

# 2025 Results & 2026 Objectives

Delivering accretive energy growth, while strengthening resilience

February 11, 2026

# 2025 Results & 2026 Objectives

Delivering accretive energy growth, while strengthening resilience

03 | Safety, our core value

04 | Relentlessly reducing emissions

## 2025: Delivered cash accretive production growth

06 | 2025: delivered growth while preparing 2030+

07 | Delivered on our growth objectives

08 | Sustaining attractive distributions supported by accretive growth and strong balance sheet

09 | Disciplined Capex within guidance

10 | Accretive Upstream growth above expectations

11 | iLNG: 2025 CFFO supported by 10% growth in production and sales, in a low-volatility environment

12 | iPower: continued strong delivery across the board

13 | Ordinary shares begin trading on the NYSE

14 | Profitability, Longevity and Resilience to deliver superior performance through cycles

15 | Best performing stock in 2025

## Namibia, a new golden province for TotalEnergies

17 | Opening a new chapter for TotalEnergies in Africa

18 | A major transaction concluded with Galp

19 | TotalEnergies becomes the anchor player for Namibia

20 | First project: Venus, targeting FID in 2026

21 | Second project: Mopane, maturing the full-scale plan for a first development on PEL83

22 | Best positioned to lead the orange basin goldrush

## Powering the AI revolution with Integrated Power and boosting AI in our operations

24 | Creating value with fit-for-purpose solutions for datacenters

25 | 2025-26: Scaling up datacenter business with tech companies

26 | A worldwide Google partnership, spanning Texas to Malaysia...

27 | Casa dos Ventos: the strategic partner at the heart of Brazil's data center push

28 | 2025: Scaling up TotalEnergies data platform to be at the forefront of the AI users

29 | A clear definition of AI-driven priorities supported by a new global competency center

## 2026: Continue to deliver accretive energy growth, while strengthening resilience

31 | 2026 Oil and LNG key market drivers

32 | 2026: our differentiated growth, a unique hedge to face uncertainty

33 | Enhancing resilience through additional cash savings

34 | 2026: reduced capital investment, secured growth

35 | 2026: Upstream growth continues

36 | Accretive growth enhances resilience

37 | Never stopped exploring

38 | iLNG: accretive production growth and major project start-ups to offset softening prices

39 | EPH transaction accelerating gas-to-power integration in Europe

40 | iPower: towards free cash flow positive

41 | Restoring the reliability of Refining & Chemicals

42 | M&S: Growing cash flow, focus on value over volume

43 | Growing free cash flow strengthening resilience

44 | Priority to sacrosanct dividend growth

45 | 2026 Cash balance preserving a healthy balance sheet

46 | The differentiated and profitably growing energy company

48 | 2026 Cash flow allocation

49 | Working capital seasonality & impact on gearing

# Safety, our core value

Continuous improvement in safety, aiming for zero fatality

**Total recordable injury rate versus peers**  
per million man-hours

**1 fatality in 2025**

**Primary losses of containment\***  
number of incidents

# Relentlessly reducing emissions

	Reference	2024	2025

	73		

## 2025 achievements

**Leading the industry on methane emissions**

- All targets met and exceeded
- 11,000 continuous detection systems deployed across all operated upstream sites
- Upstream operated O&G Methane intensity < 0.1%

**Generating tangible energy and CO<sub>2</sub> savings**

- 2025: Reduction of 1 Mt CO<sub>2</sub> on Oil & Gas facilities vs 2024
- Successful 2023-25 1G\$ investment program > 2 Mt CO<sub>2</sub>/y avoided emissions and 200 M\$/y of energy and CO<sub>2</sub> savings from electrification, energy efficiency, heat recovery...

Mero-4, Brazil

**2025**  
**Delivered cash**  
**accretive**  
**production growth**

# 2025: delivered growth while preparing 2030+

## Oil & Gas

### Oil

- Start-up of Ballymore (US) and Mero-4 (Brazil)
- Namibia: entry as operator in PEL83 (Mopane) and PEL104
- Replenishment of exploration portfolio with entries in Offshore US, Nigeria, Algeria, Malaysia, Indonesia, Guyana, Liberia...

### Gas & LNG

- Rio Grande LNG Train 4 FID (US)
- Acquisition of interests in Malaysia gas assets and in US upstream gas assets in the Anadarko basin
- Agreement with NEO NEXT, creating the largest player in UK North Sea

### 2025 achievements

**+4%**

Upstream production growth

**5 \$/boe**

Upstream production cost\*

**~120%**

Proved Reserves Replacement Rate

## Integrated Power

- Accelerate gas-to-power integration in Europe through major transaction with EPH
- ~6 TWh/y PPAs signed to supply datacenters
- Successful farm downs: 2 B\$ of recycled capital

**~+20%**

Net power production

# Delivered on our growth objectives

Feb 2025 schedule 
 First Oil/Gas 
 Production plateau

# iLNG: 2025 CFFO supported by 10% growth in production and sales, in a low-volatility environment

## US and Middle-East LNG cargoes destination\*

### → An efficient market, optimizing LNG routes and narrowing Asia/Europe spreads

- 60% of US LNG goes to Europe (shortest route)
- TotalEnergies exported 18% of US LNG in 2025
- TotalEnergies imported 20% of European LNG in 2025
- Over 80% of Middle-East LNG goes to Asia
- Excess LNG fleet capacity

### → JKM-TTF spread closing, low volatility

- JKM-TTF spread at only 0.2 \$/Mbtu on average in H2 2025
- Q4 2025: four-year low on TTF volatility

### → Less opportunities for arbitrage on Atlantic LNG cargoes

# iPower: continued strong delivery across the board

Tailwind from datacenter and AI growing demand

## Executing our focused strategy

- Europe: gas-to-power integration accelerated via EPH acquisition
- USA:
  - 1.7 GW of gross renewable capacity added in 2025, bringing total to ~10 GW
  - Over 2 GW of projects approved in 2025

## Scaling up datacenter business with Big Tech

- 1 GW solar projects in the US tied to 15-year Google PPAs (~2 TWh/y)
- ~6 TWh/y\* PPAs signed to supply datacenters

## 2 B\$ of capital recycled through farmdowns

- 1.4 GW net capacity divested in USA, Greece, Portugal and France

# Ordinary shares begin trading on the NYSE

**Dec. 8, 2025**

Termination of the ADR program and switch to ordinary shares listed on the NYSE

**A single class of TotalEnergies shares with extended trading hours**  
(9:00 am Paris to 4:30 pm New York)

**Reach out to new shareholders**

- Domestic funds previously excluding ADR
- Individual shareholders through wealth managers and financial advisors

**Option to use ordinary shares as a currency for M&A in the US**

TotalEnergies

# Namibia, a new golden province for TotalEnergies

# Opening a new chapter for TotalEnergies in Africa

With 2 operated worldclass deepwater projects to start with

## PEL56

**Operator**  
c. 35% share

**Venus - First FPSO**  
**750 Mboe**

**Olympe**  
(PEL91, operator c. 33% share)  
prospect to be explored

## PEL83

**Operator**  
40% share

**Mopane - Second FPSO**  
**800-1,100 Mboe**

**Material exploration**  
**upside**

# A major transaction concluded with Galp

Cashless, crystalizing Venus value, with closing expected by mid 2026

## What TotalEnergies will take

**40%**

operated share of PEL83 (Mopane)

**800 – 1,100 Mboe**

Expected resources from Mopane

**> 1.5 Bbo**

Exploration potential from confirmed prospects  
(Mopane Extension, Quiver, Sobreiro)

## What TotalEnergies will give

**10%**

share of PEL56 (Venus)

**Carry of 50%**

of Galp's capital expenditures for the exploration  
and appraisal of the Mopane discovery  
and the first development on PEL83

**9.39%**

share of PEL91(Exploration)

# TotalEnergies becomes the anchor player for Namibia

Operated production capacity in Namibia  
kb/d, 100%

## Launching the first two oil projects in the country

### #1 Deepwater Operator in Africa

- 10 FPSO/FSU in operation + 1 in construction
- Building on our proven low-cost track record
- Strong relationship with contractors
- Ability to develop short-cycle opportunities leveraging ullage

### Size of development will deliver synergies

- Multiple FPSO developments
- Optimal structure, procurement and logistics costs
- Credible and sizeable partner for the authorities

Maximizing projects synergies for the benefits of all stakeholders

# First project: Venus, targeting FID in 2026

## Targeting 2030 production

Fully  
appraised  
discovery

Production  
**150** kb/d

Resources  
**~750** Mboe

Capex + Opex  
**~20** \$/boe

Scope 1+2  
**~15**  
kgCO<sub>2</sub>/boe

First Oil  
**2030**

- FEED finalized
- Designed to minimize emissions, targeting GHG intensity around 15 kgCO<sub>2</sub>e/boe
- Capex firmied-up by competitive EPC bids supporting an FID in 2026
- Engaging with authorities with a target for FID mid 2026

# Second project: Mopane, maturing the full-scale plan for a first development on PEL83

## Material contribution to 2030+ growth

Proven reservoir with **good permeability**

Production **> 200** kb/d

Resources **800-1,100** Mboe

Capex + Opex **<20** \$/boe

Scope 1+2 **<15** kgCO<sub>2</sub>/boe

FID Target **2028**

Exploration & Appraisal campaign in 2026-27 to size the first development

- 2026: Mopane Extension well to quantify the maximal resources
- 2027: two appraisal wells to confirm the development plan

Further prospectivity on PEL83 generating potential upside for additional future developments

# Best positioned to lead the Orange basin goldrush

**~10 Bbo exploration potential**

## Namibia

- Firming-up exploration plan on existing acreage
- Strategically expanding with entry as operator in PEL104

## South Africa

- Exploration plans tackling huge potential through multiple prospects (Volstruis, Nayla, Perd...)

TotalEnergies

Powering the AI revolution with Integrated Power and boosting AI in our operations

# Creating value with fit-for-purpose solutions for datacenters

## Renewable pay-as-produced PPA

Quick to build, fast to connect

## Clean Firm Power PPA

Decarbonization solution for stable power

## + “Powered land” option

Construction site for datacenter

## Premium packaged offer

Energy supplier + Infrastructure enabler

Up to 10% Premium on PPA prices

Upgrade  
double-digit returns on  
Integrated Power Capex

# 2025-2026: Scaling up datacenter business with tech companies

## Deploying Integrated Power solutions

- Integrated Power focus aligned with datacenters': **USA, Europe**
- **1.3 GW** PPAs by TotalEnergies teams

## Leveraging JV participations

- Clearway**
  - **1.2 GW** with Google
  - **0.3 GW** with Microsoft
- Casa dos Ventos**
  - **0.9 GW** with ByteDance
  - **0.3 GW** with Ascenty

Largest datacenter company in LatAm

**~4 GW gross of projects backed by data center PPAs**  
**> 250 M\$/y Ebitda secured**

# A worldwide Google partnership, spanning Texas to Malaysia...

## The Texas deal

### Signed today

PPA with immediate connection to the grid

**1 GW**

solar farms

**2 TWh/y**

15 years,  
from 2028

- Renewable energy
- Secured grid connection
- Optical fiber and water access

### Options for tomorrow

“Power-land”: optional value multipliers

Option to collocate  
**1.5 gw datacenter**

Potential for  
**BESS**

- Land carve-out for datacenter
- Grid capacity reservation
- Gas transmission pipeline

Offering Google a land connected to the grid with space available for datacenter

# Casa dos Ventos: the strategic partner at the heart of Brazil's datacenter push

## Record-breaking deal with **Ascenty**

### → 500 M\$ transaction, the largest in LatAm for datacenters

- CDV will supply 110 MW<sub>avg</sub> with 24/7 uptime
- Supported by 0.3 GW solar and wind projects
- 5 Mt of CO<sub>2</sub> emissions avoided

### → Self-production model

- Ascenty to take an equity stake in the generation assets
- Capital efficient structure for CDV, delivering **double-digit IRR**

## From renewables to data export with **ByteDance**

### → Powering a massive datacenter hub in Pecém

- ByteDance 300 MW datacenter (COD 2027), scalable to 1.5 GW
- Supported by 0.9 GW wind projects

### → Creating a profitable export of renewable value

- Tax-favored datacenters leveraging optic-fiber cable proximity to “export” low-cost renewable energy as data
- Enabling them to pay a **premium** on CPPA vs industrials

“We have an abundant supply of cost-competitive renewable energy globally, as well as a clean energy matrix, and the capability to quickly connect loads for new datacenters – which other regions lack.” **Mario Araripe, Chairman of Casa dos Ventos**

# 2025: Scaling up TotalEnergies data platform to be at the forefront of the AI users

Target uplift in production and availability through AI-enabled performance improvements

# A clear definition of AI-driven priorities supported by a new global competency center

1 B\$ investment over 2026-28

## 3 Digital Strategic Programs embedding AI

### Digital for HSE

- Reduce major risks
- Reduce human exposure
- Reduce emissions (methane...)

### Digital Plant

- Increase asset production
- Maximize products value
- Reduce cost

### Integrated Power Modeling

- Automate origination & project design
- Maximize production at best return in real time
- Give trading an edge on weather forecast, grid modeling and supply and demand simulations

## Launching a new Global Competency Center in India

An enabler for Company's Integrated Power Growth and enhanced Digital Ambition

Starting in 2026

Deliver speed & scale

**2026**  
Continue to deliver accretive energy growth, while strengthening resilience

# 2026 Oil and LNG market drivers

## Oil

### Oil price

Brent, \$/b

- Dynamic oil demand growth expected **above 0.9 Mb/d** in 2026, entirely supported by non-OECD countries (IEA)
- **Non-OPEC supply growth reducing** in 2026, opening for increased **OPEC+ influence** on the global market
- **US Oil Shale Producers** reducing drilling activity (-15% yoy)

## Gas

### TTF price

Monthly average, \$/Mbtu

- Transitional year with **limited additional LNG supply** capacities and risk of new projects delays
- TTF lower than in 2025 but still **above historical averages**
- Rising demand expected in price-sensitive **Asian countries**: coal and fuel to gas switching, industrial expansion, LNG bunkering and still growing **European LNG market** (2027 ban of Russian gas)

# 2026: our differentiated growth, a unique hedge to face uncertainty

## 2026 objectives

<b>More energy</b>	Energy production growth	+ 5% <sup>(1)</sup>
	Upstream production growth	+ 3%
	Electricity net production	> 60 TWh <sup>(1)</sup>
	Refining utilization rate	> 85%
	LNG Sales	> 44 Mt
	Renewables gross installed capacity	42 GW
<b>Less emissions</b>	Methane from operated facilities vs 2020	-70%
	Scope 1+2 from operated facilities	< 34 MtCO <sub>2</sub> e
	Lifecycle carbon intensity <sup>(2)</sup> of our sales vs 2015	~ -19%
<b>Growing free cash flow</b>	Upstream production costs ASC 932	< 5 \$/boe
	CAPEX	~15 B\$
	CFFO <sup>(3)</sup>	> 26 B\$ at 60 \$/bbl
	Gearing <sup>(4)</sup> at end-26	~15%

(1) Assuming 35% flexible capacity utilization rate

(2) Lifecycle carbon intensity of energy products sold used by end-customers - See Sustainability & Climate 2025 Progress Report

(3) At 60 \$/bbl Brent, 10 \$/Mbtu TTF and 5 \$/b ERM

(4) Gearing excluding leases debts and lease receivables, at 60 \$/bbl Brent, 10 \$/Mbtu TTF and 5 \$/b ERM

# Enhancing resilience through additional cash savings

## Cash savings program over 2026-30

By 2030

**Target increased from 7.5 B\$ to 12.5 B\$**  
5 B\$ additional from Capex savings thanks to EPH deal

In 2026

**First year of the 5-year program**  
2.5 B\$ cash savings

- 2 B\$ Capex
- 0.5 B\$ Opex

### 2026 Opex savings

- **iPower: fixed cost reduction through farmdowns 200 M\$**
- **Upstream: 150 M\$**
  - Lean operating model, logistics and procurement, structure costs in affiliates
  - Energy Savings & CO<sub>2</sub>
- **Downstream: 150 M\$**
  - M&S central services reorganization
  - R&C headquarters streamlining
  - Energy Savings & CO<sub>2</sub>

### New initiatives in 2026

- **Creation of a global competence center in India**
  - Establish an India-based OneTech delivery organization at a competitive cost
  - Support Integrated Power growth and our own digital & AI growth
- **Offshoring of external services**
  - Offshore external non-proximity-dependent services to lower-cost hubs
  - > 100 M\$ savings from 2027
- **Systematic use of procurement factory established in Romania by all LBUs**
  - 2 B\$+ centralized sourcing of equipment and services by 2027
- **Regional Mutualization of services across LBUs**
  - Across LBUs in Africa
  - Across French refineries and OneTech

# 2026: Reducing capital investment, confirming growth

## 2026 Capex guidance reduced to ~15 B\$

- Capex dedicated to Major Oil & Gas projects secured
- Flexible power generation growth with all-shares EPH deal
- Active portfolio management with net cash proceeds > 1 B\$
- Flexibilities down to 14 B\$ in case of prices lower than 50 \$/b

# 2026: Upstream growth continues

Deep and rich project pipeline delivers > 125 kboe/d

€/share

	2021	2022	2023	2024	2025
<b>€/share</b>	2.64	2.81 +6.4%	3.01 +7.1%	3.22 +7.0%	3.40 +5.6%
<b>\$/share</b>	2.94	2.97 +1.2%	3.24 +8.8%	3.56 +9.9%	4.03* +13.3%

## 2025 dividend

- Final 2025 dividend: 0.85 €/share as per quarterly interim dividends
- 2025 ordinary dividend growth of **+5.6%** in €/share, fully reflecting the share of capital bought back in 2025 of **5.3%**
- Growth of dividend in \$/share amplified by exchange rate effect

## 2026 buybacks guidance

- At 60-70 \$/b and 1.2 \$/€: **3 - 6 B\$** for the full year
- Stopping buybacks in case of low prices, at 50 \$/b
- Buyback for Q1 2026 on the basis of our budget assumption (0.75 B\$/qtr at 60 \$/b), keeping flexibility for adjustment along the year

# 2026 Cash balance preserving a healthy balance sheet

## 2026 CFFO and cash flow allocation

## Healthy balance sheet: gearing at 14.7% end-25

### Gearing objective: around 15% end-26

- Strong CFFO resilience
- Disciplined net investment
- Sacrosanct dividend
- Buybacks adjusted to oil and gas prices
- Gearing seasonality (+/-3%) linked to working capital seasonality

### 2026 CFFO sensitivities

- +2.8 B\$/y for +10 \$/b Brent\*
- +0.4 B\$/y for +2 \$/Mbtu TTF
- +0.4 B\$/y for +1 \$/b ERM

# The differentiated and profitably growing energy company

Strategic consistency, growth and resilience supported by cash savings program

Delivering accretive growth from low-cost upstream portfolio

Low-cost LNG growth well positioned to arbitrage European and Asian markets

Integrated Power: towards free cash flow positive

**> 40% payout through cycles: sacrosanct and growing dividend, supported by share buybacks**

Strong capital discipline, Low breakeven portfolio

Outstanding FCF growth underpinned by CFFO growth and cash savings

Sacrosanct and growing dividend, Healthy balance sheet

TotalEnergies

# Appendix

# 2026 Cash flow allocation

1

## Dividend

A sustainable and secured ordinary dividend through cycles (no dividend cut in 2020)

Dividend increase supported by share buybacks and underlying cash flow growth

2025 Ordinary Dividend:

**+5.6%** vs. 2024 in €  
(> 2025 buybacks)  
**+13.3%** in \$\*

2

## Capex

Capex supporting balanced multi-energy strategy

14-16 B\$/y through cycles

Net investment:  
2026: **~15 B\$/y**

3

## Balance sheet

Grade A credit rating through cycles

Flexibility to capture counter-cyclical opportunities

**14.7%** end-25

Gearing around **15%** end-26

4

## Surplus cash flow

Sharing surplus cash flow from high oil and gas prices through buybacks\*\* + special dividends in case of very high prices

2026 (~1.2 \$/€):  
**3 – 6 B\$** at 60-70 \$/b

# Working capital seasonality & impact on gearing

# Disclaimer

The terms "TotalEnergies", "TotalEnergies company" and "Company" in this document are used to designate TotalEnergies SE and the consolidated entities directly or indirectly controlled by TotalEnergies SE. Likewise, the words "we", "us" and "our" may also be used to refer to these entities or their employees. The entities in which TotalEnergies SE directly or indirectly owns a shareholding are separate and independent legal entities.

This document presents the results for the fourth quarter of 2025 and full year 2025 from the consolidated financial statements of TotalEnergies as of December 31, 2025 (unaudited). The audit procedures by the statutory auditors are underway. The consolidated financial statements (unaudited) are available on the Company's website, [www.totalenergies.com](http://www.totalenergies.com). This document does not constitute the annual financial report (rapport financier annuel) within the meaning of article L.451.1.2 of the French monetary and financial code (code monétaire et financier).

This document may contain forward-looking statements (including forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995), notably with respect to the financial condition, results of operations, business activities and strategy of TotalEnergies and expectations regarding returns to stockholders, including with respect to future dividends and share buybacks. This document may also contain statements regarding the perspectives, objectives and goals of TotalEnergies, including with respect to climate change and carbon neutrality (net zero emissions). An ambition expresses an outcome desired by TotalEnergies, it being specified that the means to be deployed do not depend solely on TotalEnergies. These forward-looking statements may generally be identified by the use of the future or conditional tense or forward-looking words such as "will", "should", "could", "would", "may", "likely", "might", "envisions", "intends", "anticipates", "believes", "considers", "plans", "expects", "thinks", "targets", "commits", "aims" or similar terminology. Such forward-looking statements included in this document are based on economic data, estimates and assumptions prepared in a given economic, competitive and regulatory environment and considered to be reasonable by TotalEnergies as of the date of this document. These forward-looking statements are not historical data and should not be interpreted as assurances that the perspectives, objectives or goals announced will be achieved. They may prove to be inaccurate in the future, and may evolve or be modified with a significant difference between the actual results and those initially estimated, due to the uncertainties notably related to the economic, financial, competitive and regulatory environment, or due to the occurrence of risk factors, such as, notably, the price fluctuations in crude oil and natural gas, the evolution of the demand and price of petroleum products, the changes in production results and reserves estimates, the ability to achieve cost reductions and operating efficiencies without unduly disrupting business operations, changes in laws and regulations including those related to the environment and climate, currency fluctuations, technological innovations, meteorological conditions and events, as well as socio-demographic, economic and political developments, changes in market conditions, loss of market share and changes in consumer preferences, pandemics, and other risk factors described from time to time in the Company's regulatory filings, including its Universal Registration Document filed with the French Autorité des Marchés Financiers, its Annual Report on Form 20-F filed with the United States Securities and Exchange Commission ("SEC") and its other reports filed or furnished with the SEC.

Future interim or final annual dividends payments beyond the interim dividend payable on July 2nd, 2026 (or July 22nd, 2026 for holders on the U.S. register) have not yet, respectively, been decided by the Board of Directors or approved by shareholders at a General Meeting. Management's expectations with respect to such future dividends are "forward-looking statements" and are non-binding. The Board of Directors retains full discretion to decide to distribute an interim dividend and to set the amount and date of the distribution and decide on the dividend to be submitted for approval by shareholders at a General Meeting, based on a number of factors, including TotalEnergies' financial results, balance sheet strength, cash and liquidity requirements, future prospects, commodity prices, and other factors deemed relevant by the Board.

Readers are cautioned not to consider forward-looking statements as accurate, but as an expression of the Company's views only as of the date this document is published. TotalEnergies and its subsidiaries have no obligation, make no commitment and expressly disclaim any responsibility to investors or any stakeholder to update or revise, particularly as a result of new information or future events, any forward-looking information or statement, objectives or trends contained in this document. In addition, the Company has not verified, and is under no obligation to verify any third-party data contained in this document or used in the estimates and assumptions or, more generally, forward-looking statements published in this document. The information on risk factors that could have a significant adverse effect on TotalEnergies' business, financial condition, including its operating income and cash flow, reputation, outlook or the value of financial instruments issued by TotalEnergies is provided in the most recent version of the Universal Registration Document which is filed by TotalEnergies SE with the French Autorité des Marchés Financiers and the annual report on Form 20-F filed with the SEC. Additionally, the developments of climate change and other environmental-or social related issues in this document are based on various frameworks and the interests of various stakeholders which are subject to evolve independently of our will. Moreover, our disclosures on such issues, including disclosures on climate change and other environmental or social-related issues, may include information that is not necessarily "material" under US securities laws for SEC reporting purposes or under applicable securities law.

In addition to IFRS measures, certain alternative performance indicators are presented, such as performance indicators excluding the adjustment items described below (adjusted net operating income, adjusted net income), net cash flow, free cash flow after organic investments, normalized gearing, return on equity (ROE), return on average capital employed (ROACE), gearing ratio, cash flow from operations excluding working capital, debt adjusted cash flow, and the payout ratio. These indicators are meant to facilitate the analysis of the financial performance of TotalEnergies and the comparison of income between periods. They allow investors to track the measures used internally to manage and measure the performance of TotalEnergies.

Financial information by business segment is reported in accordance with the internal reporting system and shows internal segment information that is used to manage and measure the performance of TotalEnergies. TotalEnergies measures performance at the segment level on the basis of adjusted net operating income.

These adjustment items include:

### 1. Special items

Due to their unusual nature or particular significance, certain transactions qualifying as "special items" are excluded from the business segment figures. In general, special items relate to transactions that are significant, infrequent, or unusual. However, in certain instances, transactions such as restructuring costs or assets disposals, which are not considered to be representative of the normal course of business, may qualify as special items although they may have occurred in prior years or are likely to occur in following years.

### 2. The inventory valuation effect

In accordance with IAS 2, TotalEnergies values inventories of petroleum products in its financial statements according to the First-In, First-Out (FIFO) method and other inventories using the weighted-average cost method. Under the FIFO method, the cost of inventory is based on the historic cost of acquisition or manufacture rather than the current replacement cost. In volatile energy markets, this can have a significant distorting effect on the reported income. Accordingly, the adjusted results of the Refining & Chemicals and Marketin & Services segments are presented according to the replacement cost method. This method is used to assess the segments' performance and facilitate the comparability of the segments' performance with those of its main competitors.

In the replacement cost method, which approximates the Last-In, First-Out (LIFO) method, the variation of inventory values in the statement of income is, depending on the nature of the inventory, determined using either the month-end prices differential between one period and another or the average prices of the period rather than the historical value. The inventory valuation effect is the difference between the results under the FIFO and the replacement cost methods.

### 3. Effect of changes in fair value

The effect of changes in fair value presented as an adjustment item reflects, for trading inventories and storage contracts, differences between internal measures of performance used by TotalEnergies' Executive Committee and the accounting for these transactions under IFRS.

IFRS requires that trading inventories be recorded at their fair value using period-end spot prices. In order to best reflect the management of economic exposure through derivative transactions, internal indicators used to measure performance include valuations of trading inventories based on forward prices.

TotalEnergies, in its trading activities, enters into storage contracts, whose future effects are recorded at fair value in TotalEnergies' internal economic performance. IFRS precludes recognition of this fair value effect.

Furthermore, TotalEnergies enters into derivative instruments to risk manage certain operational contracts or assets. Under IFRS, these derivatives are recorded at fair value while the underlying operational transactions are recorded as they occur. Internal indicators defer the fair value on derivatives to match with the transaction occurrence.

The adjusted results (adjusted net operating income, adjusted net income) are defined as replacement cost results, adjusted for special items, excluding the effect of changes in fair value.

Euro amounts presented for the fully adjusted-diluted earnings per share represent dollar amounts converted at the average euro-dollar (€-\$/) exchange rate for the applicable period and are not the result of financial statements prepared in euros.

**Cautionary Note to U.S. Investors** – U.S. investors are urged to consider closely the disclosure in the Form 20-F of TotalEnergies, File N° 1-10888, available from us at 2, place Jean Millier – Arche Nord Coupole/Regnault - 92078 Paris-La Défense Cedex, France, or at the Company website [totalenergies.com](http://totalenergies.com). You can also obtain this form from the SEC by calling 1-800-SEC-0330 or on the SEC's website [sec.gov](http://sec.gov).
