

Third Quarter 2025 Results Presentation

October 30, 2025

ALAMOS GOLD INC.

TSX:AGI | NYSE:AGI

Cautionary notes

This presentation, the information contained herein, any other materials provided in connection with this presentation and any oral remarks accompanying this presentation (collectively, the "Presentation"), has been prepared by Alamos Gold Inc. ("Alamos" or the "Company") solely for information purposes. No stock exchange, securities commission or other regulatory authority has approved or disapproved the contained information. This Presentation does not constitute an offering of securities and the information contained herein is subject to the information contained in the Company's continuous disclosure documents available on the SEDAR+ website at www.sedarplus.ca or on EDGAR at www.sec.gov.

Cautionary Notes

This Presentation contains statements that constitute forward-looking information as defined under applicable Canadian and U.S. securities laws. All statements in this Presentation other than statements of historical fact, which address events, results, outcomes or development that Alamos expects to occur are, or may be deemed to be "forward-looking statements" and are based on expectations, estimates and projections as at the date of this Presentation. Forward-looking statements are generally, but not always, identified by the use of forward-looking terminology such as "expect", "anticipate", "intend", "assume", "schedule", "estimate", "budget", "continue", "potential", "outlook", "plan", "on track", "ongoing", "forecast", "target", "believe" or variations of such words and phrases and similar expressions or statements that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved or the negative connotation of such terms. Forward-looking statements include (without limitation) information, expectations and guidance related to Alamos' net asset value, operating cash flow, free cash flow, mine-site free cash flow, total cash costs, all-in sustaining costs, mine-site all-in sustaining costs, capital expenditures, total sustaining and growth capital, capitalized exploration, forecast gold production, gold price, mineral reserve and resource estimates, exploration potential, mine and reserve life, mineral reserves and resources, gold grades, recoveries, waste-to-ore ratios, mining and milling rates, the Lynn Lake Project, the Phase 3+ Expansion at Island Gold, the PDA Project, Island Gold District Expansion Study, mine plans, the 115kV powerline project, future anniversary payments in respect of the Company's sale of its Turkish development projects, the quantum of consideration payable for sale of Quartz Mountain to Q-Gold, including future guaranteed milestone payments; returns to stakeholders and other general information and statements as to strategy, plans, expectations, estimates and objectives based on forecasts of or related to future performance or operational, financial or geological results. Alamos cautions that forward-looking statements are necessarily based upon several factors and assumptions that, while considered reasonable by Alamos at the time of making such statements, are inherently subject to significant business, economic, technical, legal, political and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements, and undue reliance should not be placed on such statements and information. Such risk factors include, but are not limited to: changes to current estimates of mineral reserves and mineral resources; the speculative nature of mineral exploration and development; risks in obtaining and maintaining necessary licenses, permits and authorizations for the Company's development stage and operating assets; delays in respect of: the Phase 3+ Expansion at Island Gold, the 115kV powerline project; construction of the Lynn Lake project; construction of the PDA project; the development or updating of mine plans, production from the PDA project and/or Lynn Lake project; operations may be exposed to new or ongoing effects from any illnesses, diseases, epidemics and pandemics, resulting regulatory responses, and any resulting impact on the broader market and the trading price of the Company's shares; provincial and federal orders or mandates (including with respect to mining operations generally or auxiliary businesses or services required for the Company's operations) in Canada, Mexico and the United States, any of which may affect many aspects of the Company's operations including the ability to transport personnel to and from site, contractor and supply availability and the ability to sell or deliver gold dore bars; fluctuations in the price of gold or certain other commodities such as diesel fuel, natural gas, and electricity; changes in foreign exchange rates; the impact of inflation, any tariffs, trade barriers, or regulatory costs; employee and community relations; litigation and administrative proceedings; changes to production estimates (which assume accuracy of projected ore grade, mining rates, recovery timing and recovery rate estimates which may be impacted by unscheduled maintenance, weather issues, labour and contractor availability and other operating or technical difficulties); disruptions affecting operations; inherent risks and hazards associated with mining and mineral processing; environmental hazards, industrial hazards, industrial accidents, unusual or unexpected formations, pressures and cave-ins; risks associated with the start-up of new mines; the risk that the Company's mines may not perform as planned; increased costs associated with mining inputs and labour; contests over title to properties; changes in national and local government legislation, controls or regulations in Canada, Mexico, the United States and other jurisdictions in which the Company does or may carry on business in the future; risks related to climate change; risk of loss due to sabotage, protests and other civil disturbances; the costs and timing of construction and development of new deposits; the impact of global liquidity and credit availability and the values of assets and liabilities based on projected future cash flows; risks arising from holding derivative instruments; and business opportunities that may be pursued by the Company. With respect to the sale of the Company's Turkish development projects, risk factors include default on either or both of the second installment of third installment payments. With respect to the sale of Quartz Mountain, risk factors include the failure by Q-Gold to make the requisite future payments and actions required to trigger milestone payments not being implemented or coming to fruition. Additional risk factors that may affect the Company's ability to achieve the expectations set forth in the forward-looking statements contained in this Presentation are set out in the Company's latest 40F/Annual Information Form and Management's Discussion and Analysis, each under the heading "Risk Factors" available on the SEDAR+ website at www.sedarplus.ca or on EDGAR at www.sec.gov, and should be reviewed in conjunction with the information, risk factors and assumptions found in this Presentation. The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable law. Market data and other statistical information used throughout this Presentation are based on internal company research, independent industry publications, government publications, reports by market research firms or their published independent sources. Industry publications, governmental publications, market research surveys and forecasts generally state that the information contained therein has been obtained from sources believed to be reliable, however such content providers do not guarantee the accuracy, adequacy, completeness, timeliness or availability of such content and generally disclaim liability for any errors, omissions or losses of any kind suffered in connection with the use of such content. Although Alamos believes such information is accurate and reliable, it has not independently verified any of the data from third party sources cited or used for the Company's management's industry estimates, nor has Alamos ascertained the underlying economic assumptions relied upon therein. While Alamos believes internal company estimates are reliable, such estimates have not been verified by any independent sources, and Alamos makes no representations as to the accuracy of such estimates.

Note to U.S. Investors

All resource and reserve estimates included in this Presentation have been prepared in accordance with Canadian National Instrument 43-101 -Standards of Disclosure for Mineral Projects ("NI 43-101") and the Canadian Institute of Mining, Metallurgy and Petroleum ("the "CIM") -CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended (the "CIM Standards"). NI 43-101 is a rule developed by the Canadian Securities Administrators, which established standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. U.S. investors should review in detail the cautionary note set out on slide 25.

Cautionary non-GAAP Measures and Additional GAAP Measures

Note that for purposes of this section, GAAP refers to IFRS. The Company believes that investors use certain non-GAAP and additional GAAP measures as indicators to assess gold mining companies. They are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared with GAAP. "Cash flow from operating activities before changes in non-cash working capital" is a non-GAAP performance measure that could provide an indication of the Company's ability to generate cash flows from operations and is calculated by adding back the change in non-cash working capital to "cash provided by (used in) operating activities" as presented on the Company's consolidated statements of cash flows. "Cash flow per share" is calculated by dividing "cash flow from operations before changes in working capital" by the weighted average number of shares outstanding for the period. "Free cash flow" is a non-GAAP performance measure that is calculated as cash flows from operations net of cash flows invested in mineral property, plant and equipment and exploration and evaluation assets as presented on the Company's consolidated statements of cash flows and that would provide an indication of the Company's ability to generate cash flows from its mineral projects. "Mine site free cash flow" is a non-GAAP measure which includes cash flow from operating activities at less capital expenditures at each mine site. "Return on equity" is defined as earnings from continuing operations divided by the average total equity for the current and previous year. "Mining cost per tonne of ore" and "cost per tonne of ore" are non-GAAP performance measures that could provide an indication of the mining and processing efficiency and effectiveness of the mine. These measures are calculated by dividing the relevant mining and processing costs and total costs by the tonnes of ore processed in the period. "Cost per tonne of ore" is usually affected by operating efficiencies and waste-to-total ratios in the period. "Total capital expenditures per ounce produced" is a non-GAAP term used to assess the level of capital intensity of a project and is calculated by taking the total growth and sustaining capital of a project divided by ounces produced life of mine. "Growth capital" are expenditures primarily incurred at development projects and costs related to major projects at existing operations, where the projects will materially benefit the mine site. "Sustaining capital" are expenditures that do not increase annual gold ounce production at a mine site and excludes all expenditures at the Company's development projects. "Total cash costs per ounce", "all-in sustaining costs per ounce", "mine-site all-in sustaining costs" and "all-in costs per ounce" as used in this analysis are non-GAAP terms typically used by gold mining companies to assess the level of gross margin available to the Company by subtracting these costs from the unit price realized during the period. These non-GAAP terms are also used to assess the ability of a mining company to generate cash flow from operations. There may be some variation in the method of computation of these metrics as determined by the Company compared with other mining companies. In this context, "total cash costs" reflects mining and processing costs allocated from in-process and dore inventory and associated royalties with ounces of gold sold in the period. Total cash costs per ounce are exclusive of exploration costs. "All-in sustaining costs per ounce" include total cash costs, exploration, corporate and administrative, share based compensation and sustaining capital costs. "Mine-site all-in sustaining costs" include total cash costs, exploration, and sustaining capital costs for the mine-site, but exclude an allocation of corporate and administrative and share based compensation. "Capitalized exploration" are expenditures that meet the IFRS definition for capitalization and are incurred to further expand the known Mineral Reserve and Resource at existing operations or development projects. "Adjusted net earnings" and "adjusted earnings per share" are non-GAAP financial measures with no standard meaning under IFRS. "Adjusted net earnings" excludes the following from net earnings: foreign exchange gain (loss), items included in other loss, certain non-recurring items and foreign exchange gain (loss) recorded in deferred tax expense. "Adjusted earnings per share" is calculated by dividing "adjusted net earnings" by the weighted average number of shares outstanding for the period.

Additional GAAP measures that are presented on the face of the Company's consolidated statements of comprehensive income and are not meant to be a substitute for other subtotals or totals presented in accordance with IFRS but rather should be evaluated in conjunction with such IFRS measures. This includes "Earnings from operations", which is intended to provide an indication of the Company's operating performance and represents the amount of earnings before net finance income/expense, foreign exchange gain/loss, other income/loss, and income tax expense. Non-GAAP and additional GAAP measures do not have a standardized meaning prescribed under IFRS and therefore may not be comparable to similar measures presented by other companies. A reconciliation of historical non-GAAP and additional GAAP measures are detailed in the Company's Management's Discussion and Analysis available at www.alamosgold.com.

Q3 2025 highlights

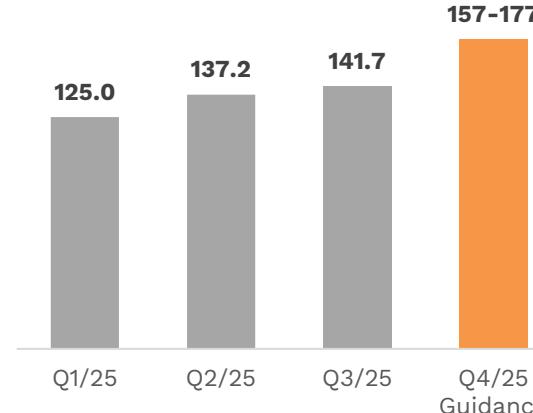

Growing production & expanding margins drive new financial records

ALAMOS GOLD INC.

Production up 3% QoQ; further 18% increase expected in Q4 to 157-177k oz

Production (k oz)

AISC¹ decreased 7% QoQ; further cost reduction of 5% expected in Q4

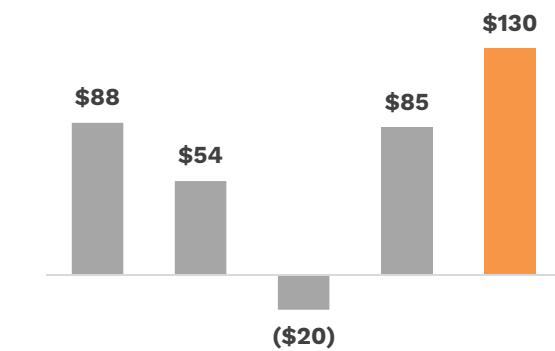

Record quarterly revenue & cash flow from operations

Record free cash flow¹ of \$130M while reinvesting in high-return growth

Adjusted net earnings, per share^{1,4}

Consolidated free cash flow (US\$M)^{1,4}

	Q3 2025A	Q3 2024A ⁴	YoY % Change	Q3 2025A YTD	Q3 2024A YTD ⁴	YoY % Change	2025 Guidance	Revised ⁶	Previous ⁶
Gold production (000 oz)	141.7	152.0	(7%)	403.9	426.8	(5%)	560-580	580-630	
Gold sales (000 oz)	136.5	145.2	(6%)	389.1	419.0	(7%)			-
Total cash costs, per ounce of gold sold^{1,6}	\$973	\$984	(1%)	\$1,065	\$909	17%	\$975-1,025		
All-in sustaining costs, per ounce of gold sold^{1,2,6}	\$1,375	\$1,359	1%	\$1,499	\$1,226	22%	\$1,400-1,450		
AISC margin (US\$/oz)^{1,2,3}	\$1,984	\$1,099	81%	\$1,645	\$1,068	54%			-
Cash flow from operations, before changes in working capital and cash taxes (US\$M)¹	\$275	\$193	43%	\$640	\$518	23%			-
Cash flow from operations (US\$M)	\$265	\$166	60%	\$544	\$469	16%			-
Capital expenditures (US\$M)⁷	\$135	\$107	26%	\$350	\$279	25%	\$539-599	\$599-669	
Consolidated free cash flow (US\$M)^{1,5}	\$130	\$88	49%	\$195	\$219	(11%)			-

1 Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

2 Total consolidated all-in sustaining costs include corporate and administrative and share based compensation expenses

3 AISC margin calculated as realized gold price less AISC

4 Argonaut Gold acquisition completed on July 12, 2024; the results before the closing date are for the Island Gold mine only

5 Free cash flow does not include lease payments, which are classified as cash flow from financing activities

6 Previous guidance was issued on January 13, 2025. Cost guidance was revised on July 30, 2025. Production and capital guidance were revised on October 29, 2025

7 Includes capitalized exploration and excludes sustaining lease payments

Full year production guidance revised lower Long-term outlook intact with significant growth starting Q4

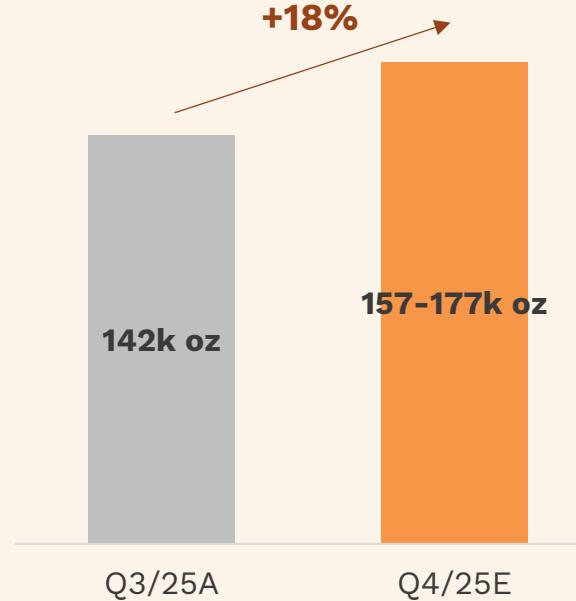

ALAMOS GOLD INC.

2025 guidance revised 6% lower to
560–580k oz

- Magino mill unplanned downtime last week of September
- Island Gold deferred access to higher-grade production due to seismic event mid-October
- Young-Davidson lower mining rates in Q3 YTD

Substantial improvement expected in Q4: ~18% increase in production & 5% decrease in costs QoQ

- ✓ Island Gold mill restarted **providing 1,200 tpd additional milling capacity**
- ✓ Magino milling rates improving, **approaching 10,000 tpd average in October**
- ✓ Young Davidson **higher mining rates & grades** (October averaging ~8,000 tpd at ~2.25 g/t Au)
- ✓ Mulatos District increased **production through recovery of higher-grades** stacked in Q2/Q3

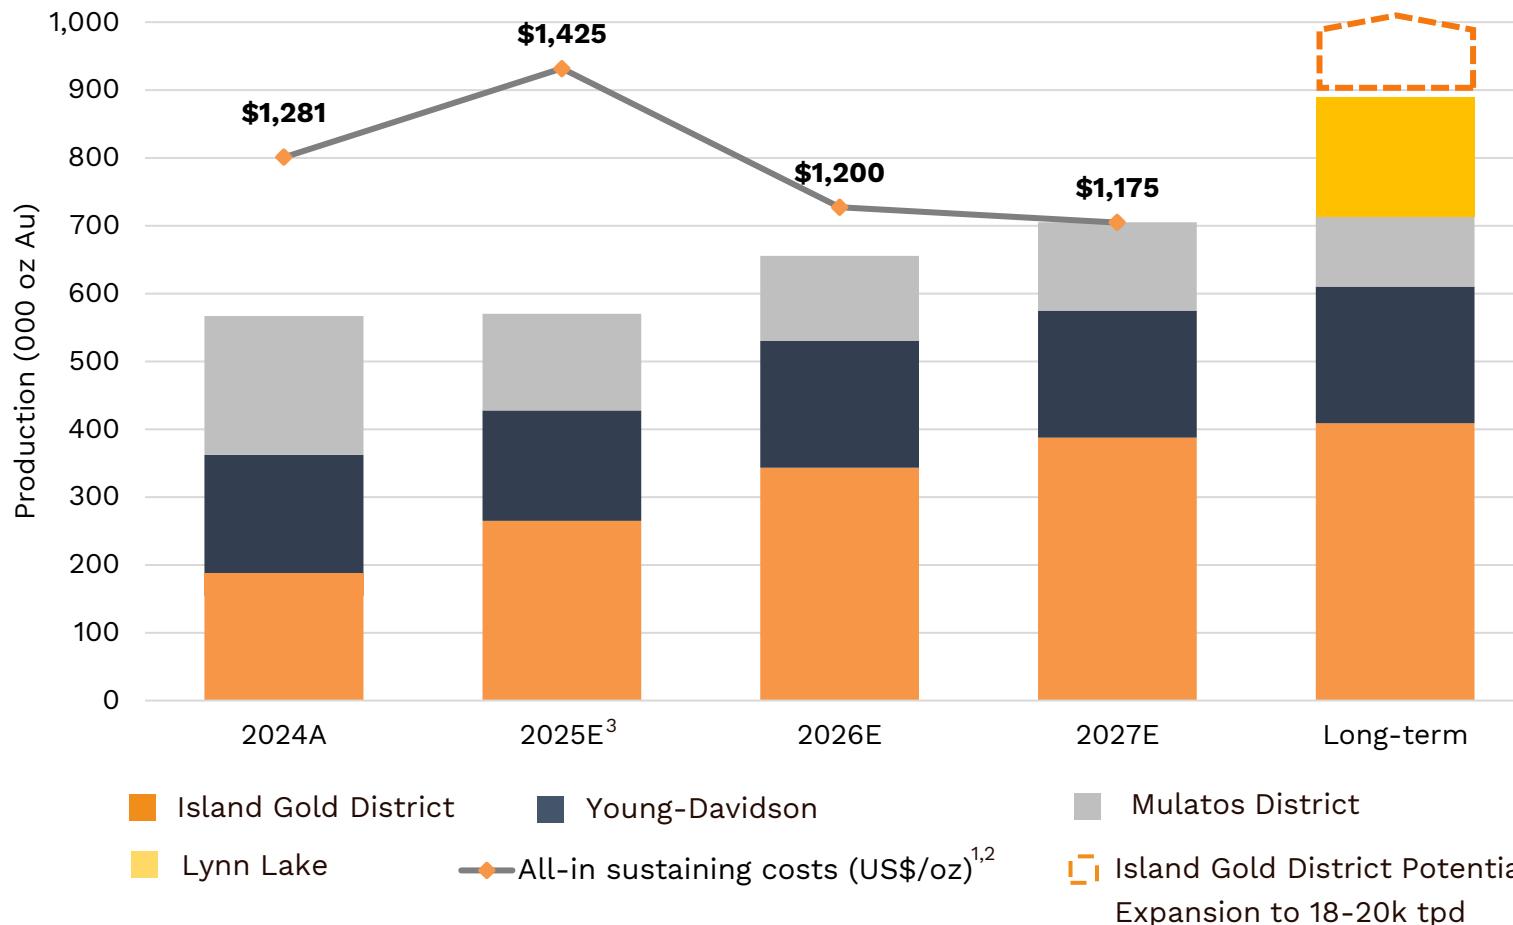

Strong outlook intact

Growing, long-life Canadian production; declining cost profile

ALAMOS GOLD INC.

~1M oz

longer-term potential production rate including Lynn Lake & further Expansion of Island Gold District, ~76% growth from 2024

8%

decrease in AISC expected by 2027 from 2024 driven by low-cost growth from Island Gold District

Long-life assets

18-year average mine life with significant exploration upside⁴

¹ Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

² Total consolidated all-in sustaining costs include corporate and administrative and share based compensation expenses. Based on mid-point of three-year guidance

³ Revised 2025 cost and production guidance. Please refer to the press release dated July 30, 2025 for details about costs guidance & press release dated October 29, 2025 for details about production guidance

⁴ Average mine life based on Mineral Reserves as of December 31, 2024 (Island Gold District updated in June 2025); See Mineral Reserve & Resource estimates and associated footnotes in appendix

Recent Highlights

- ✓ August - 2024 Annual ESG Report released
- ✓ September - **recognized as a top performer over the past 3-years by the Toronto Stock Exchange** with inclusion in the TSX30 for the second consecutive year
- ✓ October - **closed the sale of non-core Quartz Mountain Gold project** for total consideration of up to \$21M and a 9.99% equity interest in Q-Gold Resources
- ✓ October - **closed sale of Turkish Development Projects for cash consideration of \$470M**
 - \$160M paid on closing (October 27, 2025)¹
 - \$160M payable on one-year anniversary & \$150M payable on two-year anniversary

Operational highlights – Island Gold District

	Q3 2025A	Q3 2024A ⁴	Q3 2025A YTD	Q3 2024A YTD ⁴	2025 Guidance	
					Revised ⁷	Previous ⁷
Gold production (000 oz)	66.8	57.3	190.4	132.4	260-270	275-300
Total cash costs, per ounce of gold sold^{1,7}	\$964	\$988	\$1,002	\$758	\$875-925	
Mine-site all-in sustaining costs, per oz of gold sold^{1,7}	\$1,432	\$1,405	\$1,420	\$1,137	\$1,225-1,275	
Capital expenditures (US\$M) (sustaining + growth)^{1,2}	\$83	\$67	\$213	\$171	\$350-385	
Exploration spending (US\$M) (expensed & capitalized)^{1,3}	\$6	\$5	\$18	\$15	\$27	
Mine-site free cash flow (US\$M)^{1,5}	\$72	(\$9)	\$144	(\$8)	-	
Island Gold Mine						
Tonnes of ore processed (tpd) ⁶	1,087	896	1,154	1,031	-	
Average grade processed (g/t Au)	13.20	14.42	12.03	12.97	-	
Average recovery rate (%)	99%	99%	98%	98%	-	
Magino Mine						
Tonnes of ore processed (tpd) ⁸	8,443	6,881	8,099	6,881	-	
Average grade processed (g/t Au) ⁸	2.28	0.92	1.42	0.92	-	
Average recovery rate (%)	96%	95%	95%	95%	-	

- Production increased 4% QoQ; stronger production & lower costs expected in Q4** driven by higher combined milling rates from Island Gold & Magino mills
- Record quarterly mine-site free cash flow of \$72M** while funding the Phase 3+ Expansion & exploration
- Seismic event in mid-October deferred access to higher-grade stopes within one mining front**; mining rates to continue at guided levels, but grades mined expected to be lower than planned in Q4

1 Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

2 Excludes sustaining lease payments

3 Exploration spending in Q3/25 totaled \$6.1M, of which \$5.1M was capitalized; Q3/24 totaled \$5.1M, of which \$3.8M was capitalized; 2025 exploration spending guidance is \$27M, of which \$20M is expected to be capitalized

4 Argonaut Gold acquisition completed on July 12, 2024; the results before the closing date are for the Island Gold mine only

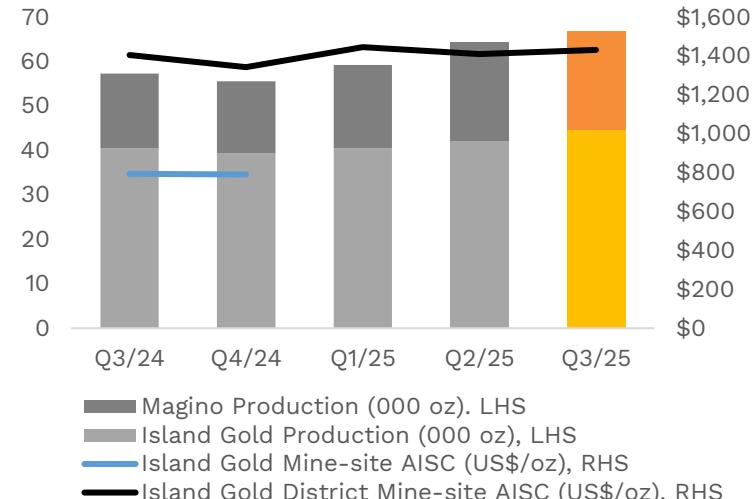

5 Mine-site free cash flow does not include lease payments, which are classified as cash flow from financing activities

6 The Island Gold mill operated for 22 days during the quarter. It was on care and maintenance from July 16 to September 23, 2025, during which time all Island Gold ore was processed at the Magino mill. Island Gold mill average tpd reflects only active operating days.

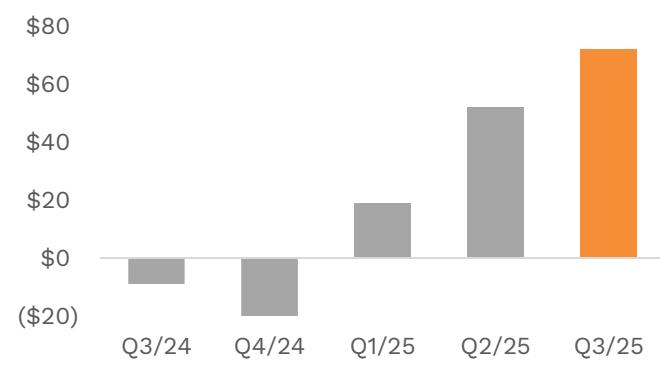

7 Previous guidance was issued on January 13, 2025. Cost guidance was revised on July 30, 2025. Production guidance was revised on October 29, 2025. Capital guidance for Island Gold District remains unchanged

8 Magino mill includes Island Gold tonnes from July 16 to Sep 23

Production & mine-site AISC¹

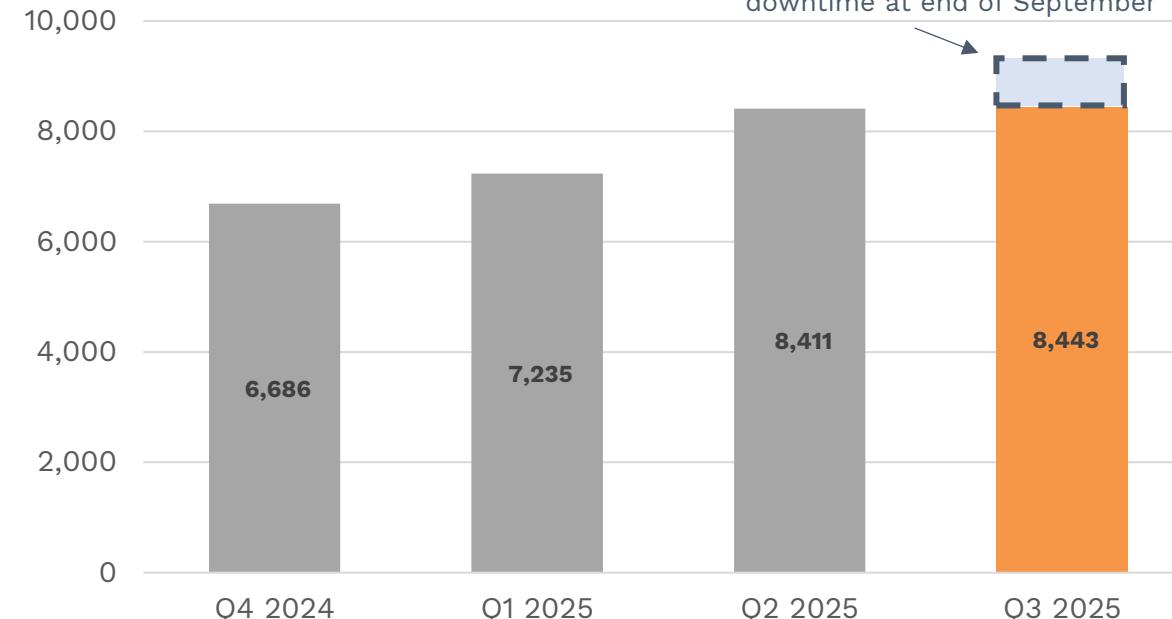

Mine-site free cash flow (US\$M)^{1,4,5}

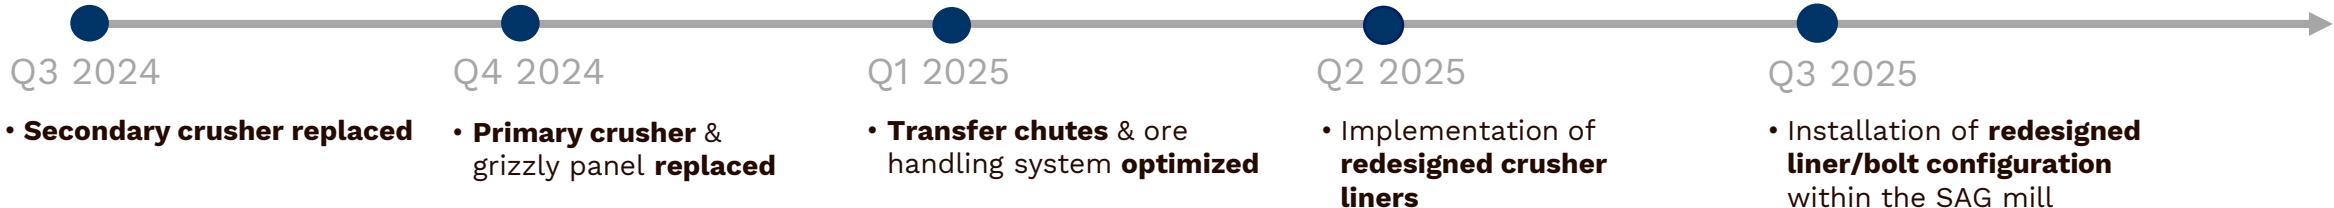

Magino milling rate

Magino Mill - Ore Milled (tpd)

- Magino milling rates impacted by one week of unplanned downtime late September
- Post SAG mill liner/bolt configuration change, milling rates increased to average ~9,200 tpd in Q3 prior to unplanned downtime
- Milling rates continue to improve, approaching 10,000 tpd average in October
- Higher milling rates expected to support increased production in Q4

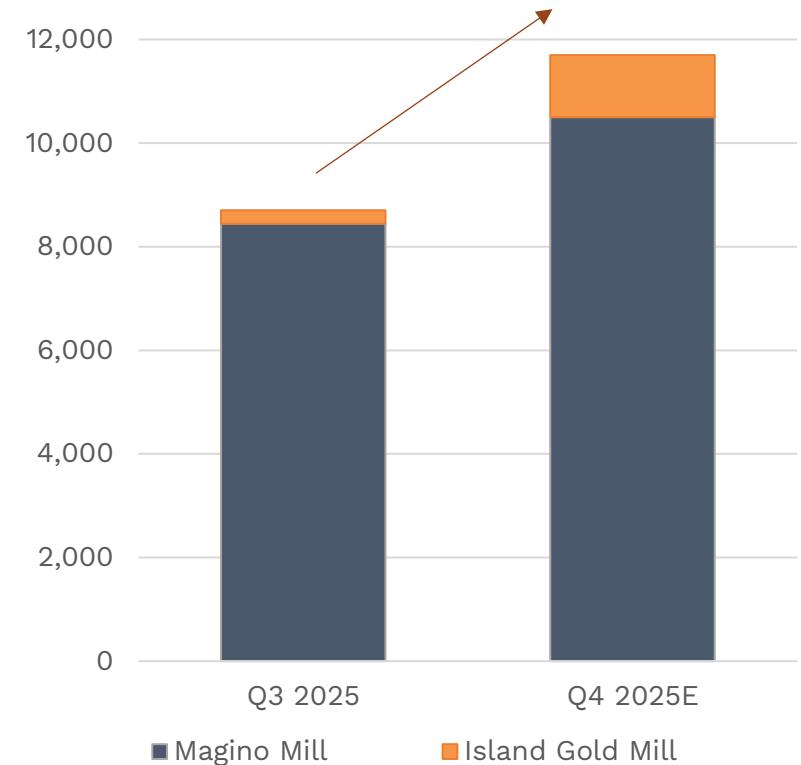

Restart of Island Gold Mill to support higher production & profitability

Island Gold mill restarted late September following downtime at Magino mill

- ✓ **Increased mill capacity of 1,200 tpd & operational flexibility**
 - ✓ Island Gold mill will focus on processing higher-grade underground ore & provide 1,200 tpd of additional mill capacity
- ✓ **Maximizing production & profitability** given significantly higher gold prices
 - ✓ **~3,000 oz of additional quarterly gold production**; ~12k oz annually
 - ✓ **~\$12M additional quarterly revenue**; ~\$48M annually¹
 - ✓ **Higher gold prices more than offsetting higher processing costs** within Island Gold mill
- ✓ Island Gold mill will operate through the remainder of the year with **ongoing operation in 2026 to be evaluated as part of Expansion Study to be completed in Q1/26**

Milling rate (tpd)

¹ Based on spot gold price of ~\$4,000/oz

Island Gold Phase 3+ Expansion – progress to date

ALAMOS GOLD INC.

Construction Progress in Q3

- ✓ **Shaft sinking** – advanced to a depth of 1,350 m (98% of planned depth); commenced work on 1350 level shaft station
- ✓ **Bin house & water handling facility** – progressed mechanical & electrical outfitting
- ✓ **Paste plant** – construction advanced, expected completion Q1/26

- ✓ **New administrative complex** – concrete foundation work ongoing
- ✓ **Advanced lateral development** – to support higher mining rates with the Phase 3+ Expansion
- ✓ **115kV power line project** – advancing, including tree clearing, installation of three bridges, and substation civil construction

Island Gold Phase 3+ Expansion – expected completion H2 2026

ALAMOS GOLD INC.

84% of total Phase 3+ growth capital spent & committed to date²

Shaft sink at 1,350 m; ~98% of ultimate planned depth

(in US\$M)

As of September 30, 2025

Growth Capital (including indirects & contingency)	P3+ Estimate as of June 2025¹	Spent to date^{1,2}	Committed to date¹	% Spent & Committed
Shaft & Shaft Surface Complex	324	247	39	88%
Mill Expansion	67	50	15	97%
Paste Plant	60	40	8	80%
Power Upgrade	38	42	4	121%
General Indirect Costs	91	70	3	80%
Total Growth Capital	\$580	\$449	\$69	89%
Underground Equipment, Infrastructure & Accelerated Development	255	187	—	73%
Total Growth Capital (including Accelerated Spend)	\$835	\$636	\$69	84%

¹ Reflects updated initial capital estimates released in June 2025 as part of the Base Case LOM Plan, based on USD/CAD exchange \$0.73:1 in 2025 and \$0.74:1 in 2026 and 2027. Spent to date based on average USD/CAD of \$0.73:1 since the start of 2022. Committed to date based on the spot USD/CAD rate as at September 30, 2025 of \$0.72:1

² Amount spent to date accounted for on an accrual basis, including working capital movements

1350L shaft station – October 2025

1350 shaft level development to access the underside of waste bin – October 2025

Magino mill expansion to 12,400 tpd

New building sized to accommodate potential further expansion

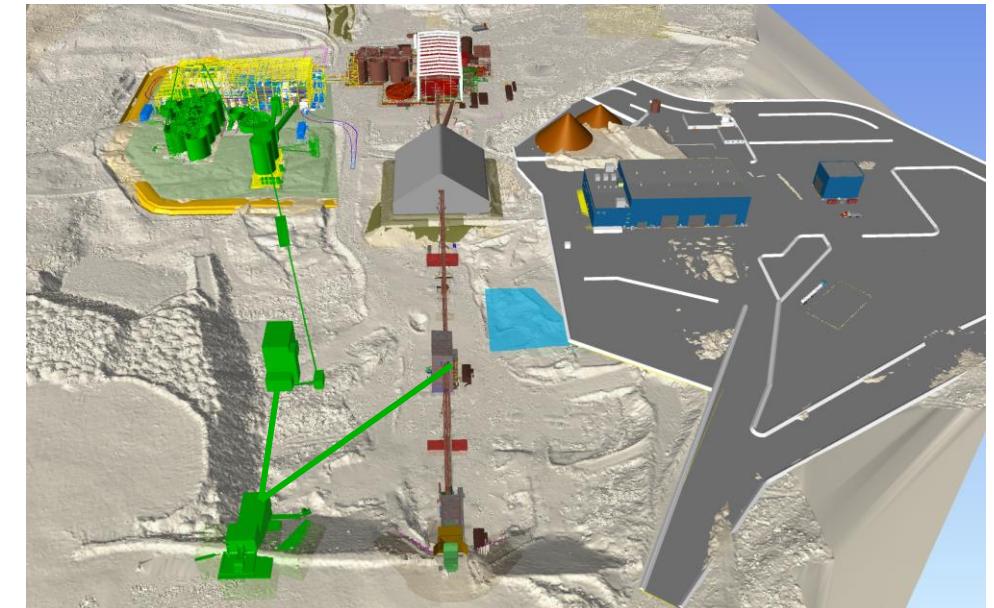

ALAMOS GOLD INC.

Expansion Plan expected to include parallel circuit to process blend of Island Gold & Magino ore

- Foundation work for **new mill building for 12,400 tpd expansion advancing**
- Footprint configured to allow for **further potential expansion up to 20,000 tpd**
- Detailed engineering for larger mill expansion ongoing
- **Expansion Study expected in Q1 2026**

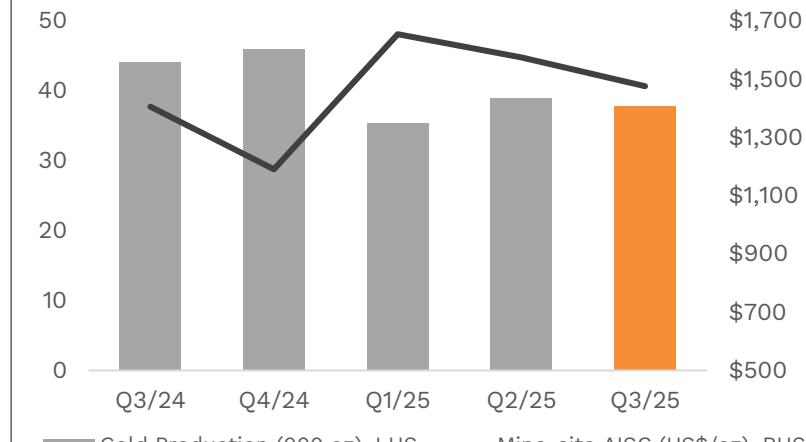

Operational highlights – Young-Davidson

Tonnes of ore processed (tpd)	7,836	7,261	7,178	7,516	-	
Average grade processed (g/t Au)	1.79	2.07	1.94	2.07	-	
Average recovery rate (%)	91%	92%	91%	91%	-	

- **Production similar QoQ with a 12% increase in milling rates offset by lower grades processed**
- **Mining rates impacted by a planned shutdown of the Northgate shaft** in July (as previously disclosed) for replacement of head ropes; mining rates increased to average ~8,000 tpd in September and October
- **Processed grades lower QoQ with low-grade stockpiles processed to maximize production & profitability** given excess mill capacity earlier in the quarter
- **Stronger Q4 expected driven by higher mining rates of ~8,000 tpd & grades at top end of guidance (~2.25 g/t Au)**
- **Record mine-site free cash flow¹ of \$62M in Q3 & \$160M YTD**; on track for > \$200M in 2025

Production & mine-site AISC¹

Mine-site free cash flow (US\$M)¹

¹ Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

² Exploration spending in Q3/25 was \$4.4M, of which \$4.2M was capitalized; Q3/24 was \$2.3M, of which \$1.5M was capitalized. 2025 exploration spending guidance is \$11M, of which \$9M is expected to be capitalized

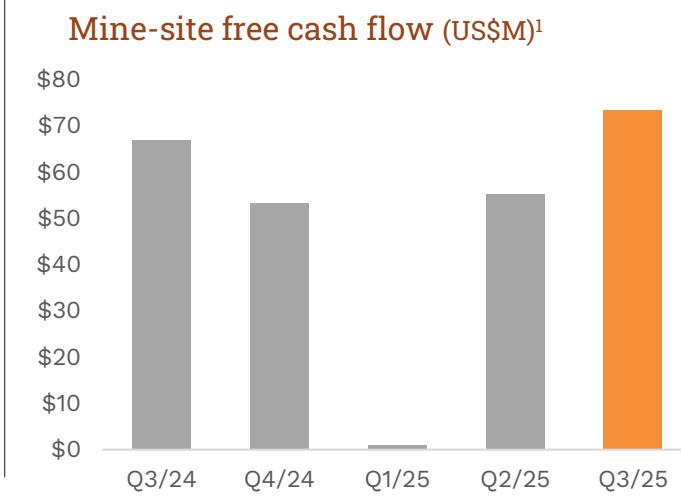

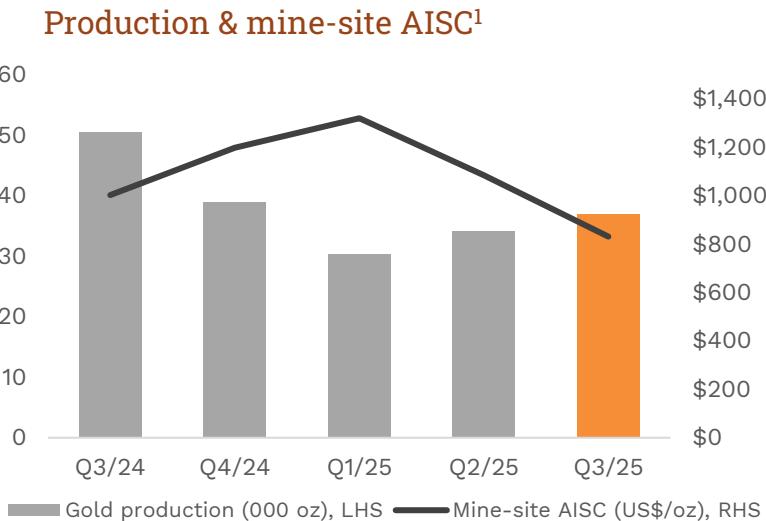

³ Previous guidance was issued on January 13, 2025. Cost guidance was revised on July 30, 2025. Production guidance was revised on October 29, 2025. Capital guidance for Young-Davidson remains unchanged

Operational highlights – Mulatos District

Mulatos District	Q3 2025A	Q3 2024A	Q3 2025A YTD	Q3 2024A YTD	2025 Guidance	
	Revised ³	Previous ³				
Gold production (000 oz) – Mulatos District	37.0	50.5	101.5	166.1	140-145	130-140
Total cash costs, per ounce of gold sold^{1,3}	\$761	\$937	\$971	\$892	\$925-975	
Mine-site all-in sustaining costs, per ounce of gold sold^{1,3}	\$831	\$1,002	\$1,045	\$954	\$1,025-1,075	
Capital expenditures (US\$M) (sustaining + growth)¹	\$4	\$2	\$9	\$9	\$20-25	\$40-45
Exploration spending (US\$M) (expensed & capitalized)^{1,2}	\$8	\$4	\$17	\$17	\$19	
Mine-site free cash flow (US\$M)¹	\$73	\$67	\$129	\$187	-	
La Yaqui Grande Mine						
Gold production (000 oz)	29.3	37.9	76.1	129.7	-	
Tonnes of ore stacked (tpd)	11,000	10,600	11,200	10,900	-	
Average grade processed (g/t Au)	1.48	1.36	1.25	1.38	-	
Average recovery rate (%)	61%	90%	62%	98%	-	

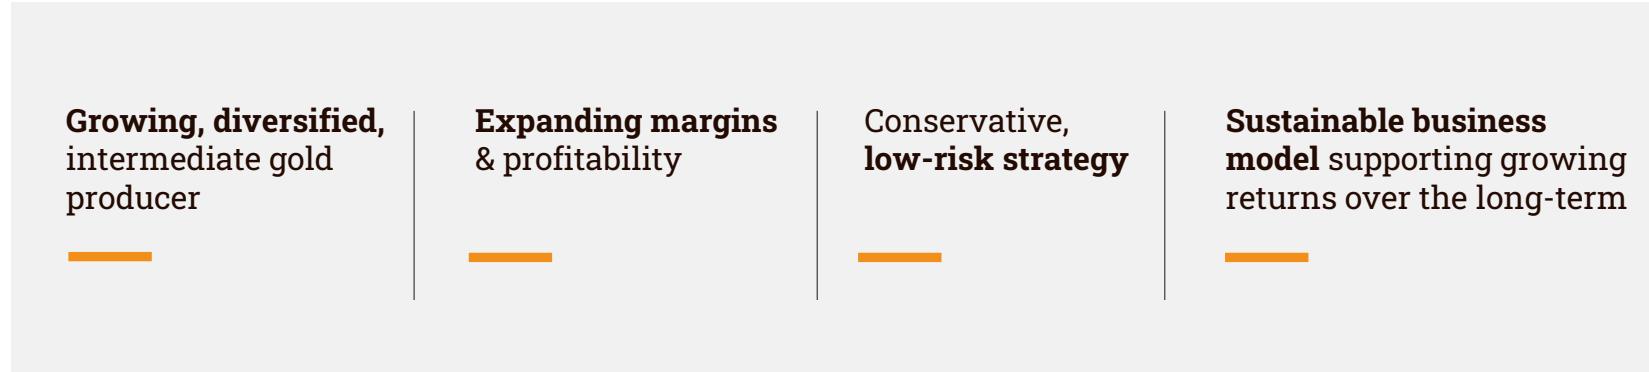

- Production up 9% QoQ** reflecting strong ongoing stacking rates & recovery of previously stacked higher-grade ore
- Costs lower QoQ** reflecting increased contribution of lower cost production from La Yaqui Grande
- Higher production & lower costs expected in Q4** with the operation benefitting from the recovery of higher grade ore stacked in Q2 & Q3
- Record mine-site free cash flow¹ of \$73M**; stronger mine-site free cash flow expected in Q4 reflecting higher production & lower costs

¹ Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures

² Exploration spending in Q3/25 was \$7.6M, all of which was capitalized; Q3/24 was \$4.4M, of which \$0.9M was capitalized. 2025 exploration spending guidance is \$19M, of which \$6M is expected to be capitalized

³ Previous guidance was issued on January 13, 2025. Production and capital guidance were revised on October 29, 2025. Cost guidance for Mulatos District remains unchanged

Notes to Mineral Reserve and Resource estimates

Qualified Persons

Chris Bostwick, FAusIMM, Alamos Gold's Senior Vice President, Technical Services, has reviewed and approved the scientific and technical information contained in this news release. Chris Bostwick is a Qualified Person within the meaning of Canadian Securities Administrator's National Instrument 43-101 ("NI 43-101"). The Qualified Persons for the National Instrument 43-101 compliant Mineral Reserve and Resource estimates are detailed in the following table.

Mineral Resources QP	Company	Project
Jeffrey Volk, CPG, FAusIMM	Director - Reserves and Resources, Alamos Gold Inc.	Young-Davidson, Lynn Lake, Golden Arrow, Magino
Tyler Poulin, P.Geo	Chief Production Geologist - Island Gold	Island Gold
Marc Jutras, P.Eng	Principal, Ginto Consulting Inc.	Mulatos Pits, PDA, La Yaqui Grande, Cerro Peon, Carricito
Mineral Reserves QP	Company	Project
Chris Bostwick, FAusIMM	SVP Technical Services, Alamos Gold Inc.	Magino, Young-Davidson, Lynn Lake, PDA, Magino
Nathan Bourgeault, P.Eng	Manager, Technical Services Manager – Island Gold District	Island Gold
Herb Welhener, SME-QP	VP, Independent Mining Consultants Inc.	La Yaqui Grande

Notes to Mineral Reserve and Resource Tables:

- The Company's Mineral Reserves and Mineral Resources as at December 31, 2024 are classified in accordance with the Canadian Institute of Mining Metallurgy and Petroleum's "CIM Standards on Mineral Resources and Reserves, Definition and Guidelines" as per Canadian Securities Administrator's NI 43-101 requirements.
- The Island Gold District Mineral Reserves and Mineral Resources (Island Gold and Magino) are as at December 31, 2024, as updated in June 2025
- Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
- Mineral Resources are exclusive of Mineral Reserves.
- Mineral Reserve cut-off grade for the La Yaqui Pit is determined as a net of process value of \$0.10 per tonne for each model block.
- All Measured, Indicated and Inferred open pit Mineral Resources are pit constrained.
- With the exceptions noted following, Mineral Reserve estimates assumed a gold price of \$1,600 per ounce and Mineral Resource estimates assumed a gold price of \$1,800 per ounce.
- Metal prices, cut-off grades and metallurgical recoveries are set out in the table below.

	Mineral Resources		Mineral Reserves		
	Gold Price	Cut-off	Gold Price	Cut-off	Met Recovery
Island Gold	\$1,800	3.36	\$1,600	3.78	96.5%
Magino	\$1,800	0.28	\$1,600	0.30	96.5%
Young-Davidson - Surface	\$1,400	0.5	n/a	n/a	n/a
Young-Davidson - Underground	\$1,800	1.39	\$1,600	1.53	92%
Golden Arrow	\$1,600	0.64	n/a	n/a	91%
Mulatos:					
Mulatos Main Open Pit	\$1,800	0.5	n/a	n/a	n/a
PDA Underground	\$1,800	2.5	\$1,600	3.0	85%
La Yaqui Grande	\$1,800	0.3	\$1,600	see notes	75%
Cerro Pelon	\$1,800	2.5	n/a	n/a	n/a
Carricito	\$1,400	0.3	n/a	n/a	n/a
Lynn Lake - MacLellan	\$1,800	0.32	\$1,600	0.36	91-92%
Lynn Lake - Gordon	\$1,800	0.44	\$1,600	0.50	92.4%
Lynn Lake - Burnt Timber	\$1,800	0.39	\$1,600	0.44	91-92%
Lynn Lake - Linkwood	\$1,800	0.2	\$1,600	0.44	91-92%

ALAMOS GOLD INC.

Cautionary Note to U.S. Investors

Alamos prepares its disclosure in accordance with the requirements of securities laws in effect in Canada. Unless otherwise indicated, all Mineral Resource and Mineral Reserve estimates included in this Presentation have been prepared in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101") and the Canadian Institute of Mining, Metallurgy and Petroleum (the "CIM") - CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended (the "CIM Standards"). NI 43-101 is a rule developed by the Canadian Securities Administrators, which established standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Mining disclosure in the United States was previously required to comply with SEC Industry Guide 7 ("SEC Industry Guide 7") under the United States Securities Exchange Act of 1934, as amended. The U.S. Securities and Exchange Commission (the "SEC") has adopted final rules, to replace SEC Industry Guide 7 with new mining disclosure rules under sub-part 1300 of Regulation S-K of the U.S. Securities Act ("Regulation S-K 1300") which became mandatory for U.S. reporting companies beginning with the first fiscal year commencing on or after January 1, 2021. Under Regulation S-K 1300, the SEC now recognizes estimates of "Measured Mineral Resources", "Indicated Mineral Resources" and "Inferred Mineral Resources". In addition, the SEC has amended its definitions of "Proven Mineral Reserves" and "Probable Mineral Reserves" to be substantially similar to international standards.

Investors are cautioned that while the above terms are "substantially similar" to CIM Definitions, there are differences in the definitions under Regulation S-K 1300 and the CIM Standards. Accordingly, there is no assurance any Mineral Reserves or Mineral Resources that the Company may report as "Proven Mineral Reserves", "Probable Mineral Reserves", "Measured mineral resources", "Indicated Mineral Resources" and "Inferred Mineral Resources" under NI 43-101 would be the same had the Company prepared the Mineral Reserve or Mineral Resource estimates under the standards adopted under Regulation S-K 1300. U.S. investors are also cautioned that while the SEC recognizes "Measured Mineral Resources", "Indicated Mineral Resources" and "Inferred Mineral Resources" under Regulation S-K 1300, investors should not assume that any part or all of the mineralization in these categories will ever be converted into a higher category of Mineral Resources or into Mineral Reserves. Mineralization described using these terms has a greater degree of uncertainty as to its existence and feasibility than mineralization that has been characterized as Reserves. Accordingly, investors are cautioned not to assume that any measured Mineral Resources, Indicated Mineral Resources, or Inferred Mineral Resources that the Company reports are or will be economically or legally mineable.
