and political subdivisions, corporate bonds, residential mortgage-backed securities, and commercial mortgage-backed securities, and other equity securities. In certain cases where there is limited activity or less transparency around inputs to the valuation, the Company classifies those securities in level 3.

INVESTAR HOLDING CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Based Management monitors the current placement of securities in the fair value hierarchy to determine whether transfers between levels may be warranted based on market reference data, which may include reported trades; bids, offers or broker/dealer quotes; benchmark yields and spreads; as well as other reference data, management monitors the current placement of securities in the fair value hierarchy to determine whether transfers between levels may be warranted. At June September 30, 2023 and December 31, 2022, the majority of our level 3 investments were obligations of state and political subdivisions. The Company estimated the fair value of these level 3 investments using discounted cash flow models, the key inputs of which are the coupon rate, current spreads to the yield curves, and expected repayment dates, adjusted for illiquidity of the local municipal market and sinking funds, if applicable. Option-adjusted models may be used for structured or callable notes, as appropriate.

Derivative Financial Instruments – The fair value for interest rate swap agreements is based upon the amounts required to settle the contracts. These derivative instruments are classified in level 2 of the fair value hierarchy.

Transfers out of level 3	(9,835)	—
Balance at September 30, 2022	<u>\$ 5,971</u>	<u>\$ 477</u>

There were no liabilities measured at fair value on a recurring basis using level 3 inputs at September 30, 2023 and December 31, 2022. For the nine months ended September 30, 2023 and 2022, there were no gains or losses included in earnings related to the change in fair value of the assets measured on a recurring basis using significant unobservable inputs held at the end of the period.

The following table provides quantitative information about significant unobservable inputs used in fair value measurements of level 3 assets measured at fair value on a recurring basis at September 30, 2023 and December 31, 2022 (dollars in thousands).

	Estimated Fair Value	Valuation Technique	Unobservable Inputs		Range of Discounts
<u>September 30, 2023</u>					
Obligations of state and political subdivisions	\$ 5,175	Option-adjusted discounted cash flow model; present value of expected future cash flow model	Bond adjustment(1)	appraisal	0% - 13%
Corporate bonds	448	Option-adjusted discounted cash flow model; present value of expected future cash flow model	Bond adjustment(1)	appraisal	11%
<u>December 31, 2022</u>					
Obligations of state and political subdivisions	\$ 5,965	Option-adjusted discounted cash flow model; present value of expected future cash flow model	Bond adjustment(1)	appraisal	0% - 12%
Corporate bonds	479	Option-adjusted discounted cash flow model; present value of expected future cash flow model	Bond adjustment(1)	appraisal	4%

(1) Fair values determined through valuation analysis using coupon, yield (discount margin), liquidity and expected repayment dates.

Fair Value of Assets and Liabilities Measured on a Nonrecurring Basis

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

The following methods and assumptions were used by the Company in estimating the fair value of assets and liabilities valued on a nonrecurring basis:

Loans Individually Evaluated – For collateral dependent loans where the borrower is experiencing financial difficulty the expected credit loss is measured as the difference between the amortized cost basis of the loan and the fair value of the collateral, which is based on third party appraisals. Individually evaluated loans that are not collateral dependent are evaluated based on a discounted cash flow methodology. Credits deemed uncollectible are charged to the allowance for credit losses. Since not all valuation inputs are observable, these nonrecurring fair value determinations are classified as Level 3.

Quantitative information about assets measured at fair value on a nonrecurring basis based on significant unobservable inputs (level 3) is summarized below as of September 30, 2023 and December 31, 2022. There were no liabilities measured on a nonrecurring basis at September 30, 2023 or December 31, 2022 (dollars in thousands).

	Estimated Fair Value	Valuation Technique	Unobservable Inputs	Range of Discounts	Weighted Average Discount(2)
September 30, 2023					
Loans individually evaluated for impairment(1)	\$ 633	Discounted cash flows; underlying collateral value	Collateral discounts and estimated costs to sell	7% - 100%	38%
December 31, 2022					
Impaired loans	\$ 4,033	Discounted cash flows; underlying collateral value	Collateral discounts and estimated costs to sell	4% - 100%	53%

(1) Loans individually evaluated that were re-measured during the period had a carrying value of \$1.0 million and \$4.2 million at September 30, 2023 and December 31, 2022, respectively, with related allowance for credit losses of \$0.4 million and \$0.2 million as of such dates.

(2) Weighted by relative fair value.

Financial Instruments

Accounting guidance requires the disclosure of estimated fair value information about certain on- and off-balance sheet financial instruments, including those financial instruments that are not measured and reported at fair value on a recurring or nonrecurring basis. The significant methods and assumptions used by the Company to estimate the fair value of financial instruments are discussed below.

Cash and Due from Banks – For these short-term instruments, fair value is the carrying value. Cash and due from banks is classified in level 1 of the fair value hierarchy.

Federal Funds Sold – The fair value is the carrying value. The Company classifies these assets in level 1 of the fair value hierarchy.

Investment Securities and Equity Securities – The fair value measurement techniques and assumptions for AFS securities and exchange-traded equity securities is discussed earlier in the note. The same measurement techniques and assumptions were applied to the valuation of HTM securities and other equity securities including equity in correspondent banks.

Loans – The fair value of portfolio loans, net is determined using an exit price methodology. The exit price methodology continues to be based on a discounted cash flow analysis, in which projected cash flows are based on contractual cash flows adjusted for prepayments for certain loan types (e.g. residential mortgage loans and multifamily loans) and the use of a discount rate based on expected relative risk of the cash flows. The discount rate selected considers loan type, maturity date, a liquidity premium, cost to service, and cost of capital, which is a level 3 fair value estimate.

Loans held for sale are measured using quoted market prices when available. If quoted market prices are not available, comparable market values or discounted cash flow analyses may be utilized. The Company classifies these assets in level 3 of the fair value hierarchy.

Deposit Liabilities – The fair values disclosed for noninterest-bearing demand deposits are, by definition, equal to the amount payable on demand at the reporting date (that is, their carrying amounts). These noninterest-bearing deposits are classified in level 2 of the fair value hierarchy. All interest-bearing deposits are classified in level 3 of the fair value hierarchy. The carrying amounts of variable-rate accounts (for example, interest-bearing checking, savings, and money market accounts), fixed-term money market accounts, and certificates of deposit approximate their fair values at the reporting date. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation analysis that applies market interest rates on comparable instruments to a schedule of aggregated expected monthly maturities on time deposits.

Short-Term Borrowings – The carrying amounts of federal funds purchased, borrowings under repurchase agreements, and other short-term borrowings approximate their fair values. The Company classifies these borrowings in level 2 of the fair value hierarchy.

Long-Term Borrowings, including Junior Subordinated Debt Securities – The fair values of long-term borrowings are estimated using discounted cash flow analyses based on the Company's current incremental borrowing rates for similar types of borrowing arrangements. The fair value of the Company's long-term debt is therefore classified in level 3 in the fair value hierarchy.

Subordinated Debt Securities – The fair value of subordinated debt is estimated based on current market rates on similar debt in the market. The Company classifies this debt in level 2 of the fair value hierarchy.

Derivative Financial Instruments – The fair value measurement techniques and assumptions for interest rate swap agreements derivative financial instruments is based upon the amounts required to settle the contracts. These derivative instruments are classified in level 2 of the fair value hierarchy.

NOTE 9. INCOME TAXES

The income tax expense and the effective tax rate included in the consolidated statements of income are shown in the table below for the periods presented (dollars in thousands).

	Three months ended June 30,		Six months ended June 30,		Three months ended September 30,		Nine months ended September 30,	
	2023		2022		2023		2022	
	\$ 1,509	\$ 2,459	\$ 2,383	\$ 5,059	\$ 585	\$ 1,699	\$ 2,968	\$ 6,758
Income tax expense								
Effective tax rate	18.7%	20.7%	18.7%	20.6%	17.4%	18.9%	18.4%	20.1%

For the three and **six** **nine** month periods ended **June** **September** 30, 2023 and 2022, the effective tax rate differs from the statutory tax rate of 21% primarily due to tax exempt interest income earned on certain loans and investment securities and income from bank owned life insurance.

NOTE 10. COMMITMENTS AND CONTINGENCIES

Unfunded Commitments

The Company is a party to financial instruments with off-balance sheet risk entered into in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit consisting of loan commitments and standby letters of credit, which are not included in the accompanying financial statements. Such financial instruments are recorded in the financial statements when they become payable. The credit risk associated with these commitments is evaluated in a manner similar to the allowance for credit losses on loans. The reserve for unfunded loan commitments was **\$0.20.6** million and \$0.4 million at **June** **September** 30, 2023 and December 31, 2022, respectively, and is included in "Accrued taxes and other liabilities" in the accompanying consolidated balance sheets.

Commitments to extend credit are agreements to lend money with fixed expiration dates or termination clauses. The Company applies the same credit standards used in the lending process when extending these commitments and periodically reassesses the customer's creditworthiness through ongoing credit reviews. Since some commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Collateral is obtained based on the Company's assessment of the transaction. Substantially all standby letters of credit issued have expiration dates within one year.

The table below shows the approximate amounts of the Company's commitments to extend credit as of the dates presented (dollars in thousands).

	June 30, 2023	December 31, 2022	September 30, 2023	December 31, 2022
Loan commitments	\$ 336,427	\$ 333,040	\$ 542,189	\$ 333,040
Standby letters of credit	14,795	11,379	14,170	11,379

Loan commitments at September 30, 2023 include commitments of \$202.0 million related to the purchase of commercial and industrial revolving lines of credit in two tranches, the second tranche of which closed in the fourth quarter of 2023. For additional information, see Note 1. Summary of Significant Accounting Policies – Acquisition Accounting - Loan Purchase Agreement.

Additionally, at **June** **September** 30, 2023, the Company had unfunded commitments of **\$1.61.4** million for its investments in Small Business Investment Company qualified funds and other investment funds.

INVESTAR HOLDING CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 11. LEASES

The Company's primary leasing activities relate to certain real estate leases entered into in support of the Company's branch operations. The Company's lease agreements under which its branch locations are operated have all been designated as operating leases. The Company does not lease equipment under operating leases, nor does it have leases designated as finance leases.

The Company determines if an arrangement is a lease at inception. Operating leases, with the exception of short-term leases, are included in operating lease right-of-use ("ROU") assets and operating lease liabilities in "Bank premises and equipment, net" and "Accrued taxes and other liabilities", respectively, in the accompanying consolidated balance sheets. Operating lease ROU assets represent the right to use an underlying asset for the lease term and operating lease liabilities represent the obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at the commencement date based on the present value of lease payments over the lease term. As

the Company's leases do not provide an implicit rate, the Company uses its incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments. The operating lease ROU asset also includes any lease pre-payments made and excludes lease incentives. The Company's lease terms may include options to extend or terminate the lease. When it is reasonably certain that the Company will exercise an option to extend a lease, the extension is included in the lease term when calculating the present value of lease payments.

Lease expense for lease payments is recognized on a straight-line basis over the lease term. The Company has lease agreements with lease and non-lease components, which the Company has elected to account for separately, as the non-lease component amounts are readily determinable.

Quantitative information regarding the Company's operating leases is presented below as of and for the **six** **nine** months ended **June** **September** 30, 2023 and 2022 (dollars in thousands).

	June 30,		September 30,	
	2023	2022	2023	2022
Total operating lease cost	\$ 228	\$ 305	\$ 332	\$ 457
Weighted-average remaining lease term (in years)	7.5	7.4	7.3	7.2
Weighted-average discount rate	3.1%	2.9%	3.1%	2.9%

At **June** **September** 30, 2023, the Company's operating lease ROU assets and related liabilities were **\$2.2** **\$2.1** million and **\$2.3** **\$2.2** million, respectively, and have remaining terms ranging from less than 1 year to 8 years, including extension options if the Company is reasonably certain they will be exercised.

Future minimum lease payments due under non-cancelable operating leases at **June** **September** 30, 2023 are presented below (dollars in thousands).

Remainder of 2023	\$ 199	\$ 96
2024	325	325
2025	336	336
2026	339	339
2027	341	341
Thereafter	1,012	1,012
Total	\$ 2,552	\$ 2,449

At **June** **September** 30, 2023, the Company had not entered into any material leases that have not yet commenced.

The Bank owns its corporate headquarters building, the first floor of which is occupied by multiple tenants. The Bank, as lessor, also leases a portion of one of its branch locations. All tenant leases are operating leases. The Bank, as lessor, recognized lease income of \$0.1 million and **\$0.2 million** **\$0.3 million** for the three and **six** **nine** month periods ended **June** **September** 30, 2023 and 2022, respectively.

On January 27, 2023, the Bank completed the sale of certain assets, deposits and other liabilities associated with the Alice and Victoria, Texas branch locations to First Community Bank. Upon the completion of the sale, the Bank recorded \$0.3 million of occupancy expense to terminate the remaining contractually obligated lease payments due under non-cancelable operating leases.

NOTE 12. SUBSEQUENT EVENTS

In August 2023, the Company entered into a loan purchase agreement to acquire commercial and industrial revolving lines of credit and related accrued interest in two tranches. The purchase of the second tranche of loans, with an unpaid principal balance of \$127.0 million and total commitments of \$176.7 million, closed on October 3, 2023.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cautionary Note Regarding Forward-Looking Statements

When included in this Quarterly Report on Form 10-Q, or in other documents that Investar Holding Corporation (the "Company," "we," "our," or "us") files with the Securities and Exchange Commission ("SEC") or in statements made by or on behalf of the Company, words like "may," "should," "could," "predict," "potential," "believe," "think," "will likely result," "expect," "continue," "will," "anticipate," "seek," "estimate," "intend," "plan," "projection," "would," "outlook" and similar expressions or the negative version of those words are intended to identify forward-looking statements as defined by the Private Securities Litigation Reform Act of 1995. These forward-looking statements involve a variety of risks and

uncertainties that could cause actual results to differ materially from those described therein. The Company's forward-looking statements are based on assumptions and estimates that management believes to be reasonable in light of the information available at the time such statements are made. However, many of the matters addressed by these statements are inherently uncertain and could be affected by many factors beyond management's control. A number of important factors could cause actual results to differ materially from those indicated by the forward-looking statements. These factors include, but are not limited to, the following, any one or more of which could materially affect the outcome of future events:

- the significant risks and uncertainties for our business, results of operations and financial condition, as well as our regulatory capital and liquidity ratios and other regulatory requirements caused by business and economic conditions generally and in the financial services industry in particular, whether nationally, regionally or in the markets in which we operate, including risks and uncertainties caused by disruptions in the banking industry discussed herein, potential continued higher inflation and interest rates, supply and labor constraints, the war wars in Ukraine and Israel, and the ongoing COVID-19 pandemic;
- our ability to achieve organic loan and deposit growth, and the composition of that growth;
- changes (or the lack of changes) in interest rates, yield curves and interest rate spread relationships that affect our loan and deposit pricing, including potential continued increases in interest rates in 2023; 2023 and thereafter;
- our ability to successfully execute our near-term strategy pivot from primarily a growth strategy to primarily a focus on consistent, quality earnings through the optimization of our balance sheet, and our ability to successfully execute a long-term growth strategy;
- our ability to achieve organic loan and deposit growth, and the composition of that growth;
- our ability to identify and enter into agreements to combine with attractive acquisition candidates, finance acquisitions, complete acquisitions after definitive agreements are entered into, and successfully integrate and grow acquired operations;
- our adoption on January 1, 2023 of *FASB ASC Topic 326 "Financial Instruments – Credit Losses: Measurement of Credit Losses on Financial Instruments" Update No. 2016-13 ("ASU 2016-13")*, and inaccuracy of the assumptions and estimates we make in establishing reserves for credit losses and other estimates;
- changes in the quality or composition of our loan portfolio, including adverse developments in borrower industries or in the repayment ability of individual borrowers;
- a reduction in liquidity, including as a result of a reduction in the amount of deposits we hold or other sources of liquidity, which may continue to be adversely impacted by the disruptions in the banking industry earlier this year causing bank depositors to move uninsured deposits to other banks or alternative investments outside the banking industry;
- changes in the quality and composition of, and changes in unrealized losses in, our investment portfolio, including whether we may have to sell securities before their recovery of amortized cost basis and realize losses;
- the extent of continuing client demand for the high level of personalized service that is a key element of our banking approach as well as our ability to execute our strategy generally;
- our dependence on our management team, and our ability to attract and retain qualified personnel;
- the concentration of our business within our geographic areas of operation in Louisiana, Texas and Alabama;
- concentration of credit exposure;
- any deterioration in asset quality and higher loan charge-offs, and the time and effort necessary to resolve problem assets;
- fluctuations in the price of oil and natural gas;
- data processing system failures and errors;
- cyberattacks and other security breaches;
- potential impairment of our goodwill and other intangible assets;

- our potential growth, including our entrance or expansion into new markets, and the need for sufficient capital to support that growth;
- the impact of litigation and other legal proceedings to which we become subject;
- competitive pressures in the commercial finance, retail banking, mortgage lending and consumer finance industries, as well as the financial resources of, and products offered by, competitors;
- the impact of changes in laws and regulations applicable to us, including banking, securities and tax laws and regulations and accounting standards, as well as changes in the interpretation of such laws and regulations by our regulators;
- changes in the scope and costs of **FDIC** Federal Deposit Insurance Corporation ("FDIC") insurance and other coverages;
- governmental monetary and fiscal policies, including the potential for the Federal Reserve Board to raise target interest rates additional times during **2023**; **2023** and **thereafter**;
- hurricanes, tropical storms, tropical depressions, floods, winter storms, **droughts** and other adverse weather events, all of which have affected the Company's market areas from time to time; other natural disasters; oil spills and other man-made disasters; acts of terrorism, an outbreak or intensifying of hostilities including the **war** **wars** in Ukraine and Israel or other international or domestic calamities, acts of God and other matters beyond our control; and
- other circumstances, many of which are beyond our control.

These factors should not be construed as exhaustive. Additional information on these and other risk factors can be found in Part I. Item 1A. "Risk Factors" and Part II. Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Special Note Regarding Forward-Looking Statements" in the Company's Annual Report on Form 10-K for the year ended December 31, 2022, filed with the SEC on March 8, 2023 (the "Annual Report") and in Part II. Item 1A. "Risk Factors" of this report.

Because forward-looking statements are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified, you should not rely on any forward-looking statement as a prediction of future events. We expressly disclaim any obligation or undertaking to update our forward-looking statements, and we do not intend to release publicly any updates or changes in our expectations concerning the forward-looking statements or any changes in events, conditions or circumstances upon which any forward-looking statement may be based, except as required by law.

Company Overview

This section presents management's perspective on the consolidated financial condition and results of operations of the Company and its wholly-owned subsidiary, Investar Bank, National Association (the "Bank"). The following discussion and analysis should be read in conjunction with our unaudited consolidated financial statements and related notes thereto included herein, and the audited consolidated financial statements for the year ended December 31, 2022, including the notes thereto, and the related Management's Discussion and Analysis of Financial Condition and Results of Operations in the Annual Report.

Through the Bank, we provide full banking services, excluding trust services, tailored primarily to meet the needs of individuals, professionals, and small to medium-sized businesses. Our primary areas of operation are south Louisiana, including Baton Rouge, New Orleans, Lafayette, Lake Charles, and their surrounding areas; southeast Texas, primarily Houston and its surrounding area; and Alabama, including York and Oxford and their surrounding areas. Our Bank commenced operations in 2006, and we completed our initial public offering in July 2014. On July 1, 2019, the Bank changed from a Louisiana state bank charter to a national bank charter and its name changed to Investar Bank, National Association. **Our** We are beginning to pivot our near-term strategy from primarily a growth strategy to primarily a focus on consistent, quality earnings through the optimization of our balance sheet. Our long-term strategy includes organic growth through high quality loans and growth through acquisitions, including whole-bank acquisitions, and strategic branch acquisitions and asset acquisitions. At **June** **September** 30, 2023, we operated **28** **29** full service branches comprised of 20 full service branches in Louisiana, two full service branches in Texas, and **six** **seven** full service branches in Alabama. We have completed seven whole-bank acquisitions since 2011 and regularly review acquisition opportunities. In addition to our branches acquired through acquisitions, during our last three fiscal years and year-to-date **June** **September** 30, 2023, we opened two de novo branch locations. locations and in the third quarter of 2023 converted an existing loan and deposit production office in Tuscaloosa, Alabama to a cashless branch designed to provide a digital banking experience. During the third quarter of 2023, we entered into a loan purchase agreement to acquire commercial and industrial revolving lines of credit with an unpaid principal balance of \$162.7 million in two tranches, described below.

We closed five branches during our last three fiscal years, and one in Louisiana during the first quarter of 2023, as we continued to evaluate opportunities to improve our branch network efficiency, leverage our digital initiatives and further reduce costs. Four of the branches had been acquired, and the closures involved anticipated synergies that resulted in

significant cost savings. In 2022, we sold these five former branch locations and three tracts of land that were being held for future branch locations. On January 27, 2023, we completed the sale of certain assets, deposits and other liabilities associated with our Alice, Texas and Victoria, Texas branch locations to First Community Bank in order to focus more on our core markets. Of the Bank's entire branch network, these two locations were geographically the most distant from our Louisiana headquarters. During the third quarter of 2023, we ceased operation of 14 automated teller machines ("ATMs").

In an effort to focus more on our core business and optimize profitability, in the third quarter of 2023, we made the strategic decision to exit the consumer mortgage origination business. We intend to retain and continue to service the existing consumer mortgage loan portfolio. Consumer mortgage loan products are typically long-term and fixed-rate and generally require a higher relative allowance for credit losses than other loan products. Consumer mortgage volumes have decreased to historical lows due to the combination of rising housing prices and interest rates and constriction of housing supply. As a result of this decision, we further optimized our workforce and will continue to dedicate resources to our more profitable business lines. Related severance expense was \$0.1 million. The consumer mortgage portfolio was approximately \$264.1 million at September 30, 2023, substantially all of which is included in the 1-4 family loan category.

Our principal business is lending to and accepting deposits from individuals and small to medium-sized businesses in our areas of operation. We generate our income principally from interest on loans and, to a lesser extent, our securities investments, as well as from fees charged in connection with our various loan and deposit services. Our principal expenses are interest expense on interest-bearing customer deposits and borrowings, salaries and employee benefits, occupancy costs, data processing and other operating expenses. We measure our performance through our net interest margin, return on average assets, and return on average equity, among other metrics, while seeking to maintain appropriate regulatory leverage and risk-based capital ratios.

Certain Events That Affect Period-over-Period Comparability

Rising Inflation and Interest Rates. During the entirety of 2021, the federal funds target rate was 0% to 0.25%, and it remained at that rate until March 2022. Inflation reached a near 40-year high in late 2021, driven in large part by economic recovery from the ongoing COVID-19 pandemic, and continued rising through June 2022. Since June 2022, the rate of inflation has generally decelerated; however, it has remained at historically high levels through July 2023, November 1, 2023. In response, the Federal Reserve raised interest rates seven times during 2022, twice in the first quarter of 2023, and once in the second quarter of 2023, and once in the third quarter of 2023. Through these incremental increases to the target rate, the Federal Reserve has raised, on a cumulative basis, the target rate from 0% to 0.25% by 500 basis points to 5.00% to 5.25% to 5.50%.

After deciding The Federal Reserve decided not to increase the target rate in June September 2023 the Federal Reserve increased the target rate again on July 26, 2023 to 5.25% to 5.50%, and or November 2023 but may increase rates again during the remainder of 2023, 2023 and thereafter.

Recent Disruptions in the Banking Industry. Between March 10, 2023 and March 12, 2023, state banking supervisors closed Silicon Valley Bank ("SVB") and Signature Bank and named the FDIC as receiver. At the time of closure, they were among the 30 largest U.S. banks. While the reasons for their failure are complex and have not been fully investigated, reports indicate that, among other things, both banks had grown in asset size in recent periods at a faster rate than their peers, had large proportions of uninsured deposits (approximately 87.5% and 89.7% of total deposits, respectively) and high unrealized losses on investment securities. SVB's business strategy focused on serving the technology and venture capital sectors, and Signature Bank had significant exposure to deposits from the digital asset industry. Prior to their closure, both banks experienced sudden and rapid deposit withdrawals. These events caused bank deposit customers, particularly those with uninsured deposits, to become concerned regarding the safety of their deposits, and in some cases caused customers to withdraw deposits. In response to the disruptions, among other things, the Federal Reserve announced a new Bank Term Funding Program ("BTFP") to provide eligible banks with loans of up to one-year maturity backed by collateral pledged at par value. On April 24, 2023, San Francisco-based First Republic Bank, also among the 30 largest U.S. banks, reported a large deposit outflow and substantially reduced net income. First Republic Bank also had a large proportion of uninsured deposits (67% as of December 31, 2022). On May 1, 2023, regulators seized First Republic Bank and sold all of its deposits and most of its assets to JPMorgan Chase Bank.

In response to the disruptions and related publicity, we formed an internal task force that included members of our Asset/Liability Committee ("ALCO"). The task force met frequently to review our liquidity position and liquidity sources, and oversaw the Bank's process to qualify for the BTFP in case needed. In addition, we took steps to inform our customers about our financial position, liquidity and insured deposit products. During the second quarter of 2023, we utilized the BTFP and reduced Federal Home Loan Bank ("FHLB") advances. The Bank utilized this source of funding due to its lower rate, the ability to prepay the obligations without penalty, and as a means to lock in funding. As of June September 30, 2023, estimated uninsured deposits represented approximately 34% of our total deposits. For additional information, see "Discussion and Analysis of Financial Condition – Deposits, Borrowings, Liquidity and Capital Resources" and Part II. Item 1A. Risk Factors.

Adoption of ASU 2016-13. As discussed throughout this report, we adopted ASU 2016-13 on January 1, 2023, and recorded a one-time, cumulative effect adjustment that increased the allowance for credit losses by \$5.9 million and decreased retained earnings, net of tax, by \$4.3 million.

Loan Purchase Agreement. In August 2023, we entered into a loan purchase agreement to acquire commercial and industrial revolving lines of credit, and related accrued interest, with an unpaid principal balance of \$162.7 million and total commitments of \$237.8 million in two tranches. The first and second tranches consist of unpaid principal balances of \$35.8 million and \$127.0 million, respectively, and total commitments of \$61.1 million and \$176.7 million, respectively. The purchase of the first tranche was completed on September 15, 2023, and the purchase of the second tranche was completed on October 3, 2023. The revolving lines of credit are variable-rate and shorter-term in nature with varying renewal terms. The loans are to consumer finance lending companies that possess a history of high credit quality and that we believe provide us with opportunities to deepen the relationships through our services such as treasury management. We also hired two individuals with significant experience in lending in this area.

Sale of Two Branches to First Community Bank. On January 27, 2023, we completed the sale of certain assets, deposits and other liabilities associated with the Alice and Victoria, Texas locations to First Community Bank, a Texas state bank located in Corpus Christi, Texas. We sold approximately \$13.9 million in loans and \$14.5 million in deposits.

Branch Closures. We closed one branch location in Baton Rouge, Louisiana and one branch location in Westlake, Louisiana in May 2022. We closed one branch in Central, Louisiana in March 2023. We do not expect to open de novo branches during the remainder of 2023.

COVID-19 Pandemic. The COVID-19 pandemic and related governmental control measures severely disrupted financial markets and overall economic conditions in 2020 and 2021. While the impact of the pandemic and the associated uncertainties remained in 2022 and 2023, there has been significant progress made with COVID-19 vaccination levels, which has resulted in the easing of restrictive measures in the United States. At the same time, many industries continue to experience supply chain disruptions and labor shortages. Inflation also increased significantly during 2021 and 2022, and in response the Federal Reserve has raised the federal funds target rate multiple times in 2022 and 2023, as discussed above. Oil and gas prices have also been volatile due in part to the pandemic and the war in Ukraine. Ukraine and, more recently, Israel. On April 10, 2023, the COVID-19 national emergency was ended by Congress, and the national public health emergency ended on May 11, 2023. For additional information, see our Annual Report, Part I, Item 1A. Risk Factors, Risks Related to our Business "The ongoing COVID-19 pandemic, or a similar health crisis, may adversely affect our business, employees, borrowers, depositors, counterparties and third-party service providers."

Subordinated Debt Issuance and Redemption. In April 2022, we completed a private placement of \$20.0 million in aggregate principal amount of our 5.125% Fixed-to-Floating Subordinated Notes due 2032 (the "2032 Notes"). In June 2022, we used the majority of the proceeds to redeem \$18.6 million of our 2017 issuance of 6.00% Fixed-to-Floating Rate Subordinated Notes due 2027 (the "2027 Notes"). We utilized the remaining proceeds for share repurchases and for general corporate purposes.

Overview of Financial Condition and Results of Operations

For the six nine months ended June 30, 2023September 30, 2023, net income was \$10.413.1 million, or \$1.051.33 per basic and diluted common share, compared to net income of \$19.526.8 million, or \$1.902.64 and \$1.892.62 per basic and diluted common share, respectively, for the six nine months ended June 30, 2022September 30, 2022. Net income decreased primarily due to an \$11.2 million decrease in net interest income and a \$9.110.1 million decrease in noninterest income and a \$5.2 million income. The decrease in net net interest income was a result of a \$32.6 million increase in interest expense partially offset by a \$21.3 million increase in interest income, as the Bank experienced margin compression due to rising market interest rates. The decrease in noninterest income is mainly attributable to \$8.1 million in swap termination fees recorded during the six nine months ended June 30, 2022September 30, 2022 and the loss on sale or disposition of fixed assets of \$0.9 million\$1.3 million during the six nine months ended June September 30, 2023, primarily resulting from the sale of the Alice and Victoria, Texas branches, compared to a loss on sale or disposition of fixed assets of \$0.1 million\$0.2 million for the six nine months ended June 30, 2022September 30, 2022. The decrease in net interest income was a result of a \$20.4 million increase in interest expense partially offset by a \$15.2 million increase in interest income, as the Bank experienced margin compression due to rising market interest rates. At June 30, 2023September 30, 2023, the Company and Bank each were in compliance with all regulatory capital requirements, and the Bank was considered "well-capitalized" under the FDIC's prompt corrective action regulations. Other key components of our performance for the six nine months ended June 30, 2023September 30, 2023 compared to the six nine months ended June 30, 2022September 30, 2022 are summarized below.

- Credit quality metrics improved as nonperforming loans were 0.34%0.27% of total loans at June 30, 2023September 30, 2023, compared to 0.54% at December 31, 2022December 31, 2022.
- We recognized net recoveries of \$2.1 million\$2.2 million in the loan portfolio during the six nine months ended June 30, 2023September 30, 2023 primarily attributable to recoveries on one loan relationship that became impaired in the third quarter of 2021 as a result of Hurricane Ida.
- Total deposits increased \$98.5 million,\$127.1 million, or 4.7%6.1%, to \$2.18 billion\$2.21 billion at June 30, 2023September 30, 2023, compared to \$2.08 billion\$2.08 billion at December 31, 2022December 31, 2022. Noninterest-bearing deposits decreased \$92.4 million,\$121.2 million, or 15.9%20.9%, to \$488.3 million\$459.5 million at June 30, 2023September 30, 2023, compared to \$580.7 million\$580.7 million at December 31, 2022December 31, 2022. Time deposits and brokered time deposits increased, and other deposit categories decreased. As of June 30, 2023September 30, 2023, estimated uninsured deposits represented approximately 34% of our total deposits.
- Total loans decreased \$19.9 million,\$1.7 million, or 0.9%0.1%, to \$2.08 billion\$2.10 billion at June 30, 2023September 30, 2023, compared to \$2.10 billion\$2.10 billion at December 31, 2022December 31, 2022. Excluding approximately \$13.9 million in loans associated with the Alice and Victoria, Texas branches sold to First Community Bank in January 2023 and approximately \$35.8 million in revolving lines of credit purchased in September 2023, total loans decreased \$6.0 million\$23.6 million, or 0.3%1.1%, to \$2.08 billion\$2.07 billion at June 30, 2023September 30, 2023, compared to \$2.09 billion at December 31, 2022December 31, 2022.

- On January 1, 2023, Investar adopted ASU 2016-13. Also referred to as the Current Expected Credit Loss ("CECL") standard, ASU 2016-13 requires the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. Upon adoption, we recorded a one-time, cumulative effect adjustment to increase the allowance for credit losses by \$5.9 million and reduce retained earnings, net of tax, by \$4.3 million.
- Net interest income for the **sixnine** months ended **June 30, 2023** **September 30, 2023** was **\$38.6** **\$56.0** million, a decrease of **\$5.2** **\$11.2** million, or **12.0%** **16.7%**, compared to **\$43.8** **\$67.3** million for the **sixnine** months ended **June 30, 2022** **September 30, 2022**, driven primarily by an increase in the rates paid on interest-bearing **liabilities** **deposits** partially offset primarily by an increase in the yield earned on **interest-earning assets**, **loans**.
- We experienced pressure on our net interest margin as interest rates rose rapidly and we raised rates offered on deposits and incurred higher costs on our borrowings. For the **sixnine** months ended **June 30, 2023** **September 30, 2023**, our net interest margin was **2.98%** **2.87%**, compared to **3.72%** **3.73%** for the **sixnine** months ended **June 30, 2022** **September 30, 2022**.
- Return on average assets decreased to **0.76%** **0.64%** for the **sixnine** months ended **June 30, 2023** **September 30, 2023**, compared to **1.54%** **1.39%** for the **sixnine** months ended **June 30, 2022** **September 30, 2022**. Return on average equity was **9.47%** **7.97%** for the **sixnine** months ended **June 30, 2023** **September 30, 2023**, compared to **16.52%** **15.30%** for the **sixnine** months ended **June 30, 2022** **September 30, 2022**.
- During the **six** **nine** months ended **June 30, 2023** **September 30, 2023**, we paid **\$2.0** **\$2.7** million to repurchase **138,275** **190,682** shares of common stock, compared to paying **\$7.6** **10.3** million to repurchase **381,919** **508,780** shares of common stock during the **six** **nine** months ended **June 30, 2022** **September 30, 2022**, and we paid **\$1.9** **\$2.9** million in cash dividends on our common stock, compared to **\$1.7** **\$2.6** million during the **six** **nine** months ended **June 30, 2022** **September 30, 2022**.
- Accumulated other comprehensive loss increased **\$0.3** **\$11.5** million, or **0.5%** **23.6%**, to **\$49.2** **\$60.5** million for the quarter ended **June 30, 2023** **September 30, 2023**, compared to \$48.9 million for the quarter ended December 31, 2022 primarily due to unrealized losses in our available for sale ("AFS") securities portfolio.

Discussion and Analysis of Financial Condition

Loans

General. Loans constitute our most significant asset, comprising **75%** and **76%** of our total assets at **June** **September** 30, 2023 and December 31, 2022, respectively. Total loans decreased **\$19.9** **\$1.7** million, or **0.9%** **0.1%**, to **\$2.08** **\$2.10** billion at **June** **September** 30, 2023, compared to \$2.10 billion at December 31, 2022. The decrease in loans was primarily the result of lower demand and the sale of approximately \$13.9 million in loans associated with the sale of the Alice and Victoria, Texas branches, along with lower demand, partially offset by the purchase of approximately \$35.8 million in revolving lines of credit in September 2023 as described in *Certain Events that Affect Year-Over-Year Comparability - Loan Purchase Agreement*. Given the rising interest rate environment, we are emphasizing origination of high margin loans that promote long-term profitability and proactively exiting credit relationships that do not fit this strategy.

The table below sets forth the balance of loans outstanding by loan type as of the dates presented, and the percentage of each loan type to total loans (dollars in thousands).

	June 30, 2023		December 31, 2022		September 30, 2023		December 31, 2022	
	Percentage of		Percentage of		Percentage of		Percentage of	
	Amount	Total Loans	Amount	Total Loans	Amount	Total Loans	Amount	Total Loans
Construction and development	\$ 197,850	9.4%	\$ 201,633	9.6%	\$ 211,390	10.0%	\$ 201,633	9.6%

Total loans \$ 2,084,863 100% \$ 2,104,767 100% \$ 2,103,022 100% \$ 2,104,767 100%

At **September** 30, 2023, the Company's business lending portfolio, which consists of loans secured by owner-occupied commercial real estate properties and commercial and industrial loans, was **\$840.9** **\$851.5** million, a decrease of **\$39.4** **\$28.7** million, or **4.5%** **3.3%**, compared to \$880.2 million at December 31, 2022. The decrease in the business lending portfolio is primarily driven by lower demand due to higher rates and economic **pressures**, **pressures**, partially offset by the purchase of commercial and industrial revolving lines of credit during the third quarter of 2023 as described above. We also experienced **an** **\$17.11.4** million **increase****decrease** in nonowner-occupied loans primarily due to a reclassification of approximately \$24.1 million nonowner-occupied loans to multifamily loans due to a change to the primary use of the property, partially offset by organic growth. As discussed above, during the third quarter of 2023 we decided to exit the consumer mortgage loan origination business. The consumer mortgage portfolio was approximately \$264.1 million at September 30, 2023, substantially all of which is included in the 1-4 family category.

The following table sets forth loans outstanding at **June** **September** 30, 2023, which, based on remaining scheduled repayments of principal, are due in the periods indicated. Loans with balloon payments and longer amortizations are often repriced and extended beyond the initial maturity when credit conditions remain satisfactory. Demand loans, loans having no stated schedule of repayments and no stated maturity and overdrafts are reported below as due in one year or less (dollars in thousands).

Loan Concentrations. Loan concentrations are considered to exist when there are amounts loaned to multiple borrowers engaged in similar activities that would cause them to be similarly impacted by economic or other conditions. At **June** **September** 30, 2023 and December 31, 2022, we had no concentrations of loans exceeding 10% of total loans other than loans in the categories listed in the table above.

Investment Securities

We purchase investment securities primarily to provide a source for meeting liquidity needs, with return on investment a secondary consideration. We also use investment securities as collateral for certain deposits and other types of borrowings. Investment securities represented 15% of our total assets and totaled \$407.4 million at June 30, 2023, a decrease of \$6.1 million, or 1.5%, from \$413.5 million at December 31, 2022. The decrease in investment securities at June 30, 2023 compared to December 31, 2022 was driven primarily by a \$9.8 million decrease in residential mortgage-backed securities, a \$2.2 million decrease in commercial mortgage-backed securities, and a \$2.5 million decrease in obligations of the U.S. Treasury and U.S. government agencies and corporations partially offset by a \$9.0 million increase in obligations of state and political subdivisions, partially offset by a \$28.0 million decrease in residential mortgage-backed securities and a \$7.2 million decrease in commercial mortgage-backed securities. We utilized excess funds in the third quarter of 2023 to purchase \$40.0 million in obligations of the U.S. Treasury and U.S. government agencies and corporations, which matured in October 2023.

The table below shows the carrying value of our investment securities portfolio by investment type and the percentage that such investment type comprises of our entire portfolio as of the dates indicated (dollars in thousands).

	June 30, 2023		December 31, 2022		September 30, 2023		December 31, 2022

The investment portfolio consists of AFS and held to maturity ("HTM") securities. We classify debt securities as HTM if management has the positive intent and ability to hold the securities to maturity. HTM debt securities are stated at amortized cost. Securities not classified as HTM are classified as AFS. As of **June September** 30, 2023, AFS securities comprised **96%** **95%** of our total investment securities.

We adopted ASU 2016-13 effective January 1, 2023. Due to the nature of the investments, current market prices, and the current interest rate environment, we determined that the declines in the fair values of the AFS and HTM securities portfolio were not attributable to credit losses. Accordingly, there was no adjustment made to the amortized cost basis upon adoption. The carrying values of our AFS securities are adjusted for unrealized gains or losses not attributable to credit losses as valuation allowances, and any gains or losses are reported on an after-tax basis as a component of other comprehensive income (loss). For additional information regarding accounting for our investment securities upon the adoption of ASU 2016-13, see Note 1. Summary of Significant Accounting Policies – Accounting Standards Adopted in 2023 in the Notes to Consolidated Financial Statements contained in Part **II**. Item 1. "Financial Statements" included herein.

The table below sets forth the stated maturities and weighted average yields of our investment debt securities based on the amortized cost of our investment portfolio at **June September** 30, 2023 (dollars in thousands).

	After One Year		After Five Years		After Ten Years		One Year or Less	After One Year		After Five Years		After Ten Years

The maturity of mortgage-backed securities reflects scheduled repayments based upon the contractual maturities of the securities. Weighted average yields on tax-exempt obligations have been computed on a fully tax equivalent basis assuming a federal tax rate of 21%.

As of **June** **September** 30, 2023, we had **\$62.8** **77.1** million in **gross** unrealized losses, primarily attributable to investment debt securities with contractual maturities due after 10 years, and \$0.3 million in **gross** unrealized gains in our AFS investment securities portfolio. For additional information, see Note 3. Investment Securities in the Notes to Consolidated Financial Statements contained in Part **II**. Item 1. "Financial Statements" herein.

Deposits

The following table sets forth the composition of our deposits and the percentage of each deposit type to total deposits at **June** **September** 30, 2023 and December 31, 2022 (dollars in thousands).

	June 30, 2023		December 31, 2022		September 30, 2023		December 31, 2022	
	Amount	Percentage of Total Deposits	Amount	Percentage of Total Deposits	Amount	Percentage of Total Deposits	Amount	Percentage of Total Deposits
Noninterest-bearing demand deposits	\$ 488,311	22.4%	\$ 580,741	27.9%	\$ 459,519	20.8%	\$ 580,741	27.9%
Interest-bearing demand deposits	514,501	23.6	565,598	27.1	482,706	21.8	565,598	27.1
Money market deposit accounts	158,984	7.3	208,596	10.0	186,478	8.4	208,596	10.0
Savings accounts	125,442	5.8	155,176	7.5	131,743	6.0	155,176	7.5
Brokered time deposits	153,365	7.0	9,990	0.5	197,747	9.0	9,990	0.5
Time deposits	740,250	33.9	562,264	27.0	751,240	34.0	562,264	27.0
Total deposits	<u>\$ 2,180,853</u>	<u>100%</u>	<u>\$ 2,082,365</u>	<u>100%</u>	<u>\$ 2,209,433</u>	<u>100%</u>	<u>\$ 2,082,365</u>	<u>100%</u>

Total deposits were **\$2.18** **2.21** billion at **June** **September** 30, 2023, an increase of **\$98.5** **127.1** million, or **4.7%** **6.1%**, compared to \$2.08 billion at December 31, 2022. Time deposits and brokered time deposits increased, and other deposit categories decreased. The majority of the increase in time deposits at **June** **September** 30, 2023 compared to December 31, 2022 is due to organic growth and existing customer funds migrating from other deposit categories due to higher rates offered. Beginning in the fourth quarter of 2022 and **through the third quarter of 2023**, management utilized brokered time deposits, entirely in denominations of less than \$250,000, to **secure** **secure** fixed cost funding and reduce **short-term borrowings**. **FHLB advances**. We were able to offset core deposit decreases with increases in time deposits and brokered time deposits. The remaining weighted average duration of brokered time deposits at **June** **September** 30, 2023 was **approximately** **approximately** 13 months with a weighted average rate of **4.91%** **5.02%**.

Our deposit mix shifted as interest rates rose, as noninterest-bearing deposits as a percentage of total deposits decreased to **22.4%** **20.8%** at **June** **September** 30, 2023 compared to 27.9% at December 31, 2022. Brokered time deposits and time deposits as a percentage of total deposits increased to **7.0%** **9.0%** and **33.9%** **34.0%**, respectively, at **June** **September** 30, 2023 compared to 0.5% and 27.0%, respectively, at December 31, 2022.

Borrowings

At **June 30, 2023** **September 30, 2023**, total borrowings include securities sold under agreements to repurchase, FHLB advances, borrowings under the BTFP, subordinated debt issued in 2019 and 2022, and junior subordinated debentures assumed through acquisitions.

We had **\$5.2** **\$13.9** million of securities sold under agreements to repurchase at **June 30, 2023** **September 30, 2023** and none at **December 31, 2022** **December 31, 2022**. Our advances from the FHLB were **\$23.5** **\$23.5** million at **June 30, 2023** **September 30, 2023**, a decrease of **\$363.5** **\$363.5** million, or 93.9%, from FHLB advances of **\$387.0** **\$387.0** million at **December 31, 2022** **December 31, 2022**. At **June 30, 2023** Based on original maturities, at **September 30, 2023**, all of our \$23.5 million of FHLB advances were long-term, compared to \$333.5 million short-term and \$53.5 million long-term FHLB advances at **December 31, 2022** **December 31, 2022**. FHLB advances are used to fund increased loan and investment activity that is not funded by deposits or other borrowings.

On March 12, 2023, the Federal Reserve established the BTFP. The BTFP is a one-year program which provides additional liquidity through borrowings secured by the pledging of certain qualifying securities and other assets valued at par. During the second quarter, we utilized the BTFP to secure fixed rate funding for a one-year term and reduce short-term FHLB advances, which are priced daily. We utilized this source of funding due to its lower rate and the ability to prepay the obligations without penalty. At **June 30, 2023** **September 30, 2023**, we had pledged securities with a remaining par value of \$243.8 million to secure outstanding borrowings under the BTFP of \$235.8 million, were \$235.8 million.

The carrying value of the subordinated debt was \$44.3 million and \$44.2 million at **June 30, 2023** **September 30, 2023** and **December 31, 2022** **December 31, 2022**, respectively. The \$8.6 million and \$8.5 million in junior subordinated debt at **June 30, 2023** **September 30, 2023** and **December 31, 2022** **December 31, 2022**, respectively, represent the junior subordinated debentures that we assumed through acquisitions.

The average balances and cost of short-term borrowings for the three and **six** months ended **June 30, 2023** **September 30, 2023** and 2022 are summarized in the table below (dollars in thousands).

	Average Balances		Average Balances		Cost of Short-term Borrowings		Cost of Short-term Borrowings		Average Balances		Average Balances		Cost of Short-term Borrowings		Cost of Short-term Borrowings	
	Three months ended June 30,		Six months ended June 30,		Three months ended June 30,		Six months ended June 30,		Three months ended September 30,		Nine months ended September 30,		Three months ended September 30,		Nine months ended September 30,	
	2023	2022	2023	2022	2023	2022	2023	2022	2023	2022	2023	2022	2023	2022	2023	2022
Federal funds purchased, short-term																
FHLB advances and other short-term borrowings	\$ 199,898	\$ 51,464	\$ 250,186	\$ 25,900	5.13%	1.16%	4.93%	1.16%	\$ 56	\$ 191,146	\$ 165,893	\$ 81,587	6.28%	2.40%	4.93%	2.14%
Borrowings under BTFP	79,719	—	40,079	—	5.10	—	5.10	—	235,800	—	106,036	—	5.11	—	5.10	—
Securities sold under agreements to repurchase	2,034	402	1,023	2,969	0.14	0.15	0.14	0.15	6,507	64	2,871	1,990	0.13	0.15	0.13	0.15
Total short-term borrowings	\$ 281,651	\$ 51,866	\$ 291,288	\$ 28,869	5.09%	1.15%	4.94%	1.06%	\$ 242,363	\$ 191,210	\$ 274,800	\$ 83,577	4.97%	2.40%	4.95%	2.09%

Typically, the main source of our short-term borrowings are advances from the FHLB. The rate charged for these advances is directly tied to the Federal Reserve Bank's federal funds target rate. As previously discussed, the Federal Reserve has raised the federal funds target rate multiple times in 2022 and 2023. As of **June 30, 2023**, the federal funds target rate was 5.00% was 5.25% to 5.25% 5.50%. The rates on the borrowings under the BTFP are fixed for one year from the day each borrowing is made.

2032 Notes. On April 6, 2022, we entered into a Subordinated Note Purchase Agreement with certain institutional accredited investors and qualified institutional buyers (the "Purchasers") under which we issued \$20.0 million in aggregate principal amount of our 2032 Notes to the Purchasers at a price equal to 100% of the aggregate principal amount of the 2032 Notes. The 2032 Notes were issued under an indenture, dated April 6, 2022 (the "Indenture"), by and among the Company and UMB Bank, National Association, as trustee.

The 2032 Notes have a stated maturity date of April 15, 2032 and will bear interest at a fixed rate of 5.125% per year from and including April 6, 2022 to but excluding April 15, 2027 or earlier redemption date. From April 15, 2027 to but excluding the stated maturity date or earlier redemption date, the 2032 Notes will bear interest at a floating rate equal to the then current three-month term secured overnight financing rate ("SOFR"), plus 277 basis points. As provided in the 2032 Notes, the interest rate on the 2032 Notes during the applicable floating rate period may be determined based on a rate other than three-month term SOFR. The 2032 Notes may be redeemed, in whole or in part, on or after April 15, 2027 or, in whole but not in part, under certain other limited circumstances set forth in the Indenture. Any redemption we made would be at a redemption price equal to 100% of the principal balance being redeemed, together with any accrued and unpaid interest to the date of redemption.

Principal and interest on the 2032 Notes are subject to acceleration only in limited circumstances in the case of certain bankruptcy and insolvency-related events with respect to us. The 2032 Notes are the unsecured, subordinated obligations of the Company and rank junior in right of payment to our current and future senior indebtedness and to our

obligations to our general creditors. The 2032 Notes are intended to qualify as tier 2 capital for regulatory purposes.

We used the majority of the net proceeds to redeem our 2027 Notes in June 2022 and utilized the remaining proceeds for share repurchases and general corporate purposes.

For a description of our 2029 Notes, which are outstanding at **June** **September** 30, 2023, and our 2027 Notes, which have been redeemed as of **June** **September** 30, 2023, see our Annual Report, Part **II**. Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Discussion and Analysis of Financial Condition – Borrowings – 2029 Notes and 2027 Notes" and Note 11 to the financial statements included in such report.

Stockholders' Equity

Stockholders' equity was **\$218.4** **208.7** million at **June** **September** 30, 2023, an increase a decrease of **\$2.6** **7.1** million compared to December 31, 2022. The increase decrease is primarily attributable to **\$10.4** million an **\$11.5** million increase in accumulated other comprehensive loss due to a decrease in the fair value of net income for the **six** months ended **June 30, 2023**, partially offset by Bank's AFS securities portfolio and the adoption of the CECL standard, reflected as a one-time, cumulative effect adjustment to retained earnings that decreased retained earnings by **\$4.3** million after tax, and a partially offset by **\$13.1** million of net income for the **\$0.3** nine months ended **September 30, 2023** million increase in accumulated other comprehensive loss due to a decrease in the fair value of the Bank's AFS securities portfolio. Stockholders' equity was also reduced during the **six** nine months ended **June 30, 2023** **September 30, 2023** by payments of **\$1.9** million **\$2.9** million in dividends and **\$2.0** million **\$2.7** million to repurchase shares.

Results of Operations

Net Interest Income and Net Interest Margin

Net interest income, our principal source of earnings, is the difference between the interest income generated by interest-earning assets and the total interest cost of the deposits and borrowings obtained to fund those assets. Factors affecting the level of net interest income include the volume of interest-earning assets and interest-bearing liabilities, yields earned on loans and investments and rates paid on deposits and other borrowings, the level of nonperforming loans, the amount of noninterest-bearing liabilities supporting interest-earning assets, and the interest rate environment.

The primary factors affecting net interest margin are changes in interest rates, competition, and the shape of the interest rate yield curve. The Federal Reserve Board sets various benchmark rates, including the federal funds rate, and thereby influences the general market rates of interest, including the deposit and loan rates offered by financial institutions. The Federal Reserve increased the federal funds target rate a total of seven times during 2022 and, as of **June** **September** 30, 2023, three four times during 2023 to **5.00%** **5.25%** to **5.25%** **5.50%**, as discussed in *Certain Events That Affect Period-over-Period Comparability – Rising Inflation and Interest Rates*.

*Three months ended **June** **September** 30, 2023 vs. three months ended **June** **September** 30, 2022.* Net interest income decreased **16.3%** **25.6%** to **\$18.4** **17.5** million for the three months ended **June** **September** 30, 2023 compared to **\$22.0** **23.5** million for the same period in 2022. The decrease is primarily due to an increase in the rates paid on interest-bearing liabilities deposits partially offset primarily by an increase in the yield earned on interest-earning assets. The volume of interest-earning assets and interest-bearing liabilities also increased. Average short-term borrowings increased **\$229.8** million, as we utilized advances from the FHLB and borrowings under the BTFP to fund loan growth and investment activity and resulted in a **\$3.4** million increase in interest expense compared to the same period in 2022. Average time deposits increased **\$307.4** **353.4** million primarily due to organic growth and customer funds migrating from other deposit categories due to higher rates offered, which resulted in a **\$5.1** **6.4** million increase in interest expense compared to the same period in 2022. Average brokered time deposits were **\$151.4** **159.2** million during the three months ended **June** **September** 30, 2023 compared to none during the three months ended **June** **September** 30, 2022, which resulted in a **\$2.0** million increase in interest expense compared to the same period in 2022. Average interest-bearing demand deposits decreased **\$218.3** million, but increases in rates led to a **\$1.9** million increase in interest expense compared to the same period in 2022. Average noninterest-bearing deposits decreased **\$150.3** million. Average short-term borrowings increased **\$51.2** million, as we utilized borrowings under the BTFP to fund loan growth and reduce FHLB advances. The higher rates paid on short-term borrowings, along with the increase in short-term borrowings resulted in a **\$1.9** million increase in interest expense compared to the same period in 2022. Average loans increased **\$204.2** **2118.1** million primarily due to organic growth which, in addition to higher loan yields, resulted in a **\$6.7** **5.0** million increase in interest income compared to the same period in 2022. Our yield on interest-earning assets increased as did our rate paid on interest-bearing liabilities primarily as a result of the overall increase in prevailing interest rates.

Interest income was **\$32.4** **33.2** million for the three months ended **June** **September** 30, 2023, compared to **\$24.3** **27.0** million for the same period in 2022. Loan interest income made up substantially all of our interest income for the three months ended **June** **September** 30, 2023 and 2022, although interest on investment securities contributed **10.4%** **9.9%** of interest income during the **second** **third** quarter of 2023 compared to **9.7%** **10.6%** during the **second** **third** quarter of 2022. An **Of the \$6.2** million increase in interest income, **of \$2.5** million can be attributed to the change in the volume of interest-earning assets, and an increase of **\$5.6** **4.6** million can be attributed to an increase in the yield earned on those interest-earning assets, and an increase in interest income of **\$1.6** million can be attributed to the change in the volume of interest-earnings assets. We also increased our average interest-earning balances with banks by **\$31.8** million, with the balances having an average yield of **6.26%** during the three months ended **September 30, 2023**. The overall yield on interest-earning assets was **4.98%** **5.05%** and **4.09%** **4.34%** for the three months ended **June** **September** 30, 2023 and 2022, respectively. The loan portfolio yielded **5.44%** **5.53%** and **4.60%** **4.86%** for the three months ended **June** **September** 30, 2023 and **June** **September** 30, 2022, respectively, while the yield on the investment portfolio

was 2.84% 2.77% for the three months ended June September 30, 2023 compared to 2.06% 2.36% for the three months ended June September 30, 2022. The increase in the overall yield on interest-earning assets compared to the quarter ended June September 30, 2022 was primarily driven by an 84.67 basis point increase in the yield on the loan portfolio and an 81 basis a 41 basis point increase in the yield on the taxable investment securities portfolio.

Interest expense was \$14.0 15.7 million for the three months ended June September 30, 2023, an increase of \$11.7 12.2 million compared to interest expense of \$2.4 3.5 million for the three months ended June September 30, 2022. An increase of \$9.5 9.8 million resulted from the increase in the cost of interest-bearing liabilities, primarily time deposits, interest-bearing demand deposits, and short-term borrowings, and to a lesser extent interest-bearing demand deposits, borrowings. An increase in interest expense of \$2.2 2.4 million resulted from an increase in volume of interest-bearing liabilities, primarily brokered time deposits. Average interest-bearing liabilities increased approximately \$314.9 253.6 million for the three months ended June September 30, 2023 compared to the same period in 2022, as average short- and long-term borrowings increased by \$157.7 million while average interest-bearing deposits increased by \$157.2 251.0 million, as discussed in further detail above. Also as discussed above, average short-term borrowings increased by \$51.2 million. Average long-term borrowings decreased by \$48.5 million. As previously discussed, the federal funds target rate was 5.00% 5.25% to 5.25% 5.50% as of June September 30, 2023, which affects the rate we pay for immediately available overnight funds, long-term borrowings, and deposits. We increased rates offered on our interest-bearing products in order to remain competitive in our markets. The cost of deposits increased 207 237 basis points to 2.31% 2.73% for the three months ended June September 30, 2023 compared to 0.24% 0.36% for the three months ended June September 30, 2022 as a result of the utilization of brokered time deposits to secure fixed cost funding and reduce short-term borrowings, FHLB advances, increases in both the average balance of and rates paid for time deposits, and an increase in rates paid for interest-bearing demand deposits. The cost of interest-bearing liabilities increased 224 228 basis points to 2.79% 3.07% for the three months ended June September 30, 2023 compared to 0.55% 0.79% for the same period in 2022, primarily due to an increase in the cost and higher average balance of deposits and an increased cost of short-term borrowings, the cost of which is primarily driven by the Federal Reserve's federal funds rate, and along with a higher average balance of and an increase in the cost of deposits, short-term borrowings.

Net interest margin was 2.82% 2.66% for the three months ended June September 30, 2023, a decrease of 88 111 basis points from 3.70% 3.77% for the three months ended June September 30, 2022. The decrease in net interest margin was primarily driven by a 224 228 basis point increase in the cost of interest-bearing liabilities partially offset by an 89 71 basis point increase in the yield on interest-earning assets. We experienced margin pressure beginning late in 2022, which has continued in 2023. We raised rates offered on deposits and incurred higher costs on our borrowings compared to the three months ended June September 30, 2022. We may experience additional pressure on our net interest margin if our cost of funds increases faster than the yield on our interest-earning assets.

Average Balances and Yields. The following table sets forth average balance sheet data, including all major categories of interest-earning assets and interest-bearing liabilities, together with the interest earned or paid and the average yield or rate paid on each such category for the three months ended June September 30, 2023 and 2022. Averages presented in the table below are daily averages (dollars in thousands).

(1) Changes in interest due to both volume and rate have been allocated entirely to rate.

Six Nine months ended June September 30, 2023 vs. six nine months ended June September 30, 2022. Net interest income decreased 12.0% 16.7% to \$38.6 56.0 million for the six nine months ended June September 30, 2023 compared to \$43.8 67.3 million for the same period in 2022. The decrease is primarily due to an increase in the rates paid on interest-bearing liabilities deposits partially offset primarily by an increase in the yield earned on interest-earning assets. The volume of interest-earning assets and interest-bearing liabilities also increased. Average short-term borrowings increased \$262.4 million, as we utilized advances from the FHLB and borrowings under the BTFP to fund loan growth and investment activity and resulted in a \$7.0 million increase in interest expense compared to the same period in 2022. Average time deposits increased \$244.6 281.3 million primarily due to organic growth and customer funds migrating from other deposit categories due to higher rates offered, which resulted in a \$8.4 14.8 million increase in interest expense compared to the same period in 2022. Average short-term borrowings increased \$191.2 million, as we utilized advances from the FHLB and borrowings under the BTFP to fund loan growth and investment activity, which along with higher rates paid, resulted in an \$8.9 million increase in interest expense compared to the same period in 2022. Average brokered time deposits decreased \$230.8 million but increases in rates led to a \$4.7 million increase in interest expense compared to the same period in 2022. Average brokered demand deposits decreased \$109.5 126.2 million during the six nine months ended June September 30, 2023 compared to none during the six nine months ended June September 30, 2022, adding \$4.6 million to interest expense. Average noninterest-bearing deposits decreased \$103.0 million. Average loans increased \$222.6 187.4 million primarily due to organic growth, which in addition to higher loan yields, resulted in a \$124.1 17.3 million increase in interest income compared to the same period in 2022. Our yield on interest-earning assets increased as did our rate paid on interest-bearing liabilities primarily as a result of the overall increase in prevailing interest rates.

Interest income was \$63.4 96.5 million for the six nine months ended June September 30, 2023, compared to \$48.2 75.2 million for the same period in 2022. Loan interest income made up substantially all of our interest income for the six nine months ended June September 30, 2023 and 2022, although interest on investment securities contributed 10.4% 10.2% of interest income during the six nine months ended June 30, 2023 September 30, 2023 compared to 9.0% 9.6% during the six nine months ended June 30, 2022 September 30, 2022. Of the \$21.3 million increase in interest income, an increase of \$14.5 million can be attributed to an increase in the yield earned on interest-earning assets, and an increase in interest income of \$5.4 6.9 million can be attributed to the change in the volume of interest-earning assets, and an increase of \$9.8 million can be attributed to an increase in the yield earned on those assets. The overall yield on interest-earning assets was 4.89% 4.94% and 4.10% 4.18% for the six nine months ended June September 30, 2023 and 2022, respectively. The loan portfolio yielded 5.36% 5.42% and 4.67% 4.73% for the six nine months ended June September 30, 2023 and June September 30, 2022, respectively, while the yield on the investment portfolio was 2.78% for the six nine months ended June September 30, 2023 compared to 1.98% 2.12% for the six nine months ended June September 30, 2022. The increase in the overall yield on interest-earning assets compared to the quarter ended June September 30, 2022 was primarily driven by a 69 basis point increase in the yield on the loan portfolio and an 83 a 67 basis point increase in the yield on the taxable investment securities portfolio.

Interest expense was \$24.8 40.5 million for the six nine months ended June September 30, 2023, an increase of \$20.4 32.6 million compared to interest expense of \$44.7 9 million for the six nine months ended June September 30, 2022. An increase of \$16.8 25.3 million resulted from the increase in the cost of interest-bearing liabilities, primarily time deposits, interest-bearing demand deposits, and short-term borrowings, and to a lesser extent interest-bearing demand deposits borrowings. An increase in interest expense of \$3.6 7.3 million resulted from an increase in volume of interest-bearing liabilities, primarily brokered time deposits and short-term borrowings. Average interest-bearing liabilities increased approximately \$282.2 272.6 million for the six nine months ended June September 30, 2023 compared to the same period in 2022 as average short- and long-term borrowings increased by \$212.6 million while average. Average interest-bearing deposits increased by \$69.6 130.7 million, as discussed in further detail above. Average short-term borrowings increased by \$191.2 million, and average long-term borrowings decreased by \$49.4 million. As previously discussed, the federal funds target rate was 5.00% was 5.25% to 5.25% 5.50% as of June September 30, 2023, which affects the rate we pay for immediately available overnight funds, long-term borrowings, and deposits. We increased rates offered on our interest-bearing products in order to remain competitive in our markets. The cost of deposits increased 173 196 basis points to 1.98% 2.24% for the six nine months ended June September 30, 2023 compared to 0.25% 0.28% for the six nine months ended June September 30, 2022 primarily as a result of the utilization of brokered time deposits to secure fixed cost funding and reduce short-term borrowings, increases in both the average balance of and rates paid for time deposits, FHLB advances, and an increase in rates paid for time deposits and interest-bearing demand deposits. The cost of interest-bearing liabilities increased 200 210 basis points

to 2.52% 2.71% for the six nine months ended June September 30, 2023 compared to 0.52% 0.61% for the same period in 2022, primarily due to a higher an increase in the cost and average balance of deposits and an increased cost and higher average balance of short-term borrowings, the cost of which is primarily driven by the Federal Reserve's federal funds rate, and partially offset by a higher lower average balance of and an increase in the cost of deposits, long-term borrowings.

Net interest margin was 2.98% 2.87% for the six nine months ended June September 30, 2023, a decrease of 74 basis points from 3.72% 3.73% for the six nine months ended June September 30, 2022. The decrease in net interest margin was primarily driven by a 200 basis point increase in the cost of interest-bearing liabilities partially offset by a 79 basis point increase in the yield on interest-earning assets. We experienced margin pressure beginning late in 2022, which continued in 2023. We raised rates offered on deposits and incurred higher costs on our borrowings compared to the six nine months ended June September 30, 2022. We may experience additional pressure on our net interest margin if our cost of funds increases faster than the yield on our interest-earning assets.

Average Balances and Yields. The following table sets forth average balance sheet data, including all major categories of interest-earning assets and interest-bearing liabilities, together with the interest earned or paid and the average yield or rate paid on each such category for the six nine months ended June September 30, 2023 and 2022. Averages presented in the table below are daily averages (dollars in thousands).

Noninterest Income

Noninterest income includes, among other things, service charges on deposit accounts, gains and losses on calls or sales of investment securities, gains and losses on sales or dispositions of fixed assets and other real estate owned, swap termination fee income, servicing fees and fee income on serviced loans, interchange fees, income from bank owned life insurance, and changes in the fair value of equity securities. We expect to continue to develop new products that generate noninterest income, and enhance our existing products, in order to diversify our revenue sources.

Three months ended June September 30, 2023 vs. three months ended June September 30, 2022. Total noninterest income decreased \$4.31.0 million, or 67.5% 38.6%, to \$2.11.6 million for the three months ended June September 30, 2023 compared to \$6.42.7 million for the three months ended June September 30, 2022. The decrease in noninterest income is mainly attributable to \$4.7 million a \$0.3 million increase in swap termination fees recorded during the three months ended June 30, 2022 partially offset by a loss on sale or disposition of fixed assets of \$0.1 million during and a \$0.7 million decrease in other operating income. The increase in the three months ended June 30, 2023, compared to a loss on sale or disposition of fixed assets resulted primarily from the disposition of \$0.5 million for ATMs and a reclassification of bank premises and equipment to other real estate owned during the three months ended June September 30, 2022 2023 resulting from. The decrease in other operating income is primarily attributable to a \$0.4 million decrease in the consolidation change in the net asset value of two branch locations, other investments, which represents unrealized net gains on investments in Small Business Investment Company qualified funds and other investment funds, and a \$0.3 million decrease in derivative fee income.

Six Nine months ended June September 30, 2023 vs. Six Nine months ended June September 30, 2022. Total noninterest income decreased \$9.110.1 million, or 74.3% 67.9%, to \$3.14.8 million for the six nine months ended June September 30, 2023 compared to \$12.214.9 million for the six nine months ended June September 30, 2022. The decrease in noninterest income is mainly attributable to \$8.1 million in swap termination fees recorded during the six nine months ended June September 30, 2022 and a loss on sale or disposition of fixed assets of \$0.9 million \$1.3 million during the six nine months ended June September 30, 2023, resulting from the sale of the Alice and Victoria, Texas branches, the disposition of ATMs, and a reclassification of bank premises and equipment to other real estate owned compared to a loss on sale or disposition of fixed assets of \$0.1 million \$0.2 million for the six nine months ended June September 30, 2022. There was also a \$0.2 million \$0.3 million decrease in interchange fees due to a decrease in the volume of debit and credit card transactions, transactions and a \$0.7 million decrease in other operating income primarily attributable to a \$0.4 million decrease in the change in the net asset value of other investments and a \$0.4 million decrease in derivative fee income.

No swap termination fees were recorded during the nine months ended September 30, 2023. Swap termination fees of \$4.7 million and \$8.1 million were recorded during the three and six nine months ended June September 30, 2022 when the Bank voluntarily terminated a number of its interest rate swap agreements in response to market conditions. We had no remaining current or forward starting interest rate swap agreements at June September 30, 2023, other than interest rate swaps related to customer loans described in Note 7. Derivative Financial Instruments in the Notes to Consolidated Financial Statements contained in Part II, Item 1. "Financial Statements" included herein.

Noninterest Expense

Three months ended June September 30, 2023 vs. three months ended June September 30, 2022. Total noninterest expense was \$15.215.8 million for the three months ended June September 30, 2023, a decrease of \$0.30.2 million, or 2.0% 1.2%, compared to the same period in 2022. The decrease is primarily a result of a \$0.2 million decrease in depreciation and amortization a \$0.2 million decrease in professional fees, and a \$0.2 million decrease in loss on early extinguishment of subordinated debt as a result of the redemption of the 2027 Notes in the second quarter of 2022, occupancy, partially offset by a \$0.3 million \$0.1 million increase in salaries and employee benefits. The increase decreases in salaries depreciation and employee benefits amortization and occupancy compared to the same period in 2022 is primarily are due to an increase in health insurance claims. The decrease in depreciation and amortization compared to the same period in 2022 is primarily due to the closure of two branch locations in 2022, the sale of the Alice and Victoria, Texas branches in January 2023 and the closure of one branch location in the first quarter of 2023. The increase in salaries and employee benefits is primarily due to severance related to Investstar's exit from its consumer mortgage origination business. We continue to closely monitor expenses, implement technology solutions and evaluate opportunities to reduce our physical branch and ATM footprint to deliver products and services to our customers more efficiently.

Six Nine months ended June September 30, 2023 vs. Six Nine months ended June September 30, 2022. Total noninterest expense was \$31.447.2 million for the six nine months ended June September 30, 2023, an increase of \$0.40.2 million, or 1.4% 0.5%, compared to the same period in 2022. The increase is primarily a result of \$0.7 million in expenses as a result of the sale of the Alice and Victoria, Texas branch locations in the first quarter of 2023. As a result of the sale of the Alice and Victoria, Texas branches, we recorded \$0.4 million of occupancy expense primarily to terminate the remaining contractually obligated lease payments, \$0.1 million of salaries and employee benefits for severance, \$0.1 million of professional fees for legal and consulting services, and \$0.1 million of depreciation and amortization to accelerate the amortization of the remaining core deposit intangible. Excluding the expenses incurred related to the sale of the Alice and Victoria branches, there was a \$0.5 \$0.6 million increase in salaries and employee benefits, a \$0.4 \$0.6 million decrease in depreciation and amortization, a \$0.1 million \$0.3 million decrease in occupancy expense, and a \$0.2 million decrease in loss on early extinguishment of subordinated debt as a result of the redemption of the 2027 Notes in the second quarter of 2022. The remaining increase in salaries and employee benefits compared to the same period in 2022 is primarily due to an increase in health insurance claims. The remaining decreases in depreciation and amortization and occupancy expense compared to the same period in 2022 are primarily due to the closure of two branch locations in 2022, the sale of the Alice and Victoria branches in January 2023, and the closure of one branch location in the first quarter of 2023.

Income Tax Expense

Income tax expense for the three months ended **June** **September** 30, 2023 and 2022 was **\$1.5** **0.6** million and **\$2.5** **1.7** million, respectively. The effective tax rate for the three months ended **June** **September** 30, 2023 and 2022 was **18.7%** **17.4%** and **20.7%** **18.9%**, respectively. Income tax expense for the **six** **nine** months ended **June** **September** 30, 2023 and 2022 was **\$2.4** **3.0** million and **\$5.1** **6.8** million, respectively. The effective tax rate for the **six** **nine** months ended **June** **September** 30, 2023 and 2022 was **18.7%** **18.4%** and **20.6%** **20.1%**, respectively.

For the three and **six** **nine** months ended **June** **September** 30, 2023 and 2022, the effective tax rate differs from the statutory tax rate of 21% primarily due to tax exempt interest income earned on certain loans and investment securities and income from bank owned life insurance.

Risk Management

The primary risks associated with our operations are credit, interest rate and liquidity risk. Higher inflation also presents risk. Credit, inflation and interest rate risk are discussed below, while liquidity risk is discussed in this section under the heading *Liquidity and Capital Resources* below.

Credit Risk and the Allowance for Credit Losses

General. The risk of loss should a borrower default on a loan is inherent in any lending activity. Our portfolio and related credit risk are monitored and managed on an ongoing basis by our risk management department, the board of directors' loan committee and the full board of directors. We utilize a ten point risk-rating system, which assigns a risk grade to each borrower based on a number of quantitative and qualitative factors associated with a loan transaction. The risk grade categorizes the loan into one of five risk categories, based on information about the ability of borrowers to service the debt. The information includes, among other factors, current financial information about the borrower, historical payment experience, credit documentation, public information and current economic trends. These categories assist management in monitoring our credit quality. The following describes each of the risk categories, which are consistent with the definitions used in guidance promulgated by federal banking regulators.

- *Pass (grades 1-6)* – Loans not falling into one of the categories below are considered pass. These loans have high credit characteristics and financial strength. The borrowers at least generate profits and cash flow that are in line with peer and industry standards and have debt service coverage ratios above loan covenants and our policy guidelines. For some of these loans, a guaranty from a financially capable party mitigates characteristics of the borrower that might otherwise result in a lower grade.
- *Special Mention (grade 7)* – Loans classified as special mention possess some credit deficiencies that need to be corrected to avoid a greater risk of default in the future. For example, financial ratios relating to the borrower may have deteriorated. Often, a special mention categorization is temporary while certain factors are analyzed or matters addressed before the loan is re-categorized as either pass or substandard.
- *Substandard (grade 8)* – Loans rated as substandard are inadequately protected by the current net worth and paying capacity of the borrower or the liquidation value of any collateral. If deficiencies are not addressed, it is likely that this category of loan will result in the Bank incurring a loss. Where a borrower has been unable to adjust to industry or general economic conditions, the borrower's loan is often categorized as substandard.
- *Doubtful (grade 9)* – Doubtful loans are substandard loans with one or more additional negative factors that makes full collection of amounts outstanding, either through repayment or liquidation of collateral, highly questionable and improbable.
- *Loss (grade 10)* – Loans classified as loss have deteriorated to such a point that it is not practicable to defer writing off the loan. For these loans, all efforts to remediate the loan's negative characteristics have failed and the value of the collateral, if any, has severely deteriorated relative to the amount outstanding. Although some value may be recovered on such a loan, it is not significant in relation to the amount borrowed.

At **June** **September** 30, 2023 and December 31, 2022, there were no loans classified as loss. There were **\$0.4** million of **no** loans classified as doubtful at **June** **September** 30, 2023, compared to **\$0.2** million at December 31, 2022. At **June** **September** 30, 2023 and December 31, 2022, there were **\$14.2** **12.6** million and **\$15.0** million, respectively, of loans classified as substandard, and **\$10.1** **5.1** million and **\$12.8** million, respectively, of loans classified as special mention.

An independent loan review is conducted annually, whether internally or externally, on at least 40% of commercial loans utilizing a risk-based approach designed to maximize the effectiveness of the review. Internal loan review is independent of the loan underwriting and approval process. In addition, credit analysts periodically review certain commercial loans to identify negative financial trends related to any one borrower, any related groups of borrowers, or any industry. All loans not categorized as pass are put on an internal watch list, with quarterly reports to the board of directors. In addition, a written status report is maintained by our special assets division for all commercial loans categorized as substandard or worse. We use this information in connection with our collection efforts.

If our collection efforts are unsuccessful, collateral securing loans may be repossessed and sold or, for loans secured by real estate, foreclosure proceedings initiated. The collateral is generally sold at public auction for fair market value, with fees associated with the foreclosure being deducted from the sales price. The purchase price is applied to the outstanding loan balance. If the loan balance is greater than the sales proceeds, the deficient balance is charged-off.

Allowance for Credit Losses. Effective January 1, 2023, we adopted ASU 2016-13, which uses the CECL accounting methodology for the allowance for credit losses. Upon adoption, we recorded a one-time, cumulative effect adjustment to increase the allowance for credit losses by \$5.9 million. The allowance for credit losses was \$30.0 million and \$24.4 million at **June** **September** 30, 2023 and December 31, 2022, respectively. The CECL methodology requires that lifetime expected credit losses be recorded at the time the financial asset is originated or acquired.

Under ASU 2016-13, the allowance for credit losses on loans is measured on a pool basis when similar risk characteristics exist. The Company's CECL calculation estimates credit losses using a combination of the discounted cash flow and remaining life methods, as appropriate, depending on the certain portfolio factors including but not limited to size, complexity, and history. The discounted cash flow analysis estimates future cash flows for the loan pool and discounts the cash flows to produce a net present value and ultimately the allowance requirement for the pool. The remaining life method applies a loss rate to a given pool of loans over the estimated remaining life of the given pool. The loss rates computed for each pool and expected pool-level funding rates are applied to the related unfunded lending commitments to calculate an allowance for credit losses on unfunded amounts. For each pool of loans, management also evaluates and applies qualitative adjustments to the calculated allowance for credit losses based on several factors, including, but not limited to, changes in current and expected future economic conditions, changes in the nature and volume of the portfolio, changes in levels of concentrations, changes in the volume and severity of past due loans, changes in lending policies and personnel and changes in the competitive and regulatory environment of the banking industry.

Loans that do not share similar risk characteristics are individually evaluated and are excluded from the pooled loan analysis. The allowance for credit losses on loans that are individually evaluated is based on a comparison of the recorded investment in the loan with either the expected cash flows discounted using the loan's original effective interest rate, observable market price for the loan or the fair value of the collateral underlying certain collateral dependent loans. We evaluate the adequacy of the allowance for credit losses on a quarterly basis. This evaluation is complex and inherently subjective, as it requires estimates by management that are inherently uncertain and therefore susceptible to significant revision as more information becomes available. In future periods evaluations of the overall loan portfolio, in light of the factors and forecasts then prevailing, may result in significant changes in the allowance and provision for credit loss on loans in those future periods.

We maintain a separate allowance for credit losses on unfunded loan commitments, which is included in "Accrued taxes and other liabilities" in the accompanying consolidated balance sheets. The allowance for credit losses is increased by the provision for credit losses and decreased by charge-offs, net of recoveries. For the **six** **nine** months ended **June 30, 2023** **September 30, 2023** and 2022, the provision for credit losses was negative \$2.5 million and \$0.5 million, respectively. The negative provision for credit losses for the nine months ended September 30, 2023 was primarily driven by net recoveries of \$2.2 million in the loan portfolio primarily attributable to recoveries on one loan relationship that became impaired in the third quarter of 2021 as a result of Hurricane Ida.

Refer to Note 1. Summary of Significant Accounting Policies – Accounting Standards Adopted in 2023 for information regarding our adoption of ASU 2016-13. Results for reporting periods beginning after December 31, 2022 are presented in accordance with ASU 2016-13 while prior period amounts continue to be reported in accordance with previously applicable U.S. GAAP as discussed in the Annual Report in the section captioned "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Estimates."

The following table presents the allocation of the allowance for credit losses by loan category and the percentage of loans in each loan category to total loans as of the dates indicated (dollars in thousands).

	June 30, 2023		December 31, 2022		September 30, 2023		December 31, 2022	
	Allowance for Credit Losses	% of Loans in each Category to Total Loans	Allowance for Credit Losses	% of Loans in each Category to Total Loans	Allowance for Credit Losses	% of Loans in each Category to Total Loans	Allowance for Credit Losses	% of Loans in each Category to Total Loans
		Category to Total Loans						
Mortgage loans on real estate:								
Construction and development	\$ 2,977	9.4%	\$ 2,555	9.6%	\$ 3,000	10.0%	\$ 2,555	9.6%
1-4 Family	9,293	19.9	3,917	19.1	9,172	19.7	3,917	19.1
Multifamily	866	3.9	999	3.9	1,105	4.9	999	3.9
Farmland	3	0.4	113	0.6	3	0.4	113	0.6
Commercial real estate	11,221	46.6	10,718	45.5	10,980	44.8	10,718	45.5

Commercial and industrial	5,469	19.2	5,743	20.7	5,297	19.6	5,743	20.7
Consumer	215	0.6	319	0.6	221	0.6	319	0.6
Total	\$ 30,044	100%	\$ 24,364	100%	\$ 29,778	100%	\$ 24,364	100%

The following table presents the amount of the allowance for credit losses allocated to each loan category as a percentage of total loans as of the dates indicated.

	June 30, 2023	December 31, 2022	September	December
			30, 2023	31, 2022
Mortgage loans on real estate:				
Construction and development		0.14%	0.12%	0.14%
1-4 Family		0.45	0.18	0.44
Multifamily		0.04	0.05	0.05
Farmland		—	0.01	—
Commercial real estate		0.54	0.51	0.53
Commercial and industrial		0.26	0.27	0.25
Consumer		0.01	0.02	0.01
Total	1.44%	1.16%	1.42%	1.16%

As discussed above, the balance in the allowance for credit losses is principally influenced by the provision for credit losses on loans and net loan loss experience. Additions to the allowance for credit losses are charged to the provision for credit losses on loans. Losses are charged to the allowance as incurred and recoveries on losses previously charged to the allowance are credited to the allowance at the time the recovery is collected.

The table below reflects the activity in the allowance for credit losses and key ratios for the periods indicated (dollars in thousands).

	Three months ended June 30,		Six months ended June 30,		Three months ended September 30,		Nine months ended September 30,

Allowance at end of period	\$	30,044	\$	21,954	\$	30,044	\$	21,954
Total loans - period end	2,084,863	1,916,395	2,084,863	1,916,395	2,103,022	2,005,677	2,103,022	2,005,677
Nonaccrual loans - period end	6,994	16,630	6,994	16,630	5,251	12,719	5,251	12,719
Key ratios:								
Allowance for credit losses to total loans - period end	1.44%	1.15%	1.44%	1.15%	1.42%	1.15%	1.42%	1.15%
Allowance for credit losses to nonaccrual loans - period end	429.57%	132.01%	429.57%	132.01%	567.09%	182.12%	567.09%	182.12%
Nonaccrual loans to total loans - period end	0.34%	0.87%	0.34%	0.87%	0.25%	0.63%	0.25%	0.63%

(1) For the three months ended June September 30, 2023, the \$2.8 million negative provision for credit losses of \$34,000 on the consolidated statement of income includes a \$2.8 million negative provision for loan losses of \$0.4 million and a \$7,000 negative provision for unfunded loan commitments, commitments of \$0.4 million. For the six nine months ended June 30, 2023 September 30, 2023, the \$2.5 million negative provision for credit losses of \$2.5 million on the consolidated statement of income includes a \$2.3 million negative provision for loan losses of \$2.7 million and a \$0.2 million negative provision for unfunded loan commitments, commitments of \$0.2 million.

(2) We recognized net recoveries of \$2.4 million \$0.2 million and \$2.1 million \$2.2 million in the loan portfolio portfolio during the three and six nine months ended June 30, 2023 September 30, 2023, respectively, primarily attributable to recoveries on one loan relationship that became impaired in the third quarter of 2021 as a result of Hurricane Ida.

The allowance for credit losses to total loans increased to 1.44% 1.42% at June September 30, 2023 compared to 1.15% at June September 30, 2022, and the allowance for credit losses to nonaccrual loans ratio increased to 430% 567% at June September 30, 2023 compared to 132% 182% at June September 30, 2022. The increases in the allowance for credit

losses to total loans and allowance for credit losses to nonaccrual loans compared to June September 30, 2022, is primarily due to the one-time, cumulative effect adjustment to increase the allowance for credit losses by \$5.9 million recorded upon adoption of ASU 2016-13 on January 1, 2023. Nonaccrual loans were \$7.0 5.3 million, or 0.34% 0.25% of total loans, at June September 30, 2023, a decrease of \$9.6 7.5 million compared to \$16.6 12.7 million, or 0.87% 0.63% of total loans at June September 30, 2022. The decrease in nonaccrual loans is primarily due to large paydowns on one loan relationship impacted by Hurricane Ida in the third quarter of 2021. Many of the loans comprising the total relationship were placed on nonaccrual following the impairment in the third quarter of 2021.

The following table presents the allocation of net (charge-offs) recoveries by loan category for the periods indicated (dollars in thousands).

		Three months ended June 30,						Three months ended September 30,

Charge-offs reflect the realization of losses in the portfolio that were recognized previously through the provision for credit losses on loans. Net charge-offs include recoveries of amounts previously charged off. For the three and **six nine** months ended **June 30, 2023** **September 30, 2023**, net recoveries were **\$2.40.2** million and **\$2.12.2** million, or **0.11%** **0.01%** and **0.10%** **0.11%**, respectively, of the average loan balances for the periods. Net recoveries during the three and **six nine** months ended **June 30, 2023** **September 30, 2023** were primarily attributable to recoveries on one loan relationship that became impaired in the third quarter of 2021 as a result of Hurricane Ida. Net charge-offs recoveries for the three months ended **June** **September 30, 2022** were **\$0.148,000** million, or less than 0.01%, of the average loan balance for the period. Net recoveries for the **six nine** months ended **June 30, 2022** **September 30, 2022** were **\$0.60.7** million, or 0.03%, of the average loan balance for the period.

Management believes the allowance for credit losses at **June** **September 30, 2023** is sufficient to provide adequate protection against losses in our portfolio. However, there can be no assurance that this allowance will prove to be adequate over time to cover ultimate losses in connection with our loans. This allowance may prove to be inadequate due to higher inflation and interest rates than anticipated, other unanticipated adverse changes in the economy, **unanticipated effects of the current geopolitical and domestic political conflicts**, the scope and duration of the COVID-19 pandemic and its continued influence on the economy, or discrete events adversely affecting specific customers or industries. Our results of operations and financial condition could be materially adversely affected to the extent that the allowance is insufficient to cover such changes or events. Effective January 1, 2023, we adopted ASU 2016-13, which uses the CECL accounting methodology for the calculating the allowance for credit losses. The CECL methodology requires that lifetime expected credit losses be recorded at the time the financial asset is originated or acquired, and be adjusted each period for changes in expected lifetime credit losses. The CECL methodology replaces multiple prior impairment models under U.S. GAAP that generally required that a loss be "incurred" before it was recognized, and represents a significant change from prior U.S. GAAP. Please refer to Note 1. Summary of Significant Accounting Policies – Accounting Standards Adopted in 2023, in the Notes to Consolidated Financial Statements for information regarding our adoption of ASU 2016-13, effective January 1, 2023.

Nonperforming Assets. Nonperforming assets consist of nonperforming loans and other real estate owned. Nonperforming loans are those on which the accrual of interest has stopped or loans which are contractually 90 days past due on which interest continues to accrue. Loans are ordinarily placed on nonaccrual when a loan is specifically determined to be impaired or when principal and interest is delinquent for 90 days or more. Additionally, management may elect to continue the accrual when the estimated net available value of collateral is sufficient to cover the principal balance and accrued interest. It is our policy to discontinue the accrual of interest income on any loan for which we have reasonable doubt as to the payment of interest or principal. A loan may be returned to accrual status when all the principal and interest amounts contractually due are brought current and future principal and interest amounts contractually due are reasonably assured, which is typically evidenced by a sustained period of repayment performance by the borrower. Nonperforming loans were **\$7.05.6** million, or **0.34%** **0.27%** of total loans, at **June** **September 30, 2023**, a decrease of **\$4.35.7** million compared to **\$11.3** million, or **0.54%** of total loans, at December 31, 2022. The decrease in nonperforming loans compared to December 31, 2022 is mainly attributable to large paydowns on one loan relationship impacted by Hurricane Ida.

Restructured Loans

Effective January 1, 2023, we adopted ASU 2022-02, *"Financial Instruments - Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures"*, which eliminated the accounting guidance for troubled debt restructurings ("TDRs"). Prior to our adoption of ASU 2022-02, we accounted for a modification to the contractual terms of a loan that resulted in granting a concession to a borrower experiencing financial difficulties as a TDR.

Other Real Estate Owned. Other real estate owned consists of properties acquired through foreclosure or acceptance of a deed in lieu of foreclosure. These properties are initially recorded at fair value at the time of foreclosure, less estimated selling cost. Losses arising at the time of foreclosure of properties are charged to the allowance for credit losses. For the **six nine** months ended **June 30, 2023** **September 30, 2023**, additions to other real estate owned were **\$3.8** million, **\$3.9** million, which were primarily driven by transfers of properties related to one loan relationship that became impaired in the third quarter of 2021 as a result of Hurricane Ida. During the **six nine** months ended **June 30, 2023** **September 30, 2023**, we closed one branch and one stand-alone interactive teller machine and transferred the associated land and building from bank premises and equipment to other real estate owned, as we did not intend to use the **property** properties for banking operations. Other real estate owned with a cost basis of **\$0.5** million **\$0.1** million and **\$1.5** million **\$1.6** million was sold during the three and **six nine** months ended **June 30, 2023** **September 30, 2023**, respectively, resulting in a gain of **\$5,000** **\$23,000** and a loss of **\$0.1** million, respectively, for the periods. Other real estate owned with a cost basis of **\$0.6** **\$2.7** million and **\$1.5** million **\$4.2** million was sold during the three and **six nine** months ended **June 30, 2022** **September 30, 2022**, respectively, resulting in **losses** gains of **\$0.1** million **\$0.1** million and **\$43,000** **\$7,000**, respectively, for the periods. At **June** **September 30, 2023**, approximately **\$0.1** million of loans secured by 1-4 family residential property were in the process of foreclosure.

The table below provides details of our other real estate owned as of the dates indicated (dollars in thousands).

	June 30, 2023	December 31, 2022	September 30, 2023	December 31, 2022
1-4 Family	\$ 139	\$ 682	\$ —	\$ 682
Commercial real estate	3,998	—	4,323	—
Commercial and industrial			115	—
Total other real estate owned	\$ 4,137	\$ 682	\$ 4,438	\$ 682

Changes in our other real estate owned are summarized in the table below for the periods indicated (dollars in thousands).

Balance, end of period	\$	4,137	\$	3,397
			\$	4,438
			\$	2,326

Impact of Inflation. Inflation reached a near 40-year high in late 2021 primarily due to effects of the ongoing pandemic and continued rising through June 2022. Since June 2022, the rate of inflation has generally decelerated; however, it has remained at historically high levels through July/October 2023. When the rate of inflation accelerates, there is an erosion of consumer and customer purchasing power. Accordingly, this could has impacted and may continue to impact our business by reducing our tolerance for extending credit, and our customer's desire to obtain credit, or causing us to incur additional provisions for credit losses resulting from a possible increased default rate. Inflation may lead to lower loan re-financings. Inflation may also increase the costs of goods and services we purchase, including the costs of salaries and benefits. In response to higher inflation, the Federal Reserve increased the federal funds target rate during 2022 and 2023 as discussed in *Certain Events That Affect Period-over-Period Comparability – Rising Inflation and Interest Rates*. For additional information, see Interest Rate Risk below, and Part I, Item 1A. "Risk Factors – Risks Related to our Business – Changes in interest rates could have an adverse effect on our profitability," in our Annual Report.

Interest Rate Risk

Market risk is the risk of loss from adverse changes in market prices and rates. Since the majority of our assets and liabilities are monetary in nature, our market risk arises primarily from interest rate risk inherent in our lending and deposit activities. A sudden and substantial change in interest rates may adversely impact our earnings and profitability because the interest rates borne by assets and liabilities do not change at the same speed, to the same extent, or on the same basis. Accordingly, our ability to proactively structure the volume and mix of our assets and liabilities to address anticipated changes in interest rates, as well as to react quickly to such fluctuations, can significantly impact our financial results. To that end, management actively monitors and manages our interest rate risk exposure.

The ALCO has been authorized by the board of directors to implement our asset/liability management policy, which establishes guidelines with respect to our exposure to interest rate fluctuations, liquidity, loan limits as a percentage of funding sources, exposure to correspondent banks and brokers and reliance on non-core deposits. The goal of the policy is to enable us to maximize our interest income and maintain our net interest margin without exposing the Bank to excessive interest rate risk, credit risk and liquidity risk. Within that framework, the ALCO monitors our interest rate sensitivity and makes decisions relating to our asset/liability composition.

Net interest income simulation is the Bank's primary tool for benchmarking near term earnings exposure. Given the ALCO's objective to understand the potential risk/volatility embedded within the current mix of assets and liabilities, standard rate scenario simulations assume total assets remain static (i.e. no growth). The Bank may also use a standard gap report in its interest rate risk management process. The primary use for the gap report is to provide supporting detailed information to the ALCO's discussion.

The Bank has particular concerns with the utility of the gap report as a risk management tool because of difficulties in relating gap directly to changes in net interest income. Hence, the income simulation is the key indicator for earnings-at-risk since it expressly measures what the gap report attempts to estimate.

Short-term interest rate risk management tactics are decided by the ALCO where risk exposures exist out into the 1 to 2 year horizon. Tactics are formulated and presented to the ALCO for discussion, modification, and/or approval. Such tactics may include asset and liability acquisitions of appropriate maturities in the cash market, loan and deposit product/pricing strategy modification, and derivatives hedging activities to the extent such activity is authorized by the board of directors.

Since the impact of rate changes due to mismatched balance sheet positions in the short-term can quickly and materially affect the current year's income statement, they require constant monitoring and management.

Within the gap position that management directs, we attempt to structure our assets and liabilities to minimize the risk of either a rising or falling interest rate environment. We manage our gap position for time horizons of one month, two months, three months, 4-6 months, 7-12 months, 13-24 months, 25-36 months, 37-60 months and more than 60 months. The goal of our asset/liability management is for the Bank to maintain a net interest income at risk in an up or down 100 basis point environment at less than (5)%. At June/September 30, 2023, the Bank was within the policy guidelines for asset/liability management.

The table below depicts the estimated impact on net interest income of immediate changes in interest rates at the specified levels.

As of June 30, 2023		As of September 30, 2023	Estimated Increase/Decrease in Net Interest Income(1)	Estimated Increase/Decrease in Net Interest Income(1)
Changes in Interest Rates (in basis points)	As of September 30, 2023			
+300			(6.6)%	(9.7)%
+200			(4.8)%	(7.0)%
+100			(2.2)%	(3.3)%
-100			2.8%	3.8%

(1) The percentage change in this column represents the projected net interest income for 12 months on a flat balance sheet in a stable interest rate environment versus the projected net interest income in the various rate scenarios.

The computation of the prospective effects of hypothetical interest rate changes requires numerous assumptions regarding characteristics of new business and the behavior of existing positions. These business assumptions are based upon our experience, business plans and published industry experience. Key assumptions include asset prepayment speeds, competitive factors, the relative price sensitivity of certain assets and liabilities, and the expected life of non-maturity deposits. However, there are a number of factors that influence the effect of interest rate fluctuations on us which are difficult to measure and predict. For example, a rapid drop in interest rates might cause our loans to repay at a more rapid pace and certain mortgage-related investments to prepay more quickly than projected. This could mitigate some of the benefits of falling rates as are expected when we are in a negatively-gapped position. Conversely, a rapid rise in rates could give us an opportunity to increase our margins and stifle the rate of repayment on our mortgage-related loans which would increase our returns; however, we may need to increase the rates we offer to maintain or increase deposits, which would adversely impact our margins. As a result, because these assumptions are inherently uncertain, actual results will differ from simulated results.

Liquidity and Capital Resources

Liquidity. Liquidity is a measure of the ability to fund loan commitments and meet deposit maturities and withdrawals in a timely and cost-effective way. Cash flow requirements can be met by generating net income, attracting new deposits, converting assets to cash or borrowing funds. While maturities and scheduled amortization of loans and securities are predictable sources of funds, deposit outflows, loan prepayments, loan sales and borrowings are greatly influenced by general interest rates, economic conditions and the competitive environment in which we operate. To minimize funding risks, we closely monitor our liquidity position through periodic reviews of maturity profiles, yield and rate behaviors, and loan and deposit forecasts. Excess short-term liquidity is usually invested in overnight federal funds sold.

Our core deposits, which are deposits excluding time deposits greater than \$250,000 and deposits of municipalities and other political entities, are our most stable source of liquidity to meet our cash flow needs due to the nature of the long-term relationships generally established with our customers. Maintaining the ability to acquire these funds as needed in a variety of markets, and within ALCO compliance targets, is essential to ensuring our liquidity. At **June** **September** 30, 2023 and December 31, 2022, **67%** **66%** and 70% of our total assets, respectively, were funded by core deposits.

Our investment portfolio is another alternative for meeting our cash flow requirements. Investment securities generate cash flow through principal payments and maturities, and they generally have readily available markets that allow for their conversion to cash. At **June** **September** 30, 2023, **96%** **95%** of our investment securities portfolio was classified as AFS and we had gross unrealized losses in our AFS investment securities portfolio of **\$62.8** **77.1** million and gross unrealized gains of \$0.3 million. The sale of securities in a loss position would cause us to record a loss on sale of investment securities in noninterest income in the period during which the securities were sold. Some securities are pledged to secure certain deposit types or short-term borrowings, such as FHLB advances and borrowings under the BTFP, which impacts their liquidity. At **June** **September** 30, 2023, securities with a carrying value of **\$357.0** **\$322.4** million were pledged to secure certain deposits, borrowings, and other liabilities, compared to \$165.7 million in pledged securities at December 31, 2022 with the increase due primarily to the pledge of securities to secure borrowings under the BTFP.

Other sources available for meeting liquidity needs include advances from the FHLB, repurchase agreements and other borrowings. FHLB advances are primarily used to match-fund fixed rate loans in order to minimize interest rate risk and also may be used to meet day to day liquidity needs, particularly if the prevailing interest rate on an FHLB advance compares favorably to the rates that we would be required to pay to attract deposits. At **June** **September** 30, 2023, the balance of our outstanding advances with the FHLB was \$23.5 million, all long-term advances, a decrease from \$387.0 million at December 31, 2022, consisting of \$333.5 million short-term and \$53.5 million long-term advances as we utilized the BTFP. The total amount of the remaining credit available to us from the FHLB at **June** **September** 30, 2023 was **\$914.4** **\$914.9** million. At **June** **September** 30, 2023, our FHLB borrowings were collateralized by a blanket pledge of certain loans totaling approximately **\$962.2** **\$962.8** million.

Beginning in March 2023, we are eligible to borrow from the BTFP, which provides additional liquidity through borrowings secured by the pledging of certain qualifying securities and other assets valued at par. The BTFP is a one-year program ending March 11, 2024, and we can borrow any time during the term and can repay the obligation at any time without penalty. During the second quarter, we utilized the BTFP to secure fixed rate funding for a one-year term and reduce short-term FHLB advances, which are priced daily. At **June** **September** 30, 2023, borrowings outstanding under the BTFP were \$235.8 million, and our remaining borrowing capacity under the BTFP was **\$23.6 million** **\$58.9 million** based on the value of securities available to be used as collateral, valued at par value as permitted under the program.

Repurchase agreements are contracts for the sale of securities which we own with a corresponding agreement to repurchase those securities at an agreed upon price and date. Our policies limit the use of repurchase agreements to those collateralized by investment securities. We had **\$5.2** **13.9** million of repurchase agreements outstanding at **June** **September** 30, 2023 and none at December 31, 2022.

We maintain unsecured lines of credit with other commercial banks totaling \$60.0 million. These lines of credit are federal funds lines of credit and are used for overnight borrowing only. The lines of credit mature at various times within the next year. There were no outstanding balances on our unsecured lines of credit at **June** **September** 30, 2023 and December 31, 2022.

At **June** **September** 30, 2023, we held **\$65.9** **63.7** million of cash and cash equivalents and maintained **\$998.0** million approximately **\$1.03** billion of available funding from **Federal Home Loan Bank** **FHLB** advances, the BTFP, and unsecured lines of credit with correspondent banks. Cash and cash equivalents and available funding represent **145%** represent **147%** of uninsured deposits of **\$731.2** **\$744.2** million at **June** **September** 30, 2023.

In addition, at **June** **September** 30, 2023 and December 31, 2022, we had \$45.0 million in aggregate principal amount of subordinated debt outstanding. In April 2022, we completed a private placement of \$20.0 million in aggregate principal amount of our 2032 Notes, and used the majority of the proceeds to redeem \$18.6 million of our 2027 Notes in June 2022. See discussion above under Discussion and Analysis of Financial Condition – Borrowings – 2032 Notes. For additional information on our 2027, 2029, and 2032 Notes, see our Annual Report for the year ended December 31, 2022, Part **II**, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Discussion and Analysis of Financial Condition – Borrowings" and Note 11 to the financial statements included in such report.

Our liquidity strategy is focused on using the least costly funds available to us in the context of our balance sheet composition and interest rate risk position. Accordingly, we target growth of noninterest-bearing deposits. Although we cannot directly control the types of deposit instruments our customers choose, we can influence those choices with the interest rates and deposit specials we offer. In recent periods, the proportion of our deposits represented by noninterest-bearing deposits has declined primarily due to rising market interest rates. At **June** **September** 30, 2023, we held **\$153.4** **197.7** million of brokered time deposits and no brokered demand deposits, as defined for federal regulatory purposes, to secure fixed cost funding and reduce **short-term borrowings** **FHLB advances**. At December 31, 2022, we held \$10.0 million of brokered time deposits and no brokered demand deposits, as defined for federal regulatory purposes. The Bank has historically used brokered demand deposits to satisfy the required borrowings under its interest rate swap agreements. We hold QwickRate® deposits, included in our time deposit balances, which we obtain through a qualified network to address liquidity needs when rates on such deposits compare favorably with deposit rates in our markets. At **June** **September** 30, 2023, we held **he** **\$23.8** million **old** **\$17.0** million of **QwickRaf** **QwickRate® te®** deposits, a decrease compared to \$26.5 million at December 31, 2022.

The following table presents, by type, our funding sources, which consist of total average deposits and borrowed funds, as a percentage of total funds and the total cost of each funding source for the three and **six** **nine** months ended **June** **30, 2023** **September** 30, 2023 and 2022.

Capital Management. Our primary sources of capital include retained earnings, capital obtained through acquisitions, and proceeds from the sale of our capital stock and subordinated debt. We may issue additional common stock and debt securities from time to time to fund acquisitions and support our organic growth. In April 2022, we completed a private placement of \$20.0 million in aggregate principal amount of our 2032 Notes, which are structured to qualify as Tier 2 capital for regulatory purposes and used the majority of the proceeds to redeem \$18.6 million of our 2027 Notes in June 2022.

During the six nine months ended June 30, 2023 September 30, 2023, we paid \$1.9 2.9 million in dividends, compared to \$1.7 2.6 million during the six nine months ended June 30, 2022 September 30, 2022. We declared dividends on our common stock of \$0.195 0.295 per share during the six nine months ended June 30, 2023 September 30, 2023 compared to dividends of \$0.175 0.27 per share during the six nine months ended June 30, 2022 September 30, 2022. The Company has We have had a stock repurchase program since 2015. During the nine months ended September 30, 2023, we paid \$2.7 million to repurchase 190,682 shares of our common stock, compared to paying \$10.3 million to repurchase 508,780 shares of its common stock during the nine months ended September 30, 2022. On July 19, 2023, we announced that our board of directors authorized the repurchase of an additional 350,000 shares of our common stock under the program. The Company had 248,439 546,032 shares of its common stock remaining authorized for repurchase under the program at June September 30, 2023. During the six months ended June 30, 2023, the Company paid \$2.0 million to repurchase 138,275 shares of its common stock, compared to paying \$7.6 million to repurchase 381,919 shares of its common stock during the six months ended June 30, 2022. On July 19, 2023, the Company announced that the board of directors authorized the repurchase of an additional 350,000 shares of our common stock under the program.

We are subject to various regulatory capital requirements administered by the Federal Reserve and the OCC which specify capital tiers, including the following classifications for the Bank under the OCC's prompt corrective action regulations.

Capital Tiers(1)	Tier 1 Leverage Ratio	Common Equity		Ratio of Tangible to Total Assets	
		Tier 1 Capital Ratio	Tier 1 Capital Ratio	Total Capital Ratio	
Well capitalized	5% or above	6.5% or above	8% or above	10% or above	
Adequately capitalized	4% or above	4.5% or above	6% or above	8% or above	
Undercapitalized	Less than 4%	Less than 4.5%	Less than 6%	Less than 8%	
Significantly undercapitalized	Less than 3%	Less than 3%	Less than 4%	Less than 6%	
Critically undercapitalized					2% or less

(1) In order to be well capitalized or adequately capitalized, a bank must satisfy each of the required ratios in the table. In order to be undercapitalized or significantly undercapitalized, a bank would need to fall below just one of the relevant ratio thresholds in the table. In order to be well capitalized, the Bank cannot be subject to any written agreement or order requiring it to maintain a specific level of capital for any capital measure. Pursuant to regulatory capital rules, the Company has made an election not to include unrealized gains and losses in the investment securities portfolio for purposes of calculating "Tier 1" capital and "Tier 2" capital.

The Company and the Bank each were in compliance with all regulatory capital requirements at June September 30, 2023 and December 31, 2022. The Bank also was considered "well-capitalized" under the OCC's prompt corrective action regulations as of these dates.

The following table presents the actual capital amounts and regulatory capital ratios for the Company and the Bank as of the dates presented (dollars in thousands).

	Actual				Minimum Capital Requirement for Bank to be Well Capitalized Under Prompt Corrective Action Rules				Actual				Minimum Capital Requirement for Bank to be Well Capitalized Under Prompt Corrective Action Rules							
	Amount		Ratio		Amount		Ratio		Amount		Ratio		Amount		Ratio

Off-Balance Sheet Transactions

Swap Contracts. The Bank historically has entered into interest rate swap contracts, some of which are forward starting, to manage exposure against the variability in the expected future cash flows (future interest payments) attributable to changes in the 1-month LIBOR associated with the forecasted issuances of 1-month fixed rate debt arising from a rollover strategy. An interest rate swap is an agreement whereby one party agrees to pay a fixed rate of interest on a notional principal amount in exchange for receiving a floating rate of interest on the same notional amount for a predetermined period of time, from a second party. At June September 30, 2023 and December 31, 2022 we had no current or forward starting interest rate swap agreements, other than interest rate swaps related to customer loans, described below. For additional information, see Note 7. Derivative Financial Instruments in the Notes to Consolidated Financial Statements contained in Part II, Item 1. "Financial Statements" included herein.

During the three and six nine months ended June 30, 2022 September 30, 2022, the Company we voluntarily terminated our remaining interest rate swaps swap agreements with a total notional amounts amount of \$60.0 million and \$15.0 million respectively, in response to market conditions. Unrealized gains For the nine months ended September 30, 2022, an unrealized gain of \$3.7 million and \$6.4 million, respectively, net of tax expenses expense of \$1.0 million and \$1.7 million, respectively, were was reclassified from "Accumulated other comprehensive loss" and recorded as "Swap termination fee income" in noninterest income in the accompanying consolidated statements of income for income.

For the three and six nine months ended June 30, 2022.

For the three and six months ended June 30, 2022 September 30, 2022, gains a gain of \$1.2 million and \$4.3 million, net of tax expenses expense of \$0.3 million and \$1.2 million, respectively, have has been recognized in "Other comprehensive loss" in the accompanying consolidated statements of comprehensive (loss) income (loss) for the change in fair value of the interest rate rate swaps.

The Company also enters into interest rate swap contracts that allow commercial loan customers to effectively convert a variable-rate commercial loan agreement to a fixed-rate commercial loan agreement. Under these agreements, the Company enters into a variable-rate loan agreement with a customer in addition to an interest rate swap agreement, which serves to effectively swap the customer's variable-rate loan into a fixed-rate loan. The Company then enters into a corresponding swap agreement with a third party in order to economically hedge its exposure through the customer agreement. The interest rate swaps with both the customers and third parties are not designated as hedges under FASB ASC Topic 815, "Derivatives and Hedging", and are marked to market through earnings. As the interest rate swaps are structured to offset each other, changes to the underlying benchmark interest rates considered in the valuation of these instruments do not result in an impact to earnings; however, there may be fair value adjustments related to credit quality variations between counterparties, which may impact earnings as required by FASB ASC Topic 820, "Fair Value Measurements". The Company did not recognize any gains or losses in other income resulting from fair value adjustments during the three and **six** **nine** months ended **June 30, 2023** **September 30, 2023** and 2022. At **June** **September** 30, 2023 we had notional amounts of **\$144.7 million** **\$143.3 million** in interest rate swap contracts with customers and **\$144.7 million** **\$143.3 million** in offsetting interest rate swap contracts with other financial institutions. The fair value of the swap contracts consisted of gross assets of **\$19.3 million** **\$21.9 million** and gross liabilities of **\$19.3 million** recorded **\$21.9 million** recorded in "Other assets" and "Accrued taxes and other liabilities", respectively, in the accompanying consolidated balance sheet.

Unfunded Commitments. The Bank enters into loan commitments and standby letters of credit in the normal course of its business. Loan commitments are made to meet the financing needs of our customers, while standby letters of credit commit the Bank to make payments on behalf of customers when certain specified future events occur. The credit risks associated with loan commitments and standby letters of credit are essentially the same as those involved in making loans to our customers. Accordingly, our normal credit policies apply to these arrangements. Collateral (e.g., securities, receivables, inventory, equipment, etc.) is obtained based on management's credit assessment of the customer. Loan commitments are also evaluated in a manner similar to the allowance for credit losses on loans. The reserve for unfunded loan commitments is included in "Accrued taxes and other liabilities" in the accompanying consolidated balance sheets and was **\$0.2 million** and **\$0.4 million** at **June** **September** 30, 2023 and December 31, 2022, respectively.

Loan commitments and standby letters of credit do not necessarily represent future cash requirements, in that while the customer typically has the ability to draw upon these commitments at any time, these commitments often expire without being drawn upon in full or at all. Substantially all of our standby letters of credit expire within one year. Our unfunded loan commitments and standby letters of credit outstanding are summarized below as of the dates indicated (dollars in thousands):

	June 30, 2023	December 31, 2022	September 30, 2023	December 31, 2022
Loan commitments	\$ 336,427	\$ 333,040	\$ 542,189	\$ 333,040
Standby letters of credit	14,795	11,379	14,170	11,379

The Company closely monitors the amount of remaining future commitments to borrowers in light of prevailing economic conditions and adjusts these commitments as necessary. The Company intends to continue this process as new commitments are entered into or existing commitments are renewed.

Loan commitments at September 30, 2023 include commitments of \$202.0 million related to the purchase of commercial and industrial revolving lines of credit in two tranches, the second tranche of which closed in the fourth quarter of 2023. For additional information, see Note 1. Summary of Significant Accounting Policies – Acquisition Accounting – Loan Purchase Agreement in the Notes to Consolidated Financial Statements contained in Part I. Item 1. "Financial Statements" included herein.

Additionally, at **June** **September** 30, 2023, the Company had unfunded commitments of **\$1.6 million** for its investment in Small Business Investment Company qualified funds and other investment funds.

For the **six** **nine** months ended **June 30, 2023** **September 30, 2023** and for the year ended December 31, 2022, except as disclosed herein and in the Company's Annual Report, we engaged in no off-balance sheet transactions that we believe are reasonably likely to have a material effect on our financial condition, results of operations, or cash flows.

Lease Obligations. The Company's primary leasing activities relate to certain real estate leases entered into in support of the Company's branch operations. The Company's branch locations operated under lease agreements have all been designated as operating leases. The Company does not lease equipment under operating leases, nor does it have leases designated as finance leases.

The following table presents, as of **June** **September** 30, 2023, contractually obligated lease payments due under non-cancelable operating leases by payment date (dollars in thousands).

Less than one year	\$ 361	\$ 338
One to three years	669	673
Three to five years	681	682
Over five years	841	756
Total	\$ 2,552	\$ 2,449

On January 27, 2023, we completed the sale of certain assets, deposits and other liabilities associated with the Alice and Victoria, Texas branch locations to First Community Bank. Upon the completion of the sale, we recorded \$0.3 million of occupancy expense to terminate the remaining contractually obligated lease payments due under non-cancelable operating leases.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Quantitative and qualitative disclosures about market risk as of December 31, 2022 are set forth in the Company's Annual Report in the section captioned "Management's Discussion and Analysis of Financial Condition and Results of Operations – Risk Management." Please refer to the information in Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations," under the heading "Risk Management" in this report for additional information about the Company's market risk for the **six nine** months ended **June 30, 2023** **September 30, 2023**; except as discussed therein, there have been no material changes in the Company's market risk since December 31, 2022.

Item 4. Controls and Procedures

Based on their evaluation as of the end of the period covered by this quarterly report on Form 10-Q, the Company's Principal Executive Officer and Principal Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) are effective for ensuring that information the Company is required to disclose in the reports that it files or submits under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

There were no changes in the Company's internal control over financial reporting during the fiscal quarter covered by this quarterly report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1A. Risk Factors

We are supplementing the risk factors described under Part I. Item 1A. "Risk Factors" of our Annual Report with the risk factor set forth below, which should be read in conjunction with the risk factors and other disclosures in this report and in our Annual Report.

Recent disruptions in the banking industry, particularly if continuing or worsening, and related regulatory responses, could have a material adverse effect on the Bank, including its liquidity and costs.

Recent highly-publicized bank failures have caused significant disruptions in the banking industry. These industry developments have negatively impacted overall customer confidence in the safety of their deposits, particularly uninsured deposits, at some regional banks. As a result, customers may choose to move deposits to, or maintain deposits with, larger financial institutions or move funds to investment alternatives outside the banking industry, which could materially adversely impact our liquidity, cost of funds, loan funding capacity, net interest margin, capital and results of operations. The rapid failures of SVB and Signature Bank highlighted risks associated with advances in technology that increase the speed at which information, concerns and rumors can spread through traditional and new media, and increase the speed at which deposits can be moved from bank to bank or outside the banking system, heightening liquidity concerns of traditional banks. While regulators and large banks have taken steps designed to increase liquidity at regional banks and strengthen depositor confidence in the broader banking industry, there can be no guarantee that these steps will succeed. In addition, regulators may adopt new regulations or increase FDIC insurance costs, which could increase our costs of doing business. For more information on the Company's liquidity position, see Part I. Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations under the headings "Certain Events That Affect Period-over-Period Comparability," "Discussion and Analysis of Financial Condition – Deposits" and "Liquidity and Capital Resources."

Item 2. Unregistered Sales of Equity Securities, and Use of Proceeds, and Issuer Purchases of Equity Securities

Unregistered Sales of Equity Securities

None.

Issuer Purchases of Equity Securities

The table below provides information with respect to purchases made by the Company of shares of its common stock during each of the months during the three month period ended **June** **September** 30, 2023.

Month	Number of Shares Purchased	Average Price per Share	Total Value of Shares Purchased
June	0	\$0.00	\$0.00
July	0	\$0.00	\$0.00
August	0	\$0.00	\$0.00
September	0	\$0.00	\$0.00

Period	(a) Total Number of Shares (or Units) Purchased ⁽¹⁾	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) That May Be Purchased Under the Plans or Programs
April 1, 2023 - April 30, 2023	14,802	\$ 13.81	3,808	336,931
May 1, 2023 - May 31, 2023	47,946	12.00	47,700	289,231
June 1, 2023 - June 30, 2023	40,792	11.35	40,792	248,439
	103,540	\$ 12.00	92,300	248,439

Period	(a) Total Number of Shares (or Units) Purchased ⁽¹⁾	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) That May Be Purchased Under the Plans or Programs ⁽²⁾
July 1, 2023 - July 31, 2023	45	\$ 12.11	—	598,439
August 1, 2023 - August 31, 2023	33,964	13.33	33,574	564,865
September 1, 2023 - September 30, 2023	18,893	12.14	18,833	546,032
	52,902	\$ 12.90	52,407	546,032

(1) Includes 11,240,495 shares surrendered to cover the payroll taxes due upon the vesting of restricted stock.

(2) The Company has had a stock repurchase program since 2015. On July 19, 2023, the Company announced that its board of directors authorized the repurchase of an additional 350,000 shares of the Company's common stock under its stock repurchase plan. As of July 19, 2023, September 30, 2023, the Company had 598,439 shares remaining available under the program.

Because we are a holding company with no material business activities, our ability to pay dividends is substantially dependent upon the ability of the Bank to transfer funds to us in the form of dividends, loans and advances. The Bank's ability to pay dividends and make other distributions and payments to us depends upon the Bank's earnings, financial condition, general economic conditions, compliance with regulatory requirements and other factors. In addition, the Bank's ability to pay dividends to us is itself subject to various legal, regulatory and other restrictions under federal banking laws that are described in Part II, Item 1 "Business", of our Annual Report.

In addition, as a Louisiana corporation, we are subject to certain restrictions on dividends under the Louisiana Business Corporation Act. Generally, a Louisiana corporation may pay dividends to its shareholders unless, after giving effect to the dividend, either (1) the corporation would not be able to pay its debts as they come due in the usual course of business or (2) the corporation's total assets are less than the sum of its total liabilities and the amount that would be needed, if the corporation were to be dissolved at the time of the payment of the dividend, to satisfy the preferential rights of shareholders whose preferential rights are superior to those receiving the dividend. In addition, our existing and future debt agreements limit, or may limit, our ability to pay dividends. Under the terms of our 5.125% Fixed-to-Floating Rate Subordinated Notes due 2029, we may not pay a dividend if either we or the Bank, both immediately prior to the declaration of the dividend and after giving effect to the payment of the dividend, would not maintain regulatory capital ratios that are at "well capitalized" levels for regulatory capital purposes. We are also prohibited from paying dividends upon and during the continuance of any Event of Default under such notes. Under the terms of our 5.125% Fixed-to-Floating Rate Subordinated Notes due 2032, we are prohibited from paying dividends upon and during the continuance of any Event of Default under such notes. Finally, our ability to pay dividends may be limited on account of the junior subordinated debentures that we assumed through acquisitions. We must make payments on the junior subordinated debentures before any dividends can be paid on our common stock.

CERTIFICATIONS

I, John J. D'Angelo, certify that:

1. I have reviewed this quarterly report on Form 10-Q for the period ended June September 30, 2023 of Investar Holding Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

- a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
- b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATIONS

I, John R. Campbell, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q for the period ended **June September 30, 2023** of Investar Holding Corporation;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

- a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
