The Company operates and reports its results in the following four reporting segments:

- Renewables; Renewables
- Residential; Residential
- Agtech; and Agtech
- Infrastructure; Infrastructure

The Company serves customers primarily in North America including renewable energy (solar) developers, institutional and commercial growers of fruits, vegetables, flowers and other plants, home improvement retailers, wholesalers, distributors, institutional and commercial growers of food and plants, and contractors. The Company's operational infrastructure provides the necessary scale to support local, regional, and national customers in each of its markets.

At September 30, 2023 March 31, 2024, the Company operated 31 thirty facilities, comprised of 23 twenty-three manufacturing facilities, one distribution center, and seven six offices, which are located in 16 sixteen states, Canada, China, and Japan. China. The Company's operational infrastructure provides the necessary scale to support local, regional, and national customers in each of the Company's markets.

Recent Trends

The uncertainty of the current macro-economic environment, including shifting inflation and higher interest rates, along with trade related disruptions that continue to impact the supply of solar modules used by the Company's customers, have impacted and may continue to adversely impact our performance and financial results. Although

Recent Trends

The effect on the Company's customers in the Renewables business due to the trade related disruption in the supply of solar modules is improving, our from the impacts of the Uyghur Forced Labor Prevention Act ("UFLPA") and the Department of Commerce's ("USDOC") anti-dumping and countervailing duties ("AD/CVD") investigation, both initiated in 2022, continues to diminish. These customers have continued to adapt to the ongoing disruption in this space and have identified alternative sources for modules not impacted by these regulatory items that require either traceability of components imported and/or potentially impose tariffs on the modules. However, some of these customers continue to pause on executing new renewable energy projects while they are being challenged awaiting final guidance from the Department of Treasury relative to obtain permits rules under the Inflation Reduction Act (IRA) in order to maximize tax incentives. Furthermore, a continued challenge to manage project specific permitting delays from relevant government entities to build new solar fields and has also affected the execution of new renewable energy projects. The Company does expect believes that these aforementioned dynamics will continue throughout 2024.

On April 24, 2024, a new petition was filed with the USDOC claiming potentially illegal trade practices with Cambodia, Malaysia, Thailand and Vietnam, the same four countries named in the remainder of 2023.

While the Company does not sell or import solar modules, the goods and services the Company provides for its customers depend upon the supply of solar modules for which such shortages have resulted in project delays over the past two years. 2022 AD/CVD case. The supply USDOC has been primarily impacted by two regulatory items: the Uyghur Forced Labor Prevention Act ("UFLPA") which was enacted in June 2022, and the circumvention of anti-dumping and countervailing duties ("AD/CVD") 20 days to determine whether to initiate an investigation launched by the U.S. Department of Commerce ("USDOC") in March 2022, against eight solar module manufacturers producing in four countries in Southeast Asia.

The UFLPA requires traceability of components of imported goods to validate components are not sourced from the Xinjiang province in China. This requirement has caused delays in module availability as module manufacturers must follow a stringent importation process with the U.S. Custom and Border Protection Agency. While a few of the larger module manufacturers are experiencing more consistent success with the importation process, other module suppliers need to make further progress with UFLPA and the importation process. The UFLPA continues to create a compliance burden and constrain supply of imported solar modules, but the Company expects continual improvement of supply as more module manufacturers move forward on the learning curve.

As a result of the USDOC's AD/CVD investigation, and until the final ruling from the USDOC was announced in August 2023, projects were delayed due to the risk of retroactive tariffs being imposed on the import of solar modules produced in four countries in Southeast Asia, where Chinese manufacturers have operations. In addition, of the eight major manufacturers under investigation, five were found to have been circumventing the AD/CVD orders. In parallel to the USDOC investigation, on June 6, 2022, an emergency Presidential Proclamation was issued delaying the imposition of duties on imports from the impacted countries until June 6, 2024. This proclamation provides non-U.S. based module manufacturers time to modify and secure supply chains to ensure compliance with U.S. law.

On August 16, 2022, the Inflation Reduction Act ("IRA") was signed into law. Among other things, the IRA provides for a variety of enhanced Investment Tax Credits ("ITC") and Production Tax Credits for renewable energy subject to specific dates and requirements. Although the Company believes the IRA should assist in driving growth in the renewable energy industry, it is important that the Department of Treasury finalize rules governing the execution of additional investment tax incentives so industry and the Company's customers can move forward with projects currently on hold. Overall, the Company believes the enhanced tax credits under the IRA will provide long-term certainty for the industry and support consistent and accelerating demand for our products. The Company will work with its customers to optimize the various ITCs as the final rules are defined and implemented. matter.

Interest expense increased year over year with \$3.2 million for the nine months ended September 30, 2023 compared to \$2.2 million for the nine months ended September 30, 2022. The increase in expense was due to higher interest rates which nearly tripled compared to the prior year, largely offset by higher average outstanding balances in the

prior year, \$50 million compared to \$73 million, for September 30, 2023 and 2022, respectively.

The Company recorded other income of \$1.9 million for the nine months ended September 30, 2023, compared to other expense of \$0.8 million recorded for the nine months ended September 30, 2022. The change year over year is the combined result of foreign currency translation fluctuations and changes in the fair market valuation allowance related to the liquidation of the processing business.

The Company recognized a provision for income taxes of \$33.3 million and \$26.7 million, with effective tax rates of 26.7% and 25.2% for the nine months ended September 30, 2023 and 2022, respectively. The effective tax rate for the nine months ended September 30, 2023, and 2022, respectively, was greater than the U.S. federal statutory rate of 21% due to state taxes and nondeductible permanent differences partially offset by favorable discrete items due to an excess tax benefit on stock-based compensation.

Sources of Liquidity

The Company's primary sources of liquidity are comprised of cash on hand and its available borrowing capacity provided under the Company's Credit Agreement (the "Credit Agreement"), entered into on December 8, 2022. The Credit Agreement replaced and paid off all amounts owed under the Sixth Amended and Restated Credit Agreement dated as of January 24, 2019. The Credit Agreement maintains similar capacity as the prior agreement in which it provides for a revolving credit facility and letters of credit in an aggregate amount equal to \$400 million and terminates on December 8, 2027. The Company can request additional financing to increase the revolving credit facility to \$700 million or enter into a term loan of up to \$300 million subject to conditions set forth in the Credit Agreement. The Company believes that these sources provide the Company with ample liquidity and capital resources to invest in operational excellence, growth initiatives and the development of the organization.

The Company has been able to weather the economic impacts of the broader market dynamics, including the inflationary cost environment, while continuing to make investments that support the Company's strategy. The Company continues to remain focused on managing its working capital, closely monitoring customer credit and collection activities, and working to extend payment terms with its vendors. The Company believes its liquidity, together with the cash expected to be generated from operations, will be sufficient to fund working capital needs and growth initiatives for the foreseeable future.

The Company can and does use the Credit Agreement to provide liquidity and capital resources primarily for the Company's U.S. operations when necessary. Generally, the Company's foreign operations have generated cash flow from operations sufficient to invest in working capital and fund their capital improvements. As of September 30, 2023 and December 31, 2022, the Company's foreign subsidiaries held \$22.3 million and \$15.2 million of cash, respectively.

Outstanding balances on the Company's revolving credit facility under the Company's Credit Agreement accrue interest at a rate, at the Company's option, equal to the applicable margin plus (a) a base rate, (b) a daily simple secured overnight financing rate ("SOFR"), (c) a term SOFR rate, or (d) for certain foreign currencies, a foreign currency rate. See Note 87 to the Company's consolidated financial statements in Part I, Item 1, Financial Statements, of this Quarterly Report on Form 10-Q for further information on the Credit Agreement.

Generally, the Company's foreign operations have generated cash flow from operations sufficient to invest in working capital and fund their capital improvements. As of March 31, 2024 and December 31, 2023, the Company's foreign subsidiaries held \$4.7 million and \$6.9 million of cash, respectively.

The Company believes that these sources, together with cash expected to be generated from operations, should provide the Company with ample liquidity and capital resources to meet its cash requirements and to continue to invest in operational excellence, growth initiatives and the development of the organization.

Uses of Cash / Cash Requirements

The Company's material short-term cash requirements primarily include accounts payable, certain employee and retiree benefit-related obligations, operating lease obligations, interest and repayments of borrowing on its revolving credit facility, capital expenditures, and other purchase obligations originating in the normal course of business for inventory purchase orders and contractual service agreements. The Company's principal capital requirements are to fund its operations' working capital and capital improvements, as well as provide capital for acquisitions and to strategically allocate capital through repurchases of Company stock under the Company's current authorized program ending May 2, 2025. The Company will continue to invest in growth opportunities as appropriate while focusing on working capital efficiency and profit

improvement opportunities to minimize the cash invested to operate its business. The Company intends to fund its cash requirements through cash generated from operations and, as necessary, from the availability on its revolving credit facility.

In May 2022, the Company's Board of Directors authorized a share repurchase program of up to \$200 million of the Company's issued and outstanding common stock. The program has a duration of three years, ending May 2, 2025. Repurchases may be made, from time to time, in amounts and at prices the Company deems appropriate, subject to market conditions, applicable legal requirements, debt covenants and other considerations. Any such repurchases may be executed using open market purchases, privately negotiated agreements or other transactions. The repurchase program may be suspended or discontinued at any time at the Company's discretion. As of September 30, 2023, the Company has repurchased 2,518,941 shares for an aggregate price of \$111.0 million under this repurchase program, including 521,575 shares repurchased for an aggregate price of \$25.2 million during the nine months ended September 30, 2023.

Over the long-term, the Company expects that future investments, including strategic business opportunities such as acquisitions, may be financed through a number of sources, including internally available cash, availability under the Credit Agreement, new debt financing, the issuance of equity securities, or any combination of the aforementioned. The \$10.4 million preliminary purchase price for the acquisition of a privately held Utah-based company was financed primarily through borrowing on our revolving credit facility. All potential acquisitions are evaluated based on the Company's acquisition strategy, which includes the enhancement of the Company's existing products, operations, and/or capabilities, as well as expanding the Company's access to new products, markets, and customers, with the goal of creating compounding and sustainable stockholder value.

These expectations are forward-looking statements based upon currently available information and may change if conditions in the credit and equity markets deteriorate or other circumstances change. To the extent that operating cash flows are lower than current levels, or sources of financing are not available or not available at acceptable terms, the Company's future liquidity may be adversely affected.

Except as disclosed above, there have been no material changes in the Company's cash requirements since December 31, 2022 December 31, 2023, the end of fiscal year 2022, 2023. See Part II, Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's Annual Report on Form 10-K for the year ended December 31, 2022 December 31, 2023.
