[Table of Contents.](#)**Forward-Looking Statements**

This report may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements reflect our current views with respect to, among other things, future events and our financial performance. Any statements about our management's expectations, beliefs, plans, predictions, forecasts, objectives, assumptions or future events or performance are not historical facts and may be forward-looking. These statements are often, but not always, made through the use of words or phrases such as "anticipate," "believes," "can," "could," "may," "predicts," "potential," "should," "will," "estimate," "plans," "projects," "continuing," "ongoing," "expects," "intends" and similar words or phrases. All forward-looking statements, expressed or implied, included herewith are expressly qualified in their entirety by the cautionary statements contained or referred to herein. The inclusion of forward-looking information in this report should not be regarded as a representation by us or any other person that the future plans, estimates or expectations contemplated by us will be achieved. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs.

Factors that may affect our results are disclosed in "Item 1A. Risk Factors" in Part II of this report and in the section titled "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2022 December 31, 2023 ("Form 10-K"). Some of the risks and uncertainties that may cause our actual results, performance or achievements to differ materially from those expressed include, but are not limited to, the following: the difficult market conditions and unfavorable economic conditions and uncertainties in the markets in which we operate and in which our loans are concentrated, including declines in housing markets as a result of global macroeconomic and geopolitical events, an increase in unemployment levels and slowdowns in economic growth; our expected future financial results; our ability to successfully execute on our strategy for our CCBX segment, CCBX

partnerships and our efforts to optimize and strengthen our CCBX balance sheet; the overall health of the local and national real estate market; the impacts related to or resulting from recent bank failures and other economic and industry volatility, including potential increased regulatory requirements and costs and potential impacts to macroeconomic conditions; the credit risk associated with our loan portfolio, such as possible additional credit losses and impairment of collectability of loans as a result of the coronavirus, and variants thereof ("COVID-19") pandemic and policies and programs implemented by the Coronavirus Aid, Relief, and Economic Security Act ("CARES Act"), including its automatic loan forbearance provisions and the effects on our loan portfolio from our Paycheck Protection Program ("PPP") lending activities, specifically with our commercial real estate loans; our level of nonperforming assets and the costs associated with resolving problem loans; business and economic conditions generally and in the financial services industry, nationally and within our market area, particularly in the markets in which we operate and in which our loans are concentrated; the impact on the Company's operations due to epidemic illnesses, natural or man-made disasters, such as earthquakes, tsunamis, wildfires and flooding, the effects of regional or national civil unrest, wars and acts of terrorism, and political developments that may disrupt or increase volatility in securities or otherwise affect economic conditions; our ability to maintain an adequate level of allowance for credit losses; our ability to successfully manage liquidity risk; our ability to implement our growth strategy and manage costs effectively; the composition of our senior leadership team and our ability to attract and retain key personnel; our ability to raise additional capital to implement our business plan; changes in market interest rates and impacts of such changes on our profits and business; the occurrence of fraudulent activity, breaches or failures of our information security controls or cybersecurity-related incidents; interruptions involving our information technology and telecommunications systems or third-party servicers; our ability to maintain our reputation; increased competition in the financial services industry; regulatory guidance on commercial lending concentrations; our relationship with broker-dealers and digital financial service providers; the effectiveness of our risk management framework; the costs and obligations associated with being a publicly traded company; company and other unanticipated costs that we may experience; the commencement and outcome of litigation and other legal proceedings and regulatory actions against us or to which we may become subject; the extensive regulatory framework that applies to us; the impact of recent and future legislative and regulatory changes and economic stimulus programs; and other changes in banking, securities and tax laws and regulations, and their application by our regulators; the impact on our operations due to epidemic illnesses, natural or man-made disasters, such as wildfires, the effects of regional or national civil unrest, and political developments that may disrupt or increase volatility in securities or otherwise affect economic conditions; the impact of benchmark interest rate reform in the U.S. and implementation of alternative reference rates, such as the Secured Overnight Financing Rate ("SOFR"), to the London Interbank Offered Rate ("LIBOR"); fluctuations in the value of the securities held in our securities portfolio; governmental monetary and fiscal policies; material weaknesses in our internal control over financial reporting; and our success at managing the risks involved in the foregoing items.

The foregoing factors should not be construed as exhaustive and should be read together with the other cautionary statements included in this report. If one or more events related to these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may differ materially from what we anticipate. You are cautioned not to place undue reliance on forward-looking statements. Further, any forward-looking statement speaks only as of the date on which it is made and we undertake no obligation to update or revise any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events, except as required by law.

COASTAL FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1 - Description of Business and Summary of Significant Accounting Policies

Nature of operations - Coastal Financial Corporation ("Corporation" or "Company") is a registered bank holding company whose wholly owned subsidiaries are Coastal Community Bank ("Bank") and Arlington Olympic LLC ("LLC"). The Company is a Washington state corporation that was organized in 2003. The Bank was incorporated and commenced operations in 1997 and is a Washington state-chartered commercial bank that is a member bank of the Federal Reserve system. Arlington Olympic LLC was formed in 2019 and owns the Company's Arlington branch site, which the Bank leases from the LLC.

We are The Company operates through the Bank and is headquartered in Everett, Washington, which by population is the largest city in, and the county seat of, Snohomish County. The Company's business is conducted through three reportable segments: CCBX, the The community bank, CCBX and treasury & administration. The community bank offers a full range of banking services to small and medium-sized businesses, professionals, and individuals throughout the greater Puget Sound region through its 14 branches in Snohomish, Island and King Counties, the Internet, and its mobile banking application. The CCBX segment provides Banking as a Service ("BaaS") that allows our broker dealers and digital financial service partners to offer their customers banking services. Through CCBX's partners the Company is able to offer banking services and products across the nation. The community bank segment includes all community banking activities with a primary focus on providing a wide range of banking products and services to consumers and small to medium-sized businesses, professionals, and individuals in the broader Puget Sound region in the state of Washington through its 14 branches in Snohomish, Island and King Counties, and through the Internet and its mobile banking application nation. The treasury & administration segment includes treasury management, overall administration and all other aspects of the Company.

The Bank's deposits are insured in whole or in part by the Federal Deposit Insurance Corporation ("FDIC"). The community bank's loans and deposits are primarily within the greater Puget Sound area, region, while CCBX loans and deposits are dependent upon the partner's market. The Bank's primary funding source is deposits from customers. The Bank is subject to regulation and supervision by the Board of Governors of the Federal Reserve System (the "Federal Reserve") and the Washington State Department of Financial Institutions Division of Banks. The Federal Reserve also has regulatory and supervisory authority over the Company.

Financial statement presentation - The accompanying unaudited interim condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") for interim reporting requirements and with instructions to Form 10-Q and Article 10 of Regulation S-X, and therefore do not include all the information and notes included in the annual consolidated financial statements in conformity with GAAP. These interim condensed consolidated financial statements and accompanying notes should be read in conjunction with the Company's audited consolidated financial statements and accompanying notes included in the Company's Annual report on Form 10-K as filed with the U.S. Securities and Exchange Commission ("SEC") on March 16, 2023 March 15, 2024. Operating results for the three and nine months ended September 30, 2023 March 31, 2024 are not necessarily indicative of the results that may be expected for the entire year.

Amounts presented in the consolidated financial statements and footnote tables are rounded and presented in thousands of dollars except per-share amounts, which are presented in dollars. In the narrative footnote discussion, amounts are rounded to thousands and presented in dollars.

In management's opinion, all accounting adjustments necessary to accurately reflect the financial position and results of operations on the accompanying consolidated financial statements have been made. These adjustments include normal and recurring accruals considered necessary for a fair and accurate presentation.

Principles of consolidation - The consolidated financial statements include the accounts of the Company, the Bank and the LLC. All significant intercompany accounts have been eliminated in consolidation.

Estimates - The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Management believes that its critical accounting policies include determining the allowance for credit losses, the valuation of the Company's deferred tax assets, and fair value of financial instruments. Actual results could differ significantly from those estimates.

[Table of Contents.](#)

Implementation of ASU 2016-13 - On January 1, 2023, the Company adopted ASU 2016-13, *Financial Instruments — Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*, which replaces the incurred loss with an expected loss methodology that is referred to as the current expected credit loss ("CECL") methodology. The measurement of expected credit losses under the CECL methodology is applicable to financial assets measured at amortized costs, including loan receivables and held-to-maturity debt securities. It also applies to off-balance sheet credit exposures not accounted for as insurance (loan commitments, standby letters of credit, financial guarantees, and other similar instruments) and net investments in certain leases. In addition, ASC 326 made changes to the accounting for available-for-sale debt securities. One such change is to require increases or decreases in credit losses be presented as an allowance rather than as a write-down on available-for-sale debt securities management does not intend to sell or believe it is more likely than not the Company will be required to sell the security before recovery of the amortized cost basis.

The Company adopted ASC 326 using the modified retrospective method. Results for the reporting periods beginning after January 1, 2023 are presented under ASC 326 while prior period amounts continue to be reported in accordance with previously applicable GAAP. The day one CECL adjustment for community bank loans included a reduction of \$310,000 to the community bank allowance in the first quarter of 2023 and a reduction of \$340,000 related to the community bank unfunded commitment reserve in the first quarter of 2023. This was offset by an increase to the CCBX allowance for \$4.2 million in the same period. With the mirror image approach accounting related to the credit enhancement for CCBX partner loans, there was a CECL day one increase to the indemnification asset in the amount of \$4.5 million. Net, the day one impact to retained earnings for the Bank's transition to CECL was an increase of \$954,000 in the first quarter of 2023, excluding the impact of income taxes.

Management has separately evaluated its held-to-maturity investment securities and determined that no loss reserves were required.

Implementation of ASU 2022-02 - On January 1, 2023, the Company adopted ASU 2022-02, *Financial Instruments - Credit Losses (Topic 326): Troubled Debt Restructurings ("TDR") and Vintage Disclosures*. The ASU eliminated the accounting guidance for TDR loans by creditors while enhancing disclosure requirements for certain loan refinancings and restructurings by creditors when a borrower is experiencing financial difficulty. Additionally, the ASU requires public business entities to disclose current-period gross write-offs by year of origination for financing receivables and net investments in leases. This ASU was effective upon adoption of ASU 2016-13 and was applied on a prospective basis. During the three and nine months ended September 30, 2023, the Company did not have any loans that were modified to borrowers experiencing financial difficulty.

Accounting policyupdate –

Allowance for Credit Losses - effective January 1, 2023 with the adoption of ASU 2016-13

Loans and unfunded commitments

The allowance for credit losses ("ACL") is an estimate of the expected credit losses on financial assets measured at amortized cost. The ACL is evaluated and calculated on a collective basis for those loans which share similar risk characteristics. At each reporting period, the Company evaluates whether the loans in a pool continue to exhibit similar risk characteristics as the other loans in the pool and whether it needs to evaluate the allowance on an individual basis. The Company must estimate expected credit losses over the loans' contractual terms, adjusted for expected prepayments. In estimating the life of the loan, the Company cannot extend the contractual term of the loan for expected extensions, renewals, and modifications, unless the extension or renewal options are included in the contract at the reporting date and are not unconditionally cancellable by the Company. Because expected credit losses are estimated over the contractual life adjusted for estimated prepayments, determination of the life of the loan may significantly affect the ACL. The Company has chosen to segment its portfolio consistent with the manner in which it manages the risk of the type of credit.

- Community Bank Portfolio: The ACL calculation is derived from loan segments utilizing loan level information and relevant available information from internal and external sources related to past events and current conditions. In addition, the Company incorporates a reasonable and supportable forecast.
- CCBX Portfolio: The Bank calculates the ACL on loans on an aggregate basis based on each partner and product level, segmenting the risk inherent in the CCBX portfolio based on qualitative and quantitative trends in the portfolio.

[Table of Contents](#)

Also included in the ACL are qualitative reserves to cover losses that are expected, but in the Company's assessment may not be adequately represented in the quantitative method. For example, factors that the Company considers include environmental business conditions, borrower's financial condition, credit rating and the volume and severity of past due loans and non-accrual loans. Based on this analysis, the Company records a provision for credit losses to maintain the allowance at appropriate levels.

Determining the amount of the allowance is considered a critical accounting estimate, as it requires significant judgment and the use of subjective measurements, including management's assessment of overall portfolio quality. The Company maintains the allowance at an amount the Company believes is sufficient to provide for estimated losses expected to occur in the Company's loan portfolio at each balance sheet date, and fluctuations in the provision for credit losses may result from management's assessment of the adequacy of the allowance. Changes in these estimates and assumptions are possible and may have a material impact on the Company's allowance, and therefore the Company's financial position, liquidity or results of operations. The Company has elected to exclude accrued interest receivable from the amortized cost basis in its ACL calculation as accrued interest is written off in a timely manner when deemed uncollectable.

For more information and discussion related to the allowance for credit losses on loans, see "Note 4 - Loans and Allowance for Credit Losses" in the Consolidated Financial Statements.

In addition to the ACL on loans held for investment, CECL requires a balance sheet liability for expected losses on unfunded commitments, which is recognized if both the following conditions are met: (1) the Company has a present contractual obligation to extend credit; and (2) the obligation is not unconditionally cancellable by the Company. Loan commitments may have a funded and unfunded portion, of which the liability for unfunded commitments is derived based upon the commitments to extend credit to a borrower (e.g., an estimate of expected credit losses is not established for unfunded portions of loan commitment that are unconditionally cancellable by the Company). The expected credit losses for funded portions are reported in the previously discussed ACL. The Company segments its unfunded commitment portfolio consistent with the ACL calculation, separating

between unfunded lines and commitments to originate. The Company incorporates the probability of funding (i.e. estimate of utilization) for each segment and then utilizes the ACL loss rates for each segment on an aggregate basis to calculate the allowance for unfunded commitments

Available-for-sale debt securities

For available-for-sale debt securities with fair value below amortized cost, the security is considered impaired. When the Company does not intend to sell the debt security, and it is more likely than not the Company will not have to sell the security before recovery of its cost basis, then the Company assesses the impairment for potential expected credit losses. Impairment related to a credit loss is measured using the discounted cash flow method. Credit loss recognition is limited to the fair value of the security. The impairment is recognized by establishing an ACL through provision for credit losses. Impairment related to noncredit factors is recognized in accumulated other comprehensive income, net of applicable taxes. The Company evaluates AFS security impairment on a quarterly basis.

Held-to-maturity debt securities

For held-to-maturity debt securities, expected losses are evaluated and calculated on a collective basis for those securities which share risk characteristics. The Company aggregates similar securities and reports the security portfolio segments based on shared risk characteristics. The only segment included in the held-to-maturity portfolio are U.S. Agency Residential Mortgage Backed Securities which have an expected zero credit loss.

[Table of Contents](#)

The following table illustrates the impact of ASU 2016-13:

	January 1, 2023		
	As reported under ASC 326	Pre-ASC 326 Adoption	Impact of ASC 326 Adoption
Assets:			
Allowance for credit losses	\$ 77,881	\$ 74,029	\$ 3,852
CCBX credit enhancement asset	57,842	53,377	4,465
Deferred tax asset	18,238	18,458	(220)
Liabilities:			
Unfunded commitment reserve	634	974	(340)
Shareholders' Equity:			
Retained earnings	120,732	119,998	734

Subsequent Events - The Company has evaluated events and transactions subsequent to September 30, 2023 March 31, 2024 for potential recognition or disclosure.

Reclassifications - Certain amounts reported in prior quarters' consolidated financial statements may have been reclassified to conform to the current presentation with no effect on stockholders' equity or net income.

Note 2 - Recent accounting standards

Recent Accounting Guidance

In March 2020, November 2023, the FASB issued ASU 2020-04, 2023-07, Reference Rate Reform Segment Reporting (Topic 848) 280: Facilitation of the Effects of Reference Rate Reform on Financial Reporting Improvements to Reportable Segment Disclosures, to provide temporary optional expedients financial statement users with more disaggregated expense information about a public entity's reportable segments. The ASU addresses the concern that more segment information is needed, including allowing the disclosure of multiple measures of segment profit or loss, requiring the disclosure of significant segment expenses, and exceptions to requiring the U.S. GAAP guidance on contract modifications and hedge accounting to ease the financial reporting burdens qualitative disclosure of the expected market transition from LIBOR and other interbank offered rates to alternative reference rates, such as Secured Overnight Financing Rate. Entities can elect not to apply certain modification accounting requirements to contracts affected by what the guidance calls reference rate reform, if certain criteria are met. An entity that makes this election would not have to remeasure the contracts at the modification date or reassess a previous accounting determination. Also, entities can elect various optional expedients that would allow them to continue applying hedge accounting for hedging relationships affected by reference rate reform, if certain criteria are met, and can make a one-time election to sell and/or reclassify held-to-maturity debt securities that reference an interest rate affected by reference rate reform. The amendments in this segment items. This ASU is effective for all entities upon issuance through December 31, 2024. The LIBOR ceased to be published effective June 30, 2023. Beginning with rate adjustments that occur for fiscal years beginning after June 30, 2023 December 15, 2023, our trust preferred subordinated debentures transitioned to an adjusted three-month CME Term SOFR index in accordance with and interim periods within fiscal years beginning after December 15, 2024. We are currently evaluating the Federal Reserve final rule implementing the Adjustable Interest Rate Act. We have identified the loans that utilize LIBOR and they will transition to alternative reference rates at each loans respective reprice date. We no longer offer LIBOR indexed rates on newly originated loans. impact of this ASU 2020-04 and ASU 2021-01 are not expected to have a material impact on our consolidated financial statements. reporting.

The amortized cost and fair value of debt securities at September 30, 2023 March 31, 2024, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because issuers or the underlying borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Mortgage-backed securities and collateralized mortgage obligations are shown separately, since they are not due at a single maturity date.

Management has evaluated the above securities and does not believe that any individual unrealized loss as of **September 30, 2023** **March 31, 2024**, will be recognized into income. Unrealized losses have not been recognized into income because management does not intend to sell and does not expect it will be required to sell the investments. The decline is largely due to changes in market conditions and interest rates, rather than credit quality. The fair value is expected to recover as the underlying securities in the portfolio approach maturity date and market conditions improve. Management believes there is a high probability of collecting all contractual amounts due, because the majority of the securities in the portfolio are backed by government agencies or government sponsored enterprises. However, a recovery in value may not occur for some time, if at all, and may be delayed for greater than the one year time horizon or perhaps even until maturity. Based on management's analysis no allowance for credit losses was required on these securities.

Note 4 - Loans and Allowance for Credit Losses

During the quarter ended **September 30, 2023** **March 31, 2024**, **\$285.0 million** **\$101.3 million** in CCBX loans were transferred to loans held for sale, with **\$320.9 million** **\$100.5 million** in loans sold. A portion of these loans were sold at par and a portion were sold with a gain on sale of **\$107,000**. Pricing is dependent upon the agreement with the partner. The Company sells CCBX loans to manage loan portfolio size by partner and by loan category, with such limits established and documented in the relevant partner agreement. As of **September 30, 2023** and **December 31, 2022**, **March 31, 2024** there were **no** **\$797,000** loans held for sale.

The Company adopted the CECL methodology sale and no loans were held for measuring credit losses sale as of **January 1, 2023** **December 31, 2023**. All disclosures as of and for the three and nine months ended September 30, 2023 are presented in accordance with Topic 326. The Company did not recast comparative financial periods and has presented those disclosures under previously applicable GAAP.

Accrued interest on loans, which is excluded from the balances in the preceding table of loans receivable, was **\$21.3 million** **\$23.7 million** and **\$17.0 million** **\$25.6 million** at **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**, respectively, and was included in accrued interest receivable on the Company's consolidated balance sheets.

Included in commercial and industrial loans as of **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**, is **\$114.2 million** **\$135.7 million** and **\$146.0 million** **\$87.5 million**, respectively in capital call lines, provided to venture capital firms through one of our BaaS clients. These loans are secured by the capital call rights and are individually underwritten to the Bank's credit standards by our BaaS client and the underwriting is reviewed and approved by the Bank on every line/loan. Also included in commercial and

[Table of Contents](#)

industrial loans are Paycheck Protection Program ("PPP") loans of **\$3.3 million** **\$2.9 million** at **September 30, 2023** **March 31, 2024** and **\$4.7 million** **\$3.0 million** at **December 31, 2022** **December 31, 2023**. PPP loans are 100% guaranteed by the Small Business Administration ("SBA").

Consumer and other loans includes overdrafts of **\$3.3 million** **\$1.3 million** and **\$2.7 million** **\$2.8 million** at **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**, respectively. Community bank overdrafts were **\$1.0 million** **\$17,000** and **\$94,000** **\$255,000** at **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**, respectively and CCBX overdrafts were **\$2.3** **\$1.3 million** and **\$2.6 million** **\$2.5 million** at **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**.

The Company has pledged loans totaling **\$927.0 million** **\$985.6 million** at **March 31, 2024** and **\$220.1 million** **\$1.01 billion** at **September 30, 2023** and **December 31, 2022** **December 31, 2023**, respectively, for borrowing lines at the FHLB and FRB. Additional loans were pledged during the first six months of 2023 and continues to significantly be pledged to increase and maintain the borrowing capacity of the Bank in the event of a liquidity crisis.

The balance of SBA and United States Department of Agriculture ("USDA") loans and participations sold and serviced for others totaled **\$9.1 million** **\$7.4 million** and **\$14.3 million** **\$8.7 million** at **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**, respectively.

The gross balance of Main Street Lending Program ("MSLP") loans including participations to participated and serviced for others, totaled **\$58.0 million** **\$53.4 million** at **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**, with **\$3.1 million** **\$2.8 million** in MSLP loans on the balance sheet and included in commercial and industrial loans at **September 30, 2023**, **March 31, 2024** and **December 31, 2022** **December 31, 2023**. Servicing is retained on the gross balance.

[Table of Contents](#)

The Company, through the community bank, at times purchases individual loans that meet its underwriting standards through the community bank at fair value as of the acquisition date. The Company held purchased loans with remaining balances that totaled **\$9.0 million** and **\$9.6 million** **\$8.1 million** as of **September 30, 2023** **March 31, 2024** and **December 31, 2022**, respectively. Unamortized premiums on these loans totaled **\$156,000** **\$152,000** and **\$167,000** **\$154,000** as of **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**, respectively, and are amortized into interest income over the life of the loans.

The Company, through the community bank, has purchased participation loans with remaining balances totaling **\$61.4 million** **\$51.3 million** and **\$63.9 million** **\$53.5 million** as of **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**, respectively. These loans are included in the applicable loan category depending upon the collateral and purpose of the individual loan and underwritten to the Bank's credit standards.

The Company, through the community bank, purchased loans from a CCBX partner, partners, at par, through agreements with those CCBX partner, partners, and those loans had a remaining balance of **\$57.1 million** **\$56.0 million** as of **September 30, 2023** **March 31, 2024** and **\$157.4 million** **\$46.5 million** as of **December 31, 2022** **December 31, 2023**. As of **September 30, 2023** **March 31, 2024**, **\$50.1 million** **\$50.7 million** is included in consumer and other loans and **\$7.0 million** **\$5.3 million** is included in commercial and industrial loans, compared to **\$146.1 million** **\$40.2 million** in consumer and other loans and **\$11.3 million** **\$6.3 million** in commercial and industrial loans as of **December 31, 2022** **December 31, 2023**.

The following is a summary of the Company's loan portfolio segments:

Commercial and industrial loans – Commercial and industrial loans are secured by business assets including inventory, receivables and machinery and equipment of businesses located generally in the Company's primary market area and capital calls on venture and investment funds. Also included in commercial and industrial loans are **\$58.9 million** **\$47.2 million** in unsecured CCBX partner loans. Loan types include **PPP loans**, **revolving lines of credit**, **term loans**, **PPP loans**, and loans secured by liquid collateral such as cash deposits or marketable securities. Also included in commercial and industrial loans are loans to other financial institutions. Additionally, the Company issues letters of credit on behalf of its customers. Risk arises primarily due to the difference between expected and actual cash flows of the borrowers. In addition, the recoverability of the Company's investment in these loans is also dependent on other factors primarily dictated by the type of collateral securing these loans. The fair value of the collateral securing these loans may fluctuate as market conditions change. In the case of loans secured by accounts receivable, the recovery of the Company's investment is dependent upon the borrower's ability to collect amounts due from its customers.

As of **September 30, 2023** **March 31, 2024**, **\$114.2 million** **\$135.7 million** in outstanding CCBX capital call lines are included in commercial and industrial loans compared to **\$146.0 million** **\$87.5 million** at **December 31, 2022** **December 31, 2023**. Capital call lines are provided to venture capital firms. These loans are secured by the capital call rights and are individually underwritten to the Bank's credit standards by our CCBX partner and the underwriting is reviewed by the Bank on every line/loan.

Construction, land and land development loans – The Company originates loans for the construction of 1-4 family, multifamily, and Commercial Real Estate ("CRE") properties in the Company's market area. Construction loans are considered to have higher risks due to construction completion and timing risk, the ultimate repayment being sensitive to interest rate changes, government regulation of real property and the availability of long-term financing. Additionally,

[Table of Contents](#)

economic conditions may impact the Company's ability to recover its investment in construction loans, as adverse economic conditions may negatively impact the real estate market, which could affect the borrower's ability to complete and sell the project. Additionally, the fair value of the underlying collateral may fluctuate as market conditions change. The Company occasionally originates land loans for the purpose of facilitating the ultimate construction of a home or commercial building. The primary risks include the borrower's ability to pay and the inability of the Company to recover its investment due to a material decline in the fair value of the underlying collateral.

Residential real estate loans – Residential real estate includes various types of loans for which the Company holds real property as collateral. Included in this segment are first and second lien single family loans, occasionally purchased by the Company to diversify its loan portfolio, and rental portfolios secured by one-to-four family homes. The primary risks of residential real estate loans include the borrower's inability to pay, material decreases in the value of the collateral, and significant increases in interest rates which may make the loan unprofitable.

As of **September 30, 2023** **March 31, 2024**, **\$251.8 million** **\$265.1 million** in loans originated through CCBX partners are included in residential real estate loans, compared to **\$244.6 million** **\$238.0 million** at **December 31, 2022** **December 31, 2023**. These home equity lines of credit are secured by residential real estate and are accessed by using a credit card. Home equity lines of credit are classified as residential real estate per regulatory guidelines.

[Table of Contents](#)

Commercial real estate (includes owner occupied and nonowner occupied) loans – Commercial real estate loans include various types of loans for which the Company holds real property as collateral. We have commercial mortgage loans totaling **\$360.5 million** **\$386.7 million** that are collateralized by owner-occupied real-estate and **\$519.1 million** **\$575.6 million** that are collateralized by non-owner-occupied real estate, as well as **\$347.2 million** **\$369.4 million** of multi-family residential loans and **\$11.2 million** **\$10.9 million** of farmland loans, as of **September 30, 2023** **March 31, 2024**. The primary risks of commercial real estate loans include the borrower's inability to pay, material decreases in the value of the collateralized real estate and significant increases in interest rates, which may make the real estate loan unprofitable. Commercial real estate loans may be more adversely affected by conditions in the real estate markets or in the general economy.

Consumer and other loans – The community bank originates a limited number of consumer loans, generally for banking customers only, which consist primarily of lines of credit, saving account secured loans, and auto loans. CCBX originates consumer loans including credit cards, consumer term loans and secured and unsecured lines of credit. This loan category includes overdrafts. Repayment of these loans is dependent on the borrower's ability to pay and the fair value of the underlying collateral, if any.

As of **September 30, 2023** **March 31, 2024**, **\$758.0 million** **\$868.7 million** in CCBX loans are included in consumer and other loans compared to **\$607.0 million** **\$816.4 million** at **December 31, 2022** **December 31, 2023**. Not included in this category is **\$265.1 million** and **\$238.0 million** as of **March 31, 2024** and **December 31, 2023**, respectively, in home equity lines of credit that are secured by residential real estate and are accessed by using a credit card. These credit card accessed home equity lines of credit are classified as residential real estate per regulatory guidelines.

Loans receivable		

There were \$36.2 million \$48.4 million in loans past due 90 days or more and still accruing interest as of September 30, 2023 March 31, 2024, and \$26.1 million \$46.5 million as of December 31, 2022 December 31, 2023. This is attributed to loans originated through CCBX lending partners which continue to accrue interest up to 120 or 180 days past due, dependent on product type. As of September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023, \$34.7 million and \$25.5 million, respectively, \$44.3 million of loans past due 90 days or more are covered by credit enhancements provided by our CCBX partners that protect the Bank against losses.

The accrual of interest on community bank loans is discontinued when, in management's opinion, the borrower may be unable to meet payments as they become due or when they are 90 days past due as to either principal or interest, unless they are well secured and in the process of collection. Installment/closed-end, and revolving/open-end consumer loans originated through CCBX lending partners will continue to accrue interest until 120 and 180 days past due, respectively and an allowance is recorded through provision expense for these expected losses. For installment/closed-end and revolving/open-end consumer loans originated through CCBX lending partners with balances outstanding beyond 120 days and 180 days past due, respectively, principal and capitalized interest outstanding is charged off against the allowance and accrued interest outstanding is reversed against interest income. These consumer loans are reported as nonperforming/substandard, 90 days or more days past due and still accruing.

When loans are placed on nonaccrual status, all accrued interest is reversed from current period earnings. Payments received on nonaccrual loans are generally applied as a reduction to the loan principal balance. If the likelihood of further

[Table of Contents](#)

loss is removed, the Company will recognize interest on a cash basis only. Loans may be returned to accruing status if the Company believes that all remaining principal and interest is fully collectible and there has been at least six months of sustained repayment performance since the loan was placed on nonaccrual.

[Table of Contents](#)

In some circumstances, the Company modifies loans in response to borrower financial difficulty, and generally provides for a temporary modification of loan repayment terms. In order for a modified loan to be considered for accrual status, the loan's collateral coverage generally will be greater than or equal to 100% of the loan balance, the loan is current on payments, and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow for an extended period of time, usually at least six months in duration.

No loans were modified for **community bank** borrowers experiencing financial difficulty in the three and nine months ended **September 30, 2023** **March 31, 2024** and **2022** **2023**.

The following table presents the CCBX loans at March 31, 2024 that were both experiencing financial difficulty and were modified during the twelve months prior to March 31, 2024 by class and by type of modification. The percentage of the loans that were modified to borrowers in financial distress as compared to the total of each class of loans is also presented below.

		Term Extension	Interest Rate Reduction	Principal		Payment Delay Extension	Total Class of Financing Receivable

Upon the Company's determination that a modified loan (or portion of a loan) has subsequently been deemed uncollectible, the loan (or a portion of the loan) is charged-off against the allowance for credit losses. Therefore, the loan balance is reduced by the uncollectible amount and the allowance for credit losses is adjusted by the same amount.

Credit Quality and Credit Risk

Federal regulations require that the Company periodically evaluate the risks inherent in its loan portfolio. In addition, the Company's regulatory agencies have authority to identify problem loans and, if appropriate, require them to be reclassified. The Company establishes loan grades for loans at the origination of the loan. Changes to community bank loan grades are considered at the time new information about the performance of a loan becomes available, including the receipt of updated financial information from the borrower and after loan reviews. For consumer loans, the Bank follows the Federal Financial Institutions Examination Council's Uniform Retail Credit Classification and Account Management Policy for subsequent classification in the event of payment delinquencies or default. Typically, an individual loan grade will not be changed from the prior period unless there is a specific indication of credit deterioration or improvement. Credit deterioration is evidenced by delinquency, direct communications with the borrower or other borrower information that becomes known to management. Credit improvements are evidenced by known facts regarding the borrower or the collateral property. The Company classifies some loans as Watch or Other Loans Especially Mentioned ("OLEM"). Loans classified as Watch are performing assets but have elements of risk that require more monitoring than other

performing loans and are reported in the OLEM column in the following table. Loans classified as OLEM are assets that continue to perform but have shown deterioration in credit quality and require close monitoring. There are three classifications for problem loans: Substandard, Doubtful, and Loss. Substandard loans have one or more defined weaknesses and are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Revolving (open-ended loans, such as credit cards) and installment (closed end) consumer loans originated through CCBX partners continue to accrue interest until they are charged-off at 120 days past due for installment loans (primarily unsecured loans to consumers) and 180 days past due for revolving loans (primarily credit cards) and are classified as substandard. Doubtful loans have the weaknesses of loans classified as Substandard, with additional characteristics that suggest the weaknesses make collection or recovery in full after liquidation of collateral questionable on the basis of currently existing facts, conditions, and values. There is a high possibility of loss in loans classified as Doubtful. A loan classified as Loss is considered uncollectible and of such little value that continued classification of the credit as a loan is not warranted. If a loan or a portion thereof is classified as Loss, it must be charged-off, meaning the amount of the loss is charged against the allowance for credit losses, thereby reducing that reserve.

[Table of Contents.](#)

Management considers the guidance in ASC 310-20 when determining whether a modification, extension, or renewal of loan constitutes a current period origination. As of September 30, 2023 and December 31, 2022, based on the most recent analysis performed.

The following tables show the risk category of community bank loans by year of origination for the periods indicated, based on the most recent analysis performed as follows: of each period end:

The Company considers the performance of the CCBX loan portfolio and its impact on the allowance for credit losses. For CCBX loans, the Company also evaluates credit quality based on the aging status of the loan, which was previously presented, and by payment activity. The following table presents tables present the loans in CCBX based on payment activity: activity for the periods indicated:

Allowance for Credit Losses ("ACL")

On January 1, 2023, the Company adopted ASU 2016-13, which replaces the incurred loss methodology with an expected loss methodology that is referred to as CECL. See Note 1, Description of Business and Summary of Significant Accounting Policies. As a result of implementing CECL, there was a one-time adjustment to the 2023 opening allowance balance of \$3.9 million.

CCBX loans have a higher level of expected losses than our community bank loans, which is reflected in the factors for the allowance for credit losses. Agreements with our CCBX partners provide for a credit enhancement which protects the Bank by reimbursing most losses. In accordance with accounting guidance, we estimate and record a provision for expected losses for these CCBX loans and reclassified negative deposit accounts. When the provision for CCBX credit losses and provision for unfunded commitments are recorded, a credit enhancement asset is also recorded on the balance sheet through noninterest income (BaaS credit enhancements). Expected losses are recorded in the allowance for credit losses. The credit enhancement asset is reduced when credit enhancement payments are received from the CCBX partner or taken from the partner's cash reserve account. CCBX partners provide for credit enhancements that provide protection to the Bank from credit and fraud losses by reimbursing the Bank for the losses. If the partner is unable to fulfill their contracted obligations then the Bank could be exposed to the loss of the reimbursement and credit enhancement income. In accordance with the program agreement for one CCBX partner, the Company is responsible for credit losses on approximately 10% of a \$231.9 million loan portfolio or \$32.0 million in loans that are without credit enhancement reimbursements. At September 30, 2023 reimbursements as of March 31, 2024. Effective April 1, 2024, 10% the agreement was modified and the Company is now responsible for 5% of the credit losses on this \$317.8 million loan portfolio, represented \$23.2 or \$16.0 million in loans. The partner is responsible for reimbursing credit allowance as of March 31, 2024 was calculated using the 5% balance as Coastal's expected future losses on approximately 90% of this portfolio and for fraud losses on 100% of this portfolio. The Company earns 100% of the interest income are only on the aforementioned \$23.2 million 5% balance based on the updated, signed, agreement as of loans.

[Table of Contents](#)

Note 6 - Leases

The Company has committed to rent premises used in business operations under non-cancelable operating leases and determines if an arrangement meets the definition of a lease upon inception.

[Table of Contents](#)

Operating lease right-of-use ("ROU") assets represent a right to use an underlying asset for the contractual lease term. Operating lease liabilities represent an obligation to make lease payments arising from the lease. An operating lease ROU asset and operating lease liability will be recognized for any new operating leases at the commencement of the new lease.

The Company's leases do not provide an implicit interest rate, therefore the Company used its incremental collateralized borrowing rates commensurate with the underlying lease terms to determine the present value of operating lease liabilities. The weighted average discount rate as of **September 30, 2023** **March 31, 2024** was **3.98%** **3.88%**.

The Company's operating lease agreements contain both lease and non-lease components, which are generally accounted for separately. The Company's lease agreements do not contain any residual value guarantees.

Operating leases with terms of 12 months or less are not included in ROU assets and operating lease liabilities recorded in the Company's consolidated balance sheet. Operating lease terms include options to extend when it is reasonably certain that the Company will exercise such options, determined on a lease-by-lease basis. At **September 30, 2023** **March 31, 2024**, lease expiration dates ranged from **5.8** months to **21.4** **20.9** years, with additional renewal options on certain leases typically ranging from **5** to 10 years. At **September 30, 2023** **March 31, 2024**, the weighted average remaining lease term inclusive of renewal options that the Company is reasonably certain to renew for the Company's operating leases was **9.2** **9.3** years.

Rental expense for operating leases is recognized on a straight-line basis over the lease term and amounted to **\$292,000** and **\$933,000**, respectively, **\$299,000** for the three and nine months ended **September 30, 2023** **March 31, 2024**, and **\$351,000** and **\$1.0** million respectively, **\$358,000** for the three and nine months ended **September 30, 2022** **March 31, 2023**. Variable lease components, such as inflation adjustments, are expensed as incurred and not included in ROU assets and operating lease liabilities.

The following table presents the minimum annual lease payments under the terms of these leases, inclusive of renewal options that the Company is reasonably certain to renew, at **September 30, 2023** **March 31, 2024**:

(dollars in thousands; unaudited)	(dollars in thousands; unaudited)	September 30, 2023	(dollars in thousands; unaudited)	March 31, 2024

Note 7 - Stock-Based Compensation

Stock Options and Restricted Stock

The 2018 Coastal Financial Corporation Omnibus Plan (the "2018 Plan") authorizes the Company to grant awards, including but not limited to, stock options, restricted stock units, and restricted stock awards, to eligible employees, directors or individuals that provide service to the Company, up to an aggregate of 500,000 shares of common stock. On May 24, 2021, the Company's shareholders approved the First Amendment to the 2018 Plan, which increased the authorized plan shares by 600,000. The 2018 Plan replaced the 2006 Plan for new awards. Existing awards will vest under the terms granted and no further awards will be granted under these prior plans. Shares available to be granted under the 2018 plan were **427,419** **366,465** at **September 30, 2023** **March 31, 2024**.

Stock Option Awards

The fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing model. Expected volatilities are based on historical volatility of the Company's stock and other factors. The Company uses the vesting term and contractual life to determine the expected life. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant. Compensation expense related to unvested stock option awards is reversed at date of forfeiture.

There were no new stock options granted in the **nine** **three** months ended **September 30, 2023** **March 31, 2024** and **2022** **2023**.

[Table of Contents](#)

Outstanding at March 31, 2024				
Vested or expected to vest at March 31, 2024				
Exercisable at March 31, 2024				

The total or aggregate intrinsic value (which is the amount by which the stock price exceeds the exercise price) of options exercised during the three and nine months ended September 30, 2023 March 31, 2024 was \$59,000 and \$2.4 million, respectively, \$1.4 million. The total or aggregate intrinsic value of options exercised during the three and nine months ended September 30, 2022 March 31, 2023 was \$186,000 and \$1.6 million, respectively, \$2.3 million.

As of September 30, 2023 March 31, 2024, there was \$861,000 \$686,000 of total unrecognized compensation cost related to nonvested stock options granted under the 2018 Plan and 2006 Plan. Total unrecognized compensation costs are adjusted for unvested forfeitures. The Company expects to recognize that cost over a remaining weighted-average period of approximately 3.9 3.2 years. Compensation expense recorded related to stock options was \$61,000 and \$261,000 respectively, \$114,000 for the three and nine months ended September 30, 2023 March 31, 2024 and \$65,000 and \$253,000 respectively, \$140,000 for the three and nine months ended September 30, 2022 March 31, 2023.

Restricted Stock Units

In the first quarter of 2023, 2024, the Company granted 73,611 76,473 restricted stock units ("RSUs") under the 2018 Plan to employees, which vest ratably over 4 years and 1,084 3,174 RSUs to an employee which vest ratably over 5 years. In the second quarter of 2023, the Company granted 9,827 RSUs to employees which vest ratably over 5 years. In the third quarter of

[Table of Contents](#)

2023, the Company granted 4,000 RSUs to employees which vest ratably over 3 years and 2,150 RSUs which vest ratably over 5 years.

RSUs provide for an interest in Company common stock to the recipient, the underlying stock is not issued until certain conditions are met. Vesting requirements include time-based, performance-based, or market-based conditions. Recipients of RSUs do not pay any cash consideration to the Company for the units and the holders of the restricted units do not have voting rights. The fair value of time-based and performance-based units is equal to the fair market value of the Company's common stock on the grant date. The fair value of market-based units is estimated on the grant date using the Monte Carlo simulation model. Compensation expense is recognized over the vesting period that the awards are based. RSUs are nonparticipating securities.

As of September 30, 2023 March 31, 2024, there was \$10.2 million \$10.9 million of total unrecognized compensation cost related to nonvested RSUs. The Company expects to recognize that cost over the remaining weighted-average vesting period of approximately 3.9 4.7 years. Compensation expense recorded related to RSUs was \$735,000 and \$2.2 million respectively, \$945,000 for the three and nine months ended September 30, 2023 March 31, 2024 and \$518,000 and \$1.3 million respectively, \$812,000 for the three and nine months ended September 30, 2022 March 31, 2023.

[Table of Contents](#)

A summary of the Company's nonvested RSUs at September 30, 2023 March 31, 2024 and changes during the nine three month period is presented below:

Nonvested shares at September 30, 2023	415,996	\$ 31.23 \$ 4,857
Nonvested shares at March 31, 2024		

Restricted Stock Awards

Employees

There were no new restricted stock awards granted in the **nine** three months ended **September 30, 2023** **March 31, 2024**. The fair value of restricted stock awards is equal to the fair value of the Company's stock at the date of grant. Compensation expense is recognized over the vesting period that the awards are based. Restricted stock awards are participating securities.

As of **September 30, 2023** **March 31, 2024**, there was **\$39,000** **\$34,000** of total unrecognized compensation cost related to nonvested restricted stock awards. The Company expects to recognize that cost over the remaining weighted-average vesting period of approximately **4.3** **3.8** years. Compensation expense recorded related to restricted stock awards was **\$2,000** and **\$7,000** respectively, for the three and nine months ended **September 30, 2023** **March 31, 2024** and **\$2,000** and **\$7,000** respectively, for the three and nine months ended **September 30, 2022** **March 31, 2023**.

Director's Stock Compensation

Under the 2018 Plan, eligible directors are granted stock with a total market value of approximately \$45,000, and the Board Chair is granted stock with a total market value of approximately \$75,000. Committee chairs receive additional stock in an amount that varies depending upon the nature and frequency of the committee meetings. The audit committee chair receives additional stock with a market value of approximately \$10,000, non-financial risk and compensation committee chairs receive additional stock with a market value of approximately \$7,500, and the asset liability & investment, credit and nominating & governance all other committee chairs receive additional stock with a market value of approximately \$5,000. Stock is granted as of each annual meeting date and vest one day prior to the next annual meeting date. During the vesting period, the grants are considered participating securities.

Table of Contents

As of **September 30, 2023** **March 31, 2024**, there was **\$313,000** **\$76,000** of total unrecognized compensation expense related to director restricted stock awards which the Company expects to recognize over the remaining average vesting period of approximately **eight months** **0.2** years. Director compensation expense recorded related to the 2018 Plan totaled **\$120,000** and **\$312,000** respectively, **\$118,000** for the three and nine months ended **September 30, 2023** **March 31, 2024** and **\$98,000** and **\$196,000** respectively, **\$96,000** for the three and nine months ended **September 30, 2022** **March 31, 2023**.

Table of Contents

The Company measures and discloses certain assets and liabilities at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (that is, not a forced liquidation or distressed sale). GAAP establishes a consistent framework for measuring fair value and disclosure requirements about fair value measurements. Among other things, the accounting standard requires the reporting entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's estimates for market assumptions. These two types of inputs create the following fair value hierarchy:

- Level 1 – Quoted prices in active markets for identical instruments. An active market is a market in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.
- Level 2 – Observable inputs other than Level 1 including quoted prices in active markets for similar instruments, quoted prices in less active markets for identical or similar instruments, or other observable inputs that can be corroborated by observable market data.
- Level 3 – Unobservable inputs supported by little or no market activity for financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation; also includes observable inputs from nonbinding single dealer quotes not corroborated by observable market data.

The estimated fair value amounts of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize at a future date. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. In addition, reasonable comparability between financial institutions may not be likely due to the wide range of permitted valuation techniques and numerous estimates that must be made given the absence of active secondary markets for certain financial instruments. This lack of uniform valuation methodologies also introduces a greater degree of subjectivity to these estimated fair values.

The following methods were used to estimate the fair value of the class of financial instruments above:

Investment securities - The fair value of securities is based on quoted market prices, pricing models, quoted prices of similar securities, independent pricing sources, and discounted cash flows.

Limitations: The fair value estimates presented herein are based on pertinent information available to management as of **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**. The factors used in the fair values estimates are subject to change subsequent to the dates the fair value estimates are completed, therefore, current estimates of fair value may differ significantly from the amounts presented herein.

Items measured at fair value on a nonrecurring basis – The following table presents financial assets and liabilities measured at fair value on a nonrecurring basis and the level within the fair value hierarchy of the fair value measurements for those assets at the dates indicated:

			Total

[Table of Contents](#)

Individually evaluated loans - Fair values for individually evaluated loans are estimated using the fair value of the collateral less selling costs if the loan results in a Level 3 classification. Individually evaluated loan amounts are initially valued at the lower of cost or fair value. Individually evaluated loans carried at fair value generally receive specific

[Table of Contents](#)

allocations of the allowance for credit losses. For collateral dependent real estate loans, fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business, resulting in a Level 3 fair value classification. Individually evaluated loans are evaluated on a quarterly basis for additional credit losses and adjusted accordingly. The estimated fair values of financial instruments disclosed above follow the guidance in ASU 2016-01 which prescribes an "exit price" approach in estimating and disclosing fair value of financial instruments incorporating discounts for credit, liquidity, and marketability factors. Valuation is measured based on the fair value of the underlying collateral or the discounted cash expected future cash flows. Subsequent changes in the value of loans are included within the provision for credit losses - loans in the same manner in which it initially was recognized or as a reduction in the provision that would otherwise be reported. Loans are evaluated quarterly to determine if valuation adjustments should be recorded. The need for valuation adjustments arises when observable market prices or current appraised values of collateral indicate a shortfall in collateral value compared to current carrying values of the related loan. If the Company determines that the value of the individually evaluated loan is less than the carrying value of the loan, the Company either establishes an reserve as a specific component of the allowance for credit losses or charges off that amount. These valuation adjustments are considered nonrecurring fair value adjustments.

Equity securities – The Company measures equity securities without readily determinable fair values at cost less impairment (if any), plus or minus observable price changes from an identical or similar investment of the same issuer, with price changes recognized in earnings.

Assets measured at fair value using significant unobservable inputs (Level 3)

The following table presents the carrying value of equity securities without readily determinable fair values, as of **September 30, 2023** **March 31, 2024**, with adjustments recorded during the periods presented for those securities with observable price changes, if applicable. These equity securities are included in other investments on the balance sheet.

Under the two-class method, earnings available to common shareholders for the period are allocated between common shareholders and participating securities according to dividends declared (or accumulated) and participation rights in undistributed earnings, however the difference in the two-class method was not significant.

Note 10 – Segment Reporting

As defined in ASC 280, *Segment Reporting*, an operating segment is a component of an enterprise that engages in business activities from which it may earn revenues and incur expenses, whose operating results are regularly reviewed by the enterprise's chief operating decision makers to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available. We evaluate performance based on an internal performance measurement accounting system, which provides line of business results. This system uses various techniques to assign balance sheet and income statement amounts to the business segments, including allocations of income and expense. A primary objective of this measurement system and related internal financial reporting practices are to produce consistent results that reflect the underlying financial impact of the segments on the Company and to provide a basis of support for strategic decision making. The accounting policies applicable to our segments are those that apply to our preparation of the accompanying Consolidated Financial Statements. Based on these criteria, we have identified three segments: the community bank, CCBX, and treasury & administration. The community bank segment includes all community banking activities, with a primary focus of the community bank is on providing a wide range of banking products and services to consumers and small to medium sized businesses in the broader Puget Sound region in the state of Washington and through the Internet and our mobile banking application. We currently operate 14 full-service banking locations, 12 of which are located in Snohomish County, where we are the largest community bank by deposit market share, and two of which are located in neighboring counties (one in King County and one in Island County). The CCBX segment provides banking as a service ("BaaS") that allows our broker-dealer and digital financial service partners to offer their customers banking services. The CCBX segment has 2221 partners as of September 30, 2023 March 31, 2024. The treasury & administration segment includes investments, debt and other reporting items that are not specific to the community bank or CCBX segments.

[Table of Contents.](#)

The management accounting policies and processes utilized in compiling segment financial information are highly subjective and, unlike financial accounting, are not based on authoritative guidance similar to GAAP. As a result, reported segments and the financial information of the reported segments are not necessarily comparable with similar information reported by other financial institutions. Additionally, because of the interrelationships of the various segments, the information presented is not indicative of how the segments would perform if they operated as independent entities. Changes in management structure or allocation methodologies and procedures may result in future changes to previously reported segment financial data. Furthermore, changes in management structure or allocation methodologies and procedures may result in changes in reported segment financial data. The Company continues to evaluate its methodology on allocating items to the Company's various segments to support strategic business decisions by the Company's executive leadership. Income and expenses that are specific to a segment are directly posted to each segment. Additionally, certain

[Table of Contents.](#)

indirect expenses are allocated to each segment utilizing various metrics, such as number of employees, utilization of space, and allocations based on loan and deposit balances. We have implemented a transfer pricing process that credits or charges the community bank and CCBX segments with intrabank interest income or expense for the difference in average loans and average deposits, with the treasury & administration segment as the offset for those entries.

[Table of Contents.](#)

Summarized financial information concerning the Company's reportable segments and the reconciliation to the consolidated financial results is shown in the following tables for the periods indicated:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We are a bank holding company that operates through our wholly owned subsidiaries, Coastal Community Bank ("Bank") and Arlington Olympic LLC. We are headquartered in Everett, Washington, which by population is the largest city in, and the county seat of, Snohomish County. Our business is conducted through three reportable segments: The community bank CCBX and treasury & administration. The community bank segment includes all community banking activities, with a primary focus on providing a wide range of banking products and services to consumers and small to medium sized businesses in the broader Puget Sound region in the state of Washington and through the Internet and our mobile banking application. We currently operate 14 full-service banking locations, 12 of which are located in Snohomish County, where we are the largest community bank by

deposit market share, and two of which are located in neighboring counties (one in King County and one in Island County). The CCBX segment provides banking as a service ("BaaS") that allows our broker-dealer and digital financial service partners to offer their customers banking services. The CCBX segment has 22 partners as of **September 30, 2023** **March 31, 2024**. The treasury & administration segment includes investments, debt and other reporting items that are not specific to the community bank or CCBX segments. The Bank's deposits are insured in whole or in part by the Federal Deposit Insurance Corporation ("FDIC"). The Bank is subject to regulation by the Federal Reserve and the Washington State Department of Financial Institutions Division of Banks. The Federal Reserve also has supervisory authority over the Company.

As of **September 30, 2023** **March 31, 2024**, we had total assets of **\$3.68 billion** **\$3.87 billion**, total loans receivable of **\$2.97 billion** **\$3.20 billion**, total deposits of **\$3.29 billion** **\$3.46 billion** and total shareholders' equity of **\$284.5 million** **\$303.7 million**.

The following discussion and analysis presents our financial condition and results of operations on a consolidated basis. However, because we conduct all of our material business operations through the Bank, the discussion and analysis relate to activities primarily conducted by the Bank.

We generate most of our community bank revenue from interest on loans and CCBX revenue from BaaS fee income and interest on loans. Our primary source of funding for our loans is commercial and retail deposits from our customer relationships and from our partner deposit relationships. We place secondary reliance on wholesale funding, primarily borrowings from the Federal Home Loan Bank ("FHLB"). Less commonly used sources of funding include borrowings from the Federal Reserve System ("Federal Reserve") discount window, draws on established federal funds lines from unaffiliated commercial banks, brokered funds, which allows us to obtain deposits from sources that do not have a relationship with the Bank and can be obtained through certificate of deposit listing services, via the internet or through other advertising methods, or a one-way buy through an insured cash sweep ("ICS") account, which allows us to obtain funds from other institutions that have deposited funds through ICS. Our largest expenses are provision for credit losses - loans, BaaS loan expense, BaaS fraud expense, salaries and employee benefits, interest on deposits and borrowings, legal and professional expenses and data processing. Our principal lending products are commercial real estate loans, consumer loans, residential real estate, commercial and industrial loans and construction, land and land development loans.

Potential Regulatory Reforms in Response to Bank Failures

The failures of Silicon Valley Bank, Santa Clara, California, Signature Bank, New York, New York, and First Republic Bank, San Francisco, California, in March and May, 2023, may lead to regulatory changes and initiatives that could impact the Company. For example, President Biden has encouraged the federal banking agencies to adopt various reforms, including the completion of an incentive compensation rule for bank executives pursuant to Section 956 of the Dodd-Frank Act, in response to these bank failures. On April 28, 2023, the Federal Reserve and the FDIC issued reports on the failures of Silicon Valley Bank and Signature Bank, respectively, identifying the potential causes that the federal banking agencies may seek to address through changes to their supervisory and regulatory policies. Additionally, agency officials, including the Vice Chair for Supervision of the Board of Governors of the Federal Reserve System, have called for changes to the manner in which banks' capital, interest rate and liquidity risks are supervised and regulated. The extent of final actions to be taken by the regulatory agencies in responses to these bank failures, including the potential changes discussed by the Vice Chair or highlighted in the Federal Reserve and FDIC reports, remain unclear.

Small Business Lending Data Collection Rule

On March 30, 2023, the CFPB finalized a rule under section 1071 of the Dodd-Frank Act requiring lenders to collect and report data regarding small business lending activity. The Company is evaluating the impact of the new rule. The rule

[Table of Contents](#)

requires compliance by October 1, 2024, April 1, 2025, or January 1, 2026, depending on the number of covered small business loans that a covered lender originates.

On July 31, 2023, the U.S. District Court for the Southern District of Texas enjoined the CFPB from implementing and enforcing the rule with respect to American Bankers Association members, which include the Company, pending the U.S. Supreme Court's consideration of the constitutionality of the CFPB's funding structure in a separate case. The court expanded its stay to cover all covered financial institutions in October 2023.

London Interbank Offered Rate ("LIBOR") Transition

LIBOR, a benchmark interest rate that was widely referenced in the past, ceased publication after June 30, 2023. On December 16, 2022, the Federal Reserve Board adopted a final rule that implemented the Adjustable Interest Rate ("LIBOR") Act (the "LIBOR Act") by designating benchmark rates based on SOFR (Secured Overnight Financing Rate) to replace LIBOR formerly known as the London Interbank Offered Rate, in certain financial contracts after June 30, 2023. Congress enacted the LIBOR Act, which was signed into law in March 2022, to provide a uniform, nationwide solution for so-called tough legacy contracts that do not have clear and practicable provisions for replacing LIBOR after June 30, 2023. The LIBOR Act also establishes a litigation safe harbor for lenders that select a LIBOR replacement under certain situations, including the use of a replacement rate selected by the Federal Reserve. As required by the law, the final rule identifies replacement benchmark rates based on SOFR to replace overnight, one-month, three-month, six-month, and 12-month LIBOR in contracts subject to the Act. These contracts include U.S. contracts that do not mature before LIBOR ends and that lack adequate "fallback" provisions that would replace LIBOR with a practicable replacement benchmark rate. For more information on the Company's approach to LIBOR transition planning, please see the risk factors discussed in the Company's annual report on Form 10-K for the year ended December 31, 2022.

As of September 30, 2023, we have \$3.6 million in floating rate junior subordinated debentures to Coastal (WA) Statutory Trust I, which was formed for the issuance of trust preferred securities. These debentures have been tied to LIBOR, but beginning with the first rate adjustment after June 30, 2023, the rate is based off three-month CME Term SOFR plus 0.26%. The move to this alternate index may impact the rates we receive on loans and rates we pay on our junior subordinated debentures. We no longer issue any loans or debt tied to LIBOR.

Third Party Risk Management Guidance

On June 6, 2023, the FDIC, the Federal Reserve and the Office of the Comptroller of the Currency (the "OCC") issued final guidance providing sound principles that support a risk-based approach to third-party risk management. The Company is evaluating the impact of this guidance on its practices.

Community Reinvestment Act Reform

On October 24, 2023, the FDIC, the Federal Reserve and the OCC released a final rule revising the framework that they use to evaluate banks' records of community reinvestment under the Community Reinvestment Act ("CRA"). Under the revised framework, banks with assets of at least \$2 billion, such as the Bank, are considered large banks and will have their retail lending, retail services and products, community development financing, and community development services subject to periodic evaluation. Depending on a large bank's geographic concentrations of lending, the evaluation of retail lending may include assessment areas in which the bank extends loans but does not operate any deposit-taking facilities, in addition to assessment areas in which the bank has deposit-taking facilities. The rule becomes effective April 1, 2024. Most provisions of the final rule will apply beginning January 1, 2026, and the remaining provisions will apply beginning January 1, 2027. The Company is evaluating the impact of the final rule.

Financial Indicators

Below are a select number of financial highlights from our **third** **first** quarter.

- Net interest margin of 6.78% for the quarter ended March 31, 2024.
- Total loans, net of deferred fees decreased \$40.5 million increased \$173.5 million, or **1.3% 5.7%**, to **\$2.97 billion** \$3.20 billion for the quarter ended **September 30, 2023** **March 31, 2024** as management sold we work to build back the CCBX portfolio with new loans, subject to enhanced credit standards, following several periods of shrinking this portfolio as part of our strategy to reduce risk, optimize the CCBX loan portfolio through higher quality new loan originations and strengthen the balance sheet through enhanced credit standards.
 - Community bank loans increased **\$71.6 million** \$53.1 million, or **4.2% 2.9%**, to **\$1.78 billion** \$1.88 billion.
 - CCBX loans decreased \$112.1 million increased \$120.3 million, or **8.7% 10.1%**, to **\$1.18 billion** \$1.32 billion.
- \$320.9 million** in Total of \$100.5 million CCBX loans were sold, sold during the quarter ended March 31, 2024 as management continued to sell loans as part of our strategy to reduce risk, optimize the CCBX loan portfolio through higher quality new loan originations and strengthen our balance sheet through enhanced credit standards.
- Deposits increased \$102.6 million, or 3.1%, to \$3.46 billion as of March 31, 2024 compared to \$3.36 billion as of December 31, 2023.
 - CCBX deposit growth of \$166.2 million, or 8.9%, to \$2.03 billion.

Table of Contents

- Deposits increased \$127.1 million, or 4.0%, to \$3.29 billion as of September 30, 2023 compared to June 30, 2023.
 - CCBX deposit growth of \$99.1 million, or 6.0%, to \$1.75 billion.
 - CCBX deposit growth is net of an additional **\$51.9 million** \$92.2 million in CCBX deposits that were transferred off balance sheet to provide increased **Federal Deposit Insurance Corporation ("FDIC")** insurance coverage purposes, compared to \$69.4 million for the quarter ended December 31, 2023. Amounts in excess of FDIC insurance coverage for those customers are transferred, using a third party facilitator/vendor sweep product, to participating financial institutions.
 - Community bank deposits increased \$28.0 million decreased \$63.6 million, or **1.9% 4.2%**, to **\$1.54 billion** \$1.43 billion.
 - We focus on growing and retaining less costly core deposits by not globally matching increases in rates on interest bearing deposits by our competitors and letting higher rate deposits run-off; additional exception pricing tactics were added as a strategy at the end of the first quarter of 2024 to retain and more effectively compete in the market.
 - Includes noninterest bearing deposits of **\$584.0 million** \$515.4 million or **38.0% 35.9%** of total community bank deposits.
 - Community bank cost of deposits was **1.31% 1.66%**.
 - Uninsured deposits of **\$599.0 million** \$495.6 million, or **18.2% 14.3%** of total deposits as of **September 30, 2023** **March 31, 2024**, compared to **\$632.1 million** \$558.6 million, or **20.0% 16.6%** of total deposits as of **June 30, 2023** **December 31, 2023**.
 - Liquidity/Borrowings as of **September 30, 2023** **March 31, 2024**:
 - Capacity to borrow up to **\$577.9 million** \$659.5 million from Federal Home Loan Bank and the Federal Reserve Bank discount window with no borrowings taken under these facilities during the quarter or **nine** **three** months ended **September 30, 2023** **March 31, 2024**.
 - Investment Portfolio as of **September 30, 2023** **March 31, 2024**:
 - Available for sale ("AFS") investments of **\$98.9 million**, \$41,000, compared to **\$98.2 million** \$99.5 million as of June 30, 2023 December 31, 2023, of which 99.7% are U.S. Treasuries, with a weighted average remaining life of 5 months 4.3 years as of **September 30, 2023** **March 31, 2024**. \$100.0 million in AFS U.S. Agency securities matured during the quarter ended March 31, 2024.
 - Held to maturity ("HTM") investments of **\$42.6 million** \$50.0 million, of which 100% are U.S. Agency mortgage backed securities held for CRA purposes. The carrying market value of the HTM investments is **\$1.7 million** more \$299,000 less than the fair carrying value, the weighted average remaining life is **18.6** **14.6** years as of **September 30, 2023** **March 31, 2024** and the weighted average yield is **5.00%** **5.46%** for the quarter ended **September 30, 2023**.
 - Net interest margin of 7.10% for the quarter ended September 30, 2023 March 31, 2024.
 - Cost of deposits of **3.14%** **3.49%** for the quarter ended **September 30, 2023** **March 31, 2024**.
 - Continued investment in technology to build and enhance the BaaS infrastructure, increase automation, enhance operational efficiency and productivity requires significant upfront expense, but is necessary for long-term success.
 - Decrease in net income driven by \$2.3 million in unanticipated expenses, net of income tax, (more information is provided on these expenses under "Results of Operations").

Deposits increased **\$127.1 million** \$102.6 million, or 4.0%, during the three months ended September 30, 2023 3.1% to \$3.46 billion as of March 31, 2024 compared to \$3.36 billion as of December 31, 2023. Fully insured IntraFi network reciprocal deposits increased \$56.1 million decreased \$3.4 million to **\$296.4 million** \$336.8 million as of **September 30, 2023** **March 31, 2024**, compared to **\$240.3 million** \$340.1 million as of **June 30, 2023** **December 31, 2023**. These fully insured sweep deposits allow the Bank to fully insure their larger customer deposits through a sweep and exchange of deposits with other financial institutions. As part of our plan to optimize and strengthen our balance sheet, we decreased loans receivable by \$40.5 million deferred fees increased \$173.5 million, or **1.3% 5.7%**, during the three months ended September 30, 2023 March 31, 2024 to \$3.20 billion, compared to \$3.03 billion at December 31, 2023. Community bank loans increased \$53.1 million, or 2.9%, and CCBX loans increased \$120.3 million, or 10.1%. The size of our CCBX loan portfolio increased during the quarter ended March 31, 2024 and we expect it to continue increasing as we work to grow the portfolio with loans that are subject to increased underwriting standards. CCBX loan growth is net of \$100.5 million in CCBX loans sold during the quarter ended March 31, 2024. We anticipate that

additional continue to monitor and manage the CCBX loan portfolio, and will continue to sell CCBX loans will be sold in the coming months as we continue working work to optimize strengthen the balance sheet by optimizing our CCBX portfolio through new partners, products and building on our existing relationships. We expect this process to take two to three quarters. At the same time we will be focused on increasing our efficiency and using technology to reduce future expense growth. Our liquidity position is supported by diligent management of our liquid assets and liabilities as well as maintaining access to alternative sources of funds. As of September 30, 2023 March 31, 2024 we had \$474.9 million \$515.1 million in cash on the balance sheet and the capacity to borrow up to \$577.9 million \$659.5 million from Federal Home Loan Bank and the Federal Reserve Bank discount window. We did not draw down on either facility at any point in the nine three months ending September 30, 2023 March 31, 2024. Cash on the balance sheet and borrowing capacity total \$1.05 billion \$1.17 billion and represented 32.0% 33.9% of total deposits and exceeded our \$599.0 million \$495.6 million in uninsured deposits as of September 30, 2023 March 31, 2024. Our AFS securities portfolio of \$41,000 has a weighted average remaining maturity of just 5 months and U.S. Treasury securities represent 99.7% of that portfolio as of September 30, 2023, 4 years, 4 months. Unrealized losses on the AFS securities portfolio were \$1.3 million, \$3,374, or 0.47% 0.001% of shareholders' equity as of September 30, 2023 March 31, 2024.

[Table of Contents](#)

As we continue to focus on our BaaS business, we intend to concentrate on working with larger partners and optimizing our CCBX loan portfolio so we can grow and advance our presence in the BaaS space. Our strategy for new CCBX partnerships is to focus on larger, more established partners, including national and publicly-traded companies with experienced management teams, existing customer bases and strong financial positions. This strategy will likely yield fewer, but larger, CCBX partnerships moving forward. We are being more intentional in our selection of products and partnerships that best serve our customers and shareholders in order to achieve our long term profitability objective. During the quarter ended September 30, 2023 we sold \$320.9 million in higher yielding CCBX loans that have a greater potential for credit deterioration in an effort to optimize our CCBX loan portfolio. As we work to optimize our CCBX loan portfolio through enhanced credit standards, we expect lower earnings in the short term with lower loan yields and compressed margins but we continue to focus on strengthening the portfolio with new loans that we believe will provide for long term stability and profitability objectives. We anticipate continuing to look for opportunities to grow our Company and will focus on the long term, holding down deposits costs when possible and managing expense through efficient use of technology.

Results of Operations

Net Income

Comparison of the quarter ended September 30, 2023 March 31, 2024 to the comparable quarter in the prior year

Net income for the three months ended September 30, 2023 March 31, 2024 was \$10.3 million \$6.8 million, or \$0.75 \$0.50 per diluted share, compared to \$11.1 million \$12.4 million, or \$0.82 \$0.91 per diluted share, for the three months ended September 30, 2022 March 31, 2023. The decrease in net income over the comparable period in the prior year was primarily attributable to a \$20.1 million \$13.9 million increase in interest expense due to an increase in average interest bearing deposits and an increase in cost of deposits as a result of higher interest rates, an increase in the provision for credit losses - loans of \$8.7 million \$39.5 million, related to CCBX loan growth, and \$5.4 million \$11.4 million more in noninterest expense, also largely related to CCBX loan growth, and increases in salary expense and professional fees fees and a number of unanticipated expenses incurred during the quarter ended March 31, 2024 described in more detail below. These increases in expense were partially offset by a \$33.2 million \$20.4 million increase in interest income and \$188,000 \$37.6 million increase in noninterest income. The increase in noninterest income, provision expense and noninterest expense are all largely related to increased CCBX loan and deposit activity. In accordance with GAAP, we recognize as revenue (1) the right to be indemnified or reimbursed for fraud losses on CCBX customer loans and deposits and (2) the right to be indemnified for credit losses by our partners for expected credit losses related to loans they originate and unfunded commitments from such loans. CCBX customer credit losses are recognized in the allowance for loan credit loss and fraud loss is recognized in BaaS noninterest expense. For more information on the accounting for BaaS allowance for credit losses, reserve for unfunded commitments, credit enhancements and fraud enhancements see the section titled "CCBX – BaaS Reporting Information."

Comparison During the quarter ended March 31, 2024, we incurred a number of unanticipated expenses. Below is a summary non-GAAP reconciliation of the nine months ended September 30, 2023 to financial effects of these items.

Non-GAAP Reconciliation of Unanticipated Expenses (dollars in thousands; unaudited)	Three Months Ended March 31, 2024		
	Actual	Unanticipated Expenses	Adjusted
Net interest income	\$ 60,936	\$ —	\$ 60,936
Provision for credit losses	(83,158)	(1,096)	(82,062)
Noninterest income	86,955	—	86,955
Noninterest expense ⁽¹⁾	(56,018)	(1,915)	(54,103)
Income before provision for income tax	8,715	(3,010)	11,725
Provision for income tax	(1,915)	662	(2,577)
Net income	\$ 6,800	\$ (2,348)	\$ 9,148

⁽¹⁾ Table below shows the comparable period in the prior year

Net income for the nine months ended September 30, 2023 was \$35.6 million, or \$2.61 per diluted share, compared to \$27.5 million, or \$2.04 per diluted share, for the nine months ended September 30, 2022. The increase in net income over the comparable period in the prior year was primarily attributable to a \$115.0 million increase in interest income and \$60.6 million increase in noninterest income. These were partially offset by an increase in the provision for credit losses - loans detail of \$77.8 million, related primarily to CCBX loan growth, \$54.3 million increase in interest expense and \$33.4 million more in noninterest expense. The increase in noninterest income, provision expense and unanticipated noninterest expense are largely related to CCBX loan and deposit growth. The increase shown in interest expense is related to higher average interest bearing deposits and an increase in cost table above:

Unanticipated noninterest expense:	
Audit and accounting services	\$ 849
Contract termination fee	600
Operational loss	122
Employment realignment costs	343
Total unanticipated noninterest expense items	\$ 1,915

[Table of deposits as a result of higher interest rates.](#) [Contents.](#)

Net Interest Income

Comparison of the quarter ended **September 30, 2023** **March 31, 2024** to the comparable quarter in the prior year

Net interest income for the three months ended **September 30, 2023** **March 31, 2024** was \$62.2 million \$60.9 million, compared to \$49.2 million \$54.5 million for the three months ended **September 30, 2022** **March 31, 2023**, an increase of \$13.0 million \$6.4 million, or 26.5% 11.8%. Yield on loans receivable was 10.84% 10.85% for the three months ended **September 30, 2023** **March 31, 2024**, compared to 8.46% 9.95% for the three months ended **September 30, 2022** **March 31, 2023**. The increase in net interest income compared to the quarter ended **September 30, 2022** **March 31, 2023** was largely related to increased yield on loans from growth in higher yielding loans, primarily from CCBX, and the overall increase in interest rates resulting from the Federal Open Market Committee ("FOMC") raising rates 2.25% 0.50% since **September 30, 2022** **March 31, 2023** to 5.50%, with the last increase during such period on July 26, 2023. As of **September 30, 2022** **March 31, 2023**, the FOMC had set the interest rates at 3.25% 5.00%. This increase in interest rates since then impacts our existing variable rate loans as well as rates on new loans. We continue to monitor the impact of these increases in interest rates. Total average loans receivable for the three months ended **September 30, 2023** **March 31, 2024** was \$3.06 billion \$3.14 billion, compared to \$2.45 billion \$2.71 billion for the three months ended **September 30, 2022** **March 31, 2023**.

Total interest and fees on loans totaled \$83.7 million \$84.6 million for the three months ended **September 30, 2023** **March 31, 2024** compared to \$52.3 million \$66.4 million for the three months ended **September 30, 2022** **March 31, 2023**. The \$31.3 million \$18.2 million increase in interest and fees on loans for the quarter ended **September 30, 2023** **March 31, 2024**, compared to the quarter ended **September 30, 2022** **March 31, 2023**, was largely due to increased yield on loans from growth in higher yielding loans, primarily from CCBX, combined with the overall increase in interest rates. After several quarters of selling loans with higher credit risk, we expect total interest and fees on loans to increase as volume increases, despite yields stabilizing, as we build back our CCBX portfolio with loans that have enhanced credit standards but lower yields, compared to previous periods when credit risk and loan yields were higher. Total loans receivable was \$2.97 billion \$3.20 billion at **September 30, 2023** **March 31, 2024**, compared to \$2.51 billion \$2.84 billion at **September 30, 2022** **March 31, 2023**. CCBX average loans receivable was \$1.31 billion \$1.27 billion for the quarter ended **September 30, 2023** **March 31, 2024**, compared to \$893.7 million \$1.06 billion for the quarter ended **September 30, 2022** **March 31, 2023**, an increase of \$415.7 million \$201.7 million, or 46.5% 19.0%. Average CCBX yield of 17.05% 17.34% was earned on CCBX loans for the quarter ended **September 30, 2023** **March 31, 2024**, compared to 13.96% 16.09% for the quarter ended **September 30, 2022** **March 31, 2023**. CCBX yield does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. The tables later in this section illustrate the impact of BaaS loan expense on CCBX loan yield. Also impacting the increase in loan interest is the increase

[Table of Contents.](#)

in interest rates on variable rate loans resulting from the FOMC raising rates, continued high interest rate environment. The FOMC has increased interest rates from 3.25% 5.00% as of **September 30, 2022** **March 31, 2023** to 5.50% as of **September 30, 2023** **March 31, 2024**. We continue to monitor the impact of these increases in interest rates. During the quarter ended **September 30, 2023** we sold \$320.9 million in higher yielding CCBX loans that have a greater potential for credit deterioration. As a result, we expect to see lower net income in the short term with lower loan yields and compressed margins but we will work to continue growing our CCBX portfolio with loans that we believe will strengthen the balance sheet and provide for long term stability and profitability.

Interest income from interest earning deposits with other banks was \$3.9 million \$4.8 million for the quarter ended **September 30, 2023** **March 31, 2024**, an increase of \$1.6 million \$1.7 million, or 70.9% 54.3%, due to an increase in balances and higher interest rates, compared to the quarter ended **September 30, 2022** **March 31, 2023**. The average balance of interest earning deposits invested with other banks for the three months ended **September 30, 2023** **March 31, 2024** was \$285.6 million \$350.9 million, compared to \$397.6 million \$271.7 million for the three months ended **September 30, 2022** **March 31, 2023**. The yield on these interest earning deposits with other banks increased 3.13% 0.86%, to 5.40% 5.48% compared to 2.27% 4.62% at **September 30, 2022** **March 31, 2023**. Interest income on investment securities increased \$212,000 \$481,000 to \$766,000 \$1.0 million at **September 30, 2023** **March 31, 2024**, compared to \$554,000 \$553,000 at **September 30, 2022** **March 31, 2023**. Average investment securities increased \$14.3 million \$13.1 million from \$103.7 million \$102.2 million for the three months ended **September 30, 2022** **March 31, 2023**, to \$118.0 million \$115.4 million for the three months ended **September 30, 2023** **March 31, 2024**, and, as a result of higher interest rates, average yield increased to 2.58% 3.60% for the three months ended **September 30, 2023** **March 31, 2024**, compared to 2.12% 2.19% for the three months ended **September 30, 2022** **March 31, 2023**. The increase in average investment securities is a result of purchasing additional U.S. Agency mortgage backed securities for CRA purposes. CRA securities are designated held-to-maturity ("HTM") and the weighted average yield of those securities was 5.00% 5.46% for the quarter ended **September 30, 2023** **March 31, 2024**.

Interest expense was \$26.1 million \$29.5 million for the quarter ended **September 30, 2023** **March 31, 2024**, a \$20.1 million \$13.9 million increase from the quarter ended **September 30, 2022** **March 31, 2023**. Interest expense on deposits was \$25.5 million \$28.9 million for the quarter ended **September 30, 2023** **March 31, 2024**, compared to \$5.7 million \$15.0

million for the quarter ended **September 30, 2022** **March 31, 2023**. The **\$19.7 million** **\$13.9 million** increase in interest expense on deposits was due to an increase of **\$561.9 million** **\$658.7 million** in interest bearing deposits as well as a **2.85%** **1.32%** increase in interest rates on deposit accounts. While we continue working to hold down deposit costs, any additional FOMC higher short-term interest rates for longer and future interest rate increases changes will increase impact our cost of deposits and result in higher interest expense on interest bearing deposits. Interest on borrowed funds was **\$651,000** **\$669,000** for the quarter ended **September 30, 2023** **March 31, 2024**, compared to **\$273,000** **\$662,000** for the quarter ended **September 30, 2022** **March 31, 2023**. The **\$378,000** increase in interest expense on borrowed funds from the quarter ended **September 30, 2022** is the result of an average balance increase of **\$19.7 million** in subordinated debt, which increased during the quarter ended December 31, 2022, and an increase in interest rates. Interest expense on interest bearing deposits increased compared to the quarter ended **September 30, 2022** **March 31, 2023** as a result of an increase in CCBX deposits that are tied to, and reprice when, the FOMC raises rates. Similarly, most of our CCBX loans also reprice when the FOMC raises interest rates. Interest expense is expected to increase as a result of the FOMC increasing rates. Any will be impacted by any additional FOMC interest rate increases will result changes in higher interest expense on interest bearing deposits which we expect will be primarily offset by higher interest rates on CCBX loans and excess cash invested in the Federal Reserve Bank or other banks future periods.

Net interest margin was **7.10%** **6.78%** for the three months ended **September 30, 2023** **March 31, 2024**, compared to **6.58%** **7.15%** for the three months ended **September 30, 2022** **March 31, 2023**. The **increase** **decrease** in net interest margin compared to the three months ended **September 30, 2022** **March 31, 2023** was largely due

[Table of Contents](#)

to an increase in total loans combined with higher interest rates on new and existing variable rate loans as they reprice. Average loans increased **\$609.4 million** compared to the three months ended **September 30, 2022**. Also contributing to the increase cost of deposits. Increases in net interest margin compared to the three months ended **September 30, 2022** was interest earning deposits invested in other banks, which earned an average rate of **5.40%** for the quarter ended **September 30, 2023**, compared to an average rate of **2.27%** for the quarter ended **September 30, 2022**. We expect that higher interest rates on interest bearing deposits by our competitors and the growth in higher cost CCBX deposits contributed to an overall increase in interest expense on interest bearing deposits. Additionally, the actions we took in an effort to strengthen our balance sheet by selling higher risk and higher yielding loans or letting such loans mature during the quarters ended **September 30, 2023**, **December 31, 2023** and **March 31, 2024** will continue to compress impact net interest margin as a result of our decision to increase rates on our interest bearing deposits in light of rate increases from our competitors and CCBX deposit pricing being tied to the Fed Funds rate future quarters.

Cost of funds was **3.18%** **3.52%** for the quarter ended **September 30, 2023** **March 31, 2024**, which is an increase of **2.33%** **1.33%** from the quarter ended **September 30, 2022** **March 31, 2023**. Cost of deposits for the quarter ended **September 30, 2023** **March 31, 2024** was **3.14%** **3.49%**, which was a **2.32%** **1.36%** increase, from **0.82%** **2.13%** for the quarter ended **September 30, 2022** **March 31, 2023**. These increases were largely due to an increase in higher cost CCBX deposits and a higher interest rate environment compared to **September 30, 2022** **March 31, 2023** as the FOMC raised the Fed funds rate **2.25%** **0.50%** from **September 30, 2022** **March 31, 2023** to **September 30, 2023** **March 31, 2024**. CCBX deposit growth also contributed to the increase in interest expense.

Total yield on loans receivable for the quarter ended **September 30, 2023** **March 31, 2024** was **10.84%** **10.85%**, compared to **8.46%** **9.95%** for the quarter ended **September 30, 2022** **March 31, 2023**. This increase in yield on loans receivable is primarily attributed to an increase in higher rate CCBX loans. For the quarter ended **September 30, 2023** **March 31, 2024**, average CCBX loans increased **\$415.7 million** **\$201.7 million**, or **46.5%** **19.0%**, with an average CCBX yield of **17.05%** **17.34%**, compared to **13.96%** **16.09%** at the quarter ended **September 30, 2022** **March 31, 2023**. CCBX yield does not

[Table of Contents](#)

include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. The tables later in this section illustrate the impact of BaaS loan expense on CCBX loan yield. Average community bank loans increased **\$193.7 million** **\$227.4 million**, or **12.4%** **13.8%**. Average yield on community bank loans for the three months ended **September 30, 2023** **March 31, 2024** was **6.20%** **6.46%** compared to **5.31%** **5.97%** for the three months ended **September 30, 2022** **March 31, 2023**.

The following tables (1) show the average yield on loans and cost of deposits by segment and also illustrates the impact of (2) illustrate how BaaS loan interest income is affected by BaaS loan expense on CCBX resulting in net BaaS loan income and the associated yield on loans for the periods indicated:

For the Three Months Ended				For the Three Months Ended						
		September 30, 2023	September 30, 2022			March 31, 2024	March 31, 2023			
		For the Three Months Ended				For the Three Months Ended				
		March 31, 2024				March 31, 2024

(1) CCBX yield on loans does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. To determine net BaaS loan income earned from CCBX loan relationships, the Company takes BaaS loan interest income and deducts BaaS loan expense to arrive at net

BaaS loan income which can be compared to interest income on the Company's community bank loans. See the section titled "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures" for a reconciliation of the impact of BaaS loan expense on CCBX yield on loans.

(2) Annualized calculations shown for periods presented.

For the three months ended September 30, 2023 March 31, 2024, net interest margin (net interest income divided by the average total interest earning assets) and net interest spread (average yield on total interest earning assets minus average cost of total interest bearing liabilities) were 7.10% and 6.04%, respectively, compared to 6.58% and 6.18%, respectively, for the three months ended September 30, 2022.

[Table of Contents](#)

bearing liabilities) were 6.78% and 5.79%, respectively, compared to 7.15% and 6.20%, respectively, for the three months ended March 31, 2023.

The following table presents an analysis of the average balances of net interest income, net interest spread and net interest margin for the periods indicated. Loan costs, net of fees included in interest income totaled \$2.0 million \$1.9 million and loan costs included in interest income totaled \$100,000 \$1.1 million for the three months ended September 30, 2023 March 31, 2024 and 2022, 2023, respectively. For the three months ended September 30, 2023 March 31, 2024 and 2022, 2023, the amount of interest income not recognized on nonaccrual loans was not material.

(1) Yields and costs are annualized.

(2) Includes loans held for sale and nonaccrual loans.

(3) Net interest margin represents net interest income divided by the average total interest earning assets.

(4) CCBX yield does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. See the section titled "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures" for a reconciliation of the impact of BaaS loan expense on CCBX loan yield.

(5) Net interest margin, net of BaaS loan expense includes the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements, servicing CCBX loans. A reconciliation of this non-GAAP measure is set forth in the section titled "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures."

(6) For presentation in this table, average balances and the corresponding average rates for investment securities are based upon historical cost, adjusted for amortization of premiums and accretion of discounts.

(7) Intrabank assets and liabilities are consolidated for period calculations and presented as intrabank asset, net or intrabank liability, net in the table above.

[Table of Contents](#)

The following table presents information regarding the dollar amount of changes in interest income and interest expense for the periods indicated for each major component of interest earning assets and interest bearing liabilities and distinguishes between the changes attributable to changes in volume and changes attributable to changes in interest rates. The table illustrates the **\$14.7 million** **\$6.1 million** increase in loan interest income that is attributed to an increase in loan rates and **\$16.6 million** **\$12.1 million** increase in loan interest income that is attributed to an increase in loan volume. For purposes of this table, changes attributable to both rate and volume that cannot be segregated have been allocated to volume.

Comparison of the nine months ended September 30, 2023 to the comparable period in the prior year

Net interest income for the nine months ended September 30, 2023, was \$179.1 million, compared to \$118.3 million for the nine months ended September 30, 2022, an increase of \$60.7 million, or 51.3%. Yield on loans receivable was 10.57% for the nine months ended September 30, 2023, compared 7.63% for the nine months ended September 30, 2022.

The increase in net interest income compared to the nine months ended September 30, 2022 was largely related to increased yield on loans from growth in higher yielding loans primarily from CCBX and higher interest rates. Total average loans receivable for the nine months ended September 30, 2023 was \$2.91 billion, compared to \$2.14 billion for the nine months ended September 30, 2022.

Interest and fees on loans totaled \$230.3 million for the nine months ended September 30, 2023 compared to \$122.1 million for the nine months ended September 30, 2022. The \$108.2 million increase in interest and fees on loans for the nine months ended September 30, 2023, compared to the nine months ended September 30, 2022, was largely due to increased yield on loans from growth in higher yielding CCBX loans and an overall increase in interest rates. CCBX average loans receivable grew to \$1.22 billion for the nine months ended September 30, 2023, compared to \$657.6 million for the nine months ended September 30, 2022, an increase of \$557.7 million, or 84.8%. Average CCBX yield of 16.74% was earned on CCBX loans for the nine months ended September 30, 2023, compared to 13.16% for the nine months ended September 30, 2022. CCBX yield does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. The tables later in this section illustrate the impact of BaaS loan expense on CCBX loan yield. Also impacting the increase in loan interest is the increase in interest rates on variable rate loans resulting from the FOMC raising rates from 3.25% as of September 30, 2022 to 5.50% as of September 30, 2023, with the most recent increase during such period on July 26, 2023. We continue to monitor the impact of these increases in interest rates.

[Table of Contents](#)

Interest income from interest earning deposits with other banks was \$9.7 million for the nine months ended September 30, 2023, an increase of \$6.0 million due to higher interest rates, despite a decrease in balances, compared to the nine months ended September 30, 2022. The average balance of interest earning deposits invested with other banks for the nine months ended September 30, 2023 was \$256.3 million, compared to \$578.9 million for the nine months ended September 30, 2022. This decrease was a result of increased loan demand. Additionally, the yield on these interest earning deposits with other banks increased 4.20%, compared to the nine months ended September 30, 2022. Interest income on investment securities increased \$784,000 to \$2.0 million, with a yield of 2.39% at September 30, 2023, compared to \$1.2 million, and a yield of 1.76%, at September 30, 2022. Average investment securities increased \$19.8 million from \$90.4 million for the nine months ended September 30, 2022 to \$110.2 million for the nine months ended September 30, 2023 as a result of purchasing additional securities to hold for CRA purposes, and average yield increased to 2.39% for the nine months ended September 30, 2023, compared to 1.76% for the nine months ended September 30, 2022.

Interest expense was \$63.1 million for the nine months ended September 30, 2023, a \$54.3 million increase from the nine months ended September 30, 2022. Interest expense on deposits was \$61.1 million for the nine months ended September 30, 2023, compared to \$7.9 million for the nine months ended September 30, 2022. The \$53.2 million increase in interest expense on deposits was due to an increase in average interest bearing deposits of \$676.9 million and an increase in interest rates. Interest on borrowed funds was \$2.0 million for the nine months ended September 30, 2023, compared to \$854,000 for the nine months ended September 30, 2022. The \$1.1 million increase in interest expense on borrowed funds from the nine months ended September 30, 2022 is the result of a \$19.7 million average balance increase in subordinated debt, which increased during the quarter ended December 31, 2022 partially offset by a decrease in average FHLB borrowings, which were paid off in full during the quarter ended March 31, 2022. The FOMC increased the Fed Funds rate 1.00% during the nine months ended September 30, 2023, with the most recent increase during such period on July 26, 2023. Interest expense is expected to increase as a result of the FOMC increasing rates and any additional FOMC interest rate increases will result in higher interest expense on interest bearing deposits which will compress net interest margin in future periods.

Net interest margin was 7.27% for the nine months ended September 30, 2023, compared to 5.61% for the nine months ended September 30, 2022. The increase in net interest margin compared to the nine months ended September 30, 2022 was largely a result of an increase in higher rate loans. Average loans increased \$772.1 million, compared to the nine months ended September 30, 2022. Also contributing to the increase in net interest margin compared to the nine months ended September 30, 2022 was a \$6.0 million increase in interest earned on interest earning deposits invested in other banks. These interest earning deposits earned an average rate of 5.04% for the nine months ended September 30, 2023, compared to an average rate of 0.84% for the nine months ended September 30, 2022. We expect that interest expense will increase and net interest margin will compress as we increase the interest rates on interest bearing deposits to compete with rates offered by our competitors and CCBX deposit pricing increases as a result of being tied to the Fed Funds rate. Additionally, the sale of higher risk and higher yielding loans during the quarter ended September 30, 2023 in an effort to optimize and strengthen the balance sheet is expected to further impact net interest margin in future quarters.

Cost of funds was 2.73% for the nine months ended September 30, 2023, compared to 0.44% for the nine months ended September 30, 2022. Cost of deposits for the nine months ended September 30, 2023 was 2.69%, which was a 2.28% increase, from 0.41% for the nine months ended September 30, 2022. These increases were largely due to an increase in interest rates and an increase in interest bearing deposits. CCBX deposit growth also contributed to the increase in interest expense.

Total yield on loans receivable for the nine months ended September 30, 2023 was 10.57%, compared to 7.63% for the nine months ended September 30, 2022. This increase in yield on loans receivable is primarily attributed to an increase in higher rate CCBX loans. For the nine months ended September 30, 2023, average CCBX loans increased \$557.7 million, or 84.8%, with an average CCBX yield of 16.74%, compared to 13.16% for the nine months ended September 30, 2022. CCBX yield does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. The tables later in this section illustrate the impact of BaaS loan expense on CCBX loan yield. In light of our efforts to optimize and strengthen the balance sheet by selling higher yield CCBX loans, total yield on loans may not continue increasing and average CCBX loans may decrease in the short term as we work to grow the CCBX portfolio with enhanced credit standards and lower potential for future credit deterioration. There was an increase in average community bank loans of \$214.4 million, or 14.5%, compared to the nine months ended September 30, 2022. Average yield on community bank loans for the nine months ended September 30, 2023 was 6.15% compared to 5.17% for the nine months ended September 30, 2022.

[Table of Contents](#)

The following tables show the average yield on loans and cost of deposits by segment and also illustrates the impact of BaaS loan expense on CCBX yield on loans:

For the Nine Months Ended

	September 30, 2023		September 30, 2022	
	Yield on Loans (2)	Cost of Deposits (2)	Yield on Loans (2)	Cost of Deposits (2)
(unaudited)				
Community Bank	6.15%	0.99%	5.17%	0.11%
CCBX (1)	16.74%	4.41%	13.16%	0.91%
Consolidated	10.57%	2.69%	7.63%	0.41%

(1) CCBX yield on loans does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. To determine net BaaS loan income earned from CCBX loan relationships, the Company takes BaaS loan interest income and deducts BaaS loan expense to arrive at net BaaS loan income which can be compared to interest income on the Company's community bank loans. A reconciliation of this non-GAAP measure is set forth in the section titled "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures."

(2) Annualized calculations shown for periods presented.

	For the Nine Months Ended			
	September 30, 2023		September 30, 2022

Less: BaaS loan expense	62,590	6.89 %	36,079	7.34 %
Net BaaS loan income (1)	\$ 89,541	9.85 %	\$ 28,642	5.82 %
Average BaaS Loans (3)	\$ 1,215,224		\$ 657,574	

(1) A reconciliation of this non-GAAP measure is set forth in the section titled "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures."

(2) Annualized calculations shown for periods presented.

(3) Includes loans held for sale.

For the nine months ended September 30, 2023, net interest margin (net interest income divided by the average total interest earning assets) and net interest spread (average yield on total interest earning assets minus average cost of total interest bearing liabilities) were 7.27% and 6.26%, respectively, compared to 5.61% and 5.32%, respectively, for the nine months ended September 30, 2022.

[Table of Contents](#)

The following table presents an analysis of the average balances of net interest income, net interest spread and net interest margin for the periods indicated. Loan fees included in interest income totaled \$4.4 million and \$3.9 million for the nine months ended September 30, 2023 and 2022, respectively. For the nine months ended September 30, 2023 and 2022, the amount of interest income not recognized on nonaccrual loans was not material.

⁽³⁾ Net interest margin represents net interest income divided by the average total interest earning assets.

⁽⁴⁾ CCBX yield does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. See the section titled "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures" for a reconciliation of the impact of BaaS loan expense on CCBX loan yield.

⁽⁵⁾ Net interest margin, net of BaaS loan expense includes the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. A reconciliation of this non-GAAP measure is set forth in the section titled "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures."

⁽⁶⁾ For presentation in this table, average balances and the corresponding average rates for investment securities are based upon historical cost, adjusted for amortization of premiums and accretion of discounts.

⁽⁷⁾ Intrabank assets and liabilities are consolidated for period calculations and presented as intrabank asset, net or intrabank liability, net in the table above.

[Table of Contents](#)

The following table presents information regarding the dollar amount of changes in interest income and interest expense for the periods indicated for each major component of interest earning assets and interest bearing liabilities and distinguishes between the changes attributable to changes in volume and changes attributable to changes in interest rates. The table illustrates the \$47.1 million increase in loan interest income that is attributed to an increase in loan rates and \$61.0 million increase in loan interest income that is attributed to an increase in loan volume. For purposes of this table, changes attributable to both rate and volume that cannot be segregated have been allocated to volume.

Provision for Credit Losses

The provision for credit losses - loans is an expense we incur to maintain an allowance for credit losses at a level that management deems appropriate to absorb inherent losses on existing loans. loans in accordance with GAAP. For a description of the factors taken into account by our management in determining the allowance for credit losses see "—Financial Condition—Allowance for Credit Losses."

The economic environment is continuously changing, with due to the bank failures earlier this year, pace of economic growth, inflation, higher interest rates, unemployment, global unrest, the war in Ukraine, and conflicts in the Middle East, the political uncertainty including a potential shutdown of the U.S. government, environment and trade issues that may impact the provision and therefore the allowance. Effective January 1, 2023 the Company implemented the CECL allowance model which calculates reserves over the life of the loan and is largely driven by portfolio characteristics, economic outlook, and other key methodology assumptions versus the incurred loss model, which is what we were previously using. Gross loans, excluding loans held for sale, totaled \$2.97 billion \$3.20 billion at September 30, 2023 and included \$3.3 million in PPP loans, which are 100% guaranteed, and are excluded from the provision for credit losses - loans calculation. March 31, 2024. The allowance for credit losses as a percentage of loans was 3.41% 4.35% at September 30, 2023 March 31, 2024, compared to 2.36% 3.14% at September 30, 2022 March 31, 2023.

Agreements with our CCBX partners provide for a credit enhancement provided by the partner which protects the Bank by indemnifying or reimbursing incurred losses. In accordance with accounting guidance, we estimate and record a provision for expected losses for these CCBX loans and reclassified negative deposit accounts. When the provision for credit losses - loans and provision for unfunded commitments is recorded, a credit enhancement asset is also recorded on the balance sheet through noninterest income (BaaS credit enhancements) in recognition of the CCBX partner's legal commitment to indemnify or reimburse losses. The credit enhancement asset is relieved as credit enhancement payments are received from the CCBX partner or taken from the partner's cash reserve account.

Table of Contents

Comparison of the quarter ended September 30, 2023 March 31, 2024 to the comparable quarter in the prior year

The provision for credit losses - loans for the three months ended September 30, 2023 March 31, 2024 was \$27.2 million \$79.5 million, compared to \$18.4 million \$43.5 million for the three months ended September 30, 2022 March 31, 2023. The increase in the Company's provision for credit losses - loans during the quarter ended September 30, 2023 March 31, 2024, is largely related to the provision for CCBX partner loans. During the quarter ended September 30, 2023 March 31, 2024, a \$26.5 million \$79.7 million provision for credit losses - loans was recorded for CCBX partner loans based on

Table of Contents

management's analysis. The factors used in management's analysis for community bank credit losses indicated that a provision recapture for credit losses - loans of \$664,000 \$199,000 was needed for the quarter ended September 30, 2023 March 31, 2024.

The following table shows the provision expense by segment for the periods indicated:

Three Months Ended

Three Months Ended			
(dollars in thousands; unaudited)	(dollars in thousands; unaudited)	September 30, 2023	September 30, 2022
Community bank	Community bank	\$ 664	\$ (238)
CCBX	CCBX	26,493	18,666
Total provision expense	Total provision expense	\$27,157	\$18,428

Net charge-offs for the quarter ended September 30, 2023 March 31, 2024 totaled \$36.8 million \$57.2 million, or 4.77% 7.34% of total average loans, compared to \$8.5 million \$32.3 million, or 1.38% 4.84% of total average loans, for the quarter ended September 30, 2022 March 31, 2023. Net charge-offs were up in 2023 2024 compared to 2022 2023 due to an increase in loans originated through CCBX partners. partners which have a higher level of expected losses than our community bank loans as reflected in the factors for allowance for credit losses. In accordance with GAAP, CCBX losses are recorded as charge-offs, but CCBX partner agreements provide for a credit enhancement that indemnifies or reimburses the Bank for net-charge-offs on CCBX loans and negative deposit accounts, except in accordance with the program agreement for one partner where the Company was responsible for credit losses on approximately 10% of a \$231.9 million \$317.8 million loan portfolio. At September 30, 2023 March 31, 2024, our portion of this portfolio represented \$23.2 million \$32.0 million in loans. Effective April 1, 2024 the agreement was modified and the Company is now responsible for 5% of the credit losses on this loan portfolio. For the three months ended September 30, 2023 March 31, 2024, \$36.8 million \$57.2 million of net charge-offs were recognized for CCBX loans and no \$11,000 net charge-offs were recognized on community bank loans. For the three months ended September 30, 2022 March 31, 2023, \$8.1 million \$32.3 million of net charge-offs were recognized on CCBX loans and \$408,000 \$45,000 of net charge-offs were recognized for community bank loans.

Although agreements with our CCBX partners provide for credit enhancements that provide protection to the Bank from credit and fraud losses by indemnifying or reimbursing incurred credit and fraud losses, if our partner is unable to fulfill their contracted obligations to replenish their cash reserve account then the Bank would be exposed to additional losses, as a result of this counterparty risk. If a CCBX partner does not replenish their cash reserve account then the Bank can declare the agreement in default, take over servicing and cease paying the partner for servicing the loan and providing credit enhancements. The Bank would write-off any remaining credit enhancement asset from the CCBX partner but would retain the full yield and any fee income on the loan portfolio going forward, and BaaS loan expense would decrease once default occurred and payments to the CCBX partner were stopped.

The following table shows the total charge-off activity by segment for the periods indicated:

Net charge-offs to average loans (1)	— %	11.16 %	4.77 %	0.10 %	3.59 %	1.38 %

(1) Annualized calculations shown for periods presented.

Comparison of the nine months ended September 30, 2023 to the comparable period in the prior year

The provision for credit losses - loans for the nine months ended September 30, 2023 was \$123.3 million, compared to \$45.5 million for the nine months ended September 30, 2022. The increase in the Company's provision for credit losses - loans during the quarter ended September 30, 2023, is largely related to the provision for CCBX partner loans due to significant loan growth and increased loss rates. During the nine months ended September 30, 2023, a \$122.3 million provision for credit losses - loans was recorded for loans originated through CCBX partners based on management's analysis. The factors used in management's analysis for community bank credit losses indicated that a provision for loan loss of \$1.0 million was needed for the nine months ended September 30, 2023.

[Table of Contents](#)

The following table shows the provision expense by segment for the periods indicated:

(dollars in thousands; unaudited)	Nine Months Ended	
	September 30, 2023	September 30, 2022
Community bank	\$ 1,045	\$ 214
CCBX	122,254	45,250
Total provision expense	\$ 123,299	\$ 45,464

Net charge-offs for the nine months ended September 30, 2023 totaled \$100.1 million, or 4.59% of total average loans, as compared to net charge-offs of \$14.8 million, or 0.93% of total average loans, for the nine months ended September 30, 2022. Net charge-offs increased in the first nine months of 2023 compared to the same period of 2022 as a result of the growth in loans originated through CCBX partners. In accordance with GAAP, CCBX losses are recorded as charge-offs, but CCBX partner agreements provide for a credit enhancement that indemnifies and CCBX partners reimburse the Bank for net-charge-offs on CCBX loans and negative deposit accounts, except in accordance with the program agreement for one partner where the Company is responsible for credit losses on approximately 10% of a \$231.9 million loan portfolio. At September 30, 2023, our portion of this portfolio represented \$23.2 million in loans. For the nine months ended September 30, 2023, \$100.0 million of net charge-offs were recognized for CCBX loans and \$54,000 of net charge-offs recognized for community bank loans. For the nine months ended September 30, 2022, \$14.4 million of net charge-offs were recognized for CCBX and \$375,000 of net charge-offs were recognized for community bank loans.

Noninterest Income

Our primary sources of recurring noninterest income are BaaS indemnification income, Baas program income and deposit service charges and fees. Noninterest income does not include loan origination fees, which are generally recognized over the life of the related loan as an adjustment to yield using the interest or similar method.

Summary of significant noninterest income for the three **and nine** months ended **September 30, 2023** **March 31, 2024** compared to the three **and nine** months ended **September 30, 2022** **March 31, 2023**

A description of our largest noninterest income categories are below:

BaaS Income. Our CCBX segment provides BaaS offerings that enable our broker dealer and digital financial service providers to offer their customers banking services. In exchange for providing these services, we earn fixed fees, volume-based fees and reimbursement of costs depending on the program agreement. In accordance with GAAP, we recognize the reimbursement of noncredit fraud losses on loans and deposits originated through partners and credit enhancements related to the allowance for credit losses and reserve for unfunded commitments provided by the partner as revenue in BaaS income. CCBX credit losses are recognized in the allowance for **loan loss credit losses -loans** and fraud losses are expensed in noninterest expense under BaaS fraud expense. Also in accordance with GAAP, we establish a credit enhancement asset for expected future credit losses through the recognition of BaaS credit enhancement revenue at the same time we establish an allowance for those loans though a provision for credit losses - loans. For more information on the accounting for BaaS allowance for credit losses, reserve for unfunded commitments, credit enhancements and fraud enhancements see the section titled "**CCBX – CCBX – BaaS Reporting Information.**"

[Table of Contents](#)

Our CCBX segment continues to evolve, and we now have **22** **21** relationships, at varying stages, as of **September 30, 2023** **March 31, 2024**. We continue to refine the criteria for CCBX partnerships and are exiting relationships where it makes sense and are focusing on expanding and developing relationships with larger and more established partners, with experienced management teams, existing customer bases and strong financial positions. The sale of **\$320.9 million** in certain CCBX loans during the **third and fourth quarters of 2023 and first quarter ended September 30, 2023 of 2024** is part of our strategy to strengthen the balance sheet and lower the overall potential credit risk in our loan portfolio. **We expect net** **These sales resulted in a tighter interest margin will tighten** in the **quarter ended March 31, 2024**, as higher quality loans yield less than higher risk loans and we also **expect the loans**. The size of our CCBX loan portfolio **will be smaller than in previous quarters while increased during the quarter ended March 31, 2024** and we expect it to continue increasing as we work to grow the portfolio with loans that are subject to increased underwriting standards. **We expect this process to take two to three quarters. At the same time** **we will be focused on increasing our efficiency and using technology to reduce future expense growth.**

The following table illustrates the activity and evolution in CCBX relationships for the periods presented.

Deposit Service Charges and Fees. Deposit service charges and fees include service charges on accounts, point-of-sale fees, merchant services fees and overdraft fees. Together they constitute the largest component of our noninterest income, outside of BaaS income.

Loan Referral Fees. We earn loan referral fees when we originate a variable rate loan and the borrower enters into an interest rate swap agreement with a third party to fix the interest rate for an extended period, usually 20 or 25 years. We recognize a loan referral fee for arranging the interest rate swap. By facilitating interest rate swaps to our clients, we are able to provide them with a long-term, fixed interest rate without the Bank assuming the interest rate risk. Interest rate volatility, swap rates, and the timing of loan closings all impact the demand for long-term fixed rate swaps. The recognition of loan referral fees fluctuates in response to these market conditions and as a result we may recognize more or less, or may not recognize any, loan referral fees in some periods. Current market conditions are making interest rate swap agreements less attractive in the higher rate environment.

Gain on Sales of Loans, net. Gain on sales of loans occurs when we sell certain CCBX loans to the originating partner, in accordance with partner agreements. We sold \$320.9 million in CCBX loans during the quarter ended September 30, 2023 and expect to continue selling CCBX loans over the next several months in an effort to optimize and strengthen our portfolio. Gain on sale of loans may also occur when we sell in the secondary market the guaranteed portion (generally

[Table of Contents](#)

75% of the principal balance) of the SBA and U.S. Department of Agriculture ("USDA") loans that we originate. This activity fluctuates based on SBA and USDA loan activity.

Unrealized (loss)/gain on equity securities, net. During the three and nine months ended September 30, 2023 March 31, 2024, we recognized an unrealized gain on equity securities of \$5,000 and \$199,000, respectively, \$15,000, compared to the same periods period ended September 30, 2022 March 31, 2023, when there was an unrealized loss/gain of \$133,000 and \$135,000, respectively, \$39,000 recognized. We hold \$2.9 million \$3.0 million in equity securities focused on entities providing products to the BaaS and financial services space.

Other. This category includes a variety of other income-producing activities, credit card fee income, wire transfer fees, interest earned on bank owned life insurance ("BOLI"), and SBA and USDA servicing fees.

Noninterest Expense

Generally, noninterest expense is composed of all employee expenses and costs associated with operating our facilities, obtaining and retaining customer relationships and providing bank services. The largest components of noninterest expense are BaaS loan and fraud expense and salaries and employee benefits. Noninterest expense also includes operational expenses, such as legal and professional expenses, data processing and software licenses, occupancy, points of sale expense, FDIC assessment, excise taxes, director and staff expenses, marketing and other expenses.

[Table of Contents](#)

Comparison of the quarter ended September 30, 2023 March 31, 2024 to the comparable quarter in the prior year

For the three months ended September 30, 2023 March 31, 2024, noninterest expense totaled \$56.5 million \$56.0 million, an increase of \$5.4 million \$11.4 million, or 10.6% 25.4%, compared to \$51.1 million \$44.7 million for the three months ended September 30, 2022 March 31, 2023. The increase of noninterest expenses was driven in part by approximately \$3.0 million in unanticipated expenses incurred during the quarter ended March 31, 2024 described under the heading "Results of Operations -Net Income—Comparison of the quarter ended March 31, 2024 to the comparable quarter in the prior year." Compared to the three months ended March 31, 2023, there was a \$977,000 increase in other expenses primarily due to expenses from exit costs associated with a fraud/compliance vendor of \$600,000 and an operational loss of \$122,000, a \$1.1 million increase in data processing and software licenses due to enhancements in technology and a \$116,000 increase in point of sale expenses which is attributed to increased CCBX activity.

The following table presents, for the periods indicated, the major categories of noninterest expense:

(dollars in thousands; unaudited)	Three Months Ended September 30,		Increase (Decrease)	Percent Change
	2023	2022		
Salaries and employee benefits	\$ 18,087	\$ 14,506	\$ 3,581	24.7 %

Summary of significant noninterest expense for the three and nine months ended September 30, 2023 March 31, 2024 compared to the three and nine months ended September 30, 2022 March 31, 2023

A description of our largest noninterest expense categories are below:

Salaries and Employee Benefits. Salaries and employee benefits are one of the largest components of noninterest expense and include payroll expense, incentive compensation costs, equity compensation, benefit plans, health insurance and payroll taxes. Salaries and employee benefits continue to increase primarily due to continued hiring staff for our CCBX segment and additional staff for our ongoing banking related growth initiatives. As our CCBX activities grow, we expect to continue to add employees to support these lines of business and to also automate our processes to reduce or slow future growth in hiring. During the three and nine months ended September 30, 2023 March 31, 2024 salaries and employee benefits included one time one-time expenses of \$494,000 \$344,000 for certain retirement costs and other expenses incurred as part of our initiative to manage costs going forward. This long-term strategy will focus on improving for enhanced efficiencies while holding staffing fairly level in 2024. As of September 30, 2023 March 31, 2024, we had 528,486 full-time equivalent employees, compared to 442,461 at September 30, 2022 March 31, 2023, a 19.5% 5.4% increase.

Legal and Professional Expenses. Legal and professional costs include legal, audit and accounting expenses, consulting fees, fees for recruiting and hiring employees, and IT related security expenses. These expenses fluctuate with the consulting costs related to risk management, development of contracts for CCBX customers, audit and accounting needs, and are impacted by our reporting cycle and timing of legal and professional services. The expenses also reflect the costs associated with our infrastructure enhancement projects to improve our processing, automate processes, reduce compliance

[Table of Contents](#)

costs and enhance our data management. The increase in legal and professional fees was related to data and risk management, building out our infrastructure and increased consulting expenses for projects and enhanced monitoring. We anticipate that our legal and professional fees will decline as projects have been completed and initiatives are achieved, with legal and professional fees leveling off to approximate first quarter 2023 levels starting in fourth quarter 2023. projects.

Data Processing and Software Licenses. Data processing and software licenses includes expenses related to obtaining and maintaining software required for our various functions. Data processing costs include all of our customer transaction processing and data storage, computer processing, and network costs. Data processing costs grow as we grow and add new products, customers and branches and enhance technology. Additionally, CCBX data processing expenses and software that aids in the reporting of CCBX activities and monitoring of transactions that helps to automate and create other efficiencies in reporting have resulted in increased expenses in the category. These expenses are expected to increase as we invest more in automated processing and as we grow product lines and our CCBX segment. We believe that these investments will give us the ability to hold staffing fairly level in 2024.

[Table of Contents](#)

Occupancy. Occupancy expenses include rent, utilities, janitorial and other maintenance expenses, property insurances and taxes. Also included is depreciation on building, leasehold, furniture, fixtures and equipment. Although our hybrid and remote workforce is increasing, which helps keep some occupancy expenses down, we do expect occupancy expenses to increase as we continue to grow.

Point of Sale Expenses. Point of sale expenses are incurred as part of the process that allows businesses to accept payment for goods or services. Generally, point of sale expense increases as point of sale activity increases, as does point of sale income which is recognized in other income.

FDIC Assessments. FDIC assessments are assessed to fund the DIF Deposit Insurance Fund ("DIF") to insure and protect the depositors of insured banks and to resolve failed banks. The assessment rate is based on a number of factors and recalculated each quarter. As deposits increase, the FDIC assessment expense will generally increase. However,

our rate has decreased in 2023 as a result of improvement in the various ratios that determine the rate at which insured deposits are assessed, compared to the comparable prior year period. On October 18, 2022 the FDIC finalized an increase of 2 basis points in the initial base deposit insurance assessment rates schedules, beginning with the first quarterly assessment period of 2023. The rise is intended to increase the reserve ratio of the Deposit Insurance Fund to 1.35%, the statutory requirement. The increase in the base rates will remain in place until the reserve ratio reaches or exceeds 2.0%. The reserve ratio is 1.15% as of December 31, 2023. The reserve ratio is negatively affected by growth in assets and bank failures.

Director and Staff Expenses. Director and staff expenses includes compensation for director service, continuing education for employees and other director and staff related expenses. As conferences and other professional events have resumed we have seen increased expenses related to employee travel, and continuing education.

Excise Taxes. Excise taxes are assessed on Washington state income and are based on gross income. Gross income is reduced by certain allowed deductions and income attributed to other states is also removed to arrive at the taxable base. Excise taxes increased as a result of increased income subject to excise taxes.

Marketing. Marketing and promotion costs are starting to increase as we deploy more branding and targeted advertising for the community bank and CCBX. We are using more cost-effective advertising options, but expect costs to increase as we expand our marketing plan.

Other. This category includes dues and memberships, office supplies, mail services, telephone, examination fees, internal loan expenses, services charges from banks, operational losses, directors and officer's insurance, donations, and miscellaneous other expenses. Provision for unfunded commitments is included in this category for the three and nine months ended September 30, 2022 and included as a provision/recapture for unfunded commitments as an expense/credit for the three and nine months ended September 30, 2023.

BaaS loan and fraud expense. Our CCBX segment provides BaaS offerings that enable our broker dealer and digital financial service providers to offer their customers banking services. Included in BaaS loan and fraud expense is partner loan expense including overdraft balances and BaaS fraud expense. Partner loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. BaaS fraud expense represents noncredit fraud losses on loans and deposits originated through partners. Fraud losses are recorded when incurred as losses in noninterest expense, and the reimbursement from the CCBX partner is recorded in noninterest income,

[Table of Contents](#)

resulting in a net impact of zero to the income statement. For more information on the accounting for BaaS loan and fraud expenses see the section titled "CCBX – BaaS Reporting Information."

The following table presents, for the periods indicated, the BaaS loan and fraud expenses:

		Three Months Ended		Nine Months Ended	
		Three Months Ended	Three Months Ended	Three Months Ended	Three Months Ended

Income Tax Expense

The amount of income tax expense we incur is impacted by the amounts of our pre-tax income, tax-exempt income and other nondeductible expenses. Deferred tax assets and liabilities are reflected at current income tax rates in effect for the

[Table of Contents](#)

period in which the deferred tax assets and liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes. Valuation allowances are established when necessary to reduce our deferred tax assets to the amount expected to be realized. The Company is subject to various state taxes that are assessed as CCBX activities and employees expand into other states, which has increased the overall tax rate used in calculating the provision for income taxes in the current and future periods. On August 16, 2022, President Biden signed into law the Inflation Reduction Act of 2022, which, among other things, implements a new 15% corporate alternative minimum tax for certain large corporations, a 1% excise tax on stock buybacks, and several tax incentives to promote clean energy and climate initiatives. These provisions were effective beginning January 1, 2023. Based on its current analysis of the provisions, we do not expect this legislation to have a material impact on our consolidated financial statements.

Comparison of the quarter ended September 30, 2023 March 31, 2024 to the comparable quarter in the prior year

For the three months ended September 30, 2023 March 31, 2024, income tax expense totaled \$2.8 million \$1.9 million, compared to \$3.0 million for the three months ended September 30, 2022 March 31, 2023. The \$180,000 \$1.1 million decrease in income tax expense is the result of slightly lower net income, partially offset by the addition of various state taxes that are being assessed as CCBX activities and employees expanding into other states, which has increased the overall tax rate used in calculating the provision for income taxes in the current and future periods. The effective tax rate was 21.3% 22.0% for the three months ended September 30, 2023 March 31, 2024, compared to 21.1% 19.7% for the three months ended September 30, 2022 March 31, 2023. The effective tax rate was higher for the three months ended September 30, 2023 March 31, 2024 due to the addition of various state taxes that are being assessed as CCBX activities and employees expand into other states.

Comparison of the nine months ended September 30, 2023 to the comparable period in the prior year

For the nine months ended September 30, 2023 income tax expense totaled \$9.7 million, compared to \$7.6 million for the nine months ended September 30, 2022. The \$2.1 million increase in income tax expense is the result of higher net income. Our effective tax rates for the nine months ended September 30, 2023 and 2022 were 21.4% and 21.6%, respectively.

Segment Information

As defined in Based on the criteria of ASC 280, *Segment Reporting*, an operating segment is a component of an enterprise that engages in business activities from which it may earn revenues and incur expenses, whose operating results are regularly reviewed by the enterprise's chief operating decision makers to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available. We evaluate performance based on an internal performance measurement accounting system, which provides line of business results. This system uses various techniques to assign balance sheet and income statement amounts to the business segments, including allocations of income and expense. A primary objective of this measurement system and related internal financial reporting practices are to produce consistent results that reflect the underlying financial impact of the segments on the Company and to provide a basis of support for strategic decision making. The accounting policies applicable to our segments are those that apply to our preparation of the accompanying Consolidated Financial Statements. Based on these criteria, we have identified three segments: the community bank, CCBX and treasury & administration. The primary focus of the community bank is on providing a wide range of banking products and services to consumers and small to medium sized businesses in the broader Puget Sound region in the state of Washington and through the Internet and our mobile banking application. We currently operate 14 full-service banking locations, 12 of which are located in Snohomish County, where we are the largest community bank by deposit market share, and two of which are located in neighboring counties (one in King County and one in Island County). The CCBX segment provides banking as a service ("BaaS") that allows our broker-dealer and digital financial service partners to offer their customers banking services. The CCBX segment provides banking as a service ("BaaS") that allows our broker-dealer and digital financial service partners to offer their customers banking services. The CCBX segment has 22 21 partners as of September 30, 2023 March 31, 2024, 19 that are active with two more currently in the testing or implementation stage as of March 31, 2024. The treasury & administration segment includes treasury management, overall administration and all other aspects of the Company.

The management accounting policies and processes utilized in compiling segment financial information are highly subjective and, unlike financial accounting, are not based on authoritative guidance similar to GAAP. As a result, Company's reported segments and the financial information of the reported segments are not necessarily comparable with similar information reported by other financial institutions. Additionally, because of the interrelationships of the various segments, the information presented is not indicative of how the segments would perform if they operated as independent entities. Changes in management structure or allocation methodologies and procedures may result in future changes to previously reported segment financial data. The Company continues to evaluate its methodology on allocating items to the Company's various segments to support strategic business decisions by the Company's executive leadership. The difference in total loans receivable and total deposits in the community bank and CCBX segments is recorded on the balance sheet of each segment as an intrabank asset or intrabank liability, with the treasury & administration segment as the offset to those entries. Income and expenses

[Table of Contents](#)

that are specific to a segment are directly posted to each segment. Additionally, certain indirect expenses are allocated to each segment utilizing various metrics, such as number of employees, utilization of space, and allocations based on loan and deposit balances. We have implemented a transfer pricing process that credits or charges the community bank and CCBX segments with intrabank interest income or expense

[Table of Contents](#)

for the difference in average loans and average deposits, with the treasury & administration segment as the offset for those entries. The accounting policies of the segments are the same as those described in "Note 1 – Description of Business and Summary of Significant Accounting Policies" in the accompanying notes to the consolidated financial statements included in the Company's most recently filed 10-K report.

Community bank total assets as of **September 30, 2023** **March 31, 2024** increased **\$175.0 million** **\$52.8 million**, or **10.8% 2.9%**, to **\$1.80 billion** **\$1.90 billion**, compared to **\$1.62 billion** **\$1.84 billion** as of **December 31, 2022** **December 31, 2023**. Loans receivable net of deferred fees for the community bank segment increased **\$169.9 million** **\$53.1 million**, or **10.5% 2.9%**, to **\$1.78 billion** **\$1.88 billion** as of **September 30, 2023** **March 31, 2024**, compared to **\$1.61 billion** **\$1.83 billion** as of **December 31, 2022** **December 31, 2023**. The

increase in community bank loans receivable is the result of gross loan growth of **\$170.8 million** **\$53.2 million**. Total community bank deposits decreased **\$750,000**, **\$63.6 million**, or **0.05% 4.24%**, to **\$1.54 billion** **\$1.43 billion**, as of **September 30, 2023** **March 31, 2024**, compared to **\$1.54 billion** **\$1.50 billion** as of **December 31, 2022** **December 31, 2023**. The decrease in community bank deposits was a result of pricing disciplines as some customer sought higher rate products elsewhere. Additional exception pricing tactics were added as a strategy at the end of the first quarter of 2024 to retain deposits and more effectively compete in the market. Our cost of deposits for the community bank was **1.31% 1.66%** for the three months ended **September 30, 2023** **March 31, 2024**.

CCBX total assets as of **September 30, 2023** **March 31, 2024** increased **\$490.2 million** **\$165.4 million**, or **37.6% 8.7%**, to **\$1.79 billion** **\$2.07 billion**, compared to **\$1.30 billion** **\$1.90 billion** as of **December 31, 2022** **December 31, 2023**. During the **nine** **three** months ended **September 30, 2023** **March 31, 2024**, **\$474.8 million** **\$101.3 million** in CCBX loans were transferred to loans held for sale, with **\$474.8 million** **\$100.5 million** in loans sold and **no** **\$797,000** loans remaining in loans held for sale as of **September 30, 2023** **March 31, 2024** and **December 31, 2022**. A portion of loans held for sale as of these loans were sold at par and a portion were sold with a gain on sale. Pricing is dependent upon the agreement with the partner. December 31, 2023. The Company sells CCBX loans to manage loan portfolio size by partner and by loan category, with such limits established and documented in the relevant partner agreements. Total CCBX loans receivable increased **\$169.9 million** **\$120.3 million**, or **16.8% 10.1%**, to **\$1.18 billion** **\$1.32 billion** as of **September 30, 2023** **March 31, 2024**, compared to **\$1.01 billion** **\$1.20 billion** as of **December 31, 2022** **December 31, 2023**. The increase in loans receivable is the result of increased activity with CCBX partners. During the quarter ended September 30, 2023, we After deliberately reduced our other consumer and other loans portfolio during the third and fourth quarters of 2023 in an effort to optimize our loan portfolio, and will work we are now working to continue growing build back the CCBX portfolio in future quarters with new loans, that have subject to enhanced credit standards, with lower potential risk of credit deterioration and are more aligned with our long term objectives. CCBX allowance for credit losses increased to **\$79.8 million** **\$117.9 million** as of **September 30, 2023** **March 31, 2024**, compared to **\$53.4 million** **\$95.4 million** as of **December 31, 2022** **December 31, 2023** as a result of increased loss rates and balances on CCBX loans which has increased the allowance calculation/requirement. CCBX partner agreements provide for, and the Company has collected in full, credit enhancements that cover the **\$36.8 million** and **\$100.0 million** **\$57.2 million** in net charge-offs on CCBX loans for the three and nine months ended **September 30, 2023** **March 31, 2024**. Total CCBX deposits increased **\$472.9 million** **\$166.2 million**, or **37.0% 8.9%**, to **\$1.75 billion** **\$2.03 billion**, compared to **\$1.28 billion** **\$1.86 billion** as of **December 31, 2022** **December 31, 2023** as a result of growth within the CCBX relationships. This does not include an additional **\$51.9 million** **\$92.2 million** in CCBX deposits that were transferred off balance sheet to provide for increased FDIC insurance coverage to certain customers. customers, compared to **\$69.4 million** at of December 31, 2023.

Treasury & administration total assets as of **September 30, 2023** **March 31, 2024** decreased **\$131.4 million** **\$106.3 million**, or **60.2% 1,101.5%**, to **\$86.7 million** **(\$96.7) million**, compared to **\$9.7 million** as of **December 31, 2023**. Total securities decreased **\$100.3 million**, or **66.7%**, to **\$50.1 million** as of **March 31, 2024**, compared to **\$218.0 million** **\$150.4 million** as of **December 31, 2022**. Total securities increased **\$43.1 million**, or **43.9%**, to **\$141.5 million** as of **September 30, 2023**, compared to **\$98.4 million** as of **December 31, 2022** December 31, 2023, as we increased the amount a result of CRA qualified securities we hold. maturing AFS securities. Total borrowings were **\$47.8 million** as of **March 31, 2024** and **\$47.7 million** as of **September 30, 2023** and **\$47.6 million** as of **December 31, 2022** December 31, 2023.

Comparison of the quarter ended September 30, 2023 March 31, 2024 to the comparable quarter in the prior year

Community Bank

Net interest income before intrabank interest expense for the community bank was \$22.3 million \$30.1 million for the quarter ended September 30, 2023 March 31, 2024, an increase of \$2.1 million \$5.8 million, or 10.2% 24.1%, compared to \$20.2 million \$24.2 million for the quarter ended September 30, 2022 March 31, 2023. The increase in net interest income is largely due to increased yield on loans resulting from loan growth and higher interest rates. As a result of the community bank having higher average loans than deposits for the quarter ended September 30, 2023 March 31, 2024 compared to the quarter ended September 30, 2022 March 31, 2023, intrabank interest expense for the community bank was \$3.0 million \$5.6 million for the quarter ended September 30, 2023 March 31, 2024, compared to intrabank interest income expense of \$441,000 \$1.1 million for the quarter ended September 30, 2022 March 31, 2023. There was a provision recapture for credit losses - loans for the community bank of \$664,000 \$199,000 for the quarter ended September 30, 2023 March 31, 2024, compared to a small recapture provision of \$238,000 \$428,000 for the quarter ended September 30, 2022 March 31, 2023. Net charge-offs to average loans for the community bank segment have remained consistently low and were 0.00% for the quarter ended September 30, 2023 March 31, 2024 and 0.10% 0.01% for the quarter ended September 30, 2022 March 31, 2023. Noninterest income for the community bank was \$1.2 million, for the quarter ended September 30, 2023 March 31, 2024, an increase of \$23,000 \$91,000, or 2.0% 8.3%, compared to \$1.1 million for the quarter ended September 30, 2022 March 31, 2023. Noninterest expenses for the community bank increased \$1.7 million, decreased \$125,000, or 20.3% 1.4%, to \$10.1 million \$9.0 million as of September 30, 2023 March 31, 2024, compared to \$8.4 million \$9.1 million as of September 30, 2022 March 31, 2023. The increase in noninterest expense is largely due to increased salaries and employee benefits as a result of growth, higher software licenses maintenance and subscription costs related to new reporting software that helps monitor and assess risk and to automate and create efficiencies in reporting, increased legal and professional fees related to data and risk management, building out our infrastructure and increased consulting expenses for projects and enhanced monitoring and other expense increases related to growth.

CCBX

Net interest income for CCBX before intrabank interest income was \$35.9 million \$54.6 million for the quarter ended September 30, 2023 March 31, 2024, an increase of \$9.5 million \$12.3 million, or 36.1% 29.2%, compared to \$26.4 million \$42.2 million for the quarter ended September 30, 2022 March 31, 2023. The increase in net interest income is due to loan growth and higher interest rates from active CCBX relationships. During the quarter ended September 30, 2023 March 31, 2024 we sold \$320.9 million \$100.5 million in higher yielding CCBX loans that have a greater potential for credit deterioration in an effort to optimize our CCBX loan portfolio. portfolio by replacing loans sold with higher quality originated loans with enhanced credit standards. The impact of these sales and the changes we are making in an effort to optimize and strengthen the balance sheet are expected to be reflected in our earnings in future periods. We expect to see lower net income in the short term with lower loan yields and compressed margins but we will work to continue growing the CCBX portfolio with loans that we believe will strengthen the balance sheet and provide for long term stability and profitability. As a result of having higher average deposits than loans for the quarter ended September 30, 2023 March 31, 2024 compared to the quarter ended September 30, 2022 March 31, 2023 intrabank interest income for CCBX was \$5.1 million \$8.2 million for the quarter ended September 30, 2023 March 31, 2024, compared to \$1.3 million \$2.7 million for the quarter ended September 30, 2022 March 31, 2023. Provision for credit losses - loans was \$26.5 million \$79.7 million as a result of loan origination growth and as a result of increased loss rates and balances on CCBX loans which has impacted the allowance calculation for the quarter ended September 30, 2023 March 31, 2024, compared to \$18.7 million \$43.1 million for the quarter ended September 30, 2022 March 31, 2023. CCBX partner agreements provide for, and the Company has collected in full, credit enhancements that cover the \$36.8 million \$57.2 million in net charge-offs on CCBX loans for the quarter ended September 30, 2023 March 31, 2024. The \$26.5 million \$79.7 million provision on CCBX loans includes \$25.8 million \$78.5 million for partner loans with credit enhancement on them and \$664,000 \$1.3 million on CCBX loans that the Company is responsible for. In accordance with the program agreement, the Company was responsible for credit losses on approximately 10% of a \$231.9 million \$317.8 million loan portfolio, or \$23.2 million \$32.0 million in partner loans at September 30, 2023 March 31, 2024. Effective April 1, 2024, the agreement was modified and the Company is now responsible for 5% of the credit losses on this portfolio. Noninterest income for CCBX was \$33.3 million \$85.6 million for the quarter ended September 30, 2023 March 31, 2024, an increase of \$5,000 \$37.6 million, or 0.0% 78.1%, compared to \$33.3 million \$48.1 million for the quarter ended September 30, 2022 March 31, 2023, due to an increase of \$8.0 million \$37.4 million in BaaS credit enhancements to establish a credit enhancement asset for future credit losses due from our CCBX partners, \$8.9 million \$1.1 million decrease in BaaS fraud enhancements and \$759,000 \$1,250,000 in BaaS program income, which was the result of increased activity with broker dealers and digital financial service providers. Noninterest expenses for CCBX increased \$3.7 million \$9.5 million, or 10.6% 33.4%, to \$38.6 million \$37.9 million as of September 30, 2023 March 31, 2024, compared to \$34.9 million \$28.4 million as of September 30, 2022 March 31, 2023. The increase in noninterest expense is largely due to growth from active CCBX relationships resulting in an increase in BaaS loan expense, BaaS fraud expense from increased CCBX loan originations and increased salaries and benefits, for the quarter ended September 30, 2023 March 31, 2024, compared to the quarter ended September 30, 2022 March 31, 2023. For more information on the accounting for BaaS income and expenses see the section titled "CCBX – BaaS Reporting Information." Net interest income before intrabank interest expense for treasury & administration was \$4.0 million for the quarter ended September 30, 2023, an increase of \$1.4 million, or 56.2%, compared to \$2.6 million for the quarter ended September 30, 2022, as a result of increased interest rates. Noninterest income increased \$160,000, or 410.3%, to \$121,000 for the quarter ended September 30, 2023, compared to \$(39,000) for the quarter ended September 30, 2022. Noninterest expense was flat at \$7.9 million for the quarter ended September 30, 2023 and for the quarter ended September 30, 2022.

[Table of Contents](#)

Comparison of the nine months ended September 30, 2023 to the comparable period in the prior year

Net interest income before intrabank interest expense for the community bank was \$66.9 million for the nine months ended September 30, 2023, an increase of \$10.9 million, or 19.4%, compared to \$56.0 million for the nine months ended September 30, 2022. The increase in net interest income is largely due to increased yield on loans resulting from loan

growth and higher interest rates. As a result of the community bank having higher average loans than deposits for the nine months ended September 30, 2023 compared to the nine months ended September 30, 2022, intrabank interest expense for the community bank was \$6.6 million for the nine months ended September 30, 2023, compared to intrabank interest income of \$872,000 for the nine months ended September 30, 2022. Provision for credit losses - loans for the community bank was \$1.0 million for the nine months ended September 30, 2023, compared to \$214,000 for the nine months ended September 30, 2022. Net charge-offs to average loans for the community bank segment have remained consistently low and was 0.00% and 0.03% for the nine months ended September 30, 2023, and 2022, respectively. Noninterest income for the community bank was \$3.9 million for the nine months ended September 30, 2023, a decrease of \$186,000, or 4.6%, compared to \$4.1 million for the nine months ended September 30, 2022. Loan referral fees decreased \$127,000 for the nine months ended September 30, 2023 compared to the nine months ended September 30, 2022. The recognition of loan referral fees fluctuates in response to market conditions and as a result we may recognize more or less, or may not recognize any, loan referral fees in some periods. Additionally, in the nine months ended September 30, 2022, there was a \$135,000 net unrealized loss on equity securities recognized compared to an unrealized gain of \$199,000 in the nine months ended September 30, 2023. Noninterest expenses for the community bank increased \$5.0 million, or 21.1%, to \$28.7 million as of September 30, 2023, compared to \$23.7 million as of September 30, 2022. The increase in noninterest expense is largely due to increased salaries and employee benefits as a result of growth, higher software licenses maintenance and subscription costs related to new reporting software that helps monitor and assess risk and to automate and create efficiencies in reporting, and increased legal and professional fees associated with our infrastructure enhancement projects to improve processing, automate processes, reduce compliance costs, and enhance our data management.

Net interest income for CCBX before intrabank interest income was \$102.3 million for the nine months ended September 30, 2023, an increase of \$44.1 million, or 75.9%, compared to \$58.2 million for the nine months ended September 30, 2022. The increase in net interest income is due to loan growth from active CCBX relationships. During the quarter ended September 30, 2023, we sold \$320.9 million in higher yielding CCBX loans that have a greater potential for credit deterioration in an effort to optimize our CCBX loan portfolio. The impact of these sales and the changes we are making in an effort to optimize and strengthen the balance sheet are expected to be reflected in our earnings in future periods. We expect to see lower net income in the short term with lower loan yields and compressed margins but we will work to continue growing the CCBX portfolio with loans that we believe will strengthen the balance sheet and provide for long term stability and profitability. As a result of having higher average deposits than loans for the nine months ended September 30, 2023 compared to the nine months ended September 30, 2022 intrabank interest income for CCBX was \$11.2 million for the nine months ended September 30, 2023, compared to \$2.1 million for the nine months ended September 30, 2022. Provision for credit losses - loans was \$122.3 million for the nine months ended September 30, 2023, compared to \$45.3 million for the nine months ended September 30, 2022, as a result of loan origination growth and as a result of increased loss rates and balances on CCBX loans which has impacted the allowance calculation. Noninterest income for CCBX was \$138.1 million for the nine months ended September 30, 2023, an increase of \$60.4 million, or 77.8%, compared to \$77.7 million for the nine months ended September 30, 2022, due to an increase of \$74.1 million in BaaS credit enhancements related to the allowance for credit losses, \$16.4 million decrease in BaaS fraud enhancements and \$2.6 million increase in total BaaS program income, which was the result of increased activity with broker dealers and digital financial service providers. Noninterest expenses for CCBX increased \$24.4 million, or 31.4%, to \$102.2 million as of September 30, 2023, compared to \$77.8 million as of September 30, 2022. The increase in noninterest expense is largely due to growth from active CCBX relationships resulting in an increase in BaaS loan expense, BaaS fraud expense and increased salaries and benefits, for the nine months ended September 30, 2023, compared to the nine months ended September 30, 2022. Also contributing to the increase in noninterest expense is higher legal and professional fees associated with our infrastructure enhancement projects to improve processing, automate processes, reduce compliance costs, and enhance our data management. For more information on the accounting for BaaS income and expenses see the section titled "CCBX – BaaS Reporting Information." Treasury & Administration

Net interest income before intrabank interest expense for treasury & administration was \$9.9 million \$5.9 million for the nine months quarter ended September 30, 2023 March 31, 2024, an increase of \$5.7 million \$2.2 million, or 137.3% 59.0%, compared to \$4.2 million \$3.7 million for the nine months quarter ended September 30, 2022 March 31, 2023, as a result of increased interest rates. Noninterest income increased \$385,000, increase \$1,000, or 283.1% 0.7%, to \$521,000 \$138,000 for the nine months quarter ended September 30, 2023 March 31, 2024, compared to \$136,000 \$137,000 for the nine months quarter ended September 30, 2022 March 31, 2023. Noninterest expense increased \$4.0 million, or 22.0%, to \$22.1 million was \$9.1 million for the nine months quarter ended September 30,

[Table of Contents](#)

2023, compared to \$18.1 million March 31, 2024 and \$7.1 million for the nine months quarter ended September 30, 2022, largely as a result of increased salaries and employee benefits and legal and professional fees as a result of growth. March 31, 2023.

Financial Condition

Our total assets increased \$533.8 million \$111.9 million, or 17.0% 3.0%, to \$3.68 billion \$3.87 billion at September 30, 2023 March 31, 2024 from \$3.14 billion \$3.75 billion at December 31, 2022 December 31, 2023. The increase is primarily the result of \$339.8 million \$173.5 million increase in loans receivable during the nine three months ended September 30, 2023 March 31, 2024.

Loans Held For Sale

During the quarter ended September 30, 2023 March 31, 2024, \$285.0 million \$101.3 million in CCBX loans were transferred to loans held for sale, with \$320.9 million \$100.5 million in loans sold. A portion of these loans were sold at par and a portion were sold with a gain on sale of \$107,000. As of September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023 there were \$797,000 and no loans, respectively, in loans held for sale.

Loan Portfolio

Our primary source of income is derived through interest earned on loans. A substantial portion of our loan portfolio consists of commercial real estate loans and commercial and industrial loans in the Puget Sound region. Our consumer and other loans also represent a significant portion of our loan portfolio with the growth of our CCBX segment. Our loan portfolio represents the highest yielding component of our earning assets.

As of September 30, 2023 March 31, 2024, loans receivable totaled \$2.97 billion \$3.20 billion, an increase of \$339.8 million \$173.5 million, or 12.9% 5.7%, compared to December 31, 2022 December 31, 2023. Total loans receivable is net of \$7.4 million \$7.5 million in net deferred origination fees. The increase includes CCBX loan growth of \$169.9 million \$120.4 million, or 16.8% 10.1%, and community bank loan growth of \$170.8 million \$53.2 million, or 10.5% 2.9%.

Loans as a percentage of deposits were 90.2% 92.4% as of **September 30, 2023** **March 31, 2024**, compared to 93.3% 90.1% as of **December 31, 2022** **December 31, 2023**. We remain focused on serving our communities and markets by growing loans and funding those loans with customer deposits.

The following table summarizes our loan portfolio by type of loan as of the dates indicated:

(1) CCBX yield does not include the impact of BaaS loan expense. BaaS loan expense represents the amount paid or payable to partners for credit enhancements, fraud enhancements and servicing CCBX loans. To determine net BaaS loan income earned from CCBX loan relationships, the Company takes BaaS loan interest income and deducts BaaS loan expense to arrive at net BaaS loan income which can be compared to interest income on the Company's community bank loans. Net BaaS loan income is a non-GAAP measure. See the reconciliation of non-GAAP measures set forth in the section titled "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures" for the impact of BaaS loan expense on CCBX yield.

(2) Loan yield is annualized for the three months ended for each period presented and includes loans held for sale and nonaccrual loans.

Commercial and Industrial Loans. Commercial and industrial loans increased **\$18.6 million** **\$45.9 million**, or **6.0% 15.8%**, to **\$331.3 million** **\$337.2 million** as of **September 30, 2023** **March 31, 2024**, from **\$312.6 million** **\$291.3 million** as of **December 31, 2022** **December 31, 2023**. The increase in commercial and industrial loans receivable over **December 31, 2022** **December 31, 2023** was due to an increase of **\$48.2 million** in capital call lines partially offset by a **\$51.9 million** increase **\$2.2 million** decrease in other commercial and industrial loans partially offset by a decrease of **\$31.9 million** in capital call lines. Included in the commercial and industrial loan balance is **\$114.2 million** **\$135.7 million** and **\$146.0 million** **\$87.5 million** in capital call lines resulting from relationships with our CCBX partners as of **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**, respectively. As of **September 30, 2023** **March 31, 2024**, there were **\$58.9 million** **\$47.2 million** in CCBX other commercial loans, compared to **\$14.9 million** **\$54.3 million** at **December 31, 2022** **December 31, 2023**.

[Table of Contents](#)

Commercial and industrial loans are underwritten after evaluating and understanding the borrower's ability to operate profitably and effectively. These loans are primarily made based on the borrower's ability to service the debt from income.

[Table of Contents](#)

Most commercial and industrial loans are secured by the assets being financed or other business assets, such as accounts receivable, inventory or equipment, and we generally obtain personal guarantees on these loans. Commercial and industrial loans includes **\$48.6 million** and **\$45.1 million** in loans to financial institutions as of **September 30, 2023** **March 31, 2024** and **December 31, 2022**, respectively.

Also included in commercial and industrial loans is **\$3.3 million** and **\$4.7 million** in PPP loans as of September 30, 2023, and December 31, 2022, respectively. The impact of PPP loans on the Company's financial statements has significantly lessened as nearly all of the PPP loans have been paid off and/or forgiven. December 31, 2023.

Construction, Land and Land Development Loans. Construction, land and land development loans decreased **\$46.4 million** increased **\$3.8 million**, or **21.7% 2.4%**, to **\$167.7 million** **\$160.9 million** as of **September 30, 2023** **March 31, 2024**, from **\$214.1 million** **\$157.1 million** as of **December 31, 2022** **December 31, 2023**. The decrease increase is attributed to the completion of a few some new construction and development projects.

Unfunded loan commitments for construction, land and land development loans were **\$133.7 million** **\$91.2 million** at **September 30, 2023** **March 31, 2024**, compared to **\$142.5 million** **\$113.5 million** at **December 31, 2022** **December 31, 2023**. Although we have seen a strong commercial and residential real estate market in the Puget Sound region thus far in **2023** **2024**, the economic environment is continuously changing with the bank failures, earlier this year, inflation, higher interest rates, global unrest, the war in Ukraine, and conflicts in the Middle East, political uncertainty, including a potential shutdown of the U.S. government, and trade issues that have resulted in some economic uncertainty and slowing in construction lending.

Construction, land and land development loans are comprised of loans to fund construction, land acquisition and land development construction. The properties securing these loans are primarily located in the Puget Sound region and are comprised of both residential and commercial properties, including owner occupied properties and investor properties. As of **September 30, 2023** **March 31, 2024**, construction, land and land development loans included **\$91.4 million** **\$102.1 million** in commercial construction loans, **\$8.3 million** **\$8.2 million** in undeveloped land loans, **\$34.0 million** **\$28.8 million** in residential construction loans and **\$34.0 million** **\$21.8 million** in other construction, land and land development loans, compared to **\$100.7 million** **\$81.5 million** in commercial construction loans, **\$44.6 million** **\$7.9 million** in undeveloped land loans, **\$32.9 million** **\$34.2 million** in residential construction loans and **\$35.9 million** **\$33.5 million** in other construction, land and land development loans as of **December 31, 2022** **December 31, 2023**.

Residential Real Estate Loans. Our one-to-four family residential real estate loans increased **\$28.0 million** **\$32.9 million**, or **6.2% 7.1%**, to **\$477.1 million** **\$496.3 million** as of **September 30, 2023** **March 31, 2024**, from **\$449.2 million** **\$463.4 million** as of **December 31, 2022** **December 31, 2023** due to an increase of **\$20.8 million** **\$5.8 million** in community bank loans combined with an increase of **\$7.2 million** **\$27.1 million** in CCBX loans.

As of **September 30, 2023** **March 31, 2024**, there were **\$251.8 million** **\$265.1 million** in CCBX home equity loans included in residential real estate, compared to **\$244.6 million** **\$238.0 million** at **December 31, 2022** **December 31, 2023**, as a result of increased activity. These home equity lines of credit are secured by residential real estate and are accessed by using a credit card.

In the past, we have purchased residential mortgages originated through other financial institutions to hold for investment for purposes of diversifying our residential mortgage loan portfolio, meeting certain regulatory requirements and increasing our interest income. We last purchased residential mortgage loans in 2018. As of **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**, we held **\$9.0 million** and **\$9.4 million**, respectively, **\$8.1 million** in purchased residential real estate mortgage loans. These loans purchased typically have a fixed rate with a term of 15 to 30 years and are collateralized by one-to-four family residential real estate. We have a defined set of credit guidelines that

we use when evaluating these loans. Although purchased loans were originated and underwritten by another institution, our mortgage, credit, and compliance departments conduct an independent review of each underlying loan that includes re-underwriting each of these loans to our credit and compliance standards.

Like our commercial real estate loans, our residential real estate loans are secured by real estate, the value of which may fluctuate significantly over a short period of time as a result of market conditions in the area in which the real estate is located. Adverse developments affecting real estate values in our market areas could therefore increase the credit risk associated with these loans, impair the value of property pledged as collateral on loans, and affect our ability to sell the collateral upon foreclosure without a loss or additional losses.

Commercial Real Estate Loans. Commercial real estate loans increased **\$189.1 million** **\$39.0 million**, or **18.0%** **3.0%**, to **\$1.24 billion** **\$1.34 billion** as of **September 30, 2023** **March 31, 2024**, from **\$1.05 billion** **\$1.30 billion** as of **December 31, 2022** **December 31, 2023**.

[Table of Contents](#)

These increases, which occurred across the various segments of our portfolio, were due to our commitment to grow the portfolio in the Puget Sound region. We actively seek commercial real estate loans in our markets and our lenders are experienced in competing for these loans and managing these relationships.

[Table of Contents](#)

We make commercial mortgage loans collateralized by owner-occupied and non-owner-occupied real estate, as well as multi-family residential loans. The real estate securing our existing commercial real estate loans includes a wide variety of property types, such as manufacturing and processing facilities, business parks, warehouses, retail centers, convenience stores, hotels and motels, low rise office buildings, mixed-use residential and commercial, and other properties. We originate both fixed- and adjustable-rate loans with terms up to 20 years. Fixed-rate loans typically amortize over a 10 to 25 year period with balloon payments due at the end of five to ten years. Adjustable-rate loans are generally based on the prime rate and adjust with the prime rate or are based on term equivalent FHLB rates. At **September 30, 2023** **March 31, 2024**, approximately **32.6%** **35.9%** of the commercial real estate loan portfolio consisted of fixed rate loans. Commercial real estate loans represented **41.6%** **41.9%** of our loan portfolio at **September 30, 2023** **March 31, 2024** and are historically our largest source of revenue. As of **September 30, 2023** **March 31, 2024**, we held **\$43.1 million** **\$42.0 million** in purchased commercial real estate loans, compared to **\$42.4 million** **\$43.0 million** at **December 31, 2022** **December 31, 2023**. Our credit administration team has substantial experience in underwriting, managing, monitoring and working out commercial real estate loans, and remains diligent in communicating and proactively working with borrowers to help mitigate potential credit deterioration.

Consumer and Other. Consumer and other loans increased **\$151.7 million** **\$52.1 million**, or **24.9%** **6.4%**, to **\$760.5 million** **\$870.1 million**, from **\$608.8 million** **\$818.0 million** as of **December 31, 2022** **December 31, 2023**, as a result of growth in CCBX loans originated through our partners. We sold **\$320.9 million** **\$100.5 million** in CCBX loans during the quarter ended **September 30, 2023** **March 31, 2024**. We intentionally reduced continue to monitor and manage the CCBX other consumer loan portfolio, and other will continue to sell CCBX loans portfolio in an effort to optimize and strengthen our balance sheet and expect that additional loans will be sold in the coming months as we continue working work to optimize our strengthen the balance sheet. We will continue growing sheet by optimizing our CCBX portfolio with loans that we believe are lower risk through new partners, products and more aligned with building on our long term portfolio and profitability objectives. existing relationships.

CCBX consumer loans totaled **\$758.0 million** **\$868.7 million** as of **September 30, 2023** **March 31, 2024**, compared to **\$607.0 million** **\$816.4 million** at **December 31, 2022** **December 31, 2023**. CCBX consumer loans include installment loans, credit cards, lines of credit and other loans. Our community bank consumer and other loans totaled **\$2.5 million** **\$1.4 million** as of **September 30, 2023** **March 31, 2024**, compared to **\$1.7 million** **\$1.6 million** at **December 31, 2022** **December 31, 2023** and are comprised of personal lines of credit, automobile, boat, and recreational vehicle loans, and secured term loans.

Industry Exposure and Categories of Loans

We have a diversified loan portfolio, representing a wide variety of industries. Our major categories of loans are commercial real estate, consumer and other loans, residential real estate, commercial and industrial, and construction, land and land development loans. Together they represent **\$2.97 billion** **\$3.21 billion** in outstanding loan balances. When combined with **\$2.35 billion** **\$2.19 billion** in unused commitments the total of these categories is **\$5.33 billion** **\$5.40 billion**. However, total exposure on CCBX loans is subject to portfolio and partner maximum limits. See "Material Cash Requirements and Capital Resources" for maximum limits on CCBX loans by category.

The following table summarizes our community bank loan commitments by industry for our commercial real estate portfolio as of **September 30, 2023** **March 31, 2024**:

Nonperforming Assets

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on nonaccrual status when, in management's opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by applicable regulations. Loans may be placed on nonaccrual status regardless of whether or not such loans are considered past due. In general, we place loans on nonaccrual status when they become 90 days past due. We also place loans on nonaccrual status if they are less than 90 days past due if the collection of principal or interest is in doubt. Installment (closed end) consumer loans and revolving (open-ended loans, such as credit cards) originated through CCBX partners continue to accrue interest until they are charged-off at 120 days past due for installment loans (primarily unsecured loans to consumers) and 180 days past due for revolving loans (primarily credit cards). These consumer loans are reported out as nonperforming/substandard loans, 90+ days past due and still accruing. As a result of the type of loans (primarily consumer loans) originated through our CCBX partners, we anticipate that balances 90 days past due or more and still accruing will increase as those loans grow. We have, however, began a process of selling CCBX loans that we believe have a greater risk of credit deterioration and plan to grow the CCBX loan portfolio with loans that we believe have a lower risk of deterioration.

When loans are placed on nonaccrual status, all unpaid accrued interest is reversed from income and all interest accruals are stopped. Interest income is subsequently recognized only to the extent cash payments are received in excess of principal balance. Loans are returned to accrual status if we believe that all remaining principal and interest is fully collectible and there has been at least six months of sustained repayment performance since the loan was placed on nonaccrual status. We define nonperforming loans as loans on nonaccrual status and accruing loans 90 days or more past due. Nonperforming assets also include other real estate owned and repossessed assets.

We believe our lending practices and active approach to managing nonperforming assets has resulted in sound asset quality and timely resolution of problem assets. We have procedures in place to assist us in maintaining the overall credit quality of our loan portfolio. We have established underwriting guidelines, concentration limits and we also monitor our delinquency levels for any negative or adverse trends. We actively manage problem assets to reduce our risk for loss.

We had **\$43.5 million** **\$54.9 million** in nonperforming assets as of **September 30, 2023** **March 31, 2024**, compared to **\$33.2 million** **\$53.8 million** as of **December 31, 2022** **December 31, 2023**. This includes **\$36.2 million** **\$46.9 million** in CCBX loans more than 90 days past due and still accruing interest as of **September 30, 2023** **March 31, 2024**, compared to **\$26.1 million** **\$46.5 million** at **December 31, 2022** **December 31, 2023**. All of our nonperforming assets were nonperforming loans as of **September 30, 2023** **March 31, 2024** and **December 31, 2022**. Our nonperforming loans to loans receivable ratio was 1.47% at September 30, 2023, compared to 1.26% at December 31, 2022 December 31, 2023. The increase in nonperforming assets was due to a **\$10.1 million** **\$399,000** increase in CCBX partner loans that are 90 days or more past due and still accruing interest. Additionally, community bank nonaccrual loans increased **\$243,000** **\$628,000** during the **nine** **three** months ended **September 30, 2023** **March 31, 2024** to **\$7.3 million** and includes a multifamily loan for **\$6.9 million** which is well secured.

Table \$7.9 million, with the addition of Contents two loans partially offset by the payoff of two nonaccrual loans. Even though our balance of nonperforming assets increased, the overall percentage of nonperforming loans decreased. Our nonperforming loans to loans receivable ratio was 1.71% at March 31, 2024, compared to 1.78% at December 31, 2023.

Our community bank credit quality remains strong, as demonstrated by the low level of community bank charge-offs and nonperforming loan balance for the **nine** **three** months ended **September 30, 2023** **March 31, 2024**. CCBX loans have a higher level of expected losses than our community bank loans, which is reflected in the factors for the allowance for credit losses. Agreements with our CCBX partners provide for a credit enhancement which protects the Bank by indemnifying or reimbursing incurred losses, when accruing consumer loans originated through CCBX partners are charged-off at 120 days past due for installment loans (primarily unsecured loans to consumers) and 180 days past due for revolving loans (primarily credit cards).

As of **September 30, 2023** **March 31, 2024**, **\$34.7 million** **\$44.3 million** of the **\$36.2 million** **\$46.9 million** in nonperforming CCBX loans were covered by CCBX partner credit enhancements. Agreements with our CCBX partners provide for a credit enhancement which protects the Bank by indemnifying or reimbursing incurred losses. Under the agreement, the CCBX partner will indemnify or reimburse the Bank for its loss/charge-off on these loans.

Allowance for credit losses

The ACL is an estimate of the expected credit losses on financial assets measured at amortized cost. The ACL is evaluated and calculated on a collective basis for those loans which share similar risk characteristics. At each reporting period, the Company evaluates whether the loans in a pool continue to exhibit similar risk characteristics as the other loans in the pool and whether it needs to evaluate the allowance on an individual basis. The Bank must estimate expected credit losses over the loans' contractual terms, adjusted for

expected prepayments. In estimating the life of the loan, the Bank cannot extend the contractual term of the loan for expected extensions, renewals, and modifications, unless the extension or renewal

[Table of Contents](#)

options are included in the contract at the reporting date and are not unconditionally cancellable by the Bank. Because expected credit losses are estimated over the contractual life adjusted for estimated prepayments, determination of the life of the loan may significantly affect the ACL. The Company has chosen to segment its portfolio consistent with the manner in which it manages the risk of the type of credit.

- Community Bank Portfolio: The ACL calculation is derived for loan segments utilizing loan level information and relevant information from internal and external sources related to past events and current conditions. In addition, the Company incorporates a reasonable and supportable forecast.
- CCBX Portfolio: The Bank calculates the ACL on loans on an aggregate basis based on each partner and product level, segmenting the risk inherent in the CCBX portfolio based on qualitative and quantitative trends in the portfolio.

Also included in the ACL are qualitative reserves to cover losses that are expected, but in the Company's assessment may not be adequately represented in the quantitative method. For example, factors that the Company considers include environmental business conditions, borrower's financial condition, credit rating and the volume and severity of past due loans and non-accrual loans. Based on this analysis, the Company records a provision for **loan credit losses** to maintain the allowance at appropriate levels.

As of **September 30, 2023** **March 31, 2024**, the allowance for credit losses totaled **\$101.1 million** **\$139.3 million**, or **3.41%** **4.35%** of total loans. As of **December 31, 2022** **December 31, 2023**, the allowance for **loan credit losses** totaled **\$74.0 million** **\$117.0 million**, or **2.82%** **3.86%** of total loans. Effective January 1, 2023 the Company implemented the **CECL** allowance model which calculates reserves over the life

Table of the loan and is largely driven by portfolio characteristics, economic outlook, and other key methodology assumptions versus the incurred loss model, which is what we were previously using. As a result of implementing CECL, there was a one-time adjustment to the 2023 opening allowance balance of \$3.9 million. The day one CECL adjustment for community bank loans included a reduction of \$310,000 to the community bank allowance driven by the reversal of the unallocated balance and a reduction of \$340,000 related to the community bank unfunded commitment reserve also driven by the reversal of the unallocated balance. This was offset by an increase to the CCBX allowance for \$4.2 million. With the mirror image approach accounting related to the contingent credit enhancement asset for CCBX partner loans, there was a CECL day one increase to the indemnification asset in the amount of \$4.5 million. Net, the day one impact to retained earnings for the Bank's transition to CECL was an increase of \$954,000, excluding the impact of income taxes. [Contents](#)

The increase in the Company's allowance for credit losses for the quarter ended **September 30, 2023** **March 31, 2024** compared to **December 31, 2022** **December 31, 2023**, is largely related to the provision for CCBX partner loans. During the **nine three** months ended **September 30, 2023** **March 31, 2024**, a **\$122.3 million** **\$79.7 million** provision for credit losses - loans was recorded for CCBX partner loans based on management's analysis. The factors used in management's analysis for community bank credit losses indicated that a **provision recapture** for credit losses - loans of **\$1.0 million** **\$199,000** was needed for the **nine three** months ended **September 30, 2023** **March 31, 2024**. The economic environment is continuously changing with **the** **bank failures, earlier this year, inflation, higher interest rates, global unrest, the war in Ukraine, and conflicts in the Middle East, political uncertainty, including a potential shutdown of the U.S. government, and trade issues** that have resulted in some economic uncertainty. As described above, CCBX loans have a higher level of expected losses than our community bank loans, which is reflected in the factors for the allowance for credit losses.

[Table of Contents](#)

Agreements with our CCBX partners provide for a credit enhancement provided by the partner which protects the Bank by indemnifying and/or reimbursing incurred losses. In accordance with accounting guidance, we estimate and record a provision for expected losses for these CCBX loans and reclassified negative deposit accounts. When the provision for credit losses - loans and provision for unfunded commitments is recorded, a credit enhancement asset is also recorded on the balance sheet through noninterest income (BaaS credit enhancements) in recognition of the CCBX partner's legal commitment to indemnify or reimburse losses. The credit enhancement asset is relieved as credit enhancement payments and recoveries are received from the CCBX partner or taken from the partner's cash reserve account. BaaS fraud includes noncredit fraud losses on loans and deposits originated through partners. Agreements with our CCBX partners also provide protection to the Bank from fraud by indemnifying and/or reimbursing incurred fraud losses. Fraud losses are recorded when incurred as losses in noninterest expense, and the enhancement received from the CCBX partner is recorded in noninterest income, resulting in a net impact of zero to the income statement. CCBX partners also pledge a cash reserve account at the Bank which the Bank can collect from when losses occur. That account is then replenished by the partner on a regular interval. Although agreements with our CCBX partners provide for credit enhancements that provide protection to the Bank from credit and fraud losses by indemnifying or reimbursing incurred credit and fraud losses, if our partner is unable to fulfill their contracted obligations to replenish their cash reserve account then the Bank would be exposed to additional losses, as a result of this counterparty risk. If a CCBX partner does not replenish their cash reserve account then the Bank can declare the agreement in default, take over servicing and cease paying the partner for servicing the loan and providing credit enhancements. The Bank would write-off any remaining credit enhancement asset from the CCBX partner but would retain the full yield and any fee income on the loan portfolio going forward, and BaaS loan expense would decrease once default occurred and payments to the CCBX partner were stopped.

The following table presents, as of and for the periods indicated, net charge-off information by segment:

(dollars in thousands; unaudited)	Three Months Ended

Allowance to loans receivable									
Allowance to loans receivable	Allowance to loans receivable	3.41	%	2.36	%	3.41	%	2.36	%

The allowance for credit losses to nonaccrual loans ratio increased as of **September 30, 2023** **March 31, 2024**, compared to **September 30, 2022** **March 31, 2023** as a result of an increase of **\$262,000** **\$961,000** in nonaccrual community bank loans, combined with an increase of **\$41.8 million** **\$50.1 million** in the allowance for credit losses. The increase in the allowance for credit losses for the three and nine months ended **September 30, 2023** **March 31, 2024** compared to the three and nine months ended **September 30, 2022** **March 31, 2023**, is largely related to the increase in the allowance for loans originated through our CCBX partners. CCBX partner agreements provide for and the Company has collected in full, credit enhancements that cover for the **\$36.8 million** and **\$100.0 million** **\$57.2 million** in net charge-offs on CCBX loans for the three and nine months ended **September 30, 2023** **March 31, 2024**. At **September 30, 2023** **March 31, 2024**, the allowance for credit losses for CCBX partner loans totaled **\$79.8 million** **\$117.9 million**, compared to **\$39.1 million** **\$68.4 million** at **September 30, 2022** **March 31, 2023**.

The following table presents the loans receivable and allowance for credit losses by segment for the periods indicated:

	As of September 30, 2023			As of December 31, 2022			As of March 31, 2024			As of March 31, 2024			As of December 31, 2023

Although we believe that we have established our allowance for credit losses in accordance with GAAP and that the allowance for credit losses was adequate to provide for expected losses in the portfolio at all times shown above, future provisions for credit losses will be subject to ongoing evaluations of the risks in our loan portfolio. We continue to have a low level of charge-offs and nonperforming community bank loans, however, the economic environment is continuously changing with the bank failures, earlier this year, inflation, higher interest rates, global unrest, the war in Ukraine, and conflicts in the Middle East, political uncertainty, including a potential shutdown of the U.S. government, and trade issues that have resulted in some economic uncertainty. If economic conditions worsen then Washington state and Puget Sound region may

[Table of Contents](#)

experience a more severe economic downturn, and our asset quality could deteriorate, which may require material additional provisions for credit losses.

[Table of Contents](#)

Securities

We use our securities portfolio primarily as a source of liquidity and collateral that can be readily sold or pledged for public deposits or other business purposes. At **September 30, 2023** **March 31, 2024**, **70.0%** of our investment portfolio consisted of **U.S. Treasury securities**. The remainder of our securities portfolio was invested in **municipal bonds**, U.S. Agency collateralized mortgage obligations and U.S. Agency residential mortgage-backed securities. Because we target a loan-to-deposit ratio in the range of 90% to 100%, we prioritize liquidity over the earnings of our securities portfolio. At **September 30, 2023** **March 31, 2024**, our loan-to-deposit ratio was **90.2%** **92.4%** due to our strong growth in both loans and deposits. Our securities portfolio represented less than 5% of assets. To the extent our securities represent more than 5% of assets, absent an immediate need for liquidity, we may invest excess funds to provide a higher return.

As of **September 30, 2023** **March 31, 2024**, the amortized cost of our investment securities totaled **\$142.8 million** **\$50.1 million**, an increase a decrease of **\$41.5 million** **\$100.8 million**, or **41.0%** **66.8%**, compared to **\$101.3 million** **\$150.9 million** as of **December 31, 2022** **December 31, 2023**. The **increase** **decrease** in the securities portfolio was due to **\$100.0 million** of securities in the purchase of twelve securities for **\$41.6 million** AFS portfolio maturing during the **nine** **three** months ended **September 30, 2023** **March 31, 2024**. These securities were purchased for CRA purposes and placed in our held-to-maturity portfolio.

Our investment portfolio consists of only **\$41,000** in securities classified as AFS and, to a lesser amount, **\$50.0 million** in held-to-maturity. The carrying values of our investment securities classified as AFS are adjusted for unrealized gain or loss, and any gain or loss is reported on an after-tax basis as a component of other comprehensive income in shareholders' equity. As of **September 30, 2023** **March 31, 2024**, our AFS portfolio has an unrealized loss of **\$1.3 million**, **\$3,000**, compared to an unrealized loss of **\$3.0 million** **\$537,000** as of **December 31, 2022** **December 31, 2023**.

The following table summarizes the amortized cost and estimated fair value of our investment securities as of the dates shown:

		As of September 30, 2023		As of December 31, 2022						As of March 31, 2024		As of December 31, 2023

We have the following equity investments which do not have a readily determinable fair value and are held at cost minus impairment if any, plus or minus observable price changes in orderly transactions for an identical or similar investment of the same issuer. This method will be applied until the investments do not qualify for the measurement election (e.g., if the investment has a readily determinable fair value). We will reassess at each reporting period whether the equity investments without a readily determinable fair value qualifies to be measured at cost minus impairment.

- As of March 31, 2024 and December 31, 2023, we had a \$2.2 million equity interest in a financial specialized bank technology company as of September 30, 2023 and December 31, 2022, which consists of common stock and preferred shares, company.

Additionally, we held: We had a \$350,000 equity interest in a technology company as of September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023.

- We had a \$50,000 equity interest in an additional technology company as of March 31, 2024 and December 31, 2023.

The following table shows the activity in equity investments without a readily determinable fair value for the dates shown:

[Table of Contents](#)

(dollars in thousands; unaudited)	For the Three Months Ended	
	March 31,	2023
2024	2023	
Carrying value, beginning of period	\$ 2,622	\$ 2,572
Purchases	—	—
Observable price change	—	—
Carrying value, end of period	\$ 2,622	\$ 2,572

We invest in investment funds that are designed to help accelerate accelerating technology adoption at banks and have invested in three separate funds, by banks. These funds equity investments are carried held at fair value as reported by the funds. During the nine three months ended September 30, 2023 March 31, 2024, we contributed a net \$13,000 \$27,000 with investment funds designed to help accelerate technology adoption at banks, and recognized net gains losses of \$199,000, \$59,000, resulting in an equity interest of \$669,000 \$777,000 at September 30, 2023 March 31, 2024. The Company has committed up to \$713,000 \$643,000 in capital for these investment funds, however, the Company is not obligated to fund these commitments prior to a capital call.

Net change recognized in earnings	(59)	39
Carrying value, end of period	\$ 777	\$ 617

Other Assets

Deferred tax assets, net decreased \$14.1 million \$1.6 million to \$4.4 million \$2.2 million and other assets increased \$9.8 million \$88,000 to \$14.0 million \$12.1 million as of September 30, 2023 March 31, 2024, compared to December 31, 2022 December 31, 2023. This is the result of a change in estimate related to taxable income. Previously, we included credit enhancement income as taxable income when it was recorded as a receivable. Since the receivable is only realized when a future credit loss occurs and is reversed when a loss does not occur, we revisited the tax treatment. In our re-examination we adjusted the practice to tax the activity at the time the related losses are recognized and the corresponding receivable is realized as income. As a result of this change in estimate, pre-paid taxes, which is included in other assets, is \$9.8 million as of September 30, 2023 compared to \$1.3 million as of December 31, 2022, and deferred tax assets, net is \$4.4 million, as of September 30, 2023 compared to \$18.5 million as of December 31, 2022.

Deposits

We offer a variety of deposit products that have a wide range of interest rates and terms, including demand, money market, savings, and time accounts as well as IntraFi network reciprocal sweep deposits. Sweep deposits enable us to provide an FDIC insured deposit option to customers that have balances in excess of the FDIC insurance limit. This service trades our customers' funds as certificates of deposit or interest bearing demand deposits in increments under the FDIC insured amount to other participating financial institutions and in exchange we receive time deposit or interest bearing demand investments from participating financial institutions in a reciprocal agreement. We rely primarily on competitive pricing policies, convenient locations, electronic delivery channels (internet and mobile), and personalized service to attract new deposits and retain existing deposits. Additionally, we offer deposit products through our CCBX segment. CCBX deposits are generally classified as interest bearing negotiable order of withdrawal ("NOW") demand and money market accounts. CCBX deposit products allow us to offer a broader range of partner specific products, which include products designed to reach specific under-served or under-banked populations served by our CCBX partners.

Total deposits as of **September 30, 2023** **March 31, 2024** were **\$3.29 billion** **\$3.46 billion**, an increase of **\$472.2 million** **\$102.6 million**, or **16.8% 3.1%**, compared to **\$2.82 billion** **\$3.36 billion** as of **December 31, 2022** **December 31, 2023**. The increase in deposits was largely in core deposits, which increased **\$582.6 million** **\$105.9 million** to **\$3.27 billion** **\$3.45 billion** from **\$2.69 billion** **\$3.34 billion** at **December 31, 2022** **December 31, 2023**. We define core deposits as all deposits except time deposits and brokered deposits. The **\$582.6 million** **\$105.9 million** increase in core deposits was largely a result of customer movement from noninterest to interest bearing accounts. Our cost of deposits for the community bank was **1.31% 1.66%** for the three months ended **September 30, 2023**. BaaS-brokered deposits are now classified as NOW accounts due to a change in the relationship agreement with one of our partners; these deposits increased **\$167.7 million** to **\$269.2 million** as of **September 30, 2023** **March 31, 2024**. Additionally, during the quarter we started sweeping deposits for an additional CCBX partner as a result of deposit growth, which increased the amount of CCBX deposits that were transferred off balance sheet for increased FDIC insurance coverage, which increased to **\$51.9 million** **\$92.2 million** as of **September 30, 2023** **March 31, 2024**.

Included in total deposits is **\$1.75 billion** **\$2.03 billion** in CCBX deposits, an increase of **\$472.9 million** **\$166.2 million**, or **37.0% 8.9%**, compared to **\$1.28 billion** **\$1.86 billion** as of **December 31, 2022** **December 31, 2023**. CCBX customer deposit relationships include deposits with CCBX end customers, operating and non-operating deposit accounts. The deposits from our CCBX segment are generally classified as interest bearing NOW demand and money market accounts.

[Table of Contents](#)

Total noninterest bearing deposits as of **September 30, 2023** **March 31, 2024** were **\$651.8 million** **\$574.1 million**, a decrease of **\$123.2 million** **\$51.1 million**, or **15.9% 8.2%**, compared to **\$775.0 million** **\$625.2 million** as of **December 31, 2022** **December 31, 2023**. Noninterest bearing deposits represent **19.8% 16.6%** and **27.5% 18.6%** of total deposits for **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**, respectively.

Total interest bearing account balances, excluding time deposits, as of **September 30, 2023** **March 31, 2024** were **\$2.62 billion** **\$2.87 billion**, an increase of **\$604.2 million** **\$157.0 million**, or **30.0% 5.8%**, compared to **\$2.01 billion** **\$2.72 billion** as of **December 31, 2022** **December 31, 2023**. The **\$604.2 million** **\$157.0 million** increase is due in part to former BaaS-brokered deposits now being classified as NOW accounts due to a change in the relationship agreement with one of our partners in the first quarter of 2023, combined with CCBX growth in interest bearing deposits and partially offset by a decrease in community bank increase in interest bearing deposits of **\$118.3 million** **\$14.2 million**. Included in total deposits is **\$296.4 million** **\$336.8 million** in IntraFi network reciprocal NOW interest bearing demand and money market sweep accounts as of **September 30, 2023** **March 31, 2024**, which provides our customers with fully insured deposits through a sweep and exchange of deposits with other financial institutions. The decrease in community bank deposits is a result of managing our deposit rates during the quarter and letting some of our higher rate deposits run-off. We focus on growing and retaining less costly core deposits by not globally matching increases in rates on interest bearing deposits by our competitors and letting higher rate deposits run-off. We added some additional exception pricing tactics as a strategy at the end of the first quarter of 2024 to retain accounts and more effectively compete in the market.

Total time deposit balances as of **September 30, 2023** **March 31, 2024** were **\$20.6 million** **\$15.1 million**, a decrease of **\$8.8 million** **\$3.2 million**, or **30.0% 17.7%**, from **\$29.4 million** **\$18.4 million** as of **December 31, 2022** **December 31, 2023**. The decrease is due to the strong increase in core deposits, and our focus on core deposits and letting higher rate deposits run off as they mature. We have seen competitors increase rates on time deposits, and we have not globally matched their rates in response as we focus on growing and retaining less costly core deposits.

--------------------------------------	------	--------------------------------------	------	--------------------------------------	------	--------------------------------------	------

Average deposits for the three months ended **September 30, 2023** **March 31, 2024** were **\$3.21 billion** **\$3.32 billion**, an increase of **16.4%** **16.8%** compared to **\$2.76 billion** **\$2.85 billion** for the three months ended **September 30, 2022** **March 31, 2023**. The increase in average deposits was primarily due to an increase in core deposits, primarily in interest rate bearing deposits. We expect deposits to increase with continued growth in our primary market areas, the increase in commercial lending relationships for which we also seek deposit balances and the results of business development efforts by branch managers, treasury service personnel and lenders.

[Table of Contents](#)

The average rate paid on total deposits was **3.14%** **3.49%** for the three months ended **September 30, 2023** **March 31, 2024**, compared to **0.82%** **2.13%** for the three months ended **September 30, 2022** **March 31, 2023**. The average rate paid on NOW interest bearing demand and money market accounts increased **2.95%** **1.33%** for the three months ended **September 30, 2023** **March 31, 2024**, compared to the three months ended **September 30, 2022** **March 31, 2023**. The average rate paid on time deposits of less than \$100,000 increased **0.17%** **0.27%** for the three months ended **September 30, 2023** **March 31, 2024**, compared to the three months ended **September 30, 2022** **March 31, 2023**. The average rate paid on time deposits greater than \$100,000 increased **0.16%** **0.37%** for the three months ended **September 30, 2023** **March 31, 2024** compared to the three months ended **September 30, 2022** **March 31, 2023**. The average rate paid on savings increased **0.24%** **0.23%** for the three months ended **September 30, 2023** **March 31, 2024** compared to the three months ended **September 30, 2022** **March 31, 2023**. The overall higher average rate paid on interest bearing accounts in the three months ended **September 30, 2023** **March 31, 2024** compared to the three months ended **September 30, 2022** **March 31, 2023** is due to the **recent** **continued** **high** interest rate **increases** by the FOMC. While we continue working to hold down deposit costs, any additional FOMC interest rate increases will increase our cost of deposits and result in higher interest expense on interest bearing deposits. environment.

The average rate paid on total deposits was 2.69% for the nine months ended September 30, 2023, compared to 0.41% for the nine months ended September 30, 2022. The average rate paid on NOW and money market accounts increased 3.04% for the nine months ended September 30, 2023 compared to the nine months ended September 30, 2022. The average rate paid on time deposits of less than \$100,000 increased 0.03% for the nine months ended September 30, 2023, compared to the nine months ended September 30, 2022. The average rate paid on time deposits greater than \$100,000 decreased 0.68% for the nine months ended September 30, 2023 compared to the nine months ended September 30, 2022, due to the recognition of additional interest expense of \$130,000 during the nine months ended September 30, 2022 to correct interest on CDs from a previous period. The average rate paid on savings was 0.22% for the nine months ended September 30, 2023, compared to 0.04% for the nine months ended September 30, 2022. The overall higher average rate paid on interest bearing accounts in the nine months ended September 30, 2023 compared to the nine months ended September 30, 2022 is due to the recent interest rate increases by the FOMC.

(1) Annualized calculations shown for periods presented.

The ratio of average noninterest bearing deposits to average total deposits for the three and nine months ended September 30, 2023 March 31, 2024 was 21.7% and 24.1% 17.9%, respectively, compared to 29.3% and 37.7%, respectively, 27.3% for the three and nine months ended September 30, 2022 March 31, 2023.

Uninsured Deposits

The FDIC insures our deposits up to \$250,000 per depositor, per insured bank for each account ownership category. Deposits that exceed insurance limits are uninsured. At September 30, 2023 March 31, 2024, deposits totaled \$3.29 billion \$3.46 billion, of which total estimated uninsured deposits were \$599.0 \$495.6 million, or 18.2% 14.3% of total deposits, compared to \$835.8 \$558.6 million, or 29.7% 16.6% of total deposits as of December 31, 2022 December 31, 2023. At September 30, 2022 March 31, 2023, deposits totaled \$2.84 billion \$3.10 billion, of which total estimated uninsured deposits were \$867.7 \$768.3 million, or 30.6% 24.8% of total deposits. The Bank is using sweep deposits to provide our customers with fully insured deposits through a sweep and exchange of deposits with other financial institutions.

Estimated uninsured time deposits totaled \$1.9 million \$777,000 as of September 30, 2023 March 31, 2024. The table below shows the estimated uninsured time deposits, by account, for the maturity periods indicated:

(dollars in thousands; unaudited)	As of September 30, 2023 March 31, 2024

Borrowings

We have the ability to utilize short-term to long-term borrowings to supplement deposits to fund our lending and investment activities, each of which is discussed below.

Federal Reserve Bank Line of Credit. The Federal Reserve allows us to borrow against our line of credit through a borrower in custody agreement utilizing the discount window, which is collateralized by certain loans. As of **September 30, 2023** **March 31, 2024** and **September 30, 2022** **March 31, 2023**, total borrowing capacity of **\$442.2 million** **\$443.3 million** and **\$28.2 million** **\$465.3 million**, respectively, was available under this arrangement. As of **September 30, 2023** **March 31, 2024** and **2022**, **2023**, Federal Reserve advances totaled zero. Additional loans were pledged **during the first nine months of** **in** 2023 to significantly increase the borrowing capacity of the Bank in the event of a liquidity crisis.

[Table of Contents](#)

Federal Home Loan Bank Advances. The FHLB allows us to borrow against our line of credit, which is collateralized by certain loans. As of **September 30, 2023** **March 31, 2024** and **September 30, 2022** **March 31, 2023**, we had borrowing capacity of **\$135.7** **216.2** million and **\$136.6** **109.8** million, respectively, with the FHLB. As of **September 30, 2023** **March 31, 2024** and **2022**, **2023**, FHLB advances totaled zero.

The table below provides details on the FHLB advance borrowings for the periods indicated:

(dollars in thousands; unaudited)	As of and For the Three Months Ended September 30,		As of and For the Nine Months Ended September 30,

Balance outstanding at end of period:	\$ —	\$ —	\$ —	\$ —
Weighted average interest rate at end of period:	— %	— %	— %	— %

Junior Subordinated Debentures. In 2004, we issued \$3.6 million in junior subordinated debentures to Coastal (WA) Statutory Trust I (the "Trust"), of which we own all of the outstanding common securities. The Trust used the proceeds from the issuance of its underlying common securities and preferred securities to purchase the debentures issued by the Company. These debentures are the Trust's only assets and the interest payments from the debentures finance the distributions paid on the preferred securities. Prior to June 30, 2023, the debentures bore interest at a rate per annum equal to the 3-month LIBOR plus 2.10%. Beginning with rate adjustments subsequent to June 30, 2023, the rate is based off three-month CME Term SOFR plus 0.26%. The effective rate as of **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023** was **7.77%** **7.69%** and **6.87%** **7.75%**, respectively. We generally have the right to defer payment of interest on the debentures at any time or from time to time for a period not exceeding five years provided that no extension period may extend beyond the stated maturity of the debentures. During any such extension period, distributions on the Trust's preferred securities will also be deferred, and our ability to pay dividends on our common stock will be restricted. The Trust's preferred securities are mandatorily redeemable upon maturity of the debentures, or upon earlier redemption as provided in the indenture, subject to Federal Reserve approval. If the debentures are redeemed prior to maturity, the redemption price will be the principal amount and any accrued but unpaid interest. We unconditionally guarantee payment of accrued and unpaid distributions required to be paid on the Trust securities subject to certain exceptions, the redemption price with respect to any Trust securities called for redemption and amounts due if the Trust is liquidated or terminated.

Subordinated Debt. In August 2021, the Company issued a subordinated note in the amount of \$25.0 million. The note matures on September 1, 2031, and bears interest at the rate of 3.375% per year for five years and, thereafter, reprices quarterly beginning September 1, 2026, at a rate equal to the three-month SOFR plus 2.76%. The five-year 3.375% interest period ends on September 1, 2026. We may redeem the subordinated note, in whole or in part, without premium or penalty, in principal redemption multiples of \$1,000, after August 18, 2026, subject to any required regulatory approvals. Proceeds were used to repay \$10.0 million in existing 5.65% interest subordinated debt on August 9, 2021 and \$11.5 million was contributed to the Bank as capital during the quarter ended September 30, 2021.

In November 2022, the Company issued subordinated notes in the aggregate amount of \$20.0 million. The notes mature on November 1, 2032, and bear interest at the rate of 7.00% per year for five years and, thereafter, reprices quarterly beginning November 1, 2027, at a rate equal to the three-month SOFR plus 2.9%. The five-year 7.00% interest period ends on November 1, 2027. We may redeem the subordinated notes, in whole or in part, without premium or penalty, in principal redemption multiples of \$1,000, after November 1, 2027, subject to any required regulatory approvals.

[Table of Contents](#)

Liquidity and Capital Resources

Liquidity Management

Liquidity refers to our capacity to meet our cash obligations at a reasonable cost. Our cash obligations require us to have cash flow that is adequate to fund loan growth and maintain on-balance sheet liquidity while meeting present and future obligations of deposit withdrawals, borrowing maturities and other contractual cash obligations. In managing our cash flows, management regularly confronts situations that can give rise to increased liquidity risk. These include funding mismatches, market constraints in accessing sources of funds and the ability to convert assets into cash. Changes in economic conditions or exposure to credit, market, and operational, legal and reputational risks also could affect the Bank's liquidity risk profile and are considered in the assessment of liquidity management. Deposits obtained through our CCBX segment are a significant source of liquidity for us. If a relationship with a large CCBX partner terminates, the exit of those deposits could have an adverse impact on liquidity. Partner program agreements govern the relationship and

are valid for a given period of time. Prior to exiting, the partner would need to provide us adequate notice as stipulated in the agreement that they were not going to renew the program agreement and intend to move the deposits. The movement to an alternate BaaS provider is cumbersome and would be over a period of time, which would allow us the opportunity to put alternate liquidity in place; those options are more fully discussed below. As of **September 30, 2023** **March 31, 2024**, we have **12** partner with deposits that are in excess of 10% of total deposits and represent **28% 44%** of total deposits.

We continually monitor our liquidity position to ensure that our assets and liabilities are managed in a manner to meet all reasonably foreseeable short-term, long-term and strategic liquidity demands. Management has established a comprehensive process for identifying, measuring, monitoring and controlling liquidity risk. Because of its critical importance to the viability of the Bank, liquidity risk management is fully integrated into our risk management processes. Critical elements of our liquidity risk management include: effective corporate governance consisting of oversight by the board of directors and active involvement by management; appropriate strategies, policies, procedures, and limits used to manage and mitigate liquidity risk; comprehensive liquidity risk measurement and monitoring systems that are commensurate with the complexity of our business activities; active management of intraday liquidity and collateral; an appropriately diverse mix of existing and potential future funding sources; adequate levels of readily available cash, deposits and highly liquid marketable securities free of legal, regulatory, or operational impediments, that can be used to meet liquidity needs in stressful situations; contingency funding policies and plans that sufficiently address potential adverse liquidity events and emergency cash flow requirements; and internal controls and internal audit processes sufficient to determine the adequacy of the Bank's liquidity risk management process. Unlike many industrial companies, substantially all of our assets and liabilities are monetary in nature. As a result, interest rates have a more significant impact on our performance than the effects of general levels of inflation. Interest rates may not necessarily move in the same direction or in the same magnitude as the prices of goods and services. However, other operating expenses do reflect general levels of inflation.

Our liquidity position is supported by management of our liquid assets and liabilities and access to alternative sources of funds. Our liquidity requirements are met primarily through our deposits, FHLB advances and the principal and interest payments we receive on loans and investment securities. Cash on hand, cash at third-party banks, investments available-for-sale and maturing or prepaying balances in our investment and loan portfolios are our most liquid assets. Other sources of liquidity that are routinely available to us include funds from retail, commercial, and BaaS deposits, advances from the FHLB and proceeds from the sale of loans. Less commonly used sources of funding include borrowings from the Federal Reserve discount window, draws on established federal funds lines from unaffiliated commercial banks, funds from online rate services, brokered deposits, a one-way buy through an ICS account, and the issuance of debt or equity securities. We believe we have ample liquidity resources to fund future growth and meet other cash needs as necessary and are closely monitoring liquidity in this uncertain economic environment.

The Company is a corporation separate and apart from our Bank and, therefore, must provide for its own liquidity, including liquidity required to meet its debt service requirements on its subordinated note and junior subordinated debentures. The Company's main source of cash flow has been through equity and debt offerings. The Company has consistently retained a portion of the funds from equity and debt offerings so that it has sufficient funds for its operating and debt costs. **During the nine months ended September 30, 2023, the Company contributed \$15.0 million to the Bank.** The Company currently holds **\$6.5 million** **\$5.3 million** in cash for debt servicing and operating purposes. In addition, the Bank can declare and pay dividends to the Company to meet the Company's debt and operating expenses. There are statutory and regulatory limitations that affect the ability of the Bank to pay dividends to the Company. We believe that these limitations will not impact the ability of the Bank to pay dividends to the Company to meet ongoing operating needs.

[Table of Contents](#)

For contingency purposes, the Company maintains a minimum level of cash to fund one year's projected operating cash flow needs and targets a minimum liquidity ratio of 10%. Both of these minimum liquidity levels are on-balance sheet sources. Per policy and the Bank's liquidity contingency plan, in event of a liquidity emergency the Bank can utilize wholesale funds in an amount up to 30% of assets. Since the Bank uses only a small portion of its borrowing or wholesale funding capacity, the Bank has access to borrow funds if needed in a liquidity emergency.

Capital Adequacy

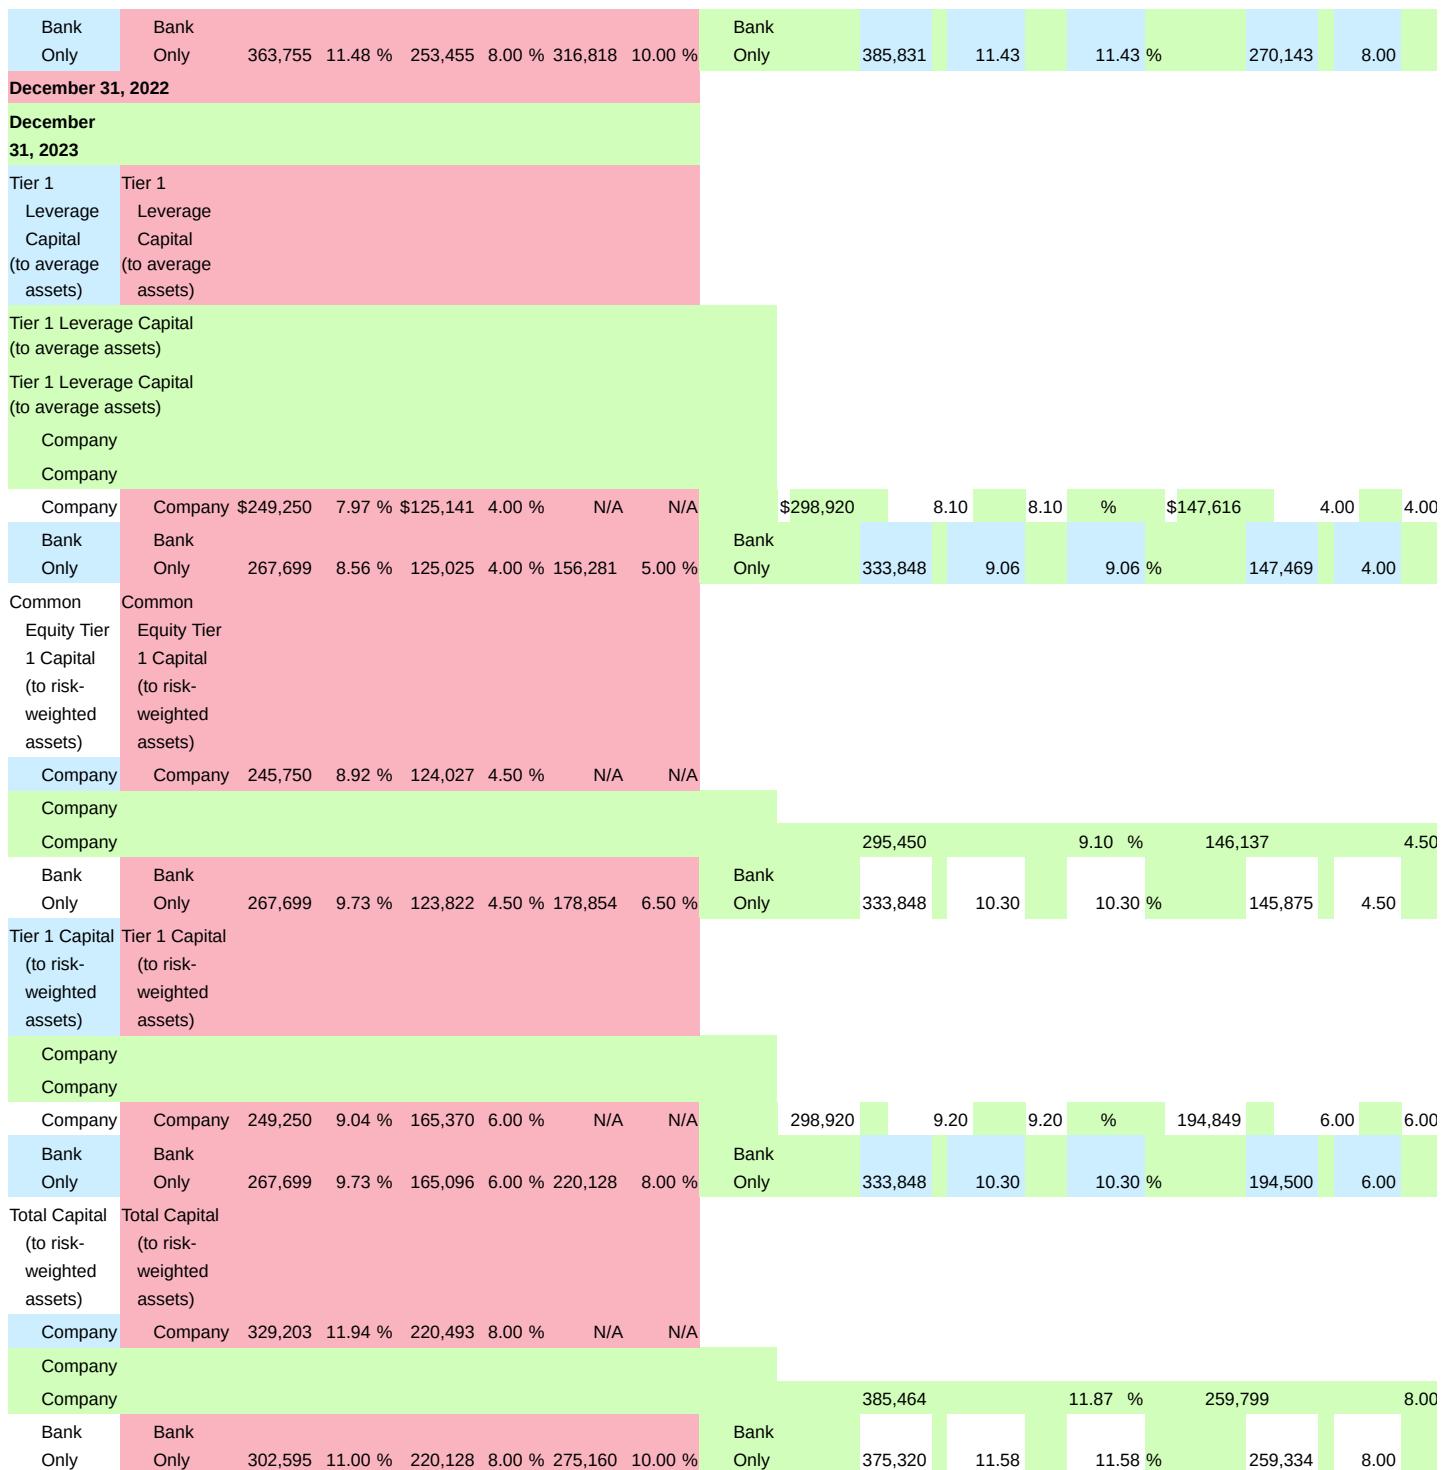

Capital management consists of providing equity and other instruments that qualify as regulatory capital to support current and future operations. Banking regulators view capital levels as important indicators of an institution's financial soundness. As a general matter, FDIC-insured depository institutions and their holding companies are required to maintain minimum capital levels relative to the amount and types of assets they hold. We are subject to regulatory capital requirements at the bank level. Because the Company's consolidated assets exceeded \$3.0 billion as of September 30, 2022, the Company is no longer eligible for the Federal Reserve's Small Bank Holding Company Policy Statement, and will be evaluated relative to the capital adequacy standards established by the Federal Reserve. Additionally, Reserve, and as of **September 30, 2023** **March 31, 2024**, the Company's consolidated assets are in excess of \$3.0 billion, and as a consequence, beginning in March 2024, the Company will no longer prepare prepares and file files financial reports with the Federal Reserve as a small bank holding company.

As of **September 30, 2023** **March 31, 2024**, and **December 31, 2022** **December 31, 2023**, the Company and the Bank were in compliance with all applicable regulatory capital requirements, and the Bank was classified as "well capitalized" for purposes of the Federal Reserve's prompt corrective action regulations. As we deploy capital and continue to grow operations, regulatory capital levels may decrease depending on our level of earnings. However, we expect to monitor and control growth in order to remain in compliance with all regulatory capital standards applicable to us. In addition, the Company maintains an effective is currently eligible to file a registration statement on Form S-3 with the Securities and Exchange Commission which allows could allow the Company to raise additional capital in an amount up to \$115.5 million; capital. The Company raised \$34.5 million in December 2021 under a previously filed Form S-3. The Company, through a private placement, raised \$25.0 million in subordinated debt in 2021 and repaid \$10.0 million of subordinated debt with the proceeds and used the remainder for general corporate purposes. On November 1, 2022 the Company, through a private placement, raised \$20.0 million of subordinated debt with the proceeds to be used for general corporate purposes. The Company contributed \$15.0 million of the capital raised to the Bank in March 2023.

[Table of Contents](#)

The following table presents the Company's and the Bank's regulatory capital ratios as of the dates presented, as well as the regulatory capital ratios that are required by Federal Reserve regulations to maintain "well-capitalized" status:

(1) Presents the minimum capital adequacy requirements that apply to the Bank (excluding the capital conservation buffer) that apply to the Bank and the Company. The capital conservation buffer is an additional 2.5% of the amount necessary to meet the minimum risk-based capital requirements for total, tier 1, and common equity tier 1 risk-based capital. Prior to September 30, 2022, the Company operated under the Small Bank Holding Company Policy Statement and therefore was not subject to Basel III capital adequacy requirements.

Non-maturity deposits	Non-maturity deposits	3,269,083	—	—	3,269,083					
Equity investment commitment	Equity investment commitment	713	713	—	—					

⁽¹⁾ Represents the undefined maturity of non-maturing deposits, including noninterest bearing demand deposits, interest bearing demand deposits, money market accounts, savings accounts and brokered deposits, which can generally be withdrawn on demand.

We maintain sufficient cash and cash equivalents and investment securities to meet short-term cash requirements and the levels of these assets are dependent on our operating, investing and financing activities during any given period. Cash on hand, cash at third-party banks, investments available-for-sale and maturing or prepaying balances in our investment and loan portfolios are our most liquid assets. Other sources of liquidity that are routinely available to us include funds from retail, commercial, and BaaS deposits, advances from the FHLB and proceeds from the sale of loans. Less commonly used sources of funding include borrowings from the Federal Reserve discount window, draws on established federal funds lines from unaffiliated commercial banks, funds from online rate services, brokered funds, a one-way buy through an ICS account, and the issuance of debt or equity securities.

In the normal course of business, we enter into various transactions, which, in accordance with GAAP, are not included in our consolidated balance sheets. We enter into these transactions to meet the financing needs of our customers. These transactions include commitments to extend credit and standby and commercial letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in our consolidated balance sheets.

Our commitments associated with outstanding commitments to extend credit and standby and commercial letters of credit are summarized in the following table. Since commitments associated with commitments to extend credit and letters of credit may expire unused, the amounts shown do not necessarily reflect the actual future cash funding requirements.

As of **September 30, 2023** **March 31, 2024** we had **\$2.35 billion** **\$2.19 billion** in commitments to extend credit, compared to **\$2.20 billion** **\$2.34 billion** as of **December 31, 2022** **December 31, 2023**. The **\$151.6 million increase** **\$152.9 million decrease** is largely attributed to a **\$64.9 million decrease** in commercial and industrial capital call line commitments, **\$13.0 million decrease** in commercial construction loans partially offset by an increase of **\$209.0 million** **\$4.4 million** in consumer and other loan commitments, related to CCBX consumer loans, **\$142.1 million decrease** in commercial and industrial capital call line commitments, **\$791,000 increase** in commercial construction loans and **\$102.5 million** a **\$15.8 million increase** in residential real estate commitments, related to CCBX loans.

[Table of Contents](#)

The following table presents commitments associated with outstanding commitments to extend credit, standby and commercial letters of credit and equity investment commitments as of the periods indicated:

(dollars in thousands; unaudited)	(dollars in thousands; unaudited)	As of September 30, 2023	As of December 31, 2022	(dollars in thousands; unaudited)	As of March 31, 2024	As of December 31, 2023

Equity investment commitment	Equity investment commitment \$ 713 \$ 988

We have portfolio limits with our each of our partners to manage loan concentration risk, liquidity risk, and counter-party partner risk. For example, as of **September 30, 2023** **March 31, 2024**, capital call lines outstanding balance totaled **\$114.2 million** **\$135.7 million**, and while commitments totaled **\$630.7 million** **\$543.9 million** the commitments are cancelable, and are also limited to a maximum of \$350.0 million by agreement with the partner. These limits allow us to manage portfolio concentrations with partners and by loan type.

The following table shows the CCBX maximum portfolio sizes by loan category as of **September 30, 2023** **March 31, 2024**.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being fully drawn upon, the total commitment amounts disclosed above do not necessarily represent future cash requirements. We evaluate each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if considered necessary by us, upon extension of credit, is based on management's credit evaluation of the customer. As of September 30, 2023 March 31, 2024, \$1.64 billion \$1.49 billion in commitments to extend credit are unconditionally cancelable, compared to \$1.57 billion at December 31, 2022 December 31, 2023. The increase decrease in unconditionally cancelable commitments is attributed to growth composition changes in the CCBX loans. Commitments that are unconditionally cancelable allow us to better manage loan growth, credit concentrations and liquidity. We also limit

[Table of Contents.](#)

CCBX partners to a maximum aggregate customer loan balance originated and held on our balance sheet, as shown in the table above.

[Table of Contents.](#)

Standby and commercial letters of credit are conditional commitments issued by us to guarantee the performance of a customer to a third party. In the event of nonperformance by the customer, we have rights to the underlying collateral, which can include commercial real estate, physical plant and property, inventory, receivables, cash and/or marketable securities. Our credit risk associated with issuing letters of credit is essentially the same as the risk involved in extending loan facilities to our customers.

We believe that we will be able to meet our long-term cash requirements as they come due. Adequate cash levels are generated through profitability, repayments from loans and securities, deposit gathering activity, access to borrowing sources and periodic loan sales.

Critical Accounting Policies

Our accounting policies are integral to understanding our results of operations. Our accounting policies are described in greater detail in "Note 1 - Description of Business and Summary of Significant Accounting Policies" and "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies" of our Form 10-K. We have procedures and processes in place to facilitate making these judgments. Actual results in these areas could differ from management's estimates. There have been no significant changes concerning our critical accounting policies as described in our Form 10-K except as indicated in Note 1 of the condensed consolidated financial statements included elsewhere in this report.

CCBX – BaaS Reporting Information

During the three and nine months ended September 30, 2023 March 31, 2024, \$25.9 million and \$119.3 million, respectively \$79.8 million was recognized in noninterest income BaaS credit enhancements related to the establishment of a credit enhancement asset for credit losses indemnified by our strategic partners and reserved for unfunded commitments for CCBX partner loans and deposits. Agreements with our CCBX partners provide for a credit enhancement provided by the partner which protects the Bank by indemnifying and/or reimbursing incurred losses. In accordance with accounting guidance, we estimate and record a provision for expected losses for these CCBX loans, unfunded commitments and negative deposit accounts. When the

[Table of Contents](#)

provision for credit losses - loans and provision for unfunded commitments is recorded, a credit enhancement asset is also recorded on the balance sheet through noninterest income (BaaS credit enhancements) in recognition of the CCBX partner legal commitment to indemnify or reimburse losses. The credit enhancement asset is relieved as credit enhancement payments and recoveries are received from the CCBX partner or taken from the partner's cash reserve account. Agreements with our CCBX partners also provide protection to the Bank from fraud by indemnifying or reimbursing incurred fraud losses. BaaS fraud includes noncredit fraud losses on loans and deposits originated through partners. Fraud losses are recorded when incurred

[Table of Contents](#)

as losses in noninterest expense, and the enhancement received from the CCBX partner is recorded in noninterest income, resulting in a net impact of zero to the income statement. CCBX partners also pledge a cash reserve account at the Bank which the Bank can collect from when losses occur that is then replenished by the partner on a regular interval. Although agreements with our CCBX partners provide for credit enhancements that provide protection to the Bank from credit and fraud losses by indemnifying or reimbursing incurred credit and fraud losses, if our partner is unable to fulfill their contracted obligations to replenish their cash reserve account then the Bank would be exposed to additional loan and deposit losses, as a result of this counterparty risk. If a CCBX partner does not replenish their cash reserve account then the Bank can declare the agreement in default, take over servicing and cease paying the partner for servicing the loan and providing credit and fraud enhancements. The Bank would write-off any remaining credit enhancement asset from the CCBX partner not covered by the cash pledge account but would retain the full yield and any fee income on the loan portfolio going forward, and BaaS loan expense for that CCBX partner would cease decrease once default occurred and payments to the CCBX partner were stopped.

For CCBX partner loans the Bank records contractual interest earned from the borrower on loans in interest income, adjusted for origination costs which are paid or payable to the CCBX partner. BaaS loan expense represents the amount paid or payable to partners for credit and fraud enhancements and servicing CCBX loans. To determine net BaaS loan income earned from CCBX loan relationships, the Bank takes BaaS loan interest income and deducts BaaS loan expense to arrive at net BaaS loan income which can then be compared to interest income on the Company's community bank loans.

The following table illustrates how CCBX partner loan income and expenses are recorded in the financial statements:

GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures

The Company uses certain non-GAAP financial measures to provide meaningful supplemental information regarding the Company's operational performance and to enhance investors' overall understanding of such financial performance. However, these non-GAAP financial measures are supplemental and are not a substitute for an analysis based on GAAP measures. As other companies may use different calculations for these adjusted measures, this presentation may not be comparable to other similarly titled adjusted measures reported by other companies.

[Table of Contents](#)

The following non-GAAP reconciliation is presented to show the impact of certain unanticipated expenses on net income. The most directly comparable GAAP measure is net income.

Non-GAAP Reconciliation of Unanticipated Expenses (dollars in thousands; unaudited)	Three Months Ended		
	March 31, 2024		
	Actual	Unanticipated Expenses	Adjusted
Net interest income	\$ 60,936	\$ —	\$ 60,936
Provision for credit losses	(83,158)	(1,096)	(82,062)
Noninterest income	86,955	—	86,955
Noninterest expense ⁽¹⁾	(56,018)	(1,915)	(54,103)
Income before provision for income tax	8,715	(3,010)	11,725
Provision for income tax	(1,915)	662	(2,577)
Net income	\$ 6,800	\$ (2,348)	\$ 9,148

(i) Table below shows the detail of unanticipated noninterest expense shown in table above:

Unanticipated noninterest expense:	
Audit and accounting services	\$ 849
Contract termination fee	600
Operational loss	122
Employment realignment costs	343
Total unanticipated noninterest expense items	\$ 1,915

The following non-GAAP measure is presented to illustrate the impact of BaaS loan expense on net loan income and yield on CCBX loans.

Net BaaS loan income divided by average CCBX loans is a non-GAAP measure that includes the impact BaaS loan expense on net BaaS loan income and the yield on CCBX loans. The most directly comparable GAAP measure is yield on CCBX loans.

The following non-GAAP measure is presented to illustrate the impact of BaaS loan expense on net interest income and net interest margin.

Net interest income net of BaaS loan expense is a non-GAAP measure that includes the impact BaaS loan expense on net interest income. The most directly comparable GAAP measure is net interest income.

Net interest margin, net of BaaS loan expense is a non-GAAP measure that includes the impact of BaaS loan expense on net interest rate margin. The most directly comparable GAAP measure is net interest margin.

[Table of Contents](#)

Reconciliations of the GAAP and non-GAAP measures are presented in the following table.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

Quantitative and Qualitative Disclosures about Market Risk

As a financial institution, our primary component of market risk is interest rate volatility. Our asset liability and funds management policy provides management with the guidelines for effective funds management, and we have established a measurement system for monitoring our net interest rate sensitivity position. We have historically managed our sensitivity position within our established guidelines.

Fluctuations in interest rates will ultimately impact both the level of income and expense recorded on most of our assets and liabilities, and the market value of all interest earning assets and interest bearing liabilities, other than those which have a short term to maturity. Interest rate risk is the potential for economic losses due to future interest rate changes. These economic losses can be reflected as a loss of future net interest income and/or a decrease in current fair market values. Our objective is to measure the effect on net interest income and to adjust the balance sheet to minimize the inherent risk while at the same time maximizing income. The FOMC raised interest rates 0.25% in mid-March 2022, 1.25% in the second quarter of 2022, 1.50% in the third quarter of 2022, 1.25% in the fourth quarter of 2022, 0.50% in the first quarter 2023, and 0.25% in the second quarter 2023 and 0.25% in the third quarter of 2023, with a 2023. The FOMC has subsequently held interest rates flat as inflation continues to remain elevated. The timing and magnitude of any potential for further increases rate changes, expected to be rate cuts in the future. event inflation decreases, remains uncertain but will likely be closely tied to future inflationary trends. The impact of this and any future increases or decreases will impact financial results.

We manage our exposure to interest rates by structuring our balance sheet in the ordinary course of business. We do not enter into instruments such as leveraged derivatives, financial options, financial future contracts or forward delivery contracts for the purpose of reducing interest rate risk. Based upon the nature of our operations, we are not subject to foreign exchange or commodity price risk. We do not own any trading assets.

Our exposure to interest rate risk is managed by the Asset Liability Committee ("ALCO"), of the Bank and reviewed by the Asset Liability and Investment Committee of our board of directors in accordance with policies approved by our board of directors. ALCO formulates strategies based on appropriate levels of interest rate risk. In determining the appropriate level of interest rate risk, ALCO considers the impact on earnings and capital on the current outlook on interest rates, potential changes in interest rates, regional economies, liquidity, business strategies and other factors. ALCO meets regularly to review, among other things, the sensitivity of assets and liabilities to interest rate changes, the book and market values of assets and liabilities, unrealized gains and losses, purchase and sale activities, commitments to originate loans and the maturities of investments and borrowings. Additionally, ALCO reviews liquidity, cash flows, maturities of deposits and consumer and commercial deposit activity. Management employs various methodologies to manage interest rate risk including an analysis of relationships between interest earning assets and interest bearing liabilities and interest rate simulations using a model. The Asset Liability and Investment Committee of our board of directors meets regularly to review the Bank's interest rate risk profile, liquidity position, including contingent liquidity, and investment portfolio.

We use interest rate risk simulation models to test interest rate sensitivity of net interest income and fair value of equity, and the impact of changes in interest rates on other financial metrics. Contractual maturities and re-pricing opportunities of loans are incorporated in the model, as are prepayment assumptions, maturity data and call options within the

investment portfolio. Average life of non-maturity deposit accounts are based on historical decay rates and assumptions and are incorporated into the model. The assumptions used are inherently uncertain and, as a result, the model cannot precisely measure future net interest income or precisely predict the impact of fluctuations in market interest rates on net interest income. Actual results will differ from the model's simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and the application and timing of various management strategies. To help ensure the accuracy of the model, we perform a quarterly back test against our actual results.

On a quarterly basis, we run multiple simulations under two different premises of which one is a static balance sheet and the other is a dynamic growth balance sheet. The static balance sheet approach produces results that show the interest risk currently inherent in our balance sheet at that point in time. The dynamic balance sheet includes our projected growth levels going forward and produces results that shows how net income, net interest income, and interest risk change based on our projected growth. These simulations test the impact on net interest income and fair value of equity from changes in market interest rates under various scenarios. Under the static and dynamic approaches, rates are shocked instantaneously and ramped over a 12-month horizon assuming parallel yield curve shifts. Parallel shock scenarios assume instantaneous parallel movements in the yield curve compared to a flat yield curve scenario. Non-parallel simulations are also conducted and involve analysis of interest income and expense under various changes in the shape of the yield curve including a

[Table of Contents.](#)

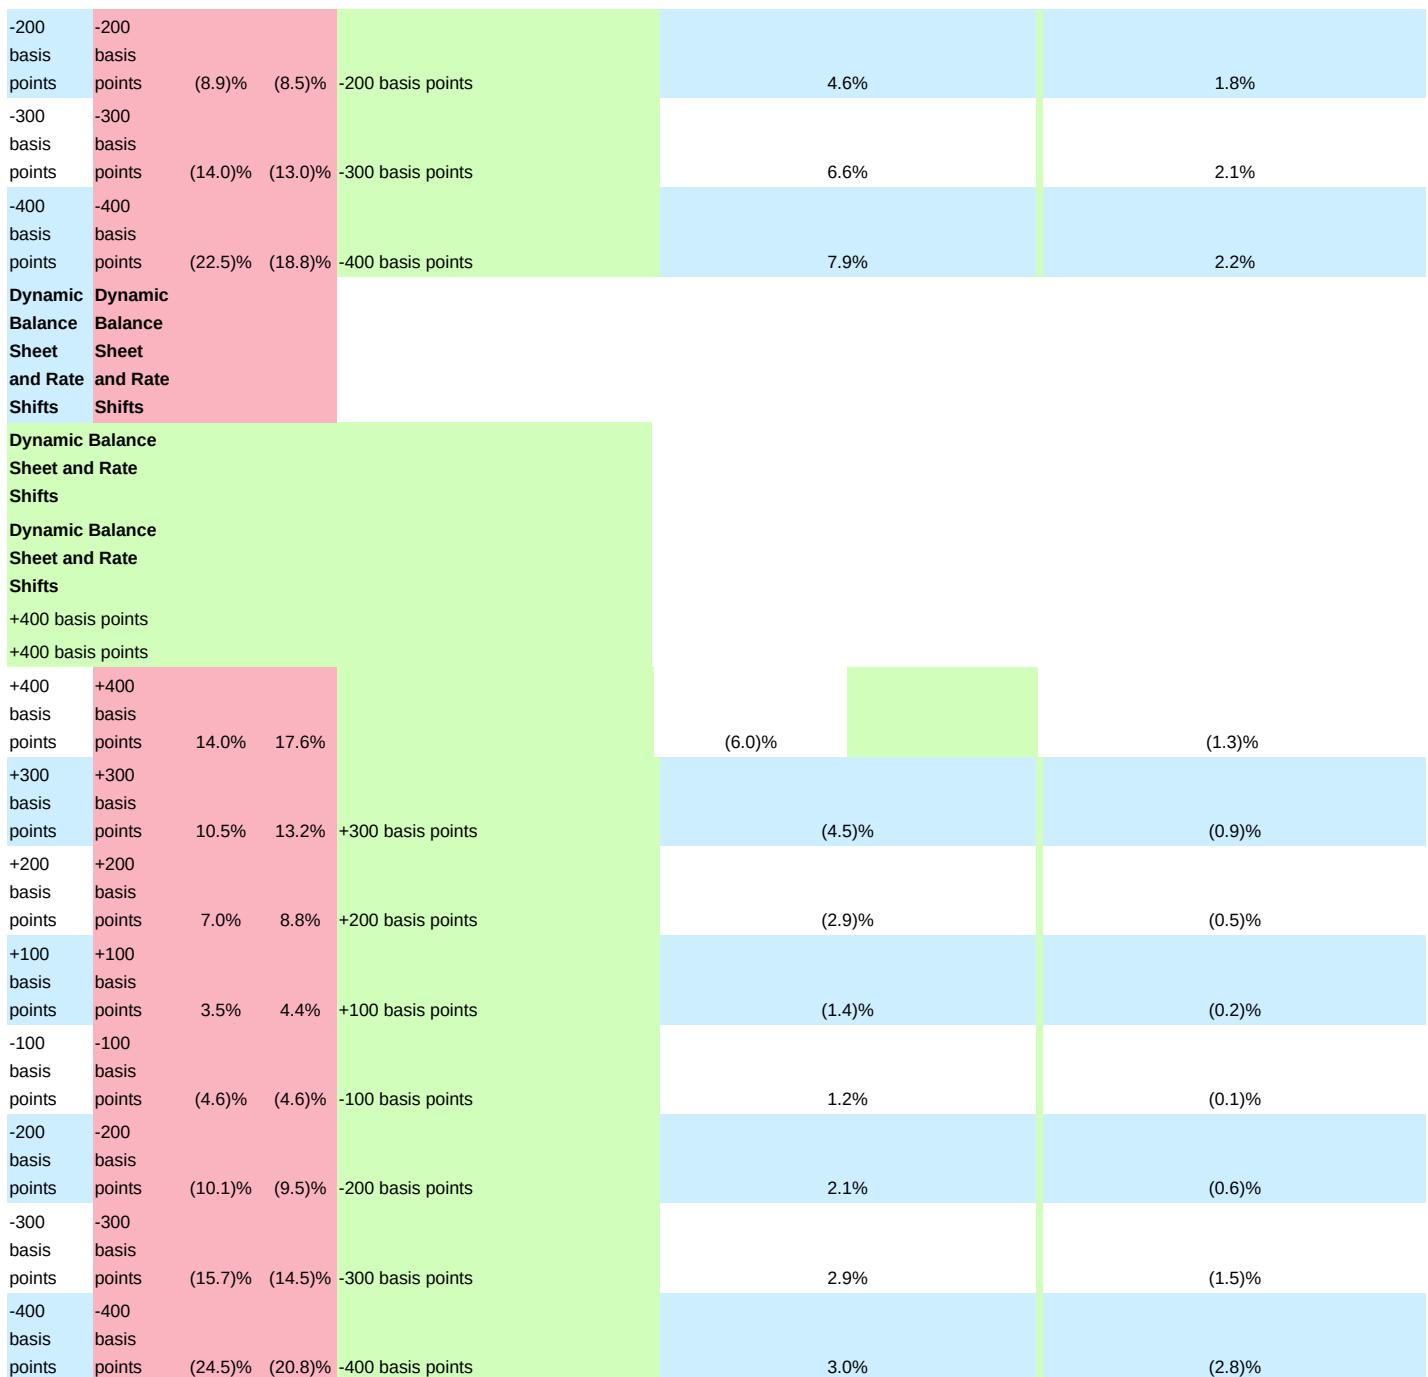

forward curve, flat curve, steepening curve, and an inverted curve. Our internal policy regarding internal rate risk simulations currently specifies that for instantaneous parallel shifts of the yield curve, estimated net income at risk for the

[Table of Contents.](#)

subsequent one- and two-year period should not decline by more than 10% for a 100 basis point shift, 15% for a 200 basis point shift, 20% for a 300 basis point shift, and 25% for a 400 basis point shift.

The following tables summarize the simulated change in net interest income over a 12-month horizon as of the dates indicated:

		Twelve Month		Twelve Month	
Change in	Change in	Projection	Projection	Change in	Change in
Market	Market	As of	As of	Market	Market
Interest	Interest	September	December	Interest	Interest
Rates	Rates	30, 2023	31, 2022	Rates	Rates
Change in Market Interest Rates					
Change in Market Interest Rates		Twelve Month Projection		Twelve Month Projection	
		As of March 31, 2024		As of December 31, 2023	
Static Balance Sheet and Rate Shifts	Static Balance Sheet and Rate Shifts				
+400 basis points	+400 basis points	10.7%	15.2%	(11.1)%	(6.2)%
+300 basis points	+300 basis points	8.0%	11.4%	+300 basis points	(8.3)%
+200 basis points	+200 basis points	5.4%	7.6%	+200 basis points	(5.4)%
+100 basis points	+100 basis points	2.7%	3.8%	+100 basis points	(2.7)%
-100 basis points	-100 basis points	(4.0)%	(4.1)%	-100 basis points	2.5%
					1.1%

The results illustrate that the Company's static balance sheet remains liability sensitive, however, the dynamic balance sheet is asset sensitive and generally performs better in an increasing interest rate environment. As the Company's composition has shifted over time due to the growth of the CCBX segment to more variable/adjustable in nature, our interest rate risk profile has migrated, slightly been mitigated, reducing our exposure variability in both rising and falling rate environments, as the community bank and CCBX segments work to offset one another. The community bank segment remains asset sensitive and generally performs better in an increasing interest rate risk from declining rates environment. For the community bank, the drivers are primarily due to behavior of demand, money market and savings deposits during such rate fluctuations. We have found that, historically, offering rates on these community bank deposits change more slowly than changes in short-term market rates. For the CCBX segment, the offering rates on the loan portfolio are modeled using partner contractual net yields which mostly adjust with market shifts. For this CCBX portfolio, the offering rates on both the approximately 70% of loans and the majority of deposits nearly fully reprice with changes in market rates. During 2023, one of the material CCBX lending partners contractual yields converted to a fixed rate product, continuing to reduce the overall variability in the Company's balance sheet. As of March 31, 2023, the Company's overall funding mix continues to be more heavily weighted towards the CCBX deposits which are primarily variable rate deposits aiding with the neutrality of the balance sheet and the overall shift to liability sensitive. The assumptions incorporated into the simulation model are inherently uncertain and, as a result, the model cannot precisely measure future net interest income or precisely predict the impact that fluctuations in market interest rates have on net interest income. Actual results will differ from the model's simulated results due to timing.

magnitude, and frequency of interest rate changes as well as changes in market conditions, the shape of the interest yield curve, and the application and timing of various assumptions and strategies.

Item 4. Controls and Procedures

Disclosure Controls and Procedures. An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based on that evaluation, the Company's Chief Executive Officer and the Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the SEC (1) is recorded,

[Table of Contents.](#)

processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate, to allow timely decisions regarding required disclosure.

Change in Internal Control over Financial Reporting. There were no changes in the Company's internal control over financial reporting occurred during the **nine****three** months ended **September 30, 2023****March 31, 2024**, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

[Table of Contents.](#)

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we are a party to various litigation matters incidental to the conduct of our business. We do not believe that any currently pending legal proceedings will have a material adverse effect on our business, financial condition or earnings.

Item 1A. Risk Factors

For information regarding the Company's risk factors, see "Risk Factors" in the Company's Annual Report on Form 10-K for the fiscal year ended **December 31, 2022****December 31, 2023**, which are incorporated by reference herein. As of **September 30, 2023****March 31, 2024**, the risk factors of the Company have not changed materially from those disclosed in the Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no unregistered sales of the Company's equity securities during the **nine****three** months ended **September 30, 2023****March 31, 2024**.

The Company did not repurchase any of its equity securities during the **nine****three** months ended **September 30, 2023****March 31, 2024** and does not have any authorized share repurchase programs.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

During the period covered by this Quarterly Report on Form 10-Q, no director or officer of the Company adopted or terminated a "Rule 10b5-1 trading arrangement" or "non-Rule 10b5-1 trading arrangement," as each term is defined in Item 408(a) of Regulation S-K.

Item 6. Exhibits

Exhibit 31.1

**CERTIFICATION PURSUANT TO
 RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES EXCHANGE ACT OF 1934,
 AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Eric M. Sprink, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Coastal Financial Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

- (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
- (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
- (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
- (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

- (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
- (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
