# DEFINITIONS

**Annualized cash rent** - Monthly base rent and escalations per the lease, excluding concessions, deferrals, and abatements as of the last day of the quarter, multiplied by 12.

**ASP** - Alternative strategy portfolio.

**Capitalized Interest** - The total of i) interest cost for project specific debt on properties that are under development or redevelopment plus ii) an imputed interest cost for properties that are under development or redevelopment, which is calculated based on the Company's equity investment in those properties multiplied by the Company's consolidated weighted average borrowing rate. Capitalized Interest is a component of the carrying value of a development or redevelopment property.

**CMBS Investments** - Investments in commercial mortgage-backed securities.

**Consolidated securitization vehicle** - CMBS securitization trusts for which the terms of our investment and special servicing assignment give us the ability to direct the activities that could significantly impact the trust's economic performance

**Debt service coverage** - Operating Income adding back income taxes, loan loss reserves and the Company's share of joint venture depreciation and amortization, divided by total interest and principal payments.

**Earnings Before Interest, Taxes, Depreciation and Amortization for Real Estate (EBITDA<sub>RE</sub>)** - EBITDA<sub>RE</sub> is a non-GAAP financial measure. The Company computes EBITDA<sub>RE</sub> in accordance with standards established by NAREIT, which may not be comparable to EBITDA<sub>RE</sub> reported by other REITs that do not compute EBITDA<sub>RE</sub> in accordance with the NAREIT definition, or that interpret the NAREIT definition differently than the Company does. The White Paper on EBITDA<sub>RE</sub> approved by the Board of Governors of NAREIT in September 2017 defines EBITDA<sub>RE</sub> as net income (loss) (computed in accordance with Generally Accepted Accounting Principles, or GAAP), plus interest expense, plus income tax expense, plus depreciation and amortization, plus (minus) losses and gains on the disposition of depreciated property, plus impairment write-downs of depreciated property and investments in unconsolidated joint ventures, plus adjustments to reflect the entity's share of EBITDA<sub>RE</sub> of unconsolidated joint ventures.

**First generation TIs and LCs** - Tenant improvements (TIs), leasing commissions (LCs), and other leasing costs which are generally incurred during the first 4-5 years following acquisition of a property.

**Fixed charge** - Total payments for interest, loan principal amortization, ground rent and preferred stock dividends.

**Fixed charge coverage** - Operating Income adding back income taxes, loan loss reserves and the Company's share of joint venture depreciation and amortization, divided by Fixed Charge. The calculation of fixed charge coverage for purposes of our credit facility covenants is governed by the terms of the credit facility.

**Funds Available for Distribution (FAD)** - FAD is a non-GAAP financial measure that is calculated as FFO plus non-real estate depreciation, allowance for straight line credit loss, adjustment for straight line operating lease rent, non-cash deferred compensation, and pro-rata adjustments for these items from the Company's unconsolidated JVs, less straight line rental income, free rent net of amortization, second generation tenant improvement and leasing costs, and recurring capital expenditures.

**Funds from Operations (FFO)** - FFO is a widely recognized non-GAAP financial measure of REIT performance. The Company computes FFO in accordance with standards established by the National Association of Real Estate Investment Trusts, or NAREIT, which may not be comparable to FFO reported by other REITs that do not compute FFO in accordance with the NAREIT definition, or that interpret the NAREIT definition differently than the Company does. The revised White Paper on FFO approved by the Board of Governors of NAREIT in April 2002, and subsequently amended in December 2018, defines FFO as net income (loss) (computed in accordance with GAAP), excluding gains (or losses) from sales of properties, and real estate related impairment charges, plus real estate related depreciation and amortization and after adjustments for unconsolidated partnerships and joint ventures.

**Junior Mortgage Participations** - Subordinate interests in first mortgages.

**Mezzanine Debt** - Loans secured by ownership interests in real estate.

**Net Operating Income (NOI) and Cash NOI** - NOI is a non-GAAP financial measure that is calculated as operating income before transaction related costs, gains/losses on early extinguishment of debt, marketing general and administrative expenses and non-real estate revenue. Cash NOI is also a non-GAAP financial measure that is calculated by subtracting free rent (net of amortization), straight-line rent, and the amortization of acquired above and below-market leases from NOI, while adding operating lease straight-line adjustment and the allowance for straight-line tenant credit loss.

**Preferred Equity Investments** - Equity investments that are senior to common equity and are entitled to preferential returns.

**Recurring capital expenditures** - Building improvements and leasing costs required to maintain current revenues. Recurring capital expenditures do not include building improvements that are incurred to bring a property up to "operating standards."

**Redevelopment costs** - Non-recurring capital expenditures incurred to improve properties to the Company's operating standards.

**Right of Use Assets / Lease Liabilities** - Represents the right to control the use of leased property and the corresponding obligation, both measured at inception as the present value of the lease payments. The asset and related liability are classified as either operating or financing based on the length and cost of the lease and whether the lease contains a purchase option or a transfer of ownership. Operating leases are expensed through operating lease rent while financing leases are expensed through amortization and interest expense.

## Non-GAAP Disclosures and Reconciliations

### Unaudited

(Dollars in Thousands, except per share data)

### Funds Available for Distribution (FAD)

FAD is a non-GAAP financial measure that is calculated as FFO plus non-real estate depreciation, allowance for straight line credit loss, adjustment for straight line operating lease rent, non-cash deferred compensation, and pro-rata adjustments for these items from the Company's unconsolidated JVs, less straight line rental income, free rent net of amortization, second generation tenant improvement and leasing costs, and recurring capital expenditures.

FAD is not intended to represent cash flow for the period and is not indicative of cash flow provided by operating activities as determined in accordance with GAAP. FAD is presented solely as a supplemental disclosure with respect to liquidity. Because all companies do not calculate FAD the same way, the presentation of FAD may not be comparable to similarly titled measures of other companies. FAD does not represent cash flow from operating, investing and finance activities in accordance with GAAP and should not be considered as an alternative to net income (determined in accordance with GAAP), as an indication of the Company's financial performance, as an alternative to net cash flows from operating activities (determined in accordance with GAAP), or as a measure of the Company's liquidity.

### Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDAre)

EBITDAre is a non-GAAP financial measure. The Company computes EBITDAre in accordance with standards established by NAREIT, which may not be comparable to EBITDAre reported by other REITs that do not compute EBITDAre in accordance with the NAREIT definition, or that interpret the NAREIT definition differently than the Company does. The White Paper on EBITDAre approved by the Board of Governors of NAREIT in September 2017 defines EBITDAre as net income (loss) (computed in accordance with Generally Accepted Accounting Principles, or GAAP), plus interest expense, plus income tax expense, plus depreciation and amortization, plus (minus) losses and gains on the disposition of depreciated property, plus impairment write-downs of depreciated property and investments in unconsolidated joint ventures, plus adjustments to reflect the entity's share of EBITDAre of unconsolidated joint ventures.

The Company presents EBITDAre because the Company believes that EBITDAre, along with cash flow from operating activities, investing activities and financing activities, provides investors with an additional indicator of the Company's ability to incur and service debt. EBITDAre should not be considered as an alternative to net income (determined in accordance with GAAP), as an indication of the Company's financial performance, as an alternative to net cash flows from operating activities (determined in accordance with GAAP), or as a measure of the Company's liquidity.

### Net Operating Income (NOI) and Cash NOI

NOI is a non-GAAP financial measure that is calculated as operating income before transaction related costs, gains/losses on early extinguishment of debt, marketing general and administrative expenses and non-real estate revenue. Cash NOI is also a non-GAAP financial measure that is calculated by subtracting free rent (net of amortization), straight-line rent, and the amortization of acquired above and below-market leases from NOI, while adding operating lease straight-line adjustment and the allowance for straight-line tenant credit loss.

The Company presents NOI and Cash NOI because the Company believes that these measures, when taken together with the corresponding GAAP financial measures and reconciliations, provide investors with meaningful information regarding the operating performance of properties. When operating performance is compared across multiple periods, the investor is provided with information not immediately apparent from net income that is determined in accordance with GAAP. NOI and Cash NOI provide information on trends in the revenue generated and expenses incurred in operating the Company's properties, unaffected by the cost of leverage, straight-line adjustments, depreciation, amortization, and other net income components. The Company uses these metrics internally as performance measures. None of these measures is an alternative to net income (determined in accordance with GAAP) and same-store performance should not be considered an alternative to GAAP net income performance.

### Coverage Ratios

The Company presents fixed charge and debt service coverage ratios to provide a measure of the Company's financial flexibility to service current debt amortization, interest expense and operating lease rent from current cash net operating income. These coverage ratios represent a common measure of the Company's ability to service fixed cash payments; however, these ratios are not used as an alternative to cash flow from operating, financing and investing activities (determined in accordance with GAAP).
