The Company's flagship Silver Sand project has the potential to be developed into one of the world's largest silver mines. The Company is also advancing its robust, high-margin silver-lead-zinc Carangas project. Additionally a discovery drill program was completed at Silverstrike in 2022. For further information, please contact: Andrew Williams, CEO New Pacific Metals Corp. CAUTIONARY NOTE REGARDING RESULTS OF PRELIMINARY ECONOMIC ASSESSMENT The results of the Preliminary Economic Assessment prepared in accordance with NI 43-101 titled "Carangas Deposit - Preliminary Economic Assessment" with an effective date of September 5, 2024 and prepared by certain qualified persons associated with RPMGlobal (the "Carangas PEA") are preliminary in nature and are intended to provide an initial assessment of the Project's economic potential and development options. The Carangas PEA mine schedule and economic assessment includes numerous assumptions and is based on both indicated and Inferred Mineral Resources. Inferred resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves, and there is no certainty that the preliminary economic assessments described herein will be achieved or that the Carangas PEA results will be realized. The estimate of Mineral Resources may be materially affected by geology, environmental, permitting, legal, title, socio-political, marketing or other relevant issues. Mineral resources are not Mineral Reserves and do not have demonstrated economic viability. Additional exploration will be required to potentially upgrade the classification of the Inferred Mineral Resources to be considered in future advanced studies. RPMGlobal (mineral resource, infrastructure, tailings, water management, environmental and financial analysis) was contracted to conduct the Carangas PEA in cooperation with Moose Mountain Technical Services
