(Nasdaq: STKH), a leading innovator in alternative proteins and 3D printing technologies,today announced that it has received its third payment of USD 250,000 from the Singapore-Israel Industrial R&D Foundation (SIIRD).To date the Company has received a total of USD 740,000 from the USD 1,000,000 grant awarded to Steakholder Foods from SIIRD.Â The first installment was disbursedin March 2024 following the Companyâ€™s successful production of 3D-printed hybrid fish using its proprietary Printer HD144 and DropLocation in Space (DLS)â„¢ printing technologies, and the second milestone payment in November 2024 was triggered by the Companyâ€™s creation of plant-based 3D-printed fish and eel. The team is moving forward with new premix blends for the second phase of the projectâ€“ 3D printed eel, with the third payment corresponding to great advancements in the creation of eel texture and flavor. This involvesmeticulous model planning, material development, premix formulation, and the final printed product. These advancements underscore SteakholderFoodsâ™ dedication to pushing the boundaries of food technology and offering diverse, sustainable alternatives to traditional seafood.Â Arik Kaufman, CEO of SteakholderFoods, said: â€œWe are thrilled to receive this third non-dilutive grant installment from SIIRD, which reflects our significantprogress in our collaboration with Umami Bioworks and commitment to advancing food technology. We are excited to continue enhancing our3D printing capabilities and premix formulations to create additional high-quality, sustainable seafood alternatives.â€Â About Steakholder FoodsÂ Steakholder Foods is at the forefrontof transforming the alternative protein industries through its advanced technology. Founded in 2019, Steakholder Foods specializes indeveloping and selling 3D-printing production machines, supported by proprietary premix blends, formulated from the highest-quality rawingredients. These innovative tools are designed to help manufacturers of all sizes efficiently produce foods that meet and exceed consumerexpectations for taste, texture, and appearance and offer a safe and sustainable alternative to industrialized meat and seafood production.Â Steakholder Foodsâ™ expertisein creating alternative proteins products that replicate the complex textures of traditional meats such as beef steaks, white fish, shrimp, and eel. The company is also exploring the integration of cultivated cells, preparing for future advancements in food technology.Â For more information, pleasevisit:
