Commentary

Securities portfolio totaled \$461.4 million; 67% of the portfolio is classified as AFS, while 33% is classified as HTM.

The modified duration is 5.2 and the average life is 6.2 years. Duration has increased because we have purchased longer-duration bonds to protect the balance sheet from expected lower interest rates.

We expect to receive \$68.2 million from the securities portfolio in 2026, at current rates; these cashflows will support loan growth and/or deposit volatility.

If rates drop 100 bps, we expect to receive \$87.7 million.

77% of the portfolio is invested in agency mortgage-backed securities, boosting liquidity.

The \$759 thousand represents an annual expense and will be accrued monthly based on performance in the future periods.

Consulting and legal fees increased \$275 thousand from the prior quarter due to non-routine expenses associated with the universal shelf offering and share repurchase transaction.

Other operating expense increased \$137 thousand primarily due to forced-placed insurance related to borrowers. The Company expects to receive reimbursement in the coming quarters.
