THIRD FIRST QUARTER 2023 2024 HIGHLIGHTS

Highlights for the three months ended **September 30, 2023** **March 31, 2024** are summarized below and discussed further under *Item 2—Management's Discussion and Analysis of Financial Condition and Results of Operations*:

Corporate and Financial

- The Company has \$5.7 million in cash as of March 31, 2024, and zero debt.
- Net loss was \$4.0 million or \$0.05 per share for the quarter, which was after \$0.9 million in expenses for the Don David Gold Mine ("DDGM") exploration development and underground drilling.
- Working capital was \$13.6 million as of March 31, 2024.
- Total cash cost after co-product credits for the quarter was \$1,667 per gold equivalent ("AuEq") ounce and total all-in sustaining cost ("AISC") after co-product credits for the quarter was \$2,295 per AuEq ounce. (See *Item 2—Management's Discussion and Analysis of Financial Condition and Results of Operations – Non-GAAP Measures* for a reconciliation of non-GAAP measures to applicable GAAP measures).

Don David Gold Mine

- In the first quarter of 2024, DDGM produced and sold a total of 5,965 gold equivalent ounces, comprised of 3,557 gold ounces and 216,535 silver ounces at an average sales price per ounce of \$2,094 and \$23.29, respectively.
- The underground diamond drilling program progressed as planned and on schedule during the first quarter, using two drill rigs with continued positive results. During the first quarter, infill drilling focused mainly on upgrading inferred resources to the measured and indicated resource categories with a specific focus on the recently discovered Three Sisters and Gloria vein systems. Infill drilling during the first quarter was successful in identifying and defining high-grade ore shoots specifically in the Sandy 1 and Sandy 2 veins of the Three Sisters system. Grade control drilling continued on veins scheduled for production in both the Arista and Switchback systems.

- There were no lost time incidents during the quarter. The quarter, resulting in a year-to-date Lost Time Injury Frequency Rate ("LTIFR") safety record is 0.11, which is significantly lower than the Mexican average of 0.89 (in US equivalent). zero. Safety at Gold Resource Corporation is paramount. Even with a good track record at the Don David Gold Mine ("DDGM"), DDGM, the Company continues to strive each quarter for improved measures, awareness, and training.
- In the third quarter of 2023, the Don David Gold Mine produced and sold a total of 6,532 gold equivalent ("AuEq") ounces, comprised of 3,982 gold ounces and 208,905 silver ounces at an average sales price per ounce of \$1,934 and \$24, respectively.
- The DDGM diamond drilling program continued as planned during the third quarter, using five drill rigs with encouraging results. Drilling continued to advance on two fronts: (1) Infill drilling designed to upgrade Inferred resources to the Indicated category; and (2) Expansion drilling with the objective of identifying additional Inferred resources via step-out drilling. The drilling during the third quarter was successful in testing the northern extensions of the Splay 31 and Marena North veins of the Arista system, as well as in expanding the Three Sisters and Gloria vein systems to the northwest and down-dip (Switchback system).

Back Forty Project

- Optimization work related to the metallurgy and the economic model for the Back Forty Project in Michigan, USA was completed, and the Company released the Technical Report Summary for the Back Forty Project as Exhibit 96.1 to Form 8-K filed on October 26, 2023. Results of the work indicate a more robust economic project with no planned impacts to wetlands that is more protective of the environment, which should facilitate a successful mine permitting process.

Financial

- The Company has \$6.7 million in cash as of September 30, 2023, and zero debt.
- Net loss was \$7.3 million or \$0.08 per share for the quarter, which was after a significant push on exploration development and underground drilling.
- Working capital was \$13.8 million as of September 30, 2023.
- Total cash cost after co-product credits for the quarter was \$1,839 per gold equivalent ("AuEq") ounce and total all-in sustaining cost ("AISC") after co-product credits for the quarter was \$2,669 per AuEq ounce. The year-to-date total cash cost after co-product credits was \$1,210, and the total AISC after co-product credits was \$1,852. (See Item 2—Management's Discussion and Analysis of Financial Condition and Results of Operations – Non-GAAP Measures below for a reconciliation of non-GAAP measures to applicable GAAP measures).

GOLD RESOURCE CORPORATION
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
September 30, 2023 March 31, 2024
(Unaudited)

1. Basis of Preparation of Financial Statements

The Condensed Consolidated Interim Financial Statements ("interim financial statements") of Gold Resource Corporation and its subsidiaries (collectively, the "Company") are unaudited and have been prepared in accordance with the rules of the Securities and Exchange Commission ("SEC") for interim statements. Certain information and footnote disclosures required by United States Generally Accepted Accounting Principles ("U.S. GAAP") have been condensed or omitted as permitted by such rules. However, the Company believes that the disclosures included are adequate to make the information presented not misleading. In the opinion of management, all adjustments (including normal recurring adjustments) and disclosures necessary for a fair presentation of these interim financial statements have been included. The results reported in these interim financial statements do not necessarily indicate the results that may be reported for the entire year. These interim financial statements should be read in conjunction with the audited consolidated financial statements for the year ended **December 31, 2022** **December 31, 2023** included in the Company's annual report on Form 10-K (the "**2022**" **"2023** Annual Report"). The year-end balance sheet

data was derived from the audited financial statements. Unless otherwise noted, there have been no material changes to the footnotes from those accompanying the audited consolidated financial statements contained in the 2022 2023 Annual Report.

In connection with the preparation of the Company's financial statements for the period ended September 30, 2023, the Company's management identified an immaterial error in prior period financial statements, whereby deferred tax liabilities and deferred tax assets attributable to different tax-paying components of the entity or to different tax jurisdictions were incorrectly offset. The Company has corrected the consolidated balance sheets as of December 31, 2022, March 31, 2023, and June 30, 2023, for this immaterial error. The effects of these revisions are as follows:

Revision to the Consolidated Balance Sheet as of December 31, 2022 (unaudited):

Additionally,

2. New Accounting Pronouncements

The FASB issued ASU 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures in November 2023, amending reportable segment disclosure requirements to include disclosure of incremental segment information on an annual and interim basis. Among the Company revised Note 22 disclosure enhancements are new disclosures regarding significant segment expenses that are regularly provided to reflect the chief operating decision-maker and included within each reported measure of segment profit or loss, as well as other segment items bridging segment revenue to each reported measure of segment profit or loss. The amendments in ASU 2023-07 are effective for fiscal years beginning after December 15, 2023, and for interim periods within fiscal years beginning after December 15, 2024, and are applied retrospectively. Early adoption is permitted. We are currently evaluating the impact of this update on our consolidated financial statements and disclosures.

The FASB issued ASU 2023-09, Income Taxes (Topic 740): Improvement to Income Tax Disclosures in December 2023, amending income tax disclosure requirements for the above correction effective tax rate reconciliation and income taxes paid. The amendments in ASU 2023-09 are effective for fiscal years beginning after December 15, 2024, and are applied prospectively. Early adoption and retrospective application of the amendments are permitted. We are currently evaluating the impact of this update on the Company's Oaxaca, Mexico segment, our consolidated financial statements and disclosures.

| Concentrates | 2,301 | 3,271 |
| Doré, net | 366 | 653 |
| Subtotal - product inventories | 2,736 | 4,521 |
| Materials and supplies ⁽¹⁾ | 7,706 | 8,979 |
| Total | \$ 10,442 | \$ 13,500 |

(1) Net of reserve for obsolescence of \$0.1 million \$0.5 million both as of September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023.

5. Income Taxes

The Company recorded an income tax benefit of \$2.7 million and \$4.7 million, respectively, \$1.9 million for the three and nine months ended September 30, 2023 March 31, 2024. For the three and nine months ended September 30, 2022 March 31, 2023, the Company recorded an income tax benefit of \$0.2 million and income tax expense of \$8.9 million, respectively, \$0.1 million. In accordance with applicable accounting rules, the interim provision for taxes is calculated using the estimated consolidated annual effective tax rate. The consolidated effective tax rate is a function of the combined effective tax rates for the jurisdictions in which the Company operates. Variations in the relative proportions of jurisdictional income could result in fluctuations to the Company's consolidated effective tax rate. At the federal level, the Company's income in the U.S. is taxed at 21%, and a

Gold Resource Corporation—Condensed Consolidated Interim Financial Statements and Notes (Unaudited)

9

[Table of Contents](#)

5% withholding tax applies to dividends received from Mexico. Income in Mexico is taxed at 37.5% (30% income tax and 7.5% mining tax), and Canada's income is taxed at 26.5%, which results in a consolidated effective tax rate above statutory U.S. Federal rates. The U.S. and Canadian jurisdictions do not currently generate taxable income. Please also see Note—23 Subsequent Events in Item 1—Condensed Consolidated Interim Financial Statements and Notes (unaudited).

Mexico Mining Taxation

Mining entities in Mexico are subject to two mining duties, in addition to the 30% Mexico corporate income tax: (i) a "special" mining duty of 7.5% of taxable income as defined under Mexican tax law (also referred to as "mining royalty tax") on extraction activities performed by concession holders, and (ii) the "extraordinary" mining duty of 0.5% on gross revenue from the sale of gold, silver, and platinum. The mining royalty tax generally applies to earnings before income tax, depreciation, depletion, amortization, and interest. In calculating the mining royalty tax, there are no Gold Resource Corporation corporate deductions related to depreciable costs from operational fixed assets. However, prospecting and exploration expenses are amortized using a 10% rate in a 10-year straight line. Both duties are tax deductible for income tax purposes. As a result, our effective tax rate applicable to the Company's Mexican operations is higher than Mexico's statutory rate.

The Company periodically transfers funds from its Mexican wholly owned subsidiary to the U.S. as dividends, which are subject to a 10% Mexico withholding tax, unless otherwise provided per a tax treaty. The current U.S.-Mexico tax treaty limits the dividend withholding tax between these countries to 5%, as long as specific requirements are met. Based on the Company's understanding that it meets these requirements, the Company pays a 5% withholding tax on dividends paid from Mexico. The estimated annual effective tax rate reflects the impact of the planned annual dividends for 2023. As of September 30, 2023 March 31, 2024, the Company recorded a \$0.1 million deferred tax liability related to the 5% withholding tax on funds available for transfer to the U.S. as dividends in the future are no longer deemed to be permanently reinvested in Mexico.

Gold Resource Corporation—Condensed Consolidated Interim Financial Statements and Notes (Unaudited)

10

[Table of Contents](#)

If these funds are distributed to the U.S. from Mexico in the future, at that time, they will be subject to the 5% dividend withholding tax payment upon distribution.

In October 2023, the Company received a notification from the Mexican Tax Administration Services ("SAT") with a sanction of 331 million pesos (approximately \$18 million \$19.9 million) as the result of a 2015 tax audit that began in 2021. The 2015 tax audit performed by SAT encompassed various tax aspects, including but not limited to intercompany transactions, mining royalty tax, and extraordinary mining tax.

6. Prepaid Expenses and Other Current Assets

[illegible]

Mexican tax statutes specify that the current year tax prepayments be calculated based on a coefficient for prior year earnings, regardless of current year results. However, starting Starting in the third quarter of each year, these same statutes allow companies

10

to request a reduction of the coefficient, which adjusts for losses experienced in the current year. During 2023, DDGM applied had to prepay approximately \$76 million pesos (\$5 million) despite of the losses for this reduction, and when approved, the Company expects that no more year. In 2024, these overpayments can be used to offset the required 2024 tax prepayments, will be required this year, and as a result, no income tax refund of approximately \$3 Million is payments are expected next year after filing the 2023 tax return. in 2024.

A value added ("IVA") tax in Mexico is assessed on the sales of products and purchases of materials and services. Businesses owe IVA taxes as the business sells a product and collects IVA taxes from its customers. Likewise, businesses are generally entitled to recover the taxes they have paid related to purchases of materials and services, either as a refund or credit to IVA tax payable. Amounts recorded as IVA taxes in the consolidated financial statements represent the net estimated IVA tax payable or receivable, since there is a legal right of offset of IVA taxes. As of **September 30, 2023** **March 31, 2024**, this resulted in an asset balance of **\$0.8 million** **\$0.3 million**, included in Other current assets.

Investment in Green Light Metals

A On December 28, 2022, Gold Resource Corporation received 12.25 million common shares of Green Light Metals as a settlement for a promissory note was receivable acquired in with the Aquila Resources Inc. ("Aquila") acquisition on December 10, 2021. In October 2021, Aquila sold its Wisconsin assets to Green Light Metals in return for a C\$4.9 million (\$3.9 million) promissory note. In December 2022, an amended agreement was executed (1) amending the maturity date to December 28, 2022, (2) clarifying the definition of "qualified financing," which set the value to C\$0.40 per share for the common shares that were to be issued at maturity; and (3) adding a top-up provision that would result in additional common shares being issued to the Company if any Green Light Metals financing was raised at less than C\$0.40 per share before March 31, 2023, essentially preventing dilution and ensuring that the total value of the Green Light Metals shares held by the Company at March 31, 2023 remains at C\$4.9 million.

Upon maturity on December 28, 2022, the Company received 12,250,000 private shares of Green Light Metals, which settled the promissory note. The shares received acquisition. This represented approximately 28.5% ownership in Green Light Metals at the time. After this settlement and before March 31, 2023, additional financing was raised by Green Light Metals at C\$0.40 per share. Therefore, the top-up provision was not triggered, and no additional shares were received. The Company's ownership in Green Light Metals as of September 30, 2023 is approximately 28.0%. As of both September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023, the fair value of this equity investment was \$3.6 million, and \$3.7 million, respectively.

9. Accrued Expenses and Other Liabilities

At September 30, 2023, March 31, 2024 and December 31, 2022, December 31, 2023, accrued expenses and other liabilities consisted of the following:

| | As of September 30, 2023 | As of December 31, 2022 | As of March 31, 2024 | As of December 31, 2023 |
|--|--------------------------------|-------------------------------|----------------------------|-------------------------------|
| | | | | |
| | | | | |
| | | | | |
| | (in thousands) | | (in thousands) | |
| Accrued royalty payments | \$ 771 | \$ 1,787 | \$ 732 | \$ 726 |
| Share-based compensation liability - current | 79 | - | 72 | 67 |
| Employee profit sharing obligation | 64 | 2,206 | 67 | 67 |
| Other payables | 723 | 1,204 | 684 | 888 |
| Total accrued expenses and other current liabilities | \$ 1,637 | \$ 5,197 | \$ 1,555 | \$ 1,748 |
| | | | | |
| Accrued non-current labor obligation | \$ 1,221 | \$ 1,050 | \$ 1,504 | \$ 1,167 |
| Share-based compensation liability | 336 | 884 | 339 | 320 |
| Other long-term liabilities | 61 | 556 | 8 | 29 |
| Total other non-current liabilities | \$ 1,618 | \$ 2,490 | \$ 1,851 | \$ 1,516 |

10. Gold and Silver Stream Agreements

The following table presents the Company's liabilities related to the Company's Gold and Silver Stream Agreements with Osisko Bermuda Limited ("OBL"), a wholly owned subsidiary of Osisko Gold Royalties Ltd (TSX & NYSE: OR), as of September 30, 2023, March 31, 2024 and December 31, 2022, December 31, 2023:

| As of | As of | As of | As of |
|-------|-------|-------|-------|
|-------|-------|-------|-------|

Per the terms of the gold stream agreement, OBL will purchase 18.5% of the refined gold from Back Forty (the “Threshold Stream Percentage”) until the Company has delivered 105,000 ounces of gold (the “Production Threshold”). Upon satisfaction of the Production Threshold, the Threshold Stream Percentage will be reduced to 9.25% of the refined gold (the “Tail Stream”). In exchange for the refined gold delivered under the Stream Agreement, OBL will pay the Company ongoing payments equal to 30% of the spot price of gold on the day of delivery, subject to a maximum payment of \$600 per ounce. Where the market price of gold is greater than the price paid, the difference realized from the sale of the gold will be applied as a repayment of against the deposit received from Osisko. (See OBL. Please see Note 12—Commitments and Contingencies in Item 1—Condensed Consolidated Interim Financial Statements and Notes (unaudited) for additional information.) information.

Silver Stream Agreement

Through a series of contracts, Aquila executed a silver stream agreement with OBL to purchase 85% of the silver produced and sold at the Back Forty Project. A total of \$17.2 million has been advanced under the agreement as of September 30, 2023 March 31, 2024. There are no future deposits to receive remaining under the agreement. The initial term of the agreement is for 40 years, automatically renewable for successive ten-year periods. The agreement is subject to certain operating and financial covenants, which are in good standing as of September 30, 2023 March 31, 2024. In March 2024, the Company secured an amendment to the stream agreement that deferred the required completion of certain operational milestones related to permitting from 2024 to 2026.

Per the terms of the silver stream agreement, OBL will purchase 85% of the silver produced from the Back Forty Project at a fixed price of \$4 per ounce of silver. Where the market price of silver is greater than \$4 per ounce, the difference realized from the sale of the silver will be applied as a repayment of against the deposit received from Osisko.

The \$17.2 million received from OBL through September 30, 2023 March 31, 2024 is shown as a long-term liability on the Condensed Consolidated Interim Balance Sheet along with Sheets and includes an implied interest. (See interest rate. The implied interest rate is applied on the OBL advance payments and calculated on the total expected life-of-mine production to be deliverable using an estimated silver

11. Reclamation and Remediation

The following table presents the changes in reclamation and remediation obligations for the nine three months ended September 30, 2023 March 31, 2024 and the year ended December 31, 2022 December 31, 2023:

| | 2023 | 2022 | 2024 | 2023 |
|--|------|------|------|------|
| | | | | |

| | (in thousands) | | (in thousands) | | |
|--|----------------|--------|----------------|--------|-------------------|
| Reclamation liabilities – balance at beginning of period | \$ | 1,949 | \$ | 1,833 | \$ 2,233 \$ 1,949 |

| Asset retirement obligation – balance at beginning of period (1) | | 8,417 | | 1,279 | 9,562 8,417 |
| Changes in estimate (1) | | - | | 6,384 | - (1,221) |
| Liability for Aquila drillhole capping (2) | | 404 | | - | - 404 |
| Liability for Aquila drillhole capping | | | | | - 404 |
| Accretion | | 547 | | 668 | 181 689 |
| Foreign currency exchange loss | | 840 | | 86 | 123 1,273 |
| Asset retirement obligation – balance at end of period | | 10,208 | | 8,417 | 9,866 9,562 |
| Total period end balance | \$ | 12,349 | \$ | 10,366 | \$12,128 \$11,795 |

- (1) In 2022, 2023, the Company updated its closure plan study, which resulted in a \$6.4 million increase \$1.2 million decrease in the estimated liability and asset retirement costs. This increase is a result of formalizing a tailings storage facility closure plan, the addition of the dry stack facility and the filtration plant, and the increase of inflation in Mexico.
- (2) As of December 31, 2022, the Company reported the liability to remediate exploration drill holes at the Back Forty Project in Michigan, USA in other non-current liabilities. As of March 31, 2023, this liability was reclassified to non-current reclamation and remediation liabilities. Upon completion of the optimization work and the related mine closure plan, an asset for asset retirement obligation and corresponding liability for reclamation and remediation will be recorded.

The Company's undiscounted reclamation liabilities of \$2.1 million \$2.3 million and \$1.9 million \$2.2 million as of September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023, respectively, are related to the Don David Gold Mine in Mexico. These represent reclamation liabilities that were expensed through 2013 before proven and probable reserves were established and the Company was considered to be a development stage entity; therefore, most of the costs, including asset retirement costs, were not allowed to be capitalized as part of our Property, Plant, property, plant, and Mine Development, mine development.

The Company's asset retirement obligations reflect the additions to the asset for reclamation and remediation costs in Property, Plant, and Mine Development, post 2013 post-2013 development stage status, which are discounted using a credit adjusted risk-free rate of 8%. As of September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023, the Company's asset retirement obligation was \$10.2 million \$9.9 million and \$8.4 million \$9.6 million, respectively, primarily related to the Don David Gold Mine in Mexico.

For the Back Forty Project in the third quarter of 2023, the Company capped 26 drillholes as required by state law. The remaining 50 study holes are not expected to be capped in the next 12 months and are shown as long-term liability.

12. Commitments and Contingencies

Commitments

As of September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023, the Company has equipment purchase commitments of approximately \$1.7 million \$0.9 million and \$1.2 million \$0.8 million, respectively.

Contingent Consideration

With the Aquila acquisition, the Company assumed a contingent consideration related to the consideration. On December 30, 2013, Aquila's shareholders approved the acquisition of 100% of the shares of HudBay Michigan Inc. ("HMI"), a subsidiary of HudBay Minerals Inc. ("HudBay"), effectively giving Aquila 100% ownership in the Back Forty Project (the "HMI Acquisition"). Pursuant to the HMI Acquisition, HudBay's 51% interest in the Back Forty Project was acquired in consideration for the issuance of common shares of Aquila, future milestone payments tied to the development of the Back Forty Project and a 1% net

[Table of Contents](#)

smelter return royalty on production from certain land parcels in the project. The issuance of shares and 1% net smelter obligations were settled before the Company acquired Aquila.

Gold Resource Corporation—Condensed Consolidated Interim Financial Statements and Notes (Unaudited)

14

[Table of Contents](#)

The contingent consideration is composed of the following in Canadian dollars: following:

The value of future installments is based on C\$9 million tied to the development of the Back Forty project as follows:

- a. C\$3 million payable on completion of any form of financing for purposes including the commencement of construction of the Back Forty, Mine. Up to 50% of the C\$3 million can be paid, at the Company's option in Gold Resource Corporation shares with the balance payable in cash. (If, as of the tenth anniversary of the HMI acquisition by Aquila, this milestone has not been achieved or payment made, HudBay has the right to repurchase a 51% ownership in the Back Forty Project); cash;
- b. C\$2 million payable in cash 90 days after the commencement of commercial production;
- c. C\$2 million payable in cash 270 days after the commencement of commercial production; and production, and;
- d. a. C\$2 million payable in cash 450 days after the commencement of commercial production.

Initially, the Company intended to pay the first C\$3 million in 2023 to prevent HudBay's 51% buy-back option in the Back Forty Project. Management later decided that it was more likely than not that HudBay would not exercise its buy-back option, and consequently, this amount was not paid. Additionally, since financing of the project is not expected in 2024, this liability was reclassified to long-term. As of the end of January 2024, by the contractual deadline, HudBay did not exercise its buy-back option, and thus, it is forfeited.

The total value of the contingent consideration as of September 30, 2023, March 31, 2024 and December 31, 2023 was \$4.3 million, \$3.6 million and \$3.5 million, including \$2.2 million in current liabilities and \$2.1 million in non-current liabilities. As the Company has the option to pay the first milestone payment of C\$3 million (\$2.2 million) in 2023 in order to prevent the repurchase of 51% ownership by HMI, this portion is presented as a current liability, with \$2.1 million remaining in long-term liability, respectively. The contingent consideration is adjusted for the time value of money and the likelihood of the milestone payments. Any future changes change in the value of the contingent consideration will be recognized in other expense, net, in the Condensed Consolidated Interim Statements of Operations.

The following table shows the change in the balance of the contingent consideration for the three months ended March 31, 2024 and the year ended December 31, 2023:

| | 2024 | 2023 |
|---|-----------------|-----------------|
| | (in thousands) | |
| Beginning Balance of contingent consideration: | | |
| Current contingent consideration | \$ - | \$ 2,211 |
| Non-current contingent consideration | 3,548 | 2,179 |
| | <u>\$ 3,548</u> | <u>\$ 4,390</u> |
| Change in value of contingent consideration - Current | - | (2,211) |
| Change in value of contingent consideration - Non-current | 50 | 1,369 |
| Ending Balance of contingent consideration: | | |
| Current contingent consideration | \$ - | \$ - |

| | | |
|--------------------------------------|----------|----------|
| Non-current contingent consideration | 3,598 | 3,548 |
| | \$ 3,598 | \$ 3,548 |

Other Contingencies

The Company has certain other contingencies resulting from litigation, claims, and other commitments and is subject to various environmental and safety laws and regulations incident to the ordinary course of business. The Company currently has no basis to conclude that any or all of such contingencies will materially affect its financial position, results of operations, or cash flows. However, in the future, there may be changes to these contingencies, or additional contingencies may occur, any of which might result in an accrual or a change in current accruals recorded by the Company. There can be no assurance that the ultimate disposition of contingencies will not have a material adverse effect on the Company's financial position, results of operations, or cash flows.

With the acquisition of Aquila Resources Inc. on December 10, 2021, the Company assumed substantial liabilities that relate to the gold and silver stream agreements with Osisko Bermuda Limited. OBL. Under the agreements, Osisko OBL deposited a total of \$37.2 million upfront in exchange for a portion of the future gold and silver production from the Back Forty Project. The stream agreements contain customary provisions regarding default and security. In the event that our subsidiary defaults under the stream agreements, including failing to achieve commercial production at a future date, it may be required to repay the

Gold Resource Corporation—Condensed Consolidated Interim Financial Statements and Notes (Unaudited)

15

[Table of Contents](#)

deposit plus accumulated interest at a rate agreed with Osisko. OBL. If it fails to do so, Osisko OBL may be entitled to enforce its remedies as a secured party and take possession of the assets that comprise the Back Forty Project.

13. Shareholders' Equity

The Company's At The Market At-The-Market Offering Agreement with H.C. Wainwright & Co., LLC (the "Agent"), which was entered into in November 2019 (the "ATM Agreement"), pursuant to which the Agent agreed to act as the Company's sales agent with respect to the offer and sale from time to time of the Company's common stock having an aggregate gross sales price of up to \$75.0 million, was renewed in June 2023. An During both the three months ended March 31, 2024 and 2023, there were no shares of the Company's common stock sold through the ATM Agreement. Subsequent to end of the first quarter, through May 2, 2024, an aggregate of 130,199 1,977,401 shares of the Company's common stock were sold and settled through the ATM Agreement during both the three and nine months ended September 30, 2023, for net proceeds to the Company of \$1.1 million, after deducting the Agent's commissions and other expenses, of \$0.1 million. There were no ATM sales during the three and nine months ended September 30, 2022.

Gold Resource Corporation—Condensed Consolidated Interim Financial Statements and Notes (Unaudited)

16

[Table of Contents](#)

No dividends were declared and paid in 2023. During the three and nine months ended September 30, 2022, the Company declared and paid dividends of \$0.01 per common share and \$0.03 per common share for an aggregate total of \$0.9 million and \$2.7 million,

respectively, expenses.

14. Derivatives

Embedded Derivatives

Concentrate Sales

Concentrate sales contracts contain embedded derivatives due to the provisional pricing terms for unsettled shipments, shipments pending final settlement. At the end of each reporting period, the Company records an adjustment to accounts receivable and revenue sales to reflect the mark-to-market adjustments for outstanding provisional invoices based on forward metal prices. Please see Note—2019 Fair Value Measurement in Item 1—Condensed Consolidated Interim Financial Statements and Notes (unaudited) for additional information on the realized and unrealized gain (loss) recorded to adjust accounts receivable and revenue.

The following table summarizes the Company's unsettled sales contracts at September 30, 2023 March 31, 2024 with the quantities of metals under contract subject to final pricing expected to occur through December 2023; June 2024:

| | Gold | Silver | Copper | Lead | Zinc | Total | Gold | Silver | Copper | Lead | Zinc | Total |
|--|----------|----------|----------|----------|----------|-----------|----------|----------|----------|----------|----------|-----------|
| | (ounces) | (ounces) | (tonnes) | (tonnes) | (tonnes) | | (ounces) | (ounces) | (tonnes) | (tonnes) | (tonnes) | |
| Under contract | 3,361 | 274,538 | 165 | 2,278 | 2,106 | | 3,947 | 276,297 | 263 | 1,425 | 1,771 | |
| Average forward price (per ounce or tonne) | \$ 1,934 | 23.63 | 8,256 | 2,138 | 2,445 | | \$ 2,070 | 23.37 | \$ 8,518 | \$ 2,069 | \$ 2,453 | |
| Unsettled sales contracts value (in thousands) | \$ 6,500 | \$ 6,487 | \$ 1,362 | \$ 4,870 | \$ 5,149 | \$ 24,368 | \$ 8,170 | \$ 6,457 | \$ 2,240 | \$ 2,948 | \$ 4,344 | \$ 24,159 |

Other Derivatives

Zinc zero cost collar

Derivative instruments that are not designated as hedging instruments are required to be recorded on the balance sheet at fair value. Changes in fair value impact the Company's earnings through mark-to-market adjustments until the physical commodity is delivered or the financial instrument is settled. The fair value does not reflect the realized or cash value of the instrument. As of December 31, 2022, the Company's hedge program concluded, but the Company may utilize similar programs in the future to manage near-term exposure to cash flow variability from metal prices.

The Company manages credit risk by selecting entering into arrangements with counterparties believed to be financially strong, by entering into netting arrangements with counterparties, and by requiring other credit risk mitigants, as appropriate. The Company actively evaluates the implicit creditworthiness of its counterparties, assigns appropriate credit limits, and monitors credit exposures against those assigned limits, exposures.

15. Employee Benefits

Effective October 2012, the Company adopted a profit-sharing plan (the "Plan"), which covers all U.S. employees. The Plan meets the requirements of a qualified retirement plan pursuant to the provisions of Section 401(k) of the Internal Revenue Code. The Plan also allows eligible employees to make tax deferred contributions to a retirement trust account up to 90% of their qualified wages, subject to the IRS annual maximums.

On April 23, 2021, a decree that reforms labor outsourcing in Mexico was published in the Federation's Official Gazette. This decree amended the outsourcing provisions, whereby operating companies can no longer source their labor resources used to carry out the core business functions from service entities or third-party providers. Under Mexican law, employees are entitled to receive statutory profit sharing (Participación) (Participación a los Trabajadores de las Utilidades or "PTU") payments. The required cash payment to employees in the aggregate is equal to 10% of their employer's profit subject to

[Table of Contents](#)

PTU, which differs from profit determined under U.S. GAAP. Please see *Note 9—Accrued Expenses and Other Liabilities in Item 1—Condensed Consolidated Interim Financial Statements and Notes (unaudited)* for additional information.

Gold Resource Corporation—Condensed Consolidated Interim Financial Statements and Notes (Unaudited)

17

[Table of Contents](#)

16. Stock-Based Compensation

The Company's compensation program comprises three main elements: (1) base salary, (2) an annual short-term incentive plan ("STIP") award which may be in the form of cash award, or Deferred Share Units ("DSUs") with immediate vesting, and (3) long-term equity-based incentive compensation ("LTIP") in the form of deferred stock units Performance Share Units ("DSUs" PSUs), restricted stock units Restricted Share Units ("RSUs"), and stock options, and performance share units ("PSUs"), options.

The Gold Resource Corporation 2016 Equity Incentive Plan (the "Incentive Plan") allows for the issuance of up to 5 million shares of common stock in the form of incentive and non-qualified stock options, stock appreciation rights, RSUs, stock grants, stock units, performance shares, PSUs, and DSUs.

The Company's STIP for its management team provides annual award, which may be settled as a cash payable through the issuance of fully vested equity awards (such as fully vested stock grants or DSUs), or a combination of cash and stock awards (DSUs), upon achievement of specified performance metrics. As of March 31, 2024, the Company has a \$0.8 million liability accrued for the 2023 and 2024 bonuses.

No stock options were granted, exercised, or forfeited during the three months ended March 31, 2024 and 2023.

No RSUs were granted during the three months ended March 31, 2024. RSUs of 612,059 were granted during the three months ended March 31, 2023. During the three months ended March 31, 2024, a total of 294,993 RSUs vested, for which 96,436 common shares were issued, with a fair value of \$31,091. During the three months ended March 31, 2024, RSUs of 64,300 were withheld for taxes due to net settlement, and 134,257 RSUs were deferred. During the three months ended March 31, 2023, a total of 195,525 RSUs vested, from which 88,570 RSUs were redeemed, issuing 70,433 common shares with a fair value of \$61,981. During the three months ended March 31, 2023, RSUs of 106,955 were deferred.

No PSUs were granted during the three months ended March 31, 2024. PSUs of 534,890 were granted during the three months ended March 31, 2023. PSUs cliff vest usually in three years based on the relative and absolute total shareholder return of a predetermined peer group and are expected to be settled in cash. Additionally, pursuant During the three months ended March 31, 2024, 201,258 PSUs were paid out in cash of \$0.1 million. No PSUs were paid out during the three months ended March 31, 2023.

During the three months ended March 31, 2024, no PSUs were forfeited due to employee terminations. There were 38,269 PSUs forfeitures during the terms same period in 2023. As of March 31, 2024 and 2023, the Incentive Plan, any award outstanding under current liability balances related to PSUs were \$0.1 million and \$0.2 million, respectively, and the prior plan that is terminated, expired, forfeited, or canceled for any reason will be available for grant under the Incentive Plan, non-current liability balances related to PSUs were \$0.1 million and \$0.1 million, respectively.

DSUs of nil and 278,663, respectively, were granted to the Board of Directors during the three and nine months ended September 30, 2023. DSUs of nil March 31, 2024 and 214,357 were granted to the Board of Directors during the three and nine months ended September 30, 2022, 2023, respectively. DSUs are vested immediately and redeemable in cash or shares at the earliest of 10 years or upon the eligible directors' termination. Termination is deemed to occur on the earliest of: (1) the date of voluntary resignation or retirement of the director from

the Board; (2) the date of death of the director; or (3) the date of removal of the director from the Board whether by shareholder resolution, failure to achieve re-election, or otherwise; and on which date the director is not a director or employee of the Company or any of its affiliates. These awards contain a cash settlement feature and are therefore classified as a liability and are marked to market each reporting period.

The Company may also issue DSUs for directors in lieu of board fees at their request. During the three and nine months ended September 30, 2023, March 31, 2024 and 2023 DSUs of 64,584 and 13,649, respectively, 32,323 and 63,624 DSUs were granted in lieu of board fees that are also subject to mark-to-market adjustment. During the three and nine months ended September 30, 2022, March 31, 2024 and 2023, DSUs of nil and 212,407, respectively, there were 3,746 and 10,454 DSUs granted in lieu of board fees. Additionally, during the first quarter of 2023, executives were granted 212,407 DSUs in lieu of half of their STIP cash bonus for 2022.

During the three and nine months ended September 30, 2023, 49,589 and 373,489 DSUs were redeemed, respectively, for the cash value of \$31 thousand and \$0.3 million, executive bonuses. There were no DSU redemptions during the same periods in 2022.

As of September 30, 2023 and 2022, the non-current liability balances related to DSUs were \$0.2 million and \$0.6 million, respectively. For the three and nine months ended September 30, 2023, the changes in liabilities related to DSUs resulted in \$0.1 million March 31, 2024 and \$20 thousand credit, respectively, to stock-based compensation expense. For the three and nine months ended September 30, 2022, the changes in liabilities related to DSUs resulted in \$13 thousand and \$0.4 million stock-based compensation expense, respectively.

RSUs of nil and 779,192 were granted during the three and nine months ended September 30, 2023, respectively. RSUs of nil and 611,681 were granted during the three and nine months ended September 30, 2022, respectively. During the three and nine months ended September 30, 2023, a total of 41,668 and 237,193 RSUs vested, respectively, for which 29,624 and 100,057 common shares were issued, respectively, with a fair value of \$16,886 and \$78,867, respectively. During the three and nine months ended September 30, 2023, a total of RSUs of 12,044 and 30,181, respectively, were withheld for taxes due to net settlement, and nil and 106,955 RSUs, respectively, were deferred. During the three and nine months ended September 30, 2022, a total of 41,666 and 119,467 RSUs vested, respectively, from which 41,666 and 80,169 RSUs were redeemed, respectively, issuing 41,666 and 75,584 common shares with a fair value of \$74,165 and \$138,101, respectively. During the three and nine months ended September 30, 2022, nil and 39,298 RSUs were deferred.

No stock options were granted nor exercised during the three and nine months ended September 30, 2023. Stock options of nil and 320,816 were granted during the three and nine months ended September 30, 2022, respectively. Stock options of nil and 355,000, respectively, were exercised during the three and nine months ended September 30, 2022. The exercises in 2022 were settled in cash. 2023.

Gold Resource Corporation—Condensed Consolidated Interim Financial Statements and Notes (Unaudited)

18 17

[Table of Contents](#)

PSUs of nil and 534,890, respectively, were granted during the three and nine months ended September 30, 2023. PSUs of nil and 695,041, respectively, were granted during the three and nine months ended September 30, 2022. PSUs cliff vest usually in three years based on the relative and absolute total shareholder return of a predetermined peer group and are expected to be settled in cash.

During the three and nine months ended September 30, 2023, there were 250,522 and 349,005 PSUs, respectively, forfeited due to employee terminations. There were no forfeitures during the same periods in 2022.

As of September 30, 2023 March 31, 2024 and 2022, the current liability balances related to PSUs were \$0.1 million and nil, respectively, and 2023, the non-current liability balances related to PSUs DSUs were \$0.3 million and \$0.9 million, respectively. For the three months ended March 31, 2024, the changes in liabilities related to DSUs resulted in \$0.1 million and \$0.2 million \$0.4 million, respectively, to stock-based compensation expense, respectively.

Stock-based compensation expense for the periods presented is as follows:

18. Other Expense, net

Other expense, net, for the periods presented consisted of the following:

[illegible]

(1) Gains and losses due to changes in fair value are non-cash in nature until such time that they are realized through cash transactions. For additional information regarding the Company's fair value measurements and investments, please see [Note 20—19—Fair Value Measurement in Item 1—Condensed Consolidated Interim Financial Statements and Notes \(unaudited\)](#) for additional information.

(2) Interest expense increased in the third quarter of 2023 due to updating the streaming models based on the Technical Report Summary (S-K 1300) filed for the Back Forty Project in October 2023.

(3) This is due to an organized reduction of workforce and leadership change at DDGM in Mexico.

19.18. Net Loss per Common Share

Basic net income per common share is calculated based on the weighted average number of common shares outstanding for the period. Diluted earnings per common share are calculated based on the assumption that stock options and other dilutive securities outstanding, which have an exercise price less than the average market price of the Company's common shares during the period, would have been exercised on the later of the beginning of the period or the date granted and that the funds obtained from the exercise were used to purchase common shares at the average market price during the period. All of the Company's RSUs are **considered anti-dilutive due to the Company's net loss for the period**. Since PSUs and DSUs are expected to be cash settled, they are not included in the dilutive **in periods with net income calculation**.

The effect of the Company's dilutive securities is calculated using the treasury stock method, and only those instruments that result in a reduction in net income per common share are included in the calculation. Options to purchase 1.1 million 0.8 million shares of common stock at weighted average exercise price of \$2.98 \$2.99 were outstanding as of September 30, 2023 March 31, 2024, but had no dilutive effect due to the net loss for the period. Options to purchase 2.1 million 1.5 million shares of common stock at a weighted average exercise price of \$3.52 \$2.90 were outstanding as of September 30, 2022 March 31, 2023 but had no dilutive effect due to the net loss for the period.

20. 19. Fair Value Measurement

Fair value accounting establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 Quoted prices in markets that are not active or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; and

Level 3 Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

As required by accounting guidance, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. These assets and liabilities are remeasured for each reporting period. The following tables set forth certain of the Company's assets and liabilities measured at fair value by level within the fair value hierarchy as of **September 30, 2023**, **March 31, 2024** and **December 31, 2022**, **December 31, 2023**:

[Table of Contents](#)

Investment in equity securities—Green Light Metals: Upon maturity on December 28, 2022, the Company received 12,250,000 private shares of Green Light Metals, which settled the promissory note receivable from Green Light Metals. The shares received represented approximately 28.5% ownership at the time. Management chose to account for this investment using the fair value option; therefore, these securities are carried at fair value. As of **September 30, 2023** **March 31, 2024**, the value of this equity investment was C\$4.9 million (\$3.6 million). The value of the issued shares was determined to be C\$0.40 per share, which was based on the significant unobservable input of Green Light Metals **recent** equity transactions. For the **nine three** months ended **September 30, 2023** **March 31, 2024**, there have been no gains or losses on the value of the shares the Company received, other than **some an immaterial** foreign exchange loss.

Gains and losses related to changes in the fair value of these financial instruments were included in the Company's Condensed Consolidated Interim Statements of Operations, as shown in the following **table: table (in thousands):**

| | For the three months ended September 30, | | For the nine months ended September 30, | | Statements of Operations Classification | For the three months ended March 31, 2024 2023 | | Statements of Operations Classification |

22.21. Segment Reporting

As of September 30, 2023 March 31, 2024, the Company has organized its operations into three geographic regions: Oaxaca, Mexico, Michigan, U.S.A., and Corporate and Other. Oaxaca, Mexico represents the Company's only production stage property. Michigan, U.S.A. is an advanced exploration stage property. Intercompany The Company does not have any intersegment revenue, and expense amounts all intercompany transactions have been eliminated within each segment in order to report the net income (loss) on the basis that management uses internally for evaluating segment performance. The Company's business activities that are not considered production stage or advanced exploration stage properties are included in Corporate and Other.

The following table shows selected information from the Condensed Consolidated Interim Balance Sheets relating to the Company's segments (in thousands):

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion summarizes the results of operations of Gold Resource Corporation and its subsidiaries ("we," "our," "us," or the "Company") for the three and nine months ended September 30, 2023 March 31, 2024 and compares those results with the three and nine months ended September 30, 2022 March 31, 2023. It also analyzes the Company's financial condition as of September 30, 2023 March 31, 2024, and compares it to the financial condition as of December 31, 2022 December 31, 2023. This discussion should be read in conjunction with management's discussion and analysis and the audited consolidated financial statements and footnotes contained in the 2022 2023 Annual Report.

The discussion also presents certain non-GAAP financial measures that are important to management in its evaluation of our operating results, and which are used by management to compare our performance with what we perceive to be peer group mining companies and are relied on as part of management's decision-making process. Management believes these measures may also be important to investors in evaluating our performance. For a detailed description of each of the non-GAAP financial measures and a reconciliation to GAAP financial measures, please see the discussion below under "Non-GAAP Measures." Also see Forward-Looking Statements at the end of this Item 2 for important information regarding statements contained herein.

Overview

Gold Resource Corporation is a mining company that pursues gold, silver, and other metal projects that are expected to achieve both low operating costs and high returns on capital. The Don David Gold Mine is our cornerstone asset comprised of six properties. The Company's focus is to unlock the significant upside potential of this asset through optimization of the current operations, growing the existing resource by investing in exploration drilling, and identifying new opportunities near existing infrastructure. The primary mineral production comes from the Arista underground mine. This mine supplies ore to our processing facilities to produce gold and silver doré and copper, lead, and zinc concentrates that also contain gold and silver.

The Back Forty Project, when developed, is expected to produce gold and silver doré and copper and zinc concentrates bearing gold and silver. Optimization work related to metallurgy and the economic model was completed during the third quarter of 2023 and the Company filed the Back Forty Project Technical Report Summary (S-K 1300) on October 26, 2023. Results of the work indicate a more robust economic project with no planned impacts to wetlands that is more protective of the environment, which should facilitate a successful mine permitting process. The Board continues to evaluate options in order to develop the Back Forty Project.

Review of Strategic Alternatives

Notwithstanding the technical successes noted above, in light of the continued challenges facing the Company, the Company's Board of Directors has decided to initiate a formal review process, with the assistance of outside financial and legal advisors, to evaluate strategic alternatives for the Company. The comprehensive process **will begin immediately is underway** and will evaluate a broad range of options to maximize shareholder value, including a potential sale **or merger** of the Company.

There is no deadline or definitive timetable for completion of the strategic alternatives review process, and there can be no assurance regarding the results or outcome of this review. The Company does not intend to comment further on this strategic review process until it has been completed or the Company determines that a disclosure is required by law or otherwise deemed appropriate.

Removing Loose Rock

DDGM **has** is focused on safety, efficiency, and cost-saving initiatives, while emphasizing strong leadership and collaboration. The safety efforts have resulted in zero lost time injuries for the **quarter and a significantly lower Lost Time Injury Frequency Rate of 0.11 compared to Cámara Minera de México's average of 0.89, quarter**. Leadership training programs have been successfully implemented, empowering leaders to enhance team productivity and safety. Union leaders and contractors **have continue to actively participated participate** in safety programs, fostering a cooperative work community.

While production maintained tonnage levels similar Processing plant throughput was reduced to cope with a variation in the make-up water quality supplied from the tailings storage facility decant pond. Preparations during the quarter for the closure of the tailings storage facility reduced the make-up water supply to the **first quarter, plant**, which in turn affected pH levels in that water supplied to the three floatation circuits. Each circuit operates optimally at a **significant portion** different pH (6-6.5 slightly acidic and 10.5-11 highly alkaline); however, during the transition to a smaller tailings decant pond as part of the **material came from lower closure preparations, controlling the pH levels with became a decreased Net Smelter Return**. Mining these sections was necessary to integrate transverse long-hole stoping challenge. This resulted in the **fourth** use of additional reagents to control pH levels, and due to the less-than-optimal conditions, recoveries were lower than expected. A full review is planned for the second quarter which is expected of 2024, followed by modifications to **impact mining costs positively, improve the processing recoveries**.

To ensure long-term sustainability and profitability, DDGM has implemented cost-saving measures **starting in 2023**, including a 10% reduction in headcount, minimizing crusher usage during peak hours, improving mining cycle efficiencies, and enhancing drilling and bolting processes. These measures optimize operations without compromising safety or productivity.

Lastly, **DDGM's DDGM's** persistent commitment to safety, efficiency, leadership development, collaboration with unions and contractors, and cost-saving initiatives positions the company for continued success. The company remains dedicated to delivering value to shareholders, while maintaining responsible and sustainable mining practices.

2023 DDGM Exploration Update

Our portfolio of properties that make up the Don David Gold Mine are located along a 55-kilometer trend of the San Jose structural corridor in the Sierra Madre Sur mountain range. This northwest trending structural corridor spans three historic mining districts within the state of Oaxaca. Regional surface exploration activity continues on several properties with a goal of defining additional priority drill targets, demonstrating our commitment to long-term investment in Oaxaca, Mexico.

Underground exploration (expansion) and **During the first quarter of 2024**, underground infill drilling continued **during the third quarter of 2023, where access is available, from accessible areas** using five diamond-drill rigs **one dedicated contract diamond drill rig** from various locations **drill stations** within the Arista mine. Expansion drilling was conducted to (1) further test the Three Sisters and Gloria vein systems, as well as other newly identified vein targets in the Arista North vein system including the Splay 31 and Mareña North veins, and (2) infill drilling in the central-north Switchback deposit and **in mine, targeting** the Three Sisters and Gloria vein systems to further define, **expand and expand Mineral Reserves and upgrade the Mineral Resources** in these **areas**.

The underground **recently discovered zones**. A second diamond drill **program continues rig, owned and operated by DDGM, was allocated to advance our 2023 exploration objectives grade control drilling, providing additional information for improved ore definition and detailed geologic model improvements aimed at bolstering mining efficiencies and ensuring the delivery of identifying new mineralization and defining and upgrading additional mineral resources that were identified during the previous drilling campaign. These recent drill results will be**

incorporated into a 2023 resource estimate update. Preliminary calculations show a positive increase in tonnage with higher grades in both the Arista and Switchback vein deposits, along with an increase highest-quality (NSR) ore to the inferred resources of the Gloria and Three Sisters vein systems, process plant.

[Table of Contents](#)

The underground drill program continues to advance our 2024 exploration objectives of identifying new mineralization and defining and upgrading additional Mineral Resources identified during the previous drilling campaign. First quarter drill results will be incorporated into a 2024 resource estimate update. Preliminary calculations show a positive increase in tonnage along with higher grades in the Three Sisters and Gloria vein systems. Upon the completion of an additional 250 meters of exploration development scheduled to begin in the second quarter of 2024, expansion drilling will resume with the goal of expanding the Three Sisters and Gloria vein systems along strike to the north-west and down dip.

During the third first quarter of 2023, eight exploration 2024, nine infill drill holes were completed, for a total of 3,343 3,390 meters, while 54 infill fifteen grade control drill holes were completed for 9,374 a total of 1,286 meters. One geotechnical drill hole was also drilled for a total of 115 meters. The positive initial results from the ongoing exploration drilling campaign have validated the additional continued investment of capital in exploration during 2023 2024 and have further bolstered the area's potential for future mineral exploration.

Exploration drilling in the third first quarter of 2023 continued to target 2024 targeted the following zones at the Arista mine:

- o The northwest extension Building upon the successful 2023 expansion and infill drilling programs of the Switchback system at depth and along strike, where we have confirmed the continuation of the system, which now extends for over 1,100 meters along a northeast-southwest strike, remaining open in both directions as well as up- and down-dip.
- o The Three Sisters vein system, in conjunction with the and recently discovered Gloria vein system, systems, infill drilling continued to be strategically prioritize these areas for drill targeted targeting in the third first quarter of 2023. The 2024. Infill drilling of the Three Sisters and Gloria vein systems have now been defined over a strike length of more than 700 meters, with both systems remaining open along a northwest-southeast strike and at depth.
- o Exploration drilling got underway during the third quarter to test the northwest extension of the Arista vein system, targeting the Splay 31 and Marena North veins in particular. This drilling occurs approximately 100 meters northwest of the historic Arista mine working limits. Vein intercepts drilled during the third quarter show visual mineralized continuity (along strike and at depth) in the projections of the northwest trending Arista veins (i.e., Splay 31, Marena North) northwest of areas previously modeled and outside the current resource shell. The projected intersection of the western terminus of the Gloria vein continued from Level 3 with the northwest trending Arista vein system is becoming an increasingly exciting future exploration target at DDGM.
- o In the third quarter of 2023, infill drilling was focused on Levels 27 and 28 in the central and north Switchback vein system. This drilling successfully confirmed the continuity and economic viability of the Susana North, Soledad North, Salamanca, and Sagrario veins along strike to the northwest and down-dip of the current Switchback deposit and outside current resource shells. Additionally, infill drilling began late in the third quarter on the Three Sisters vein system and the Splay 31 vein of the North Arista vein system, with the aim primary objective of upgrading inferred resources to the indicated category. Mineral Resources of these areas. Due to their proximity to existing mine infrastructure, these areas will provide efficient and quick access to near-term mine production opportunities. To date, the Three Sisters and Gloria vein systems have been drill tested over a strike length of more than 700 meters, with both systems remaining open along strike to the northwest, as well as up- and down-dip.
- o During the first quarter of 2024, grade control drilling focused on validating near-term production opportunities not previously realized within the Arista mine. Grade control drilling during the first quarter focused on the upper levels of the Arista vein system from Level 1 targeting the upper-central zones of the Splay 31, Arista and Aire veins as well as in the Switchback system from Level 28 targeting the Sofia vein. Definition of these zones allows mining operations increased flexibility in scheduling, ensuring improved operating efficiencies.

Regional exploration during the third first quarter of 2023 2024 continued to focus on evaluating and prioritizing advanced stage projects located along the 55-kilometer trend in the San Jose structural corridor. These projects include Alta Gracia, Margaritas, Chamizo, El Rey, and Jabali, all situated within the 55.1 square kilometers of concession holdings controlled by the Don David Gold Mine. Additionally, other prospects in the vicinity of the Arista mine are being re-evaluated for near-term potential, with the goal of defining additional priority drill targets. A regional geologic map to outline of the DDGM concession holdings with the advanced stage project locations is provided below.

(1) During the first and second quarter of 2022 and during the first quarter of 2023, tonnes milled includes 1,043, 215, and 1,060 purchased tonnes, respectively, related to a collaborative initiative with a local community to ensure the proper environmental treatment and storage of the material.

(2) Based on actual days the mill operated during the period.

(3) The difference between what we report as "ounces/tonnes produced" and "payable ounces/tonnes sold" is attributable to the difference between the quantities of metals contained in the concentrates we produce versus the portion of those metals actually paid for according to the terms of our sales contracts. Differences can also arise from inventory changes incidental to shipping schedules, or variances in ore grades and recoveries, which impact the amounts of metals contained in concentrates produced and sold.

[Table of Contents](#)

Third First quarter 2023 2024 compared to third first quarter 2022 2023

Production

During the three months ended September 30, 2023 March 31, 2024, total tonnes milled of 116,626 98,889 were 5% higher 15% lower than in the same period in 2022 2023. Metal production for gold, silver, copper, lead, and zinc decreased by 24% 34%, 5% 22%, 7% 17%, 16% 48%, and 17% 40%, respectively, during the three months ended September 30, 2023 March 31, 2024 as compared to the same period last year as a result of the lower tonnes processed and the lower metal grades as that was expected and in line with the 2023 2024 mine plan.

Grades & Recoveries

During the three months ended September 30, 2023 March 31, 2024, all of the ore processed came from the Arista underground mine with an average gold grade of 1.52 1.89 g/t and silver grade of 73 88 g/t, compared to 1.98 2.33 g/t and 80 94 g/t, respectively, for the same period in 2022 2023. In 2023, 2024, the average gold and silver grades were 23% 19% and 9% 6% lower, respectively. As shown in the Technical Report Summary for DDGM incorporated by reference in the 2022 2023 Annual Report (the "Technical Report Summary"), the ore grades are expected to decline in 2023 2024 in line with the life of mine average shown in the estimates of mineral reserves (as defined by subpart 1300 of Regulation S-K, "Mineral Reserve") and mineral resources (as defined by subpart 1300 of Regulation S-K, "Mineral Resource") tables contained therein (the "Mineral Reserve and Mineral Resource Tables"). As grades decline, recoveries are expected to decline as well. Our base metals average grades during the three months ended September 30, 2023 March 31, 2024 were 0.32% 0.37% for copper, 1.29% 1.25% for lead, and 3.24% 2.82% for zinc. Copper, The lead and zinc grades were 14% lower by 28% and 27%, 19%, and 23% lower, respectively, than in the as compared to same period in 2022 2023. The copper grades were unchanged.

Gold and silver recoveries for the three months ended September 30, 2023 March 31, 2024 were 77.9% 79.3% and 89.7% 90.3%, respectively, reflecting a 6% 2% decrease for gold and a 2% 1% decrease for silver over the same period in 2022. The mineralization in the third quarter of 2023 was different from the same period in 2022, containing high quartz. Quartz has an adverse effect on the floatation. Some of the gold is encapsulated in the quartz and is lost due to the fact it cannot be recovered in the floatation circuit. 2023. Copper, lead, and zinc recoveries for the three months ended September 30, 2023 March 31, 2024 were 74.5% 76.0%, 69.5% 65.7%, and 85.2% 82.7%, respectively. While recoveries Recoveries for copper, lead, and zinc in the three months ended September 30, 2023 for both copper and zinc increased by 2%, recoveries for lead decreased by 2% March 31, 2024 when compared to the same period in 2022 2023 declined by 1%, 15%, and 2%, respectively. As shown in the Technical Report Summary incorporated by reference in the 2022 2023 Annual Report, future recoveries and grades are expected to align with the life of mine average shown in the Mineral Reserve and Mineral Resource Tables.

Year-to-date 2023 compared to year-to-date 2022

Production

During the nine months ended September 30, 2023, total tonnes milled of 346,857 were 8% lower than during the same period in 2022. Metal production for gold, copper, lead, and zinc decreased by 38%, 8%, 25%, and 23%, respectively, during the nine months ended September 30, 2023 as compared to the same period last year, as a result of the lower tonnes processed and lower metal grades as expected and in line with the 2023 mine plan. Metal production for silver increased by 2% during the nine months ended September 30, 2023 as compared to the same period last year due to higher silver grades.

Grades & Recoveries

During the nine months ended September 30, 2023, the majority of ore processed came from the Arista underground mine with an average gold grade of 1.82 g/t and silver grade of 85 g/t, compared to 2.57 g/t and 75 g/t, respectively, for the same period in 2022. The average gold grade was 29% lower, and the average silver grade was 13% higher in 2023. As shown in the Technical Report Summary incorporated by reference in the 2022 Annual Report, grades are expected to decline in 2023 in line with the life of mine average shown in the Mineral Reserve and Mineral Resource Tables. As grades decline, recoveries are expected to decline as well. Our base metals average grades during the nine months ended September 30, 2023 were 0.35% for copper, 1.56% for lead, and 3.61% for zinc. Copper, lead, and zinc grades were 5%, 16%, and 18% lower, respectively, than in the same period in 2022.

[Table of Contents](#)

Gold and silver recoveries for the nine months ended September 30, 2023 were 79.7% and 91.0%, respectively, reflecting a 5% decrease for gold and a 2% decrease for silver over the same period in 2022. In 2023, we encountered different mineralization, containing zones of high quartz. Quartz has an adverse effect on the floatation. Some of the gold is encapsulated in the quartz and is lost due to the fact it cannot be recovered in the floatation circuit. Copper, lead, and zinc recoveries for the nine months ended September 30, 2023 were 77.0%, 74.1%, and 84.8%, respectively. While recoveries for copper and zinc for the nine months ended September 30, 2023 increased by 3% and 2%, respectively, recoveries for lead decreased by 3% compared to the same period in 2022. As shown in the Technical Report Summary incorporated by reference in the 2022 Annual Report, future recoveries and grades are expected to align with the life of mine average shown in the Mineral Reserve and Mineral Resource Tables.

Sales Statistics

The following table summarizes certain sales statistics about the Don David Gold Mine operations for the periods indicated:

| | For the three months ended September 30, | | For the nine months ended September 30, | |

(1) Average metal prices realized vary from the market metal prices due to final settlement adjustments from our provisional invoices when they are settled. Our average metal prices realized will therefore differ from the average market metal prices in most cases.

Third First quarter 2024 compared to first quarter 2023 compared to third quarter 2022

The key drivers of the production and financial results for the third first quarter of 2023, 2024, as compared to the third first quarter of 2022, 2023, relate to the higher lower tonnes mined and changes in metal grades, grades and recoveries. These results align with the 2023 2024 mine plan and were considered in the 2023 2024 guidance disclosed in the 2022 2023 Annual Report. Financial results have also been impacted unfavorably by the strengthening Mexican peso and the substantially lower zinc price realized in 2024 as compared to 2023.

Metal Sold

During the three months ended September 30, 2023 March 31, 2024, gold sales of 8,982 3,557 ounces, silver sales of 208,905 216,535 ounces, copper sales of 245 264 tonnes, lead sales of 947 667 tonnes, and zinc sales of 2,571 1,682 tonnes decreased by 45%, 27%, 7% 20%, 13%, 10% 53% and 13% 45% respectively, as compared to the same period in 2022, 2023. The lower metal production was expected due to mine sequencing.

Average metal prices realized

During the three months ended September 30, 2023 March 31, 2024, the average metal prices were \$1,934 \$2,094 per ounce for gold, \$23.61 \$23.29 per ounce for silver, \$8,185 \$8,546 per tonne for copper, \$2,196 \$1,977 per tonne for lead, and \$2,195 \$2,483 per tonne for zinc. Compared to the same period in 2022, the average metal price for gold, silver, copper, and lead increased by 19%, 27%, 15%, and 17%, respectively, while the average metal price zinc decreased 31%.

Year-to-date 2023 compared to year-to-date 2022

Key drivers in the production and financial results for the nine months ended September 30, 2023, as compared to the same period in 2022, relate to the lower tonnes mined and changes in metal grades. These results align with the 2023 mine plan and were considered in the 2023 guidance disclosed in the 2022 Annual Report. Financial results have also been impacted unfavorably by the strengthening Mexican peso and the lower zinc price realized in 2023.

Metal Sold

During the nine months ended September 30, 2023, gold sales of 14,777 ounces, copper sales of 904 tonnes, lead sales of 3,681 tonnes, and zinc sales of 8,772 tonnes decreased by 35%, 7%, 17%, and 19%, respectively, as compared to the same period in 2022. Silver sales of 777,977 ounces increased by 8% during the nine months ended September 30, 2023 compared to the same period in 2022.

Average metal prices realized

During the nine months ended September 30, 2023, the average metal prices were \$1,948 per ounce for gold, \$23.86 per ounce for silver, \$8,624 per tonne for copper, \$2,166 per tonne for lead, and \$2,648 per tonne for zinc. Compared to the same period in 2022, the average metal price for gold and silver increased by 7% and 10%, respectively, while the average metal price for copper and zinc decreased by 4% and 31%, respectively. The average price for lead was the same as in the comparable period in 2022.

[Table of Contents](#)

same period in 2023, the average metal price for gold and silver increased by 9% and 1%, respectively, while copper, lead and zinc decreased by 7%, 8%, and 22%, respectively.

(1) For a detailed description of each of the non-GAAP financial measures and a reconciliation to GAAP financial measures, please see the discussion below under "Non-GAAP Measures".

[Table of Contents](#)**Third First quarter 2024 compared to first quarter 2023 compared to third quarter 2022***Sales, net*

Net sales of \$20.6 million \$18.7 million for DDGM for the three months ended September 30, 2023 March 31, 2024 decreased by \$3.3 million \$12.5 million, or 14% 40%, when compared to the same period in 2022, 2023. The decrease in 2023 2024 net sales is the result of decreased sales volumes and lower realized metal prices for zinc, base metals, as outlined in the sales statistics table above. Additionally, treatment and refining charges during the three months ended September 30, 2023 March 31, 2024 decreased by 3% 50% as a result of the decline in third first quarter 2023 2024 production as compared to third first quarter 2022 2023 production.

Total cost of sales

Total cost of sales of \$25.0 million \$20.8 million for the three months ended September 30, 2023 March 31, 2024 decreased by 4% 24% from \$26.0 million \$27.3 million for the same period in 2022, 2023. The \$1.0 million \$6.4 million decrease was primarily related to a \$0.4 million \$3.7 million decrease in production cost and a \$0.8 million \$3.0 million decrease in depreciation expense. Production costs of \$19.0 \$16.1 million for the three months ended September 30, 2023 March 31, 2024 are 2% 19% lower than the production costs of \$19.4 \$19.9 million for the same period in 2022, 2023. Although the cost of sales and production costs were lower during the third first quarter of 2023 2024 compared to the same period in 2023, the cost of sales as a percentage of revenue was 12% 25% higher because the increased power rates and the strengthening of the peso negatively impacted production costs.

Mine gross (loss) profit

For the three months ended September 30, 2023 March 31, 2024, the Company had a mine gross loss of \$4.4 million \$2.2 million, compared to a mine gross profit of \$3.9 million three months ended March 31, 2023. Mine gross loss increased profit decreased by \$2.2 \$6.1 million, or 103% 155%, compared to the same period in 2022, 2023. The increase in loss was primarily due to a \$3.3 million \$12.5 million, or 14% 40% decrease in net sales, partially offset by a \$0.4 million \$3.7 million, or 2% 19% decrease in production costs and a \$0.8 million \$3.0 million, or 12% 42% decrease in depreciation and amortization expenses.

The relationship between sales and the cost of sales, and therefore mine gross profit, is not perfectly correlated to the tonnes of ore processed. While both sales and the cost of sales are impacted by the tonnes of ore processed, other factors,

[Table of Contents](#)

such as the grade of ore processed, metal commodity prices, and operating costs have a significant impact on mine gross profit. For example, in the third quarter of 2023, the tonnes of ore processed increased by 5%, but the total cost of sales only decreased by 4% compared to the third quarter of 2022 due to a 9% lower cost per tonne processed; however, sales decreased by 14%.

We expect grades to vary from period to period based on the annual mine plan. The gold grades are expected to trend downwards over time, toward the average grade of 1.14 g/t (exclusive of silver, copper, lead, and zinc contained grades), reflected in our mineral reserve

estimate. However, as mine development progresses and infill drilling occurs, opportunities to refine mining methods and reduce dilution may have a favorable impact on future mined grades.

Net (loss) income

For the three months ended September 30, 2023, we recorded a net loss of \$7.3 million, compared to a net loss of \$9.7 million during the same period in 2022. The \$2.4 million decrease in net loss is mainly attributable to the higher tax benefit in the third quarter of 2023.

Year-to-date 2023 compared to year-to-date 2022

Sales, net

Net sales of \$76.6 million for DDGM for the nine months ended September 30, 2023 decreased by \$29.8 million, or 28%, compared to the same period in 2022. The decrease in 2023 sales is the result of decreased sales volumes outlined in the sales statistics table above. Additionally, treatment and refining charges during the nine months ended September 30, 2023 increased by 6% due to an increase in the zinc treatment charge benchmark and spot price.

Total cost of sales

Total cost of sales decreased by 2% to \$79.2 million for the nine months ended September 30, 2023 from \$81.2 million for the same period in 2022. The \$2.0 million decrease was primarily related to a \$2.1 million decrease in production cost, offset by higher reclamation and remediation expenses. Production costs of \$59.1 million for the nine months ended September 30, 2023 are 3% lower than the production costs of \$61.2 million for the same period in 2022. The decrease is directly related to an 8% decrease in ore tonnes processed. Although the cost of sales and production costs were lower during the nine months ended September 30, 2023 compared to the same period in 2022, the cost of sales as a percentage of revenue was 27% higher because of the increased power rates and the strengthening of the peso negatively impacted production costs.

Mine gross (loss) profit

For the nine months ended September 30, 2023, mine gross profit decreased \$27.8 million, or 111% compared to the same period in 2022, from a mining gross profit of \$25.2 million in 2022 to a mining gross loss of \$2.7 million in 2023. The decrease was primarily due to a \$29.8 million, or 28% decrease in net sales, offset by a \$2.1 million, or 3% decrease in production costs.

The relationship between sales and the cost of sales, and therefore mine gross profit, is not perfectly correlated to the tonnes of ore processed. While both sales and the cost of sales are impacted by the tonnes of ore processed, other factors, such as the grade of ore processed, metal commodity prices, and operating costs have a significant impact on mine gross profit. For example, for in the nine months ended September 30, 2023, first quarter of 2024, the volume tonnes of ore processed decreased by 8% 15%, but and the total cost of sales decreased only by 2% 24% compared to the same period in 2022 first quarter of 2023 due to a 6% higher 9% lower cost per tonne processed; however, net sales decreased by 28% due to a decrease in ore tonnes processed and a decrease in grade of ore tonnes processed for gold and base metals. The decrease in sales is explained by the decrease in volumes as well as the decrease in grades for gold and base metals in 2023, and the decrease in operating costs is primarily explained by the decrease in production costs and depreciation. 40%.

[Table of Contents](#)

We expect grades to vary from period to period based on upon the potential for unplanned changes to the annual mine plan. The gold grades are expected to trend downwards over time, toward the average grade of 1.14 1.29 g/t (exclusive of silver, copper, lead, and zinc contained grades), reflected in our mineral reserve estimate. However, as capital intensive mine development progresses and infill drilling occurs, opportunities to access upgraded resources or refine mining methods and eliminate reduce dilution may have a favorable impact on future mined ore grades.

Net (loss) income

Other Costs and Expenses, Including Taxes

Third First quarter 2023 2024 compared to third first quarter 2022 2023

DDGM Exploration expenses: For the three months ended September 30, 2023, March 31, 2024, exploration expenses in DDGM totaled \$1.5 million, compared to \$0.9 million, compared to \$1.1 million for the same period in 2022, 2023. Exploration activities in Oaxaca, Mexico, increased compared to the same period in 2022, 2023 primarily due to the reduction in expansion drilling and underground exploration drilling activity and increased contract drilling rates in 2023.

Back Forty Project expenses: For the three months ended September 30, 2023, costs for the optimization work totaled \$0.4 million. Back Forty Project were \$0.2 million, compared to \$3.8 million \$0.5 million for the same period in 2022, 2023. The 89% 54%

decrease is due to the completion of the optimization work in the third quarter of 2023 and utilizing third parties only on a limited basis until after not actively progressing the completion of the capital cost analysis for the project. project in 2024.

Stock-based compensation: Stock-based compensation decreased by \$0.5 million \$0.4 million for the three months ended September 30, 2023 March 31, 2024 compared to the same period in 2022, 2023. This decrease is mainly due to the downward mark-to-market adjustment in timing of issuance of new grants, which is still under the liability-classified share-based awards due to a decrease in share price.

Realized and unrealized loss on zinc zero cost collar: As Board of December 31, 2022, the Company's hedge program concluded; therefore, no gains or losses were recorded in 2023. For the three months ended September 30, 2022, a \$0.2 million gain was recorded related to the zinc zero cost collar, consisting of a realized gain of \$0.1 million and an unrealized gain of \$0.1 million. Directors' review.

Other expense, net: For both the three months ended September 30, 2023, \$2.0 million March 31, 2024 and 2023, the Company incurred \$1.5 million of other expense was recorded compared to \$0.8 million in other expense during the same period of 2022. The \$1.2 million increase primarily is the result

[Table of Contents](#)

of the \$0.7 million severance expense due to the reduction of workforce and changes in the leadership team at DDGM in Mexico. expenses. Please see Note 18 17 - Other expense, net in Item 1—Condensed Consolidated Interim Financial Statements and Notes (unaudited) for a detailed breakdown.

Provision for income taxes Income tax benefits: For the three months ended September 30, 2023 March 31, 2024, income tax benefit was \$2.7 million \$1.9 million, compared to \$0.2 million \$0.1 million income tax benefit for the same period in 2022, 2023. The increase in income tax benefit for the three months ended September 30, 2023 March 31, 2024 is due to the 2023 third quarter \$4.7 million higher loss primarily occurring in Mexico whereas the 2022 third quarter loss occurred primarily in USA subject to a full valuation allowance.

Year-to-date 2023 compared to year-to-date 2022

General and administrative expenses: For the nine months ended September 30, 2023 and 2022, general and administrative expenses were \$5.1 million and \$5.6 million, respectively, representing a 9% decrease from the same period of 2022 primarily due to the impact of increased audit fees and consulting services in the second quarter of 2022, related to finalizing the Aquila acquisition and the allocation of \$1.7 million corporate personnel costs for management and technical services specifically related to DDGM from general and administrative expenses to production costs for the Mexican operations.

DDGM Exploration expenses: For the nine months ended September 30, 2023, exploration expenses in DDGM totaled \$4.0 million, compared to \$3.2 million for the same period in 2022. Exploration activities in Oaxaca, Mexico, increased before income taxes compared to the same period in 2022 primarily due to increased drilling activity and increased contract drilling rates in 2023.

Back Forty Project expenses: For the nine months ended September 30, 2023, costs for the optimization work totaled \$1.3 million, compared to \$6.9 million for the same period in 2022. The 82% decrease is due to the completion of the optimization work in the third quarter of 2023 and utilizing third parties only on a limited basis until after the completion of the capital cost analysis for the project.

Stock-based compensation: Stock-based compensation decreased by \$1.1 million for the nine months ended September 30, 2023 compared to the same period in 2022. This decrease is mainly due to the downward mark-to-market adjustment in the liability-classified share-based awards due to a decrease in share price.

Realized and unrealized loss on zinc zero cost collar: As of December 31, 2022, the Company's hedge program concluded; therefore, no gains or losses were recorded in 2023. For the nine months ended September 30, 2022, a \$0.1 million loss was recorded related to the zinc zero cost collar. The year-to-date loss of \$0.1 million is the result of the year-to-date realized loss of \$2.4 million offset by the \$2.3 million unrealized gain related to the zero cost collars that matured from October through December 2022.

Other expense, net: For the nine months ended September 30, 2023, \$4.1 million of other expense was recorded compared to \$1.8 million other expense during the same period of 2022. The \$2.3 million increase primarily is the result of the \$1.5 million severance expense due to the reduction of workforce and change in the leadership team at DDGM in Mexico. Please see *Note 18 - Other expense, net* in *Item 1—Condensed Consolidated Interim Financial Statements and Notes (unaudited)* above for a detailed breakdown.

Provision for income taxes: For the nine months ended September 30, 2023, income tax benefit was \$4.7 million, compared to \$8.9 million income tax expense for the same period in 2022. The decrease in income tax expense for the nine months ended September 30, 2023 is driven by the decrease in the nine-month net income before income taxes.

Other Non-GAAP Financial Measures

Third First quarter 2023 2024 compared to third first quarter 2022 2023

Total cash cost after co-product credits per AuEq oz sold: For the three months ended September 30, 2023 March 31, 2024, the total cash cost after co-product credits per AuEq oz sold is \$1,839 \$1,667 compared to \$1,103 \$711 for the same period in 2022, 2023. The increase is due to the lower amount of co-product credits we received during the third first quarter of 2023, 2024, and the 19% 41% decrease in the total number of AuEq ounces sold, offset by a 3% 50% decrease in total treatment and refining charges as a result of the decline in third first quarter 2023 2024 production as compared to third first quarter 2022 2023 production. Although production costs were lower in the third first quarter of 2023 2024 compared to the same period last year, the strengthening peso and increased energy costs negatively impacted production costs and, therefore, the cost per tonne processed and the total cash cost after co-product credits per AuEq oz sold.

Graphic

Total consolidated all-in sustaining cost after co-product credits per AuEq oz sold: For the three months ended September 30, 2023 March 31, 2024, the total consolidated all-in sustaining cost after co-product credits per AuEq oz sold was \$2,669 \$2,295 compared to \$1,838 \$1,221 for the same period in 2022, 2023. The increase directly relates to the higher cash costs per ounce discussed above.

Total all-in cost after co-product credits per AuEq oz sold: For the three months ended September 30, 2023 March 31, 2024, the total all-in cost after co-product credits per AuEq oz sold was \$3,001 \$2,480 compared to \$2,457 \$1,404 for the same period in 2022, 2023. The increase is due to the higher all-in sustaining costs discussed above and lower exploration expense related to advancing the Back Forty optimization work and permitting activities.

Year-to-date 2023 compared to year-to-date 2022

Total cash cost after co-product credits per AuEq oz sold: For the nine months ended September 30, 2023, the total cash cost after co-product credits per AuEq oz sold was \$1,210 compared to \$368 for the same period in 2022. The increase is due to the lower amount of co-product credits we received during the nine months ended September 30, 2023, the 22% decrease in total number of AuEq ounces sold, and the 6% increase in treatment and refining charges as a result of an increase in the zinc treatment charge benchmark and spot price. Although

production costs were lower for the nine months ended September 30, 2023 compared to the same period last year, the strengthening peso and increased energy costs negatively impacted production costs and, therefore, the cost per tonne processed and the total cash cost after co-product credits per AuEq oz sold.

[Table of Contents](#)

Total consolidated all-in sustaining cost after co-product credits per AuEq oz sold: For the nine months ended September 30, 2023, the total consolidated all-in sustaining cost after co-product credits per AuEq oz sold was \$1,852 compared to \$998 for the same period in 2022. The increase is directly related to the higher cash costs per ounce discussed above, partially offset by lower sustaining capital expenditures.

Total all-in cost after co-product credits per AuEq oz sold: For the nine months ended September 30, 2023, the total all-in cost after co-product credits per AuEq oz sold was \$2,082 compared to \$1,383 for the same period in 2022. The increase is due to the higher all-in sustaining costs discussed above, partially offset by lower Back Forty costs due to nearing completion of the optimization work and utilizing third parties only on a limited basis until after completion of capital cost analysis for the project. **above.**

| Total Capital and Exploration: | | \$ | 14,990 | | \$ | 3,179 |
| | | | \$15 - 18 million | | | \$12.0 - 16.2 million |

The Company's investment in Mexico through in the third first quarter of 2023 2024 totaled \$13.3 million \$3.0 million. Our investment in Mexico is focused on favorably impacting our environment, social, and governance programs while creating operational efficiencies and sustainability. At the Back Forty Project, year-to-date \$ 1.3 million has been invested in optimization work and permitting initiatives year-to-date.

Gold Resource Corporation—Management's Discussion and Analysis of Financial Condition and Results of Operations

41 35

[Table of Contents](#)

Underground and Exploration Development:

Mine development during the quarter included ramps, and access to different areas of the deposit and ventilation shafts, and shafts. No exploration or infill development drifts. A total of 87 meters of development (included in Infill Drilling and Exploration Development in the table above), at a cost of \$0.3 million was completed during the third first quarter of 2024 as all drilling is being done from existing infrastructure developed in 2023. Additional exploration development is scheduled for the second and third quarters of 2024. As part of ongoing safety initiatives, the Company also invested in additional ground support and improved ventilation for the mine. Year to date, an investment of \$1.5 million has been made in the construction of 520 meters of development for exploration purposes.

Three Sisters / Gloria vein systems**

Back Forty Feasibility and Permitting:

Work on optimizing the Back Forty Project was completed during the third quarter of 2023. Mine planning, process plant design, site layout, and infrastructure were largely completed during 2022. As a result, the Company filed the Back Forty Project Technical Report Summary (S-K 1300) on October 26, 2023. Results of the work indicate a more robust economic project with no planned impacts to wetlands that is more protective of the environment, which should facilitate a successful mine permitting process. The Board continues to evaluate potential alternative options in order to develop the Back Forty Project.

Non-GAAP Measures

Throughout this report, we have provided information prepared or calculated according to U.S. GAAP and have referenced certain non-GAAP performance measures that we believe will assist with understanding the performance of our business. These measures are based on precious metal gold equivalent ounces sold and include (i) **total** cash cost after co-product credits per ounce and (ii) **total** all-in sustaining cost after co-product credits ("AISC") **per ounce**, and (iii) **all-in cost after co-product credits** per ounce. Because the non-GAAP performance measures do not have any standardized meaning prescribed by U.S. GAAP, they may not be comparable to similar measures presented by other companies. Accordingly, these measures should not be considered in isolation or as a substitute for, measures of performance prepared in accordance with U.S. GAAP. These non-GAAP measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP.

For financial reporting purposes, we report the sale of base metals as part of our revenue. Revenue generated from the sale of base metals in our concentrates is considered a co-product of our gold and silver production for the purpose of calculating our total cash cost after co-product credits for our Don David Gold Mine. We periodically review our revenues to ensure that our reporting of primary products and co-

Liquidity and Capital Resources

As of **September 30, 2023** **March 31, 2024**, working capital was **\$13.8 million** **\$13.6 million**, consisting of current assets of **\$28.9 million** **\$25.7 million** and current liabilities of **\$15.1 million** **\$12.1 million**. This represents a **\$7.6 million** **\$1.6 million**, or **36%** **11%**, decrease from the working capital balance of **\$21.4 million** **\$15.2 million** as of **December 31, 2022** **December 31, 2023**. The primary factors factor influencing the decrease in our working capital were a payment of the liability related to the mining royalty tax, the cash used by operating activities of **\$7.0 million**, and the cash used in investing activities of **\$9.8 million** **\$2.0 million** as reported in the *Condensed Consolidated Interim Statements of Cash Flows*. Our working capital balance fluctuates as we use cash to fund our operations, financing and investing activities, including exploration, mine development, and income taxes. We believe that as a result of our cash balances, the performance of our current and expected operations, and the current metals prices, we will be able to meet our known obligations and other potential cash requirements for the next 12 months.

Long-term liabilities assumed with the Aquila acquisition, capital requirements to develop the Back Forty Project, and potential project financing may have an impact on liquidity in the long term. These long-term liabilities are contingent upon the approval of the Back Forty Project by the Company's Board of Directors and securing project financing. Project financing is requirements will not expected be determined until the Company Board of Directors approves a decision to be required any earlier than 2024. proceed on the Project. The Board continues to evaluate options that could lead to the development of the Project.

Cash and cash equivalents as of **September 30, 2023** **March 31, 2024** decreased to **\$6.7 million** **\$5.7 million** from **\$23.7 million** **\$6.3 million** as of **December 31, 2022** **December 31, 2023**, a net decrease in cash of **\$17.0 million** **\$0.6 million**. The decrease is primarily due to **\$2.0 million** cash spent on capital and exploration expenditures at DDGM and at used in investing activities, partially offset by the **Back Forty Project** and mining royalty tax payments for the 2022 tax years. **\$1.5 million** cash provided by operating activities.

Of the **\$6.7 million** **\$5.7 million** cash balance as of **September 30, 2023** **March 31, 2024**, **\$5.0 million** **\$5.5 million** was held in foreign subsidiaries, primarily held in U.S. dollar denominated accounts, with the remainder in foreign currencies readily convertible to U.S. dollars. The Don David Gold Mine's primary source of liquidity is the sale of doré and concentrates. The Don David Gold Mine has been self-sustaining since production commencement in 2010 and has been a source of cash for U.S. operations and projects.

Net cash used in provided by operating activities for the **nine** **three** months ended **September 30, 2023** **March 31, 2024** was **\$7.0 million** **\$1.5 million**, a **49%** **increase** compared to **\$7.9 million** **the \$1.0 million** net cash provided by operating cash inflow activities for the same period in **2022** **2023**. While net sales decreased by **28%** **40%** for the **nine** **three** months ended **September 30, 2023** **March 31, 2024**, compared to the same period in **2022** **2023**, due to lower grades and lower recoveries, production costs only decreased by **3%** **19%** due to the strengthening of peso and higher inflation, resulting in net cash outflows from operations in 2023. inflation.

Net cash used in investing activities of **\$9.8 million** **\$2.0 million** for the **nine** **three** months ended **September 30, 2023** **March 31, 2024** decreased from **\$15.3 million** **\$3.1 million** from the same period in **2022** **2023**. The decrease is mainly attributed to the 2022 investment planned

reduction in work investing activities to complete the commissioning of the filtration plant, the dry stack facility, and the gold regrind circuit. reserve cash. Investing activities in both 2024 and 2023 are mainly attributable to continued reinvestment in DDGM.

Net cash from used in financing activities for both the nine three months ended September 30, 2023 was a net inflow of \$33 thousand compared to a net outflow of \$3.0 million for the same period in 2022. The change is primarily related to the discontinuation of shareholder dividends. March 31, 2024 and 2023 were immaterial.

While current macro risk factors, such as economic uncertainties and supply chain interruptions have not had a significant adverse impact on exploration plans, results of operations, financial position, and cash flows during the current fiscal year, future impacts are unknown at this time. However, we believe there is sufficient liquidity and capital resources to fund operations and corporate activities for the foreseeable future.

The Company's At The Market Offering Agreement with H.C. Wainwright & Co., LLC (the "Agent"), which was entered into in November 2019 (the "ATM Agreement"), pursuant to which the Agent agreed to act as the Company's sales agent with respect to the offer and sale from time to time of the Company's common stock having an aggregate gross sales price of up to \$75.0 million, was renewed in June 2023. An There were no ATM sales during the three months ended March 31, 2024 and 2023. Subsequent to end of the first quarter, through May 2, 2024, an aggregate of 130,199 1,977,401 shares of the Company's common stock were sold and settled through the ATM Agreement during both the three and nine months ended September 30, 2023, for net proceeds to the Company of \$1.1 million, after deducting the Agent's commissions and other expenses, of \$0.1 million. There were no ATM sales during the three and nine months ended September 30, 2022. expenses.

Accounting Developments

For a discussion of recently adopted and recently issued accounting pronouncements, please see Note 2—Recently Adopted New Accounting Standards Pronouncements in Item 1—Condensed Consolidated Interim Financial Statements and Notes (unaudited) above.

Forward-Looking Statements

This report contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. We use the words "anticipate," "continue," "likely," "estimate," "expect," "may," "could," "will," "project," "should," "believe," and similar expressions (including negative and grammatical variations) to identify forward looking statements. Such forward-looking statements include, without limitation, statements regarding:

- Our strategy for significant future investment in Oaxaca, Mexico, and in Michigan, USA, for development and exploration activities;
- The expected timing for the Back Forty optimized feasibility study, Project, including permitting, detailed engineering, and project financing;
- Expectations regarding the likelihood of a successful mine permitting process at the Back Forty Project;
- Our expectations regarding future grades and recoveries from mining at DDGM;
- Expectations regarding capital investment, exploration spending, and general and administrative costs;
- Future exploration plans at DDGM, including vein systems targeted for future exploration activity;
- Compliance with existing legal and regulatory requirements, including future asset reclamation costs;
- Estimates of Mineral Resources and Mineral Reserves;
- Our expectations regarding whether dividends will be paid in the future; and
- Our ability to satisfy our obligations and other potential cash requirements over the next twelve months.

Forward-looking statements are neither historical facts nor assurances of future performance. Rather, they are based only on our current beliefs, expectations, and assumptions regarding the future of our business, future plans and strategies, projections, anticipated events and trends, the economy, and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks, and changes in circumstances that are difficult to predict, and many of which are outside of our control. Our actual results

and financial condition may differ materially from those indicated in the forward-looking statements. Therefore, you should not rely on any of these forward-looking statements. Important factors that could cause our actual results and financial condition to differ materially from those indicated in the forward-looking statements include, among others, the following:

- Commodity price fluctuations;
- Mine protests and work stoppages;
- Rock formations, faults and fractures, water flow and possible CO2 gas exhalation, or other unanticipated geological challenges;
- Unexpected changes in business and economic conditions, including supply chain challenges, the rate of inflation, and their impact on operating and capital costs;
- **Changes in interest rates and currency exchange rates;**
- **Adverse technological changes and cybersecurity threats;**

[Table of Contents](#)

- **Changes in interest rates and currency exchange rates;**
- **Adverse technological changes and cybersecurity threats;**
- Unanticipated increases in our operating costs and other costs of doing business;
- **The Company's inability to secure financing when needed;**
- Access to land and availability of materials, equipment, supplies, labor and supervision, power, and water;
- Results of current and future feasibility studies;
- Interpretation of drill hole results and the geology, grade, and continuity of mineralization;
- Litigation by private parties or regulatory action by governmental entities;
- Acts of God, such as floods, earthquakes, and any other natural disasters;
- The inherent uncertainty of Mineral Resource and Mineral Reserve estimates; and
- Such other factors are discussed below under *Item 1A—Risk Factors* in *Part II—Other Information*.

Many of these factors are beyond our ability to control or predict. Although we believe that the expectations reflected in our forward-looking statements are based on reasonable assumptions, such expectations may prove to be materially incorrect due to known and unknown risks and uncertainties. You should not unduly rely on any of our forward-looking statements. These statements speak only as of the date of this Quarterly Report on Form 10-Q. Except as required by law, we are not obligated to publicly release any revisions to these forward-looking statements to reflect future events or developments. All subsequent written and oral forward-looking statements attributable to us and persons acting on our behalf are qualified in their entirety by the cautionary statements contained in this section and elsewhere in this Quarterly Report on Form 10-Q.

ITEM 3: Quantitative and Qualitative Disclosures about Market Risk

Our exposure to market risks includes, but is not limited to, the following risks: changes in commodity prices, foreign currency exchange rates, provisional sales contract risks, changes in interest rates, and equity price risks. We Currently, we do not use derivative financial instruments as part of an overall strategy to manage market risk; however, risk. However, we may consider such arrangements in the future as we evaluate our business and financial strategy.

Commodity Price Risk

The results of our operations, cash flows, and financial condition largely depend upon the market prices of gold, silver, copper, lead, and zinc. Metal prices fluctuate widely and are affected by numerous factors beyond our control. The level of interest rates, the rate of inflation, government fiscal and monetary policy, the stability of exchange rates, and the world supply of and demand for gold, silver, and other metals, among other factors, can all cause significant fluctuations in commodity prices. Such external economic factors are, in turn, influenced by changes in international investment patterns, monetary systems, and political developments. The metal price markets have fluctuated widely in recent years, and future price declines could cause a mineral project to become uneconomic, thereby having a material adverse effect on our business and financial condition. We previously entered into a zinc zero cost collar to protect the selling price for zinc, but that hedge program concluded on December 31, 2022. We have Currently, we are not entered into unitizing derivative contracts to protect the selling price for gold, silver, copper, lead, or lead, zinc. We may, in the future, more actively manage our exposure through additional derivative contracts, although we have no intention of doing so in the near term.

In addition to materially adversely affecting our reserve estimates, results of operations and/or our financial condition, declining gold and silver prices could require a reassessment of the feasibility of a project. Even if a project is ultimately determined to be economically viable, the need to conduct such a reassessment may cause delays in the implementation of a project.

Foreign Currency Risk

Our foreign operation sells its gold, silver, copper, lead, and zinc production based on U.S. dollar metal prices. Fluctuations in foreign currency exchange rates do not have a material impact on our revenue since gold, silver, copper, lead, and zinc are sold worldwide in U.S. dollars.

Foreign currency exchange rate fluctuations can increase or decrease our costs to the extent that we pay costs in currencies other than the U.S. Dollar. We are primarily impacted by Mexican peso rate changes relative to the U.S. Dollar, as we incur some costs in the Mexican peso. When the value of the peso rises in relation to the U.S. Dollar, some of our costs in Mexico may increase, thus materially adversely affecting our operating results. Alternatively, when the value of the peso drops in relation to the U.S. Dollar, peso-denominated costs in Mexico will decrease in U.S. Dollar terms. Future fluctuations may give rise to foreign currency exposure, which may affect our financial results. Approximately 50% to 60% of expenses are paid in currencies other than the U.S. dollar.

We have not utilized market-risk sensitive instruments to manage our exposure to foreign currency exchange rates. However, we may, in the future, actively manage our exposure to foreign currency exchange rate risk.

Gold Resource Corporation

[Table of Contents](#)

Provisional Sales Contract Risk

We enter into concentrate sales contracts, which, in general, provide for a provisional payment to us based upon provisional assays and prices. The provisionally priced sales contracts contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of concentrates determined at the quoted metal prices at the time of shipment delivery to the customer. The embedded derivative, which does not qualify for hedge accounting, is adjusted to market through revenue each period prior to settlement. Changes in the prices of metals between the shipment delivery and the final settlement date will result

in adjustments to revenues related to the sales of concentrate previously recorded upon shipment delivery. Please see *Note 14—Derivatives* in *Item 1—Condensed Consolidated Interim Financial Statements and Notes (unaudited)* above for additional information.

Interest Rate Risk

We consider our interest rate risk exposure to be insignificant at this time, as our interest rate is related and embedded in immaterial payments for office leases.

Equity Price Risk

We have, in the past, and may in the future, seek to acquire additional funding through the sale of common stock and other equity. The price of our common stock has been volatile in the past and may also be volatile in the future. As a result, there is a risk that we may not be able to sell our common stock at an acceptable price should the need for new equity funding arise.

ITEM 4: Controls and Procedures

Evaluation of Disclosure Controls and Procedures

During the fiscal period covered by this report, our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended). Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective in ensuring that information required to be disclosed by us in reports that we file or submit under the Exchange Act are recorded, processed, summarized and reported within the required time periods and are designed to ensure that information required to be disclosed in our reports is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes that occurred during the three months ended **September 30, 2023** **March 31, 2024** that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1: Legal Proceedings

In February 2020, a local Ejido community (who claim to be an indigenous community) filed an injunction against the Mexican federal government through which they demanded the cancellation of several concession titles. The federal government ordered a suspension to prevent work related to excavating, drilling, opening tunnels and exploiting the mineral resources on the surface and subsoil of the concessions named in the injunction. Presently, the Don David Gold Mine does not perform such works in the named concessions in lands of the indigenous community. The lawsuit filed in February 2020 has not progressed to a final ruling.

We know of no other material, existing or pending legal proceedings against us, nor are we involved as a plaintiff in any material proceeding or pending litigation.

ITEM 1A: Risk Factors

Item 1A. Risk Factors of the **2022** **2023** Annual Report includes a discussion of our known material risk factors, other than risks that could apply to any issuer or offering. There have been no material changes from the risk factors described in the **2022** **2023** Annual Report.

ITEM 2: Unregistered Sales of Equity Securities and Use of Proceeds

None.

ITEM 3: Defaults upon Senior Securities

None.

ITEM 4: Mine Safety Disclosures

While the Company owns an advanced exploration project in Michigan, USA, the project is not yet subject to the Mine Safety and Health Administration jurisdiction and therefore, the mine safety disclosure requirements are not applicable.

ITEM 5: Other Information

None.

ITEM 6: Exhibits

The following exhibits are filed or furnished herewith or incorporated herein by reference:

| Exhibit Number | Descriptions |
|-------------------|---|
| 31.1 | Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 for Allen Palmiere. |
| 31.2 | Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 for Chet Holyoak. |
| 32* | Certification pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 for Allen Palmiere and Chet Holyoak. |
| 101 | Financial statements from the Quarterly Report on Form 10-Q of Gold Resource Corporation as of or for the three and nine months ended September 30, 2023 March 31, 2024 , formatted in inline XBRL: (i) the Condensed Consolidated Interim Balance Sheets, (ii) the Condensed Consolidated Interim Statements of Operations, (iii) the Condensed Consolidated Interim Statements of Changes in Shareholders' Equity, (iv) the Condensed Consolidated Interim Statements of Cash Flows, and (v) the Notes to the Condensed Consolidated Interim Financial Statements. |
| 104 | Cover Page Interactive Data File (embedded within the XBRL document) |

Exhibit 31.1

CERTIFICATION
PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Allen Palmiere, certify that:

1. I have reviewed this Form 10-Q of Gold Resource Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
