Such statements involve risks, uncertainties, and assumptions. If the risks or uncertainties ever materialize or the assumptions prove incorrect, the results of Hewlett Packard Enterprise Company and its consolidated subsidiaries (Ã Hewlett Packard EnterpriseÃ ) may differ materially from those expressed or implied by such forward-looking statements and assumptions. The words Ã believe,Ã  Ã expect,Ã  Ã anticipate,Ã  Ã intend,Ã  Ã will,Ã  Ã estimate,Ã  Ã may,Ã  Ã likely,Ã  Ã could,Ã  Ã shouldÃ  and similar expressions are intended to identify such forward-looking statements. All statements other than statements of historical fact are statements that should be deemed forward-looking statements, including but not limited to any anticipated financial or operational benefits associated with the segment realignment that became effective as of the beginning of the first quarter of fiscal 2024; any projections, estimations or expectations of addressable markets and their sizes, revenue (including annualized revenue run-rate), margins, expenses (including stock-based compensation expenses), investments, effective tax rates, interest rates, the impact of tax law changes and related guidance and regulations, net earnings, net earnings per share, cash flows, liquidity and capital resources, inventory, goodwill, impairment charges, hedges and derivatives and related offsets, order backlog, benefit plan funding, deferred tax assets, share repurchases, currency exchange rates, repayments of debts including our asset-backed debt securities, or other financial items; recent amendments to accounting guidance and any potential impacts on our financial reporting therefrom; any projections or estimations of orders, including as-a-service orders; any statements of the plans, strategies, and objectives of management for future operations, as well as the execution and consummation of corporate transactions or contemplated acquisitions (including but not limited to our proposed acquisition of Juniper Networks, Inc.) and dispositions (including disposition of our H3C shares and the receipt of proceeds therefrom), research and development expenditures, and any resulting benefits, cost savings, charges, or revenue or profitability improvements; any statements concerning the expected development, performance, market share, or competitive performance relating to products or services; any statements concerning technological and market trends, the pace of technological innovation, and adoption of new technologies, including artificial intelligence-related and other products and services offered by Hewlett Packard Enterprise; any statements regarding current or future macroeconomic trends or events and the impact of those trends and events on Hewlett Packard Enterprise and our financial performance, including but not limited to supply chain dynamics, demand for our products and services, and access to liquidity, and our actions to mitigate such impacts to our business; the scope and duration of outbreaks, epidemics, pandemics, public health crises, the ongoing conflicts between Russia and Ukraine and in the Middle East and the relationship between China and the U.S., and our actions in response thereto, and their impacts on our business, operations, liquidity and capital resources, employees, customers, partners, supply chain, financial results, and the world economy; any statements regarding future regulatory trends and the resulting legal and reputational exposure, including but not limited to those relating to environmental, social, governance, cybersecurity, data privacy, and artificial intelligence issues; any statements regarding pending litigation, investigations, claims, or disputes; any statements of expectation or belief; and any statements of assumptions underlying any of the foregoing. Risks, uncertainties, and assumptions include the need to address the many challenges facing Hewlett Packard Enterprise's businesses; the competitive pressures faced by Hewlett Packard Enterprise's businesses; risks associated with executing Hewlett Packard Enterprise's strategy; the impact of macroeconomic and geopolitical trends and events, including but not limited to heightened global trade restrictions, the use and development of artificial intelligence and the events described above; the need to effectively manage third-party suppliers and distribute Hewlett Packard Enterprise's products and services; the protection of Hewlett Packard Enterprise's intellectual property assets, including intellectual property licensed from third parties and intellectual property shared with its former parent; risks associated with Hewlett Packard Enterprise's international operations (including from public health crises, such as pandemics or epidemics, and geopolitical events, such as, but not limited to, those mentioned above); the development of and transition to new products and services and the enhancement of existing products and services to meet customer needs and respond to emerging technological trends; the execution of Hewlett Packard Enterprise's ongoing transformation and mix shift of its portfolio of offerings; the execution and performance of contracts by Hewlett Packard Enterprise and its suppliers, customers, clients, and partners, including any impact thereon resulting from macroeconomic or geopolitical events, such as, but not limited to, those mentioned above; the prospect of a shutdown of the U.S. federal government; the hiring and retention of key employees; the execution, integration, consummation, and other risks associated with business combination, disposition, and investment transactions, including but not limited to the risks associated with the disposition of H3C shares and the receipt of proceeds therefrom and completion of our proposed acquisition of Juniper Networks, Inc. and our ability to integrate and implement our plans, forecasts, and other expectations with respect to the consolidated business; the impact of changes to privacy, cybersecurity, environmental, global trade, and other governmental regulations; changes in our product, lease, intellectual property, or real estate portfolio; the payment or non-payment of a dividend for any period; the efficacy of using non-GAAP, rather than GAAP, financial measures in business projections and planning; the judgments required in connection with determining certain financial metrics; utility of segment realignments; allowances for recovery of receivables and warranty obligations; provisions for, and resolution of, pending litigation, investigations, claims, and disputes; the impacts of tax law changes and related guidance or regulations; and other risks that are described herein, including but not limited to the items discussed in Ã Risk FactorsÃ  in Item 1A of Part I of this report and that are otherwise described or updated from time to time in Hewlett Packard Enterprise's Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and in other filings made with the Securities and Exchange Commission. Hewlett Packard Enterprise assumes no obligation and does not intend to update these forward-looking statements, except as required by applicable law.1Table of ContentPART IITEM 1. BusinessWe are a global technology leader focused on developing intelligent solutions that allow customers to capture, analyze and act upon data seamlessly from edge to cloud. We enable customers to accelerate business outcomes by driving new business models, creating new customer and employee experiences, and increasing operational efficiency today and into the future. Our customers range from small-and-medium-sized businesses to large global enterprises and governmental entities. Our legacy dates back to a partnership founded in 1939 by William R. Hewlett and David Packard, and we strive every day to uphold and enhance that legacy through our dedication to providing innovative technological solutions to our customers. We use the terms Ã Hewlett Packard Enterprise,Ã  Ã HPE,Ã  Ã the Company,Ã  Ã we,Ã  Ã us,Ã  and Ã ourÃ  to refer to Hewlett Packard Enterprise Company.Our Strategy Over the last several years, new megatrends around edge, cloud, data, and artificial intelligence (Ã AIÃ ) have emerged to shape customer expectations for enterprise technology. First, data at the edge is increasing exponentially, driven by the proliferation of devices that require secure connectivity to enable reliable digital experiences. Second, enterprises need a cloud experience everywhere to manage data and workloads wherever they live across a distributed enterprise. Third, data growth is creating countless new opportunities to generate meaningful business insights. Finally, HPE is seeing a significant technology shift as customers realize the fundamental potential of AI technology to deliver business transformation. In concert with these trends, enterprises are consuming their technology differently. Increasingly, customers want to digitally transform while preserving capital and eliminating operating expense by paying only for the information technology (Ã ITÃ ) they use. The megatrends are ushering in long-lasting changes to IT, including accelerating hybrid multi-cloud adoption. Customers across industry verticals are interested in unifying all the applications and data with a consistent cloud experience.Customers also want to

better extract value from their growing stores of rapidly evolving data, knowing that actionable insights from data are critical to deliver business transformations. Data is becoming more unstructured, more time-sensitive, and more distributed. Frequently, data is siloed and spread across different multi-generational IT systems, often trapped in critical legacy architecture. Many organizations cannot adequately gain insights from their data at the edge or face cloud migration challenges because of their legacy applications. Customers need a data-first modernization approach across edge to data center to cloud.HPE has deployed an edge-to-cloud strategy that capitalizes on emergent megatrends and delivers a data-first modernization approach for customers. Our vision to be the edge-to-cloud company has led us to innovate our solutions across networking connectivity, cloud, and data, delivered as-a-service (â€œaaSâ€) through the HPE GreenLake cloud. We have shifted our mix of products and services, and how we deliver that mix to customers. HPE has evolved to a platform-based model, fueled by a portfolio richer in software and services. In hybrid cloud, we have redefined the cloud space by delivering an experience that is hybrid by design with our HPE GreenLake cloud as the centerpiece of our strategy; it accelerates multi-generation IT transformation through a unified cloud-native and AI-driven experience that empowers customers to access, analyze, and extract value from their data across public clouds, data centers, colocation facilities, and at the edge. The AI market requires a modern and high-performing networking fabric as a core foundation to deliver a more efficient data-center cloud, which we offer through our AI-driven portfolio of networking solutions. Our server business supports both traditional servers and those meant to enable AI workloads with decades of large-scale infrastructure expertise, including technologies like direct liquid cooling that are powering some of our largest AI systems. Our Financial Services (â€œFSâ€) business complements our solution offerings by helping customers unlock financial capacity. We recognize the AI market will be driven by computational capability, data-intensive workloads, and the need for specialized architecture; thus, we have been targeting, and continue to target three areas: supercomputing, AI infrastructure, and AI platform software. We seek to seize this AI market opportunity by innovating in networking, hybrid cloud and AI â€” which are all essential building blocks to deliver a unified technology experience. We believe that we are differentiated from our competition by our unique and compelling value proposition, which positions us to capture significant value from the growing AI market through our intellectual property portfolio, trusted expertise, and long-term sustained market leadership in supercomputing. The pending acquisition of Juniper Networks, Inc. (“Juniper Networks”) further supports the aforementioned strategies and enables us to execute on them. We believe this acquisition will accelerate our edge-to-cloud vision with a full networking IP stack: from silicon, to infrastructure, to the operating system, to security, to software and services, in a cloud-native and AI-2Table of Contentdriven approach. Furthermore, through this strategic acquisition, we seek to deliver secure, AI-driven networking solutions, which will be foundational to delivering fully integrated hybrid cloud and AI solutions.Our Business Segments, Products and Services Our operations are organized into five reportable business segments: Server, Hybrid Cloud, Intelligent Edge, Financial Services, and Corporate Investments and Other. The class of similar product categories within each segment which accounted for more than 10% of our consolidated net revenue in each of the past three years was as follows:â€¢Fiscal 2024 - Server products, Server services, Intelligent Edge products, Hybrid Cloud productsâ€¢Fiscal 2023 - Server products, Intelligent Edge products, Server services, Hybrid Cloud productsâ€¢Fiscal 2022 - Server products, Server services, Hybrid Cloud products, Intelligent Edge productsThe Company had two distributors which represented approximately 14% and 11% of the Company’s total net revenue in fiscal 2024, primarily within the Intelligent Edge and Server segments. A summary of our net revenue, earnings from operations and assets for our segments can be found in NoteÂ 2, â€¢Segment Information,â€¢to our Consolidated Financial Statements in Item 8 of Part II. A discussion of certain factors potentially affecting our operations is set forth in Item 1A of Part I, â€¢Risk Factors.â€¢ServerOur Server segment offerings consist of general-purpose servers for multi-workload computing and workload-optimized servers to deliver the high performance and value for demanding applications, and integrated systems comprised of software and hardware designed to address high-performance computing and supercomputing (including exascale applications), artificial intelligence, data analytics, and transaction processing workloads for government and commercial customers globally. This portfolio of products includes our secure and versatile HPE ProLiant Rack and Tower servers; HPE Synergy, a composable infrastructure for traditional and cloud-native applications; HPE Scale Up Servers product lines for critical applications, including large enterprise software applications and data analytics platforms; HPE Edgeline servers; HPE Cray EX; HPE Cray XD (formerly known as HPE Apollo); and HPE NonStop. Server offerings also include operational and support services sold with systems and as standalone services. Hybrid CloudThe Hybrid Cloud segment offers a wide variety of cloud-native and hybrid solutions across storage, private cloud and the infrastructure software-as-a-service (â€œSaaSâ€) space. Storage includes data storage and data management offerings with the HPE Alletra Storage portfolio; unstructured data solutions and analytics for AI; data protection and archiving; and storage networking. It also includes AIOps-driven intelligence with HPE InfoSight and HPE CloudPhysics. In private cloud, our Private Cloud Enterprise offerings include new cloud-native offerings and capabilities for virtual machines, containers, and bare metal; a full suite of private cloud offerings that enable customers to self-manage or choose a fully managed experience. In fiscal 2024, we launched a new offering, Private Cloud AI, that captures the emerging enterprise model fine-tuning, retrieval augmented generation and inference markets for AI solutions. Private Cloud AI is fully integrated, standardized offer that has been co-developed with AI market leader Nvidia, with the goal to provide an out of the box solution for enterprise AI. This segment also provides self-service private cloud on-demand with HPE GreenLake for Private Cloud Business Edition. Infrastructure software includes monitoring and observability for day two operations and beyond through our acquisition of OpsRamp and unified data access through our HPE Ezmeral Data Fabric and analytics suite, which helps move and transform data for use in AI and other applications. Hybrid Cloud segment also includes data lifecycle management and protection through our suite of offerings, including Zerto Disaster Recovery. Intelligent EdgeThe Intelligent Edge segment offers wired and wireless local area networks, campus, branch, and data center switching, software-defined wide-area-networks, private and public cellular network software, network security, and associated services that enable secure connectivity for businesses of any size. The HPE Aruba Networking product portfolio includes hardware products such as Wi-Fi access points, switches, and gateways. The HPE Aruba Networking software and services portfolio includes cloud-based management, network management, network access control, software-defined wide-area networking, network security, analytics and assurance, location services software, private and public cellular core software, and professional and support services, as well as aaaS and consumption models through the HPE GreenLake cloud for the Intelligent Edge portfolio of products. Intelligent Edge offerings are consolidated in the edge service platform, which takes a cloud-native approach that provides customers with a unified framework to meet their connectivity, security, and financial needs across campus, branch, data center, and remote worker environments. Upon closing of the pending acquisition of Juniper Networks, we expect to offer an even more comprehensive portfolio of networking solutions.3Table of ContentÂ Financial ServicesFinancial Services (â€œFSâ€) provides flexible investment solutions, such as leasing, financing, IT consumption, utility programs, and asset management services for customers that facilitate unique technology deployment models and the acquisition of complete IT solutions, including hardware, software, and services from Hewlett Packard Enterprise and others. FS also supports financial solutions for on-premise flexible consumption models, such as the HPE GreenLake cloud.Â Corporate Investments and Other Corporate Investments and Other includes the Advisory and Professional Services business, which primarily offers consultative-led services, HPE and partner technology expertise and advice, implementation services as well as complex solution engagement capabilities; the Communications and Media Solutions business, which primarily offers software and related services to the telecommunications industry; and Hewlett Packard Labs, which is responsible for research and development. Our Strengths We believe that we possess a number of competitive advantages that distinguish us from our competitors, including:â€¢Edge-to-cloud strategy and solutions uniquely solve customer challenges. As data grows and evolves, enterprises become increasingly distributed, and customers realize the potential in AI technology, HPEâ€™’s edge-to-cloud strategy is uniquely designed to enable customers to securely access, control, and maximize the value of all their workloads and data assets to accelerate business outcomes. The HPE GreenLake cloud is an open, secure, fully integrated platform that brings a unified experience across the edge, data center, colocation, and cloud. It is automated and easy to consume with capacity available to scale up and down on demand. It offers true pay per use consumption so customers only pay for what they use, and they can have the entire hybrid cloud experience managed for them through our HPE Managed Services offerings.â€¢Comprehensive portfolio. We have a distinctive and industry leading portfolio of edge-to-cloud solutions and capabilities to help accelerate our customers’ digital transformations and help them capture the opportunity that AI presents for their businesses. We combine our software-defined infrastructure and services capabilities to provide what we believe is the strongest portfolio of enterprise solutions in the IT industry. Our ability to deliver a comprehensive IT strategy and connect our customers’ data from edge to cloud, through our high-quality products and high-value consulting and support services in a single package, is one of our principal differentiators.â€¢Differentiated consumption-based IT solutions for a growing opportunity. Enterprises of all sizes are looking to digitally transform in order to develop next-generation cloud-native applications, create actionable insights from their data, and drive business growth, but they face many challenges including lack of in-house IT skills, limited budgets and options for financing, and lack of flexibility to choose the technology foundation that best meets their needs. Consumption-based IT offers solutions to these challenges by providing greater agility, which empowers people to shift from managing infrastructure to driving innovation by leveraging insights from their data, while also eliminating capital and operating expenses tied to infrastructure over-provisioning. HPE is distinctly differentiated in delivering a true consumption-based IT experience. â€¢Open platforms. The world is shifting from centralized and closed approaches in large data centers to a future of centers of data everywhere, which are highly decentralized and distributed. This shift demands a unified cloud platform that can put the agility and intelligence close to customers’â€” data sources to create real-time insights everywhere. We believe the cloud experience should be open and seamless across all our customers’ clouds, rather than requiring customers to be locked into a cloud stack. â€¢Multi-year innovation roadmap and strong balance sheet. We have been in the technology and innovation business for over 80 years. Our vast intellectual property portfolio and global research and development capabilities are part of a broader innovation roadmap designed to help organizations take advantage of the expanding amount of data available and leverage the latest technology developments such as cloud, artificial intelligence, supercomputing, and cybersecurity to drive business transformations now and in the future. We also have a strong balance sheet and liquidity profile that provide the financial flexibility and speed to take advantage of acquisition opportunities.â€¢Global distribution and partner ecosystem. We are experts in delivering innovative technological solutions to our customers in complex multi-country, multi-vendor, and/or multi-language environments. We have expansive go-to-market capabilities, including a large ecosystem of channel partners, which enables us to market and deliver our product offerings to customers located virtually anywhere in the world. Our HPE GreenLake cloud provides open cloud application programming interfaces to our partners, enabling them to better offer their unique solutions to customers. 4Table of Contentâ€¢Custom financial solutions. Through our FS segment, we help customers create investment capacity to accelerate their transformations by helping them free up capital, capture value from older assets, achieve sustainability goals, invest in new technologies aaaS, and weather financial volatility. FS is also an enabler of our consumption-based IT models by helping spread our upfront solution costs over the duration of the customer contract. Through FSâ€™ Technology Renewal Centers, we are helping customers achieve their own sustainability goals by refurbishing technology assets for reuse. â€¢Experienced leadership team. Our management team has an extensive track record of performance and execution. We are led by our President and Chief Executive Officer, Antonio Neri, who has proven experience in developing transformative business models, building global brands, and driving sustained growth and expansion in the technology industry. Mr. Neri’s experience includes more than 25 years combined at HPE and Hewlett-Packard Company (â€œHP Co.â€) in various leadership positions. Our senior management team has many years of experience in our industry and possesses extensive knowledge of and experience in the enterprise IT business and the markets in which we compete. Sales, Marketing, and Distribution We manage our business and report our financial results based on the segments described above. Our customers are organized by commercial and large enterprise groups, including business and public sector enterprises, and purchases of our products, solutions and services may be fulfilled directly by us or indirectly through a variety of partners, including:â€¢Resellers that sell our products and services, frequently with their own value-added products or services, to targeted customer groups;â€¢Distribution partners that supply our solutions to resellers;â€¢Original equipment manufacturers (â€œOEMsâ€)Â that integrate our products and services with their own products and services, and sell the integrated solution;â€¢Independent software vendors that provide their clients with specialized software products and often assist us in selling our products and services to clients purchasing their products;â€¢Systems integrators that provide expertise in designing and implementing custom IT solutions and often partner with us to extend their expertise or influence the sale of our products and services; andâ€¢Advisory firms that provide various levels of management and IT consulting, including some systems integration work, and typically partner with us on client solutions that require our unique products and services.The mix of our business conducted by direct sales or channel differs substantially by business and region. We believe that customer buying patterns and different regional market conditions require us to tailor our sales, marketing, and distribution efforts accordingly. We are focused on driving the depth and breadth of our coverage, in addition to identifying efficiencies and productivity gains, in both our direct and indirect businesses. This has resulted in a combined go-to-market model, in which we have a direct sales presence in a number of countries, while we sell and deliver our products, solutions, and services through a channel-only model in the remaining countries. In those countries where we have a direct sales presence, we follow a bifurcated sales operational model with separate go-to-market routes for high-velocity, transactional hardware sales, on the one hand and for services and solutions, on the other hand. Also, we typically assign an account manager to manage relationships across our business with large enterprise customers as well as with large public sector accounts. The account manager is supported by a team of specialists with product and services expertise. For other customers, our businesses collaborate to manage relationships with commercial resellers targeting smaller accounts, both in the commercial and public sector space.Manufacturing and Materials We utilize a significant number of outsourced and contract manufacturers around the world to manufacture products that we design. The use of outsourced and contract manufacturers is intended to generate cost efficiencies and reduce time to market for our products as well as create manufacturing flexibility in our supply chain and processes. In some circumstances, third-party OEMs produce products that we purchase and resell under our brand. In addition to our use of outsourced and contract manufacturers, we currently manufacture a limited number of finished products from components and subassemblies that we acquire from a wide range of vendors. Historically, we have utilized two primary methods of fulfilling demand for products: building products to order and configuring products to order. We build products to order to maximize manufacturing and logistics efficiencies by producing high volumes of basic product configurations. Alternatively, configuring products to order enables units to match a customer’s particular hardware and software customization requirements. Our inventory management and distribution practices in both building products to order and configuring products to order seek to minimize inventory holding periods by taking delivery of the inventory and manufacturing shortly before the sale or distribution of products to our customers.5Table of ContentWe purchase materials, supplies, and product subassemblies from a substantial number of vendors. For most of our products, we have existing alternate sources of supply or such alternate sources of supply are readily available. However, we do rely on single-source suppliers for certain customized parts (although some of these sources have operations in multiple locations in the event of a disruption) and a disruption or loss of a single-source supplier could delay production of some products. In some instances, our single-source suppliers (e.g., Intel and AMD as suppliers of certain x86 processors) are also the single-source suppliers for the entire market; disruptions with these suppliers would result in industry-wide dislocations and therefore would not disproportionately disadvantage us relative to our competitors.Like other participants in the IT industry, we ordinarily acquire materials and components through a combination of blanket and scheduled purchase orders to support our demand requirements for periods averaging 90 to 120 days. From time to time, we experience significant price volatility or supply constraints for certain components that are not available from multiple sources due to certain events taking place where our suppliers are geographically concentrated. When necessary, we are often able to obtain scarce components for somewhat higher prices on the open market, which may have an impact on our gross margin, but does not generally disrupt production. We also acquire component inventory in anticipation of supply constraints, or enter into longer-term pricing commitments with vendors to improve the priority, price, and availability of supply. See â€¢Risk Factorsâ€ in Item 1A of Part I of this Annual Report on Form 10-K under the heading â€¢We depend on third-party suppliers, and our financial results could suffer if we fail to manage our supplier relationships properly.â€¢We rely on proactive inventory buffering measures in order to position ourselves well for availability of those components. We intend to take additional inventory actions as appropriate in alignment to the market demand, and plan to continue leveraging strong partnerships and long-term agreements with our suppliers.Backlog Backlog represents the price of orders related to current or prior periods for which work has not been performed or goods have not been delivered as of the reporting period. Orders reflected in backlog are subject to adjustment, including as a result of re-bookings, cancellations and fulfillment issues, which may impact backlog. The adverse impact of the global pandemic on the supply chain has moderated, resulting in a more balanced supply-and-demand environment and improved component availability. Challenges in global logistics have mostly normalized despite some uncertainty related to regional conflicts and port labor disputes. Our overall demand pipeline has improved since the beginning of fiscal 2024 as customers have been digesting through their inventory. Even though demand across our AI product portfolio, including for high

performance graphics and accelerated processing units, continues to be somewhat uneven, due to the lumpiness of deals that can cause fluctuations quarter-to-quarter, AI systems demand in the midst of persisting data center space availability constraints continued to drive significant AI backlog. The supply and demand environment for GPUs continues to remain uneven as the market navigates transition to next generation GPUs. These dynamics have resulted in our inventory levels being elevated as compared to the fiscal year ended October 31, 2023, and we are closely monitoring inventory levels as the market navigates a transition to next-generation GPUs. International Our products and services are available worldwide. We believe geographic diversity allows us to meet demand on a worldwide basis for our customers, draws on business and technical expertise from a worldwide workforce, provides stability to our operations, provides revenue streams that may offset geographic economic trends, and offers us an opportunity to access new markets for maturing products. A summary of our domestic and international results is set forth in NoteÂ 2, "Segment Information," to our Consolidated Financial Statements in Item 8 of Part II. Approximately 64% of our overall net revenue in fiscal 2024 came from sales outside the United States. For a discussion of certain risks attendant to our international operations, see "Risk Factors" in Item 1A of Part I of this Annual Report on Form 10-K under the headings "Due to the international nature of our business, political or economic changes and the laws and regulatory regimes applying to international transactions or other factors could harm our future revenue, costs and expenses, and financial condition," and "We are exposed to fluctuations in foreign currency exchange rates." Quantitative and Qualitative Disclosure about Market Risk in ItemÂ 7A of Part II, and NoteÂ 13, "Financial Instruments," to our Consolidated Financial Statements in Item 8 of Part II. Table of Content Research and Development Innovation is a key element of our culture and critical to our success. Our research and development efforts ("R&D") are focused on designing and developing products, services, and solutions that anticipate customers' changing needs and desires and emerging technological trends. Our efforts also are focused on identifying the areas where we believe we can make a unique contribution and where partnering with other leading technology companies will leverage our cost structure and maximize our customers' experiences. Expenditures for R&D were \$2.2 billion in fiscal 2024, \$2.3 billion fiscal 2023, and \$2.0 billion in fiscal 2022. We anticipate that we will continue to have significant R&D expenditures in the future to support the design and development of innovative, high-quality products, services, and solutions to maintain and enhance our competitive position. Included in the R&D work currently taking place at the Company are the following initiatives: In Server, we are developing high-quality next-generation compute solutions that encompass servers, server-attached options, and software, integrating the latest industry technology and aligning with our customers' evolving needs. Furthermore, we are advancing our SaaS capabilities by creating cloud-native, cloud-based server management solutions to enhance our existing portfolio. In the high performance computing and AI sector, our investments are focused on pioneering leadership computing solutions that deliver superior performance and efficiency. These solutions feature leading edge silicon architectures, high-speed interconnects, advanced storage and innovative direct liquid cooling. Our R&D efforts in the realm of AI are particularly robust, with new server solutions designed for AI inference engines and integrated into larger HPE Private Cloud AI for inferencing, retrieval augmented generation, and model fine-tuning. Large-scale model training and tuning, including natural language processing, large language models, and multi-modal training for models with trillions of parameters are supported by our leading AI solutions. These efforts are bolstered by the development of high-performance computing tools, cloud-native and scalable cluster management software, and transaction processing software, which have been instrumental in achieving our milestone of delivering the world's first exascale supercomputer. In Hybrid Cloud, we are investing in a comprehensive portfolio of storage and private cloud technologies and capabilities that are focused on enabling customers to transform through the power of data and AI, modernize their IT infrastructure and simplify hybrid operations, delivering a cloud operational experience via the HPE GreenLake cloud. We continue to invest in the storage portfolio aligned with the customers evolving data and AI needs. We have extended the deployment model from on-premise and cloud-adjacent to include software-defined cloud native deployments in Amazon Web Services. In private cloud, we are developing fully integrated hardware-software offers that simplify day-to-day management, operations and data protection, enables an on-premise public-cloud like experience while addressing security, privacy, governance, and regulatory compliance needs. The investment includes airgapped/disconnected offers and offers for heavy data traffic and latency requirements at the edge. In the AI space, we have invested in building turn-key integrated systems co-engineered with Nvidia that integrate HPE AI hardware and software technologies with Nvidia technologies to radically increase time to value of GenAI capabilities optimized for inferencing, retrieval augmented generation, and model fine-tuning. We have expanded our cloud observability and orchestration capabilities and virtualization options through the acquisitions of OpsRamp (observability) and Morpheus (orchestration), extending our ability to simplify IT complexity in multi-cloud and multi-vendor environments. Finally, we have been rapidly developing an enterprise-grade hypervisor for virtual machines, along with the ability to manage cloud-native applications using containerization, or specialized workload needs with bare metal as a service. In Intelligent Edge, we are investing in a broad portfolio of networking and security capabilities, addressing remote, branch, campus, data center, and cloud use cases. We are expanding our wireless access portfolio to include new Wi-Fi (e.g., Wi-Fi 7) and private cellular (4G, LTE, and 5G) products to complement our existing portfolio. We have expanded our security capabilities with last year's acquisition of Secure Service Edge ("SSE") provider Axis Security and delivering stand-alone SSE, and integrating security with our software-defined wide area network ("SD-WAN") capabilities to deliver a single-vendor Secure Access Services Edge solution. In our Ethernet Switch portfolio, we are investing in new Data Center Networking platforms and features to expand our total addressable market to complement the campus and branch segment. We leverage the HPE GreenLake cloud to provide consistent access to ouraaS capabilities and enable new business models, including network-as-a-service. We also are investing in automation, machine learning, and AI-based network operations to optimize user experience and improve operator efficiency, as exemplified by our cloud-native Aruba Central cloud service, which is expected to provide manageability across our entire portfolio, including Wireless LAN, Ethernet switching, SD-WAN, and security. In Hewlett Packard Labs, we are focused on disruptive innovation and applied research in collaboration with other HPE business groups to deliver differentiated intellectual property. Our innovation agenda is focused on developing technologies in the areas of system architecture, networking, AI, sustainability, edge-to-cloud, quantum computing, and sustainability. We also continue to invest in our silicon design capability to accelerate the development and delivery of our technology. Table of Content For a discussion of risks attendant to our R&D activities, see "Risk Factors" in Item 1A of Part I of this Annual Report on Form 10-K under the heading "We cannot successfully execute our go-to-market strategy, including offering our entire portfolio as aS, our business, operating results, and financial performance may suffer." Patents Our general policy is to seek patent protection for those inventions likely to be incorporated into our products and services or where obtaining such proprietary rights will improve our competitive position. As of OctoberÂ 31, 2024, our worldwide patent portfolio included approximately 13,000 issued and pending patents. Patents generally have a term of up to 20 years from the date they are filed. As our patent portfolio has been built over time, the remaining terms of the individual patents across our patent portfolio vary. We believe that our patents and patent applications are important for maintaining the competitive differentiation of our products and services, enhancing our freedom of action to sell our products and services in markets in which we choose to participate, and maximizing our return on research and development investments. No single patent is in itself essential to our company as a whole or to any of our business segments. In addition to developing our patent portfolio, we license intellectual property from third parties as we deem appropriate. We have also granted and continue to grant to others licenses and other rights under our patents when we consider these arrangements to be in our interest. These license arrangements include a number of cross-licenses with third parties. For a discussion of risks attendant to intellectual property rights, see "Risk factors" in Item 1A of Part I of this Annual Report on Form 10-K under the headings "Our financial performance may suffer if we cannot continue to develop, license or enforce the intellectual property rights on which our businesses depend" and "Our products and services depend in part on intellectual property and technology licensed from third parties." Seasonality From time to time, the markets in which we sell our products, services, and solutions experience weak economic conditions that may negatively affect sales. We experience some seasonal trends in the sale of our products and services. For example, European sales are often weaker in the summer months. See "Risk factors" in Item 1A of Part I of this Annual Report on Form 10-K under the heading "Our uneven sales cycle and supply chain disruptions make planning and inventory management difficult and future financial results less predictable." Competition We have a broad technology portfolio of enterprise IT infrastructure products, solutions, and services which includes ouraaS offerings. We encounter strong competition in all areas of our business. We compete primarily on the basis of technology, innovation, performance, price, quality, reliability, brand, reputation, distribution, range of products and services, ease of use of our products, account relationships, customer training, service and support, security, and the availability of our IT infrastructure offerings. The markets in which we compete are characterized by strong competition among major corporations with long-established positions and a large number of new and rapidly growing firms. Most product life cycles are relatively short, and to remain competitive we must develop new products and services, continuously enhance our existing products and services and compete effectively on the basis of the factors listed above, among others. In addition, we compete with many of our current and potential partners, including OEMs that design, manufacture, and market their products under their own brand names. Our successful management of these competitive partner relationships is critical to our future success. Moreover, we anticipate that we will have to continue to adjust prices on many of our products and services to stay competitive. The competitive environments in which our segments operate are described below: Server business operates in the highly competitive enterprise data center infrastructure market and the markets for data-intensive high performance supercomputing, analytics, and artificial intelligence infrastructure solutions, which are characterized by rapid and ongoing technological innovation. Our primary competitors in data center infrastructure are technology vendors, such as Dell Technologies Inc., Super Micro Computer, Inc., Cisco Systems, Inc., Lenovo Group Ltd. In certain regions, we also experience competition from local companies and from generically branded or "white-box" manufacturers. Our primary competitors in high performance infrastructure include technology vendors that can design and build solutions that deliver performance scalability and connectivity necessary to handle super-compute and AI workloads, including Dell Technologies Inc., Super Micro Computer, Inc., Lenovo Group Ltd., Fujitsu Network Communications, Inc., and Atos Information Technology Incorporated. In our software platform for AI model development and deployment, we both compete and cooperate with cloud service providers and start-up companies that deliver platforms for AI model training, tuning, and inferencing. Our strategy is to deliver superior products, high-value technology support services, and differentiated Table of Content integrated solutions that combine our infrastructure, software, and services capabilities. Our competitive advantages include our broad end-to-end solutions portfolio, supported by our strong intellectual property portfolio and research and development capabilities, coupled with our global reach and partner ecosystem. Hybrid Cloud is our private cloud services solutions business consisting of HPE's GreenLake and Storage solutions, and associated private cloud software offerings. Hybrid cloud solutions enable HPE to take care of the infrastructure, so customers can focus on managing workloads and fostering innovation. Our primary competitors are other infrastructure and cloud management software technology vendors, such as Broadcom/VMware, Cisco Systems Inc., Dell Technologies Inc., IBM, NetApp Inc., Nutanix, and Pure Storage and public cloud vendors like Amazon Web Services, Google Cloud, and Microsoft Azure. Our strategy is to deliver a secure and scalable cloud-like experience across any app or mission-critical workload "traditional or cloud-native. Intelligent Edge operates in the highly competitive networking and connectivity infrastructure market, which is characterized by rapid and ongoing technological innovation and price competition. Our primary competitors are technology vendors, such as Cisco Systems, Inc., Extreme Networks, Inc., Arista Networks Inc, Palo Alto Networks, Fortinet, Juniper Networks, Ruckus Networks, and Ubiquiti and networking-as-a-service vendors such as Nile and Meter. Our strategy is to deliver superior enterprise wired and wireless local-area, wide-area and data-center networking components and software, routing technology, high-value technology support services, and differentiated integrated solutions that combine our infrastructure, software, and services capabilities. Our competitive advantage includes our broad end-to-end solutions portfolio, supported by our strong intellectual property portfolio and research and development capabilities, coupled with our global reach and partner ecosystem. Financial Services. In our financing business, our primary competitors are captive financing companies, such as IBM Global Financing, Dell Financial Services, and Cisco Capital, as well as banks and other financial institutions. Our primary IT Asset Disposition ("ITAD") competitors are ERI, Ingram Micro, Sage Sustainable Electronics, and Sims Recycling Solutions. We believe our competitive advantage over banks, other financial institutions, and ITAD providers is our ability to bring together our investment solutions with our expertise in managing technology assets. Not only are we able to deliver investment solutions that help customers create unique technology deployments based on specific business needs, but we also help them extract value from existing IT investments while more efficiently managing the retirement of those assets. All of these solutions can help customers accelerate digital transformation, create new budget streams, and meet Circular Economy objectives. For a discussion of certain risks attendant to these competitive environments, see "Risk factors" in Item 1A of Part I of this Annual Report on Form 10-K under the heading "We operate in an intensely competitive industry, and competitive pressures could harm our business and financial performance." Human Capital Resources At HPE we are united by our purpose, which is to advance the way people live and work. We believe technology "s greatest promise lies in its potential for positive change. This is the guidepost for each decision we make at HPE. We believe it not only helps guide our contribution to society, but also makes good business sense. Our company strives to be an engine of innovation, and our approximately 61,000 employees as of OctoberÂ 31, 2024, are proud of the ways our technology enables our customers to achieve meaningful outcomes like curing disease, modernizing farming, addressing world-hunger, and democratizing transportation through autonomous vehicles. Our Culture - We recognize the importance of talent and culture to the success of HPE and our ability to fulfill our purpose. We have identified four key cultural beliefs that guide how we lead on a daily basis: accelerating what "s next, bold moves, the "power of yes we can," and being a force for good. We embed these beliefs in a deep-rooted DNA that puts customers first, enabling us to partner, innovate, and act with integrity. HPE has remained committed to its focus on internalizing these values into a vibrant culture that creates a superior team member experience and a highly engaged workforce, driving improvements across our communications, our reward programs, our talent/performance programs, and our work environment. Through such efforts, we aim to foster a collaborative, inclusive, and inspiring experience for all our team members and to make HPE a destination for talent while driving high-performance and growth opportunities for our team members, and innovation and excellence for our customers. In the midst of the above, we continually seek feedback from our team members to better understand and improve their experiences and identify opportunities to continually strengthen our culture. Diversity, Equity, and Inclusion - At HPE, we are committed to cultivating a diverse and inclusive workplace. By fostering a culture where our people can freely contribute their perspectives, ideas, and experiences, we can fuel innovation, drive transformational changes, and be a force for good by harnessing the potential of our technologies and our team members. In 2024, we continued to advance our global approach of enhancing the composition of our workforce, by selecting regional leaders responsible for engaging team members, core human resources professionals, business stakeholders, and external Table of Content partners to identify areas of focus to advance unconditional inclusion. We also expanded our voluntary, and confidential self-identification program, "Count me in. I belong," from the US, Puerto Rico and the U.K. to include Mexico, Brazil, Costa Rica, Colombia and India for the first time. We continue to develop new and inclusive pipelines of talent in science, technology, engineering, and math ("STEM") professions through our dedicated HPE STEM Discovery Program. This program equips and enables HPE team members to serve as STEM education and digital inclusion volunteers in their local communities, exposing learners to cutting-edge technology and raising awareness about careers in technology. The Diversity, Equity, and Inclusion Voice of the Workforce index within our annual global engagement survey continued to reveal strong engagement scores across our ethnically diverse and female team members. Our Board, Chief Executive Officer ("CEO"), and Executive Committee model high standards for our efforts to drive an unconditionally inclusive environment and oversee efforts throughout the Company leadership to continuously develop their inclusive leadership acumen. Talent - We are dedicated to attracting, developing, and retaining top talent through substantial investment. Our commitment extends to all career stages. We establish transparent goals, promote accountability, and continuously evaluate and nurture talent. About 95% of employees engaged in HPE's "My Success Plan" program, which entails quarterly 1:1 conversations with leaders, centered on performance, progress, and career aspirations. The dynamic nature of our industry allows team members to thrive in their current roles while acquiring new skills. Over the past year, our approximately 61,000 team members completed over 821,000 online and instructor-led courses across various categories, including leadership, inclusion and diversity, professional skills, technical training, and compliance. We are particularly focused on identifying and cultivating the next generation of exceptional leaders, emphasizing technical expertise. Our annual talent and succession review, conducted with our CEO and Executive Committee, aims to accelerate talent development, enhance succession pipelines, and improve diversity in our key positions. Pay Equity - We believe people should be paid equitably for what they do and how they do it, regardless of their gender, race, or other personal characteristics. We maintain policies to promote equal pay, and we regularly review our global pay practices with an aim to pay team members in similar roles and locations commensurately with their experience and responsibilities. We partner with independent third-party experts to conduct annual pay assessments and identify unexplained gaps between our present state and our goal of equitable pay treatment for all team members. Where these reviews identify such gaps at a country-wide level, we adjust compensation to eliminate the gap. As

a result of our efforts, our most recent pay equity review demonstrated that we have achieved pay parity for base compensation and bonus targets between male and female team members in the U.S. (including among underrepresented ethnicities), and a dozen additional countries throughout the world, when accounting for job title, time-in-role, experience, and location. We conduct a number of compensation analyses in other countries to provide competitive and equitable pay. Work That Fits Your Life - This global initiative, which was launched in 2019, is an important example of how HPE is investing in our culture and creating a team member experience that aims to make HPE a destination of choice for the best talent in the industry. It includes an industry-leading paid parental leave program (minimum 6 months), part-time work opportunities for new parents or team members transitioning to retirement, and a Wellness Fridaysa that allows team members a full Friday off four times per year to focus on their well-being. The HPE Global Wellness Program is a comprehensive program that promotes overall health and well-being by providing team members with programs and resources that offer flexibility built around team member needs while continuing to deliver on critical business results. The program consists of four pillars: physical health, financial well-being, mental and emotional health, and community well-being. Additionally, we offer a hybrid work environment for the majority of our team members, encouraging two days in the office per week for collaboration.Total Rewards - HPE requires a uniquely talented workforce and is committed to providing total rewards that are market-competitive and performance based, designed to drive innovation and operational excellence. Our compensation programs, practices, and policies reflect our commitment to reward short- and long-term performance that aligns with, and drives stockholder value. Total direct compensation is generally positioned within a competitive range of the market median, with differentiation based on tenure, skills, proficiency, and performance to attract and retain key talent.Board Oversight - Our Board of Directors oversees our human capital management strategy and programs. Our HR and Compensation Committee provides oversight of our human resources and workforce management programs, including but not limited to those related to corporate culture; compensation plans and policies; diversity and inclusion; and talent acquisition, development, and retention.HPEa's strong and healthy culture is critical to accelerating whata's next for our customers and partners a and the success of our company. We believe that a workforce that is energized and more engaged will fuel our ability to pivot and grow, which will, in turn, power the next chapter at Hewlett Packard Enterprise.10Table of ContentEnvironmental Sustainability Living Progress is our business strategy for creating sustainable and responsible IT solutions that meet the technology demands of the future, while advancing the way people live and work. Anchored to our edge-to-cloud offerings and bolstered by our sustainability credentials, our Living Progress strategy provides us with a competitive advantage in the market as we help our customers achieve not only their business objectives, but also their IT sustainability goals. A legacy of sustainability leadership supports talent acquisition and retention and enables ongoing access to global markets. The HPE Board of Directors, including through its committees, provides oversight of our Living Progress strategy, risks, practices, policies, and disclosures, to support integration with our core business strategy. Sustainability performance is a core business discipline within HPE. HPE aims to become a net-zero enterprise by 2040, with interim targets set across our value chain for 2030. These climate targets are approved by the Science Based Target initiative and align with the latest climate science. Our commitment is supported by our Net-Zero Roadmap, which defines the levers we plan to prioritize to enable us to deliver on our near- and long-term carbon emissions reduction targets and outlines key assumptions with respect to our reduction targets.In 2024, the majority of our greenhouse gas emissions resulted from our customers' use of our products and solutions. We recognize the opportunity to innovate technologies for a carbon-constrained world and are committed to delivering products and solutions that empower our customers to reduce the carbon footprints of their IT estates while also gaining maximum productivity from their IT investments and reducing costs. For instance, the latest generation of HPE ProLiant Gen 11 Servers enables customers to consolidate and grow compute capabilities while lowering the cost of power, cooling, floor space, and licensing. To enable market access across the globe and aid customers in selecting more sustainable IT solutions, many of our products are certified by eco-labels such as Electronic Product Environment Assessment Tool, Energy STAR, China SEPA and the China Energy Conservation Program. Supply Chain Responsibility and Human Rights We manage our supply chain to help reduce risk, improve product quality, achieve environmental and social goals, and improve overall performance and value creation for our customers, partners, and suppliers. We are conscious of the importance of the responsible use of our products. In an effort to prevent intended and unintended harm, we continue to consider who purchases our offerings and how they are used by, among other things, limiting features, including responsible use clauses, monitoring for risk of alternate end uses, and promoting deployment of AI with safeguards, such as user training and ongoing checks and refinement to mitigate bias and improve accuracy.Human rights principles are embedded in how we do business, and we are committed to holding our entire value chain to high ethical standards that respect such principles. We have processes in place to enable the early detection of forced labor and have implemented due diligence procedures to monitor and help prevent human rights violations or abuses at our suppliers and in our operations. Additionally, through our Responsible Minerals Program, we work to advance the responsible sourcing of minerals used in our products and within our supply chain.Our commitment to diversity, equity, and inclusion extends beyond our workforce and to our suppliers, as well. We believe a diverse supply chain and equity in sourcing not only creates opportunities for underrepresented and underserved communities, but also contributes to the resiliency of our supply chain and of our communities.We are also committed to the responsible and ethical development and deployment of new technologies to advance how we live and work, and we continue to build on our existing responsible development work, particularly in relation to AI. We have an executive level AI Ethics Responsibility Committee and an operational AI Ethics Working Group, through which we aim to align the development, deployment, and use of AI with HPE's AI Ethical Principles, promoting privacy-enabled and secure, human focused, inclusive, robust, and responsible use of AI. In 2022, we refined our approach to assessing ethical AI and rolled out AI Ethical Principles training. In 2023, we further advanced this initiative by launching three new sub-committees to help us operationalize our principles for: Products (AI we develop), Processes (AI we source to use), and Partnerships (AI we source to incorporate into our solutions). In 2024, we rolled out a broader AI Governance model and developed tools to drive efficiency in the AI ethics assessment process.While the HPE Board of Directors and all of its committees take an integrated, rather than siloed, approach to providing oversight of Living Progress matters, including environmental sustainability, supply chain responsibility, and human rights, our Nominating, Governance and Social Responsibility Committee is primarily responsible for oversight of our broader Living Progress strategy, initiatives, risks, and policies.11Table of ContentMaterial Government Regulations Our business activities are subject to various federal, state, local, and foreign laws and our products and services are governed by a number of rules and regulations. Costs and accruals incurred to comply with these governmental regulations are presently not material to our capital expenditures, results of operations and competitive position. Although there is no assurance that existing or future government laws applicable to our operations, services or products will not have a material adverse effect on our capital expenditures, results of operations and competitive position, we do not currently anticipate material expenditures for government regulations. Nonetheless, as discussed below, we believe that global trade and certain environmental regulations could potentially materially impact our business.Environment Our products and operations are, or may in the future be, subject to various federal, state, local, and foreign laws and regulations concerning the environment, including, among others, laws addressing the discharge of pollutants into the air and water; supply chain due diligence, and sustainability, environment and emissions-related reporting; the management, movement, and disposal of hazardous substances and wastes and the clean-up of contaminated sites; product compliance and safety, such as reparability, chemical composition, packaging and labeling; energy consumption of our products and services; and the manufacture and distribution of chemical substances. We proactively evaluate, and at times replace materials in our products and supply chain, taking into account, among other things, published lists of substances of concern, new and upcoming legal requirements, customer preferences and scientific analysis that indicates a potential impact to human health or the environment. We are also subject to legislation in an increasing number of jurisdictions that makes producers of electrical goods, including servers and networking equipment, subject to certain reparability requirements or financially responsible for specified collection, recycling, treatment, and disposal of past and future covered products (sometimes referred to as a product take-back legislationa). We are also subject to standards set by public and private entities related to sustainability issues such as energy consumption, carbon emissions, reusing or recycling. Finally, as climate change and other environmental-related laws, regulations, treaties, and similar initiatives and programs are adopted and implemented throughout the world, we will be required to comply or potentially face market access limitations or other sanctions, including fines. In the event our products are impacted by these laws or standards, our products could be restricted from entering certain jurisdictions or from being procured by certain governments or private companies, and we could face other sanctions, including fines. However, we believe that technology will be fundamental to finding solutions to achieve compliance with and manage those requirements, and we are collaborating with industry, business groups and governments to find and promote ways that our technology can be used to address climate change and other environmental-related issues, and to facilitate compliance with related laws, regulations and treaties. We are committed to maintaining compliance with all environmental and environmental-related laws applicable to our operations, products and services, and to reducing our environmental impact across all aspects of our business. We support this commitment with a range of comprehensive policies, including relating to environmental, health and safety, climate, water, and electronic waste; a strict environmental management of our operations and worldwide environmental programs and services; an extensive supply chain responsibility program; and an approach to ethical standards and strong governance that are the foundations of our business.Global Trade As a global company, the import and export of our products and services are subject to laws and regulations including international treaties, U.S. export controls and sanctions laws, customs regulations, and local trade rules around the world. Such laws, rules, and regulations may delay the introduction of some of our products or impact our competitiveness through restricting our ability to do business in certain places or with certain entities and individuals, or the need to comply with domestic preference programs, laws concerning transfer and disclosure of sensitive or controlled technology or source code, unique technical standards, localization mandates, and duplicative in-country testing and inspection requirements. The consequences of any failure to comply with domestic and foreign trade regulations could limit our ability to conduct business globally. We continue to support open trade policies that recognize the importance of integrated cross-border supply chains that will continue to contribute to the growth of the global economy and measures that standardize compliance for manufacturers to ensure that products comply with safety and security requirements. For a discussion of the risks associated with government regulations that may materially impact us, see aRegulatory and Government Risksa within aRisk Factorsa in Item 1A of Part I. Additional InformationThis Annual Report on Form 10-K may include trademarks and trade names owned by other parties, and all other such trademarks and trade names mentioned in this Annual Report on Form 10-K are the property of their respective owners.12Table of ContentInformation about our Executive Officers The following are our current executive officers:NameAgePositionAntonio Neri57President and Chief Executive OfficerMarie Myers56Executive Vice President, Chief Financial OfficerJohn F. Cox47Senior Vice President, Corporate Controller, Chief Tax Officer, and Principal Accounting Officer Kirt P. Karros55Senior Vice President, Treasurer and Financial Planning & AnalysisAntonio Neri; President and Chief Executive OfficerMr.A Neri has served as our President and Chief Executive Officer since June 2017 and February 2018, respectively. Previously, he served as Executive Vice President and General Manager of our Enterprise Group from November 2015 to June 2017. Prior to that, Mr.A Neri served in a similar role for HP Co.'s Enterprise Group from October 2014 to November 2015. Mr.A Neri served as Senior Vice President and General Manager of the HP Servers business unit from September 2013 to October 2014 and concurrently as Senior Vice President and General Manager of the HP Networking business unit from May 2014 to October 2014. Prior to that, he served as Senior Vice President and General Manager of the HP Technology Services business unit from August 2011 to September 2013 and as Vice President, Customer Services for the HP Personal Systems Group from 2007 to August 2011, having first joined HP Co. in 1996. Since December 2017, Mr. Neri has served as a director of Elevance Health, Inc. (formerly Anthem, Inc.), a health insurance provider in the U.S. Marie Myers; Executive Vice President, Chief Financial OfficerMs.A Myers has served as our Executive Vice President, Chief Financial Officer since January 2024, responsible for leading all aspects of our finance and strategy organizations. She partners closely with the CEO to develop and execute the long-term strategy for the Company. Prior to that, she served as the Chief Financial Officer of HP Inc. from February 2021 to January 2024, as well as numerous other leadership positions at HP Inc.: Interim Chief Financial Officer from October 2020 to February 2021, Chief Transformation Officer from June 2020 to February 2021, and Chief Digital Officer from March 2020 to October 2020. Prior to that, she served as Chief Financial Officer of UiPath, Inc., a robotic process automation company, from December 2018 to December 2019.John F. Schultz; Executive Vice President, Chief Operating and Legal OfficerMr.A Schultz has served as our Executive Vice President, Chief Operating and Legal Officer since July 2020, responsible for overseeing all aspects of our operations and shaping our operational strategies. Prior to that, he served as Executive Vice President, Chief Legal and Administrative Officer and Secretary from December 2017 to July 2020 and as Executive Vice President, General Counsel and Secretary from November 2015 to December 2017, performing a similar role at HP A Co. from April 2012 to November 2015. Prior to that, Mr. Schultz served as Deputy General Counsel for Litigation, Investigations and Global Functions at HP A Co. from September 2008 to April 2012 and as a partner in the litigation practice at Morgan, Lewis & Bockius A LLP, a law firm, where, among other clients, he supported HP A Co. as external counsel on a variety of litigation and regulatory matters.Kristin Major; Executive Vice President and Chief People OfficerMs.A Major has served as our Executive Vice President, Chief People Officer since February 2024, leading the global HR function, driving business growth and transformation through employee engagement; performance-led talent management; comprehensive rewards; and culture development. Prior to that, she served as Chief Talent Officer from March 2023 to January 2024, as Senior Vice President, Human Resources from January 2020 to March 2023, and as Senior Vice President, Deputy General Counsel of Global Functions and Security from December 2011 until January 2020. Before joining Hewlett Packard 13Table of ContentEnterprise, she served as a counsel in the labor and employment practice at Skadden, Arps, Slate, Meagher & Flom LLP, a law firm. Gerri A. Gold; Executive Vice President, President and Chief Executive Officer, HPE Financial ServicesMs. Gold has served as Executive Vice President, President and Chief Executive Officer of HPE Financial Services since February 2023. In this role, she leads HPE Financial Services, the global financing and asset managementA organization that supports HPEa's edge-to-cloud strategy, and helps customers and partners accelerate their transformation. From May 2018 to February 2023, she served as the Senior Vice President and Chief Operating Officer of HPE Financial Services, and from AugustA 2015 to May 2018, as the Vice PresidentA Global Accounts, Sales, Marketing and Managing Director Asset Management of HPE Financial Services. Fidelm Russo; Executive Vice President, General Manager of Hybrid Cloud and Chief Technology OfficerMs. Russo has served as our Executive Vice President, General Manager of our Hybrid Cloud business segment, and Chief Technology Officer since November 2023. Prior to that, Ms. Russo served as Executive Vice President, Chief Technology Officer from September 2021 to October 2023. Prior to joining Hewlett Packard Enterprise, Ms. Russo was Senior Vice President and General Manager of the Cloud Services business unit at VMware from May 2020 to September 2021 and the Chief Technology Officer and Executive Vice President of Global Technology & Operations at Iron Mountain, Inc. from March 2017 to May 2020. Additionally, Ms. Russo has served on the board of directors at Equinix, Inc. as a member of its audit committee since 2022. Neil B. MacDonald; Executive Vice President, General Manager of ServerMr. MacDonald has served as Executive Vice President and General Manager of our Server business since February 2024, responsible for overseeing the day-to-day operations and shaping the strategy of the Server business unit. Prior to that, he served as Executive Vice President and General Manager of our Compute business from March 2022 to January 2024, as Senior Vice President and General Manager of our Compute business from February 2020 to March 2022, and as Senior Vice President and General Manager of the Compute Solutions group of the then Hybrid IT business segment, from November 2018 to February 2020. Philip J. Mottram; Executive Vice President, General Manager of Intelligent EdgeMr. Mottram has served as Executive Vice President and General Manager of our Intelligent Edge business since March 2022. Previously, he served as the President of our Intelligent Edge business from June 2021 to March 2022. Prior to that, Mr. Mottram served as Senior Vice President and General Manager of the Communications Technology Group from April 2019 to June 2021. Before joining Hewlett Packard Enterprise, he served as the Chief Revenue Officer of Zayo Group, a communications infrastructure provider, from November 2017 to February 2019, where he was responsible for all customer-facing functions. Prior to that, Mr. Mottram served as Director of the Enterprise Business Unit of Vodafone from May 2014 to November 2017, the Chief Executive Officer of Hong Kong CSL from September 2012 to May 2014, and Executive Director of Global Sales at Telstra International from September 2010 to September 2012, as well as a variety of different operational roles at other telecommunications companies.Jeremy K. Cox; Senior Vice President, Corporate Controller, Chief Tax Officer, and Principal Accounting Officer Mr. Cox has served as our Senior Vice President, Corporate Controller, Chief Tax Officer, and Principal Accounting Officer since January 2024. Prior to that, he served as Senior Vice President, Interim Chief Financial Officer, Corporate Controller, Chief Tax Officer, and Principal Accounting Officer from August 2023 to January 2024, as Senior Vice President, Corporate Controller, Chief Tax Officer, and Principal Accounting Officer from July 2022 to August 2023, as Senior Vice

President, Global Tax and Head of Products and Services Finance from May 2021 to July 2022, and as Senior Vice President, Global Tax, Financial Planning and Analysis, and Global Functions Finance from November 2018 to May 2021, among numerous other leadership positions. Prior to joining HP Inc. in 2008, Mr. Cox was Senior Tax Counsel for Electronic Data Systems. Kurt P. Karros; Senior Vice President, Treasurer and Financial Planning & AnalysisMr. A Karros has served as our Senior Vice President, Treasurer and Financial Planning & Analysis since March 2024, responsible for all treasury operations and overseeing financial planning and strategy for HPE and our business units. Prior to that, he served as Senior Vice President, Treasurer and Investor Relations from May 2022 to March 2024, overseeing all treasury and investor relations-related activities. Previously, he served as our Senior Vice President, Finance and Treasurer from November 2015 to May 2022. Prior to that, Mr. A Karros served in a similar role at HPA Co., leading its treasury and investor relations functions.14Table of ContentAvailable InformationOur website is located at www.hpe.com. Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to reports filed or furnished pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended, are available on our website at http://investors.hpe.com, as soon as reasonably practicable after we electronically file such reports with, or furnish those reports to, the Securities and Exchange Commission. Hewlett Packard Enterprise's Corporate Governance Guidelines, Board of Directors' committee charters (including the charters of the Audit Committee, Finance and Investment Committee, HR and Compensation Committee, Technology Committee, and Nominating, Governance and Social Responsibility Committee) and code of ethics entitled "Standards of Business Conduct" are also available at that same location on our website. Risk Factors. You should carefully consider the following risks and other information in this Form 10-K in evaluating Hewlett Packard Enterprise. Any of the following risks could materially and adversely affect our results of operations or financial condition. The following risk factors should be read in conjunction with Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the Consolidated Financial Statements and related notes in Part II, Item 8, "Financial Statements and Supplementary Data" of this Form 10-K.Risk Factors SummaryThe following is a summary of the principal risks that could adversely affect our business, operations, and financial results. Business and Operational Risks If we cannot successfully execute our go-to-market strategy, including offering our entire portfolio as-a-Service, our business, operating results, and financial performance may suffer. We depend on third-party suppliers, and our financial results could suffer if we fail to manage our supplier relationships properly. System security risks, data protection incidents, cyberattacks and systems integration issues could disrupt our internal operations or IT services provided to customers, and any such disruption could reduce our revenue, increase our expenses, damage our reputation, and adversely affect our stock price. Business disruptions could seriously harm our future revenue and financial condition and increase our costs and expenses. Failure to complete the Merger with Juniper Networks may adversely affect our business and our stock price. Failure to realize the benefits expected from the Merger with Juniper Networks could adversely affect our business or our stock price. Any failure by us to identify, manage, and complete acquisitions and subsequent integrations, divestitures, and other significant transactions successfully could harm our financial results, business and prospects. If we cannot continue to produce quality products and services, our reputation, business, and financial performance may suffer. In order to be successful, we must attract, retain, train, motivate, develop, and transition key employees, and failure to do so could seriously harm us. If we fail to manage the distribution of our products and services properly, our business and financial performance could suffer. Issues in the development and use of artificial intelligence may result in reputational harm, liability or impact to our results of operations. Changes in the macroeconomic environment have, at times, impacted and may in the future negatively impact our results of operations. Failure to meet responsible and sustainable business expectations or standards or achieve our Living Progress goals could adversely affect our business, results of operations, financial condition, or stock price. Risks arising from climate change and the transition to a lower-carbon economy may impact our business. Industry Risks We operate in an intensely competitive industry, and competitive pressures could harm our business and financial performance. International Risks Due to the international nature of our business, political or economic changes and the laws and regulatory regimes applying to international transactions or other factors could harm our future revenue, costs and expenses, and financial condition. We are exposed to fluctuations in foreign currency exchange rates. Intellectual Property Risks 16Table of ContentOur financial performance may suffer if we cannot continue to develop, license, or enforce the intellectual property rights on which our businesses depend. Our products and services depend in part on intellectual property and technology licensed from third parties. Third-party claims of intellectual property infringement, including patent infringement, are commonplace in our industry and successful third-party claims may limit or disrupt our ability to sell our products and services. Financial Risks Adverse developments affecting our liquidity, capital position, borrowing costs, and access to capital markets could adversely impact our business, financial condition, and results of operations or those of the third parties with whom we do business. Our debt obligations may adversely affect our business and our ability to meet our obligations and pay dividends. The revenue and profitability of our operations have historically varied, which makes our future financial results less predictable. Our uneven sales cycle and supply chain disruptions make planning and inventory management difficult and future financial results less predictable. We make estimates and assumptions in connection with the preparation of our Consolidated Financial Statements and any changes to those estimates and assumptions could adversely affect our results of operations. Declaration, payment and amounts of dividends, if any, to holders of our shares will be uncertain. Regulatory and Government Risks Our business is subject to various federal, state, local and foreign laws and regulations that could result in costs or other sanctions that adversely affect our business and results of operations. Contracts with federal, state, provincial, and local governments are subject to a number of challenges and risks that may adversely impact our business. Unanticipated changes in our tax provisions, the adoption of new tax legislation or exposure to additional tax liabilities could affect our financial performance. Risks Related to Prior Separations The stock distribution in either or both of the completed separations of our former Enterprise Services business and our former Software segment could result in significant tax liability, and DXC Technology Company or Micro Focus International plc (as applicable) may in certain cases be obligated to indemnify us for any such tax liability imposed on us. We continue to face a number of risks related to our separation from HP Inc., our former parent, including those associated with ongoing indemnification obligations, which could adversely affect our financial condition and results of operations, and shared use of certain intellectual property rights, which could in the future adversely impact our reputation. General Risks Our stock price has fluctuated and may continue to fluctuate, which may make future prices of our stock difficult to predict. For a more complete discussion of the material risks facing our business, see below. Business and Operational Risks If we cannot successfully execute our go-to-market strategy, including offering our entire portfolio as-a-Service, our business, operating results, and financial performance may suffer. Our long-term strategy is focused on leveraging our portfolio of hardware, software, and services as we deliver global edge-to-cloud platform as-a-service to help customers accelerate outcomes by unlocking value from all of their data, everywhere. We provide our entire portfolio through a range of subscription and consumption-based, pay-per-use, and aaaS offerings. We will also continue to provide our hardware and software in a capital expenditure and license-based model, giving our customers choices in consuming HPE products and services. Furthermore, subject to our anticipated consummation of the acquisition of Juniper Networks, Inc. (the "Merger"), we will seek to offer secure, unified cloud- and AI-native networking to enhance innovation across edge to cloud. To successfully execute on these strategic pillars, we will continue to improve cost structures, align sales coverage with strategic goals, improve channel execution, and strengthen our capabilities in our areas of strategic focus, while continuing to pursue new product innovation that builds on our strategic 17Table of Contentcapabilities in areas such as edge computing, hybrid cloud, artificial intelligence, data center networking, network security, and high-performance compute. We must make sufficient long-term investments in strategic growth areas, such as developing, obtaining, and protecting appropriate intellectual property, and commit or transition significant R&D and other resources before knowing whether our projections will reasonably reflect customer demand for our solutions. Should such efforts fail to produce actionable insights, or our offerings not perform as designed or promised, our business results and financial condition may be adversely affected. Furthermore, such incremental capital requirements may negatively impact cash flows in the near term and may require us to dedicate additional resources, including sales and marketing costs. The process of improving our HPE GreenLake cloud offerings, enhancing existing hardware, software, and cloud-based solutions, and developing and improving the systems necessary for new and evolving data-intensive artificial intelligence-based workloads are all complex, costly, and uncertain, and any failure by us to anticipate customers' changing needs and emerging technological trends accurately, to invest sufficiently in strategic growth areas, or to otherwise successfully execute this strategy could significantly harm our market share, results of operations, and financial performance. Having developed a cloud platform product in HPE GreenLake and the hardware capabilities to support artificial intelligence computing, we must be able to continue integrating new features that are relevant to our customers and to scale quickly, while also managing costs and preserving margins, which means accurately forecasting volumes, mixes of products, and configurations that meet customer requirements, which we may not succeed at doing. These offerings face competition from peer companies with their own cloud platform and artificial intelligence computing offerings, and any delay in the development, production, or marketing of a new product, service, or solution could result in our offerings being late to reach the market, which could harm our competitive position. In addition, should we successfully consummate the Merger, the process of integrating and streamlining our offerings (including integrating Juniper Networks' offerings with ours) or developing new solutions based on our respective technological portfolios may be complex, costly, time-consuming, and uncertain, and failure by us to successfully do so could adversely impact our future results of operations and financial performance. Furthermore, we anticipate needing to adapt our go-to-market structure from time to time with new sales and marketing approaches, to better align with aaaS business models and to capture unique market opportunities, such as in hybrid cloud and artificial intelligence. Changing our go-to-market structure may affect employee compensation models and ultimately our ability to retain employees. There is no assurance that we will be able to implement these adjustments in a timely or cost-effective manner, or that we will be able to realize all or any of the expected benefits from them. Our HPE GreenLake solutions generally are multiyear agreements, which result in recurring revenue streams over the term of the arrangement. As customer demand for our aaaS offerings increases, we have experienced, and will continue to experience, differences in the timing of revenue recognition between our traditional offerings (for which revenue is generally recognized at the time of delivery) and our aaaS offerings (for which revenue is generally recognized ratably over the term of the arrangement). As such, our financial results and growth depend, in part, on customers continuing to purchase our services and solutions over the contract life on the agreed terms. Additionally, implementing this business model also means that our historical results, especially those from before the transition, may not be indicative of future results, which may adversely affect our ability to accurately forecast our future operating results. Our aaaS offerings also could subject us to increased risk of liability related to the provision of services as well as operational, technical, legal, regulatory, or other costs. We depend on third-party suppliers, and our financial results could suffer if we fail to manage our supplier relationships properly. Our operations depend on our ability to anticipate our needs for components, products, and services, as well as our suppliers' abilities to deliver sufficient quantities of quality components, products, and services at reasonable prices and in time for us to meet critical schedules for the delivery of our own products and services. Given the wide variety of solutions that we offer, the large and diverse distribution of our suppliers and contract manufacturers, and the long lead times required to manufacture, assemble, and deliver certain solutions, problems have, from time to time in the past, arisen, and could in the future arise, in production, planning, and inventory management that could harm our business. In addition, our ongoing efforts to optimize the efficiency of our supply chain could cause supply disruptions and be more expensive, time-consuming, and resource-intensive than expected. Furthermore, certain of our suppliers have at times decided, and may in the future decide, to discontinue conducting business with us. Other supplier problems that we have faced, and could again face in the future, include component shortages, excess supply, and contractual, relational, and labor risks, each of which is described below. Component shortages. We have in the past experienced, and may experience again in the future, delays and shortages of certain components as a result of strong demand, supplier transitions, raw material or capacity constraints, and other problems experienced by suppliers in certain geographies and markets, resulting in insufficient supply to meet total market demand. In the past, we have experienced shortages or delays, which led to higher prices of certain components and exposure to quality issues and delivery delays, which may occur again in the future. We may not be able to secure enough components at reasonable prices, of acceptable quality, or at all, to build products or provide services in a timely manner in the quantities needed or according to our specifications. Accordingly, our business and financial performance could suffer from a loss of time-sensitive sales, additional freight costs incurred, or the inability to pass 18Table of Contenton price increases to our customers. If we cannot adequately address supply issues, we may have to reengineer some product or service offerings, which could result in further costs and delays. Excess supply. In order to secure components for our products or services, at times we may make advance payments to suppliers or enter into long term agreements, non-cancellable commitments, or other inventory management arrangements with vendors. In addition, we may purchase components strategically in advance of demand to take advantage of favorable pricing or to address concerns about the availability of future components. If we fail to anticipate customer demand properly, a temporary oversupply can result in excess or obsolete components (which has happened at times in the past), which has at times adversely impacted and could in the future adversely impact our business and financial performance. Contractual terms. As a result of binding long-term price or purchase commitments with vendors, we may be obligated to purchase components or services at prices that are higher than those available in the current market and be limited in our ability to respond to changing market conditions. If we commit to purchasing components or services for prices in excess of the then-current market price, we may be at a disadvantage to competitors who have access to components or services at lower prices, our gross margin could suffer, and we could incur charges relating to inventory obsolescence. Contingent workers. We also rely on third-party suppliers for the provision of contingent workers, and our failure to manage our use of such workers effectively could adversely affect our results of operations. We have been exposed to various legal claims relating to the status of contingent workers in the past and could face similar claims in the future. We may be subject to shortages, oversupply or fixed contractual terms relating to contingent workers. Our ability to manage the size and cost of our contingent workforce may be subject to additional constraints imposed by local laws. Single-source suppliers. We obtain certain components from single-source suppliers due to technology, availability, price, quality, scale, or customization needs. Certain of such suppliers have, in the past decided, and may in the future decide, to discontinue manufacturing components used in our products, which may cause us to discontinue certain products, incur additional costs to redesign our products so as not to incorporate such discontinued components, or incur time and expense to find replacement suppliers. Replacing a single-source supplier has at times delayed, and could delay, production of some products as replacement suppliers may initially be unable to meet demand or be subject to other output limitations. For some components, such as customized components, alternative sources either may not exist or may be unable to produce the quantities of those components necessary to satisfy our production requirements. In addition, we sometimes purchase components from single-source suppliers under short-term agreements that contain favorable pricing and other terms but that may be unilaterally modified or terminated by the supplier with limited notice and with little or no penalty. The performance of such single-source suppliers under those agreements (and the renewal or extension of those agreements upon similar terms) may affect the quality, quantity, and price of our components. The loss of a single-source supplier, the deterioration of our relationship with a single-source supplier, or any unilateral modification to the contractual terms under which we are supplied components by a single-source supplier could adversely affect our business and financial performance. System security risks, data protection incidents, cyberattacks and systems integration issues could disrupt our internal operations or IT services provided to customers, and any such disruption could reduce our revenue, increase our expenses, damage our reputation, and adversely affect our stock price. As a leading technology firm, we are exposed to attacks from criminals, nation state actors, malicious insiders, and activist hackers (collectively, "malicious parties") who have at times been able to circumvent or bypass our cyber security measures. Although some of these attacks have caused disruptions or exposure of information, so far, these attacks have not resulted in material negative impacts to HPE, nor have any of HPE's consumers, customers, or employees informed HPE that these attacks resulted in material harm to them. While we investigate and remediate incidents, there can be no assurance that we will do so comprehensively or that the threat actor will not identify alternative means of intrusion or opportunities to otherwise utilize the information it accessed to adversely affect our business or results of operations. It is also possible that incidents may embolden other malicious actors to perpetrate future attacks that may result in material misappropriation, system disruptions or shutdowns, malicious alteration, or destruction of our confidential or personal information or that of third parties. Further, there has been an increase in the frequency and sophistication of such attacks, and we expect these activities to continue to increase, including malicious actors potentially leveraging AI to develop malicious code or sophisticated phishing attempts. Malicious parties may also be able to otherwise develop and deploy viruses, worms, ransomware, and other malicious software programs that attack our products or otherwise exploit any security vulnerabilities of our products, including within our cloud-based environments and offerings, such that we may be unable to anticipate such

malicious parties’ techniques, implement adequate preventative measures, or remediate any intrusion on a timely or effective basis even if our security measures are appropriate, reasonable, and comply with applicable legal requirements. Further, cyberattacks or incidents have in the past gone, and could in the future go, undetected in our environments for a period of time, and we may discover additional impacts of earlier incidents that we believe were remediated. For example, as previously disclosed in our Form 8-K filed with the Securities and Exchange Commission on January 24, 2024, we learned in December 2023 that, beginning in May 2023, a nation-state-19Table of Contentassociated threat actor gained unauthorized access to and exfiltrated data from HPE’s cloud-based email and SharePoint environments. While this incident has been investigated and remediated with no material impact experienced by HPE to date, this may have nevertheless resulted in harm to our reputation and customer relationships (and may do so in the future, as well), and there can be no assurance that the threat actor will not utilize the information accessed to adversely affect our business or results of operations. Given our broad and diverse network environment, resource limitations, and operational constraints, we have in the past failed, and may in the future fail, to patch certain security vulnerabilities in time to prevent successful disruptions of our infrastructure or exposure of information. Malicious parties may compromise our manufacturing supply chain and the systems or networks of other third parties on whom we rely, and as such, may embed malicious software or hardware in our products, thereby compromising our customers. Geopolitical tensions or conflicts, such as the ongoing conflicts between Russia and Ukraine or in the Middle East, may heighten the risk of such cyberattacks or exacerbate system vulnerabilities, considering our continued hybrid work environment and our globally dispersed operations, employees, contractors, suppliers, developers, partners, and other third parties. In addition, sophisticated hardware and operating system software and applications that we produce, procure or integrate from third parties, including those of companies we have acquired, may contain defects in design or manufacturing, including flaws that could unexpectedly interfere with the operation of the system. The costs associated with cybersecurity tools and infrastructure and competition for cybersecurity and IT talent have at times limited, and may in the future limit, our ability and the ability of third parties on whom we rely to efficiently identify, eliminate, or remediate cyber or other security vulnerabilities or problems or enact changes to minimize the attack surface of our network. Furthermore, our efforts, and the efforts of third parties on whom we rely, to address these problems, at times, have not been, and may in the future not be successful and could result in interruptions, delays, cessation of service, compromise of sensitive information, and loss of existing or potential customers, any of which may impede our sales, manufacturing, distribution or other critical functions. Additional impacts from cybersecurity incidents could include reimbursement of remediation costs to our customers, suppliers, or distributors, such as liability for stolen assets or information, repairs of system damage, and incentives for continued business; lost revenue resulting from the unauthorized use of proprietary information or the failure to retain or attract business partners following an incident; increased insurance premiums; and damage to our competitiveness, stock price, and long-term shareholder value. Further, it may be difficult to determine the best way to investigate, mitigate, contain, and remediate any harm caused by a cybersecurity incident. Such efforts may not be successful, and we may make errors or fail to take necessary actions. It may take considerable time for us to investigate and evaluate the full impact of incidents, particularly for sophisticated attacks. These factors may inhibit our ability to provide prompt, full, and reliable information about the incident to our customers, partners, regulators, and the public. Additionally, to the extent we carry insurance coverage for such possibilities, we cannot be certain that any such coverage will be adequate or otherwise protect us with respect to claims, expenses, fines, penalties, business loss, data loss, litigation, regulatory actions, or other impacts arising from security breaches or incidents, or that such coverage will continue to be available on acceptable terms or at all. We manage and store various proprietary information, intellectual property, and sensitive or confidential data relating to our business. In addition, our business may process, store, and transmit customer data, including commercially sensitive, government-related, and/or personal data, subject to the European General Data Protection Regulation, United Kingdom General Data Protection Regulation, and various U.S. state and foreign data security and privacy laws, which give new data privacy rights to their residents and impose significant obligations related to the handling of personal data. Compliance with data security and privacy laws is complex and costly. With our business increasingly providing aaS offerings, malicious parties could target such services, potentially resulting in an increased risk of compromise of customer or employee data resulting in regulatory exposure. Incidents involving our cyber or physical security measures or the accidental loss, inadvertent disclosure, or unapproved dissemination of proprietary information, intellectual property, or sensitive, confidential, or personal data about us, our clients, or our customers, including the potential loss or disclosure of such data as a result of fraud or other forms of deception, could expose us, our customers, or the individuals affected to a risk of loss or misuse of this information; result in regulatory fines, litigation, and potential liability for us; damage our brand and reputation; or otherwise harm our business. We also could lose existing or potential customers of services or other IT solutions or incur significant expenses in connection with our customers’ system failures or any actual or perceived security vulnerabilities in our products and services. In addition, the cost and operational consequences of managing an incident and implementing further data protection measures could be significant. Additionally, we have at times experienced, and may experience, other security issues that are not the results of any action or attack from malicious parties, whether due to employee or insider error or malfeasance, system errors or vulnerabilities in our or other parties’ systems. Portions of our IT infrastructure also have experienced, and may experience, interruptions, delays, or cessations of service or produce errors in connection with systems integration or migration work that takes place from time to time. As our IT environment continues to evolve, we have, at times, been unsuccessful, and may in the future be unsuccessful, in adopting or implementing new systems and transitioning data, which could cause business disruptions and be more expensive, time-consuming, disruptive, and resource intensive. Furthermore, our data centers depend on predictable and reliable energy and networking capabilities, the cost or availability of which could be adversely affected or 20Table of Contentdisrupted by a variety of factors, including but not limited to the effects of climate change. Such disruptions could adversely impact our ability to fulfill orders and respond to customer requests and interrupt other processes. Delayed sales, lower margins, or lost customers resulting from these events could reduce our revenue, increase our expenses, and adversely affect our reputation and stock price. While we seek to identify and remediate vulnerabilities in our products, services, IT systems, controls, and software that could be exploited by any malicious parties, we may not be aware of all such vulnerabilities, and we have at times failed, and may fail, to anticipate, detect, identify, and/or remediate such vulnerabilities before they are exploited or such vulnerabilities may persist after issuing security patches because system software updates may occur asynchronously across our customer base. Additionally, we have acquired and may continue to acquire companies with cybersecurity vulnerabilities or different security standards, which exposes us to related cybersecurity, operational, and financial risks. Further, as our products and services in some instances are integrated with our customers’ systems and processes, even if we are successful in identifying vulnerabilities, a successful attack on us could compromise customers’ IT systems and sensitive data, despite active monitoring and development of tools designed to identify and remediate such vulnerabilities. There is no guarantee that a series of issues may not be determined to be material in the aggregate at a future date even if they may not be material individually at the time of their occurrence. Business disruptions could seriously harm our future revenue and financial condition and increase our costs and expenses. Our worldwide operations and supply chain could be disrupted by natural or human-induced disasters including, but not limited to, earthquakes; tsunamis; floods; hurricanes, cyclones or typhoons; fires; other extreme weather conditions; power or water shortages; telecommunications failures; materials scarcity and price volatility; terrorist acts, civil unrest, conflicts or wars; and health epidemics or pandemics. The impacts and frequency of any of the above could be further exacerbated by climate change, particularly in countries where we operate that have limited infrastructure and disaster recovery resources. While we are predominantly self-insured to mitigate the impact of most catastrophic events, the occurrence of business disruptions could, among other impacts, harm our revenue, profitability, and financial condition; adversely affect our competitive position; increase our costs and expenses; make it difficult or impossible to provide our offerings to our customers or to receive components from our suppliers; create delays and inefficiencies in our supply chain; or require substantial expenditures and recovery time in order to fully resume operations. Public health crises, such as the COVID-19 pandemic, and the measures taken in response to such events have in the past negatively impacted, and may again in the future negatively impact, our operations and workforce, as well as those of our partners, customers and suppliers. Additionally, concerns over the economic impact of such events have, from time to time, caused increased volatility in financial and other capital markets, adversely impacting our stock price, our ability to access the capital markets, and our ability to fund liquidity needs, and may do so again in the future. The negative impacts of any such events on business operations and demand for our offerings will depend on future developments and actions taken in response to such events, which may be outside our control, highly uncertain, and cannot be predicted at this time. The manufacture of product components, the final assembly of our products and other critical operations are concentrated in certain geographic locations, including the United States, Puerto Rico, Costa Rica, Czech Republic, Malaysia, Mexico, China, Taiwan, South Korea, and Singapore. We also rely on major logistics hubs, which are strategically located near manufacturing facilities in the major regions and in proximity to HPE’s distribution channels and customers. Other critical business operations and some of our suppliers are located in California and Asia, near major earthquake faults known for seismic activity. Our operations could be adversely affected if manufacturing, logistics, or other operations in these locations are disrupted for any reason, including those enumerated above, as they have been in the past by natural disasters and public health issues in the United States, Puerto Rico, and China. To the extent such disruptions adversely affect our business, results of operations, financial condition, and stock price, they may also have the effect of heightening many of the other risks described in this Item 1A of Part I of this Form 10-K. Failure to complete the Merger with Juniper Networks may adversely affect our business and our stock price. In January 2024, we entered into a definitive agreement to acquire Juniper Networks, Inc., a leader in AI-native networks. Consummation of the Merger is subject to the satisfaction or waiver of certain conditions, including but not limited to (i) the adoption of the Agreement and Plan of Merger (the “Merger Agreement”), by and among Juniper Networks, HPE and Jasmine Acquisition Sub, Inc., a Delaware corporation and a wholly owned subsidiary of HPE (the “Merger Sub”), by Juniper Networks’ stockholders (which was completed on April 2, 2024); (ii) the absence of any injunction, order or law preventing, prohibiting or making illegal the consummation of the Merger; (iii) the expiration or termination of the waiting period (or extension thereof) under the Hart-Scott-Rodino Antitrust Improvement Act of 1976, as amended, and the receipt of all other required approvals, consents or clearances under specified foreign antitrust laws and foreign investment laws without imposition of a Burdensome Condition (as defined in the Merger Agreement); and (iv) in the case of the obligations of HPE and Merger Sub to effect the Merger, the absence of a material adverse effect with respect to Juniper Networks that is continuing as of the closing. There can be no assurance that these or other closing conditions will be satisfied in a timely manner or at all. Any delay in completing the Merger could cause us not to realize some or all of the anticipated benefits when expected, if at all. 21Table of ContentIf the Merger is not completed, our stock price could be impacted to the extent it reflects an assumption that we will complete the Merger, and additionally, we may suffer other consequences that could adversely affect our business, results of operations, and stock price, including incurring significant acquisition costs that we would be unable to recover, negative publicity, and a negative impression of us in the investment community. Furthermore, under certain specified circumstances, including the termination of the Merger Agreement by either us or Juniper Networks because certain required regulatory clearances are not obtained or the terms of the Merger Agreement are materially breached by us, upon termination we would be required to pay Juniper Networks a termination fee of \$815 million. Failure to realize the benefits expected from the Merger with Juniper Networks could adversely affect our business or our stock price. There can be no assurance that we will realize any of the significant benefits that we expect to result from the Merger, or realize them within the anticipated timeframe. Achieving these benefits will depend, in part, on our ability to integrate Juniper Networks’ business successfully and efficiently. The challenges involved in this integration, which will be complex and time-consuming, include the following: (1) preserving customer and other important relationships of Juniper Networks and attracting new business and operational relationships; (2) integrating financial forecasting and controls, procedures and reporting cycles; (3) consolidating and integrating corporate, information technology, finance and administrative infrastructures; (4) coordinating sales and marketing efforts to effectively position our capabilities; (5) coordinating and integrating operations, including in countries in which we have not previously operated; (6) integrating employees and related human capital management systems and benefits, maintaining employee morale and retaining key employees. If we do not successfully manage these issues and the other challenges inherent in integrating an acquired business, then we may not achieve the anticipated benefits of the Merger on our anticipated timeframe or at all, and our revenue, expenses, operating results, financial condition and stock price could be materially adversely affected. The successful integration of Juniper Networks will require significant management attention both before and after the completion of the Merger with Juniper Networks, and may divert the attention of management from our business and operational issues. Any failure by us to identify, manage, and complete acquisitions and subsequent integrations, divestitures, and other significant transactions successfully could harm our financial results, business and prospects. As part of our strategy, we may acquire businesses, divest businesses or assets, enter into strategic alliances and joint ventures, and make investments to further our business (collectively, “business combination and investment transactions”), and also handle any post-closing issues, such as integration. Risks associated with business combination and investment transactions include the following, any of which could adversely affect our financial results, including our effective tax rate: (1) We may not successfully combine product or service offerings or realize all of the anticipated benefits of any particular business combination and investment transaction, which may result in (1) failure to execute on our business strategy; (2) failure to coordinate sales and marketing efforts to effectively position our capabilities; (3) failure to retain employees, customers, distributors, and suppliers or attract new business and operational relationships; (4) increase in unanticipated delays or failure to meet contractual obligations which may cause financial results to differ from expectations; and (5) pay, early retirement costs, employee benefit costs, charges from the elimination of duplicative facilities and contracts, inventory adjustments, assumed litigation and other liabilities, legal, accounting and financial advisory fees, and required payments to executive officers and key employees under retention plans. (6) We may fail to successfully and efficiently (1) integrate financial forecasting and controls, procedures and reporting cycles; (2) consolidate and integrate corporate, information technology, finance and administrative infrastructures; (3) coordinate and integrate operations, including in countries in which we have not previously operated; (4) integrate employees and related human capital management systems and benefits; or (5) address redundant processes and functions in an adequate manner (thereby impacting our ability to achieve all or any of the anticipated synergies). (7) Our ability to conduct due diligence with respect to business combination and investment transactions, and our ability to evaluate the results of such due diligence, is dependent upon the veracity and completeness of statements and disclosures made or actions taken by third parties or their representatives. We may fail to identify significant issues with the acquired company’s product quality, financial disclosures, workplace culture, accounting practices or internal control deficiencies or all of the factors necessary to estimate reasonably accurate costs, timing and other matters. (8) In order to complete a business combination and investment transaction, we may issue common stock, potentially creating dilution for our existing stockholders or we may enter into financing arrangements, which could affect our liquidity and financial condition. (9) For an acquisition or other combination, the acquisition partner may have differing or inadequate cybersecurity and data protection controls, which could impact our exposure to data security incidents and potentially increase anticipated costs or time to integrate the business. (10) Business combination and investment transactions may lead to litigation, which could impact our financial condition and results of operations. (11) We have incurred and will incur additional depreciation and amortization expense over the useful lives of certain assets acquired in connection with business combination and investment transactions and, to the extent that the value of goodwill or intangible assets acquired in connection with a business combination and investment transaction becomes impaired, we may be required to incur additional material charges relating to the impairment of those assets. (12) For a divestiture, we may encounter difficulty in finding buyers or alternative exit strategies on acceptable terms in a timely manner, or we may dispose of a business at a price or on terms that are less desirable than we had anticipated. (13) The impact of divestitures on our revenue growth may be larger than projected, as we may experience greater dis-synergies than expected. If we do not satisfy pre-closing conditions and necessary regulatory and governmental approvals on acceptable terms, it may prevent us from completing the transaction. Dispositions may also involve continued financial involvement in the divested business, such as through continuing equity ownership, guarantees, indemnities or other financial obligations. Under these arrangements, performance by the divested businesses or other conditions outside of our control could affect our future financial results. (14) Our certificate of incorporation and bylaws could make it difficult or discourage an acquisition of Hewlett Packard Enterprise if our Board of Directors deems it to be undesirable. Provisions such as indemnification, meeting requirements, and blank check stock authorizations could deter or delay hostile takeovers, proxy contests, or changes in control or management of Hewlett Packard Enterprise. Management’s attention or other resources may be diverted during business combination and investment transactions and may be further impacted if we fail to successfully complete or integrate business combination and investment transactions that further our strategic objectives. See also the risk factors below under the heading “Risks Related to Prior Separations.” If we cannot continue to produce quality products and services, our reputation, business, and financial performance may suffer. In the course of conducting our business, we must adequately address quality issues associated with our products, services, and solutions (whether developed by us or by a company we acquire),

including defects in our engineering, design, and manufacturing processes and unsatisfactory performance under service contracts, as well as defects in third-party components included in our products and unsatisfactory performance or even malicious acts by third-party contractors or subcontractors or their employees. In order to address quality issues, we work extensively with our customers and suppliers and engage in product testing to determine the causes of problems and to develop and implement appropriate solutions. However, the products, services, and solutions that we offer are complex, and our regular testing and quality control efforts may not be effective in controlling or detecting all quality issues or errors, particularly with respect to faulty components manufactured by third parties. If we are unable to determine the cause, find an appropriate solution or offer a temporary fix (or “éœatchâ€”) to address quality issues with our products, we may delay shipment to customers, which could delay revenue recognition and receipt of customer payments and could adversely affect our revenue, cash flows, and profitability. In addition, after products are delivered, quality issues may require us to repair or replace such products. Addressing quality issues can be expensive and may result in additional warranty, repair, replacement, and other costs, adversely affecting our financial performance. If new or existing customers have difficulty operating our products or are dissatisfied with our services or solutions, our results of operations could be adversely affected, and we could face possible claims if we fail to meet our customers’ expectations. In addition, quality issues, including the actual or perceived security or reliability of our offerings or ability to address other data security concerns, can impair our relationships with new or existing customers and adversely affect our brand and reputation, which could adversely affect our results of operations. In order to be successful, we must attract, retain, train, motivate, develop, and transition key employees, and failure to do so could seriously harm us. In order to be successful, we must attract, retain, train, motivate, develop, and transition qualified executives and other key employees, including those in managerial, technical, development, sales, marketing, and IT positions. In order to attract and retain executives and other key employees in a competitive marketplace, we must provide a competitive compensation package, including cash and equity-based compensation. These are particularly important considering our growth strategy to capture the market opportunities presented by networking, hybrid cloud, and AI. Certain equity-based incentive awards for certain executives contain conditions relating to our stock price performance and our long-term financial performance that make the future value of those awards uncertain. If the anticipated value of such equity-based incentive awards does not materialize, if our equity-based compensation otherwise ceases to be viewed as a valuable benefit, if our total compensation package is not 23Table of Contentviewed as being competitive, or if we do not obtain the stockholder approval needed to continue granting equity-based incentive awards in the amounts we believe are necessary, our ability to attract, retain, and motivate executives and key employees could be weakened. Our failure to successfully hire executives and key employees or the loss of any executives and key employees could have a significant impact on our operations and our ability to execute our strategy. Further, changes in our management team may be disruptive to our business, and any failure to successfully transition and assimilate key new hires or promoted employees could adversely affect our business and results of operations. As competition for highly skilled employees in our industry has grown increasingly intense, we have in the past experienced, and may in the future experience, higher than anticipated levels of employee attrition, which has resulted in increased costs to hire new employees with the desired skills and may do so again in the future. In addition, significant or prolonged turnover or revised hiring priorities may negatively impact our operations and culture, as well as our ability to successfully maintain our processes and procedures, including due to the loss of historical, technical, and other expertise. These risks to attracting and retaining the necessary talent may be exacerbated by labor constraints, such as immigration policies which may impair the ability to recruit technical and professional talent, and inflationary pressures, which impact employee wages and benefits. Further, integration of employees and businesses as a result of our acquisitions, including the Merger, may present challenges, which could negatively affect our ability to retain and recruit personnel who are essential to our future success. If we fail to manage the distribution of our products and services properly, our business and financial performance could suffer. We use a variety of distribution methods to sell our products and services around the world, including both direct and indirect sales to end-users. Successfully managing the interaction of our direct and indirect channel efforts to reach various potential customer segments for our products and services is a complex process. Moreover, since each distribution method has distinct risks and gross margins, our failure to implement the most advantageous balance in the delivery model for our products and services could adversely affect our revenue and gross margins and therefore our profitability. Our financial results could be materially adversely affected due to distribution channel conflicts or if the financial conditions of our channel partners were to weaken. Our results of operations may be adversely affected by any conflicts that might arise between our various distribution channels or the loss or deterioration of any alliance or distribution arrangement. Moreover, some of our wholesale distributors may have insufficient financial resources and may not be able to withstand changes in business conditions, including economic weakness, industry consolidation, and market trends. Considerable trade receivables that are not covered by collateral or credit insurance are outstanding with our distribution channel partners. Revenue from indirect sales could suffer, and we could experience disruptions in distribution, if our distributorsâ€™ financial conditions, abilities to borrow funds in the credit markets, or operations weaken. Our inventory management is complex, as we continue to sell a significant mix of products through distributors. We must manage both owned and channel inventory effectively, particularly with respect to sales to distributors, which involves forecasting demand and pricing challenges. Distributors have in the past adjusted orders during periods of product shortages, and may do so in the future, in addition to cancelling orders if their inventory is too high or delaying orders in anticipation of new products. Distributors also may adjust their orders in response to the supply of our products and the products of our competitors and seasonal fluctuations in end-user demand. If we have excess or obsolete inventory, we may have to reduce our prices and write down inventory, and have done so from time to time in the past. Moreover, our use of indirect distribution channels may limit our willingness or ability to adjust prices quickly and otherwise to respond to pricing changes. Issues in the development and use of artificial intelligence may result in reputational harm, liability or impact to our results of operations. We believe the proliferation of AI, especially as it relates to our products and solutions that enable AI workloads, will have a significant impact on customer preferences and market dynamics in our industry, and our ability to effectively compete in this space will be critical to our financial performance. We currently incorporate AI capabilities into certain offerings and manufacture hardware designed to support AI capabilities, and our research into and continued development of such capabilities and manufacturing processes remain ongoing. We have invested, and expect to continue to invest, significant resources to build and support the development of these capabilities and manufacturing processes, and if our AI-related offerings fail to operate as anticipated or as well as competing offerings or otherwise do not meet customer needs or if we are unable to bring AI-related offerings to market as effectively as our competitors, we may fail to recoup our investments in AI, our competitive position may be harmed, and our business and reputation may be adversely impacted. As with many innovations, AI presents risks, challenges, and unintended consequences that could affect its adoption, and therefore our business and our overall strategy. While we review proposed implementations and use cases ahead of deployment, we may not always identify the risks or deficiencies of an AI capability or offering and the market may respond differently than we anticipate, potentially impacting our results of operations. AI algorithms and training methodologies may be flawed. Ineffective or inadequate AI development or deployment practices by us or others could result in incidents that impair the 24Table of Contentacceptance of AI solutions or cause harm to individuals or society. These deficiencies and other failures of AI systems could subject us to competitive harm, regulatory action, legal liability, and brand or reputational harm. If we enable or offer AI solutions that are controversial because of their impact on human rights, privacy, employment, or other social, economic, or political issues, we may experience competitive, brand, or reputational harm or legal and/or regulatory action. Further, incorporating AI gives rise to litigation risk and risk of non-compliance and unknown cost of compliance, as AI is an emerging technology for which the legal and regulatory landscape is not fully developed and which may vary from jurisdiction to jurisdiction, creating complex compliance issues (including potential liability for breaching intellectual property or privacy rights or laws or for the misuse of personal data). While new AI initiatives, laws, and regulations are emerging and evolving, what they ultimately will look like remains uncertain, and our obligation to comply with them could entail significant costs, negatively affect our business, or entirely limit our ability to incorporate certain AI capabilities into our offerings. The resulting impact of such regulations on our customersâ€™ desire for AI capabilities and demand for our offerings more generally could negatively impact our results of operations. Additionally, leveraging AI capabilities to potentially improve internal functions and operations presents further risks and challenges. While we aim to use AI ethically and attempt to identify and mitigate ethical or legal issues presented by its use, we may nevertheless be unsuccessful in identifying or resolving issues before they arise. The use of AI to support business operations carries inherent risks related to data privacy and security, such as intended, unintended, or inadvertent transmission of proprietary or sensitive information, as well as challenges related to implementing and maintaining AI tools, such as developing and maintaining appropriate datasets for such support. Further, dependence on AI without adequate safeguards to make certain business decisions may introduce additional operational vulnerabilities by impacting our relationships with customers, partners, and suppliers; by producing inaccurate outcomes based on flaws in the underlying data; or other unintended results. Changes in the macroeconomic environment have, at times, impacted and may in the future negatively impact our results of operations. Changes in macroeconomic conditions have, at times, affected and may in the future affect consumer and enterprise spending, and as a result, our customers have postponed or cancelled, and may also in the future postpone or cancel, spending in response to numerous reasons, including but not limited to volatility in credit and equity markets, negative financial news and/or declines in income or asset values, all of which may have an adverse effect on the demand for our products and/or result in changes in our product prices. Other factors that have had, and could again in the future have, an adverse effect on demand for our products, financial condition and results of operations include inflation, slower economic growth or economic recession, conditions in the labor market, healthcare costs, access to credit, consumer confidence, and other macroeconomic factors affecting consumer and business spending behavior. These changes could happen rapidly and we may not be able to react quickly to prevent or limit our losses or exposures. Additionally, other macroeconomic developments, such as efforts of governments to stimulate or stabilize the economy, international conflicts, trade disputes, sanctions, increased tariffs internationally, including between the United States and China and on imports into the United States from various countries, have at times impacted, and may in the future impact our business in an adverse manner, whether directly or indirectly, such as through their impacts on the financial positions and operations of our customers, suppliers, and other third parties with whom we do business or on whom we rely, and as a consequence, their ability to perform their obligations under their agreements with us. Persistent inflation has negatively affected our business in recent quarters and could do so again in the future, as well. A general weakening of, and related declining corporate confidence in, the global economy or the curtailment in government or corporate spending have at times caused current or potential customers to reduce their IT budgets or be unable to fund data storage products, which have led them to delay, decrease or cancel purchases of our products or to not pay us or to delay paying us for previously purchased products and services, all of which may occur again in the future. Failure to meet responsible and sustainable business expectations or standards or achieve our Living Progress goals could adversely affect our business, results of operations, financial condition, or stock price. There has been an increased focus from regulators and stakeholders on sustainability and corporate responsibility matters. Given our commitment to sustainable and responsible business, we actively manage these issues through our Living Progress Strategy and have established and publicly announced certain goals, which we may refine or even expand further in the future. These goals reflect our current plans and aspirations, are based on available data and estimates, and are not guarantees that we will be able to achieve them. Moreover, actions or statements that we may take based on expectations, assumptions, or third-party information that we currently believe to be reasonable may subsequently be determined to be erroneous or be subject to misinterpretation. Initiatives to address sustainability and corporate responsibility issues may be costly and may not have the desired effect. Evolving stakeholder expectations and our efforts and ability to manage these issues and accomplish our goals present numerous operational, regulatory, reputational, financial, legal, and other risks, any of which may be outside of our control or could have adverse impacts on our business, including on our stock price. Further, there is uncertainty around the accounting standards and climate-related disclosures associated with emerging laws and reporting requirements and the related costs to comply with the emerging regulations. 25Table of ContentOur failure or perceived failure to achieve our Living Progress goals, maintain responsible and sustainable business practices, or comply with emerging sustainability regulations that meet evolving regulatory or stakeholder expectations could harm our reputation, adversely impact our ability to attract and retain customers and talent, and expose us to increased scrutiny from the investment community and enforcement authorities. Our reputation also may be harmed by the perceptions that our stakeholders have about our action or inaction on certain sustainability- and corporate responsibility-related issues, or because they may disagree with our goals and initiatives, either of which may cause us to face scrutiny, lawsuits, or other market access restrictions from certain parties related to our action or inaction on such issues. Damage to our reputation and loss of brand equity may reduce demand for our products and services and thus have an adverse effect on our future financial performance, as well as require additional resources to rebuild our reputation. Risks arising from climate change and the transition to a lower-carbon economy may impact our business. Climate change serves as a risk multiplier that could increase both the frequency and severity of natural disasters that may affect our worldwide business operations and those of suppliers and customers. Our corporate headquarters is located in Spring, Texas, which suffers from floods, hurricanes, and other extreme weather, and a portion of our research and development activities are located in California, which suffers from drought conditions and catastrophic wildfires, each affecting the health and safety of our employees. In California, to mitigate wildfire risk, electric utilities have, at times periodically deployed, and may in the future, periodically deploy public safety power shutoffs, which affect electricity reliability to our facilities and our communities. Certain sites located in the United States, Middle East, China, and India experience exposure to extreme heat and water stress, which could potentially jeopardize the health and well-being of our employees, consequently impacting our operations. While we seek to mitigate business risks, including those associated with climate change, through site selection, infrastructure technological investments, business continuity planning, and robust environmental programs, this may require us to incur substantial costs, and we may be unsuccessful in doing so as there are inherent climate-related risks wherever business is conducted. Furthermore, climate change may reduce the availability or increase the cost of insurance for these negative impacts of natural disasters by contributing to an increase in the incidence and severity of such natural disasters. The increasing concern over climate change could also result in transition risks, such as efforts and expenditures related to carbon abatement, shifting customer preferences, or compliance risks from changing regulatory and legal requirements. We have already observed changing customer preferences resulting in increased demands for sustainable solutions, products, and services. While we have been integrating such trends into our business and sales strategies thus far, we may not be able to successfully do so in the future. Further, continually changing customer preferences may cause us to incur additional costs, invest more in R&D, or make other changes to other operations to respond to such demands, which may not be carried out successfully, and if so, could adversely affect our financial results. We may also confront higher electricity prices as the grid decarbonizes, and higher costs for supplies or components that comply with certain environmental regulatory thresholds, potentially impacting our margins or the pricing of our offerings. If we fail to manage these and other transition risks in an effective manner, customer demand for our solutions, products, and services could diminish, and our profitability could suffer. Industry Risks We operate in an intensely competitive industry, and competitive pressures could harm our business and financial performance. Our ability to implement solutions for our customers, anticipate and respond to rapid and continuing changes in technology (such as cloud-, AI-, and security-related offerings, which are continually evolving), and develop new service offerings or incorporate technological improvements into our offerings that meet current and prospective customersâ€™ needs, as well as evolving industry standards, is critical to our competitiveness and success. We encounter aggressive competition from numerous and varied competitors in all areas of our business, and our competitors have targeted and are expected to continue targeting our key market segments. We compete primarily on the basis of technology, innovation, performance, price, quality, reliability, brand, reputation, distribution, range of products and services, ease of use of our products, account relationships, customer training, service and support, security, and the availability of our IT infrastructure offerings. If our products, services, support, and cost structure do not enable us to compete successfully based on any of those criteria, our results of operations and business prospects could be harmed. We have a large portfolio of products and services and must allocate our financial, personnel, and other resources across all of our products and services while competing with companies that have smaller portfolios or specialize in one or more of our product or service lines. As a result, we may invest less in certain areas of our business than our competitors do, and our competitors may have greater financial, technical, and marketing resources available to them compared to the resources allocated to our products and services that compete against theirs. If we do not sufficiently invest in new technologies, successfully adapt to industry developments and changing demand, and evolve and expand our business at sufficient speed and scale to keep pace with the demands of the markets we serve, we may be unable to develop and maintain a competitive advantage and execute on our growth strategy, which would adversely affect our business, results of operations, and financial condition. Industry consolidation may also affect competition by creating larger, more homogeneous, and potentially stronger 26Table of Contentcompetitors in the markets in which we operate. Additionally, our competitors may affect our business by entering into exclusive arrangements with our existing or potential customers or suppliers. Companies with whom we have vertical relationships in

certain areas may be or become our competitors in other areas. In addition, companies with whom we have vertical relationships also may acquire or form relationships with our competitors, which could reduce their business with us. If we are unable to effectively manage these complicated relationships with vertical partners, our business and results of operations could be adversely affected. We face aggressive price competition and may continue to do so. As a consequence of inflation and higher supply chain and manufacturing costs, we have in the past increased the prices of many of our products and services to maintain or improve our revenue and gross margin, and may do so again in the future. In addition, competitors who have a greater presence in some of the lower-cost markets in which we compete, or who can obtain better pricing, more favorable contractual terms and conditions, or more favorable allocations of products and components during periods of limited supply may be able to offer lower prices than we are able to offer. Our cash flows, results of operations, and financial condition may be adversely affected by these and other industry-wide pricing pressures. Because our business model is based on providing innovative and high-quality products and services, we may spend a proportionately greater amount of our revenues on R&D than some of our competitors. If we cannot proportionately decrease our cost structure (apart from R&D expenses) on a timely basis in response to competitive price pressures, our profitability could be adversely affected. In addition, if our pricing and other facets of our offerings are not sufficiently competitive, or if there is an adverse reaction to our product decisions, we may lose market share in certain areas, which could adversely affect our financial performance and business prospects. Even if we are able to maintain or increase market share for a particular product, its financial performance could decline because the product is in a maturing industry or market segment or contains technology that is becoming obsolete. Financial performance could decline due to increased competition from other types of products that perform similar functions as our offerings. International Risks Due to the international nature of our business, political or economic changes and the laws and regulatory regimes applying to international transactions or other factors could harm our future revenue, costs and expenses, and financial condition. Our business and financial performance depend significantly on worldwide economic conditions and the demand for technology hardware, software, and services in, and continued access to, the markets in which we compete. Economic weakness and uncertainty and the volatile inflationary environment have constrained spending on network and enterprise infrastructure. This has in the past adversely affected the demand for our products, services, and solutions, which has impacted our financial condition and results of operations, all of which we may experience again in the future. These have, at times in the past, resulted in increased expenses due to higher allowances for doubtful accounts and potential goodwill and asset impairment charges (among other financial impacts), and made it more difficult for us to manage inventory and make accurate forecasts of revenue, gross margin, cash flows, and expenses, and may have such effects again in the future. Such factors, including how long such conditions may persist, among others, may negatively impact the evenness or volume of demand for our products and services, potentially resulting in impacts similar to those mentioned above, though the precise extent of such impacts cannot be accurately predicted. Economic weakness and uncertainty could cause our expenses to vary materially from our expectations. Any financial turmoil affecting the banking system and financial markets, or any significant financial services institution failures could negatively impact our treasury operations, as the financial condition of such parties may deteriorate rapidly and without notice in times of market volatility and disruption. Interest and other expenses have varied, and could continue to vary, materially from expectations depending on changes in interest rates, borrowing costs, currency exchange rates, costs of hedging activities, and the fair value of derivative instruments. It is difficult to predict the impact of such events on us, our third-party partners, our customers, or economic markets more broadly, which have been and will continue to be highly dependent upon the actions of governments and businesses in response to macroeconomic events, and the effectiveness of those actions. Such actions have impacted, and may further impact our ability, desire, or the timing of seeking funding for various investment opportunities. Economic downturns also may lead to restructuring actions and associated expenses. Further, reduced U.S. federal government spending may limit demand for our products, services, and solutions from organizations that receive funding from the U.S. government, and could negatively affect macroeconomic conditions in the United States, which could further reduce demand for our products, services, and solutions. Our business and financial performance also could be adversely affected by changes in U.S. trade policy, U.S. export controls and sanctions, and U.S. regulations concerning imports, as well as international laws and regulations relating to global trade. Current U.S. government trade policy includes the imposition of tariffs on certain foreign goods, including information and communication technology products. These measures have materially increased costs for certain goods imported into the United States. As a result, our business has in the past been impacted by forced material price increases, which in turn resulted 27Table of Contentin price increases for our offerings, which subsequently limited demand or reduced margins for our offerings, all of which may impact us again from time to time in the future. Additionally, U.S. trading partners may adopt their own trade policies making it more difficult or costly for us to export our products to those countries. Similarly, changes in regulations relating to certain exports, including economic sanctions, have led to export delays and prevented us, and could in the future prevent us, from exporting products to certain locations or customers entirely, which have in some instances impacted, and could in the future impact, our financial performance. In addition, changes in requirements relating to making foreign direct investments could increase our cost of doing business in certain jurisdictions, prevent us from shipping products to particular countries or markets, affect our ability to obtain favorable terms for components, increase our operating costs, or lead to penalties or restrictions. While we have policies and procedures designed to facilitate compliance with global trade laws and regimes around the world, such measures may not guarantee compliance. Sales outside the United States constituted approximately 64% of our net revenue in fiscal 2024. As such, our future business and financial performance could suffer due to a variety of international factors in addition to those otherwise already disclosed, including: a) ongoing uncertainties as a result of instability or changes in geopolitical conditions, including military or political conflicts, such as those caused by the ongoing conflicts between Russia and Ukraine or in the Middle East (the potential escalation or geographic expansion of which could heighten other risks identified in this report), or the relationship between China and the U.S. (which could, among other things, impact the enforceability of certain contracts or the timing and form of certain payments); b) inflationary pressures, which have in the past increased, and may in the future increase costs for materials, supplies, and services, including those of third parties with whom we do business; c) adverse or uncertain macroeconomic conditions, including a changing interest rate environment and fears of a potential global economic downturn or recession, which have at times in the past slowed customer demand for our products and services, and may do so again in the future; d) network security, privacy, and data sovereignty concerns, which could make foreign customers reluctant to purchase products and services from U.S.-based technology companies; e) longer collection cycles and financial instability among customers, which could impact our ability to collect on accounts receivable and consequently recognize revenue; f) local labor conditions and regulations, including local labor issues faced by specific suppliers and OEMs, or changes to immigration and labor law policies which may adversely impact our access to technical and professional talent; g) managing our geographically dispersed workforce, which has necessitated, and may in the future require, incurring costs to promote seamless workforce connectivity and to comply with changing laws, regulations and workers' rights councils across multiple jurisdictions; h) differing technology standards or customer requirements, which have required us to incur additional development and production costs to modify or adapt our offerings, and may do so again in the future; i) local content and manufacturing requirements, which have impacted, and could further impact, our ability to sell into those markets; j) difficulties associated with repatriating earnings in restricted countries, and changes in tax laws, which introduces uncertainty to our results of operations and financial performance; and k) fluctuations in freight costs, limitations on shipping and receiving capacity, and other disruptions in the transportation and shipping infrastructure at important geographic points of exit and entry for our products and shipments, which have from time to time adversely impacted, and any of which could in the future adversely impact, our results of operations and ability to meet customer demand. Certain of the factors described above have, in the past, disrupted the operations of, and adversely impacted our product and component manufacturing and key suppliers, customers, or vendors located outside of the United States, and could do so again in the future. For example, we rely on suppliers in Asia for product assembly and manufacture, the operations of whom are subject to local labor laws and other requirements. Any loss of or limitations on their output or their inability to operate could have an adverse effect on our ability to timely deliver our products and services, which would in turn negatively impact our financial performance. Further, the ongoing conflict between Russia and Ukraine and the trade sanctions imposed by the U.S., the European Union (the "EU"), and other countries in response have negatively impacted business and financial performance in that region. HPE is continuing to execute on the exit of our remaining business in Russia and Belarus as planned; however, we cannot provide any assurance that such exit will be efficient or uninterrupted, which may negatively impact our operational expenses. 28Table of ContentWe implement policies, procedures, and training designed to facilitate compliance with anti-corruption laws around the world, including the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act. However, such measures may not guarantee compliance, and our employees and third parties with whom we work may take actions in violation of such policies or such anti-corruption laws. Furthermore, in many foreign countries, particularly in those with developing economies, people may engage in business practices prohibited by anti-corruption laws. Violations of such laws may result in severe criminal or civil sanctions and penalties, and we may be subject to those and other liabilities that could have an adverse effect on our business, results of operations, and financial condition. We are exposed to fluctuations in foreign currency exchange rates. Conducting business in currencies other than the U.S. dollar, including the euro, the Japanese yen, and British pound has, from time to time, adversely impacted, and could in the future, have an adverse impact on our results as expressed in U.S. dollars. Currency volatility contributes to variations in our sales of products and services in impacted jurisdictions. Fluctuations in foreign currency exchange rates have, from time to time, adversely affected, and could in future periods adversely affect our revenue recognition and our revenue growth. In addition, currency variations can adversely affect our ability to implement price increases, margins on sales of our products in countries outside of the United States and margins on sales of products that include components obtained from suppliers located outside of the United States. From time to time, we use forward contracts and options designated as cash flow hedges to protect against foreign currency exchange rate risks, and may continue to do so in the future. The effectiveness of our hedges depends on our ability to accurately forecast future cash flows, which is particularly difficult during periods of uncertain demand for our products and services and highly volatile exchange rates. We may incur significant losses from our hedging activities due to factors such as volatility and currency variations. In addition, certain or all of our hedging activities may be ineffective, may expire and not be renewed or may not offset any or more than a portion of the adverse financial impact resulting from currency variations. Losses associated with hedging activities also may impact our revenue and to a lesser extent our cost of sales and financial condition. Intellectual Property Risks Our financial performance may suffer if we cannot continue to develop, license, or enforce the intellectual property rights on which our businesses depend. We rely upon patent, copyright, trademark, trade secret, and other intellectual property laws in the United States, similar laws in other countries, and agreements with our employees, customers, suppliers, and other parties, to establish and maintain intellectual property rights in the products and services we sell, provide, or otherwise use in our operations. However, from time to time our intellectual property rights have been challenged, infringed, or circumvented, and any of such rights could be further challenged, invalidated, infringed, or circumvented or such intellectual property rights may not be sufficient to permit us to take advantage of current market trends or to otherwise provide competitive advantages. Further, the laws of certain countries do not protect proprietary rights to the same extent as the laws of the United States. Therefore, in certain jurisdictions we may be unable to protect our proprietary technology adequately against unauthorized third-party copying or use; this, too, could adversely affect our ability to sell products or services and our competitive position. Furthermore, changes in intellectual property laws or their interpretation may impact our ability to protect and assert our intellectual property rights, increase costs and uncertainties in the prosecution of patent applications or related enforcement actions, and diminish the value and competitive advantage conferred by our intellectual property assets. Monitoring and detecting any unauthorized access, use or disclosure of our intellectual property is complex, and we cannot be certain that the protective measures we have implemented will completely prevent misuse. Our ability to enforce our intellectual property rights is subject to litigation risks and uncertainty as to the protection and enforceability of those rights in some countries. If we seek to enforce our intellectual property rights, we may be subject to claims that those rights are invalid or unenforceable, and others may seek counterclaims against us, which could have a negative impact on our business. Effective protection of intellectual property rights is expensive and difficult to maintain, both in terms of application and maintenance costs, as well as the costs of defending and enforcing those rights. Our products and services depend in part on intellectual property and technology licensed from third parties. Much of our business and many of our products rely on key technologies developed or licensed by third parties. For example, many of our software offerings are developed using software components or other intellectual property licensed from third parties, including through both proprietary and open-source licenses. These third-party software components may become obsolete, defective, or incompatible with future versions of our products, our relationship with the third party may deteriorate or cease, or our agreements with the third party may expire or be terminated. We may face legal or business disputes with licensors that may threaten or lead to the disruption of inbound licensing relationships. In order to remain in compliance with the terms of our licenses, we must carefully monitor and manage our use of third-party software components, including both proprietary and open source license terms that may require the licensing or public disclosure of our intellectual property without compensation or on undesirable terms. Additionally, some of these licenses may not be available to us in the future on terms that are acceptable or that allow our product offerings to remain competitive. Our inability to obtain licenses or rights on favorable terms could have a material effect on our business, including our financial condition and results of operations. In 29Table of Contentaddition, it is possible that as a consequence of a merger or acquisition, we may acquire intellectual property subject to licensing obligations to third parties, other third parties may obtain licenses to some of our intellectual property rights or our business may be subject to certain restrictions that were not in place prior to such transaction. Because the availability and cost of licenses from third parties depends upon the willingness of third parties to deal with us on the terms we request, there is a risk that third parties who license to our competitors will either refuse to license us at all, or refuse to license us on terms equally favorable to those granted to our competitors. Consequently, we may lose a competitive advantage with respect to these intellectual property rights or we may be required to enter into costly arrangements in order to terminate or limit these rights. Third-party claims of intellectual property infringement, including patent infringement, are commonplace in our industry and successful third-party claims may limit or disrupt our ability to sell our products and services. Third parties may claim that we or customers indemnified by us are infringing upon or otherwise violating their intellectual property rights. Patent assertion entities frequently purchase intellectual property assets for the purpose of extracting infringement settlements. Furthermore, our exposure to these risks associated with the use of intellectual property may be increased as a result of acquisitions; not only do we have a lower level of visibility into the development process with respect to such technology or the care taken to safeguard against infringement risks, but also third parties may make infringement and similar claims only after we have acquired technology that had not been asserted prior to our acquisition. If we cannot license, or replace, allegedly infringed intellectual property on reasonable terms, our operations could be adversely affected. In addition, there is uncertainty around the validity and enforceability of intellectual property rights related to our use, development, and deployment of AI and AI systems and solutions. Our use of AI technologies, whether created by us for internal or customer use cases or otherwise incorporated from external sources into our offerings, could lead to violation of third-party intellectual property rights, and could require us to incur significant expenses to modify our solutions and processes or otherwise engage in efforts to remain in compliance with the law. Even if we believe that intellectual property claims are without merit, they can be time-consuming and costly to defend against and may divert management's attention and resources away from our business. Claims of intellectual property infringement also might require us to redesign affected products, discontinue certain product offerings, enter into costly settlement or license agreements, pay costly damage awards, or face a temporary or permanent injunction prohibiting us from importing, marketing, or selling certain of our products. Even if we have an agreement to indemnify us against such costs, the indemnifying party may be unable or unwilling to uphold its contractual obligations to us. Financial Risks Adverse developments affecting our liquidity, capital position, borrowing costs, and access to capital markets could adversely impact our business, financial condition, and results of operations or those of the third parties with whom we do business. We currently maintain investment grade credit ratings with Moody's Investors Service, Standard & Poor's Ratings Services, and Fitch Ratings Services. Despite these investment grade credit ratings at this time, we may experience downgrades in our credit ratings for various reasons, including but not limited to for reasons in connection with the substantial amount of debt we have incurred and expect to assume in connection with the Merger. Any such downgrades could increase the cost of borrowing under any indebtedness we may incur, jeopardize our ability to incur debt on terms acceptable to us, reduce market capacity for our commercial paper, or require the posting of additional collateral under our derivative contracts. Additionally, increased borrowing costs, including those arising from a credit rating downgrade, can potentially reduce the competitiveness of our financing business. There can be no assurance that we will be able to maintain our credit ratings, and any additional actual or anticipated changes or downgrades in our credit ratings, including any announcement that our ratings are under review for a downgrade, may have a negative impact on our liquidity, capital position, and access to capital markets. In addition, volatility and disruption in the financial sector and capital markets and other events negatively affecting macroeconomic conditions or contributing to the instability or volatility

thereof, such as changing interest rates, have from time to time in the past impacted, and may in the future impact, our liquidity, capital position, and access to capital markets. Our total liquidity depends in part on the availability of funds under the revolving credit facility and our other financing agreements. The failure of any lender's ability to fund future draws on our revolving credit facility or our other financing arrangements could reduce the amount of cash we have available for operations and additional capital for future needs. The future effects of such events are unknown and difficult to predict at this time, and could adversely affect us, our customers, financial institutions, transactional counterparties, or others with which we do business, which may in turn have adverse impacts on our current and/or projected business operations, financial condition, and our results of operations. Our obligation to consummate the Merger is not subject to a financing condition, and as such, may be subject to events beyond our control, such as the timing of receipt of regulatory approvals. Further, portions of our recently issued debt contain special mandatory redemption provisions, and if we do not consummate the Merger before October 2025, we may be required to redeem certain series of such debt, which would result in less flexibility to address other funding needs. Our debt obligations may adversely affect our business and our ability to meet our obligations and pay dividends. In addition to our current total carrying debt, we may also incur additional indebtedness in the future. In order to consummate the Merger, we have incurred a substantial amount of debt, and plan to incur further debt, as well. This collective 30Table of Contentamount of debt could have important adverse consequences to us and our investors, including requiring a substantial portion of our cash flow from operations to make principal and interest payments; making it more difficult to satisfy other obligations; increasing the risk of a future credit ratings downgrade of our debt, which could increase future debt costs and limit the future availability of debt financing; increasing our vulnerability to general adverse economic and industry conditions; reducing the cash flows available to fund capital expenditures and other corporate purposes and to grow our business; limiting our flexibility in planning for, or reacting to, changes in our business and industry; and limiting our ability to borrow additional funds as needed or take advantage of business opportunities as they arise, pay cash dividends or repurchase our common stock. While the U.S. Federal Reserve has begun lowering interest rates and signaled its intention to keep doing so, macroeconomic circumstances may change, resulting in delays or reversal of such actions, including by central banks around the world, which may result in a prolonged high interest rate environment and affect our ability to incur debt at reasonable prices or our desire to incur further debt at all. To the extent that we incur additional indebtedness, the risks described above could increase, including requiring additional expected cash flows from operations to service our debt. In addition, our actual cash requirements to operate our business in the future may be greater than expected. Our cash flow from operations may not be sufficient to service our outstanding debt or to repay our outstanding debt as it becomes due, and we may not be able to borrow money, sell assets, or otherwise raise funds on acceptable terms, or at all, to service or refinance our debt. The revenue and profitability of our operations have historically varied, which makes our future financial results less predictable. Our revenue, gross margin, and profit vary among our diverse products and services, customer groups, and geographic markets and therefore, will likely be different in future periods than our historical results. Our revenue depends on the overall demand for our products and services, which is difficult to accurately predict, varies from time to time, may be uneven across our portfolio of offerings, and is subject to industry-wide or broader macroeconomic market dynamics, all of which have in the past adversely impacted, and may again in the future adversely impact, our business and financial condition. Additionally, the varying sizes of customer contracts or orders, variations in customer acceptances of delivered orders, the timing thereof, and cancellations and/or de-bookings of such orders (due to various reasons, including but not limited to failure to satisfy terms and compliance matters, whether initiated by us or the customer) can be uneven across our portfolio and have at times impacted, and in the future could impact, our pipeline, bookings and our ability to recognize revenue, if at all (particularly with respect to contracts and orders involving our AI offerings). Such variables have in the past negatively impacted our financial performance, and may do so again in the future. Delays or reductions in discretionary IT spending by our customers or potential customers have had, and in the future could have a material adverse effect on demand for our products and services, which could result in a significant decline in revenue. For example, we have seen demand soften unevenly across our portfolio and geographies, which may continue, as certain customers and sectors have been taking longer than anticipated to digest prior large orders. In addition, revenue declines in some of our businesses may affect revenue in our other businesses as we may lose cross-selling opportunities. Overall gross margins and profitability in any given period are dependent partially on the product, service, customer, and geographic mix reflected in that period's net revenue. Furthermore, the relationship between China and the U.S., and any subsequent action that may be taken by either country, may significantly vary the results our operations and financial performance from that region. There could be additional uncertainty surrounding the enforceability of contract obligations, as well as the timing and form of payments from China. Competition, lawsuits, investigations, increases in component and manufacturing costs that we are unable to pass on to our customers, component supply disruptions, and other risks affecting our businesses may have a significant impact on our overall gross margin and profitability. Variations in our fixed cost structure and gross margins across business units and product portfolios, have from time to time led to, and may lead to significant operating profit volatility on a quarterly or annual basis in the future. In addition, newer geographic market opportunities may be relatively less profitable due to our investments associated with entering those markets and local pricing pressures, and we may have difficulty establishing and maintaining the operating infrastructure necessary to support the high growth rate associated with some of those markets. Market trends, industry shifts, competitive pressures, commoditization of products, increased component or shipping costs, regulatory impacts, and other factors have from time to time resulted in, and may in the future result in, reductions in revenue or pressure on gross margins of certain segments in a given period, which may lead to adjustments to our operations. Moreover, our efforts to address the challenges facing our business could increase the level of variability in our financial results because the rate at which we are able to realize the benefits from those efforts may vary from period to period. Our uneven sales cycle and supply chain disruptions make planning and inventory management difficult and future financial results less predictable. In some of our businesses, our quarterly sales have periodically reflected a pattern in which a disproportionate percentage of each quarter's total sales occurs towards the end of the quarter. This uneven sales pattern makes predicting revenue, earnings, cash flow from operations, and working capital for each financial period difficult, increases the risk of unanticipated variations in our quarterly results and financial condition, and places pressure on our inventory management and logistics systems. If predicted demand is substantially greater than orders, there may be excess inventory; and alternatively, if 31Table of Contentorders substantially exceed predicted demand, we may not be able to fulfill all of the orders received in each quarter and such orders may be canceled, all of which we experienced from time to time in the past and may do so again in the future. Depending on when they occur in a quarter, developments such as a systems failure, component pricing movements, component shortages, or global logistics disruptions, have in the past adversely impacted, and could in the future adversely impact, our inventory levels and results of operations in a manner that is disproportionate to the number of days in the quarter affected. We experience some seasonal trends in the sale of our products that also have produced, and may in the future produce, variations in our quarterly results and financial condition. Many of the factors that create and affect seasonal trends are beyond our control. Separately, periodic supply chain shortages and constraints have, in some instances, resulted in, and may result in, increases to the costs of production of our hardware products that we have, at times, not been able to, and may, in the future, not be able to pass on to our customers. We have, in some instances, responded to such constraints by committing to higher inventory purchases and balances relative to our historical positions in order to secure manufacturing capacity, components to fulfill orders, or both. While these measures have been taken to shorten lead times to deliver products to customers, they may also result in excess or obsolete components in the future if the demand for our products is less than we anticipate or orders are cancelled, which could adversely affect our business and financial performance. We make estimates and assumptions in connection with the preparation of our Consolidated Financial Statements and any changes to those estimates and assumptions could adversely affect our results of operations. In connection with the preparation of our Consolidated Financial Statements, we use certain estimates and assumptions based on historical experience and other factors. Our most critical accounting estimates are described in the section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations." In addition, as discussed in Note 1, "Overview and Summary of Significant Accounting Policies" "Use of Estimates" and Note 17, "Litigation, Contingencies, and Commitments" to our Consolidated Financial Statements in Item "8 of Part II, we make certain estimates, including decisions related to provisions for legal proceedings and other contingencies. While we believe that these estimates and assumptions are reasonable under the circumstances, they are subject to significant uncertainties, some of which are beyond our control. Should any of these estimates and assumptions change or prove to have been incorrect, it could adversely affect our results of operations. Declaration, payment and amounts of dividends, if any, to holders of our shares will be uncertain. Our board of directors will have the discretion to determine whether any dividends on our common stock will be declared, when dividends, if any, are declared, and the amount of such dividends. We expect that such determination would be based on a number of considerations, including our results of operations and capital management plans, availability of funds, our access to capital markets, as well as industry practice, and other factors deemed relevant by our board of directors. In addition, on September 13, 2024, we issued 30,000,000 shares of 7.625% Series C Mandatory Convertible Preferred Stock with a dividend rate of 7.625% per annum on the liquidation preference of \$50 per share (the "Preferred Stock"). The Preferred Stock ranks senior to our common stock with respect to the payment of dividends. As long as any share of Preferred Stock is outstanding, unless all accumulated and unpaid dividends on the Preferred Stock for all preceding dividend periods have been declared and paid in full or declared and set apart for payment, we may not declare, pay or set apart for payment any dividends on our common stock or any other class or series of stock that ranks junior to the Preferred Stock. Dividends on the Preferred Stock are discretionary and cumulative. Holders of Preferred Stock will only receive dividends on their shares when, as and if declared by our board of directors. If dividends on the Preferred Stock have not been declared and paid for the equivalent of six or more quarterly dividend periods, whether or not consecutive, holders of Preferred Stock, together as a class with holders of any other series of parity stock with like voting rights, will be entitled to vote for the election of two additional directors to our board of directors. This right to elect additional directors to our board of directors will dilute the representation of our stockholders on our board of directors and may adversely affect the market price of our common stock. When quarterly dividends have been declared and set apart for payment in full, the right of the holders of Preferred Stock to elect these two additional directors will cease, the terms of office of these two directors will forthwith terminate and the number of directors constituting our board of directors will be reduced accordingly. Additional risks related to the Preferred Stock are contained in the prospectus supplement dated September 10, 2024. Regulatory and Government Risks Our business is subject to various federal, state, local and foreign laws and regulations that could result in costs or other sanctions that adversely affect our business and results of operations. We are subject to various US (federal, state, and local), and foreign laws and regulations. Laws and regulations may change in ways that will require us to modify our business model and objectives or affect our returns on investments by restricting existing activities and products, subjecting them to escalating costs or prohibiting them outright. For example, as a result of laws and regulations concerning responsible and sustainable business practices, we face increasing complexity related to product design, safety and compliance; the use of regulated, hazardous, and scarce materials; the management, movement and disposal of hazardous substances and waste; the associated energy consumption and efficiency related to operations and the 32Table of Contentuse of products, services, and solutions; the transportation and shipping of products and other materials; supply chain due diligence; climate change adaptation and mitigation; greenhouse gas emissions; sustainability-related regulations and reporting requirements; and the reuse, recycling and/or disposal of products and their components at end-of-use or useful life and associated operational or financial responsibility. A significant portion of our hardware revenues come from international sales. Any changes to current environmental legal requirements may increase our cost of doing business internationally and impact our hardware revenues from the EU, U.S., China, India and/or other countries proposing or adopting similar environmental legal requirements. In addition, other sustainability reporting-related laws, regulations, treaties, and similar initiatives and programs are being proposed, adopted, and implemented throughout the world. If we were to violate or become liable under environmental or certain sustainability-related laws or if our products become non-compliant with such laws or market access requirements, it could result in loss of market access or limit offerings in those markets or our customers may refuse to purchase our products, and we could incur costs or face other sanctions, such as restrictions on our products entering certain jurisdictions, fines, and/or civil or criminal sanctions. Environmental regulations may also impact the availability and cost of energy or emissions related to energy consumption which may increase our cost of manufacturing and/or the cost of powering and cooling owned IT infrastructures. In addition, our business is subject to an ever-growing number of laws and regulations addressing privacy and information security, including the use of AI. In particular, we face an increasingly complex global regulatory environment and patchwork of state laws in the U.S., increasing the risks addressing these regulatory requirements and in responding to potential security and data incidents. The increase inaaS offerings may also be impacted by data localization and international data transfer requirements under various privacy laws, including the European Union's General Data Protection Regulation. Given our significant employee and operational presence in India, the Digital Personal Data Protection Act (which was approved in August 2023) has imposed, and may continue to impose, additional restrictions and compliance costs on us. Furthermore, the rapid development and deployment of tools that leverage AI is also causing governments to consider and implement regulation of AI, even for AI that does not pertain to personal data, which is impacting and may further impact the use and incorporation of AI capabilities in our offerings and in our customer's demand for such offerings. We have received inquiries, and may be subject to demands, claims, lawsuits, regulatory investigations, and additional inquiries (including those from U.S. or foreign governmental authorities), relating to AI use cybersecurity and data incidents that we have experienced or may in the future experience. If we were to violate or become liable under laws or regulations associated with privacy or security or the use of AI, we could incur substantial costs or be exposed to potential regulatory fines, civil or criminal sanctions, third-party claims, and reputational damage. Our actual or perceived failure to comply with applicable laws and regulations or other obligations relating to these topics could subject us to liability to our customers, data subjects, suppliers, business partners, employees, and others, give rise to legal and/or regulatory action, could damage our reputation or could otherwise materially harm our business, any of which could have an adverse effect on our business, operating results, and financial condition. Jurisdictions in which we have significant operations and assets, such as the U.S., China, India, and the E.U., each have exercised and continue to exercise significant influence over many aspects of their domestic economies including, but not limited to fair competition, tax practices, anti-corruption, anti-trust, responsible sourcing and human rights (including the use of conflict minerals), price controls and international trade, which have had and may continue to have an adverse effect on our business operations and financial condition. Contracts with federal, state, provincial, and local governments are subject to a number of challenges and risks that may adversely impact our business. Our contracts with federal, state, provincial, and local governmental customers are subject to various government procurement laws and regulations, required contract provisions, and other requirements relating to contract formation, administration, and performance, as well as local content, manufacturing, information security and security requirements. Any violation of government contracting laws and regulations or contract terms could result in the imposition of various civil and criminal penalties, which may include termination of contracts, forfeiture of profits, suspension of payments and fines, treble damages, and suspension from future government contracting. Additionally, changes in underlying regulatory requirements that vary across the geographies in which we operate could increase compliance costs and risks. Such failures could also cause reputational damage to our business. In addition, in the US, we will continue to be subject to qui tam litigation brought by private individuals on behalf of the government relating to our government contracts. If we are suspended or disbarred from government work or if our ability to compete for new government contracts is adversely affected, our financial performance could suffer. Government contracts impose additional challenges and risks to our sales efforts. Government demand and payment for our products and services may be impacted by public sector budgetary cycles and funding authorizations, including in connection with an extended government shutdown, with funding reductions, or delays adversely affecting public sector demand for our products and services. Such developments could result in material payment delays, payment reductions, or contract terminations by our governmental customers, which may impact our results of operations and financial condition. These may also adversely impact the results of operations and financial condition of government contractors with whom we 33Table of Contentconduct business. This may cause those government contractors to become unable to meet their obligations under contracts with us. Unanticipated changes in our tax provisions, the adoption of new tax legislation or exposure to additional tax liabilities could affect our financial performance. We are subject to income and other taxes in the United States and numerous foreign jurisdictions. Our tax liabilities are affected by the amounts we charge in intercompany transactions for inventory, services, licenses, funding, and other items. We are subject to ongoing tax audits in various jurisdictions. Tax authorities may disagree with our intercompany charges, cross-jurisdictional transfer pricing or other matters, and may assess additional taxes as a result. There can be no assurance that we will accurately predict the outcomes of these audits, and the amounts ultimately paid upon resolution of audits could be materially different from the amounts previously included in our income tax expense and therefore could have a material impact on our tax provision, net income and cash flows. In addition, our effective tax rate in the future could be adversely affected by acquisitions, changes to our operating structure, changes in the mix of earnings in countries with differing

statutory tax rates, changes in the valuation of deferred tax assets and liabilities, changes in tax laws, and the discovery of new information in the course of our tax return preparation process. The carrying value of our deferred tax assets is dependent on our ability to generate future taxable income. The Organization for Economic Co-operation and Development (   OECD   ), an international association of 38 countries including the United States, has proposed changes to numerous long-standing tax principles, namely, its Pillar Two framework, which imposes a global minimum corporate tax rate of 15%. To date, 43 countries have enacted portions, or all, of the OECD proposal and a further 22 countries have drafted, or have announced an intent to draft, legislation enacting the proposed rules. Where enacted, the rules begin to be effective for us in fiscal 2025. Under US GAAP, the OECD Pillar Two rules are considered an alternative minimum tax, and therefore deferred taxes would not be recognized or adjusted for the estimated effects of the future minimum tax. As a result, there was no impact to our fiscal 2024 results. The adoption and effective dates of these rules may vary by country and could increase tax complexity and uncertainty and may adversely affect our provision for income taxes. We currently do not expect a material impact to our fiscal 2025 results.During fiscal 2019, we executed a Termination and Mutual Release Agreement which terminated our Tax Matters Agreement with HP Inc. Because we now have limited indemnity rights from HP Inc., we potentially bear more economic risk for certain potential unfavorable tax assessments.Risks Related to Prior Separations The stock distribution in either or both of the completed separations of our former Enterprise Services business and our former Software segment could result in significant tax liability, and DXC Technology Company or Micro Focus International plc (as applicable) may in certain cases be obligated to indemnify us for any such tax liability imposed on us. The completed separations and mergers of our former Enterprise Services business with DXC Technology Company (   DXC   ) (the    Everett Transaction    or    Everett   ) and our Software Segment with Micro Focus International plc (   Micro Focus   ) (the    Seattle Transaction    or    Seattle   ) were conditioned upon the receipt of an opinion from outside counsel regarding the qualification of (i) the relevant distribution and related transactions as a    reorganization    within the meaning of Sections 368(a), 361 and 355 of the Internal Revenue Code of 1986 (the    Code   ) and (ii) the relevant merger as a    reorganization    within the meaning of Section 368(a) of the Code. While the Seattle Transaction generally qualified for tax-free treatment for us, Seattle SpinCo and Micro Focus, the acquisition of Seattle SpinCo by Micro Focus resulted in the recognition of gain (but not loss) for U.S. persons who received Micro Focus American Depositary Shares in the Software separation.Each opinion of outside counsel was based upon and relied on, among other things, certain facts and assumptions, as well as certain representations, statements and undertakings of us, Everett SpinCo and CSC, or us, Seattle SpinCo and Micro Focus, as applicable. If any of these representations, statements or undertakings are, or become, inaccurate or incomplete, or if any party breaches any of its covenants in the relevant separation documents, the relevant opinion of counsel may be invalid and the conclusions reached therein could be jeopardized. Notwithstanding the opinions of counsel, the Internal Revenue Service (the    IRS   ) could determine that either or both of the distributions should be treated as a taxable transaction if it determines that any of the facts, assumptions, representations, statements or undertakings upon which the relevant opinion of counsel was based are false or have been violated, or if it disagrees with the conclusions in the opinion of counsel. An opinion of counsel is not binding on the IRS and there can be no assurance that the IRS will not assert a contrary position.If the distribution of Everett SpinCo or Seattle SpinCo, as applicable, together with certain related transactions, failed to qualify as a transaction that is generally tax-free, for U.S. federal income tax purposes, under Sections 355 and 368(a)(1)(D) of the Code, in general, we would recognize taxable gain as if we had sold the stock of Everett SpinCo or Seattle SpinCo, as applicable, in a taxable sale for its fair market value, and our stockholders who receive Everett SpinCo shares or Seattle SpinCo shares in the relevant distribution would be subject to tax as if they had received a taxable distribution equal to the fair market value of such shares.34Table of ContentWe obtained private letter rulings from the IRS regarding certain U.S. federal income tax matters relating to the separation of our Enterprise Services business and Software Segment. Those rulings concluded that certain transactions in those separations are generally tax-free for U.S. federal income tax purposes. The conclusions of the IRS private letter rulings were based, among other things, on various factual assumptions we have authorized and representations we have made to the IRS. If any of these assumptions or representations are, or become, inaccurate or incomplete, the validity of the IRS private letter rulings may be affected. Notwithstanding the foregoing, we incurred certain tax costs in connection with the completed separation of our former Enterprise Services business and Software Segment, including non-U.S. tax expenses resulting from the completed separation of our former Enterprise Services business and Software Segment in multiple non-U.S. jurisdictions that do not legally provide for tax-free separations, which may be material. If the completed separation of our former Enterprise Services business or Software Segment (including certain internal transactions undertaken in anticipation of those separations) are determined to be taxable for U.S. federal income tax purposes, we, our stockholders that are subject to U.S. federal income tax and/or DXC and/or Micro Focus could incur significant U.S. federal income tax liabilities.We continue to face a number of risks related to our separation from HP Inc., our former parent, including those associated with ongoing indemnification obligations, which could adversely affect our financial condition and results of operations, and shared use of certain intellectual property rights, which could in the future adversely impact our reputation. In connection with our separation from HP Inc. on November 1, 2015 (the    Separation   ), Hewlett Packard Enterprise and HP Inc. entered into several agreements that determine the allocation of assets and liabilities between the companies following the Separation and include any necessary indemnifications related to liabilities and obligations. In these agreements, HP Inc. agreed to indemnify us for certain liabilities, and we agreed to indemnify HP Inc. for certain liabilities, including cross-indemnities that are designed and intended to place financial responsibility for the obligations and liabilities of our business with us, and financial responsibility for the obligations and liabilities of HP Inc.'s business with HP Inc. We may be obligated to fully indemnify HP Inc. for certain liabilities under the Separation agreements or HP Inc. may not be able to fully cover their indemnification obligations to us under the same Separation agreements. Each of these risks could negatively affect our business, financial position, results of operations, and cash flows. In addition, the terms of the Separation also include licenses and other arrangements to provide for certain ongoing use of intellectual property in the operations of both businesses. For example, through a joint brand holding structure, both Hewlett Packard Enterprise and HP Inc. retain the ability to make ongoing use of certain variations of the legacy Hewlett-Packard and HP branding, respectively. As a result of this continuing shared use of the legacy branding there is a risk that conduct or events adversely affecting the reputation of HP Inc. could also adversely affect our reputation. General Risks Our stock price has fluctuated and may continue to fluctuate, which may make future prices of our stock difficult to predict. Investors should not rely on recent or historical trends to predict future stock prices, financial condition, results of operations, or cash flows. Our stock price, like that of other technology companies, can be volatile and can be affected by, among other things, speculation, coverage, or sentiment in the media or the investment community; the announcement and anticipated timing of new, planned or contemplated products, services, technological innovations, acquisitions, divestitures, or other significant transactions by us or our competitors; developments in our as-a-service business model; our perceived progress in integrating acquired companies; our quarterly financial results and comparisons to estimates by the investment community or financial outlook provided by us; the financial results and business strategies of our competitors; inflation; market volatility or downturns caused by outbreaks, epidemics, pandemics, geopolitical tensions or conflicts, or other macroeconomic dynamics; developments relating to pending investigations, claims, and disputes; or the timing and amount of our share repurchases. General or industry specific market conditions or stock market performance or domestic or international macroeconomic and geopolitical factors unrelated to our performance also may affect the price of our stock. Volatility in the price of our securities could result in the filing of securities class action litigation matters, which could result in substantial costs and the diversion of management time and resources.35Table of ContentITEM 1B. Unresolved Staff Comments.None.ITEM 1C. Cybersecurity.Risk Management and Strategy Our Cybersecurity and Digital Risk Management (   CDRM   ) organization, under the leadership of a Global Chief Information Security Officer (   Global CISO   ), operates a cybersecurity program that is designed to help us assess, identify, manage, and mitigate risks relating to cybersecurity threats and incidents. We design our cybersecurity standards, policies, processes and controls to operate in an integrated manner, leveraging applicable industry standards and security frameworks, including the NIST Cybersecurity Framework, as guides in supporting our ability to perform such functions. CDRM manages our cybersecurity program, including by fostering collaboration with partners across business units and functional areas to identify and assess material cybersecurity threats, evaluate their severity, and explore ways to mitigate and manage such risks. Business units and functional areas are responsible for managing risks and implementing our policies and standards within the respective business unit or function. Compliance with our policies and standards is assessed by CDRM in conjunction with our internal audit function, through periodic cybersecurity audits. As part of our cybersecurity program, we maintain a Cyber Risk Management Program that seeks to address key risk management concepts, including mission and vision, escalation path for risk mitigation, risk assessments, and risk treatment. We do so by conducting a variety of planning and preparedness activities, including employing monitoring tools to identify suspicious or anomalous activity, vulnerabilities, or signs of compromise across our networks, systems, and data. We utilize data from attack surface management tools to produce a prioritized set of vulnerabilities for remediation. We also require mandatory cybersecurity training for employees and periodically conduct Company-wide phishing simulations. To aide in assessing material risks from cybersecurity threats, our enterprise risk management (   ERM   ) program incorporates cybersecurity risks as part of its process to assess overall risk of the Company. The ERM organization supports management by facilitating a semi-annual risk assessment, which documents the priority and status of these risks and aligns them with our strategic mitigation efforts. ERM is structured using a framework based on guidance from the Committee of Sponsoring Organizations of the Treadway Commission on Enterprise Risk Management Integrating Strategy with Performance. Within CDRM, our Cybersecurity Defense Center (   CDC   ) has established policies, processes, and controls that are designed to monitor, detect, investigate, respond to, and escalate management of cybersecurity threats and incidents. If we experience a cybersecurity incident, the CDC activates an incident response plan, which includes processes to enable us to triage, assess severity of, escalate, contain, investigate, and remediate the incident, as well as to comply with applicable legal obligations and mitigate brand and reputational harm. Based on initial investigation into such incident   s impact to the Company, the actor(s) involved, and other factors, the CDC assigns a severity level to an incident, which dictates the escalation path for a given incident. For incidents rising to higher levels of severity, the Cyber Governance and Incident Disclosure Committee, a cross-functional committee spanning cybersecurity, IT, legal, finance, enterprise risk management, and compliance teams, assesses the severity and potential materiality of such incidents and, as appropriate, escalates to designated members of our senior management for further assessment, response, and remediation. Additionally, we have established a Cyber Crisis Management Team, responsible for addressing and responding to the most severe cyber incidents. If warranted, senior management notifies the Audit Committee and/or the full Board of Directors, as appropriate. Throughout this process, the CDC continues to investigate the incident and, as its understanding of the incident evolves, updates its severity assessment, as necessary. We engage third-party security experts, assessors, and consultants, as appropriate, to assess our cybersecurity risk management processes; support our ongoing certification efforts; help identify areas for continued focus, improvement, and compliance; and support incident response functions, to the extent necessary, all of which support our cybersecurity program. From time to time, we conduct third-party-administered, as well as internally administered, tabletop exercises, which simulate cybersecurity threats, to assess our existing cybersecurity infrastructure and incident response processes. We also periodically conduct offensive security assessments and vulnerability tests, and continuously monitor our computing environments to gain visibility into our security posture and detect vulnerabilities, abnormalities, or signs of compromise. In addition to monitoring risks from threats to our own assets, we administer third-party risk management practices that endeavor to help identify and manage supply chain and vendor risk arising from some of our key suppliers and other service provider organizations. We do so in a variety of ways, such as gathering information on third parties    cybersecurity programs and controls, performing due diligence, undertaking cybersecurity reviews and/or audits, and/or mandating certain contractual requirements, such as notification of cybersecurity incidents. 36Table of ContentGovernance Our Global CISO, who reports to our Chief Operating and Legal Officer (   COLO   ), has principal management-level responsibility for our cybersecurity program, which includes assessing and managing our cybersecurity risks, along with developing and implementing cybersecurity processes, policies, and controls that are used for managing cybersecurity risk across the Company. Our Global CISO is supported by the CISO of Cyber Defense and the CISO of Cyber Governance     both of whom have extensive experience in private sector cybersecurity roles     and a team of cybersecurity professionals with relevant educational and industry experience. The Global CISO periodically meets with the Cyber Governance and Incident Disclosure Committee, our enterprise risk management function and chief-level executives to discuss cybersecurity risks, as well as related mitigation and remediation activities. The CDC monitors the prevention, detection, investigation, mitigation, response to, and remediation of cybersecurity incidents, and regularly reports to our CISO of Cyber Defense, who then subsequently reports to the Global CISO.Our Board of Directors is responsible for overseeing cybersecurity risk, primarily through the Audit Committee. Cybersecurity reviews by the Audit Committee and the Board of Directors are scheduled to occur at least quarterly and annually, respectively, or more frequently, as deemed necessary or advisable. Such presentations to the Audit Committee and Board of Directors, as applicable, are made by our COLO and Global CISO and address topics such as cybersecurity threats, incidents, risks, results from internal and third-party assessments, progress towards risk-mitigation goals, the functioning of our incident response program, and regulatory developments. At times, the Audit Committee may receive additional cybersecurity risk reviews from other members of management and/or internal cybersecurity experts on certain of our key business segments and products. The Audit Committee regularly reports to our Board of Directors regarding the committee   s oversight of such cybersecurity matters. Additionally, the COLO and Global CISO may provide ad hoc updates to the Board of Directors and/or the Audit Committee if necessitated by a security incident or other significant developments. HPE, like all organizations operating in the technology landscape, faces significant and persistent cybersecurity risks. To date, no risks from cybersecurity threats, including as a result of any previous cybersecurity incident, have materially affected us, including our business strategy, results of operations, or financial condition. Notwithstanding our cybersecurity program, we may not be successful in identifying a cybersecurity risk or preventing or mitigating a cybersecurity incident or vulnerability, which if realized, could reasonably likely materially affect us. Additional information on the cybersecurity risks we face can be found in the section titled    Risk Factors    in Item 1A of Part I of this Annual Report on Form 10-K.Our prior Global CISO departed HPE at the end of October 2024. We have identified a successor, who will join HPE in January 2025, previously served in relevant leadership positions at other public and private companies, and will bring over two decades of technology experience spanning information security and IT, including serving as CISO at other large companies. In the interim, our CDRM organization has been and will be led by our CISO of Cyber Defense and CISO of Cyber Governance, both reporting directly to our COLO.ITEM 2. Properties.As of October 31, 2024, we owned or leased approximately 11A million square feet of space worldwide, which included 3A million square feet of vacated space. A summary of the Company's operationally utilized space is provided below.    As of October 31, 2024A OwnedLeasedTotalA (Square feet in millions)Administration and support2A 4A 6A (Percentage)33A %67A %100A %Core data centers, manufacturing plants, research and development facilities, and warehouse operations1A 1A 2A (Percentage)50A %50A %100A %A Total3A 5A 8A (Percentage)37A %63A %100A %We believe that our existing properties are in good condition and are suitable for the conduct of our business. Mine Safety Disclosures. Not applicable.38Table of ContentPART IIITEM 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities. Market InformationThe common stock of Hewlett Packard Enterprise is listed on the New York Stock Exchange with the ticker symbol    HPE.    HoldersAs of DecemberA 9, 2024, there were 43,102 stockholders of record of Hewlett Packard Enterprise common stock.DividendsDuring fiscal 2024, we paid a quarterly dividend of \$0.13 per share of common stock to our holders of common stock. On December 5, 2024 we declared a quarterly dividend of \$0.13 per share of common stock, payable on January 16, 2025, to stockholders of record as of the close of business on December 20, 2024.We also declared a cash dividend of \$0.82604167 per share of our 7.625% Series C Mandatory Convertible Preferred Stock (the    Preferred Stock   ), which was paid on December 1, 2024, to holders of record as of the close of business on November 15, 2024.The payment of any dividends in the future on shares of our common stock and our Preferred Stock, and the timing and amount thereof, is within the sole discretion of our Board of Directors. Our Board of Directors' decisions regarding the payment of dividends will depend on many factors, such as our financial condition, earnings, capital requirements, debt service obligations, restrictive covenants in our debt, industry practice, legal

requirements, regulatory constraints, and other factors that our Board of Directors deems relevant. Our ability to pay dividends will depend on our ongoing ability to generate cash from operations and on our access to the capital markets. Furthermore, so long as any share of our Preferred Stock remains outstanding, no dividend on shares of common stock (or any other class of stock junior to the Preferred Stock) shall be declared or paid unless all accumulated and unpaid dividends for all preceding dividend periods for the Preferred Stock have been declared and paid in full in cash, shares of our common stock or a combination thereof, or a sufficient sum of cash or number of shares of our common stock has been set apart for the payment of such dividends, on all outstanding shares of the Preferred Stock. We cannot guarantee that we will continue to pay a dividend in any future period. This program, which does not have a specific expiration date, authorizes repurchases in the open market or in private transactions. The Company may choose to repurchase shares when sufficient liquidity exists and the shares are trading at a discount relative to estimated intrinsic value. As of October 31, 2024, the Company had a remaining authorization of approximately \$0.8 billion for future share repurchases. Stock Performance Graph and Cumulative Total Return The graph below shows a comparison of cumulative total stockholder return, the S&P 500 Index, and the S&P Information Technology Index. This graph covers the period from October 31, 2019 through October 31, 2024. This graph assumes the investment of \$100 in the stock or the index on October 31, 2019 (and the reinvestment of dividends thereafter). 39Table of ContentThe comparisons in the graph below are based on historical data and are not indicative of, or intended to forecast, future performance of our common stock on 10/201910/202110/202210/202310/2024Hewlett Packard Enterprise\$100.00A \$54.88A \$96.26A \$96.84A \$107.55A \$140.18A S&P 500 Index\$100.00A \$109.70A \$156.75A \$133.82A \$147.36A \$203.35A S&P Information Technology Index\$100.00A \$134.47A \$197.56A \$157.53A \$206.12A \$311.72A ITEM 6. [Reserved]40Table of ContentITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.For purposes of this Management's Discussion and Analysis of Financial Condition and Results of Operations (the MD&A) section, we use the terms the Hewlett Packard Enterprise, the HPE, the the Company, the the, the, and the to refer to Hewlett Packard Enterprise Company. This section of this Form 10-K generally discusses fiscal 2024 and fiscal 2023 items and year-to-year comparisons between fiscal 2024 and fiscal 2023. Discussions of fiscal 2022 items and year-to-year comparisons between fiscal 2023 and fiscal 2022 that are not included in this Form 10-K can be found in the Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations of the Company's Annual Report on Form 10-K for the fiscal year October 31, 2023, as filed with the SEC on December 22, 2023, which is available on the SEC's website at www.sec.gov. We intend the discussion of our financial condition and results of operations that follows to provide information that will assist the reader in understanding our Consolidated Financial Statements, changes in certain key items in these financial statements from year to year, and the primary factors that accounted for these changes, as well as how certain accounting principles, policies and estimates affect our Consolidated Financial Statements. This discussion should be read in conjunction with our Consolidated Financial Statements and the related notes that appear elsewhere in this document. This MD&A is organized as follows: Trends and Uncertainties. A discussion of material events and uncertainties known to management, such as the mixed macroeconomic environment of supply chain constraints (though easing), uneven demand across our portfolio, increased demand for and adoption of new technologies, conservative (though recovering) customer spending environment, persistent inflation, foreign exchange pressures, recent tax developments, and pending merger with Juniper Networks, Inc. (the Juniper Networks). Executive Overview. A discussion of our business and a summary of our financial performance and other highlights, including non-GAAP financial measures, affecting the Company in order to provide context to the remainder of the MD&A. Critical Accounting Policies and Estimates. A discussion of accounting policies and estimates that we believe are important to understanding the assumptions and judgments incorporated in our reported financial results. Results of Operations. A discussion of the results of operations at the consolidated level is followed by a discussion of the results of operations at the segment level. Liquidity and Capital Resources. An analysis of changes in our cash flows, financial condition, liquidity, and cash requirements and commitments. GAAP to Non-GAAP Reconciliations. Each non-GAAP financial measure has been reconciled to the most directly comparable GAAP financial measure. This section also includes a discussion of the use, usefulness and economic substance of the non-GAAP financial measures, along with a discussion of material limitations, and compensation for those limitations, associated with the use of non-GAAP financial measures. TRENDS AND UNCERTAINTIES During fiscal 2024, the effects of the evolving macroeconomic environment on demand persisted and certain significant developments impacted our operations as follows: Technological Advancements: We have observed market trends and demand (of customers of various segments and sizes) gravitating towards artificial intelligence (the AI), hybrid cloud, edge computing, data security capabilities, and related offerings. The volume of data at the edge continues to grow, driven by the proliferation of more devices. The need for a unified cloud experience everywhere has grown, as well, in order to manage the growth of data at the edge. With the abundance of data, there are opportunities to develop AI tools with powerful computational abilities to extract insights and value from the captured data. Increasing demand for AI is also contributing to changes in the competitive landscape. Our major competitors and emerging competitors are expanding their product and service offerings with integrated products and solutions and exerting increased competitive pressure. We expect these market dynamics and trends to continue in the longer term. Macroeconomic Uncertainty: The effect of the evolving macroeconomic environment has been impacting industry-wide demand, as customers take longer to work through prior orders and have been adopting a more conservative approach to discretionary IT spending. This has resulted in uneven demand across our portfolio and geographies, particularly for certain of our hardware offerings, as customers have focused investments on modernizing infrastructure, such as migrating to cloud-based AI. Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) offerings, including our own. We expect such mixed macroeconomic environment to largely continue (though ease slightly) and possibly limit revenue growth in the near term. Supply Chain: During fiscal 2024, we experienced supply chain constraints for certain components, including graphics processing units (the GPU) and accelerated processing units, but they have since eased, in part due to increased availability of supply and lower material and logistics costs. Logistics costs decreased from previously elevated levels as a result of declines in both expedited shipments and overall rate costs in the freight network. We have, in fact, been experiencing higher-than-normal inventory levels, primarily due to customers transitioning to the next generation of GPUs, our securing supply ahead of demand, and longer customer acceptance timelines on AI-related orders; we expect this trend to continue in the medium term. We have experienced, and expect to continue experiencing, rising input component costs and a competitive pricing environment, which may impact our financial results. We plan to mitigate the impact of these dynamics through continued disciplined cost and pricing management. Recurring Revenue and Consumption Models: We continue to strengthen our core server and storage-oriented offerings and expand our offerings on the HPE GreenLake cloud, to deliver our entire portfolio as-a-service (the aaS) and become the edge-to-cloud company for our customers and partners. We expect that such flexible consumption model will continue to strengthen our customer relationships and contribute to growth in recurring revenue. Foreign Currency Exposure: We have a large global presence, with more than half of our revenue generated outside of the U.S. As a result, our financial results can be, and particularly in recent periods have been, impacted by fluctuations in foreign currency exchange rates. We utilize a comprehensive hedging strategy intended to mitigate the impact of foreign currency volatility over time, and we adjust pricing when possible to further minimize foreign currency impacts. Recent Tax Developments: The Organisation for Economic Co-operation and Development (the OECD), an international association of 38 countries including the United States, has proposed changes to numerous long-standing tax principles, namely, its Pillar Two framework, which imposes a global minimum corporate tax rate of 15%. To date, 43 countries have enacted portions, or all, of the OECD proposal and a further 22 countries have drafted, or have announced an intent to draft, legislation enacting the proposed rules. Where enacted, the rules begin to be effective for us in fiscal 2025. Under US GAAP, the OECD Pillar Two rules are considered an alternative minimum tax and therefore deferred taxes would not be recognized or adjusted for the estimated effects of the future minimum tax. As a result, there was no impact to our fiscal 2024 results. The adoption and effective dates of these rules may vary by country and could increase tax complexity and uncertainty and may adversely affect our provision for income taxes. We currently do not expect a material impact to our fiscal 2025 results. The Internal Revenue Service (the IRS) is conducting audits of our fiscal 2017 through 2022 U.S. federal income tax returns. During fiscal 2023, the IRS issued notices of proposed adjustments (the NOPAs) for 2017, 2018, and 2019 relating to our intercompany transfer pricing. During the first quarter of fiscal 2024, the IRS issued a Revenue Agent Report finalizing their position on the NOPAs for the same issues and same fiscal years. However, we disagreed with the IRS' adjustments and believe the positions taken on our tax returns are more likely than not to prevail on technical merits and have continued with settlement discussions with the IRS. During the third quarter of fiscal 2024, we submitted a formal settlement offer to the IRS to facilitate the closing of the audit and recorded increased reserves for unrecognized tax benefits of \$122 million. The impact of the increase in reserves is almost entirely offset with a valuation allowance release, and the net impact to income tax expense for fiscal 2024 was not material. It is reasonably possible that the IRS audit for fiscal 2017 through 2019 may be concluded in the next 12 months, and it is reasonably possible that existing unrecognized tax benefits related to these years may be reduced by an amount up to \$358 million within the next 12 months, the majority of which relates to adjustments to foreign tax credits that carry a full valuation allowance or to the timing of intercompany royalty revenue recognition, neither of which affects the Company's effective tax rate. Other Trends and Uncertainties: The impacts of trade protection measures, including increases in tariffs and trade barriers, changes in government policies and international trade arrangements, geopolitical volatility (including the ongoing conflict in the Middle East), and global macroeconomic challenges (including the relationship between China and the U.S.), may impact our operations, financial performance, and ability to conduct business in some non-U.S. markets. We monitor and seek to mitigate these risks with adjustments to our manufacturing, supply chain, and distribution networks. 42Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) Pending Merger with Juniper Networks, Inc. On January 9, 2024, we entered into a definitive Agreement and Plan of Merger (the Merger Agreement) under which we will acquire Juniper Networks in an all-cash transaction for \$40.00 per share (the Merger), representing an equity value of approximately \$14 billion. On April 2, 2024, Juniper Networks shareholders approved the transaction. The transaction is expected to be funded based on senior unsecured delayed draw term loans from a syndicate of banks, the post-tax proceeds from our sale to Unisplendour International Technology Limited (the UNIS) of 30% of the total issued share capital of H3C Technologies Co., Limited (the H3C), the net proceeds (including after repayments of maturing debt) of our September 2024 issuances of senior unsecured notes and the Preferred Stock (as further described in Note 15, the Stockholders' Equity) to the Consolidated Financial Statements in Item 8 of Part II), and cash on the balance sheet. The closing of the transaction remains subject to receipt of regulatory approvals and satisfaction of other customary closing conditions. For further information about the Merger, see Note 10, the Acquisitions and Dispositions to the Consolidated Financial Statements in Item 8 of Part II, and for further discussion about the risks related to the Merger, see the section titled the Risk Factors in Item 1A of Part I of this Annual Report on Form 10-K. The foregoing summary of the Merger, the adoption of the Merger Agreement, and the transactions contemplated thereby does not purport to be complete and is subject to, and qualified in its entirety by, the full text of the Merger Agreement, which is filed as Exhibit 2.1 to our Current Report on Form 8-K filed with the Securities and Exchange Commission on January 10, 2024. The following Executive Overview, Results of Operations and Liquidity discussions and analysis compare fiscal 2024 to fiscal 2023, unless otherwise noted. The Capital Resources and, Cash Requirements and Commitments sections present information as of October 31, 2024, unless otherwise noted. EXECUTIVE OVERVIEW Net revenue of \$30.1A billion represented an increase of 3.4% (increased 3.3% on a constant currency basis) primarily due to higher average unit prices (the AUP) in the Server segment, moderated by lower volume and product mix effect in the Intelligent Edge segment. The gross profit margin of 32.8% (or \$9.9 billion) represents a decrease of 2.3 percentage points from the prior-year period due to decline in revenue in the Intelligent Edge segment and higher mix of lower margin products in the Server segment. The operating profit margin of 7.3% was relatively flat as compared to the prior-year period. Financial Results The following table summarizes our consolidated GAAP financial results: For the fiscal years ended October 31, 2024 2023 Change In millions, except per share amounts Net revenue \$30,127.3A \$29,135.3A 3.4% Gross profit \$9,878.1A \$10,239.4A (3.5)% Gross profit margin 32.8A % 35.1A % (2.3)pts Earnings from operations \$2,190.4A \$2,089.4A 4.8% Operating profit margin 7.3A % 7.2A % 0.1pts Net earnings attributable to HPE \$2,579.9A \$2,025.4A 27.4% Net earnings attributable to common stockholders 2,554.2A 2,025.26A 26.1% Diluted net earnings per share attributable to common stockholders (1) 1.93A 1.54A \$0.39 Cash flow from operations \$4,341.4A \$4,428.8A (\$87)43 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) The following table summarizes our consolidated non-GAAP financial results: For the fiscal years ended October 31, 2024 2023 Change In millions, except per share amounts Net revenue in constant currency \$30,107.7A \$29,135.3A 3.3% Non-GAAP gross profit \$9,893.4A \$10,273.3A (3.7)% Non-GAAP gross profit margin 32.8A % 35.3A % (2.5)pts Non-GAAP earnings from operations \$3,168.4A \$3,145.0A 0.7% Non-GAAP operating profit margin 10.5A % 10.8A % (0.3)pts Non-GAAP net earnings attributable to HPE \$2,655.4A \$2,832.4A (6.3)% Non-GAAP net earnings attributable to common stockholders 2,630.4A 2,832.4A (7.1)% Non-GAAP diluted net earnings per share attributable to common stockholders (1) 1.99A 2.15A \$(0.16) Free cash flow \$2,297.4A \$2,238.4A \$59(1) For purposes of calculating diluted net EPS, the preferred stock dividends are added back to the net earnings attributable to common stockholders and the diluted weighted average share calculation assumes the preferred stock was converted at issuance or as of the beginning of the reporting period. Each non-GAAP financial measure has been reconciled to the most directly comparable GAAP financial measure herein. Please refer to the section the GAAP to non-GAAP Reconciliations included in this MD&A for these reconciliations, a discussion of the use, usefulness and economic substance of the non-GAAP financial measures, along with a discussion of material limitations, and compensation for those limitations, associated with the use of non-GAAP financial measures. Annualized Revenue Run-rate (the ARR) Our pivot to aS continues its strong momentum with the addition of HPE GreenLake cloud services. Our mix of ARR is becoming more software-rich as we build our HPE GreenLake cloud, which is improving our margin profile. We will continue to invest aggressively in HPE GreenLake cloud services to provide a true cloud experience and operating model, whether at the edge, on-premises or across multiple clouds. ARR represents the annualized revenue of all net HPE GreenLake cloud services revenue, related financial services revenue (which includes rental income from operating leases and interest income from finance leases), and software-as-a-service (the SaaS), software consumption revenue, and other aS offerings, recognized during a quarter and multiplied by four. We believe that ARR is a metric that allows management to better understand and highlight the potential future performance of our aS business. We also believe ARR provides investors with greater transparency to our financial information and of the performance metric used in our financial and operational decision making and allows investors to see our results through the eyes of management. We use ARR as a performance metric. ARR should be viewed independently of net revenue and is not intended to be combined with it. ARR does not have any standardized definition and is therefore unlikely to be comparable to similarly titled measures presented by other companies. ARR is not a forecast and the active contracts at the end of a reporting period used in calculating ARR may or may not be extended or renewed by our customers. The following table presents our ARR: For the fiscal years ended October 31, 2024 2023 Dollars in millions ARR \$1,938.1A \$1,304.4A Year-over-year growth rate 49A % 39A % The 49% year over year increase in ARR was primarily due to growth in our Hybrid Cloud, Server and Intelligent Edge segments, which was due to an expanding customer installed base, an expanded range of HPE GreenLake Flex Solutions, Server aS, and Intelligent Edge aS activity. 44Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) Capital Returns to Shareholders Returning capital to our shareholders remains an important part of our capital allocation framework, which also consists of strategic investments. We believe our existing balance of cash and cash equivalents, along with commercial paper and other short-term liquidity arrangements, are sufficient to satisfy our working capital needs, capital asset purchases, dividends, debt repayments, and other liquidity requirements associated with our existing operations. As of October 31, 2024, our cash, cash equivalents and restricted cash were \$15.1A billion, compared to \$4.6A billion as of October 31, 2023, representing an increase of \$10.5A billion. CRITICAL ACCOUNTING POLICIES AND ESTIMATES Our Consolidated Financial Statements are prepared in accordance with U.S. Generally Accepted Accounting Principles (the GAAP), which requires us to make estimates, judgments, and assumptions that affect the reported amounts of assets, liabilities, net revenue and expenses, and the disclosure of contingent liabilities. A summary of significant accounting policies and a summary of recent accounting pronouncements applicable to our Consolidated Financial Statements are included in

Note 1, Overview and Summary of Significant Accounting Policies, to the Consolidated Financial Statements in Item 8 of Part II. An accounting policy is deemed to be critical if the nature of the estimate or assumption it incorporates is subject to material level of judgment related to matters that are highly uncertain and changes in those estimates and assumptions are reasonably likely to materially impact our Consolidated Financial Statements. Estimates and judgments are based on historical experience, forecasted events, and various other assumptions that we believe to be reasonable under the circumstances. Estimates and judgments may vary under different assumptions or conditions. We evaluate our estimates and judgments on an ongoing basis. We believe the accounting policies below are critical in the portrayal of our financial condition and results of operations and require management's most difficult, subjective, or complex judgments. Revenue Recognition We enter into contracts with customers that may include combinations of products and services, resulting in arrangements containing multiple performance obligations for hardware and software products and/or various services. The majority of our revenue is derived from sales of products and services and the associated support and maintenance, and such revenue is recognized when, or as, control of promised products or services is transferred to the customer at the transaction price. Transaction price is adjusted for variable consideration which may be offered in contracts with customers, partners, and distributors and may include rebates, volume-based discounts, price protection, and other incentive programs. Significant judgment is applied in determining the transaction price as we may be required to estimate variable consideration at the time of revenue recognition. When determining the amount of revenue to recognize, we estimate the expected usage of these programs, applying the expected value or most likely estimate and update the estimate at each reporting period as actual utilization becomes available. Variable consideration is recognized only to the extent that it is probable that a significant reversal of revenue will not occur. We also consider the customers' right of return in determining the transaction price, where applicable. To recognize revenue for the products and services for which control has been transferred, we allocate the transaction price for the contract among the performance obligations on a relative standalone selling price (the SSP) basis. For products and services sold as a bundle, the SSP is generally not directly observable and requires the Company to estimate SSP based on management judgment by considering available data such as internal margin objectives, pricing strategies, market/competitive conditions, historical profitability data, as well as other observable inputs. For certain products and services, the Company establishes SSP based on the observable price when sold separately in similar circumstances to similar customers. The Company establishes SSP ranges for its products and services and reassesses them periodically. Taxes on Earnings We calculate our current and deferred tax provisions based on estimates and assumptions that could differ from the final positions reflected in our income tax returns. We adjust our current and deferred tax provisions based on our tax returns which are generally filed in the third or fourth quarters of the subsequent fiscal year. Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) We recognize deferred tax assets and liabilities for the expected tax consequences of temporary differences between the tax bases of assets and liabilities and their reported amounts using enacted tax rates in effect for the year in which we expect the differences to reverse. We record a valuation allowance to reduce deferred tax assets to the amount that we are more likely than not to realize. In determining the need for a valuation allowance, we consider future market growth, forecasted earnings, future sources of taxable income, the mix of earnings in the jurisdictions in which we operate, and prudent and feasible tax planning strategies. In order for us to realize our deferred tax assets, we must be able to generate sufficient taxable income, of the appropriate character, in the jurisdictions in which the deferred tax assets are located, prior to their expiration under applicable tax laws. Our effective tax rate includes the impact of certain undistributed foreign earnings and basis differences for which we have not provided for U.S. federal taxes because we plan to reinvest such earnings and basis differences indefinitely outside the U.S. We will remit non-indefinitely reinvested earnings of our non-U.S. subsidiaries for which deferred U.S. state income and foreign withholding taxes have been provided where excess cash has accumulated and when we determine that it is advantageous for business operations, tax, or cash management reasons. We are subject to income taxes in the U.S. and approximately 80 other countries, and we are subject to routine corporate income tax audits in many of these jurisdictions. We believe that positions taken on our tax returns are fully supported, but tax authorities may challenge these positions, which may not be fully sustained on examination by the relevant tax authorities. Accordingly, our income tax provision includes amounts intended to satisfy assessments that may result from these challenges. Determining the income tax provision for these potential assessments and recording the related effects requires management judgments and estimates. The amounts ultimately paid on resolution of an audit could be materially different from the amounts previously included in our income tax provision and, therefore, could have a material impact on our Provision for taxes, Net earnings and cash flows. Our accrual for uncertain tax positions is attributable primarily to uncertainties concerning the tax treatment of our international operations, including the allocation of income among different jurisdictions, intercompany transactions and related interest, and uncertain tax positions from acquired companies. For further discussion on taxes on earnings, refer to Note 6, Taxes on Earnings, to the Consolidated Financial Statements in Item 8 of Part II. Goodwill We review goodwill for impairment at the reporting unit level annually on the first day of the fourth quarter, or whenever events or circumstances indicate the carrying amount of goodwill may not be recoverable. We are permitted to conduct a qualitative assessment to determine whether it is necessary to perform a quantitative goodwill impairment test. As of October 31, 2024, our reporting units with goodwill are consistent with the reportable segments identified in Note 2, Segment Information, to the Consolidated Financial Statements in Item 8 of Part II, with the exception of Server, which contains two reporting units: Compute and High Performance Computing & AI (HPC & AI), and Corporate Investments and Other which contains two reporting units: Advisory and Professional Services, and legacy Communications and Media Solutions. When performing the goodwill impairment test, we compare the fair value of each reporting unit to its carrying amount. An impairment exists if the fair value of the reporting unit is less than its carrying amount. Estimating the fair value of a reporting unit is judgmental in nature and involves the use of significant estimates and assumptions. We estimate the fair value of our reporting units using a weighting of fair values derived mostly from the income approach and, to a lesser extent, the market approach. Under the income approach, the fair value of a reporting unit is based on discounted cash flow analysis of management's short-term and long-term forecast of operating performance. This analysis includes significant assumptions regarding revenue growth rates, expected operating margins, and timing of expected future cash flows based on market conditions and customer acceptances. The discount rate used is based on the weighted-average cost of capital of comparable public companies adjusted for the relevant risk associated with business specific characteristics and the uncertainty related to the reporting unit's ability to execute on the projected cash flows. Under the market approach, the fair value is based on market multiples of revenue and earnings derived from comparable publicly traded companies with operating and investment characteristics similar to the reporting unit. We weight the fair value derived from the market approach commensurate with the level of comparability of these publicly traded companies to the reporting unit. When market comparables are not meaningful or not available, we estimate the fair value of a reporting unit using the income approach. In addition, we make certain judgments and assumptions in allocating shared assets and liabilities to individual reporting units to determine the carrying amount of each reporting unit. Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) Annual Goodwill Impairment Review Our annual goodwill impairment analysis, which we performed as of the first day of the fourth quarter of fiscal 2024, did not result in any impairment charges. The excess of fair value over carrying amount for our reporting units ranged from approximately 8% to 198% of the respective carrying amounts. In order to evaluate the sensitivity of the estimated fair value of our reporting units in the goodwill impairment test, we applied a hypothetical 10% decrease to the fair value of each reporting unit. Based on the results of this hypothetical 10% decrease all of the reporting units had an excess of fair value over carrying amount, except for HPC & AI and Hybrid Cloud. The HPC & AI reporting unit has goodwill of \$2.0 billion as of October 31, 2024, and excess of fair value over carrying value of 11% as of the annual test date. The HPC & AI business is growing at a very fast pace driven primarily by the AI demand from model builders, but as GPUs represent a large portion of the solutions, the pricing is very competitive and margins are limited. With the growth of AI in enterprise and sovereign customer segments and key strategic differentiators, such as direct liquid cooling, we believe that there is a potential for continued growth over time. Interim Goodwill Impairment Reviews In September 2024, HPE sold 30% of the total issued share capital of H3C to UNIS. The equity investment in H3C primarily benefits the Compute and Hybrid Cloud reporting units. Subsequent to the sale, on September 30, 2024, we performed an interim goodwill impairment analysis for Compute and Hybrid Cloud reporting units. The excess of fair value over carrying amount for these reporting units was 6% for Compute and 5% for Hybrid Cloud. We also applied a hypothetical 10% decrease to the fair value of Compute and Hybrid Cloud, noting that neither had an excess of fair value over carrying amount. The Compute reporting unit has goodwill of \$8.2 billion as of October 31, 2024, and excess of fair value over carrying value of 6% as of the September 30, 2024 interim test date. The Compute business is cyclical in nature. Over the last several years, digital transformation drove increased investment to modernize infrastructure. However, in the current macroeconomic and inflationary environment, customers have invested selectively resulting in moderate unit growth and competitive pricing. The Compute business continues to focus on capturing market share while maintaining operating margin, leveraging its strong portfolio of ProLiant Gen11 products. The Hybrid Cloud reporting unit has goodwill of \$4.8 billion as of October 31, 2024, and excess of fair value over carrying value of 5% as of the September 30, 2024 interim test date. Although the Hybrid Cloud business is on a positive trajectory, we are managing both a sales model transition and product transition within this business. Our product model transition is to a more cloud-native, software-defined platform with HPE Alletra. Translating this growth to revenue and operating income will take time because a greater mix of high margin business such as ratable software and services, is deferred and recognized in future periods. Our interim 2024 goodwill impairment test performed as of November 1, 2023 based on organizational changes impacting the composition of reporting units as of that date did not result in any impairment charges. RESULTS OF OPERATIONS Revenue from our international operations has historically represented, and we expect will continue to represent, a majority of our overall net revenue. As a result, our revenue growth has been impacted, and we expect will continue to be impacted, by fluctuations in foreign currency exchange rates. In order to provide a framework for assessing performance excluding the impact of foreign currency fluctuations, we present the year-over-year percentage change in revenue on a constant currency basis, which assumes no change in foreign currency exchange rates from the prior-year period and does not adjust for any repricing or demand impacts from changes in foreign currency exchange rates. This change in revenue on a constant currency basis is calculated as the quotient of (a) current year revenue converted to U.S. dollars using the prior-year period's foreign currency exchange rates divided by (b) the prior-year period revenue. This information is provided so that revenue can be viewed without the effect of fluctuations in foreign currency exchange rates, which is consistent with how management evaluates our revenue results and trends. This constant currency disclosure is provided in addition to, and not as a substitute for, the year-over-year percentage change in revenue on a GAAP basis. Other companies may calculate and define similarly labeled items differently, which may limit the usefulness of this measure for comparative purposes. Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) Results of operations in dollars and as a percentage of net revenue were as follows: A For the fiscal years ended October 31, A 2024 2023 2022 Dollars % of Revenue Dollars % of Revenue Dollars % of Revenue A Dollars in millions Net revenues \$30,127A 100.0A % \$29,135A 100.0A % \$28,496A 100.0A % Cost of sales (exclusive of amortization shown separately below) 20,249A 67.2A % 18,896A 64.9A % 18,990A 66.6A % Gross profit 9,878A 32.8A % 10,239A 35.1A % 9,506A 33.4A % Research and development 2,46A 7.5A % 2,349A 8.1A % 2,045A 7.2A % Selling, general and administrative 4,871A 16.2A % 5,160A 17.7A % 4,941A 17.3A % Amortization of intangible assets 267A 0.9A % 288A 1.0A % 293A 1.0A % Impairment of goodwill A A % A A % 905A 3.2A % Transformation costs 93A 0.3A % 283A 1.0A % 473A 1.7A % Disaster charges 7A A % 1A A % 48A 0.2A % Acquisition, disposition and other related charges 204A 0.6A % 69A 0.1A % 19A 0.1A % Earnings from operations 2,190A 7.3A % 2,089A 7.2A % 782A 2.7A % Interest and other, net (117) (0.4) (104) (0.3) (121) (0.4) Gain on sale of equity interest 733A 2.4A % A 0.1A % A A % Earnings from equity interests 147A 0.5A % 245A 0.8A % 215A 0.8A % Earnings before provision for taxes 2,953A 9.8A % 2,30A 7.8A % 876A 3.1A % Provision for taxes (374) (1.2) (205) (0.7) (8) (0.1) Net earnings attributable to HPE 2,579A 8.6A % 2,025A 7.0A % 868A 3.0A % Preferred stock dividends (25) (0.1) A A % A A % Net earnings attributable to common stockholders \$2,554A 8.5A % \$2,025A 7.0A % \$868A 3.0A % Fiscal 2024 compared with fiscal 2023 Net revenue In fiscal 2024, total net revenue of \$30.1 billion represented an increase of \$992 million, or 3.4% (increased 3.3% on a constant currency basis). U.S. net revenue increased by \$521 million, or 5.0% to \$10.9 billion, and net revenue from outside of the U.S. increased by \$471 million, or 2.5%, to \$19.2 billion. The components of the weighted net revenue change by segment were as follows: For the fiscal years ended October 31, 2024 2023 2022 Percentage Points Server 6.4A (3.9) Hybrid Cloud (0.4) 0.9A Intelligent Edge (2.9) 5.3A Financial Services 0.1A 0.5A Corporate Investments and Other 0.1A (0.1) Total segment 3.3A 2.7A Elimination of intersegment net revenue and other 0.1A (0.5) Total HPE 3.4A 2.2A Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) Fiscal 2024 compared with fiscal 2023 From a segment perspective, the primary factors contributing to the change in total net revenue are summarized as follows: A Server net revenue increased \$1,844 million, or 12.8%, primarily due to higher AUPs A Hybrid Cloud net revenue decreased \$107 million, or 1.9%, primarily due to lower AUPs A Intelligent Edge net revenue decreased \$847 million, or 15.7%, primarily due to lower volume and product mix effect A Financial Services net revenue increased \$32 million, or 0.9%, primarily due to higher finance income A Corporate Investments and Other net revenue increased \$29 million, or 2.9%, primarily due to revenue growth from Advisory and Professional Services (A A & PS A) Fiscal 2023 compared with fiscal 2022 From a segment perspective, the primary factors contributing to the change in total net revenue are summarized as follows: A Server net revenue decreased \$1,111 million, or 7.2%, primarily due to lower server unit volume and unfavorable currency fluctuations A Hybrid Cloud net revenue increased \$260 million, or 5.0%, primarily due to higher unit volume A Intelligent Edge net revenue increased \$1,522 million, or 39.5%, primarily due to increased AUPs and volume and product mix effect A Financial Services net revenue increased \$141 million, or 4.2%, primarily due to higher rental revenue from higher average operating leases and higher finance income on finance leases due to an increasing interest rate environment A Corporate Investments and Other net revenue decreased \$27 million, or 2.7%, primarily due to unfavorable currency fluctuations Gross Profit Fiscal 2024 total gross profit margin of 32.8% represents a decrease of 2.3 percentage points as compared to the respective prior year period. The decrease was primarily due to decline in revenue in the Intelligent Edge segment and higher mix of lower margin products in the Server segment. Operating expenses Research and development (A A & D A) R&D expense decreased by \$103 million, or 4.4%, primarily due to capitalization of software costs, which contributed 4.2 percentage points to the change. Selling, general and administrative (A A S G & A A) SG&A expense decreased by \$289 million, or 5.6%, primarily due to lower employee costs, which contributed 3.3 percentage points, lower travel and marketing expenses and lower consulting costs, both of which contributed 1.4 percentage points to the change. Transformation programs and costs Our transformation programs consist of the Cost Optimization and Prioritization Plan (launched in 2020) and the HPE Next Plan (launched in 2017). Transformation costs decreased by \$190 million, or 67.1%, due to lower charges incurred in the current period as the primary elements of these plans have been substantially completed by the end of fiscal 2023. Refer to Note 3, A Transformation Programs A to the Consolidated Financial Statements in Item 8 of Part II for further discussion. Acquisition, disposition and other related charges Acquisition, disposition and other related charges increased by \$135 million or 195.7%, primarily due to costs incurred in connection with the pending acquisition of Juniper Networks. 49 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) Interest and other, net Interest and other, net expense increased by \$13 million or 12.5%, primarily due to lower gain from sale of certain investments and unfavorable currency fluctuations in the current year and the previous year containing tax indemnification income due to an audit settlement. The increase was partially offset by a decrease in net interest expense and lower loss on equity investments in the current year. Gain on sale of equity interest On September 4, 2024, the Company divested 30% of the total issued share capital of H3C to UNIS. We continue to possess the option to sell the remaining 19% of the total issued share capital of H3C at a later date. In connection with this sale, we recorded a gain on sale of equity interest of \$733 million. Earnings from equity interests In fiscal 2024, Earnings from equity interests decreased by \$98 million or 40%, primarily due to lower net income earned by H3C and the disposition of 30% of the total issued share capital of H3C, partially offset by lower amortization expense from basis difference in the current period. Provision for taxes For fiscal 2024 and 2023, we recorded income tax expense of \$374 million and \$205 million, respectively, which reflect effective tax rates of 12.7% and 9.2%, respectively. Our effective tax rate generally differs from the U.S. federal statutory rate of 21% due to favorable tax rates associated with certain earnings from our operations in lower tax jurisdictions throughout the world but may also be materially impacted by discrete tax adjustments during the fiscal year. The jurisdictions with favorable tax rates that had the most significant impact on our effective tax rate in the periods presented include Puerto Rico and Singapore. In fiscal 2024, we recorded \$43 million of net income tax charges related to items discrete to the year. These amounts primarily included: A \$104 million of net income tax charges resulting from the gain on the H3C divestiture, which

which accounts \$215 million of U.S. and foreign income tax charges offset by \$111 million of income tax benefit for the release of an uncertain tax benefit related to the prior divestiture, partially offset by \$54 million of income tax benefits related to transformation costs, and acquisition, disposition and other related charges and \$11 million of net excess tax benefits related to stock-based compensation. In fiscal 2023, we recorded \$131 million of net income tax benefits related to items discrete to the year. These amounts primarily included: \$104 million of income tax benefits related to transformation costs and acquisition, disposition and other related charges and \$19 million of net excess tax benefits related to stock-based compensation. Segment Information

Hewlett Packard Enterprise's organizational structure is based on a number of factors that the Chief Operating Decision Maker, who is the CEO, uses to evaluate, view, and run our business operations, which include, but are not limited to, customer base and homogeneity of products and technology. The segments are based on this organizational structure and information reviewed by Hewlett Packard Enterprise's management to evaluate segment results. A description of the products and services for each segment, along with other pertinent information related to Segments can be found in Note 2, "Segment Information," to the Consolidated Financial Statements in Item 8 of Part II.50

Dollars in millions

Net revenue \$16,205A \$14,361A \$15,472A 12.8A % (7.2)%

Earnings from operations \$1,818A \$1,830A \$1,958A (0.7)% (6.5)%

Earnings from operations as a % of net revenue 11.2A % 12.7A % 12.7A %

Fiscal 2024 compared with fiscal 2023

Server net revenue increased by \$1,844 million, or 12.8% in actual dollars and constant currency, primarily due to a \$1,812 million, or 16.7%, increase in product revenue. The increase in product revenue was primarily due to higher AUPs of \$1,769 million, or 16.3%. Server earnings from operations as a percentage of net revenue decreased 1.5 percentage points primarily due to an increase in costs of products as a percentage of net revenue, moderated by a decrease in operating expenses as a percentage of net revenue. The increase in costs of products as a percentage of net revenue was primarily due to higher mix of lower margin products and competitive pricing pressure. The decrease in operating expenses as a percentage of net revenue was primarily due to lower total operating expenses as a result of cost containment measures. Fiscal 2023 compared with fiscal 2022

Server net revenue decreased by \$1,111 million, or 7.2% (decreased 3.5% on a constant currency basis), primarily due to a \$1,061 million, or 8.9%, decrease in product revenue. The decline in product revenue was primarily due to lower server unit volume of \$1,281 million, or 10.7%, and unfavorable currency fluctuations of \$458 million, or 3.8%. The product revenue decline was moderated by an increase in AUPs of \$683 million, or 5.7%, led by higher sales of server configurations with more complex component architectures in our next generation products. Server earnings from operations as a percentage of net revenue remained relatively flat.

Earnings from operations as a % of net revenue 4.5A % 4.2A % 8.9A %

Fiscal 2024 compared with fiscal 2023

Hybrid Cloud net revenue decreased by \$107 million, or 1.9% (decreased 2.0% on a constant currency basis) primarily due to a decrease in AUPs, partially offset by an increase in unit volume. Hybrid Cloud product revenue decreased \$267 million, or 8.1%, primarily due to a decrease in AUPs of \$831 million, or 25.2%, led by private cloud and storage products, partially offset by a unit volume increase of \$543 million or 16.5%, led by private cloud and storage products. Hybrid Cloud services revenue increased by \$160 million, or 7.3%, primarily due to a unit volume increase of \$275 million, or 12.5%, led by private cloud and infrastructure SaaS. This increase was partially offset by lower AUPs of \$107 million, or 4.9%. Hybrid Cloud earnings from operations as a percentage of net revenue remained relatively flat as compared to the prior-year period. Fiscal 2023 compared with fiscal 2022

Hybrid Cloud net revenue increased by \$260 million, or 5.0% (increased 8.2% on a constant currency basis) primarily due to an increase in unit volume, partially offset by unfavorable currency fluctuations and decrease in AUPs. Hybrid Cloud product revenue increased by \$180 million, or 5.8%, primarily due to an increase in unit volume of \$371 million or 11.9%, led by private cloud and infrastructure SaaS. The increase in product revenue was moderated by unfavorable currency fluctuations of \$130 million or 4.2%, and a decrease in AUPs of \$39 million or 1.3%. Hybrid Cloud services revenue increased by \$80 million, or 3.8%, primarily due to a unit volume increase of \$178 million, or 8.4%, led by private cloud and infrastructure SaaS. The increase in service revenue was partially offset by decrease in AUPs of \$43 million or 2.0% and unfavorable currency fluctuations of \$40 million or 1.9%. Hybrid Cloud earnings from operations as a percentage of net revenue decreased 4.7 percentage points due to an increase in cost of products sold as a percentage of net revenue and an increase in operating expenses as a percentage of net revenue. The increase in cost of products and services as a percentage of net revenue was primarily due to lower margin GreenLake Flex Solutions deals and decrease in storage subscription revenue. The increase in operating expenses as a percentage of net revenue was primarily due to the unfavorable currency fluctuations. Intelligent Edge

HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES

Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued)

Fiscal 2024 compared with fiscal 2023

Intelligent Edge net revenue decreased by \$847 million, or 15.7% (decreased 15.9% on a constant currency basis). Product revenue decreased by \$1,050 million, or 23.9%, led by lower volume and product mix effect of \$876 million, or 19.9%, and lower AUPs of \$183 million, or 4.2%. The product revenue decrease was led by switching products and wireless local area network products due to softened demand. Services net revenue increased \$203 million, or 20.6%, primarily led by our aas and attached support service offerings. Intelligent Edge earnings from operations as a percentage of net revenue decreased 0.4 percentage points primarily due to increase in operating expenses as a percentage of net revenue, partially offset by a decrease in cost of products and services as a percentage of net revenue. Operating expenses as a percentage of net revenue increased primarily due to scale of net revenue decline, higher employee costs related to acquisitions and investments to enhance Aruba offerings in GreenLake. The decrease in cost of product and services as a percentage of net revenue was primarily due to favorable revenue mix and cost containment measures. Fiscal 2023 compared with fiscal 2022

Intelligent Edge net revenue increased by \$1,522 million, or 39.5% (increased 42.5% on a constant currency basis). Product revenue increased by \$1,396 million, or 46.5%, led by higher AUPs of \$1,284 million, or 42.8%, and a volume and product mix effect of \$217 million, or 7.2%, moderated by unfavorable currency fluctuations of \$106 million, or 3.5%. The product revenue increase was led by switching and wireless local area network products, which benefited from improvements in the supply availability, and elevated order book levels at the beginning of the period. Services net revenue increased \$127 million, or 14.8%, primarily led by our aas and attached support service offerings. Intelligent Edge earnings from operations as a percentage of net revenue increased 10.9 percentage points primarily due to decreases in cost of products and services as a percentage of net revenue and operating expenses as a percentage of net revenue. The decrease in cost of product and services as a percentage of net revenue was primarily due to lower supply chain costs, moderating the decrease was a lower mix of higher-margin support services revenue. Operating expenses as a percentage of net revenue decreased primarily due to our cost containment measures. Financial Services

For the fiscal years ended October 31, 2024 and 2023

2022

2024 vs 2023 % Change

2023 vs 2022 % Change

A

Dollars in millions

Net revenue \$3,512A \$3,480A \$3,339A 0.9A % 4.2A %

Earnings from operations \$316A \$387A 12.5A % (27.4)%

Earnings from operations as a % of net revenue 9.0A % 8.1A % 11.6A %

Fiscal 2024 compared with fiscal 2023

FS net revenue increased by \$32 million, or 0.9% (increased 0.6% on a constant currency basis) primarily due to higher finance income from higher average finance leases in a higher interest rate environment, along with favorable currency fluctuations, partially offset by lower rental revenue on lower average operating leases and lower asset management lease buyout revenue. FS earnings from operations as a percentage of net revenue increased 0.9 percentage points, although the cost of services as a percentage of net revenue and operating expenses as a percentage of net revenue were relatively flat. Fiscal 2023 compared with fiscal 2022

FS net revenue increased by \$141 million, or 4.2% (increased 5.4% on a constant currency basis) due primarily to higher rental revenue from higher average operating leases and higher finance income on finance leases due to an increasing interest rate environment, partially offset by lower asset management revenue primarily from lower pre-owned asset sales and unfavorable currency fluctuations. FS earnings from operations as a percentage of net revenue decreased 3.5 percentage points due primarily to an increase in cost of services as a percentage of net revenue, while operating expenses as a percentage of net revenue were 53

Table of Contents

Financing volume \$6,616A \$6,412A \$6,252A

Financing volume, which represents the amount of financing provided to customers for equipment and related software and services, including intercompany activity, increased by 3.2% in fiscal 2024 as compared to the prior-year period. The increase was primarily driven by higher financing of HPE product sales and services, partially offset by lower financing of third-party product sales and services. Portfolio Assets and Ratios

The FS business model is asset intensive and uses certain internal metrics to measure its performance against other financial services companies, including a segment balance sheet that is derived from our internal management reporting system. The accounting policies used to derive FS amounts are substantially the same as those used by the Company. However, intercompany loans and certain accounts that are reflected in the segment balances are eliminated in our Consolidated Financial Statements. The portfolio assets and ratios derived from the segment balance sheets for FS were as follows:

A

As of October 31, 2024 and 2023

customary conditions (the **â€œTerm Loan Commitment Letterâ€**). In September 2024, we issued \$9.0Â billion of senior unsecured notes and \$1.5Â billion of Preferred Stock, the net proceeds of which we intend to use to fund a portion of the consideration for the acquisition of Juniper Networks and for other general corporate purposes, which may include, among other uses, repaying certain indebtedness of HPE, Juniper Networks and our and its respective subsidiaries. In addition, in furtherance of the Term Loan Commitment Letter, we entered into term loan agreements with JPMorgan Chase Bank, N.A., Citibank, N.A., and Mizuho Bank, Ltd. for approximately \$12.0Â billion of senior unsecured delayed draw term loan facilities, comprised of an approximately \$9.0Â billion 364-day tranche (which was reduced from the original commitment of \$11.0 billion, upon receipt and application of approximately \$2.0 billion in post-tax proceeds from our sale to UNIS of 30% of the total issued share capital of H3C, as further described below) and a \$3.0Â billion three-year tranche, subject to customary conditions. We have since further reduced the commitments under the 364-day term loan to \$1.0 billion upon receipt and application of certain proceeds from the aforementioned issuance of senior unsecured notes and the Preferred Stock. Unless previously terminated, commitments under both the 364-day term loan and the three-year term loan will terminate upon the earliest of (i) five business days after the Juniper Outside Date (as defined in such term loan agreements), (ii) the occurrence of the closing of the acquisition of Juniper Networks without the funding of any borrowings under either of the term loan agreements, and (iii) the termination of the Merger Agreement by HPE in writing in accordance with its terms. In connection with the entry into the aforementioned 364-day term loan and the three-year term loan, on September 12, 2024, we terminated the Term Loan Commitment Letter. In September 2024, we issued 30Â million shares of the Preferred Stock, par value \$0.01 per share, for an aggregate purchase price of \$1.5Â billion, less issuance costs of \$38Â million. As of October 31, 2024, 30Â million shares of the Preferred Stock was outstanding. We intend to use these net proceeds as indicated above. For more information on our Preferred Stock, refer to Note 15, **â€œStockholders' Equity** to the Consolidated Financial Statements in Item 8 of Part II. Pursuant to the Shareholders' Agreement among our relevant subsidiaries, UNIS, and H3C dated as of May 1, 2016, as amended from time to time, and most recently on October 28, 2022, we delivered a notice to UNIS on December 30, 2022, to exercise our right to put to UNIS, for cash consideration, all of the H3C shares held by us, which represent 49% of the total issued share capital of H3C. On May 26, 2023, our relevant subsidiaries entered into a Put Share Purchase Agreement with UNIS, whereby UNIS has agreed to purchase all of the H3C shares held by us, through our subsidiaries. On May 24, 2024, our relevant subsidiaries entered into (i) an Amended and Restated Put Share Purchase Agreement with UNIS, whereby our relevant subsidiaries shall sell to UNIS 30% of the total issued share capital of H3C for pre-tax cash consideration of approximately \$2.1 billion by August 31, 2024 (the **â€œSale Transaction**), and (ii) an Agreement on Subsequent Arrangements with UNIS, whereby upon closing of the Sale Transaction, our relevant subsidiary shall have a put option to sell to UNIS and 56 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued) UNIS shall have a call option to purchase from our relevant subsidiary 19% of the total issued share capital of H3C for pre-tax cash consideration of approximately \$1.4 billion between the 16th month and until the 36th month after the Sale Transaction. The transactions referenced in clauses (i) and (ii) above, taken together, revise the arrangements governing the aforementioned sale of all of the H3C shares held by us, through our subsidiaries and are subject to certain grace periods and regulatory approvals. On September 4, 2024, pursuant to the Amended and Restated Put Share Purchase Agreement with UNIS, we received \$2.1Â billion of pre-tax consideration (\$2.0Â billion post-tax), in connection with the sale to UNIS of 30% of the total issued share capital of H3C. Liquidity Our cash, cash equivalents, restricted cash, total debt and available borrowing resources were as follows: As of October 31, 2024 2023 2022 2021 2020 2019 2018 2017 2016 2015 2014 2013 2012 These non-GAAP financial measures are not computed in accordance with, or as an alternative to, generally accepted accounting principles in the United States. The GAAP measure most directly comparable to net revenue on a constant currency basis is net revenue. The GAAP measure most directly comparable to non-GAAP gross profit is gross profit. The GAAP measure most directly comparable to non-GAAP gross profit margin is gross profit margin. The GAAP measure most directly comparable to non-GAAP earnings from operations is earnings from operations. The GAAP measure most directly comparable to non-GAAP operating profit margin (non-GAAP earnings from operations as a percentage of net revenue) is operating profit margin (earnings from operations as a percentage of net revenue). The GAAP measure most directly comparable to non-GAAP income tax rate is income tax rate. The GAAP measure most directly comparable to non-GAAP net earnings is net earnings. The GAAP measure most directly comparable to non-GAAP diluted net earnings per share is diluted net earnings per share. The GAAP measure most directly comparable to FCF is cash flow from operations.We believe that providing the non-GAAP measures stated above, in addition to the related GAAP measures provides greater transparency to the information used in our financial and operational decision making and allows the reader of our Consolidated Financial Statements to see our financial results á through the eyesá of management. We further believe that providing this information provides investors with a supplemental view to understand our historical and prospective operating performance and to evaluate the efficacy of the methodology and information used by management to evaluate and measure such performance. Disclosure of these non-GAAP financial measures also facilitates comparisons of our operating performance with the performance of other companies in the same industry that supplement their GAAP results with non-GAAP financial measures that may be calculated in a similar manner.Economic Substance of non-GAAP Financial MeasuresNet revenue on a constant currency basis assumes no change to the foreign exchange rate utilized in the comparable prior-year period. This measure assists investors with evaluating our past and future performance, without the impact of foreign exchange rates, as more than half of our revenue is generated outside of the U.S. We believe that excluding the items mentioned below from the non-GAAP financial measures provides a supplemental view to management and our investors of our consolidated financial performance and presents the financial results of the business without costs that we do not believe to be reflective of our ongoing operating results. Exclusion of these items can have a material impact on the equivalent GAAP measure and cash flows thus limiting the use of such non-GAAP financial measures as analytic tools. See á Compensation for Limitations With Use of Non-GAAP Financial Measuresá section below for further information.Non-GAAP gross profit and non-GAAP gross profit margin are defined to exclude charges related to the amortization of initial direct costs, stock-based compensation expense, and disaster charges. See below for the reasons management excludes each item.á Stock-based compensation expense consists of equity awards granted based on the estimated fair value of those awards at grant date. Although stock-based compensation is a key incentive offered to our employees, we exclude these charges for the purpose of calculating these non-GAAP measures, primarily because they are non-cash expenses and our internal benchmarking analyses evidence that many industry participants and peers present non-GAAP financial measures excluding stock-based compensation expense.63Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESManagement's Discussion and Analysis ofFinancial Condition and Results of Operations (Continued)á Disaster recoveries include direct costs or recovery of these costs related to the exit of the Companyá™s businesses in Russia and Belarus. Hewlett Packard Enterprise excludes disaster recoveries from these non-GAAP measures as the specific net recoveries are non-recurring charges and not indicative of the operational performance of our business.á Divestiture related exit costs include expenses associated with certain disposal activities. On May 23, 2024, HPE announced plans to divest the Companyá™s CTG business, which was completed on December 1, 2024. We consider this divestiture to be a discrete event. We exclude these costs as these expenses are non-recurring exit costs to eliminate stranded costs of this business. In addition, our internal benchmarking analyses evidence that many industry participants and peers present non-GAAP financial measures excluding these charges.Non-GAAP earnings from operations and non-GAAP operating profit margin consist of earnings from operations or earnings from operations as a percentage of net revenue excluding the items mentioned above and charges relating to the amortization of intangible assets, transformation costs and acquisition, disposition and other related charges. In addition to the items previously explained above, management excludes these items for the following reasons:á We incur charges relating to the amortization of intangible assets and exclude these charges for purposes of calculating these non-GAAP measures. Such charges are significantly impacted by the timing and magnitude of our acquisitions. We exclude these charges for the purpose of calculating these non-GAAP measures, primarily because they are noncash expenses and our internal benchmarking analyses evidence that many industry participants and peers present non-GAAP financial measures excluding intangible asset amortization. Although this does not directly affect our cash position, the loss in value of intangible assets over time can have a material impact on the equivalent GAAP earnings measure. á Transformation costs represent net costs related to the (i) HPE Next Plan and (ii) Cost Optimization and Prioritization Plan and include restructuring charges, program design and execution costs, costs incurred to transform our IT infrastructure, net gains from the sale of real estate and any impairment charges on real estate identified as part of the initiatives. We exclude these costs as they are discrete costs related to two specific transformation programs that were announced in 2017 and 2020, respectively, as multi-year programs necessary to transform the business and IT infrastructure following material divestiture transactions in 2017 and in response to COVID-19 and an evolving product portfolio in fiscal 2020. The primary elements of the HPE Next and the Cost Optimization and Prioritization Plan have been substantially completed by October 31, 2023. The exclusion of the transformation program costs from our non-GAAP financial measures as stated above is to provide a supplemental measure of our operating results that does not include material HPE Next Plan and Cost Optimization and Prioritization Plan costs as we do not believe such costs to be reflective of our ongoing operating cost structure. Further as our transformation costs for these plans have materially fluctuated since 2017, have been materially declining since 2021 and we do not expect to incur material transformation costs related to these programs beyond fiscal 2024, we believe non-GAAP measures excluding these costs are useful to management and investors for comparing operating performance across multiple periods.á We incur costs related to our acquisition, disposition and other related charges. The charges are direct expenses, such as professional fees and retention costs, most of which are treated as non-cash or non-capitalized expenses. For fiscal 2024, these charges were driven by costs associated with the pending merger with Juniper Networks and the acquisition of Morpheus Data, in addition to prior acquisitions of Axis, Athonet and OpsRamp. For fiscal 2023, these charges were driven by acquisitions of Axis, Zerto, OpsRamp and Athonet. Charges may also include expenses associated with disposal activities including legal and arbitration settlements in connection with certain dispositions. We consider these acquisitions and divestitures to be discrete events. We exclude these costs as these expenses are inconsistent in amount and frequency and are significantly impacted by the timing and nature of our acquisitions and divestitures. In addition, our internal benchmarking analyses evidence that many industry participants and peers present non-GAAP financial measures excluding these charges.Non-GAAP net earnings and non-GAAP diluted net earnings per share consist of net earnings or diluted net earnings per share excluding those same charges mentioned above, as well as other items such as adjustments for equity interests, gain or loss on equity investments, other adjustments, and adjustments for taxes. The Adjustments for taxes line item includes certain income tax valuation allowances and separation taxes, the impact of tax reform, structural rate adjustment, excess tax benefit from stock-based compensation, and adjustments for additional taxes or tax benefits associated with each non-GAAP item. In addition to the items previously explained, management excludes these items for the following reasons:á During the six months ended April 30, 2024, we stopped reporting H3C earnings in our non-GAAP results due to the planned divestiture of the H3C investment. Per the terms of the original Put Share Purchase Agreement, we werená™t anticipating receiving dividends from this investment prospectively. However, on May 24, 2024, we entered into an 64Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESManagement's Discussion and Analysis ofFinancial Condition and Results of Operations (Continued)Amended and Restated Put Share Purchase Agreement and an Agreement on Subsequent Arrangements, both with UNIS, as described in Note 19 á Equity Interestsá to the Consolidated Financial Statements in Item 8 of Part II, which, taken together, revise the arrangements governing the aforementioned sale as previously set forth in the original Put Share Purchase Agreement. On September 4, 2024, we divested 30% of the total issued share capital of H3C, which resulted in a gain of \$733 million and is included in the fiscal 2024 adjustment Gain on sale of equity interest. We continue to possess the option to sell the remaining 19% of the total issued share capital of H3C at a later date. For the second half of fiscal 2024, the adjustment for equity interests incorporated the completed divestment of 30% of the total issued share capital of H3C. All periods presented include the amortization of the basis difference in our investment. For fiscal 2023, this adjustment also included our portion of intangible asset impairment charges from H3C. We believe that eliminating these amounts for purposes of calculating non-GAAP financial measures facilitates the evaluation of our current operating performance.á We exclude gains and losses (including impairments) on our non-marketable equity investments because we do not believe they are reflective of normal continuing business operations. These adjustments are reflected in Interest and other, net in the Consolidated Statements of Earnings. We believe eliminating these adjustments for the purposes of calculating non-GAAP measures facilitates the evaluation of our current operating performance.á We utilize a structural long-term projected non-GAAP income tax rate in order to provide consistency across the interim reporting periods and to eliminate the effects of items not directly related to our operating structure that can vary in size, frequency and timing. When projecting this long-term rate, we evaluated a three-year financial projection. The projected rate assumes no incremental acquisitions in the three-year projection period and considers other factors including our expected tax structure, our tax positions in various jurisdictions and current impacts from key legislation implemented in major jurisdictions where we operate. For fiscal 2024, we used a projected non-GAAP income tax rate of 15%, which reflects currently available information as well as other factors and assumptions. For fiscal 2023 we used a non-GAAP income tax rate of 14%. The non-GAAP income tax rate could be subject to change for a variety of reasons, including the rapidly evolving global tax environment, significant changes in our geographic earnings mix including due to acquisition activity, or other changes to our strategy or business operations. We will re-evaluate its long-term rate as appropriate. We believe that making these adjustments for purposes of calculating non-GAAP measures, facilitates a supplemental evaluation of our current operating performance and comparisons to past operating results.FCF is defined as cash flow from operations, less net capital expenditures (investments in PP&E and software assets less proceeds from the sale of PP&E), and adjusted for the effect of exchange rate fluctuations on cash, cash equivalents, and restricted cash. FCF does not represent the total increase or decrease in cash for the period. Our management and investors can use FCF for the purpose of determining the amount of cash available for investment in our businesses, repurchasing stock and other purposes as well as evaluating our historical and prospective liquidity.Compensation for Limitations With Use of Non-GAAP Financial MeasuresThese non-GAAP financial measures have limitations as analytical tools, and these measures should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP. Some of the limitations in relying on these non-GAAP financial measures are that they can have a material impact on the equivalent GAAP earnings measures and cash flows, they may be calculated differently by other companies (limiting the usefulness of those measures for comparative purposes) and may not reflect the full economic effect of the loss in value of certain assets.We compensate for these limitations on the use of non-GAAP financial measures by relying primarily on our GAAP results and using non-GAAP financial measures only as a supplement. We also provide a reconciliation of each non-GAAP financial measure to its most directly comparable GAAP financial measure for this fiscal year and prior periods, and we encourage investors to review those reconciliations carefully.65Table of ContentsITEM 7A. Quantitative and Qualitative Disclosures About Market Risk.In the normal course of business, we are exposed to foreign currency exchange rate and interest rate risks that could impact our financial position and results of operations. Our risk management strategy with respect to these market risks may include the use of derivative financial instruments. We use derivative contracts only to manage existing underlying exposures. Accordingly, we do not use derivative contracts for speculative purposes. Our risks, risk management strategy and a sensitivity analysis estimating the effects of changes in fair value for each of these exposures is outlined below.Actual gains and losses in the future may differ materially from the sensitivity analyses based on changes in the timing and amount of foreign currency exchange rate and interest rate movements and our actual exposures and derivatives in place at the time of the change, as well as the effectiveness of the derivative to hedge the related exposure.Foreign currency exchange rate riskWe are exposed to foreign currency exchange rate risk inherent in our sales commitments, anticipated sales, anticipated purchases, and assets and liabilities denominated in currencies other than the U.S. dollar. We transact business in approximately 40 currencies worldwide, of which the most significant foreign currencies to our operations for fiscal 2024 were the euro, Japanese yen, and Indian rupee. For most currencies, we are a net receiver of the foreign currency and therefore benefit from a weaker U.S. dollar and are adversely affected by a stronger U.S. dollar relative to the foreign currency. Even where we are a net receiver of the foreign currency, a weaker U.S. dollar may adversely affect certain expense figures, if taken alone.We use a combination of forward contracts and, from time to time, options designated as cash flow hedges to protect against the foreign currency exchange rate risks inherent in our forecasted net revenue and, to a lesser extent, cost of sales, operating expenses, and intercompany loans denominated in currencies other than the U.S. dollar. In addition, when debt is denominated in a foreign currency, we may use swaps to exchange the foreign currency principal and interest obligations for U.S. dollar-denominated amounts to manage the exposure to changes in foreign currency exchange rates. We also use other derivatives not designated as hedging instruments, consisting primarily of forward contracts, to hedge foreign currency balance sheet exposures. Alternatively, we may choose not to hedge the risk associated with our foreign currency exposures, primarily if such exposure acts as a natural hedge for offsetting amounts denominated in the same currency or if the currency is too difficult or too expensive to hedge. We have performed sensitivity analyses as of OctoberÁ 31, 2024 and 2023, using a modeling technique that measures the change in the fair values arising from a hypothetical 10% adverse movement in the levels of foreign currency exchange rates relative to the U.S. dollar, with all other variables held constant. The analyses cover all of our foreign currency derivative contracts offset by underlying exposures. The foreign currency exchange rates we used in performing the sensitivity analysis were based on market rates in effect at OctoberÁ 31, 2024 and 2023, respectively. The sensitivity analyses indicated that a hypothetical 10% adverse movement in foreign currency exchange rates would result in a foreign exchange fair value loss of \$44Á million and \$48Á million at OctoberÁ 31, 2024 and 2023, respectively.Interest rate riskWe also are exposed to interest rate risk related to debt we have issued, our debt investment portfolio and net portfolio assets of our Financial Services segment. We issue long-term debt in either U.S. dollars or foreign currencies based on market conditions at the time of financing.We often use interest rate and/or currency swaps to modify the market risk exposures in connection with the debt to achieve U.S. dollar based floating or fixed interest expense. The swap transactions generally involve the exchange of fixed for floating interest payments. However, in circumstances where we believe additional fixed-rate debt would be beneficial, we may choose to terminate a previously executed swap, or swap certain floating interest payments to fixed.We have performed sensitivity analyses as of OctoberÁ 31, 2024 and 2023, using a modeling technique that measures the change in the fair values arising from a hypothetical 10% adverse movement in the levels of interest rates across the entire yield curve, with all other variables held constant. The analyses cover our debt, debt investments, net portfolio assets, and interest rate swaps. The analyses use actual or approximate maturities for the debt, debt investments, net portfolio assets, and interest rate swaps. The discount rates used were based on the market interest rates in effect at OctoberÁ 31, 2024 and 2023, respectively. The sensitivity analyses indicated that a hypothetical 10% adverse movement in interest rates would result in a loss in the fair values of our debt, debt investments and net portfolio assets, net of interest rate swaps, of

0
\$233 million and \$411 million at October 31, 2024 and 2023, respectively. For more information about our debt, use of derivative instruments, forward contracts and investments, Refer to Note 1, [Hewlett-Packard Enterprise Company's Report on Internal Control Over Financial Reporting](#), [Table of Contents](#), [Page Reports of Independent Registered Public Accounting Firm \(PCAOB ID: 42\)68Management's Report on Internal Control Over Financial Reporting71Consolidated Statements of Earnings72Consolidated Statements of Comprehensive Income73Consolidated Balance Sheets74Consolidated Statements of Cash Flows75Consolidated Statements of Stockholders' Equity76Notes to Consolidated Financial Statements78Note A 1: Overview and Summary of Significant Accounting Policies78Note A 2: Segment Information88Note 3: Transformation Programs91Note A 4: Retirement and Post-Retirement Benefit Plans92Note A 5: Stock-Based Compensation99Note A 6: Taxes on Earnings101Note A 7: Balance Sheet Details106Note 8: Accounting for Leases as a Lessee110Note A 9: Accounting for Leases as a Lessor111Note A 10: Acquisitions and Dispositions115Note A 11: Goodwill and Intangible Assets117Note A 12: Fair Value119Note A 13: Financial Instruments122Note A 14: Borrowings127Note A 15: Stockholders' Equity130Note A 16: Net Earnings Per Share132Note A 17: Litigation, Contingencies, and Commitments133Note A 18: Guarantees and Indemnifications135Note 19: Equity Interests137Unless otherwise stated or the context otherwise indicates, all references in this Annual Report on Form 10-K to \[HPE\]\(#\), \[we\]\(#\), \[us\]\(#\), or \[the Company\]\(#\) mean Hewlett Packard Enterprise Company and its consolidated subsidiaries. \[Table of Contents\]\(#\)\[Report of Independent Registered Public Accounting Firm\]\(#\)To the Stockholders and the Board of Directors of Hewlett Packard Enterprise Company Opinion on the Financial Statements We have audited the accompanying consolidated balance sheets of Hewlett Packard Enterprise Company and subsidiaries \(\[the Company\]\(#\)\) as of October 31, 2024 and 2023, the related consolidated statements of earnings, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended October 31, 2024, and the related notes \(collectively referred to as the \[consolidated financial statements\]\(#\)\). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at October 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended October 31, 2024, in conformity with U.S. generally accepted accounting principles. We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board \(United States\) \(\[the PCAOB\]\(#\)\), the Company's internal control over financial reporting as of October 31, 2024, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission \(2013 framework\) and our report dated December 19, 2024 expressed an unqualified opinion thereon.Basis for OpinionThese financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.Critical Audit MattersThe critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: \(1\) relate to accounts or disclosures that are material to the financial statements and \(2\) involved our especially challenging, subjective or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.Valuation of goodwillDescription of the matterAt October 31, 2024, the Company's goodwill was \\$18 billion, of which \\$4.8 billion related to the Hybrid Cloud reporting unit. As discussed in Note 11 to the consolidated financial statements, goodwill is tested for impairment at least annually at the reporting unit level and more frequently when warranted based on indicators of impairment. Auditing management's goodwill impairment test for the Hybrid Cloud reporting unit was complex and highly judgmental due to the significant estimation required to determine the fair value of the reporting unit. In particular, the fair value estimates of the Hybrid Cloud reporting unit was sensitive to significant assumptions, such as the terminal revenue growth rate and operating margin, which are affected by expectations about future market or economic conditions.\[Table of Contents\]\(#\)How we addressed the matter in our auditWe obtained an understanding, evaluated the design and tested the operating effectiveness of controls over the Company's goodwill impairment review process, including controls over the significant assumptions described above. To test the estimated fair value of the Company's Hybrid Cloud reporting unit, we performed audit procedures that included, among others, assessing methodologies and testing the significant assumptions discussed above and the underlying data used by the Company in its analysis. We compared the significant assumptions used by management to current industry and economic trends and evaluated whether changes to the Company's business model, product mix and other factors would affect the significant assumptions. We assessed the historical accuracy of management's estimates and performed sensitivity analyses of significant assumptions to evaluate the changes in the fair value of the reporting unit that would result from changes in the assumptions.In addition, we tested management's reconciliation of the fair value of all the reporting units to the market capitalization of the Company. We involved our valuation professionals to evaluate the application of valuation methodologies in the Company's annual impairment test.Estimation of variable considerationDescription of the matterAs described in Note 1 to the consolidated financial statements, the Company recognizes revenue for sales to its customers after deducting management's estimates of variable consideration which may include various rebates, volume-based discounts, price protection, and other incentive programs that are offered to customers, partners, and distributors. Estimated variable consideration is presented within other accrued liabilities on the consolidated balance sheet and totaled \\$1.0 billion at October 31, 2024. Auditing the estimates of variable consideration associated with rebates, specifically within the Intelligent Edge segment, was complex and judgmental due to the level of uncertainty involved in management's estimate of expected usage of these programs.How we addressed the matter in our auditWe obtained an understanding, evaluated the design and tested the operating effectiveness of controls over the Company's process for estimating rebates, including controls over the significant assumptions described above.To test the Company's determination of variable consideration we performed audit procedures that included, among others, evaluating the methodologies, testing the significant assumptions discussed above and testing the completeness and accuracy of the underlying data used by the Company in its analyses. We compared the significant assumptions to historical experience of the Company to develop an expectation of the rebates associated with product remaining in the distribution channel at October 31, 2024, which we compared to management's recorded amount. In addition, we inspected the underlying agreements and compared the incentive rates used in the Company's analyses with contractual rates. We assessed the historical accuracy of management's estimates by comparing previous estimates of rebate liabilities to the amount of actual payments in subsequent periods./ Ernst & Young LLP We have served as the Company's auditor since 2014.Houston, TexasDecember 19, 2024\[Table of Contents\]\(#\)\[Report of Independent Registered Public Accounting Firm\]\(#\)To the Stockholders and the Board of Directors of Hewlett Packard Enterprise Company Opinion on Internal Control Over Financial Reporting We have audited Hewlett Packard Enterprise Company and subsidiaries' internal control over financial reporting as of October 31, 2024, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission \(2013 framework\) \(the COSO criteria\). In our opinion, Hewlett Packard Enterprise Company and subsidiaries \(the Company\) maintained, in all material respects, effective internal control over financial reporting as of October 31, 2024, based on the COSO criteria. We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board \(United States\) \(PCAOB\), the consolidated balance sheets of the Company as of October 31, 2024 and 2023, the related consolidated statements of earnings, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended October 31, 2024, and the related notes and our report dated December 19, 2024 expressed an unqualified opinion thereon.Basis for OpinionThe Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.Definition and Limitations of Internal Control Over Financial Reporting A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that \(1\) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; \(2\) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and \(3\) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate./ Ernst & Young LLPHouston, TexasDecember 19, 2024\[Table of Contents\]\(#\)\[Management's Report on Internal Control Over Financial Reporting\]\(#\)Hewlett Packard Enterprise's management is responsible for establishing and maintaining adequate internal control over financial reporting for Hewlett Packard Enterprise. Hewlett Packard Enterprise's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. Hewlett Packard Enterprise's internal control over financial reporting includes those policies and procedures that \(i\) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of Hewlett Packard Enterprise; \(ii\) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of Hewlett Packard Enterprise are being made only in accordance with authorizations of management and directors of Hewlett Packard Enterprise; and \(iii\) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of Hewlett Packard Enterprise's assets that could have a material effect on the financial statements.Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.Hewlett Packard Enterprise's management assessed the effectiveness of Hewlett Packard Enterprise's internal control over financial reporting as of October 31, 2024, utilizing the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission \(COSO\) in Internal Control-Integrated Framework \(2013 framework\). Based on the assessment by Hewlett Packard Enterprise's management, we determined that Hewlett Packard Enterprise's internal control over financial reporting was effective as of October 31, 2024. The effectiveness of Hewlett Packard Enterprise's internal control over financial reporting as of October 31, 2024 has been audited by Ernst & Young LLP, Hewlett Packard Enterprise's independent registered public accounting firm, as stated in their report on the preceding pages./ Antonio F. The accompanying notes are an integral part of these Consolidated Financial Statements.77Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial StatementsNoteÂ 1: Overview and Summary of Significant Accounting PoliciesBackgroundHewlett Packard Enterprise Company (â€Hewlett Packard Enterprise, â€ â€HPE,â€ or the â€Companyâ€) is a global technology leader focused on developing intelligent solutions that allow customers to capture, analyze and act upon data seamlessly from edge to cloud. Hewlett Packard Enterprise enables customers to accelerate business outcomes by driving new business models, creating new customer and employee experiences, and increasing operational efficiency today and into the future. Hewlett Packard Enterprise's customers range from small- and medium-sized businesses to large global enterprises and governmental entities.Basis of Presentation and Principles of Consolidation The Consolidated Financial Statements are prepared in accordance with U.S. generally accepted accounting principles (â€GAAPâ€). The accompanying Consolidated Financial Statements include the accounts of the Company and its subsidiaries and affiliates in which the Company has a controlling financial interest or is the primary beneficiary. All intercompany transactions and accounts within the consolidated businesses of the Company have been eliminated.The Company consolidates a Variable Interest Entity (â€VIEâ€) where it has been determined that the Company is the primary beneficiary of the entity's operation. The primary beneficiary is the party that has both the power to direct the activities that most significantly impact the VIE's economic performance and the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE. In evaluating whether the Company is the primary beneficiary, the Company evaluates its power to direct the most significant activities of the VIE by considering the purpose and design of the entity and the risks the entity was designed to create and pass through to its variable interest holders. The Company also evaluates its economic interests in the VIE.The Company accounts for investments in companies over which it has the ability to exercise significant influence but does not hold a controlling interest under the equity method of accounting, and the Company records its proportionate share of income or losses in Earnings from equity interests in the Consolidated Statements of Earnings. Non-controlling interests are presented as a separate component within Total stockholders' equity in the Consolidated Balance Sheets. Net earnings attributable to non-controlling interests are recorded within Interest and other, net in the Consolidated Statements of Earnings and are not presented separately, as they were not material for any periods presented.Segment Realignment Effective as of the beginning of fiscal 2024, in order to align the segment financial reporting more closely with its business structure, the Company established two new reportable segments, Hybrid Cloud and Server. Hybrid Cloud includes the historical Storage segment, HPE GreenLake Flex Solutions (which provides flexible as-a-service (â€aaSâ€) IT infrastructure through the HPE GreenLake cloud and was previously reported under the Compute and the High Performance Computing & Artificial Intelligence (â€HPC & AIâ€) segments), Private Cloud, and Software (previously reported under the Corporate Investments and Other segment). The Server segment combines the previously separately reported Compute and HPC & AI segments, with adjustments for certain product lines that are now reported in Hybrid Cloud. Additionally, certain products and services previously reported in the financial results for the HPC & AI segment were moved to be reported in the Hybrid Cloud segment, and the Athonet business and certain components of the Communications and Media Solutions (â€CMSâ€) business, both previously reported in the financial results for Corporate Investments and Other, moved to be reported in the Intelligent Edge segment. As a result, the Companyâ€™s organizational structure for fiscal 2024 consisted of the following segments: (i) Server; (ii) Hybrid Cloud; (iii) Intelligent Edge; (iv) Financial Services; and (v) Corporate Investments and Other. The Company began reporting under this re-aligned segment structure beginning with the results of the first quarter of fiscal 2024 included in the Quarterly Report on Form 10-Q for the fiscal quarter ended January 31, 2024. These changes had no impact on Hewlett Packard Enterpriseâ€™s previously reported consolidated net revenue, net earnings, net earnings per share (â€EPSâ€) or total assets.78Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)Russia/Ukraine ConflictIn response to the conflict between Russia and Ukraine and the related sanctions imposed by the U.S., European Union and other countries, the Company determined that it was no longer tenable to maintain its operations in Russia and Belarus and has been proceeding with an orderly, managed exit of its remaining business in these countries. During fiscal 2022, the Company recorded total pre-tax charges of \$161Â million primarily related to expected credit losses of financing and trade receivables, employee severance and abandoned assets, \$99Â million of which was included in Financing cost, \$12Â million in Cost of services and \$50Â million in Disaster charges in the Consolidated Statements of Earnings.Use of Estimates The preparation of financial statements requires management to make estimates, judgments and assumptions that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Estimates are assessed each period and updated to reflect current information, including those related to revenue recognition, stock-based compensation, net periodic benefit costs, restructuring accruals, provision for taxes, valuation allowance for deferred taxes, provision for expected credit losses, inventory reserves, and impairment assessments of goodwill, intangible assets and other long-lived assets. The Company believes that these estimates, judgments and assumptions are reasonable under the circumstances, and are subject to significant uncertainties, some of which are beyond the Company's control. Should any of these estimates change, it could adversely affect the Company's results of operations. Actual results could differ materially from these estimates under different assumptions or conditions. Foreign Currency TranslationThe Company predominately uses the U.S. dollar as its functional currency. Assets and liabilities denominated in non-U.S. currencies are remeasured into U.S. dollars at current exchange rates for monetary assets and liabilities and at historical exchange rates for non-monetary assets and liabilities. Net revenue, costs and expenses denominated in non-U.S. currencies are recorded in U.S. dollars at the average rates of exchange prevailing during the period. The Company includes gains or losses from foreign currency remeasurement in Interest and other, net in the Consolidated Statements of Earnings and gains and losses from cash flow hedges in Net revenue as the hedged revenue is recognized. Certain non-U.S. subsidiaries designate the local currency as their functional currency, and the Company records the translation of their assets and liabilities into U.S. dollars at the balance sheet date as translation adjustments and includes them as a component of Accumulated other comprehensive loss in the Consolidated Balance Sheets. Revenue RecognitionThe Company accounts for a contract with a customer when both parties have provided written approval and are committed to perform, each party's rights including payment terms are identified, the contract has commercial substance, and collection of consideration is probable. The Company enters into contracts with customers that typically include combinations of products and services, resulting in arrangements containing multiple performance obligations for hardware and software products and/or various services. The Company determines whether each product or service is distinct in order to identify the performance obligations in the contract and allocate the contract transaction price among the distinct performance obligations. Arrangements are distinct based on whether the customer can benefit from the product or service on its own or together with other resources that are readily available and whether the commitment to transfer the product or service to the customer is separately identifiable from other obligations in the contract. The Company classifies its hardware, perpetual software licenses, service arrangements and software-as-a-service (â€SaaSâ€) as distinct performance obligations. Term software licenses represent multiple obligations, which include software licenses and software maintenance. In transactions where the Company delivers hardware or software, it is typically the principal and records revenue and costs of goods sold on a gross basis.The majority of the Company's revenue is derived from sales of products and services and the associated support and maintenance, and such revenue is recognized when, or as, control of promised products or services is transferred to the customer, in an amount that reflects the consideration to which the Company expects to be entitled, in exchange for those products or services. Variable consideration offered in contracts with customers, partners and distributors may include rebates, volume-based discounts, price protection, and other incentive programs. Variable consideration is estimatedÂ at contract inception and updated at the end of each reporting period as additional information becomes available and recognized only to the extent that it is probable that a significant reversal of revenue will not occur.79Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)Transfer of control occurs once the customer has the contractual right to use the product, generally upon delivery once title and risk of loss has transferred to the customer. Transfer of control can also occur over time for maintenance and services as the customer receives the benefit over the contract term. The Company's hardware and perpetual software licenses are distinct performance obligations where revenue is recognized upfront upon transfer of control. Term software licenses include multiple performance obligations where the term licenses are recognized upfront upon transfer of control, with the associated software maintenance revenue recognized ratably over the contract term as services and software updates are provided. SaaS arrangements have one distinct performance obligation which is satisfied over time with revenue recognized ratably over the contract term as the customer consumes the services. On its product sales, the Company records consideration from shipping and handling on a gross basis within net product sales. Revenue is recorded net of any associated sales taxes.The Company allocates the transaction price for the contract among the performance obligations on a relative standalone selling price basis (â€SSPâ€). For products and services sold as a bundle, the SSP is generally not directly observable and requires the Company to estimate SSP based on management judgment by considering available data such as internal margin objectives, pricing strategies, market/competitive conditions, historical profitability data, as well as other observable inputs. For certain products and services, the Company establishes SSP based on the observable price when sold separately in similar circumstances to similar customers. The Company establishes SSP ranges for its products and services and reassesses them periodically.Judgment is applied in determining the transaction price as the Company may be required to estimate variable consideration when determining the amount of revenue to recognize. Variable consideration may include various rebates, volume-based discounts, price protection, and other incentive programs that are offered to customers, partners and distributors. When determining the amount of revenue to recognize, the Company estimates the expected usage of these programs, applying the expected value or most likely estimate and updates the estimate at each reporting period as actual utilization becomes available. The Company also considers the customers' right of return in determining the transaction price, where applicable.Contract BalancesAccounts receivable and contract assetsA receivable is a right to consideration in exchange for products or services the Company has transferred to a customer that is unconditional. A contract asset is a right to consideration in exchange for products or services transferred to a customer that is conditional on something other than the passage of time. A receivable is recorded when the right to consideration becomes unconditional. The Company's contract assets include unbilled receivables which are recorded when the Company recognizes revenue in advance of billings. Unbilled receivables generally relate to services contracts where a service has been performed and control has transferred, but invoicing to the customer is subject to future milestone billings or other contractual payment schedules. The Company classifies unbilled receivables as Accounts receivable.Contract liabilitiesA contract liability is an obligation to transfer products or services to a customer for which the Company has received consideration, or the amount is due, from the customer. The Company's contract liabilities primarily consist of deferred revenue and customer deposits. Deferred revenue is recorded when amounts invoiced to customers are in excess of revenue that can be recognized because performance obligations have not been satisfied and control of the promised products or services has not transferred to the customer. Deferred revenue largely represents amounts invoiced in advance for product (hardware/software) support contracts, consulting projects and product sales where revenue cannot be recognized yet. Customer deposits largely represent payments received from customers in advance of the Companyâ€™s completion of its contractual obligations. As customer acceptance milestones are met, the Company will recognize revenue and reduce the amount of contract liabilities.Costs to obtain a contract with a customerThe Company capitalizes the incremental costs of obtaining a contract with a customer, primarily sales commissions, if the Company expects to recover those costs. The Company has elected, as a practical expedient, to expense the costs of obtaining a contract as incurred for contracts with terms of one year or less. The typical amortization periods used range from two to five years. The Company periodically reviews the capitalized sales commission costs for possible impairment losses. The amortization of capitalized costs to obtain a contract are included in Selling, general and administrative expense. Refer to Note 7, â€Balance Sheet Detailsâ€ for additional information. 80Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)Shipping and HandlingThe Company includes costs related to shipping and handling in Cost of products.Stock-Based Compensation Stock-based compensation expense is based on the measurement date fair value of the award and is recognized only for those awards expected to meet the service and performance vesting conditions. Stock-based compensation expense for stock options and restricted stock units with only a service condition is recognized on a straight-line basis over the requisite service period of the award. For stock options and restricted stock units with both a service condition and a performance or market condition, the expense is recognized on a graded vesting basis over the requisite service period of the award.

Stock-based compensation expense is determined at the aggregate grant level for service-based awards and at the individual vesting tranche level for awards with performance and/or market conditions. The forfeiture rate is estimated based on historical experience.Retirement and Post-Retirement PlansThe Company has various defined benefit, other contributory and noncontributory, retirement and post-retirement plans. The costs and obligations for these plans depend on various assumptions. Major assumptions relate primarily to discount rates, mortality rates, expected increases in compensation levels and the expected long-term return on plan assets. These assumptions vary by plan, and the weighted-average rates used are set forth in Note 4. 4. Retirement and Post-Retirement Benefit Plans. The discount rate assumption is based on current investment yields of high-quality fixed-income securities with maturities similar to the expected benefits payment period. Mortality rates help predict the expected life of plan participants and are based on a historical demographic study of the plan. The expected increase in the compensation levels assumption reflects long-term actual experience and future expectations. The expected long-term return on plan assets is determined based on asset allocations, historical portfolio results, historical asset correlations and management's expected returns for each asset class. In any fiscal year, significant differences may arise between the actual return and the expected long-term return on plan assets. Historically, differences between the actual return and expected long-term return on plan assets have resulted from changes in target or actual asset allocation, short-term performance relative to expected long-term performance, and to a lesser extent, differences between target and actual investment allocations, the timing of benefit payments compared to expectations, and the use of derivatives intended to effect asset allocation changes or hedge certain investment or liability exposures. The following table provides the impact changes in the weighted-average assumptions of discount rates, the expected increase in compensation levels and the expected long-term return on plan assets would have had on the net periodic benefit cost for fiscal 2024:Change in basis pointsChange in Net Periodic Benefit CostIn millionsAssumptions: A Discount rate(25)\$17A Expected increase in compensation levels25\$3A Expected long-term return on plan assets(25)\$25A The Company generally amortizes unrecognized actuarial gains and losses on a straight-line basis over the average remaining estimated service life or, in the case of closed plans, life expectancy of participants. In limited cases, actuarial gains and losses are amortized using the corridor approach. Advertising Costs to produce advertising are expensed as incurred during production. Costs to communicate advertising are expensed when the advertising is first run. Advertising expense totaled approximately \$117 million, \$173 million, and \$179 million in fiscal 2024, 2023, and 2022, respectively.81Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)RestructuringThe Company's transformation programs include charges to approved restructuring plans. Restructuring charges include severance costs to eliminate a specified number of employees, infrastructure charges to vacate facilities and consolidate operations, and contract cancellation costs. These restructuring actions require management to estimate the timing and amount of severance and other employee separation costs for workforce reduction and enhanced early retirement programs, the fair value of assets made redundant or obsolete, and the value of lease and contract cancellation and other exit costs. The Company records restructuring charges based on estimated employee terminations and site closure and consolidation plans. The Company accrues for severance and other employee separation costs under these actions when it is probable that benefits will be paid and the amount is reasonably estimable. The rates used in determining severance accruals are based on existing plans, historical experiences and negotiated settlements. For a full description of the Company's restructuring actions, refer to the discussions in Note 3. 3. Transformation Programs. Taxes on EarningsThe Company recognizes deferred tax assets and liabilities for the expected tax consequences of temporary differences between the tax bases of assets and liabilities and their reported amounts using enacted tax rates in effect for the year the differences are expected to reverse. The Company records a valuation allowance to reduce deferred tax assets to the amount that is more likely than not to be realized. In determining the need for a valuation allowance, the Company considers future market growth, forecasted earnings, future sources of taxable income, the mix of earnings in the jurisdictions in which the Company operates, and prudent and feasible tax planning strategies. In the event the Company were to determine that it is more likely than not that the Company will be unable to realize all or part of its deferred tax assets in the future, the Company would increase the valuation allowance and recognize a corresponding charge to earnings in the period in which such a determination was made. Likewise, if the Company later determines that the deferred tax assets are more likely than not to be realized, the Company would reverse the applicable portion of the previously recognized valuation allowance. In order for the Company to realize deferred tax assets, the Company must be able to generate sufficient taxable income, of the appropriate character, in the jurisdictions in which the deferred tax assets are located, prior to their expiration under applicable tax laws. The Company records accruals for uncertain tax positions when the Company believes that it is not more likely than not that the tax position will be sustained on examination by the taxing authorities based on the technical merits of the position. The provision for income taxes includes the effects of adjustments for uncertain tax positions as well as any related interest and penalties. The Company recognizes interest income from favorable settlements and interest expense and penalties accrued on unrecognized tax benefits in Provision for taxes in the Consolidated Statements of Earnings. The Company is subject to the Global Intangible Low Taxed Income (a GILTI tax) in the U.S. The Company elected to treat taxes on future GILTI inclusions in U.S. taxable income as a current period expense when incurred.Allowance for Doubtful AccountsAccounts ReceivableThe allowance for expected credit losses related to accounts receivable is comprised of a general reserve and a specific reserve. The Company may record a specific reserve for individual accounts when the Company becomes aware of specific customer circumstances, such as in the case of a bankruptcy filing or deterioration in the customer's operating results or financial position. If there are additional changes in circumstances related to the specific customer, the Company further adjusts estimates of the recoverability of receivables. The Company maintains an allowance for credit losses for all other customers based on a variety of factors, including the financial condition of customers and the length of time receivables are past due. These qualitative factors are subjective and require a degree of management judgment. The past due or delinquency status of a receivable is based on the contractual payment terms of the receivable. The Company establishes an allowance for expected credit losses related to accounts receivable, including unbilled receivables.82Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)Financing ReceivableThe allowance for expected credit losses related to financing receivables is comprised of a general reserve and a specific reserve. The Company establishes a specific reserve for financing receivables with identified exposures, such as customer defaults, bankruptcy or other events, that make it unlikely the Company will recover its investment. For individually evaluated receivables, the Company determines the expected cash flow for the receivable, which includes consideration of estimated proceeds from disposition of the collateral and calculates an estimate of the potential loss and the probability of loss. For those accounts where a loss is considered probable, the Company records a specific reserve. The Company maintains a general reserve using a credit loss model on a regional basis and bases such percentages on several factors, including consideration of historical credit losses and portfolio delinquencies, trends in the overall weighted-average risk rating of the portfolio, current economic conditions, and forward-looking information, including reasonable and supportable forecasts. The Company excludes accounts evaluated as part of the specific reserve from the general reserve analysis. The Company generally writes off a receivable or records a specific reserve when a receivable becomes 180 days past due, or sooner if the Company determines that the receivable is not collectible.Non-Accrual and Past-Due Financing ReceivablesThe Company considers a financing receivable to be past due when the minimum payment is not received by the contractually specified due date. The Company generally places financing receivables on non-accrual status, which is the suspension of interest accrual, and considers such receivables to be non-performing at the earlier of the time at which full payment of principal and interest becomes doubtful or the receivable becomes 90 days past due. Subsequently, the Company may recognize revenue on non-accrual financing receivables as payments are received, which is on a cash basis, if the Company deems the recorded financing receivable to be fully collectible; however, if there is doubt regarding the ultimate collectability of the recorded financing receivable, all cash receipts are applied to the carrying amount of the financing receivable, which is the cost recovery method. In certain circumstances, such as when the Company deems a delinquency to be of an administrative nature, financing receivables may accrue interest after becoming 90 days past due. The non-accrual status of a financing receivable may not impact a customer's risk rating. After all of a customer's delinquent principal and interest balances are settled, the Company may return the related financing receivable to accrual status.Concentrations of RiskFinancial instruments that potentially subject the Company to significant concentrations of credit risk consist principally of cash, cash equivalents and restricted cash, investments, receivables from trade customers and contract manufacturers, financing receivables and derivatives. The Company maintains cash, cash equivalents and restricted cash, investments, derivatives, and certain other financial instruments with various financial institutions. These financial institutions are located in many different geographic regions, and the Company's policy is designed to limit exposure from any particular institution. As part of its risk management processes, the Company performs periodic evaluations of the relative credit standing of these financial institutions. The Company has not sustained material credit losses from instruments held at these financial institutions. The Company utilizes derivative contracts to protect against the effects of foreign currency and interest rate exposures. Such contracts involve the risk of non-performance by the counterparty, which could result in a material loss. For more details on the collateral program, see Note 13. 13. Financial Instruments. Credit risk with respect to accounts receivable from trade customers and financing receivables is generally diversified due to the large number of entities comprising the Company's customer base and their dispersion across many different industries and geographic regions. The Company performs ongoing credit evaluations of the financial condition of its customers and may require collateral, such as letters of credit and bank guarantees, in certain circumstances. As of October 31, 2024 and 2023 no single customer accounted for more than 10% of the Company's receivable from trade customers and financing receivables.Restricted CashRestricted cash is included within Other current assets in the accompanying Consolidated Balance Sheets and is primarily related to cash received under the Company's collateral securities agreements for its derivative instruments and cash restricted under the fixed-term securitization program for the issuance of asset-backed debt securities.InventoryThe Company values inventory at the lower of cost or net realizable value. Cost is computed using standard cost which approximates actual cost on a first-in, first-out basis. At each reporting period, the Company assesses the value of its inventory.83Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)and writes down the cost of inventory to its net realizable value if required, for estimated excess or obsolescence. Factors influencing these adjustments include changes in future demand forecasts, market conditions, technological changes, product life-cycle and development plans, component cost trends, product pricing, physical deterioration, and quality issues. If in any period the Company anticipates a change in those factors to be less favorable than its previous estimates, additional inventory write-downs may be required and could materially impact gross margin. The write down for excess or obsolescence is charged to the provision of inventory, which is a component of Cost of Products and Cost of Services in the Consolidated Statements of Earnings. At the point of the loss recognition, a new, lower cost basis for that inventory is established, and subsequent changes in facts and circumstances do not result in the restoration or increase in that newly established cost basis.Property, Plant and Equipment, netThe Company states property, plant and equipment at cost less accumulated depreciation. The Company capitalizes additions and improvements and expenses maintenance and repairs as incurred. Depreciation expense is recognized on a straight-line basis over the estimated useful lives of the assets. Estimated useful lives are five to 40 years for buildings and improvements and three to 15 years for machinery and equipment. The Company depreciates leasehold improvements over the life of the lease or the asset, whichever is shorter. The Company depreciates equipment held for lease over the initial term of the lease to the equipment's estimated residual value. The estimated useful lives of assets used solely to support a customer services contract generally do not exceed the term of the customer contract. On retirement or disposition, the asset cost and related accumulated depreciation are removed from the Consolidated Balance Sheets with any gain or loss recognized in the Consolidated Statements of Earnings. The Company capitalizes certain internal and external costs incurred to acquire or create internal use software, principally related to software coding, designing system interfaces and installation and testing of the software. The Company amortizes capitalized internal use software costs using the straight-line method over the estimated useful lives of the software, generally from three to five years.Lessee AccountingThe Company enters into various leases as a lessee for assets including office buildings, data centers, vehicles, and aviation. The Company determines if an arrangement is a lease at inception. An arrangement contains a lease when the arrangement conveys the right to control the use of an identified asset over the lease term. Upon lease commencement, the Company records a lease liability for the obligation to make lease payments and right-of-use (a ROU asset) for the right to use the underlying asset for the lease term in the Consolidated Balance Sheets. The lease liability is measured at commencement date based on the present value of lease payments not yet paid over the lease term and the Company's incremental borrowing rate. As most of the Company's leases do not provide an implicit rate, the Company uses an incremental borrowing rate which approximates the rate at which the Company would borrow, on a secured basis, in the country where the lease was executed. The ROU asset is based on the lease liability, adjusted for lease prepayments, lease incentives received, and the lessee's initial direct costs. Fixed payments are included in the recognition of ROU assets and liabilities, while non-lease components, such as maintenance or utility charges are expensed as incurred. The Company has agreements with lease and non-lease components that are accounted for separately and not included in its leased assets and corresponding liabilities for the majority of the Company's lease agreements. The Company allocates consideration to the lease and non-lease components using their relative standalone values. The lease term may include options to extend or to terminate the lease that the Company is reasonably certain to exercise. The Company has elected not to record leases with an initial term of twelve months or less on the Consolidated Balance Sheets.For finance leases, the ROU asset is amortized on a straight-line basis over the shorter of the useful life of the asset or the lease term. Interest expense on the lease liability is recorded separately using the interest method. For operating leases, lease expense is generally recognized on a straight-line basis over the lease term. Lessor AccountingThe Company's lease offerings are non-cancelable and the payment schedule primarily consists of fixed payments. Variable payments that are based on an index are included in lease receivables. The Company allocates consideration amongst lease components and non-lease components on a relative standalone selling price basis, when lease arrangements include multiple performance obligations. At the end of the lease term, the Company allows the client to either return the equipment, purchase the equipment or renew the lease based on mutually agreed upon terms. 84Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)The Company retains a residual position in equipment through lease and finance agreements which is equivalent to an estimated market value. The residual amount is established prior to lease inception, based upon estimated equipment values at end of lease using product road map trends, historical analysis, future projections and remarketing experience. The Company's residual amounts are evaluated at least annually to assess the appropriateness of the carrying values. Any anticipated declines in specific future residual values that are considered to be other-than-temporary would be recorded in current earnings. The Company is able to optimize the recovery of residual values by selling equipment in place, extending lease arrangements on a fixed term basis, entering into a monthly usage rental term beyond the initial lease term, and selling lease returned equipment in the secondary market. The contractual lease agreement also identifies return conditions that ensures the leased equipment will be in good operating condition upon return minus any normal wear and tear. During the residual review process, product changes, product updates, as well as market conditions are reviewed and adjustments if other than temporary are made to residual values in accordance with the impact of any such changes. The remarketing sales organization closely manages the sale of equipment lease returns to optimize the recovery of outstanding residual by product. Business CombinationsThe Company includes the results of operations of acquired businesses in the Company's consolidated results prospectively from the date of acquisition. The Company allocates the fair value of purchase consideration to the assets acquired including in-process research and development (a IP&D), liabilities assumed, and non-controlling interests in the acquired entity based on their fair values at the acquisition date. IP&D is initially capitalized at fair value as an intangible asset with an indefinite life and assessed for impairment thereafter. The excess of the fair value of purchase consideration over the fair value of the assets acquired, liabilities assumed and non-controlling interests in the acquired entity is recorded as goodwill. The primary items that generate goodwill include the value of the synergies between the acquired company and the Company and the value of the acquired assembled workforce, neither of which qualifies for recognition as an intangible asset. Acquisition-related expenses and post-acquisition restructuring costs are recognized separately from the business combination and are expensed as incurred.GoodwillThe Company reviews goodwill for impairment annually and whenever events or changes in circumstances indicate the carrying amount of goodwill may not be recoverable. In evaluating goodwill for impairment, the Company has the option to first perform a qualitative test to determine whether further impairment testing is necessary or to perform a qualitative assessment by comparing the fair value of the reporting unit to its carrying amount. Under the qualitative assessment, the Company is not required to calculate the fair value of a reporting unit unless it determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Qualitative factors include, but are not limited to, the macroeconomic and industry environment as well as Company-specific factors. The Company elects to perform a quantitative test for all of its reporting units as part of its annual goodwill impairment assessment in the fourth quarter of each fiscal year. In the quantitative assessment, the Company estimates the fair value of its reporting units using a weighting of fair values derived most significantly from the income approach, and to a lesser extent, the market approach. Under the income approach, the Company estimates the fair value of a reporting unit based on the present

value of estimated future cash flows covering discrete forecast periods as well as terminal value determinations. The Company prepares cash flow projections based on management's estimates of revenue growth rates and operating margins, taking into consideration industry and market conditions. The Company bases the discount rate on the weighted-average cost of capital adjusted for the relevant risk associated with business-specific characteristics and the uncertainty related to the reporting unit's ability to execute on the projected cash flows. Under the market approach, the Company estimates fair value based on market multiples of revenue and earnings derived from comparable publicly traded companies with similar operating and investment characteristics as the reporting unit. The Company weights the fair value derived from the market approach commensurate with the level of comparability of these publicly traded companies to the reporting unit. When market comparables are not meaningful or not available, the Company estimates the fair value of a reporting unit using only the income approach.If the fair value of a reporting unit exceeds the carrying amount of the net assets assigned to that reporting unit, goodwill is not impaired and no further testing is required. If the fair value of the reporting unit is less than its carrying amount, goodwill is impaired. The goodwill impairment loss is measured as the excess of the reporting unit's carrying value over its fair value (not to exceed the total goodwill allocated to that reporting unit).

85Table of Contents**HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES****Notes to Consolidated Financial Statements**

(Continued)**Intangible Assets and Long-Lived Assets**The Company reviews intangible assets with finite lives, long-lived assets and ROU assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. For lease assets such circumstances would include a decision to abandon the use of all or part of an asset, or subleases that do not fully recover the costs of the associated lease. The Company assesses the recoverability of assets based on the estimated undiscounted future cash flows expected to result from the use and eventual disposition of the asset. If the undiscounted future cash flows are less than the carrying amount, the asset is impaired. The Company measures the amount of impairment loss, if any, as the difference between the carrying amount of the asset and its fair value using an income approach or, when available and appropriate, using a market approach. The Company amortizes intangible assets with finite lives using the straight-line method over the estimated economic lives of the assets, ranging from one to ten years. Intangible assets purchased as part of an acquisition are included in Intangible assets, net in the Consolidated Balance Sheets. All other separately purchased intangible assets are included in Long-term financing receivables and other assets in the Consolidated Balance Sheets. Software development costs related to the development of new product offerings are capitalized subsequent to the establishment of technological feasibility, which is demonstrated by the completion of a detail program design or working model. Software development costs are included in Intangible assets, net in the Consolidated Balance Sheets. The Company amortizes capitalized costs on a straight-line basis over the estimated useful life of products, which is generally three years. Equity Method InvestmentsInvestments and ownership interests are accounted for under equity method accounting if the Company has the ability to exercise significant influence, but does not have a controlling financial interest. The Company records its interest in the net earnings of its equity method investees, along with adjustments for unrealized profits or losses on intra-entity transactions and amortization of basis differences, within Earnings from equity interests in the Consolidated Statements of Earnings. Profits or losses related to intra-entity sales with its equity method investees are eliminated until realized by the investor or investee. Basis differences represent differences between the cost of the investment and the underlying equity in net assets of the investment and are generally amortized over the lives of the related assets that gave rise to them. Equity method goodwill is not amortized or tested for impairment; instead the equity method investment is tested for impairment. The Company records its interest in the net earnings of its equity method investments based on the most recently available financial statements of the investees. The carrying amount of the investment in equity interests is adjusted to reflect the Company's interest in net earnings, dividends received and other-than-temporary impairments. The Company reviews for impairment whenever factors indicate that the carrying amount of the investment might not be recoverable. In such a case, the decrease in value is recognized in the period the impairment occurs in the Consolidated Statements of Earnings.

Equity Securities InvestmentsEquity securities investments with readily determinable fair values (other than those accounted for under the equity method or those that result in consolidation of the investee) are measured at fair value and any changes in fair value are recognized in Interest and other, net in the Consolidated Statements of Earnings. For equity investments without readily determinable fair values, the Company may elect to apply the measurement alternative or the fair value option. Under the measurement alternative investments are measured at cost, less impairment, and adjusted for qualifying observable price changes on a prospective basis. The Company reviews for impairment at each reporting period, assessing factors such as deterioration of earnings, adverse change in market/industry conditions, the ability to operate as a going concern, and other factors which indicate that the carrying amount of the investment might not be recoverable. In such a case, the decrease in value is recognized in the period the impairment occurs in the Consolidated Statements of Earnings. The Company elects the fair value option when it believes that it best reflects the underlying economics of the investment. These investments may be valued using third-party pricing services at each reporting date with changes in fair value recorded as a component of Interest and other, net in the Consolidated Statements of Earnings.

Debt Securities InvestmentsDebt securities are generally considered available-for-sale and are reported at fair value with unrealized gains and losses, net of applicable taxes, recorded in Accumulated other comprehensive loss in the Consolidated Balance Sheets. Realized gains and losses for available-for-sale securities are calculated based on the specific identification method and included in Interest and other, net in the Consolidated Statements of Earnings. The Company monitors its investment portfolio for potential impairment on a quarterly basis. When the carrying amount of an investment in debt securities exceeds its fair value and the decline in value is determined to be due to credit-related factors, the Company recognizes the impairment using an allowance for credit loss in **86Table of Contents****HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****Interest and other, net**, in the Consolidated Statements of Earnings, while the impairment that is not credit related is recorded in Accumulated other comprehensive loss in the Consolidated Balance Sheets.

DerivativesThe Company uses derivative financial instruments, primarily forwards, swaps, and, at times, options, to manage a variety of risks, including risks related to foreign currency and interest rate exposures. The Company does not use derivative financial instruments for speculative purposes. The Company receives fair value to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. When prices in active markets are not available for an identical asset or liability, the Company generally uses industry standard valuation models to measure the fair value of derivative positions. Such measurements involve projecting future cash flows and discounting the future amounts to present value using market based observable inputs, including interest rate curves, Company and counterparty credit risk, foreign currency exchange rates, and forward and spot prices. In the absence of such data, the Company will use internal information that is consistent with what market participants would use in a hypothetical transaction that occurs at the measurement date. The determination of fair value often involves significant judgments about assumptions such as determining an appropriate discount rate that factors in both risk and liquidity premiums, identifying the similarities and differences in market transactions, weighting those differences accordingly and then making the appropriate adjustments to make market transactions to reflect the risks specific to the asset or liability being valued.For a further discussion of fair value measurements and derivative instruments, refer to Note A 12, "Fair Value" and Note 13, "Financial Instruments," respectively.

ContingenciesThe Company is involved in various lawsuits, claims, investigations, and proceedings that arise in the ordinary course of business. The Company records a liability for contingencies when it believes it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. The Company does not record gain contingencies until realized. See Note A 17, "Litigation, Contingencies, and Commitments," for a full description of the Company's contingencies.

WarrantiesThe Company accrues the estimated cost of product warranties at the time of recognizing revenue. The Company's standard product warranty terms generally include post-sales support and repairs or replacement of a product at no additional charge for a specified period of time. The Company engages in extensive product quality programs and processes, including actively monitoring and evaluating the quality of its component suppliers. The estimated warranty obligation is based on contractual warranty terms, repair costs, product call rates, average cost per call, current period product shipments and ongoing product failure rates, as well as specific product class failure outside of the Company's baseline experience. Warranty terms generally range from one to five years for parts and labor, depending upon the product. For certain networking products, the Company offers a lifetime warranty. Over the last three fiscal years, the annual warranty expense has averaged approximately 1.1% of annual net product revenue. Refer to Note 7, "Balance Sheet Details," for additional information.

Recently Enacted Accounting PronouncementsIn November 2024, the FASB issued guidance to provide disaggregated expense disclosures in the Consolidated Financial Statements. The Company is required to adopt the guidance for its annual period ending October 31, 2028 and all interim periods thereafter, though early adoption is permitted. The Company is currently evaluating the impact of this amendment on its Consolidated Financial Statements.

In December 2023, the FASB issued guidance to provide disaggregated income tax disclosures on the rate reconciliation and income taxes paid. The Company is required to adopt the guidance in the first quarter of fiscal 2026, though early adoption is permitted. The Company is currently evaluating the impact of this amendment on its Consolidated Financial Statements.

In November 2023, the FASB issued guidance to improve the disclosures about a public entity's reportable segments and address requests from investors for additional, more detailed information about a reportable segment's expenses. The Company will adopt this guidance for its annual period ending October 31, 2025 and all interim periods thereafter. The Company does not expect the adoption of this guidance to have a significant impact on its Consolidated Financial Statements.

87Table of Contents**HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****Note A 2: Segment Information**Hewlett Packard Enterprise's operations are organized into five segments for financial reporting purposes: Server, Hybrid Cloud, Intelligent Edge, Financial Services ("FS"), and Corporate Investments and Other. Hewlett Packard Enterprise's organizational structure is based on a number of factors that the Chief Operating Decision Maker ("CODM"), who is the Chief Executive Officer, uses to evaluate, view and run the Company's business operations, which include, but are not limited to, customer base and homogeneity of products and technology. The five segments are based on this organizational structure and information reviewed by Hewlett Packard Enterprise's management to evaluate segment results. A summary of the types of products and services within each segment is as follows: Server consists of general-purpose servers for multi-workload computing and workload-optimized servers to deliver the best performance and value for demanding applications, and integrated systems comprised of software and hardware designed to address High-Performance Computing and Supercomputing (including exascale applications), Artificial Intelligence ("AI"), Data Analytics, and Transaction Processing workloads for government and commercial customers globally. This portfolio of products includes the secure and versatile HPE ProLiant Rack and Tower servers; HPE Synergy, a composable infrastructure for traditional and cloud-native applications; HPE Scale Up Servers product lines for critical applications, including large enterprise software applications and data analytics platforms; HPE Edgeline servers; HPE Cray EX; HPE Cray XD (formerly known as HPE Apollo); and HPE NonStop. Server offerings also include operational and support services sold with systems and as standalone services.

Hybrid Cloud offers a wide variety of cloud-native and hybrid solutions across storage, private cloud and the infrastructure SaaS space. Storage includes data storage and data management offerings with the HPE Alletra Storage portfolio; unstructured data solutions and analytics for AI; data protection and archiving; and storage networking. It also includes AIOps-driven intelligence with HPE InfoSight and HPE CloudPhysics. In private cloud, the HPE GreenLake offerings include new cloud-native offerings and capabilities for virtual machines, containers, and bare metal; a full suite of private cloud offerings that enable customers to self-manage or choose a fully managed experience; and a portfolio of world-class AI infrastructure delivered as a SaaS. This segment also provides self-service private cloud on-demand with HPE GreenLake for Private Cloud Business Edition. Infrastructure software includes monitoring and observability for day two operations and beyond through the Company's acquisition of OpsRamp and unified data access through HPE Ezmeral Data Fabric and analytics suite, which helps move and transform data for use in AI and other applications. Hybrid Cloud segment also includes data lifecycle management and protection through its suite of offerings, including Zerto Disaster Recovery. Intelligent Edge offers wired and wireless local area networks, campus, branch, and data center switching, software-defined wide-area networks, private and public cellular network software, network security, and associated services that enable secure connectivity for businesses of any size. The HPE Aruba Networking product portfolio includes hardware products such as Wi-Fi access points, switches, and gateways. The HPE Aruba Networking software and services portfolio includes cloud-based management, network management, network access control, software-defined wide-area networking, network security, analytics and assurance, location services software, private and public cellular core software, and professional and support services, as well as SaaS and consumption models through the HPE GreenLake cloud for the Intelligent Edge portfolio of products. Intelligent Edge offerings are consolidated in the edge service platform, which takes a cloud-native approach that provides customers with a unified framework to meet their connectivity, security, and financial needs across campus, branch, data center, and remote worker environments.

Financial Services provides flexible investment solutions, such as leasing, financing, IT consumption, utility programs, and asset management services for customers that facilitate unique technology deployment models and the acquisition of complete IT solutions, including hardware, software, and services from Hewlett Packard Enterprise and others. FS also supports financial solutions for on-premise flexible consumption models, such as the HPE GreenLake cloud.

Corporate Investments and Other includes the Advisory and Professional Services ("APS") business, which primarily offers consultative-led services, HPE and partner technology expertise and advice, implementation services as well as complex solution engagement capabilities; CMS, which primarily offers software and related services to the telecommunications industry; and Hewlett Packard Labs, which is responsible for research and development.

88Table of Contents**HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****Segment Policy**Hewlett Packard Enterprise derives the results of its business segments directly from its internal management reporting system. The accounting policies that Hewlett Packard Enterprise uses to derive segment results are substantially the same as those the consolidated company uses. The CODM measures the performance of each segment based on several metrics, including earnings from operations. The CODM uses these results, in part, to evaluate the performance of, and to allocate resources to each of the segments.

Segment revenue includes revenues from sales to external customers and intersegment revenues that reflect transactions between the segments on an arm's-length basis. Intersegment revenues primarily consist of sales of hardware and software that are sourced internally and, in the majority of the cases, are financed as operating leases by FS to the Company's customers. Hewlett Packard Enterprise's consolidated net revenue is derived and reported after the elimination of intersegment revenues from such arrangements.

Financing cost in the Consolidated Statements of Earnings reflects interest expense on borrowing and funding-related activity associated with FS and its subsidiaries, and debt issued by Hewlett Packard Enterprise for which a portion of the proceeds benefited FS.

Hewlett Packard Enterprise does not allocate to its segments certain operating expenses, which it manages at the corporate level. These unallocated operating costs include certain corporate costs and eliminations, stock-based compensation expense, amortization of intangible assets, impairment of goodwill, transformation costs, disaster recovery/charges, divestiture related exit costs, and acquisition, disposition and other related charges. Total assets by segment are not presented as that information is not used to allocate resources or assess performance at the segment level and is not reviewed by the CODM.

within the Intelligent Edge and Server segments. No single customer represented 10% or more of the Company's total net revenue in fiscal year 2022. Geographic Information Net revenue by country is based upon the sales location that predominately represents the customer location. For each of the fiscal years of 2024, 2023 and 2022, other than the U.S., no country represented more than 10% of the Company's net revenue. Net revenue by geographic region was as follows: For the fiscal years ended October 31, 2024 2023 2022 In millions Americas U.S.\$10,890A \$10,369A \$9,425A Americas excluding U.S.\$2,345A 2,208A 1,964A Total Americas13,235A 12,577A 11,389A Europe, Middle East and Africa10,189A 10,151A 10,292A Asia Pacific and Japan6,703A 6,407A 6,815A Total consolidated net revenues\$30,127A \$29,135A \$28,496A 90Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)Property, plant and equipment, net by country in which the Company's operates was as follows: As of October 31A 2024 2023A In millionsU.S.\$ 2,616A \$2,803A Other countries3,048A 3,186A Total property, plant and equipment, net\$5,664A \$5,989A Note 3: Transformation Programs Transformation programs are comprised of the Cost Optimization and Prioritization Plan and the HPE Next Plan. During the third quarter of fiscal 2020, the Company launched the Cost Optimization and Prioritization Plan which focuses on realigning the workforce to areas of growth, a new hybrid workforce model called Edge-to-Office, real estate strategies and simplifying and evolving the Company's product portfolio strategy. The transformation costs predominantly related to labor restructuring, non-labor restructuring, IT investments, design and execution charges and real estate initiatives. The primary elements of the Cost Optimization and Prioritization Plan were completed by the end of fiscal 2024. During the third quarter of fiscal 2017, the Company launched the HPE Next Plan to put in place a purpose-built company designed to compete and win in the markets where it participates. Through this program, the Company is simplifying the operating model, and streamlining its offerings, business processes and business systems to improve its strategy execution. The primary elements of the HPE Next Plan were completed by the end of fiscal 2024. Cost Optimization and Prioritization Plan The components of the transformation costs relating to the Cost Optimization and Prioritization Plan were as follows: For the fiscal years ended October 31, 2024 2023 2022 In millions Program management\$2A \$9A \$27A IT costs13A 26A 26A Restructuring charges\$2A 226A 201A Total \$47A \$261A \$254A HPE Next Plan The components of transformation costs relating to HPE Next Plan were as follows: For the fiscal years ended October 31, 2024 2023 2022 In millions Program management\$1A \$6A \$7A IT costs47A 91A 184A Restructuring charges1A 16A 13A Gains on real estate sales\$A (85)(8) Impairment on real estate assets\$A A A 11A Other\$A 3A 13A Total \$49A \$25A \$220A Restructuring Plans On May 19, 2020, the Company's Board of Directors approved a restructuring plan in connection with the Cost Optimization and Prioritization Plan which primarily related to labor restructuring and real estate site exits under non-labor restructuring. The changes to the workforce varied by country, based on business needs, local legal requirements and consultations with employee works councils and other employee representatives, as appropriate. 91Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)On October 16, 2017, the Company's Board of Directors approved a restructuring plan in connection with the HPE Next Plan, and on September 20, 2018, the Company's Board of Directors approved a revision to that restructuring plan. Headcount exits under the HPE Next Plan were substantially complete as of October 31, 2020. Other restructuring actions primarily related to infrastructure were substantially complete as of October 31, 2022. Restructuring activities related to the Company's employees and infrastructure under the Cost Optimization and Prioritization Plan and HPE Next Plan are presented in the table below: A Cost Optimization and Prioritization Plan HPE Next Plan Employee Severance Infrastructure and other Employee Severance Infrastructure and other A In millions Liability as of October 31, 2023\$152A \$127A \$6A \$27A Charges30A 2A A A 1A Cash payments(113)(38)(5)(7) Non-cash items(23A) (12A) Liability as of October 31, 2024\$867A \$94A \$A A \$23A Total costs incurred to date as of October 31, 2024\$823A \$563A \$1,267A Total expected costs to be incurred as of October 31, 2024\$823A \$563A \$1,267A \$271A The current restructuring liability related to the transformation programs, reported in the Consolidated Balance Sheets as of October 31, 2024 and 2023, was \$61 million and \$180 million, respectively, in Accrued restructuring, and \$17 million and \$22 million, respectively, in Other accrued liabilities. The non-current restructuring liability related to the transformation programs, reported in Other non-current liabilities in the Consolidated Balance Sheets as of October 31, 2024 and 2023 was \$106 million and \$110 million, respectively. Note 4: Retirement and Post-Retirement Benefit Plans Defined Benefit Plans The Company sponsors defined benefit pension plans worldwide, the most significant of which are the United Kingdom (UK) and Germany plans. The pension plan in the UK is closed to new entrants, and the plan was frozen October 31, 2024. This plan provides benefits based on final pay and years of service and generally requires contributions from members. The German pension program that is open to new hires consists of cash balance plans that provide employer credits as a percentage of pay, certain employee pay deferrals and employer matching contributions. There also are previously closed German pension programs that include cash balance and final average pay plans. A These previously closed pension programs comprise the majority of the pension obligations in Germany. A Post-Retirement Benefit Plans The Company sponsors retiree health and welfare benefit plans, the most significant of which is in the U.S. Generally, employees hired before August 2008 are eligible for employer credits under the Hewlett Packard Enterprise Retirement Medical Savings Account Plan (RMSAP) upon attaining age 45. Employer credits to the RMSA available after September 2008 are provided in the form of matching credits on employee contributions made to a voluntary employee beneficiary association. Upon retirement, employees may use these employer credits for the reimbursement of certain eligible medical expenses. Defined Contribution Plans The Company offers various defined contribution plans for U.S. and non-U.S. employees. The Company's defined contribution expense was approximately \$206 million in fiscal 2024 and 2023, and \$196 million in fiscal 2022. U.S. employees are automatically enrolled in the Hewlett Packard Enterprise Company 401(k) Plan (HPE 401(k) Plan), when they meet eligibility requirements, unless they decline participation. The HPE 401(k) Plan's quarterly employer matching contributions are 100% of an employee's contributions, up to a maximum of 4% of eligible compensation. 92Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)Pension Benefit Expense The Company's net pension and post-retirement benefit costs that were directly attributable to the eligible employees, retirees and other former employees of Hewlett Packard Enterprise and recognized in the Consolidated Statements of Earnings for fiscal 2024, 2023 and 2022 are presented in the table below: A For the fiscal years ended October 31, 2024 2023 2022 A Defined Benefit Plans Post-Retirement Benefit Plans A In millions Service cost\$49A \$53A \$78A \$1A \$1A \$1A Interest cost(140)8A 386A 154A 9A 8A 4A Expected return on plan assets(1)(550)(539)(450)(4)(2)(2) Amortization and Deferrals(1): Actuarial loss (gain)148A 160A 167A 4(6)(2) Prior service benefit(8)(10)(10) A A A A A Net periodic benefit cost (credit) 47A 50A (61) 2A 1A 1A Settlement loss and special termination benefits(1) 14A 6A 5A A A A A Total net benefit cost (credit) \$51A \$56A \$(56) \$2A \$1A \$1A (1) These non-service components were included in Interest and other, net in the Consolidated Statements of Earnings. The weighted-average assumptions used to calculate the net benefit cost (credit) in the table above for fiscal 2024, 2023 and 2022 were as follows: A For the fiscal years ended October 31, 2024 2023 2022 A Defined Benefit Plans Post-Retirement Benefit Plans Discount rate used to determine benefit obligation 4.4A % 3.9A % 1.3A % 6.5A % 6.0A % 3.0A % Discount rate used to determine service cost 4.7A % 4.2A % 1.7A % 6.1A % 5.7A % 6.2A % Discount rate used to determine interest cost 4.4A % 3.9A % 1.1A % 6.4A % 5.9A % 6.2A % Expected increase in compensation levels 2.9A % 3.0A % 2.6A % A A A A A Expected long-term return on plan assets 5.5A % 5.1A % 3.2A % 5.3A % 4.3A % 3.3A % Interest crediting rate (1) 2.4A % 2.4A % 2.5A % 3.4A % 2.7A % (1) The average assumed interest credited for HPE's cash balance plans and post-retirement plans, as applicable. To estimate the service and interest cost components of net periodic benefit cost for defined benefit plans that use the yield curve approach, which represent substantially all of the Company's defined benefit plans, the Company has elected to use a full yield curve approach in the estimation of these components of benefit cost by applying the specific spot rates along the yield curve used in the determination of the benefit obligation to the relevant projected cash flows. 93Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)Funded Status The funded status of the plans was as follows: A As of October 31, 2024 2023 2022 A Defined Benefit Plans Post-Retirement Benefit Plans Change in fair value of plan assets: A A A Fair value at beginning of year\$9,879A \$9,915A \$68A \$60A Reimbursement of benefit payments(1)(90)(82) A A A Actual return on plan assets1,207A (315) 5A 4A Employer contributions172A 179A 4A 6A Participant contributions26A 24A 6A 7A Benefits paid(509)(449)(7)(9) Settlement(18)(29) A A A Currency impact340A 636A A A A Fair value at end of year\$11,007A \$9,879A \$76A \$68A Change in benefit obligation: Projected benefit obligation at beginning of year\$9,362A \$9,517A \$148A \$138A Addition/deletion of plans(2) A A A A A Service cost49A 53A 1A 1A Interest cost408A 386A 9A 8A Participant contributions26A 24A 6A 7A Actuarial loss (gain)613A (756) 7A 3A Benefits paid(509)(449)(7)(9) Plan amendments4A A A A A Settlement(18)(29) A A A A Special termination benefits2A A A A A Currency impact319A 613A (2) A A A Projected benefit obligation at end of year\$310,256A \$9,362A \$162A \$148A Funded status at end of year\$751A \$517A \$(86) \$(80) Accumulated benefit obligation\$10,130A \$9,233A \$A A A A (1) For benefit payments reimbursed to HPE from the German Contractual Trust Arrangements. (2) Includes the addition/deletion of plans resulting from acquisitions. (3) HPE divested \$13A million in projected benefit obligation and \$7A million in assets due to the Communications Technology Group (CTG) divestiture that occurred on December 1, 2024. For the year ended October 31, 2024, the benefit obligation increased from \$9.4A billion to \$10.3A billion primarily due to the effects of decreasing discount rates. The increase was partially offset by benefits paid which reduced benefit obligations. Pension assets increased from \$9.9A billion to \$11.0A billion as assets performed better than expected. The increase was partially offset by benefits paid from plan assets. 94Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)The weighted-average assumptions used to calculate the projected benefit obligations were as follows: A As of October 31, 2024 2023 2022 A Defined Benefit Plans Post-Retirement Benefit Plans Discount rate 3.8A % 4.4A % 5.6A % Expected increase in compensation levels 2.6A % 2.9A % A A A A A Interest crediting rate 2.5A % 2.4A % 4.8A % 5.3A % The net amounts recognized for defined benefit and post-retirement benefit plans in the Company's Consolidated Balance Sheets were as follows: A As of October 31, 2024 2023 2022 A Defined Benefit Plans Post-Retirement Benefit Plans A In millions Non-current assets\$1,555A \$1,313A \$A A A Current liabilities(52)(51)(6)(8) Non-current liabilities(752)(745)(80)(72) Funded status at end of year\$751A \$517A \$(86) \$(80) The following table summarizes the pre-tax net actuarial loss and prior service benefit recognized in accumulated other comprehensive loss for the defined benefit plans, activity for the post-retirement benefit plans were immaterial: A As of October 31, 2024 A Defined Benefit Plans A In millions Net actuarial loss\$2,478A Prior service benefit14A Total recognized in accumulated other comprehensive loss\$2,492A Defined benefit plans with projected benefit obligations exceeding the fair value of plan assets were as follows: A As of October 31, 2024 2023 A In millions Aggregate fair value of plan assets\$506A \$1,969A Aggregate projected benefit obligations1,212A 2,765A Defined benefit plans with accumulated benefit obligations exceeding the fair value of plan assets were as follows: A As of October 31, 2024 2023 A In millions Aggregate fair value of plan assets\$2,274A \$1,969A Aggregate accumulated benefit obligations\$3,076A \$2,675A Fair Value of Plan Assets The Company pays the U.S. defined benefit plan obligations when they come due since these plans are unfunded. The table below sets forth the fair value of non-U.S. defined benefit plan assets by asset category within the fair value hierarchy as of October 31, 2024 and 2023. 95Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued) A As of October 31, 2024 A Assets of October 31, 2023 A Level 1 A Level 2 A Level 3 A Total A Level 1 A Level 2 A Level 3 A Total A In millions Asset Category:

Investments in publicly traded equity securities are valued using the closing price on the measurement date as reported on the stock exchange on which the individual securities are traded. For corporate, government backed debt securities, and some other investments, fair value is based on observable inputs of comparable market transactions. The valuation of certain real estate funds, insurance group annuity contracts and alternative investments, such as limited partnerships and joint ventures, may require significant management judgment and involves a level of uncertainty. The valuation is generally based on fair value as reported by the asset manager and adjusted for cash flows, if necessary. In making such an assessment, a variety of factors are reviewed by management, including, but are not limited to, the timeliness of fair value as reported by the asset manager and changes in general economic and market conditions subsequent to the last fair value reported by the asset manager. The use of different techniques or assumptions to estimate fair value could result in a different fair value measurement at the reporting date. Cash and cash equivalents includes money market funds, which are valued based on cost, which approximates fair value. Other than those assets that have quoted prices from an active market, investments are generally classified in Level 2 or Level 3 of the fair value hierarchy based on the lowest level input that is significant to the fair value measure in its entirety. Investments measured using net asset value as a practical expedient are not categorized within the fair value hierarchy.Plan Asset Allocations The weighted-average target and actual asset allocations across the benefit plans at the respective measurement dates for the non-U.S. defined benefit plans were as follows: A Defined Benefit PlansA Plan Assets2024 Target Allocation20242023Public equity securities21.4A %21.8A %Private/hybrid equity securities10.5A %9.5A %Real estate and other(1)6.7A %6.3A %Equity-related investments(1)41.7A %38.6A %37.6A %Debt securities57.3A %58.2A %59.2A %Cash and cash equivalents1.0A %3.2A %3.2A %Total100.0A %100.0A %100.0A % (1) A A A Included in Real estate and other investments are synthetic equity swaps with equity exposure of \$396A million, which is held in the UK plans as of OctoberA 31, 2024.For the Company's post-retirement benefit plans, approximately 80% of the plan assets are invested in cash and cash equivalents and approximately 20% in multi-asset credit investments which consists primarily of investment grade credit, emerging market debt and high yield bonds.98Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)Investment PolicyThe Company's investment strategy is to seek a competitive rate of return relative to an appropriate level of risk depending on the funded status of each plan and the timing of expected benefit payments. The majority of the plansA investment managers employ active investment management strategies with the goal of outperforming the broad markets in which they invest. Risk management practices include diversification across asset classes and investment styles and periodic rebalancing toward asset allocation targets. A number of the plansA investment managers are authorized to utilize derivatives for investment or liability exposures, and the Company may utilize derivatives to effect asset allocation changes or to hedge certain investment or liability exposures.Asset allocation decisions are typically made by an independent board of trustees for the specific plan. Investment objectives are designed to generate returns that will enable the plan to meet its future obligations. In some countries, local regulations may restrict asset allocations, typically leading to a higher percentage of investment in fixed income securities than would otherwise be deployed. The Company reviews the investment strategy and provides a recommended list of investment managers for each country plan, with final decisions on asset allocation and investment managers made by the board of trustees or investment committees for the specific plan.Basis for Expected Long-Term Rate of Return on Plan AssetsThe expected long-term rate of return on plan assets reflects the expected returns for each major asset class in which the plan invests and the weight of each asset class in the target mix. Expected asset returns reflect the current yield on government bonds, risk premiums for each asset class and expected real returns, which considers each countryA specific inflation outlook. Because the CompanyA investment policy is to employ primarily active investment managers who seek to outperform the broader market, the expected returns are adjusted to reflect the expected additional returns, net of fees.Employer Contributions and Funding PolicyDuring fiscal 2024, the Company contributed approximatelyA \$172 million to its non-U.S. pension plansA and paidA \$4 millionA to cover benefit claims under the CompanyA s post-retirement benefit plans.During fiscal 2025, the Company expects to contribute approximately \$189 million to its non-U.S. pension plans and an additional \$1 million to cover benefit payments to U.S. non-qualified plan participants. In addition, the Company expects to pay approximately \$6 million to cover benefit claims for its post-retirement benefit plans. The Company's policy is to fund its pension plans so that it makes at least the minimum contribution required by various authorities including local government and taxing authorities.Estimated Future Benefits PaymentsAs of OctoberA 31, 2024, estimated future benefits payments for the Company's retirement plans were as follows:Fiscal yearDefined Benefit PlansPost-RetirementBenefit PlansA In millions2025\$609A \$10A 2026\$54A \$1A 2027\$68A \$1A 2028\$92A \$1A 2029\$60A \$1A Next five fiscal years to October 31, 2034\$3,114A \$72A NoteA 5: Stock-Based CompensationOn April 14, 2021 (the A Approval DateA), shareholders of the Company approved the Hewlett Packard Enterprise Company 2021 Stock Incentive Plan (the A 2021 PlanA) that replaced the CompanyA s 2015 Stock Incentive Plan (the A 2015 PlanA). The 2021 Plan provides for the grant of various types of awards including restricted stock awards, stock options and performance-based awards. These awards generally vest over 3 years from the grant date. The maximum number of shares as of the Approval Date that may be delivered to the participants under the 2021 Plan shall not exceed 7A million shares, plus 35.8A million shares that were available for grant under the 2015 Plan and any awards granted under the 2015 Plan prior to the 99Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)Approval Date that were cash-settled, forfeited, terminated, or lapsed after the Approval Date. On April 5, 2022, April 5, 2023 and April 10, 2024, shareholders of the Company approved amendments to the 2021 Plan thereby increasing the overall number of shares available for issuance by 15A million shares, 18A million shares, and 22A million shares, respectively. As of OctoberA 31, 2024, the Company had remaining authorization of 38.5A million shares under the 2021 Plan. Stock-Based Compensation ExpenseStock-based compensation expense and the resulting tax benefits were as follows:A For the fiscal years ended OctoberA 31, 202420232022In millionsStock-based compensation expense\$430A \$428A \$391A Income tax benefit(96)(92)(75)Stock-based compensation expense, net of tax\$334A \$336A \$316A Stock-based compensation expense as presented in the table above is recorded within the following cost and expense lines in the Consolidated Statements of Earnings.For the fiscal years ended OctoberA 31, 202420232022In millionsCost of sales\$49A \$47A \$46A Research and development158A 161A 143A Selling, general and administrative223A 220A 202A Stock-based compensation expense \$430A \$428A \$391A Employee Stock Purchase PlanEffective NovemberA 1, 2015, the Company adopted the Hewlett Packard Enterprise Company 2015 Employee Stock Purchase Plan (A ESPPA). The total number of shares of Company's common stock authorized under the ESPP wasA 80 million.A The ESPP allows eligible employees to contribute up to 10% of their eligible compensation to purchase Hewlett Packard Enterprise's common stock. The ESPP provides for a discount not to exceed 15% and an offering period up to 24 months. The Company currently offers 6-month offering periods during which employees have the ability to purchase shares at 95% of the closing market price on the purchase date. No stock-based compensation expense was recorded in connection with those purchases, as the criteria of a non-compensatory plan were met.Restricted Stock UnitsRestricted stock units have forfeitable dividend equivalent rights equal to the dividend paid on common stock. Restricted stock units do not have the voting rights of common stock, and the shares underlying restricted stock units are not considered issued and outstanding upon grant. The fair value of the restricted stock units is the closing price of the Company's common stock on the grant date of the award. The Company expenses the fair value of restricted stock units ratably over the period during which the restrictions lapse. 100Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)The following table summarizes restricted stock unit activity for the year ended OctoberA 31, 2024: A SharesWeighted-Average Grant Date Fair Value Per ShareA In thousandsOutstanding at beginning of year54,389A \$15A Granted and replacement awards for acquisitions29,930A 16A Vested(25,245)15A Forfeited/canceled(3,461)16A Outstanding at end of year55,613A \$16A The total grant date fair value of restricted stock awards vested for Company employees in fiscal 2024, 2023, and 2022 was \$348A million, \$319 million and \$262 million, respectively. As of OctoberA 31, 2024, there was \$342 million of unrecognized pre-tax stock-based compensation expense related to unvested restricted stock units, which the Company expects to recognize over the remaining weighted-average vesting period of 1.3 years.Performance Restricted Units The Company issues performance stock units (A PSUsA) that vest on the satisfaction of service and performance conditions. The fair value of the PSUs is the closing price of the Company's common stock on the grant date of the award. The Company also issues performance-adjusted restricted stock units (A PARSUA) that vest only on the satisfaction of service, performance and market conditions. The Company estimates the fair value of PARSUs subject to performance-contingent vesting conditions using the Monte Carlo simulation model. The expenses associated with these performance restricted units were not material for any of the periods presented. Stock OptionsStock options granted under the Plan are generally non-qualified stock options, but the Plan permits some options granted to qualify as incentive stock options under the U.S. Internal Revenue Code. The exercise price of a stock option is equal to the closing price of the Company's common stock on the option grant date. The majority of the stock options issued by the Company contain only service vesting conditions. The Company has also issued performance-contingent stock options that vest only on the satisfaction of both service and market conditions. The Company did not issue stock options in fiscal 2024, 2023, and 2022. The expenses associated with stock options were not material for any of the periods presented. The Company utilizes the Black-Scholes-Merton option pricing formula to estimate the fair value of stock options subject to service-based vesting conditions. The Company estimates the fair value of stock options subject to performance-contingent vesting conditions using a combination of a Monte Carlo simulation model and a lattice model, as these awards contain market conditions. NoteA 6: Taxes on EarningsProvision for TaxesThe domestic and foreign components of Net earnings (loss) from operations before taxes were as follows:A For the fiscal years ended OctoberA 31, 202420232022A In millionsU.S.\$765A \$(1,105)\$(1,138)Non-U.S.\$2,188A 3,335A 2,014A \$2,953A \$2,230A \$876A 101Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)The Provision for taxes on Net earnings from operations were as follows:A For the fiscal years ended OctoberA 31, 202420232022A In millionsU.S. federal taxes:A A Current\$8A A A \$12A Deferred(120)(88)(98)Non-U.S. taxes:CurrentA15A 256A 288A Deferred44A 23A (143)State taxes:Current15A 16A (43)Deferred12A (2)(8)\$374A \$205A \$8A The differences between the U.S. federal statutory income tax rate and the Company's effective tax rate were as follows:A For the fiscal years ended OctoberA 31, 202420232022U.S. federal statutory income tax rate21.0A %21.0A %21.0A %State income taxes, net of federal tax benefit0.4A %0.9A %2.8A %Lower rates in other jurisdictions, net(1.3)(4.4)(0.9)Valuation allowance(1.3)(2.8)(3.1)U.S. permanent differences(4.0)(1.5)(6.0)U.S. R&D credit(1.8)(2.1)(5.1)Uncertain tax positions(0.3)(2.0)(15.6)Goodwill impairmentA A A A %21.5A %Other, netA A 0.1A %2.7A %12.7A %69.2A %0.9A %The jurisdictions with favorable tax rates that had the most significant impact on the Company's effective tax rate in the periods presented include Puerto Rico and Singapore.In fiscal 2024, the Company recorded \$43 million of net income tax charges related to various items discrete to the year. These amounts primarily included \$104 million of income tax charges resulting from the gain on the partial disposition of H3C Technologies Co., Limited (A H3CA), which included \$215 million of U.S. and foreign income tax charges offset by \$111 million of income tax benefit for the release of an uncertain tax benefit related to the prior divestiture, partially offset by \$54 million of income tax benefits related to transformation costs, and acquisition, disposition and other related charges and \$11 million of net excess tax benefits related to stock-based compensation.In fiscal 2023, the Company recorded \$131 million of net income tax benefits related to various items discrete to the year. These amounts primarily included \$104 million of income tax benefits related to transformation costs, and acquisition, disposition and other related charges and \$19 million of net excess tax benefits related to stock-based compensation.In fiscal 2022, the Company recorded \$454 million of net income tax benefits related to various items discrete to the year. These amounts primarily included \$150 million of income tax benefits related to releases of foreign valuation allowances, \$99 million of income tax benefits related to transformation costs, and acquisition, disposition and other related charges, \$43 million of income tax benefits related to the settlement of U.S. tax audit matters, \$42 million of income tax benefits related to the release of U.S. passive foreign tax credit valuation allowances, \$30 million of income tax benefits related to the change in pre-separation tax liabilities, primarily those for which the Company shared joint and several liability with HP Inc. and for which the Company was indemnified by HP Inc., \$27 million of income tax benefits related to the utilization of capital losses which had a full valuation allowance, \$12 million of income tax benefits as a result of the fiscal 2021 U.S. tax return filing primarily 102Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)from the decrease in GILTI, and \$11 million of net income tax benefits related to settlements and ongoing discussions in foreign tax audit matters. As a result of certain employment actions and capital investments the Company has undertaken, income from manufacturing and services in certain countries is subject to reduced tax rates through 2039. The gross foreign income tax benefits attributable to these actions and investments were \$356A million (\$0.27 diluted net EPS) in fiscal 2024, \$857A million (\$0.65 diluted net EPS) in fiscal 2023, and \$832A million (\$0.63 diluted net EPS) in fiscal 2022. Refer to NoteA 16, A Net Earnings Per ShareA for details on shares used to compute diluted net EPS.Uncertain Tax PositionsA reconciliation of unrecognized tax benefits is as follows:A As of OctoberA 31, 202420232022A In millionsBalance at beginning of year\$672A \$674A \$2,131A Increases:For current year's tax positions\$60A 67A 81A For prior years' tax positions116A 20A 41A Decreases:For prior years' tax positions(113)(2)(48)Statute of limitations expiration(4)(4)(12)Settlements with taxing authorities(7)(83)(1,491)Settlements related to joint and several positions indemnified by HP Inc.A A A A A (28)Balance at end of year\$724A \$672A \$674A Up to \$344A million, \$354A million and \$386A million of the Company's unrecognized tax benefits at OctoberA 31, 2024, 2023 and 2022, respectively, would affect its effective tax rate if realized in their respective periods. During the first quarter of fiscal 2022, the Company effectively settled with the U.S. Internal Revenue Service (A IRSA) for fiscal 2016, primarily contributing to the reduction in the Company's unrecognized tax benefits of \$1.5A billion, which was predominantly related to the timing of intercompany royalty revenue recognition which does not affect the CompanyA s effective tax rate.The Company recognizes interest income from favorable settlements and interest expense and penalties accrued on unrecognized tax benefits in Provision for taxes in the Consolidated Statements of Earnings. The Company recognized \$2 million of interest expense and \$25 million and \$55A million of interest income in fiscal 2024, 2023, and 2022, respectively. As of OctoberA 31, 2024 and 2023, the Company had accrued \$58A million and \$56A million, respectively, for interest and penalties in the Consolidated Balance Sheets.The Company is subject to income tax in the U.S. and approximately 80 other countries and is subject to routine corporate income tax audits in many of these jurisdictions.The Company engages in continuous discussion and negotiation with taxing authorities regarding tax matters in various jurisdictions. The Company is no longer subject to U.S. federal tax audits for years prior to 2017. The IRS is conducting audits of the Company's fiscal 2017 through 2022 U.S. federal income tax returns. During fiscal 2023, the IRS issued notices of proposed adjustments (A NOPAsA) for fiscal 2017, 2018, and 2019 relating to HPEA s intercompany transfer pricing. During the first quarter of fiscal 2024, the IRS issued a Revenue Agent Report (A RARa) finalizing their position on the NOPAs for the same issues and same fiscal years. However, HPE disagreed with the IRSA adjustments and believes the positions taken on its tax returns are more likely than not to prevail on technical merits, and has continued with settlement discussions with the IRS. During the third quarter of fiscal 2024, the Company submitted a formal settlement offer to the IRS to facilitate the closing of the audit and recorded increased reserves for unrecognized tax benefits of \$122 million. The impact of the increase in reserves is almost entirely offset with a valuation allowance release, and the net impact to income tax expense for fiscal 2024 was not material. It is reasonably possible that the IRS audit for fiscal 2017 through 2019 may be concluded in the next 12 months, and it is reasonably possible that existing unrecognized tax benefits related to these years may be reduced by an amount up to \$358 million within the next 12 months, the majority of which relates to adjustments to foreign tax credits that carry a full valuation 103Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)allowance or to the timing of intercompany royalty revenue recognition, neither of which affects the CompanyA s effective tax rate.With respect to major state and foreign tax jurisdictions, the Company is no longer subject to tax authority examinations for years prior to 2005. However, it is reasonably possible that certain foreign tax issues may be concluded in the next 12 months, including issues involving resolution of certain intercompany transactions and other matters. The Company believes it is reasonably possible that its existing

unrecognized tax benefits may be reduced by an amount up to \$6.1 million within the next 12 months. The Company believes it has provided adequate reserves for all tax deficiencies or reductions in tax benefits that could result from federal, state and foreign tax audits. The Company regularly assesses the likely outcomes of these audits in order to determine the appropriateness of the Company's tax provision. The Company adjusts its uncertain tax positions to reflect the impact of negotiations, settlements, rulings, advice of legal counsel, and other information and events pertaining to a particular audit. However, income tax audits are inherently unpredictable and there can be no assurance that the Company will accurately predict the outcome of these audits. The amounts ultimately paid on resolution of an audit could be materially different from the amounts previously included in the Provision for taxes and therefore the resolution of one or more of these uncertainties in any particular period could have a material impact on net earnings or cash flows. The Company has not provided for U.S. federal and state income and foreign withholding taxes on \$9.3 billion of undistributed earnings and basis differences from non-U.S. operations as of October 31, 2024 because the Company intends to reinvest such earnings indefinitely outside of the U.S. Determination of the amount of unrecognized deferred tax liability related to these earnings and basis differences is not practicable. The Company will remit non-indefinitely reinvested earnings of its non-U.S. subsidiaries for which deferred U.S. state income and foreign withholding taxes have been provided where excess cash has accumulated and the Company determines that it is advantageous for business operations, tax or cash management reasons. Deferred Income Taxes Deferred income taxes result from temporary differences between the amount of assets and liabilities recognized for financial reporting and tax purposes. 104 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Notes to Consolidated Financial Statements (Continued) The significant components of deferred tax assets and deferred tax liabilities were as follows: As of October 31, 2024 2023 A In millions Deferred tax assets: Loss and credit carryforwards (1) \$5,692 \$5,936 Inventory valuation 78 90 A Intercompany prepayments 192 325 A Warranty 45 49 A Employee and retiree benefits 162 184 Restructuring 27 52 A Deferred revenue 799 658 A Intangible assets 251 107 A Capitalized R&D 81 44 A Lease liabilities 253 209 A Other 262 196 A Total deferred tax assets 7,842 7,850 A Valuation allowance (1)(5,204)(5,428) Total deferred tax assets net of valuation allowance 2,638 2,422 A Deferred tax liabilities: Unremitted earnings of foreign subsidiaries (229)(190) ROU assets (236)(192) Fixed assets (150)(102) Total deferred tax liabilities (615)(484) Net deferred tax assets and liabilities 2,023 \$1,938 A (1) Fiscal 2023 amounts have been reclassified to conform to the current period presentation. Deferred tax assets and liabilities included in the Consolidated Balance Sheets are as follows: As of October 31, 2024 2023 In millions Deferred tax assets \$2,396 \$2,264 A Deferred tax liabilities (373)(326) Deferred tax assets net of deferred tax liabilities 2,023 \$1,938 A As of October 31, 2024, the Company had \$269 million, \$2.9 billion and \$20.1 billion of federal, state and foreign net operating loss carryforwards, respectively. Amounts included in state and foreign net operating loss carryforwards will begin to expire in 2025; federal net operating losses can carry forward indefinitely. The Company has provided a valuation allowance of \$145 million and \$3.8 billion for deferred tax assets related to state and foreign net operating losses carryforwards, respectively. As of October 31, 2024, the Company also had \$20 million, \$81 million, and \$91 million of federal, state, and foreign capital loss carryforwards, respectively. Amounts included in federal and state capital loss carryforwards will begin to expire in 2028; foreign capital losses can carry forward indefinitely. The Company has provided a valuation allowance of \$5 million and \$27 million for deferred tax assets related to state and foreign capital loss carryforwards, respectively. 105 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Notes to Consolidated Financial Statements (Continued) As of October 31, 2024, the Company had recorded deferred tax assets for various tax credit carryforwards as follows: A Carryforward Valuation Allowance Initial Year of Expiration A In millions U.S. foreign tax credits \$648 \$ (648) 2027 U.S. research and development and other credits 230 \$ 6 A 2029 Tax credits in state and foreign jurisdictions 197 A (177) 2028 Balance at end of year \$1,075 \$ (825) A Total valuation allowances decreased by \$224 million in fiscal 2024, primarily as a result of the utilization of certain non-U.S. loss carryforwards which had full valuation allowances, the impact on fully valued U.S. foreign tax credits as a result of the change in uncertain tax benefits, the recording of valuation allowances on certain non-U.S. tax credits, and the release of certain foreign valuation allowances. Tax Matters Agreement and Other Income Tax Matters In connection with the completed separations and mergers of the former Enterprise Services business with DXC Technology Company (the DXC Co) (the Everett Transaction) and the Software Segment with Micro Focus International plc (the Micro Focus Co) (the Seattle Transaction) and the Seattle Co, the Company entered into a DXC Tax Matters Agreement with DXC and a Micro Focus Tax Matters Agreement with Micro Focus, respectively. See Note 18, A Guarantees and Indemnifications, A for a description of the DXC Tax Matters Agreement and Micro Focus Tax Matters Agreement. Note 7: Balance Sheet Details Cash, Cash Equivalents and Restricted Cash As of October 31, 2024 2023 In millions Cash and cash equivalents \$14,846 \$4,270 A Restricted cash 259 311 A Total \$15,105 \$4,581 A Accounts Receivable, Net A As of October 31, 2024 2023 A In millions Accounts receivable \$3,236 \$3,254 A Unbilled receivable 324 264 A Allowances (10)(37) Totals \$3,550 \$3,481 A The allowance for doubtful accounts related to accounts receivable and changes therein were as follows: As of October 31, 2024 2023 2022 A In millions Balance at beginning of year \$37 \$25 A Provision for credit losses 41 29 A Adjustments to existing allowances, including write offs (68)(17) 2023 Balance at end of year \$10 \$37 A 106 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Notes to Consolidated Financial Statements (Continued) The Company has third-party revolving short-term financing arrangements intended to facilitate the working capital requirements of certain customers. The Company recorded an obligation of \$62 million, \$80 million and \$88 million in Notes payable and short-term borrowings in its Consolidated Balance Sheets as of October 31, 2024, 2023 and 2022, respectively, related to the trade receivables sold and collected from the third-party for which the revenue recognition was deferred. For arrangements involving an element of recourse, the fair value of the recourse obligation is measured using market data from similar transactions and reported as a current liability in Other accrued liabilities in the Consolidated Balance Sheets. The activity related to Hewlett Packard Enterprise's revolving short-term financing arrangements was as follows: As of October 31, 2024 2023 2022 A In millions Balance at beginning of period (1) \$83 \$163 A \$336 A Trade receivables sold 3,098 4,097 4,130 A Cash receipts (3,190)(4,185)(4,292) Foreign currency and other 9 8 A (11) Balance at end of period (1) \$8 \$336 A (1) Beginning and ending balances represent amounts for trade receivables sold but not yet collected. Depreciation expense was \$2.3 billion in fiscal 2024 and 2023, respectively, and \$2.2 billion in 2022. 107 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Notes to Consolidated Financial Statements (Continued) Long-Term Financing Receivables and Other Assets A As of October 31, 2024 2023 A In millions Financing receivables, net \$5,583 \$5,028 A Deferred tax assets 2,396 2,264 A Prepaid pension 1,555 1,313 A ROU assets 1,408 980 A Other 1,674 1,792 A Totals \$12,616 \$11,377 A Supplier Financing Arrangements The Company enters into supplier financing arrangements with external financial institutions. Under these arrangements, suppliers can choose to settle outstanding payment obligations at a discount. The Company holds no economic interest in suppliers' participation, nor does it provide guarantees or pledge assets under these arrangements. Invoices are settled with the financial institutions based on the original supplier payment terms. These arrangements do not alter the Company's rights and obligations towards suppliers, including scheduled payment terms. Liabilities associated with the funded participation in these arrangements, are presented within Accounts Payable on the Consolidated Balance Sheets, amounted to \$466 million, and \$295 million as of October 31, 2024 and October 31, 2023, respectively. Other Accrued Liabilities A As of October 31, 2024 2023 A In millions Sales and marketing programs \$1,032 \$1,070 A Value-added and property taxes 922 786 A Contract manufacturer liabilities 505 71 A Customer deposits 289 392 A Operating lease liabilities 261 194 A Warranty 150 167 A Collateral payable 90 207 A Other 1,281 1,274 A Total \$4,530 \$4,161 A Other Non-Current Liabilities A As of October 31, 2024 2023 A In millions Deferred revenue \$3,578 \$3,281 A Operating lease liabilities 1,309 966 A Pension, post-retirement, and post-employment 859 841 A Deferred tax liabilities 373 326 A Taxes on earnings 163 233 A Other 623 899 A Total \$6,905 \$6,546 A 108 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Notes to Consolidated Financial Statements (Continued) Warranties The Company's aggregate product warranty liabilities and changes therein were as follows: A As of October 31, 2024 2023 2022 A In millions Balance at beginning of year \$318 \$360 A Charges 173 184 A Adjustments related to pre-existing warranties (5)(18) 2022 Settlements made (185)(208) 2023 Balance at end of year (1) \$301 \$318 A \$360 A (1) The Company included the current portion in Other accrued liabilities, and amounts due after one year in Other non-current liabilities in the accompanying Consolidated Balance Sheets. Contract Liabilities and Remaining Performance Obligations Contract liabilities consist of deferred revenue and customer deposits. A summary of contract liabilities were as follows: A As of October 31, 2024 2023 A Location In millions Customer deposits Other accrued liabilities 289 392 A Customer deposits - non-current Other non-current liabilities 7 144 A Total customer deposits 296 536 A Deferred revenue Deferred revenue \$3,904 \$3,658 A Deferred revenue - non-current Other non-current liabilities 3,578 3,281 A Total deferred revenue 7,482 6,939 A In fiscal 2024, approximately \$3.5 billion of revenue was recognized relating to contract liabilities recorded as of October 31, 2023. Revenue allocated to remaining performance obligations represents contract work that has not yet been performed and does not include contracts where the customer is not committed. Remaining performance obligations estimates are subject to change and are affected by several factors, including contract terminations, changes in the scope of contracts, adjustments for revenue that has not materialized and adjustments for currency. As of October 31, 2024, the aggregate amount of deferred revenue, was \$7.5 billion. The Company expects to recognize approximately 50% of this balance over fiscal 2025 with the remainder to be recognized thereafter. The Company receives payments in advance of completion of its contractual obligations, these payments are considered customer deposits. As customer acceptance milestones are met, the Company will recognize revenue and reduce the amount of contract liabilities. As of October 31, 2024, the aggregate amount of customer deposits was \$296 million. The Company expects to recognize \$289 million over fiscal 2025 and the remaining balance thereafter. Costs to obtain a Contract A As of October 31, 2024, the current and non-current portions of the capitalized costs to obtain a contract were \$88 million and \$136 million, respectively. As of October 31, 2023, the current and non-current portions of the capitalized costs to obtain a contract were \$86 million and \$138 million, respectively. The current and non-current portions of the capitalized costs to obtain a contract were included in Other current assets, and Long-term financing receivables and other assets, respectively, in the Consolidated Balance Sheets. In fiscal 2024, 2023, and 2022 the Company amortized \$106 million, \$94 million, and \$83 million, respectively, of the capitalized costs to obtain a contract which are included in Selling, general and administrative expense in the Consolidated Statements of Earnings. 109 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Notes to Consolidated Financial Statements (Continued) Note 8: Accounting for Leases as a Lessee Components of lease cost included in the Consolidated Statement of Earnings were as follows: For the fiscal years ended October 31, 2024 2023 2022 In millions Operating lease cost \$259 \$200 A \$197 A Finance lease cost 3 4 5 A Sublease rental income (26)(23)(27) Total lease costs 236 \$181 A \$175 A The ROU assets and lease liabilities for operating and finance leases included in the Consolidated Balance Sheets were as follows: As of October 31, Balance Sheet Classification 2024 2023 In millions Operating Leases ROU Assets Long-term financing receivables and other assets \$1,408 \$980 A Lease Liabilities: Operating lease liabilities \$ current Other accrued liabilities 261 194 A Operating lease liabilities \$ non-current Other non-current liabilities 1,309 966 A Total operating lease liabilities \$1,570 \$1,160 A Finance Leases Finance lease ROU Assets: Property, plant and equipment, net Gross finance lease ROU assets \$26 \$26 A Less: Accumulated depreciation (16)(14) Net finance lease ROU assets \$10 \$12 A Lease Liabilities: Finance lease liabilities \$ current Notes payable and short-term borrowings 6 5 A Finance lease liabilities \$ non-current Long-term debt 32 38 A Total finance lease liabilities \$38 \$43 A Total ROU assets 1,418 \$992 A Total lease liabilities 1,608 \$1,203 A 110 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Notes to Consolidated Financial Statements (Continued) The weighted-average remaining lease term and the weighted-average discount rate for the operating and finance leases were as follows: As of October 31, 2024 2023 Operating Leases Finance Leases Operating Leases Finance Leases Weighted-average remaining lease term (in years) 6.75 5.7 26.5 Weighted-average discount rate 4.4 3.5 3.8 3.5 A Supplemental cash flow information related to leases was as follows: For the fiscal years ended October 31, Cash Flow Statement Activity 2024 2023 2022 In millions Cash outflows from operating leases Net cash used in operating activities 274 \$219 A \$214 A ROU assets obtained in exchange for new operating lease liabilities Non-cash activities 627 \$215 A \$195 A The following tables shows the future payments on the Company's operating and finance leases: As of October 31, 2024 Operating Leases Finance Leases Fiscal year In millions 2025 \$321 A 7 A 2026 \$296 A 7 A 2027 \$281 A 7 A 2028 \$249 A 8 A 2029 \$201 A 8 A Thereafter 468 4 A Total future lease payments \$1,816 \$414 A Less: imputed interest (246)(3) Total lease liabilities \$1,570 \$411 A 7 A Accounting for Leases as a Lessor Financing Receivables Financing receivables represent sales-type and direct-financing leases of the Company and third-party products. These receivables typically have terms ranging from two to five years and are usually collateralized by a security interest in the underlying assets. Financing receivables also include billed receivables from operating leases. The allowance for credit losses represents future expected credit losses over the life of the receivables based on past experience, current information and forward-looking economic considerations. The components of financing receivables were as follows: 111 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Notes to Consolidated Financial Statements (Continued) A As of October 31, 2024 2023 A In millions Minimum lease payments receivables \$10,266 \$9,363 A Unguaranteed residual value 599 438 A Unearned income (1,218)(987) Financing receivables, gross 9,647 8,814 A Allowance for credit losses (194)(243) Financing receivables, net 9,453 8,571 A Less: current portion (3,870)(3,543) Amounts due after one year, net 5,583 \$5,028 A As of October 31, 2024, scheduled maturities of the Company's minimum lease payments receivable were as follows: As of October 31, 2024 Fiscal year In millions 2025 \$4,282 A 2026 \$2,977 A 2027 \$1,747 A 2028 \$892 A 2029 \$277 A Thereafter 91 A Total undiscounted cash flows \$10,266 A A Present value of lease payments (recognized as finance receivables) \$9,048 A Difference between undiscounted cash flows and discounted cash flows \$1,218 A Sale of Financing Receivables The Company enters into arrangements to transfer the contractual payments due under certain financing receivables to third-party financial institutions. For the fiscal years ended October 31, 2024 and 2023, the Company sold \$93 million and \$237 million, respectively, of financing receivables. Credit Quality Indicators Due to the homogeneous nature of its leasing transactions, the Company manages its financing receivables on an aggregate basis when assessing and monitoring credit risk. Credit risk is generally diversified due to the large number of entities comprising the Company's customer base and their dispersion across many different industries and geographic regions. The Company evaluates the credit quality of an obligor at lease inception and monitors that credit quality over the term of a transaction. The Company assigns risk ratings to each lease based on the creditworthiness of the obligor and other variables that augment or mitigate the inherent credit risk of a particular transaction and periodically updates the risk ratings when there is a change in the underlying credit quality. Such variables include the underlying value and liquidity of the collateral, the essential use of the equipment, the term of the lease, and the inclusion of credit enhancements, such as guarantees, letters of credit or security deposits. 112 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Notes to Consolidated Financial Statements (Continued) The credit risk profile of gross financing receivables, based on internal risk ratings as of October 31, 2024, presented on amortized cost basis by year of origination was as follows: A As of October 31, 2024 Risk Rating Low Moderate High Fiscal Year In millions 2024 \$2,630 \$1,120 A \$19 A 2023 1,804 948 54 A 2022 1,284 665 46 A 2021 1,440 317 52 A 2020 and prior 158 193 73 A Totals \$6,160 \$3,243 A \$244 A The credit risk profile of gross financing receivables, based on internal risk ratings as of October 31, 2023, presented on amortized cost basis by year of origination was as follows: A As of October 31, 2023 Risk Rating A Low Moderate High Fiscal Year In millions 2023 \$992 A \$1,408 A \$3,401 A \$273 A Accounts rated low risk typically have the equivalent of a Standard A or Poor's rating of BBB+ or higher, while accounts rated moderate risk generally have the equivalent of BB+ or lower. The Company classifies accounts as high risk when it considers the financing receivable to be impaired or when management believes there is a significant near-term risk of impairment. The credit quality indicators do not reflect any mitigation actions taken to transfer credit risk to third parties. Allowance for Credit Losses The allowance for credit losses for financing receivables as of October 31, 2024, 2023, and 2022, and the respective changes for the twelve months then ended were as follows: A As of October 31, 2024 2023 2022 A In millions Balance at beginning of period \$243 \$325 A \$228 A Provision for credit losses (1)(50) \$8 177 A Adjustment to the existing allowance (4) \$ 6 A (10) Write-offs (95) (140)(70) Balance at end of period \$194 \$243 A \$325 A (1) A A Fiscal 2022 included a provision of \$99 million related to expected credit losses due to the Company's exit from its Russia and Belarus businesses. 113 Table of Contents HEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIES Notes to Consolidated Financial Statements (Continued) Non-Accrual and Past-Due Financing Receivables The following table summarizes the aging and non-accrual status of gross financing receivables: A As of October 31, 2024 2023 A In millions Billed: (1) A Current 1-

At commencement of an operating lease, initial direct costs are deferred and are expensed over the lease term on the same basis as the lease revenue is recorded.

114Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)The following table presents amounts included in the Consolidated Statements of Earnings related to lessor activity:For the fiscal years ended October 31,Location202420232022In millionsInterest income from sales-type leases and direct financing leasesFinancing income\$668Å \$474Å \$483Å Lease income from operating leasesServices2,344Å 2,407Å 2,296Å Total lease income\$3,012Å \$2,954Å \$2,779Å Variable Interest EntitiesThe Company has issued asset-backed debt securities under a fixed-term securitization program to private investors. The asset-backed debt securities are collateralized by the U.S. fixed-term financing receivables and leased equipment in the offering, which is held by a Special Purpose Entity (ÆœSPÊÄ). The SPE meets the definition of a Variable Interest Entity (ÆœVIEÄ) and is consolidated, along with the associated debt, into the Consolidated Financial Statements as the Company is the primary beneficiary of the VIE. The SPE is a bankruptcy-remote legal entity with separate assets and liabilities. The purpose of the SPE is to facilitate the funding of customer receivables and leased equipment in the capital markets. The Company's risk of loss related to securitized receivables and leased equipment is limited to the amount by which the Company's right to receive collections for assets securitized exceeds the amount required to pay interest, principal, and fees and expenses related to the asset-backed securities. The following table presents the assets and liabilities held by the consolidated VIE as of OctoberÅ 31, 2024 and 2023, which are included in the Consolidated Balance Sheets. The assets in the table below include those that can be used to settle the obligations of the VIE. Additionally, general creditors do not have recourse to the assets of the VIE.Å As of OctoberÅ 31, 20242023Assets held by VIE:In millionsOther current assets\$189Å \$145Å Financing receivablesShort-term\$872Å \$764Å Long-term\$1,079Å \$983Å Property, plant and equipment, nets\$1,033Å \$1,214Å Liabilities held by VIE:Notes payable and short-term borrowings, net of unamortized debt issuance costs\$1,433Å \$1,392Å Long-term debt, net of unamortized debt issuance costs\$965Å \$1,082Å For the year ended OctoberÅ 31, 2024, financing receivables and leased equipment transferred via securitization through the SPE were \$1.2 billion and \$0.6 billion, respectively. For the fiscal year ended OctoberÅ 31, 2023, financing receivables and leased equipment transferred via securitization through the SPE were \$0.8 billion and \$0.7 billion, respectively. NoteÅ 10: Acquisitions and DispositionsAcquisitions and Disposition in fiscal 2024On August 30, 2024, the Company completed the acquisition of Morpheus Data, a pioneer in software for hybrid cloud management and platform operations. Morpheus DataÆ™'s results of operations were included within the Hybrid Cloud segment. The acquisition date fair value consideration of \$147Å million primarily consisted of cash paid for outstanding common stock. The Company is amortizing the intangible assets on a straight-line basis over an estimated weighted-average useful life of 4 years. The purchase price allocations for the Morpheus Data acquisition, described below, reflect various preliminary fair value estimates and analysis, including preliminary work performed by third-party valuation specialists, of certain tangible assets and

115Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)liabilities acquired, the valuation of intangible assets acquired, certain legal matters, income and non-income based taxes, and residual goodwill, which are subject to change within the measurement period. On January 9, 2024, the Company entered into a definitive merger agreement under which HPE will acquire Juniper Networks, Inc. (ÆœJuniper NetworksÆ) in an all-cash transaction for \$40.00 per share, representing an equity value of approximately \$14Å billion. The transaction was unanimously approved by the boards of directors of both companies. On April 2, 2024, Juniper Networks shareholders approved the transaction. The transaction is expected to be funded based on senior unsecured delayed draw term loans from a syndicate of banks, the post-tax proceeds from the CompanyÆ™'s sale to UNIS of 30% of the total issued share capital of H3C, the net proceeds (including after repayments of maturing debt) of its September 2024 issuances of senior unsecured notes and 7.625% Series C Mandatory Convertible Preferred Stock (the ÆœPreferred StockÆ), and cash on the balance sheet. Refer to Note 14, ÆœBorrowings,Æ and Note 15, ÆœStockholders' Equity,Æ for additional information. The closing of the transaction remains subject to receipt of regulatory approvals and satisfaction of other customary closing conditions.Disposition of CTG On May 23, 2024, HPE announced plans to divest the CTG business to HCLTech. CTG is included in the Communications and Media Solutions business, which is reported in the Corporate Investments and Other segment. This divestiture includes the platform-based software solutions portions of the CTG portfolio, including systems integration, network applications, data intelligence, and the business support systems groups. As of October 31, 2024, assets and liabilities to be sold have been presented in the Consolidated Balance Sheet as assets and liabilities held for sale. On December 1, 2024, the Company completed the disposition of CTG. The Company received net proceeds of \$210 million and expect to recognize a gain of approximately \$230 million.Acquisitions in fiscal 2023During fiscalÅ 2023, the Company completed five acquisitions. The purchase price allocations for the acquisitions described below reflect various fair value estimates and analysis, including work performed by third-party valuation specialists, of certain tangible assets and liabilities acquired, the valuation of intangible assets acquired, certain legal matters, income and non-income based taxes, and residual goodwill, which were subject to change within the measurement period. Measurement period adjustments were recorded in the reporting period in which the estimates were finalized and adjustment amounts were determined.The pro forma results of operations, revenue and net income subsequent to the acquisition dates have not been presented as they were not material to the Company's consolidated results of operations, either individually or in the aggregate. Goodwill, which represents the excess of the purchase price over the net tangible and intangible assets acquired, was not deductible for tax purposes.

The following table presents the aggregate estimated fair value of the assets acquired and liabilities assumed, including those items that are still pending allocations, for the acquisitions completed during fiscal 2023.In millionsGoodwill\$585Å Amortizable intangible assets\$209Net tangible assets assumed\$46Total fair value consideration\$840Å On May 2, 2023, the Company completed the acquisition of OpsRamp, an IT operations management company that monitors, observes, automates, and manages IT infrastructure, cloud resources, workflows, and applications for hybrid and multi-cloud environments, including the leading hyperscalers. OpsRampÆ™'s results of operations were included within the Corporate Investments and Other segment. The acquisition date fair value consideration of \$307Å million primarily consisted of cash paid for outstanding common stock. In connection with this acquisition, the Company recorded approximately \$217Å million of goodwill, and \$84Å million of intangible assets. The Company is amortizing the intangible assets on a straight-line basis over an estimated weighted-average useful life of 5 years.On March 15, 2023, the Company completed the acquisition of Axis Security, a cloud security provider, enabling the Company to expand its edge-to-cloud security capabilities by offering a unified Secure Access Services Edge solution to meet the increasing demand for integrated networking and security solutions deliveredaaS. Axis Security's results of operations were included within the Intelligent Edge segment. The acquisition date fair value consideration of \$412Å million primarily consisted of cash paid for outstanding common stock. In connection with this acquisition, the Company recorded approximately \$311Å million of goodwill, and \$71Å million of intangible assets. The Company is amortizing the intangible assets on a straight-line basis over an estimated weighted-average useful life of 5 years.Acquisitions in fiscal 2022The Company did not have any acquisitions during fiscal 2022. NoteÅ 11: Goodwill and Intangible Assets Goodwill and related changes in the carrying amount by reportable segment were as follows:A ServerHybrid CloudIntelligent EdgeFinancialServicesCorporate Investments & OtherTotalÅ Balance at OctoberÅ 31, 2023(1)\$10,220Å \$4,716Å \$2,908Å \$144Å \$æ“Å \$17,988Å Goodwill from acquisitions\$æ“Å \$98Å æ“A æ“A æ“A æ“A 98Å Goodwill adjustments\$æ“(1)1Å æ“A æ“A æ“A æ“A Balance at OctoberÅ 31, 2024(1)\$10,220Å \$4,813Å \$2,909Å \$144Å \$æ“(1)\$18,086Å (1)Goodwill is net of accumulated impairment losses of \$1.9Å billion. Of this amount, \$1.7Å billion relates to the HPC & AI reporting unit of which \$815Å million was recorded during the fourth quarter of fiscal 2022. The Hybrid Cloud reporting unit has an accumulated impairment loss of \$90Å million related to the former Software reporting unit which was also recorded during the fourth quarter of fiscal 2022.2024 Interim and Annual Goodwill Impairment Reviews As of October 31, 2024, the CompanyÆ™'s reporting units with goodwill are consistent with the reportable segments identified in Note 2, ÆœSegment InformationÆ to the Consolidated Financial Statements in Item 8 of Part II, with the exception of Server, which contains two reporting units: Compute and HPC & AI, and Corporate Investments and Other which contains two reporting units: Advisory and Professional Services, and legacy Communications and Media Solutions.

117Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)

During fiscal 2024, the Company performed the following goodwill impairment tests, none of which resulted in goodwill impairment:ÆœImpairment test performed as of November 1, 2023 based on organizational changes impacting the composition of reporting units as of that date;ÆœAnnual goodwill impairment test, which was performed as of the first day of the fourth quarter of fiscal 2024. The excess of fair value over carrying amount for the reporting units ranged from approximately 8% to 198% of the respective carrying amounts and;ÆœInterim goodwill impairment test as of September 30, 2024 for Compute and Hybrid Cloud reporting units. In September 2024, HPE sold 30% of the total issued share capital of H3C. The equity investment in H3C primarily benefits the Compute and Hybrid Cloud reporting units. Subsequent to the sale, on September 30, 2024, the Company performed an interim impairment analysis for Compute and Hybrid Cloud reporting units. The excess of fair value over carrying amount for these reporting units was 6% for Compute and 5% for Hybrid Cloud. The Compute reporting unit has goodwill of \$8.2 billion as of OctoberÅ 31, 2024, and excess of fair value over carrying value of 6% as of the September 30, 2024 interim test date. The Compute business is cyclical in nature. Over the last several years, digital transformation drove increased investment to modernize infrastructure. However, in the current macroeconomic and inflationary environment, customers have invested selectively resulting in moderate unit growth and competitive pricing. The Compute business continues to focus on capturing market share while maintaining operating margin, leveraging its strong portfolio of ProLiant Gen11 products. The Hybrid Cloud reporting unit has goodwill of \$4.8 billion as of OctoberÅ 31, 2024, and excess of fair value of 5% as of the September 30, 2024 interim test date. Although the Hybrid Cloud business is on a positive trajectory, the Company is managing both a sales model transition and product transition within this business. The CompanyÆ™'s product model transition is to a more cloud-native, software-defined platform with HPE Alletra. Translating this growth to revenue and operating income will take time because a greater mix of high margin business such as ratable software and services, are deferred and recognized in future periods.2023 and 2022 Annual Goodwill Impairment Reviews The CompanyÆ™'s fiscal 2023 annual impairment test did not result in any impairment charges.The CompanyÆ™'s fiscal 2022 annual goodwill impairment analysis resulted in impairment charges for goodwill related to the HPC & AI reporting unit and former Software reporting unit (which is now part of the Hybrid Cloud reporting unit). There was no impairment of goodwill for other reporting units. The decline in the fair value of the HPC & AI reporting unit below its carrying value resulted from changes in expected future cash flows due to the continuation of supply chain constraints, and other operational challenges as well as an increase in cost of capital. As a result, a goodwill impairment charge of \$815Å million was recorded in the fourth quarter of fiscal 2022. The decline in the fair value of the former Software reporting unit resulted primarily from a decline in market multiples. As a result, a goodwill impairment charge of \$90Å million was recorded in the fourth quarter of fiscal 2022.Intangible AssetsÅ As of October 31, 2024As of October 31, 2023Å GrossAccumulatedAmortizationNetGrossAccumulatedAmortizationNetÅ In millionsCustomer contracts, customer lists and distribution agreements\$219Å \$(70)\$149Å \$357Å \$(177)\$180Å Developed and core technology and patents747Å (443)304Å 1,162Å (711)451Å Trade name and trademarks6(5)1Å 146Å (123)23Å Capitalized software development costs56Å æ“A 56Å æ“A æ“A æ“A Total intangible assets\$1,028Å \$(518)\$510Å \$1,665Å \$(1,011)\$654Å 118Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)

For fiscal 2024, the decrease in gross intangible assets was primarily due to \$761Å million of intangible assets which became fully amortized and were eliminated from gross intangible assets and accumulated amortization, partially offset by \$68Å million of intangible assets related to acquisitions and \$56 million related to capitalized software development costs.As of October 31, 2024, the weighted-average remaining useful lives of the Company's finite-lived intangible assets were as follows

2024 and 2023, respectively, of borrowing- and funding-related activity associated with FS and its subsidiaries that are collateralized by receivables and underlying assets associated with the related finance and operating leases. For both the periods presented, the carrying amount of the assets approximated the carrying amount of the borrowings.Interest expense on borrowings recognized in the Consolidated Statements of Earnings was as follows:For the fiscal years ended October31, 202420232022In millionsFinancing interestFinancing cost\$49\$ (383) \$211 A Interest expenseInterest and other, net\$28\$ (26) \$260 A Total interest expenses\$77\$ (709) \$71 A As disclosed in Note13, A Financial Instruments, A The Company used interest rate swaps to mitigate the exposure of its fixed rate debt to changes in fair value resulting from changes in interest rates, or hedge the variability of cash flows in the interest payments associated with its variable-rate debt. Interest rates on long-term debt in the table above have not been adjusted to reflect the impact of any interest rate swaps.Commercial Paper Hewlett Packard Enterprise maintains two commercial paper programs, A the Parent Programs, A and a wholly-owned subsidiary maintains a third program. The Parent Program in the U.S. provides for the issuance of U.S. dollar-denominated commercial paper up to a maximum aggregate principal amount of \$4.75 billion. The Parent Program outside the U.S. provides for the issuance of commercial paper denominated in U.S. dollars, euros or British pounds up to a maximum aggregate principal amount of \$3.0 billion or the equivalent in those alternative currencies. The combined aggregate principal amount of commercial paper outstanding under those two programs at any one time cannot exceed the \$4.75 billion as authorized by Hewlett Packard Enterprise's Board of Directors. In addition, the Hewlett Packard Enterprise subsidiary's euro Commercial Paper/Certificate of Deposit Program provides for the issuance of commercial paper in various currencies of up to a maximum aggregate principal amount of \$1.0 billion. As of October31, 2024 and 2023, no borrowings were outstanding under the Parent Programs. As of October31, 2024 and 2023, \$649 million and \$679 million, respectively, were outstanding under the subsidiary's A program.Revolving Credit FacilityIn September 2024, the Company terminated its prior senior unsecured revolving credit facility that was entered into in December 2021, and entered into a new senior unsecured revolving credit facility with an aggregate lending commitment of \$5.25 billion for a period of five years. The commitment comprised of (i) \$4.75 billion of commitments available immediately and (ii) \$500 million of commitments available from and subject to the closing of the Juniper Networks acquisition and refinancing of Juniper Networks A credit agreement in connection with the closing of the Juniper Networks acquisition. As of October31, 2024 and 2023, no borrowings were outstanding under either credit facilities. Uncommitted Credit facilityOn September 21, 2023, the Company entered into a five-year agreement with Societe Generale for an uncommitted short-term cash advance facility in the principal amount of up to \$500 million. As of October31, 2024, no borrowings were outstanding under this credit facility.Juniper Networks Acquisition Committed FinancingIn connection with HPE's signing a definitive agreement to acquire Juniper Networks in January 2024 (the A Merger Agreement), HPE entered into a commitment letter whereby HPE obtained a commitment from Citigroup Global Markets Inc., JPMorgan Chase Bank, N.A. and Mizuho Bank, Ltd. for a \$1.0 billion senior unsecured delayed draw term loan facility, comprised of an \$11.0 billion 364-day tranche and a \$3.0 billion three-year tranche, subject to customary conditions (the A Term Loan Commitment Letter). In September 2024, HPE issued \$9.0 billion of senior unsecured notes. In addition, in furtherance of the Term Loan Commitment Letter, the Company entered into term loan agreements with JPMorgan Chase Bank, N.A., Citibank, N.A., and 129Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)Mizuho Bank, Ltd. for approximately \$12.0 billion of senior unsecured delayed draw term loan facilities, comprised of an approximately \$9.0 billion 364-day tranche and a \$3.0 billion three-year tranche, subject to customary conditions. The Company has since further reduced the commitments under the 364-day term loan to \$1.0 billion. Unless previously terminated, commitments under both the 364-day term loan and the three-year term loan will terminate upon the earliest of (i) five business days after the Juniper Outside Date (as defined in such term loan agreements), (ii) the occurrence of the closing of the acquisition of Juniper Networks without the funding of any borrowings under either of the term loan agreements, and (iii) the termination of the Merger Agreement by HPE in writing in accordance with its terms. As of October31, 2024, no borrowings were outstanding and HPE paid \$422 million of financing fees. In connection with the entry into the aforementioned 364-day term loan and the three-year term loan, on September 12, 2024, HPE terminated the Term Loan Commitment Letter.Future Maturities of BorrowingsAs of October31, 2024, aggregate future maturities of the Company's borrowings at face value (excluding a fair value adjustment related to hedged debt of \$58 million, a net discount of \$53 million and unamortized debt issuance costs of \$76 million), including finance lease obligations were as follows:Fiscal yearIn millions2025\$4,032 A 2026\$2,710 A 2027\$1,545 A 2028\$612 A 2029\$1,758 A Thereafter\$7,003 A Total\$17,660 A Note 15: Stockholders' Equity The components of accumulated other comprehensive loss, net of taxes as of October31, 2024 and changes during fiscal 2024 were as follows:Net unrealizedgains on available-for-salesecuritiesNet unrealizedgains (losses)on cashflow hedgesUnrealizedcomponents of definedbenefit plansCumulative translation adjustmentAccumulated other comprehensive lossIn millionsBalance at beginning of period\$ (61) \$ (2,507) \$(638) \$(3,084) Other comprehensive income (loss) before reclassifications\$8 (115) \$ (34) (23) \$(96) Reclassifications of losses into earnings\$ (16) \$ (138) \$ (32) \$ (186) A Tax benefit (provision)\$ (22) \$ (72) \$ (17) \$ (17) A Balance at end of period\$ (88) \$ (166) \$(627) \$(977) The components of accumulated other comprehensive loss, net of taxes as of October31, 2023 and changes during fiscal 2023 were as follows:Net unrealized\$ (166) gains unavailable-for-salesecuritiesNet unrealizedgains (losses)on cashflow hedgesUnrealizedcomponents of definedbenefit plansCumulative translation adjustmentAccumulated other comprehensive lossIn millionsBalance at beginning of period\$ (1) \$ (109) \$ (2,596) \$(610) \$(3,098) Other comprehensive income (loss) before reclassifications\$ (1) \$(77) \$(99) \$(32) \$(307) Reclassifications of losses into earnings\$ (16) \$ (116) \$ (147) \$ (263) A Tax benefit\$ (13) \$ (41) \$ (4) \$ (58) A Balance at end of period\$ (6) \$ (61) \$ (2,507) \$(638) \$(3,084) 130Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)The components of accumulated other comprehensive loss, net of taxes as of October31, 2022 and changes during fiscal 2022 were as follows:Net unrealizedgains (losses) on available-for-salesecuritiesNet unrealizedgains (losses)on cashflow hedgesUnrealizedcomponents of definedbenefit plansCumulative translation adjustmentAccumulated other comprehensive lossIn millionsBalance at beginning of period\$ (15) \$ (81) \$ (2,545) \$(466) \$(2,915) Other comprehensive (loss) income before reclassifications(161) \$ (2,025) (315) (146) \$ (484) Reclassifications of (gains) losses into earnings\$ (978) \$ (160) \$ (818) Tax (provision) benefit\$ (19) \$ (104) \$ (287) A Balance at end of period\$ (1) \$ (109) \$ (2,596) \$(610) \$(3,098) 7.625 Series C Mandatory Convertible Preferred StockIn September 2024, the Company issued 30A million shares of 7.625% Series C Mandatory Convertible Preferred Stock, par value \$0.01 per share (the A Preferred Stock), for an aggregate purchase price of \$1.5 billion, less issuance costs of \$38A million. As of October31, 2024, 30A million shares of the Preferred Stock were outstanding. Unless converted earlier in accordance with its terms, each share of Preferred Stock will automatically convert on the mandatory conversion date, which is expected to be September 1, 2027, into between 2.5352 shares and 3.1056 shares of common stock, in each case, subject to customary anti-dilution adjustments described in the certificate of designations related to the Preferred Stock (the A Certificate of Designations). The number of shares of common stock issuable upon conversion will be determined based on the average volume weighted average price per share of common stock over the 20 consecutive trading day period beginning on, and including, the 21st scheduled trading day immediately prior to September 1, 2027. Holders of shares of Preferred Stock have the option to convert all or any portion of their shares of Preferred Stock at any time. The conversion rate applicable to any early conversion may, in certain circumstances, be increased to compensate holders of the Preferred Stock for unpaid accumulated dividends as described in the Certificate of Designations. If a Fundamental Change, as defined in the Certificate of Designations, occurs on or prior to September 1, 2027, then holders of the Preferred Stock will be entitled to convert all or any portion of their Preferred Stock at the Fundamental Change Conversion Rate, into between 1.9200 shares and 3.1056 shares of common stock, in all cases, subject to customary anti-dilution adjustments described in the Certificate of Designations, for a specified period of time and to also receive an amount to compensate them for unpaid accumulated dividends and any remaining future scheduled dividend payments. The Preferred Stock is not subject to redemption at the Company's option.DividendsThe stockholders of HPE common stock are entitled to receive dividends when and as declared by the Board of Directors. The Company's ability to pay dividends will depend on many factors, such as its financial condition, earnings, capital requirements, debt service obligations, restrictive covenants in its debt, industry practice, legal requirements, regulatory constraints, and other factors that the Board of Directors deems relevant. Furthermore, so long as any share of its Preferred Stock remains outstanding, no dividend on shares of common stock (or any other class of stock junior to the Preferred Stock) shall be declared or paid unless all accumulated and unpaid dividends for all preceding dividend periods for the Preferred Stock have been declared and paid in full in cash, shares of the Company's common stock or a combination thereof, or a sufficient sum of cash or number of shares of its common stock has been set apart for the payment of such dividends, on all outstanding shares of the Preferred Stock. Dividends declared were \$0.52 and \$0.48 per common share in fiscal 2024 and 2023, respectively. On December 05, 2024, the Company declared a regular cash dividend of \$0.13 per share on the Company's common stock, payable on January 16, 2025, to the stockholders of record as of the close of business on December 20, 2024. Dividends on the Preferred Stock will be payable on a cumulative basis when, as and if declared by the Board of Directors, or an authorized committee thereof, at an annual rate of 7.625% on the liquidation of preference of \$50.00 per share. The Company may pay declared dividends in cash or, subject to certain limitations, in shares of its common stock or in any combination of cash and shares of its common stock on March 1, June 1, September 1 and December 1 of each year, 131Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)commencing on December 1, 2024, and ending on, and including, September 1, 2027. The Company has declared a cash dividend of \$0.82604167 per share of its 7.625% Series C Mandatory Convertible Preferred Stock, which was paid on December 1, 2024, to holders of record as of the close of business on November 15, 2024. Share Repurchase ProgramOn October 13, 2015, the Board of Directors approved a share repurchase program with a \$3.0 billion authorization, which was refreshed with additional share repurchase authorizations of \$3.0 billion, \$5.0 billion and \$2.5 billion on May 24, 2016, October 16, 2017 and February 21, 2018, respectively. This program, which does not have a specific expiration date, authorizes repurchases in the open market or in private transactions. In fiscal 2024, the Company repurchased and settled a total of 7.8A million shares under its share repurchase program through open market repurchases, which included 0.2A million shares that were unsettled open market repurchases as of October31, 2023. Additionally, the Company had unsettled open market repurchases of 0.1A million shares as of October31, 2024. Shares repurchased during the fiscal 2024 were recorded as a \$150A million reduction to stockholders' equity. As of October31, 2024, the Company had a remaining authorization of approximately \$0.8A billion for future share repurchases. In fiscal 2023, the Company repurchased and settled a total of 27.2A million shares under its share repurchase program through open market repurchases, which included 0.3A million shares that were unsettled open market repurchases as of October31, 2022. Additionally, the Company had unsettled open market repurchases of 0.2A million shares as of October31, 2023. Shares repurchased during the fiscal 2023 were recorded as a \$0.4 billion reduction to stockholders' equity. Note 16: Net Earnings Per ShareThe Company calculates basic net EPS using net earnings and the weighted-average number of shares outstanding during the reporting period. The reconciliations of the numerators and denominators of each of the basic and diluted net EPS calculations were as follows:For the fiscal years ended October31, 202420232022A In millions, except per share amountsNumerator: A Net earnings attributable to common stockholders - Basic\$2,554\$ (2,025) A \$868 A Plus: 7.625% Series C mandatory convertible preferred stock dividends\$25\$ (2) \$ (2) A Net earnings - Diluted\$2,579\$ (2,025) A \$868 A Denominator:Weighted-average shares used to compute basic net EPS1,309\$ (1,299) \$1,303 A Dilutive effect of employee stock plans(1)18\$ (17) \$ (19) A Dilutive effect of 7.625% Series C mandatory convertible preferred stock(1)10\$ (4) \$ (4) A Weighted-average shares used to compute diluted net

EPS1,337A,1316A,1322A Net earnings per share attributable to common stockholders:Basic \$1.95A \$1.56A \$0.67A Diluted \$1.93A \$1.54A \$0.66A Anti-dilutive weighted-average stock awards(2)â€A â€A 2A (1)The impact of dilutive effect of employee stock plans is calculated under the treasury stock method, and the impact of dilutive effect of the 7.625% Series C Mandatory Convertible Preferred Stock is calculated under the if-converted method.(2)The Company excludes shares potentially issuable under employee stock plans that could dilute basic net EPS in the future from the calculation of diluted net earnings per share, as their effect, if included, would have been anti-dilutive for the periods presented.132Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)NoteA-17: Litigation, Contingencies, and CommitmentsHewlett Packard Enterprise is involved in various lawsuits, claims, investigations and proceedings including those consisting of intellectual property, commercial, securities, employment, employee benefits, and environmental matters, which arise in the ordinary course of business. In addition, as part of the Separation and Distribution Agreement (the "Separation and Distribution Agreement") entered into in connection with Hewlett Packard Enterprise's spin-off from HP Inc. (formerly known as "Hewlett-Packard Company") (the "Separation"), Hewlett Packard Enterprise and HP Inc. agreed to cooperate with each other in managing certain existing litigation related to both parties' businesses. The Separation and Distribution Agreement included provisions that allocate liability and financial responsibility for pending litigation involving the parties, as well as provide for cross-indemnification of the parties against liabilities to one party arising out of liabilities allocated to the other party. The Separation and Distribution Agreement also included provisions that assign to the parties responsibility for managing pending and future litigation related to the general corporate matters of HP Inc. arising prior to the Separation. Hewlett Packard Enterprise records a liability when it believes that it is both probable that a liability has been incurred and the amount of loss can be reasonably estimated. Significant judgment is required to determine both the probability of having incurred a liability and the estimated amount of the liability. Hewlett Packard Enterprise reviews these matters at least quarterly and adjusts these liabilities to reflect the impact of negotiations, settlements, rulings, advice of legal counsel, and other updated information and events pertaining to a particular matter. Litigation is inherently unpredictable. However, Hewlett Packard Enterprise believes it has valid defenses with respect to legal matters pending against us. Nevertheless, cash flows or results of operations could be materially affected in any particular period by the resolution of one or more of these contingencies. Hewlett Packard Enterprise believes it has recorded adequate provisions for any such matters and, as of October 31, 2024, it was not reasonably possible that a material loss had been incurred in connection with such matters in excess of the amounts recognized in its financial statements.Litigation, Proceedings and InvestigationsRoss and Rogus v. Hewlett Packard Enterprise Company. On November 8, 2018, a putative class action complaint was filed in the Superior Court of California, County of Santa Clara alleging that HPE pays its California-based female employees "systemically lower compensation" than HPE pays male employees performing substantially similar work. The complaint alleges various California state law claims, including California's "Equal Pay Act, Fair Employment and Housing Act, and Unfair Competition Law, and seeks certification of a California-only class of female employees employed in certain "Covered Positions." The parties subsequently reached an agreement to resolve this class action. The terms of the settlement are reflected in Plaintiff's Motion for Preliminary Approval of Class Action Settlement and Certification of Settlement Class, which was filed with the Court on September 26, 2022. On November 3, 2022, the Court granted Plaintiff's motion and preliminarily approved the terms of the class settlement, which defines the settlement class as all "women actively employed in California by Defendant at any point from November 1, 2015, through the date of Preliminary Approval" who were employed in a covered job code. The settlement class excludes certain individuals, including those who previously executed an arbitration agreement with HPE or an agreement that resulted in a release or waiver of claims. On April 28, 2023, the Court granted Plaintiff's Motion for Final Approval of the Class Action Settlement and Certification of the Settlement Class. On February 6, 2024, the Court entered final judgment, approving the settlement and dismissing the action.India Directorate of Revenue Intelligence Proceedings.Â On April 30 and May 10, 2010, the India Directorate of Revenue Intelligence (the "DRi") issued notices to Hewlett-Packard India Sales Private Ltd ("HP India"), a subsidiary of HP Inc., seven HP India employees and one former HP India employee alleging that HP India underpaid customs duties while importing products and spare parts into India and seeking to recover an aggregate of approximately \$370 million, plus penalties. On April 11, 2012, the Bangalore Commissioner of Customs issued an order on the products-related notices affirming duties and penalties against HP India and the named individuals for approximately \$386 million. On April 20, 2012, the Commissioner issued an order on the spare parts-related notice affirming duties and penalties against HP India and certain of the named individuals for approximately \$17 million. HP India filed appeals of the Commissioner's orders before the Customs Tribunal. The Customs Department filed cross-appeals before the Customs Tribunal. On October 27, 2014, the Customs Tribunal commenced hearings on the cross-appeals of the Commissioner's orders. The Customs Tribunal rejected HP India's request to return the matter to the Commissioner on procedural grounds. The hearings before the Customs Tribunal were subsequently delayed, have been postponed on several occasions since 2014, and have not yet been rescheduled.ECT Proceedings. In January 2011, the postal service of Brazil, Empresa Brasileira de Correios e TelÃ©grafos ("ECT"), notified a former subsidiary of HP Inc. in Brazil ("HP Brazil") that it had initiated administrative proceedings to consider whether to suspend HP Brazil's right to bid and contract with ECT related to alleged improprieties in the bidding and contracting processes whereby employees of HP Brazil and employees of several other companies allegedly coordinated their bids and fixed results for three ECT contracts in 2007 and 2008. In late July 2011, ECT notified HP Brazil it had decided to 133Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)apply the penalties against HP Brazil and suspend HP Brazil's right to bid and contract with ECT for five years, based upon the evidence before it. In August 2011, HP Brazil appealed ECT's decision. In April 2013, ECT rejected HP Brazil's appeal, and the administrative proceedings were closed with the penalties against HP Brazil remaining in place. In parallel, in September 2011, HP Brazil filed a civil action against ECT seeking to have ECT's decision revoked. HP Brazil also requested an injunction suspending the application of the penalties until a final ruling on the merits of the case, which was denied. HP Brazil appealed the denial of its request for injunctive relief to the intermediate appellate court, which issued a preliminary ruling denying the request for injunctive relief but reducing the length of the sanctions from five to two years. HP Brazil appealed that decision and, in December 2011, obtained a ruling staying enforcement of ECT's sanctions until a final ruling on the merits of the case. HP Brazil expects a resolution of the decision on the merits to take several years.Forsyth, et al. vs. HP Inc. and Hewlett Packard Enterprise. This purported class and collective action was filed on August 18, 2016 in the United States District Court for the Northern District of California, against HP Inc. and Hewlett Packard Enterprise (collectively, "Defendants") alleging Defendants violated the Federal Age Discrimination in Employment Act ("ADEA"), the California Fair Employment and Housing Act, California public policy and the California Business and Professions Code by terminating older workers and replacing them with younger workers.Â Plaintiffs seek to certify a nationwide collective action under the ADEA comprised of individuals aged 40 years and older who had their employment terminated by an HP entity pursuant to a work force reduction ("WFR") plan. Plaintiffs also seek to certify a class under California law consisting of all persons 40 years or older employed by Defendants in the state of California and terminated pursuant to a WFR plan on or after August 18, 2012. On April 14, 2021, Plaintiff's Motion for Conditional Class Certification was granted. The conditionally certified collective action consists of all individuals who had their employment terminated by Defendants pursuant to a WFR Plan on or after November 1, 2015, and who were 40 years or older at the time of such termination. The collective action excludes all individuals who signed a Waiver and General Release Agreement or an Agreement to Arbitrate Claims. The parties have reached an agreement to resolve this matter. Plaintiffs filed a Motion for Preliminary Approval of the Class Action and Collective Action Settlement on September 21, 2023. On November 3, 2023, the Court issued an order granting preliminary approval to the Class Action and Collective Action Settlement. On March 29, 2024, the Court granted Final Approval to the settlement following a Fairness Hearing on the parties' Motion for Final Approval. Judgment has been entered by the Court and the matter is now closed.Q3 Networking Litigation. On September 21 and September 22, 2020, Q3 Networking LLC filed complaints against HPE, Aruba Networks, Commscope and Netgear in the United States District Court for the District of Delaware and the United States International Trade Commission ("ITC"). Both complaints allege infringement of four patents, and the ITC complaint defines the "accused products" as "routers, access points, controllers, network management servers, other networking products, and hardware and software components thereof." The ITC action was instituted on October 23, 2020. The District of Delaware action has been stayed pending resolution of the ITC action. On December 7, 2021, the Administrative Law Judge issued his initial determination finding no violation of section 337 of the Tariff Act. On May 3, 2022, the ITC issued its Notice of Final Determination, affirming the initial determination and terminating the investigation. On June 18, 2022, Q3 Networking filed a petition for review of the ITC ruling with the United States Court of Appeals for the Federal Circuit. On May 10, 2024, the United States Court of Appeals for the Federal Circuit affirmed the ITC's ruling in favor of HPE and Aruba Networks. Q3 Networking has not sought further review of the Federal Circuit's ruling and HPE considers the matter closed.R2 Semiconductor Patent Litigation. In November 2022, R2 Semiconductor, Inc. ("R2") filed a lawsuit in the Dusseldorf Regional Court in Germany against Intel Deutschland GmbH, Hewlett-Packard GmbH, and other Intel customers. R2 asserts that one European patent is infringed by certain Intel processors and the HPE products that contain those Intel processors. On February 7, 2024, the Dusseldorf Regional Court ruled in R2's favor, issuing an injunction that, if enforced by R2, would prevent the sale in Germany of any products with infringing Intel processors, and require HPE to correspond with its direct customers in Germany requesting return of the products with infringing Intel processors. The injunction would remain in place unless the ruling is overturned on appeal, the patent is invalidated by the German Federal Patent Court, or the matter is resolved by the parties. On February 8, 2024, HPE, Intel, HP Inc., and Dell filed an appeal and request for a stay of the judgment pending appeal. On April 9, 2024 the request for a stay pending appeal was denied. On April 3, 2024, R2 filed a lawsuit in France in the first instance court in Paris (Tribunal judiciaire de Paris) against Intel Corporation, Intel Corporation SAS, Intel Deutschland GmbH, HP France SAS and certain other Intel customers. In May 2024, R2 filed suit in Milan against Intel Corporation Italia S.p.A., Hewlett-Packard Italiana S.r.l., and certain other Intel customers. R2 asserts the same European patent is infringed in both the French and Italian actions. On August 30, 2024, Intel and R2 publicly announced an agreement to dismiss all litigation between the two companies that would include dismissal of all litigation against all subsidiaries of HPE in the foregoing actions. Pursuant to that agreement, the Italian lawsuit was dismissed on September 2, 2024, the German lawsuit was dismissed on September 4, 2024, and the French lawsuit was dismissed on September 6, 2024. These matters are now 134Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)closed.Shared Litigation with HP Inc., DXC and Micro Focus As part of the Separation and Distribution Agreements between Hewlett Packard Enterprise and HP Inc., Hewlett Packard Enterprise and DXC, and Hewlett Packard Enterprise and Seattle SpinCo, the parties to each agreement agreed to cooperate with each other in managing certain existing litigation related to both parties' businesses. The Separation and Distribution Agreements also included provisions that assign to the parties responsibility for managing pending and future litigation related to the general corporate matters of HP Inc. (in the case of the separation of Hewlett Packard Enterprise from HP Inc.) or of Hewlett Packard Enterprise (in the case of the separation of DXC from Hewlett Packard Enterprise and the separation of Seattle SpinCo from Hewlett Packard Enterprise), in each case arising prior to the applicable separation.EnvironmentalThe Company's operations and products are or may in the future become subject to various federal, state, local and foreign laws and regulations concerning the environment, including laws addressing the discharge of pollutants into the air and water; supply chain due diligence, and sustainability, environment, and emissions-related reporting; the management, movement, and disposal of hazardous substances and wastes; the clean-up of contaminated sites; product compliance and safety; the energy consumption of products, services, and operations; and the operational or financial responsibility for recycling, treatment, and disposal of those products. This includes legislation that makes producers of electrical goods, including servers and networking equipment, subject to certain reparability requirements or financially responsible for specified collection, recycling, treatment, and disposal of past and future covered products (sometimes referred to as "product take-back legislation"). The Company could incur substantial costs, its products could be restricted from entering certain jurisdictions, and it could face other sanctions, if it were to violate or become liable under environmental laws, including those related to addressing climate change and other environmental related issues, or if its products become non-compliant with such environmental laws. The Company's potential exposure includes impacts on revenue, fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. The amount and timing of costs to comply with environmental laws are difficult to predict.In particular, the Company may become a party to, or otherwise involved in, proceedings brought by U.S. or state environmental agencies under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), known as "Superfund," or other federal, state or foreign laws and regulations addressing the clean-up of contaminated sites, and may become a party to, or otherwise involved in, proceedings brought by private parties for contribution towards clean-up costs. The Company is also contractually obligated to make financial contributions to address actions related to certain environmental liabilities, both ongoing and arising in the future, pursuant to its Separation and Distribution Agreement with HP Inc.Unconditional Purchase ObligationsAs of October 31, 2024, the Company had unconditional purchase obligations of approximately \$1.3A billion. These unconditional purchase obligations include agreements to purchase goods or services that are enforceable and legally binding on the Company and that specify all significant terms, including fixed or minimum quantities to be purchased, fixed, minimum or variable price provisions and the approximate timing of the transaction, as well as settlements that the Company has reached with third parties, requiring it to pay determined amounts over a specified period of time. These unconditional purchase obligations are related principally to inventory purchases, software maintenance and support services and other items. Unconditional purchase obligations exclude agreements that are cancellable without penalty. The Company expects the commitments to total \$56A million, \$36A million, \$27A million, \$6A million, and \$13A million, for fiscal years 2025, 2026, 2027, 2028, and 2029, respectively. There are no unconditional purchase obligations subsequent to fiscal year 2029.NoteA-18: Guarantees and IndemnificationsGuaranteesIn the ordinary course of business, the Company may issue performance guarantees to certain of its clients, customers and other parties pursuant to which the Company has guaranteed the performance obligations of third parties. Some of those guarantees may be backed by standby letters of credit or surety bonds. In general, the Company would be obligated to perform over the term of the guarantee in the event a specified triggering event occurs as defined by the guarantee. The Company believes the likelihood of having to perform under a material guarantee is remote.135Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)The Company has entered into service contracts with certain of its clients that are supported by financing arrangements. If a service contract is terminated as a result of the Company's non-performance under the contract or failure to comply with the terms of the financing arrangement, the Company could, under certain circumstances, be required to acquire certain assets related to the service contract. The Company believes the likelihood of having to acquire a material amount of assets under these arrangements is remote.The maximum potential future payments under performance guarantees and financing arrangements was \$298 million as of October 31, 2024.IndemnificationsIn the ordinary course of business, the Company enters into contractual arrangements under which the Company may agree to indemnify a third party to such arrangement from any losses incurred relating to the services they perform on behalf of the Company or for losses arising from certain events as defined within the particular contract, which may include, for example, litigation or claims relating to past performance. The Company also provides indemnifications to certain vendors and customers against claims of intellectual property infringement made by third parties arising from the use by such vendors

and accordingly, the Company could be legally liable under applicable tax law for such liabilities and required to make additional tax payments. In addition, if the distribution of Everett's or Seattle's common shares to Hewlett Packard Enterprise's stockholders is determined to be taxable, the Company would generally bear the tax liability, unless the taxability of the distribution is the direct result of actions taken by DXC/Micro Focus, in which case DXC/Micro Focus would be responsible for any taxes imposed on the distribution. 136Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)As of October 31, 2024 and 2023, the Company's receivable and payable balances related to indemnified litigation matters and other contingencies, and income tax-related indemnification covered by these agreements were as follows:As of October 31, 20242023A In millionsLitigation Matters and Other ContingenciesReceivable \$37A \$42A Payable 47A 48A Income Tax-Related Indemnification(1)Net indemnification receivable - long-term35A 31A Net indemnification receivable - short-term\$A€"A \$11A (1)The actual amount that the Company may receive or pay could vary depending upon the outcome of certain unresolved tax matters, which may not be resolved for several years.Note 19: Equity InterestsThe Company includes investments which are accounted for using the equity method, under Investments in equity interests on the Company's Consolidated Balance Sheets.Pursuant to the Shareholders' Agreement among the CompanyA€"s relevant subsidiaries, Unisplendour International Technology Limited (A€œUNISA€", and H3C dated as of May 1, 2016, as amended from time to time, and most recently on October 28, 2022, the Company delivered a notice to UNIS on December 30, 2022, to exercise its right to put to UNIS, for cash consideration, all of the H3C shares held by the Company, which represent 49% of the total issued share capital of H3C. On May 26, 2023, the CompanyA€"s relevant subsidiaries entered into a Put Share Purchase Agreement with UNIS, whereby UNIS has agreed to purchase all of the H3C shares held by the Company, through its subsidiaries. On May 24, 2024, the CompanyA€"s relevant subsidiaries entered into (i) an Amended and Restated Put Share Purchase Agreement with UNIS, whereby its relevant subsidiaries shall sell to UNIS 30% of the total issued share capital of H3C for pre-tax cash consideration of approximately \$2.1A billion by August 31, 2024 (the A€œSale TransactionA€), and (ii) an Agreement on Subsequent Arrangements with UNIS, whereby upon closing of the Sale Transaction, the CompanyA€"s relevant subsidiary shall have a put option to sell to UNIS and UNIS shall have a call option to purchase from the CompanyA€"s relevant subsidiary 19% of the total issued share capital of H3C for pre-tax cash consideration of approximately \$1.4A billion between the 16th month and until the 36th month after the Sale Transaction. The transactions referenced in clauses (i) and (ii) above, taken together, revise the arrangements governing the aforementioned sale of all of the H3C shares held by the Company, through its subsidiaries and are subject to certain grace periods and regulatory approvals. On September 4, 2024, pursuant to the Amended and Restated Put Share Purchase Agreement with UNIS (as described above), the Company received \$2.1A billion of pre-tax consideration (\$2.0A billion post-tax), in connection with the sale to UNIS of 30% of the total issued share capital of H3C resulting in a gain of \$733A million. As of October 31, 2024, the Company's Investments in equity interests was \$929A million and primarily related to a 19% equity interest in H3C. As of October 31, 2023, the Company's Investments in equity interests was \$2.2A billion and primarily related to a 49% equity interest in H3C.As of OctoberA 31, 2024, the difference between the cost of the investment and the underlying equity in the net assets of the investment is \$649A million. As of OctoberA 31, 2024 and 2023, the Company determined that no impairment of its equity method investments existed. 137Table of ContentsHEWLETT PACKARD ENTERPRISE COMPANY AND SUBSIDIARIESNotes to Consolidated Financial Statements (Continued)Earnings from equity interestsThe Company recorded earnings from equity interests of \$147 million, \$245 million and \$215 million in fiscal 2024, 2023 and 2022, respectively, in the Consolidated Statements of Earnings, the components of which are as follows:For the fiscal years ended October 31, 202420232022In millionsEarnings from equity interests, net of taxes\$154A \$242A \$270A Basis difference amortization(3)(9)(45)Adjustment of profit on intra-entity sales(4)(12A (10)Earnings from equity interests\$147A \$245A \$215A For fiscal 2024 and 2023, the Company received a cash dividend of \$43A million and \$200A million, respectively, from H3C. These amounts were accounted for as a return on investment and reflected as a reduction in the carrying balance of the Company's Investments in equity interests in its Consolidated Balance Sheets.The Company also has commercial arrangements with H3C to buy and sell HPE branded servers, storage and networking products and services. For fiscal 2024, 2023 and 2022, HPE recorded approximately \$256A million, \$383A million and \$484A million of sales to H3C and \$72A million, \$125A million and \$148A million of purchases from H3C, respectively. Payables due to H3C as of October 31, 2024 and 2023 were approximately \$7A million and \$10A million, respectively. Receivables due from H3C as of October 31, 2024 and 2023 were approximately \$7A million and \$12A million, respectively.138Table of ContentsITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.None.ITEM 9A. Controls and Procedures.Evaluation of Disclosure Controls and ProceduresUnder the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in RulesA 13a-15(e) and 15d-15(e) under the Exchange Act as of the end of the period covered by this report (the A€œEvaluation DateA€). Based on this evaluation, our principal executive officer and principal financial officer concluded as of the Evaluation Date that our disclosure controls and procedures were effective such that the information relating to the Company, including our consolidated subsidiaries, required to be disclosed in our SEC reports (i)A is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii)A is accumulated and communicated to the Company's management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.Management's Report on Internal Control Over Financial ReportingSeeA ManagementA€"s Report of Internal Control Over Financial ReportingA and the Report of Independent Registered Public Accounting Firm on our internal control over financial reporting in Item 8, which are incorporated herein by reference.Changes in Internal Control Over Financial ReportingUnder the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of any changes in our internal control over financial reporting (as such term is defined in RulesA 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during our most recently completed fiscal quarter. Based on that evaluation, our principal executive officer and principal financial officer concluded that there has not been any change in our internal control over financial reporting during that quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. ITEM 9B. Other Information.The Company filed a Corrected Certificate of Designations with the Secretary of State of the State of Delaware on December 17, 2024, to correct a scrivenerA€"s error in the Certificate of Designations that was previously filed with the Secretary of State of the State of Delaware on September 12, 2024, governing the powers, preferences and rights of the 7.625% Series C Mandatory Convertible Preferred Stock. This newly filed Corrected Certificate of Designations is attached hereto as Exhibit 3.8.Trading PlansDuring the fiscal quarter ended OctoberA 31, 2024, none of our directors or officers adopted or terminated a A€œRule 10b5-1 trading arrangementA€ or a A€œnon-Rule 10b5-1 trading arrangement,A€ as those terms are defined in Regulation S-K, Item 408.Exchange Act Section 13(r) Disclosure On March 2, 2021, the U.S. Secretary of State designated the Russian Federal Security Service (A€œFSBA€) as a party subject to the provisions of U.S. Executive Order No. 13382 issued in 2005 (A€œExecutive Order 13382A€). On the same day, the U.S. Department of the TreasuryA€"s Office of Foreign Assets Control (A€œOFACA€) updated General License 1B (A€œGeneral License 1BA€) which generally authorizes U.S. companies to engage in certain licensing, permitting, certification, notification, and related transactions with the FSB as may be required for the importation, distribution, or use of information technology products in the Russian Federation. Our local Russian subsidiary (A€œHPE RussiaA€) may be required to engage with the FSB as a licensing authority and to file documents. There are no gross revenues or net profits directly associated with any such dealings by HPE with the FSB and all such dealings are explicitly authorized by General License 1B. We plan to continue these activities as required to support our orderly and managed wind down of our Russia operations.On April 15, 2021, the U.S. Government issued an executive order on Blocking Property with Respect to Specified Harmful Foreign Activities of the Government of the Russian Federation (A€œExecutive Order 14024A€), implementing additional U.S. sanctions against the Russian government and against Russian actors that threaten U.S. interests, including certain technology companies that support the Russian Intelligence Service. The U.S. Secretary of the Treasury designated Pozitiv Teknolodzhiz, AO (A€œPositive TechnologiesA€) under Executive Order 14024 and Executive Order 13382. HPE Russia had dealings with Positive Technologies prior to its designation. Following the sanctions designation, HPE Russia immediately initiated procedures to terminate its relationship with Positive Technologies. HPE does not plan to engage in any further 139Table of Contentstransactions with this entity, except wind down activities that are authorized by OFAC going forward. HPE Russia continues to have blocked property associated with Positive Technologies. No action will be taken unless and until a license is received from OFAC authorizing collection of the property. There are no identifiable gross revenues or net profits associated with HPEA€"s activities related to Positive Technologies for this reporting period.For a summary of our revenue recognition policies, see A€œRevenue RecognitionA€ described in Note 1, A€œOverview and Summary of Significant Accounting PoliciesA€ to the Consolidated Financial Statements in Item 8 of Part II. ITEM 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections.Not applicable.140Table of ContentsPART IIITEM 10. Directors, Executive Officers and Corporate Governance.The names of the executive officers of Hewlett Packard Enterprise and their ages, titles and biographies as of the date hereof are incorporated by reference from PartA I, ItemA 1, above.Hewlett Packard Enterprise has adopted insider trading policies and procedures applicable to our directors, officers, and employees, that we believe are reasonably designed to promote compliance with insider trading laws, rules, and regulations, and the listing standards of the New York Stock Exchange. Our insider trading policy, among other things, (i) prohibits our employees and related persons and entities from trading in securities of Hewlett Packard Enterprise and certain other companies while in possession of material, non-public information, (ii) prohibits our employees from disclosing material, non-public information of Hewlett Packard Enterprise, or another publicly traded company, to others who may trade on the basis of that information, and (iii) requires that certain designated individuals and roles of the Company only transact in Hewlett Packard Enterprise securities during an open window period, subject to limited exceptions. A copy of our insider trading policy is filed as Exhibit 19 to this Form 10-K. [illegible]

be.â€œOpen of Businessâ€ means 9:00 a.m., New York City time.â€œParity Stockâ€ means any class or series of capital stock of the Corporation established after the Initial Issue Date, the terms of which expressly provide that such class or series shall rank on parity with the Mandatory Convertible Preferred Stock as to dividend rights and distribution rights upon the Corporationâ€™s liquidation, winding-up or dissolution.â€œPersonâ€ means any individual, partnership, firm, corporation, limited liability company, business trust, joint stock company, trust, unincorporated association, joint venture, governmental authority or other entity of whatever nature.â€œPreferred Stockâ€ shall have the meaning ascribed to such term in the Charter. -10-â€œPreferred Stock Directorsâ€ shall have the meaning set forth in Section 8(b)(i).â€œProspectus Supplementâ€ means the preliminary prospectus supplement dated September 9, 2024, relating to the offering and sale of the Mandatory Convertible Preferred Stock, as supplemented by the related pricing term sheet.â€œRecord Dateâ€ means, with respect to any dividend, distribution or other transaction or event in which the holders of the Common Stock (or other applicable security) have the right to receive any cash, securities or other property or in which the Common Stock (or such other security) is exchanged for or converted into any combination of cash, securities or other property, the date fixed for determination of holders of the Common Stock (or such other security) entitled to receive such cash, securities or other property (whether such date is fixed by the Board of Directors, or an authorized committee thereof, statute, contract or otherwise).â€œRecord Holderâ€ means, with respect to any Dividend Payment Date, a Holder of record of the Mandatory Convertible Preferred Stock as such Holder appears on the stock register of the Corporation at the Close of Business on the related Regular Record Date.â€œReference Amountâ€ means, for each share of Mandatory Convertible Preferred Stock, an amount equal to the sum of the following amounts:i.a number of shares of Common Stock equal to the Acquisition Termination Conversion Rate, plusii.cash in an amount equal to the Acquisition Termination Dividend Amount,provided that the Corporation may deliver cash in lieu of all or any portion of the Common Stock set forth in clause (i) above, and the Corporation may deliver shares of Common Stock in lieu of all or any portion of the cash amount set forth in clause (ii) above.â€œRegistrarâ€ initially means Equiniti Trust Company, LLC, the Corporationâ€™s duly appointed registrar for Mandatory Convertible Preferred Stock and any successor appointed under Section 17.â€œRegular Record Dateâ€ means, with respect to any Dividend Payment Date, the February 15, May 15, August 15 and November 15, as the case may be, immediately preceding the relevant Dividend Payment Date. These Regular Record Dates shall apply regardless of whether a particular Regular Record Date is a Business Day.â€œRelevant Stock Exchangeâ€ means NYSE or, if the Common Stock is not then listed on NYSE, on the principal other U.S. national or regional securities exchange on which the Common Stock is then listed or, if the Common Stock is not then listed on a U.S. national or regional securities exchange, on the principal other market on which the Common Stock is then listed or admitted for trading.â€œReorganization Common Stockâ€ shall have the meaning set forth in Section 16(i). -11-â€œReorganization Eventâ€ shall have the meaning set forth in Section 16.â€œReorganization Valuation Percentageâ€ for any Reorganization Event shall be equal to (x) the Average VWAP of one share of the relevant Reorganization Common Stock over the relevant Reorganization Valuation Period (determined as if references to â€œCommon Stockâ€ in the definition of â€œVWAPâ€ were references to the â€œReorganization Common Stockâ€ for such Reorganization Event), divided by (y) the Average VWAP of one share of Common Stock over the relevant Reorganization Valuation Period.â€œReorganization Valuation Periodâ€ for any Reorganization Event means the five consecutive Trading Day period immediately preceding, but excluding, the effective date for such Reorganization Event.â€œScheduled Trading Dayâ€ means any day that is scheduled to be a Trading Day.â€œSecurities Actâ€ means the Securities Act of 1933, as amended, and the rules and regulations thereunder.â€œSenior Stockâ€ means each class or series of capital stock of the Corporation established after the Initial Issue Date, the terms of which expressly provide that such class or series shall rank senior to the Mandatory Convertible Preferred Stock as to dividend rights or distribution rights upon the Corporationâ€™s liquidation, winding-up or dissolution.â€œSeries B Preferred Stockâ€ means the Series B Junior Participating Redeemable Preferred Stock, par value \$0.01 per share, of the Corporation.â€œSettlement Periodâ€ means the 20 consecutive Trading Day period beginning on, and including, the 21st Scheduled Trading Day immediately preceding September 1, 2027.â€œShelf Registration Statementâ€ means a shelf registration statement filed with the Securities and Exchange Commission in connection with the issuance of, or for resales of, shares of Common Stock issued as payment of a dividend on shares of the Mandatory Convertible Preferred Stock, including dividends paid in connection with a conversion.â€œSpin-Offâ€ means a payment of a dividend or other distribution on the Common Stock of shares of capital stock of any class or series, or similar equity interest, of or relating to a Subsidiary or other business unit of the Corporation that are, or, when issued, will be, listed or admitted for trading on a U.S. national securities exchange.â€œSubsidiaryâ€ means, with respect to any Person, any corporation, association, partnership or other business entity of which more than 50% of the total voting power of shares of capital stock or other interests (including partnership interests) entitled (without regard to the occurrence of any contingency) to vote in the election of directors, managers, general partners or trustees thereof is at the time owned or controlled, directly or indirectly, by (i) such Person¼ (ii) such Person and one or more Subsidiaries of such Person¼ or (iii) one or more Subsidiaries of such Person.-12-â€œThreshold Appreciation Priceâ€ means \$50.00, divided by the Minimum Conversion Rate, which quotient is initially equal to approximately \$19.72. â€œTrading Dayâ€ means a day on which (i) there is no Market Disruption Event and (ii)A trading in Common Stock generally occurs on the Relevant Stock Exchange¼ provided that if the Common Stock is not listed or admitted for trading, â€œTrading Dayâ€ means any Business Day.â€œTransfer Agentâ€ shall initially mean Equiniti Trust Company, LLC, the Corporationâ€™s duly appointed transfer agent for Mandatory Convertible Preferred Stock and any successor appointed under Section 17.â€œTrigger Eventâ€ shall have the meaning set forth in Section 15(a)(iii).â€œUnit of Exchange Propertyâ€ shall have the meaning set forth in Section 16. â€œValuation Periodâ€ shall have the meaning set forth in Section 15(a)(iii).â€œVoting Preferred Stockâ€ means any other class or series of Parity Stock upon which like voting powers for the election of directors as set forth in Section 8 have been conferred and are exercisable.â€œVWAPâ€ per share of Common Stock on any Trading Day means the per share volume-weighted average price as displayed on Bloomberg page â€œHPEAQRAâ€ (or its equivalent successor if such page is not available) in respect of the period from the scheduled open of trading until the scheduled close of trading of the primary trading session on such Trading Day (or if such volume-weighted average price is not available, the market value per share of Common Stock on such Trading Day as determined, using a volume-weighted average method, by a nationally recognized independent investment banking firm retained by the Corporation for this purpose).â€œWholly-Owned Subsidiaryâ€ means, with respect to any Person, any Subsidiary of such Person, except that, solely for purposes of this definition, the reference to â€œmore than 50%â€ in the definition of â€œSubsidiaryâ€ shall be deemed to be replaced by a reference to â€œ100%â€.Section 4.Dividends.(a)Rate. Subject to the rights of holders of any class or series of Senior Stock, Holders shall be entitled to receive, when, as and if declared by the Board of Directors, or an authorized committee thereof, out of funds of the Corporation legally available for payment, cumulative dividends at the rate per annum of 7.625% on the Liquidation Preference per share of the Mandatory Convertible Preferred Stock (the â€œDividend Rateâ€) (equivalent to \$3.81 per annum per share), payable in cash, by delivery of shares of Common Stock or through any combination of cash and shares of Common Stock pursuant to Section 4(c), as determined by the Board of Directors, or an authorized committee thereof, in its sole discretion (subject to the limitations set forth in Section 4(e)).If declared, dividends on the Mandatory Convertible Preferred Stock shall be payable quarterly on each Dividend Payment Date at such annual rate, and dividends shall accumulate -13-from the most recent date as to which dividends shall have been paid or, if no dividends have been paid, from the Initial Issue Date, whether or not in any Dividend Period or Dividend Periods there have been funds legally available or shares of Common Stock legally permitted to be issued for the payment of such dividends.If declared, dividends shall be payable on the relevant Dividend Payment Date to Record Holders on the immediately preceding Regular Record Date, whether or not such Record Holders convert their shares of Mandatory Convertible Preferred Stock, or such shares are automatically converted, after such Regular Record Date and on or prior to such immediately succeeding Dividend Payment Date¼ provided that the Regular Record Date for any such dividend shall not precede the date on which such dividend was so declared. If a Dividend Payment Date is not a Business Day, payment shall be made on the next succeeding Business Day, without any interest or other payment in lieu of interest accruing with respect to this delay.The amount of dividends payable on each share of Mandatory Convertible Preferred Stock for each full Dividend Period (subsequent to the initial Dividend Period) shall be computed by dividing the Dividend Rate by four. Dividends payable on Mandatory Convertible Preferred Stock for the initial Dividend Period and any partial Dividend Period shall be computed based upon the actual number of days elapsed during such period over a 360-day year (consisting of twelve 30-day months). Accumulated dividends on shares of the Mandatory Convertible Preferred Stock shall not bear interest, nor shall additional dividends be payable thereon, if they are paid subsequent to the applicable Dividend Payment Date.No dividend shall be paid unless and until the Board of Directors, or an authorized committee thereof, declares a dividend payable with respect to the Mandatory Convertible Preferred Stock. No dividend shall be declared or paid upon, or any sum of cash or number of shares of Common Stock set apart for the payment of dividends upon, any outstanding shares of Mandatory Convertible Preferred Stock with respect to any Dividend Period unless all dividends for all preceding Dividend Periods have been declared and paid upon, or a sufficient sum of cash or number of shares of Common Stock has been set apart for the payment of such dividends upon, all outstanding shares of Mandatory Convertible Preferred Stock.Holders shall not be entitled to any dividends on Mandatory Convertible Preferred Stock, whether payable in cash, property or shares of Common Stock, in excess of full cumulative dividends.Except as described in this Section 4(a), dividends on shares of Mandatory Convertible Preferred Stock converted to Common Stock shall cease to accumulate, and all other rights of Holders will terminate, from and after the applicable Conversion Date (other than the right to receive the consideration due upon such conversion as described herein).(b)Priority of Dividends. So long as any share of Mandatory Convertible Preferred Stock remains outstanding, no dividend or distribution shall be declared or paid on the Common Stock or any other class or series of Junior Stock, and no Common Stock or any other class or series of Junior Stock or Parity Stock shall be, directly or indirectly, purchased, redeemed or otherwise acquired for consideration by the Corporation or any of its Subsidiaries unless, in each case, all accumulated and unpaid dividends for all preceding Dividend Periods have been -14-declared and paid in full in cash, shares of the Common Stock or a combination thereof, or a sufficient sum of cash or number of shares of the Common Stock has been set apart for the payment of such dividends, on all outstanding shares of Mandatory Convertible Preferred Stock. The foregoing limitation shall not apply to:(i)any dividend or distribution payable in shares of Common Stock or other Junior Stock, together with cash in lieu of any fractional share¼(ii)purchases, redemptions or other acquisitions of Common Stock or other Junior Stock or Parity Stock in connection with the administration of any benefit or other incentive plan, including any employment or compensation agreement, including, without limitation, (x) the forfeiture of unvested shares of restricted stock or share withholding or other acquisitions or surrender of shares or derivative securities to which the holder may otherwise be entitled upon exercise, delivery or vesting of equity awards (whether in payment of applicable taxes, the exercise price or otherwise), and (y) the payment of cash in lieu of fractional shares¼(iii)purchases or deemed purchases or acquisitions of fractional interests in shares of any Common Stock or other Junior Stock pursuant to the conversion or exchange provisions of such shares of other Junior Stock or any securities exchangeable for or convertible into shares of Common Stock or other Junior Stock¼(iv)any dividends or distributions of rights or Common Stock or other Junior Stock in connection with a stockholdersâ€™ rights plan or any redemption or repurchase of rights pursuant to any stockholdersâ€™ rights plan¼(v)purchases of Common Stock or other Junior Stock pursuant to a contractually binding requirement to buy Common Stock or other Junior Stock, including under a contractually binding stock repurchase plan, in each case, existing prior to the date of the Prospectus Supplement¼(vi)the acquisition by the Corporation or any of its Subsidiaries of record ownership in Common Stock or other Junior Stock or Parity Stock for the beneficial ownership of any other persons (other than the Corporation or any of its Subsidiaries), including as trustees or custodians, and the payment of cash in lieu of fractional shares¼ (vii)the exchange or conversion of Junior Stock for or into other Junior Stock or of Parity Stock for or into other Parity Stock (with the same or lesser aggregate liquidation preference) or Junior Stock and the payment of cash in lieu of fractional shares; and(viii)the settlement of any convertible note hedge transactions or capped call transactions entered into in connection with the issuance of Mandatory Convertible Preferred Stock, by the Corporation or any of its subsidiaries, of any debt securities that are convertible into, or exchangeable for, Common Stock (or into or for any combination of cash and Common Stock based on the value of Common Stock); provided that such convertible note hedge transactions or capped call transactions, as applicable, are on customary terms and were entered into either (a) before the Initial Issue Date or (b) in compliance with the foregoing provision.When dividends on shares of the Mandatory Convertible Preferred Stock (i) have not been declared and paid in full on any Dividend Payment Date (or, in the case of Parity Stock having dividend payment dates different from such Dividend Payment Dates, on a dividend -15-payment date falling within a regular dividend period related to such Dividend Payment Date), or (ii)A have been declared but a sum of cash or number of shares of Common Stock sufficient for payment thereof has not been set aside for the benefit of the Holders thereof on the applicable Regular Record Date, no dividends may be declared or paid on any shares of Parity Stock unless dividends are declared on the shares of Mandatory Convertible Preferred Stock such that the respective amounts of such dividends declared on the shares of Mandatory Convertible Preferred Stock and such shares of Parity Stock shall be allocated pro rata among the Holders of the shares of the Mandatory Convertible Preferred Stock and the holders of any shares of Parity Stock then outstanding. For purposes of calculating the pro rata allocation of partial dividend payments, the Corporation shall allocate those payments so that the respective amounts of those payments for the declared dividend bear the same ratio to each other as all accumulated and unpaid dividends per share on the shares of Mandatory Convertible Preferred Stock and all declared and unpaid dividends per share on such shares of Parity Stock bear to each other (subject to their having been declared by the Board of Directors, or an authorized committee thereof, out of legally available funds)¼ provided that any unpaid dividends on the Mandatory Convertible Preferred Stock will continue to accumulate, except as described herein. For purposes of this calculation, with respect to non-cumulative Parity Stock, the Corporation shall use the full amount of dividends that would be payable for the most recent dividend period if dividends were declared in full on such non-cumulative Parity Stock.Subject to the foregoing, and not otherwise, such dividends as may be determined by the Board of Directors, or an authorized committee thereof, may be declared and paid (payable in cash, securities or other property) on any securities, including Common Stock and other Junior Stock, from time to time out of any funds legally available for such payment, and Holders shall not be entitled to participate in any such dividends.(c)Method of Payment of Dividends. (i) Subject to the limitations set forth in Section 4(e), the Corporation may pay any declared dividend (or any portion of any declared dividend) on the shares of Mandatory Convertible Preferred Stock (whether or not for a current Dividend Period or any prior Dividend Period, including in connection with the payment of declared and unpaid dividends pursuant to Section 9(c) or Section 11), as determined in the sole discretion of the Board of Directors, or an authorized committee thereof:(A)in cash¼(B)by delivery of shares of Common Stock¼ or (C)through any combination of cash and shares of Common Stock.(ii) The Corporation shall make each payment of a declared dividend on the shares of Mandatory Convertible Preferred Stock in cash, except to the extent the Corporation elects to make all or any portion of such payment in shares of Common Stock. The Corporation shall give notice to Holders of any such election, and the portion of such payment that will be made in cash and the portion that will be made in shares of Common Stock, no later than 10 Scheduled Trading Days prior to the Dividend Payment Date for such dividend¼ provided, however, that if the Corporation does not provide timely notice of this election, the Corporation will be deemed to have elected to pay the relevant dividend in cash.-16-(iii) All cash payments to which a Holder is entitled in connection with a declared dividend on the shares of Mandatory Convertible Preferred Stock will be rounded to the nearest cent. If the Corporation elects to make any such payment of a declared dividend, or any portion thereof, in shares of Common Stock, such shares shall be valued for such purpose, in the case of any dividend payment or portion thereof, at 97% of the Average VWAP per share of Common Stock over the five consecutive Trading Day period beginning on, and including, the sixth Scheduled Trading Day prior to the applicable Dividend Payment Date (such average, the â€œAverage Priceâ€). If the five Trading Day period to determine the Average Price ends on or after the relevant Dividend Payment Date (whether because a Scheduled Trading Day is not a Trading Day due to the occurrence of a Market Disruption Event or otherwise), then the Dividend Payment Date will be postponed until the second Business Day after the final Trading Day of such five Trading Day period¼ provided that no interest or other amounts shall accrue as a result of such postponement.(d)No fractional shares of Common Stock shall be delivered to the Holders in payment or partial payment of a dividend. The Corporation shall instead, to the extent it is legally permitted to do so, pay a cash amount (computed to the nearest cent) to each Holder that would otherwise be entitled to receive a fraction of a share of Common Stock based on the Average Price with respect to such dividend. To the extent that the Corporation is not able to pay such fractional amount in cash under applicable law and in compliance with its indebtedness, the Corporation shall instead round up to the nearest whole share for each Holder, and the Corporation shall not have any obligation to pay such amount in cash and such amount shall not form a part of the cumulative dividends that may be deemed to accumulate on the shares of Mandatory Convertible Preferred Stock.(e)Notwithstanding the foregoing, in no event shall the number of shares of Common Stock to be delivered in connection with any declared dividend, including any declared dividend payable in connection with a conversion, exceed a number equal to:(i)the declared dividend, divided by(ii)\$5.64, subject to adjustment in a manner inversely proportional to any anti-dilution adjustment to each Fixed Conversion Rate as provided in Section 15 (such dollar amount, as adjusted, the â€œFloor Priceâ€). To the extent that the amount of any declared dividend exceeds the product of (x) the number of shares of Common Stock delivered in connection with such declared

dividend and (y) 97% of the Average Price, the Corporation shall, if it is legally able to do so, and to the extent permitted under the terms of the documents governing the Corporation's indebtedness, notwithstanding any notice by the Corporation to the contrary, pay such excess amount in cash (computed to the nearest cent). To the extent that the Corporation is not able to pay such excess amount in cash under applicable law and in compliance with its indebtedness, the Corporation shall not have any obligation to pay such amount in cash or deliver additional shares of Common Stock in respect of such amount, and such amount shall not form a part of the cumulative dividends that may be deemed to accumulate on the shares of Mandatory Convertible Preferred Stock.(f)To the extent that a Shelf Registration Statement is required in the Corporation's reasonable judgment in connection with the issuance of, or for resales of, Common Stock issued as payment of a dividend on the shares of Mandatory Convertible Preferred Stock, including -17-dividends paid in connection with a conversion, the Corporation shall, to the extent such a Shelf Registration Statement is not currently filed and effective, use its commercially reasonable efforts to file and maintain the effectiveness of such a Shelf Registration Statement until the earlier of such time as all such shares of Common Stock have been resold thereunder and such time as all such shares would be freely tradable without registration by holders thereof that are not (and were not at any time during the preceding three months) affiliates of the Corporation for purposes of the Securities Act. To the extent applicable, the Corporation shall also use its commercially reasonable efforts to have such shares of the Common Stock approved for listing on NYSE (or if the Common Stock is not listed on NYSE, on the principal other U.S. national or regional securities exchange on which the Common Stock is then listed), and qualified or registered under applicable state securities laws, if required provided that the Corporation will not be required to qualify as a foreign corporation or to take any action that would subject it to general service of process in any such jurisdiction where it is not presently qualified or where it is not presently subject to taxation as a foreign corporation and such qualification or action would subject it to such taxation.Section 5.Liquidation, Dissolution or Winding-Up.(a)In the event of any voluntary or involuntary liquidation, winding-up or dissolution of the Corporation, each Holder shall be entitled to receive, per share of Mandatory Convertible Preferred Stock, the Liquidation Preference of \$50.00 per share of the Mandatory Convertible Preferred Stock, plus an amount (the "Liquidation Dividend Amount") equal to accumulated and unpaid dividends on such share, whether or not declared, to, but excluding, the date fixed for liquidation, winding-up or dissolution, such amount to be paid out of the assets of the Corporation legally available for distribution to its stockholders, after satisfaction of debt and other liabilities owed to the Corporation's creditors and holders of shares of any Senior Stock and before any payment or distribution is made to holders of any Junior Stock, including, without limitation, Common Stock.(b)If, upon the voluntary or involuntary liquidation, winding-up or dissolution of the Corporation, the amounts payable with respect to (1) the Liquidation Preference plus the Liquidation Dividend Amount on the shares of the Mandatory Convertible Preferred Stock and (2) the liquidation preference of, and the amount of accumulated and unpaid dividends (to, but excluding, the date fixed for liquidation, winding-up or dissolution) on, all Parity Stock, if applicable, are not paid in full, the Holders and all holders of any such Parity Stock shall share equally and ratably in any distribution of the Corporation's assets in proportion to their respective liquidation preferences and amounts equal to the accumulated and unpaid dividends to which they are entitled.(c)After the payment to any Holder of the full amount of the Liquidation Preference and the Liquidation Dividend Amount for such Holder's shares of Mandatory Convertible Preferred Stock, such Holder as such shall have no right or claim to any of the remaining assets of the Corporation.(d)Neither the sale, lease nor exchange of all or substantially all of Corporation's assets or business (other than in connection with the Corporation's liquidation, winding-up or dissolution), nor its merger or consolidation into or with any other Person, shall be deemed to be the voluntary or involuntary liquidation, winding-up or dissolution of the Corporation.Section 6.No Redemption or Sinking Fund.Other than pursuant to Section 7, the Mandatory Convertible Preferred Stock shall not be subject to any redemption rights, sinking fund or other similar provisions. Notwithstanding the foregoing, the Corporation may, at its option, purchase or exchange the Mandatory Convertible Preferred Stock from time to time in the open market, by tender or exchange offer or otherwise, without the consent of, or notice to, Holders on such terms as the Holder thereof and the Corporation may agree.Section 7.Acquisition Termination Redemption.(a)If (x) the consummation of the Juniper Acquisition does not occur on or before the later of (i) the date that is five business days after October 9, 2025 and (ii) the date that is five business days after any later date to which Juniper and the Corporation may agree to extend the "End Date" in the Merger Agreement, or (y) the Corporation notifies Holders in writing that the Corporation will not pursue the consummation of the Juniper Acquisition, then the Corporation may, within 75 calendar days, at its option, give notice of a redemption (an "Acquisition Termination Redemption") to Holders; provided that to the extent Mandatory Convertible Preferred Stock is held in book-entry form through DTC, the Corporation may give such notice in any manner permitted by the DTC. If the Corporation provides notice of Acquisition Termination Redemption to Holders, then, on the Acquisition Termination Redemption Date, the Corporation will redeem the Mandatory Convertible Preferred Stock, in whole but not in part, at a redemption amount per Mandatory Convertible Preferred Stock equal to the Acquisition Termination Make-Whole Amount.(b)If the Acquisition Termination Share Price exceeds the Initial Price:(i)the Corporation may elect to pay cash in lieu of delivering all or any portion of the Common Stock equal to the Acquisition Termination Conversion Rate. If the Corporation makes such an election, it will deliver cash (rounded to the nearest cent) in an amount equal to such Common Stock in respect of which it has made this election multiplied by the Acquisition Termination Market Value, and (ii)the Corporation may elect to deliver Common Stock in lieu of paying cash for some or all of the Acquisition Termination Dividend Amount. A A A If the Corporation makes such an election, it will deliver such number of shares of Common Stock equal to such portion of the Acquisition Termination Dividend Amount to be paid in Common Stock divided by the greater of (x) the Floor Price and (y) 97% of the Acquisition Termination Market Value; provided, that if the Acquisition Termination Dividend Amount or portion thereof in respect of which Common Stock is delivered exceeds the product of Common Stock multiplied by 97% of the Acquisition Termination Market Value, the Corporation will, if it is legally able to do so, and to the extent permitted under the terms of the documents governing its indebtedness, pay such excess amount in cash (computed to the nearest cent). To the extent that the Corporation is not able to pay such excess amount in cash under applicable law and in compliance with the terms of its indebtedness, the Corporation shall not have any obligation to pay such amount in cash or deliver additional shares of Common Stock in respect of such amount, and such amount will not form a part of the cumulative dividends that may be deemed to accumulate on the shares of the Mandatory Convertible Preferred Stock.(c)If any portion of the Acquisition Termination Make-Whole Amount is to be paid in Common Stock, no fractional shares will be delivered to Holders. The Corporation will instead pay a cash adjustment to each Holder that would otherwise be entitled to a fractional share based on the Average VWAP per ordinary share over the five consecutive Trading Day -19-period ending on, and including, the Trading Day immediately preceding the Acquisition Termination Redemption Date. If more than one share of Mandatory Convertible Preferred Stock is to be redeemed from a Holder, the number of shares of Common Stock issuable in connection with the payment of the Reference Amount shall be computed on the basis of the aggregate number of Mandatory Convertible Preferred Stock so redeemed.(d)Notice of Acquisition Termination Redemption will specify, among other things:(i)the Acquisition Termination Make-Whole Amount;(ii)if the Acquisition Termination Share Price exceeds the Initial Price, the number of shares of Common Stock and the amount of cash comprising the Reference Amount per Mandatory Convertible Preferred Stock (before giving effect to any election to pay or deliver, with respect to each Mandatory Convertible Preferred Stock, cash in lieu of all or a portion of the Common Stock equal to the Acquisition Termination Conversion Rate or Common Stock in lieu of some or all of the cash in respect of the Acquisition Termination Dividend Amount);(iii)if the Acquisition Termination Share Price exceeds the Initial Price, whether the Corporation will pay cash in lieu of Common Stock equal to the Acquisition Termination Conversion Rate comprising a portion of the Reference Amount (specifying, if applicable, the number of such shares of Common Stock in respect of which cash will be paid);(iv)if the Acquisition Termination Share Price exceeds the Initial Price, whether the Corporation will deliver Common Stock in lieu of paying cash for all or any portion of the Acquisition Termination Dividend Amount comprising a portion of the Reference Amount (specifying, if applicable, the percentage of the Acquisition Termination Dividend Amount in respect of which Common Stock will be delivered in lieu of cash); and(v)the Acquisition Termination Redemption Date (specifying, as applicable, a fixed date or that the Acquisition Termination Redemption Date will be the second Business Day following the last Trading Day of the 20 consecutive Trading Day period used to determine the Acquisition Termination Market Value).(e)To the extent a shelf registration statement is required in the Corporation's reasonable judgment in connection with the issuance of, or for resales of, Common Stock issued as payment of the Acquisition Termination Make-Whole Amount, the Corporation shall, to the extent such a Shelf Registration Statement is not currently filed and effective, use its commercially reasonable efforts to file and maintain the effectiveness of such a Shelf Registration Statement until the earlier of such time as all such shares of Common Stock have been resold thereunder and such time as all such shares would be freely tradable without registration by holders thereof that are not (and were not at any time during the preceding three months) affiliates of the Corporation for purposes of the Securities Act. To the extent applicable, the Corporation shall also use its commercially reasonable efforts to have such shares of the Common Stock approved for listing on NYSE (or if the Common Stock is not listed on NYSE, on the principal other U.S. national or regional securities exchange on which the Common Stock is then listed), and qualified or registered under applicable state securities laws, if required provided that the Corporation will not be required to qualify as a foreign corporation or to take any action that would subject it to general service of process in any such jurisdiction where it is not presently qualified or where it is not presently subject to taxation as a foreign corporation and such qualification or action would subject it to such taxation.-20-Section 8.Voting Power.(a)General. Holders shall not have any voting rights or powers other than those set forth in this Section 8, except as specifically required by Delaware law or by the Charter from time to time.(b)Right to Elect Two Directors Upon Nonpayment. (i) Whenever dividends on any shares of the Mandatory Convertible Preferred Stock have not been declared and paid for the equivalent of six or more Dividend Periods, whether or not for consecutive Dividend Periods (a "Nonpayment"), the authorized number of directors on the Board of Directors shall, at the Corporation's next annual meeting of the stockholders or at a special meeting of stockholders as provided below, automatically be increased by two and Holders, voting together as a single class with holders of any and all other series of Voting Preferred Stock then outstanding, shall be entitled, at the Corporation's next annual meeting of stockholders or at a special meeting of stockholders, if any, as provided below, to vote for the election of a total of two additional members of the Board of Directors (the "Preferred Stock Directors") provided, that the election of any such Preferred Stock Directors will not cause the Corporation to violate the corporate governance requirements of NYSE (or any other exchange or automated quotation system on which the Corporation's securities may be listed or quoted) that requires listed or quoted companies to have a majority of independent directors provided further that the Board of Directors shall, at no time, include more than two Preferred Stock Directors.(ii) In the event of a Nonpayment, the Holders of at least 25% of the shares of the Mandatory Convertible Preferred Stock and holders of record of any other series of Voting Preferred Stock may request that a special meeting of stockholders be called to elect such Preferred Stock Directors (provided, that if the next annual or a special meeting of stockholders is scheduled to be held within 90 days of the receipt of such request, the election of such Preferred Stock Directors, to the extent otherwise permitted by the Bylaws, shall, instead, be included in the agenda for, and shall be held at, such scheduled annual or special meeting of stockholders). The Preferred Stock Directors shall stand for reelection annually, at each subsequent annual meeting of the stockholders, so long as the Holders continue to have such voting powers. At any meeting at which the Holders are entitled to elect Preferred Stock Directors, the holders of record of a majority in voting power of the then outstanding shares of Mandatory Convertible Preferred Stock and all other series of Voting Preferred Stock, present in person or represented by proxy, shall constitute a quorum and the vote of the holders of a majority in voting power of such shares of Mandatory Convertible Preferred Stock and other Voting Preferred Stock so present or represented by proxy at any such meeting at which there shall be a quorum shall be sufficient to elect the Preferred Stock Directors.(iii) If and when all accumulated and unpaid dividends on the Mandatory Convertible Preferred Stock have been paid in full, or declared and a sum or number of shares of the Common Stock sufficient for such payment shall have been set aside for the benefit of the Holders thereof on the applicable Regular Record Date (a "Nonpayment Remedy"), the Holders shall immediately and, without any further action by the Corporation, be divested of the voting powers described in this Section 8(b), subject to the revesting of such powers in the event of each subsequent Nonpayment. If such voting powers for the Holders and all other holders of Voting Preferred Stock shall have terminated, each Preferred Stock Director then in office shall automatically be disqualified as a director and shall no longer be a director and the term of office of each Preferred Stock Director so elected shall terminate at such time and the authorized number of directors on the Board of Directors shall automatically decrease by two.-21-(iv) Any Preferred Stock Director may be removed at any time, with or without cause, by the holders of record of a majority in voting power of the outstanding shares of the Mandatory Convertible Preferred Stock and any other series of Voting Preferred Stock then outstanding (voting together as a single class), when they have the voting powers described in this Section 8(b). In the event that a Nonpayment shall have occurred and there shall not have been a Nonpayment Remedy, any vacancy in the office of a Preferred Stock Director (other than prior to the initial election of Preferred Stock Directors after a Nonpayment) may be filled by the written consent of the Preferred Stock Director remaining in office, except that in the event that such vacancy is created as a result of such Preferred Stock Director being removed, or if no Preferred Stock Director remains in office, then such vacancy may be filled by a vote of the holders of record of a majority in voting power of the outstanding shares of the Mandatory Convertible Preferred Stock and any other series of Voting Preferred Stock then outstanding (voting together as a single class) when they have the voting powers described in this Section 8(b) provided, however, that the election of any such Preferred Stock Directors to fill such vacancy will not cause the Corporation to violate the corporate governance requirements of NYSE (or any other exchange or automated quotation system on which the Corporation's securities may be listed or quoted) that requires listed or quoted companies to have a majority of independent directors. The Preferred Stock Directors shall each be entitled to one vote per director on any matter that shall come before the Board of Directors for a vote.(c)Other Voting Powers. So long as any shares of the Mandatory Convertible Preferred Stock are outstanding, the Corporation shall not, without the affirmative vote or consent of the holders of record of at least two-thirds in voting power of the outstanding shares of the Mandatory Convertible Preferred Stock and all other series of Voting Preferred Stock at the time outstanding and entitled to vote thereon (subject to the last paragraph of this Section 8(c)), voting together as a single class, given in person or by proxy, either by written consent without a meeting or by vote at an annual or special meeting of such stockholders:(i)amend or alter the provisions of the Charter so as to authorize or create, or increase the authorized number of, any class or series of Senior Stock;(ii)amend, alter or repeal any provision of the Charter or this Certificate of Designations so as to materially and adversely affect the special rights, preferences or voting powers of the Mandatory Convertible Preferred Stock;(iii)consummate a binding share exchange or reclassification involving the shares of the Mandatory Convertible Preferred Stock, a merger or consolidation of the Corporation with another entity or a conversion of the Corporation or domestication in or transfer to a foreign jurisdiction, unless in each case: (A) the shares of the Mandatory Convertible Preferred Stock remain outstanding following the consummation of such binding share exchange, reclassification, merger or consolidation or, in the case of (x) A any such merger or consolidation with respect to which the Corporation is not the surviving or resulting entity (or the Mandatory Convertible Preferred Stock is otherwise exchanged or reclassified) or (y) any such conversion, domestication or transfer, are converted or reclassified into or exchanged for preference securities of the surviving or resulting entity, of the converted, domesticated or transferred entity or, in either case, such entity's ultimate parent and (B) the shares of the Mandatory Convertible Preferred Stock that remain outstanding or such shares of preference securities, as the case may be, have such rights, preferences and voting powers that, taken as a whole, are not materially less favorable to the holders thereof than the rights, preferences and voting powers, taken as a whole, of the Mandatory Convertible Preferred Stock immediately prior to the consummation of such transaction; 22-provided, however, that in the event a transaction would trigger voting powers under clauses (ii) and (iii) above, clause (iii) shall govern; 23-provided, further, however, that for all purposes of this Section 8(c):(1) any increase in the number of the Corporation's authorized but unissued shares of Preferred Stock,(2) any increase in the number of the authorized or issued shares of Mandatory Convertible Preferred Stock, (3) the creation and issuance, or increase in the authorized or issued number, of any class or series of Parity Stock or Junior Stock, and(4) the applicable of the provisions described in Section 16, shall be deemed not to adversely affect (or to otherwise cause to be materially less favorable) the rights, preferences or voting powers of the Mandatory Convertible Preferred Stock and shall not require the affirmative vote or written consent under this Section 8(c). If any amendment, alteration, repeal, share exchange, reclassification, merger or consolidation or conversion, domestication or transfer specified in this Section 8(c) would adversely affect the rights, preferences or voting powers of one or more but not all series of Voting Preferred Stock (including the Mandatory Convertible Preferred Stock for this purpose), then only the series of Voting Preferred Stock the rights, preferences or voting powers of which are adversely affected and entitled to vote shall vote as a class in lieu of all series of Voting Preferred Stock.(d)Without the vote or consent of the Holders, so long as such action does not adversely affect the special rights, preferences or voting powers of the Mandatory Convertible Preferred Stock, and limitations and restrictions thereof, the Corporation may amend, alter, correct, supplement or repeal any terms of the Mandatory Convertible Preferred Stock by amending or supplementing the Charter or the Certificate of Designations for the following purposes:(i)to cure any ambiguity, omission, inconsistency or mistake in any such agreement (including any provision contained in this Certificate of Designations

that may be defective or inconsistent with any other provision contained in this Certificate of Designations) (ii) to make any provision with respect to matters or questions relating to the Mandatory Convertible Preferred Stock that is not inconsistent with the provisions of the Charter or this Certificate of Designations) (iii) to waive any of the Corporation's rights with respect to the Mandatory Convertible Preferred Stock; or (iv) to make any other change that does not materially and adversely affect the rights of any Holder (other than any Holder that consents to such change). In addition, without the consent of the Holders, the Corporation may amend, alter, supplement or repeal any terms of the Mandatory Convertible Preferred Stock in order to -23-(x)A conform the terms thereof to the description of the terms of the Mandatory Convertible Preferred Stock set forth under "Description of Mandatory Convertible Preferred Stock" in the Prospectus Supplement or (y) file a certificate of correction with respect to this Certificate of Designations to the extent permitted by Section 103(f) of the Delaware General Corporation Law. (e) Prior to the Close of Business on the applicable Conversion Date, the shares of Common Stock issuable upon conversion of any shares of the Mandatory Convertible Preferred Stock shall not be deemed to be outstanding for any purpose and Holders shall have no rights, powers or preferences with respect to such shares of Common Stock, including voting powers, rights to respond to tender offers for the Common Stock and rights to receive any dividends or other distributions on the Common Stock, by virtue of holding the Mandatory Convertible Preferred Stock. (f) In connection with any vote expressly set forth in this Section 8, the number of votes that each share of Mandatory Convertible Preferred Stock (and any Voting Preferred Stock participating in the votes set forth in this Section 8) shall have shall be equal to the respective per share liquidation preference amounts of the Mandatory Convertible Preferred Stock and such other Voting Preferred Stock. (g) The rules and procedures for calling and conducting any meeting of the Holders (including, without limitation, the fixing of a record date in connection therewith), the solicitation and use of proxies at such a meeting, the obtaining of written consents and any other procedural aspect or matter with regard to such a meeting or such consents shall be governed by any rules the Board of Directors, in its discretion, may adopt from time to time, which rules and procedures shall conform to the requirements of the Charter, the Bylaws, applicable law and the rules of any national securities exchange or other trading facility on which the Mandatory Convertible Preferred Stock is listed or traded at the time. Section 9. Mandatory Conversion on the Mandatory Conversion Date. (a) Each outstanding share of the Mandatory Convertible Preferred Stock shall automatically convert (unless previously redeemed in accordance with Section 7 or converted in accordance with Section 10 or Section 11) on the Mandatory Conversion Date (the "Mandatory Conversion Date"), into a number of shares of Common Stock equal to the Mandatory Conversion Rate. (b) The "Mandatory Conversion Rate" shall, subject to adjustment in accordance with Section 9(c), be as follows: (i) if the Applicable Market Value is greater than the Threshold Appreciation Price, the Mandatory Conversion Rate shall be equal to 2.5352 shares of Common Stock per share of the Mandatory Convertible Preferred Stock (the "Minimum Conversion Rate") (ii) if the Applicable Market Value is less than or equal to the Threshold Appreciation Price but equal to or greater than the Initial Price, the Mandatory Conversion Rate per share of the Mandatory Convertible Preferred Stock shall be equal to \$50.00 divided by the Applicable Market Value, rounded to the nearest ten-thousandth of a share of Common Stock 1/4 or 24- (iii) if the Applicable Market Value is less than the Initial Price, the Mandatory Conversion Rate shall be equal to 3.1056 shares of Common Stock per share of the Mandatory Convertible Preferred Stock (the "Maximum Conversion Rate") 1/4 provided that the Fixed Conversion Rates are each subject to adjustment in accordance with the provisions of Section 15. (c) If the Corporation declares a dividend on the Mandatory Convertible Preferred Stock for the Dividend Period ending on, but excluding, September 1, 2027, the Corporation shall pay such dividend to the Record Holders as of the immediately preceding Regular Record Date, in accordance with Section 4. If on or prior to September 1, 2027, the Corporation has not declared a dividend payable in the amount of all or any portion of the accumulated and unpaid dividends on the Mandatory Convertible Preferred Stock, the Mandatory Conversion Rate shall be adjusted so that Holders receive an additional number of shares of Common Stock equal to: (i) the amount of such undeclared, accumulated and unpaid dividends per share of the Mandatory Convertible Preferred Stock (the "Mandatory Conversion Additional Conversion Amount"), divided by (ii) the greater of (x) the Floor Price and (y) 97% of the Average Price (calculated using September 1, 2027 as the applicable Dividend Payment Date). To the extent that the Mandatory Conversion Additional Conversion Amount exceeds the product of such number of additional shares and 97% of the Average Price, the Corporation shall, if it is legally able to do so, and to the extent permitted under the terms of the documents governing its indebtedness, declare and pay such excess amount in cash (computed to the nearest cent) pro rata per share to the Holders. To the extent that the Corporation is not able to pay such excess amount in cash under applicable law and in compliance with its indebtedness, the Corporation shall not have any obligation to pay such amount in cash or deliver additional shares of Common Stock in respect of such amount, and such amount will not form a part of the cumulative dividends on the shares of Mandatory Convertible Preferred Stock. For the avoidance of doubt, the Mandatory Conversion Rate shall in no event exceed the Maximum Conversion Rate, subject to adjustment in accordance with the provisions of Section 15, and exclusive of any amounts owing in respect of any Mandatory Conversion Additional Conversion Amount or any accrued and unpaid dividends paid at the Corporation's election in shares of Common Stock. Section 10. Early Conversion at the Option of the Holder. (a) Other than during a Fundamental Change Conversion Period, subject to satisfaction of the conversion procedures set forth in Section 12, the Holders shall have the option to convert their Mandatory Convertible Preferred Stock, in whole or in part (but in no event in increments of less than one share of the Mandatory Convertible Preferred Stock), at any time prior to September 1, 2027 (an "Early Conversion Date"), into shares of Common Stock at the Minimum Conversion Rate, subject to adjustment in accordance with Section 10(b). (b) If, as of any Early Conversion Date, the Corporation has not declared all or any portion of the accumulated and unpaid dividends for all full Dividend Periods ending on or prior to the Dividend Payment Date immediately prior to such Early Conversion Date, the Minimum -25- Conversion Rate shall be adjusted, with respect to the relevant Early Conversion, so that the Holders converting their Mandatory Convertible Preferred Stock at such time receive an additional number of shares of Common Stock equal to: (i) such amount of undeclared, accumulated and unpaid dividends per share of Mandatory Convertible Preferred Stock for such prior full Dividend Periods (the "Early Conversion Additional Conversion Amount"), divided by (ii) the greater of (x) the Floor Price and (y) the Average VWAP per share of the Common Stock over the 20 consecutive Trading Day period (the "Early Conversion Settlement Period") commencing on, and including, the 21st Scheduled Trading Day immediately preceding the Early Conversion Date (such Average VWAP, the "Early Conversion Average Price"). To the extent that the Early Conversion Additional Conversion Amount exceeds the product of such number of additional shares and the Early Conversion Average Price, the Corporation shall not have any obligation to pay the shortfall in cash or deliver shares of Common Stock in respect of such shortfall. Except as set forth in the first sentence of this Section 10(b), upon any Early Conversion of any shares of Mandatory Convertible Preferred Stock, the Corporation shall make no payment or allowance for unpaid dividends on such shares of the Mandatory Convertible Preferred Stock, unless such Early Conversion Date occurs after the Regular Record Date for a declared dividend and on or prior to the immediately succeeding Dividend Payment Date, in which case the Corporation shall pay such dividend on such Dividend Payment Date to the Record Holder of the converted shares of the Mandatory Convertible Preferred Stock as of such Regular Record Date, in accordance with Section 4. Section 11. Fundamental Change Conversion. (a) If a Fundamental Change occurs on or prior to September 1, 2027, the Holders shall have the right (the "Fundamental Change Conversion Right") during the Fundamental Change Conversion Period to: (i) convert their shares of Mandatory Convertible Preferred Stock, in whole or in part (but in no event in increments of less than one share of the Mandatory Convertible Preferred Stock) (any such conversion pursuant to this Section 11(a) being a "Fundamental Change Conversion") into a number of shares of Common Stock (or Units of Exchange Property in accordance with Section 16) equal to the Fundamental Change Conversion Rate per share of Mandatory Convertible Preferred Stock 1/3 (ii) with respect to such converted shares of Mandatory Convertible Preferred Stock, receive an amount equal to the present value, calculated using a discount rate of 4.67% per annum, of all dividend payments on such shares (excluding any Accumulated Dividend Amount) for (A) the partial Dividend Period, if any, from, and including, the Fundamental Change Effective Date to, but excluding, the next Dividend Payment Date and (B) all the remaining full Dividend Periods from, and including, the Dividend Payment Date following the Fundamental Change Effective Date to, but excluding, September 1, 2027 (the "Fundamental Change Dividend Make-Whole Amount"), payable in cash or shares of Common Stock 1/4 and 26- (iii) with respect to such converted shares of Mandatory Convertible Preferred Stock, receive the Accumulated Dividend Amount payable in cash or shares of Common Stock, subject, in the case of clauses (ii) and (iii) to certain limitations with respect to the number of shares of Common Stock the Corporation will be required to deliver as set forth in Section 11(d). Notwithstanding clauses (ii) and (iii), if the Fundamental Change Effective Date or the Fundamental Change Conversion Date falls after the Regular Record Date for a Dividend Period for which the Corporation has declared a dividend and prior to the next Dividend Payment Date, then the Corporation shall pay such dividend on the relevant Dividend Payment Date to the Record Holders as of such Regular Record Date, in accordance with Section 4, and the Accumulated Dividend Amount shall not include the amount of such dividend, and the Fundamental Change Dividend Make-Whole Amount shall not include the present value of the payment of such dividend. (b) To exercise the Fundamental Change Conversion Right, Holders must submit their shares of Mandatory Convertible Preferred Stock for conversion at any time during the Fundamental Change Conversion Period. Holders that submit their shares of Mandatory Convertible Preferred Stock for conversion during the Fundamental Change Conversion Period shall be deemed to have exercised their Fundamental Change Conversion Right. Holders who do not submit their shares for conversion during the Fundamental Change Conversion Period shall not be entitled to convert their Mandatory Convertible Preferred Stock at the relevant Fundamental Change Conversion Rate or to receive the relevant Fundamental Change Dividend Make-Whole Amount or the relevant Accumulated Dividend Amount. The Corporation shall provide written notice (the "Fundamental Change Notice") to Holders of the Fundamental Change Effective Date no later than the second Business Day immediately following such Fundamental Change Effective Date. The Fundamental Change Notice shall state: (i) the event causing the Fundamental Change 1/3 (ii) the anticipated Fundamental Change Effective Date or actual Fundamental Change Effective Date, as the case may be 1/3 (iii) that Holders shall have the right to effect a Fundamental Change Conversion in connection with such Fundamental Change during the Fundamental Change Conversion Period 1/3 (iv) the Fundamental Change Conversion Period 1/4 and (v) the instructions a Holder must follow to effect a Fundamental Change Conversion in connection with such Fundamental Change. (c) Not later than the second Business Day following the Fundamental Change Effective Date, the Corporation shall notify Holders of: (i) the Fundamental Change Conversion Rate (if notice is provided to Holders prior to the anticipated Fundamental Change Effective Date, specifying how the Fundamental Change Conversion Rate will be determined) 1/4 -27- (ii) the Fundamental Change Dividend Make-Whole Amount and whether the Corporation will pay such amount in cash, shares of Common Stock (or to the extent applicable, Units of Exchange Property) or a combination thereof, specifying the combination, if applicable 1/4 and (iii) the Accumulated Dividend Amount as of the Fundamental Change Effective Date and whether the Corporation will pay such amount in cash, shares of Common Stock (or to the extent applicable, Units of Exchange Property) or a combination thereof, specifying the combination, if applicable. (d) (i) For any shares of the Mandatory Convertible Preferred Stock that are converted during the Fundamental Change Conversion Period, in addition to the Common Stock issued upon conversion at the Fundamental Change Conversion Rate, the Corporation shall at its option (subject to satisfaction of the requirements of this Section 11): (A) pay the Fundamental Change Dividend Make-Whole Amount in cash (computed to the nearest cent), to the extent the Corporation is legally permitted to do so and to the extent permitted under the terms of the documents governing its indebtedness 1/4 (B) increase the number of shares of Common Stock (or Units of Exchange Property) to be issued upon conversion by a number equal to (x) the Fundamental Change Dividend Make-Whole Amount, divided by (y) the greater of (i) the Floor Price and (ii) 97% of the Fundamental Change Stock Price 1/4 or (C) pay the Fundamental Change Dividend Make-Whole Amount through any combination of cash and shares of Common Stock (or Units of Exchange Property) in accordance with the provisions of clauses (A) and (B) above. (ii) In addition, to the extent that the Accumulated Dividend Amount exists as of the Fundamental Change Effective Date, the converting Holder shall be entitled to receive such Accumulated Dividend Amount upon such Fundamental Change Conversion. The Corporation shall, at its option, pay the Accumulated Dividend Amount (subject to satisfaction of the requirements of this Section 11): (A) in cash (computed to the nearest cent), to the extent the Corporation is legally permitted to do so and to the extent permitted under the terms of the documents governing its indebtedness 1/4 (B) in an additional number of shares of Common Stock (or Units of Exchange Property) equal to (x) the Accumulated Dividend Amount, divided by (y) the greater of (i) the Floor Price and (ii) 97% of the Fundamental Change Stock Price 1/4 or (C) through a combination of cash and shares of Common Stock (or Units of Exchange Property) in accordance with the provisions of clauses (A) and (B) above. (iii) The Corporation shall pay the Fundamental Change Dividend Make-Whole Amount and the Accumulated Dividend Amount in cash, except to the extent the Corporation elects on or prior to the second Business Day following the relevant Fundamental Change Effective Date to make all or any portion of such payments in shares of Common Stock (or Units of Exchange Property). If the Corporation elects to -28- deliver Common Stock (or Units of Exchange Property) in respect of all or any portion of the Fundamental Change Dividend Make-Whole Amount or the Accumulated Dividend Amount, to the extent that the Fundamental Change Dividend Make-Whole Amount or the Accumulated Dividend Amount or the dollar amount of any portion thereof paid in Common Stock (or Units of Exchange Property) exceeds the product of (x) the number of additional shares the Corporation delivers in respect thereof and (y) 97% of the Fundamental Change Stock Price, the Corporation shall, if it is legally able to do so, and to the extent permitted under the terms of the documents governing its indebtedness, pay such excess amount in cash (computed to the nearest cent). To the extent that the Corporation is not able to pay such excess amount in cash under applicable law and in compliance with its indebtedness, the Corporation shall not have any obligation to pay such amount in cash or deliver additional shares of Common Stock in respect of such amount, and such amount will not form a part of the cumulative dividends that may be deemed to accumulate on the shares of the Mandatory Convertible Preferred Stock. (iv) No fractional shares of Common Stock (or, to the extent applicable, Units of Exchange Property) shall be delivered by the Corporation to converting Holders in respect of the Fundamental Change Dividend Make-Whole Amount or the Accumulated Dividend Amount. The Corporation shall instead, to the extent the Corporation is legally permitted to do so and to the extent permitted under the terms of the documents governing the Corporation's indebtedness, pay a cash amount (computed to the nearest cent) to each converting Holder that would otherwise be entitled to receive a fraction of a share of Common Stock (or to the extent applicable, Units of Exchange Property) based on the Average VWAP per share of Common Stock (or to the extent applicable, Units of Exchange Property) over the five consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the relevant Fundamental Change Conversion Date. In the event the Corporation cannot pay cash in lieu of a fractional share, the Corporation shall instead round up to the nearest whole share for each Holder, and the Corporation shall not have any obligation to pay such amount in cash and such amount shall not form a part of the cumulative dividends that may be deemed to accumulate on the shares of Mandatory Convertible Preferred Stock. (v) If the Corporation is prohibited from paying or delivering, as the case may be, the Fundamental Change Dividend Make-Whole Amount (whether in cash or in shares of Common Stock), in whole or in part, due to limitations of applicable Delaware law, the Fundamental Change Conversion Rate will instead be increased by a number of shares of Common Stock equal to: (A) the cash amount of the aggregate unpaid and undelivered Fundamental Change Dividend Make-Whole Amount, divided by (B) the greater of (i) the Floor Price and (ii) 97% of the Fundamental Change Stock Price. To the extent that the cash amount of the aggregate unpaid and undelivered Fundamental Change Dividend Make-Whole Amount exceeds the product of such number of additional shares and 97% of the Fundamental Change Stock Price, the Corporation shall not have any obligation to pay the shortfall in cash or deliver additional shares of Common Stock in respect of such amount. -29- Section 12. Conversion Procedures. (a) Pursuant to Section 9, on the Mandatory Conversion Date, any outstanding shares of Mandatory Convertible Preferred Stock shall mandatorily and automatically convert into shares of Common Stock. Subject to any applicable rules and procedures of the Depository, if more than one share of the Mandatory Convertible Preferred Stock held by the same Holder is automatically converted on the Mandatory Conversion Date, the number of full shares of Common Stock issuable upon conversion thereof shall be computed on the basis of the aggregate number of shares of Mandatory Convertible Preferred Stock so converted. A Holder of shares of the Mandatory Convertible Preferred Stock that are mandatorily converted shall not be required to pay any transfer or similar taxes or duties relating to the issuance or delivery of the Common Stock upon conversion, except that such Holder shall be required to pay any tax or duty that may be payable relating to any transfer involved in the issuance or delivery of the Common Stock in a name other than the name of such Holder. A certificate representing the shares of Common Stock issuable upon conversion shall be issued and delivered to the converting Holder or, if the Mandatory Convertible Preferred Stock being converted is in book-entry form, the shares of Common Stock issuable upon conversion shall be delivered to the converting Holder through book-entry transfer through the facilities of the Depository, in each case, together with delivery by the Corporation to the converting Holder of any cash to which the converting Holder is entitled, only after all applicable taxes and duties, if any, payable by such converting Holder have been paid in full, and such shares and cash will be delivered on the later of (i) the Mandatory Conversion Date and (ii) the Business Day after the Holder has paid in full all applicable taxes and duties, if any. The Person or Persons entitled to receive the shares of Common Stock issuable upon Mandatory Conversion shall be treated as the record holder(s) of such shares of Common Stock as of the Close of Business on the Mandatory Conversion Date. Prior to the Close of Business on the Mandatory Conversion Date, the Common Stock issuable upon conversion of Mandatory Convertible Preferred Stock on the Mandatory Conversion Date shall not be deemed to

are outstanding for any purpose and Holders shall have no rights, powers or preferences with respect to such Common Stock, including voting powers, rights to respond to tender offers and rights to receive any dividends or other distributions on the Common Stock, by virtue of holding the Mandatory Convertible Preferred Stock.(b)To effect an Early Conversion pursuant to Section 10, a Holder must:(i)complete and manually sign the conversion notice on the back of the Mandatory Convertible Preferred Stock certificate or a facsimile of such conversion notice³/(ii)deliver the completed conversion notice and the certificated shares of Mandatory Convertible Preferred Stock to be converted to the Conversion and Dividend Disbursing Agent³/4-30-(iii)if required, furnish appropriate endorsements and transfer documents³/4 and(iv)if required, pay all transfer or similar taxes or duties, if any.Notwithstanding the foregoing, to effect an Early Conversion pursuant to Section 10 of shares of Mandatory Convertible Preferred Stock held in global form, the Holder must, in lieu of the foregoing, comply with the applicable procedures of DTC (or any other Depository for the shares of Mandatory Convertible Preferred Stock held in global form appointed by the Corporation).The Early Conversion shall be effective on the date on which a Holder has satisfied the foregoing requirements, to the extent applicable (the "Early Conversion Date").Subject to any applicable rules and procedures of the Depository, if more than one share of the Mandatory Convertible Preferred Stock is surrendered for conversion at one time by or for the same Holder, the number of full shares of Common Stock issuable upon conversion thereof shall be computed on the basis of the aggregate number of shares of the Mandatory Convertible Preferred Stock so surrendered.A Holder shall not be required to pay any transfer or similar taxes or duties relating to the issuance or delivery of Common Stock upon conversion, but such Holder shall be required to pay any tax or duty that may be payable relating to any transfer involved in the issuance or delivery of Common Stock in a name other than the name of such Holder.A certificate representing the shares of Common Stock issuable upon conversion shall be issued and delivered to the converting Holder or, if the Mandatory Convertible Preferred Stock being converted are in book-entry form, the shares of Common Stock issuable upon conversion shall be delivered to the converting Holder through book-entry transfer through the facilities of the Depository, in each case, together with delivery by the Corporation to the converting Holder of any cash to which the converting Holder is entitled, only after all applicable taxes and duties, if any, payable by such converting Holder have been paid in full, and such shares and cash will be delivered on the latest of (i) the second Business Day immediately succeeding the Early Conversion Date, (ii) the second Business Day immediately succeeding the last day of the Early Conversion Settlement Period, and (iii) the Business Day after the Holder has paid in full all applicable taxes and duties, if any.The Person or Persons entitled to receive the shares of Common Stock issuable upon Early Conversion shall be treated for all purposes as the record holder(s) of such shares of Common Stock as of the Close of Business on the applicable Early Conversion Date. Prior to the Close of Business on such applicable Early Conversion Date, the shares of Common Stock issuable upon conversion of any shares of Mandatory Convertible Preferred Stock shall not be deemed to be outstanding for any purpose, and Holders shall have no rights, powers or preferences with respect to such shares of Common Stock, including voting powers, rights to respond to tender offers for the Common Stock and rights to receive any dividends or other distributions on the Common Stock, by virtue of holding shares of Mandatory Convertible Preferred Stock.-31-In the event that an Early Conversion is effected with respect to shares of Mandatory Convertible Preferred Stock representing less than all the shares of the Mandatory Convertible Preferred Stock held by a Holder, upon such Early Conversion the Corporation shall execute and instruct the Transfer Agent and Registrar to countersign and deliver to the Holder thereof, at the expense of the Corporation, a certificate evidencing the shares of Mandatory Convertible Preferred Stock as to which Early Conversion was not effected, or, if the Mandatory Convertible Preferred Stock is held in book-entry form, the Corporation shall cause the Transfer Agent and Registrar to reduce the number of shares of the Mandatory Convertible Preferred Stock represented by the global certificate by making a notation on the global certificate or otherwise noting such reduction in the register maintained by such Transfer Agent and Registrar.(c)To effect a Fundamental Change Conversion pursuant to Section 11, a Holder must:(i)complete and manually sign the conversion notice on the back of the Mandatory Convertible Preferred Stock certificate or a facsimile of such conversion notice³/(ii)deliver the completed conversion notice and the certificated shares of Mandatory Convertible Preferred Stock to be converted to the Conversion and Dividend Disbursing Agent³/(iii)if required, furnish appropriate endorsements and transfer documents³/4 and(iv)if required, pay all transfer or similar taxes or duties, if any.Notwithstanding the foregoing, to effect a Fundamental Change Conversion pursuant to Section 11 of shares of Mandatory Convertible Preferred Stock held in global form, the Holder must, in lieu of the foregoing, comply with the applicable procedures of DTC (or any other Depository for the shares of Mandatory Convertible Preferred Stock held in global form appointed by the Corporation).The Fundamental Change Conversion shall be effective on the date on which a Holder has satisfied the foregoing requirements, to the extent applicable (the "Fundamental Change Conversion Date").Subject to any applicable rules and procedures of the Depository, if more than one share of the Mandatory Convertible Preferred Stock is surrendered for conversion at one time by or for the same Holder, the number of full shares of Common Stock issuable upon conversion thereof shall be computed on the basis of the aggregate number of shares of the Mandatory Convertible Preferred Stock so surrendered.A Holder shall not be required to pay any transfer or similar taxes or duties relating to the issuance or delivery of Common Stock upon conversion, but such Holder shall be required to pay any tax or duty that may be payable relating to any transfer involved in the issuance or delivery of Common Stock in a name other than the name of such Holder.-32-A certificate representing the shares of Common Stock issuable upon conversion shall be issued and delivered to the converting Holder or, if the Mandatory Convertible Preferred Stock being converted are in book-entry form, the shares of Common Stock issuable upon conversion shall be delivered to the converting Holder through book-entry transfer through the facilities of the Depository, in each case, together with delivery by the Corporation to the converting Holder of any cash to which the converting Holder is entitled, only after all applicable taxes and duties, if any, payable by such converting Holder have been paid in full, on the later of (i) the second Business Day immediately succeeding the Fundamental Change Conversion Date and (ii) the Business Day after the Holder has paid in full all applicable taxes and duties, if any.The Person or Persons entitled to receive the shares of Common Stock issuable upon such Fundamental Change Conversion shall be treated for all purposes as the record holder(s) of such shares of Common Stock as of the Close of Business on the applicable Fundamental Change Conversion Date. Prior to the Close of Business on such applicable Fundamental Change Conversion Date, the shares of Common Stock issuable upon conversion of any shares of the Mandatory Convertible Preferred Stock shall not be deemed to be outstanding for any purpose, and Holders shall have no rights, powers or preferences with respect to the Common Stock, including voting powers, rights to respond to tender offers for the Common Stock and rights to receive any dividends or other distributions on the Common Stock, by virtue of holding shares of Mandatory Convertible Preferred Stock.In the event that a Fundamental Change Conversion is effected with respect to shares of Mandatory Convertible Preferred Stock representing less than all the shares of Mandatory Convertible Preferred Stock held by a Holder, upon such Fundamental Change Conversion the Corporation shall execute and instruct the Transfer Agent and Registrar to countersign and deliver to the Holder thereof, at the expense of the Corporation, a certificate evidencing the shares of Mandatory Convertible Preferred Stock as to which Fundamental Change Conversion was not effected, or, if Mandatory Convertible Preferred Stock is held in book-entry form, the Corporation shall cause the Transfer Agent and Registrar to reduce the number of shares of Mandatory Convertible Preferred Stock represented by the global certificate by making a notation on Schedule 1 attached to the global certificate or otherwise notate such reduction in the register maintained by such Transfer Agent and Registrar.(d)In the event that a Holder shall not by written notice designate the name in which shares of Common Stock to be issued upon conversion of such Mandatory Convertible Preferred Stock should be registered or, if applicable, the address to which the certificate or certificates representing such shares of Common Stock should be sent, the Corporation shall be entitled to register such shares, and make such payment, in the name of the Holder as shown on the records of the Corporation and, if applicable, to send the certificate or certificates representing such shares of Common Stock to the address of such Holder shown on the records of the Corporation.(e)Shares of Mandatory Convertible Preferred Stock shall cease to be outstanding on the applicable Conversion Date, subject to the right of Holders of such shares to receive shares of Common Stock issuable upon conversion of such shares of Mandatory Convertible Preferred Stock and other amounts and shares of Common Stock, if any, to which they are entitled pursuant to Sections 9, 10 or 11, as applicable and, if the applicable Conversion Date occurs after the Regular Record Date for a declared dividend and prior to the immediately succeeding Dividend Payment Date, subject to the right of the Record Holders of such shares of the -33-Mandatory Convertible Preferred Stock on such Regular Record Date to receive payment of the full amount of such declared dividend on such Dividend Payment Date pursuant to Section 4.Section 13.Reservation of Common Stock.(a)The Corporation shall at all times reserve and keep available out of its authorized and unissued Common Stock, solely for issuance upon the conversion of shares of Mandatory Convertible Preferred Stock as herein provided, free from any preemptive or other similar rights, a number of shares of Common Stock equal to the maximum number of shares of Common Stock deliverable upon conversion of all shares of Mandatory Convertible Preferred Stock (which shall initially equal a number of shares of Common Stock equal to the sum of (x) the product of (i) 30,000,000 shares of Mandatory Convertible Preferred Stock, and (ii) the initial Maximum Conversion Rate and (y) the product of (i) 30,000,000 shares of Mandatory Convertible Preferred Stock, and (ii) the maximum number of shares of Common Stock that would be added to the Mandatory Conversion Rate assuming (A) the Corporation paid no dividends on the shares of Mandatory Convertible Preferred Stock prior to the Mandatory Conversion Date and (B) the Floor Price is greater than 97% of the relevant Average Price). For purposes of this Section 13(a), the number of shares of Common Stock that shall be deliverable upon the conversion of all outstanding shares of Mandatory Convertible Preferred Stock shall be computed as if at the time of computation all such outstanding shares were held by a single Holder.(b)Notwithstanding the foregoing, the Corporation shall be entitled to deliver upon conversion of shares of Mandatory Convertible Preferred Stock or as payment of any dividend on such shares of Mandatory Convertible Preferred Stock, as herein provided, shares of Common Stock reacquired and held in the treasury of the Corporation (in lieu of the issuance of authorized and unissued shares of Common Stock), so long as any such treasury shares are free and clear of all liens, charges, security interests or encumbrances (other than liens, charges, security interests and other encumbrances created by the Holders).(c)All shares of Common Stock delivered upon conversion of, or as payment of a dividend on, the Mandatory Convertible Preferred Stock shall be duly authorized, validly issued, fully paid and non-assessable, free and clear of all liens, claims, security interests and other encumbrances (other than liens, charges, security interests and other encumbrances created by the Holders) and free of preemptive rights.(d)Prior to the delivery of any securities that the Corporation shall be obligated to deliver upon conversion of Mandatory Convertible Preferred Stock, the Corporation shall use commercially reasonable efforts to comply with all federal and state laws and regulations thereunder requiring the registration of such securities with, or any approval of or consent to the delivery thereof by, any governmental authority.(e)The Corporation hereby covenants and agrees that, if at any time the Common Stock shall be listed on NYSE or any other national securities exchange or automated quotation system, the Corporation shall, if permitted by the rules of such exchange or automated quotation system, list and use its commercially reasonable efforts to keep listed, so long as the Common Stock shall be so listed on such exchange or automated quotation system, all Common Stock issuable upon conversion (including, for the avoidance of doubt, with respect to the Mandatory Conversion Additional Conversion Amount or Early Conversion Additional Conversion Amount) of, or issuable in respect of the payment of dividends, the Accumulated Dividend Amount and the Fundamental Change Dividend Make-Whole Amount on, the Mandatory Convertible Preferred Stock³/4 provided, however, that if the rules of such exchange or automated quotation system permit the Corporation to defer the listing of such Common Stock until the earlier of (x) the first conversion of Mandatory Convertible Preferred Stock into Common Stock -34-in accordance with the provisions hereof and (y) the first payment of any dividends, any Accumulated Dividend Amount or any Fundamental Change Dividend Make-Whole Amount on the Mandatory Convertible Preferred Stock, the Corporation covenants to list such Common Stock issuable upon the earlier of (1) the first conversion of the Mandatory Convertible Preferred Stock and (2) the first payment of any dividends, any Accumulated Dividend Amount or any Fundamental Change Dividend Make-Whole Amount on the Mandatory Convertible Preferred Stock in accordance with the requirements of such exchange or automated quotation system at such time.Section 14.Fractional Shares.(a)No fractional shares of Common Stock shall be issued to Holders as a result of any conversion of shares of Mandatory Convertible Preferred Stock.(b)In lieu of any fractional shares of Common Stock otherwise issuable in respect of the aggregate number of shares of the Mandatory Convertible Preferred Stock of any Holder that are converted on the Mandatory Conversion Date pursuant to Section 9 or at the option of the Holder pursuant to Section 10 or Section 11, the Corporation shall pay an amount in cash (computed to the nearest cent) equal to the product of (i) that same fraction and (ii) the Average VWAP of the Common Stock over the five consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the Mandatory Conversion Date, Early Conversion Date or Fundamental Change Conversion Date, as applicable. In the event the Corporation cannot pay cash in lieu of a fractional share, the Corporation shall instead round up to the nearest whole share for each Holder, and the Corporation shall not have any obligation to pay such amount in cash and such amount shall not form a part of the cumulative dividends that may be deemed to accumulate on the shares of Mandatory Convertible Preferred Stock.Section 15.Anti-Dilution Adjustments to the Fixed Conversion Rates. (a) Each Fixed Conversion Rate shall be adjusted as set forth in this Section 15, except that the Corporation shall not make any adjustments to the Fixed Conversion Rates if Holders participate (other than in the case of a share split or share combination), at the same time and upon the same terms as holders of Common Stock and solely as a result of holding the Mandatory Convertible Preferred Stock, in any of the transactions set forth in Sections 15(a)(i)-(v) without having to convert their Mandatory Convertible Preferred Stock as if they held a number of shares of Common Stock equal to (i) the Maximum Conversion Rate as of the Record Date for such transaction, multiplied by (ii) the number of shares of Mandatory Convertible Preferred Stock held by such Holder.(i)If the Corporation exclusively issues shares of Common Stock as a dividend or distribution on shares of Common Stock, or if the Corporation effects a share split or share combination, each Fixed Conversion Rate shall be adjusted based on the following formula:
$$\frac{\text{Adjusted Rate}}{\text{CR1} \times \text{OS1} + \text{X} \times \text{OS0} + \text{Y} \times \text{OS1}} = \frac{\text{Current Rate}}{\text{CR1} \times \text{OS1} + \text{X} \times \text{OS0} + \text{Y} \times \text{OS1}}$$
where, CR0 = A A A such Fixed Conversion Rate in effect immediately prior to the Close of Business on the Record Date of such dividend or distribution, or immediately prior to the -35-Open of Business on the Effective Date of such share split or share combination, as applicable³/4 CR1 = A A A such Fixed Conversion Rate in effect immediately after the Close of Business on such Record Date or immediately after the Open of Business on such Effective Date, as applicable³/4 OS0 = A A A the number of shares of Common Stock outstanding immediately prior to the Close of Business on such Record Date or immediately prior to the Open of Business on such Effective Date, as applicable, before giving effect to such dividend, distribution, share split or share combination³/4 and OS1 = A A A the number of shares of Common Stock outstanding immediately after giving effect to such dividend, distribution, share split or share combination.Any adjustment made under this Section 15(a)(i) shall become effective immediately after the Close of Business on the Record Date for such dividend or distribution, or immediately after the Open of Business on the Effective Date for such share split or share combination, as applicable. If any dividend or distribution of the type set forth in this Section 15(a)(i) is declared but not so paid or made, each Fixed Conversion Rate shall be immediately readjusted, effective as of the date the Board of Directors, or an authorized committee thereof, determines not to pay such dividend or distribution, to such Fixed Conversion Rate that would then be in effect if such dividend or distribution had not been declared. For the purposes of this Section 15(a)(i), the number of shares of Common Stock outstanding immediately prior to the Close of Business on the Record Date or immediately prior to the Open of Business on the relevant Effective Date, as the case may be, and the number of shares of Common Stock outstanding immediately after giving effect to such dividend, distribution, share split or share combination shall, in each case, not include shares that the Corporation holds in treasury. The Corporation shall not pay any dividend or make any distribution on shares of Common Stock that it holds in treasury.(i)If the Corporation issues to all or substantially all holders of Common Stock any rights, options or warrants entitling them, for a period of not more than 45 calendar days after the announcement date of such issuance, to subscribe for or purchase shares of Common Stock at a price per share that is less than the Average VWAP per share of Common Stock for the 10 consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the date of announcement of such issuance, each Fixed Conversion Rate shall be increased based on the following formula:
$$\$$

options or warrants been made on the basis of delivery of only the number of shares of Common Stock actually delivered, if any. If such rights, options or warrants are not so issued, each Fixed Conversion Rate shall be immediately readjusted, effective as of the date the Board of Directors, or an authorized committee, thereof determines not to issue such rights, options or warrants, to such Fixed Conversion Rate that would then be in effect if such Record Date for such issuance had not occurred. For the purpose of this Section 15(a)(ii), in determining whether any rights, options or warrants entitle the holders of Common Stock to subscribe for or purchase shares of Common Stock at less than such Average VWAP per share for the 10 consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the date of announcement of such issuance, and in determining the aggregate offering price of such shares of Common Stock, there shall be taken into account any consideration received by the Corporation for such rights, options or warrants and any amount payable on exercise or conversion thereof, the value of such consideration, if other than cash, to be determined by the Board of Directors, or an authorized committee thereof.(iii)(A) If the Corporation distributes shares of its capital stock, evidences of the Corporation's indebtedness, other assets or property of the Corporation or rights, options or warrants to acquire its capital stock or other securities, to all or substantially all holders of Common Stock, excluding: (1) dividends, distributions or issuances as to which the provisions set forth in Section 15(a)(i) or Section 15(a)(ii) shall apply 1/37-42) dividends or distributions paid exclusively in cash as to which the provisions set forth in Section 15(a)(iv) shall apply 1/3(3) any dividends and distributions upon conversion of, or in exchange for, shares of Common Stock in connection with a recapitalization, reclassification, change, consolidation, merger or other combination, share exchange, or sale, lease or other transfer or disposition resulting in the change in the conversion consideration as set forth under Section 161(4)(e) except as otherwise set forth in Section 15(a)(vii), rights issued pursuant to a shareholder rights plan adopted by the Corporation 1/4 and (5) Spin-Offs as to which the provisions set forth below in Section 15(a)(iii)(B) shall apply 1/3 then each Fixed Conversion Rate shall be increased based on the following formula: $\frac{\text{CR0} + \text{A} \times \text{FMV}}{\text{CR0} + \text{A}}$, where, CR0 = A such Fixed Conversion Rate in effect immediately prior to the Close of Business on the Record Date for such distribution 1/4 CR1 = A such Fixed Conversion Rate in effect immediately after the Close of Business on such Record Date 1/4 SP0 = A the Average VWAP per share of Common Stock over the 10 consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the Ex-Date for such distribution 1/4 and FMV = A the fair market value (as determined by the Board of Directors, or an authorized committee thereof, in good faith) of the shares of capital stock, evidences of indebtedness, assets, property, rights, options or warrants so distributed, expressed as an amount per share of Common Stock on the Ex-Date for such distribution. Any increase made under this Section 15(a)(iii)(A) will become effective immediately after the Close of Business on the Record Date for such distribution. If such distribution is not so paid or made, each Fixed Conversion Rate shall be immediately readjusted, effective as of the date the Board of Directors, or an authorized committee thereof, determines not to pay such dividend or distribution, to be such Fixed Conversion Rate that would then be in effect if such distribution had not been declared. Notwithstanding the foregoing, if $\frac{\text{CR0} + \text{A} \times \text{FMV}}{\text{CR0} + \text{A}}$ (as defined above) is equal to or greater than $\frac{\text{CR0} + \text{A} \times \text{FMV}}{\text{CR0} + \text{A}}$ (as defined above), or if the difference is less than \$1.00, in lieu of the foregoing increase, -38- each Holder shall receive, in respect of each share of Mandatory Convertible Preferred Stock, at the same time and upon the same terms as holders of Common Stock, the amount and kind of the Corporation's capital stock, evidences of the Corporation's indebtedness, other assets or property of the Corporation or rights, options or warrants to acquire its capital stock or other securities that such Holder would have received if such Holder owned a number of shares of Common Stock equal to the Maximum Conversion Rate in effect on the Record Date for the distribution. (B) A such Fixed Conversion Rate in effect immediately prior to the Close of Business on such Record Date shall be increased based on the following formula: $\frac{\text{CR0} + \text{A} \times \text{FMV}}{\text{CR0} + \text{A}}$, where, CR0 = A such Fixed Conversion Rate in effect immediately prior to the Open of Business on the Ex-Date for the Spin-Off 1/4 CR1 = A such Fixed Conversion Rate in effect immediately after the Open of Business on the Ex-Date for the Spin-Off 1/4 FMV0 = A the Average VWAP per share of the capital stock or similar equity interest distributed to holders of Common Stock applicable to one share of Common Stock over the ten consecutive Trading Day period commencing on, and including, the Ex-Date for the Spin-Off (the Valuation Period) 1/4 and MP0 = A the Average VWAP per share of Common Stock over the Valuation Period. The increase to each Fixed Conversion Rate under the preceding paragraph will be calculated as of the Close of Business on the last Trading Day of the Valuation Period but will be given retroactive effect as of immediately after the Open of Business on the Ex-Date of the Spin-Off. Because the Corporation shall make the adjustment to each Fixed Conversion Rate with retroactive effect, it shall delay the settlement of any conversion of the Mandatory Convertible Preferred Stock where any date for determining the number of shares of Common Stock issuable to a Holder occurs during the Valuation Period until the second Business Day after the last Trading Day of such Valuation Period. If such dividend or distribution is not so paid, each Fixed Conversion Rate shall be decreased, effective as of the date the Board of Directors, or an authorized committee, thereof determines not to make or pay such dividend or distribution, to be such Fixed Conversion Rate that would then be in effect if such dividend or distribution had not been declared. For purposes of this Section 15(a)(iii) (and subject in all respects to Section 15(a)(i) and Section 15(a)(ii)): (A) rights, options or warrants distributed by the Corporation to all or substantially all holders of the Common Stock entitling them to subscribe for or -39- purchase shares of the Corporation's capital stock, including Common Stock (either initially or under certain conditions), which rights, options or warrants, until the occurrence of a specified event or events (the Trigger Event): (1) are deemed to be transferred with such shares of the Common Stock 1/2 are not exercisable 1/3 and (3) are also issued in respect of future issuances of the Common Stock, shall be deemed not to have been distributed for purposes of this Section 15(a)(iii) (and no adjustment to the Fixed Conversion Rates under this Section 15(a)(iii) shall be required) until the occurrence of the earliest Trigger Event, whereupon such rights, options or warrants shall be deemed to have been distributed and an appropriate adjustment (if any is required) to the Fixed Conversion Rates shall be made under this Section 15(a)(iii). (B) If any such right, option or warrant, including any such existing rights, options or warrants distributed prior to the Initial Issue Date, are subject to events, upon the occurrence of which such rights, options or warrants become exercisable to purchase different securities, evidences of indebtedness or other assets, then the date of the occurrence of any and each such event shall be deemed to be the date of distribution and Record Date with respect to new rights, options or warrants with such rights (in which case the existing rights, options or warrants shall be deemed to terminate and expire on such date without exercise by any of the holders thereof). (C) In addition, in the event of any distribution (or deemed distribution) of rights, options or warrants, or any Trigger Event or other event (of the type described in the immediately preceding clause (B)) with respect thereto that was counted for purposes of calculating a distribution amount for which an adjustment to the Fixed Conversion Rates under this clause (iii) was made: (1) in the case of any such rights, options or warrants that shall all have been redeemed or repurchased without exercise by any holders thereof, upon such final redemption or repurchase (x) the Fixed Conversion Rates shall be readjusted as if such rights, options or warrants had not been issued and (y) the Fixed Conversion Rates shall then again be readjusted to give effect to such distribution, deemed distribution or Trigger Event, as the case may be, as though it were a cash distribution pursuant to Section 15(a)(iv), equal to the per share redemption or repurchase price received by a holder or holders of Common Stock with respect to such rights, options or warrants (assuming such holder had retained such rights, options or warrants), made to all holders of Common Stock as of the date of such redemption or repurchase 1/4 and (2) in the case of such rights, options or warrants that shall have expired or been terminated without exercise by any holders thereof, the Fixed Conversion Rates shall be readjusted as if such rights, options and warrants had not been issued 1/4 -40- provided that, in each case, such rights, options or warrants are deemed to be transferred with such shares of the Common Stock and are also issued in respect of future issuances of the Common Stock. For purposes of Section 15(a)(i), Section 15(a)(ii) and this Section 15(a)(iii), if any dividend or distribution to which this Section 15(a)(iii) is applicable includes one or both of: (A) a dividend or distribution of shares of Common Stock to which Section 15(a)(i) is applicable (the Clause A Distribution) 1/4 or (B) an issuance of rights, options or warrants to which Section 15(a)(ii) is applicable (the Clause B Distribution) 1/4, then: (1) such dividend or distribution, other than the Clause A Distribution and the Clause B Distribution, shall be deemed to be a dividend or distribution to which this Section 15(a)(iii) is applicable (the Clause C Distribution) 1/4 and any Fixed Conversion Rate adjustment required by this Section 15(a)(iii) with respect to such Clause C Distribution shall then be made 1/4 and (2) the Clause A Distribution and Clause B Distribution shall be deemed to immediately follow the Clause C Distribution and any Fixed Conversion Rate adjustment required by Section 15(a)(i) and Section 15(a)(ii) with respect thereto shall then be made, except that, if determined by the Corporation (I) the Record Date of the Clause A Distribution and the Clause B Distribution shall be deemed to be the Record Date of the Clause C Distribution and (II) any shares of Common Stock included in the Clause A Distribution or Clause B Distribution shall be deemed not to be outstanding immediately prior to the Close of Business on such Record Date or immediately prior to the Open of Business on such Effective Date within the meaning of Section 15(a)(i) or outstanding immediately prior to Close of Business on such Record Date within the meaning of Section 15(a)(ii). (iv) If any cash dividend or distribution is made to all or substantially all holders of Common Stock other than a regular, quarterly cash dividend that does not exceed \$0.13 per share (the Initial Dividend Threshold) 1/4, each Fixed Conversion Rate shall be adjusted based on the following formula: $\frac{\text{CR0} + \text{A} \times \text{FMV}}{\text{CR0} + \text{A}}$, where, CR0 = A such Fixed Conversion Rate in effect immediately prior to the Close of Business on the Record Date for such dividend or distribution 1/4 CR1 = A such Fixed Conversion Rate in effect immediately after the Close of Business on the Record Date for such dividend or distribution 1/4 -41- SP0 = A the Average VWAP per share of Common Stock over the 10 consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the Ex-Date for such distribution 1/4 T = A the Initial Dividend Threshold 1/4 provided that if the dividend or distribution is not a regular quarterly cash dividend, the Initial Dividend Threshold shall be deemed to be zero 1/4 and C = A the amount in cash per share the Corporation distributes to all or substantially all holders of Common Stock. The Initial Dividend Threshold is subject to adjustment in a manner inversely proportional to adjustments to each Fixed Conversion Rate 1/4 provided that no adjustment will be made to the Initial Dividend Threshold for any adjustment to each Fixed Conversion Rate under this Section 15(a)(iv). Any increase made under this Section 15(a)(iv) shall become effective immediately after the Close of Business on the Record Date for such dividend or distribution. If such dividend or distribution is not so paid, each Fixed Conversion Rate shall be decreased, effective as of the date the Board of Directors, or an authorized committee thereof, determines not to make or pay such dividend or distribution, to be such Fixed Conversion Rate that would then be in effect if such dividend or distribution had not been declared. Notwithstanding the foregoing, if $\frac{\text{CR0} + \text{A} \times \text{FMV}}{\text{CR0} + \text{A}}$ (as defined above) is equal to or greater than $\frac{\text{CR0} + \text{A} \times \text{FMV}}{\text{CR0} + \text{A}}$ (as defined above), or if the difference is less than \$1.00, in lieu of the foregoing increase, each Holder shall receive, for each share of Mandatory Convertible Preferred Stock, at the same time and upon the same terms as holders of shares of Common Stock, the amount of cash that such Holder would have received if such Holder owned a number of shares of Common Stock equal to the Maximum Conversion Rate on the Record Date for such cash dividend or distribution. (v) If the Corporation or any of its Subsidiaries make a payment in respect of a tender or exchange offer for Common Stock (and excluding a tender offer solely to holders of fewer than 100 shares of Common Stock), to the extent that the cash and value of any other consideration included in the payment per share of Common Stock exceeds the Average VWAP per share of Common Stock over the 10 consecutive Trading Day period (the Averaging Period) 1/4 commencing on, and including, the Trading Day next succeeding the last date on which tenders or exchanges may be made pursuant to such tender or exchange offer (the Expiration Date) 1/4, each Fixed Conversion Rate shall be increased based on the following formula: $\frac{\text{CR0} + \text{A} \times \text{FMV}}{\text{CR0} + \text{A}}$, where, CR0 = A such Fixed Conversion Rate in effect immediately prior to the Close of Business on the Expiration Date 1/4 CR1 = A such Fixed Conversion Rate in effect immediately after the Close of Business on the Expiration Date 1/4 AC = A the aggregate value of all cash and any other consideration (as determined by the Board of Directors, or an authorized committee thereof, in good faith) paid or payable for shares purchased in such tender or exchange offer 1/4 OS1 = A the number of shares of Common Stock outstanding immediately prior to the Expiration Date (prior to giving effect to the purchase of all shares accepted for purchase or exchange in such tender or exchange offer) 1/4 OS2 = A the number of shares of Common Stock outstanding immediately after the Expiration Date (after giving effect to the purchase of all shares accepted for purchase or exchange in such tender or exchange offer) 1/4 and SP1 = A the Average VWAP of Common Stock over the Averaging Period. The increase to each Fixed Conversion Rate under the preceding paragraph will be calculated at the Close of Business on the last Trading Day of the Averaging Period but will be given retroactive effect as of immediately after the Close of Business on the Expiration Date. Because the Corporation will make the adjustment to each Fixed Conversion Rate with retroactive effect, it will delay the settlement of any conversion of the Mandatory Convertible Preferred Stock where any date for determining the number of shares of Common Stock issuable to a Holder occurs during the Averaging Period until the second Business Day after the last Trading Day of the Averaging Period. For the avoidance of doubt, no adjustment under this Section 15(a)(v) will be made if such adjustment would result in a decrease in any Fixed Conversion Rate, except as set forth in the immediately succeeding sentence. In the event that the Corporation or one of its Subsidiaries is obligated to purchase shares of Common Stock pursuant to any such tender offer or exchange offer, but the Corporation or such Subsidiary is permanently prevented by applicable law from effecting any such purchases, or all such purchases are rescinded, then each Fixed Conversion Rate shall again be adjusted to be such Fixed Conversion Rate that would then be in effect if such tender offer or exchange offer had not been made (or had been made only in respect of the purchases that have been made and not rescinded). For the avoidance of doubt, for purposes of this clause (v), the term "tender offer" is used as such term is used in the Exchange Act and the term "exchange offer" means an exchange offer that constitutes a tender offer. (vi) If: (A) the record date for a dividend or distribution on shares of the Common Stock occurs after the end of the 20 consecutive Trading Day period -43- used for calculating the Applicable Market Value and before the Mandatory Conversion Date 1/4 and (B) such dividend or distribution would have resulted in an adjustment of the number of shares of Common Stock issuable to the Holders had such record date occurred on or before the last Trading Day of such 20-Trading Day period, then the Corporation shall deem the Holders to be holders of record, for each share of their Mandatory Convertible Preferred Stock, of a number of shares of Common Stock equal to the Mandatory Conversion Rate for purposes of that dividend or distribution, and in such a case, the Holders would receive the dividend or distribution on Common Stock together with the number of shares of Common Stock issuable upon mandatory conversion of Mandatory Convertible Preferred Stock. (vii) If the Corporation has a rights plan in effect upon conversion of the Mandatory Convertible Preferred Stock into Common Stock, the Holders shall receive, in addition to any shares of Common Stock received in connection with such conversion, the rights under the rights plan. However, if, prior to any conversion, the rights have separated from the shares of Common Stock in accordance with the provisions of the applicable rights plan, each Fixed Conversion Rate will be adjusted at the time of separation as if the Corporation distributed to all or substantially all holders of Common Stock, shares of its capital stock, evidences of indebtedness, assets, property, rights, options or warrants as set forth in Section 15(a)(iii)(A), subject to readjustment in the event of the expiration, termination or redemption of such rights. (viii) The Corporation may (but is not required to), to the extent permitted by law and the rules of NYSE or any other securities exchange on which the shares of Common Stock or the Mandatory Convertible Preferred Stock is then listed, increase each Fixed Conversion Rate by any amount for a period of at least 20 Business Days if such increase is irrevocable during such 20 Business Days and the Board of Directors, or an authorized committee thereof, determines that such increase would be in the best interest of the Corporation. The Corporation may also (but is not required to) make such increases in each Fixed Conversion Rate as it deems advisable in order to avoid or diminish any income tax to holders of Common Stock resulting from any dividend or distribution of shares of Common Stock (or issuance of rights or warrants to acquire shares of Common Stock) or from any event treated as such for income tax purposes or for any other reason. However, in either case, the Corporation may only make such discretionary adjustments if it makes the same proportionate adjustment to each Fixed Conversion Rate. (ix) The Corporation shall not adjust the Fixed Conversion Rates: (A) upon the issuance of shares of Common Stock pursuant to any present or future plan providing for the reinvestment of dividends or interest payable on securities of the Corporation and the investment of additional optional amounts in Common Stock under any plan 1/4 (B) upon the issuance of any shares of Common Stock, warrants, options, units or other rights to or securities exercisable for the purchase or issuance of such shares of Common Stock (including the net share settlement of any such securities) pursuant to any present or future retirement, deferred -44- compensation, incentive, equity or other benefit plan or program of or assumed by the Corporation or any of its Subsidiaries 1/4 (C) upon the issuance of any shares of Common Stock pursuant to any option, warrant, right or exercisable, exchangeable or convertible security not described in clause (B) of this Section 15(a)(ix) and outstanding as of the Initial Issue Date 1/4 (D) for a change in par value of the Common Stock 1/4 (E) for stock repurchases that are not tender or exchange offers referred to in Section 15(a)(v), including structured or derivative transactions or pursuant to a stock repurchase program approved by the Board of Directors 1/4 (F) as a result of a tender offer that satisfies the exception described in Section 15(a)(v) above for offers solely to holders of fewer than 100 shares of Common Stock 1/4 (G) as a result of a tender or exchange offer by a Person other than the Corporation or one or more of its Subsidiaries 1/4 (H) for accumulated dividends on the

Mandatory Convertible Preferred Stock, except as described in Sections 9, 10 and 11¼ or (I) for any other issuance of shares of Common Stock or any securities convertible into or exchangeable for shares of Common Stock or the right to purchase shares of Common Stock or such convertible or exchangeable securities, except as otherwise stated herein.(x)Adjustments to each Fixed Conversion Rate will be calculated to the nearest 1/10,000th of a share of Common Stock. No adjustment to any Fixed Conversion Rate will be required unless the adjustment would require an increase or decrease of at least 1% of the Fixed Conversion Rate¼ provided, however, that if an adjustment is not made because the adjustment does not change the Fixed Conversion Rates by at least 1%, then such adjustment will be carried forward and taken into account in any future adjustment. Notwithstanding the foregoing, on each date for determining the number of shares of Common Stock issuable to a Holder upon any conversion of the Mandatory Convertible Preferred Stock, the Corporation shall give effect to all adjustments that otherwise had been deferred pursuant to this clause (x), and those adjustments will no longer be carried forward and taken into account in any future adjustment. Except as otherwise provided above, the Corporation will be responsible for making all calculations called for under the Mandatory Convertible Preferred Stock. These calculations include, but are not limited to, determinations of the Fundamental Change Stock Price, the VWAPs, the Average VWAPs and the Fixed Conversion Rates of the Mandatory Convertible Preferred Stock and shall be made in good faith.(xi)For the avoidance of doubt, if an adjustment is made to the Fixed Conversion Rates, no separate inversely proportionate adjustment will be made to the Initial Price or the Threshold Appreciation Price because the Initial Price is equal to \$50.00 divided by the Maximum Conversion Rate (as adjusted in the manner described herein) and the Threshold Appreciation Price is equal to \$50.00 divided by the Minimum Conversion Rate (as adjusted in the manner described herein).-45-(xii)Whenever any provision of this Certificate of Designations requires the Corporation to calculate the VWAP per share of Common Stock over a span of multiple days, the Board of Directors, or an authorized committee thereof, shall make appropriate adjustments in good faith (including, without limitation, to the Applicable Market Value, the Early Conversion Average Price, the Fundamental Change Stock Price and the Average Price, as the case may be) to account for any adjustments to the Fixed Conversion Rates (as the case may be) that become effective, or any event that would require such an adjustment if the Ex-Date, Effective Date, Record Date or Expiration Date, as the case may be, of such event occurs during the relevant period used to calculate such prices or values, as the case may be.(b) Whenever the Fixed Conversion Rates are to be adjusted, the Corporation shall:(i)compute such adjusted Fixed Conversion Rates¼(ii)within 10 Business Days after the Fixed Conversion Rates are to be adjusted, provide or cause to be provided, a written notice to the Holders of the occurrence of such event¼ and(iii)within 10 Business Days after the Fixed Conversion Rates are to be adjusted, provide or cause to be provided, to the Holders, a statement setting forth in reasonable detail the method by which the adjustments to the Fixed Conversion Rates were determined and setting forth such adjusted Fixed Conversion Rates.Section 16.Recapitalizations, Reclassifications and Changes of Common Stock. In the event of:(a)any consolidation or merger of the Corporation with or into another Person or any conversion of the Corporation or domestication in or transfer to a foreign jurisdiction¼(b)any sale, transfer, lease or conveyance to another Person of all or substantially all of the property and assets of the Corporation¼(c)any reclassification of Common Stock into securities, including securities other than Common Stock¼ or(d)any statutory exchange of securities of the Corporation with another Person (other than in connection with a merger or acquisition or a conversion of the Corporation or domestication in or transfer to a foreign jurisdiction), in each case, as a result of which the Common Stock will be converted into, or exchanged for, stock, other securities or other property or assets (including cash or any combination thereof) (each, a "Reorganization Event"), each share of the Mandatory Convertible Preferred Stock outstanding immediately prior to such Reorganization Event shall, without the consent of the Holders, become convertible into the kind of stock, other securities or other property or assets (including cash or any combination thereof) that such Holder would have been entitled to receive if such Holder had converted its Mandatory Convertible Preferred Stock into Common Stock immediately prior to such Reorganization Event (such stock, other securities or other property or assets (including cash or any combination thereof), the "Exchange Property," with each "Unit of Exchange Property" meaning the kind and amount of such Exchange Property that a holder of one share of Common Stock is entitled to receive).-46-If any Reorganization Event causes the Common Stock to be converted into, or exchanged for, the right to receive more than a single type of consideration (determined based in part upon any form of stockholder election), the Exchange Property into which the Mandatory Convertible Preferred Stock shall be convertible shall be deemed to be the weighted average of the types and amounts of consideration actually received by the holders of the Common Stock in such Reorganization Event.The Corporation shall notify Holders of the weighted average as soon as practicable after such determination is made.The number of Units of Exchange Property the Corporation shall deliver for each share of Mandatory Convertible Preferred Stock converted, or as a payment of dividends on the Mandatory Convertible Preferred Stock, as applicable, following the effective date of such Reorganization Event shall be determined as if references in Section 7, Section 9, Section 10 and Section 11 to shares of Common Stock were to Units of Exchange Property (without interest thereon and without any right to dividends or distributions thereon which have a Record Date that is prior to the date on which Holders of Mandatory Convertible Preferred Stock become holders of record of the underlying shares of Common Stock). For the purpose of determining which of clauses (i), (ii) and (iii) of Section 9(b) shall apply upon Mandatory Conversion, and for the purpose of calculating the Mandatory Conversion Rate if clause (ii) of Section 9(b) is applicable, the value of a Unit of Exchange Property shall be determined in good faith by the Board of Directors, or an authorized committee thereof (which determination will be final), except that if a Unit of Exchange Property includes common stock or American Depositary Receipts ("ADRs") that are traded on a U.S. national securities exchange, the value of such common stock or ADRs shall be the average over the 20 consecutive Trading Day period used for calculating the Applicable Market Value of the volume-weighted Average Prices for such common stock or ADRs, as displayed on the applicable Bloomberg screen (as determined in good faith by the Board of Directors, or an authorized committee thereof (which determination will be final))¼ or, if such price is not available, the average market value per share of such common stock or ADRs over such period as determined, using a volume-weighted average method, by a nationally recognized independent investment banking firm retained by the Corporation for this purpose.The above provisions of this Section 16 shall similarly apply to successive Reorganization Events, and the provisions of Section 15 shall apply to any shares of capital stock or ADRs of the Corporation (or any successor thereto) received by the holders of Common Stock in any such Reorganization Event.The Corporation (or any successor thereto) shall, as soon as reasonably practicable (but in any event within 20 calendar days) after the occurrence of any Reorganization Event, provide written notice to the Holders of such occurrence and of the kind and amount of cash, securities or other property that constitute the Exchange Property. Failure to deliver such notice shall not affect the operation of this Section 16.-47-In connection with any Reorganization Event, the Initial Dividend Threshold shall be subject to adjustment as described in clause (i), clause (ii) or clause (iii) below, as the case may be:(i)In the case of a Reorganization Event in which the Exchange Property (determined, as appropriate, as set forth above in this Section 16 and excluding any dissenters' " appraisal rights) is composed entirely of shares of Common Stock (the "Reorganization Common Stock"), the Initial Dividend Threshold at and after the effective time of such Reorganization Event will be equal to (x) the Initial Dividend Threshold immediately prior to the effective time of such Reorganization Event, divided by (y) the number of shares of Reorganization Common Stock that a holder of one share of Common Stock would receive in such Reorganization Event (such quotient rounded down to the nearest cent).(ii)In the case of a Reorganization Event in which the Exchange Property (determined, as appropriate, as set forth above in this Section 16 and excluding any dissenters' " appraisal rights) is composed in part of shares of Reorganization Common Stock, the Initial Dividend Threshold at and after the effective time of such Reorganization Event will be equal to (x) the Initial Dividend Threshold immediately prior to the effective time of such Reorganization Event, multiplied by (y) the Reorganization Valuation Percentage for such Reorganization Event (such product rounded down to the nearest cent).(iii)For the avoidance of doubt, in the case of a Reorganization Event in which the Exchange Property (determined, as appropriate, as set forth above in this Section 16 and excluding any dissenters' " appraisal rights) is composed entirely of consideration other than shares of common stock, the Initial Dividend Threshold at and after the effective time of such Reorganization Event will be equal to zero.Section 17.Transfer Agent, Registrar, and Conversion and Dividend Disbursing Agent. The duly appointed Transfer Agent, Registrar and Conversion and Dividend Disbursing Agent for Mandatory Convertible Preferred Stock shall be Equiniti Trust Company, LLC. The Corporation may, in its sole discretion, remove the Transfer Agent, Registrar or Conversion and Dividend Disbursing Agent in accordance with the agreement between the Corporation and the Transfer Agent, Registrar or Conversion and Dividend Disbursing Agent, as the case may be¼ provided that if the Corporation removes Equiniti Trust Company, LLC, the Corporation shall appoint a successor transfer agent, registrar or conversion and dividend disbursing agent, as the case may be, who shall accept such appointment prior to the effectiveness of such removal. Upon any such removal or appointment, the Corporation shall give notice thereof to the Holders.Section 18.Record Holders. To the fullest extent permitted by applicable law, the Corporation and the Transfer Agent may deem and treat the Holder of any shares of Mandatory Convertible Preferred Stock as the true and lawful owner thereof for all purposes.Section 19.Notices. All notices or communications in respect of Mandatory Convertible Preferred Stock shall be sufficiently given if given in writing and delivered by first class mail, postage prepaid, or if given in such other manner as may be permitted in this Certificate of Designations, in the Charter or the Bylaws and by applicable law. Notwithstanding the foregoing, if the shares of Mandatory Convertible Preferred Stock are represented by a Global Preferred Certificate, such notices may also be given to the Holders in any manner -48-permitted by DTC or any similar facility used for the settlement of transactions in Mandatory Convertible Preferred Stock.Section 20.No Preemptive Rights. The Holders shall have no preemptive or preferential rights to purchase or subscribe for any stock, obligations, warrants or other securities of the Corporation of any class.Section 21.Other Rights. The shares of Mandatory Convertible Preferred Stock shall not have any rights, preferences, privileges or voting powers or relative, participating, optional or other special rights, or qualifications, limitations or restrictions thereof, other than as set forth herein or in the Charter or as provided by applicable law.Section 22.Book-Entry Form.(a)The Mandatory Convertible Preferred Stock shall be issued in the form of one or more permanent global shares of Mandatory Convertible Preferred Stock in definitive, fully registered form eligible for book-entry settlement with the global legend as set forth on the form of Mandatory Convertible Preferred Stock certificate attached hereto as Exhibit A (each, a "Global Preferred Certificate" and the shares of Mandatory Convertible Preferred Stock represented by such Global Preferred Certificate, the "Global Preferred Shares"), which is hereby incorporated in and expressly made part of this Certificate of Designations. The Global Preferred Certificates may have notations, legends or endorsements required by law, stock exchange rules or agreements to which the Corporation is subject, if any, or usage (provided that any such notation, legend or endorsement is in a form acceptable to the Corporation). The Global Preferred Certificates shall be deposited on behalf of the Holders represented thereby with the Registrar, at its New York office as custodian for the Depositary, and registered in the name of the Depositary, duly executed by the Corporation and countersigned and registered by the Registrar as hereinafter provided. The aggregate number of shares represented by each Global Preferred Certificate may from time to time be increased or decreased by adjustments made on the records of the Registrar and the Depositary or its nominee as hereinafter provided.This Section 22(a) shall apply only to a Global Preferred Certificate deposited with or on behalf of the Depositary. The Corporation shall execute and the Registrar shall, in accordance with this Section 22(a), countersign and deliver any Global Preferred Certificate that (i) shall be registered in the name of Cede & Co. or other nominee of the Depositary and (ii) shall be delivered by the Registrar to Cede & Co. or pursuant to instructions received from Cede & Co. or held by the Registrar as custodian for the Depositary pursuant to an agreement between the Depositary and the Registrar. Members of, or participants in, the Depositary ("Agent Members") shall have no rights under this Certificate of Designations with respect to any Global Preferred Share held on their behalf by the Depositary or by the Registrar as the custodian of the Depositary, or under such Global Preferred Share, and the Depositary may be treated by the Corporation, the Registrar and any agent of the Corporation or the Registrar as the absolute owner of such Global Preferred Share for all purposes whatsoever. Notwithstanding the foregoing, nothing herein shall prevent the Corporation, the Registrar or any agent of the Corporation or the Registrar from giving effect to any written certification, proxy or other authorization furnished by the Depositary or impair, as between the Depositary and its Agent Members, the operation of customary practices of the Depositary governing the exercise of the rights of a holder of a beneficial interest in any Global Preferred Share. The Holder of the Global Preferred Shares may grant proxies or otherwise authorize any Person to take any action -49-that a Holder is entitled to take pursuant to the Global Preferred Shares, this Certificate of Designations or the Charter.Owners of beneficial interests in Global Preferred Shares shall not be entitled to receive physical delivery of certificated shares of Mandatory Convertible Preferred Stock, unless (x) the Depositary notifies the Corporation that it is unwilling or unable to continue as Depositary for the Global Preferred Shares and the Corporation does not appoint a qualified replacement for the Depositary within 90 days or (y) the Depositary ceases to be a "clearing agency" registered under the Exchange Act and the Corporation does not appoint a qualified replacement for the Depositary within 90 days. In any such case, the Global Preferred Certificates shall be exchanged in whole for definitive stock certificates that are not issued in global form, with the same terms and of an equal aggregate Liquidation Preference, and such definitive stock certificates shall be registered in the name or names of the Person or Persons specified by the Depositary in a written instrument to the Registrar.(b)Signature. Any two authorized Officers shall sign each Global Preferred Certificate for the Corporation, in accordance with the Corporation's Bylaws and applicable Delaware law, by manual or facsimile signature. If an Officer whose signature is on a Global Preferred Certificate no longer holds that office at the time the Registrar countersigned such Global Preferred Certificate, such Global Preferred Certificate shall be valid nevertheless. A Global Preferred Certificate shall not be valid until an authorized signatory of the Registrar manually countersigns such Global Preferred Certificate. Each Global Preferred Certificate shall be dated the date of its countersignature. The foregoing paragraph shall likewise apply to any certificate representing shares of Mandatory Convertible Preferred Stock.Section 23.Listing. The Corporation hereby covenants and agrees that, if its listing application for the Mandatory Convertible Preferred Stock is approved by NYSE, upon such listing, the Corporation shall use its commercially reasonable efforts to keep the Mandatory Convertible Preferred Stock listed on NYSE (or if the Common Stock is not listed on NYSE, on the principal other U.S. national or regional securities exchange on which the Common Stock is then listed).If the Global Preferred Share or Global Preferred Shares, as the case may be, shall be listed on NYSE or any other stock exchange, the Depositary may, with the written approval of the Corporation, appoint a registrar (acceptable to the Corporation) for registration of such Global Preferred Share or Global Preferred Shares, as the case may be, in accordance with the requirements of such exchange. Such registrar (which may be the Registrar if so permitted by the requirements of such exchange) may be removed and a substitute registrar appointed by the Registrar upon the request or with the written approval of the Corporation. If the Global Preferred Share or Global Preferred Shares, as the case may be, are listed on one or more other stock exchanges, the Registrar will, at the request and expense of the Corporation, arrange such facilities for the delivery, transfer, surrender and exchange of such Global Preferred Share or Global Preferred Shares, as the case may be, and the Global Preferred Certificate or Global Preferred Certificates representing such shares as may be required by law or applicable stock exchange regulations.-50-Section 24.Stock Certificates.(a)Shares of Mandatory Convertible Preferred Stock may be represented by stock certificates substantially in the form set forth as Exhibit A hereto.(b)Stock certificates representing shares of the Mandatory Convertible Preferred Stock shall be signed by any two authorized Officers of the Corporation, in accordance with the Bylaws and applicable Delaware law, by manual or facsimile signature.(c)A stock certificate representing shares of the Mandatory Convertible Preferred Stock shall not be valid until manually countersigned by an authorized signatory of the Transfer Agent and Registrar. Each stock certificate representing shares of the Mandatory Convertible Preferred Stock shall be dated the date of its countersignature.(d)If any Officer of the Corporation who has signed a stock certificate no longer holds that office at the time the Transfer Agent and Registrar countersigns the stock certificate, the stock certificate shall be valid nonetheless.Section 25.Replacement Certificates. If any Mandatory Convertible Preferred Stock certificate shall be mutilated, lost, stolen or destroyed, the Corporation shall, at the expense of the Holder, issue, in exchange and in substitution for and upon cancellation of the mutilated Mandatory Convertible Preferred Stock certificate, or in lieu of and substitution for the Mandatory Convertible Preferred Stock certificate lost, stolen or destroyed, a new Mandatory Convertible Preferred Stock certificate of like tenor and representing an equivalent Liquidation Preference of shares of Mandatory Convertible Preferred Stock, but only upon receipt of evidence of such loss, theft or destruction of such Mandatory Convertible Preferred Stock certificate and indemnity, if requested, reasonably satisfactory to the Corporation and the Transfer Agent.Section 26.Withholding. Notwithstanding anything herein to the contrary, the Corporation or any agent of the Corporation shall have the right to deduct and withhold from any payment or distribution (or deemed distribution) made with respect to any share of Mandatory Convertible Preferred Stock (including the delivery of shares of Common Stock and/or cash upon conversion or redemption of Mandatory Convertible Preferred Stock and any deemed distribution to any Holder in respect of an adjustment to any Fixed Conversion Rate) such amounts as are required to be deducted or withheld with respect to the making of such payment or distribution (or deemed distribution) or delivery under applicable tax law without liability therefor. To the extent that any amounts are so deducted or withheld, such deducted or withheld amounts shall be treated for all purposes as having been paid (or delivered) to the applicable Holder. In the event the Corporation or any agent of the Corporation remits any amounts to a governmental authority on account of taxes required to be deducted or withheld in respect of any payment or distribution (or deemed distribution) or delivery with respect to any share of Mandatory Convertible Preferred Stock with

to an applicable Holder hereunder and under any other instrument or agreement.[Signature page follows] -51-IN WITNESS WHEREOF, the Corporation has caused this Certificate of Designations to be signed by David Antczak, its Senior Vice President, General Counsel and Corporate Secretary, the 17th day of December, 2024.HEWLETT PACKARD ENTERPRISE COMPANYBy: A A A /s/ David Antczak A A A Name: David AntczakTitle: Senior Vice President, General Counsel and Corporate SecretaryExhibit A[FORM OF FACE OF 7.625% SERIES C MANDATORY CONVERTIBLE PREFERRED STOCK CERTIFICATE][INCLUDE FOR GLOBAL PREFERRED SHARES] UNLESS THIS CERTIFICATE IS PRESENTED BY AN AUTHORIZED REPRESENTATIVE OF THE DEPOSITORY TRUST COMPANY, A NEW YORK CORPORATION (â€œDTCâ€), TO THE CORPORATION OR THE TRANSFER AGENT NAMED ON THE FACE OF THIS CERTIFICATE, AND ANY CERTIFICATE ISSUED IS REGISTERED IN THE NAME OF CEDE & CO. We encourage you to read our Certificate of Incorporation, Certificate of Designations, Bylaws and the applicable provisions of the Delaware General Corporation Law (the â€œDGCLâ€) for additional information.GeneralUnder our Certificate of Incorporation, our authorized capital stock consists of 9,900,000,000 shares, consisting of 9,600,000,000 shares of common stock, par value \$0.01 per share, and 300,000,000 shares of preferred stock, par value \$0.01 per share, which may be designated from time to time in accordance with our Certificate of Incorporation and of which 30,000,000 shares are designated as 7.625% Series C Mandatory Convertible Preferred Stock (the â€œMandatory Convertible Preferred Stockâ€).Common StockVoting Rights: Each holder of our common stock is entitled to one vote for each share on all matters to be voted upon by the common stockholders. Holders of our common stock do not have cumulative voting rights.Dividend Rights: Subject to any preferential rights of holders of our outstanding preferred stock, including the preferential rights of shares of Mandatory Convertible Preferred Stock, holders of our common stock are entitled to receive ratably the dividends, if any, as may be declared from time to time by our board of directors (the â€œBoardâ€) out of funds legally available for that purpose.Liquidation Rights: Subject to any preferential rights of holders of our outstanding preferred stock, including the preferential rights of shares of Mandatory Convertible Preferred Stock, upon any liquidation, dissolution, or winding up of Hewlett Packard Enterprise, holders of our common stock are entitled to ratable distribution of its assets remaining after the payment in full of liabilities and any preferential rights of any holders of then-outstanding preferred stock.Others Rights, Restrictions and Preferences: Holders of our common stock will have no preemptive, conversion rights or other subscription rights, and there are no redemption or sinking fund provisions applicable to the common stock. The common stock currently outstanding is validly issued, fully paid and nonassessable.Preferred StockOn September 13, 2024, HPE issued 30,000,000 shares of our 7.625% Series C Mandatory Convertible Preferred Stock. A copy of the Certificate of Designations setting forth the terms of the Mandatory Convertible Preferred Stock is incorporated by reference as Exhibit 3.7 to our Annual Report on Form 10-K. This description of the terms of the Mandatory Convertible Preferred Stock is not complete and is qualified in its entirety by reference to the provisions of our Certificate of Incorporation and the Certificate of Designations.The rights, preferences and privileges of the holders of our common stock are subject to, and may be adversely affected by, the rights of the holders of shares of any series of preferred stock that we have issued, including our Mandatory Convertible Preferred Stock, or may designate and issue in the future. Our Board has the authority, without further action by our stockholders, to issue up to 300,000,000 total shares of preferred stock in one or more series. Our Board may designate the rights, preferences, privileges and restrictions of the preferred stock, including dividend rights, conversion rights, voting rights, terms of redemption, liquidation preference, sinking fund terms, and number of shares constituting any series or the designation of any series. The issuance of preferred stock could have the effect of restricting dividends on our common stock, diluting the voting power of our common stock, impairing the liquidation rights of our common stock, or delaying or preventing a change in control.Ranking: The Mandatory Convertible Preferred Stock, with respect to dividend rights and/or distribution rights upon our liquidation, winding-up or dissolution, as applicable, will rank:â€¢senior to (i) our common stock, (ii) our Series B Junior Participating Redeemable Preferred Stock (the â€œSeries B Junior Preferred Stockâ€) and (iii) each other class or series of our capital stock established after the first original issue date of shares of the Mandatory Convertible Preferred Stock (which we refer to as the â€œInitial Issue Dateâ€), the terms of which do not expressly provide that such class or series ranks either (x) senior to the Mandatory Convertible Preferred Stock as to dividend rights and distribution rights upon our liquidation, winding-up or dissolution or (y) on parity with the Mandatory Convertible Preferred Stock as to dividend rights and distribution rights upon our liquidation, winding-up or dissolution (which we refer to collectively as â€œJunior Stockâ€);â€¢on parity with any class or series of our capital stock established after the Initial Issue Date, the terms of which expressly provide that such class or series will rank on parity with the Mandatory Convertible Preferred Stock as to dividend rights and distribution rights upon our liquidation, winding-up or dissolution (which we refer to collectively as â€œParity Stockâ€);â€¢junior to each class or series of our capital stock established after the Initial Issue Date, the terms of which expressly provide that such class or series will rank senior to the Mandatory Convertible Preferred Stock as to dividend rights or distribution rights upon our liquidation, winding-up or dissolution (which we refer to collectively as â€œSenior Stockâ€); andâ€¢junior to our existing and future indebtedness and other liabilities.In addition, with respect to dividend rights and distribution rights upon our liquidation, winding-up or dissolution, the Mandatory Convertible Preferred Stock will be structurally subordinated to any existing and future indebtedness and other liabilities of each of our subsidiaries.Listing: The Mandatory Convertible Preferred Stock is listed on The New York Stock Exchange ("NYSE"), under the symbol "HPEPrC".Dividends: Subject to the rights of holders of any class or series of any Senior Stock, holders of the Mandatory Convertible Preferred Stock will be entitled to receive, when, as and if declared by our Board, or an authorized committee thereof, out of funds legally available for payment, cumulative dividends at the rate per annum of 7.625% on the Liquidation Preference (as defined below) of \$50.00 per share of the Mandatory Convertible Preferred Stock (equivalent to \$3.81 per annum per share), payable in cash, by delivery of shares of our common stock or through any combination of cash and shares of our common stock, as determined by Board, or an authorized committee thereof, in its sole discretion (subject to the limitations described below). If declared, dividends on the Mandatory Convertible Preferred Stock will be payable quarterly on March 1, June 1, September 1 and December 1 of each year to, and including, September 1, 2027, having commenced on December 1, 2024 (each, a â€œDividend Payment Dateâ€), at such annual rate, and dividends shall accumulate from the most recent date as to which dividends shall have been paid or, if no dividends have been paid, from the Initial Issue Date of the Mandatory Convertible Preferred Stock, whether or not in any dividend period or periods there have been funds legally available or shares of common stock legally permitted to be issued for the payment of such dividends. If declared, dividends will be payable on the relevant Dividend Payment Date to holders of record of the Mandatory Convertible Preferred Stock as they appear on our stock register at the Close of Business (as defined below) on February 15, May 15, August 15 or November 15, as applicable, immediately preceding the relevant Dividend Payment Date (each, a â€œRegular Record Dateâ€), whether or not such holders convert their shares, or such shares are automatically converted, after such Regular Record Date and on or prior to such immediately succeeding Dividend Payment Date; provided that the Regular Record Date for any such dividend shall not precede the date on which such dividend was so declared. These Regular Record Dates will apply regardless of whether a particular Regular Record Date is a Business Day. A â€œBusiness Dayâ€ means any day other than a Saturday or Sunday or any other day on which commercial banks in New York City are authorized or required by law or executive order to close. If a Dividend Payment Date is not a Business Day, payment will be made on the next succeeding Business Day, without any interest or other payment in lieu of interest accruing with respect to this delay.A full dividend period is the period from, and including, a Dividend Payment Date to, but excluding, the next Dividend Payment Date, except that the initial dividend period commenced on, and included, the Initial Issue Date of the Mandatory Convertible Preferred Stock and ended on and excluded the December 1, 2024 Dividend Payment Date. The amount of dividends payable on each

on interest coverage (and, in some cases, total leverage), which may be adversely affected by the use of cash to pay dividends. In addition, our ability to declare and pay dividends may be limited by applicable Delaware law.

Method and Payment of Dividends: Subject to the limitations described below, we may pay any declared dividend (or any portion of any declared dividend) on the shares of the Mandatory Convertible Preferred Stock (whether or not for a current dividend period or any prior dividend period, including in connection with the payment of declared and unpaid dividends pursuant to the provisions described in “Mandatory Conversion” and “Conversion at the Option of the Holder Upon Fundamental Change; Fundamental Change Dividend Make-Whole Amount”), determined in our sole discretion: (a) in cash; (b) by delivery of shares of our common stock; or (c) through any combination of cash and shares of our common stock. We will make each payment of a declared dividend on the shares of the Mandatory Convertible Preferred Stock in cash, except to the extent we elect to make all or any portion of such payment in shares of our common stock. We will give the holders of the Mandatory Convertible Preferred Stock notice of any such election and the portion of such payment that will be made in cash and the portion that will be made in shares of our common stock no later than ten Scheduled Trading Days (as defined below) prior to the Dividend Payment Date for such dividend; provided, however, that if we do not provide timely notice of this election, we will be deemed to have elected to pay the relevant dividend in cash. All cash payments to which a holder of the Mandatory Convertible Preferred Stock is entitled in connection with a declared dividend on the shares of the Mandatory Convertible Preferred Stock will be rounded to the nearest cent. If we elect to make any such payment of a declared dividend, or any portion thereof, in shares of our common stock, such shares will be valued for such purpose, in the case of any dividend payment or portion thereof, at 97% of the Average VWAP (as defined below) per share of our common stock over the five consecutive Trading Days (as defined below) period beginning on, and including, the sixth Scheduled Trading Day (as defined below) prior to the applicable Dividend Payment Date (such average, the “Average Price”). If the five Trading Day period to determine the Average Price ends on or after the relevant Dividend Payment Date (whether because a Scheduled Trading Day is not a Trading Day due to the occurrence of a Market Disruption Event (as defined herein) or otherwise), then the Dividend Payment Date will be postponed until the second Business Day after the final Trading Day of such five Trading Day period; provided that no interest or other amounts will accrue as a result of such postponement. No fractional shares of our common stock will be delivered to the holders of the Mandatory Convertible Preferred Stock in payment or partial payment of a dividend. We will instead, to the extent we are legally permitted to do so, pay a cash amount (computed to the nearest cent) to each holder that would otherwise be entitled to receive a fraction of a share of our common stock based on the Average Price with respect to such dividend. In the event that we cannot pay cash in lieu of a fractional share, we will instead round up to the nearest whole share for each holder, and we shall not have any obligation to pay such amount in cash and such amount shall not form a part of the cumulative dividends that may be deemed to accumulate on the shares of Mandatory Convertible Preferred Stock. To the extent a shelf registration statement is required in our reasonable judgment in connection with the issuance of, or for resales of, shares of our common stock issued as payment of a dividend on the shares of the Mandatory Convertible Preferred Stock, including dividends paid in connection with a conversion, we will, to the extent a registration statement covering such shares is not currently filed and effective, use our commercially reasonable efforts to file and maintain the effectiveness of such a shelf registration statement until the earlier of such time as all such shares of common stock have been resold thereunder and such time as all such shares would be freely tradable without registration by holders thereof that are not (and were not at any time during the preceding three months) “affiliates” of ours for purposes of the Securities Act of 1933, as amended, and the rules and regulations thereunder (collectively, the “Securities Act”). To the extent applicable, we will also use our commercially reasonable efforts to have such shares of our common stock approved for listing on the NYSE (or if our common stock is not listed on the NYSE, on the principal other U.S. national or regional securities exchange on which our common stock is then listed), and qualified or registered under applicable state securities laws, if required; provided that we will not be required to qualify as a foreign corporation or to take any action that would subject us to general service of process in any such jurisdiction where we are not presently qualified or where we are not presently subject to taxation as a foreign corporation and such qualification or action would subject us to such taxation. Notwithstanding the foregoing, in no event will the number of shares of our common stock to be delivered in connection with any declared dividend, including any declared dividend payable in connection with a conversion, exceed a number equal to: (a) the declared dividend, divided by \$5.64, which amount represents approximately 35% of the Initial Price (as defined below), subject to adjustment in a manner inversely proportional to any anti-dilution adjustment to each Fixed Conversion Rate as set forth below in “Anti-Dilution Adjustments” (such dollar amount, as adjusted, the “Floor Price”). To the extent that the amount of any declared dividend exceeds the product of (x) the number of shares of our common stock delivered in connection with such declared dividend and (y) 97% of the Average Price, we will, if we are legally able to do so, and to the extent permitted under the terms of the documents governing our indebtedness, notwithstanding any notice by us to the contrary, pay such excess amount in cash (computed to the nearest cent). Any such payment in cash may not be permitted by our then existing debt instruments. To the extent that we are not able to pay such excess amount in cash under applicable law and in compliance with our indebtedness, we will not have any obligation to pay such amount in cash or deliver additional shares of our common stock in respect of such amount, and such amount will not form a part of the cumulative dividends that may be deemed to accumulate on the shares of the Mandatory Convertible Preferred Stock.

Dividend Stopper: So long as any share of the Mandatory Convertible Preferred Stock remains outstanding, no dividend or distribution shall be declared or paid on our common stock or any other class or series of Junior Stock, and no common stock or any other class or series of Junior Stock or Parity Stock shall be, directly or indirectly, purchased, redeemed or otherwise acquired for consideration by us or any of our subsidiaries unless, in each case, all accumulated and unpaid dividends for all preceding dividend periods have been declared and paid in full in cash, shares of our common stock or a combination thereof, or a sufficient sum of cash or number of shares of our common stock has been set apart for the payment of such dividends, on all outstanding shares of the Mandatory Convertible Preferred Stock. The foregoing limitation shall not apply to: (i) any dividend or distribution payable in shares of common stock or other Junior Stock, together with cash in lieu of any fractional share, (ii) purchases, redemptions or other acquisitions of common stock or other Junior Stock or Parity Stock in connection with the administration of any benefit or other incentive plan, including any employment or compensation agreement, including, without limitation, (x) the forfeiture of unvested shares of restricted stock or share withholdings or other acquisitions or surrender of shares or derivative securities to which the holder may otherwise be entitled upon exercise, delivery or vesting of equity awards (whether in payment of applicable taxes, the exercise price or otherwise) and (y) the payment of cash in lieu of fractional shares; (iii) purchases or deemed purchases or acquisitions of fractional interests in shares of any of our common stock or other Junior Stock pursuant to the conversion or exchange provisions of such shares of other Junior Stock or any securities exchangeable for or convertible into shares of common stock or other Junior Stock; (iv) any dividends or distributions of rights or common stock or other Junior Stock in connection with a stockholders’ rights plan or any redemption or repurchase of rights pursuant to any stockholders’ rights plan; (v) purchases of common stock or other Junior Stock pursuant to a contractually binding requirement to buy common stock or other Junior Stock, including under a contractually binding stock repurchase plan, in each case, existing prior to September 10, 2024; (vi) the acquisition by us or any of our subsidiaries of record ownership in common stock or other Junior Stock or Parity Stock for the beneficial ownership of any other persons (other than us or any of our subsidiaries), including as trustees or custodians, and the payment of cash in lieu of fractional shares; (vii) the exchange or conversion of Junior Stock or into other Junior Stock or of Parity Stock for or into other Parity Stock (with the same or lesser aggregate liquidation preference) or Junior Stock and the payment of cash in lieu of fractional shares; or (viii) the settlement of any convertible note hedge transactions or capped call transactions entered into in connection with the issuance, by us or any of our subsidiaries, of any debt securities that are convertible into, or exchangeable for, our common stock (or into or for any combination of cash and our common stock based on the value of our common stock), provided such convertible note hedge transactions or capped call transactions, as applicable, are on customary terms and were entered into either (a) before the Initial Issue Date or (b) in compliance with the foregoing provision. When dividends on shares of the Mandatory Convertible Preferred Stock (i) have not been declared and paid in full on any Dividend Payment Date (or, in the case of Parity Stock having dividend payment dates different from such Dividend Payment Dates, on a dividend payment date falling within a regular dividend period related to such Dividend Payment Date), or (ii) have been declared but a sum of cash or number of shares of our common stock sufficient for payment thereof has not been set aside for the benefit of the holders thereof on the applicable Regular Record Date, no dividends may be declared or paid on any shares of Parity Stock unless dividends are declared on the shares of the Mandatory Convertible Preferred Stock such that the respective amounts of such dividends declared on the shares of the Mandatory Convertible Preferred Stock and such shares of Parity Stock shall be allocated pro rata among the holders of the shares of the Mandatory Convertible Preferred Stock and the holders of any shares of Parity Stock then outstanding. For purposes of calculating the pro rata allocation of partial dividend payments, the Company shall allocate those payments so that the respective amounts of those payments for the declared dividend bear the same ratio to each other as all accumulated and unpaid dividends per share on the shares of the Mandatory Convertible Preferred Stock and all declared and unpaid dividends per share on such shares of Parity Stock bear to each other (subject to their having been declared by our Board, or an authorized committee thereof, out of legally available funds); provided, however, that any unpaid dividends on the Mandatory Convertible Preferred Stock will continue to accumulate except as described herein. For purposes of this calculation, with respect to non-cumulative Parity Stock, we will use the full amount of dividends that would be payable for the most recent dividend period if dividends were declared in full on such non-cumulative Parity Stock. Subject to the foregoing, and not otherwise, such dividends as may be determined by our Board, or an authorized committee thereof, may be declared and paid (payable in cash, securities or other property) on any securities, including our common stock and other Junior Stock, from time to time out of any funds legally available for such payment, and holders of the Mandatory Convertible Preferred Stock shall not be entitled to participate in any such dividends. Redemption: The Mandatory Convertible Preferred Stock will not be redeemable. However, at our option, we may purchase or exchange the Mandatory Convertible Preferred Stock from time to time in the open market, by tender or exchange offer or otherwise, without the consent of, or notice to, holders.

Acquisition Termination Redemption: For purposes of this section, references to: (a) “Juniper Acquisition” refer to the Merger Sub merging with and into Juniper, with Juniper continuing as the surviving corporation (the “Surviving Corporation”) and as a wholly owned subsidiary of HPE; (b) “Juniper” refer to Juniper Networks, Inc., a Delaware corporation; and (c) “Merger Agreement” refer to an Agreement and Plan of Merger (as amended or supplemented from time to time), by and among Juniper, HPE and Jasmine Acquisition Sub, Inc., a Delaware corporation and a wholly owned subsidiary of HPE (the “Merger Sub”). If (x) the consummation of the Juniper Acquisition does not occur on or before the later of (i) the date that is five business days after October 9, 2025 and (ii) the date that is five business days after any later date to which Juniper and we may agree to extend the “End Date” in the Merger Agreement or (y) we notify the holders in writing that we will not pursue the consummation of the Juniper Acquisition, we may within 75 calendar days, at our option, give notice of a redemption to the holders of the Mandatory Convertible Preferred Stock (provided that, to the extent the shares of Mandatory Convertible Preferred Stock are held in book-entry form through DTC, we may give such notice in any manner permitted by DTC). If we provide notice of acquisition termination redemption to holders of the Mandatory Convertible Preferred Stock, then, on the Acquisition Termination Redemption Date (as defined below), we will redeem the Mandatory Convertible Preferred Stock, in whole but not in part, at a redemption amount per Mandatory Convertible Preferred Stock equal to the Acquisition Termination Make-Whole Amount (as defined below).

Acquisition Termination Redemption Date means the date specified by us in our notice of acquisition termination redemption that is not less than 30 nor more than 60 days following the date on which we provide notice of such acquisition termination redemption; provided, that such date shall be a Business Day; provided, further, that, if the Acquisition Termination Share Price is greater than the Initial Price (as defined under “Mandatory Conversion”) and we elect to: (a) pay cash in lieu of delivering all or any portion of the shares of common stock equal to the Acquisition Termination Conversion Rate (as defined below), or (b) deliver common stock in lieu of all or any portion of the Acquisition Termination Dividend Amount (as defined below), the Acquisition Termination Redemption Date will be the second Business Day following the last Trading Day of the 20 consecutive Trading Day period used to determine the Acquisition Termination Market Value (as defined below).

Acquisition Termination Make-Whole Amount means, for each share of Mandatory Convertible Preferred Stock, an amount payable in cash equal to \$50.00 plus accumulated and unpaid dividends to, but excluding, the Acquisition Termination Redemption Date (whether or not declared); provided, that if the Acquisition Termination Share Price (as defined below) exceeds the Initial Price, the Acquisition Termination Make-Whole Amount will equal the Reference Amount (as defined below), which may be paid in cash, common stock or a combination thereof, as described below.

Acquisition Termination Share Price means the Average VWAP per ordinary share over the 10 consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the date on which we provide notice of acquisition termination redemption. The “Reference Amount” means, for each share of Mandatory Convertible Preferred Stock, an amount equal to the sum of the following amounts: (a) a number of shares of common stock equal to the Acquisition Termination Conversion Rate; plus (b) cash in an amount equal to the Acquisition Termination Dividend Amount; provided that we may deliver cash in lieu of all or any portion of the common stock set forth in clause (i) above, and we may deliver shares of common stock in lieu of all or any portion of the cash amount set forth in clause (ii) above, in each case, as described below.

Acquisition Termination Conversion Rate means a rate equal to the Fundamental Change Conversion Rate (as defined under “Conversion at the Option of the Holder upon Fundamental Change; Fundamental Change Dividend Make-Whole Amount”) (General), assuming for such purpose that the date on which we provide notice of acquisition termination redemption is the Fundamental Change Effective Date (as defined under “Conversion at the Option of the Holder upon Fundamental Change; Fundamental Change Dividend Make-Whole Amount”) (Fundamental Change Conversion Rate), and that the Acquisition Termination Share Price is the Fundamental Change Share Price (as defined under “Conversion at the Option of the Holder upon Fundamental Change; Fundamental Change Dividend Make-Whole Amount”) (Fundamental Change Conversion Rate).

Acquisition Termination Dividend Amount means an amount of cash equal to the sum of: (a) the Fundamental Change Dividend Make-Whole Amount (as defined under “Conversion at the Option of the Holder upon Fundamental Change; Fundamental Change Dividend Make-Whole Amount”) (Fundamental Change Dividend Make-Whole Amount); and (b) the Accumulated Dividend Amount (as defined under “Conversion at the Option of the Holder upon Fundamental Change; Fundamental Change Dividend Make-Whole Amount”) (Fundamental Change Dividend Make-Whole Amount and Accumulated Dividend Amount), assuming in each case, for such purpose that the date on which we provide notice of acquisition termination redemption is the Fundamental Change Effective Date. If the Acquisition Termination Share Price exceeds the Initial Price, we may elect to pay cash in lieu of delivering all or any portion of the common stock equal to the Acquisition Termination Conversion Rate. If we make such an election, we will deliver cash (rounded to the nearest cent) in an amount equal to such common stock in respect of which we have made this election multiplied by the Acquisition Termination Market Value; and (b) we may elect to deliver common stock in lieu of paying cash for some or all of the Acquisition Termination Dividend Amount. If we make such an election, we will deliver common stock equal to such portion of the Acquisition Termination Dividend Amount to be paid in common stock divided by the greater of (x) the Floor Price and (y) 97% of the Acquisition Termination Market Value; provided, that if the Acquisition Termination Dividend Amount or portion thereof in respect of which common stock is delivered exceeds the product of common stock multiplied by 97% of the Acquisition Termination Market Value, we will, if we are legally able to do so, and to the extent permitted under the terms of the documents governing its indebtedness, pay such excess amount in cash (rounded to the nearest cent). To the extent that we are not able to pay such excess amount in cash under applicable law and in compliance with the terms of the indebtedness, we shall not have any obligation to pay such amount in cash or deliver additional shares of our common stock in respect of such amount, and such amount will not form part of the cumulative dividends that may be deemed to accumulate on the shares of the Mandatory Convertible Preferred Stock.

Acquisition Termination Market Value means the Average VWAP per ordinary share over the 20 consecutive Trading Day period commencing on, and including, the second Trading Day following the date on which we provide notice of acquisition termination redemption. If any portion of the Acquisition Termination Make-Whole Amount is to be paid in common stock, no fractional shares will be delivered to the holders of the Mandatory Convertible Preferred Stock. We will instead pay a cash adjustment to each holder that would otherwise be entitled to a fractional share based on the Average VWAP per ordinary share over the five consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the Acquisition Termination Redemption Date. If more than one share of Mandatory Convertible Preferred Stock is to be redeemed from a holder, the number of shares of common stock issuable in connection with the payment of the Reference Amount shall be computed on the basis of the aggregate number of Mandatory Convertible Preferred Stock so redeemed. The notice of acquisition termination redemption will specify, among other things: (a) the Acquisition Termination Make-Whole Amount; (b) if the Acquisition Termination Share Price exceeds the Initial Price, the number of shares of common stock and the amount of cash comprising the Reference Amount per Mandatory Convertible Preferred Stock (before giving effect to any election to pay or deliver, with respect to each Mandatory Convertible Preferred Stock, cash in lieu of all or a portion of the common stock equal to the Acquisition Termination Conversion Rate or common stock lieu of some or all of the cash in respect of the

Acquisition Termination Dividend Amount); and (c) if the Acquisition Termination Share Price exceeds the Initial Price, whether we will pay cash in lieu of common stock equal to the Acquisition Termination Conversion Rate comprising a portion of the Reference Amount (specifying, if applicable, the number of such shares of common stock in respect of which cash will be paid); and (d) if the Acquisition Termination Share Price exceeds the Initial Price, whether we will deliver common stock in lieu of paying cash for all or any portion of the Acquisition Termination Dividend Amount comprising a portion of the Reference Amount (specifying, if applicable, the percentage of the Acquisition Termination Dividend Amount in respect of which common stock will be delivered in lieu of cash); and (e) the Acquisition Termination Redemption Date (specifying, as applicable, a fixed date or that the Acquisition Termination Redemption Date will be the second Business Day following the last Trading Day of the 20 consecutive Trading Day period used to determine the Acquisition Termination Market Value). To the extent a shelf registration statement is required in our reasonable judgment in connection with the issuance of or for resales of shares of common stock issued in payment of the Acquisition Termination Make-Whole Amount, we will, to the extent such a registration statement is not currently filed and effective, use our commercially reasonable efforts to file and maintain the effectiveness of such a shelf registration statement until the earlier of such time as all such shares of common stock have been resold thereunder and such time as all such shares of common stock are freely tradable without registration by holders thereof that are not, and have not been within the three months preceding, affiliates of ours for purposes of the Securities Act. To the extent applicable, we will also use our commercially reasonable efforts to have the common stock approved for listing on NYSE (or if our common stock is not listed on NYSE, on the principal other U.S. national or regional securities exchange on which our common stock are then listed) and qualified or registered under applicable state securities laws, if required; provided that we will not be required to qualify as a foreign corporation or to take any action that would subject us to general service of process in any such jurisdiction where we are not presently qualified or where we are not presently subject to taxation as a foreign corporation and such qualification or action would subject us to such taxation. The proceeds of this offering will not be deposited into an escrow account. Our ability to pay the Acquisition Termination Make-Whole Amount to holders of the Mandatory Convertible Preferred Stock in connection with a redemption may be limited by our then-existing financial resources, and following our election, if any, to redeem the Mandatory Convertible Preferred Stock, sufficient funds may not be available when necessary to pay the Acquisition Termination Make-Whole Amount. Liquidation Preference: In the event of our voluntary or involuntary liquidation, winding-up or dissolution, each holder of the Mandatory Convertible Preferred Stock will be entitled to receive a liquidation preference in the amount of \$50.00 per share of the Mandatory Convertible Preferred Stock (the "Liquidation Preference"), plus an amount (the "Liquidation Dividend Amount") equal to accumulated and unpaid dividends on such shares, whether or not declared, to, but excluding, the date fixed for liquidation, winding-up or dissolution, such amount to be paid out of our assets legally available for distribution to our stockholders, after satisfaction of debt and other liabilities owed to our creditors and holders of shares of any Senior Stock and before any payment or distribution is made to holders of Junior Stock (including our common stock). If, upon our voluntary or involuntary liquidation, winding-up or dissolution, the amounts payable with respect to (1) the Liquidation Preference plus the Liquidation Dividend Amount on the shares of the Mandatory Convertible Preferred Stock and (2) the liquidation preference of, and the amount of accumulated and unpaid dividends (to, but excluding, the date fixed for liquidation, winding-up or dissolution) on, all Parity Stock are not paid in full, the holders of the Mandatory Convertible Preferred Stock and all holders of any such Parity Stock will share equally and ratably in any distribution of our assets in proportion to their respective liquidation preferences and amounts equal to accumulated and unpaid dividends to which they are entitled. After payment to any holder of the Mandatory Convertible Preferred Stock of the full amount of the Liquidation Preference and the Liquidation Dividend Amount for such holder's shares of the Mandatory Convertible Preferred Stock, such holder of the Mandatory Convertible Preferred Stock will have no right or claim to any of our remaining assets. Neither the sale, lease nor exchange of all or substantially all of our assets or business (other than in connection with our liquidation, winding-up or dissolution), nor our merger or consolidation into or with any other person, will be deemed to be our voluntary or involuntary liquidation, winding-up or dissolution. Our Certificate of Incorporation and the Certificate of Designations will not contain any provision requiring funds to be set aside to protect the Liquidation Preference of the Mandatory Convertible Preferred Stock even though it is substantially in excess of the par value thereof. Voting Power: The holders of the Mandatory Convertible Preferred Stock will not have any voting rights or powers, except as described below and as specifically required by Delaware law or by our Certificate of Incorporation from time to time. Whenever dividends on any shares of the Mandatory Convertible Preferred Stock have not been declared and paid for the equivalent of six or more dividend periods, whether or not for consecutive dividend periods (a "Nonpayment"), the authorized number of directors on our Board will, at the next annual meeting of stockholders or at a special meeting of stockholders as provided below, automatically be increased by two and the holders of such shares of the Mandatory Convertible Preferred Stock, voting together as a single class with holders of any and all other series of Voting Preferred Stock (as defined below) then outstanding, will be entitled, at our next annual meeting of stockholders or at a special meeting of stockholders, if any, as provided below, to vote for the election of a total of two additional members of our Board (the "Preferred Stock Directors"); provided, that the election of any such Preferred Stock Directors will not cause us to violate the corporate governance requirements of the NYSE (or any other exchange or automated quotation system on which our securities may be listed or quoted) that requires listed or quoted companies to have a majority of independent directors; provided, further, that our Board shall, at no time, include more than two Preferred Stock Directors. In the event of a Nonpayment, the holders of record of at least 25% of the shares of the Mandatory Convertible Preferred Stock and any other series of Voting Preferred Stock may request that a special meeting of stockholders be called to elect such Preferred Stock Directors (provided, that if our next annual or a special meeting of stockholders is scheduled to be held within 90 days of the receipt of such request, the election of such Preferred Stock Directors, to the extent otherwise permitted by our amended and restated bylaws, will, instead, be included in the agenda for and will be held at such scheduled annual or special meeting of stockholders). The Preferred Stock Directors will stand for reelection annually, at each subsequent annual meeting of the stockholders, so long as the holders of the Mandatory Convertible Preferred Stock continue to have such voting powers. At any meeting at which the holders of the Mandatory Convertible Preferred Stock are entitled to elect Preferred Stock Directors, the holders of record of a majority in voting power of the then outstanding shares of the Mandatory Convertible Preferred Stock and all other series of Voting Preferred Stock, present in person or represented by proxy, will constitute a quorum and the vote of the holders of a majority in voting power of such shares of the Mandatory Convertible Preferred Stock and other Voting Preferred Stock so present or represented by proxy at any such meeting at which there shall be a quorum shall be sufficient to elect the Preferred Stock Directors. As used in this description, "electing Preferred Stock" means any other class or series of our Parity Stock upon which like voting powers for the election of directors have been conferred and are exercisable. If and when all accumulated and unpaid dividends on the Mandatory Convertible Preferred Stock have been paid in full, or declared and a sum or number of shares of our common stock sufficient for such payment shall have been set aside for the benefit of the holders thereof on the applicable Regular Record Date (a "Nonpayment Remedy"), the holders of the Mandatory Convertible Preferred Stock shall immediately and, without any further action by us, be divested of the foregoing voting powers, subject to the revesting of such powers in the event of each subsequent Nonpayment. If such voting powers for the holders of the Mandatory Convertible Preferred Stock and all other holders of Voting Preferred Stock have terminated, each Preferred Stock Director then in office shall automatically be disqualified as a director and shall no longer be a director and the term of office of each Preferred Stock Director so elected will terminate at such time and the authorized number of directors on our Board shall automatically decrease by two. Any Preferred Stock Director may be removed at any time, with or without cause, by the holders of record of a majority in voting power of the outstanding shares of the Mandatory Convertible Preferred Stock and any other series of Voting Preferred Stock then outstanding (voting together as a single class) when they have the voting powers described above. In the event that a Nonpayment shall have occurred and there shall not have been a Nonpayment Remedy, any vacancy in the office of a Preferred Stock Director (other than prior to the initial election of Preferred Stock Directors after a Nonpayment) may be filled by the written consent of the Preferred Stock Director remaining in office, except that in the event that such vacancy is created as a result of such Preferred Stock Director being removed, or if no Preferred Stock Director remains in office, then such vacancy may be filled by a vote of the holders of record of a majority in voting power of the outstanding shares of the Mandatory Convertible Preferred Stock and any other series of Voting Preferred Stock then outstanding (voting together as a single class) when they have the voting powers described above; provided, however, that the election of any such Preferred Stock Directors to fill such vacancy will not cause us to violate the corporate governance requirements of the NYSE (or any other exchange or automated quotation system on which our securities may be listed or quoted) that requires listed or quoted companies to have a majority of independent directors. The Preferred Stock Directors will each be entitled to one vote per director on any matter that comes before our Board for a vote. So long as any shares of the Mandatory Convertible Preferred Stock are outstanding, we will not, without the affirmative vote or consent of the holders of record of at least two-thirds in voting power of the outstanding shares of the Mandatory Convertible Preferred Stock and all other series of Voting Preferred Stock at the time outstanding and entitled to vote thereon, voting together as a single class, given in person or by proxy, by written consent without a meeting or by vote at an annual or special meeting of such stockholders: (a) amend or alter the provisions of our Certificate of Incorporation so as to authorize or create, or increase the authorized number of, any class or series of Senior Stock; (b) amend, alter or repeal any provision of our Certificate of Incorporation or the Certificate of Designations so as to materially and adversely affect the special rights, preferences or voting powers of the Mandatory Convertible Preferred Stock; (c) consummate a binding share exchange or reclassification involving the shares of the Mandatory Convertible Preferred Stock, a merger or consolidation of us with another entity or a conversion of the Company or domestication in or transfer to a foreign jurisdiction, unless in each case: (i) the shares of the Mandatory Convertible Preferred Stock remain outstanding following the consummation of such binding share exchange, reclassification, merger or consolidation or, in the case of (x) any such merger or consolidation with respect to which we are not the surviving or resulting entity (or the Mandatory Convertible Preferred Stock is otherwise exchanged or reclassified) or (y) any such conversion, domestication or transfer, are converted or reclassified into or exchanged for preference securities of the surviving or resulting entity, of the converted, domesticated or transferred entity or, in either case, such entity's ultimate parent; and (ii) the shares of the Mandatory Convertible Preferred Stock that remain outstanding or such shares of preference securities, as the case may be, have such rights, preferences and voting powers that, taken as a whole, are not materially less favorable to the holders thereof than the rights, preferences and voting powers, taken as a whole, of the Mandatory Convertible Preferred Stock immediately prior to the consummation of such transaction; provided, however, that in the event that a transaction would trigger voting powers under both the second and the third bullet point above, the third bullet point will govern; provided, further, however, that (1) any increase in the number of our authorized but unissued shares of our preferred stock, (2) any increase in the number of authorized or issued shares of the Mandatory Convertible Preferred Stock, (3) the creation and issuance, or increase in the authorized or issued number, of any class or series of Parity Stock or Junior Stock and (4) the application of the provisions described below under the caption "Recapitalizations, Reclassifications and Changes in our Common Stock", will be deemed not to adversely affect (or to otherwise cause to be materially less favorable) the rights, preferences or voting powers of the Mandatory Convertible Preferred Stock and shall not require the affirmative vote or consent of holders of the Mandatory Convertible Preferred Stock. Our Certificate of Incorporation and Delaware law permit us, without the approval of any of our stockholders (including any holders of the Mandatory Convertible Preferred Stock), to establish and issue a new series of preferred stock ranking equally with or junior to the Mandatory Convertible Preferred Stock, which may dilute the voting and other interests of holders of the Mandatory Convertible Preferred Stock. If any amendment, alteration, repeal, share exchange, reclassification, merger or consolidation or conversion, domestication or transfer described above would adversely affect the rights, preferences or voting powers of one or more but not all series of Voting Preferred Stock (including the Mandatory Convertible Preferred Stock for this purpose), then only the series of Voting Preferred Stock, the rights, preferences or voting powers of which are adversely affected and entitled to vote, shall vote as a class in lieu of all other series of Voting Preferred Stock. Without the vote or consent of the holders of the Mandatory Convertible Preferred Stock, so long as such action does not adversely affect the special rights, preferences or voting powers of the Mandatory Convertible Preferred Stock, and limitations and restrictions thereof, we may amend, alter, correct, supplement or repeal any terms of the Mandatory Convertible Preferred Stock by amending or supplementing our Certificate of Incorporation or the Certificate of Designations for the following purposes: (a) to cure any ambiguity, omission, inconsistency or mistake in any such agreement (including any provision contained in the Certificate of Designations that may be defective or inconsistent with any other provision contained in such Certificate of Designations); (b) to make any provision with respect to matters or questions relating to the Mandatory Convertible Preferred Stock that is not inconsistent with the provisions of our Certificate of Incorporation or the Certificate of Designations; (c) to waive any of our rights with respect to the Mandatory Convertible Preferred Stock; (d) to make any other change that does not materially and adversely affect the rights of any holder of the Mandatory Convertible Preferred Stock (other than any holder that consents to such change). In addition, without the consent of the holders of the Mandatory Convertible Preferred Stock, we may amend, alter, supplement or repeal any terms of the Mandatory Convertible Preferred Stock in order to (i) conform the terms thereof to the description of the terms of the Mandatory Convertible Preferred Stock set forth under "Description of Mandatory Convertible Preferred Stock" in the preliminary prospectus supplement relating to our offering of the Mandatory Convertible Preferred Stock, as supplemented and/or amended by any related pricing term sheet or (ii) file a certificate of correction with respect to the Certificate of Designations to the extent permitted by Section 103(f) of the Delaware General Corporation Law. In connection with any vote expressly set forth in this section, the number of votes that each share of Mandatory Convertible Preferred Stock (and any Voting Preferred Stock participating in the votes set forth in this section) will have will be equal to the respective per share liquidation preference amounts of the Mandatory Convertible Preferred Stock and such other Voting Preferred Stock. Mandatory Conversion: Each outstanding share of the Mandatory Convertible Preferred Stock will automatically convert on the Mandatory Conversion Date (as defined below), into a number of shares of our common stock equal to the Conversion Rate described below. The "Conversion Rate," which is the number of shares of our common stock issuable upon conversion of each share of the Mandatory Convertible Preferred Stock on the Mandatory Conversion Date (excluding any shares of our common stock issued in respect of accrued and unpaid dividends, as described below), will be as follows: (a) if the Applicable Market Value (as defined below) of our common stock is greater than the Threshold Appreciation Price, which is approximately \$19.72, the Conversion Rate will be 2.5352 shares of our common stock per share of the Mandatory Convertible Preferred Stock (the "Minimum Conversion Rate"); (b) if the Applicable Market Value of our common stock is less than or equal to the Threshold Appreciation Price but equal to or greater than the Initial Price, which is approximately \$16.10, the Conversion Rate will be equal to \$50.00, divided by the Applicable Market Value of our common stock, rounded to the nearest ten-thousandth of a share; or (c) if the Applicable Market Value of our common stock is less than the Initial Price, the Conversion Rate will be 3.1056 shares of our common stock per share of the Mandatory Convertible Preferred Stock (the "Maximum Conversion Rate"). For the avoidance of doubt, the Conversion Rate per share of the Mandatory Convertible Preferred Stock will in no event exceed the Maximum Conversion Rate, subject to adjustment as described under "Anti-Dilution Adjustments" below and exclusive of any amounts owing in respect of any Additional Conversion Amount or any accrued and unpaid dividends paid at our election in shares of common stock. We refer to the Minimum Conversion Rate and the Maximum Conversion Rate collectively as the "Fixed Conversion Rates." The Fixed Conversion Rates are subject to adjustment as described under "Anti-Dilution Adjustments" below. The "Threshold Appreciation Price" is calculated by dividing \$50.00 by the Minimum Conversion Rate, and represents approximately 22.5% appreciation over the Initial Price. The "Initial Price" is calculated by dividing \$50.00 by the Maximum Conversion Rate and initially equals approximately \$16.10, the closing price of our common stock on September 10, 2024. If we declare a dividend on the Mandatory Convertible Preferred Stock for the dividend period ending on, but excluding, September 1, 2027, we will pay such dividend to the holders of record as of the immediately preceding Regular Record Date, as described above under "Dividends." If, on or prior to September 1, 2027 we have not declared a dividend payable in the amount of all or any portion of the accumulated and unpaid dividends on the Mandatory Convertible Preferred Stock, the Conversion Rate will be adjusted so that holders receive an additional number of shares of our common stock equal to: (a) the amount of such undeclared, accumulated and unpaid dividends per share of the Mandatory Convertible Preferred Stock (the "Additional Conversion Amount"), divided by (b) the greater of (x) the Floor Price and (y) 97% of the Average Price (calculated using September 1, 2027, as the applicable Dividend Payment Date). To the extent that the Additional Conversion Amount exceeds the product of such number of additional shares and 97% of the Average Price, we will, if we are legally able to do so, and to the extent permitted under the terms of the documents governing our indebtedness, declare and pay such excess amount in cash (computed to the nearest cent) pro rata per share to the holders of the Mandatory Convertible Preferred Stock. Any such payment in cash may not be permitted by our then existing debt instruments. To the extent that we are not able to pay such excess amount in cash under applicable law and in compliance with our indebtedness, we will not have any obligation to pay such amount in cash or deliver additional shares of our common stock in respect of such amount, and such amount will not form a part of the cumulative dividends on the shares of the Mandatory Convertible Preferred

hypothetical conversion values upon mandatory conversion: For illustrative purposes only, the following table shows the number of shares of our common stock that a holder of the Mandatory Convertible Preferred Stock would receive upon mandatory conversion of one share of the Mandatory Convertible Preferred Stock at various Applicable Market Values for our common stock. The table assumes that there will be no conversion adjustments as described above for any Additional Conversion Amount or as described below in “Anti-Dilution Adjustments” and that dividends on the Mandatory Convertible Preferred Stock will be declared and paid in cash (and not in additional shares of our common stock). The actual Applicable Market Value of our common stock may differ from those set forth in the table below. Given an Initial Price of approximately \$16.10 and a Threshold Appreciation Price of approximately \$19.72, a holder of the Mandatory Convertible Preferred Stock would receive on the Mandatory Conversion Date the number of shares of our common stock per share of the Mandatory Convertible Preferred Stock set forth below, subject to the provisions described below with respect to any fractional share of our common stock. Assumed Applicable Market Value of our common stock: Number of shares of our common stock to be received upon mandatory conversion: Assumed conversion value (calculated as Applicable Market Value multiplied by the number of shares of our common stock to be received upon mandatory conversion)

Assumed Applicable Market Value of our common stock	Number of shares of our common stock to be received upon mandatory conversion

Under the Fundamental Change Conversion Period, then we will pay such dividend on the relevant Dividend Payment Date to the holders of record at the Close of Business on such Regular Record Date, as described in “Dividends,” and the Accumulated Dividend Amount will not include the amount of such dividend, and the Fundamental Change Dividend Make-Whole Amount will not include the present value of such dividend. The Accumulated Dividend Amount will be payable at our option (subject to satisfaction of the requirements described below) in cash (computed to the nearest cent), to the extent we are legally permitted to do so and to the extent permitted under the terms of the documents governing our indebtedness, in an additional number of shares of our common stock (or Units of Exchange Property) equal to (i) the Accumulated Dividend Amount, divided by (ii) the greater of (x) the Floor Price and (y) 97% of the Fundamental Change Stock Price, or through a combination of cash and shares of our common stock (or Units of Exchange Property) in accordance with the provisions of the preceding two bullets. We will pay the Fundamental Change Dividend Make-Whole Amount and the Accumulated Dividend Amount in cash, except to the extent we elect on or prior to the second Business Day following the Fundamental Change Effective Date to make all or any portion of such payments in shares of our common stock (or Units of Exchange Property). In addition, if we elect to deliver common stock (or Units of Exchange Property) in respect of all or any portion of the Fundamental Change Dividend Make-Whole Amount or the Accumulated Dividend Amount, to the extent that the Fundamental Change Dividend Make-Whole Amount or the Accumulated Dividend Amount or the dollar amount of any portion thereof paid in common stock (or Units of Exchange Property) exceeds the product of (x) the number of additional shares we deliver in respect thereof and (y) 97% of the Fundamental Change Stock Price, we will, if we are legally able to do so, and to the extent permitted under the terms of the documents governing our indebtedness, pay such excess amount in cash (computed to the nearest cent). Any such payment in cash may not be permitted by our then existing debt instruments, including any restricted payments covenants. To the extent that we are not able to pay such excess amount in cash under applicable law and in compliance with our indebtedness, we will not have any obligation to pay such amount in cash or deliver additional shares of our common stock in respect of such amount, and such amount will not form a part of the cumulative dividends that may be deemed to accumulate on the shares of the Mandatory Convertible Preferred Stock. However, if we are prohibited from paying or delivering, as the case may be, the Fundamental Change Dividend Make-Whole Amount (whether in cash or in shares of our common stock), in whole or in part, due to limitations of applicable Delaware law, then the Fundamental Change Conversion Rate will instead be increased by a number of shares of common stock equal to the cash amount of the aggregate unpaid and undelivered Fundamental Change Dividend Make-Whole Amount, divided by the greater of (i) the Floor Price and (ii) 97% of the Fundamental Change Stock Price. To the extent that the cash amount of the aggregate unpaid and undelivered Fundamental Change Dividend Make-Whole Amount exceeds the product of such number of additional shares and 97% of the Fundamental Change Stock Price, we will not have any obligation to pay the shortfall in cash or deliver additional shares of our common stock in respect of such amount. No fractional shares of our common stock (or to the extent applicable, Units of Exchange Property) will be delivered to converting holders of the Mandatory Convertible Preferred Stock in respect of the Fundamental Change Dividend Make-Whole Amount or the Accumulated Dividend Amount. We will instead, to the extent we are legally permitted to do so and to the extent permitted under the terms of the documents governing our indebtedness, pay a cash amount (computed to the nearest cent) to each converting holder that would otherwise be entitled to receive a fraction of a share of our common stock (or to the extent applicable, Units of Exchange Property) based on the Average VWAP per share of our common stock (or to the extent applicable, Units of Exchange Property) over the five consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the Fundamental Change Conversion Date. In the event that we cannot pay cash in lieu of a fractional share, we will instead round up to the nearest whole share for each holder, and we shall not have any obligation to pay such amount in cash and such amount shall not form a part of the cumulative dividends that may be deemed to accumulate on the shares of Mandatory Convertible Preferred Stock. Not later than the second Business Day following the Fundamental Change Effective Date, we will notify holders of the Fundamental Change Conversion Rate (if we provide notice to holders prior to the anticipated Fundamental Change Effective Date, specifying how the Fundamental Change Conversion Rate will be determined), the Fundamental Change Dividend Make-Whole Amount and whether we will pay such amount in cash, shares of our common stock (or to the extent applicable, Units of Exchange Property) or a combination thereof, specifying the combination, if applicable; if applicable, and the Accumulated Dividend Amount as of the Fundamental Change Effective Date and whether we will pay such amount in cash, shares of our common stock (or to the extent applicable, Units of Exchange Property) or a combination thereof, specifying the combination, if applicable. Our obligation to deliver shares at the Fundamental Change Conversion Rate and pay the Fundamental Change Dividend Make-Whole Amount (whether in cash, our common stock or any combination thereof) could be considered a penalty, in which case the enforceability thereof would be subject to general principles of reasonableness of economic remedies. Conversion Procedures: Upon Mandatory Conversion: Any outstanding shares of the Mandatory Convertible Preferred Stock will mandatorily and automatically convert into shares of common stock on the Mandatory Conversion Date. A holder of the Mandatory Convertible Preferred Stock will not be required to pay any transfer or similar taxes or duties relating to the issuance or delivery of our common stock upon conversion, but such holder will be required to pay any tax or duty that may be payable relating to any transfer involved in the issuance or delivery of the common stock in a name other than the name of such holder. A certificate representing the shares of common stock issuable upon conversion will be issued and delivered to the converting holder, or, if the Mandatory Convertible Preferred Stock being converted is in global form, the shares of common stock issuable upon conversion shall be delivered to the converting holder through the facilities of DTC, in each case together with delivery by us to the converting holder of any cash to which the converting holder is entitled, only after all applicable taxes and duties, if any, payable by you have been paid in full, and such shares and cash will be delivered on the later of (i) the Mandatory Conversion Date and (ii) the Business Day after you have paid in full all applicable taxes and duties, if any. The person or persons entitled to receive the shares of our common stock issuable upon mandatory conversion of the Mandatory Convertible Preferred Stock will be treated as the record holder(s) of such shares as of the Close of Business on the Mandatory Conversion Date. Prior to the Close of Business on the Mandatory Conversion Date, the common stock issuable upon conversion of the Mandatory Convertible Preferred Stock on the Mandatory Conversion Date will not be deemed to be outstanding for any purpose and you will have no rights, powers or preferences with respect to such common stock, including voting powers, rights to respond to tender offers and rights to receive any dividends or other distributions on the common stock, by virtue of holding the Mandatory Convertible Preferred Stock. Upon Early Conversion or Upon Early Fundamental Change Conversion: If a holder of the Mandatory Convertible Preferred Stock elects to convert the Mandatory Convertible Preferred Stock prior to the Mandatory Conversion Date, in the manner described in “Early Conversion at the Option of the Holder” or “Conversion at the Option of the Holder upon Fundamental Change; Fundamental Change Dividend Make-Whole Amount” (an “Early Fundamental Change Conversion”), such holder must observe the following conversion procedures: (a) If shares of the Mandatory Convertible Preferred Stock are in global form, to convert the Mandatory Convertible Preferred Stock such holder must deliver to DTC the appropriate instruction form for conversion pursuant to DTC’s conversion program. If shares of the Mandatory Convertible Preferred Stock are held in certificated form, such holder must comply with certain procedures set forth in the Certificate of Designations. In either case, if required, such holder must pay all transfer or similar taxes or duties, if any, as described below. The “Conversion Date” will be the date on which such holder has satisfied the foregoing requirements with respect to an Early Conversion or an Early Fundamental Change Conversion. Such holder will not be required to pay any transfer or similar taxes or duties relating to the issuance or delivery of our common stock if such holder exercises its conversion rights, except that such holder will be required to pay any tax or duty that may be payable relating to any transfer involved in the issuance or delivery of the common stock in a name other than the name of such holder. A certificate representing shares of common stock issuable upon conversion will be issued and delivered to the converting holder, or, if the Mandatory Convertible Preferred Stock being converted is in global form, the shares of common stock issuable upon conversion shall be delivered through the facilities of DTC, in each case together with delivery by us to the converting holder of any cash to which the converting holder is entitled, only after all applicable taxes and duties, if any, payable by the converting holder have been paid in full, and such shares and cash will be delivered on the latest of (i) the second Business Day immediately succeeding the Conversion Date, (ii) if applicable, the second Business Day immediately succeeding the last day of the Early Conversion Settlement Period and (iii) the Business Day after such holder has paid in full all applicable taxes and duties, if any. The person or persons entitled to receive the shares of common stock issuable upon an Early Conversion or an Early Fundamental Change Conversion of the Mandatory Convertible Preferred Stock will be treated as the record holder(s) of such shares as of the Close of Business on the applicable Conversion Date. Prior to the Close of Business on the applicable Conversion Date, the shares of common stock issuable upon conversion of any shares of the Mandatory Convertible Preferred Stock will not be deemed to be outstanding for any purpose, and a holder of the Mandatory Convertible Preferred Stock will have no rights, powers or preferences with respect to such common stock, including voting powers, rights to respond to tender offers for the common stock and rights to receive any dividends or other distributions on the common stock, by virtue of holding the Mandatory Convertible Preferred Stock. Fractional Shares: No fractional shares of our common stock will be issued to holders of the Mandatory Convertible Preferred Stock upon conversion. In lieu of any fractional shares of our common stock otherwise issuable in respect of the aggregate number of shares of the Mandatory Convertible Preferred Stock of any holder that are converted, that holder will be entitled to receive an amount in cash (computed to the nearest cent) equal to the product of: (i) that same fraction; and (ii) the Average VWAP of our common stock over the five consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the applicable Conversion Date. In the event that we cannot pay cash in lieu of a fractional share, we will instead round up to the nearest whole share for each holder and we shall not have any obligation to pay such amount in cash and such amount shall not form a part of the cumulative dividends that may be deemed to accumulate on the shares of Mandatory Convertible Preferred Stock. Subject to any applicable rules and procedures of DTC, if more than one share of the Mandatory Convertible Preferred Stock is to be automatically converted on the Mandatory Conversion Date or is surrendered for conversion at one time, in each case, by or for the same holder, the number of full shares of our common stock issuable upon conversion thereof shall be computed on the basis of the aggregate number of shares of the Mandatory Convertible Preferred Stock to be automatically converted or so surrendered, as the case may be. Anti-Dilution Adjustments: Each Fixed Conversion Rate will be adjusted as described below, except that we will not make any adjustments to the Fixed Conversion Rates if holders of the Mandatory Convertible Preferred Stock participate (other than in the case of a share split or share combination), at the same time and upon the same terms as holders of our common stock and solely as a result of holding the Mandatory Convertible Preferred Stock, in any of the transactions described below without having to convert their Mandatory Convertible Preferred Stock as if they held a number of shares of common stock equal to (i) the Maximum Conversion Rate as of the record date for such transaction, multiplied by (ii) the number of shares of the Mandatory Convertible Preferred Stock held by such holder. (1) If we exclusively issue shares of our common stock as a dividend or distribution on shares of our common stock, or if we effect a share split or share combination, each Fixed Conversion Rate will be adjusted based on the following formula:
$$\frac{A \times \text{CR1} \times \text{CR0} \times \text{X} + \text{Y}}{A \times \text{CR1} \times \text{CR0} \times \text{X} + \text{Y} + \text{Z}}$$
 where, CR0 = such Fixed Conversion Rate in effect immediately prior to the Close of Business on the record date (as defined below) of such dividend or distribution, or immediately prior to the Open of Business on the effective date of such share split or share combination, as applicable; CR1 = such Fixed Conversion Rate in effect immediately after the Close of Business on such record date or immediately after the Open of Business on such effective date, as applicable; OS0 = the number of shares of our common stock outstanding immediately prior to the Close of Business on such record date or immediately prior to the Open of Business on such effective date, as applicable, before giving effect to such dividend, distribution, share split or share combination; and OS1 = the number of shares of our common stock outstanding immediately after giving effect to such dividend, distribution, share split or share combination. Any adjustment made under this clause (1) shall become effective immediately after the Close of Business on the record date for such dividend or distribution, or immediately after the Open of Business on the effective date for such share split or share combination, as applicable. If any dividend or distribution of the type described in this clause (1) is declared but not so paid or made, each Fixed Conversion Rate shall be immediately readjusted, effective as of the date our Board or an authorized committee thereof determines not to pay such dividend or distribution, to such Fixed Conversion Rate that would then be in effect if such dividend or distribution had not been declared. For the purposes of this clause (1), the number of shares of our common stock outstanding immediately prior to the Close of Business on the record date or immediately prior to the Open of Business on the relevant effective date, as the case may be, and the number of shares of our common stock outstanding immediately after giving effect to such dividend, distribution, share split or share combination shall, in each case, not include shares that we hold in treasury. We will not pay any dividend or make any distribution on shares of our common stock that we hold in treasury. (2) If we effect a dividend, distribution, share split or share combination, as applicable, the date fixed for determination of holders of our common stock (or such other security) entitled to receive such cash, securities or other property (whether such date is fixed by our Board or a duly authorized committee thereof, statute, contract or otherwise). (2) If we issue to all or substantially all holders of our common stock any rights, options or warrants entitling them, for a period of not more than 45 calendar days after the announcement date of such issuance, to subscribe for or purchase shares of our common stock at a price per share that is less than the Average VWAP per share of our common stock for the ten consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the date of announcement of such issuance, each Fixed Conversion Rate will be increased based on the following formula:
$$\frac{A \times \text{CR1} \times \text{CR0} \times \text{X} + \text{Y} + \text{Z}}{A \times \text{CR1} \times \text{CR0} \times \text{X} + \text{Y} + \text{Z} + \text{W}}$$
 where, CR0 = such Fixed Conversion Rate in effect immediately prior to the Close of Business on the record date for such issuance; CR1 = such Fixed Conversion Rate in effect immediately after the Close of Business on such record date; OS0 = the number of shares of our common stock outstanding immediately prior to the Close of Business on such record date; X = the total number of shares of our common stock issuable pursuant to such rights, options or warrants; and Y = the number of shares of our common stock equal to (i) the aggregate price payable to exercise such rights, options or warrants, divided by (ii) the Average VWAP per share of our common stock over the ten consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the date of announcement of the issuance of such rights, options or warrants. Any increase made under this clause (2) will be made successively whenever any such rights, options or warrants are issued and shall become effective immediately after the Close of Business on the record date for such issuance. To the extent that such rights, options or warrants are not exercised prior to their expiration or shares of common stock are not delivered after the exercise of such rights, options or warrants, each Fixed Conversion Rate shall be decreased to such Fixed Conversion Rate that would then be in effect had the increase with respect to the issuance of such rights, options or warrants been made on the basis of delivery of only the number of shares of common stock actually delivered, if any. If such rights, options or warrants are not so issued, each Fixed Conversion Rate shall be immediately readjusted, effective as of the date our Board or an authorized committee thereof determines not to issue such rights, options or warrants, to such Fixed Conversion Rate that would then be in effect if such record date for such issuance had not occurred. For the purpose of this clause (2), in determining whether any rights, options or warrants entitle the holders of our common stock to subscribe for or purchase shares of our common stock at less than such Average VWAP per share for the ten consecutive trading day period ending on, and including, the Trading Day immediately preceding the date of announcement of such issuance, and in determining the aggregate offering price of such shares of our common stock, there shall be taken into account any consideration received by us for such rights, options or warrants and any amount payable on exercise or conversion thereof, the value of such consideration, if other than cash, to be determined by our Board or an authorized committee thereof. (3) (A) If we distribute shares of our capital stock, evidences of our indebtedness, other assets or property of ours or rights, options or warrants to acquire our capital stock or other securities, to all or substantially all holders of our common stock, excluding: (i) dividends, distributions or issuances as to which the provisions set forth in clause (1) or (2) shall apply; (ii) dividends or distributions paid exclusively in cash as to which the provisions set forth in clause (4

conversion Rate in effect immediately after the Close of Business on such record date; SPO =the Average VWAP per share of our common stock over the ten consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the ex-date (as defined below) for such distribution; and FMV =the fair market value (as determined by our Board or an authorized committee thereof in good faith) of the shares of capital stock, evidences of indebtedness, assets, property, rights, options or warrants so distributed, expressed as an amount per share of our common stock on the ex-date for such distribution. $\text{CR1} = \frac{\text{FMV}}{\text{Average VWAP per share of the capital stock over the ten consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the ex-date for such distribution}}$ means the first date on which the shares of our common stock trade on the applicable exchange or in the applicable market, regular way, without the right to receive the issuance, dividend or distribution in question, from us or, if applicable, from the seller of our common stock on such exchange or market (in the form of due bills or otherwise) as determined by such exchange or market. Any increase made under clause (3)(A) above will become effective immediately after the Close of Business on the record date for such distribution. If such distribution is not so paid or made, each Fixed Conversion Rate shall be immediately readjusted, effective as of the date our Board or an authorized committee thereof determines not to pay such dividend or distribution, to be such Fixed Conversion Rate that would then be in effect if such distribution had not been declared. Notwithstanding the foregoing, if $\text{CR1} \geq \text{CR2}$ (as defined above) is equal to or greater than CR2 (as defined above), or if the difference is less than \$1.00, in lieu of the foregoing increase, each holder shall receive, in respect of each share of the Mandatory Convertible Preferred Stock, at the same time and upon the same terms as holders of our common stock, the amount and kind of our capital stock, evidences of our indebtedness, other assets or property of ours or rights, options or warrants to acquire our capital stock or other securities that such holder would have received if such holder owned a number of shares of common stock equal to the Maximum Conversion Rate in effect on the record date for the distribution. If we issue rights, options or warrants that are only exercisable upon the occurrence of certain triggering events, then we will not adjust the Fixed Conversion Rates pursuant to the foregoing in this clause (3)(A) until the earliest of these triggering events occurs; and we will readjust the Fixed Conversion Rates to the extent any of these rights, options or warrants are not exercised before they expire or are terminated without exercise by any holder thereof; provided that the rights, options or warrants trade together with our common stock and will be issued in respect of future issuances of the shares of our common stock. (3)(B) With respect to an adjustment where there has been a payment of a dividend or other distribution on our common stock of shares of capital stock of any class or series, or similar equity interest, of or relating to a subsidiary or other business unit, that are, or, when issued, will be, listed or admitted for trading on a U.S. national securities exchange, which we refer to as the spin-off, each Fixed Conversion Rate will be increased based on the following formula: $\text{CR1} = \frac{\text{CR2} \times (\text{FMV} + \text{Dividend})}{\text{FMV}}$ where, CR2 =such Fixed Conversion Rate in effect immediately prior to the Open of Business on the ex-date for the spin-off; CR1 =such Fixed Conversion Rate in effect immediately after the Open of Business on the ex-date for the spin-off; FMV =the Average VWAP per share of the capital stock or similar equity interest distributed to holders of our common stock applicable to one share of our common stock over the ten consecutive Trading Day period commencing on, and including, the ex-date for the spin-off (the "evaluation period"); and MP0 =the Average VWAP per share of our common stock over the valuation period. The increase to each Fixed Conversion Rate under the preceding paragraph will be calculated as of the Close of Business on the last Trading Day of the valuation period but will be given retroactive effect as of immediately after the Open of Business on the ex-date of the spin-off. Because we will make the adjustment to each Fixed Conversion Rate with retroactive effect, we will delay the settlement of any conversion of the Mandatory Convertible Preferred Stock where any date for determining the number of shares of our common stock issuable to a holder occurs during the valuation period until the second Business Day after the last Trading Day of such valuation period. If such dividend or distribution is not so paid, each Fixed Conversion Rate shall be decreased, effective as of the date our Board or an authorized committee thereof determines not to make or pay such dividend or distribution, to be such Fixed Conversion Rate that would then be in effect if such dividend or distribution had not been declared. (4) If any cash dividend or distribution is made to all or substantially all holders of our common stock other than a regular, quarterly cash dividend that does not exceed \$0.13 per share (the "Initial Dividend Threshold"), each Fixed Conversion Rate will be adjusted based on the following formula: $\text{CR1} = \frac{\text{CR2} \times (\text{FMV} + \text{Dividend})}{\text{FMV}}$ where, CR2 =such Fixed Conversion Rate in effect immediately prior to the Close of Business on the record date for such dividend or distribution; CR1 =such Fixed Conversion Rate in effect immediately after the Close of Business on the record date for such dividend or distribution; SPO =the Average VWAP per share of our common stock over the ten consecutive Trading Day period ending on, and including, the Trading Day immediately preceding the ex-date for such distribution; T =the Initial Dividend Threshold; provided that if the dividend or distribution is not a regular quarterly cash dividend, the Initial Dividend Threshold will be deemed to be zero; and C =the amount in cash per share we distribute to all or substantially all holders of our common stock. The Initial Dividend Threshold is subject to adjustment in a manner inversely proportional to adjustments to each Fixed Conversion Rate; provided that no adjustment will be made to the Initial Dividend Threshold for any adjustment to each Fixed Conversion Rate under this clause (4). Any increase made under this clause (4) shall become effective immediately after the Close of Business on the record date for such dividend or distribution. If such dividend or distribution is not so paid, each Fixed Conversion Rate shall be decreased, effective as of the date our Board or an authorized committee thereof determines not to make or pay such dividend or distribution, to be such Fixed Conversion Rate that would then be in effect if such dividend or distribution had not been declared. Notwithstanding the foregoing, if $\text{CR1} \geq \text{CR2}$ (as defined above) is equal to or greater than CR2 (as defined above), or if the difference is less than \$1.00, in lieu of the foregoing increase, each holder shall receive, for each share of the Mandatory Convertible Preferred Stock, at the same time and upon the same terms as holders of shares of our common stock, the amount of cash that such holder would have received if such holder owned a number of shares of our common stock equal to the Maximum Conversion Rate on the record date for such cash dividend or distribution. (5) If we or any of our subsidiaries make a payment in respect of a tender or exchange offer for our common stock (and excluding a tender offer solely to holders of fewer than 100 shares of our common stock), to the extent that the cash and value of any other consideration included in the payment per share of common stock exceeds the Average VWAP per share of our common stock over the ten consecutive Trading Day period (the "averaging period") commencing on, and including, the Trading Day next succeeding the last date on which tenders or exchanges may be made pursuant to such tender or exchange offer (the "expiration date"), each Fixed Conversion Rate will be increased based on the following formula: $\text{CR1} = \frac{\text{CR2} \times (\text{FMV} + \text{Value})}{\text{FMV}}$ where, CR2 =such Fixed Conversion Rate in effect immediately prior to the Close of Business on the expiration date; CR1 =such Fixed Conversion Rate in effect immediately after the Close of Business on the expiration date; AC =the aggregate value of all cash and any other consideration (as determined by our Board or an authorized committee thereof in good faith) paid or payable for shares purchased in such tender or exchange offer; OS0 =the number of shares of our common stock outstanding immediately prior to the expiration date (prior to giving effect to the purchase of all shares accepted for purchase or exchange in such tender or exchange offer); OS1 =the number of shares of our common stock outstanding immediately after the expiration date (after giving effect to the purchase of all shares accepted for purchase or exchange in such tender or exchange offer); and SP1 =the Average VWAP of our common stock over the averaging period. The increase to each Fixed Conversion Rate under the preceding paragraph will be calculated at the Close of Business on the last Trading Day of the averaging period but will be given retroactive effect as of immediately after the Close of Business on the expiration date. Because we will make the adjustment to each Fixed Conversion Rate with retroactive effect, we will delay the settlement of any conversion of the Mandatory Convertible Preferred Stock where any date for determining the number of shares of our common stock issuable to a holder occurs during the averaging period until the second Business Day after the last Trading Day of the averaging period. For the avoidance of doubt, no adjustment under this clause (5) will be made if such adjustment would result in a decrease in any Fixed Conversion Rate; except as set forth below. In the event that we or one of our subsidiaries is obligated to purchase shares of common stock pursuant to any such tender offer or exchange offer, but we or such subsidiary is permanently prevented by applicable law from effecting any such purchases, or all such purchases are rescinded, then each Fixed Conversion Rate shall again be adjusted to be such Fixed Conversion Rate that would then be in effect if such tender offer or exchange offer had not been made (or had been made only in respect of the purchases that have been made and not rescinded). For the avoidance of doubt, for purposes of this clause (5), the term "offer" is used as such term is used in the Exchange Act and the term "exchange offer" means an exchange offer that constitutes a tender offer. We may, to the extent permitted by law and the rules of NYSE or any other securities exchange on which our common stock or the Mandatory Convertible Preferred Stock is then listed, increase each Fixed Conversion Rate by any amount for a period of at least 20 Business Days if such increase is irrevocable during such 20 Business Days and our Board, or a committee thereof, determines that such increase would be in our best interest. In addition, we may make such increases in each Fixed Conversion Rate as we deem advisable in order to avoid or diminish any income tax to holders of our common stock resulting from any dividend or distribution of shares of our common stock (or issuance of rights or warrants to acquire shares of our common stock) or from any event treated as such for income tax purposes or for any other reason. We may only make such a discretionary adjustment if we make the same proportionate adjustment to each Fixed Conversion Rate. Holders of the Mandatory Convertible Preferred Stock may, in certain circumstances, including a distribution of cash dividends to holders of our shares of common stock, be deemed to have received a distribution subject to U.S. Federal income tax as a dividend as a result of an adjustment or the nonoccurrence of an adjustment to the Fixed Conversion Rates. If we have a rights plan in effect upon conversion of the Mandatory Convertible Preferred Stock into common stock, such holder will receive, in addition to any shares of common stock received in connection with such conversion, the rights under the rights plan. However, if, prior to any conversion, the rights have separated from the shares of common stock in accordance with the provisions of the applicable rights plan, each Fixed Conversion Rate will be adjusted at the time of separation as if we distributed to all or substantially all holders of our common stock, shares of our capital stock, evidences of indebtedness, assets, property, rights, options or warrants as described in clause (3)(A) above, subject to readjustment in the event of the expiration, termination or redemption of such rights. We do not currently have a stockholder rights plan in effect. Adjustments to the Fixed Conversion Rates will be calculated to the nearest 1/10,000th of a share of our common stock. No adjustment to any Fixed Conversion Rate will be required unless the adjustment would require an increase or decrease of at least 1% of the Fixed Conversion Rate; provided, however, that if an adjustment is not made because the adjustment does not change the Fixed Conversion Rates by at least 1%, then such adjustment will be carried forward and taken into account in any future adjustment. Notwithstanding the foregoing, on each date for determining the number of shares of our common stock issuable to a holder upon any conversion of the Mandatory Convertible Preferred Stock, we will give effect to all adjustments that we have otherwise deferred pursuant to this sentence, and those adjustments will no longer be carried forward and taken into account in any future adjustment. The Fixed Conversion Rates will not be adjusted: (a) upon the issuance of any shares of our common stock pursuant to any present or future plan providing for the reinstatement of dividends or interest payable on our securities and the investment of additional optional amounts in common stock under any plan; (b) upon the issuance of any shares of our common stock or warrants, options, units or other rights to or securities exercisable for the purchase or issuance of those shares pursuant to any present or future retirement, deferred compensation, incentive, equity or other benefit plan or program or assumed by us or any of our subsidiaries; (c) upon the issuance of any shares of our common stock pursuant to any option, warrant, right or exercisable, exchangeable or convertible security not described in the preceding bullet and outstanding as of the Initial Issue Date; (d) for a change in the par value of our common stock; (e) for stock repurchases that are not tender or exchange offers referred to in clause (5) of the adjustments above, including structured or derivative transactions or pursuant to a stock repurchase program approved by our Board; (f) as a result of a tender offer that satisfies the exception described in clause (5) above for offers solely to holders of fewer than 100 shares of our common stock; (g) as a result of a tender or exchange offer by a person other than us or one or more of our subsidiaries; (h) for accumulated dividends on the Mandatory Convertible Preferred Stock, except as described above under "Mandatory Conversion, Early Conversion at the Option of the Holder" and "Conversion at the Option of the Holder upon Fundamental Change; Fundamental Change Dividend Make-Whole Amount"; or (i) as a result of a tender or exchange offer by a person other than us or one or more of our subsidiaries. Except as otherwise provided above, we will be responsible for making all calculations called for under the Mandatory Convertible Preferred Stock. These calculations include, but are not limited to, determinations of the Fundamental Change Stock Price, the VWAPs, the Average VWAPs and the Fixed Conversion Rates of the Mandatory Convertible Preferred Stock and shall be made in good faith. We will be required, within ten Business Days after the Fixed Conversion Rates are adjusted, to provide or cause to be provided written notice of the adjustment to the holders of the Mandatory Convertible Preferred Stock. We will also be required to deliver a statement setting forth in reasonable detail the method by which the adjustment to each Fixed Conversion Rate was determined and setting forth each adjusted Fixed Conversion Rate. For the avoidance of doubt, if an adjustment is made to the Fixed Conversion Rates, no separate inversely proportionate adjustment will be made to the Initial Price or the Threshold Appreciation Price because the Initial Price is equal to \$50.00 divided by the Maximum Conversion Rate (as adjusted in the manner described herein) and the Threshold Appreciation Price is equal to \$50.00 divided by the Minimum Conversion Rate (as adjusted in the manner described herein). Whenever the terms of the Mandatory Convertible Preferred Stock require us to calculate the VWAP per share of our common stock over a span of multiple days, our Board or an authorized committee thereof will make appropriate adjustments in good faith (including, without limitation, to the Applicable Market Value, the Early Conversion Average Price, the Fundamental Change Stock Price and the Average Price (as the case may be)) to account for any adjustments to the Fixed Conversion Rates (as the case may be) that become effective, or any event that would require such an adjustment if the ex-date, effective date, record date or expiration date (as the case may be) of such event occurs, during the relevant period used to calculate such prices or values (as the case may be). If a dividend or distribution on shares of our common stock occurs after the end of the 20 consecutive Trading Day period used for calculating the Applicable Market Value and before the Mandatory Conversion Date, and that dividend or distribution would have resulted in an adjustment of the number of shares issuable to the holders of the Mandatory Convertible Preferred Stock had such record date occurred on or before the last Trading Day of such 20-Trading Day period, then we will deem the holders of the Mandatory Convertible Preferred Stock to be holders of record of our common stock for purposes of that dividend or distribution. In this case, the holders of the Mandatory Convertible Preferred Stock would receive the dividend or distribution on our common stock together with the number of shares of our common stock issuable upon mandatory conversion of the Mandatory Convertible Preferred Stock. Recapitalizations, Reclassifications and Changes of Our Common Stock: In the event of: (a) any consolidation or merger of us with or into another person or any conversion of the Company or domestication in or transfer to a foreign jurisdiction; (b) any sale, transfer, lease or conveyance to another person of all or substantially all of our property and assets; (c) any reclassification of our common stock into securities, including securities other than our common stock; or (d) any statutory exchange of our securities with another person (other than in connection with a merger or acquisition or conversion of the Company or domestication in or transfer to a foreign jurisdiction), in each case, as a result of which our common stock would be converted into, or exchanged for, stock, other securities or other property or assets (including cash or any combination thereof) (each, a "Reorganization Event"), each share of the Mandatory Convertible Preferred Stock outstanding immediately prior to such Reorganization Event shall, without the consent of the holders of the Mandatory Convertible Preferred Stock, become convertible into the kind of stock, other securities or other property or assets (including cash or any combination thereof) that such holder would have been entitled to receive if such holder had converted its Mandatory Convertible Preferred Stock into common stock

the purpose of calculating the conversion rate if the second bullet is applicable, the value of a Unit of Exchange Property will be determined in good faith by our Board or an authorized committee thereof (which determination will be final), except that if a Unit of Exchange Property includes common stock or American Depositary Receipts, or âADRs,â that are traded on a U.S. national securities exchange, the value of such common stock or ADRs will be the average over the 20 consecutive Trading Day period used for calculating the Applicable Market Value of the volume-weighted average prices for such common stock or ADRs, as displayed on the applicable Bloomberg screen (as determined in good faith by our Board or an authorized committee thereof (which determination will be final)); or, if such price is not available, the average market value per share of such common stock or ADRs over such period as determined, using a volume-weighted average method, by a nationally recognized independent investment banking firm retained by us for this purpose. The provisions of this paragraph will apply to successive Reorganization Events, and the provisions summarized under âAnti-Dilution Adjustmentsâ will apply to any shares of capital stock or ADRs of us or any successor received by the holders of shares of our common stock in any such Reorganization Event.In connection with any adjustment to each Fixed Conversion Rate described above, we will also adjust the Initial Dividend Threshold (as defined under âAnti-Dilution Adjustmentsâ) based on the number of shares of common stock comprising the Exchange Property and (if applicable) the value of any non-stock consideration comprising the Exchange Property. If the Exchange Property is composed solely of non-stock consideration, the Initial Dividend Threshold will be zero.We (or any successor to us) will, as soon as reasonably practicable (but in any event within 20 calendar days) after the occurrence of any Reorganization Event provide written notice to the holders of the Mandatory Convertible Preferred Stock of such occurrence and of the kind and amount of cash, securities or other property that constitute the Exchange Property. Failure to deliver such notice will not affect the operation of the provisions described in this section.It is possible that certain consolidations, mergers, combinations or other transactions could result in tax gains or losses to the holders either as a result of the transaction or the conversion thereafter. Holders are encouraged to consult with their own tax advisors regarding the tax consequences of the ownership, disposition and conversion of the Mandatory Convertible Preferred Stock.Reservation of Shares: We will at all times reserve and keep available out of the authorized and unissued shares of common stock, solely for issuance upon conversion of the Mandatory Convertible Preferred Stock, the maximum number of shares of our common stock as shall be issuable from time to time upon the conversion of all the shares of the Mandatory Convertible Preferred Stock then outstanding.Transfer Agent, Registrar and Conversion and Dividend Disbursing Agent: Equiniti Trust Company, LLC is the transfer agent, registrar and conversion and dividend disbursing agent for the Mandatory Convertible Preferred Stock.Book-Entry, Delivery and Form: The Mandatory Convertible Preferred Stock will be issued in global form. DTC or its nominee will be the sole registered holder of the Mandatory Convertible Preferred Stock. Ownership of beneficial interests in the Mandatory Convertible Preferred Stock in global form will be limited to persons who have accounts with DTC (âParticipantsâ) or persons who hold interests through such Participants. Ownership of beneficial interests in the Mandatory Convertible Preferred Stock in global form will be shown on, and the transfer of that ownership will be effected only through, records maintained by DTC or its nominee (with respect to interests of Participants) and the records of Participants (with respect to interests of persons other than Participants).So long as DTC, or its nominee, is the registered owner or holder of a global certificate representing the shares of the Mandatory Convertible Preferred Stock, DTC or such nominee, as the case may be, will be considered the sole holder of the shares of the Mandatory Convertible Preferred Stock represented by such global certificate for all purposes under the Certificate of Designations. No beneficial owner of an interest in the shares of the Mandatory Convertible Preferred Stock in global form will be able to transfer that interest except in accordance with the applicable procedures of DTC in addition to those provided for under the Certificate of Designations.Payments of dividends on the global certificate representing the shares of the Mandatory Convertible Preferred Stock will be made to DTC or its nominee, as the case may be, as the registered holder thereof. None of us, the transfer agent, registrar, conversion or dividend disbursing agent will have any responsibility or liability for any aspect of the records relating to or payments made on account of beneficial ownership interests in a global certificate representing the shares of the Mandatory Convertible Preferred Stock or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.We expect that DTC or its nominee, upon receipt of any payment of dividends in respect of a global certificate representing the shares of the Mandatory Convertible Preferred Stock, will credit Participantsâ accounts with payments in amounts proportionate to their respective beneficial ownership interests in the aggregate Liquidation Preference of such global certificate representing the shares of the Mandatory Convertible Preferred Stock as shown on the records of DTC or its nominee, as the case may be. We also expect that payments by Participants to owners of beneficial interests in such global certificate representing the shares of the Mandatory Convertible Preferred Stock held through such Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers registered in the names of nominees for such customers. Such payments will be the responsibility of such Participants.Transfers between Participants in DTC will be effected in the ordinary way in accordance with DTC rules and will be settled in same-day funds.We understand that DTC is:âa limited purpose trust company organized under the laws of the State of New York;âa âbanking organizationâ within the meaning of New York Banking Law;âa member of the Federal Reserve System;âa âclearing corporationâ within the meaning of the Uniform Commercial Code; andâa âClearing Agencyâ registered pursuant to the provisions of Section 17A of the Exchange Act.DTC was created to hold securities for its Participants and facilitate the clearance and settlement of securities transactions between Participants through electronic book-entry changes in accounts of its Participants, thereby eliminating the need for physical movement of certificates. Participants include:âsecurities brokers and dealers;âbanks and trust companies; andâclearing corporations and certain other organizations.Indirect access to the DTC system is available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a Participant, either directly or indirectly (indirect Participants).Although DTC is expected to follow the foregoing procedures in order to facilitate transfers of interests in a global security among its Participants, it is under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued at any time. None of us, the transfer agent, registrar, conversion or dividend disbursing agent will have any responsibility for the performance by DTC or its Participants or indirect Participants of their respective obligations under the rules and procedures governing their operations.If DTC is at any time unwilling or unable to continue as a depository for the shares of the Mandatory Convertible Preferred Stock in global form or DTC ceases to be registered as a clearing agency under the Exchange Act, and in either case a successor depository is not appointed by us within 90 days, we will issue certificated shares in exchange for the global securities. Beneficial interests in the Mandatory Convertible Preferred Stock in global form held by any direct or indirect participant may also be exchanged for certificated shares upon request to DTC by such direct participant (for itself or on behalf of an indirect participant), to the transfer agent in accordance with their respective customary procedures.The information in this section concerning DTC and its book-entry system has been obtained from sources that we believe to be reliable, but we take no responsibility for the accuracy thereof.Certain Anti-Takeover EffectsWe are subject to the provisions of Section 203 of the DGCL, which, subject to certain exceptions, prohibits a Delaware corporation from engaging in any business combination with any interested stockholder for a period of three years following the time that such stockholder became an interested stockholder, unless:a.prior to such time, the board of directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder;b.upon consummation of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced, excluding for purposes of determining the number of shares outstanding those shares owned:i.by persons who are directors and also officers; andii.by employee stock plans in which employee participants do not have the right to determine confidentially whether shares held subject to the plan will be tendered in a tender or exchange offer; orc.at or subsequent to such time the business combination is approved by the board of directors and authorized at an annual or special meeting of the stockholders, and not by written consent, by the affirmative vote of at least 6 2/3% of the outstanding voting stock that is not owned by the interested stockholder.In general, Section 203 defines âbusiness combinationâ to include:a.any merger or consolidation involving (i) the corporation or a direct or indirect majority-owned subsidiary of the corporation and (ii) the interested stockholder or any other corporation, partnership or entity if the merger or consolidation is caused by the interested stockholder and as a result of such merger or consolidation any of (a), (b) or (c) above is not applicable to the surviving entity;b.any sale, lease, exchange, mortgage, transfer, pledge or other disposition of 10% or more of the assets or outstanding stock of the corporation or any direct or indirect majority-owned subsidiary of the corporation to or with the interested stockholder;c.subject to certain exceptions, any transaction that results in the issuance or transfer by the corporation or any direct or indirect majority-owned subsidiary of the corporation of any stock of the corporation or such subsidiary to the interested stockholder;d.any transaction involving the corporation or any direct or indirect majority-owned subsidiary of the corporation that has the effect of increasing the proportionate share of the stock of any class or series, or securities convertible into the stock of any class or series, of the corporation or any such subsidiary which is beneficially owned by the interested stockholder; ore.the receipt by the interested stockholder of the benefit, directly or indirectly, of any loans, advances, guarantees, pledges or other financial benefits provided by or through the corporation or any direct or indirect majority-owned subsidiary of the corporation.In general, Section 203 defines an âinterested stockholderâ as any person who or which beneficially owns 15% or more of the outstanding voting stock of the corporation or any person affiliated or associated with or controlling or controlled by the corporation that was the owner of 15% or more of the outstanding voting stock of the corporation at any time within the three-year period immediately prior to the date of determination if such person is an interested stockholder, and the affiliates and associates of such person.The existence of this provision would be expected to have an anti-takeover effect with respect to transactions not approved in advance by our board of directors, including discouraging takeover attempts that might result in a premium over the market price for the shares of common stock held by stockholders.Authorized but Unissued SharesOur authorized but unissued shares of common stock and preferred stock will generally be available for future issuance without your approval. We may use such additional shares for a variety of purposes, including future public offerings to raise additional capital, to fund acquisitions and as employee compensation. The existence of authorized but unissued shares of common stock and preferred stock could render more difficult or discourage an attempt to obtain control of Hewlett Packard Enterprise by means of a proxy contest, tender offer, merger or otherwise.7.625% Series C Mandatory Convertible Preferred StockHolders of our 7.625% Series C Mandatory Convertible Preferred Stock have the right to convert their shares upon the occurrence of a âFundamental Change,â which could have the effect of discouraging third parties from pursuing certain transactions with us, which may otherwise be in the best interest of our stockholders. See âPreferred Stockâ above.Exclusive ForumOur Bylaws provide that unless we select or consent in writing to the selection of an alternative forum (a) the sole and exclusive forum for any complaint asserting any internal corporate claims (as defined in Section 115 of the DGCL), to the fullest extent permitted by law, and subject to applicable jurisdictional requirements, shall be the Court of Chancery of the State of Delaware (or, if the Court of Chancery does not have, or declines to accept, jurisdiction, another state court or a federal court located within the State of Delaware); and (b) the sole and exclusive forum for any complaint asserting a cause of action arising under the Securities Act of 1933, as amended, to the fullest extent permitted by law, shall be the federal district courts of the United States of America. While the Delaware Supreme Court has upheld the validity of similar provisions under the DGCL, there is uncertainty as to whether a court in another state would enforce such a forum selection provision. Our exclusive forum provision does not relieve us of our duties to comply with the federal securities laws, and nothing in the exclusive forum provision of our Bylaws affects suits brought to enforce a duty or liability created by the Securities Exchange Act of 1934, as amended, or any other claim for which the federal courts have exclusive jurisdiction. EX-194 ex-19xhpeinsidertradingpol.htm EX-19 DocumentA A A A A A Exhibit 19Insider Trading PolicyPurposeCompliance with the U.S. securities laws is an area of critical importance to Hewlett Packard Enterprise Company (âHPEâ). In furtherance of that goal, HPE has developed this policy (the âPolicyâ) to help its directors, officers and employees comply with the federal securities laws and the rules of the U.S. Securities and Exchange Commission (âSECâ) relating to insider trading.It is important that you understand the breadth of activities that constitute illegal insider trading and the consequences, which can be serious. The U.S. Department of Justice (âDOJâ), the SEC, the New York Stock Exchange (âNYSEâ), and the Financial Industry Regulatory Authority (âFINRAâ) all investigate and are very effective at detecting insider trading violations. Cases have been successfully prosecuted against individuals as a result of trades involving only a small number of shares. There are no exceptions to this Policy, even for situations that may seem necessary or justifiable (such as the need to raise money for an emergency expenditure) or small transactions. If material non-public information is inadvertently disclosed â no matter what the circumstances â the person making or discovering that disclosure should immediately report the disclosure to HPEâs Insider Trading Compliance at InsiderTrading.Compliance@hpe.com. ScopeDuring the course of your association with HPE, you may receive important information that has not yet been publicly announced by HPE or concerning other publicly traded companies with which HPE has business dealings (âmaterial non-public informationâ). This Policy prohibits the purchase or sale of HPE securities, or securities of any Business Partner (as defined below in Section 7), while you are aware of material non-public information concerning HPE or such other publicly traded company which you acquired as a result of performing your duties at HPE. This Policy must be followed by all full- and part-time HPE employees and contractors, all members of the HPE Board of Directors, and all of HPEâs external advisors (all of which are collectively referred to in this policy as âcovered personsâ).This Policy also applies to (i) anyone who lives in a covered personâs household and any family members who do not live with a covered person, but whose transactions in HPE securities or the securities of Business Partners are directed by, or are subject to, a covered personâs influence or control, such as parents or children who consult with the covered person before they trade in HPE securities (collectively, âFamily Membersâ) and (ii) entities controlled by a covered person or the covered personâs Family Members (âRelated Entitiesâ). It is your obligation to make Family Members and Related Entities aware of, and understand and comply with, the provisions and obligations of this Policy. 1.Prohibited Activity.The U.S. securities laws prohibit any person from trading in securities of an issuer while the person is aware of material non-public information about that issuer. A covered person who is aware of material non-public information about HPE may not legally trade in HPE securities until a reasonable time (usually 24 hours) after HPE discloses the information to the public. The same trading restrictions that apply to covered persons under the U.S. insider trading laws also apply to Family Members and Related Entities. In addition, covered persons who are aware of material non-public information when their employment or other service relationship with HPE terminates may not trade in HPE securities until that information has been publicly disclosed or is no longer material.U.S. insider trading laws also prohibit âtipping,â which covers disclosing or passing material non-public information to others or making recommendations to others about the purchase or sale of HPE securities while a person is aware of material non-public information, and such other persons then trade in HPE securities or the securities of Business Partners (a âtippeeâ). This behavior is prohibited, even if you do not receive a benefit or the tippee does not receive a benefit from the transaction. This Policy also prohibits you from causing another person to trade on the basis of material non-public information.U.S. insider trading laws apply to people outside the U.S. who trade within the U.S. Similar laws in other countries may apply to trading by covered persons who are located in those countries or to trades on exchanges that are located there. In addition, Member States of the European Union have implemented legislation restricting insider trading, and many other European countries apply similar laws.2.Material Information.Information is âmaterialâ if there is a substantial likelihood that a reasonable investor would consider it important in making an investment decision (i.e., to buy, hold or sell securities), or there is a substantial likelihood that the information would have been viewed by a reasonable investor as having significantly altered the total mix of information made available. Any information that could be expected to affect the price of a security, whether it is positive or negative, should be considered material. The below list contains some examples of information that ordinarily would be regarded as material:âConsolidated reported worldwide, reporting segment or regional revenue, margins, earnings or other significant financial information, including guidance, projections, and/or forecasts;âMergers, acquisitions, tender offers, joint ventures or changes in assets;âMajor new products or discoveries;âSignificant customer or supplier news;âChanges in control or changes in executive management;âChanges in auditors or auditor resignation;âEvents affecting HPEâs securities, such as a change in dividend policy, the declaration of a stock split or stock dividend, the approval of a repurchase plan, or an offering of additional securities;âActual or threatened major litigation or the resolution of such litigation; âKnowledge of a significant data security, privacy or cybersecurity incident; orâCommunications with government agencies.The foregoing list is not exhaustive; other kinds of information also may be material, depending on their quantitative and qualitative significance. Covered personsâ transactions will be scrutinized after the fact, with the benefit of hindsight. As a practical matter, before engaging in any transaction, all covered persons should carefully consider how enforcement authorities and others might view the transactions in hindsight. Questions concerning the materiality of particular information should be resolved in favor of concluding that it is material. When in doubt, it is best not to transact in HPE securities. 3.Non-public Information.Non-public information is information that has not been disseminated in a manner making it generally available to investors and giving them a reasonable time to react to the information. Generally speaking, information will be considered publicly disseminated after one full trading day has elapsed since the date of public disclosure of the information. For example, if the release/call/filing occurs prior to the

market opening on a Wednesday, the blackout ends at the close of regular trading on Wednesday, and a covered person could resume trading on the following Thursday (assuming the covered person is not otherwise aware of material non-public information).An SEC filing, a widely disseminated HPE press release or a properly noticed, publicly available webcast generally are acceptable methods of disseminating information such that, following such dissemination and the passage of the time period noted above, the information will no longer be considered non-public. However, information disseminated solely through other methods, such as a posting on HPEâ€™s internal or external website or in a meeting, conference or presentation not open to the general public or major media, likely would not satisfy this requirement.4.Trading Activities.Trading activities in HPE securities that are prohibited while a covered person is aware of material non-public information (and during any applicable closed trading window, as discussed below) include:â€¢Buying or selling HPE shares in the open market (including short selling of HPE securities);â€¢Buying or selling HPE debt securities (debentures, bonds or notes);â€¢Selling shares that were purchased upon exercise of an HPE stock option;â€¢Making a cash payment to avoid the sale or withholding of HPE shares that would otherwise have been executed by HPE on behalf of the covered person to cover amounts that must be withheld for the payment of taxes upon the vesting of a stock award (a covered person may elect to pay (or pre-pay) the tax that will be due when a stock award vests, provided that (i) the election is made during an open trading window and when the covered person is not aware of any material non-public information about HPE, and (ii) the election is irrevocable such that it will result in the automatic payment of such tax in cash at the time of vesting without any further action by the covered person);â€¢Increases or decreases in the portion of an HPE employeeâ€™s periodic contributions to HPEâ€™s 401(k) plan for the U.S. that will be allocated to an HPE stock fund account;â€¢Increases (including new enrollment) or decreases in the HPE employeeâ€™s periodic contribution rate to the HPE employee stock purchase plan;â€¢Borrowing money against a 401(k) plan account or prepaying a 401(k) plan loan where the borrowing or loan prepayment will result in the increase or decrease of the funds in an HPE stock fund account in the 401(k) plan;â€¢Transferring funds to or from an HPE stock fund account in the 401(k) plan; enrolling in the HPE employee stock purchase plan;â€¢Selling HPE shares purchased under the HPE employee stock purchase plan; â€¢Gifts of HPE shares; andâ€¢Voluntary purchases resulting from any additional contributions made to the HPE dividend reinvestment plan.Trading activities in HPE securities that are not prohibited while a covered person is aware of material non-public information (and that are not prohibited during any applicable closed trading window, as discussed below) include:â€¢Regular, continuing purchases of HPE shares through HPEâ€™s employee stock purchase plan are not prohibited if the HPE employee already is enrolled in the plan;â€¢Purchases of HPE shares under HPEâ€™s 401(k) plan for the U.S. resulting from periodic contributions to the plan pursuant to automatic payroll deductions;â€¢Purchases, without sale, of shares through the exercise of an HPE stock option, where such exercise also does not involve the sale of any shares;â€¢Automatic purchases of HPE shares under the HPE dividend reinvestment plan resulting from the reinvestment of dividends paid on HPE shares; orâ€¢Trades pursuant to a pre-approved Rule 10b5-1 trading plan (as discussed below).This Policy does not apply to the vesting of restricted stock or the vesting and delivery of restricted stock units and performance-based equity awards. This Policy does apply, however, to any market sale by a covered person of any stock underlying such equity awards, even if the sale is to satisfy any tax obligations arising with respect to the equity awards. For the avoidance of doubt, the foregoing prohibition does not apply to the exercise of a tax withholding right pursuant to which you elect to have HPE withhold shares of common stock subject to such equity awards to satisfy tax withholding requirements.5.Trading Windows.HPE imposes quarterly â€œtrading windowsâ€ on certain individuals, including:â€¢Members of the HPE Board of Directors;â€¢HPE executives who are designated by the Board of Directors as â€œofficersâ€ pursuant to Section 16 of the Exchange Act (collectively, the â€œSection 16 Officersâ€ and, together with the members of the Board of Directors, the â€œSection 16 Insidersâ€); â€¢HPE vice presidents (including non-Section 16 Officer executive vice presidents and senior vice presidents);â€¢HPE director-level employees;â€¢Employees in the Legal Department at the â€œstrategicâ€ job level; andâ€¢All other employees and other covered persons with access to some or all of the following interim financial data about HPEâ€™s fiscal quarter-to-date results:oHPE worldwide or regional consolidated top and/or bottom line financial information; oHPE worldwide top and/or bottom line financial information for one or more reporting segments.Those persons and their Family Members and Related Entities may trade HPE securities only during the period that the trading window is â€œopenâ€ and only if they are not then aware of any material non-public information about HPE. HPEâ€™s quarterly trading windows tentatively open with the market 24 hours after quarterly or annual earnings results are released and close on the last trading day of the second month of the fiscal quarter.A trading calendar specifying the period of each quarterly trading window will be published in advance of each fiscal year and will be posted on the Insider Trading Compliance site. Additionally, trading window notices are sent quarterly before the earnings release to all persons who have been identified as being subject to trading window restrictions, notifying them of the period that their trading window will be open during the next quarter. Such notifications will also be published on the Insider Trading Compliance site. However, each such person is required to comply with the trading window during a particular quarter, even if he or she did not receive a trading window notice. Any failure to review, or the failure of HPE to provide, periodic notices and/or memorandums regarding quarterly trading windows is not an excuse for failure to comply with this Policy.In addition to adhering to the quarterly trading windows, please note that special blackout periods may be imposed from time to time if, in the judgment of Internal Trading Compliance or the Deputy General Counsel, Corporate Securities and M&A, there exists undisclosed information that would make trading in HPE securities inappropriate for certain or all covered persons. The fact that a special blackout period has been imposed, or that a quarterly trading window has been shortened, should itself be considered material non-public information. Even during an open trading window when a blackout period is not in effect, at no time may covered persons (including their Family Members and Related Entities) trade in HPE securities when aware of material non-public information about HPE. For example, a person that is aware that HPE is about to sign and announce a large acquisition should not trade in HPE securities until the transaction is signed and announced or negotiations are terminated, regardless of whether the trading window is open or closed.6.Pre-Clearance and Advance NoticeIn order to avoid unintentional violations of federal securities laws, the Section 16 Insiders are required to pre-clear any transaction (i.e., sales, purchases or gifts in HPE securities) with Insider Trading Compliance at InsiderTrading.Compliance@hpe.com before engaging in the transaction. Pre-clearance is required so that HPE will be in a position to aid the individual in determining whether material non-public information exists, avoiding short-swing profit recovery, and assuring that appropriate Form 4, Form 5 and Form 144 filings are timely made with the SEC, if required. If a Section 16 Insiderâ€™s request to transact in HPE securities is approved, such approval will remain in effect until the earlier of the then-open trading window closure or the Section 16 Insider learns of any material non-public information. 7.Trading in Securities of Other Companies.HPE policy prohibits trading in the securities of any company (i) with which HPE does business, such as customers, channel partners, suppliers, and other business partners or (ii) that is involved in a potential transaction or business relationship with HPE, such as potential acquisition targets (such companies, â€œBusiness Partnersâ€), by persons who are aware of material non-public information about such company acquired as a result of performing his or her duties at HPE. To facilitate compliance with these restrictions, HPE may impose temporary trading windows on covered persons who are working on transactions involving HPE and one or more other publicly traded companies in the situation referenced in clause (ii) above. If that occurs, those covered persons will be notified that they may not trade in the securities of such other company until all material non-public information about the transaction and that company is no longer non-public or no longer material. In addition, if the transaction is potentially material to HPE, the temporary trading restriction also may extend to trading in HPE securities.You should also be aware that insider trading includes situations where, among other things, the individual trades in the securities of other companies that are economically-linked to HPE (e.g., competitors) based on material non-public information concerning HPE or its securities obtained as a result of performing his or her duties at HPE.8.Prohibited Transactions.Covered persons may not engage in any of the following transactions at any time:Short SalesShort sales of HPEâ€™s securities evidence an expectation on the part of the seller that the securities will decline in value. Short sales of HPEâ€™s securities may also be a signal to the market that the seller does not have confidence in HPE or its prospects. In addition, short sales of HPE securities may reduce the sellerâ€™s incentive to improve HPEâ€™s performance since the seller can benefit from a decline in the value of HPEâ€™s securities. For these reasons, short sales of HPEâ€™s securities by covered persons are prohibited.OptionsA transaction in options (other than options granted under an HPE stock option plan) is, in effect, a bet on the short-term movement of HPEâ€™s stock and, therefore, could create an impression that the trader is trading based on material non-public information. Transactions in options also may focus a covered personâ€™s attention on short-term performance at the expense of HPEâ€™s long-term objectives. Accordingly, transactions by covered persons in puts, calls or other derivatives of HPEâ€™s securities, regardless of whether or not such securities or derivatives are traded on an exchange or in any other organized market, are prohibited.Hedging TransactionsCertain transactions, such as prepaid variable forwards, equity swaps, collars and exchange funds, may allow a person to lock in much of the value of his or her stock holdings, often in exchange for giving up all or part of the potential for upside appreciation in the stock. These transactions allow the person to continue to own the covered securities, but without the full risks and rewards of ownership. When that occurs, a covered person may no longer have the same objectives as HPEâ€™s other stockholders. Therefore, covered persons are prohibited from engaging in any such transactions that involve HPE securities. Any questions about what constitutes a â€œhedging transactionâ€ for purposes of this paragraph should be directed to Insider Trading Compliance at InsiderTrading.Compliance@hpe.com. Margin Accounts and PledgesSecurities held in a â€œmargin account,â€ which shall be deemed to mean a margin account in which HPE securities are subject to margin calls, may be sold by the broker without the customerâ€™s consent if the customer fails to meet a margin call. Similarly, securities pledged as collateral for a loan may be sold in foreclosure if the borrower defaults on the loan or, in many instances, if the value of the collateral falls. Because a margin sale or foreclosure sale may occur at a time when the pledgor is aware of material non-public information about HPE, covered persons are prohibited from holding HPE securities subject to margin calls in a margin account or pledging such securities as collateral.9.Rule 10b5-1 Trading Plans.U.S. insider trading laws permit a person to establish a â€œRule 10b5-1 planâ€ at a time when the person is not aware of any material non-public information about HPE and then trade in HPE securities at a later time, even if that person is aware of material non-public information about HPE at the time of the transaction. Covered persons may only establish a 10b5-1 plan during an open window period, when not in possession of material, non-public information for use when trading in HPE securities. Information about establishing a Rule 10b5-1 plan is available on the Insider Trading Compliance site at: ITC 10b5-1 Information.10.Post-Termination TransactionsThe Policy continues to apply to your transactions in HPE securities or securities of other public companies engaged in business transactions with HPE even after your association with HPE has terminated. If you are aware of material non-public information when your relationship with HPE concludes, you, your Family Members, and any Related Entities may not trade in HPE securities or securities of such other company until that information has become public or is no longer material.11.Company Repurchases of SharesFrom time to time, HPE may engage in transactions in its own securities. It is HPEâ€™s policy to comply with all applicable securities and state laws (including obtaining appropriate approvals by the Board of Directors or appropriate committee(s), if required) and this Policy when engaging in transactions in HPEâ€™s securities.ConsequencesCompliance with this Policy is essential as there can be severe penalties for any failure to comply with the federal securities laws and SEC rules relating to insider trading, as well as disciplinary action by HPE. For example, if a covered person violates insider trading laws, both the covered person and HPE may be subject to severe civil and criminal penalties. The DOJ, SEC, NYSE, and FINRA investigate and pursue insider trading violations vigorously. A violation of the insider trading laws also constitutes a violation of HPEâ€™s Standards of Business Conduct.The consequences of a violation of this Policy are severe:Traders and Tippees. Covered persons (or tippees) who trade on the basis of material non-public information can be subject to the following penalties (in addition to dismissal from HPE):â€¢Forfeiture of trading gains or losses avoided, as well as civil penalties of up to three times the trading gains made or losses avoided;â€¢A criminal fine of up to \$5,000,000 (no matter how small the profit);â€¢A jail term of up to 20 years;â€¢Injunctions against future violations; andâ€¢Private party damages.If a covered person tips information to a person who then trades, the covered person can be subject to the same penalties as the tippee, even if the covered person did not trade and did not profit from the trading made by the person who receives the tip.Control Persons. HPE and HPE management, if they fail to take appropriate steps to prevent illegal insider trading, can be subject to â€œcontrolling personâ€ liability for an insider trading violation, with the following potential penalties:â€¢A civil penalty of up to \$1,000,000 (as adjusted for inflation from time to time per SEC guidelines) or, if greater, three times the profit gained or loss avoided as a result of the associateâ€™s violation; andâ€¢A criminal fine of up to \$25,000,000.Company-Imposed Sanctions. Failure to comply with this Policy may also subject covered persons to disciplinary action, including dismissal for cause, whether or not the covered personâ€™s failure to comply results in a violation of law.TrainingThe Legal Department will provide training through the Insider Trading Compliance staff with respect to these policies and procedures and HPEâ€™s compliance with them and with the federal securities laws and SEC rules relating to insider trading periodically as appropriate. Overview and Summary of Significant Accounting Policies	12 Months Ended
	Oct. 31, 2024
Accounting Policies [Abstract]	

[Overview and Summary of Significant Accounting Policies](#)

Background	Hewlett Packard Enterprise Company ("Hewlett Packard Enterprise," "HPE," or the "Company") is a global technology leader focused on developing intelligent solutions that allow customers to capture, analyze and act upon data seamlessly from edge to cloud. Hewlett Packard Enterprise enables customers to accelerate business outcomes by driving new business models, creating new customer and employee experiences, and increasing operational efficiency today and into the future. Hewlett Packard Enterprise's customers range from small- and medium-sized businesses to large global enterprises and governmental entities. <i>Basis of Presentation and Principles of Consolidation</i> The Consolidated Financial Statements are prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). The accompanying Consolidated Financial Statements include the accounts of the Company and its subsidiaries and affiliates in which the Company has a controlling financial interest or is the primary beneficiary. All intercompany transactions and accounts within the consolidated businesses of the Company have been eliminated. The Company consolidates a Variable Interest Entity ("VIE") where it has been determined that the Company is the primary beneficiary of the entity's operation. The primary beneficiary is the party that has both the power to direct the activities that most significantly impact the VIE's economic performance and the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE. In evaluating whether the Company is the primary beneficiary, the Company evaluates its power to direct the most significant activities of the VIE by considering the purpose and design of the entity and the risks the entity was designed to create and pass through to its variable interest holders. The Company also evaluates its economic interests in the VIE. The Company accounts for investments in companies over which it has the ability to exercise significant influence but does not hold a controlling interest under the equity method of accounting, and the Company records its proportionate share of income or losses in Earnings from equity interests in the Consolidated Statements of Earnings. Non-controlling interests are presented as a separate component within Total stockholders' equity in the Consolidated Balance Sheets. Net earnings attributable to non-controlling interests are recorded within Interest and other, net in the Consolidated Statements of Earnings and are not presented separately, as they were not material for any periods presented. <i>Segment Realignment</i> Effective as of the beginning of fiscal 2024, in order to align the segment financial reporting more closely with its business structure, the Company established two new reportable segments, Hybrid Cloud and Server. Hybrid Cloud includes the historical Storage segment, HPE GreenLake Flex Solutions (which provides flexible as-a-service ("aaS") IT infrastructure through the HPE GreenLake cloud and was previously reported under the Compute and the High Performance Computing & Artificial Intelligence ("HPC & AI") segments), Private Cloud, and Software (previously reported under the Corporate Investments and Other segment). The Server segment combines the previously separately reported Compute and HPC & AI segments, with adjustments for certain product lines that are now reported in Hybrid Cloud. Additionally, certain products and services previously reported in the financial results for the HPC & AI segment were moved to be reported in the Hybrid Cloud segment, and the Athonet business and certain components of the Communications and Media Solutions ("CMS") business, both previously reported in the financial results for Corporate Investments and Other, moved to be reported in the Intelligent Edge segment. As a result, the Company's organizational structure for fiscal 2024 consisted of the following segments: (i) Server; (ii) Hybrid Cloud; (iii) Intelligent Edge; (iv) Financial Services; and (v) Corporate Investments and Other. The Company began reporting under this re-aligned segment structure beginning with the results of the first quarter of fiscal 2024 included in the Quarterly Report on Form 10-Q for the fiscal quarter ended January 31, 2024. These changes had no impact on Hewlett Packard Enterprise's previously reported consolidated net revenue, net earnings, net earnings per share ("EPS") or total assets. <i>Russia/Ukraine Conflict</i> In response to the conflict between Russia and Ukraine and the related sanctions imposed by the U.S., European Union and other countries, the Company determined that it was no longer tenable to maintain its operations in Russia and Belarus and has been proceeding with an orderly, managed exit of its remaining business in these countries. During fiscal 2022, the Company recorded total pre-tax charges of \$161 million primarily related to expected credit losses of financing and trade receivables, employee severance and abandoned assets, \$99 million of which was included in Financing cost, \$12 million in Cost of services and \$50 million in Disaster charges in the Consolidated Statements of Earnings. <i>Use of Estimates</i> The preparation of financial statements requires management to make estimates, judgments and assumptions that affect the amounts reported in the Consolidated Financial Statements and

accompanying notes. Estimates are assessed each period and updated to reflect current information, including those related to revenue recognition, stock-based compensation, net periodic benefit costs, restructuring accruals, provision for taxes, valuation allowance for deferred taxes, provision for expected credit losses, inventory reserves, and impairment assessments of goodwill, intangible assets and other long-lived assets. The Company believes that these estimates, judgments and assumptions are reasonable under the circumstances, and are subject to significant uncertainties, some of which are beyond the Company's control. Should any of these estimates change, it could adversely affect the Company's results of operations. Actual results could differ materially from these estimates under different assumptions or conditions.

Foreign Currency Translation

The Company predominately uses the U.S. dollar as its functional currency. Assets and liabilities denominated in non-U.S. currencies are remeasured into U.S. dollars at current exchange rates for monetary assets and liabilities and at historical exchange rates for non-monetary assets and liabilities. Net revenue, costs and expenses denominated in non-U.S. currencies are recorded in U.S. dollars at the average rates of exchange prevailing during the period. The Company includes gains or losses from foreign currency remeasurement in Interest and other, net in the Consolidated Statements of Earnings and gains and losses from cash flow hedges in Net revenue as the hedged revenue is recognized. Certain non-U.S. subsidiaries designate the local currency as their functional currency, and the Company records the translation of their assets and liabilities into U.S. dollars at the balance sheet date as translation adjustments and includes them as a component of Accumulated other comprehensive loss in the Consolidated Balance Sheets.

Revenue Recognition

The Company accounts for a contract with a customer when both parties have provided written approval and are committed to perform, each party's rights including payment terms are identified, the contract has commercial substance, and collection of consideration is probable.

The Company enters into contracts with customers that typically include combinations of products and services, resulting in arrangements containing multiple performance obligations for hardware and software products and/or various services. The Company determines whether each product or service is distinct in order to identify the performance obligations in the contract and allocate the contract transaction price among the distinct performance obligations. Arrangements are distinct based on whether the customer can benefit from the product or service on its own or together with other resources that are readily available and whether the commitment to transfer the product or service to the customer is separately identifiable from other obligations in the contract. The Company classifies its hardware, perpetual software licenses, service arrangements and software-as-a-service ("SaaS") as distinct performance obligations. Term software licenses represent multiple obligations, which include software licenses and software maintenance. In transactions where the Company delivers hardware or software, it is typically the principal and records revenue and costs of goods sold on a gross basis.

The majority of the Company's revenue is derived from sales of products and services and the associated support and maintenance, and such revenue is recognized when, or as, control of promised products or services is transferred to the customer, in an amount that reflects the consideration to which the Company expects to be entitled, in exchange for those products or services. Variable consideration offered in contracts with customers, partners and distributors may include rebates, volume-based discounts, price protection, and other incentive programs. Variable consideration is estimated at contract inception and updated at the end of each reporting period as additional information becomes available and recognized only to the extent that it is probable that a significant reversal of revenue will not occur.

Transfer of control occurs once the customer has the contractual right to use the product, generally upon delivery once title and risk of loss has transferred to the customer. Transfer of control can also occur over time for maintenance and services as the customer receives the benefit over the contract term. The Company's hardware and perpetual software licenses are distinct performance obligations where revenue is recognized upfront upon transfer of control. Term software licenses include multiple performance obligations where the term licenses are recognized upfront upon transfer of control, with the associated software maintenance revenue recognized ratably over the contract term as services and software updates are provided. SaaS arrangements have one distinct performance obligation which is satisfied over time with revenue recognized ratably over the contract term as the customer consumes the services. On its product sales, the Company records consideration from shipping and handling on a gross basis within net product sales. Revenue is recorded net of any associated sales taxes.

The Company allocates the transaction price for the contract among the performance obligations on a relative standalone selling price basis ("SSP"). For products and services sold as a bundle, the SSP is generally not directly observable and requires the Company to estimate SSP based on management judgment by considering available data such as internal margin objectives, pricing strategies, market/competitive conditions, historical profitability data, as well as other observable inputs. For certain products and services, the Company establishes SSP based on the observable price when sold separately in similar circumstances to similar customers. The Company establishes SSP ranges for its products and services and reassesses them periodically.

Judgment is applied in determining the transaction price as the Company may be required to estimate variable consideration when determining the amount of revenue to recognize. Variable consideration may include various rebates, volume-based discounts, price protection, and other incentive programs that are offered to customers, partners and distributors. When determining the amount of revenue to recognize, the Company estimates the expected usage of these programs, applying the expected value or most likely estimate and updates the estimate at each reporting period as actual utilization becomes available. The Company also considers the customers' right of return in determining the transaction price, where applicable.

Contract Balances

Accounts receivable and contract assets

A receivable is a right to consideration in exchange for products or services the Company has transferred to a customer that is unconditional. A contract asset is a right to consideration in exchange for products or services transferred to a customer that is conditional on something other than the passage of time. A receivable is recorded when the right to consideration becomes unconditional.

The Company's contract assets include unbilled receivables which are recorded when the Company recognizes revenue in advance of billings. Unbilled receivables generally relate to services contracts where a service has been performed and control has transferred, but invoicing to the customer is subject to future milestone billings or other contractual payment schedules. The Company classifies unbilled receivables as Accounts receivable.

Contract liabilities

A contract liability is an obligation to transfer products or services to a customer for which the Company has received consideration, or the amount is due, from the customer. The Company's contract liabilities primarily consist of deferred revenue and customer deposits. Deferred revenue is recorded when amounts invoiced to customers are in excess of revenue that can be recognized because performance obligations have not been satisfied and control of the promised products or services has not transferred to the customer. Deferred revenue largely represents amounts invoiced in advance for product (hardware/software) support contracts, consulting projects and product sales where revenue cannot be recognized yet. Customer deposits largely represent payments received from customers in advance of the Company's completion of its contractual obligations. As customer acceptance milestones are met, the Company will recognize revenue and reduce the amount of contract liabilities.

Costs to obtain a contract with a customer

The Company capitalizes the incremental costs of obtaining a contract with a customer, primarily sales commissions, if the Company expects to recover those costs. The Company has elected, as a practical expedient, to expense the costs of obtaining a contract as incurred for contracts with terms of one year or less. The typical amortization periods used range from two to five years. The Company periodically reviews the capitalized sales commission costs for possible impairment losses. The amortization of capitalized costs to obtain a contract are included in Selling, general and administrative expense. Refer to Note 7, "Balance Sheet Details" for additional information.

Shipping and Handling

The Company includes costs related to shipping and handling in Cost of products.

Stock-Based Compensation

Stock-based compensation expense is based on the measurement date fair value of the award and is recognized only for those awards expected to meet the service and performance vesting conditions. Stock-based compensation expense for stock options and restricted stock units with only a service condition is recognized on a straight-line basis over the requisite service period of the award. For stock options and restricted stock units with both a service condition and a performance or market condition, the expense is recognized on a graded vesting basis over the requisite service period of the award. Stock-based compensation expense is determined at the aggregate grant level for service-based awards and at the individual vesting tranche level for awards with performance and/or market conditions. The forfeiture rate is estimated based on historical experience.

Retirement and Post-Retirement Plans

The Company has various defined benefit, other contributory and noncontributory, retirement and post-retirement plans. The costs and obligations for these plans depend on various assumptions. Major assumptions relate primarily to discount rates, mortality rates, expected increases in compensation levels and the expected long-term return on plan assets. These assumptions vary by plan, and the weighted-average rates used are set forth in Note 4, "Retirement and Post-Retirement Benefit Plans."

The discount rate assumption is based on current investment yields of high-quality fixed-income securities with maturities similar to the expected benefits payment period. Mortality rates help predict the expected life of plan participants and are based on a historical demographic study of the plan. The expected increase in the compensation levels assumption reflects long-term actual experience and future expectations. The expected long-term return on plan assets is determined based on asset allocations, historical portfolio results, historical asset correlations and management's expected returns for each asset class. In any fiscal year, significant differences may arise between the actual return and the expected long-term return on plan assets. Historically, differences between the actual return and expected long-term return on plan assets have resulted from changes in target or actual asset allocation, short-term performance relative to expected long-term performance, and to a lesser extent, differences between target and actual investment allocations, the timing of benefit payments compared to expectations, and the use of derivatives intended to effect asset allocation changes or hedge certain investment or liability exposures.

The following table provides the impact changes in the weighted-average assumptions of discount rates, the expected increase in compensation levels and the expected long-term return on plan assets would have had on the net periodic benefit cost for fiscal 2024:

	Change in basis points	Change in Net Periodic Benefit Cost In millions
Assumptions:		
Discount rate	(25)	\$ 17
Expected increase in compensation levels	25	3
Expected long-term return on plan assets	(25)	\$ 25

The Company generally amortizes unrecognized actuarial gains and losses on a straight-line basis over the average remaining estimated service life or, in the case of closed plans, life expectancy of participants. In limited cases, actuarial gains and losses are amortized using the corridor approach.

Advertising

Costs to produce advertising are expensed as incurred during production. Costs to communicate advertising are expensed when the advertising is first run. Advertising expense totaled approximately \$117 million, \$173 million, and \$179 million in fiscal 2024, 2023, and 2022, respectively.

Restructuring

The Company's transformation programs include charges to approved restructuring plans. Restructuring charges include severance costs to eliminate a specified number of employees, infrastructure charges to vacate facilities and consolidate operations, and contract cancellation costs. These restructuring actions require management to estimate the timing and amount of severance and other employee separation costs for workforce reduction and enhanced early retirement programs, the fair value of assets made redundant or obsolete, and the value of lease and contract cancellation and other exit costs. The Company records restructuring charges based on estimated employee terminations and site closure and consolidation plans. The Company accrues for severance and other employee separation costs under these actions when it is probable that benefits will be paid and the amount is reasonably estimable. The rates used in determining severance accruals are based on existing plans, historical experiences and negotiated settlements. For a full description of the Company's restructuring actions, refer to the discussions in Note 3, "Transformation Programs."

Taxes on Earnings

The Company recognizes deferred tax assets and liabilities for the expected tax consequences of temporary differences between the tax bases of assets and liabilities and their reported amounts using enacted tax rates in effect for the year the differences are expected to reverse.

The Company records a valuation allowance to reduce deferred tax assets to the amount that is more likely than not to be realized. In determining the need for a valuation allowance, the Company considers future market growth, forecasted earnings, future sources of taxable income, the mix of earnings in the jurisdictions in which the Company operates, and prudent and feasible tax planning strategies. In the event the Company were to determine that it is more likely than not that the Company will be unable to realize all or part of its deferred tax assets in the future, the Company would increase the valuation allowance and recognize a corresponding charge to earnings in the period in which such a determination was made. Likewise, if the Company later determines that the deferred tax assets are more likely than not to be realized, the Company would reverse the applicable portion of the previously recognized valuation allowance. In order for the Company to realize deferred tax assets, the Company must be able to generate sufficient taxable income, of the appropriate character, in the jurisdictions in which the deferred tax assets are located, prior to their expiration under applicable tax laws.

The Company records accruals for uncertain tax positions when the Company believes that it is not more likely than not that the tax position will be sustained on examination by the taxing authorities based on the technical merits of the position. The provision for income taxes includes the effects of adjustments for uncertain tax positions as well as any related interest and penalties. The Company recognizes interest income from favorable settlements and interest expense and penalties accrued on unrecognized tax benefits in Provision for taxes in the Consolidated Statements of Earnings.

The Company is subject to the Global Intangible Low Taxed Income ("GILTI") tax in the U.S. The Company elected to treat taxes on future GILTI inclusions in U.S. taxable income as a current period expense when incurred.

Allowance for Doubtful Accounts

Accounts Receivable

The allowance for expected credit losses related to accounts receivable is comprised of a general reserve and a specific reserve. The Company may record a specific reserve for individual accounts when the Company becomes aware of specific customer circumstances, such as in the case of a bankruptcy filing or deterioration in the customer's operating results or financial position. If there are additional changes in circumstances related to the specific customer, the Company further adjusts estimates of the recoverability of receivables. The Company maintains an allowance for credit losses for all other

customers based on a variety of factors, including the financial condition of customers and the length of time receivables are past due. These qualitative factors are subjective and require a degree of management judgment. The past due or delinquency status of a receivable is based on the contractual payment terms of the receivable. The Company establishes an allowance for expected credit losses related to accounts receivable, including unbilled receivables.

Financing Receivable

The allowance for expected credit losses related to financing receivables is comprised of a general reserve and a specific reserve. The Company establishes a specific reserve for financing receivables with identified exposures, such as customer defaults, bankruptcy or other events, that make it unlikely the Company will recover its investment. For individually evaluated receivables, the Company determines the expected cash flow for the receivable, which includes consideration of estimated proceeds from disposition of the collateral and calculates an estimate of the potential loss and the probability of loss. For those accounts where a loss is considered probable, the Company records a specific reserve. The Company maintains a general reserve using a credit loss model on a regional basis and bases such percentages on several factors, including consideration of historical credit losses and portfolio delinquencies, trends in the overall weighted-average risk rating of the portfolio, current economic conditions, and forward-looking information, including reasonable and supportable forecasts. The Company excludes accounts evaluated as part of the specific reserve from the general reserve analysis. The Company generally writes off a receivable or records a specific reserve when a receivable becomes 180 days past due, or sooner if the Company determines that the receivable is not collectible.

Non-Accrual and Past-Due Financing Receivables

The Company considers a financing receivable to be past due when the minimum payment is not received by the contractually specified due date. The Company generally places financing receivables on non-accrual status, which is the suspension of interest accrual, and considers such receivables to be non-performing at the earlier of the time at which full payment of principal and interest becomes doubtful or the receivable becomes 90 days past due. Subsequently, the Company may recognize revenue on non-accrual financing receivables as payments are received, which is on a cash basis, if the Company deems the recorded financing receivable to be fully collectible; however, if there is doubt regarding the ultimate collectability of the recorded financing receivable, all cash receipts are applied to the carrying amount of the financing receivable, which is the cost recovery method. In certain circumstances, such as when the Company deems a delinquency to be of an administrative nature, financing receivables may accrue interest after becoming 90 days past due. The non-accrual status of a financing receivable may not impact a customer's risk rating. After all of a customer's delinquent principal and interest balances are settled, the Company may return the related financing receivable to accrual status.

Concentrations of Risk

Financial instruments that potentially subject the Company to significant concentrations of credit risk consist principally of cash, cash equivalents and restricted cash, investments, receivables from trade customers and contract manufacturers, financing receivables and derivatives.

The Company maintains cash, cash equivalents and restricted cash, investments, derivatives, and certain other financial instruments with various financial institutions. These financial institutions are located in many different geographic regions, and the Company's policy is designed to limit exposure from any particular institution. As part of its risk management processes, the Company performs periodic evaluations of the relative credit standing of these financial institutions. The Company has not sustained material credit losses from instruments held at these financial institutions. The Company utilizes derivative contracts to protect against the effects of foreign currency and interest rate exposures. Such contracts involve the risk of non-performance by the counterparty, which could result in a material loss. For more details on the collateral program, see Note 13, "Financial Instruments."

Credit risk with respect to accounts receivable from trade customers and financing receivables is generally diversified due to the large number of entities comprising the Company's customer base and their dispersion across many different industries and geographic regions. The Company performs ongoing credit evaluations of the financial condition of its customers and may require collateral, such as letters of credit and bank guarantees, in certain circumstances. As of October 31, 2024 and 2023 no single customer accounted for more than 10% of the Company's receivable from trade customers and financing receivables.

Restricted Cash

Restricted cash is included within Other current assets in the accompanying Consolidated Balance Sheets and is primarily related to cash received under the Company's collateral securities agreements for its derivative instruments and cash restricted under the fixed-term securitization program for the issuance of asset-backed debt securities.

Inventory

The Company values inventory at the lower of cost or net realizable value. Cost is computed using standard cost which approximates actual cost on a first-in, first-out basis. At each reporting period, the Company assesses the value of its inventory and writes down the cost of inventory to its net realizable value if required, for estimated excess or obsolescence. Factors influencing these adjustments include changes in future demand forecasts, market conditions, technological changes, product life-cycle and development plans, component cost trends, product pricing, physical deterioration, and quality issues. If in any period the Company anticipates a change in those factors to be less favorable than its previous estimates, additional inventory write-downs may be required and could materially impact gross margin. The write down for excess or obsolescence is charged to the provision of inventory, which is a component of Cost of Products and Cost of Services in the Consolidated Statements of Earnings. At the point of the loss recognition, a new, lower cost basis for that inventory is established, and subsequent changes in facts and circumstances do not result in the restoration or increase in that newly established cost basis.

Property, Plant and Equipment, net

The Company states property, plant and equipment at cost less accumulated depreciation. The Company capitalizes additions and improvements and expenses maintenance and repairs as incurred. Depreciation expense is recognized on a straight-line basis over the estimated useful lives of the assets. Estimated useful lives are five to 40 years for buildings and improvements and three to 15 years for machinery and equipment. The Company depreciates leasehold improvements over the life of the lease or the asset, whichever is shorter. The Company depreciates equipment held for lease over the initial term of the lease to the equipment's estimated residual value. The estimated useful lives of assets used solely to support a customer services contract generally do not exceed the term of the customer contract. On retirement or disposition, the asset cost and related accumulated depreciation are removed from the Consolidated Balance Sheets with any gain or loss recognized in the Consolidated Statements of Earnings.

The Company capitalizes certain internal and external costs incurred to acquire or create internal use software, principally related to software coding, designing system interfaces and installation and testing of the software. The Company amortizes capitalized internal use software costs using the straight-line method over the estimated useful lives of the software, generally from three to five years.

Leases

Lessee Accounting

The Company enters into various leases as a lessee for assets including office buildings, data centers, vehicles, and aviation. The Company determines if an arrangement is a lease at inception. An arrangement contains a lease when the arrangement conveys the right to control the use of an identified asset over the lease term. Upon lease commencement, the Company records a lease liability for the obligation to make lease payments and right-of-use ("ROU") asset for the right to use the underlying asset for the lease term in the Consolidated Balance Sheets. The lease liability is measured at commencement date based on the present value of lease payments not yet paid over the lease term and the Company's incremental borrowing rate. As most of the Company's leases do not provide an implicit rate, the Company uses an incremental borrowing rate which approximates the rate at which the Company would borrow, on a secured basis, in the country where the lease was executed. The ROU asset is based on the lease liability, adjusted for lease prepayments, lease incentives received, and the lessee's initial direct costs. Fixed payments are included in the recognition of ROU assets and liabilities, while non-lease components, such as maintenance or utility charges are expensed as incurred. The Company has agreements with lease and non-lease components that are accounted for separately and not included in its leased assets and corresponding liabilities for the majority of the Company's lease agreements. The Company allocates consideration to the lease and non-lease components using their relative standalone values. The lease term may include options to extend or to terminate the lease that the Company is reasonably certain to exercise. The Company has elected not to record leases with an initial term of twelve months or less on the Consolidated Balance Sheets.

For finance leases, the ROU asset is amortized on a straight-line basis over the shorter of the useful life of the asset or the lease term. Interest expense on the lease liability is recorded separately using the interest method. For operating leases, lease expense is generally recognized on a straight-line basis over the lease term.

Lessor Accounting

The Company's lease offerings are non-cancelable and the payment schedule primarily consists of fixed payments. Variable payments that are based on an index are included in lease receivables. The Company allocates consideration amongst lease components and non-lease components on a relative standalone selling price basis, when lease arrangements include multiple performance obligations. At the end of the lease term, the Company allows the client to either return the equipment, purchase the equipment or renew the lease based on mutually agreed upon terms.

The Company retains a residual position in equipment through lease and finance agreements which is equivalent to an estimated market value. The residual amount is established prior to lease inception, based upon estimated equipment values at end of lease using product road map trends, historical analysis, future projections and remarketing experience. The Company's residual amounts are evaluated at least annually to assess the appropriateness of the carrying values. Any anticipated declines in specific future residual values that are considered to be other-than-temporary would be recorded in current earnings. The Company is able to optimize the recovery of residual values by selling equipment in place, extending lease arrangements on a fixed term basis, entering into a monthly usage rental term beyond the initial lease term, and selling lease returned equipment in the secondary market. The contractual lease agreement also identifies return conditions that ensures the leased equipment will be in good operating condition upon return minus any normal wear and tear. During the residual review process, product changes, product updates, as well as market conditions are reviewed and adjustments if other than temporary are made to residual values in accordance with the impact of any such changes. The remarketing sales organization closely manages the sale of equipment lease returns to optimize the recovery of outstanding residual by product.

Business Combinations

The Company includes the results of operations of acquired businesses in the Company's consolidated results prospectively from the date of acquisition. The Company allocates the fair value of purchase consideration to the assets acquired including in-process research and development ("IPR&D"), liabilities assumed, and non-controlling interests in the acquired entity based on their fair values at the acquisition date. IPR&D is initially capitalized at fair value as an intangible asset with an indefinite life and assessed for impairment thereafter. The excess of the fair value of purchase consideration over the fair value of the assets acquired, liabilities assumed and non-controlling interests in the acquired entity is recorded as goodwill. The primary items that generate goodwill include the value of the synergies between the acquired company and the Company and the value of the acquired assembled workforce, neither of which qualifies for recognition as an intangible asset. Acquisition-related expenses and post-acquisition restructuring costs are recognized separately from the business combination and are expensed as incurred.

Goodwill

The Company reviews goodwill for impairment annually and whenever events or changes in circumstances indicate the carrying amount of goodwill may not be recoverable. In evaluating goodwill for impairment, the Company has the option to first perform a qualitative test to determine whether further impairment testing is necessary or to perform a qualitative assessment by comparing the fair value of the reporting unit to its carrying amount. Under the qualitative assessment, the Company is not required to calculate the fair value of a reporting unit unless it determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Qualitative factors include, but are not limited to, the macroeconomic and industry environment as well as Company-specific factors. The Company elects to perform a quantitative test for all of its reporting units as part of its annual goodwill impairment assessment in the fourth quarter of each fiscal year.

In the quantitative assessment, the Company estimates the fair value of its reporting units using a weighting of fair values derived most significantly from the income approach, and to a lesser extent, the market approach. Under the income approach, the Company estimates the fair value of a reporting unit based on the present value of estimated future cash flows covering discrete forecast periods as well as terminal value determinations. The Company prepares cash flow projections based on management's estimates of revenue growth rates and operating margins, taking into consideration industry and market conditions. The Company bases the discount rate on the weighted-average cost of capital adjusted for the relevant risk associated with business-specific characteristics and the uncertainty related to the reporting unit's ability to execute on the projected cash flows. Under the market approach, the Company estimates fair value based on market multiples of revenue and earnings derived from comparable publicly traded companies with similar operating and investment characteristics as the reporting unit. The Company weights the fair value derived from the market approach commensurate with the level of comparability of these publicly traded companies to the reporting unit. When market comparables are not meaningful or not available, the Company estimates the fair value of a reporting unit using only the income approach.

If the fair value of a reporting unit exceeds the carrying amount of the net assets assigned to that reporting unit, goodwill is not impaired and no further testing is required. If the fair value of the reporting unit is less than its carrying amount, goodwill is impaired. The goodwill impairment loss is measured as the excess of the reporting unit's carrying value over its fair value (not to exceed the total goodwill allocated to that reporting unit).

Intangible Assets and Long-Lived Assets

The Company reviews intangible assets with finite lives, long-lived assets and ROU assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. For lease assets such circumstances would include a decision to abandon the use of all or part of an asset, or subleases that do not fully recover the costs of the associated lease. The Company assesses the recoverability of assets based on the estimated undiscounted future cash flows expected to result from the use and eventual disposition of the asset. If the undiscounted future cash flows are less than the carrying amount, the asset is impaired. The Company measures the amount of impairment loss, if any, as the difference between the carrying amount of the asset and its fair value using an income approach or, when available and appropriate, using a market approach. The Company amortizes intangible assets with finite lives using the straight-line method over the estimated economic lives of the assets, ranging from one to ten years. Intangible assets purchased as part of an acquisition are included in Intangible assets, net in the Consolidated Balance Sheets. All other separately purchased intangible assets are included in Long-term financing receivables and other assets in the Consolidated Balance Sheets.

Software development costs related to the development of new product offerings are capitalized subsequent to the establishment of technological feasibility, which is demonstrated by the completion of a detail program design or working model. Software development costs are included in Intangible assets, net in the Consolidated Balance Sheets. The Company amortizes capitalized costs on a straight-line basis over the estimated useful life of products, which is generally three years.

Equity Method Investments

Investments and ownership interests are accounted for under equity method accounting if the Company has the ability to exercise significant influence, but does not have a controlling financial interest. The Company records its interest in the net earnings of its equity method investees, along with adjustments for unrealized profits or losses on intra-entity transactions and amortization of basis differences, within Earnings from equity interests in the Consolidated Statements of Earnings. Profits or losses related to intra-entity sales with its equity method investees are eliminated until realized by the investor or investee. Basis differences represent differences between the cost of the investment and the underlying equity in net assets of the investment and are generally amortized over the lives of the related assets that gave rise to them. Equity method goodwill is not amortized or tested for impairment; instead the equity method investment is tested for impairment. The Company records its interest in the net earnings of its equity method investments based on the most recently available financial statements of the investees.

The carrying amount of the investment in equity interests is adjusted to reflect the Company's interest in net earnings, dividends received and other-than-temporary impairments. The Company reviews

for impairment whenever factors indicate that the carrying amount of the investment might not be recoverable. In such a case, the decrease in value is recognized in the period the impairment occurs in the Consolidated Statements of Earnings.

Equity Securities Investments

Equity securities investments with readily determinable fair values (other than those accounted for under the equity method or those that result in consolidation of the investee) are measured at fair value and any changes in fair value are recognized in Interest and other, net in the Consolidated Statements of Earnings. For equity investments without readily determinable fair values, the Company may elect to apply the measurement alternative or the fair value option. Under the measurement alternative investments are measured at cost, less impairment, and adjusted for qualifying observable price changes on a prospective basis. The Company reviews for impairment at each reporting period, assessing factors such as deterioration of earnings, adverse change in market/industry conditions, the ability to operate as a going concern, and other factors which indicate that the carrying amount of the investment might not be recoverable. In such a case, the decrease in value is recognized in the period the impairment occurs in the Consolidated Statements of Earnings. The Company elects the fair value option when it believes that it best reflects the underlying economics of the investment. These investments may be valued using third-party pricing services at each reporting date with changes in fair value recorded as a component of Interest and other, net in the Consolidated Statements of Earnings.

Debt Securities Investments

Debt securities are generally considered available-for-sale and are reported at fair value with unrealized gains and losses, net of applicable taxes, recorded in Accumulated other comprehensive loss in the Consolidated Balance Sheets. Realized gains and losses for available-for-sale securities are calculated based on the specific identification method and included in Interest and other, net in the Consolidated Statements of Earnings. The Company monitors its investment portfolio for potential impairment on a quarterly basis. When the carrying amount of an investment in debt securities exceeds its fair value and the decline in value is determined to be due to credit-related factors, the Company recognizes the impairment using an allowance for credit loss in

Interest and other, net, in the Consolidated Statements of Earnings, while the impairment that is not credit related is recorded in Accumulated other comprehensive loss in the Consolidated Balance Sheets.

Derivatives

The Company uses derivative financial instruments, primarily forwards, swaps, and, at times, options, to manage a variety of risks, including risks related to foreign currency and interest rate exposures. The Company does not use derivative financial instruments for speculative purposes.

The Company receives fair value to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. When prices in active markets are not available for an identical asset or liability, the Company generally uses industry standard valuation models to measure the fair value of derivative positions. Such measurements involve projecting future cash flows and discounting the future amounts to present value using market based observable inputs, including interest rate curves, Company and counterparty credit risk, foreign currency exchange rates, and forward and spot prices. In the absence of such data, the Company will use internal information that is consistent with what market participants would use in a hypothetical transaction that occurs at the measurement date. The determination of fair value often involves significant judgments about assumptions such as determining an appropriate discount rate that factors in both risk and liquidity premiums, identifying the similarities and differences in market transactions, weighting those differences accordingly and then making the appropriate adjustments to those market transactions to reflect the risks specific to the asset or liability being valued.

For a further discussion of fair value measurements and derivative instruments, refer to Note 12, "Fair Value" and Note 13, "Financial Instruments," respectively.

Contingencies

The Company is involved in various lawsuits, claims, investigations, and proceedings that arise in the ordinary course of business. The Company records a liability for contingencies when it believes it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. The Company does not record gain contingencies until realized. See Note 17, "Litigation, Contingencies, and Commitments," for a full description of the Company's contingencies.

Warranties

The Company accrues the estimated cost of product warranties at the time of recognizing revenue. The Company's standard product warranty terms generally include post-sales support and repairs or replacement of a product at no additional charge for a specified period of time. The Company engages in extensive product quality programs and processes, including actively monitoring and evaluating the quality of its component suppliers. The estimated warranty obligation is based on contractual warranty terms, repair costs, product call rates, average cost per call, current period product shipments and ongoing product failure rates, as well as specific product class failure outside of the Company's baseline experience. Warranty terms generally range from one to five years for parts and labor, depending upon the product. For certain networking products, the Company offers a lifetime warranty. Over the last three fiscal years, the annual warranty expense has averaged approximately 1.1% of annual net product revenue. Refer to Note 7, "Balance Sheet Details," for additional information.

Recently Enacted Accounting Pronouncements

In November 2024, the FASB issued guidance to provide disaggregated expense disclosures in the Consolidated Financial Statements. The Company is required to adopt the guidance for its annual period ending October 31, 2028 and all interim periods thereafter, though early adoption is permitted. The Company is currently evaluating the impact of this amendment on its Consolidated Financial Statements.

In December 2023, the FASB issued guidance to provide disaggregated income tax disclosures on the rate reconciliation and income taxes paid. The Company is required to adopt the guidance in the first quarter of fiscal 2026, though early adoption is permitted. The Company is currently evaluating the impact of this amendment on its Consolidated Financial Statements.

In November 2023, the FASB issued guidance to improve the disclosures about a public entity's reportable segments and address requests from investors for additional, more detailed information about a reportable segment's expenses. The Company will adopt this guidance for its annual period ending October 31, 2025 and all interim periods thereafter. The Company does not expect the adoption of this guidance to have a significant impact on its Consolidated Financial Statements.

Segment Information

Hewlett Packard Enterprise's operations are organized into five segments for financial reporting purposes: Server, Hybrid Cloud, Intelligent Edge, Financial Services ("FS"), and Corporate Investments and Other. Hewlett Packard Enterprise's organizational structure is based on a number of factors that the Chief Operating Decision Maker ("CODM"), who is the Chief Executive Officer, uses to evaluate, view and run the Company's business operations, which include, but are not limited to, customer base and homogeneity of products and technology. The five segments are based on this organizational structure and information reviewed by Hewlett Packard Enterprise's management to evaluate segment results. A summary of the types of products and services within each segment is as follows:

Server consists of general-purpose servers for multi-workload computing and workload-optimized servers to deliver the best performance and value for demanding applications, and integrated systems comprised of software and hardware designed to address High-Performance Computing and Supercomputing (including exascale applications), Artificial Intelligence ("AI"), Data Analytics, and Transaction Processing workloads for government and commercial customers globally. This portfolio of products includes the secure and versatile HPE ProLiant Rack and Tower servers; HPE Synergy, a composable infrastructure for traditional and cloud-native applications; HPE Scale Up Servers product lines for critical applications, including large enterprise software applications and data analytics platforms; HPE Edgeline servers; HPE Cray EX; HPE Cray XD (formerly known as HPE Apollo); and HPE NonStop. Server offerings also include operational and support services sold with systems and as standalone services.

Hybrid Cloud offers a wide variety of cloud-native and hybrid solutions across storage, private cloud and the infrastructure SaaS space. Storage includes data storage and data management offerings with the HPE Alletra Storage portfolio; unstructured data solutions and analytics for AI; data protection and archiving; and storage networking. It also includes AI/ops-driven intelligence with HPE InfoSight and HPE CloudPhysics. In private cloud, the HPE GreenLake offerings include new cloud-native offerings and capabilities for virtual machines, containers, and bare metal; a full suite of private cloud offerings that enable customers to self-manage or choose a fully managed experience; and a portfolio of world-class AI infrastructure delivered aaaS. This segment also provides self-service private cloud on-demand with HPE GreenLake for Private Cloud Business Edition. Infrastructure software includes monitoring and observability for day two operations and beyond through the Company's acquisition of OpsRamp and unified data access through HPE Ezmeral Data Fabric and analytics suite, which helps move and transform data for use in AI and other applications. Hybrid Cloud segment also includes data lifecycle management and protection through its suite of offerings, including Zerto Disaster Recovery.

Intelligent Edge offers wired and wireless local area networks, campus, branch, and data center switching, software-defined wide-area-networks, private and public cellular network software, network security, and associated services that enable secure connectivity for businesses of any size. The HPE Aruba Networking product portfolio includes hardware products such as Wi-Fi access points, switches, and gateways. The HPE Aruba Networking software and services portfolio includes cloud-based management, network management, network access control, software-defined wide-area networking, network security, analytics and assurance, location services software, private and public cellular core software, and professional and support services, as well as aaaS and consumption models through the HPE GreenLake cloud for the Intelligent Edge portfolio of products. Intelligent Edge offerings are consolidated in the edge service platform, which takes a cloud-native approach that provides customers with a unified framework to meet their connectivity, security, and financial needs across campus, branch, data center, and remote worker environments.

Financial Services provides flexible investment solutions, such as leasing, financing, IT consumption, utility programs, and asset management services for customers that facilitate unique technology deployment models and the acquisition of complete IT solutions, including hardware, software, and services from Hewlett Packard Enterprise and others. FS also supports financial solutions for on-premise flexible consumption models, such as the HPE GreenLake cloud.

Corporate Investments and Other includes the Advisory and Professional Services ("A & PS") business, which primarily offers consultative-led services, HPE and partner technology expertise and advice, implementation services as well as complex solution engagement capabilities; CMS, which primarily offers software and related services to the telecommunications industry; and Hewlett Packard Labs, which is responsible for research and development.

Segment Policy

Hewlett Packard Enterprise derives the results of its business segments directly from its internal management reporting system. The accounting policies that Hewlett Packard Enterprise uses to derive segment results are substantially the same as those the consolidated company uses. The CODM measures the performance of each segment based on several metrics, including earnings from operations. The CODM uses these results, in part, to evaluate the performance of, and to allocate resources to each of the segments.

Segment revenue includes revenues from sales to external customers and intersegment revenues that reflect transactions between the segments on an arm's-length basis. Intersegment revenues primarily consist of sales of hardware and software that are sourced internally and, in the majority of the cases, are financed as operating leases by FS to the Company's customers. Hewlett Packard Enterprise's consolidated net revenue is derived and reported after the elimination of intersegment revenues from such arrangements.

Financing cost in the Consolidated Statements of Earnings reflects interest expense on borrowing and funding-related activity associated with FS and its subsidiaries, and debt issued by Hewlett Packard Enterprise for which a portion of the proceeds benefited FS.

Hewlett Packard Enterprise does not allocate to its segments certain operating expenses, which it manages at the corporate level. These unallocated operating costs include certain corporate costs and eliminations, stock-based compensation expense, amortization of intangible assets, impairment of goodwill, transformation costs, disaster recovery/charges, divestiture related exit costs, and acquisition, disposition and other related charges. Total assets by segment are not presented as that information is not used to allocate resources or assess performance at the segment level and is not reviewed by the CODM.

Segment Operating Results

	Server	Hybrid Cloud	Intelligent Edge	Financial Services	Corporate Investments and Other	Total
	In millions					
Fiscal 2024						
Net revenue	\$ 15,931	\$ 5,172	\$ 4,501	\$ 3,509	\$ 1,014	\$ 30,127
Intersegment net revenue	274	214	31	3	—	522
Total segment net revenue	\$ 16,205	\$ 5,386	\$ 4,532	\$ 3,512	\$ 1,014	\$ 30,649
Segment earnings (loss) from operations	\$ 1,818	\$ 245	\$ 1,115	\$ 316	\$ (25)	\$ 3,469
Fiscal 2023						
Net revenue	\$ 13,926	\$ 5,396	\$ 5,362	\$ 3,466	\$ 985	\$ 29,135
Intersegment net revenue	435	97	17	14	—	563
Total segment net revenue	\$ 14,361	\$ 5,493	\$ 5,379	\$ 3,480	\$ 985	\$ 29,698
Segment earnings (loss) from operations	\$ 1,830	\$ 232	\$ 1,343	\$ 281	\$ (77)	\$ 3,609
Fiscal 2022						
Net revenue	\$ 15,137	\$ 5,173	\$ 3,849	\$ 3,326	\$ 1,011	\$ 28,496
Intersegment net revenue	335	60	8	13	1	417
Total segment net revenue	\$ 15,472	\$ 5,233	\$ 3,857	\$ 3,339	\$ 1,012	\$ 28,913
Segment earnings (loss) from operations	\$ 1,958	\$ 468	\$ 542	\$ 387	\$ (26)	\$ 3,329

The reconciliation of segment operating results to Consolidated Statement of Earnings results was as follows:

	For the fiscal years ended October 31,		
	2024	2023	2022
	In millions		
Net Revenue:			
Total segments	\$ 30,649\$	29,698\$	28,913
Elimination of intersegment net revenue	(522)	(563)	(417)
Total consolidated net revenue	\$ 30,127\$	29,135\$	28,496
Earnings Before Taxes:			
Total segment earnings from operations	\$ 3,469\$	3,609\$	3,329

Major Customers

The Company had two distributors which represented approximately 14% and 11% of the Company's total net revenue in fiscal 2024, primarily within the Intelligent Edge and Server segments. The Company had one customer, which is a distributor, that represented 11% of the Company's total net revenue in fiscal 2023, primarily within the Intelligent Edge and Server segments. No single customer represented 10% or more of the Company's total net revenue in fiscal year 2022.

Geographic Information

Net revenue by country is based upon the sales location that predominately represents the customer location. For each of the fiscal years of 2024, 2023 and 2022, other than the U.S., no country represented more than 10% of the Company's net revenue.

Net revenue by geographic region was as follows:

	For the fiscal years ended October 31,		
	2024	2023	2022
	In millions		
Americas			
U.S.	\$ 10,890	\$ 10,369	\$ 9,425
Americas excluding U.S.	2,345	2,208	1,964
Total Americas	13,235	12,577	11,389
Europe, Middle East and Africa	10,189	10,151	10,292
Asia Pacific and Japan	6,703	6,407	6,815
Total consolidated net revenue	\$ 30,127	\$ 29,135	\$ 28,496

Property, plant and equipment, net by country in which the Company's operates was as follows:

	As of October 31	
	2024	2023
	In millions	
U.S.	\$ 2,616	\$ 2,803
Other countries	3,048	3,186
Total property, plant and equipment, net	\$ 5,664	\$ 5,989

Transformation Programs

Restructuring and Related Activities [Abstract]

Transformation Programs

12 Months Ended Oct. 31, 2024

Transformation Programs

Transformation programs are comprised of the Cost Optimization and Prioritization Plan and the HPE Next Plan. During the third quarter of fiscal 2020, the Company launched the Cost Optimization and Prioritization Plan which focuses on realigning the workforce to areas of growth, a new hybrid workforce model called Edge-to-Office, real estate strategies and simplifying and evolving the Company's product portfolio strategy. The transformation costs predominantly related to labor restructuring, non-labor restructuring, IT investments, design and execution charges and real estate initiatives. The primary elements of the Cost Optimization and Prioritization Plan were completed by the end of fiscal 2024.

During the third quarter of fiscal 2017, the Company launched the HPE Next Plan to put in place a purpose-built company designed to compete and win in the markets where it participates. Through this program, the Company is simplifying the operating model, and streamlining its offerings, business processes and business systems to improve its strategy execution. The primary elements of the HPE Next Plan were completed by the end of fiscal 2024.

Cost Optimization and Prioritization Plan

The components of the transformation costs relating to the Cost Optimization and Prioritization Plan were as follows:

	For the fiscal years ended October 31,		
	2024	2023	2022
	In millions		
Program management	\$ 2	\$ 9	\$ 27
IT costs	13	26	26
Restructuring charges	32	226	201
Total	\$ 47	\$ 261	\$ 254

HPE Next Plan

The components of transformation costs relating to HPE Next Plan were as follows:

	For the fiscal years ended October 31,		
	2024	2023	2022
	In millions		
Program management	\$ 1	\$ —	\$ 7
IT costs	47	91	184
Restructuring charges	1	16	13
Gains on real estate sales	—	(85)	(8)
Impairment on real estate assets	—	—	11
Other	—	3	13
Total	\$ 49	\$ 25	\$ 220

Restructuring Plans

On May 19, 2020, the Company's Board of Directors approved a restructuring plan in connection with the Cost Optimization and Prioritization Plan which primarily related to labor restructuring and real estate site exits under non-labor restructuring. The changes to the workforce varied by country, based on business needs, local legal requirements and consultations with employee works councils and other employee representatives, as appropriate.

On October 16, 2017, the Company's Board of Directors approved a restructuring plan in connection with the HPE Next Plan, and on September 20, 2018, the Company's Board of Directors approved a revision to that restructuring plan. Headcount exits under the HPE Next Plan were substantially complete as of October 31, 2020. Other restructuring actions primarily related to infrastructure were substantially complete as of October 31, 2022.

Restructuring activities related to the Company's employees and infrastructure under the Cost Optimization and Prioritization Plan and HPE Next Plan are presented in the table below:

	Cost Optimization and Prioritization Plan		HPE Next Plan	
	Employee Severance	Infrastructure and other	Employee Severance	Infrastructure and other
	In millions			
Liability as of October 31, 2023	\$ 152	\$ 127	\$ 6	\$ 27
Charges	30	2	—	1
Cash payments	(113)	(38)	(5)	(7)
Non-cash items	(2)	3	(1)	2
Liability as of October 31, 2024	\$ 67	\$ 94	\$ —	\$ 23
Total costs incurred to date as of October 31, 2024	\$ 823	\$ 563	\$ 1,267	\$ 271
Total expected costs to be incurred as of October 31, 2024	\$ 823	\$ 563	\$ 1,267	\$ 271

The current restructuring liability related to the transformation programs, reported in the Consolidated Balance Sheets as of October 31, 2024 and 2023, was \$61 million and \$180 million, respectively, in Accrued restructuring, and \$17 million and \$22 million, respectively, in Other accrued liabilities. The non-current restructuring liability related to the transformation programs, reported in Other non-current liabilities in the Consolidated Balance Sheets as of October 31, 2024 and 2023 was \$106 million and \$110 million, respectively.

Retirement and Post-Retirement Benefit Plans

Retirement Benefits [Abstract]

Retirement and Post-Retirement Benefit Plans

12 Months Ended Oct. 31, 2024

Retirement and Post-Retirement Benefit Plans

Defined Benefit Plans

The Company sponsors defined benefit pension plans worldwide, the most significant of which are the United Kingdom ("UK") and Germany plans. The pension plan in the UK is closed to new entrants, and the plan was frozen October 31, 2024. This plan provides benefits based on final pay and years of service and generally requires contributions from members. The German pension program that is open to new hires consists of cash balance plans that provide employer credits as a percentage of pay, certain employee pay deferrals and employer matching contributions. There also are previously closed German pension programs that include cash balance and final average pay plans. These previously closed pension programs comprise the majority of the pension obligations in Germany.

Post-Retirement Benefit Plans

The Company sponsors retiree health and welfare benefit plans, the most significant of which is in the U.S. Generally, employees hired before August 2008 are eligible for employer credits under the Hewlett Packard Enterprise Retirement Medical Savings Account Plan ("RMSA") upon attaining age 45. Employer credits to the RMSA available after September 2008 are provided in the form of matching credits on employee contributions made to a voluntary employee beneficiary association. Upon retirement, employees may use these employer credits for the reimbursement of certain eligible medical expenses.

Defined Contribution Plans

The Company offers various defined contribution plans for U.S. and non-U.S. employees. The Company's defined contribution expense was approximately \$206 million in fiscal 2024 and 2023, and \$196 million in fiscal 2022. U.S. employees are automatically enrolled in the Hewlett Packard Enterprise Company 401(k) Plan ("HPE 401(k) Plan"), when they meet eligibility requirements, unless they decline participation. The HPE 401(k) Plan's quarterly employer matching contributions are 100% of an employee's contributions, up to a maximum of 4% of eligible compensation.

Pension Benefit Expense

The Company's net pension and post-retirement benefit costs that were directly attributable to the eligible employees, retirees and other former employees of Hewlett Packard Enterprise and recognized in the Consolidated Statements of Earnings for fiscal 2024, 2023 and 2022 are presented in the table below.

	For the fiscal years ended October 31,					
	2024	2023	2022	2024	2023	2022
	Defined Benefit Plans			Post-Retirement Benefit Plans		
	In millions					
Service cost	\$ 49	\$ 53	\$ 78	\$ 1	\$ 1	\$ 1
Interest cost ⁽¹⁾	408	386	154	9	8	4
Expected return on plan assets ⁽¹⁾	(550)	(539)	(450)	(4)	(2)	(2)
Amortization and Deferrals ⁽¹⁾ :						
Actuarial loss (gain)	148	160	167	(4)	(6)	(2)
Prior service benefit	(8)	(10)	(10)	—	—	—
Net periodic benefit cost (credit)	47	50	(61)	2	1	1
Settlement loss and special termination benefits ⁽¹⁾	4	6	5	—	—	—
Total net benefit cost (credit)	\$ 51	\$ 56	\$ (56)	\$ 2	\$ 1	\$ 1

(1) These non-service components were included in Interest and other, net in the Consolidated Statements of Earnings.

The weighted-average assumptions used to calculate the net benefit cost (credit) in the table above for fiscal 2024, 2023 and 2022 were as follows:

	For the fiscal years ended October 31,					
	2024	2023	2022	2024	2023	2022
	Defined Benefit Plans			Post-Retirement Benefit Plans		
Discount rate used to determine benefit obligation	4.4 %	3.9 %	1.3 %	6.5 %	6.0 %	3.0 %
Discount rate used to determine service cost	4.7 %	4.2 %	1.7 %	6.1 %	5.7 %	2.7 %
Discount rate used to determine interest cost	4.4 %	3.9 %	1.1 %	6.4 %	5.9 %	2.6 %
Expected increase in compensation levels	2.9 %	3.0 %	2.6 %	—	—	—
Expected long-term return on plan assets	5.5 %	5.1 %	3.2 %	5.3 %	4.3 %	3.3 %
Interest crediting rate ⁽¹⁾	2.4 %	2.4 %	2.5 %	5.3 %	4.3 %	2.7 %

(1) The average assumed interest credited for HPE's cash balance plans and post-retirement plans, as applicable.

To estimate the service and interest cost components of net periodic benefit cost for defined benefit plans that use the yield curve approach, which represent substantially all of the Company's defined benefit plans, the Company has elected to use a full yield curve approach in the estimation of these components of benefit cost by applying the specific spot rates along the yield curve used in the determination of the benefit obligation to the relevant projected cash flows.

Funded Status

The funded status of the plans was as follows:

	As of October 31,							
	2024		2023		2023			
	Defined Benefit Plans		Post-Retirement Benefit Plans					
	In millions							
Change in fair value of plan assets:								
Fair value—beginning of year	\$	9,879	\$	9,915	\$	68	\$	60
Reimbursement of benefit payments ⁽¹⁾		(90)		(82)		—		—
Actual return on plan assets		1,207		(315)		5		4
Employer contributions		172		179		4		6
Participant contributions		26		24		6		7
Benefits paid		(509)		(449)		(7)		(9)
Settlement		(18)		(29)		—		—
Currency impact		340		636		—		—
Fair value—end of year	\$	11,007	\$	9,879	\$	76	\$	68
Change in benefit obligation:								
Projected benefit obligation—beginning of year	\$	9,362	\$	9,517	\$	148	\$	138
Addition/deletion of plans ⁽²⁾		—		1		—		—
Service cost		49		53		1		1
Interest cost		408		386		9		8
Participant contributions		26		24		6		7
Actuarial loss (gain)		613		(756)		7		3
Benefits paid		(509)		(449)		(7)		(9)
Plan amendments		4		—		—		—
Settlement		(18)		(29)		—		—
Special termination benefits		2		2		—		—
Currency impact		319		613		(2)		—
Projected benefit obligation—end of year ⁽³⁾	\$	10,256	\$	9,362	\$	162	\$	148
Funded status at end of year	\$	751	\$	517	\$	(86)	\$	(80)
Accumulated benefit obligation		10,130	\$	9,233		—	\$	—

(1) For benefit payments reimbursed to HPE from the German Contractual Trust Arrangements.

(2) Includes the addition/deletion of plans resulting from acquisitions.

(3) HPE divested \$13 million in projected benefit obligation and \$7 million in assets due to the Communications Technology Group ("CTG") divestiture that occurred on December 1, 2024.

For the year ended October 31, 2024, the benefit obligation increased from \$9.4 billion to \$10.3 billion primarily due to the effects of decreasing discount rates. The increase was partially offset by benefits paid which reduced benefit obligations. Pension assets increased from \$9.9 billion to \$11.0 billion as assets performed better than expected. The increase was partially offset by benefits paid from plan assets.

The weighted-average assumptions used to calculate the projected benefit obligations were as follows:

	As of October 31,			
	2024	2023	2024	2023
	Defined Benefit Plans		Post-Retirement Benefit Plans	
Discount rate	3.8 %	4.4 %	5.6 %	6.5 %
Expected increase in compensation levels	2.6 %	2.9 %	—	—
Interest crediting rate	2.5 %	2.4 %	4.8 %	5.3 %

The net amounts recognized for defined benefit and post-retirement benefit plans in the Company's Consolidated Balance Sheets were as follows:

	As of October 31,			
	2024	2023	2024	2023
	Defined Benefit Plans		Post-Retirement Benefit Plans	
		In millions		
Non-current assets	\$ 1,555	\$ 1,313	\$ —	\$ —
Current liabilities	(52)	(51)	(6)	(8)
Non-current liabilities	(752)	(745)	(80)	(72)
Funded status at end of year	\$ 751	\$ 517	\$ (86)	\$ (80)

The following table summarizes the pre-tax net actuarial loss and prior service benefit recognized in accumulated other comprehensive loss for the defined benefit plans, activity for the post-retirement benefit plans were immaterial:

	As of October 31, 2024	
	Defined Benefit Plans	
	In millions	
Net actuarial loss	\$ 2,478	
Prior service benefit	14	
Total recognized in accumulated other comprehensive loss	\$ 2,492	

Defined benefit plans with projected benefit obligations exceeding the fair value of plan assets were as follows:

	As of October 31,	
	2024	2023
	In millions	
Aggregate fair value of plan assets	\$ 506	\$ 1,969
Aggregate projected benefit obligation	\$ 1,212	\$ 2,765

Defined benefit plans with accumulated benefit obligations exceeding the fair value of plan assets were as follows:

	As of October 31,			
	2024		2023	
	In millions			
Aggregate fair value of plan assets	\$	2,274	\$	1,969
Aggregate accumulated benefit obligation	\$	3,076	\$	2,675

Fair Value of Plan Assets

The Company pays the U.S. defined benefit plan obligations when they come due since these plans are unfunded. The table below sets forth the fair value of non-U.S. defined benefit plan assets by asset category within the fair value hierarchy as of October 31, 2024 and 2023.

	As of October 31, 2024				As of October 31, 2023

Total	\$ 948	\$ 6,412	\$ 1,503	\$ 11,007	\$ 912	\$ 5,591	\$ 1,274	\$ 9,879

- (1) Repurchase agreements, primarily in the UK, represent the plans' short-term borrowing to hedge against interest rate and inflation risks. Investments in approximately \$2.0 billion and \$2.3 billion of government bonds collateralize this short-term borrowing at October 31, 2024 and 2023, respectively. The plans have an obligation to return the cash after the term of the agreements. Due to the short-term nature of the agreements, the outstanding balance of the obligation approximates fair value.
- (2) Includes funds that invest primarily in asset-backed securities, mortgage-backed securities, collateralized loan obligations, and/or private debt investments. Primary valuation techniques for level 3 investments include discounted cash flows and broker quotes and/or third-party pricing services. Significant unobservable inputs include yields which are determined by considering the market yield of comparable public debt instruments adjusted for estimated losses to reflect where the expected recovery rate would be less than 100%, discount rates, and internal rate of return (IRR). The yields ranged from 6% to 21%, with the weighted average around 10%. In the prior year, the yields ranged from 6% to 22%, with the weighted average around 10%. The discount rates ranged from 3% to 5%, with the weighted average around 4%. In the prior year, the discount rates ranged from 4% to 5%, with the weighted average around 4%. The IRR ranged from 1% to 38%, with the main weighted average around 9%. In the prior year, the IRR ranged from 5% to 21%, with the main weighted average around 10%. Generally, an increase in yield and discounted rates may result in a decrease in the fair value of certain investments.
- (3) Includes funds, primarily in the UK, held in non-marketable, limited partnership interests which invest in a broad range of infrastructure and infrastructure-related assets. Primary valuation techniques for level 3 investments include the market, income or cost approach. Significant unobservable inputs include discount rate and EV/EBITDA multiples. Discount rates ranged from 8% to 13%, with the weighted average around 10%. The EV/EBITDA multiples ranged from 6.5x to 37.9x, with the weighted average ranging from 9.2x to 36.3x. Generally, an increase in discount rates may result in a decrease in the fair value of certain investments. The EV/EBITDA ratio generally indicates the number of times investors are willing to pay for a company's EBITDA valuation.
- (4) Includes funds, primarily in the UK, that invest in both private and public equities, as well as emerging markets across all sectors. The funds also hold fixed income and derivative instruments to hedge interest rate and inflation risk. In addition, the funds include units in transferable securities, collective investment schemes, money market funds, asset-backed income, cash, and deposits. Primary valuation techniques for level 3 investments include discounted cash flows and book value or net asset value. Significant unobservable inputs include discount rates. The discount rates ranged from 3% to 38%, with the weighted average around 17%. In the prior year, the discount rates ranged from 3% to 28%, with the weighted average around 14%. Generally, an increase in discount rates may result in a decrease in the fair value of certain investments.
- (5) Includes a pooled fund in the UK, that seeks a rate of return with direct or indirect linkage to UK inflation by investing in vehicles including bonds, long lease property, income strips, asset-backed securities, and index linked assets. Units are available for subscription on the first business day of each calendar month at net asset value. There are no redemption restrictions or future commitments on these investments.
- (6) Common Contractual Funds are investment arrangements in which institutional investors pool their assets. Units may be acquired in four different sub-funds focused on equities, fixed income, alternative investments, and emerging markets. Each sub-fund is invested in accordance with the fund's investment objective and units are issued in relation to each sub-fund. While the sub-funds are not publicly traded, the custodian strikes a net asset value either once or twice a month, depending on the sub-fund. There are no redemption restrictions or future commitments on these investments.
- (7) Includes funds, primarily in Germany, that invest in a diversified portfolio of European real estate assets exposed to logistics real estate properties, food retailing properties, residential and commercial properties, and properties under development. Primary valuation techniques for level 3 investments include the income capitalization approach and cost approach. Significant unobservable inputs include rental yield and IRR. The rental yield rates ranged from 4% to 7%, with the weighted average around 5%. In the prior year, the rental yield rates ranged from 4% to 6%, with the weighted average around 4%. The IRR ranged from 0% to 4%, with the main weighted average around 1%. In the prior year, the IRR ranged from 5% to 8%, with the main weighted average around 7%. Generally, an increase in rental yield rates may result in a decrease in the fair value of certain investments. A higher IRR generally signifies a greater fair value as it implies a greater potential rate of return over the life of an investment.
- (8) Includes life insurance investment policies, unsettled transactions, and derivative instruments. As of October 31, 2024, the derivative instruments include synthetic equity swaps held by the UK plans with equity exposure of \$396 million.

As of October 31, 2024 post-retirement benefit plan assets of \$76 million were invested in publicly traded registered investment entities of which \$61 million are classified within Level 1 and \$15 million within Level 2 of the fair value hierarchy. As of October 31, 2023 post-retirement benefit plan assets of \$68 million were invested in publicly traded registered investment entities of which \$55 million are classified within Level 1 and \$13 million within Level 2 of the fair value hierarchy.

Changes in fair value measurements of Level 3 investments for the non-U.S. defined benefit plans were as follows:

	For the fiscal year ended October 31, 2024						
	Alternative Investments						Total
	Debt-Other	Private Equity	Hybrids	Real Estate Funds	Insurance Group Annuities		
	In millions						
Balance at beginning of year	\$ 799	\$ 41	\$ 177	\$ 237	\$ 20	\$	1,274
Actual return on plan assets:							
Relating to assets held at the reporting date	27	(3)	6	(14)	1		17
Relating to assets sold during the period	—	4	—	(1)	—		3
Purchases, sales, and settlements	(81)	234	14	42	—		209
Balance at end of year	\$ 745	\$ 276	\$ 197	\$ 264	\$ 21	\$	1,503

	For the fiscal year ended October 31, 2023						
	Alternative Investments						Total
	Debt-Other	Private Equity	Hybrids	Real Estate Funds	Insurance Group Annuities	Other	
	In millions						
Balance at beginning of year	\$ 932	\$ 46	\$ 182	\$ 164	\$ 21	\$ 1	1,346
Actual return on plan assets:							
Relating to assets held at the reporting date	72	(8)	2	(6)	(1)	—	59
Relating to assets sold during the period	—	3	—	—	—	—	3
Purchases, sales, and settlements	(205)	—	(7)	79	—	(1)	(134)
Balance at end of year	\$ 799	\$ 41	\$ 177	\$ 237	\$ 20	\$ —	1,274

The following is a description of the valuation methodologies used to measure plan assets at fair value.

Investments in publicly traded equity securities are valued using the closing price on the measurement date as reported on the stock exchange on which the individual securities are traded. For corporate, government backed debt securities, and some other investments, fair value is based on observable inputs of comparable market transactions. The valuation of certain real estate funds, insurance group annuity contracts and alternative investments, such as limited partnerships and joint ventures, may require significant management judgment and involves a level of uncertainty. The valuation is generally based on fair value as reported by the asset manager and adjusted for cash flows, if necessary. In making such an assessment, a variety of factors are reviewed by management, including, but are not limited to, the timeliness of fair value as reported by the asset manager and changes in general economic and market conditions subsequent to the last fair value reported by the asset manager. The use of different techniques or assumptions to estimate fair value could result in a different fair value measurement at the reporting date. Cash and cash equivalents includes money market funds, which are valued based on cost, which approximates fair value. Other than those assets that have quoted prices from an active market, investments are generally classified in Level 2 or Level 3 of the fair value hierarchy based on the lowest level input that is significant to the fair value measure in its entirety. Investments measured using net asset value as a practical expedient are not categorized within the fair value hierarchy.

Plan Asset Allocations

The weighted-average target and actual asset allocations across the benefit plans at the respective measurement dates for the non-U.S. defined benefit plans were as follows:

	Defined Benefit Plans		
	2024 Target Allocation	2024 Plan Assets	2023 Plan Assets
Public equity securities		21.4 %	21.8 %
Private/hybrid equity securities		10.5 %	9.5 %
Real estate and other ⁽¹⁾		6.7 %	6.3 %
Equity-related investments ⁽¹⁾	41.7 %	38.6 %	37.6 %
Debt securities	57.3 %	58.2 %	59.2 %
Cash and cash equivalents	1.0 %	3.2 %	3.2 %
Total	100.0 %	100.0 %	100.0 %

- (1) Included in Real estate and other investments are synthetic equity swaps with equity exposure of \$396 million, which is held in the UK plans as of October 31, 2024.

For the Company's post-retirement benefit plans, approximately 80% of the plan assets are invested in cash and cash equivalents and approximately 20% in multi-asset credit investments which consists primarily of investment grade credit, emerging market debt and high yield bonds.

Investment Policy

The Company's investment strategy is to seek a competitive rate of return relative to an appropriate level of risk depending on the funded status of each plan and the timing of expected benefit payments. The majority of the plans' investment managers employ active investment management strategies with the goal of outperforming the broad markets in which they invest. Risk management practices include diversification across asset classes and investment styles and periodic rebalancing toward asset allocation targets. A number of the plans' investment managers are authorized to utilize derivatives for investment or liability exposures, and the Company may utilize derivatives to effect asset allocation changes or to hedge certain investment or liability exposures.

Asset allocation decisions are typically made by an independent board of trustees for the specific plan. Investment objectives are designed to generate returns that will enable the plan to meet its future obligations. In some countries, local regulations may restrict asset allocations, typically leading to a higher percentage of investment in fixed income securities than would otherwise be deployed. The Company reviews the investment strategy and provides a recommended list of investment managers for each country plan, with final decisions on asset allocation and investment managers made by the board of trustees or investment committees for the specific plan.

Basis for Expected Long-Term Rate of Return on Plan Assets

The expected long-term rate of return on plan assets reflects the expected returns for each major asset class in which the plan invests and the weight of each asset class in the target mix. Expected asset

returns reflect the current yield on government bonds, risk premiums for each asset class and expected real returns, which considers each country’s specific inflation outlook. Because the Company’s investment policy is to employ primarily active investment managers who seek to outperform the broader market, the expected returns are adjusted to reflect the expected additional returns, net of fees.

Employer Contributions and Funding Policy

During fiscal 2024, the Company contributed approximately \$172 million to its non-U.S. pension plans and paid \$4 million to cover benefit claims under the Company’s post-retirement benefit plans. During fiscal 2025, the Company expects to contribute approximately \$189 million to its non-U.S. pension plans and an additional \$1 million to cover benefit payments to U.S. non-qualified plan participants. In addition, the Company expects to pay approximately \$6 million to cover benefit claims for its post-retirement benefit plans. The Company’s policy is to fund its pension plans so that it makes at least the minimum contribution required by various authorities including local government and taxing authorities.

Estimated Future Benefits Payments

As of October 31, 2024, estimated future benefits payments for the Company’s retirement plans were as follows:

Fiscal year	Defined Benefit Plans		Post-Retirement Benefit Plans	
	In millions			
2025	\$	609	\$	10
2026		554		11
2027		568		11
2028		592		12
2029		609		13
Next five fiscal years to October 31, 2034	\$	3,114	\$	72

Stock-Based Compensation
Share-Based Payment Arrangement [Abstract]
Stock-Based Compensation

12 Months Ended
Oct. 31, 2024

Stock-Based Compensation

On April 14, 2021 (the “Approval Date”), shareholders of the Company approved the Hewlett Packard Enterprise Company 2021 Stock Incentive Plan (the “2021 Plan”) that replaced the Company’s 2015 Stock Incentive Plan (the “2015 Plan”). The 2021 Plan provides for the grant of various types of awards including restricted stock awards, stock options and performance-based awards. These awards generally vest over 3 years from the grant date. The maximum number of shares as of the Approval Date that may be delivered to the participants under the 2021 Plan shall not exceed 7 million shares, plus 35.8 million shares that were available for grant under the 2015 Plan and any awards granted under the 2015 Plan prior to the

Approval Date that were cash-settled, forfeited, terminated, or lapsed after the Approval Date. On April 5, 2022, April 5, 2023 and April 10, 2024, shareholders of the Company approved amendments to the 2021 Plan thereby increasing the overall number of shares available for issuance by 15 million shares, 18 million shares, and 22 million shares, respectively. As of October 31, 2024, the Company had remaining authorization of 38.5 million shares under the 2021 Plan.

Stock-Based Compensation Expense

Stock-based compensation expense and the resulting tax benefits were as follows:

	For the fiscal years ended October 31,		
	2024	2023	2022
	In millions		
Stock-based compensation expense	\$ 430	\$ 428	\$ 391
Income tax benefit	(96)	(92)	(75)
Stock-based compensation expense, net of tax	\$ 334	\$ 336	\$ 316

Stock-based compensation expense as presented in the table above is recorded within the following cost and expense lines in the Consolidated Statements of Earnings.

	For the fiscal years ended October 31,		
	2024	2023	2022
	In millions		
Cost of sales	\$ 49	\$ 47	\$ 46
Research and development	158	161	143
Selling, general and administrative	223	220	202
Stock-based compensation expense	\$ 430	\$ 428	\$ 391

Employee Stock Purchase Plan

Effective November 1, 2015, the Company adopted the Hewlett Packard Enterprise Company 2015 Employee Stock Purchase Plan (“ESPP”). The total number of shares of Company’s common stock authorized under the ESPP was 80 million. The ESPP allows eligible employees to contribute up to 10% of their eligible compensation to purchase Hewlett Packard Enterprise’s common stock. The ESPP provides for a discount not to exceed 15% and an offering period up to 24 months. The Company currently offers 6-month offering periods during which employees have the ability to purchase shares at 95% of the closing market price on the purchase date. No stock-based compensation expense was recorded in connection with those purchases, as the criteria of a non-compensatory plan were met.

Restricted Stock Units

Restricted stock units have forfeitable dividend equivalent rights equal to the dividend paid on common stock. Restricted stock units do not have the voting rights of common stock, and the shares underlying restricted stock units are not considered issued and outstanding upon grant. The fair value of the restricted stock units is the closing price of the Company’s common stock on the grant date of the award. The Company expenses the fair value of restricted stock units ratably over the period during which the restrictions lapse.

The following table summarizes restricted stock unit activity for the year ended October 31, 2024:

	Shares	Weighted-Average Grant Date Fair Value Per Share	
	In thousands		
Outstanding at beginning of year	54,389	\$	15
Granted and replacement awards for acquisitions	29,930		16
Vested	(25,245)		15
Forfeited/canceled	(3,461)		16
Outstanding at end of year	55,613	\$	16

The total grant date fair value of restricted stock awards vested for Company employees in fiscal 2024, 2023, and 2022 was \$348 million, \$319 million and \$262 million, respectively. As of October 31, 2024, there was \$342 million of unrecognized pre-tax stock-based compensation expense related to unvested restricted stock units, which the Company expects to recognize over the remaining weighted-average vesting period of 1.3 years.

Performance Restricted Units

The Company issues performance stock units (“PSU”) that vest on the satisfaction of service and performance conditions. The fair value of the PSUs is the closing price of the Company’s common stock on the grant date of the award. The Company also issues performance-adjusted restricted stock units (“PARSU”) that vest only on the satisfaction of service, performance and market conditions. The Company estimates the fair value of PARSU subject to performance-contingent vesting conditions using the Monte Carlo simulation model. The expenses associated with these performance restricted units were not material for any of the periods presented.

Stock Options

Stock options granted under the Plan are generally non-qualified stock options, but the Plan permits some options granted to qualify as incentive stock options under the U.S. Internal Revenue Code. The exercise price of a stock option is equal to the closing price of the Company’s common stock on the option grant date. The majority of the stock options issued by the Company contain only service vesting conditions. The Company has also issued performance-contingent stock options that vest only on the satisfaction of both service and market conditions. The Company did not issue stock options in fiscal 2024, 2023, and 2022. The expenses associated with stock options were not material for any of the periods presented.

The Company utilizes the Black-Scholes-Merton option pricing formula to estimate the fair value of stock options subject to service-based vesting conditions. The Company estimates the fair value of stock options subject to performance-contingent vesting conditions using a combination of a Monte Carlo simulation model and a lattice model, as these awards contain market conditions.

Taxes on Earnings

Income Tax Disclosure [Abstract]
Taxes on Earnings

Taxes on Earnings

Provision for Taxes

The domestic and foreign components of Net earnings (loss) from operations before taxes were as follows:

	For the fiscal years ended October 31,		
	2024	2023	2022
	In millions		
U.S.	\$ 765	\$ (1,105)	\$ (1,138)
Non-U.S.	2,188	3,335	2,014
	\$ 2,953	\$ 2,230	\$ 876

The Provision for taxes on Net earnings from operations were as follows:

	For the fiscal years ended October 31,		
	2024	2023	2022
	In millions		
U.S. federal taxes:			
Current	\$ 8	\$ —	\$ 12
Deferred	(120)	(88)	(98)
Non-U.S. taxes:			
Current	415	256	288
Deferred	44	23	(143)
State taxes:			
Current	15	16	(43)
Deferred	12	(2)	(8)
	\$ 374	\$ 205	\$ 8

The differences between the U.S. federal statutory income tax rate and the Company’s effective tax rate were as follows:

	For the fiscal years ended October 31,		
	2024	2023	2022
U.S. federal statutory income tax rate	21.0 %	21.0 %	21.0 %
State income taxes, net of federal tax benefit	0.4 %	0.9 %	2.8 %
Lower rates in other jurisdictions, net	(1.3)%	(4.4)%	(0.9)%
Valuation allowance	(1.3)%	(2.8)%	(31.5)%
U.S. permanent differences	(4.0)%	(1.5)%	6.0 %
U.S. R&D credit	(1.8)%	(2.1)%	(5.1)%
Uncertain tax positions	(0.3)%	(2.0)%	(15.6)%
Goodwill impairment	— %	— %	21.5 %
Other, net	— %	0.1 %	2.7 %
	12.7 %	9.2 %	0.9 %

The jurisdictions with favorable tax rates that had the most significant impact on the Company's effective tax rate in the periods presented include Puerto Rico and Singapore.

In fiscal 2024, the Company recorded \$43 million of net income tax charges related to various items discrete to the year. These amounts primarily included \$104 million of income tax charges resulting from the gain on the partial disposition of H3C Technologies Co., Limited ("H3C"), which included \$215 million of U.S. and foreign income tax charges offset by \$111 million of income tax benefit for the release of an uncertain tax benefit related to the prior divestiture, partially offset by \$54 million of income tax benefits related to transformation costs, and acquisition, disposition and other related charges and \$11 million of net excess tax benefits related to stock-based compensation.

In fiscal 2023, the Company recorded \$131 million of net income tax benefits related to various items discrete to the year. These amounts primarily included \$104 million of income tax benefits related to transformation costs, and acquisition, disposition and other related charges and \$19 million of net excess tax benefits related to stock-based compensation.

In fiscal 2022, the Company recorded \$454 million of net income tax benefits related to various items discrete to the year. These amounts primarily included \$150 million of income tax benefits related to releases of foreign valuation allowances, \$99 million of income tax benefits related to transformation costs, and acquisition, disposition and other related charges, \$43 million of income tax benefits related to the settlement of U.S. tax audit matters, \$42 million of income tax benefits related to the release of U.S. passive foreign tax credit valuation allowances, \$30 million of income tax benefits related to the change in pre-separation tax liabilities, primarily those for which the Company shared joint and several liability with HP Inc. and for which the Company was indemnified by HP Inc., \$27 million of income tax benefits related to the utilization of capital losses which had a full valuation allowance, \$12 million of income tax benefits as a result of the fiscal 2021 U.S. tax return filing primarily from the decrease in GILTI, and \$11 million of net income tax benefits related to settlements and ongoing discussions in foreign tax audit matters.

As a result of certain employment actions and capital investments the Company has undertaken, income from manufacturing and services in certain countries is subject to reduced tax rates through 2039. The gross foreign income tax benefits attributable to these actions and investments were \$356 million (\$0.27 diluted net EPS) in fiscal 2024, \$857 million (\$0.65 diluted net EPS) in fiscal 2023, and \$832 million (\$0.63 diluted net EPS) in fiscal 2022. Refer to Note 16, "Net Earnings Per Share" for details on shares used to compute diluted net EPS.

Uncertain Tax Positions

A reconciliation of unrecognized tax benefits is as follows:

	As of October 31,		
	2024	2023	2022
	In millions		
Balance at beginning of year	\$ 672	\$ 674	\$ 2,131
Increases:			
For current year's tax positions	60	67	81
For prior years' tax positions	116	20	41
Decreases:			
For prior years' tax positions	(113)	(2)	(48)
Statute of limitations expiration	(4)	(4)	(12)
Settlements with taxing authorities	(7)	(83)	(1,491)
Settlements related to joint and several positions indemnified by HP Inc.	—	—	(28)
Balance at end of year	\$ 724	\$ 672	\$ 674

Up to \$344 million, \$354 million and \$386 million of the Company's unrecognized tax benefits at October 31, 2024, 2023 and 2022, respectively, would affect its effective tax rate if realized in their respective periods. During the first quarter of fiscal 2022, the Company effectively settled with the U.S. Internal Revenue Service ("IRS") for fiscal 2016, primarily contributing to the reduction in the Company's unrecognized tax benefits of \$1.5 billion, which was predominantly related to the timing of intercompany royalty revenue recognition which does not affect the Company's effective tax rate.

The Company recognizes interest income from favorable settlements and interest expense and penalties accrued on unrecognized tax benefits in Provision for taxes in the Consolidated Statements of Earnings. The Company recognized \$2 million of interest expense and \$25 million and \$55 million of interest income in fiscal 2024, 2023, and 2022, respectively. As of October 31, 2024 and 2023, the Company had accrued \$58 million and \$56 million, respectively, for interest and penalties in the Consolidated Balance Sheets.

The Company is subject to income tax in the U.S. and approximately 80 other countries and is subject to routine corporate income tax audits in many of these jurisdictions.

The Company engages in continuous discussion and negotiation with taxing authorities regarding tax matters in various jurisdictions. The Company is no longer subject to U.S. federal tax audits for years prior to 2017. The IRS is conducting audits of the Company's fiscal 2017 through 2022 U.S. federal income tax returns. During fiscal 2023, the IRS issued notices of proposed adjustments ("NOPAs") for fiscal 2017, 2018, and 2019 relating to HPE's intercompany transfer pricing. During the first quarter of fiscal 2024, the IRS issued a Revenue Agent Report ("RAR") finalizing their position on the NOPAs for the same issues and same fiscal years. However, HPE disagreed with the IRS' adjustments and believes the positions taken on its tax returns are more likely than not to prevail on technical merits, and has continued with settlement discussions with the IRS. During the third quarter of fiscal 2024, the Company submitted a formal settlement offer to the IRS to facilitate the closing of the audit and recorded increased reserves for unrecognized tax benefits of \$122 million. The impact of the increase in reserves is almost entirely offset with a valuation allowance release, and the net impact to income tax expense for fiscal 2024 was not material. It is reasonably possible that the IRS audit for fiscal 2017 through 2019 may be concluded in the next 12 months, and it is reasonably possible that existing unrecognized tax benefits related to these years may be reduced by an amount up to \$358 million within the next 12 months, the majority of which relates to adjustments to foreign tax credits that carry a full valuation allowance or to the timing of intercompany royalty revenue recognition, neither of which affects the Company's effective tax rate.

With respect to major state and foreign tax jurisdictions, the Company is no longer subject to tax authority examinations for years prior to 2005. However, it is reasonably possible that certain foreign tax issues may be concluded in the next 12 months, including issues involving resolution of certain intercompany transactions and other matters. The Company believes it is reasonably possible that its existing unrecognized tax benefits may be reduced by an amount up to \$6 million within the next 12 months.

The Company believes it has provided adequate reserves for all tax deficiencies or reductions in tax benefits that could result from federal, state and foreign tax audits. The Company regularly assesses the likely outcomes of these audits in order to determine the appropriateness of the Company's tax provision. The Company adjusts its uncertain tax positions to reflect the impact of negotiations, settlements, rulings, advice of legal counsel, and other information and events pertaining to a particular audit. However, income tax audits are inherently unpredictable and there can be no assurance that the Company will accurately predict the outcome of these audits. The amounts ultimately paid on resolution of an audit could be materially different from the amounts previously included in the Provision for taxes and therefore the resolution of one or more of these uncertainties in any particular period could have a material impact on net earnings or cash flows.

The Company has not provided for U.S. federal and state income and foreign withholding taxes on \$9.3 billion of undistributed earnings and basis differences from non-U.S. operations as of October 31, 2024 because the Company intends to reinvest such earnings indefinitely outside of the U.S. Determination of the amount of unrecognized deferred tax liability related to these earnings and basis differences is not practicable. The Company will remit non-indefinitely reinvested earnings of its non-U.S. subsidiaries for which deferred U.S. state income and foreign withholding taxes have been provided where excess cash has accumulated and the Company determines that it is advantageous for business operations, tax or cash management reasons.

Deferred Income Taxes

Deferred income taxes result from temporary differences between the amount of assets and liabilities recognized for financial reporting and tax purposes.

The significant components of deferred tax assets and deferred tax liabilities were as follows:

	As of October 31,		
	2024	2023	
	In millions		
Deferred tax assets:			
Loss and credit carryforwards ⁽¹⁾	\$ 5,692	\$ 5,936	
Inventory valuation	78	90	
Intercompany prepayments	192	325	
Warranty	45	49	
Employee and retiree benefits	162	184	
Restructuring	27	52	
Deferred revenue	799	658	
Intangible assets	251	107	
Capitalized R&D	81	44	
Lease liabilities	253	209	
Other	262	196	
Total deferred tax assets	7,842	7,850	
Valuation allowance ⁽¹⁾	(5,204)	(5,428)	
Total deferred tax assets net of valuation allowance	2,638	2,422	
Deferred tax liabilities:			
Unremitted earnings of foreign subsidiaries	(229)	(190)	
ROU assets	(236)	(192)	
Fixed assets	(150)	(102)	
Total deferred tax liabilities	(615)	(484)	
Net deferred tax assets and liabilities	\$ 2,023	\$ 1,938	

(1) Fiscal 2023 amounts have been reclassified to conform to the current period presentation.

Deferred tax assets and liabilities included in the Consolidated Balance Sheets are as follows:

	As of October 31,		
	2024	2023	
	In millions		
Deferred tax assets	\$ 2,396	\$ 2,264	
Deferred tax liabilities	(373)	(326)	
Deferred tax assets net of deferred tax liabilities	\$ 2,023	\$ 1,938	

As of October 31, 2024, the Company had \$269 million, \$2.9 billion and \$20.1 billion of federal, state and foreign net operating loss carryforwards, respectively. Amounts included in state and foreign net operating loss carryforwards will begin to expire in 2025; federal net operating losses can carry forward indefinitely. The Company has provided a valuation allowance of \$145 million and \$3.8 billion for deferred tax assets related to state and foreign net operating losses carryforwards, respectively. As of October 31, 2024, the Company also had \$20 million, \$81 million, and \$91 million of federal, state, and foreign capital loss carryforwards, respectively. Amounts included in federal and state capital loss carryforwards will begin to expire in 2028; foreign capital losses can carry forward indefinitely. The Company has provided a valuation allowance of \$5 million and \$27 million for deferred tax assets related to state and foreign capital loss carryforwards, respectively.

As of October 31, 2024, the Company had recorded deferred tax assets for various tax credit carryforwards as follows:

	Carryforward	Valuation Allowance	Initial Year of Expiration
	In millions		
U.S. foreign tax credits	\$ 648	\$ (648)	2027
U.S. research and development and other credits	230	—	2029
Tax credits in state and foreign jurisdictions	197	(177)	2028
Balance at end of year	\$ 1,075	\$ (825)	

Total valuation allowances decreased by \$224 million in fiscal 2024, primarily as a result of the utilization of certain non-U.S. loss carryforwards which had full valuation allowances, the impact on fully valued U.S. foreign tax credits as a result of the change in uncertain tax benefits, the recording of valuation allowances on certain non-U.S. tax credits, and the release of certain foreign valuation allowances.

Tax Matters Agreement and Other Income Tax Matters

In connection with the completed separations and mergers of the former Enterprise Services business with DXC Technology Company ("DXC") (the "Everett Transaction" or "Everett") and the Software Segment with Micro Focus International plc ("Micro Focus") (the "Seattle Transaction" or "Seattle"), the Company entered into a DXC Tax Matters Agreement with DXC and a Micro Focus Tax Matters Agreement with Micro Focus, respectively. See Note 18, "Guarantees and Indemnifications," for a description of the DXC Tax Matters Agreement and Micro Focus Tax Matters Agreement.

The allowance for doubtful accounts related to accounts receivable and changes therein were as follows:

	As of October 31,		
	2024	2023	2022
	In millions		
Balance at beginning of year	\$ 37	\$ 25	\$ 23
Provision for credit losses	41	29	25
Adjustments to existing allowances, including write offs	(68)	(17)	(23)
Balance at end of year	\$ 10	\$ 37	\$ 25

The Company has third-party revolving short-term financing arrangements intended to facilitate the working capital requirements of certain customers. The Company recorded an obligation of \$62 million, \$80 million and \$88 million in Notes payable and short-term borrowings in its Consolidated Balance Sheets as of October 31, 2024, 2023 and 2022, respectively, related to the trade receivables sold and collected from the third-party for which the revenue recognition was deferred. For arrangements involving an element of recourse, the fair value of the recourse obligation is measured using market data from similar transactions and reported as a current liability in Other accrued liabilities in the Consolidated Balance Sheets.

The activity related to Hewlett Packard Enterprise's revolving short-term financing arrangements was as follows:

	As of October 31,		
	2024	2023	2022
	In millions		
Balance at beginning of period ⁽¹⁾	\$ 83	\$ 163	\$ 336

Other	1,674	1,792
Total	\$ 12,616	\$ 11,377

Supplier Financing Arrangements

The Company enters into supplier financing arrangements with external financial institutions. Under these arrangements, suppliers can choose to settle outstanding payment obligations at a discount. The Company holds no economic interest in suppliers' participation, nor does it provide guarantees or pledge assets under these arrangements. Invoices are settled with the financial institutions based on the original supplier payment terms. These arrangements do not alter the Company's rights and obligations towards suppliers, including scheduled payment terms. Liabilities associated with the funded participation in these arrangements, are presented within Accounts Payable on the Consolidated Balance Sheets, amounted to \$466 million, and \$295 million as of October 31, 2024 and October 31, 2023, respectively.

Other Accrued Liabilities

	As of October 31,	
	2024	2023
	In millions

Settlements made	(185)	(208)	(203)
Balance at end of year ⁽¹⁾	\$ 301	\$ 318	\$ 360

(1) The Company included the current portion in Other accrued liabilities, and amounts due after one year in Other non-current liabilities in the accompanying Consolidated Balance Sheets.

Contract Liabilities and Remaining Performance Obligations

Contract liabilities consist of deferred revenue and customer deposits. A summary of contract liabilities were as follows:

	Location	As of October 31,		
		2024	2023	2022
		In millions		
Customer deposits	Other accrued liabilities	\$ 289	\$ 392	
Customer deposits - non-current	Other non-current liabilities	7	144	
Total customer deposits		\$ 296	\$ 536	
Deferred revenue	Deferred revenue	\$ 3,904	\$ 3,658	
Deferred revenue - non-current	Other non-current liabilities	3,578	3,281	
Total deferred revenue		\$ 7,482	\$ 6,939	

In fiscal 2024, approximately \$3.5 billion of revenue was recognized relating to contract liabilities recorded as of October 31, 2023.

Revenue allocated to remaining performance obligations represents contract work that has not yet been performed and does not include contracts where the customer is not committed. Remaining performance obligations estimates are subject to change and are affected by several factors, including contract terminations, changes in the scope of contracts, adjustments for revenue that has not materialized and adjustments for currency. As of October 31, 2024, the aggregate amount of deferred revenue, was \$7.5 billion. The Company expects to recognize approximately 50% of this balance over fiscal 2025 with the remainder to be recognized thereafter. The Company receives payments in advance of completion of its contractual obligations, these payments are considered customer deposits. As customer acceptance milestones are met, the Company will recognize revenue and reduce the amount of contract liabilities. As of October 31, 2024, the aggregate amount of customer deposits was \$296 million. The Company expects to recognize \$289 million over fiscal 2025 and the remaining balance thereafter.

Costs to obtain a Contract

As of October 31, 2024, the current and non-current portions of the capitalized costs to obtain a contract were \$88 million and \$136 million, respectively. As of October 31, 2023, the current and non-current portions of the capitalized costs to obtain a contract were \$86 million and \$138 million, respectively. The current and non-current portions of the capitalized costs to obtain a contract were included in Other current assets, and Long-term financing receivables and other assets, respectively, in the Consolidated Balance Sheets. In fiscal 2024, 2023, and 2022 the Company amortized \$106 million, \$94 million, and \$83 million, respectively, of the capitalized costs to obtain a contract which are included in Selling, general and administrative expense in the Consolidated Statements of Earnings.

Accounting for Leases as a Lessor

Financing Receivables

Financing receivables represent sales-type and direct-financing leases of the Company and third-party products. These receivables typically have terms ranging from two to five years and are usually collateralized by a security interest in the underlying assets. Financing receivables also include billed receivables from operating leases. The allowance for credit losses represents future expected credit losses over the life of the receivables based on past experience, current information and forward-looking economic considerations. The components of financing receivables were as follows:

		As of October 31,	
		2024	2023
		In millions	
Minimum lease payments receivable		\$ 10,266	\$ 9,363
Unguaranteed residual value		599	438
Unearned income		(1,218)	(987)
Financing receivables, gross		9,647	8,814
Allowance for credit losses		(194)	(243)
Financing receivables, net		9,453	8,571
Less: current portion		(3,870)	(3,543)
Amounts due after one year, net		\$ 5,583	\$ 5,028

As of October 31, 2024, scheduled maturities of the Company's minimum lease payments receivable were as follows:

Fiscal year		As of October 31, 2024	
		In millions	
2025		\$ 4,282	
2026		2,977	
2027		1,747	
2028		892	
2029		277	
Thereafter		91	
Total undiscounted cash flows		\$ 10,266	
Present value of lease payments (recognized as finance receivables)		\$ 9,048	
Difference between undiscounted cash flows and discounted cash flows		\$ 1,218	

Sale of Financing Receivables

The Company enters into arrangements to transfer the contractual payments due under certain financing receivables to third-party financial institutions. For the fiscal years ended October 31, 2024 and 2023, the Company sold \$93 million and \$237 million, respectively, of financing receivables.

Credit Quality Indicators

Due to the homogeneous nature of its leasing transactions, the Company manages its financing receivables on an aggregate basis when assessing and monitoring credit risk. Credit risk is generally diversified due to the large number of entities comprising the Company's customer base and their dispersion across many different industries and geographic regions. The Company evaluates the credit quality of an obligor at lease inception and monitors that credit quality over the term of a transaction. The Company assigns risk ratings to each lease based on the creditworthiness of the obligor and other variables that augment or mitigate the inherent credit risk of a particular transaction and periodically updates the risk ratings when there is a change in the underlying credit quality. Such variables include the underlying value and liquidity of the collateral, the essential use of the equipment, the term of the lease, and the inclusion of credit enhancements, such as guarantees, letters of credit or security deposits.

The credit risk profile of gross financing receivables, based on internal risk ratings as of October 31, 2024, presented on amortized cost basis by year of origination was as follows:

Fiscal Year		As of October 31, 2024		
		Low	Risk Rating Moderate In millions	High
2024		\$ 2,630	\$ 1,120	\$ 19
2023		1,804	948	54
2022		1,128	665	46
2021		440	317	52
2020 and prior		158	193	73
Total		\$ 6,160	\$ 3,243	\$ 244

The credit risk profile of gross financing receivables, based on internal risk ratings as of October 31, 2023, presented on amortized cost basis by year of origination was as follows:

Fiscal Year		As of October 31, 2023		
		Low	Risk Rating Moderate In millions	High
2023		\$ 2,100	\$ 1,196	\$ 31
2022		1,681	1,052	51
2021		868	645	57
2020		336	285	35
2019 and prior		155	223	99
Total		\$ 5,140	\$ 3,401	\$ 273

Accounts rated low risk typically have the equivalent of a Standard & Poor's rating of BBB- or higher, while accounts rated moderate risk generally have the equivalent of BB+ or lower. The Company classifies accounts as high risk when it considers the financing receivable to be impaired or when management believes there is a significant near-term risk of impairment. The credit quality indicators do not reflect any mitigation actions taken to transfer credit risk to third parties.

Allowance for Credit Losses

The allowance for credit losses for financing receivables as of October 31, 2024, 2023, and 2022, and the respective changes for the twelve months then ended were as follows:

	As of October 31,		
	2024	2023	2022
	In millions		
Balance at beginning of period	\$ 243	\$ 325	\$ 228
Provision for credit losses ⁽¹⁾	50	58	177
Adjustment to the existing allowance	(4)	—	(10)
Write-offs	(95)	(140)	(70)
Balance at end of period	\$ 194	\$ 243	\$ 325

(1) Fiscal 2022 included a provision of \$99 million related to expected credit losses due to the Company's exit from its Russia and Belarus businesses.

Non-Accrual and Past-Due Financing Receivables

The following table summarizes the aging and non-accrual status of gross financing receivables:

	As of October 31,	
	2024	2023
	In millions	
Billed: ⁽¹⁾		
Current 1-30 days	\$ 334	\$ 320
Past due 31-60 days	29	30
Past due 61-90 days	12	13
Past due > 90 days	79	100
Unbilled sales-type and direct-financing lease receivables	9,193	8,351
Total gross financing receivables	\$ 9,647	\$ 8,814
Gross financing receivables on non-accrual status ⁽²⁾	\$ 214	\$ 227
Gross financing receivables 90 days past due and still accruing interest ⁽²⁾	\$ 82	\$ 81

(1) Includes billed operating lease receivables and billed sales-type and direct-financing lease receivables.

(2) Includes billed operating lease receivables and billed and unbilled sales-type and direct-financing lease receivables.

Operating Leases

Operating lease assets included in Property, plant and equipment, net in the Consolidated Balance Sheets were as follows:

	As of October 31,	
	2024	2023
	In millions	
Equipment leased to customers	\$ 6,669	\$ 7,019
Accumulated depreciation	(3,037)	(2,919)
Total	\$ 3,632	\$ 4,100

As of October 31, 2024, minimum future rentals on non-cancelable operating leases related to leased equipment were as follows:

Fiscal year	As of October 31, 2024	
	In millions	
2025	\$ 1,696	
2026	962	
2027	339	
2028	36	
2029	3	
Thereafter	1	
Total	\$ 3,037	

If a lease is classified as an operating lease, the Company records lease revenue on a straight-line basis over the lease term. At commencement of an operating lease, initial direct costs are deferred and are expensed over the lease term on the same basis as the lease revenue is recorded.

The following table presents amounts included in the Consolidated Statements of Earnings related to lessor activity:

	Location	For the fiscal years ended October 31,		
		2024	2023	2022
		In millions		
Interest income from sales-type leases and direct financing leases	Financing income	\$ 668	\$ 547	\$ 483
Lease income from operating leases	Services	2,344	2,407	2,296
Total lease income		\$ 3,012	\$ 2,954	\$ 2,779

Variable Interest Entities

The Company has issued asset-backed debt securities under a fixed-term securitization program to private investors. The asset-backed debt securities are collateralized by the U.S. fixed-term financing receivables and leased equipment in the offering, which is held by a Special Purpose Entity ("SPE"). The SPE meets the definition of a Variable Interest Entity ("VIE") and is consolidated, along with the associated debt, into the Consolidated Financial Statements as the Company is the primary beneficiary of the VIE. The SPE is a bankruptcy-remote legal entity with separate assets and liabilities. The purpose of the SPE is to facilitate the funding of customer receivables and leased equipment in the capital markets.

The Company's risk of loss related to securitized receivables and leased equipment is limited to the amount by which the Company's right to receive collections for assets securitized exceeds the amount required to pay interest, principal, and fees and expenses related to the asset-backed securities.

The following table presents the assets and liabilities held by the consolidated VIE as of October 31, 2024 and 2023, which are included in the Consolidated Balance Sheets. The assets in the table below include those that can be used to settle the obligations of the VIE. Additionally, general creditors do not have recourse to the assets of the VIE.

	As of October 31,	
	2024	2023
	In millions	
Assets held by VIE:		
Other current assets	\$ 189	\$ 145
Financing receivables		
Short-term	\$ 872	\$ 764
Long-term	\$ 1,079	\$ 983
Property, plant and equipment, net	\$ 1,033	\$ 1,214
Liabilities held by VIE:		
Notes payable and short-term borrowings, net of unamortized debt issuance costs	\$ 1,433	\$ 1,392
Long-term debt, net of unamortized debt issuance costs	\$ 965	\$ 1,082

For the year ended October 31, 2024, financing receivables and leased equipment transferred via securitization through the SPE were \$1.2 billion and \$0.6 billion, respectively. For the fiscal year ended October 31, 2023, financing receivables and leased equipment transferred via securitization through the SPE were \$0.8 billion and \$0.7 billion, respectively.

12 Months Ended Oct. 31, 2024

Acquisitions and Dispositions

Acquisitions and Disposition in fiscal 2024

On August 30, 2024, the Company completed the acquisition of Morpheus Data, a pioneer in software for hybrid cloud management and platform operations. Morpheus Data's results of operations were included within the Hybrid Cloud segment. The acquisition date fair value consideration of \$147 million primarily consisted of cash paid for outstanding common stock. The Company is amortizing the intangible assets on a straight-line basis over an estimated weighted-average useful life of 4 years. The purchase price allocations for the Morpheus Data acquisition, described below, reflect various preliminary fair value estimates and analysis, including preliminary work performed by third-party valuation specialists, of certain tangible assets and

liabilities acquired, the valuation of intangible assets acquired, certain legal matters, income and non-income based taxes, and residual goodwill, which are subject to change within the measurement period.

The following table presents the aggregate estimated fair value of the assets acquired and liabilities assumed, including those items that are still pending allocations, for the acquisition completed during fiscal 2024:

	In millions
Goodwill	\$ 98
Amortizable intangible assets	68
Net liabilities assumed	(19)
Total fair value consideration	\$ 147

Pending Merger with Juniper Networks, Inc.

On January 9, 2024, the Company entered into a definitive merger agreement under which HPE will acquire Juniper Networks, Inc. ("Juniper Networks") in an all-cash transaction for \$40.00 per share, representing an equity value of approximately \$14 billion. The transaction was unanimously approved by the boards of directors of both companies. On April 2, 2024, Juniper Networks shareholders approved the transaction. The transaction is expected to be funded based on senior unsecured delayed draw term loans from a syndicate of banks, the post-tax proceeds from the Company's sale to UNIS of 30% of the total issued share capital of H3C, the net proceeds (including after repayments of maturing debt) of its September 2024 issuances of senior unsecured notes and 7.625% Series C Mandatory Convertible Preferred Stock (the "Preferred Stock"), and cash on the balance sheet. Refer to Note 14, "Borrowings," and Note 15, "Stockholders' Equity," for additional information. The closing of the transaction remains subject to receipt of regulatory approvals and satisfaction of other customary closing conditions.

Disposition of CTG

On May 23, 2024, HPE announced plans to divest the CTG business to HCLTech. CTG is included in the Communications and Media Solutions business, which is reported in the Corporate Investments and Other segment. This divestiture includes the platform-based software solutions portions of the CTG portfolio, including systems integration, network applications, data intelligence, and the business support systems groups. As of October 31, 2024, assets and liabilities to be sold have been presented in the Consolidated Balance Sheets as assets and liabilities held for sale. On December 1, 2024, the Company completed the disposition of CTG. The Company received net proceeds of \$210 million and expect to recognize a gain of approximately \$230 million.

Acquisitions in fiscal 2023

During fiscal 2023, the Company completed five acquisitions. The purchase price allocations for the acquisitions described below reflect various fair value estimates and analysis, including work performed by third-party valuation specialists, of certain tangible assets and liabilities acquired, the valuation of intangible assets acquired, certain legal matters, income and non-income based taxes, and residual goodwill, which were subject to change within the measurement period. Measurement period adjustments were recorded in the reporting period in which the estimates were finalized and adjustment amounts were determined.

The pro forma results of operations, revenue and net income subsequent to the acquisition dates have not been presented as they were not material to the Company's consolidated results of operations, either individually or in the aggregate. Goodwill, which represents the excess of the purchase price over the net tangible and intangible assets acquired, was not deductible for tax purposes.

The following table presents the aggregate estimated fair value of the assets acquired and liabilities assumed, including those items that are still pending allocations, for the acquisitions completed during fiscal 2023:

	In millions
Goodwill	\$ 585
Amortizable intangible assets	209
Net tangible assets assumed	46
Total fair value consideration	\$ 840

On May 2, 2023, the Company completed the acquisition of OpsRamp, an IT operations management company that monitors, observes, automates, and manages IT infrastructure, cloud resources, workloads, and applications for hybrid and multi-cloud environments, including the leading hyperscalers. OpsRamp's results of operations were included within the Corporate Investments and Other segment. The acquisition date fair value consideration of \$307 million primarily consisted of cash paid for outstanding common stock. In connection with this acquisition, the Company recorded approximately \$217 million of goodwill, and \$84 million of intangible assets. The Company is amortizing the intangible assets on a straight-line basis over an estimated weighted-average useful life of 5 years.

On March 15, 2023, the Company completed the acquisition of Axis Security, a cloud security provider, enabling the Company to expand its edge-to-cloud security capabilities by offering a unified Secure Access Services Edge solution to meet the increasing demand for integrated networking and security solutions deliveredaaS. Axis Security's results of operations were included within the Intelligent Edge segment. The acquisition date fair value consideration of \$412 million primarily consisted of cash paid for outstanding common stock. In connection with this acquisition, the Company recorded approximately \$311 million of goodwill, and \$71 million of intangible assets. The Company is amortizing the intangible assets on a straight-line basis over an estimated weighted-average useful life of 5 years.

Acquisitions in fiscal 2022

The Company did not have any acquisitions during fiscal 2022.

Intangible Assets
Disclosure [Abstract]
Goodwill and Intangible
Assets

12 Months Ended
Oct. 31, 2024

Goodwill and Intangible Assets

Goodwill

Goodwill and related changes in the carrying amount by reportable segment were as follows:

	Server	Hybrid Cloud	Intelligent Edge	Financial Services	Corporate Investments & Other	Total
Balance at October 31, 2023 ⁽¹⁾	\$ 10,220	\$ 4,716	\$ 2,908	\$ 144	\$ —	\$ 17,988
Goodwill from acquisitions	—	98	—	—	—	98
Goodwill adjustments	—	(1)	1	—	—	—
Balance at October 31, 2024 ⁽¹⁾	\$ 10,220	\$ 4,813	\$ 2,909	\$ 144	\$ —	\$ 18,086

(1) Goodwill is net of accumulated impairment losses of \$1.9 billion. Of this amount, \$1.7 billion relates to the HPC & AI reporting unit of which \$815 million was recorded during the fourth quarter of fiscal 2022. The Hybrid Cloud reporting unit has an accumulated impairment loss of \$90 million related to the former Software reporting unit which was also recorded during the fourth quarter of fiscal 2022.

2024 Interim and Annual Goodwill Impairment Reviews

As of October 31, 2024, the Company's reporting units with goodwill are consistent with the reportable segments identified in Note 2, "Segment Information" to the Consolidated Financial Statements in Item 8 of Part II, with the exception of Server, which contains two reporting units: Compute and HPC & AI, and Corporate Investments and Other which contains two reporting units: Advisory and Professional Services, and Legacy Communications and Media Solutions.

During fiscal 2024, the Company performed the following goodwill impairment tests, none of which resulted in goodwill impairment:

- Impairment test performed as of November 1, 2023 based on organizational changes impacting the composition of reporting units as of that date;
- Annual goodwill impairment test, which was performed as of the first day of the fourth quarter of fiscal 2024. The excess of fair value over carrying amount for the reporting units ranged from approximately 8% to 198% of the respective carrying amounts and;
- Interim goodwill impairment test as of September 30, 2024 for Compute and Hybrid Cloud reporting units.

In September 2024, HPE sold 30% of the total issued share capital of H3C. The equity investment in H3C primarily benefits the Compute and Hybrid Cloud reporting units. Subsequent to the sale, on September 30, 2024, the Company performed an interim impairment analysis for Compute and Hybrid Cloud reporting units. The excess of fair value over carrying amount for these reporting units was 6% for Compute and 5% for Hybrid Cloud.

The Compute reporting unit has goodwill of \$8.2 billion as of October 31, 2024, and excess of fair value over carrying value of 6% as of the September 30, 2024 interim test date. The Compute business is cyclical in nature. Over the last several years, digital transformation drove increased investment to modernize infrastructure. However, in the current macroeconomic and inflationary environment, customers have invested selectively resulting in moderate unit growth and competitive pricing. The Compute business continues to focus on capturing market share while maintaining operating margin, leveraging its strong portfolio of ProLiant Gen11 products.

The Hybrid Cloud reporting unit has goodwill of \$4.8 billion as of October 31, 2024, and excess of fair value of 5% as of the September 30, 2024 interim test date. Although the Hybrid Cloud business is on a positive trajectory, the Company is managing both a sales model transition and product transition within this business. The Company's product model transition is to a more cloud-native, software-defined platform with HPE Alletra. Translating this growth to revenue and operating income will take time because a greater mix of high margin business such as ratable software and services, are deferred and recognized in future periods.

2023 and 2022 Annual Goodwill Impairment Reviews

The Company's fiscal 2023 annual impairment test did not result in any impairment charges.

The Company's fiscal 2022 annual goodwill impairment analysis resulted in impairment charges for goodwill related to the HPC & AI reporting unit and former Software reporting unit (which is now part of the Hybrid Cloud reporting unit). There was no impairment of goodwill for other reporting units.

The decline in the fair value of the HPC & AI reporting unit below its carrying value resulted from changes in expected future cash flows due to the continuation of supply chain constraints, and other operational challenges as well as an increase in cost of capital. As a result, a goodwill impairment charge of \$815 million was recorded in the fourth quarter of fiscal 2022. The decline in the fair value of the former Software reporting unit resulted primarily from a decline in market multiples. As a result, a goodwill impairment charge of \$90 million was recorded in the fourth quarter of fiscal 2022.

Intangible Assets

	As of October 31, 2024			As of October 31, 2023		
	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net
			In millions			
Customer contracts, customer lists and distribution agreements	\$ 219	\$ (70)	\$ 149	\$ 357	\$ (177)	\$ 180
Developed and core technology and patents	747	(443)	304	1,162	(711)	451
Trade name and trademarks	6	(5)	1	146	(123)	23
Capitalized software development costs	56	—	56	—	—	—
Total intangible assets	\$ 1,028	\$ (518)	\$ 510	\$ 1,665	\$ (1,011)	\$ 654

For fiscal 2024, the decrease in gross intangible assets was primarily due to \$761 million of intangible assets which became fully amortized and were eliminated from gross intangible assets and accumulated amortization, partially offset by \$68 million of intangible assets related to acquisitions and \$56 million related to capitalized software development costs.

As of October 31, 2024, the weighted-average remaining useful lives of the Company's finite-lived intangible assets were as follows:

	Weighted-Average Remaining Useful Lives In years
Customer contracts, customer lists and distribution agreements	5
Developed and core technology and patents	3
Trade name and trademarks	1
Capitalized software development costs	3

As of October 31, 2024, estimated future amortization expense related to finite-lived intangible assets was as follows:

Fiscal year	In millions
2025	\$ 152
2026	128
2027	95
2028	50
2029	30
Thereafter	5
Total ⁽¹⁾	\$ 460

(1)This table does not include \$50 million of software development costs that are in-progress and not amortizable.

[Abstract]
Fair Value

12 Months Ended
Oct. 31, 2024

Fair Value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants at the measurement date.

Fair Value Hierarchy

The Company uses valuation techniques that are based upon observable and unobservable inputs. Observable inputs are developed using market data such as publicly available information and reflect the assumptions market participants would use, while unobservable inputs are developed using the best information available about the assumptions market participants would use. Assets and liabilities are classified in the fair value hierarchy based on the lowest level input that is significant to the fair value measurement:

Level 1—Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2—Quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability and market-corroborated inputs.

Level 3—Unobservable inputs for assets or liabilities.

The fair value hierarchy gives the highest priority to observable inputs and lowest priority to unobservable inputs. For the fiscal years ended October 31, 2024 and 2023, there were no transfers between levels within the fair value hierarchy.

The following table presents the Company's assets and liabilities that are measured at fair value on a recurring basis:

	As of October 31, 2024				As of October 31, 2023

(1) Available-for-sale debt securities with carrying values that approximate fair value.

Valuation Techniques

Cash Equivalents and Investments: The Company holds time deposits, money market funds, debt securities primarily consisting of corporate and foreign government notes and bonds. The Company values cash equivalents using quoted market prices, alternative pricing sources, including net asset value, or models utilizing market observable inputs. The fair value of debt and equity investments was based on quoted market prices or model-driven valuations using inputs primarily derived from or corroborated by observable market data, and, in certain instances, valuation models that utilize assumptions which cannot be corroborated with observable market data. Equity and other securities include investments in marketable and non-marketable securities. In evaluating non-marketable securities for impairment or observable price changes, the Company uses valuation techniques using the best information available, and may include quoted market prices, market comparables and discounted cash flow projections.

Derivative Instruments: The Company uses forward contracts, interest rate and total return swaps to hedge certain foreign currency and interest rate exposures. The Company uses industry standard valuation models to measure fair value. Where applicable, these models project future cash flows and discount the future amounts to present value using market-based observable inputs, including interest rate curves, the Company and counterparties' credit risk, foreign currency exchange rates, and forward and spot prices for currencies and interest rates. See Note 13, "Financial Instruments," for a further discussion of the Company's use of derivative instruments.

Other Fair Value Disclosures

Short-Term and Long-Term Debt: The Company estimates the fair value of its debt primarily using an expected present value technique, which is based on observable market inputs using interest rates currently available to companies of similar credit standing for similar terms and remaining maturities, and considering its own credit risk. The portion of the Company's debt that is hedged is reflected in the Consolidated Balance Sheets as an amount equal to the debt's carrying amount and a fair value adjustment representing changes in the fair value of the hedged debt obligations arising from movements in benchmark interest rates. As of October 31, 2024, the estimated fair value of the Company's short-term and long-term debt was \$18.3 billion and the carrying value was \$18.2 billion. As of October 31, 2023, the estimated fair value of the Company's short-term

and long-term debt was \$12.2 billion and the carrying value was \$12.4 billion. If measured at fair value in the Consolidated Balance Sheets, short-term and long-term debt would be classified in Level 2 of the fair value hierarchy.

Other Financial Instruments: For the balance of the Company's financial instruments, primarily accounts receivable, accounts payable and financial liabilities included in other accrued liabilities, the carrying amounts approximate fair value due to their short-term nature. If measured at fair value in the Consolidated Balance Sheets, these other financial instruments would be classified in Level 2 or Level 3 of the fair value hierarchy.

Non-Recurring Fair Value Measurements

Equity Investments without Readily Determinable Fair Value: Equity investments are recorded at cost and measured at fair value, when they are deemed to be impaired or when there is an adjustment from observable price changes. For fiscal 2024, the Company recorded a net unrealized gain of \$34 million. For fiscal 2023 and 2022, the Company recorded net unrealized losses of \$45 million and \$17 million, respectively, which included impairments of \$50 million and \$24 million for the same respective periods. These amounts are reflected in Interest and other, net in the Consolidated Statements of Earnings. If measured at fair value in the Consolidated Balance Sheets, these would generally be classified in Level 3 of the fair value hierarchy. These adjustments are based on observable price changes for certain equity investments without readily determinable fair value. For investments still held as of October 31, 2024, the cumulative upward adjustments for observable price changes was \$82 million and cumulative downward adjustments for observable price changes and impairments was \$88 million. Refer to Note 13 "Financial Instruments," for further information about equity investments.

Non-Financial Assets: The Company's non-financial assets, such as intangible assets, goodwill and property, plant and equipment, are recorded at cost. The Company records ROU assets based on the lease liability, adjusted for lease prepayments, lease incentives received and the lessee's initial direct costs. Fair value adjustments are made to these non-financial assets in the period an impairment charge is recognized.

In fiscal 2023 and 2022, the Company recorded a net ROU asset impairment charge of \$18 million and \$5 million, respectively, in Transformation costs in the Consolidated Statements of Earnings as the carrying value of certain ROU assets exceeded its fair value. If measured at fair value in the Consolidated Balance Sheets, these would generally be classified in Level 3 of the fair value hierarchy.

In the fourth quarter of fiscal 2022, the Company recorded a goodwill impairment charge of \$905 million associated with the HPC & AI reporting unit and the Software reporting unit within the Corporate Investments and Other segment. The fair value of the Company's reporting units was classified in Level 3 of the fair value hierarchy due to the significance of unobservable inputs developed using company-specific information. For more information on the goodwill impairment, see Note 11, "Goodwill and Intangible Assets."

Financial Instruments

Cash Equivalents and Available-for-Sale Debt Investments

Cash equivalents and available-for-sale debt investments were as follows:

As of October 31, 2024					As of October 31, 2023				
Gross Unrealized Gains/(Losses)					Gross Unrealized Gains/(Losses)				
Cost			Fair Value		Cost		Fair Value		
In millions									
Cash Equivalents:									
Time deposits	\$ 601	\$ —	\$ 601	\$ 905	\$ —	\$ 905			
Money market funds	12,639	—	12,639	1,672	—	1,672			
Total cash equivalents	13,240	—	13,240	2,577	—	2,577			
Available-for-sale Debt Investments:									
Foreign bonds	101	2	103	100	(3)	97			
Other debt securities	8	6	14	19	3	22			
Total available-for-sale debt investments	109	8	117	119	—	119			
Total cash equivalents and available-for-sale debt investments	\$ 13,349	\$ 8	\$ 13,357	\$ 2,696	\$ —	\$ 2,696			

All highly liquid investments with original maturities of three months or less at the date of acquisition are considered cash equivalents. As of October 31, 2024 and 2023, the carrying amount of cash equivalents approximated fair value due to the short period of time to maturity. Interest income related to cash, cash equivalents and debt securities was approximately \$197 million, \$127 million and \$39 million in fiscal 2024, 2023 and 2022, respectively. Time deposits were primarily issued by institutions outside the U.S. as of October 31, 2024 and 2023. The estimated fair value of the available-for-sale debt investments may not be representative of values that will be realized in the future.

Contractual maturities of investments in available-for-sale debt securities were as follows:

			As of October 31, 2024	
			Amortized Cost	Fair Value
			In millions	
Due in more than five years			109	117
			\$ 109	\$ 117

Equity Investments

Non-marketable equity investments in privately held companies are included in Long-term financing receivables and other assets in the Consolidated Balance Sheets. These non-marketable equity investments are carried either at fair value or under measurement alternative. Measurement alternative equity investments are recorded at cost and measured at fair value when they are deemed to be impaired or when there is an adjustment from observable price changes.

The carrying amount of those non-marketable equity investments accounted for under the fair value option was \$88 million and \$135 million as of October 31, 2024 and 2023, respectively. For fiscal 2024, he Company recorded a net unrealized loss of \$47 million on these investments. For fiscal 2023 and 2022, the Company recorded net unrealized gains of \$9 million and \$86 million, respectively on these investments. These amounts are reflected in Interest and other, net in the Consolidated Statements of Earnings. In fiscal 2022, the Company sold \$165 million of these investments.

The carrying amount of those non-marketable equity investments accounted for under the measurement alternative was \$200 million and \$145 million as of October 31, 2024 and 2023, respectively. For fiscal 2024, the Company recorded a net unrealized gain of \$34 million. For fiscal 2023 and 2022, the Company recorded net unrealized losses of \$45 million and \$17 million, respectively, which included impairments of \$50 million and \$24 million for the same respective periods. These amounts are reflected in Interest and other, net in the Consolidated Statements of Earnings.

Derivative Instruments

The Company is a global company exposed to foreign currency exchange rate fluctuations and interest rate changes in the normal course of its business. As part of its risk management strategy, the Company uses derivative instruments, primarily forward contracts, interest rate swaps and total return swaps to hedge certain foreign currency, interest rate and, to a lesser extent, equity exposures. The Company's objective is to offset gains and losses resulting from these exposures with losses and gains on the derivative contracts used to hedge them, thereby reducing volatility of earnings or protecting the fair value of assets and liabilities. The Company does not have any leveraged derivatives and does not use derivative contracts for speculative purposes. The Company may designate its derivative contracts as fair value hedges, cash flow hedges or hedges of the foreign currency exposure of a net investment in a foreign operation ("net investment hedges"). Additionally, for derivatives not designated as hedging instruments, the Company categorizes those economic hedges as other derivatives. Derivative instruments are recognized at fair value in the Consolidated Balance Sheets. The change in fair value of the derivative instruments is recognized in the Consolidated Statements of Earnings or Consolidated Statements of Comprehensive Income depending upon the type of hedge as further discussed below. The Company classifies cash flows from its derivative programs with the activities that correspond to the underlying hedged items in the Consolidated Statements of Cash Flows.

As a result of its use of derivative instruments, the Company is exposed to the risk that its counterparties will fail to meet their contractual obligations. To mitigate counterparty credit risk, the Company has a policy of only entering into derivative contracts with carefully selected major financial institutions based on their credit ratings and other factors, and the Company maintains dollar risk limits that

correspond to each financial institution's credit rating and other factors. The Company's established policies and procedures for mitigating credit risk include reviewing and establishing limits for credit exposure and periodically reassessing the creditworthiness of its counterparties. Master netting agreements also mitigate credit exposure to counterparties by permitting the Company to net amounts due from the Company to a counterparty against amounts due to the Company from the same counterparty under certain conditions.

To further mitigate credit exposure to counterparties, the Company has collateral security agreements, which allows the Company to hold collateral from, or require the Company to post collateral to counterparties when aggregate derivative fair values exceed contractually established thresholds which are generally based on the credit ratings of the Company and its counterparties. If the Company's credit rating falls below a specified credit rating, the counterparty has the right to request full collateralization of the derivatives' net liability position. Conversely, if the counterparty's credit rating falls below a specified credit rating, the Company has the right to request full collateralization of the derivatives' net liability position. Collateral is generally posted within two business days. The fair value of the Company's derivatives with credit contingent features in a net liability position was \$23 million and \$108 million at October 31, 2024 and 2023, respectively, most of which were fully collateralized within two business days.

Under the Company's derivative contracts, the counterparty can terminate all outstanding trades following a covered change of control event affecting the Company that results in the surviving entity being rated below a specified credit rating. This credit contingent provision did not affect the Company's financial position or cash flows as of October 31, 2024 and 2023.

Fair Value Hedges

The Company issues long-term debt in U.S. dollars based on market conditions at the time of financing. The Company may enter into fair value hedges, such as interest rate swaps, to reduce the exposure of its debt portfolio to changes in fair value resulting from changes in interest rates by achieving a primarily U.S. dollar LIBOR-based floating interest rate which was replaced with SOFR starting in July of fiscal 2023. The swap transactions generally involve principal and interest obligations for U.S. dollar-denominated amounts. Alternatively, the Company may choose not to swap fixed for floating interest payments or may terminate a previously executed swap if it believes a larger proportion of fixed-rate debt would be beneficial. When investing in fixed-rate instruments, the Company may enter into interest rate swaps that convert the fixed interest payments into variable interest payments and may designate these swaps as fair value hedges.

For derivative instruments that are designated and qualify as fair value hedges, the Company recognizes the change in fair value of the derivative instrument, as well as the offsetting change in the fair value of the hedged item, in Interest and other, net in the Consolidated Statements of Earnings in the period of change.

Cash Flow Hedges

The Company uses forward contracts designated as cash flow hedges to protect against the foreign currency exchange rate risks inherent in its forecasted net revenue and, to a lesser extent, cost of sales, operating expenses, and intercompany loans denominated in currencies other than the U.S. dollar. The Company's foreign currency cash flow hedges mature generally within twelve months; however, forward contracts associated with sales-type and direct-financing leases and intercompany loans extend for the duration of the lease or loan term, which can extend up to five years.

For derivative instruments that are designated and qualify as cash flow hedges, and as long as they remain highly effective, the Company records the changes in fair value of the derivative instrument in Accumulated other comprehensive loss as a separate component of equity in the Consolidated Balance Sheets and subsequently reclassifies these amounts into earnings in the same financial statement line item when the hedged transaction is recognized.

In connection with the Company's pending acquisition of Juniper Networks and related debt issuances, the Company entered into interest rate locks for an aggregate notional amount of \$2.6 billion. These contracts were settled in fiscal 2024, the Company recognized a loss of \$42 million in accumulated other comprehensive income.

Net Investment Hedges

The Company uses forward contracts designated as net investment hedges to hedge net investments in certain foreign subsidiaries whose functional currency is the local currency. The Company records the changes in the fair value of the hedged items in cumulative translation adjustment as a separate component of equity in the Consolidated Balance Sheets.

Other Derivatives

Other derivatives not designated as hedging instruments consist primarily of forward contracts used to hedge foreign currency-denominated balance sheet exposures. The Company also uses total return swaps, based on equity or fixed income indices, to hedge its executive deferred compensation plan liability.

For derivative instruments not designated as hedging instruments, the Company recognizes changes in fair value of the derivative instrument, as well as the offsetting change in the fair value of the hedged item, in Interest and other, net in the Consolidated Statements of Earnings in the period of change.

Hedge Effectiveness

For interest rate swaps designated as fair value hedges, the Company measures hedge effectiveness by offsetting the change in fair value of the hedged items with the change in fair value of the derivative. For forward contracts designated as cash flow or net investment hedges, the Company measures hedge effectiveness by comparing the cumulative change in fair value of the hedge contract with the cumulative change in fair value of the hedged item, both of which are based on forward rates.

Fair Value of Derivative Instruments in the Consolidated Balance Sheets

The gross notional and fair value of derivative instruments in the Consolidated Balance Sheets were as follows:

	As of October 31, 2024					As of October 31, 2023				
	Fair Value					Fair Value				
	Outstanding Gross Notional	Other Current Assets	Long-Term Financing Receivables and Other Assets	Other Accrued Liabilities	Long-Term Other Liabilities	Outstanding Gross Notional	Other Current Assets	Long-Term Financing Receivables and Other Assets	Other Accrued Liabilities	Long-Term Other Liabilities

Offsetting of Derivative Instruments

The Company recognizes all derivative instruments on a gross basis in the Consolidated Balance Sheets. The Company's derivative instruments are subject to master netting arrangements and collateral security arrangements. The Company does not offset the fair value of its derivative instruments against the fair value of cash collateral posted under collateral security agreements. The information related to the potential effect of the Company's use of the master netting agreements and collateral security agreements were as follows:

	As of October 31, 2024						As of October 31, 2023					
	In the Consolidated Balance Sheets						In the Consolidated Balance Sheets					
	(i)	(ii)	(iii) = (i)-(ii)	(iv)	(v)	(vi) = (iii)-(iv)-(v)	(i)	(ii)	(iii) = (i)-(ii)	(iv)	(v)	(vi) = (iii)-(iv)-(v)
	Gross Amount Recognized	Gross Amount Offset	Net Amount Presented	Derivatives	Financial Collateral	Net Amount	Gross Amount Recognized	Gross Amount Offset	Net Amount Presented	Derivatives	Financial Collateral	Net Amount
				In millions						In millions		
Derivative assets	\$ 299	\$ —	\$ 299	\$ 138	\$ 90 ⁽¹⁾	\$ 71	\$ 464	\$ —	\$ 464	\$ 196	\$ 207 ⁽¹⁾	\$ 61
Derivative liabilities	\$ 163	\$ —	\$ 163	\$ 138	\$ 27 ⁽²⁾	N/A	\$ 305	\$ —	\$ 305	\$ 196	\$ 103 ⁽²⁾	\$ 6

- (1) Represents the cash collateral posted by counterparties as of the respective reporting date for the Company's asset position, net of derivative amounts that could be offset, as of, generally, two business days prior to the respective reporting date.
- (2) Represents the collateral posted by the Company in cash or through the re-use of counterparty cash collateral as of the respective reporting date for the Company's liability position, net of derivative amounts that could be offset, as of, generally, two business days prior to the respective reporting date. As of October 31, 2024, \$27 million of collateral posted was entirely through the re-use of counterparty collateral. As of October 31, 2023, of the \$103 million of collateral posted, \$56 million was in cash and \$47 million was through the re-use of counterparty collateral.

The amounts recorded in the Consolidated Balance Sheets related to cumulative basis adjustments for fair value hedges were as follows:

	Carrying Amount of the Hedged Assets/ (Liabilities)			Cumulative Amount of Fair Value Hedging Adjustment Included in the Carrying Amount of the Hedged Assets/ (Liabilities)		
	2024	As of October 31, 2023	2023	2024	As of October 31, 2023	2023
		In millions			In millions	
Notes payable and short-term borrowings	\$ (2,440)	\$ —	\$ —	\$ 58	\$ —	\$ —
Long-term debt	\$ —	\$ (2,345)	\$ —	\$ —	\$ —	\$ 151

The pre-tax effect of derivative instruments in cash flow and net investment hedging relationships recognized in Other Comprehensive Income ("OCI") were as follows:

	Gains (Losses) Recognized in OCI on Derivatives For the fiscal years ended October 31,		
	2024	2023	2022
		In millions	
Derivatives in Cash Flow Hedging Relationship			
Foreign exchange contracts	\$ (73)	\$ (177)	\$ 1,025
Interest rate locks	(42)	—	—
Derivatives in Net Investment Hedging Relationship			
Foreign exchange contracts	25	(76)	99
Total	\$ (90)	\$ (253)	\$ 1,124

As of October 31, 2024, the Company expects to reclassify an estimated net accumulated other comprehensive gain of approximately \$20 million, net of taxes, to earnings in the next twelve months along with the earnings effects of the related forecasted transactions associated with cash flow hedges.

Effect of Derivative Instruments on the Consolidated Statements of Earnings

The following table represents the pre-tax effect of derivative instruments on total amounts of income and expense line items presented in the Consolidated Statements of Earnings in which the effects of fair value hedges, cash flow hedges and derivatives not designated as hedging instruments are recorded:

	Gains (Losses) Recognized in Income For the fiscal years ended October 31,

\$612 issued in September 2023, in six tranches at a weighted average price of 99.99% and a weighted average interest rate of 6.40%, payable monthly from October 2023 with a stated final maturity of July 2031	373		596			
\$643 issued in March 2023 and April 2023, in five tranches at a weighted average price of 99.99% and a weighted average interest rate of 5.59%, payable monthly from April 2023 with a stated final maturity of April 2028	257		483			
\$651 issued in October 2022, in five tranches at a weighted average price of 99.99% and a weighted average interest rate of 5.55%, payable monthly from November 2022 with a stated final maturity date of August 2029	191		393			
\$747 issued in May 2022, in six tranches at a weighted average price of 99.99% and a weighted average interest rate of 3.68%, payable monthly from July 2022 with a stated final maturity date of March 2030	148		367			
\$1,000 issued in January 2022, in six tranches at a weighted average price of 99.99% and a weighted average interest rate of 1.51%, payable monthly from March 2022 with a stated final maturity date of November 2029	124		391			
\$753 issued in June 2021, in six tranches at a weighted average price of 99.99% and a weighted average interest rate of 0.58%, payable monthly from August 2021 with a stated final maturity date of March 2029	26		147			
\$1,000 issued in March 2021, in six tranches at a weighted average price of 99.99% and a weighted average interest rate of 0.49%, payable monthly from April 2021 with a stated final maturity date of March 2031	—		102			
Other, including finance lease obligations, at 1.6%-6.3%, due in calendar years 2024-2030 ⁽¹⁾	208		215			
Fair value adjustment related to hedged debt	(58)		(151)			
Unamortized debt issuance costs	(76)		(30)			
Less: current portion	(3,969)		(4,022)			
Total long-term debt	\$ 13,504		\$ 7,487			

(1) Other, including finance lease obligations included \$14 million and \$36 million as of October 31, 2024 and 2023, respectively, of borrowing- and funding-related activity associated with FS and its subsidiaries that are collateralized by receivables and underlying assets associated with the related finance and operating leases. For both the periods presented, the carrying amount of the assets approximated the carrying amount of the borrowings.

	Interest expense on borrowings recognized in the Consolidated Statements of Earnings was as follows:					
	Location	2024	2023	2022		
		In millions				
Financing interest	Financing cost	\$ 495	\$ 383	\$ 211		
Interest expense	Interest and other, net	282	326	260		
Total interest expense		\$ 777	\$ 709	\$ 471		

As disclosed in Note 13, “Financial Instruments,” the Company used interest rate swaps to mitigate the exposure of its fixed rate debt to changes in fair value resulting from changes in interest rates, or hedge the variability of cash flows in the interest payments associated with its variable-rate debt. Interest rates on long-term debt in the table above have not been adjusted to reflect the impact of any interest rate swaps.

Commercial Paper

Hewlett Packard Enterprise maintains two commercial paper programs, “the Parent Programs,” and a wholly-owned subsidiary maintains a third program. The Parent Program in the U.S. provides for the issuance of U.S. dollar-denominated commercial paper up to a maximum aggregate principal amount of \$4.75 billion. The Parent Program outside the U.S. provides for the issuance of commercial paper denominated in U.S. dollars, euros or British pounds up to a maximum aggregate principal amount of \$3.0 billion or the equivalent in those alternative currencies. The combined aggregate principal amount of commercial paper outstanding under those two programs at any one time cannot exceed the \$4.75 billion as authorized by Hewlett Packard Enterprise’s Board of Directors. In addition, the Hewlett Packard Enterprise subsidiary’s euro Commercial Paper/Certificate of Deposit Program provides for the issuance of commercial paper in various currencies of up to a maximum aggregate principal amount of \$1.0 billion. As of October 31, 2024 and 2023, no borrowings were outstanding under the Parent Programs. As of October 31, 2024 and 2023, \$649 million and \$679 million, respectively, were outstanding under the subsidiary’s program.

Revolving Credit Facility

In September 2024, the Company terminated its prior senior unsecured revolving credit facility that was entered into in December 2021, and entered into a new senior unsecured revolving credit facility with an aggregate lending commitment of \$5.25 billion for a period of five years. The commitment comprised of (i) \$4.75 billion of commitments available immediately and (ii) \$500 million of commitments available from and subject to the closing of the Juniper Networks acquisition and refinancing of Juniper Networks’ credit agreement in connection with the closing of the Juniper Networks acquisition. As of October 31, 2024 and 2023, no borrowings were outstanding under either credit facilities.

Uncommitted Credit facility

On September 21, 2023, the Company entered into a five-year agreement with Societe Generale for an uncommitted short-term cash advance facility in the principal amount of up to \$500 million. As of October 31, 2024, no borrowings were outstanding under this credit facility.

Juniper Networks Acquisition Committed Financing

In connection with HPE’s signing a definitive agreement to acquire Juniper Networks in January 2024 (the “Merger Agreement”), HPE entered into a commitment letter whereby HPE obtained a commitment from Citigroup Global Markets Inc., JPMorgan Chase Bank, N.A. and Mizuho Bank, Ltd. for a \$14.0 billion senior unsecured delayed draw term loan facility, comprised of an \$11.0 billion 364-day tranche and a \$3.0 billion three-year tranche, subject to customary conditions (the “Term Loan Commitment Letter”).

In September 2024, HPE issued \$9.0 billion of senior unsecured notes. In addition, in furtherance of the Term Loan Commitment Letter, the Company entered into term loan agreements with JPMorgan Chase Bank, N.A., Citibank, N.A., and Mizuho Bank, Ltd. for approximately \$12.0 billion of senior unsecured delayed draw term loan facilities, comprised of an approximately \$9.0 billion 364-day tranche and a \$3.0 billion three-year tranche, subject to customary conditions. The Company has since further reduced the commitments under the 364-day term loan to \$1.0 billion. Unless previously terminated, commitments under both the 364-day term loan and the three-year term loan will terminate upon the earliest of (i) five business days after the Juniper Outside Date (as defined in such term loan agreements), (ii) the occurrence of the closing of the acquisition of Juniper Networks without the funding of any borrowings under either of the term loan agreements, and (iii) the termination of the Merger Agreement by HPE in writing in accordance with its terms. As of October 31, 2024, no borrowings were outstanding and HPE paid \$42 million of financing fees.

In connection with the entry into the aforementioned 364-day term loan and the three-year term loan, on September 12, 2024, HPE terminated the Term Loan Commitment Letter.

Future Maturities of Borrowings

As of October 31, 2024, aggregate future maturities of the Company’s borrowings at face value (excluding a fair value adjustment related to hedged debt of \$58 million, a net discount of \$53 million and unamortized debt issuance costs of \$76 million), including finance lease obligations were as follows:

Fiscal year	In millions				
2025					4,032
2026					2,710
2027					1,545
2028					612
2029					1,758
Thereafter					7,003

7.625% Series C Mandatory Convertible Preferred Stock

In September 2024, the Company issued 30 million shares of 7.625% Series C Mandatory Convertible Preferred Stock, par value \$0.01 per share (the “Preferred Stock”), for an aggregate purchase price of \$1.5 billion, less issuance costs of \$38 million. As of October 31, 2024, 30 million shares of the Preferred Stock were outstanding.

Unless converted earlier in accordance with its terms, each share of Preferred Stock will automatically convert on the mandatory conversion date, which is expected to be September 1, 2027, into between 2.5352 shares and 3.1056 shares of common stock, in each case, subject to customary anti-dilution adjustments described in the certificate of designations related to the Preferred Stock (the “Certificate of Designations”). The number of shares of common stock issuable upon conversion will be determined based on the average volume weighted average price per share of common stock over the 20 consecutive trading day period beginning on, and including, the 21st scheduled trading day immediately prior to September 1, 2027.

Holders of shares of Preferred Stock have the option to convert all or any portion of their shares of Preferred Stock at any time. The conversion rate applicable to any early conversion may, in certain circumstances, be increased to compensate holders of the Preferred Stock for unpaid accumulated dividends as described in the Certificate of Designations.

If a Fundamental Change, as defined in the Certificate of Designations, occurs on or prior to September 1, 2027, then holders of the Preferred Stock will be entitled to convert all or any portion of their Preferred Stock at the Fundamental Change Conversion Rate, into between 1.9200 shares and 3.1056 shares of common stock, in all cases, subject to customary anti-dilution adjustments described in the Certificate of Designations, for a specified period of time and to also receive an amount to compensate them for unpaid accumulated dividends and any remaining future scheduled dividend payments. The Preferred Stock is not subject to redemption at the Company’s option.

Dividends

The stockholders of HPE common stock are entitled to receive dividends when and as declared by the Board of Directors. The Company’s ability to pay dividends will depend on many factors, such as its financial condition, earnings, capital requirements, debt service obligations, restrictive covenants in its debt, industry practice, legal requirements, regulatory constraints, and other factors that the Board of Directors deems relevant. Furthermore, so long as any share of its Preferred Stock remains outstanding, no dividend on shares of common stock (or any other class of stock junior to the Preferred Stock) shall be declared or paid unless all accumulated and unpaid dividends for all preceding dividend periods for the Preferred Stock have been declared and paid in full in cash, shares of the Company’s common stock or a combination thereof, or a sufficient sum of cash or number of shares of its common stock has been set apart for the payment of such dividends, on all outstanding shares of the Preferred Stock. Dividends declared were \$0.52 and \$0.48 per common share in fiscal 2024 and 2023, respectively.

On December 05, 2024, the Company declared a regular cash dividend of \$0.13 per share on the Company’s common stock, payable on January 16, 2025, to the stockholders of record as of the close of business on December 20, 2024.

Dividends on the Preferred Stock will be payable on a cumulative basis when, as and if declared by the Board of Directors, or an authorized committee thereof, at an annual rate of 7.625% on the liquidation of preference of \$50.00 per share. The Company may pay declared dividends in cash or, subject to certain limitations, in shares of its common stock or in any combination of cash and shares of its common stock on March 1, June 1, September 1 and December 1 of each year,

commencing on December 1, 2024, and ending on, and including, September 1, 2027. The Company has declared a cash dividend of \$0.82604167 per share of its 7.625% Series C Mandatory Convertible Preferred Stock, which was paid on December 1, 2024, to holders of record as of the close of business on November 15, 2024.

Share Repurchase Program

On October 13, 2015, the Board of Directors approved a share repurchase program with a \$3.0 billion authorization, which was refreshed with additional share repurchase authorizations of \$3.0 billion, \$5.0 billion and \$2.5 billion on May 24, 2016, October 16, 2017 and February 21, 2018, respectively. This program, which does not have a specific expiration date, authorizes repurchases in the open market or in private transactions.

In fiscal 2024, the Company repurchased and settled a total of 7.8 million shares under its share repurchase program through open market repurchases, which included 0.2 million shares that were unsettled open market repurchases as of October 31, 2023. Additionally, the Company had unsettled open market repurchases of 0.1 million shares as of October 31, 2024. Shares repurchased during the fiscal 2024 were recorded as a \$150 million reduction to stockholders’ equity. As of October 31, 2024, the Company had a remaining authorization of approximately \$0.8 billion for future share repurchases.

In fiscal 2023, the Company repurchased and settled a total of 27.2 million shares under its share repurchase program through open market repurchases, which included 0.3 million shares that were unsettled open market repurchases as of October 31, 2022. Additionally, the Company had unsettled open market repurchases of 0.2 million shares as of October 31, 2023. Shares repurchased during the fiscal 2023 were recorded as a \$0.4 billion reduction to stockholders’ equity.

Net Earnings Per Share
Earnings Per Share [Abstract]
Net Earnings Per Share

Net Earnings Per Share

The Company calculates basic net EPS using net earnings and the weighted-average number of shares outstanding during the reporting period.

The reconciliations of the numerators and denominators of each of the basic and diluted net EPS calculations were as follows:

	For the fiscal years ended October 31,			
	2024	2023	2022	
	In millions, except per share amounts			
Numerator:				
Net earnings attributable to common stockholders - Basic	\$ 2,554	\$ 2,025	\$ 868	
Plus: 7.625% Series C mandatory convertible preferred stock dividends	25	—	—	
Net earnings - Diluted	\$ 2,579	\$ 2,025	\$ 868	
Denominator:				
Weighted-average shares used to compute basic net EPS	1,309	1,299	1,303	
Dilutive effect of employee stock plans ⁽¹⁾	18	17	19	
Dilutive effect of 7.625% Series C mandatory convertible preferred stock ⁽¹⁾	10	—	—	
Weighted-average shares used to compute diluted net EPS	1,337	1,316	1,322	
Net earnings per share attributable to common stockholders:				
Basic	\$ 1.95	\$ 1.56	\$ 0.67	
Diluted	\$ 1.93	\$ 1.54	\$ 0.66	
Anti-dilutive weighted-average stock awards ⁽²⁾	—	—	2	

- (1) The impact of dilutive effect of employee stock plans is calculated under the treasury stock method, and the impact of dilutive effect of the 7.625% Series C Mandatory Convertible Preferred Stock is calculated under the if-converted method.
- (2) The Company excludes shares potentially issuable under employee stock plans that could dilute basic net EPS in the future from the calculation of diluted net earnings per share, as their effect, if included, would have been anti-dilutive for the periods presented.

Litigation, Contingencies, and Commitments
Loss Contingency

12 Months Ended
Oct. 31, 2024

[Abstract]

Litigation,
Contingencies, and
Commitments

Litigation, Contingencies, and Commitments

Hewlett Packard Enterprise is involved in various lawsuits, claims, investigations and proceedings including those consisting of intellectual property, commercial, securities, employment, employee benefits, and environmental matters, which arise in the ordinary course of business. In addition, as part of the Separation and Distribution Agreement (the "Separation and Distribution Agreement") entered into in connection with Hewlett Packard Enterprise's spin-off from HP Inc. (formerly known as "Hewlett-Packard Company") (the "Separation"), Hewlett Packard Enterprise and HP Inc. agreed to cooperate with each other in managing certain existing litigation related to both parties' businesses. The Separation and Distribution Agreement included provisions that allocate liability and financial responsibility for pending litigation involving the parties, as well as provide for cross-indemnification of the parties against liabilities to one party arising out of liabilities allocated to the other party. The Separation and Distribution Agreement also included provisions that assign to the parties responsibility for managing pending and future litigation related to the general corporate matters of HP Inc. arising prior to the Separation. Hewlett Packard Enterprise records a liability when it believes that it is both probable that a liability has been incurred and the amount of loss can be reasonably estimated. Significant judgment is required to determine both the probability of having incurred a liability and the estimated amount of the liability. Hewlett Packard Enterprise reviews these matters at least quarterly and adjusts these liabilities to reflect the impact of negotiations, settlements, rulings, advice of legal counsel, and other updated information and events pertaining to a particular matter. Litigation is inherently unpredictable. However, Hewlett Packard Enterprise believes it has valid defenses with respect to legal matters pending against us. Nevertheless, cash flows or results of operations could be materially affected in any particular period by the resolution of one or more of these contingencies. Hewlett Packard Enterprise believes it has recorded adequate provisions for any such matters and, as of October 31, 2024, it was not reasonably possible that a material loss had been incurred in connection with such matters in excess of the amounts recognized in its financial statements.

Litigation, Proceedings and Investigations

Ross and Rogus v. Hewlett Packard Enterprise Company. On November 8, 2018, a putative class action complaint was filed in the Superior Court of California, County of Santa Clara alleging that HPE pays its California-based female employees "systemically lower compensation" than HPE pays male employees performing substantially similar work. The complaint alleges various California state law claims, including California's Equal Pay Act, Fair Employment and Housing Act, and Unfair Competition Law, and seeks certification of a California-only class of female employees employed in certain "Covered Positions." The parties subsequently reached an agreement to resolve this class action. The terms of the settlement are reflected in Plaintiff's Motion for Preliminary Approval of Class Action Settlement and Certification of Settlement Class, which was filed with the Court on September 26, 2022. On November 3, 2022, the Court granted Plaintiff's motion and preliminarily approved the terms of the class settlement, which defines the settlement class as all "[w]omen actively employed in California by Defendant at any point from November 1, 2015, through the date of Preliminary Approval" who were employed in a covered job code. The settlement class excludes certain individuals, including those who previously executed an arbitration agreement with HPE or an agreement that resulted in a release or waiver of claims. On April 28, 2023, the Court granted Plaintiffs' Motion for Final Approval of the Class Action Settlement and Certification of the Settlement Class. On February 6, 2024, the Court entered final judgment, approving the settlement and dismissing the action.

India Directorate of Revenue Intelligence Proceedings. On April 30 and May 10, 2010, the India Directorate of Revenue Intelligence (the "DRI") issued notices to Hewlett-Packard India Sales Private Ltd ("HP India"), a subsidiary of HP Inc., seven HP India employees and one former HP India employee alleging that HP India underpaid customs duties while importing products and spare parts into India and seeking to recover an aggregate of approximately \$370 million, plus penalties. On April 11, 2012, the Bangalore Commissioner of Customs issued an order on the products-related notices affirming duties and penalties against HP India and the named individuals for approximately \$386 million. On April 20, 2012, the Commissioner issued an order on the spare parts-related notice affirming duties and penalties against HP India and certain of the named individuals for approximately \$17 million. HP India filed appeals of the Commissioner's orders before the Customs Tribunal. The Customs Department filed cross-appeals before the Customs Tribunal. On October 27, 2014, the Customs Tribunal commenced hearings on the cross-appeals of the Commissioner's orders. The Customs Tribunal rejected HP India's request to return the matter to the Commissioner on procedural grounds. The hearings before the Customs Tribunal were subsequently delayed, have been postponed on several occasions since 2014, and have not yet been rescheduled.

ECT Proceedings. In January 2011, the postal service of Brazil, Empresa Brasileira de Correios e Telégrafos ("ECT"), notified a former subsidiary of HP Inc. in Brazil ("HP Brazil") that it had initiated administrative proceedings to consider whether to suspend HP Brazil's right to bid and contract with ECT related to alleged improprieties in the bidding and contracting processes whereby employees of HP Brazil and employees of several other companies allegedly coordinated their bids and fixed results for three ECT contracts in 2007 and 2008. In late July 2011, ECT notified HP Brazil it had decided to

apply the penalties against HP Brazil and suspend HP Brazil's right to bid and contract with ECT for five years, based upon the evidence before it. In August 2011, HP Brazil appealed ECT's decision. In April 2013, ECT rejected HP Brazil's appeal, and the administrative proceedings were closed with the penalties against HP Brazil remaining in place. In parallel, in September 2011, HP Brazil filed a civil action against ECT seeking to have ECT's decision revoked. HP Brazil also requested an injunction suspending the application of the penalties until a final ruling on the merits of the case, which was denied. HP Brazil appealed the denial of its request for injunctive relief to the intermediate appellate court, which issued a preliminary ruling denying the request for injunctive relief but reducing the length of the sanctions from five to two years. HP Brazil appealed that decision and, in December 2011, obtained a ruling staying enforcement of ECT's sanctions until a final ruling on the merits of the case. HP Brazil expects a resolution of the decision on the merits to take several years.

Forsyth, et al. vs. HP Inc. and Hewlett Packard Enterprise. This purported class and collective action was filed on August 18, 2016 in the United States District Court for the Northern District of California, against HP Inc. and Hewlett Packard Enterprise (collectively, "Defendants") alleging Defendants violated the Federal Age Discrimination in Employment Act ("ADEA"), the California Fair Employment and Housing Act, California public policy and the California Business and Professions Code by terminating older workers and replacing them with younger workers. Plaintiffs seek to certify a nationwide collective action under the ADEA comprised of individuals aged 40 years and older who had their employment terminated by an HP entity pursuant to a work force reduction ("WFR") plan. Plaintiffs also seek to certify a class under California law consisting of all persons 40 years or older employed by Defendants in the state of California and terminated pursuant to a WFR plan on or after August 18, 2012. On April 14, 2021, Plaintiffs' Motion for Conditional Class Certification was granted. The conditionally certified collective action consists of all individuals who had their employment terminated by Defendants pursuant to a WFR Plan on or after November 1, 2015, and who were 40 years or older at the time of such termination. The collective action excludes all individuals who signed a Waiver and General Release Agreement or an Agreement to Arbitrate Claims. The parties have reached an agreement to resolve this matter. Plaintiffs filed a Motion for Preliminary Approval of the Class Action and Collective Action Settlement on September 21, 2023. On November 3, 2023, the Court issued an order granting preliminary approval to the Class Action and Collective Action Settlement. On March 29, 2024, the Court granted Final Approval to the settlement following a Fairness Hearing on the parties' Motion for Final Approval. Judgment has been entered by the Court and the matter is now closed.

Q3 Networking Litigation. On September 21 and September 22, 2020, Q3 Networking LLC filed complaints against HPE, Aruba Networks, Commscope and Netgear in the United States District Court for the District of Delaware and the United States International Trade Commission ("ITC"). Both complaints allege infringement of four patents, and the ITC complaint defines the "accused products" as "routers, access points, controllers, network management servers, other networking products, and hardware and software components thereof." The ITC action was instituted on October 23, 2020. The District of Delaware action has been stayed pending resolution of the ITC action. On December 7, 2021, the Administrative Law Judge issued his initial determination finding no violation of section 337 of the Tariff Act. On May 3, 2022, the ITC issued its Notice of Final Determination, affirming the initial determination and terminating the investigation. On June 18, 2022, Q3 Networking filed a petition for review of the ITC ruling with the United States Court of Appeals for the Federal Circuit. On May 10, 2024, the United States Court of Appeals for the Federal Circuit affirmed the ITC's ruling in favor of HPE and Aruba Networks. Q3 Networking has not sought further review of the Federal Circuit's ruling and HPE considers the matter closed.

R2 Semiconductor Patent Litigation. In November 2022, R2 Semiconductor, Inc. ("R2") filed a lawsuit in the Dusseldorf Regional Court in Germany against Intel Deutschland GmbH, Hewlett-Packard GmbH, and other Intel customers. R2 asserts that one European patent is infringed by certain Intel processors and the HPE products that contain those Intel processors. On February 7, 2024, the Dusseldorf Regional Court ruled in R2's favor, issuing an injunction that, if enforced by R2, would prevent the sale in Germany of any products with infringing Intel processors, and require HPE to correspond with its direct customers in Germany requesting return of the products with infringing Intel processors. The injunction would remain in place unless the ruling is overturned on appeal, the patent is invalidated by the German Federal Patent Court, or the matter is resolved by the parties. On February 8, 2024, HPE, Intel, HP Inc., and Dell filed an appeal and request for a stay of the judgment pending appeal. On April 9, 2024 the request for a stay pending appeal was denied. On April 3, 2024, R2 filed a lawsuit in France in the first instance court in Paris (Tribunal judiciaire de Paris) against Intel Corporation, Intel Corporation SAS, Intel Deutschland GmbH, HP France SAS and certain other Intel customers. In May 2024, R2 filed suit in Milan against Intel Corporation Italia S.p.A., Hewlett-Packard Italiana S.r.l., and certain other Intel customers. R2 asserts the same European patent is infringed in both the French and Italian actions. On August 30, 2024, Intel and R2 publicly announced an agreement to dismiss all litigation between the two companies that would include dismissal of all litigation against all subsidiaries of HPE in the foregoing actions. Pursuant to that agreement, the Italian lawsuit was dismissed on September 2, 2024, the German lawsuit was dismissed on September 4, 2024, and the French Lawsuit was dismissed on September 6, 2024. These matters are now

closed.

Shared Litigation with HP Inc., DXC and Micro Focus

As part of the Separation and Distribution Agreements between Hewlett Packard Enterprise and HP Inc., Hewlett Packard Enterprise and DXC, and Hewlett Packard Enterprise and Seattle SpinCo, the parties to each agreement agreed to cooperate with each other in managing certain existing litigation related to both parties' businesses. The Separation and Distribution Agreements also included provisions that assign to the parties responsibility for managing pending and future litigation related to the general corporate matters of HP Inc. (in the case of the separation of Hewlett Packard Enterprise from HP Inc.) or of Hewlett Packard Enterprise (in the case of the separation of DXC from Hewlett Packard Enterprise and the separation of Seattle SpinCo from Hewlett Packard Enterprise), in each case arising prior to the applicable separation.

Environmental

The Company's operations and products are or may in the future become subject to various federal, state, local and foreign laws and regulations concerning the environment, including laws addressing the discharge of pollutants into the air and water; supply chain due diligence, and sustainability, environment, and emissions-related reporting; the management, movement, and disposal of hazardous substances and wastes; the clean-up of contaminated sites; product compliance and safety; the energy consumption of products, services, and operations; and the operational or financial responsibility for recycling, treatment, and disposal of those products. This includes legislation that makes producers of electrical goods, including servers and networking equipment, subject to certain reparability requirements or financially responsible for specified collection, recycling, treatment, and disposal of past and future covered products (sometimes referred to as "product take-back legislation"). The Company could incur substantial costs, its products could be restricted from entering certain jurisdictions, and it could face other sanctions, if it were to violate or become liable under environmental laws, including those related to addressing climate change and other environmental related issues, or if its products become non-compliant with such environmental laws. The Company's potential exposure includes impacts on revenue, fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. The amount and timing of costs to comply with environmental laws are difficult to predict.

In particular, the Company may become a party to, or otherwise involved in, proceedings brought by U.S. or state environmental agencies under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), known as "Superfund," or other federal, state or foreign laws and regulations addressing the clean-up of contaminated sites, and may become a party to, or otherwise involved in, proceedings brought by private parties for contribution towards clean-up costs. The Company is also contractually obligated to make financial contributions to address actions related to certain environmental liabilities, both ongoing and arising in the future, pursuant to its Separation and Distribution Agreement with HP Inc.

Unconditional Purchase Obligations

As of October 31, 2024, the Company had unconditional purchase obligations of approximately \$1.3 billion. These unconditional purchase obligations include agreements to purchase goods or services that are enforceable and legally binding on the Company and that specify all significant terms, including fixed or minimum quantities to be purchased, fixed, minimum or variable price provisions and the approximate timing of the transaction, as well as settlements that the Company has reached with third parties, requiring it to pay determined amounts over a specified period of time. These unconditional purchase obligations are related principally to inventory purchases, software maintenance and support services and other items. Unconditional purchase obligations exclude agreements that are cancellable without penalty. The Company expects the commitments to total \$556 million, \$368 million, \$278 million, \$68 million, and \$13 million, for fiscal years 2025, 2026, 2027, 2028, and 2029, respectively. There are no unconditional purchase obligations subsequent to fiscal year 2029.

[Guarantees \[Abstract\]](#)

[Guarantees and
Indemnifications](#)

Guarantees and Indemnifications

Guarantees

In the ordinary course of business, the Company may issue performance guarantees to certain of its clients, customers and other parties pursuant to which the Company has guaranteed the performance obligations of third parties. Some of those guarantees may be backed by standby letters of credit or surety bonds. In general, the Company would be obligated to perform over the term of the guarantee in the event a specified triggering event occurs as defined by the guarantee. The Company believes the likelihood of having to perform under a material guarantee is remote.

The Company has entered into service contracts with certain of its clients that are supported by financing arrangements. If a service contract is terminated as a result of the Company's non-performance under the contract or failure to comply with the terms of the financing arrangement, the Company could, under certain circumstances, be required to acquire certain assets related to the service contract. The Company believes the likelihood of having to acquire a material amount of assets under these arrangements is remote.

The maximum potential future payments under performance guarantees and financing arrangements was \$298 million as of October 31, 2024.

Indemnifications

In the ordinary course of business, the Company enters into contractual arrangements under which the Company may agree to indemnify a third party to such arrangement from any losses incurred relating to the services they perform on behalf of the Company or for losses arising from certain events as defined within the particular contract, which may include, for example, litigation or claims relating to past performance. The Company also provides indemnifications to certain vendors and customers against claims of intellectual property infringement made by third parties arising from the use by such vendors and customers of the Company's software products and support services and certain other matters. Some indemnifications may not be subject to maximum loss clauses. Historically, payments made related to these indemnifications have been immaterial.

General Cross-indemnifications

In connection with the Separation, Everett and Seattle Transactions, the Company entered into a Separation and Distribution Agreement with HP Inc., DXC and Micro Focus respectively, whereby the Company agreed to indemnify HP Inc., DXC and Micro Focus, each of its subsidiaries and each of their respective directors, officers and employees from and against all liabilities relating to, arising out of or resulting from, among other matters, the liabilities allocated to the Company as part of the Separation, Everett and Seattle Transactions. Similarly, HP Inc., DXC and Micro Focus agreed to indemnify the Company, each of its subsidiaries and each of their respective directors, officers and employees from and against all claims and liabilities relating to, arising out of or resulting from, among other matters, the liabilities allocated to HP Inc., DXC and Micro Focus as part of the Separation, Everett and Seattle Transactions.

In connection with the Everett Transaction and the Seattle Transaction, the Company entered into a Tax Matters Agreement with DXC and Micro Focus respectively (the "DXC Tax Matters Agreement" and the "Micro Focus Tax Matters Agreement"). The DXC Tax Matters Agreement and the Micro Focus Tax Matters Agreement govern the rights and obligations of the Company and DXC/Micro Focus for certain pre-divestiture tax liabilities and tax receivables. The DXC Tax Matters Agreement and the Micro Focus Tax Matters Agreement generally provide that the Company will be responsible for pre-divestiture tax liabilities and will be entitled to pre-divestiture tax receivables that arise from adjustments made by tax authorities to the Company's and DXC's, or Micro Focus', as applicable, U.S. and certain non-U.S. tax returns. In certain jurisdictions, the Company and DXC/Micro Focus have joint and several liability for past tax liabilities and accordingly, the Company could be legally liable under applicable tax law for such liabilities and required to make additional tax payments.

In addition, if the distribution of Everett's or Seattle's common shares to Hewlett Packard Enterprise's stockholders is determined to be taxable, the Company would generally bear the tax liability, unless the taxability of the distribution is the direct result of actions taken by DXC/Micro Focus, in which case DXC/Micro Focus would be responsible for any taxes imposed on the distribution.

As of October 31, 2024 and 2023, the Company's receivable and payable balances related to indemnified litigation matters and other contingencies, and income tax-related indemnification covered by these agreements were as follows:

	As of October 31,			
	2024		2023	
	In millions			
Litigation Matters and Other Contingencies				
Receivable	\$	37	\$	42
Payable		47		48
Income Tax-Related Indemnification ⁽¹⁾				
Net indemnification receivable - long-term		35		31
Net indemnification receivable - short-term	\$	—	\$	11

(1) The actual amount that the Company may receive or pay could vary depending upon the outcome of certain unresolved tax matters, which may not be resolved for several years.

Equity Interests

[Equity Method Investments and Joint Ventures \[Abstract\]](#)
[Equity Interests](#)

Equity Interests

The Company includes investments which are accounted for using the equity method, under Investments in equity interests on the Company's Consolidated Balance Sheets.

Pursuant to the Shareholders' Agreement among the Company's relevant subsidiaries, Unisplendour International Technology Limited ("UNIS"), and H3C dated as of May 1, 2016, as amended from time to time, and most recently on October 28, 2022, the Company delivered a notice to UNIS on December 30, 2022, to exercise its right to put to UNIS, for cash consideration, all of the H3C shares held by the Company, which represent 49% of the total issued share capital of H3C. On May 26, 2023, the Company's relevant subsidiaries entered into a Put Share Purchase Agreement with UNIS, whereby UNIS has agreed to purchase all of the H3C shares held by the Company, through its subsidiaries. On May 24, 2024, the Company's relevant subsidiaries entered into (i) an Amended and Restated Put Share Purchase Agreement with UNIS, whereby its relevant subsidiaries shall sell to UNIS 30% of the total issued share capital of H3C for pre-tax cash consideration of approximately \$2.1 billion by August 31, 2024 (the "Sale Transaction"), and (ii) an Agreement on Subsequent Arrangements with UNIS, whereby upon closing of the Sale Transaction, the Company's relevant subsidiary shall have a put option to sell to UNIS and UNIS shall have a call option to purchase from the Company's relevant subsidiary 19% of the total issued share capital of H3C for pre-tax cash consideration of approximately \$1.4 billion between the 16th month and until the 36th month after the Sale Transaction. The transactions referenced in clauses (i) and (ii) above, taken together, revise the arrangements governing the aforementioned sale of all of the H3C shares held by the Company, through its subsidiaries and are subject to certain grace periods and regulatory approvals. On September 4, 2024, pursuant to the Amended and Restated Put Share Purchase Agreement with UNIS (as described above), the Company received \$2.1 billion of pre-tax consideration (\$2.0 billion post-tax), in connection with the sale to UNIS of 30% of the total issued share capital of H3C resulting in a gain of \$733 million. As of October 31, 2024, the Company's Investments in equity interests was \$929 million and primarily related to a 19% equity interest in H3C. As of October 31, 2023, the Company's Investments in equity interests was \$2.2 billion and primarily related to a 49% equity interest in H3C.

As of October 31, 2024, the difference between the cost of the investment and the underlying equity in the net assets of the investment is \$649 million. As of October 31, 2024 and 2023, the Company determined that no impairment of its equity method investments existed.

Earnings from equity interests

The Company recorded earnings from equity interests of \$147 million, \$245 million and \$215 million in fiscal 2024, 2023 and 2022, respectively, in the Consolidated Statements of Earnings, the components of which are as follows:

	For the fiscal years ended October 31,					
	2024		2023		2022	
	In millions					
Earnings from equity interests, net of taxes	\$	154	\$	242	\$	270
Basis difference amortization		(3)		(9)		(45)
Adjustment of profit on intra-entity sales		(4)		12		(10)
Earnings from equity interests	\$	147	\$	245	\$	215

For fiscal 2024 and 2023, the Company received a cash dividend of \$43 million and \$200 million, respectively, from H3C. These amounts were accounted for as a return on investment and reflected as a reduction in the carrying balance of the Company's Investments in equity interests in its Consolidated Balance Sheets.

The Company also has commercial arrangements with H3C to buy and sell HPE branded servers, storage and networking products and services. For fiscal 2024, 2023 and 2022, HPE recorded approximately \$256 million, \$383 million and \$848 million of sales to H3C and \$72 million, \$125 million and \$148 million of purchases from H3C, respectively. Payables due to H3C as of October 31, 2024 and 2023 were approximately \$7 million and \$10 million, respectively. Receivables due from H3C as of October 31, 2024 and 2023 were approximately \$7 million and \$12 million, respectively.

Overview and Summary of Significant Accounting Policies (Policies)	12 Months Ended	
	Oct. 31, 2024	

Accounting Policies [Abstract]

[Basis of Presentation and Principles of Consolidation](#)

Basis of Presentation and Principles of Consolidation

The Consolidated Financial Statements are prepared in accordance with U.S. generally accepted accounting principles ("GAAP").

The accompanying Consolidated Financial Statements include the accounts of the Company and its subsidiaries and affiliates in which the Company has a controlling financial interest or is the primary beneficiary. All intercompany transactions and accounts within the consolidated businesses of the Company have been eliminated.

The Company consolidates a Variable Interest Entity ("VIE") where it has been determined that the Company is the primary beneficiary of the entity's operation. The primary beneficiary is the party that has both the power to direct the activities that most significantly impact the VIE's economic performance and the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE. In evaluating whether the Company is the primary beneficiary, the Company evaluates its power to direct the most significant activities of the VIE by considering the purpose and design of the entity and the risks the entity was designed to create and pass through to its variable interest holders. The Company also evaluates its economic interests in the VIE.

The Company accounts for investments in companies over which it has the ability to exercise significant influence but does not hold a controlling interest under the equity method of accounting, and the Company records its proportionate share of income or losses in Earnings from equity interests in the Consolidated Statements of Earnings.

Non-controlling interests are presented as a separate component within Total stockholders' equity in the Consolidated Balance Sheets. Net earnings attributable to non-controlling interests are recorded within Interest and other, net in the Consolidated Statements of Earnings and are not presented separately, as they were not material for any periods presented.

Segment Realignment

Segment Realignment

Effective as of the beginning of fiscal 2024, in order to align the segment financial reporting more closely with its business structure, the Company established two new reportable segments, Hybrid Cloud and Server. Hybrid Cloud includes the historical Storage segment, HPE GreenLake Flex Solutions (which provides flexible as-a-service ("aaS") IT infrastructure through the HPE GreenLake cloud and was previously reported under the Compute and the High Performance Computing & Artificial Intelligence ("HPC & AI") segments), Private Cloud, and Software (previously reported under the Corporate Investments and Other segment). The Server segment combines the previously separately reported Compute and HPC & AI segments, with adjustments for certain product lines that are now reported in Hybrid Cloud. Additionally, certain products and services previously reported in the financial results for the HPC & AI segment were moved to be reported in the Hybrid Cloud segment, and the Athonet business and certain components of the Communications and Media Solutions ("CMS") business, both previously reported in the financial results for Corporate Investments and Other, moved to be reported in the Intelligent Edge segment.

As a result, the Company's organizational structure for fiscal 2024 consisted of the following segments: (i) Server; (ii) Hybrid Cloud; (iii) Intelligent Edge; (iv) Financial Services; and (v) Corporate Investments and Other. The Company began reporting under this re-aligned segment structure beginning with the results of the first quarter of fiscal 2024 included in the Quarterly Report on Form 10-Q for the fiscal quarter ended January 31, 2024. These changes had no impact on Hewlett Packard Enterprise's previously reported consolidated net revenue, net earnings, net earnings per share ("EPS") or total assets.

Segment Policy

Hewlett Packard Enterprise derives the results of its business segments directly from its internal management reporting system. The accounting policies that Hewlett Packard Enterprise uses to derive segment results are substantially the same as those the consolidated company uses. The CODM measures the performance of each segment based on several metrics, including earnings from operations. The CODM uses these results, in part, to evaluate the performance of, and to allocate resources to each of the segments.

Segment revenue includes revenues from sales to external customers and intersegment revenues that reflect transactions between the segments on an arm's-length basis. Intersegment revenues primarily consist of sales of hardware and software that are sourced internally and, in the majority of the cases, are financed as operating leases by FS to the Company's customers. Hewlett Packard Enterprise's consolidated net revenue is derived and reported after the elimination of intersegment revenues from such arrangements.

Financing cost in the Consolidated Statements of Earnings reflects interest expense on borrowing and funding-related activity associated with FS and its subsidiaries, and debt issued by Hewlett Packard Enterprise for which a portion of the proceeds benefited FS.

Hewlett Packard Enterprise does not allocate to its segments certain operating expenses, which it manages at the corporate level. These unallocated operating costs include certain corporate costs and eliminations, stock-based compensation expense, amortization of intangible assets, impairment of goodwill, transformation costs, disaster recovery/charges, divestiture related exit costs, and acquisition, disposition and other related charges. Total assets by segment are not presented as that information is not used to allocate resources or assess performance at the segment level and is not reviewed by the CODM.

Use of Estimates

Use of Estimates

The preparation of financial statements requires management to make estimates, judgments and assumptions that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Estimates are assessed each period and updated to reflect current information, including those related to revenue recognition, stock-based compensation, net periodic benefit costs, restructuring accruals, provision for taxes, valuation allowance for deferred taxes, provision for expected credit losses, inventory reserves, and impairment assessments of goodwill, intangible assets and other long-lived assets. The Company believes that these estimates, judgments and assumptions are reasonable under the circumstances, and are subject to significant uncertainties, some of which are beyond the Company's control. Should any of these estimates change, it could adversely affect the Company's results of operations. Actual results could differ materially from these estimates under different assumptions or conditions.

Foreign Currency Translation

Foreign Currency Translation

The Company predominately uses the U.S. dollar as its functional currency. Assets and liabilities denominated in non-U.S. currencies are remeasured into U.S. dollars at current exchange rates for monetary assets and liabilities and at historical exchange rates for non-monetary assets and liabilities. Net revenue, costs and expenses denominated in non-U.S. currencies are recorded in U.S. dollars at the average rates of exchange prevailing during the period. The Company includes gains or losses from foreign currency remeasurement in Interest and other, net in the Consolidated Statements of Earnings and gains and losses from cash flow hedges in Net revenue as the hedged revenue is recognized. Certain non-U.S. subsidiaries designate the local currency as their functional currency, and the Company records the translation of their assets and liabilities into U.S. dollars at the balance sheet date as translation adjustments and includes them as a component of Accumulated other comprehensive loss in the Consolidated Balance Sheets.

Revenue Recognition

Revenue Recognition

The Company accounts for a contract with a customer when both parties have provided written approval and are committed to perform, each party's rights including payment terms are identified, the contract has commercial substance, and collection of consideration is probable.

The Company enters into contracts with customers that typically include combinations of products and services, resulting in arrangements containing multiple performance obligations for hardware and software products and/or various services. The Company determines whether each product or service is distinct in order to identify the performance obligations in the contract and allocate the contract transaction price among the distinct performance obligations. Arrangements are distinct based on whether the customer can benefit from the product or service on its own or together with other resources that are readily available and whether the commitment to transfer the product or service to the customer is separately identifiable from other obligations in the contract. The Company classifies its hardware, perpetual software licenses, service arrangements and software-as-a-service ("SaaS") as distinct performance obligations. Term software licenses represent multiple obligations, which include software licenses and software maintenance. In transactions where the Company delivers hardware or software, it is typically the principal and records revenue and costs of goods sold on a gross basis.

The majority of the Company's revenue is derived from sales of products and services and the associated support and maintenance, and such revenue is recognized when, or as, control of promised products or services is transferred to the customer, in an amount that reflects the consideration to which the Company expects to be entitled, in exchange for those products or services. Variable consideration offered in contracts with customers, partners and distributors may include rebates, volume-based discounts, price protection, and other incentive programs. Variable consideration is estimated at contract inception and updated at the end of each reporting period as additional information becomes available and recognized only to the extent that it is probable that a significant reversal of revenue will not occur.

Transfer of control occurs once the customer has the contractual right to use the product, generally upon delivery once title and risk of loss has transferred to the customer. Transfer of control can also occur over time for maintenance and services as the customer receives the benefit over the contract term. The Company's hardware and perpetual software licenses are distinct performance obligations where revenue is recognized upfront upon transfer of control. Term software licenses include multiple performance obligations where the term licenses are recognized upfront upon transfer of control, with the associated software maintenance revenue recognized ratably over the contract term as services and software updates are provided. SaaS arrangements have one distinct performance obligation which is satisfied over time with revenue recognized ratably over the contract term as the customer consumes the services. On its product sales, the Company records consideration from shipping and handling on a gross basis within net product sales. Revenue is recorded net of any associated sales taxes.

The Company allocates the transaction price for the contract among the performance obligations on a relative standalone selling price basis ("SSP"). For products and services sold as a bundle, the SSP is generally not directly observable and requires the Company to estimate SSP based on management judgment by considering available data such as internal margin objectives, pricing strategies, market/competitive conditions, historical profitability data, as well as other observable inputs. For certain products and services, the Company establishes SSP based on the observable price when sold separately in similar circumstances to similar customers. The Company establishes SSP ranges for its products and services and reassesses them periodically.

Judgment is applied in determining the transaction price as the Company may be required to estimate variable consideration when determining the amount of revenue to recognize. Variable consideration may include various rebates, volume-based discounts, price protection, and other incentive programs that are offered to customers, partners and distributors. When determining the amount of revenue to recognize, the Company estimates the expected usage of these programs, applying the expected value or most likely estimate and updates the estimate at each reporting period as actual utilization becomes available. The Company also considers the customers' right of return in determining the transaction price, where applicable.

Contract Balances

Accounts receivable and contract assets

A receivable is a right to consideration in exchange for products or services the Company has transferred to a customer that is unconditional. A contract asset is a right to consideration in exchange for products or services transferred to a customer that is conditional on something other than the passage of time. A receivable is recorded when the right to consideration becomes unconditional.

The Company's contract assets include unbilled receivables which are recorded when the Company recognizes revenue in advance of billings. Unbilled receivables generally relate to services contracts where a service has been performed and control has transferred, but invoicing to the customer is subject to future milestone billings or other contractual payment schedules. The Company classifies unbilled receivables as Accounts receivable.

Contract liabilities

A contract liability is an obligation to transfer products or services to a customer for which the Company has received consideration, or the amount is due, from the customer. The Company's contract liabilities primarily consist of deferred revenue and customer deposits. Deferred revenue is recorded when amounts invoiced to customers are in excess of revenue that can be recognized because performance obligations have not been satisfied and control of the promised products or services has not transferred to the customer. Deferred revenue largely represents amounts invoiced in advance for product (hardware/software) support contracts, consulting projects and product sales where revenue cannot be recognized yet. Customer deposits largely represent payments received from customers in advance of the Company's completion of its contractual obligations. As customer acceptance milestones are met, the Company will recognize revenue and reduce the amount of contract liabilities.

Costs to obtain a contract with a customer

The Company capitalizes the incremental costs of obtaining a contract with a customer, primarily sales commissions, if the Company expects to recover those costs. The Company has elected, as a practical expedient, to expense the costs of obtaining a contract as incurred for contracts with terms of one year or less. The typical amortization periods used range from two to five years. The Company periodically reviews the capitalized sales commission costs for possible impairment losses. The amortization of capitalized costs to obtain a contract are included in Selling, general and administrative expense. Refer to Note 7, "Balance Sheet Details" for additional information.

Shipping and Handling

Shipping and Handling

The Company includes costs related to shipping and handling in Cost of products.

Stock-Based Compensation

Stock-Based Compensation

Stock-based compensation expense is based on the measurement date fair value of the award and is recognized only for those awards expected to meet the service and performance vesting conditions. Stock-based compensation expense for stock options and restricted stock units with only a service condition is recognized on a straight-line basis over the requisite service period of the award. For stock options and restricted stock units with both a service condition and a performance or market condition, the expense is recognized on a graded vesting basis over the requisite service period of the award. Stock-based compensation expense is determined at the aggregate grant level for service-based awards and at the individual vesting tranche level for awards with performance and/or market conditions. The forfeiture rate is estimated based on historical experience.

Stock Options

Stock options granted under the Plan are generally non-qualified stock options, but the Plan permits some options granted to qualify as incentive stock options under the U.S. Internal Revenue Code. The exercise price of a stock option is equal to the closing price of the Company's common stock on the option grant date. The majority of the stock options issued by the Company contain only service vesting conditions. The Company has also issued performance-contingent stock options that vest only on the satisfaction of both service and market conditions. The Company did not issue stock options in fiscal 2024, 2023, and 2022. The expenses associated with stock options were not material for any of the periods presented.

The Company utilizes the Black-Scholes-Merton option pricing formula to estimate the fair value of stock options subject to service-based vesting conditions. The Company estimates the fair value of stock options subject to performance-contingent vesting conditions using a combination of a Monte Carlo simulation model and a lattice model, as these awards contain market conditions.

Retirement and Post-Retirement Plans

Retirement and Post-Retirement Plans

The Company has various defined benefit, other contributory and noncontributory, retirement and post-retirement plans. The costs and obligations for these plans depend on various assumptions. Major assumptions relate primarily to discount rates, mortality rates, expected increases in compensation levels and the expected long-term return on plan assets. These assumptions vary by plan, and the weighted-average rates used are set forth in Note 4, "Retirement and Post-Retirement Benefit Plans."

The discount rate assumption is based on current investment yields of high-quality fixed-income securities with maturities similar to the expected benefits payment period. Mortality rates help predict the expected life of plan participants and are based on a historical demographic study of the plan. The expected increase in the compensation levels assumption reflects long-term actual experience and future expectations. The expected long-term return on plan assets is determined based on asset allocations, historical portfolio results, historical asset correlations and management's expected returns for each asset class. In any fiscal year, significant differences may arise between the actual return and the expected long-term return on plan assets. Historically, differences between the actual return and expected long-term return on plan assets have resulted from changes in target or actual asset allocation, short-term performance relative to expected long-term performance, and to a lesser extent, differences between target and actual investment allocations, the timing of benefit payments compared to expectations, and the use of derivatives intended to effect asset allocation changes or hedge certain investment or liability exposures.

The following table provides the impact changes in the weighted-average assumptions of discount rates, the expected increase in compensation levels and the expected long-term return on plan assets would have had on the net periodic benefit cost for fiscal 2024:

	Change in basis points		Change in Net Periodic Benefit Cost In millions
Assumptions:			
Discount rate	(25)	\$	17
Expected increase in compensation levels	25		3
Expected long-term return on plan assets	(25)	\$	25

The Company generally amortizes unrecognized actuarial gains and losses on a straight-line basis over the average remaining estimated service life or, in the case of

closed plans, life expectancy of participants. In limited cases, actuarial gains and losses are amortized using the corridor approach.

[Advertising](#)

Advertising

Costs to produce advertising are expensed as incurred during production. Costs to communicate advertising are expensed when the advertising is first run. Advertising expense totaled approximately \$117 million, \$173 million, and \$179 million in fiscal 2024, 2023, and 2022, respectively.

[Restructuring](#)

Restructuring

The Company's transformation programs include charges to approved restructuring plans. Restructuring charges include severance costs to eliminate a specified number of employees, infrastructure charges to vacate facilities and consolidate operations, and contract cancellation costs. These restructuring actions require management to estimate the timing and amount of severance and other employee separation costs for workforce reduction and enhanced early retirement programs, the fair value of assets made redundant or obsolete, and the value of lease and contract cancellation and other exit costs. The Company records restructuring charges based on estimated employee terminations and site closure and consolidation plans. The Company accrues for severance and other employee separation costs under these actions when it is probable that benefits will be paid and the amount is reasonably estimable. The rates used in determining severance accruals are based on existing plans, historical experiences and negotiated settlements. For a full description of the Company's restructuring actions, refer to the discussions in Note 3, "Transformation Programs."

[Taxes on Earnings](#)

Taxes on Earnings

The Company recognizes deferred tax assets and liabilities for the expected tax consequences of temporary differences between the tax bases of assets and liabilities and their reported amounts using enacted tax rates in effect for the year the differences are expected to reverse.

The Company records a valuation allowance to reduce deferred tax assets to the amount that is more likely than not to be realized. In determining the need for a valuation allowance, the Company considers future market growth, forecasted earnings, future sources of taxable income, the mix of earnings in the jurisdictions in which the Company operates, and prudent and feasible tax planning strategies. In the event the Company were to determine that it is more likely than not that the Company will be unable to realize all or part of its deferred tax assets in the future, the Company would increase the valuation allowance and recognize a corresponding charge to earnings in the period in which such a determination was made. Likewise, if the Company later determines that the deferred tax assets are more likely than not to be realized, the Company would reverse the applicable portion of the previously recognized valuation allowance. In order for the Company to realize deferred tax assets, the Company must be able to generate sufficient taxable income, of the appropriate character, in the jurisdictions in which the deferred tax assets are located, prior to their expiration under applicable tax laws.

The Company records accruals for uncertain tax positions when the Company believes that it is not more likely than not that the tax position will be sustained on examination by the taxing authorities based on the technical merits of the position. The provision for income taxes includes the effects of adjustments for uncertain tax positions as well as any related interest and penalties. The Company recognizes interest income from favorable settlements and interest expense and penalties accrued on unrecognized tax benefits in Provision for taxes in the Consolidated Statements of Earnings.

The Company is subject to the Global Intangible Low Taxed Income ("GILTI") tax in the U.S. The Company elected to treat taxes on future GILTI inclusions in U.S. taxable income as a current period expense when incurred.

The Company believes it has provided adequate reserves for all tax deficiencies or reductions in tax benefits that could result from federal, state and foreign tax audits. The Company regularly assesses the likely outcomes of these audits in order to determine the appropriateness of the Company's tax provision. The Company adjusts its uncertain tax positions to reflect the impact of negotiations, settlements, rulings, advice of legal counsel, and other information and events pertaining to a particular audit. However, income tax audits are inherently unpredictable and there can be no assurance that the Company will accurately predict the outcome of these audits. The amounts ultimately paid on resolution of an audit could be materially different from the amounts previously included in the Provision for taxes and therefore the resolution of one or more of these uncertainties in any particular period could have a material impact on net earnings or cash flows.

The Company has not provided for U.S. federal and state income and foreign withholding taxes on \$9.3 billion of undistributed earnings and basis differences from non-U.S. operations as of October 31, 2024 because the Company intends to reinvest such earnings indefinitely outside of the U.S. Determination of the amount of unrecognized deferred tax liability related to these earnings and basis differences is not practicable. The Company will remit non-indefinitely reinvested earnings of its non-U.S. subsidiaries for which deferred U.S. state income and foreign withholding taxes have been provided where excess cash has accumulated and the Company determines that it is advantageous for business operations, tax or cash management reasons.

Deferred Income Taxes

Deferred income taxes result from temporary differences between the amount of assets and liabilities recognized for financial reporting and tax purposes.

[Accounts Receivable](#)

Accounts Receivable

The allowance for expected credit losses related to accounts receivable is comprised of a general reserve and a specific reserve. The Company may record a specific reserve for individual accounts when the Company becomes aware of specific customer circumstances, such as in the case of a bankruptcy filing or deterioration in the customer's operating results or financial position. If there are additional changes in circumstances related to the specific customer, the Company further adjusts estimates of the recoverability of receivables. The Company maintains an allowance for credit losses for all other customers based on a variety of factors, including the financial condition of customers and the length of time receivables are past due. These qualitative factors are subjective and require a degree of management judgment. The past due or delinquency status of a receivable is based on the contractual payment terms of the receivable. The Company establishes an allowance for expected credit losses related to accounts receivable, including unbilled receivables.

Financing Receivable

The allowance for expected credit losses related to financing receivables is comprised of a general reserve and a specific reserve. The Company establishes a specific reserve for financing receivables with identified exposures, such as customer defaults, bankruptcy or other events, that make it unlikely the Company will recover its investment. For individually evaluated receivables, the Company determines the expected cash flow for the receivable, which includes consideration of estimated proceeds from disposition of the collateral and calculates an estimate of the potential loss and the probability of loss. For those accounts where a loss is considered probable, the Company records a specific reserve. The Company maintains a general reserve using a credit loss model on a regional basis and bases such percentages on several factors, including consideration of historical credit losses and portfolio delinquencies, trends in the overall weighted-average risk rating of the portfolio, current economic conditions, and forward-looking information, including reasonable and supportable forecasts. The Company excludes accounts evaluated as part of the specific reserve from the general reserve analysis. The Company generally writes off a receivable or records a specific reserve when a receivable becomes 180 days past due, or sooner if the Company determines that the receivable is not collectible.

Non-Accrual and Past-Due Financing Receivables

The Company considers a financing receivable to be past due when the minimum payment is not received by the contractually specified due date. The Company generally places financing receivables on non-accrual status, which is the suspension of interest accrual, and considers such receivables to be non-performing at the earlier of the time at which full payment of principal and interest becomes doubtful or the receivable becomes 90 days past due. Subsequently, the Company may recognize revenue on non-accrual financing receivables as payments are received, which is on a cash basis, if the Company deems the recorded financing receivable to be fully collectible; however, if there is doubt regarding the ultimate collectability of the recorded financing receivable, all cash receipts are applied to the carrying amount of the financing receivable, which is the cost recovery method. In certain circumstances, such as when the Company deems a delinquency to be of an administrative nature, financing receivables may accrue interest after becoming 90 days past due. The non-accrual status of a financing receivable may not impact a customer's risk rating. After all of a customer's delinquent principal and interest balances are settled, the Company may return the related financing receivable to accrual status.

[Concentrations of Risk](#)

Concentrations of Risk

Financial instruments that potentially subject the Company to significant concentrations of credit risk consist principally of cash, cash equivalents and restricted cash, investments, receivables from trade customers and contract manufacturers, financing receivables and derivatives.

The Company maintains cash, cash equivalents and restricted cash, investments, derivatives, and certain other financial instruments with various financial institutions. These financial institutions are located in many different geographic regions, and the Company's policy is designed to limit exposure from any particular institution. As part of its risk management processes, the Company performs periodic evaluations of the relative credit standing of these financial institutions. The Company has not sustained material credit losses from instruments held at these financial institutions. The Company utilizes derivative contracts to protect against the effects of foreign currency and interest rate exposures. Such contracts involve the risk of non-performance by the counterparty, which could result in a material loss. For more details on the collateral program, see Note 13, "Financial Instruments."

Credit risk with respect to accounts receivable from trade customers and financing receivables is generally diversified due to the large number of entities comprising the Company's customer base and their dispersion across many different industries and geographic regions. The Company performs ongoing credit evaluations of the financial condition of its customers and may require collateral, such as letters of credit and bank guarantees, in certain circumstances. As of October 31, 2024 and 2023 no single customer accounted for more than 10% of the Company's receivable from trade customers and financing receivables.

[Restricted Cash](#)

Restricted Cash

Restricted cash is included within Other current assets in the accompanying Consolidated Balance Sheets and is primarily related to cash received under the Company's collateral securities agreements for its derivative instruments and cash restricted under the fixed-term securitization program for the issuance of asset-backed debt securities.

[Inventory](#)

Inventory

The Company values inventory at the lower of cost or net realizable value. Cost is computed using standard cost which approximates actual cost on a first-in, first-out basis. At each reporting period, the Company assesses the value of its inventory and writes down the cost of inventory to its net realizable value if required, for estimated excess or obsolescence. Factors influencing these adjustments include changes in future demand forecasts, market conditions, technological changes, product life-cycle and development plans, component cost trends, product pricing, physical deterioration, and quality issues. If in any period the Company anticipates a change in those factors to be less favorable than its previous estimates, additional inventory write-downs may be required and could materially impact gross margin. The write down for excess or obsolescence is charged to the provision of inventory, which is a component of Cost of Products and Cost of Services in the Consolidated Statements of Earnings. At the point of the loss recognition, a new, lower cost basis for that inventory is established, and subsequent changes in facts and circumstances do not result in the restoration or increase in that newly established cost basis.

Property, Plant and Equipment, net

The Company states property, plant and equipment at cost less accumulated depreciation. The Company capitalizes additions and improvements and expenses maintenance and repairs as incurred. Depreciation expense is recognized on a straight-line basis over the estimated useful lives of the assets. Estimated useful lives are five to 40 years for buildings and improvements and three to 15 years for machinery and equipment. The Company depreciates leasehold improvements over the life of the lease or the asset, whichever is shorter. The Company depreciates equipment held for lease over the initial term of the lease to the equipment's estimated residual value. The estimated useful lives of assets used solely to support a customer services contract generally do not exceed the term of the customer contract. On retirement or disposition, the asset cost and related accumulated depreciation are removed from the Consolidated Balance Sheets with any gain or loss recognized in the Consolidated Statements of Earnings.

The Company capitalizes certain internal and external costs incurred to acquire or create internal use software, principally related to software coding, designing system interfaces and installation and testing of the software. The Company amortizes capitalized internal use software costs using the straight-line method over the estimated useful lives of the software, generally from three to five years.

[Lessee Accounting](#)

Lessee Accounting

The Company enters into various leases as a lessee for assets including office buildings, data centers, vehicles, and aviation. The Company determines if an arrangement is a lease at inception. An arrangement contains a lease when the arrangement conveys the right to control the use of an identified asset over the lease term. Upon lease commencement, the Company records a lease liability for the obligation to make lease payments and right-of-use ("ROU") asset for the right to use the underlying asset for the lease term in the Consolidated Balance Sheets. The lease liability is measured at commencement date based on the present value of lease payments not yet paid over the lease term and the Company's incremental borrowing rate. As most of the Company's leases do not provide an implicit rate, the Company uses an incremental borrowing rate which approximates the rate at which the Company would borrow, on a secured basis, in the country where the lease was executed. The ROU asset is based on the lease liability, adjusted for lease prepayments, lease incentives received, and the lessee's initial direct costs. Fixed payments are included in the recognition of ROU assets and liabilities, while non-lease components, such as maintenance or utility charges are expensed as incurred. The Company has agreements with lease and non-lease components that are accounted for separately and not included in its leased assets and corresponding liabilities for the majority of the Company's lease agreements. The Company allocates consideration to the lease and non-lease components using their relative standalone values. The lease term may include options to extend or to terminate the lease that the Company is reasonably certain to exercise. The Company has elected not to record leases with an initial term of twelve months or less on the Consolidated Balance Sheets.

For finance leases, the ROU asset is amortized on a straight-line basis over the shorter of the useful life of the asset or the lease term. Interest expense on the lease liability is recorded separately using the interest method. For operating leases, lease expense is generally recognized on a straight-line basis over the lease term.

[Lessor Accounting](#)

Lessor Accounting

The Company's lease offerings are non-cancelable and the payment schedule primarily consists of fixed payments. Variable payments that are based on an index are included in lease receivables. The Company allocates consideration amongst lease components and non-lease components on a relative standalone selling price basis, when lease arrangements include multiple performance obligations. At the end of the lease term, the Company allows the client to either return the equipment, purchase the equipment or renew the lease based on mutually agreed upon terms.

The Company retains a residual position in equipment through lease and finance agreements which is equivalent to an estimated market value. The residual amount is established prior to lease inception, based upon estimated equipment values at end of lease using product road map trends, historical analysis, future projections and

remarketing experience. The Company's residual amounts are evaluated at least annually to assess the appropriateness of the carrying values. Any anticipated declines in specific future residual values that are considered to be other-than-temporary would be recorded in current earnings. The Company is able to optimize the recovery of residual values by selling equipment in place, extending lease arrangements on a fixed term basis, entering into a monthly usage rental term beyond the initial lease term, and selling lease returned equipment in the secondary market. The contractual lease agreement also identifies return conditions that ensures the leased equipment will be in good operating condition upon return minus any normal wear and tear. During the residual review process, product changes, product updates, as well as market conditions are reviewed and adjustments if other than temporary are made to residual values in accordance with the impact of any such changes. The remarketing sales organization closely manages the sale of equipment lease returns to optimize the recovery of outstanding residual by product.

[Business Combinations](#)

Business Combinations

The Company includes the results of operations of acquired businesses in the Company's consolidated results prospectively from the date of acquisition. The Company allocates the fair value of purchase consideration to the assets acquired including in-process research and development ("IPR&D"), liabilities assumed, and non-controlling interests in the acquired entity based on their fair values at the acquisition date. IPR&D is initially capitalized at fair value as an intangible asset with an indefinite life and assessed for impairment thereafter. The excess of the fair value of purchase consideration over the fair value of the assets acquired, liabilities assumed and non-controlling interests in the acquired entity is recorded as goodwill. The primary items that generate goodwill include the value of the synergies between the acquired company and the Company and the value of the acquired assembled workforce, neither of which qualifies for recognition as an intangible asset. Acquisition-related expenses and post-acquisition restructuring costs are recognized separately from the business combination and are expensed as incurred.

[Goodwill](#)

Goodwill

The Company reviews goodwill for impairment annually and whenever events or changes in circumstances indicate the carrying amount of goodwill may not be recoverable. In evaluating goodwill for impairment, the Company has the option to first perform a qualitative test to determine whether further impairment testing is necessary or to perform a qualitative assessment by comparing the fair value of the reporting unit to its carrying amount. Under the qualitative assessment, the Company is not required to calculate the fair value of a reporting unit unless it determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Qualitative factors include, but are not limited to, the macroeconomic and industry environment as well as Company-specific factors. The Company elects to perform a quantitative test for all of its reporting units as part of its annual goodwill impairment assessment in the fourth quarter of each fiscal year.

In the quantitative assessment, the Company estimates the fair value of its reporting units using a weighting of fair values derived most significantly from the income approach, and to a lesser extent, the market approach. Under the income approach, the Company estimates the fair value of a reporting unit based on the present value of estimated future cash flows covering discrete forecast periods as well as terminal value determinations. The Company prepares cash flow projections based on management's estimates of revenue growth rates and operating margins, taking into consideration industry and market conditions. The Company bases the discount rate on the weighted-average cost of capital adjusted for the relevant risk associated with business-specific characteristics and the uncertainty related to the reporting unit's ability to execute on the projected cash flows. Under the market approach, the Company estimates fair value based on market multiples of revenue and earnings derived from comparable publicly traded companies with similar operating and investment characteristics as the reporting unit. The Company weights the fair value derived from the market approach commensurate with the level of comparability of these publicly traded companies to the reporting unit. When market comparables are not meaningful or not available, the Company estimates the fair value of a reporting unit using only the income approach.

If the fair value of a reporting unit exceeds the carrying amount of the net assets assigned to that reporting unit, goodwill is not impaired and no further testing is required. If the fair value of the reporting unit is less than its carrying amount, goodwill is impaired. The goodwill impairment loss is measured as the excess of the reporting unit's carrying value over its fair value (not to exceed the total goodwill allocated to that reporting unit).

[Intangible Assets and Long-Lived Assets](#)

Intangible Assets and Long-Lived Assets

The Company reviews intangible assets with finite lives, long-lived assets and ROU assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. For lease assets such circumstances would include a decision to abandon the use of all or part of an asset, or subleases that do not fully recover the costs of the associated lease. The Company assesses the recoverability of assets based on the estimated undiscounted future cash flows expected to result from the use and eventual disposition of the asset. If the undiscounted future cash flows are less than the carrying amount, the asset is impaired. The Company measures the amount of impairment loss, if any, as the difference between the carrying amount of the asset and its fair value using an income approach or, when available and appropriate, using a market approach. The Company amortizes intangible assets with finite lives using the straight-line method over the estimated economic lives of the assets, ranging from one to ten years. Intangible assets purchased as part of an acquisition are included in Intangible assets, net in the Consolidated Balance Sheets. All other separately purchased intangible assets are included in Long-term financing receivables and other assets in the Consolidated Balance Sheets.

Software development costs related to the development of new product offerings are capitalized subsequent to the establishment of technological feasibility, which is demonstrated by the completion of a detail program design or working model. Software development costs are included in Intangible assets, net in the Consolidated Balance Sheets. The Company amortizes capitalized costs on a straight-line basis over the estimated useful life of products, which is generally three years.

[Equity Method Investments](#)

Equity Method Investments

Investments and ownership interests are accounted for under equity method accounting if the Company has the ability to exercise significant influence, but does not have a controlling financial interest. The Company records its interest in the net earnings of its equity method investees, along with adjustments for unrealized profits or losses on intra-entity transactions and amortization of basis differences, within Earnings from equity interests in the Consolidated Statements of Earnings. Profits or losses related to intra-entity sales with its equity method investees are eliminated until realized by the investor or investee. Basis differences represent differences between the cost of the investment and the underlying equity in net assets of the investment and are generally amortized over the lives of the related assets that gave rise to them. Equity method goodwill is not amortized or tested for impairment; instead the equity method investment is tested for impairment. The Company records its interest in the net earnings of its equity method investments based on the most recently available financial statements of the investees.

The carrying amount of the investment in equity interests is adjusted to reflect the Company's interest in net earnings, dividends received and other-than-temporary impairments. The Company reviews for impairment whenever factors indicate that the carrying amount of the investment might not be recoverable. In such a case, the decrease in value is recognized in the period the impairment occurs in the Consolidated Statements of Earnings.

[Equity Securities Investments](#)

Equity Securities Investments

Equity securities investments with readily determinable fair values (other than those accounted for under the equity method or those that result in consolidation of the investee) are measured at fair value and any changes in fair value are recognized in Interest and other, net in the Consolidated Statements of Earnings. For equity investments without readily determinable fair values, the Company may elect to apply the measurement alternative or the fair value option. Under the measurement alternative investments are measured at cost, less impairment, and adjusted for qualifying observable price changes on a prospective basis. The Company reviews for impairment at each reporting period, assessing factors such as deterioration of earnings, adverse change in market/industry conditions, the ability to operate as a going concern, and other factors which indicate that the carrying amount of the investment might not be recoverable. In such a case, the decrease in value is recognized in the period the impairment occurs in the Consolidated Statements of Earnings. The Company elects the fair value option when it believes that it best reflects the underlying economics of the investment. These investments may be valued using third-party pricing services at each reporting date with changes in fair value recorded as a component of Interest and other, net in the Consolidated Statements of Earnings.

[Debt Securities Investments](#)

Debt Securities Investments

Debt securities are generally considered available-for-sale and are reported at fair value with unrealized gains and losses, net of applicable taxes, recorded in Accumulated other comprehensive loss in the Consolidated Balance Sheets. Realized gains and losses for available-for-sale securities are calculated based on the specific identification method and included in Interest and other, net in the Consolidated Statements of Earnings. The Company monitors its investment portfolio for potential impairment on a quarterly basis. When the carrying amount of an investment in debt securities exceeds its fair value and the decline in value is determined to be due to credit-related factors, the Company recognizes the impairment using an allowance for credit loss in

Interest and other, net, in the Consolidated Statements of Earnings, while the impairment that is not credit related is recorded in Accumulated other comprehensive loss in the Consolidated Balance Sheets.

[Derivatives](#)

Derivatives

The Company uses derivative financial instruments, primarily forwards, swaps, and, at times, options, to manage a variety of risks, including risks related to foreign currency and interest rate exposures. The Company does not use derivative financial instruments for speculative purposes.

The Company receives fair value to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. When prices in active markets are not available for an identical asset or liability, the Company generally uses industry standard valuation models to measure the fair value of derivative positions. Such measurements involve projecting future cash flows and discounting the future amounts to present value using market based observable inputs, including interest rate curves, Company and counterparty credit risk, foreign currency exchange rates, and forward and spot prices. In the absence of such data, the Company will use internal information that is consistent with what market participants would use in a hypothetical transaction that occurs at the measurement date. The determination of fair value often involves significant judgments about assumptions such as determining an appropriate discount rate that factors in both risk and liquidity premiums, identifying the similarities and differences in market transactions, weighting those differences accordingly and then making the appropriate adjustments to those market transactions to reflect the risks specific to the asset or liability being valued.

Derivative Instruments

The Company is a global company exposed to foreign currency exchange rate fluctuations and interest rate changes in the normal course of its business. As part of its risk management strategy, the Company uses derivative instruments, primarily forward contracts, interest rate swaps and total return swaps to hedge certain foreign currency, interest rate and, to a lesser extent, equity exposures. The Company's objective is to offset gains and losses resulting from these exposures with losses and gains on the derivative contracts used to hedge them, thereby reducing volatility of earnings or protecting the fair value of assets and liabilities. The Company does not have any leveraged derivatives and does not use derivative contracts for speculative purposes. The Company may designate its derivative contracts as fair value hedges, cash flow hedges or hedges of the foreign currency exposure of a net investment in a foreign operation ("net investment hedges"). Additionally, for derivatives not designated as hedging instruments, the Company categorizes those economic hedges as other derivatives. Derivative instruments are recognized at fair value in the Consolidated Balance Sheets. The change in fair value of the derivative instruments is recognized in the Consolidated Statements of Earnings or Consolidated Statements of Comprehensive Income depending upon the type of hedge as further discussed below. The Company classifies cash flows from its derivative programs with the activities that correspond to the underlying hedged items in the Consolidated Statements of Cash Flows.

As a result of its use of derivative instruments, the Company is exposed to the risk that its counterparties will fail to meet their contractual obligations. To mitigate counterparty credit risk, the Company has a policy to enter into derivative contracts with carefully selected major financial institutions based on their credit ratings and other factors, and the Company maintains dollar risk limits that correspond to each financial institution's credit rating and other factors. The Company's established policies and procedures for mitigating credit risk include reviewing and establishing limits for credit exposure and periodically reassessing the creditworthiness of its counterparties. Master netting agreements also mitigate credit exposure to counterparties by permitting the Company to net amounts due from the Company to a counterparty against amounts due to the Company from the same counterparty under certain conditions.

To further mitigate credit exposure to counterparties, the Company has collateral security agreements, which allow the Company to hold collateral from, or require the Company to post collateral to counterparties when aggregate derivative fair values exceed contractually established thresholds which are generally based on the credit ratings of the Company and its counterparties. If the Company's credit rating falls below a specified credit rating, the counterparty has the right to request full collateralization of the derivatives' net liability position. Conversely, if the counterparty's credit rating falls below a specified credit rating, the Company has the right to request full collateralization of the derivatives' net liability position. Collateral is generally posted within two business days. The fair value of the Company's derivatives with credit contingent features in a net liability position was \$23 million and \$108 million at October 31, 2024 and 2023, respectively, most of which were fully collateralized within two business days.

Under the Company's derivative contracts, the counterparty can terminate all outstanding trades following a covered change of control event affecting the Company that results in the surviving entity being rated below a specified credit rating. This credit contingent provision did not affect the Company's financial position or cash flows as of October 31, 2024 and 2023.

Fair Value Hedges

The Company issues long-term debt in U.S. dollars based on market conditions at the time of financing. The Company may enter into fair value hedges, such as interest rate swaps, to reduce the exposure of its debt portfolio to changes in fair value resulting from changes in interest rates by achieving a primarily U.S. dollar LIBOR-based floating interest rate which was replaced with SOFR starting in July of fiscal 2023. The swap transactions generally involve principal and interest obligations for U.S. dollar-denominated amounts. Alternatively, the Company may choose not to swap fixed for floating interest payments or may terminate a previously executed swap if it believes a larger proportion of fixed-rate debt would be beneficial. When investing in fixed-rate instruments, the Company may enter into interest rate swaps that convert the fixed interest payments into variable interest payments and may designate these swaps as fair value hedges.

For derivative instruments that are designated and qualify as fair value hedges, the Company recognizes the change in fair value of the derivative instrument, as well as the offsetting change in the fair value of the hedged item, in Interest and other, net in the Consolidated Statements of Earnings in the period of change.

Cash Flow Hedges

The Company uses forward contracts designated as cash flow hedges to protect against the foreign currency exchange rate risks inherent in its forecasted net revenue and, to a lesser extent, cost of sales, operating expenses, and intercompany loans denominated in currencies other than the U.S. dollar. The Company's foreign currency cash flow hedges mature generally

within twelve months; however, forward contracts associated with sales-type and direct-financing leases and intercompany loans extend for the duration of the lease or loan term, which can extend up to five years.

For derivative instruments that are designated and qualify as cash flow hedges, and as long as they remain highly effective, the Company records the changes in fair value of the derivative instrument in Accumulated other comprehensive loss as a separate component of equity in the Consolidated Balance Sheets and subsequently reclassifies these amounts into earnings in the same financial statement line item when the hedged transaction is recognized.

In connection with the Company’s pending acquisition of Juniper Networks and related debt issuances, the Company entered into interest rate locks for an aggregate notional amount of \$2.6 billion. These contracts were settled in fiscal 2024, the Company recognized a loss of \$42 million in accumulated other comprehensive income.

Net Investment Hedges

The Company uses forward contracts designated as net investment hedges to hedge net investments in certain foreign subsidiaries whose functional currency is the local currency. The Company records the changes in the fair value of the hedged items in cumulative translation adjustment as a separate component of equity in the Consolidated Balance Sheets.

Other Derivatives

Other derivatives not designated as hedging instruments consist primarily of forward contracts used to hedge foreign currency-denominated balance sheet exposures. The Company also uses total return swaps, based on equity or fixed income indices, to hedge its executive deferred compensation plan liability.

For derivative instruments not designated as hedging instruments, the Company recognizes changes in fair value of the derivative instrument, as well as the offsetting change in the fair value of the hedged item, in Interest and other, net in the Consolidated Statements of Earnings in the period of change.

Hedge Effectiveness

For interest rate swaps designated as fair value hedges, the Company measures hedge effectiveness by offsetting the change in fair value of the hedged items with the change in fair value of the derivative. For forward contracts designated as cash flow or net investment hedges, the Company measures hedge effectiveness by comparing the cumulative change in fair value of the hedge contract with the cumulative change in fair value of the hedged item, both of which are based on forward rates.

[Contingencies](#)

Contingencies

The Company is involved in various lawsuits, claims, investigations, and proceedings that arise in the ordinary course of business. The Company records a liability for contingencies when it believes it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. The Company does not record gain contingencies until realized.

[Warranties](#)

Warranties

The Company accrues the estimated cost of product warranties at the time of recognizing revenue. The Company’s standard product warranty terms generally include post-sales support and repairs or replacement of a product at no additional charge for a specified period of time. The Company engages in extensive product quality programs and processes, including actively monitoring and evaluating the quality of its component suppliers. The estimated warranty obligation is based on contractual warranty terms, repair costs, product call rates, average cost per call, current period product shipments and ongoing product failure rates, as well as specific product class failure outside of the Company’s baseline experience. Warranty terms generally range from one to five years for parts and labor, depending upon the product. For certain networking products, the Company offers a lifetime warranty. Over the last three fiscal years, the annual warranty expense has averaged approximately 1.1% of annual net product revenue.

Recently Enacted Accounting Pronouncements

In November 2024, the FASB issued guidance to provide disaggregated expense disclosures in the Consolidated Financial Statements. The Company is required to adopt the guidance for its annual period ending October 31, 2028 and all interim periods thereafter, though early adoption is permitted. The Company is currently evaluating the impact of this amendment on its Consolidated Financial Statements.

In December 2023, the FASB issued guidance to provide disaggregated income tax disclosures on the rate reconciliation and income taxes paid. The Company is required to adopt the guidance in the first quarter of fiscal 2026, though early adoption is permitted. The Company is currently evaluating the impact of this amendment on its Consolidated Financial Statements.

In November 2023, the FASB issued guidance to improve the disclosures about a public entity’s reportable segments and address requests from investors for additional, more detailed information about a reportable segment’s expenses. The Company will adopt this guidance for its annual period ending October 31, 2025 and all interim periods thereafter. The Company does not expect the adoption of this guidance to have a significant impact on its Consolidated Financial Statements.

[Pension and Other Postretirement Plans](#)

The following is a description of the valuation methodologies used to measure plan assets at fair value.

Investments in publicly traded equity securities are valued using the closing price on the measurement date as reported on the stock exchange on which the individual securities are traded. For corporate, government backed debt securities, and some other investments, fair value is based on observable inputs of comparable market transactions. The valuation of certain real estate funds, insurance group annuity contracts and alternative investments, such as limited partnerships and joint ventures, may require significant management judgment and involves a level of uncertainty. The valuation is generally based on fair value as reported by the asset manager and adjusted for cash flows, if necessary. In making such an assessment, a variety of factors are reviewed by management, including, but are not limited to, the timeliness of fair value as reported by the asset manager and changes in general economic and market conditions subsequent to the last fair value reported by the asset manager. The use of different techniques or assumptions to estimate fair value could result in a different fair value measurement at the reporting date. Cash and cash equivalents includes money market funds, which are valued based on cost, which approximates fair value. Other than those assets that have quoted prices from an active market, investments are generally classified in Level 2 or Level 3 of the fair value hierarchy based on the lowest level input that is significant to the fair value measure in its entirety. Investments measured using net asset value as a practical expedient are not categorized within the fair value hierarchy.

[Investment Policy](#)

Investment Policy

The Company’s investment strategy is to seek a competitive rate of return relative to an appropriate level of risk depending on the funded status of each plan and the timing of expected benefit payments. The majority of the plans’ investment managers employ active investment management strategies with the goal of outperforming the broad markets in which they invest. Risk management practices include diversification across asset classes and investment styles and periodic rebalancing toward asset allocation targets. A number of the plans’ investment managers are authorized to utilize derivatives for investment or liability exposures, and the Company may utilize derivatives to effect asset allocation changes or to hedge certain investment or liability exposures.

Asset allocation decisions are typically made by an independent board of trustees for the specific plan. Investment objectives are designed to generate returns that will enable the plan to meet its future obligations. In some countries, local regulations may restrict asset allocations, typically leading to a higher percentage of investment in fixed income securities than would otherwise be deployed. The Company reviews the investment strategy and provides a recommended list of investment managers for each country plan, with final decisions on asset allocation and investment managers made by the board of trustees or investment committees for the specific plan.

[Basis for Expected Long-Term Rate of Return on Plan Assets](#)

Basis for Expected Long-Term Rate of Return on Plan Assets

The expected long-term rate of return on plan assets reflects the expected returns for each major asset class in which the plan invests and the weight of each asset class in the target mix. Expected asset returns reflect the current yield on government bonds, risk premiums for each asset class and expected real returns, which considers each country’s specific inflation outlook. Because the Company’s investment policy is to employ primarily active investment managers who seek to outperform the broader market, the expected returns are adjusted to reflect the expected additional returns, net of fees.

[Fair Value](#)

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants at the measurement date.

Fair Value Hierarchy

The Company uses valuation techniques that are based upon observable and unobservable inputs. Observable inputs are developed using market data such as publicly available information and reflect the assumptions market participants would use, while unobservable inputs are developed using the best information available about the assumptions market participants would use. Assets and liabilities are classified in the fair value hierarchy based on the lowest level input that is significant to the fair value measurement:

Level 1—Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2—Quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability and market-corroborated inputs.

Level 3—Unobservable inputs for assets or liabilities.

The fair value hierarchy gives the highest priority to observable inputs and lowest priority to unobservable inputs. For the fiscal years ended October 31, 2024 and 2023, there were no transfers between levels within the fair value hierarchy.

Valuation Techniques

Cash Equivalents and Investments: The Company holds time deposits, money market funds, debt securities primarily consisting of corporate and foreign government notes and bonds. The Company values cash equivalents using quoted market prices, alternative pricing sources, including net asset value, or models utilizing market observable inputs. The fair value of debt and equity investments was based on quoted market prices or model-driven valuations using inputs primarily derived from or corroborated by observable market data, and, in certain instances, valuation models that utilize assumptions which cannot be corroborated with observable market data. Equity and other securities include investments in marketable and non-marketable securities. In evaluating non-marketable securities for impairment or observable price changes, the Company uses valuation techniques using the best information available, and may include quoted market prices, market comparables and discounted cash flow projections.

Derivative Instruments: The Company uses forward contracts, interest rate and total return swaps to hedge certain foreign currency and interest rate exposures. The Company uses industry standard valuation models to measure fair value. Where applicable, these models project future cash flows and discount the future amounts to present value using market-based observable inputs, including interest rate curves, the Company and counterparties’ credit risk, foreign currency exchange rates, and forward and spot prices for currencies and interest rates. See Note 13, “Financial Instruments,” for a further discussion of the Company’s use of derivative instruments.

Other Fair Value Disclosures

Short-Term and Long-Term Debt: The Company estimates the fair value of its debt primarily using an expected present value technique, which is based on observable market inputs using interest rates currently available to companies of similar credit standing for similar terms and remaining maturities, and considering its own credit risk. The portion of the Company’s debt that is hedged is reflected in the Consolidated Balance Sheets as an amount equal to the debt’s carrying amount and a fair value adjustment representing changes in the fair value of the hedged debt obligations arising from movements in benchmark interest rates. As of October 31, 2024, the estimated fair value of the Company’s short-term and long-term debt was \$18.3 billion and the carrying value was \$18.2 billion. As of October 31, 2023, the estimated fair value of the Company’s short-term

and long-term debt was \$12.2 billion and the carrying value was \$12.4 billion. If measured at fair value in the Consolidated Balance Sheets, short-term and long-term debt would be classified in Level 2 of the fair value hierarchy.

Other Financial Instruments: For the balance of the Company’s financial instruments, primarily accounts receivable, accounts payable and financial liabilities included in other accrued liabilities, the carrying amounts approximate fair value due to their short-term nature. If measured at fair value in the Consolidated Balance Sheets, these other financial instruments would be classified in Level 2 or Level 3 of the fair value hierarchy.

Non-Recurring Fair Value Measurements

Equity Investments without Readily Determinable Fair Value: Equity investments are recorded at cost and measured at fair value, when they are deemed to be impaired or when there is an adjustment from observable price changes. For fiscal 2024, the Company recorded a net unrealized gain of \$34 million. For fiscal 2023 and 2022, the Company recorded net unrealized losses of \$45 million and \$17 million, respectively, which included impairments of \$50 million and \$24 million for the same respective periods. These amounts are reflected in Interest and other, net in the Consolidated Statements of Earnings. If measured at fair value in the Consolidated Balance Sheets, these would generally be classified in Level 3 of the fair value hierarchy. These adjustments are based on observable price changes for certain equity investments without readily determinable fair value. For investments still held as of October 31, 2024, the cumulative upward adjustments for observable price changes was \$82 million and cumulative downward adjustments for observable price changes and impairments was \$88 million. Refer to Note 13 “Financial Instruments,” for further information about equity investments.

Non-Financial Assets: The Company’s non-financial assets, such as intangible assets, goodwill and property, plant and equipment, are recorded at cost. The Company records ROU assets based on the lease liability, adjusted for lease prepayments, lease incentives received and the lessee’s initial direct costs. Fair value adjustments are made to these non-financial assets in the period an impairment charge is recognized.

In fiscal 2023 and 2022, the Company recorded a net ROU asset impairment charge of \$18 million and \$5 million, respectively, in Transformation costs in the Consolidated Statements of Earnings as the carrying value of certain ROU assets exceeded its fair value. If measured at fair value in the Consolidated Balance Sheets, these would generally be classified in Level 3 of the fair value hierarchy.

In the fourth quarter of fiscal 2022, the Company recorded a goodwill impairment charge of \$905 million associated with the HPC & AI reporting unit and the Software reporting unit within the Corporate Investments and Other segment. The fair value of the Company’s reporting units was classified in Level 3 of the fair value hierarchy due to the significance of unobservable inputs developed using company-specific information. For more information on the goodwill impairment, see Note 11, “Goodwill and Intangible Assets.”

[Net Earnings per share](#)

The Company calculates basic net EPS using net earnings and the weighted-average number of shares outstanding during the reporting period.

Credit Quality Indicators

Credit Quality Indicators

Due to the homogeneous nature of its leasing transactions, the Company manages its financing receivables on an aggregate basis when assessing and monitoring credit risk. Credit risk is generally diversified due to the large number of entities comprising the Company's customer base and their dispersion across many different industries and geographic regions. The Company evaluates the credit quality of an obligor at lease inception and monitors that credit quality over the term of a transaction. The Company assigns risk ratings to each lease based on the creditworthiness of the obligor and other variables that augment or mitigate the inherent credit risk of a particular transaction and periodically updates the risk ratings when there is a change in the underlying credit quality. Such variables include the underlying value and liquidity of the collateral, the essential use of the equipment, the term of the lease, and the inclusion of credit enhancements, such as guarantees, letters of credit or security deposits.

Organization, Consolidation and Presentation of Financial Statements (Tables)

Accounting Policies [Abstract]
Schedule of weighted average assumptions used to calculate net benefit (credit) cost

12 Months Ended

Oct. 31, 2024

The following table provides the impact changes in the weighted-average assumptions of discount rates, the expected increase in compensation levels and the expected long-term return on plan assets would have had on the net periodic benefit cost for fiscal 2024:

	Change in basis points	Change in Net Periodic Benefit Cost In millions
Assumptions:		
Discount rate	(25)	\$ 17
Expected increase in compensation levels	25	3
Expected long-term return on plan assets	(25)	\$ 25

The weighted-average assumptions used to calculate the net benefit cost (credit) in the table above for fiscal 2024, 2023 and 2022 were as follows:

	For the fiscal years ended October 31,					
	2024	2023	2022	2024	2023	2022
	Defined Benefit Plans			Post-Retirement Benefit Plans		
Discount rate used to determine benefit obligation	4.4 %	3.9 %	1.3 %	6.5 %	6.0 %	3.0 %
Discount rate used to determine service cost	4.7 %	4.2 %	1.7 %	6.1 %	5.7 %	2.7 %
Discount rate used to determine interest cost	4.4 %	3.9 %	1.1 %	6.4 %	5.9 %	2.6 %
Expected increase in compensation levels	2.9 %	3.0 %	2.6 %	—	—	—
Expected long-term return on plan assets	5.5 %	5.1 %	3.2 %	5.3 %	4.3 %	3.3 %
Interest crediting rate ⁽¹⁾	2.4 %	2.4 %	2.5 %	5.3 %	4.3 %	2.7 %

(1) The average assumed interest credited for HPE's cash balance plans and post-retirement plans, as applicable.

Retirement and Post-Retirement Benefit Plans (Tables)

Retirement Benefits

[Abstract]

Summary of Net Benefit Cost

The Company's net pension and post-retirement benefit costs that were directly attributable to the eligible employees, retirees and other former employees of Hewlett Packard Enterprise and recognized in the Consolidated Statements of Earnings for fiscal 2024, 2023 and 2022 are presented in the table below.

	For the fiscal years ended October 31,					
	2024	2023	2022	2024	2023	2022
	Defined Benefit Plans			Post-Retirement Benefit Plans		
	In millions					
Service cost	\$ 49	\$ 53	\$ 78	\$ 1	\$ 1	\$ 1
Interest cost ⁽¹⁾	408	386	154	9	8	4
Expected return on plan assets ⁽¹⁾	(550)	(539)	(450)	(4)	(2)	(2)
Amortization and Deferrals ⁽¹⁾ :						
Actuarial loss (gain)	148	160	167	(4)	(6)	(2)
Prior service benefit	(8)	(10)	(10)	—	—	—
Net periodic benefit cost (credit)	47	50	(61)	2	1	1
Settlement loss and special termination benefits ⁽¹⁾	4	6	5	—	—	—
Total net benefit cost (credit)	\$ 51	\$ 56	\$ (56)	\$ 2	\$ 1	\$ 1

(1)These non-service components were included in Interest and other, net in the Consolidated Statements of Earnings.

The following table provides the impact changes in the weighted-average assumptions of discount rates, the expected increase in compensation levels and the expected long-term return on plan assets would have had on the net periodic benefit cost for fiscal 2024:

	Change in basis points	Change in Net Periodic Benefit Cost
		In millions
Assumptions:		
Discount rate	(25)	\$ 17
Expected increase in compensation levels	25	3
Expected long-term return on plan assets	(25)	\$ 25

The weighted-average assumptions used to calculate the net benefit cost (credit) in the table above for fiscal 2024, 2023 and 2022 were as follows:

	For the fiscal years ended October 31,					
	2024	2023	2022	2024	2023	2022
	Defined Benefit Plans			Post-Retirement Benefit Plans		
Discount rate used to determine benefit obligation	4.4 %	3.9 %	1.3 %	6.5 %	6.0 %	3.0 %
Discount rate used to determine service cost	4.7 %	4.2 %	1.7 %	6.1 %	5.7 %	2.7 %
Discount rate used to determine interest cost	4.4 %	3.9 %	1.1 %	6.4 %	5.9 %	2.6 %
Expected increase in compensation levels	2.9 %	3.0 %	2.6 %	—	—	—
Expected long-term return on plan assets	5.5 %	5.1 %	3.2 %	5.3 %	4.3 %	3.3 %
Interest crediting rate ⁽¹⁾	2.4 %	2.4 %	2.5 %	5.3 %	4.3 %	2.7 %

(1) The average assumed interest credited for HPE's cash balance plans and post-retirement plans, as applicable.

The funded status of the plans was as follows:

	As of October 31,					
	2024	2023		2024	2023	
	Defined Benefit Plans			Post-Retirement Benefit Plans		
	In millions					
Change in fair value of plan assets:						
Fair value—beginning of year	\$	9,879	\$	9,915	\$	68
Reimbursement of benefit payments ⁽¹⁾		(90)		(82)		—
Actual return on plan assets		1,207		(315)		5
Employer contributions		172		179		4
Participant contributions		26		24		6
Benefits paid		(509)		(449)		(7)
Settlement		(18)		(29)		—
Currency impact		340		636		—
Fair value—end of year	\$	11,007	\$	9,879	\$	76
Change in benefit obligation:						
Projected benefit obligation—beginning of year	\$	9,362	\$	9,517	\$	148
Addition/deletion of plans ⁽²⁾		—		1		—
Service cost		49		53		1
Interest cost		408		386		9
Participant contributions		26		24		6
Actuarial loss (gain)		613		(756)		7
Benefits paid		(509)		(449)		(7)
Plan amendments		4		—		—
Settlement		(18)		(29)		—
Special termination benefits		2		2		—
Currency impact		319		613		(2)
Projected benefit obligation—end of year ⁽³⁾	\$	10,256	\$	9,362	\$	162
Funded status at end of year	\$	751	\$	517	\$	(86)
Accumulated benefit obligation	\$	10,130	\$	9,233	\$	—

(1) For benefit payments reimbursed to HPE from the German Contractual Trust Arrangements.

(2) Includes the addition/deletion of plans resulting from acquisitions.

(3) HPE divested \$13 million in projected benefit obligation and \$7 million in assets due to the Communications Technology Group ("CTG") divestiture that occurred on December 1, 2024.

The weighted-average assumptions used to calculate the projected benefit obligations were as follows:

	As of October 31,			
	2024	2023	2024	2023
	Defined Benefit Plans		Post-Retirement Benefit Plans	
Discount rate	3.8 %	4.4 %	5.6 %	6.5 %
Expected increase in compensation levels	2.6 %	2.9 %	—	—
Interest crediting rate	2.5 %	2.4 %	4.8 %	5.3 %

The net amounts recognized for defined benefit and post-retirement benefit plans in the Company's Consolidated Balance Sheets were as follows:

	As of October 31,			
	2024		2023	
	Defined Benefit Plans		Post-Retirement Benefit Plans	
	In millions			
Non-current assets	\$ 1,555	\$ 1,313	\$ —	\$ —
Current liabilities	(52)	(51)	(6)	(8)
Non-current liabilities	(752)	(745)	(80)	(72)
Funded status at end of year	\$ 751	\$ 517	\$ (86)	\$ (80)

The following table summarizes the pre-tax net actuarial loss and prior service benefit recognized in accumulated other comprehensive loss for the defined benefit plans, activity for the post-retirement benefit plans were immaterial:

- (1) Repurchase agreements, primarily in the UK, represent the plans' short-term borrowing to hedge against interest rate and inflation risks. Investments in approximately \$2.0 billion and \$2.3 billion of government bonds collateralize this short-term borrowing at October 31, 2024 and 2023, respectively. The plans have an obligation to return the cash after the term of the agreements. Due to the short-term nature of the agreements, the outstanding balance of the obligation approximates fair value.
- (2) Includes funds that invest primarily in asset-backed securities, mortgage-backed securities, collateralized loan obligations, and/or private debt investments. Primary valuation techniques for level 3 investments include discounted cash flows and broker quotes and/or third-party pricing services. Significant unobservable inputs include yields which are determined by considering the market yield of comparable public debt instruments adjusted for estimated losses to reflect where the expected recovery rate would be less than 100%, discount rates, and internal rate of return (IRR). The yields ranged from 6% to 21%, with the weighted average around 10%. In the prior year, the yields ranged from 6% to 22%, with the weighted average around 10%. The discount rates ranged from 3% to 5%, with the weighted average around 4%. In the prior year, the discount rates ranged from 4% to 5%, with the weighted average around 4%. The IRR ranged from 1% to 38%, with the main weighted average around 9%. In the prior year, the IRR ranged from 5% to 21%, with the main weighted average around 10%. Generally, an increase in yield and discounted rates may result in a decrease in the fair value of certain investments.
- (3) Includes funds, primarily in the UK, held in non-marketable, limited partnership interests which invest in a broad range of infrastructure and infrastructure-related assets. Primary valuation techniques for level 3 investments include the market, income or cost approach. Significant unobservable inputs include discount rate and EV/EBITDA multiples. Discount rates ranged from 8% to 13%, with the weighted average around 10%. The EV/EBITDA multiples ranged from 6.5x to 37.9x, with the weighted average ranging from 9.2x to 36.3x. Generally, an increase in discount rates may result in a decrease in the fair value of certain investments. The EV/EBITDA ratio generally indicates the number of times investors are willing to pay for a company's EBITDA valuation.
- (4) Includes funds, primarily in the UK, that invest in both private and public equities, as well as emerging markets across all sectors. The funds also hold fixed income and derivative instruments to hedge interest rate and inflation risk. In addition, the funds include units in transferable securities, collective investment schemes, money market funds, asset-backed income, cash, and deposits. Primary valuation techniques for level 3 investments include discounted cash flows and book value or net asset value. Significant unobservable inputs include discount rates. The discount rates ranged from 3% to 38%, with the weighted average around 17%. In the prior year, the discount rates ranged from 3% to 28%, with the weighted average around 14%. Generally, an increase in discount rates may result in a decrease in the fair value of certain investments.
- (5) Includes a pooled fund in the UK, that seeks a rate of return with direct or indirect linkage to UK inflation by investing in vehicles including bonds, long lease property, income strips, asset-backed securities, and index linked assets. Units are available for subscription on the first business day of each calendar month at net asset value. There are no redemption restrictions or future commitments on these investments.
- (6) Common Contractual Funds are investment arrangements in which institutional investors pool their assets. Units may be acquired in four different sub-funds focused on equities, fixed income, alternative investments, and emerging markets. Each sub-fund is invested in accordance with the fund's investment objective and units are issued in relation to each sub-fund. While the sub-funds are not publicly traded, the custodian strikes a net asset value either once or twice a month, depending on the sub-fund. There are no redemption restrictions or future commitments on these investments.
- (7) Includes funds, primarily in Germany, that invest in a diversified portfolio of European real estate assets exposed to logistics real estate properties, food retailing properties, residential and commercial properties, and properties under development. Primary valuation techniques for level 3 investments include the income capitalization approach and cost approach. Significant unobservable inputs include rental yield and IRR. The rental yield rates ranged from 4% to 7%, with the weighted average around 5%. In the prior year, the rental yield rates ranged from 4% to 6%, with the weighted average around 4%. The IRR ranged from 0% to 4%, with the main weighted average around 1%. In the prior year, the IRR ranged from 5% to 8%, with the main weighted average around 7%. Generally, an increase in rental yield rates may result in a decrease in the fair value of certain investments. A higher IRR generally signifies a greater fair value as it implies a greater potential rate of return over the life of an investment.
- (8) Includes life insurance investment policies, unsettled transactions, and derivative instruments. As of October 31, 2024, the derivative instruments include synthetic equity swaps held by the UK plans with equity exposure of \$396 million.

Schedule of changes in fair value measurements of Level 3 investments for Direct non-U.S. defined benefit plans

		For the fiscal year ended October 31, 2024

12 Months Ended

Oct. 31, 2024

Stock-based compensation expense and the resulting tax benefits were as follows:

	For the fiscal years ended October 31,					
	2024		2023	2022		
	In millions					
Stock-based compensation expense	\$	430	\$	428	\$	391
Income tax benefit		(96)		(92)		(75)
Stock-based compensation expense, net of tax	\$	334	\$	336	\$	316

Stock-based compensation expense as presented in the table above is recorded within the following cost and expense lines in the Consolidated Statements of Earnings.

	For the fiscal years ended October 31,			
	2024	2023	2022	
	In millions			
Cost of sales	\$ 49	\$ 47	\$ 46	
Research and development	158	161	143	
Selling, general and administrative	223	220	202	
Stock-based compensation expense	\$ 430	\$ 428	\$ 391	

The following table summarizes restricted stock unit activity for the year ended October 31, 2024:

	Shares	Weighted-Average Grant	
	In thousands	Date	Fair Value Per Share
Outstanding at beginning of year	54,389	\$	15
Granted and replacement awards for acquisitions	29,930		16
Vested	(25,245)		15
Forfeited/canceled	(3,461)		16
Outstanding at end of year	<u>55,613</u>	\$	<u>16</u>

12 Months Ended

Oct. 31, 2024

The domestic and foreign components of Net earnings (loss) from operations before taxes were as follows:

	For the fiscal years ended October 31,			
	2024	2023		2022
	In millions			
U.S.	\$ 765	\$ (1,105)	\$ (1,138)	
Non-U.S.	2,188	3,335	2,014	
	<u>\$ 2,953</u>	<u>\$ 2,230</u>	<u>\$ 876</u>	

The Provision for taxes on Net earnings from operations were as follows:

	For the fiscal years ended October 31,			
	2024	2023	2022	
	In millions			
U.S. federal taxes:				
Current	\$ 8	\$ —	\$ 12	
Deferred	(120)	(88)	(98)	
Non-U.S. taxes:				
Current	415	256	288	
Deferred	44	23	(143)	
State taxes:				
Current	15	16	(43)	
Deferred	12	(2)	(8)	
	\$ 374	\$ 205	\$ 8	

The differences between the U.S. federal statutory income tax rate and the Company's effective tax rate were as follows:

	For the fiscal years ended October 31,			
	2024	2023	2022	
U.S. federal statutory income tax rate	21.0 %	21.0 %	21.0 %	
State income taxes, net of federal tax benefit	0.4 %	0.9 %	2.8 %	
Lower rates in other jurisdictions, net	(1.3)%	(4.4)%	(0.9)%	
Valuation allowance	(1.3)%	(2.8)%	(31.5)%	
U.S. permanent differences	(4.0)%	(1.5)%	6.0 %	
U.S. R&D credit	(1.8)%	(2.1)%	(5.1)%	
Uncertain tax positions	(0.3)%	(2.0)%	(15.6)%	
Goodwill impairment	— %	— %	21.5 %	
Other, net	— %	0.1 %	2.7 %	
	12.7 %	9.2 %	0.9 %	

A reconciliation of unrecognized tax benefits is as follows:

	As of October 31,			
	2024	2023	2022	
	In millions			
Balance at beginning of year	\$ 672	\$ 674	\$ 2,131	
Increases:				
For current year's tax positions	60	67	81	
For prior years' tax positions	116	20	41	
Decreases:				
For prior years' tax positions	(113)	(2)	(48)	
Statute of limitations expiration	(4)	(4)	(12)	
Settlements with taxing authorities	(7)	(83)	(1,491)	
Settlements related to joint and several positions indemnified by HP Inc.	—	—	(28)	
Balance at end of year	\$ 724	\$ 672	\$ 674	

The significant components of deferred tax assets and deferred tax liabilities were as follows:

	As of October 31,	
	2024	2023
	In millions	
Deferred tax assets:		
Loss and credit carryforwards ⁽¹⁾	\$ 5,692	\$ 5,936
Inventory valuation	78	90
Intercompany prepayments	192	325
Warranty	45	49
Employee and retiree benefits	162	184
Restructuring	27	52
Deferred revenue	799	658
Intangible assets	251	107
Capitalized R&D	81	44
Lease liabilities	253	209
Other	262	196
Total deferred tax assets	7,842	7,850
Valuation allowance ⁽¹⁾	(5,204)	(5,428)
Total deferred tax assets net of valuation allowance	2,638	2,422
Deferred tax liabilities:		
Unremitted earnings of foreign subsidiaries	(229)	(190)
ROU assets	(236)	(192)
Fixed assets	(150)	(102)
Total deferred tax liabilities	(615)	(484)
Net deferred tax assets and liabilities	\$ 2,023	\$ 1,938

(1)Fiscal 2023 amounts have been reclassified to conform to the current period presentation.

Deferred tax assets and liabilities included in the Consolidated Balance Sheets are as follows:

	As of October 31,	
	2024	2023
	In millions	
Deferred tax assets	\$ 2,396	\$ 2,264
Deferred tax liabilities	(373)	(326)
Deferred tax assets net of deferred tax liabilities	\$ 2,023	\$ 1,938

, the Company had recorded deferred tax assets for various tax credit carryforwards as follows:

	Carryforward	Valuation Allowance	Initial Year of Expiration
	In millions		
U.S. foreign tax credits	\$ 648	\$ (648)	2027
U.S. research and development and other credits	230	—	2029
Tax credits in state and foreign jurisdictions	197	(177)	2028
Balance at end of year	\$ 1,075	\$ (825)	

Total valuation allowances decreased by \$224 million in fiscal 2024, primarily as a result of the utilization of certain non-U.S. loss carryforwards which had full valuation allowances, the impact on fully valued U.S. foreign tax credits as a result of the change in uncertain tax benefits, the recording of valuation allowances on certain non-U.S. tax credits, and the release of certain foreign valuation allowances.

ROU assets	1,408	980
Other	1,674	1,792
Total	\$ 12,616	\$ 11,377

Supplier Financing Arrangements

The Company enters into supplier financing arrangements with external financial institutions. Under these arrangements, suppliers can choose to settle outstanding payment obligations at a discount. The Company holds no economic interest in suppliers' participation, nor does it provide guarantees or pledge assets under these arrangements. Invoices are settled with the financial institutions based on the original supplier payment terms. These arrangements do not alter the Company's rights and obligations towards suppliers, including scheduled payment terms. Liabilities associated with the funded participation in these arrangements, are presented within Accounts Payable on the Consolidated Balance Sheets, amounted to \$466 million, and \$295 million as of October 31, 2024 and October 31, 2023, respectively.

Other Accrued
Liabilities

Other Accrued Liabilities

	As of October 31,	
	2024	2023
	In millions	
Sales and marketing programs	\$ 1,032	\$ 1,070
Value-added and property taxes	922	786

Accounting for Leases as a Lessor (Tables)

12 Months Ended Oct. 31, 2024

Leases [Abstract]

Components of Financing Receivables

The components of financing receivables were as follows:

	As of October 31,	
	2024	2023
	In millions	
Minimum lease payments receivable	\$ 10,266	\$ 9,363
Unguaranteed residual value	599	438
Unearned income	(1,218)	(987)
Financing receivables, gross	9,647	8,814
Allowance for credit losses	(194)	(243)
Financing receivables, net	9,453	8,571
Less: current portion	(3,870)	(3,543)
Amounts due after one year, net	\$ 5,583	\$ 5,028

Scheduled Maturities of Minimum Lease Payments Receivable

As of October 31, 2024, scheduled maturities of the Company's minimum lease payments receivable were as follows:

Fiscal year	As of October 31, 2024	
	In millions	
2025	\$	4,282
2026		2,977
2027		1,747
2028		892
2029		277
Thereafter		91
Total undiscounted cash flows	\$	10,266
Present value of lease payments (recognized as finance receivables)	\$	9,048
Difference between undiscounted cash flows and discounted cash flows	\$	1,218

Credit Risk Profile of Gross Financing Receivables

The credit risk profile of gross financing receivables, based on internal risk ratings as of October 31, 2024, presented on amortized cost basis by year of origination was as follows:

Fiscal Year	As of October 31, 2024		
	Low	Risk Rating Moderate In millions	High
2024	\$ 2,630	\$ 1,120	\$ 19
2023	1,804	948	54
2022	1,128	665	46
2021	440	317	52
2020 and prior	158	193	73
Total	\$ 6,160	\$ 3,243	\$ 244

The credit risk profile of gross financing receivables, based on internal risk ratings as of October 31, 2023, presented on amortized cost basis by year of origination was as follows:

Fiscal Year	As of October 31, 2023		
	Low	Risk Rating Moderate In millions	High
2023	\$ 2,100	\$ 1,196	\$ 31
2022	1,681	1,052	51
2021	868	645	57
2020	336	285	35
2019 and prior	155	223	99
Total	\$ 5,140	\$ 3,401	\$ 273

Schedule of Allowance for Doubtful Accounts for Financing Receivables

The allowance for credit losses for financing receivables as of October 31, 2024, 2023, and 2022, and the respective changes for the twelve months then ended were as follows:

	As of October 31,		
	2024	2023	2022
	In millions		
Balance at beginning of period	\$ 243	\$ 325	\$ 228
Provision for credit losses ⁽¹⁾	50	58	177
Adjustment to the existing allowance	(4)	—	(10)
Write-offs	(95)	(140)	(70)
Balance at end of period	\$ 194	\$ 243	\$ 325

(1) Fiscal 2022 included a provision of \$99 million related to expected credit losses due to the Company's exit from its Russia and Belarus businesses.

The following table summarizes the aging and non-accrual status of gross financing receivables:

	As of October 31,	
	2024	2023
	In millions	
Billed: ⁽¹⁾		
Current 1-30 days	\$ 334	\$ 320
Past due 31-60 days	29	30
Past due 61-90 days	12	13
Past due > 90 days	79	100
Unbilled sales-type and direct-financing lease receivables	9,193	8,351
Total gross financing receivables	\$ 9,647	\$ 8,814
Gross financing receivables on non-accrual status ⁽²⁾	\$ 214	\$ 227
Gross financing receivables 90 days past due and still accruing interest ⁽²⁾	\$ 82	\$ 81

(1) Includes billed operating lease receivables and billed sales-type and direct-financing lease receivables.

(2) Includes billed operating lease receivables and billed and unbilled sales-type and direct-financing lease receivables.

Operating Lease Assets Included in Machinery and Equipment

Operating lease assets included in Property, plant and equipment, net in the Consolidated Balance Sheets were as follows:

	As of October 31,	
	2024	2023
	In millions	
Equipment leased to customers	\$ 6,669	\$ 7,019
Accumulated depreciation	(3,037)	(2,919)
Total	\$ 3,632	\$ 4,100

Lessor Operating Lease Payments Maturity

As of October 31, 2024, minimum future rentals on non-cancelable operating leases related to leased equipment were as follows:

Fiscal year	As of October 31, 2024	
	In millions	
2025	\$	1,696
2026		962
2027		339
2028		36
2029		3
Thereafter		1
Total	\$	3,037

Lessor Lease Activity

The following table presents amounts included in the Consolidated Statements of Earnings related to lessor activity:

	Location	For the fiscal years ended October 31,		
		2024	2023	2022
		In millions		
Interest income from sales-type leases and direct financing leases	Financing income	\$ 668	\$ 547	\$ 483
Lease income from operating leases	Services	2,344	2,407	2,296
Total lease income		\$ 3,012	\$ 2,954	\$ 2,779

Schedule of Variable Interest Entities

The assets in the table below include those that can be used to settle the obligations of the VIE. Additionally, general creditors do not have recourse to the assets of the VIE.

	As of October 31,	
	2024	2023
	In millions	
Assets held by VIE:		
Other current assets	\$ 189	\$ 145
Financing receivables		
Short-term	\$ 872	\$ 764
Long-term	\$ 1,079	\$ 983
Property, plant and equipment, net	\$ 1,033	\$ 1,214
Liabilities held by VIE:		
Notes payable and short-term borrowings, net of unamortized debt issuance costs	\$ 1,433	\$ 1,392
Long-term debt, net of unamortized debt issuance costs	\$ 965	\$ 1,082

[XML 66 R49.htm IDEA: XBRL DOCUMENT](#)

**Net Earnings (Loss)
Per Share (Tables)**

[Earnings Per Share \[Abstract\]](#)
[Basic and diluted net Earnings Per
Share calculations](#)

**12 Months Ended
Oct. 31, 2024**

The reconciliations of the numerators and denominators of each of the basic and diluted net EPS calculations were as follows:

	For the fiscal years ended October 31,		
	2024	2023	2022
	In millions, except per share amounts		
Numerator:			
Net earnings attributable to common stockholders - Basic	\$ 2,554	\$ 2,025	\$ 868
Plus: 7.625% Series C mandatory convertible preferred stock dividends	25	—	—
Net earnings - Diluted	\$ 2,579	\$ 2,025	\$ 868
Denominator:			
Weighted-average shares used to compute basic net EPS	1,309	1,299	1,303
Dilutive effect of employee stock plans ⁽¹⁾	18	17	19
Dilutive effect of 7.625% Series C mandatory convertible preferred stock ⁽¹⁾	10	—	—
Weighted-average shares used to compute diluted net EPS	1,337	1,316	1,322
Net earnings per share attributable to common stockholders:			
Basic	\$ 1.95	\$ 1.56	\$ 0.67
Diluted	\$ 1.93	\$ 1.54	\$ 0.66
Anti-dilutive weighted-average stock awards ⁽²⁾	—	—	2

- (1) The impact of dilutive effect of employee stock plans is calculated under the treasury stock method, and the impact of dilutive effect of the 7.625% Series C Mandatory Convertible Preferred Stock is calculated under the if converted method.
- (2) The Company excludes shares potentially issuable under employee stock plans that could dilute basic net EPS in the future from the calculation of diluted net earnings per share, as their effect, if included, would have been anti-dilutive for the periods presented.

- [1] Repurchase agreements, primarily in the UK, represent the plans’ short-term borrowing to hedge against interest rate and inflation risks. Investments in approximately \$2.0 billion and \$2.3 billion of government bonds collateralize this short-term borrowing at October 31, 2024 and 2023, respectively. The plans have an obligation to return the cash after the term of the agreements. Due to the short-term nature of the agreements, the outstanding balance of the obligation approximates fair value.
- [2] Includes funds that invest primarily in asset-backed securities, mortgage-backed securities, collateralized loan obligations, and/or private debt investments. Primary valuation techniques for level 3 investments include discounted cash flows and net quoted and/or party pricing services. Significant unobservable inputs include yields which are determined by considering the market yield of comparable public debt instruments adjusted for estimated losses to reflect where the expected recovery rate would be less than 100%, discount rates, and internal rate of return (IRR). The yields ranged from 6% to 21%, with the weighted average around 10%. In the prior year, the yields ranged from 6% to 22%, with the weighted average around 10%. The discount rates ranged from 3% to 5%, with the weighted average around 4%. In the prior year, the discount rates ranged from 4% to 5%, with the weighted average around 4%. The IRR ranged from 1% to 38%, with the main weighted average around 9%. In the prior year, the IRR ranged from 5% to 21%, with the main weighted average around 10%. Generally, an increase in yield and discounted rates may result in a decrease in the fair value of certain investments.
- [3] Includes funds, primarily in the UK, held in non-marketable, limited partnership interests which invest in a broad range of infrastructure and infrastructure-related assets. Primary valuation techniques for level 3 investments include the market, income or cost approach. Significant unobservable inputs include discount rate and EV/EBITDA multiples. Discount rates ranged from 8% to 13%, with the weighted average around 10%. The EV/EBITDA multiples ranged from 6.5x to 37.9x, with the weighted average ranging from 9.2x to 36.3x. Generally, an increase in discount rates may result in a decrease in the fair value of certain investments. The EV/EBITDA ratio generally indicates the number of times investors are willing to pay for a company’s EBITDA valuation.
- [3] Includes funds, primarily in the UK, that invest in both private and public equities, as well as emerging markets across all sectors. The funds also hold fixed income and derivative instruments to hedge interest rate and inflation risk. In addition, the funds include units in transferable securities, collective investment schemes, money market funds, asset-backed income, cash, and deposits. Primary valuation techniques for level 3 investments include discounted cash flows and book value or net asset value. Significant unobservable inputs include discount rates. The discount rates ranged from 3% to 38%, with the weighted average around 17%. In the prior year, the discount rates ranged from 3% to 28%, with the weighted average around 14%. Generally, an increase in discount rates may result in a decrease in the fair value of certain investments.
- [4] Includes a pooled fund in the UK, that seeks a rate of return with direct or indirect linkage to UK inflation by investing in vehicles including bonds, long lease property, income strips, asset-backed securities, and index linked assets. Units are available for subscription on the first business day of each calendar month at net asset value. There are no redemption restrictions or future commitments on these investments.
- [5] Common Contractual Funds are investment arrangements in which institutional investors pool their assets. Units may be acquired in four different sub-funds focused on equities, fixed income, alternative investments, and emerging markets. Each sub-fund is invested in accordance with the fund’s investment objective and units are issued in relation to each sub-fund. While the sub-funds are not publicly traded, the custodian strikes a net asset value either once or twice a month, depending on the sub-fund. There are no redemption restrictions or future commitments on these investments.
- [6] Includes funds, primarily in Germany, that invest in a diversified portfolio of European real estate assets exposed to logistics real estate properties, food retailing properties, residential and commercial properties, and properties under development. Primary valuation techniques for level 3 investments include the income capitalization approach and cost approach. Significant unobservable inputs include rental yield and IRR. The rental yield rates ranged from 4% to 7%, with the weighted average around 5%. In the prior year, the rental yield rates ranged from 4% to 6%, with the weighted average around 4%. The IRR ranged from 0% to 4%, with the main weighted average around 1%. In the prior year, the IRR ranged from 5% to 8%, with the main weighted average around 7%. Generally, an increase in rental yield rates may result in a decrease in the fair value of certain investments. A higher IRR generally signifies a greater fair value as it implies a greater potential rate of return over the life of an investment.
- [7] Includes life insurance investment policies, unsettled transactions, and derivative instruments. As of October 31, 2024, the derivative instruments include synthetic equity swaps held by the UK plans with equity exposure of \$396 million.

- [1]

Includes funds that invest primarily in asset-backed securities, mortgage-backed securities, collateralized loan obligations, and/or private debt investments. Primary valuation techniques for level 3 investments include discounted cash flows and broker quotes and/or third-party pricing services. Significant unobservable inputs include yields which are determined by considering the market yield of comparable public debt instruments adjusted for estimated losses to reflect where the expected recovery rate would be less than 100%, discount rates, and internal rate of return (IRR). The yields ranged from 6% to 21%, with the weighted average around 10%. In the prior year, the yields ranged from 6% to 22%, with the weighted average around 10%. The discount rates ranged from 3% to 5%, with the weighted average around 4%. In the prior year, the discount rates ranged from 4% to 5%, with the weighted average around 4%. The IRR ranged from 1% to 38%, with the main weighted average around 9%. In the prior year, the IRR ranged from 5% to 21%, with the main weighted average around 10%. Generally, an increase in yield and discounted rates may result in a decrease in the fair value of certain investments.
- [3]

Includes funds, primarily in the UK, held in non-marketable, limited partnership interests which invest in a broad range of infrastructure and infrastructure-related assets. Primary valuation techniques for level 3 investments include the market, income or cost approach. Significant unobservable inputs include discount rate and EV/EBITDA multiples. Discount rates ranged from 8% to 13%, with the weighted average around 10%. The EV/EBITDA multiples ranged from 6.5x to 37.9x, with the weighted average ranging from 9.2x to 36.3x. Generally, an increase in discount rates may result in a decrease in the fair value of certain investments. The EV/EBITDA ratio generally indicates the number of times investors are willing to pay for a company's EBITDA valuation.
- [2]

Includes funds, primarily in the UK, that invest in both private and public equities, as well as emerging markets across all sectors. The funds also hold fixed income and derivative instruments to hedge interest rate and inflation risk. In addition, the funds include units in transferable securities, collective investment schemes, money market funds, asset-backed income, cash, and deposits. Primary valuation techniques for level 3 investments include discounted cash flows and book value or net asset value. Significant unobservable inputs include discount rates. The discount rates ranged from 3% to 38%, with the weighted average around 17%. In the prior year, the discount rates ranged from 3% to 28%, with the weighted average around 14%. Generally, an increase in discount rates may result in a decrease in the fair value of certain investments.
- [3]

Includes funds, primarily in Germany, that invest in a diversified portfolio of European real estate assets exposed to logistics real estate properties, food retailing properties, residential and commercial properties, and properties under development. Primary valuation techniques for level 3 investments include the income capitalization approach and cost approach. Significant unobservable inputs include rental yield and IRR. The rental yield rates ranged from 4% to 7%, with the weighted average around 5%. In the prior year, the rental yield rates ranged from 4% to 6%, with the weighted average around 4%. The IRR ranged from 0% to 4%, with the main weighted average around 1%. In the prior year, the IRR ranged from 5% to 8%, with the main weighted average around 7%. Generally, an increase in rental yield rates may result in a decrease in the fair value of certain investments. A higher IRR generally signifies a greater fair value as it implies a greater potential rate of return over the life of an investment.
- [4]

Includes life insurance investment policies, unsettled transactions, and derivative instruments. As of October 31, 2024, the derivative instruments include synthetic equity swaps held by the UK plans with equity exposure of \$396 million.
