Disclaimer

This presentation speaks at the date hereof and the Company is under no obligation to update or keep current the information contained in this presentation. Any information expressed herein is subject to change without notice. Any market or other third-party data included in this presentation has been obtained by the Company from third-party sources. While the Company has compiled and extracted the market data, it can provide no assurances of the accuracy and completeness of such information and takes no responsibility for such data.

This presentation contains forward-looking statements. All statements other than statements of historical fact contained in this presentation may be forward-looking statements and include, but are not limited to, statements regarding the Company's intent, belief or current expectations. These forward-looking statements are subject to risks and uncertainties, and may include, among others, financial forecasts and estimates based on assumptions or statements regarding plans, objectives and expectations. Although the Company believes that these estimates and forward-looking statements are based upon reasonable assumptions, they are subject to several risks and uncertainties and are made in light of information currently available, and actual results may differ materially from those expressed or implied in the forward-looking statements due to various factors, including those risks and uncertainties included under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the prospectus dated December 8, 2021 filed with the Securities and Exchange Commission pursuant to Rule 424(b) under the Securities Act of 1933, as amended, and in our Annual Report on Form 20-F for the year ended December 31, 2023, which was filed with the Securities and Exchange Commission on April 19, 2024. The Company, its advisers and each of their respective directors, officers and employees disclaim any obligation to update the Company's view of such risks and uncertainties or to publicly announce the result of any revision to the forward-looking statements made herein, except where it would be required to do so under applicable law. The forward-looking statements can be identified, in certain cases, through the use of words such as "believe," "may," "might," "can," "could," "is designed to," "will," "aim," "estimate," "continue," "anticipate," "intend," "expect," "forecast," "plan," "predict," "potential," "aspiration," "should," "purpose," "belief," and similar, or variations of, or the negative of such words and expressions.

The financial information in this document includes forecasts, projections and other predictive statements that represent the Company's assumptions and expectations in light of currently available information. These forecasts, projections and other predictive statements are based on the Company's expectations and are subject to variables and uncertainties. The Company's actual performance results may differ. Consequently, no guarantee is presented or implied as to the accuracy of specific forecasts, projections or predictive statements contained herein, and undue reliance should not be placed on the forward-looking statements in this presentation, which are inherently uncertain.

In addition to IFRS financials, this presentation includes certain summarized, non-audited or non-IFRS financial information. These summarized, non-audited or non-IFRS financial measures are in addition to, and not a substitute for or superior to, measures of financial performance prepared in accordance with IFRS. References in this presentation to "R\$" refer to the Brazilian Real, the official currency of Brazil.

Continued Growth of One of the World's Largest Digital Banking Platforms

2024 Main Highlights

■ Customers (MM)

114.2MM Customers

+20.4M YoY from 93.9MM

58% of Adult Population of Brazil

94.9MM Active Customers

+22% YoY from 78.0MM

83% Monthly Activity Rate

US\$28.9BN Total Deposits

+55% YoY FXN from US\$23.7BN

US\$11.2BN Interest Earning Portfolio

+75% YoY FXN from US\$8.2BN

Meta 1: Adult population market share is calculated as the Nu's Brazilian adult customers divided by the adult population of the country. Adult Population of the country forecast by IBGE. Meta 2: Adult population is defined as 18+ years for Brazil. Meta 3: Activity Rate is defined as monthly active customers divided by the total number of customers as of a specific date. Meta 4: Amounts are presented in US dollars and growth rates on an FX Neutral basis. For additional details on calculations please refer to the appendix Non-IFRS Financial measures and reconciliations. Source: IBGE, Nu.

Non-IFRS Financial Measures and Reconciliations

This presentation includes financial measures defined as “non-IFRS financial measures” by the SEC, including: Adjusted Net Income and certain FX Neutral measures and provides reconciliations to the most directly comparable IFRS financial measure. A non-IFRS financial measure is generally defined as a numerical measure of historical or future financial performance or financial position that purports to measure financial performance but excludes or includes amounts that would not be so adjusted in the most comparable IFRS measure. These non-IFRS financial measures are in addition to, and not a substitute for or superior to, measures of financial performance prepared in accordance with IFRS.

Adjusted Net Income is defined as profit (loss) attributable to shareholders of the parent company for the period, adjusted for the expenses and allocated tax effects on share-based compensation.

Adjusted Net Income is presented because management believes that this non-IFRS financial measure can provide useful information to investors, securities analysts and the public in their review of the operating and financial performance of the Company, although it is not calculated in accordance with IFRS or any other generally accepted accounting principles and should not be considered as a measure of performance in isolation. Nu also uses Adjusted Net Income as a key profitability measure to assess the performance of the business. Nu believes Adjusted Net Income is useful to evaluate operating and financial performance for the following reasons:

- Adjusted Net Income is widely used by investors and securities analysts to measure a company’s operating performance without regard to items that can vary substantially from company to company and from period to period, depending on their accounting and tax methods, the book value and the market value of their assets and liabilities, and the method by which their assets were acquired; and
- Non-cash equity grants made to executives, employees or consultants at a certain price and point in time, and their hedge accounting effects for the corporate tax and social wages and their income tax effects, do not necessarily reflect how the business is performing at any particular time and the related expenses (and their subject impacts in the market value of assets and liabilities) are not key measures of core operating performance.

Adjusted Net Income is not a substitute for Net Income, which is the IFRS measure of earnings. Additionally, the calculation of Adjusted Net Income (Loss) may be different from the calculation used by other companies, including competitors in the technology and financial services industries, because other companies may not calculate these measures in the same manner as we do, and therefore, measure may not be comparable to those of other companies.

Non-IFRS Financial Measures and Reconciliations

FX Neutral measures are prepared and presented to eliminate the effect of foreign exchange, or "FX," volatility between the comparison periods, allowing management and investors to evaluate financial performance despite variations in foreign currency exchange rates, which may not be indicative of core operating results and business outlook.

FX Neutral measures are presented because management believes that these non-IFRS financial measures can provide useful information to investors, securities analysts and the public in their review of operating and financial performance, although they are not calculated in accordance with IFRS or any other generally accepted accounting principles and should not be considered as a measure of performance in isolation.

The FX Neutral measures were calculated to present what such measures in preceding periods would have been had exchange rates remained stable from these preceding periods until the date of the Company's most recent financial information.

The FX Neutral measures for the three months ended December 31, 2023 were calculated by multiplying the as reported amounts of Adjusted Net Income and the key business metrics for such period by the average Brazilian reais / U.S. dollars exchange rate for the three months ended December 31, 2023 (R\$4.9383 to US\$1.00) and using such results to re-translate the corresponding amounts back to U.S. dollars by dividing them by the average Brazilian reais/U.S. dollars exchange rate for the three months ended December 31, 2024 (R\$5.9773 to US\$1.00), so as to present what certain of statement of profit and loss amounts and key business metrics would have been had exchange rates remained stable from this past period until the three months ended December 31, 2024.

The average Brazilian reais/U.S. dollars exchange rates were calculated as the average of the month-end rates for each month in the three months ended December 31, 2024 and 2023 as reported by Bloomberg.

FX Neutral measures for deposits and interest-earning portfolio were calculated by multiplying the as reported amounts as of each date, by the spot Brazilian reais/U.S. dollars exchange rates as of each date and using such results to re-translate the corresponding amounts back to U.S. dollars by dividing them by using the spot rate as of December 31, 2024 (R\$6.1736 to US\$1.00) so as to present what these amounts would have been had exchange rates been the same on December 31, 2023. The Brazilian reais/U.S. dollars exchange rates were calculated using rates as of such dates as reported by Bloomberg.
