FORM 10-Q

(Mark one)

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the quarterly period ended **June 30, 2024** **September 30, 2024**.

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the transition period from _____ to _____.

Commission file number 0-4604

CINCINNATI FINANCIAL CORPORATION

(Exact name of registrant as specified in its charter)

Ohio

31-0746871

(State or other jurisdiction of
incorporation or organization)

(I.R.S. Employer Identification No.)

6200 S. Gilmore Road, Fairfield, Ohio

45014-5141

(Address of principal executive offices)

(Zip code)

Registrant's telephone number, including area code: (513) 870-2000

N/A

(Former name, former address and former fiscal year, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common stock	CINF	Nasdaq Global Select Market

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

☒ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).

☒ Yes ☐ No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a nonaccelerated filer, a smaller reporting company or an emerging growth company. See definition of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

☒ Large accelerated filer ☐ Accelerated filer ☐ Nonaccelerated filer ☐ Smaller reporting company

☐ Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act):

☐ Yes ☒ No

As of **July 19, 2024** **October 18, 2024**, there were **156,240,158** **156,315,102** shares of common stock outstanding.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1 — Accounting Policies

The condensed consolidated financial statements include the accounts of Cincinnati Financial Corporation and its consolidated subsidiaries, each of which is wholly owned. These statements are presented in conformity with accounting principles generally accepted in the United States of America (GAAP). All intercompany balances and transactions have been eliminated in consolidation.

The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Our actual results could differ from those estimates. Certain financial information that is normally included in annual financial statements prepared in accordance with GAAP, but that is not required for interim reporting purposes, has been condensed or omitted.

Our June 30, 2024 September 30, 2024, condensed consolidated financial statements are unaudited. We believe that we have made all adjustments, consisting only of normal recurring accruals, that are necessary for fair presentation. These condensed consolidated financial statements should be read in conjunction with our consolidated financial statements included in our 2023 Annual Report on Form 10-K. The results of operations for interim periods do not necessarily indicate results to be expected for the full year.

Pending Accounting Updates

ASU 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures

In November 2023, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2023-07, *Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures*. ASU 2023-07 enhances reportable segment disclosures by requiring entities to disclose significant segment expenses that are regularly provided to the chief operating decision maker (CODM) and included within the reported measure of profit or loss. This ASU also requires disclosure of the title and position of the CODM as well as a description of how the reported measure of profit or loss is used to assess segment performance and allocate resources. The effective date of ASU 2023-07 is for annual reporting periods beginning after December 15, 2023, and interim reporting periods within annual periods beginning after December 15, 2024, and should be applied retrospectively to all prior periods presented. The ASU has not yet been adopted and will not have a material impact on our company's consolidated financial position, results of operations or cash flows, but the ASU will require additional disclosures in our annual and interim financial statements.

ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures

In December 2023, the FASB issued ASU 2023-09, *Income Taxes (Topic 740): Improvements to Income Tax Disclosures*. ASU 2023-09 enhances the transparency and decision usefulness of income tax disclosures by requiring entities to disclose specific categories within their rate reconciliation as well as additional items within those categories above a prescribed threshold. This ASU also requires disclosure of the amount of income taxes paid (net of refunds received) disaggregated by federal, state and foreign taxes as well as additional items within those categories above a prescribed threshold. The effective date of ASU 2023-09 is for annual reporting periods beginning after December 15, 2024, and should be applied prospectively with retrospective application permitted. The ASU has not yet been adopted and will not have a material impact on our company's consolidated financial position, results of operations or cash flows, but the ASU will require additional disclosures in our annual financial statements.

NOTE 2 – Investments

The following table provides amortized cost, gross unrealized gains, gross unrealized losses and fair value for our fixed-maturity securities:

The ~~increase~~ decrease in net unrealized investment losses in our fixed-maturity portfolio at ~~June 30, 2024~~ September 30, 2024, is primarily due to an ~~increase~~ a decrease in U.S. Treasury ~~yields~~ yields and a tightening of corporate credit spreads as well as realized losses on sales of some lower-yielding fixed maturities. Our asset-backed securities had an average rating of ~~Aa2/AA-~~ and Aa3/AA- at ~~both June 30, 2024~~ September 30, 2024, and December 31, 2023, respectively.

The table below provides fair values and gross unrealized losses by investment category and by the duration of the securities' continuous unrealized loss positions:

The fair value of our equity portfolio was \$11.634 billion, \$11.570 billion, and \$10.989 billion at June 30, 2024, September 30, 2024, and December 31, 2023, respectively. Apple, Inc. (Nasdaq:AAPL) and Microsoft Corporation (Nasdaq:MSFT), an equity holding, was holdings, were our largest single investment holding holdings with a fair value of \$1.001 billion, \$885 million, and \$842 million, which was 8.9%, 7.9%, and 7.9% of our publicly traded common equities portfolio and 3.8%, 3.2%, and 3.4% of the total investment portfolio at June 30, 2024, September 30, 2024, and December 31, 2023, respectively.

The allowance for credit losses on fixed-maturity securities was \$43 million, \$39 million, and \$18 million at June 30, 2024, September 30, 2024, and December 31, 2023, respectively.

There were 3,784, 2,495, and 2,840 fixed-maturity securities in a total unrealized loss position of \$767 million, \$404 million, and \$687 million at June 30, 2024, September 30, 2024, and December 31, 2023, respectively. Of those totals, 165 and 20 fixed-maturity securities had fair values below 70% of amortized cost at June 30, 2024, September 30, 2024, and December 31, 2023, respectively.

NOTE 3 – Fair Value Measurements

In accordance with accounting guidance for fair value measurements and disclosures, we categorized our financial instruments, based on the priority of the observable and market-based data for the valuation technique used, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices with readily available independent data in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable market inputs (Level 3). When various inputs for measurement fall within different levels of the fair value hierarchy, the lowest observable input that has a significant impact on fair value measurement is used. Our valuation techniques have not changed from those used at December 31, 2023, and ultimately management determines fair value. See our 2023 Annual Report on Form 10-K, Item 8, Note 3, Fair Value Measurements, Page 139, for information on characteristics and valuation techniques used in determining fair value.

Fair Value Disclosures for Assets

The following tables illustrate the fair value hierarchy for those assets measured at fair value on a recurring basis at **June 30, 2024**, **September 30, 2024**, and December 31, 2023. We do not have any liabilities carried at fair value.

Prior accident years											

and net premium using certain cash flow assumptions including mortality, morbidity and lapse rates as well as a discount rate assumption. The cash flow assumptions are established based on our current expectations and are reviewed annually to determine any necessary updates. These assumptions are also updated on an interim basis if evidence suggests that they should be revised. We use both our own experience and industry experience, adjusted for historical trends, in arriving at our cash flow assumptions. The discount rate assumption is based on upper-medium grade fixed-income instrument yields (market value discount rates) and is updated quarterly. Certain assumptions, including the mortality, lapse and long-term interest rate reversion targets, were updated in the second quarter of 2024 as part of our annual assumption unlocking. Changes in the inputs, judgments and assumptions during the period and the related measurement impact on the liability are reflected in the below tables.

We establish reserves for our universal life, deferred annuity and other investment contracts equal to the cumulative account balances, which include premium deposits plus credited interest less charges and withdrawals. Some of our universal life policies contain no-lapse guarantee provisions. For these policies, we establish a reserve in addition to the account balance, based on expected no-lapse guarantee benefits and expected policy assessments.

The following table summarizes our life policy and investment contract reserves and provides a reconciliation of the balances described in the below tables to those in the condensed consolidated balance sheets:

(Dollars in millions)	(Dollars in millions)	June 30, 2024	December 31, 2023	(Dollars in millions)	September 30, 2024	December 31, 2023

NOTE 6 – Deferred Policy Acquisition Costs

Expenses directly related to successfully acquired insurance policies – primarily commissions, premium taxes and underwriting costs – are deferred and amortized over the terms of the policies. We update our acquisition cost assumptions periodically to reflect actual experience. For property casualty, we evaluate the costs for recoverability. No premium deficiencies were recorded in the condensed consolidated statements of income, as the sum of the anticipated loss and loss expenses, policyholder dividends and unamortized deferred acquisition expenses did not exceed the related unearned premiums and anticipated investment income.

The table below shows the deferred policy acquisition costs and asset reconciliation.

(Dollars in millions)	(Dollars in millions)	Three months ended June 30,	Six months ended June 30,	(Dollars in millions)	Three months ended September 30,	Nine months ended September 30,

Investment gains and losses, net, and other investment gains and losses, net, are recorded in the investment gains and losses, net, line item in the condensed consolidated statements of income. Amortization of pension obligations is recorded in the insurance losses and contract holders' benefits and underwriting, acquisition and insurance expenses line items in the condensed consolidated statements of income.

NOTE 8 – Reinsurance

Primary components of our property casualty reinsurance assumed operations include involuntary and voluntary assumed as well as contracts from our reinsurance assumed operations, known as Cincinnati Re. Primary components of our ceded reinsurance include a property per risk treaty, property excess treaty, casualty per occurrence treaty, casualty excess treaty, property catastrophe treaty and retrocessions on our reinsurance assumed operations. Management's decisions about the appropriate level of risk retention are affected by various factors, including changes in our underwriting practices, capacity to retain risks and reinsurance market conditions.

The table below summarizes our consolidated property casualty insurance net written premiums, earned premiums and incurred loss and loss expenses:

	(Dollars in millions)	Three months ended June 30,	Six months ended June 30,	(Dollars in millions)	Three months ended September 30,	Nine months ended September 30,	
(Dollars in millions)	2024	2024	2023	2024	2023	2024	2023

Earned premiums
Direct incurred loss and loss expenses
Direct incurred loss and loss expenses
Direct incurred loss and loss expenses
Assumed incurred loss and loss expenses
Ceded incurred loss and loss expenses
Incurred loss and loss expenses

Our life insurance company purchases reinsurance for protection of a portion of the risks that are written. Primary components of our life reinsurance program include individual mortality coverage, aggregate catastrophe and accidental death coverage in excess of certain deductibles.

The table below summarizes our consolidated life insurance earned premiums and contract holders' benefits incurred:

(Dollars in millions)	(Dollars in millions)	Three months ended June 30,	Six months ended June 30,	(Dollars in millions)	Three months ended September 30,	Nine months ended September 30,			
	2024	2024	2023	2024	2023	2024	2023	2024	2023

Earned premiums									
Direct contract holders' benefits incurred									
Direct contract holders' benefits incurred									
Direct contract holders' benefits incurred									
Ceded contract holders' benefits incurred									
Ceded contract holders' benefits incurred									
Ceded contract holders' benefits incurred									
Contract holders' benefits incurred									

The ceded benefits incurred can vary depending on the type of life insurance policy held and the year the policy was issued.

The allowance for uncollectible property casualty premiums was \$18\$17 million and \$16 million at June 30, 2024September 30, 2024, and December 31, 2023, respectively. The allowances for credit losses on other premiums receivable and reinsurance recoverable assets were immaterial at June 30, 2024September 30, 2024, and December 31, 2023.

NOTE 9 – Income Taxes

The differences between the 21% statutory federal income tax rate and our effective income tax rate were as follows:

	(Dollars in millions)	Three months ended June 30,				Six months ended June 30,			(Dollars in millions)	Three months ended September 30,				Nine Se
	(Dollars in millions)	2024	2024	2023		2024	2024	2023	2024	2023	2024	2023		Se
Tax at statutory rate:	Tax at statutory rate:	\$ 81	21.0 %	\$ 140	21.0 %	\$281	21.0 %	\$196	21.0 %	\$219	21.0 %	\$219	21.0 %	
Increase (decrease) resulting from:	Increase (decrease) resulting from:													
Tax-exempt income from municipal bonds														
Dividend received exclusion														
Other														
Provision for income taxes		\$ 74	19.2 %	\$132	19.8 %	\$272	20.3 %	\$ 175	18.7 %					
Provision (benefit) for income taxes		\$220	21.2 %	\$ (49)	33.1 %	\$492	20.7 %	\$ 126	16.0 %					

The provision (benefit) for federal income taxes is based upon filing a consolidated income tax return for the company and its domestic subsidiaries.

We continue to believe that after considering all positive and negative evidence of taxable income in the carryback and carryforward periods as permitted by law, it is more likely than not that all of the deferred tax assets on our U.S. domestic operations and those related to Cincinnati Global Underwriting Ltd.SM (Cincinnati Global) will be realized. As a result, we have no valuation allowance for our U.S. domestic operations or Cincinnati Global at both **June 30, 2024** **September 30, 2024**, and December 31, 2023.

During the third quarter of 2024, we were notified by the Internal Revenue Service (IRS) that the audit of tax years ended December 31, 2021 and 2020, has concluded. Despite this, the statute of limitations remains open through September of 2025.

Cincinnati Global

Cincinnati Global had no operating loss carryforwards in the United States and \$85 million and \$100 million in the United Kingdom at **June 30, 2024** **September 30, 2024**, and December 31, 2023, respectively. These Cincinnati Global losses can only be utilized within the Cincinnati Global group.

NOTE 10 – Net Income (Loss) Per Common Share

Basic earnings per share are computed based on the weighted average number of common shares outstanding. Diluted earnings per share are computed based on the weighted average number of common and dilutive potential common shares outstanding using the treasury stock method. The table shows calculations for basic and diluted earnings per share:

(In millions, except per share data)	(In millions, except per share data)	Three months ended June 30, 2024	2023	Six months ended June 30, 2024	2023	(In millions, except per share data)	Three months ended September 30, 2024	2023	Nine months ended September 30, 2024	2023
Numerator:	Numerator:									
Net income—basic and diluted										
Net income (loss)—basic and diluted										
Denominator:	Denominator:									
Basic weighted-average common shares outstanding										
Effect of share-based awards:	Effect of share-based awards:					Effect of share-based awards:				
Stock options										
Nonvested shares										
Diluted weighted-average shares										
Earnings per share:										
Earnings (loss) per share:										
Basic										
Diluted										
Number of anti-dilutive share-based awards										

The source of dilution of our common shares are certain equity-based awards. See our 2023 Annual Report on Form 10-K, Item 8, Note 17, Share-Based Associate Compensation Plans, Page 177, for information about share-based awards. The above table shows the number of anti-dilutive share-based awards for the three and six nine months ended June 30, 2024 September 30, 2024 and 2023. In accordance with Accounting Standards Codification 260, *Earnings per Share*, the assumed exercise of share-based awards was excluded from the computation of diluted loss per share for the three months ended September 30, 2023 because their exercise would have anti-dilutive effects.

NOTE 11 – Employee Retirement Benefits

The following summarizes the components of net periodic benefit for our qualified and supplemental pension plans:

(Dollars in millions)	(Dollars in millions)	Three months ended June 30, 2024	2023	Six months ended June 30, 2023	(Dollars in millions)	Three months ended September 30, 2023	Nine months ended September 30, 2023	2024	2023	2024	2023
Service cost											
Non-service (benefit) costs:											
Interest cost											
Interest cost											
Interest cost											
Expected return on plan assets											
Amortization of actuarial loss (gain) and prior service cost											
Other											
Total non-service benefit											
Net periodic benefit											

See our 2023 Annual Report on Form 10-K, Item 8, Note 13, Employee Retirement Benefits, Page 170, for information on our retirement benefits. The net periodic benefit is allocated in the same proportion primarily to the underwriting, acquisition and insurance expenses line item with the remainder allocated to the insurance losses and contract holders' benefits line item on the condensed consolidated statements of income for both 2024 and 2023.

Cincinnati Financial Corporation Third-Quarter 2024 10-Q

We made matching contributions totaling \$7 million and \$6 million to our 401(k) and Top Hat savings plans during the **second third** quarter of 2024 and 2023, respectively, and contributions of **\$16 million \$23 million** and **\$14 million \$20 million** for the first **half nine months** of 2024 and 2023, respectively.

We made no contributions to our qualified pension plan during the first **six nine** months of 2024.

Cincinnati Financial Corporation Second-Quarter 2024 10-Q

Page 30

NOTE 12 – Commitments and Contingent Liabilities

The company, through its insurance subsidiaries, is involved in claims litigation arising in the ordinary course of conducting its business, both as a liability insurer defending or providing indemnity for third-party claims brought against insureds and as an insurer defending coverage claims brought against it. The company accounts for such activity through the establishment of unpaid loss and loss expense reserves. Subject to the uncertainties discussed in Note 4, Property Casualty Loss and Loss Expenses, and in the discussion in the balance of this Note, we believe that the ultimate liability, if any, with respect to such ordinary-course claims litigation, after consideration of provisions made for potential losses, costs of defense, and reinsurance recoveries, is immaterial to our consolidated financial position, results of operations and cash flows.

Beginning in April 2020, like many companies in the property casualty insurance industry, the company's property casualty subsidiaries were named as defendants in lawsuits seeking insurance coverage under commercial property insurance policies issued by the company for alleged losses resulting from the shutdown or suspension of their businesses due to the COVID-19 pandemic. Although the allegations vary, the plaintiffs generally seek a declaration of insurance coverage, damages for breach of contract in unspecified amounts for claim denials, interest and attorney fees. Some of the lawsuits also allege that the insurance claims were denied in bad faith or otherwise in violation of state laws and seek extra-contractual or punitive damages.

The company denies the allegations in these lawsuits and continues to vigorously defend them. The company maintains that it has no coverage obligations with respect to these lawsuits for business income allegedly lost by the plaintiffs due to the COVID-19 pandemic based on the terms of the applicable insurance policies. Although the policy terms vary, in general, the claims at issue in these lawsuits were denied because the policyholder identified no direct physical loss or damage to property at the insured premises, and the governmental orders that led to the complete or partial shutdown of the business were not due to the existence of any direct physical loss or damage to property in the immediate vicinity of the insured premises and did not prohibit access to the insured premises, as required by the terms of the insurance policies. Depending on the individual policy, additional policy terms and conditions may also prohibit coverage, such as exclusions for pollutants, ordinance or law, loss of use, and acts or decisions. The company's standard commercial property insurance policies generally did not contain a specific virus exclusion.

In addition to the inherent difficulty in predicting litigation outcomes, the COVID-19 pandemic business income coverage lawsuits present a number of uncertainties and contingencies that are not yet known, including how many policyholders will ultimately file claims, the extent to which any class may be certified, and the size and scope of any such classes. The legal theories advanced by plaintiffs vary by case as do the state laws that govern the policy interpretation. Most of these lawsuits have been dismissed, both by courts and by plaintiffs, but some have been appealed and a few others remain pending in trial courts. Appellate decisions issued to date generally have been favorable for the insurance industry, and the company has received numerous favorable rulings on appeal with no adverse appellate rulings to date. Some cases remain to be decided and in some jurisdictions, cases have been stayed pending appellate decisions in their state or federal circuit. Accordingly, little discovery has occurred on pending cases. In addition, business income calculations depend upon a wide range of factors that are particular to the circumstances of each individual policyholder and, here, virtually none of the plaintiffs have submitted proofs of loss or otherwise quantified or factually supported any allegedly covered loss. Moreover, the company's experience shows that demands for damages often bear little relation to a reasonable estimate of potential loss. Accordingly, management cannot now reasonably estimate the possible loss or range of loss, if any. Nonetheless, given the number of claims and potential claims, the indeterminate amounts sought, and the inherent unpredictability of litigation, it is possible that adverse outcomes, if any, in the aggregate could have a material adverse effect on the company's consolidated financial position, results of operations and cash flows.

The company and its subsidiaries also are occasionally involved in other legal and regulatory proceedings, some of which assert claims for substantial amounts. These actions include, among others, putative class actions seeking certification of state or national classes. Such proceedings have alleged, for example, improper depreciation of labor costs in repair estimates. The company's insurance subsidiaries also are occasionally parties to individual actions in which extra-contractual damages, punitive damages or penalties are sought, such as claims alleging bad faith handling of insurance claims or writing unauthorized coverage or claims alleging discrimination by former or current associates.

Cincinnati Financial Corporation Second-Quarter 2024 10-Q

Page 31

On a quarterly basis, we review these outstanding matters. Under current accounting guidance, we establish accruals when it is probable that a covered loss has been incurred and we can reasonably estimate its potential exposure. The company accounts for such probable and estimable losses, if any, through the establishment of legal expense reserves. Based on our quarterly review, we believe that our accruals for probable and estimable losses are reasonable and that the amounts accrued do not have a material effect on our consolidated financial position, results of operations and cash flows. However, if any one or more of these matters results in a judgment against us or settlement for an amount that

is significantly greater than the amount accrued, the resulting liability could have a material effect on the company's consolidated financial position, results of operations and cash flows. Based on our most recent review, our estimate for any other matters for which the risk of loss is not probable, but more than remote, is immaterial.

NOTE 13 – Segment Information

We operate primarily in two industries, property casualty insurance and life insurance. Our CODM regularly reviews our reporting segments to make decisions about allocating resources and assessing performance. Our reporting segments are:

- Commercial lines insurance
- Personal lines insurance
- Excess and surplus lines insurance
- Life insurance
- Investments

We report as Other the noninvestment operations of the parent company and its noninsurer subsidiary, CFC Investment Company. We also report as Other the underwriting results of Cincinnati Re and Cincinnati Global. See our 2023 Annual Report on Form 10-K, Item 8, Note 18, Segment Information, Page 180, for a description of revenue, income or loss before income taxes and identifiable assets for each of the five segments.

Segment information is summarized in the following table:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion highlights significant factors influencing the condensed consolidated results of operations and financial position of Cincinnati Financial Corporation. It should be read in conjunction with the consolidated financial statements and related notes included in our 2023 Annual Report on Form 10-K. Unless otherwise noted, the industry data is prepared by A.M. Best Co., a leading insurance industry statistical, analytical and financial strength rating organization. Information from A.M. Best is presented on a statutory basis for insurance company regulation in the United States of America. When we provide our results on a comparable statutory basis, we label it as such; all other company data is presented in accordance with accounting principles generally accepted in the United States of America (GAAP).

We present per share data on a diluted basis unless otherwise noted, adjusting those amounts for all stock splits and dividends. Dollar amounts are rounded to millions; calculations of percent changes are based on dollar amounts rounded to the nearest million. Certain percentage changes are identified as not meaningful (nm).

SAFE HARBOR STATEMENT

This is our "Safe Harbor" statement under the Private Securities Litigation Reform Act of 1995. Our business is subject to certain risks and uncertainties that may cause actual results to differ materially from those suggested by the forward-looking statements in this report. Some of those risks and uncertainties are discussed in our 2023 Annual Report on Form 10-K, Item 1A, Risk Factors, Page 30.

Factors that could cause or contribute to such differences include, but are not limited to:

- Ongoing developments concerning business interruption insurance claims and litigation related to the COVID-19 pandemic that affect our estimates of losses and loss adjustment expenses or our ability to reasonably estimate such losses, such as:
 - The continuing duration of the pandemic and governmental actions to limit the spread of the virus that may produce additional economic losses
 - The number of policyholders that will ultimately submit claims or file lawsuits
 - The lack of submitted proofs of loss for allegedly covered claims
 - Judicial rulings in similar litigation involving other companies in the insurance industry
 - Differences in state laws and developing case law
 - Litigation trends, including varying legal theories advanced by policyholders
 - Whether and to what degree any class of policyholders may be certified
 - The inherent unpredictability of litigation
- Effects of any future pandemic, or the resurgence of the COVID-19 pandemic, that could affect results for reasons such as:
 - Securities market disruption or volatility and related effects such as decreased economic activity and continued supply chain disruptions that affect our investment portfolio and book value
 - An unusually high level of claims in our insurance or reinsurance operations that increase litigation-related expenses
 - An unusually high level of insurance losses, including risk of court decisions extending business interruption insurance in commercial property coverage forms to cover claims for pure economic loss related to such pandemic
 - Decreased premium revenue and cash flow from disruption to our distribution channel of independent agents, consumer self-isolation, travel limitations, business restrictions and decreased economic activity
 - Inability of our workforce, agencies or vendors to perform necessary business functions
- Unusually high levels of catastrophe losses due to risk concentrations, changes in weather patterns (whether as a result of global climate change or otherwise), environmental events, war or political unrest, terrorism incidents, cyberattacks, civil unrest or other causes
- Increased frequency and/or severity of claims or development of claims that are unforeseen at the time of policy issuance, due to inflationary trends or other causes
- Inadequate estimates or assumptions, or reliance on third-party data used for critical accounting estimates
- Declines in overall stock market values negatively affecting our equity portfolio and book value

- Interest rate fluctuations or other factors that could significantly affect:
 - Our ability to generate growth in investment income
 - Values of our fixed-maturity investments, including accounts in which we hold bank-owned life insurance contract assets
 - Our traditional life policy reserves

- Domestic and global events, such as Russia's invasion of Ukraine, war in the Middle East and disruptions in the banking and financial services industry, resulting in insurance losses, capital market or credit market uncertainty, followed by prolonged periods of economic instability or recession, that lead to:
 - Significant or prolonged decline in the fair value of a particular security or group of securities and impairment of the asset(s)
 - Significant decline in investment income due to reduced or eliminated dividend payouts from a particular security or group of securities

Cincinnati Financial Corporation Third-Quarter 2024 10-Q

Page 33

- Significant rise in losses from surety or director and officer policies written for financial institutions or other insured entities or in losses from policies written by Cincinnati Re or Cincinnati Global
- Our inability to manage Cincinnati Global or other subsidiaries to produce related business opportunities and growth prospects for our ongoing operations
- Recession, prolonged elevated inflation or other economic conditions resulting in lower demand for insurance products or increased payment delinquencies
- Ineffective information technology systems or discontinuing to develop and implement improvements in technology may impact our success and profitability
- Difficulties with technology or data security breaches, including cyberattacks, that could negatively affect our or our agents' ability to conduct business; disrupt our relationships with agents, policyholders and others; cause reputational damage, mitigation expenses and data loss and expose us to liability under federal and state laws
- Difficulties with our operations and technology that may negatively impact our ability to conduct business, including cloud-based data information storage, data security, cyberattacks, remote working capabilities, and/or outsourcing relationships and third-party operations and data security
- Disruption of the insurance market caused by technology innovations such as driverless cars that could decrease consumer demand for insurance products
- Delays, inadequate data developed internally or from third parties, or performance inadequacies from ongoing development and implementation of underwriting and pricing methods, including telematics and other usage-based insurance methods, or technology projects and enhancements expected to increase our pricing accuracy, underwriting profit and competitiveness
- Intense competition, and the impact of innovation, technological change and changing customer preferences on the insurance industry and the markets in which we operate, could harm our ability to maintain or increase our business volumes and profitability
- Changing consumer insurance-buying habits and consolidation of independent insurance agencies could alter our competitive advantages
- Inability to obtain adequate ceded reinsurance on acceptable terms, amount of reinsurance coverage purchased, financial strength of reinsurers and the potential for nonpayment or delay in payment by reinsurers
- Inability to defer policy acquisition costs for any business segment if pricing and loss trends would lead management to conclude that segment could not achieve sustainable profitability
- Inability of our subsidiaries to pay dividends consistent with current or past levels
- Events or conditions that could weaken or harm our relationships with our independent agencies and hamper opportunities to add new agencies, resulting in limitations on our opportunities for growth, such as:
 - Downgrades of our financial strength ratings
 - Concerns that doing business with us is too difficult
 - Perceptions that our level of service, particularly claims service, is no longer a distinguishing characteristic in the marketplace
 - Inability or unwillingness to nimbly develop and introduce coverage product updates and innovations that our competitors offer and consumers expect to find in the marketplace

Cincinnati Financial Corporation Second-Quarter 2024 10-Q

Page 35

- Actions of insurance departments, state attorneys general or other regulatory agencies, including a change to a federal system of regulation from a state-based system, that:
 - Impose new obligations on us that increase our expenses or change the assumptions underlying our critical accounting estimates
 - Place the insurance industry under greater regulatory scrutiny or result in new statutes, rules and regulations
 - Restrict our ability to exit or reduce writings of unprofitable coverages or lines of business
 - Add assessments for guaranty funds, other insurance-related assessments or mandatory reinsurance arrangements; or that impair our ability to recover such assessments through future surcharges or other rate changes
 - Increase our provision for federal income taxes due to changes in tax law
 - Increase our other expenses

- Limit our ability to set fair, adequate and reasonable rates
- Place us at a disadvantage in the marketplace
- Restrict our ability to execute our business model, including the way we compensate agents
- Adverse outcomes from litigation or administrative proceedings, including effects of social inflation and third-party litigation funding on the size of litigation awards
- Events or actions, including unauthorized intentional circumvention of controls, that reduce our future ability to maintain effective internal control over financial reporting under the Sarbanes-Oxley Act of 2002
- Unforeseen departure of certain executive officers or other key employees due to retirement, health or other causes that could interrupt progress toward important strategic goals or diminish the effectiveness of certain longstanding relationships with insurance agents and others
- Our inability, or the inability of our independent agents, to attract and retain personnel in a competitive labor market, impacting the customer experience and altering our competitive advantages
- Events, such as an epidemic, natural catastrophe or terrorism, that could hamper our ability to assemble our workforce at our headquarters location or work effectively in a remote environment

Further, our insurance businesses are subject to the effects of changing social, global, economic and regulatory environments. Public and regulatory initiatives have included efforts to adversely influence and restrict premium rates, restrict the ability to cancel policies, impose underwriting standards and expand overall regulation. We also are subject to public and regulatory initiatives that can affect the market value for our common stock, such as measures affecting corporate financial reporting and governance. The ultimate changes and eventual effects, if any, of these initiatives are uncertain.

Total revenues decreased \$61 million increased \$1.509 billion for the second third quarter of 2024, compared with the second third quarter of 2023, primarily due to a decrease in net investment gains that offset including higher earned premiums, investment income and net investment income, gains. For the first six nine months of 2024, compared with the same period of 2023, total revenues increased \$633 million \$2.142 billion, including higher earned premiums, investment income and net investment gains. Premium and investment revenue trends are discussed further in the respective sections of Financial Results.

Investment gains and losses are recognized on the sales of investments, on certain changes in fair values of securities even though we continue to hold the securities or as otherwise required by GAAP. We have substantial discretion in the timing of investment sales, and that timing generally is independent of the insurance underwriting process. The change in fair value of securities is also generally independent of the insurance underwriting process.

Net income for the second third quarter of 2024, compared with the second third quarter of 2023, decreased \$222 increased \$919 million, including decreases increases of \$235 million \$956 million in after-tax net investment gains and losses and \$9 \$26 million in after-tax investment income, partially offset by a \$40 million decrease in after-tax property casualty underwriting income that offset an increase of \$17 million in after-tax investment income. Catastrophe losses for the second third quarter of 2024, mostly weather related, were \$7 \$86 million higher after taxes and unfavorably affected both net income and property casualty underwriting income. Life insurance segment results increased decreased by \$9 million \$7 million on a pretax basis.

For the first six nine months of 2024, net income increased \$308 million \$1.227 billion, compared with the first six nine months of 2023, including increases of \$164 million \$1.120 billion in after-tax investment gains and losses, \$102 million \$62 million in after-tax property casualty underwriting income and \$45 million \$71 million in after-tax investment income. The property casualty underwriting income increase included a favorable \$86 million after-tax effect from lower catastrophe losses. Catastrophe losses for the first nine months of 2024, mostly weather related, matched the same period in 2023. Life insurance segment results increased by \$11 million \$4 million on a pretax basis.

Performance by segment is discussed below in Financial Results. As discussed in our 2023 Annual Report on Form 10-K, Item 7, Executive Summary, Page 48, there are several reasons why our performance during 2024 may ultimately be below our long-term targets.

The board of directors is committed to rewarding shareholders directly through cash dividends and through share repurchase authorizations. Through 2023, the company had increased the annual cash dividend rate for 63 consecutive years, a record we believe is matched by only seven other U.S. publicly traded companies. In January 2024, the board of directors increased the regular quarterly dividend to 81 cents per share, setting the stage for our 64th consecutive year of increasing cash dividends. During the first six nine months of 2024, cash dividends declared by the company increased 8% compared with the same period of 2023. Our board regularly evaluates relevant factors in decisions related to dividends and share repurchases. The 2024 dividend increase reflected our strong operating performance and signaled management's and the board's positive outlook and confidence in our outstanding capital, liquidity and financial flexibility.

Total assets at June 30, 2024 September 30, 2024, increased 6% 13% compared with year-end 2023, and included a 5% an 11% increase in total investments that reflected net purchases and higher fair values for many securities in our equity portfolio. Shareholders' equity increased 6% 14% and book value per share also increased 6% 15% during the first six nine months of 2024. Our debt-to-total-capital ratio (capital is the sum of debt plus shareholders' equity) decreased compared with year-end 2023.

Our value creation ratio is our primary performance metric. As shown in the tables below, that ratio was 8.2% 17.8% for the first six nine months of 2024, better than 7.2% 4.4% for the same period in 2023, primarily due to a higher amount in overall net income before gains from our investment gains, portfolio. Book value per share increased \$4.73 \$11.26 during the first six nine months of 2024 and contributed 6.1 14.6 percentage points to the value creation ratio, while dividends declared at \$1.62 \$2.43 per share contributed 2.1 3.2 points. Value creation ratio major contributors and in total, along with calculations from per-share amounts, are shown in the tables below.

DRIVERS OF LONG-TERM VALUE CREATION

Operating through The Cincinnati Insurance Company, Cincinnati Financial Corporation is one of the 25 largest property casualty insurers in the nation, based on 2023 net written premiums for approximately 2,000 U.S. stock and mutual insurer groups. We market our insurance products through a select group of independent insurance agencies as discussed in our 2023 Annual Report on Form 10-K, Item 1, Our Business and Our Strategy, Page 6. At **June 30, 2024** **September 30, 2024**, we actively marketed through **2,171** **2,196** agencies located in 46 states. We maintain a long-term perspective that guides us in addressing immediate challenges or opportunities while focusing on the major decisions that best position our company for success through all market cycles.

To measure our long-term progress in creating shareholder value, our value creation ratio is our primary financial performance target. As discussed in our 2023 Annual Report on Form 10-K, Item 7, Executive Summary, Page 48, management believes this measure is a meaningful indicator of our long-term progress in creating shareholder value and has three primary performance drivers:

- Premium growth – We believe our agency relationships and initiatives can lead to a property casualty written premium growth rate over any five-year period that exceeds the industry average. For the first **six** **nine** months of 2024, our consolidated property casualty net written premium year-over-year growth was **13%**. As of March 2024, **14%**, comparing favorably with the industry's 10% growth rate reported by A.M. Best projected for the industry's full-year 2024 written premium growth at approximately 9%. **first six months of 2024**. For the five-year period 2019 through 2023, our growth rate exceeded that of the industry. The industry's growth rate excludes its mortgage and financial guaranty lines of business.
- Combined ratio – We believe our underwriting philosophy and initiatives can generate an average GAAP combined ratio over any five-year period that is consistently within the range of 92% to 98%. For the first **six** **nine** months of 2024, our GAAP combined ratio was **96.1%** **96.5%**, including **9.9** **11.2** percentage points of current accident year catastrophe losses partially offset by **3.4** **3.3** percentage points of favorable loss reserve development on prior accident years. Our statutory combined ratio was **94.6%** **95.7%** for the first nine months of 2024, comparing favorably with the industry's 97.7% reported by A.M. Best for the first six months of 2024. As of March 2024, A.M. Best projected the industry's full-year 2024 statutory combined ratio at approximately 101%, including approximately 7 percentage points of catastrophe losses and a favorable effect of less than 1 percentage point of loss reserve development on prior accident years. The industry's ratio again excludes its mortgage and financial guaranty lines of business.
- Investment contribution – We believe our investment philosophy and initiatives can drive investment income growth and lead to a total return on our equity investment portfolio over a five-year period that exceeds the five-year return of the Standard & Poor's 500 Index. For the first **six** **nine** months of 2024, pretax investment income was **\$487 million**, **\$745 million**, up **1.3%** **14%** compared with the same period in 2023. We believe our investment portfolio mix provides an appropriate balance of income stability and growth with capital appreciation potential.

Cincinnati Financial Corporation **Second-Quarter** **Third-Quarter** 2024 10-Q
Page **39** **38**

Financial Strength

An important part of our long-term strategy is financial strength, which is described in our 2023 Annual Report on Form 10-K, Item 1, Our Business and Our Strategy, Financial Strength, Page 8. One aspect of our financial strength is prudent use of reinsurance ceded to help manage financial performance variability due to catastrophe loss experience. A description of how we use reinsurance ceded is included in our 2023 Annual Report on Form 10-K, Item 7, Liquidity and Capital Resources, 2024 Reinsurance Ceded Programs, Page 105. Another aspect of our financial strength is our investment portfolio, which remains well-diversified as discussed in this quarterly report in Item 3, Quantitative and Qualitative Disclosures About Market Risk. Our strong parent-company liquidity and financial strength increase our flexibility to maintain a cash dividend through all periods and to continue to invest in and expand our insurance operations.

At **June 30, 2024** **September 30, 2024**, we held **\$5.002** **\$5.419** billion of our cash and cash equivalents and invested assets at the parent-company level, of which **\$4.643** **billion** **\$4.639 billion**, or **92.8%** **85.6%**, was invested in common stocks, and **\$166 million** **\$645 million**, or **3.3%** **11.9%**, was cash or cash equivalents. Our debt-to-total-capital ratio

was 6.0% 5.6% at June 30, 2024 September 30, 2024. Another important indicator of financial strength is our ratio of property casualty net written premiums to statutory surplus, which was 1.1-to-1 1.0-to-1 for the 12 months ended June 30, 2024 September 30, 2024, compared with 1.0-to-1 at matching year-end 2023.

Financial strength ratings assigned to us by independent rating firms also are important. In addition to rating our parent company's senior debt, four firms award insurer financial strength ratings to one or more of our insurance subsidiary companies based on their quantitative and qualitative analyses. These ratings primarily assess an insurer's ability to meet financial obligations to policyholders and do not necessarily address all of the matters that may be important to investors. Ratings are under continuous review and subject to change or withdrawal at any time by the rating agency. Each rating should be evaluated independently of any other rating; please see each rating agency's website for its most recent report on our ratings.

At July 24, 2024 October 23, 2024, our insurance subsidiaries continued to be highly rated.

Our consolidated property casualty insurance operations generated an underwriting profit of \$35 million \$62 million for the second third quarter and \$166 million \$228 million for the first six nine months of 2024. The second-quarter third-quarter 2024 underwriting profit decrease of \$12 million, \$50 million, compared with second-quarter third-quarter 2023, included an unfavorable increase of \$9 \$109 million in losses from catastrophes, mostly caused by severe weather. The second-quarter third-quarter 2024 change in underwriting profitability also included higher current accident year loss and loss expenses before catastrophe losses that grew slower than earned premiums and lower higher amounts of favorable reserve development on prior accident years. The six-month nine-month 2024 underwriting profit increase of \$129 million \$79 million, compared with the first six nine months of 2023, included a favorable decrease of \$109 million in losses from catastrophes. The six-month 2023 catastrophes that matched. In addition, the nine-month 2024 period also experienced higher current accident year loss and loss expenses before catastrophe losses that grew slower than earned premiums and a lower amounts amount of favorable reserve development on prior accident years. years before catastrophe losses.

Underwriting results for the second third quarter and first six nine months of 2024 included improved current accident year loss experience before catastrophe losses, as price increases have helped to offset recent-year elevated paid losses reflecting economic or other forms of inflation. Elevated inflation was a driver of higher losses and loss expenses in both 2024 and 2023 as costs have increased significantly to repair damaged autos or other property that we insure. We also experienced higher losses for liability coverages for some of our lines of business. Due to increased uncertainty regarding ultimate losses, we intend to remain prudent in reserving for estimated ultimate losses until longer-term loss cost trends become more clear. The higher loss experience is discussed in Financial Results by property casualty insurance segment. We believe future property casualty underwriting results will continue to benefit from price increases and our ongoing initiatives to improve pricing precision and loss experience related to claims and loss control practices.

For all property casualty lines of business in aggregate, net loss and loss expense reserves at June 30, 2024 September 30, 2024, were \$578 million \$963 million, or 7% 11%, higher than at year-end 2023, including an increase of \$506 million \$917 million for the incurred but not reported (IBNR) portion.

We measure and analyze property casualty underwriting results primarily by the combined ratio and its component ratios. The GAAP-basis combined ratio is the percentage of incurred losses plus all expenses per each earned premium dollar – the lower the ratio, the better the performance. An underwriting profit results when the combined ratio is below 100%. A combined ratio above 100% indicates that an insurance company's losses and expenses exceeded premiums.

Our consolidated property casualty combined ratio for the **second third** quarter of 2024 increased by **0.9 3.0** percentage points, compared with the same period of 2023, including a **decrease an increase** of **0.8 3.9** points from catastrophe losses and loss expenses. For the first **six nine** months of 2024, compared with the 2023 **six-month nine-month** period, our combined ratio improved by **3.1 1.0** percentage points, including a decrease of **3.8 1.2** points from catastrophe losses and loss expenses. Other combined ratio components that changed are discussed below and in further detail in Financial Results by property casualty insurance segment.

The combined ratio can be affected significantly by natural catastrophe losses and other large losses as discussed in detail below. The combined ratio can also be affected by updated estimates of loss and loss expense reserves established for claims that occurred in prior periods, referred to as prior accident years. Net favorable development on prior accident year reserves, including reserves for catastrophe losses, benefited the combined ratio by **3.4 3.3** percentage points in the first **six nine** months of 2024, compared with **4.3 3.8** percentage points in the same period of 2023. Net favorable development is discussed in further detail in Financial Results by property casualty insurance segment.

The ratio for current accident year loss and loss expenses before catastrophe losses improved in the first **six nine** months of 2024. That **59.5% 58.6%** ratio was **1.3 1.1** percentage points lower, compared with the **60.8% 59.7%** accident year 2023 ratio measured as of **June 30, 2023 September 30, 2023**, including a decrease of **1.5 1.2** points in the ratio for large losses of \$2 million or more per claim, discussed below. The ratio improvement of **1.3 1.1** percentage points included an increase of **0.5 1.1** points for the IBNR portion and a decrease of **1.8 2.2** points for the case incurred portion.

The underwriting expense ratio **decreased for the third quarter and increased for the second quarter and first six nine** months of 2024, compared with the same periods a year ago. The **increases were third-quarter 2024 decrease was largely due to a decrease in profit-sharing commissions for agencies. The nine-month 2024 increase was** largely due to increases in profit-sharing commissions for agencies and employee-related expenses. The ratios also included ongoing expense management efforts and higher earned premiums.

Consolidated Property Casualty Insurance Premiums

Agency new business written premiums													
Other written premiums													
Other written premiums													
Other written premiums													
Net written premiums													
Unearned premium change													
Earned premiums													

The trends in net written premiums and earned premiums summarized in the table above include the effects of price increases. Price change trends that heavily influence renewal written premium increases or decreases, along with other premium growth drivers for 2024, are discussed in more detail by segment below in Financial Results.

Consolidated property casualty net written premiums for the **second third** quarter and **six nine** months ended **June 30, 2024 September 30, 2024**, grew **\$309 million \$336 million** and **\$538 \$874 million** compared with the same periods of 2023. Our premium growth initiatives from prior years have provided an ongoing favorable effect on growth during the current year, particularly as newer agency relationships mature over time.

Consolidated property casualty agency new business written premiums increased by **\$104 million \$93 million** and **\$199 \$292 million** for the **second third** quarter and first **six nine** months of 2024, compared with the same periods of 2023. New agency appointments during 2024 and 2023 produced a **\$52 \$82 million** increase in standard lines new business for the first **six nine** months of 2024 compared with the same period of 2023. As we appoint new agencies that choose to move accounts to us, we report these accounts as new business. While this business is new to us, in many cases it is not new to the agent. We believe these seasoned accounts tend to be priced more accurately than business that may be less familiar to our agent upon obtaining it from a competing agent.

Net written premiums for Cincinnati Re, included in other written premiums, increased by **\$30 million \$4 million** in the **second third** quarter and **\$2 \$6 million** for the **six nine** months ended **June 30, 2024 September 30, 2024**, compared with the same periods of 2023, to **\$207 \$89 million** and **\$409 million \$498 million**, respectively. Cincinnati Re assumes risks

through reinsurance treaties and in some cases cedes part of the risk and related premiums to one or more unaffiliated reinsurance companies through transactions known as retrocessions.

Cincinnati Global is also included in other written premiums. Net written premiums for Cincinnati Global decreased increased by \$15 million \$8 million in the second third quarter and increased by \$3 \$11 million for the six nine months ended June 30, 2024 September 30, 2024, to \$67 \$77 million and \$149 million \$226 million, respectively, compared with the same periods of 2023.

Other written premiums include premiums ceded to reinsurers as part of our reinsurance ceded program. An increase in ceded premiums reduced net written premiums by \$11 \$16 million and \$16 million \$32 million for the second third quarter and first six nine months of 2024, compared with the same period of 2023.

Catastrophe losses and loss expenses typically have a material effect on property casualty results and can vary significantly from period to period. Losses from catastrophes contributed 11.2 13.0 and 8.6 10.1 percentage points to the combined ratio in the second third quarter and first six nine months of 2024, compared with 12.0 9.1 and 12.4 11.3 percentage points in the same period of 2023.

Effective June 1, 2024, we restructured our reinsurance program for Cincinnati Re only, providing retrocession coverages with various triggers, exclusions and unique features. That program included property catastrophe excess of loss coverage with a total available aggregate limit of \$60 million in excess of \$80 million per occurrence. Coverage for Cincinnati Re only with a total available aggregate limit of \$20 million in excess of \$80 million per occurrence expired during the second quarter of 2024. That expiration also included the shared coverage for Cincinnati Re and the direct business applying to catastrophe losses in excess of \$600 million. Ceded premiums for the one-year renewal period of coverage from the treaty effective June 1, 2024, are estimated to be approximately \$16 million.

The following table shows consolidated property casualty insurance catastrophe losses and loss expenses incurred, net of reinsurance, as well as the effect of loss development on prior period catastrophe events. We individually list declared catastrophe events for which our incurred losses reached or exceeded \$25 million.

We believe the inherent variability of aggregate loss experience for our portfolio of larger policies is greater than that of our portfolio of smaller policies, and we continue to monitor the variability in addition to general inflationary trends in loss costs. Our analysis continues to indicate no unexpected concentration of large losses and case reserve increases by risk category, geographic region, policy inception, agency or field marketing territory. The **second-quarter third-quarter 2024** property casualty total large losses incurred of **\$74 million** \$88 million, net of reinsurance, was lower than the \$95 million quarterly average during full-year 2023 and the **\$97 million** \$108 million experienced for the **second third** quarter of 2023. The ratio for these large losses was **1.7 1.5** percentage points lower compared with last year's **second third** quarter. The **second-quarter third-quarter 2024** amount of total large losses incurred helped contribute to the decrease in the **six-month nine-month 2024** total large loss ratio, compared with 2023, in addition to a **first-quarter first-half 2024** ratio that was **1.0 point 1.4 points** lower than the first **quarter half** of 2023. We believe results for the three- and **six-month nine-month** periods largely reflected normal fluctuations in loss

patterns and normal variability in large case reserves for claims above \$2 million. Losses by size are discussed in further detail in results of operations by property casualty insurance segment.

FINANCIAL RESULTS

Consolidated results reflect the operating results of each of our five segments along with the parent company, Cincinnati Re, Cincinnati Global and other activities reported as "Other." The five segments are:

- Commercial lines insurance
- Personal lines insurance
- Excess and surplus lines insurance
- Life insurance
- Investments

near the low end of in the high-single-digit range. We continue to segment commercial lines policies, emphasizing identification and retention of those we believe have relatively stronger pricing. Conversely, we have been seeking stricter renewal terms and conditions on policies we believe have relatively weaker pricing, thus retaining fewer of those policies. We measure average changes in commercial lines renewal pricing as the percentage rate of change in renewal premium for the new policy period compared with the premium for the expiring policy period, assuming no change in the level of insured exposures or policy coverage between those periods for the respective policies.

Our average overall commercial lines renewal pricing change includes the impact of flat pricing for certain coverages within package policies written for a three-year term that were in force but did not expire during the period being measured. Therefore, our reported change in average commercial lines renewal pricing reflects a blend of three-year policies that did not expire and other policies that did expire during the measurement period. For commercial lines policies that did expire and were then renewed during the second third quarter of 2024, we estimate that our average percentage price increases were in the high-single-digit range for our commercial casualty, commercial property and commercial auto lines of business. The estimated average percentage price change for workers' compensation was a decrease in the mid-single-digit range.

Our commercial lines segment's increase in agency renewal written premiums for the first six nine months of 2024 also included changes in the level of insured exposures. Part of the insured exposure increase reflects our response to inflation effects that increase the cost of building materials to repair damaged commercial structures. We use building valuation software to automate much of that underwriting process and may also manually adjust premiums to reflect property costs.

Renewal premiums for certain policies, primarily our commercial casualty and workers' compensation lines of business, include the results of policy audits that adjust initial premium amounts based on differences between estimated and actual sales or payroll related to a specific policy. Audits completed during the first six nine months of 2024 contributed \$54 million \$81 million to net written premiums, compared with \$73 million \$105 million for the same period of 2023.

New business written premiums for commercial lines increased \$44 million \$39 million and \$92 million \$131 million during the second third quarter and first six nine months of 2024, compared with the same periods of 2023, as we continued to carefully underwrite each policy in a highly competitive market. Trend analysis for year-over-year comparisons of individual quarters is more difficult to assess for commercial lines new business written premiums, due to inherent variability. That variability is often driven by larger policies with annual premiums greater than \$100,000.

Other written premiums include premiums ceded to reinsurers as part of our reinsurance ceded program. For our commercial lines insurance segment, an increase in ceded premiums reduced net written premiums by \$5 million and \$6 million \$11 million for the second third quarter and first six nine months of 2024, compared with the same periods of 2023.

- Combined ratio – The second-quarter third-quarter 2024 commercial lines combined ratio increased improved by 2.2 percentage points, compared with the second third quarter of 2023, including a decrease of 1.8 1.3 points in losses from catastrophes. The second-quarter third-quarter combined ratio increased by 0.2 points from current accident year loss and loss expenses before catastrophe losses, including an increase of 2.9 points for the IBNR portion and a decrease of 2.7 points for the case incurred portion. For the first nine months of 2024, the combined ratio improved by 1.3 percentage points, compared with the same period a year ago, including a decrease of 2.5 points in losses from catastrophes. The nine-month 2024 combined ratio also decreased included a decrease of 0.3 points from current accident year loss and loss expenses before catastrophe losses, including an increase of 2.8 points for the IBNR portion and a decrease of 3.1 points for the case incurred portion. For the first six months of 2024, the combined ratio improved by 0.7 percentage points, compared with the same period a year ago, including a decrease of 2.9 points in losses from catastrophes. The six-month 2024 combined ratio also included a decrease of 0.6 points from current accident year loss and loss expenses before catastrophe losses, including an increase of 2.2 2.4 points in the IBNR portion and a decrease of 2.8 2.7 points for the case incurred portion. Underwriting results also included a higher third-quarter 2024 and lower level nine-month 2024 levels of favorable reserve development on prior accident years, as discussed below. The current accident year ratios were measured as of June September 30 of the respective years and included a decrease of 2.3 1.5 percentage points for the first six nine months of 2024 in the ratio for large losses of \$2 million or more per claim, discussed below.

When estimating the ultimate cost of total loss and loss expenses, we consider many factors, including trends for inflation, historical paid and reported losses, large loss activity and other data or information for the industry or our company. Elevated inflation in recent years has been a driver of higher losses and loss expenses as costs have increased significantly to repair damaged business property or autos that we insure, in addition to

higher losses for liability coverages for some of our lines of business. Due to increased uncertainty regarding ultimate losses, we intend to remain prudent in reserving for estimated ultimate losses until longer-term loss cost trends become more clear.

Catastrophe losses and loss expenses accounted for 9.3 5.4 and 7.8 6.9 percentage points of the combined ratio for the second third quarter and first six nine months of 2024, compared with 11.1 6.7 and 10.7 9.4 percentage points for the same periods a year ago. Through 2023, the 10-year annual average for that catastrophe measure for the commercial lines segment was 5.9 percentage points, and the five-year annual average was 6.5 percentage points.

The net effect of reserve development on prior accident years during the second third quarter and first six nine months of 2024 was favorable for commercial lines overall by \$29 million \$50 million and \$67 million \$117 million, compared with \$59 million \$34 million and \$91 million \$125 million for the same periods in 2023. For the second quarter of 2024, our commercial casualty line of business included \$28 million of unfavorable reserve development on prior accident years. For the first six nine months of 2024, our commercial property and workers' compensation lines of business were the main contributors to the commercial lines net favorable reserve development. The net favorable reserve development recognized during the first six nine months of 2024 for our commercial lines insurance segment was mainly for accident years 2023 and 2022 and was primarily due to lower-than-anticipated loss emergence on known claims. Our commercial casualty line of business included \$27 million of unfavorable reserve development on prior accident years for the first nine months of 2024. Reserve estimates are inherently uncertain as described in our 2023 Annual Report on Form 10-K, Item 7, Critical Accounting Estimates, Property Casualty Insurance Loss and Loss Expense Reserves, Page 53.

The commercial lines underwriting expense ratio decreased for the third quarter and increased for the second quarter and first six nine months of 2024, compared with the same periods a year ago. The increases were third-quarter 2024 decrease was largely due to increases a decrease in profit-sharing commissions for agencies. The nine-month 2024 increase was primarily due to an increase in profit-sharing commissions for agencies and employee-related expenses. The ratios also included ongoing expense management efforts and higher earned premiums.

We continue to monitor new losses and case reserve increases greater than \$2 million for trends in factors such as initial reserve levels, loss cost inflation and claim settlement expenses. Our analysis continues to indicate no unexpected concentration of these large losses and case reserve increases by risk category, geographic region, policy inception, agency or field marketing territory. The second-quarter third-quarter 2024 commercial lines total large losses incurred of \$64 million \$67 million, net of reinsurance, was lower than the quarterly average of \$74 million during full-year 2023 and the \$75 million \$76 million of total large losses incurred for the second third quarter of 2023. The decrease in commercial lines large losses for the first six nine months of 2024 was primarily due to our commercial property line of business. The second-quarter third-quarter 2024 ratio for commercial lines total large losses was 1.3 1.2 percentage points lower than last year's second-quarter third-quarter ratio. The second-quarter third-quarter 2024 amount of total large losses incurred helped contribute to the decrease in the six-month nine-month 2024 total large loss ratio, compared with 2023, in addition to a first-quarter first-half 2024 ratio that was 2.1 1.7 points lower than the first quarter half of 2023. We believe results for the three- and six-month nine-month periods largely reflected normal fluctuations in loss patterns and normal variability in large case reserves for claims above \$2 million.

Overview

Performance highlights for the personal lines segment include:

- Premiums – Personal lines earned premiums and net written premiums continued to grow during the second third quarter and first six nine months of 2024, including increased agency new business and renewal written premiums that included higher average pricing. Cincinnati Private ClientsSM net written premiums included in the personal lines insurance segment results totaled approximately \$472 million \$479 million and \$802 million \$1.281 billion for the second third quarter and first six nine months of 2024, compared with \$349 \$356 million and \$582 million \$938 million for the same periods of 2023. Cincinnati

Private Client net written premiums for the respective periods included excess and surplus lines homeowner policies with premiums totaling \$51 million \$46 million in the second third quarter and \$131 million in the first nine months of 2024, compared with \$34 million in the third quarter and \$85 million in the first six months of 2024, compared with \$32 million in the second quarter and \$51 million in the first six nine months of 2023. The table below analyzes the primary components of premiums.

Agency renewal written premiums increased 26% 28% and 27% for both the second third quarter and first six nine months of 2024, reflecting rate increases in selected states, a higher level of insured exposures and other factors such as higher policy retention rates and changes in policy deductibles or mix of business. Part of the insured exposure increase reflects our response to inflation effects that increase the cost of building materials used to repair damaged homes.

We estimate that premium rates for our personal auto line of business increased at average percentages in the low-double-digit range during the first six nine months of 2024. For our homeowner line of business, we estimate that premium rates for the first six nine months of 2024 increased at average percentages in the high-single-digit range. For both our personal auto and homeowner lines of business, some individual policies experienced lower or higher rate changes based on each risk's specific characteristics and enhanced pricing precision enabled by predictive models.

Personal lines new business written premiums increased \$57 million \$43 million or 54% 35% for the second third quarter of 2024, compared with the same period of 2023, including approximately \$25 \$18 million from Cincinnati Private Client policies and \$32 million \$25 million from middle-market policies. For the first six nine months of 2024, compared with the same period of 2023, personal lines new business written premiums increased \$100 \$143 million or 54% 47%, including approximately \$40 million \$58 million from Cincinnati Private Client policies and \$60 million \$85 million from middle-market policies. We believe we maintained underwriting and pricing discipline across all personal lines markets as we expanded use of enhanced pricing precision tools.

Other written premiums include premiums ceded to reinsurers as part of our reinsurance ceded program. For our personal lines insurance segment, an increase in 2024 ceded premiums reduced net written premiums by approximately \$8 million \$10 million and \$10 million \$20 million for the second third quarter and first six nine months of 2024, compared with the same period periods of 2023.

- Combined ratio – Our personal lines combined ratio for the second third quarter of 2024 improved increased by 0.7 10.4 percentage points, compared with second-quarter third-quarter 2023, despite primarily due to an increase of 1.2 12.7 points in losses from catastrophes. The second-quarter third-quarter 2024 combined ratio also included a decrease of 4.0 2.3 percentage points from current accident year loss and loss expenses before catastrophe losses, including a decrease of 0.9 points for the IBNR portion and a decrease of 3.1 points for the case incurred portion. For the first six months of 2024, the combined ratio improved by 9.4 percentage points, compared with the same period a year ago, including a decrease of 7.1 points in losses from catastrophes. The six-month 2024 combined ratio also included a decrease of 3.2 points from current accident year loss and loss expenses before catastrophe losses, including an increase of 0.6 5.0 points for the IBNR portion and a decrease of 7.3 points for the case incurred portion. For the

first nine months of 2024, the combined ratio improved by 2.3 percentage points, compared with the same period a year ago, including no change in the net ratio for losses from catastrophes. The nine-month 2024 combined ratio also included a decrease of 2.9 points from current accident year loss and loss expenses before catastrophe losses, including an increase of 2.1 points in the IBNR portion and a decrease of 3.8 5.0 points for the case incurred portion. Those current accident year ratios were measured as of June September 30 of the respective years and included a decrease of 1.1 1.6 percentage points for the first six nine months of 2024 in the ratio for large losses of \$2 million or more per claim, discussed below.

When estimating the ultimate cost of total loss and loss expenses, we consider many factors, including trends in inflation, historical paid and reported losses, large loss activity and other data or information for the industry or our company. Elevated inflation in recent years has been a driver of higher losses and loss expenses as costs have increased significantly to repair damaged autos or homes that we insure. Due to increased uncertainty

regarding ultimate losses, we intend to remain prudent in reserving for estimated ultimate losses until longer-term loss cost trends become more clear.

Catastrophe losses and loss expenses accounted for 20.9 26.6 and 15.0 19.2 percentage points of the combined ratio for the second third quarter and first six nine months of 2024, compared with 19.7 13.9 and 22.1 19.2 points for the same periods a year ago. The 10-year annual average catastrophe loss ratio for the personal lines segment through 2023 was 11.4 percentage points, and the five-year annual average was 13.2 percentage points.

In addition to the average rate increases discussed above, we continue to refine our pricing to better match premiums to the risk of loss on individual policies. Improved pricing precision and broad-based rate increases are expected to help position the combined ratio at a profitable level over the long term. In addition, greater geographic diversification is expected to reduce the volatility of homeowner loss ratios attributable to weather-related catastrophe losses over time.

The net effect of reserve development on prior accident years during the second third quarter of 2024 was unfavorable by \$6 million less than \$1 million but favorable by \$27 million for the first six nine months of 2024 for personal lines overall, compared with \$15 million \$8 million and \$46 million \$54 million of favorable development for the same periods of 2023. Our homeowner line of business was the primary contributor to the personal lines net favorable reserve development for the first six nine months of 2024. The net favorable reserve development was primarily due to lower-than-anticipated loss emergence on known claims. Reserve estimates are inherently uncertain as described in our 2023 Annual Report on Form 10-K, Item 7, Critical Accounting Estimates, Property Casualty Insurance Loss and Loss Expense Reserves, Page 53.

The personal lines underwriting expense ratio decreased for the second third quarter and first six nine months of 2024, compared with the same periods a year ago. The decreases were primarily due to premium growth outpacing growth in various expenses. The ratios also included ongoing expense management efforts and higher earned premiums. efforts.

Overview

Performance highlights for the excess and surplus lines segment include:

- Premiums – Excess and surplus lines earned premiums and net written premiums continued to grow during the **second third** quarter and first **six nine** months of 2024, compared with the same periods a year ago, including increases in both agency renewal and new business written premiums. Renewal written premiums rose **19% 22%** for the **second third** quarter and **13% 16%** for the **six nine** months ended **June 30, 2024 September 30, 2024**, compared with the same periods of 2023, largely due to higher renewal pricing. For both 2024 periods, excess and surplus lines policy renewals experienced estimated average price increases at percentages in the high-single-digit range. We measure average changes in excess and surplus lines renewal pricing as the percentage rate of change in renewal premium for the new policy period compared with the premium for the expiring policy period, assuming no change in the level of insured exposures or policy coverage between those periods for respective policies.
- New business written premiums produced by agencies increased by **6% 26%** for the **second third** quarter and **8% 14%** for the first **six nine** months of 2024 compared with the same periods of 2023, as we continued to carefully underwrite each policy in a highly competitive market. Some of what we report as new business came from accounts that were not new to our agents. We believe our agents' seasoned accounts tend to be priced more accurately than business that may be less familiar to them.

Earned premiums														

- Combined ratio – The excess and surplus lines combined ratio increased by **3.2 4.8** percentage points for the **second third** quarter and **2.6 3.4** points for the first **six nine** months of 2024, compared with the same periods of 2023. The increases were **primarily largely** due to unfavorable reserve development on prior accident year loss and loss expenses for the three and **six nine** months ended **June 30, 2024 September 30, 2024**, compared with a smaller amount of unfavorable reserve development for third-quarter 2023 and favorable reserve development for the **same** first nine months of 2023. Higher catastrophe losses for both 2024 periods **of 2023**, also contributed to the combined ratio **increases**.
- The **second-quarter 64.2% third-quarter 2024** ratio for current accident year loss and loss expenses before catastrophe losses was **5.7 0.6** percentage points lower, compared with the **69.7% 64.8%** accident year 2023 ratio measured as of **June 30, 2023 September 30, 2023**, including **a decrease an increase of 13.6 2.7** points for the IBNR portion and **an increase a decrease of 7.9 3.3** points for the case incurred portion. The **six-month 64.6% nine-month 2024** ratio for current accident year loss and loss expenses before catastrophe losses was **4.7 3.3** percentage points lower, compared with the **69.5% 67.9%** accident year 2023 ratio measured as of **June 30, 2023 September 30, 2023**, including a decrease of **8.4 5.3** points for the IBNR portion and an increase of **4.7 2.0** points for the case incurred portion.
- Excess and surplus lines net reserve development on prior accident years, as a ratio to earned premiums, was unfavorable by **2.1% 2.7%** for the **second third** quarter and **less than 0.1% 1.0%** for the first **six nine** months of 2024, compared with **unfavorable 0.7% for third-quarter 2023** and favorable **4.7% and 5.5% 3.5%** for the **same periods first nine**

months of 2023. Reserve estimates are inherently uncertain as described in our 2023 Annual Report on Form 10-K, Item 7, Critical Accounting Estimates, Property Casualty Insurance Loss and Loss Expense Reserves, Page 53.

The excess and surplus lines underwriting expense ratio increased for the second third quarter and first six nine months of 2024, compared with the same periods a year ago. The increases were largely due to increases in profit-sharing commissions for agencies and employee-related expenses. The ratio for both periods also benefited from ongoing expense management efforts and premium growth.

Losses incurred but not reported									
Other losses excluding catastrophe losses									
Catastrophe losses									
Total loss ratio									

We continue to monitor new losses and case reserve increases greater than \$2 million for trends in factors such as initial reserve levels, loss cost inflation and claim settlement expenses. Our analysis continues to indicate no unexpected concentration of these large losses and case reserve increases by risk category, geographic region, policy inception, agency or field marketing territory. In the **second third** quarter of 2024, the excess and surplus lines total ratio for large losses, net of reinsurance, was **1.7 1.3** percentage points higher than last year's **second third** quarter. The **second-quarter third-quarter** 2024 amount of total large losses incurred contributed unfavorably to the increase in the **six-month nine-month** 2024 total large loss ratio, compared with 2023, in addition to a **first-quarter first-half** 2024 ratio that was **0.3 1.0** points higher than the first **quarter half** of 2023. We believe results for the three- and **six month nine-month** periods largely reflected normal fluctuations in loss patterns and normal variability in large case reserves for claims above \$2 million.

Life insurance segment
profit

Overview

Performance highlights for the life insurance segment include:

- Revenues – Revenues increased for the six nine months ended June 30, 2024 September 30, 2024, compared with the same period a year ago, driven by higher earned premiums from term life insurance, our largest life insurance product line.
Net in-force life insurance policy face amounts increased 1% 2% to \$83.219 \$83.664 billion at June 30, 2024 September 30, 2024, from \$82.361 billion at year-end 2023.
Fixed annuity deposits received for the three and six nine months ended June 30, 2024 September 30, 2024, were \$10 million and \$19 \$29 million, compared with \$15 million \$13 million and \$25 million \$38 million for the same periods of 2023. Fixed annuity deposits have a minimal impact to earned premiums because deposits received are initially recorded as liabilities. Profit is earned over time by way of interest rate spreads. We do not write variable or equity-indexed annuities.

- Profitability – Our life insurance segment typically reports a smaller profit compared with the life insurance subsidiary because profits from investment income spreads are included in our investments segment results. We include only investment income credited to contract holders (including interest assumed in life insurance policy reserve calculations) in our life insurance segment results. A profit of \$32 million \$42 million for our life insurance segment in the first six nine months of 2024, compared with a profit of \$21 million \$38 million for the same period of 2023, was primarily due to more favorable impacts from the unlocking of interest rate and other actuarial assumptions. mortality experience.

Life insurance segment benefits and expenses consist principally of contract holders' (policyholders') benefits incurred related to traditional life and interest-sensitive products and operating expenses incurred, net of deferred acquisition costs. Total benefits decreased in the first six nine months of 2024 primarily due to more favorable impacts from the unlocking of interest rate and other actuarial assumptions. Life policy and investment contract reserves decreased primarily due to an increase in market value discount rates. Mortality results improved compared with the same period of 2023. mortality experience.

Underwriting expenses for the first six nine months of 2024 increased compared with the same period a year ago, largely due to higher general insurance expense levels compared to the same period of 2023.

We recognize that assets under management, capital appreciation and investment income are integral to evaluating the success of the life insurance segment because of the long duration of life products.

On a basis that includes investment income and investment gains or losses from life-insurance-related invested assets, the life insurance subsidiary reported net income of \$24 million \$20 million and \$43 million \$63 million for the three and six nine months ended June 30, 2024 September 30, 2024, compared with \$21 million \$25 million and \$40

million \$65 million for the three and six nine months ended June 30, 2023 September 30, 2023. The life insurance subsidiary portfolio had net after-tax investment losses of \$5 million less than \$1 million and \$7 million for the three and six nine months ended June 30, 2024 September 30, 2024, compared with \$2 less than \$1 million of net after-tax gains and \$1 million of net after-tax investment losses for the three and six nine months ended June 30, 2023 September 30, 2023.

INVESTMENTS RESULTS
Overview

The investments segment contributes investment income and investment gains and losses to results of operations. Investments traditionally are our primary source of pretax and after-tax profits.

Investment Income

Pretax investment income grew 10% 15% for the second third quarter and 13% 14% for the first six nine months of 2024, compared with the same periods of 2023. Interest income increased by \$26 million \$33 million and \$55 million \$88 million for the three and six nine months ended June 30, 2024 September 30, 2024, as net purchases of fixed-maturity securities in recent quarters and higher bond yields are working to generally offset effects of the low interest rate environment of the past several years. Net purchases of fixed-maturity securities totaled \$672 million for the third quarter and \$1.443 billion for the first nine months of 2024. Sales of selected equity securities, discussed below, contributed to the relatively larger amount of third-quarter 2024 net purchases as proceeds from those sales were reinvested in fixed-maturity securities. Bond purchases in the third quarter helped increase the yield of the overall investment portfolio as we target what we believe to be optimal risk-adjusted after-tax yields. Dividend income decreased by \$1 million in the second third quarter and increased by \$5 million \$4 million for the first six nine months of 2024. In addition to dividend rates generally increasing more slowly in recent quarters, net sales of equity securities totaled \$959 million for the second-quarter 2024 dividend decrease reflected two unusual items that totaled approximately \$2 million. One was an third quarter and \$1.050 billion for the first nine months of 2024. Most of the equity holding with a June ex-dividend date in 2023 that was July 1 in 2024. The other was a holding that reduced its dividend rate by 53% after a spin-off transaction. security sales involved trimming or exiting positions for selected common stocks. Minor asset allocation adjustments in our equity portfolio in recent quarters have helped partially offset other factors that unfavorably affected dividend income. Our investment approach remains the same as we focus on balancing near-term income generation with long-term book value growth potential.

Cincinnati Financial Corporation Third-Quarter 2024 10-Q
Page 55

We continue to consider the low interest rate environment that prevailed in recent years as well as the potential for a continuation of both elevated inflation and higher bond yields as we position our portfolio. As bonds in our generally ladderred portfolio mature or are called over the near term, we will reinvest with a balanced approach, keeping in mind our long-term strategy and pursuing attractive risk-adjusted after-tax yields. The table below shows the average pretax yield-to-amortized cost associated with expected principal redemptions for our fixed-maturity portfolio. The expected principal redemptions are based on par amounts and include dated maturities, calls and prefunded municipal bonds that we expect will be called during each respective time period.

While our bond portfolio more than covers our insurance reserve liabilities, we believe our diversified common stock portfolio of mainly blue chip, dividend-paying companies represents one of our best investment opportunities for the long term. We discussed our portfolio strategies in our 2023 Annual Report on Form 10-K, Item 1, Investments Segment, Page 21, and Item 7, Investments Outlook, Page 91. We discuss risks related to our investment income and our fixed-maturity and equity investment portfolios in this quarterly report Item 3, Quantitative and Qualitative Disclosures About Market Risk.

The table below provides details about investment income. Average yields in this table are based on the average invested asset and cash amounts indicated in the table, using fixed-maturity securities valued at amortized cost and all other securities at fair value.

Total Investment Gains and Losses

Investment gains and losses are recognized on the sale of investments, for certain changes in fair values of securities even though we continue to hold the securities or as otherwise required by GAAP. The change in fair value for equity securities still held is included in investment gains and losses and also in net income. The change in unrealized gains or losses for fixed-maturity securities is included as a component of other comprehensive income (OCI). Accounting requirements for the allowance for credit losses for the fixed-maturity portfolio are disclosed in our 2023 Annual Report on Form 10-K, Item 8, Note 1, Summary of Significant Accounting Policies, Page 128.

The table below summarizes total investment gains and losses, before taxes.

(Dollars in millions)	(Dollars in millions)	Three months ended June 30,	Six months ended June 30,	(Dollars in millions)	Three months ended September 30,	Nine months ended September 30,

Of the 4,916 4,988 fixed-maturity securities in the portfolio, 16 five securities were trading below 70% of amortized cost at June 30, 2024 September 30, 2024. Our asset impairment committee regularly monitors the portfolio, including a quarterly review of the entire portfolio for potential credit losses. We believe that if liquidity in the markets were to significantly deteriorate or economic conditions were to significantly weaken, we could experience declines in portfolio values and possibly increases in the allowance for credit losses or write-downs to fair value.

In the the first six months of 2024, the allowance for credit losses increased \$25 million and no fixed-maturity securities were written down to fair value due to an intention to be sold. Fixed-maturity securities written down to fair value due to an intention to be sold were \$4 million for the first six months of 2023, in addition to \$3 million in changes in the allowance for credit losses.

OTHER

We report as Other the noninvestment operations of the parent company and a noninsurance subsidiary, CFC Investment Company. We also report as Other the underwriting results of Cinnnati Re and Cinnnati Global, including earned premiums, loss and loss expenses and underwriting expenses in the table below.

Total revenues for the first **six nine** months of 2024 for our Other operations increased, compared with the same period of 2023, primarily due to earned premiums from Cinnnati Re and Cinnnati Global, with increases of **\$1 \$5 million** and **\$2 million \$10 million**, respectively. Cinnnati Re had **\$273 million \$411 million** of earned premiums for the first **six nine** months of 2024 and generated an underwriting profit of **\$70 million \$76 million**. Cinnnati Global had **\$96 million \$203 million** of earned premiums for the first **six nine** months of 2024 and generated an underwriting profit of **\$32 million \$68 million**. Total expenses for Other decreased for the first **six nine** months of 2024, primarily due to lower loss and loss expenses from Cinnnati Re and Cinnnati Global.

Other income in the table below represents profit before income taxes. For all periods shown, total other income was driven by underwriting profit from Cinnnati Re and Cinnnati Global.

TAXES

We had **\$74 million \$220 million** and **\$272 million \$492 million** of income tax expense for the three and **six nine** months ended **June 30, 2024 September 30, 2024**, compared with **\$132 \$49 million of income tax benefit** and **\$175 million \$126 million of income tax expense** for the same periods of 2023. The effective tax rate for the three and **six nine** months ended **June 30, 2024 September 30, 2024**, was **19.2% 21.2%** and **20.3% 20.7%** compared with **19.8% 33.1%** and **18.7% 16.0%** for the same periods last year. The change in our effective tax rate between periods was primarily due to large changes in our net investment gains and losses included in income for the periods and changes in underwriting income and investment income.

Historically, we have pursued a strategy of investing some portion of cash flow in tax-advantaged fixed-maturity and equity securities to minimize our overall tax liability and maximize after-tax earnings. See Tax-Exempt Fixed Maturities in this quarterly report Item 3, Quantitative and Qualitative Disclosures About Market Risk for further discussion on municipal bond purchases in our fixed-maturity investment portfolio. For tax years after 2017, for our property casualty insurance subsidiaries, approximately 75% of interest from tax-advantaged, fixed-maturity investments and approximately 40% of dividends from qualified equities are exempt from federal tax after applying proration. For our noninsurance companies, the dividend received deduction exempts 50% of dividends from qualified equities. Our life insurance company does not own tax-advantaged, fixed-maturity investments or equities subject to the dividend received deduction. Details about our effective tax rate are in this quarterly report Item 1, Note 9, Income Taxes.

LIQUIDITY AND CAPITAL RESOURCES

At **June 30, 2024 September 30, 2024**, shareholders' equity was **\$12.777 billion \$13.804 billion**, compared with \$12.098 billion at December 31, 2023. Total debt was \$815 million at **June 30, 2024 September 30, 2024**, unchanged from December 31, 2023. At **June 30, 2024 September 30, 2024**, cash and cash equivalents totaled **\$771 million \$1.752 billion**, compared with \$907 million at December 31, 2023. During the third quarter of 2024, net sales of equity securities were \$959 million, primarily from trimming or exiting positions for selected common stocks. Proceeds from the sales of those equity securities were used to purchase fixed maturities during the third quarter of 2024, with plans to purchase additional fixed maturities in the fourth quarter of 2024, thereby reducing our cash balance at September 30, 2024.

In addition to our historically positive operating cash flow to meet the needs of operations, we have the ability to slow investing activities or sell a portion of our high-quality, liquid investment portfolio if such need arises. We also have additional capacity to borrow on our revolving short-term line of credit, as described further below.

SOURCES OF LIQUIDITY

Subsidiary Dividends

Our lead insurance subsidiary declared dividends of \$290 million to the parent company in the first half nine months of 2024, compared with \$284 \$426 million for the same period of 2023. For full-year 2023, our lead insurance subsidiary paid dividends totaling \$526 million to the parent company. State of Ohio regulatory requirements restrict the dividends our insurance subsidiary can pay. For full-year 2024, total dividends that our insurance subsidiary can pay to our parent company without regulatory approval are approximately \$729 million.

Investing Activities

Investment income is a source of liquidity for both the parent company and its insurance subsidiaries. We continue to focus on portfolio strategies to balance near-term income generation and long-term book value growth.

Parent company obligations can be funded with income on investments held at the parent-company level or through sales of securities in that portfolio, although our investment philosophy seeks to compound cash flows over the long term. These sources of capital can help minimize subsidiary dividends to the parent company, protecting insurance subsidiary capital.

For a discussion of our historic investment strategy, portfolio allocation and quality, see our 2023 Annual Report on Form 10-K, Item 1, Investments Segment, Page 21.

Insurance Underwriting

Our property casualty and life insurance underwriting operations provide liquidity because we generally receive premiums before paying losses under the policies purchased with those premiums. After satisfying our cash requirements, we use excess cash flows for investment, increasing future investment income.

Historically, cash receipts from property casualty and life insurance premiums, along with investment income, have been more than sufficient to pay claims, operating expenses and dividends to the parent company.

The table below shows a summary of the operating cash flow for property casualty insurance (direct method):

(Dollars in millions)	(Dollars in millions)	Three months ended June 30,	(Dollars in millions)	Six months ended June 30,	(Dollars in millions)	Three months ended September 30,	(Dollars in millions)	Nine months ended September 30,	(Dollars in millions)	% Change	(Dollars in millions)	% Change

Cincinnati Financial Corporation Third-Quarter 2024 10-Q

Page 60

Collected premiums for property casualty insurance rose \$469 million \$787 million during the first six nine months of 2024, compared with the same period in 2023. Loss and loss expenses paid for the 2024 period decreased increased \$ \$23 33 million. Commissions and other underwriting expenses paid increased \$167 million. \$236 million.

We discuss our future obligations for claims payments and for underwriting expenses in our 2023 Annual Report on Form 10-K, Item 7, Obligations, Page 97.

Cincinnati Financial Corporation Second-Quarter 2024 10-Q
Page 60

Capital Resources

At June 30, 2024 September 30, 2024, our debt-to-total-capital ratio was 6.0% 5.6%, considerably below our 35% covenant threshold, with \$790 million in long-term debt and \$25 million in borrowing on our revolving short-term line of credit. At June 30, 2024 September 30, 2024, \$275 million was available for future cash management needs as part of the general provisions of the line of credit agreement, with another \$300 million available as part of an accordion feature. Based on our capital requirements at June 30, 2024 September 30, 2024, we do not anticipate a material increase in debt levels exceeding the available line of credit amount during the year. As a result, we expect changes in

our debt-to-total-capital ratio to continue to be largely a function of the contribution of unrealized investment gains or losses to shareholders' equity. We have an On September 12, 2024, we terminated our unsecured letter of credit agreement, that provides which provided a portion of the capital needed to support Cincinnati Global's obligations at Lloyd's. The amount of this the unsecured letter of credit agreement was \$94 million at June 30, 2024 \$94 million, with no amounts amount drawn. We replaced the letter of credit agreement with common equities, bringing total common equities held in Lloyd's trust accounts to \$219 million.

We provide details of our three long-term notes in this quarterly report Item 1, Note 3, Fair Value Measurements. None of the notes are encumbered by rating triggers.

Four independent ratings firms award insurer financial strength ratings to our property casualty insurance companies and three firms rate our life insurance company. Those firms made no changes to our parent company debt ratings during the first half nine months of 2024. On October 16, 2024, Fitch Ratings revised our Rating Outlook to Positive from Stable for all ratings. Our debt ratings are discussed in our 2023 Annual Report on Form 10-K, Item 7, Liquidity and Capital Resources, Long-Term Debt, Page 96.

Off-Balance Sheet Arrangements

We do not use any special-purpose financing vehicles or have any undisclosed off-balance sheet arrangements (as that term is defined in applicable SEC rules) that are reasonably likely to have a current or future material effect on the company's financial condition, results of operation, liquidity, capital expenditures or capital resources. Similarly, the company holds no fair-value contracts for which a lack of marketplace quotations would necessitate the use of fair-value techniques.

USES OF LIQUIDITY

Our parent company and insurance subsidiary have contractual obligations and other commitments. In addition, one of our primary uses of cash is to enhance shareholder return.

Contractual Obligations

We estimated our future contractual obligations as of December 31, 2023, in our 2023 Annual Report on Form 10-K, Item 7, Contractual Obligations, Page 97. There have been no material changes to our estimates of future contractual obligations since our 2023 Annual Report on Form 10-K.

Other Commitments

In addition to our contractual obligations, we have other property casualty operational commitments:

- Commissions – Commissions paid were \$934 million \$1.310 billion in the first half nine months of 2024. Commission payments generally track with written premiums, except for annual profit-sharing commissions typically paid during the first quarter of the year.
- Other underwriting expenses – Many of our underwriting expenses are not contractual obligations, but reflect the ongoing expenses of our business. Noncommission underwriting expenses paid were \$489 million \$698 million in the first half nine months of 2024.

There were no contributions to our qualified pension plan during the first half nine months of 2024.

Cincinnati Financial Corporation Second-Quarter Third-Quarter 2024 10-Q
Page 61

Investing Activities

After fulfilling operating requirements, we invest cash flows from underwriting, investment and other corporate activities in fixed-maturity and equity securities on an ongoing basis to help achieve our portfolio objectives. We discuss our investment strategy and certain portfolio attributes in this quarterly report Item 3, Quantitative and Qualitative Disclosures About Market Risk.

Uses of Capital

Uses of cash to enhance shareholder return include dividends to shareholders and shares acquired under our repurchase program. In January 2024, the board of directors declared regular quarterly cash dividends of 81 cents per share for an indicated annual rate of \$3.24 per share. During the first six nine months of 2024, we used \$241 million \$365 million to pay cash dividends to shareholders.

PROPERTY CASUALTY INSURANCE LOSS AND LOSS EXPENSE RESERVES

For the business lines in the commercial and personal lines insurance segments, and in total for the excess and surplus lines insurance segment and other property casualty insurance operations, the following table details gross reserves among case, IBNR (incurred but not reported) and loss expense reserves, net of salvage and subrogation reserves. Reserving practices are discussed in our 2023 Annual Report on Form 10-K, Item 7, Property Casualty Loss and Loss Expense Obligations and Reserves, Page 98.

Total gross reserves at June 30, 2024 September 30, 2024, increased \$519 million \$891 million compared with December 31, 2023. Case loss reserves increased decreased by \$33 million \$9 million, IBNR loss reserves increased by \$445 million \$794 million and loss expense reserves increased by \$41 million \$106 million. The total gross increase was primarily due to our commercial casualty commercial property and homeowner lines of business and also our excess and surplus lines insurance segment.

At June 30, 2024 September 30, 2024, substantially all of our consolidated investment portfolio, measured at fair value, is classified as Level 1 or Level 2. See Item 1, Note 3, Fair Value Measurements, for additional discussion of our valuation techniques.

In addition to our investment portfolio, the total investments amount reported in our condensed consolidated balance sheets includes Other invested assets. Other invested assets included \$507 \$528 million of private equity investments, \$81 million \$84 million of real estate through direct property ownership and development projects in the United States, \$35 million of life policy loans and \$18 million \$16 million in Lloyd's deposit at June 30, 2024 September 30, 2024.

FIXED-MATURITY SECURITIES INVESTMENTS

By maintaining a well-diversified fixed-maturity portfolio, we attempt to reduce overall risk. We invest new money in the bond market on a regular basis, targeting what we believe to be optimal risk-adjusted, after-tax yields. Risk, in this context, includes interest rate, call, reinvestment rate, credit and liquidity risk. We do not make a concerted effort to alter duration on a portfolio basis in response to anticipated movements in interest rates. By regularly investing in the bond market, we build a broad, diversified portfolio that we believe mitigates the impact of adverse economic factors.

In the first six nine months of 2024, the increase in fair value of our fixed-maturity portfolio was due to net purchases of securities, partially offset by an increase plus a decrease in our net unrealized loss position that reflected an increase realized losses from the sales of some lower-yielding bonds, as well as a decrease in U.S. Treasury yields, yields in addition to tightening of corporate credit spreads. At June 30, 2024 September 30, 2024, our fixed-maturity portfolio with an average rating of A2/A was valued at 95.4% 98.7% of its amortized cost, compared with 96.0% at December 31, 2023.

At June 30, 2024 September 30, 2024, our investment-grade fixed-maturity securities represented 96.6% 97.4% of the portfolio based on ratings provided by nationally recognized statistical rating organizations or the Securities Valuation Office of the National Association of Insurance Commissioners.

Attributes of the fixed-maturity portfolio include:

		At June 30, 2024				At December 31, 2023			
		At September 30, 2024				At December 31, 2023			
Weighted average yield-to-amortized cost	Weighted average yield-to-amortized cost	4.64	%		%	4.60	%	%	cost
Weighted average maturity	Weighted average maturity	8.5	yrs			7.9	yrs		Weighted average maturity
Effective duration	Effective duration	4.4	yrs			4.3	yrs		Effective duration
								4.98	% % 4.60 % %
								9.5	yrs 7.9 yrs
								4.6	yrs 4.3 yrs

We discuss maturities of our fixed-maturity portfolio in our 2023 Annual Report on Form 10-K, Item 8, Note 2, Investments, Page 137, and in this quarterly report Item 2, Investments Results.

TAXABLE FIXED MATURITIES

Our taxable fixed-maturity portfolio, with a fair value of \$10.584 billion \$11.882 billion at June 30, 2024 September 30, 2024, included:

(Dollars in millions)	(Dollars in millions)	At June 30, 2024	At December 31, 2023	(Dollars in millions)	At September 30, 2024	At December 31, 2023
Investment-grade corporate						
States, municipalities and political subdivisions						
Noninvestment-grade corporate						
Government-sponsored enterprises						
Asset-backed						
United States government						
Foreign government						
Total						
Total						
Total						

Our strategy is to buy, and typically hold, fixed-maturity investments to maturity, but we monitor credit profiles and fair value movements when determining holding periods for individual securities. With the exception of United States agency issues that include government-sponsored enterprises, no individual issuer's securities accounted for more than 0.9% of the taxable fixed-maturity portfolio at June 30, 2024 September 30, 2024. Our investment-grade corporate bonds had an average rating of Baa1 by Moody's or BBB+ by S&P Global Ratings and represented 69.0% 67.4% of the taxable fixed-maturity portfolio's fair value at June 30, 2024 September 30, 2024, compared with 71.2% at year-end 2023.

The heaviest concentration in our investment-grade corporate bond portfolio, based on fair value at June September 30, 2024, was the financial sector. It represented 37.2% 35.6% of our investment-grade corporate bond portfolio, compared with 38.2% at year-end 2023. The utility and energy sectors represented 12.5% and utility sectors each represented 10.8% 10.6%, compared with 11.2% and less than 10% and 11.2%, respectively, at year-end 2023. No other sector exceeded 10% of our investment-grade corporate bond portfolio.

As discussed in our 2023 Annual Report on Form 10-K, Item 1A, Risk Factors, Page 30, investments in the financial sector include various risks. See risk factors entitled "Financial disruption or a prolonged economic downturn could materially and adversely affect our investment performance" and "Our ability to achieve our performance objectives could be affected by changes in the financial, credit and capital markets or the general economy."

Our taxable fixed-maturity portfolio at June 30, 2024 September 30, 2024, included \$247 million \$314 million of asset-backed securities with an average rating of Aa3/ Aa2/AA-.
TAX-EXEMPT FIXED MATURITIES

At June 30, 2024 September 30, 2024, we had \$3.825 billion \$3.989 billion of tax-exempt fixed-maturity securities with an average rating of Aa2/AA by Moody's and S&P Global Ratings. We traditionally have purchased municipal bonds focusing on general obligation and essential services issues, such as water, waste disposal or others. The portfolio is well diversified among approximately 1,800 municipal bond issuers. No single municipal issuer accounted for more than 0.5% 0.6% of the tax-exempt fixed-maturity portfolio at June 30, 2024 September 30, 2024.

INTEREST RATE SENSITIVITY ANALYSIS

Because of our strong surplus, long-term investment horizon and ability to hold most fixed-maturity investments until maturity, we believe the company is adequately positioned if interest rates were to rise. Although the fair values of our existing holdings may suffer, a higher rate environment would provide the opportunity to invest cash flow in higher-yielding securities, while reducing the likelihood of untimely redemptions of currently callable securities. While higher interest rates would be expected to continue to increase the number of fixed-maturity holdings trading below 100% of amortized cost, we believe lower fixed-maturity security values due solely to interest rate changes would not signal a decline in credit quality. We continue to manage the portfolio with an eye toward both meeting current income needs and managing interest rate risk.

Our dynamic financial planning model uses analytical tools to assess market risks. As part of this model, the effective duration of the fixed-maturity portfolio is continually monitored by our investment department to evaluate the theoretical impact of interest rate movements.

The table below summarizes the effect of hypothetical changes in interest rates on the fair value of the fixed-maturity portfolio:

(Dollars in millions)	(Dollars in millions)	Effect from interest rate change in basis points			(Dollars in millions)	Effect from interest rate change in basis points		
	-200	-200	-100	—	100	200	-200	-100 — 100 200
At June 30, 2024								
At September 30, 2024								
At December 31, 2023								

The effective duration of the fixed-maturity portfolio as of June 30, 2024 September 30, 2024, was 4.4 4.6 years, up from 4.3 years at the end of 2023. The above table is a theoretical presentation showing that an instantaneous, parallel shift in the yield curve of 100 basis points could produce an approximately 4.5% 4.7% change in the fair value of the fixed-maturity portfolio. Generally speaking, the higher a bond is rated, the more directly correlated movements in its fair value are to changes in the general level of interest rates, exclusive of call features. The fair values of average- to lower-rated corporate bonds are additionally influenced by the expansion or contraction of credit spreads.

In our dynamic financial planning model, the selected interest rate change of 100 to 200 basis points represents our view of a shift in rates that is quite possible over a one-year period. The rates modeled should not be considered a prediction of future events as interest rates may be much more volatile in the future. The analysis is not intended to provide a precise forecast of the effect of changes in rates on our results or financial condition, nor does it take into account any actions that we might take to reduce exposure to such risks.

EQUITY INVESTMENTS

Our equity investments, with a fair value totaling \$11.634 billion \$11.570 billion at June 30, 2024 September 30, 2024, included \$11.283 billion \$11.200 billion of common stock securities of companies generally with strong indications of paying and growing their dividends. Other criteria we evaluate include increasing sales and earnings, proven management and a favorable outlook. We believe our equity investment style is an appropriate long-term strategy. While our long-term financial position would be affected by prolonged changes in the market valuation of our investments, we believe our strong surplus position and cash flow provide a cushion against short-term fluctuations in valuation. Continued payment of cash dividends by the issuers of our common equity holdings can provide a floor to their valuation.

The table below summarizes the effect of hypothetical changes in market prices on fair value of our equity portfolio.

(Dollars in millions)	(Dollars in millions)	Effect from market price change in percent				(Dollars in millions)	Effect from market price change in percent				-10%	—	10%	20%	30%
		-30%	-20%	-10%	—	10%	20%	30%	-30%	-20%	-10%	—	10%	20%	30%
At June 30, 2024															
At September 30, 2024															
At December 31, 2023															

At June 30, 2024 September 30, 2024, Microsoft Apple Inc.(Nasdaq:MSFT) AAPL) was our largest single common stock holding with a fair value of \$1.001 billion, \$885 million, or 8.9% 7.9% of our publicly traded common stock portfolio and 3.8% 3.2% of the total investment portfolio. Thirty-eight Forty holdings among eight nine different sectors each had a fair value greater than \$100 million.

UNREALIZED INVESTMENT GAINS AND LOSSES

At June 30, 2024 September 30, 2024, unrealized investment gains before taxes for the fixed-maturity portfolio totaled \$67 \$201 million and unrealized investment losses amounted to \$767 \$404 million before taxes.

The \$700 million \$203 million net unrealized loss position in our fixed-maturity portfolio at June 30, 2024 September 30, 2024, increased decreased in the first six nine months of 2024, primarily due to an increase the sale of low-yielding bonds sold at a loss and a decrease in U.S. Treasury yields. yields in addition to tightening of corporate credit spreads. The net loss position for our current fixed-maturity holdings will naturally decline over time as individual securities approach maturity. In addition, changes in interest rates can cause rapid, significant changes in fair values of fixed-maturity securities and the net loss position, as discussed in Quantitative and Qualitative Disclosures About Market Risk.

For federal income tax purposes, taxes on gains from appreciated investments generally are not due until securities are sold. We believe that the appreciated value of equity securities, compared with the cost of securities that is generally used as a tax basis, is a useful measure to help evaluate how fair value can change over time. On this basis, the net unrealized investment gains at June 30, 2024 September 30, 2024, consisted of a net gain position in our equity portfolio of \$7.356 \$7.536 billion. Events or factors such as economic growth or recession can affect the fair value and unrealized investment gains of our equity securities. The five largest holdings in our common stock portfolio were Apple,

Microsoft [Apple](#) (Nasdaq:[AAPL](#)) [MSFT](#)), [Broadcom Inc.](#) (Nasdaq:[AVGO](#)), [JPMorgan Chase & Co](#) (NYSE:[JPM](#)) and [UnitedHealth Group Inc](#) (NYSE:[UNH](#)) and [Abbvie Inc.](#) (NYSE:[ABBV](#)), which had a combined fair value of [\\$3.484 billion](#) [\\$3.046 billion](#).

Unrealized Investment Losses

We expect the number of fixed-maturity securities trading below amortized cost to fluctuate as interest rates rise or fall and credit spreads expand or contract due to prevailing economic conditions. Further, amortized costs for some securities are revised through write-downs recognized in prior periods. At [June 30, 2024](#) [September 30, 2024](#), [3,784](#) [2,495](#) of the [4,916](#) [4,988](#) fixed-maturity securities we owned had fair values below amortized cost, compared with 2,840 of the 4,738 securities we owned at year-end 2023. The [3,784](#) [2,495](#) holdings with fair values below amortized cost at [June 30, 2024](#) [September 30, 2024](#), represented [78.7%](#) [48.7%](#) of the fair value of our fixed-maturity investment portfolio and [\\$767](#) [\\$404](#) million in unrealized losses.

- [2,806](#) [1,854](#) of the [3,784](#) [2,495](#) holdings had fair value between 90% and 100% of amortized cost at [June 30, 2024](#) [September 30, 2024](#). These primarily consist of securities whose current valuation is largely the result of interest rate factors. The fair value of these [2,806](#) [1,854](#) securities was [\\$9.195 billion](#) [\\$6.496 billion](#), and they accounted for [\\$276](#) [\\$151](#) million in unrealized losses.
- [962](#) [636](#) of the [3,784](#) [2,495](#) fixed-maturity holdings had fair value between 70% and 90% of amortized cost at [June](#) [September 30, 2024](#). We believe the [962](#) [636](#) fixed-maturity securities will continue to pay interest and ultimately

[Cincinnati Financial Corporation Third-Quarter 2024 10-Q](#)
[Page 68](#)

pay principal upon maturity. The issuers of these [962](#) [636](#) securities have strong cash flow to service their debt and meet

[Cincinnati Financial Corporation Second-Quarter 2024 10-Q](#)
[Page 68](#)

- their contractual obligation to make principal payments. The fair value of these securities was [\\$2.115](#) [\\$1.217](#) billion, and they accounted for [\\$474 million](#) [\\$247 million](#) in unrealized losses.
- [16](#) Five of the [3,784](#) [2,495](#) fixed-maturity holdings had fair value below 70% of amortized cost at [June 30, 2024](#) [September 30, 2024](#). We believe these fixed-maturity securities will continue to pay interest and ultimately pay principal upon maturity. The fair value of these securities was [\\$32 million](#) [\\$11 million](#), and they accounted for [\\$17 million](#) [\\$6 million](#) in unrealized losses.

The table below reviews fair values and unrealized losses by investment category and by the overall duration of the securities' continuous unrealized loss position.

(Dollars in millions)	(Dollars in millions)	Less than 12 months		12 months or more		Total	(Dollars in millions)	Less than 12 months	12 months or more	Total

At **June 30, 2024** **September 30, 2024**, applying our invested asset impairment policy, we determined that the total of **\$767 million** **\$404 million**, for securities in an unrealized loss position in the table above, was not the result of a credit loss.

During the first **six nine** months of 2024, no fixed maturity securities were written down to fair value, due to an intention to be sold. The allowance for credit losses increased \$25 million during the first **six nine** months of 2024. During the first **six nine** months of 2023, one fixed-maturity security was written down to fair value, due to an intention to be sold, resulting in \$4 million of noncash charges. Changes in allowance for credit losses were \$3 million during the first **six nine** months of 2023.

During the full year of 2023, we wrote down one security and recorded \$4 million in impairment charges. At December 31, 2023, 2,840 fixed-maturity securities with a total unrealized loss of \$687 million were in an unrealized loss position. Of that total, 20 fixed-maturity securities had fair values below 70% of amortized cost.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures – The company maintains disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act)).

Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. The company's management, with the participation of the company's chief executive officer and chief financial officer, has evaluated the effectiveness of the design and operation of the company's disclosure controls and procedures as of **June 30, 2024** **September 30, 2024**. Based upon that evaluation, the company's chief executive officer and chief financial officer concluded that the design and operation of the company's disclosure controls and procedures provided reasonable assurance that the disclosure controls and procedures are effective to ensure:

- that information required to be disclosed in the company's reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and
- that such information is accumulated and communicated to the company's management, including its chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosures.

Changes in Internal Control over Financial Reporting – During the three months ended **June 30, 2024** **September 30, 2024**, there were no changes in our internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II – Other Information

Item 1. Legal Proceedings

Neither the company nor any of our subsidiaries are involved in any litigation believed to be material other than ordinary, routine litigation incidental to the nature of our business.

Item 1A. Risk Factors

Our risk factors have not changed materially since they were described in our 2023 Annual Report on Form 10-K filed February 26, 2024. Investors should not interpret the disclosure of a risk to imply that the risk has not already materialized.

Cincinnati Financial Corporation **Second-Quarter** **Third-Quarter** 2024 10-Q
Page 72

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

We did not sell any of our shares that were not registered under the Securities Act during the first **six** **nine** months of 2024. Our repurchase program does not have an expiration date. On January 26, 2018, an additional 15 million shares were authorized, which expanded our current repurchase program. We have 5,651,785 shares available for purchase under our programs at **June 30, 2024** **September 30, 2024**.

FIRST AMENDMENT TO THE CINCINNATI FINANCIAL CORPORATION TOP HAT SAVINGS PLAN

[AS AMENDED AND RESTATED EFFECTIVE JANUARY 1, 2018]

Pursuant to the authority granted under Section 7.2(a) of the Cincinnati Financial Corporation Top Hat Savings Plan (the "Plan"), Cincinnati Financial Corporation hereby amends the Plan effective January 1, 2023 as set forth below.

1. Section 1.12 is amended to read as follows.

1.12 "Employer" means Cincinnati Financial Corporation and its U.S. subsidiaries, or their successors.

2. Section 1.14 is amended to read as follows.

1.14 "Executive" means as provided in (a) and (b) below as determined for each Plan Year.

(a) **General.** Except as otherwise provided in (b) below, Executive means an Employee who satisfies (1), (2) or (3) below.

(1) The Employer recognizes the Employee as an officer, and his Compensation is projected to be at least 120% of the indexed amount under Code §414(q)(1)(B)(i) either for the Plan Year for which eligibility is being determined, or for the immediately preceding Plan Year, as determined by the Committee.

(2) The Employee's Compensation, and/or Bonus for the Plan Year, when considered together, exceeds the Code §401(a)(17) compensation limit.

(3) The Employee is designated by the Committee as eligible to participate in the Plan for purposes of some or all of its provisions.

(b) **Post-2022 Grandfathered Participants.** Notwithstanding (a) above, a Grandfathered Participant is an Executive for a post-2022 Plan Year.

3. Article I is amended to add new Section 1.14A that reads as follows.

1.14A "Grandfathered Participant" means an Employee who, for the 2022 Plan Year, was an Executive who made a Deferral Election that was effective the entire year. If a Grandfathered Participant does not make a Deferral Election for a post-2022 Plan Year, or cancels his election during the year, he is no longer a Grandfathered Participant effective on the earlier of: (a) the date he canceled his election; or (b) December 31 of the last post-2022 Plan Year for which he made a Deferral Election that was effective the entire year.

4. Section 7.2(a) is amended to read as follows.

(a) **Amendment.** Cincinnati Financial Corporation or the Committee may amend the Plan at any time prospectively or retroactively. . The Plan can only be amended by a written instrument

(including Committee minutes and board resolutions) that Cincinnati Financial Corporation or the Committee considers an amendment.

Executed on 1st of December, 2022.

EXHIBIT 31A

CERTIFICATION PURSUANT TO SECTION 302 OF THE SARBANES OXLEY ACT OF 2002

I, Stephen M. Spray, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Cincinnati Financial Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
