Â â€œWFOEâ€ refers to Qianhai Yingxi Textile & Garments Co., Ltd, a wholly foreign owned enterprise in China, which is indirectly wholly owned by Addentax Group Corp. Â Our garment manufacturing business consists of sales made principally to wholesaler located in the PRC. We have our own manufacturing facilities, with sufficient production capacity and skilled workers on production lines to ensure that we meet our high quality control standards and timely meet the delivery requirements for our customers. We conduct our garment manufacturing operations through five wholly owned subsidiaries, namely Dongguan Heng Sheng Wei Garments Co., Ltd (â€œHSWâ€), Dongguan Yushang Clothing Co., Ltd (â€œYSâ€), Shantou Yi Bai Yi Garment Co., Ltd (â€œYBYâ€), Zhuang Hao Jia (Dongguan) Decoration Engineering Co.,Ltd (â€œZHJâ€), and Dongguan Aotesi Garments Co., Ltd., (â€œAOTâ€), which are located in the Guangdong province, China. Â Our logistics business consists of delivery and courier services covering 44 cities in 10 provinces and 2 municipalities in China. Although we have our own motor vehicles and drivers, we currently outsource some of the business to our contractors. We believe outsourcing allows us to maximize our capacity and maintain flexibility while reducing capital expenditures and the costs of keeping drivers during slow seasons. We conduct our logistic operations through two wholly owned subsidiaries, namely Shenzhen Xin Kuai Jie Transportation Co., Ltd (â€œXKJâ€) and Shenzhen Yingxi Peng Fa Logistic Co., Ltd (â€œPFâ€), which are located in the Guangdong province, China. Â Our property management and subleasing business provides shops subleasing and property management services for garment wholesalers and retailers in the garment market. We currently have an aggregate of 56,238 square meters floor space Â Â and provide approximately 1,300 shop space to clients. In February 2023, the Company disposed of DY to an independent third party at fair value in February, 2023. We conduct our property management and subleasing operation through a wholly owned subsidiary acquired in September 2023, namely Dongguan Hongxiang Commercial Co., Ltd., a PRC company (â€œHXâ€), which is located in the Guangdong province, China. Â To focus on the core businesses of the Group, the Company dissolved one of its subsidiaries, Shenzhen Yingxi Tongda Logistic Co., Ltd, in April 2024 and received approval from RPC authorities. Â As at the date of this report, the Company is in the process of dissolving another subsidiary, ZHJ. Â 3 Â Â Business Objectives Â Garment Manufacturing Business Â We believe the strength of our garment manufacturing business is mainly due to our consistent emphasis on exceptional quality and timely delivery of our products. The primary business objective for our garment manufacturing segment is to expand our customer base and improve our profit. Â Logistics Services Business Â The business objective and future plan for our logistics services segment is to establish an efficient logistic system and to build a nationwide delivery and courier network in China. As of June 30, 2024, we provide logistics services to over 44 cities in approximately 10 provinces and 2 municipalities. We expect to develop 20 additional logistics routes in existing serving cities and improve the Companyâ€™s profit for the remainder of 2024. Â Property Management and Subleasing Business Â The business objective of our property management and subleasing segment is to integrate resources in shopping mall, develop e-commerce bases and the Internet celebrity economy together to drive to increase the value of the stores in the area. In February 2023, the Company disposed of DY to an independent third party and conduct the business through a wholly owned subsidiary acquired in September 2023, namely Dongguan Hongxiang Commercial Co., Ltd., a PRC company (â€œHXâ€). Â Seasonality of Business Â Garment Manufacturing Business Â We generally receive more purchase orders during our second and third quarters and fewer manufacture orders during May and June. Â Logistics Services Business Â We generally receive more delivery orders in our third and fourth quarters and are more vulnerable to shipping delays in the PRC during Chinese New Year due to traffic and port congestion, border crossing delays and customs clearance issues. Â Property Management and Subleasing Business Â There is no significant seasonality in our business. Â Collection Policy Â Garment manufacturing business Â For our new customers, we generally require orders placed to be backed by advances or deposits. For our long-term and established customers with good payment track records, we generally provide payment terms between 30 to 180 days following their acknowledgement of receipt of goods. Â Logistics services business Â For logistics services, we generally receive payments from the customers between 30 to 90 days following the date of the registration of our receipt of packages. Â Property management and subleasing business Â For property management and subleasing business, we generally collect rental and management fees of the following month each month in advance. Â 4 Â Â Economic Uncertainty Â Our business is dependent on consumer demand for our products and services. We believe that the significant uncertainty in the economy in China has increased our clientsâ€™ sensitivity to the cost of our products and services. We have experienced continued pricing pressure. If the economic environment becomes weak, the economic conditions could have a negative impact on our sales growth and operating margins, cash position and collection of accounts receivable. Additionally, business credit and liquidity have tightened in China. Some of our suppliers and customers may face credit issues and could experience cash flow problems and other financial hardships. These factors currently have not had an impact on the timeliness of receivable collections from our customers. We cannot predict at this time how this situation will develop and whether accounts receivable may need to be allowed for or written off in the coming quarters. Â Despite the various risks and uncertainties associated with the current economy in China, we believe our core strengths will continue to allow us to execute our strategy for long-term sustainable growth in revenue, net income and operating cash flow. Â Summary of Critical Accounting Policies Â We have identified critical accounting policies that, as a result of judgments, uncertainties, uniqueness and complexities of the underlying accounting standards and operation involved could result in material changes to our financial position or results of operations under different conditions or using different assumptions. Â Estimates and Assumptions Â We regularly evaluate the accounting estimates that we use to prepare our financial statements. In general, managementâ€™s estimates are based on historical experience, on information from third party professionals, and on various other assumptions that are believed to be reasonable under the facts and circumstances. Actual results could differ from those estimates made by management. Â Revenue Recognition Â Revenue is generated through sale of goods and delivery services. Revenue is recognized when a customer obtains control of promised goods or services and is recognized in an amount that reflects the consideration that the Company expects to receive in exchange for those goods or services. In addition, the standard requires disclosure of the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The amount of revenue that is recorded reflects the consideration that the Company expects to receive in exchange for those goods and services. The Company applies the following five-step model in order to determine this amount: Â Â (i) identification of the promised goods and services in the contract; Â Â Â Â (ii) determination of whether the promised goods and services are performance obligations, including whether they are distinct in the context of the contract; Â Â Â Â (iii) measurement of the transaction price, including the constraint on variable consideration; Â Â Â Â (iv) allocation of the transaction price to the performance obligations; and Â Â Â Â (v) recognition of revenue when (or as) the Company satisfies each performance obligation. Â 5 Â Â The Company only applies the five-step model to contracts when it is probable that the Company will collect the consideration it is entitled to in exchange for the goods or services it transfers to the customer. Once a contract is determined to be within the scope of ASC 606 at contract inception, the Company reviews the contract to determine which performance obligations the Company must deliver and which of these performance obligations are distinct. The Company recognizes as revenues the amount of the transaction price that is allocated to the respective performance obligation when the performance obligation is satisfied or as it is satisfied. Generally, the Companyâ€™s performance obligations are transferred to customers at a point in time, typically upon delivery. Â For all reporting periods, the Company has not disclosed the value of unsatisfied performance obligations for all product and service revenue contracts with an original expected length of one year or less, which is an optional exemption that is permitted under the adopted rules. Â Leases Â Lessee Â The Company determines if an arrangement is a lease at inception. Operating leases are included in operating lease right-of-use (â€œROUâ€) assets, other current liabilities, and operating lease liabilities in our consolidated balance sheets. Finance leases are included in property and equipment, other current liabilities, and other long-term liabilities in the consolidated balance sheets. Â ROU assets represent the right to use an underlying asset for the lease term and lease liabilities represent the obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. As most of the leases do not provide an implicit rate, The Company generally use the incremental borrowing rate based on the estimated rate of interest for collateralized borrowing over a similar term of the lease payments at commencement date. The operating lease ROU asset also includes any lease payments made and excludes lease incentives. Lease expense for lease payments is recognized on a straight-line basis over the lease term. Â Lessor Â As a lessor, the Companyâ€™s leases are classified as operating leases under ASC 842. Leases, in which the Company is the lessor, are substantially all accounted for as operating leases and the lease components and non-lease components are accounted for separately. Rental income from operating leases is recognized on a straight line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized on a straight line basis over the lease term. Â Accounts receivable, net Â Accounts receivable, net are stated at the historical carrying amount net of allowance for doubtful accounts. Â Account receivables are classified as financial assets subsequently measured at amortized cost. Account receivables are recognized when the Company becomes a party to the contractual provisions of the receivables. They are measured, at initial recognition, at fair value plus transaction costs, if any and are subsequently measured at amortized cost. The amortized cost is the amount recognized on the receivable initially, minus principal repayments, plus cumulative amortization (interest) using the effective interest method of any difference between the initial amount and the maturity amount, adjusted for any loss allowance. Â A loss allowance for expected credit losses is recognized on account receivables and is updated at each reporting date. The Company determines the expected credit losses provisions based on ASU No. 2016-13, Financial Instrumentsâ€”Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments (â€˜â€˜ASC 326â€™â€™) using a modified retrospective approach which did not have a material impact on the opening balance of accumulated deficit. To determine expected credit losses on account receivables, the Company will consider the historic credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions, and an assessment of both the current and forecasted direction of conditions at the reporting date, including the time value of money, where appropriate. Â The loss allowance is calculated on a collective basis for all trade and other receivables in totality. An impairment gain or loss is recognized in profit or loss with a corresponding adjustment to the carrying amount of account receivables, through use of a loss allowance account. The impairment loss is included in operating expenses as a movement in credit loss allowance. Â Receivables are written off when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, e.g., when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Receivables written off may still be subject to enforcement activities under the Companyâ€™s recovery procedures, considering legal advice where appropriate. Any recoveries made are recognized in profit or loss. Â 6 Â Â Recently issued accounting pronouncements Â Accounting for Convertible Instruments: In August 2020, FASB issued ASU 2020-06, Accounting for Convertible Instruments and Contracts in an Entityâ€™s Own Equity (ASU 2020-06), as part of its overall simplification initiative to reduce costs and complexity of applying accounting standards while maintaining or improving the usefulness of the information provided to users of financial statements. Among other changes, the new guidance removes from GAAP separation models for convertible debt that require the convertible debt to be separated into a debt and equity component, unless the conversion feature is required to be bifurcated and accounted for as a derivative or the debt is issued at a substantial premium. As a result, after adopting the guidance, entities will no longer separately present such embedded conversion features in equity and will instead account for the convertible debt wholly as debt. The new guidance also requires use of the â€œif-convertedâ€ method when calculating the dilutive impact of convertible debt on earnings per share, which is consistent with the Companyâ€™s current accounting treatment under the current guidance. The guidance is effective for financial statements issued for fiscal years beginning after December 15, 2021, and interim periods within those fiscal years, with early adoption permitted, but only at the beginning of the fiscal year. Â The Company reviews new accounting standards as issued. Management has not identified any other new standards that it believes will have a significant impact on the Companyâ€™s consolidated financial statements. BASIS OF PRESENTATION Â In the opinion of management, the unaudited condensed consolidated financial statements reflect all adjustments of a normal recurring nature that are necessary for a fair presentation of the results for the interim periods presented. All significant intercompany transactions and balances are eliminated in consolidation. However, the results of operations included in such financial statements may not necessarily be indicative of annual results. Â The Company uses the same accounting policies in preparing quarterly and annual financial statements. Certain information and footnote disclosures normally included in the annual consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America (â€œU.S. GAAPâ€) have been condensed or omitted. These unaudited condensed consolidated financial statements should be read in conjunction with the Companyâ€™s audited consolidated financial

statements and notes thereto included in the Companyâ€™s Annual Report on Form 10-K for the year ended March 31, 2024 filed with the Securities and Exchange Commission (â€œSECâ€) on July15, 2024 (â€œ2023 Form 10-Kâ€). SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Â Use of Estimates Â The preparation of the consolidated financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Management makes these estimates using the best information available at the time the estimates are made; however actual results could differ materially from those estimates. Â There is no change in the accounting policies for the three months ended June 30, 2024. Â Recently issued accounting pronouncements Â In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments â€“ Credit Losses (Topic 326), Measurement of Credit Losses on Financial Instruments. This standard requires a financial asset (or group of financial assets) measured at amortized cost basis to be presented at the net amount expected to be collected. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial asset(s) to present the net carrying value at the amount expected to be collected on the financial asset. This standard will be effective for the Company on April 1, 2023. The Company is currently evaluating the impact the adoption of this ASU will have on its consolidated financial statements. Â Accounting for Convertible Instruments: In August 2020, FASB issued ASU 2020-06, Accounting for Convertible Instruments and Contracts in an Entityâ€™s Own Equity (ASU 2020-06), as part of its overall simplification initiative to reduce costs and complexity of applying accounting standards while maintaining or improving the usefulness of the information provided to users of financial statements. Among other changes, the new guidance removes from GAAP separation models for convertible debt that require the convertible debt to be separated into a debt and equity component, unless the conversion feature is required to be bifurcated and accounted for as a derivative or the debt is issued at a substantial premium. As a result, after adopting the guidance, entities will no longer separately present such embedded conversion features in equity and will instead account for the convertible debt wholly as debt. The new guidance also requires use of the â€œif-convertedâ€ method when calculating the dilutive impact of convertible debt on earnings per share, which is consistent with the Companyâ€™s current accounting treatment under the current guidance. The guidance is effective for financial statements issued for fiscal years beginning after December 15, 2021, and interim periods within those fiscal years, with early adoption permitted, but only at the beginning of the fiscal year. Â The Company reviews new accounting standards as issued. Management has not identified any other new standards that it believes will have a significant impact on the Companyâ€™s consolidated financial statements. [Abstract] Â FINANCIAL INSTRUMENTS 14. FINANCIAL INSTRUMENTS Â On January 4, 2023, the Company entered into a series of

agreements with certain accredited investors, pursuant to which the Company received a net proceed of $15,000,000 in consideration of the issuance of: Â Â â— senior secured convertible notes in the aggregate original principal amount of approximately $16.7 million with interest rate of 5% per annum (the â€œConvertible Notesâ€); The Convertible Notes shall be matured on July 4, 2024. The conversion price is $1.25, subject to adjustment under several conditions. Â â— warrants to purchase up to approximately 16.1 million shares of common stock of the Company (the â€œCommon Stockâ€) until on or prior to 11:59 p.m. (New York time) on the five-year anniversary of the closing date at an exercise price of $1.25 per share, also subject to adjustment under several conditions. Â The Warrant is considered a freestanding instrument issued together with the Convertible Note and measured at its issuance date fair value. Proceeds received were first allocated to the Warrant based on its initial fair value. The initial fair value of the Warrant was $3.9 million. The Warrant were marked to the market with the changes in the fair value of warrant recorded in the consolidated statements of operations and comprehensive loss. As of June 30, 2024, the balance of the Warrant was approximately $0.1 million (March 31, 2024: $2.0 million). Â The Convertible Note is classified as a liability and is subsequently stated at amortized cost with any difference between the initial carrying value and the repayment amount as interest expenses using the effective interest method over the period from the issuance date to the maturity date. The embedded conversion feature should be bifurcated and separately accounted for using fair value, as this embedded feature is considered not clearly and closely related to the debt host. The bifurcated conversion feature was recorded at fair value with the changes recorded in the consolidated statements of operations and comprehensive loss. The initial fair value of the embedded conversion feature was $1.2 million. As of June 30, 2024, the fair value of the conversion option was $0.04 million (March 31, 2024: $0.04 million). Â The Company determined that the other embedded features do not require bifurcation as they either are clearly and closely related to the Convertible Note or do not meet the definition of a derivative. Â The total proceeds of the Convertible Note and the Warrants, net of issuance cost, of $15.0 million was received by the Company in January 2023, and allocated to each of the financial instruments as following: Â SCHEDULE OF FINANCIAL INSTRUMENTS Â Â As of January 4, 2023Â Â Â Â Â Derivative liabilities â€“ Fair value of the WarrantsÂ $3,858,521Â Derivative liabilities â€“ Embedded conversion featureÂ Â 1,247,500Â Convertible NoteÂ Â 9,893,979Â Â Â $15,000,000Â Â In January 2023, the Company also granted to the placement agent a warrant as partial of agent fee to purchase 0.7 million shares of common stock of the Company. Management makes these estimates using the best information available at the time the estimates are made; however actual results could differ materially from those estimates. Â There is no change in the accounting policies for the three months ended June 30, 2024. Â Recently issued accounting pronouncements Recently issued accounting pronouncements Â In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments â€“ Credit Losses (Topic 326), Measurement of Credit Losses on Financial Instruments. This standard requires a financial asset (or group of financial assets) measured at amortized cost basis to be presented at the net amount expected to be collected. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial asset(s) to present the net carrying value at the amount expected to be collected on the financial asset. This standard will be effective for the Company on April 1, 2023. The Company is currently evaluating the impact the adoption of this ASU will have on its consolidated financial statements. Â Accounting for Convertible Instruments: In August 2020, FASB issued ASU 2020-06, Accounting for Convertible Instruments and Contracts in an Entityâ€™s Own Equity (ASU 2020-06), as part of its overall simplification initiative to reduce costs and complexity of applying accounting standards while maintaining or improving the usefulness of the information provided to users of financial statements. Among other changes, the new guidance removes from GAAP separation models for convertible debt that require the convertible debt to be separated into a debt and equity component, unless the conversion feature is required to be bifurcated and accounted for as a derivative or the debt is issued at a substantial premium. As a result, after adopting the guidance, entities will no longer separately present such embedded conversion features in equity and will instead account for the convertible debt wholly as debt. The new guidance also requires use of the â€œif-convertedâ€ method when calculating the dilutive impact of convertible debt on earnings per share, which is consistent with the Companyâ€™s current accounting treatment under the current guidance. The guidance is effective for financial statements issued for fiscal years beginning after December 15, 2021, and interim periods within those fiscal years, with early adoption permitted, but only at the beginning of the fiscal year. Â The Company reviews new accounting standards as issued. Management has not identified any other new standards that it believes will have a significant impact on the Companyâ€™s consolidated financial statements. UseOfEstimates_zuwpaCPfdMxk" style="font: 10pt Times New Roman, Times, Serif; margin: 0pt 0pt 0pt 0.25in; text-align: justify">Use of Estimates   The preparation of the consolidated financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Management makes these estimates using the best information available at the time the estimates are made; however actual results could differ materially from those estimates.   There is no change in the accounting policies for the three months ended June 30, 2024.   Recently issued accounting pronouncements   In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments - Credit Losses (Topic 326), Measurement of Credit Losses on Financial Instruments. This standard requires a financial asset (or group of financial assets) measured at amortized cost basis to be presented at the net amount expected to be collected. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial asset(s) to present the net carrying value at the amount expected to be collected on the financial asset. This standard will be effective for the Company on April 1, 2023. The Company is currently evaluating the impact the adoption of this ASU will have on its consolidated financial statements.   Accounting for Convertible Instruments: In August 2020, FASB issued ASU 2020-06, Accounting for Convertible Instruments and Contracts in an Entity's Own Equity (ASU 2020-06), as part of its overall simplification initiative to reduce costs and complexity of applying accounting standards while maintaining or improving the usefulness of the information provided to users of financial statements. Among other changes, the new guidance removes from GAAP separation models for convertible debt that require the convertible debt to be separated into a debt and equity component, unless the conversion feature is required to be bifurcated and accounted for as a derivative or the debt is issued at a substantial premium. As a result, after adopting the guidance, entities will no longer separately present such embedded conversion features in equity and will instead account for the convertible debt wholly as debt. The new guidance also requires use of the "if-converted" method when calculating the dilutive impact of convertible debt on earnings per share, which is consistent with the Company's current accounting treatment under the current guidance. The guidance is effective for financial statements issued for fiscal years beginning after December 15, 2021, and interim periods within those fiscal years, with early adoption permitted, but only at the beginning of the fiscal year.   The Company reviews new accounting standards as issued. Management has not identified any other new standards that it believes will have a significant impact on the Company's consolidated financial statements. 4. Proceeds received were first allocated to the Warrant based on its initial fair value. The initial fair value of the Warrant was $3.9 million. The Warrant were marked to the market with the changes in the fair value of warrant recorded in the consolidated statements of operations and comprehensive loss. As of June 30, 2024, the balance of the Warrant was approximately $0.1 million (March 31, 2024: $2.0 million).   The Convertible Note is classified as a liability and is subsequently stated at amortized cost with any difference between the initial carrying value and the repayment amount as interest expenses using the effective interest method over the period from the issuance date to the maturity date. The embedded conversion feature should be bifurcated and separately accounted for using fair value, as this embedded feature is considered not clearly and closely related to the debt host. The bifurcated conversion feature was recorded at fair value with the changes recorded in the consolidated statements of operations and comprehensive loss. The initial fair value of the embedded conversion feature was $1.2 million. As of June 30, 2024, the fair value of the conversion option was $0.04 million (March 31, 2024: $0.04 million).   The Company determined that the other embedded features do not require bifurcation as they either are clearly and closely related to the Convertible Note or do not meet the definition of a derivative.   The total proceeds of the Convertible Note and the Warrants, net of issuance cost, of $15.0 million was received by the Company in January 2023, and allocated to each of the financial instruments as following:</p> <p id="xdx_891_ecustom--ScheduleOfFinancialInstrumentTableTextBlock_zDfzh0ShE9ba" style="font: 10pt Times New Roman, Times, Serif; margin: 0pt 0pt 0pt 17.5pt; text-align: justify; text-indent: 0.5pt"> SCHEDULE OF FINANCIAL INSTRUMENTS</p> <table cellpadding="0" cellspacing="0" style="font: 10pt Times New Roman, Times, Serif; margin-left: 0.25in; border-collapse: collapse; width: 80%"> <tr style="vertical-align: bottom"> <td> </td><td style="padding-bottom: 1.5pt"> </td> <td colspan="2" style="border-bottom: Black 1.5pt solid; text-align: center">As of January 4, 2023</td><td style="padding-bottom: 1.5pt"> </td></tr> <tr style="vertical-align: bottom"> <td> </td><td> </td> <td colspan="2"> </td><td> </td></tr> <tr style="vertical-align: bottom; background-color: rgb(204,238,255)"> <td style="width: 80%; text-align: left">Derivative liabilities - Fair value of the Warrants</td><td style="width: 2%"> </td> <td style="width: 1%; text-align: left">$</td><td id="xdx_986_eus-gaap--FairValueAdjustmentOfWarrants_c20230104__20230104__us-gaap--FinancialInstrumentAxis__us-gaap--DerivativeMember_zfyoRmr8UDlg" style="width: 16%; text-align: right" title="Derivative liabilities - Fair value of the Warrants">3,858,521</td><td style="width: 1%; text-align: left"> </td></tr> <tr style="vertical-align: bottom; background-color: White"> <td style="text-align: left">Derivative liabilities - Embedded conversion feature</td><td> </td> <td style="text-align: left"> </td><td id="xdx_985_eus-gaap--DebtInstrumentConvertibleBeneficialConversionFeature_c20230104__20230104__us-gaap--FinancialInstrumentAxis__us-gaap--DerivativeMember_z1KjY1uS56Sa" style="text-align: right" title="Derivative liabilities - Embedded conversion feature">1,247,500</td><td style="text-align: left"> </td></tr> <tr style="vertical-align: bottom; background-color: rgb(204,238,255)"> <td style="text-align: left; padding-bottom: 1.5pt">Convertible Note</td><td style="padding-bottom: 1.5pt"> </td> <td style="border-bottom: Black 1.5pt solid; text-align: left"> </td><td id="xdx_98D_eus-gaap--ConvertibleDebt_iI_c20230104__us-gaap--FinancialInstrumentAxis__us-gaap--DerivativeMember_zac7pvmFmeNe" style="border-bottom: Black 1.5pt solid; text-align: right" title="Convertible Note">9,893,979</td><td style="padding-bottom: 1.5pt; text-align: left"> </td></tr> <tr style="vertical-align: bottom; background-color: White"> <td style="padding-bottom: 2.5pt"> </td><td style="padding-bottom: 2.5pt"> </td> <td style="border-bottom: Black 2.5pt double; text-align: left">$</td><td id="xdx_98E_eus-gaap--ProceedsFromConvertibleDebt_c20230104__20230104__us-gaap--FinancialInstrumentAxis__us-gaap--DerivativeMember_z37h45WAWL62" style="border-bottom: Black 2.5pt double; text-align: right" title="Total">15,000,000</td><td style="padding-bottom: 2.5pt; text-align: left"> </td></tr> </table>   <span style="font-family: Times New
