Note 1. Nature of Business and Significant Accounting Policies

Nature of Business

SiteOne Landscape Supply, Inc. (hereinafter collectively with all its consolidated subsidiaries referred to as the "Company") is a wholesale distributor of irrigation supplies, hardscapes (including pavers, natural stone, and blocks), fertilizer and control products (e.g., herbicides), landscape accessories, nursery goods, outdoor lighting, and ice melt products to green industry professionals. The Company also provides value-added consultative services to complement its product offering and to help customers operate and grow their businesses. Substantially all of the Company's sales are to customers located in the United States of America ("U.S."), with less than **four two** percent of sales and less than

four three percent of total assets in Canada for all periods presented. As of October 1, 2023 March 31, 2024, the Company had over 690 branches. Based on the nature of the Company's products and customers' business cycles, sales are significantly higher in the second and third quarters of each fiscal year.

Share Repurchase Program

On October 20, 2022, the Company's Board of Directors authorized the Company to repurchase, at any time or from time to time, shares of the Company's common stock having an aggregate purchase price not to exceed \$400.0 million pursuant to a Rule 10b5-1 plan and/or pursuant to open market or accelerated share repurchase arrangements, tender offers, or privately negotiated transactions. The repurchase authorization does not have an expiration date and may be amended, suspended, or terminated by the Company's Board of Directors at any time.

During the three and nine months ended October 1, 2023 March 31, 2024, there were no shares purchased under the share repurchase program. As of October 1, 2023 March 31, 2024, the dollar value of shares that may yet be purchased under the share repurchase authorization was \$375.0 \$363.6 million.

Inflation Reduction Act of 2022

In August 2022, the Inflation Reduction Act of 2022 was enacted, which, among other things, implements a 15% corporate alternative minimum tax on book income of certain large corporations effective for tax years beginning after December 31, 2022, and imposes a 1% excise tax on corporate stock repurchases after December 31, 2022. The Company does not expect the enacted legislation to have a material impact on the Company's consolidated financial statements and related disclosures.

Basis of Financial Statement Presentation

The accompanying unaudited consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") as applicable to interim financial reporting. In management's opinion, the unaudited financial information for the interim periods presented includes all adjustments, consisting of normal recurring accruals necessary for a fair statement of the financial position, results of operations, and cash flows. Certain information and disclosures normally included in the Company's annual financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). These interim unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto contained in the Company's Annual Report on Form 10-K filed with the SEC for the fiscal year ended January 1, 2023 December 31, 2023. The interim period unaudited financial results for the three and nine-month three-month periods presented are not necessarily indicative of results to be expected for any other interim period or for the entire year.

Certain prior period amounts, which are not material, have been reclassified to conform to the current period presentation on the Consolidated Statements of Equity. For the three and nine months ended October 1, 2023, the Company reclassified Treasury stock shares of 20,911 and the corresponding share amount of \$0.3 million, which in previous years were reported in Common stock shares and Additional paid-in capital, respectively.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported and disclosed in the financial statements and accompanying notes. Actual results could differ from these estimates.

Fiscal Year

The Company's fiscal year is a 52- or 53-week period ending on the Sunday nearest to December 31. The fiscal years ending December 29, 2024 (the "2024 Fiscal Year") and December 31, 2023 and January 1, 2023 (the "2023 Fiscal Year") both include 52 weeks. Additionally, the Company's fiscal quarters end on the Sunday nearest to March 31, June 30, and September 30, respectively. The three months ended October 1, 2023 March 31, 2024 and October 2, 2022 April 2, 2023 both include 13 weeks. The nine months ended October 1, 2023 and October 2, 2022 both include 39 weeks.

Principles of Consolidation

The Company's consolidated financial statements include the assets and liabilities used in operating the Company's business, including entities in which the Company owns or controls more than 50% of the voting shares. All of the Company's subsidiaries are wholly owned. All intercompany balances and transactions have been eliminated in consolidation.

Significant Accounting Policies

Except as updated by the Recently Issued and Adopted Accounting Pronouncements section below, a description of the Company's significant accounting policies is included in the Company's Annual Report on Form 10-K for the fiscal year ended January 1, 2023, 2023 Fiscal Year.

Recently Issued and Adopted Accounting Pronouncements

In October 2021, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2021-08, "Business Combinations (Topic 805): Accounting for Contract Assets and Contract Liabilities from Contracts with Customers" ("ASU 2021-08"). The guidance requires an acquirer in a business combination to recognize and measure

contract assets and liabilities in accordance with ASU 2014-09, *Revenue from Contracts with Customers* (Topic 606) rather than at fair value. The Company adopted ASU 2021-08 on a prospective basis when it became effective in the first quarter of **fiscal year 2023, the 2023 Fiscal Year**. The adoption of ASU 2021-08 did not have a material impact on the Company's consolidated financial statements and related disclosures.

In March 2020, the FASB issued ASU 2020-04, "Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting" ("ASU 2020-04"), as amended in January 2021 by ASU 2021-01, "Reference Rate Reform (Topic 848): Scope" ("ASU 2021-01"), and in December 2022 by ASU 2022-06, "Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848" ("ASU 2022-06").

- ASU 2020-04 provided optional expedients and exceptions for applying U.S. GAAP to contracts, hedging relationships, and other transactions affected by reference rate reform if certain criteria were met.
- ASU 2021-01 amended the scope of the guidance in ASU 2020-04 on the facilitation of the effects of reference rate reform on financial reporting. The amendments in ASU 2021-01 clarified that "certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting can apply to derivatives that are affected by the discounting transition". These amendments applied only to contracts and hedging relationships that reference the London Interbank Offered Rate ("LIBOR") or another reference rate expected to be discontinued due to reference rate reform. The expedients are applicable to contract modifications made and hedging relationships entered into on or before December 31, 2022. The guidance was permitted to be elected over time as reference rate reform activities occurred.
- ASU 2022-06 deferred the expiration date of the reference rate reform relief guidance provided by ASU 2020-04 and ASU 2021-01 to December 31, 2024.

The Company previously elected to apply the hedge accounting expedients related to probability and the assessments of effectiveness for future LIBOR-indexed cash flows to assume that the index upon which future hedged transactions would be based matches the index for the corresponding derivatives. On March 27, 2023, the Company amended its term loans to implement a forward-looking interest rate based on the secured overnight financing rate ("SOFR") in lieu of LIBOR. On March 31, 2023, the Company amended the terms of its interest rate swaps to implement SOFR in place of LIBOR. Concurrent with the amendments to its interest rate swaps, the Company elected certain of the optional expedients provided in Topic 848 that allowed the Company to preserve the past presentation of its derivatives without de-designating the existing hedging relationships. The adoption of Topic 848 did not have a material impact on the Company's consolidated financial statements. Refer to "[Note 9](#). Long-Term Debt" and "[Note 4](#). Fair Value Measurement and Interest Rate Swaps" for additional information regarding these amended agreements.

In July 2023, the FASB issued ASU 2023-03, "*Presentation of Financial Statements* (Topic 205), *Income Statement—Reporting Comprehensive Income* (Topic 220), *Distinguishing Liabilities from Equity* (Topic 480), *Equity* (Topic 505), and *Compensation—Stock Compensation* (Topic 718)" ("**ASU 2023-03**"). This ASU amends or supersedes various SEC paragraphs in the Accounting Standards Codification to primarily reflect the issuance of Staff Accounting Bulletin No. 120. ASU 2023-03 provides clarifying guidance related to employee and non-employee share-based payment accounting, including guidance to companies issuing share-based awards shortly before announcing material, nonpublic information to consider such material nonpublic information to adjust observable market prices if the release of material nonpublic information is expected to affect the share price. ASU 2023-03 does not provide new guidance so there is no transition or effective date associated with it. Therefore, these updates were immediately effective. The adoption of ASU 2023-03 did not have a material impact on the Company's consolidated financial statements and related disclosures.

Accounting Pronouncements Issued But Not Yet Adopted

In November 2023, the FASB issued ASU 2023-07, "*Segment Reporting* (Topic 280): *Improvements to Reportable Segment Disclosures*" ("ASU 2023-07"), which expands reportable segment disclosure requirements primarily through enhanced disclosures about significant segment expenses. ASU 2023-07 requires disclosure of (i) significant segment expenses that are regularly provided to the CODM and included within the segment measure of profit or loss, (ii) an amount and description of its composition for other segment items to reconcile to segment profit or loss, and (iii) the title and position of the Company's CODM. The ASU does not change how a public entity identifies its operating segments, aggregates them, or applies the quantitative thresholds to determine its reportable segments. The new standard will be effective on a retrospective basis for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024, with early adoption permitted. The Company is currently evaluating the segment disclosure impact of the amended guidance; however, ASU 2023-07 is not expected to have a material impact on its consolidated financial statements.

In December 2023, the FASB issued ASU 2023-09, "*Income Taxes* (Topic 740): *Improvements to Income Tax Disclosures*" ("ASU 2023-09"). The amendments in ASU 2023-09 require public entities, on an annual basis, to provide disclosure of specific categories in the rate reconciliation, as well as disclosure of income taxes paid disaggregated by jurisdiction. The new standard will be effective on a prospective basis for fiscal years beginning after December 15, 2024 and interim periods therein, with early adoption permitted. The Company is currently evaluating the amended guidance and does not expect the adoption to have a material impact on its consolidated financial statements and related disclosures.

Note 4. Fair Value Measurement and Interest Rate Swaps

Fair value is defined as an exit price, representing an amount that would be received to sell an asset or the amount paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The inputs used to measure fair value are prioritized into the following three-tiered value hierarchy:

- Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2: Unadjusted quoted prices in active markets for similar assets or liabilities, unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active or inputs, other than quoted prices in active markets, which are observable either directly or indirectly.
- Level 3: Unobservable inputs for which there is little or no market data.

The hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The classification of fair value measurement within the hierarchy is based upon the lowest level of input that is significant to the measurement.

The Company's financial instruments consist of cash and cash equivalents, accounts receivables, interest rate swap contracts, and long-term debt. The variable interest rate on the long-term debt is reflective of current market borrowing rates. As such, the Company has determined that the carrying value of these financial instruments approximates fair value.

Interest Rate Swaps

The Company is subject to interest rate risk with regard to existing and future issuances of debt. The Company utilizes interest rate swap contracts to reduce its exposure to fluctuations in variable interest rates for future interest payments on existing debt. The Company is party to interest rate swap contracts to convert the variable interest rate to a fixed interest rate on the borrowings under the term loans.

The Company recognizes any differences between the variable interest rate payments and the fixed interest rate settlements with the swap counterparties as an adjustment to interest expense over the life of the swaps. The Company has designated these swaps as cash flow hedges and records the estimated fair value of the swaps to Accumulated other comprehensive income (loss) ("AOCI") on its Consolidated Balance Sheets. If it becomes probable the forecasted transactions will not occur, the hedge relationship will be de-designated and amounts accumulated in AOCI will be reclassified to Interest and other non-operating expenses, net in the current period.

On March 31, 2023, the Company amended the terms of its interest rate swaps to implement a forward-looking interest rate based on SOFR in place of LIBOR. Since the interest rate swaps were affected by reference rate reform, the Company applied the expedients and exceptions provided in Topic 848 to preserve the past presentation of its derivatives without de-designating the existing hedging relationships. All interest rate swap amendments were executed with the existing counterparties and did not change the notional amounts, maturity dates, or other critical terms of the hedging relationships. The interest rate swaps will continue to be net settled on a quarterly basis with the counterparties for the difference between the fixed rates and the variable rates based upon three-month Term SOFR (subject to a floor of 0.73839% for interest rate swap 3 and 0.23839% for interest rate swaps 7, 8, and 9) as applied to the notional amounts of each interest rate swap.

On March 23, 2021, the Company restructured the interest rate swap positions of its Forward-starting forward-starting interest rate swaps 4, 5, and 6 to extend the terms to maturity using a strategy commonly referred to as a "blend and extend" in order to continue to manage its exposure to interest rate risk on borrowings under the term loans. Refer to "Note 9. Long-Term Debt" for additional information regarding the Company's term loans. As a result of these transactions, all existing agreements for Forward-starting forward-starting interest rate swaps 4, 5, and 6 at that time were amended and restructured as new agreements designated by the Company as interest rate swaps 7, 8, and 9 with the same counterparties. The Company recognizes the unrealized gains or unrealized losses for interest rate swap contracts as either assets or liabilities at fair value on its Consolidated Balance Sheets. The interest rate swap contracts are subject to master netting arrangements. The Company has elected not to offset the fair value of assets with the fair value of liabilities related to these contracts. The following table summarizes the fair value of the derivative instruments and the respective lines in which they were recorded in the Consolidated Balance Sheets as of **October 1, 2023**, **March 31, 2024** and **January 1, 2023**, **December 31, 2023** (in millions):

REFINITIV 

As of October 1, 2023, the net fair value of the interest rate swaps in the amount of \$10.1 million, net of taxes, was recorded in AOCI for the derivatives designated as hedging instruments. To the extent the interest rate swaps designated as hedging instruments are determined to be ineffective, the Company recognizes the changes in the estimated fair value of the swaps in earnings.

For determining the fair value of the interest rate swap contracts, the Company uses significant observable market data or assumptions (Level 2 inputs) that market participants would use in pricing similar assets or liabilities, including assumptions about counterparty risk. The fair value estimates reflect an income approach based on the terms of the interest rate swap contracts and inputs corroborated by observable market data including interest rate curves.

For the three and nine months ended October 1, 2023 March 31, 2024 and October 2, 2022 April 2, 2023, there was no ineffectiveness recognized in earnings. The after-tax amount of unrealized gain on derivative instruments included in AOCI related to the interest rate swap contracts expected to be reclassified to earnings during the next twelve months was \$7.3 million \$6.5 million as of October 1, 2023 March 31, 2024. The ultimate amount recognized will vary based on fluctuations of interest rates through the maturity dates.

The tables table below provide provides details regarding pre-tax amounts in AOCI and gain (loss) reclassified into income for derivatives designated as cash flow hedges for the three and nine months ended October 1, 2023 March 31, 2024 and October 2, 2022 April 2, 2023 (in millions):

Failure of the swap counterparties to make payments would result in the loss of any potential benefit to the Company under the swap agreements. In this case, the Company would still be obligated to pay the variable interest payments underlying the debt agreements. Additionally, failure of the swap counterparties would not eliminate the Company's obligation to continue to make payments under the existing swap agreements if it continues to be in a net pay position.

Intangible Assets

Intangible assets include customer relationships as well as trademarks and other intangibles acquired through acquisitions. Intangible assets with finite useful lives are amortized on an accelerated method or a straight-line method over their estimated useful lives. An accelerated amortization method reflecting the pattern in which the asset will be consumed is utilized if that pattern can be reliably determined. If that pattern cannot be reliably determined, a straight-line amortization method is used. The Company considers the period of expected cash flows and the underlying data used to measure the fair value of the intangible assets when selecting a useful life. The Company's customer relationships are amortized on an accelerated method.

The following table summarizes the components of intangible assets (in millions, except weighted average remaining useful life):

Note 7. Leases

The Company determines if an arrangement is a lease at inception of a contract. The Company leases equipment and real estate including office space, branch locations, and distribution centers under operating leases. Finance lease obligations consist primarily of the Company's vehicle fleet. Most leases include one or more options to renew, with renewal terms that can extend the lease term from one year to five years or more. The exercise of lease renewal options is at the Company's sole discretion. Certain leases include options to purchase the leased property. ROU assets represent the Company's right to use an underlying asset during the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the lease. ROU assets and liabilities are recognized at the commencement date based on the net present value of fixed lease payments over the lease term. As most of the Company's operating leases do not provide an implicit interest rate, the Company uses an incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments. Finance lease agreements generally include an interest rate that is used to determine the present value of future lease payments. Variable lease payment amounts that cannot be determined at the commencement of the lease such as increases in lease payments based on changes in index rates or usage, are not included in the ROU assets or lease liabilities and are expensed as incurred and recorded as variable lease expense. Leases with an initial term of 12 months or less are not recorded in the Consolidated Balance Sheets.

Note 8. Employee Benefit and Stock Incentive Plans

The Company sponsors a defined contribution benefit plan for substantially all of its employees. Company contributions to the plan are based on a percentage of employee wages. The Company's contributions to the plan were **\$3.8** **\$4.9** million and **\$13.2 million** **\$4.6 million** for the three **and nine** months ended **October 1, 2023**, **March 31, 2024** and **\$3.2 million** and **\$11.4 million** for the three and nine months ended **October 2, 2022** **April 2, 2023**, respectively.

The Company's Omnibus Equity Incentive Plan (the "2016 Plan"), which became effective on April 28, 2016, provided for the grant of awards in the form of stock options that may be either incentive stock options or non-qualified stock options; stock purchase rights; restricted stock; restricted stock units ("RSUs"); performance shares; performance stock units ("PSUs"); stock appreciation rights; dividend equivalents; deferred stock units ("DSUs"); or other stock-based awards. The Company also has outstanding stock-based awards under

its stock incentive plan ("Stock Incentive Plan"), which commenced in May 2014 and terminated upon adoption of the 2016 Plan. However, awards previously granted under the Stock Incentive Plan were unaffected by the termination of the Stock Incentive Plan.

At the 2020 Annual Meeting of Stockholders of the Company on May 13, 2020 (the "Effective Date"), the Company's stockholders approved the Company's 2020 Omnibus Equity Incentive Plan (the "2020 Plan"), which replaced the 2016 Plan. The 2020 Plan reserves 2,155,280 shares of the Company's common stock for issuance under the 2020 Plan, consisting of 1,600,000 new shares plus 555,280 shares that were previously authorized for issuance under the 2016 Plan and that, as of the Effective Date, were not subject to outstanding awards. No further grants of awards will be made under the 2016 Plan; however, outstanding awards granted under the 2016 Plan will remain outstanding and will continue to be administered in accordance with the terms of the 2016 Plan and the applicable award agreements. Any shares covered by an award, or any portion thereof, granted under the 2020 Plan, 2016 Plan, or Stock Incentive Plan that terminates, is forfeited, is repurchased, expires, or lapses for any reason will again be available for the grant of awards. Additionally, any shares tendered or withheld to satisfy the grant or exercise price or tax withholding obligations pursuant to any award under the 2020 Plan, 2016 Plan, or Stock Incentive Plan will again be available for issuance. The aggregate number of shares that may be issued under the 2020 Plan is 2,155,280 shares of which 1,913,823 1,871,030 remain available as of October 1, 2023 March 31, 2024.

Stock options and RSUs granted to employees vest over a four-year period at 25% per year. Stock options expire ten years after the date of grant. PSUs granted to employees vest upon the achievement of the performance conditions, over a three-year period, measured by the growth of the Company's pre-tax income plus amortization relative to a select peer group, subject to adjustment based upon the application of a return on invested capital modifier.

RSUs granted to non-employee directors vest at the earlier of the day preceding the next annual meeting of stockholders of the Company at which directors are elected or the first anniversary of the grant date, in each case, subject to the participant's continued service as a director or other service provider (as applicable) from the grant date through such vesting date. In February 2023, the Company's Human Resources and Compensation Committee approved amendments to the applicable equity award agreements governing the terms of the stock options, RSUs, and PSUs granted under the 2020 Plan. Pursuant to such amendments, all unvested stock options and RSUs granted to an associate after the effective date of the amendments under an applicable award agreement, as amended, will fully vest following the end of their employment, generally in four equal annual installments and expire in 10 years for stock options, if such associate's combined age (minimum of 55 years of age) and completed years of employment with the Company (minimum of five years of service) equals 65 or more (the "Rule of 65"). The amendments did not alter any equity award agreements outstanding on or prior to the effective date or the pro-rated vesting schedule with respect to PSUs, other than to change the definition of retirement to reflect the Rule of 65.

DSUs, RSUs, and PSUs have grant date fair values equal to the fair market value of the underlying stock on the date of grant. The ABL Facility is secured by a first lien on the inventory and receivables of the Borrowers. The ABL Facility is guaranteed by SiteOne Landscape Supply Bidco, Inc. ("Bidco"), an indirect wholly-owned subsidiary of the Company, and each direct and indirect wholly-owned U.S. restricted subsidiary of Landscape. Availability is determined using borrowing base calculations of eligible inventory and receivable balances less the current outstanding ABL Facility and letters of credit balances.

On July 22, 2022, the Company, through its subsidiaries, entered into the Seventh Amendment to the ABL Credit Agreement (the "Seventh Amendment"). The Seventh Amendment amended and restated the ABL Credit Agreement in order to, among other things, (i) increase the aggregate principal amount of the commitments to \$600.0 million, (ii) extend the final scheduled maturity of the revolving credit facility to July 22, 2027, (iii) establish an alternate rate of interest to the LIBOR rate, (iv) replace the administrative and collateral agent, and (v) make such other changes as agreed among the Borrowers and the lenders. Additionally, undrawn commitments under the ABL Credit Agreement bear a commitment fee of 0.20% or 0.25%, depending on the average daily undrawn portion of the commitments under the ABL Credit Agreement.

The interest rate on outstanding balances under the ABL Facility was 6.67741% ranged from 6.54483% to 6.55167% as of October 1, 2023 March 31, 2024 and ranged from 5.68561% to 5.77336% was 6.69508% as of January 1, 2023 December 31, 2023. Additionally, the Borrowers paid a The commitment fee of on unfunded amounts was 0.25% on the unfunded amount and 0.25% as of October 1, 2023 March 31, 2024 and a commitment fee of 0.20% on the unfunded amount as of January 1, 2023 December 31, 2023, respectively.

The ABL Facility contains customary representations and warranties and customary affirmative and negative covenants. The negative covenants are limited to the following: financial condition, fundamental changes, dividends and distributions, acquisitions, dispositions of collateral, payments and modifications of restricted indebtedness, negative pledge clauses, changes in line of business, currency, commodity and other hedging transactions, transactions with affiliates, investments, indebtedness, and liens. Remediation activities can vary substantially in duration and cost and it is difficult to develop precise estimates of future site remediation costs. The Company recorded in Other long-term liabilities the undiscounted cost estimate of future remediation efforts of \$3.9 million and \$3.9 million as of **October 1, 2023** **March 31, 2024** and **January 1, 2023** **December 31, 2023**, respectively. As part of the CD&R Acquisition, Deere & Company agreed to pay the first \$2.5 million of the liability and the Company's exposure is capped at \$2.4 million. The Company has recorded an indemnification asset in Other assets against the liability as a result of these actions of \$1.5 million and \$1.5 million as of **October 1, 2023** **March 31, 2024** and **January 1, 2023** **December 31, 2023**, respectively.

Letters of credit: Credit

As of **October 1, 2023** **March 31, 2024** and **January 1, 2023** **December 31, 2023**, outstanding letters of credit were **\$14.3** million **\$18.8** million and **\$11.5** million **\$14.3** million, respectively. There were no amounts drawn on the letters of credit for either period presented.

Note 12. Earnings (Loss) Per Share

The Company computes basic earnings (loss) per share ("EPS") by dividing Net income (loss) attributable to common shares by the weighted average number of common shares outstanding for the period. The Company includes vested RSUs, DSUs, and PSUs that have not been settled in common shares in the basic weighted average number of common shares calculation. The Company's computation of diluted EPS reflects the potential dilution that could occur if dilutive securities or other obligations to issue common stock were exercised or converted into common stock, which include in-the-money outstanding stock options and RSUs. PSUs are excluded from the calculation of dilutive potential common shares until the performance conditions have been achieved on the basis of the assumption that the end of the reporting period was the end of the contingency period, if such

shares issuable are dilutive. Using the treasury stock method, the effect of dilutive securities includes the additional shares of common stock that would have been outstanding based on the assumption that these potentially dilutive securities had been issued. The treasury stock method assumes proceeds from the exercise price of stock options and the unamortized compensation expense of RSUs and stock options are used to repurchase common shares at the average market price during the period, thus reducing the dilutive effect. RSUs and stock options with assumed proceeds per unit above the Company's average share price for the periods presented are excluded from the diluted EPS calculation because the effect is anti-dilutive.

The following table sets forth the computation of the weighted average number of diluted common shares outstanding for the three and nine months ended **October 1, 2023** **March 31, 2024** and **October 2, 2022** **April 2, 2023**:

(a) The shares used in the computation of diluted EPS do not give effect to any dilutive securities for the three months ended March 31, 2024 and April 2, 2023 as its inclusion would have the effect of decreasing the Net loss per common share.

The diluted earnings per common share calculation for the three months ended **October 1, 2023** **March 31, 2024** and **October 2, 2022** **April 2, 2023** excluded the effect of **183,837** **1,042,007** and **280,825** **1,253,714** potential shares of common stock, respectively, because the assumed exercises of a portion of the Company's employee stock options and RSUs were anti-dilutive. In addition, the diluted earnings per common share calculation for the nine months ended **October 1, 2023** and **October 2, 2022** excluded the anti-dilutive effect of **180,154** and **267,840** potential shares of common stock, respectively.

We operate three other distribution centers that are located in Hutchins, Texas (338,000 square feet), Palmetto, Georgia (335,000 square feet), and Carlisle, Pennsylvania (201,000 square feet). In addition, we have achieved strong operating cash flows during the nine months ended October 1, 2023 through effective working capital management primarily due to our progress in reducing inventory levels which were elevated in response to supply chain uncertainty in prior year periods.

As we continue to navigate through the current uncertainty presented by market and economic conditions, we believe that we are prepared to meet the challenges ahead due to our balanced business, strong financial condition, dedicated and experienced teams, and focused business strategy. We continue to closely monitor the impact on our business and the related uncertainties and risks of moderating prices and demand weakness softer markets resulting from the challenging market conditions described above as well as the potential effects of uncertain political conditions and geopolitical conflicts, such as the ongoing war in Ukraine, and the conflict in the Gaza Strip, Strip, and unrest in the Middle East. These conditions are beyond our control, and we cannot estimate with certainty the full extent of their impact on our business, results of operations, cash flows, and/or financial condition. To mitigate the effects of these conditions, we may take actions that alter our business operations if required or that we determine are in the best interests of our associates, customers, suppliers, and shareholders. The forward-looking statements in this Business Environment and Trends section are subject to significant risks and uncertainties. See Part I, Item 1A. - "Risk Factors", in our Annual Report on Form 10-K for the fiscal year ended January 1, 2023 2023 Fiscal Year for a discussion of the various risks that could have a material adverse effect on our reputation, business, financial position, results of operations, and cash flows.

Presentation

Our financial statements included in this report have been prepared in accordance with generally accepted accounting principles in the United States of America ("GAAP"). We use a 52/53 week Our fiscal year with the fiscal year is a 52- or 53-week period ending on the Sunday nearest to December 31 in each year. The Our fiscal years ending December 29, 2024 (the "2024 Fiscal Year") and December 31, 2023 and January 1, 2023 (the "2023 Fiscal Year") both include 52 weeks. Additionally, our fiscal quarters end on the Sunday nearest to March 31, June 30, and September 30, respectively. The three months ended October 1, 2023 March 31, 2024 and October 2, 2022 April 2, 2023 both included 13 weeks. The nine months ended October 1, 2023 and October 2, 2022 both included 39 weeks.

We manage our business as a single reportable segment. Within our organizational framework, the same operational resources support multiple geographic regions, and performance is evaluated at a consolidated level. We also evaluate performance based on discrete financial information on a regional basis. Since all of our regions have similar operations and share similar economic characteristics, we aggregate regions into a single operating and reportable segment. These similarities include (i) long-term financial performance, (ii) the nature of products and services, (iii) the types of customers we sell to, and (iv) the distribution methods utilized. Further, all of our product categories have similar supply chain processes and classes of customers.

Key Business and Performance Metrics

We focus on a variety of indicators and key operating and financial metrics to monitor the financial condition and performance of our business. These metrics include:

Net sales. We generate Net sales primarily through the sale of landscape supplies, including irrigation supplies, fertilizer and control products, hardscapes, landscape accessories, nursery goods, outdoor lighting, and ice melt products to our customers who are primarily landscape contractors serving the residential and commercial construction sectors. Our Net sales include billings for freight and handling charges, and commissions on the sale of control products that we sell as an agent. Net sales are presented net of any discounts, returns, customer rebates, and sales or other revenue-based taxes.

[Table of Contents](#)

Non-GAAP Organic Sales. In managing our business, we consider all growth, including the opening of new greenfield branches, to be organic growth unless it results from an acquisition. When we refer to Organic Sales growth, we include increases in growth from newly-opened greenfield branches and decreases in growth from closing existing branches but exclude increases in growth from acquired branches until they have been under our ownership for at least four full fiscal quarters at the start of the fiscal reporting period.

Non-GAAP Selling Days. Selling Days are defined as business days, excluding Saturdays, Sundays, and holidays, that our branches are open during the year. Depending upon the location and the season, our branches may be open on Saturdays and Sundays; however, for consistency, those days have been excluded from the calculation of Selling Days.

Non-GAAP Organic Daily Sales. We define Organic Daily Sales as Organic Sales divided by the number of Selling Days in the relevant reporting period. We believe Organic Sales growth and Organic Daily Sales growth are useful measures for evaluating our performance as we may choose to open or close branches in any given market depending upon the needs of our customers or our strategic growth opportunities. Refer to "Results of Operations – Quarterly Results of Operations Data" for a reconciliation of Organic Daily Sales to Net sales.

Cost of goods sold. Our Cost of goods sold includes all inventory costs, such as the purchase price paid to suppliers, net of any volume-based incentives, as well as inbound freight and handling, and other costs associated with inventory. Cost of goods sold also includes salaries, wages, employee benefits, payroll taxes, bonuses, depreciation, and amortization related to inventory production activities. Our Cost of goods sold excludes the cost to deliver the products to our customers through our branches, which is included in Selling, general and administrative expenses. Cost of goods sold is recognized primarily using the first-in, first-out method of accounting for the inventory sold.

Gross profit and gross margin. We believe that Gross profit and gross margin are useful for evaluating our operating performance. We define Gross profit as Net sales less Cost of goods sold. We define gross margin as Gross profit divided by Net sales.

Selling, general and administrative expenses (operating expenses). Our operating expenses are primarily comprised of Selling, general and administrative costs, which include personnel expenses (salaries, wages, employee benefits, payroll taxes, stock-based compensation, and bonuses), rent, fuel, vehicle maintenance costs, insurance, utilities, repairs and maintenance, and professional fees. Operating expenses also include depreciation and amortization.

Non-GAAP Adjusted EBITDA. In addition to the metrics discussed above, we believe that Adjusted EBITDA is useful for evaluating the operating performance and efficiency of our business. EBITDA represents our Net income (loss) plus the sum of income tax (benefit) expense, interest expense, net of interest income, and depreciation and amortization. Adjusted EBITDA represents EBITDA as further adjusted for items such as stock-based compensation expense, (gain) loss on sale of assets and termination of finance leases not in the ordinary course of business, financing fees, as well as other fees and expenses related to acquisitions, and other non-recurring (income) loss. Refer to "Results of Operations – Quarterly Results of Operations Data" for more information regarding how we calculate EBITDA and Adjusted EBITDA and the limitations of those metrics.

Key Factors Affecting Our Operating Results

In addition to the metrics described above, a number of other important factors may affect our results of operations in any given period.

Weather Conditions and Seasonality

In a typical year, our operating results are impacted by seasonality. Our Net sales and Net income have been higher in the second and third quarters of each fiscal year due to favorable weather and longer daylight conditions during these quarters. Our Net sales have been significantly lower in the first and fourth quarters due to lower landscaping, irrigation, and turf maintenance activities in these quarters, and historically, we have incurred net losses in these quarters. Seasonal variations in operating results may also be significantly impacted by inclement weather conditions, such as snow and ice storms, wet weather, and hurricanes, which not only impact the demand for certain products like fertilizer and ice melt, but also may delay construction projects where our products are used.

[Table of Contents](#)

Industry and Key Economic Conditions

Our business depends on demand from customers for landscape products and services. The landscape supply industry includes a significant amount of landscape products, such as irrigation systems, outdoor lighting, lawn care supplies, nursery goods, and landscape accessories, for use in the construction of newly built homes, commercial buildings and facilities, and recreational spaces. The landscape supply industry has historically grown in line with rates of growth in residential housing and commercial building. The industry is also affected by trends in home prices, mortgage interest rates, home sales, and consumer spending. As general economic conditions improve or deteriorate, consumption of these products and services also tends to fluctuate. The landscape supply industry also includes a significant amount of agronomic products such as fertilizer, herbicides, and ice melt for use in maintaining existing landscapes or facilities. The use of these products is also tied to general economic activity, but levels of sales are not as closely correlated to construction markets.

Popular Consumer Trends

Preferences in housing, lifestyle, and environmental awareness can also impact the overall level of demand and mix for the products we offer. Examples of current trends we believe are important to our business include an ongoing interest in professional landscape services inspired by the popularity of home and garden television shows, magazines, and social media, the increasingly popular concept of "outdoor living," which has been a key driver of sales growth for our hardscapes and outdoor lighting products, and the social focus on eco-friendly products that promote water conservation, energy efficiency, and the adoption of "green" standards.

Acquisitions

In addition to our organic growth, we continue to grow our business through acquisitions in an effort to better service our existing customers and to attract new customers. These acquisitions have allowed us to further broaden our product lines and extend our geographic reach and leadership positions in local markets. In accordance with GAAP, the results of the acquisitions are reflected in our financial statements from the date of acquisition forward. Additionally, we incur transaction costs in connection with identifying and completing acquisitions as well as ongoing costs as we integrate acquired companies and seek to achieve synergies. As of **October 1, 2023** **March 31, 2024**, we completed the following acquisitions since the start of the **2022 fiscal year**: **2023 Fiscal Year**:

Volume-Based Pricing

We generally procure our products through purchase orders rather than under long-term contracts with firm commitments. We work to develop strong relationships with select suppliers that we target based on a number of factors, including brand and market recognition, price, quality, product support, service levels, delivery terms, and strategic positioning. We typically have annual supplier agreements, and while they generally do not provide for specific product pricing, many include volume-based financial incentives that

(a) In addition to our Net income (loss) determined in accordance with GAAP, we present Adjusted EBITDA in this Quarterly Report on Form 10-Q to evaluate the operating performance and efficiency of our business. EBITDA represents our Net income (loss) plus the sum of **income** **Income tax expense** (benefit) **expense**, interest expense, net of interest income, and depreciation and amortization. Adjusted EBITDA **represents EBITDA as is** further adjusted for stock-based compensation expense, (gain) loss on sale of assets and termination of finance leases not in the ordinary course of business, financing fees, as well as other fees and expenses related to acquisitions, and other non-recurring (income) loss. We believe that Adjusted EBITDA is an important supplemental measure of operating performance because:

- Adjusted EBITDA is used to test compliance with certain covenants under our long-term debt agreements;
- Adjusted EBITDA is frequently used by securities analysts, investors, and other interested parties in their evaluation of companies, many of which present an Adjusted EBITDA measure when reporting their results;
- Adjusted EBITDA is helpful in highlighting operating trends, because it excludes the results of decisions that are outside the control of operating management and that can differ significantly from company to company depending on long-term strategic decisions regarding capital structure, the tax jurisdictions in which companies operate, age and book depreciation of facilities, and capital investments;
- we consider (gains) losses on the acquisition, disposal, and impairment of assets as resulting from investing decisions rather than ongoing operations; and
- other significant non-recurring items, while periodically affecting our results, may vary significantly from period to period and have a disproportionate effect in a given period, which affects comparability of our results.

[Table of Contents](#)

Adjusted EBITDA is not a measure of our liquidity or financial performance under GAAP and should not be considered as an alternative to Net income, **operating** **Operating** income, or any other performance measures derived in accordance with GAAP, or as an alternative to cash flow from operating activities as a measure of our liquidity. The use of Adjusted EBITDA instead of Net income has limitations as an analytical tool. For example, this measure:

- does not reflect changes in, or cash requirements for, our working capital needs;
- does not reflect our interest expense, net, or the cash requirements necessary to service interest or principal payments, on our debt;
- does not reflect our Income tax **expense** (benefit) **expense** or the cash requirements to pay our income taxes;
- does not reflect historical cash expenditures or future requirements for capital expenditures or contractual commitments; and
- although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future and does not reflect any cash requirements for such replacements.

Management compensates for these limitations by relying primarily on the GAAP results and by using Adjusted EBITDA only as a supplement to provide a more complete understanding of the factors and trends affecting the business than GAAP results alone. Because not all companies use identical calculations, our presentation of Adjusted EBITDA may not be comparable to other similarly titled measures of other companies limiting their usefulness as a comparative measure.

Liquidity and Capital Resources

We assess our liquidity in terms of our cash and cash equivalents on hand and the ability to generate cash to fund our operating and investing activities, repurchase shares, and service our debt, taking into consideration available borrowings and the seasonal nature of our business. We expect that cash and cash equivalents on hand, cash provided from operations, and available capacity under the ABL Facility will provide sufficient funds to operate our business, make capital expenditures, complete acquisitions and share repurchases, and meet all of our liquidity requirements for the next 12 months, including payment of interest and principal on our debt. Longer-term projects or significant investments in acquisitions may be financed through borrowings under our credit facilities or other forms of financing and will depend on then-existing conditions.

In October 2022, our Board of Directors approved a share repurchase authorization for up to \$400.0 million of our common stock. We intend to purchase shares under the repurchase authorization from time to time on the open market at the discretion of management, subject to strategic considerations, market conditions, and other factors. The share repurchase authorization does not have an expiration date and may be amended, suspended, or terminated by our Board of Directors at any time. During the three and nine months ended October 1, 2023 March 31, 2024, we did not repurchase shares under the share repurchase program. As of October 1, 2023 March 31, 2024, the dollar value of shares that may yet be purchased under the share repurchase authorization was \$375.0 \$363.6 million.

Our borrowing base capacity under the ABL Facility was \$513.2 \$497.6 million as of October 1, 2023 March 31, 2024, after giving effect to \$72.5 \$83.6 million of revolving credit loans under the ABL Facility and outstanding letters of credit of \$14.3 \$18.8 million. Our borrowing base capacity under the ABL Facility was \$487.4 million \$578.2 million as of January 1, 2023 December 31, 2023, after giving effect to \$100.0 million \$7.5 million of revolving credit loans under the ABL Facility and outstanding letters of credit of \$11.5 million \$14.3 million. As of October 1, 2023 March 31, 2024, we had total cash and cash equivalents of \$74.9 \$41.5 million, total gross long-term debt of \$445.3 \$453.8 million, and total finance lease obligations (excluding interest) of \$82.0 \$101.5 million.

Working capital was \$918.8 \$910.0 million as of October 1, 2023 March 31, 2024, an increase of \$159.3 million \$83.0 million compared to \$759.5 million \$827.0 million as of January 1, 2023 December 31, 2023. The change in working capital was primarily attributable to the seasonality of our business.

Table of Contents

The following table summarizes current and long-term material cash requirements related to our long-term debt as of October 1, 2023 March 31, 2024 (in millions):

| | | Beyond | | | | | |
|--|--|---------|----|--------|----|------------------|--|
| | | Next 12 | | 12 | | | |

| | | Total | | Total | | Next 12 Months | |

| Interest on long-term debt | Interest on long-term debt | \$132.5 | \$ | 24.2 | \$ | 108.3 | |

Our gross long-term debt balance increased \$89.2 million \$74.8 million since January 1, 2023 December 31, 2023. This increase was primarily attributable to funding the seasonal increase in our working capital and our acquisition investments. We have current maturities on our long-term debt of \$5.3 million, which includes \$3.8 million \$3.8 million related to the term loan facility and \$1.5 million related to the hybrid debt instruments. The projected interest payments on our debt only pertain to obligations and agreements outstanding as of October 1, 2023 March 31, 2024 and expected payments for agent administration fees. The projected interest payments are calculated for future periods through maturity dates of our long-term debt using interest rates in effect as of October 1, 2023 March 31, 2024. Certain of these projected interest payments may differ in the future based on changes in floating interest rates or other factors and events, including our entry into amendments of the term loans loan facility and the ABL Facility. The total amount of interest on long-term debt balance increased \$34.6 \$10.9 million since January 1, 2023, December 31, 2023 to \$123.3 million, primarily due to the increase in borrowings under the term loans and rising interest rates. ABL Facility. Refer to "Note 9. Long-Term Debt" in the notes to the consolidated financial statements for further information regarding our debt instruments.

ABL Facility

Landscape Holding and Landscape (collectively, the "ABL Borrowers") are parties to the credit agreement dated December 23, 2013 (as amended by the First Amendment to the Credit Agreement, dated June 13, 2014, the Second Amendment to the Credit Agreement, dated January 26, 2015, the Third Amendment to the Credit Agreement, dated February 13, 2015, the Fourth Amendment to the Credit Agreement, dated October 20, 2015, the Omnibus Amendment to the Credit Agreement, dated May 24, 2017, the Sixth Amendment to the Credit Agreement, dated February 1, 2019, and the Seventh Amendment to the Credit Agreement, dated July 22, 2022, the "ABL Credit Agreement") providing for an asset-based credit facility (the "ABL Facility") of up to \$600.0 million, subject to borrowing base availability, with a maturity date of July 22, 2027. The ABL Facility is secured by a first lien on the inventory and receivables of the ABL Borrowers. The ABL Facility is guaranteed by SiteOne Landscape Supply Bidco, Inc. ("Bidco"), an indirect wholly-owned subsidiary of the Company, and each direct and indirect wholly-owned U.S. restricted subsidiary of Landscape. Availability is determined using borrowing base calculations of eligible inventory and receivable balances less the current outstanding ABL Facility and letters of credit balances.

On July 22, 2022, the ABL Borrowers entered into the Seventh Amendment to the ABL Credit Agreement (the "Seventh Amendment"). The Seventh Amendment amended and restated the ABL Credit Agreement in order to, among other things, (i) increase the aggregate principal amount of the commitments to \$600.0 million, (ii) extend the final scheduled maturity of the revolving credit facility to July 22, 2027, (iii) establish an alternate rate of interest to the LIBOR rate, (iv) replace the administrative and collateral agent, and (v) make such other changes as agreed among the ABL Borrowers and the lenders. Proceeds of the initial borrowings under the ABL Credit Agreement on the closing date of the Seventh Amendment were used, among other things, (i) to repay in full the loans outstanding under the ABL Credit Agreement immediately prior to the effectiveness of the Seventh Amendment, (ii) to pay fees and expenses related to the Seventh Amendment and the ABL Credit Agreement, and (iii) for working capital and other general corporate purposes.

Loans under the ABL Credit Agreement bear interest, at Landscape Holding's option, at either (i) an adjusted term SOFR rate equal to term SOFR plus 0.10% (subject to a floor of 0.00%) plus an applicable margin of 1.25% or 1.50% or (ii) an alternate base rate plus an applicable margin of 0.25% or 0.50%, in each case depending on the average daily excess availability under the ABL Credit Agreement, and in each case subject to a 0.125% reduction when the Consolidated First Lien Leverage Ratio (as defined in the ABL Credit

Agreement) is less than 1.50:1.00. Additionally, undrawn commitments under the ABL Credit Agreement bear a commitment fee of 0.20% or 0.25%, depending on the average daily undrawn portion of the commitments under the ABL Credit Agreement.

The interest rate on outstanding balances under the ABL Facility was 6.67741% ranged from 6.54483% to 6.55167% as of October 1, 2023 March 31, 2024 and ranged from 5.68561% to 5.77336% was 6.69508% as of January 1, 2023 December 31, 2023. Additionally, the ABL Borrowers paid a The commitment fee of paid on unfunded amounts was 0.25% on the unfunded amount and 0.25% as of October 1, 2023 March 31, 2024 and a commitment fee of 0.20% on the unfunded amount as of January 1, 2023 December 31, 2023, respectively.

The ABL Facility is subject to mandatory prepayments if the outstanding loans and letters of credit exceed either the aggregate revolving commitments or the current borrowing base, in an amount equal to such excess. Additionally, the ABL Facility is subject to various covenants, including incurrence covenants that require the Company to meet minimum financial ratios, and additional borrowings and other corporate transactions may be limited by failure to meet these financial ratios. Failure to meet any of these covenants could result in an event of default under these agreements. If an event of default occurs, the lenders could elect to declare all amounts outstanding under these agreements to be immediately due and payable, enforce their interest in collateral pledged under the agreement, or restrict the ABL Borrowers' ability to obtain additional borrowings under these agreements. The ABL Facility is secured by a first lien security interest over inventory and receivables and a second lien security interest over all other assets pledged as collateral.

The ABL Facility contains customary representations and warranties and customary affirmative and negative covenants. The negative covenants are limited to the following: financial condition, fundamental changes, dividends and distributions, acquisitions, dispositions of collateral, payments and modifications of restricted indebtedness, negative pledge clauses, changes in line of business, currency, commodity and other hedging transactions, transactions with affiliates, investments, indebtedness, and liens. The negative covenants are subject to customary exceptions and also permit the payment of dividends and distributions, investments, permitted acquisitions, payments or redemptions of indebtedness under the Second Amended and Restated Credit Agreement, asset sales and mergers, consolidations, and sales of all or substantially all assets involving subsidiaries upon satisfaction of a "payment condition." The payment condition is deemed satisfied upon 30-day specified excess availability and specified availability exceeding agreed upon thresholds and, in certain cases, the absence of specified events of default or known events of default and pro forma compliance with a consolidated fixed charge coverage ratio of 1.00 to 1.00.

Subject to certain conditions and subject to the receipt of commitments, the ABL Facility may be increased (or a new term loan facility added) by up to (i) the greater of (a) \$450.0 million and (b) 100% of Consolidated EBITDA (as defined in the ABL Credit Agreement) for the period of the most recent four consecutive fiscal quarters ending prior to the date of such determination plus (ii) an additional amount that will not cause the Consolidated First Lien Leverage Ratio, after giving effect to the incurrence of such additional amount and any use of proceeds thereof, to exceed 5.00 to 1.00.

There are no financial covenants included in the ABL Credit Agreement, other than a springing minimum consolidated fixed charge coverage ratio of at least 1.00 to 1.00, which is tested only when specified availability is less than 10.0% of the lesser of (x) the then applicable borrowing base and (y) the then aggregate effective commitments under the ABL Facility, and continuing until such time as specified availability has been in excess of such threshold for a period of 20 consecutive calendar days.

Failure to comply with the covenants and other provisions included in the ABL Credit Agreement could result in an event of default under the ABL Facility. If an event of default occurs, the lenders could elect to declare all amounts outstanding under the ABL Facility to be immediately due and payable, enforce their interest in collateral pledged under the agreement, or restrict the ABL Borrowers' ability to obtain additional borrowings thereunder.

Limitations on Distributions and Dividends by Subsidiaries

The ability of our subsidiaries to make distributions and dividends to us depends on their operating results, cash requirements, financial condition, and general business conditions, as well as restrictions under the laws of our subsidiaries' jurisdictions.

The agreements governing the Second Amended and Restated Credit Agreement and the ABL Facility restrict the ability of our subsidiaries to pay dividends, make loans, or otherwise transfer assets to us. Further, our subsidiaries are permitted under the terms of the Second Amended and Restated Credit Agreement and the ABL Facility and other indebtedness to incur additional indebtedness that may restrict or prohibit the making of distributions, the payment of dividends, or the making of loans to us.

Interest Rate Swaps

We are subject to interest rate risk with regard to existing and future issuances of debt. We utilize interest rate swap contracts to reduce our exposure to fluctuations in variable interest rates for future interest payments on existing debt. We are party to interest rate swap contracts to convert the variable interest rate to a fixed interest rate on portions of the borrowings under the term loans.

On March 31, 2023, we amended the terms of our interest rate swaps to implement a forward-looking interest rate based on SOFR in place of LIBOR. Since the interest rate swaps were affected by reference rate reform, we applied the expedients and exceptions provided in Topic 848 to preserve the past presentation of our derivatives without designating the existing hedging relationships. All interest rate swap amendments were executed with the existing counterparties and did not change the notional amounts, maturity dates, or other critical terms of the hedging relationships. The interest rate swaps will continue to be net settled on a quarterly basis with the counterparties for the difference between the fixed rates and the variable rates based upon three-month Term SOFR (subject to a floor) as applied to the notional amounts of each interest rate swap.

During the first quarter of 2021, we amended and restructured certain of our interest rate swap contracts using a strategy commonly referred to as a "blend and extend". In a blend and extend arrangement, the liability position of the existing interest rate swap arrangement is blended into the amended or new interest rate swap arrangement and the term to maturity of the hedged position is extended. We reclassified \$5.9 million from Accrued liabilities and Other long-term liabilities to long-term debt with \$1.5 million classified as

Long-term debt, current portion and \$4.4 million classified as Long-term debt, less current portion on our Consolidated Balance Sheets since for the interest rate swap arrangements executed during the first quarter of 2021 that were determined to be hybrid debt instruments containing embedded at-market swap derivatives. As of October 1, 2023 March 31, 2024, approximately the outstanding amount of \$1.5 million was classified as Long-term debt, current portion and approximately \$0.7 million was classified as Long-term debt, less current portion on our Consolidated Balance Sheets.

We recognize any differences between the variable interest rate payments and the fixed interest rate settlements from the swap counterparties as an adjustment to interest expense over the life of the swaps. We have designated these swaps as cash flow hedges and record the changes in the estimated fair value of the swaps to Accumulated other comprehensive income (loss) ("AOCI") on our Consolidated Balance Sheets. If it becomes probable that the forecasted transaction will not occur, the hedge relationship will be de-designated and amounts accumulated in AOCI will be reclassified to Interest and other non-operating expenses, net in the current period. To the extent the interest rate swaps are determined to be ineffective, we recognize the changes in the estimated fair value of the swaps in earnings.

Failure of the swap counterparties to make payments would result in the loss of any potential benefit to us under the swap agreements. In this case, we would still be obligated to pay the variable interest payments underlying the debt agreements. Additionally, failure of the swap counterparties would not eliminate our obligation to continue to make payments under the existing swap agreements if they were in a net pay position.
