UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended **September 30, 2023** **March 31, 2024**

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-07434

Aflac Incorporated

(Exact name of registrant as specified in its charter)

Georgia	58-1167100	
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)	
1932 Wynnton Road	Columbus, Georgia	31999
(Address of principal executive offices)	(ZIP Code)	
706.323.3431		
(Registrant's telephone number, including area code)		

(Former name, former address and former fiscal year, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, \$.10 par value per share	AFL	New York Stock Exchange

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date. **584,379,889** **568,222,447** shares of the issuer's common stock were outstanding as of **October 26, 2023** **April 24, 2024**.

Aflac Incorporated and Subsidiaries
Notes to the Consolidated Financial Statements
 (Unaudited) (Interim period data - Unaudited)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of Business

Aflac Incorporated (the Parent Company) and its subsidiaries (collectively, the Company) primarily sell supplemental health and life insurance in Japan and the United States (U.S.) and Japan. The Company's insurance business is marketed and administered through Aflac Life Insurance Japan Ltd. (ALIJ) in Japan and through American Family Life Assurance Company of Columbus (Aflac), American Family Life Assurance Company of New York (Aflac New York), Continental American Insurance Company (CAIC), Tier One Insurance Company (TOIC) and Aflac Benefits Solutions, Inc. (ABS) in the U.S. and through Aflac Life Insurance Japan Ltd. (ALIJ) in Japan. The Company's operations consist of two reportable business segments: Aflac Japan, which includes ALIJ, and Aflac U.S., which includes Aflac, and Aflac Japan, which includes ALIJ. American Family Life Assurance

Company of New York, (Aflac) CAIC, TOIC and ABS. Aflac New York is a wholly owned subsidiary of Aflac. Most of Aflac's the Aflac U.S. policies are individually underwritten and marketed through independent agents. With the exception of dental and vision products administered by Aflac Benefits Solutions, Inc. (ABS) ABS, and certain group life insurance products, Aflac U.S. markets and administers group products through Continental American Insurance Company (CAIC) CAIC, branded as Aflac Group Insurance. Additionally, Aflac U.S. markets its consumer markets products through Tier One Insurance Company (TOIC) TOIC. The Company's insurance operations in the U.S. and Japan service the two markets for the Company's insurance business. The Parent Company, other operating business units that are not individually reportable, and business reinsurance activities, including internal reinsurance activity with Aflac Re Bermuda Ltd. (Aflac Re), and other business activities not included in Aflac Japan or Aflac U.S. are included in Corporate and other. Aflac Japan's revenues, including net gains and losses on its investment portfolio, accounted for 63% and 72% of the Company's total revenues in the nine-month periods ended September 30, 2023 and 2022, respectively. The percentage of the Company's total assets attributable to Aflac Japan was 79% at September 30, 2023, compared with 80% at December 31, 2022.

In 2022, the Company established Aflac Re Bermuda Ltd. (Aflac Re), a Bermuda domiciled insurer that reinsures certain policies issued by ALIJ. Aflac Re is subject to regulation in Bermuda, where the Bermuda Monetary Authority (BMA) has broad administrative powers relating to granting and revoking licenses to transact reinsurance business, approval of specific reinsurance transactions, capital requirements and solvency standards, limitations on dividends to shareholders, the nature of and limitations on investments, and the filing of financial statements in accordance with prescribed or permitted accounting practices. Financial results from Aflac Re as well as intercompany eliminations, are included in Corporate and other.

Basis of Presentation

The Company prepares its financial statements in accordance with U.S. generally accepted accounting principles (U.S. GAAP). These principles are established primarily by the Financial Accounting Standards Board (FASB). In these Notes to the Consolidated Financial Statements, references to U.S. GAAP issued by the FASB are derived from the FASB Accounting Standards Codification™ (ASC). The preparation of financial statements in conformity with U.S. GAAP requires the Company to make estimates based on currently available information when recording transactions resulting from business operations. The most significant items on the Company's balance sheet that involve a greater degree of accounting estimates and actuarial determinations subject to changes in the future are the valuation of investments and derivatives, deferred policy acquisition costs (DAC), liabilities for future policy benefits and income taxes. These accounting estimates and actuarial determinations are sensitive to market conditions, investment yields, interest rates, mortality, morbidity, commission and other acquisition expenses and terminations by policyholders. As additional information becomes available, or actual amounts are determinable, the recorded estimates are revised and reflected in the consolidated financial statements. Although some variability is inherent in these estimates, the Company believes the amounts provided are reasonable and reflective of the best estimates of management.

The unaudited consolidated financial statements include the accounts of the Parent Company, its subsidiaries and those entities required to be consolidated under applicable accounting standards. All material intercompany accounts and transactions have been eliminated.

In the opinion of management, the accompanying unaudited consolidated financial statements of the Company contain all adjustments, consisting of normal recurring accruals, which are necessary to fairly present the consolidated balance sheets as of September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023, and the consolidated statements of earnings and comprehensive income (loss) for the three-, shareholders' equity and nine-month periods ended September 30, 2023 and 2022, the consolidated statements of shareholders' equity cash flows for the three-month periods ended March 31, 2023 March 31, 2024 and 2022, June 30, 2023 and 2022, and September 30, 2023 and 2022, and the consolidated statements of cash flows for the nine-month periods ended September 30, 2023 and 2022. Results of operations for interim periods are not necessarily indicative of results for the entire year. As a result, these financial statements should be read in conjunction with the financial statements and notes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2022 (2022 December 31, 2023 (2023 Annual Report).

Significant Accounting Policies

The Company revised the following accounting policies as a result of the adoption of amended accounting guidance effective January 1, 2023 and certain reclassifications. Refer to the Recently Adopted Accounting Pronouncements section below for details of the adoption of Accounting Standards Update (ASU) 2018-12 Financial Services - Insurance: Targeted Improvements to the Accounting for Long-Duration Contracts. In conjunction with the adoption of ASU 2018-12, the Company changed its practice of recording the change in the deferred profit liability on products with limited payment features from the benefits and claims, net line item to the net earned premiums line item in the consolidated statements of earnings. This reclassification had no impact on net earnings. The change in presentation has been made for all comparative periods presented. All other categories of significant accounting policies remain unchanged from the 2022 Annual Report.

Insurance Revenue and Expense Recognition: Substantially all of the supplemental health and life insurance policies the Company issues are classified as long-duration contracts. The contract provisions generally cannot be changed or canceled during the contract period; however, the Company may adjust premiums for supplemental health policies issued in the U.S. within prescribed guidelines and with the approval of state insurance regulatory authorities.

Insurance premiums for most of the Company's health and life policies, including cancer, accident, hospital, critical illness, supplemental dental and vision, term life, whole life, long-term care and disability, are recognized as earned premiums over the premium-paying periods of the contracts when due from policyholders. When earned premiums are reported, the related amounts of benefits and expenses are charged against such revenues. This association is accomplished by means of annual increases or decreases to the liability for future policy benefits (LFPB) and the deferral and subsequent amortization of policy acquisition costs.

Premiums from the Company's products with limited-pay features, including cancer, medical and nursing care, term life, whole life, WAYS, and child endowment, are collected over a significantly shorter period than the contract term (i.e., the period during which benefits are provided). Premiums for these products are recognized as earned premiums over the premium-paying periods when due from policyholders. Any gross premium in excess of the net premium is deferred and recorded as a deferred profit liability, which is subsequently amortized in net earned premiums such that profits are recognized in a constant relationship with insurance in force. Benefits are recorded as an expense when they are incurred. An LFPB is recorded when premiums are recognized using the net premium method.

Policyholders also have an option to pay discounted advanced premiums for certain of the Company's products. Advanced premiums are deferred and recognized when due from policyholders over the otherwise required contractual premium payment period.

Benefit expense is bifurcated between benefits and claims and reserve remeasurement (gains) losses. The net premium ratio (NPR) is used to measure benefit expense and is calculated as the ratio of the present value of actual and future expected benefits and expenses to the present value of actual and future expected gross premiums. A revised NPR is calculated as of the beginning of each reporting period using updated future cash flow expectations.

Reserve remeasurement (gains) losses represent the difference between two reserve measures both calculated as of the beginning of the current reporting period using the same locked-in discount rates. One reserve measure uses the NPR as of the end of the prior reporting period, and the second uses the revised NPR. Benefits and claims represent the difference in the liability balance calculated as of the beginning of the current reporting period and the end of the current reporting period both using the revised NPR and the locked-in discount rates. The locked-in interest accretion rate utilized for accretion of interest expense on insurance reserves is the original discount rate used at contract issue date.

Advertising expense is reported as incurred in insurance and other expenses in the consolidated statements of earnings.

Deferred Policy Acquisition Costs: Certain direct and incremental costs of acquiring insurance contracts are deferred and amortized on a grouped-contract basis over the expected term of the related contracts, using a constant-level basis. For life and health products issued in Japan, the constant-level basis used is units in force, which is a proxy for face amount, and insurance in force, respectively. For life and health products issued in the U.S., the constant-level basis used is face amount and number of policies in force, respectively. Amortization is computed using the same contract groupings (also referred to as cohorts) and mortality and termination assumptions that are used in computing the LFPB, and these assumptions are reviewed and updated at least annually. The effects of changes in assumptions are recognized

prospectively over the remaining contract term as a revision of the future amortization pattern, while current period amortization is calculated based on the actual experience during the quarter. Deferred costs include the excess of current-year commissions over ultimate renewal-year commissions and certain incremental direct policy issue, underwriting and sales expenses directly related to successful policy acquisition.

For some products, policyholders can elect to modify product benefits, features, rights or coverages by exchanging a contract for a new contract or by amendment, endorsement, or rider to a contract, or by the election of a feature or coverage within a contract. These transactions are known as internal replacements. The Company performs a two-stage analysis of the internal replacements to determine if the modification is substantive to the base policy. The stages of evaluation are as follows: 1) determine if the modification is integrated with the base policy, and 2) if it is integrated, determine if the resulting contract is substantially changed.

For internal replacement transactions where the resulting contract is substantially unchanged, unamortized deferred acquisition costs from the original policy continue to be amortized over the expected life of the cohort, and the costs of replacing the policy are accounted for as policy maintenance costs and expensed as incurred.

For an internal replacement transaction that results in a policy that is substantially changed, the policy is treated as lapsed for amortization purposes, and the costs of acquiring the new policy are capitalized and amortized in accordance with the Company's accounting policies for deferred acquisition costs.

Riders can be considered internal replacements that are either integrated or non-integrated resulting in either substantially changed or substantially unchanged treatment. Riders are evaluated based on the specific facts and circumstances of the rider and are considered an expansion of the existing benefits with additional premium required. Non-integrated riders to existing contracts do not change the Company's profit expectations for the related products and are treated as a new policy establishment for incremental coverage.

Policy Liabilities: For long-duration insurance contracts, the Company calculates an integrated reserve that represents all payments under the contract including future expected claims and unpaid policy claims and related expenses. The liability for future policy benefits is measured using the net level premium method.

Long-duration insurance contracts issued by the Company are grouped into annual calendar-year cohorts based on the contract issue date, reportable segment, legal entity and product type. Limited-pay contracts are grouped into separate cohorts from other traditional products in the same manner and are further separated based on their premium payment structures.

The LFPB is determined as the present value of expected future policy benefits to be paid to or on the behalf of policyholders and certain related expenses less the present value of expected future net premiums receivable under the Company's insurance contracts, where expected future net premiums receivable are future gross premiums receivable under the contract multiplied by the NPR.

Future policy benefits are calculated using assumptions and estimates including mortality, morbidity, termination (also referred to as lapses), expense and discount rates. The assumptions and estimates that the Company uses depend on its judgment regarding the likelihood of future events and are inherently uncertain.

Cash flow assumptions (mortality, morbidity, and termination) are established at policy inception and are evaluated each quarter to determine if an update is needed. To facilitate a more detailed review of cash flow assumptions, experience studies are performed annually during the third quarter. Changes in cash flow assumptions are the result of applying the updated best estimate assumptions as of the beginning of the reporting period and are recognized in reserve remeasurement (gains) losses in the consolidated statements of earnings. Expense assumptions are established at policy inception and determined for each issue-year cohort as a percentage of paid claims. These expense assumptions are locked-in and remain unchanged over the term of the insurance policy. Actual experience is reflected in the calculation of future policy benefits each quarter, and changes in the liability due to actual experience are recognized in reserve remeasurement (gains) losses in the consolidated statements of earnings.

Discount rates used to calculate net premiums are locked in at policy inception and represent the basis to recognize interest expense in the consolidated statements of earnings. Discount rates used to measure the carrying value of the LFPB in the consolidated balance sheets are updated each reporting period, and the difference between the liability balances calculated using the locked-in discount rates and the updated discount rates is recognized in accumulated other comprehensive income (loss) (AOCI).

The Company has designed its discount rate methodology for the U.S. and Japan insurance business. The methodology incorporates constructing a discount rate curve separately for discounting cash flows used to calculate the U.S. and Japan LFPBs, reflective of the characteristics of the insurance liabilities, such as currency and tenor. Discount rates comprising each curve are determined by reference to upper-medium grade (low credit risk) fixed-income instrument yields that reflect the duration characteristics of the

corresponding insurance liabilities. The Company uses for these yields single-A rated fixed income instruments with credit ratings based on international rating standards. Where only local ratings are available, the Company selects the fixed-income instruments with local ratings that are equivalent to a single-A rating based on international rating standards. The methodology is designed to prioritize observable inputs based on market data available in the local debt markets where the respective policies were issued in the currency in which the policies are denominated. For the discount rates applicable to tenors for which the single-A debt market is not liquid or there is little or no observable market data, the Company uses various estimation techniques consistent with the fair value guidance in ASC 820, which include, but are not limited to: (i) for tenors where there is less observable market data and/or the observable market data is available for similar instruments, estimating tenor-specific single-A credit spreads and applying them to risk-free government rates; (ii) for tenors where there is very limited or no observable single-A or similar market data, interpolation and extrapolation techniques.

The locked-in discount rate used for the computation of interest accretion on LFPBs is determined separately for each issue-year cohort as a single discount rate, calculated as the weighted-average of monthly upper-medium grade (low credit risk) fixed-income instrument forward curves in the calendar year, determined using the methodology described above and weighted using issued annualized premiums for each issue month. The single discount rate for each issue-year cohort is determined by solving for a rate that produces an equivalent net premium ratio to the forward curve and will remain unchanged after the calendar year of issue.

Unearned premiums consist primarily of discounted advance premiums on deposit from policyholders in conjunction with their purchase of certain Aflac Japan limited-pay insurance products. These advanced premiums are deferred upon collection and recognized as earned premiums over the contractual premium payment period.

The other policyholders' funds liability consists primarily of the fixed annuity line of business in Aflac Japan which has fixed benefits and premiums.

For internal replacements that are determined to be substantially changed, policy liabilities related to the original policy that was replaced are immediately released, and policy liabilities are established for the new insurance contract. The policy reserves are evaluated based on the new policy features, and changes are recognized at the date of contract change/modification. For internal replacements that are substantially unchanged, no changes to the reserves are recognized. For modifications that are not integrated with the base policy, new coverage is recognized as a separately issued contract within the current cohort.

Reclassifications: Certain reclassifications have been made to prior-year amounts to conform to current-year reporting classifications. These reclassifications had no impact on net earnings or total shareholders' equity.

New Accounting Pronouncements

Recently Adopted Accounting Pronouncements

ASU 2018-12 Financial Services - Insurance: Targeted Improvements For the three-month period ended March 31, 2023, immaterial reclassifications were made to the Accounting for Long-Duration Contracts, as clarified consolidated statement of cash flows related to investments in limited partnerships and amended by:

ASU 2019-09 Financial Services - Insurance: Effective Date

ASU 2020-11 Financial Services - Insurance: Effective Date and Early Application

In August 2018, the FASB issued amendments that significantly changed how insurers account for long-duration contracts. impact of foreign currency on policy liabilities. The Company adopted impact of the standard on January 1, 2023 using a modified retrospective transition method which reclassification related to investments in limited partnerships resulted in applying the amended guidance as an increase to net cash flows provided by operating activities of the beginning of the earliest period presented on the January 1, 2021 transition date (Transition Date). The modified retrospective transition method generally results in applying the guidance to contracts on the basis of existing carrying values as of the Transition Date. On the Transition Date, the Company calculated the ratio of the present value of expected future benefits and expenses less existing carrying values to the present value of expected future gross premiums (Transition Date NPR) using updated assumptions and the discount rate immediately before the Transition Date. The Company capped the Transition Date NPR at 100% for any cohorts \$182 million with a Transition Date NPR greater than 100%. The Company calculated the LFPB using the Transition Date NPR (capped at 100% if required) and two different discount rates: (i) the discount rate used immediately before the Transition Date, and (ii) the discount rate determined corresponding decrease to net cash flows provided by reference investing activities. There was no impact to the Transition Date market level yields for upper-medium grade (low credit risk) fixed income instruments (as of December 31, 2020). For cohorts with their Transition Date NPR capped at 100%, the Company recorded as an adjustment (decrease) to opening retained earnings any difference between the LFPB calculated using the discount rate immediately before the Transition Date and the existing carrying value as of the Transition Date. For all cohorts on the Transition Date, the Company recorded in AOCI net of tax, the difference in the LFPB calculated using the two different discount rates (i.e., the discount rate used immediately before the Transition Date and the updated discount rate as of the Transition Date).

Upon adoption, the Company adjusted opening equity for the Transition Date impacts to AOCI and retained earnings and adjusted prior periods presented (years 2021 and 2022) following the updated standard. Based upon the modified retrospective transition method, the Transition Date impact from adoption resulted in a decrease in AOCI of approximately \$18.6 billion and a decrease in retained earnings (RE) of approximately \$0.3 billion.

See Note 6 and Note 7 for expanded disclosures for DAC and future policy benefits, respectively, required cash flows provided by operating activities as a result of the amended guidance.

Transition Impact to Shareholder's Equity

The following table presents the cumulative transition impact as of January 1, 2021 to the Company's Shareholder's Equity as a result of the adoption of ASU 2018-12, using the modified retrospective transition method.

(In millions - Unaudited)	Accumulated Other						Total Shareholders' Equity
	Common Stock	Additional Paid-in Capital	Retained Earnings	Comprehensive Income (Loss)	Treasury Stock		
Balance at December 31, 2020	\$ 135 \$	2,410 \$	37,984 \$	8,934 \$	(15,904) \$		33,559

(1) Impact to retained earnings is driven primarily by capping the Transition Date NPR on Care products, reclassification related

Transition Impact to the impact of foreign currency on policy liabilities between the Liability for Future Policy Benefits increase in policy liabilities and other net line items within operating activities.

The Company adopted ASU 2018-12 using the modified retrospective transition method. The tables below present the disaggregated transition impacts to the Company's LFPB as a result of adoption, split between the changes in the present value of expected future net premiums and the present value of expected future policy benefits as of the Transition Date and the LFPB rollforward for the year ended December 31, 2021. The locked-in discount rates on the policies held at the Transition Date reflect the locked-in rates in existence immediately before the Transition Date. See Note 7 for additional information. New Accounting Pronouncements

Under the modified retrospective transition method, the NPR for future policy benefits existing as of the Transition Date considers the carryover basis of those liabilities, which equals the future policy benefits and unpaid policy claims balance as of December 31, 2020. If the revised Transition Date NPR for a cohort is greater than 100%, the Company capped the Transition Date NPR at 100% and increased the LFPB with an offsetting decrease to opening retained earnings.

The LFPB recorded in the consolidated balance sheets includes the deferred profit liability for limited-payment contracts. This deferred profit liability is not included in the Transition Date and LFPB rollforwards. For products with limited-payment features, to the extent the transition date adjustment related to updating cash flow assumptions is favorable, the Company increased the deferred profit liability.

The following table presents the transition impacts to the present value of expected future net premiums, gross of internal and external reinsurance, by reporting segment and disaggregated by product type due to the cumulative effect of the change in accounting principle as a result of the adoption of ASU 2018-12 using the modified retrospective transition method.

The adoption of ASU 2018-12 did not have an impact on the Company's balance for deferred policy acquisition costs upon adoption.

ASU 2023-02 Investments - Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method

In March 2023, the FASB issued amendments to permit reporting entities to elect to account for their tax equity investments, regardless of the tax credit program from which the income tax credits are received, using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the income tax credits and other income tax benefits received and recognizes the net amortization and income tax credits and other income tax benefits in the income statement as a component of income tax expense (benefit).

The Company early adopted this guidance on July 1, 2023. The adoption of this guidance did not have a significant impact on the Company's financial position, results of operations or disclosures.

[Accounting Pronouncements Pending Adoption](#)

There Accounting Standards Update (ASU) 2023-09 Income Taxes (Topic 740) – Improvements to Income Tax Disclosures

In December 2023, the FASB issued amendments that require enhanced income tax disclosures including (1) disclosure of specific categories and greater disaggregation of information in the rate reconciliation and (2) income taxes paid disaggregated by jurisdiction. It also includes certain other amendments to improve the effectiveness of income tax disclosures.

The amendments are **no accounting pronouncements pending** effective for annual periods beginning after December 15, 2024. Early adoption **that are relevant to or have an is** permitted. The adoption of this guidance has **no impact on the Company's Company's financial statements** position or results of operations. The Company is evaluating the impact of adoption on its disclosures.

ASU 2023-07 Segment Reporting (Topic 280) – Improvements to Reportable Segment Disclosures

In November 2023, the FASB issued amendments that will add certain segment disclosures related to significant segment expenses and require that a public entity disclose the title and position of the Chief Operating Decision Maker (CODM) and an explanation of how the CODM uses the reported measure(s) of segment profit or loss in assessing segment performance and deciding how to allocate resources.

The amendments are effective for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024. Early adoption is permitted. The adoption of this guidance has **no impact on the Company's financial position or results of operations**. The Company is evaluating the impact of adoption on its disclosures.

Recent accounting guidance not discussed above is not applicable, did not have, or is not expected to have a material impact to the Company's business.

For additional information on new accounting pronouncements and recent accounting guidance and their impact, if any, on the Company's financial position, results of operations or disclosures, see Note 1 of the Notes to the Consolidated Financial Statements in the **2022 2023 Annual Report**.

2. BUSINESS SEGMENT INFORMATION

The Company consists of two reportable insurance business segments: Aflac Japan and Aflac U.S., both of which sell supplemental health and life insurance. In addition, the Parent Company, other operating business units that are not individually reportable, and **business reinsurance** activities, including **internal reinsurance activity with Aflac Re**, and other **business activities not included in Aflac Japan or Aflac U.S.**, as well as **intercompany eliminations**, are included in Corporate and other.

The Company does not allocate corporate overhead expenses to business segments.

Consistent with U.S. GAAP accounting guidance for segment reporting, the Company evaluates and manages its business segments using a financial performance measure called pretax adjusted earnings. **Adjusted**

- **Pretax adjusted earnings** are adjusted revenues less benefits and adjusted expenses. The adjustments to both revenues and expenses account for certain items that **cannot be predicted or that** are outside management's **control**. **control** because they tend to be driven by general economic conditions and events or are related to **infrequent activities not directly associated with insurance operations**. The Company excludes income taxes related to operations to arrive at pretax adjusted earnings.
 - Adjusted revenues are U.S. GAAP total revenues excluding net investment gains and losses, except for amortized hedge costs/income related to foreign currency exposure management strategies and net interest **cash flows** income/expense from derivatives associated with certain investment **strategies**. **strategies**, which are **reclassified from net investment gains (losses)** and **included in adjusted earnings as a component of adjusted net investment income when analyzing operations**.
 - Adjusted expenses are U.S. GAAP total acquisition and operating expenses including the impact of interest **cash flows** from derivatives associated with notes payable but excluding any non-recurring or other items not associated with the normal course of the Company's insurance operations and that do not reflect the **Company's Company's** underlying business performance.

Aflac Japan's adjusted revenues accounted for 56% and 61% of the Company's total adjusted revenues in the three-month periods ended March 31, 2024 and 2023, respectively. The Company excludes income taxes related percentage of the Company's total assets attributable to operations to arrive Aflac Japan was 79% at pretax adjusted earnings. March 31, 2024, compared with 80% at December 31, 2023.

The methods of determining the fair values of the Company's investments in fixed maturity securities and equity securities are described in Note 5.

During the first **nine** **three** months of **2023** **2024** and **2022**, **2023**, respectively, the Company did not reclassify any investments from the held-to-maturity category to the available-for-sale category.

Contractual and Economic Maturities

The contractual and economic maturities of the Company's investments in fixed maturity securities at **September 30, 2023** **March 31, 2024**, were as follows:

(In millions)	(In millions)	Amortized Cost ⁽¹⁾	Fair Value

Total fixed maturity securities held-to-maturity

(a) Net of allowance for credit losses

Economic maturities are used for certain debt instruments with no stated maturity where the expected maturity date is based on the combination of features in the financial instrument such as the right to call or prepay obligations or changes in coupon rates.

Investment Concentrations

The Company's process for investing in credit-related investments begins with an independent approach to underwriting each issuer's fundamental credit quality. The Company evaluates independently those factors that it believes could influence an issuer's ability to make payments under the contractual terms of the Company's instruments. This includes a thorough analysis of a variety of items including the issuer's country of domicile (including political, legal, and financial considerations); the industry in which the issuer competes (with an analysis of industry structure, end-market dynamics, and regulation); company specific issues (such as management, assets, earnings, cash generation, and capital needs); and contractual provisions of the instrument (such as financial covenants and position in the capital structure). The Company further evaluates the investment considering broad business and portfolio management objectives, including asset/liability needs, portfolio diversification, and expected income.

Investment exposures that individually exceeded 10% of shareholders' equity were as follows:

September 30, 2023			December 31, 2022			March 31, 2024			December 31, 2023

Analysis of Securities in Unrealized Loss Positions

The unrealized losses on the Company's **fixed maturity available-for-sale** securities **investments** have been primarily related to general market changes in interest rates, foreign exchange rates, and/or the levels of credit spreads rather than specific concerns with the issuer's ability to pay interest and repay principal.

For any of its **fixed maturity available-for-sale** securities with significant declines in fair value, the Company performs detailed analyses to identify whether the drivers of the declines are due to general market drivers, such as the recent rise in interest rates, or due to credit-related factors. Identifying the drivers of the declines in fair value helps to align and allocate the Company's resources to securities with real credit-related concerns that could impact ultimate collection of principal and interest. For any significant declines in fair value determined to be non-interest rate or market related, the Company performs a more focused review of the related issuers' specific credit profile.

For corporate issuers, the Company evaluates their assets, business profile including industry dynamics and competitive positioning, financial statements and other available financial data. For non-corporate issuers, the Company analyzes all sources of credit support, including issuer-specific factors. The Company utilizes information available in the public domain and, for certain private placement issuers, from consultations with the issuers directly. The Company also considers ratings from Nationally Recognized Statistical Rating Organizations (NRSROs), as well as the specific characteristics of the security it owns including seniority in the issuer's capital structure, covenant protections, or other relevant features. From these reviews, the Company evaluates the issuers' continued ability to service the Company's investment through payment of interest and principal.

Assuming no credit-related factors develop, unrealized gains and losses on **fixed maturity available-for-sale** securities are expected to diminish as investments near maturity. Based on its credit analysis, the Company believes that the issuers of its **fixed maturity available-for-sale** investments in the sectors shown in the table above have the ability to service their obligations to the Company. Further, the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost bases, which may be at maturity.

However, from time to time the Company identifies certain **available-for-sale** **fixed maturity** securities where the amortized cost basis exceeds the present value of the cash flows expected to be collected due to credit-related factors and as a result, a credit **loss** allowance will be estimated. Based on an evaluation of its securities currently in an unrealized loss position, the Company has determined that those securities should not have a credit loss allowance as of **September 30, 2023** **March 31, 2024**. Refer to the Allowance for Credit Losses section below for additional information.

As of **September 30, 2023** **March 31, 2024** and **December 31, 2022** **December 31, 2023**, the Company had an immaterial amount of fixed maturity securities on nonaccrual status.

Commercial Mortgage and Other Loans

The Company classifies its transitional real estate loans (TREs), commercial mortgage loans (CMLs) and, middle market loans (MMLs), and other loans as held-for-investment and includes them in the commercial mortgage and other loans line on the consolidated balance sheets. The Company carries them on the balance sheet at amortized cost less an estimated allowance for credit losses.

The following table reflects the composition of the carrying value for commercial mortgage and other loans by property type as of the periods presented.

CMLs and TREs were secured by properties entirely within the U.S. (with the largest concentrations in California (20%), Texas (13% (15%) and Florida (10% (12%))). MMLs are issued only to companies domiciled within the U.S. and Canada.

Transitional Real Estate Loans

TREs are commercial mortgage loans that are typically relatively short-term floating rate instruments secured by a first lien on the property. These loans provide funding for properties undergoing a change in their physical characteristics and/or economic profile and do not typically require any principal repayment prior to the maturity date.

As of **September 30, 2023** **March 31, 2024**, the Company had **\$661 million** **\$442 million** in outstanding commitments to fund TREs. These commitments are contingent on the final underwriting and due diligence to be performed.

Commercial Mortgage Loans

CMLs are typically fixed rate loans on commercial real estate with partial repayment of principal over the life of the loan with the remaining outstanding principal being repaid upon maturity. This loan portfolio is generally considered higher quality investment grade loans.

Middle Market Loans

MMLs are typically first lien senior secured cash flow loans to small to mid-size companies for working capital, refinancing, acquisition, and recapitalization. These loans are generally considered to be below investment grade. The carrying value for MMLs included \$19 million and \$28 million \$24 million for a short term short-term credit facility that is reflected in other liabilities on the consolidated balance sheets as of September 30, 2023, at both March 31, 2024 and December 31, 2022, respectively, December 31, 2023.

As of September 30, 2023 March 31, 2024, the Company had commitments of approximately \$745 million \$787 million to fund future MMLs. These commitments are contingent upon the availability of MMLs that meet the Company's underwriting criteria.

Other Loans

Other loans are primarily infrastructure loans. Infrastructure loans are typically senior secured, financing operating portfolios of contracted solar and wind assets generating cash flow for loan repayment. The infrastructure loan portfolio weighted average rating is investment grade. As of March 31, 2024, the Company had commitments of approximately \$5 million to fund future other loans. These commitments are contingent upon the availability of other loans that meet the Company's underwriting criteria.

Credit Quality Indicators

For TREs, the Company's key credit quality indicator is indicators include performance of the loan and loan-to-value (LTV), which is calculated by dividing the current outstanding loan balance by the estimated property value, primarily using values at origination. Given that TREs involve properties undergoing a repositioning of their commercial profile, LTV provides the most insight into the credit risk of the loan. The Company monitors the performance of the loans periodically, but not less frequently than quarterly. The monitoring process also focuses on higher risk loans, which include those that are delinquent or for which foreclosure or deed in lieu of foreclosure is anticipated.

For CMLs, the Company's key credit quality indicators include LTV and debt service coverage ratios (DSCR). DSCR is the most recently available net operating income of the underlying property compared to the required debt service of the loan.

For MMLs and held-to-maturity fixed maturity securities, the Company's key credit quality indicator is credit ratings. The Company's held-to-maturity portfolio is composed of investment grade securities that are senior unsecured instruments, while its MMLs generally have below-investment-grade ratings but are typically senior secured instruments. The Company monitors the credit ratings periodically, but not less frequently than quarterly.

For other loans, the Company's reinsurance recoverable balance, the Company's key credit quality indicator is the credit rating of the Company's reinsurance counterparty. The Company uses external credit ratings focused on the reinsurer's financial strength and credit worthiness. As of September 30, 2023, the Company's reinsurance counterparties were rated A+. The Company monitors these credit ratings periodically, but not less frequently than quarterly.

The following tables present as of September 30, 2023 March 31, 2024 the amortized cost basis of TREs, CMLs, MMLs, and MMLs other loans by year of origination and credit quality indicator.

Loan Modifications to Borrowers Experiencing Financial Difficulties

The Company granted certain loan modifications in its MML and TRE portfolios to borrowers experiencing financial difficulty during the first nine three months of 2024 and 2023. As the amount, timing, and extent of September 30, 2023 modifications granted are considered in determining any credit loss allowance recorded. For the three-month period ended March 31, 2024, these loan 3% of TREs with an amortized cost of \$210 million were modified in the form of interest rate reductions and other-than-insignificant payment delays. The

modifications did not have resulted in a material impact on reduction in the Company's results of operations. weighted-average contractual interest rate from 8.3% to 6.9%. Loan modifications for the three-month period ended March 31, 2023 were immaterial.

Past Due and Nonaccrual Loans

The Company designates nonaccrual status for a nonperforming loan or debt security or a loan or debt security that is not generating its stated interest rate because of nonpayment of periodic interest or principal by the borrower. The Company applies the cash basis method to record any payments received on nonaccrual assets. The Company resumes the accrual of interest on fixed maturity securities and loans that are currently making contractual payments or for those that are not current where the borrower has paid timely (less than 30 days outstanding).

The following table presents tables present an aging of past due and nonaccrual loans at amortized cost, before allowance for credit losses, as of the period periods presented.

Total		\$ 12,050	\$ 141	\$ 610	\$ 751	\$ 12,801	\$ 718		

(a) As of December 31, 2023, there were no loans that were 90 days or more past due that continued to accrue interest.

For the three- and nine-month periods ended September 30, 2023 March 31, 2024 and March 31, 2023, the Company recognized no interest income for TREs, CMLs, MMLs, or MMLs other loans on nonaccrual status. Of these loans, TREs with an amortized cost of \$65 million \$383 million had no credit loss allowance as of September 30, 2023 March 31, 2024 because these loans are collateral dependent assets for which the estimated fair values of the collateral are in excess of amortized cost. As of September 30, 2023 March 31, 2024 and December 31, 2023, there were no MMLs on nonaccrual status without an allowance for credit losses.

As of December 31, 2022, the Company had an immaterial amount of loans on nonaccrual status.

Allowance for Credit Losses

The Company calculates its allowance for credit losses for held-to-maturity fixed maturity securities, loan receivables, loan commitments and reinsurance recoverable by grouping assets with similar risk characteristics when there is not a specific expectation of a loss for an individual asset. For held-to-maturity fixed maturity securities, MMLs, and MML commitments, the Company groups assets by credit ratings, industry, and country.

The Company groups CMLs and TREs and respective loan commitments by property type, property location and the property's LTV and DSCR. On a quarterly basis, CMLs and TREs within a portfolio segment that share similar risk characteristics are pooled for calculation of credit loss allowance. On an ongoing basis, TREs, CMLs and CMLs other loans with dissimilar risk characteristics (i.e., loans with significant declines in credit quality), such as collateral dependent mortgage loans (i.e., when the borrower is experiencing financial difficulty, including when foreclosure is probable), are evaluated individually for credit loss. For example, the credit loss allowance for a collateral dependent loan is established as the excess of amortized cost over the estimated fair value of the loan's underlying collateral, less selling cost when foreclosure is probable. Accordingly, the change in the estimated fair value of the collateral dependent loans, which are evaluated individually for credit loss, is recorded as a change in the credit loss allowance which is recorded on a quarterly basis as a charge or credit to earnings in component of net investment gains (losses) in the consolidated statements of earnings.

The credit allowance for the reinsurance recoverable balance is estimated using a probability-of-default (PD) / loss-given-default (LGD) method. The credit allowance for held-to-maturity fixed maturity securities and loan receivables is estimated using a PD probability-of-default (PD) / LGD loss-given-default (LGD) method, discounted for the time value of money. For held-to-maturity fixed maturity securities, available-for-sale fixed maturity securities and loan receivables, the Company includes the change in present value due to the passage of time in the change in the allowance for credit losses. The Company's methodology for estimating credit losses utilizes the contractual maturity date of the financial asset, adjusted when necessary to reflect the expected timing of repayment (such as prepayment options, renewal options, call options, or extension options). The Company applies reasonable and supportable forecasts of macroeconomic variables that impact the determination of PD/PD / LGD over a two-year period for held-to-maturity fixed maturity securities and MMLs. The Company reverts to historical loss information over one year, following the two-year forecast period. For the CML and TRE portfolio, the Company applies reasonable and supportable forecasts of macroeconomic variables as well as national and local real-estate market factors to estimate future credit losses where the market factors revert back to historical levels over time with the period being dependent on current market conditions, projected market conditions and difference in the current and historical market levels for each factor. The Company continuously monitors the estimation methodology, due to changes in portfolio composition, changes in underwriting practices and significant events or conditions and makes adjustments as necessary.

The Company's held-to-maturity fixed maturity portfolio includes Japan Government and Agency securities of \$16.1 billion \$15.9 billion amortized cost as of September 30, 2023 March 31, 2024 that meet the requirements for zero-credit-loss expectation and therefore these asset classes have been excluded from the current expected credit loss measurement.

An investment in an available-for-sale fixed maturity security may be impaired if the fair value falls below amortized cost. The Company regularly reviews its fixed maturity security investments available-for-sale portfolio for declines in fair value. The Company's debt available-for-sale impairment model focuses on the ultimate collection of the cash flows from its investments and whether the Company has the intent to sell or if it is more likely than not the Company would be required to sell the security prior to recovery of its amortized cost. The determination of the amount of impairments under this model is based upon the Company's periodic evaluation and assessment of known and inherent risks associated with the respective securities. Such evaluations and assessments are revised as conditions change and new information becomes available.

When determining the Company's intention to sell a security prior to recovery of its fair value to amortized cost, the Company evaluates facts and circumstances such as, but not limited to, future cash flow needs, decisions to reposition its security portfolio, and risk profile of individual investment holdings. The Company performs ongoing analyses of its liquidity needs, which includes cash flow testing of its policy liabilities, debt maturities, projected dividend payments, and other cash flow and liquidity needs.

The Company's methodology for estimating credit losses for available-for-sale fixed maturity securities utilizes the discounted cash flow model, based on past events, current market conditions and future economic conditions, as well as industry analysis and credit ratings of the fixed maturity securities. In addition, the Company evaluates the specific issuer's probability of default and expected recovery of its position in the event of default based on the underlying financial condition and assets of the borrower as well as seniority and/or security of other debt holders in the issuer when developing management's best estimate of expected cash flows.

The following table presents the roll forward of the allowance for credit losses by portfolio segment for loans and by accounting classification for securities.

Change in foreign exchange	0	0	0	0	0	0 0
Balance at March 31, 2023	\$ (65)	\$ (9)	\$ (149)	\$ (21)	\$ (6)	\$ 0 (250)

⁽¹⁾ Includes an allowance for credit losses of \$4 recognized on financial assets accounted for as purchased financial assets with credit deterioration that is not recorded in earnings upon recognition.

⁽²⁾ Excludes allowance on firm loan commitments of \$19 and \$26 as of September 30, 2023 and 2022, respectively.

For the three-month period ended **September 30, 2023** March 31, 2024, the Company completed foreclosure or deed in lieu of foreclosure on TREs collateralized with commercial real estate properties with an amortized cost of **\$142 million** \$31 million. As a result of the excess of amortized cost over the estimated fair value of the collateral of the TREs, upon consummating the foreclosures or deed in lieu of foreclosure transactions, the Company recognized a net loss gain of **\$53 million** \$4 million for the three- and nine-month periods three-month period ended September 30, 2023, March 31, 2024 in net investment gains (losses). Real estate obtained via The Company did not complete any foreclosure or deed in lieu of foreclosure is reported as real estate owned (REO) and included in other investments transactions in the consolidated balance sheet three-month period ended March 31, 2023. Refer to the Other Investments section below for additional information.

As of **September 30, 2023** March 31, 2024, the Company identified additional TREs with an amortized cost of **\$546 million** \$601 million in anticipation of potential foreclosure or deed in lieu of foreclosure transactions. As of **September 30, 2023** March 31, 2024, the Company established a credit allowance of **\$35** \$60 million for **\$481 million** \$598 million of loans for which the fair value of the collateral was below the amortized cost of the loans.

For assets that are subject to the credit loss measurement, the change in credit loss allowance is significantly impacted by purchases and sales in those assets during the period as well as entering into new non-cancelable loan commitments. The estimate of credit losses for loan commitments as of September 30, 2023 was \$19 million.

Other Investments

⁽¹⁾ Includes securities lending collateral

⁽²⁾ Includes tax credit investments and asset classes such as private equity and real estate funds

The Parent Company invests in partnerships that specialize in rehabilitating historic structures or the installation of solar equipment in order to receive federal historic rehabilitation and solar tax credits. These investments are classified as limited partnerships and included in other investments in the consolidated balance sheets. The change in value of each investment is recorded as a reduction to net investment income. Tax credits generated by these investments are recorded as an income tax benefit in the consolidated statements of earnings.

REO

Real estate owned (REO) consists of office buildings or other commercial properties obtained through foreclosure or deed in lieu of foreclosure of certain of the Company's TREs. As of **September 30, 2023** **March 31, 2024**, \$16 all REO was classified as held-and-used for the production of income and is carried at cost less accumulated depreciation. As of December 31, 2023, \$210 million of REO was classified as held-and-used with the remaining \$17 million classified as held-for-sale, which is carried at the lower of depreciated cost or fair value less cost to sell and is not further depreciated once classified as such. The remaining \$73 million classified as held-and-used is held for the production of income and is carried at cost less accumulated depreciation. Depreciation expense was immaterial \$1 million for the three- and nine-month periods three-month period ended **September 30, 2023** **March 31, 2024**. Additionally, as of **September 30, 2023** **March 31, 2024** and December 31, 2023, accumulated depreciation was immaterial. Net operating income earned on REO is reported as a component of net investment income in the consolidated statement of earnings. \$2 million and an immaterial amount, respectively.

As of December 31, 2022, the Company did not have REO.

As of **September 30, 2023** **March 31, 2024**, the Company had \$2.4 billion \$2.2 billion in outstanding commitments to fund alternative investments in limited partnerships.

Variable Interest Entities (VIEs)

As a condition in the normal course of its involvement or investment in a VIE, activities, the Company enters into certain protective rights and covenants invests in legal entities that preclude changes in the structure of the VIE that would alter the creditworthiness of the are VIEs. The Company's investment debt or its beneficial interest in the VIE.

For those VIEs other than certain unit trust structures, the Company's involvement is passive in nature. The Company is not, nor has it been, required to purchase any securities issued in the future by these VIEs.

The Company's ownership interest in VIEs is limited to holding the equity interests and obligations issued by them. The With the exception of commitments to limited partnerships and to certain loan investments made in the normal course of business, the Company has not provided any direct or contingent obligations to fund the limited activities of these VIEs or support related to the limited activities of these VIE and does not have any intention to do so in the future, nor does it have any direct or indirect financial guarantees related to the limited activities of these VIEs. The Company has not provided any assistance or any other type of financing support to any of the VIEs it invests in, nor does it have any intention to do so in the future. For those VIEs in which the Company holds debt obligations, the weighted-average lives of the Company's notes are very similar to the underlying collateral held by these VIEs where applicable. guarantees.

The Company's risk of loss related to its interests in any of its VIEs is limited to the carrying value of the related investments, and in certain cases, to any unfunded commitments held in the VIE.

For those VIEs other than certain unit trust structures, the Company's involvement is passive in nature.

VIEs - Consolidated

The Company is the primary beneficiary of a VIE if it has

- the power to direct the activities of the VIE that most significantly impact the economic performance of the entity

and

- the obligation to absorb losses of or the right to receive benefits from the entity that could be potentially significant to the VIE.

If the Company determines that it is the VIE's primary beneficiary, it consolidates the VIE. Creditors or beneficial interest holders of VIEs where the Company is the primary beneficiary have no recourse to the general credit of the Company except to the extent of the unfunded commitments referenced above, as the Company's obligation to each VIE is limited to the amount of its committed investment.

The following table presents the cost or amortized cost, fair carrying value and balance sheet caption in which the assets and liabilities of consolidated VIEs are reported.

(1) Net of allowance for credit losses

(2) Consists entirely of alternative investments in limited partnerships

(3) (4) Consists entirely of derivatives

The Company is substantively the only sole investor in the consolidated VIEs listed in the table above. As The Company invests in fixed maturity securities issued by VIEs that in turn hold U.S. dollar-denominated fixed maturity securities coupled with foreign currency swap agreements. The weighted-average lives of the sole investor Company's investments in these VIEs are very similar to the Company has the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance and is therefore considered to be the primary beneficiary of the VIEs that it consolidates. The Company also participates in substantially all of the variability created underlying collateral held by these VIEs. The activities of these VIEs are limited to holding invested assets and foreign currency swaps as appropriate, and utilizing the cash flows from these securities to service its investment, the VIEs' debt. Neither the Company nor any of its creditors are able to obtain the underlying collateral of the these VIEs unless there is an event of default or other specified event. For those VIEs that contain a swap, the The Company is not a direct counterparty to the foreign currency swap contracts and has no control over them. The Company's loss exposure to these VIEs is limited to its original investment. The Company's These consolidated VIEs do not rely on outside or ongoing sources of funding to support their activities beyond the underlying collateral and foreign currency swap contracts, if applicable. With the exception of its investment in unit trust structures, the The underlying collateral assets and funding of the Company's these consolidated VIEs are generally static in nature.

Investments in Unit Trust Structures

The Company also utilizes unit trust structures in its Aflac Japan segment to invest in various asset classes. As the sole investor classes, which include CMLs, MMLs, TREs, other loans and limited partnerships. The limited partnership investments are comprised of private equity and real estate funds. The Company's loss exposure to these VIEs is limited to its original investments, together with any unfunded portion of the Company's commitments made in the normal course of business to fund certain loan investments and limited partnership investments, as described in the Commercial Mortgage and Other Loans and Other Investments sections of this note. Excluding these commitments, the Company is required does not provide financial or other support to consolidate these trusts under U.S. GAAP. consolidated VIEs.

VIEs - Not Consolidated

The table below reflects the amortized cost, fair carrying value and balance sheet caption in which the Company's investment investments in VIEs that are not consolidated are reported.

(a) Consists entirely of alternative investments in limited partnerships

Certain investments in VIEs that the Company is not required to consolidate are investments that are in the form of debt obligations from issued by the VIEs. These fixed maturity securities include structured securities, primarily asset-backed securities. The Company's involvement in the related VIEs is limited to that of a passive investor in asset-backed securities issued by the VIEs. The Company also invests in VIEs that are irrevocably and unconditionally guaranteed by their corporate parents or sponsors. These VIEs are the primary financing vehicles used by their corporate sponsors to raise financing in the capital markets. The variable interests created by these VIEs are principally or solely a result of the debt instruments issued by them. The Company does not have the power to direct the activities that most significantly impact the entity's economic performance, nor does it have the obligation to absorb losses of the VIE entity or the right to receive benefits from the entity that could be significant to the entity. As such, the Company is not the primary beneficiary of these VIEs and therefore is therefore not required to consolidate them. The Company's maximum exposure to loss on these investments is limited to the amount of the Company's investment.

The Company also holds debt and equity investments in limited partnerships that have been determined to be VIEs. These partnerships primarily invest in private equity and structured investments, real estate funds. The Company's maximum exposure to loss on these investments is limited to the amount of its investment, investment and any unfunded commitments. As described in the Other Investments section of this note, the Company makes commitments to fund partnership investments in the normal course of business. Excluding these commitments, the Company did not provide financial or other support to unconsolidated VIEs. The Company is not the primary beneficiary of these VIEs and is therefore not required to consolidate them. The Company classifies these investments as other investments in the consolidated balance sheets.

Securities Lending and Pledged Securities

The Company lends fixed maturity securities and, from time to time, public equity securities to financial institutions in short-term securities lending transactions. These short-term securities lending arrangements increase investment income with minimal risk. The Company receives cash or other securities as collateral for such loans. The Company's securities lending policy requires that the fair value of the securities received as collateral be 102% or more of the fair value of the loaned securities and that unrestricted cash received as collateral be 100% or more of the fair value of the loaned securities. The securities loaned continue to be carried as investment assets on the Company's balance sheet during the terms of the loans and are not reported as sales. For loans involving unrestricted cash or securities as collateral, the collateral is reported as an asset with a corresponding liability for the return of the collateral. For loans where the Company receives as collateral securities that the Company is not permitted to sell or repledge, the collateral is not reflected on the consolidated financial statements.

Details of collateral by loaned security type and remaining maturity of the agreements were as follows:

^(a) The related loaned security, under the Company's U.S. securities lending program, can be returned to the Company at the transferee's discretion; therefore, they are classified as Overnight and Continuous.

In connection with securities lending, in addition to cash collateral received, the Company received from counterparties securities collateral of \$5.1 billion \$4.5 billion and \$6.8 billion \$4.3 billion at September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023, respectively, which may not be sold or re-pledged, unless the counterparty is in default. Such securities collateral is not reflected on the consolidated financial statements.

The Company did not have any repurchase agreements or repurchase-to-maturity transactions outstanding as of September 30, 2023 March 31, 2024, and December 31, 2022 December 31, 2023, respectively.

Certain fixed maturity securities can be pledged as collateral as part of derivative transactions, or pledged to support state deposit requirements on certain investment programs. For additional information regarding pledged securities related to derivative transactions, see Note 4.

4. DERIVATIVE INSTRUMENTS

The Company's freestanding derivative financial instruments have historically consisted of: include:

- foreign currency forwards and options used in hedging foreign exchange risk on U.S. dollar-denominated investments in Aflac Japan's portfolio, with options used on a standalone basis and/or in a collar strategy;
- foreign currency forwards and options used to economically hedge certain portions of forecasted cash flows denominated in yen and hedge the Company's long term exposure to a weakening yen;
- cross-currency interest rate swaps, also referred to as foreign currency swaps, associated with certain senior notes and subordinated debentures;
- foreign currency swaps that are associated with variable interest entity (VIE) bond purchase commitments, and investments in special-purpose entities, including VIEs where the Company is the primary beneficiary;
- interest rate swaps used to economically hedge interest rate fluctuations in certain variable-rate investments;
- interest rate swaptions used to hedge changes in the fair value associated with interest rate fluctuations for certain U.S. dollar-denominated available-for-sale fixed-maturity securities; and
- bond purchase commitments at the inception of investments in consolidated VIEs.

Some of the Company's derivatives are designated as cash flow hedges, fair value hedges or net investment hedges; however, other derivatives do not qualify for hedge accounting or the Company elects not to designate them as accounting hedges.

Derivative Types

Foreign currency forwards and options are executed for the Aflac Japan segment in order to hedge the currency risk on the carrying value of certain U.S. dollar-denominated investments. The average maturity of these forwards and options can change depending on factors such as market conditions and types of investments being held. In situations where the maturity of the forwards and options is shorter than the underlying investment being hedged, the Company may enter into new forwards and options near maturity of the existing derivative in order to continue hedging the underlying investment. In forward transactions, Aflac Japan agrees with another party to buy a fixed amount of yen and sell a corresponding amount of U.S. dollars at a specified future date. The Company also uses one-sided foreign currency put options to mitigate the settlement risk on U.S. dollar-denominated assets related to extreme foreign currency rate changes. From time to time, Aflac Japan also executes foreign currency option transactions in a collar strategy, where Aflac Japan agrees with another party to simultaneously purchase put options and sell call options. In the purchased put transactions, Aflac Japan obtains the option to buy a fixed amount of yen and sell a corresponding amount of U.S. dollars at a specified future date. In the sold call transactions, Aflac Japan agrees to sell a fixed amount of yen and buy a corresponding amount of U.S. dollars at a specified future date. The combination of purchasing the put option and selling the call option results in no net premium being paid (i.e. a costless or zero-cost collar).

From time to time, the Company may also enter into foreign currency forwards and options to hedge the currency risk associated with the net investment in Aflac Japan. In these forward transactions, the Company agrees with another party to buy a fixed amount of U.S. dollars and sell a corresponding amount of yen at a specified price at a specified future date. In the option transactions, the Company may use a combination of foreign currency options to protect expected future cash flows by simultaneously purchasing yen put options (options that protect against a weakening yen) and selling yen call options (options that limit participation in a strengthening yen). The combination of these two actions create a zero-cost collar. Additionally, the Company enters into purchased options to hedge cash flows from the net investment in Aflac Japan.

The Company enters into foreign currency swaps pursuant to which it exchanges an initial principal amount in one currency for an initial principal amount of another currency, with an agreement to re-exchange the principal amounts at a future date. There may also be periodic exchanges of payments at specified intervals based on the agreed upon rates and notional amounts. Foreign currency swaps are used primarily in the consolidated VIEs in the Company's Aflac Japan portfolio to convert foreign-denominated cash flows to yen, the functional currency of Aflac Japan, in order to minimize cash flow fluctuations. The Company also uses foreign currency swaps to economically convert certain of its U.S. dollar-denominated senior note and subordinated debenture principal and interest obligations into yen-denominated obligations.

In order to reduce investment income volatility from its variable-rate investments, the Company enters into receive-fixed, pay-floating interest rate swaps. These derivatives are cleared and settled through a central clearinghouse.

Swaptions are used to mitigate the adverse impact resulting from significant changes in the fair value of U.S. dollar-denominated available-for-sale securities due to fluctuation in interest rates. In a payer swaption, the Company pays a premium to obtain the right, but not the obligation, to enter into a swap contract where it will pay a fixed rate and receive a floating rate. Interest rate swaption collars are combinations of two swaption positions. In order to maximize the efficiency of the collars while minimizing cost, a collar strategy is used whereby the Company purchases a long payer swaption (the Company purchases an option that allows it to enter into a swap where the Company will pay the fixed rate and receive the floating rate of the swap) and sells a short receiver swaption (the Company sells an option that provides the counterparty with the right to enter into a swap where the Company will receive the fixed rate and pay the floating rate of the swap). The combination of purchasing the long payer swaption and selling the short receiver swaption results in no net premium being paid (i.e. a costless or zero-cost collar).

Bond purchase commitments result from repackaged bond structures that are consolidated VIEs whereby there is a delay in the trade date and settlement date of the bond within the structure to ensure completion of all necessary legal agreements to support the consolidated VIE that issues the repackaged bond. Since the Company has a commitment to purchase the underlying bond at a specified price, the agreement meets the definition of a derivative where the value is derived based on the current market value of the bond compared to the fixed purchase price to be paid on the settlement date.

Derivative Balance Sheet Classification

The table below summarizes the balance sheet classification of the Company's derivative fair value amounts, as well as the gross asset and liability fair value amounts. The fair value amounts presented do not include income accruals. Derivative assets are included in other assets, while derivative liabilities are included in other liabilities within the Company's consolidated balance sheets. The notional amount of derivative contracts represents the basis upon which pay or receive amounts are calculated and are not reflective of exposure or credit risk.

Cash Flow Hedges

For certain variable-rate U.S. dollar-denominated available-for-sale securities held by Aflac Japan via consolidated VIEs, foreign currency swaps are used to swap the U.S. Dollar (USD) variable rate interest and principal payments to fixed rate Japanese Yen (JPY) interest and principal payments. The Company has designated foreign currency swaps as a hedge of the variability in cash flows of a forecasted transaction or of amounts to be received or paid related to a recognized asset ("cash flow" hedge). The remaining maximum length of time for which these cash flows are hedged is approximately three years. The derivatives in the Company's consolidated VIEs that are not designated as accounting hedges are discussed in the ["Non-qualifying Strategies" Non-qualifying Strategies](#) section of this note.

Fair Value Hedges

The Company designates and accounts for certain foreign currency forwards, options, and interest rate swaptions as fair value hedges when they meet the requirements for hedge accounting. The Company recognizes gains and losses on these derivatives as well as the offsetting gain or loss on the related hedged items in current earnings.

Foreign currency forwards and options hedge the foreign currency exposure of certain U.S. dollar-denominated available-for-sale fixed-maturity investments held in Aflac Japan. The change in the fair value of the foreign currency forwards related to the changes in the difference between the spot rate and the forward price is excluded from the assessment of hedge effectiveness. The change in fair value of the foreign currency option related to the time value of the option is recognized in current earnings and is excluded from the assessment of hedge effectiveness.

Interest rate swaptions hedge the interest rate exposure of certain U.S. dollar-denominated available-for-sale securities held in Aflac Japan. For these hedging relationships, the Company excludes time value from the assessment of hedge effectiveness and recognizes changes in the intrinsic value of the swaptions in current earnings within net investment income. The change in the time value of the swaptions is recognized in other comprehensive income (loss) and amortized into earnings (net investment income) over its legal term.

The following table presents the gains and losses on derivatives and the related hedged items in fair value hedges. The Company had no fair value hedges during the three-month period ending March 31, 2024.

(a) Gains (losses) excluded from effectiveness testing includes the forward point on foreign currency forwards and time value change on foreign currency options which are reported in the consolidated statements of earnings as net investment gains (losses). It also includes the change in the fair value of the interest rate swaptions related to the time value of the swaptions which is recognized as a component of other comprehensive income (loss).

(b) Gains and losses on foreign currency forwards and options and related hedged items are reported in the consolidated statements of earnings as net investment gains (losses). For interest rate swaptions and related hedged items, gains and losses included in the hedge assessment, premium amortization and time value amortization while the hedge items are still outstanding are reported within net investment income. The time value gains and losses for interest rate swaptions when the related hedged items are redeemed are reported in net investment gains (losses) consistent with the impact of the hedged item. For the three- and nine-month periods three-month period ended September 30, 2023 and 2022, March 31, 2023, gains and losses included in the hedge assessment on interest rate swaptions and related hedged items were immaterial.

The following table shows the carrying amounts of assets designated and qualifying as hedged items in fair value hedges of interest rate risk and the related cumulative hedge adjustment included in the carrying amount. The Company had no fair value hedges of interest rate risk as of September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023; therefore, the amounts presented in the table below are related to previous fair value hedges of interest rate risk that were discontinued.

(In millions)	(In millions)	Cumulative Amount of Fair Value Hedging Adjustment Included in the Carrying Amount of Hedged Assets/(Liabilities)			
		September 30, 2023	December 31, 2022	September 30, 2023	December 31, 2022

		March 31, 2024			
Fixed maturity securities	Fixed maturity securities	\$ 1,829	\$ 2,360	\$ 179	\$ 189
Fixed maturity securities					
Fixed maturity securities					

(a) The balance includes hedging adjustment on discontinued hedging relationships of \$179 \$161 in 2023 2024 and \$189 \$164 in 2022 2023.

Net Investment Hedge

The Company's investment in Aflac Japan is affected by changes in the yen/dollar exchange rate. To mitigate this exposure, the Parent Company's yen-denominated liabilities (see Note 9) have been designated as non-derivative hedges and certain foreign currency forwards and options have been designated as derivative hedges of the foreign currency exposure of the Company's net investment in Aflac Japan.

The Company's net investment hedge was effective during the three- and nine-month three-month periods ended September 30, 2023 March 31, 2024 and 2022 2023, respectively.

Non-qualifying Strategies

For the Company's derivative instruments in consolidated VIEs that do not qualify for hedge accounting treatment, all changes in their fair value are reported in current period earnings within net investment gains (losses). The amount of gain or loss recognized in earnings for the Company's VIEs is attributable to the derivatives in those investment structures. While the change in value of the swaps is recorded in current period earnings, the change in value of the available-for-sale fixed maturity securities associated with these swaps is recorded in other comprehensive income.

As of September 30, 2023 March 31, 2024, the Parent Company had \$1.2 billion notional amount of cross-currency interest rate swap agreements related to certain of its U.S. dollar-denominated senior notes to effectively convert a portion of the interest on the notes from U.S. dollar to Japanese yen. Changes in the values of these swaps are recorded through in current period earnings. For additional information regarding these swaps, see Note 9 of the Notes to the Consolidated Financial Statements in the 2022 Annual Report.

The Company uses foreign currency forwards and options to economically mitigate the currency risk of some of its U.S. dollar-denominated loan receivables and U.S. government fixed maturity securities held within the Aflac Japan segment. These arrangements are not designated as accounting hedges, as the foreign currency remeasurement of the loan receivables impacts current period earnings, and substantially offsets gains and losses from foreign currency forwards within net investment gains (losses). The Company also has certain foreign currency forwards on U.S. dollar-denominated available-for-sale securities where hedge accounting is not being applied.

The Company uses interest rate swaps to economically convert the variable rate investment income to a fixed rate on certain variable-rate investments.

Impact of Derivatives and Hedging Instruments

The following table summarizes the impact to earnings and other comprehensive income (loss) from all derivatives and hedging instruments.

(a) Interest expense/income on cash flow hedges are recorded in net investment income. For interest rate swaptions classified as fair value hedges, the change in the time value of the swaptions is recognized in other comprehensive income (loss) and amortized into net investment income over its legal term. If the swaption is early terminated but the hedge item is still outstanding, the amortization of disposal amount of the swaptions is recorded in net investment income over the remaining life of the hedged items.

(b) Gains and losses on cash flow hedges and the change in the fair value of interest rate swaptions related to the time value of the swaptions in fair value hedges are recorded as unrealized gains (losses). Gains and losses on net investment hedges related to changes in foreign currency spot rates are recorded in the unrealized foreign currency translation gains (losses) line in the consolidated statements of comprehensive income (loss).

(c) Impact of cash flow hedges reported as net investment gains (losses) includes \$1 of losses reclassified from accumulated other comprehensive income (loss) into earnings during the three-month period ended **September 30, 2023** **March 31, 2024**, and \$1 of losses during the three-month period ended **September 30, 2022**.

(a) Interest expense/income on cash flow hedges are recorded in net investment income. For interest rate swaptions classified as fair value hedges, the change in the time value of the swaptions is recognized in other comprehensive income (loss) and amortized into net investment income over its legal term. If the swaption is early terminated but the hedge item is still outstanding, the amortization of disposal amount of the swaptions is recorded in net investment income over the remaining life of the hedged items.

(b) Gains and losses on cash flow hedges and the change in the fair value of interest rate swaptions related to the time value of the swaptions in fair value hedges are recorded as unrealized gains (losses). Gains and losses on net investment hedges related to changes in foreign currency spot rates are recorded in the unrealized foreign currency translation gains (losses) line in the consolidated statements of comprehensive income (loss).

(c) Impact of cash flow hedges reported as net investment gains (losses) includes \$3 of losses reclassified from accumulated other comprehensive income (loss) into earnings during the nine-month period ended September 30, 2023, and \$3 of losses during the nine-month period ended September 30, 2022.

(d) Includes \$1 of losses reclassified from accumulated other comprehensive income (loss) into earnings during the nine-month period ended September 30, 2023 and \$1 of losses during the nine-month period ended September 30, 2022 related to fair value hedges excluded component. Impact shown net of effect of hedged items (see Fair Value Hedges section of this Note 4 for further detail) March 31, 2023.

As of **September 30, 2023** **March 31, 2024**, \$5 million of deferred losses on derivative instruments recorded in accumulated other comprehensive income are expected to be reclassified into earnings during the next twelve months.

Credit Risk Assumed through Derivatives

For the foreign currency swaps associated with the Company's VIE investments for which it is the primary beneficiary, the Company bears the risk of loss due to counterparty default even though it is not a direct counterparty to those contracts.

The Company is a direct counterparty to the foreign currency swaps that it has entered into in connection with certain of its senior notes and subordinated debentures; foreign currency forwards; and foreign currency options, and therefore the Company is exposed to credit risk in the event of nonperformance by the counterparties in those contracts. The risk of counterparty default for the Company's foreign currency swaps, certain foreign currency forwards, and foreign currency options is mitigated by collateral posting requirements that counterparties to those transactions must meet.

As of **September 30, 2023** **March 31, 2024**, all of the Company's derivative agreement counterparties were investment grade.

The Company engages in over-the-counter (OTC) bilateral derivative transactions directly with unaffiliated third parties under International Swaps and Derivatives Association, Inc. (ISDA) agreements and other documentation. Most of the ISDA agreements also include Credit Support Annexes (CSAs) provisions, which generally provide for two-way collateral postings at the first dollar of exposure. The Company mitigates the risk that counterparties to transactions might be unable to fulfill their contractual obligations by monitoring counterparty credit exposure and collateral value while generally requiring that collateral be posted at the outset of the transaction. In addition, a significant portion of the derivative transactions have provisions that give the counterparty the right to terminate the transaction upon a downgrade of the Company's financial strength rating. The actual amount of payments that the Company could be required to make depends on market conditions, the fair value of outstanding affected transactions, and other factors prevailing at and after the time of the downgrade.

The Company also engages in OTC cleared derivative transactions through regulated central clearing counterparties. These positions are marked to market and margined on a daily basis (both initial margin and variation margin), and the Company has minimal exposure to credit-related losses in the event of nonperformance by counterparties to these derivatives.

Collateral posted by the Company to third parties for derivative transactions can generally be repledged or resold by the counterparties. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a net liability position by counterparty was approximately **\$1.3 billion** **\$1.0 billion** and **\$1.2 billion** as of **September 30, 2023** **March 31, 2024**, and **December 31, 2022** **December 31, 2023**, respectively. If the credit-risk-related contingent features underlying these agreements had been triggered on **September 30, 2023** **March 31, 2024**, the Company estimates that it would be required to post a maximum of **\$227 million** **\$447 million** of additional collateral to these derivative counterparties. The Company is generally allowed to sell or repledge collateral obtained from its derivative counterparties, although it does not typically exercise such rights. (See See the Offsetting tables below for collateral posted or received as of the reported balance sheet dates.)

Offsetting of Financial Instruments and Derivatives

Most of the Company's derivative instruments are subject to enforceable master netting arrangements that provide for the net settlement of all derivative contracts between the Parent Company or its subsidiaries and the respective counterparty in the event of default or upon the occurrence of certain termination events. Collateral support agreements with the master netting arrangements generally provide that the Company will receive or pledge financial collateral at the first dollar of exposure.

The Company has securities lending agreements with unaffiliated financial institutions that post collateral to the Company in return for the use of its fixed maturity and public equity securities (see Note 3). When the Company has entered into securities lending agreements with the same counterparty, the agreements generally provide for net settlement in the event of default by the counterparty. This right of set-off allows the Company to keep and apply collateral received if the counterparty failed to return the securities borrowed from the Company as contractually agreed.

The tables below summarize the Company's derivatives and securities lending transactions, and as reflected in the tables, in accordance with U.S. GAAP, the Company's policy is to not offset these financial instruments in the consolidated balance sheets.

5. FAIR VALUE MEASUREMENTS

Fair Value Hierarchy

U.S. GAAP specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. These two types of inputs create three valuation hierarchy **levels**, as follows:

- Level 1 valuations reflect quoted market prices for identical assets or liabilities in active markets.
- Level 2 valuations reflect quoted market prices for similar assets or liabilities in an active market, quoted market prices for identical or similar assets or liabilities in non-active markets or model-derived valuations in which all significant valuation inputs are observable in active markets.
- Level 3 valuations reflect valuations in which one or more of the significant inputs are not observable in an active market.

The following tables present the fair value hierarchy levels of the Company's assets and liabilities that are measured and carried at fair value on a recurring basis.

	September 30, 2023					March 31, 2024					
	Quoted Prices in Active Markets for Identical Assets					Quoted Prices in Active Markets for Identical Assets

⁽¹⁾ Excludes policy loans of \$214, and equity method investments of \$2,290, \$2,750, and REO of \$227, at carrying value.

Prior-year amounts have been adjusted for the adoption of accounting guidance on January 1, 2023 related to accounting for long-duration insurance contracts.

Fair Value of Financial Instruments

Fixed maturity and equity securities

The Company determines the fair values of fixed maturity securities and public equity securities using the following approaches or techniques: price quotes and valuations from third party pricing vendors (including quoted market prices readily available from public exchange markets), in-house valuations and non-binding price quotes the Company obtains from outside brokers.

The fair values of the Company's public fixed maturity securities are generally based on prices provided by third-party pricing vendors. The Company utilizes internally generated valuations or broker quotes for privately-issued privately issued fixed maturity securities or fixed maturity securities where there is no price available from a third-party pricing vendor.

The fair values of the Company's public equity securities are generally based on price quotes, including quoted market prices readily available from independent public exchange markets or established security dealer associations. The Company determines the fair values of privately issued equity securities using the following approaches or techniques: price quotes and valuations from third-party pricing vendors, in-house valuations and non-binding price quotes the Company obtains from outside brokers.

The pricing data and market quotes the Company obtains from outside sources, including third-party pricing services, are reviewed internally for reasonableness. If a fair value appears unreasonable, the Company will re-examine the inputs and assess the reasonableness of the pricing data with the provider. Additionally, the Company may compare the inputs to relevant market indices and other performance measurements. Based on management's analysis, the valuation is confirmed or may be revised if there is evidence of a more appropriate estimate of fair value based on available market data. The Company has performed verification of the inputs and calculations in any valuation models, including independent validations and back testing, to confirm that the valuations represent reasonable estimates of fair value. For the periods presented, the Company has not adjusted the quotes or prices it obtains from the pricing services and brokers it uses.

For internally generated valuations, the Company utilizes valuation models developed by a third-party pricing vendor. The models and associated processes and controls are executed by Company personnel.

These models are discounted cash flow (DCF) valuation models but also use information from related markets, specifically public bond markets and the credit default swap (CDS) market, to estimate expected cash flows. The models take into consideration any unique characteristics of the securities and make various adjustments to arrive at an appropriate issuer-specific loss adjusted credit curve using the most appropriate comparable security(ies) of the issuer and issuer-specific CDS spreads. This credit curve is then used with the relevant recovery rates to estimate expected cash flows and modeling of additional features, including illiquidity adjustments, if necessary, to price the security by discounting those loss adjusted cash flows. In cases where a credit curve cannot be developed from market information for the specific issuer, the valuation methodology takes into consideration other market observable inputs, including:

- 1)• the most appropriate comparable security(ies) of a guarantor and/or parent
- 2)• CDS spreads of a guarantor and/or parent
- 3)• bonds of comparable issuers with similar characteristics such as rating, geography, or sector
- 4)• CDS spreads of an appropriate index or of comparable issuers with similar characteristics such as rating, geography, or sector
- 5)• bond indices that are comparative in rating, industry, maturity, and region.

Prices for public equity securities are readily available and are acquired from independent market data providers or established security dealer associations.

The pricing data and market quotes the Company obtains from outside sources, including third party pricing services, are reviewed internally for reasonableness. If a fair value appears unreasonable, the Company will re-examine the inputs and assess the reasonableness of the pricing data with the provider. Additionally, the Company may compare the inputs to relevant market indices and other performance measurements. Based on management's analysis, the valuation is confirmed or may be revised if there is evidence of a more appropriate estimate of fair value based on available market data. The Company has performed verification of the inputs and calculations in any valuation models, including independent validations and back testing, to confirm that the valuations represent reasonable estimates of fair value.

For the periods presented, the Company has not adjusted the quotes or prices it obtains from the pricing services and brokers it uses.

The following tables present the pricing sources for the fair values of the Company's fixed maturity and equity securities.

The following is a discussion of the determination of fair value of the Company's remaining financial instruments.

Derivatives

The Company uses derivative instruments to manage the risk associated with certain assets. However, the derivative instrument may not be classified in the same fair value hierarchy level as the associated asset. The significant inputs to pricing derivatives are generally observable in the market or can be derived by observable market data. When these inputs are observable, the derivatives are classified as Level 2.

The Company uses present value techniques to value non-option based derivatives. It also uses option pricing models to value option based derivatives. Key inputs are as follows:

Instrument Type	Level 2
Interest rate derivatives	Swap yield curves Basis curves Interest rate volatility ⁽¹⁾
Foreign currency exchange rate derivatives - Non-VIEs (forwards, swaps and options)	Foreign currency forward rates Swap yield curves Basis curves Foreign currency spot rates Cross foreign currency basis curves Foreign currency volatility ⁽¹⁾
Foreign currency exchange rate derivatives - VIEs (swaps)	Foreign currency spot rates Swap yield curves Credit default swap curves Basis curves Recovery rates Foreign currency forward rates Foreign cross currency cross-currency basis curves

⁽¹⁾ Option-based only

The fair values of the foreign currency forwards and options are based on observable market inputs, therefore they are classified as Level 2.

The Parent Company has cross-currency swap agreements related to certain of its U.S. dollar-denominated senior notes to effectively convert a portion of the interest on the notes from U.S. dollar to Japanese yen. Their fair values are based on observable market inputs, therefore they are classified as Level 2.

To determine the fair value of its interest rate derivatives, the Company uses inputs that are generally observable in the market or can be derived from observable market data. Interest rate swaps are cleared trades. In a cleared swap contract, the clearinghouse provides benefits to the counterparties similar to contracts listed for investment traded on an exchange since it maintains a daily margin to mitigate counterparties' credit risk. These derivatives are priced using observable inputs, accordingly, they are classified as Level 2.

For derivatives associated with VIEs where the Company is the primary beneficiary, the Company is not the direct counterparty to the swap contracts. Nevertheless, the Company has full transparency into the contracts to properly value the swaps for reporting purposes. For these derivatives, the Company utilizes valuation models developed by independent

valuation analytics providers. The models are market standard DCF models and all associated processes and controls are executed by Company personnel. These models take into consideration any unique characteristics of the derivatives in determining the appropriate valuation methodology to estimate expected cash flows. The fair values of these swaps are based on observable market inputs and are classified as Level 2 within the fair value hierarchy.

For forward bond purchase commitments with VIEs, the fair value of the derivative is based on the difference in the fixed purchase price and the current market value of the related bond prior to the settlement date. Since the bond is typically a public bond with readily available pricing, the derivatives associated with the forward purchase commitment are classified as Level 2 within the fair value hierarchy.

Commercial mortgage and other loans

Commercial mortgage and other loans include TRES, CMLs, **MMLs** and **MMLs**, **other loans**. The Company's loan receivables do not have readily determinable market prices and generally lack market liquidity. Fair values for loan receivables are determined based on the present value of expected future cash flows discounted at the applicable U.S. Treasury or floating-rate benchmark yield plus an appropriate spread that considers other risk factors, such as credit and liquidity risk. The spreads are a significant component of the pricing inputs and are generally considered unobservable. Therefore, these investments are classified as Level 3 within the fair value hierarchy.

Other investments

Other investments includes short-term investments that are measured at fair value where amortized cost approximates fair value.

Other policyholders' funds

The largest component of the other policyholders' funds liability is the Company's annuity line of business in Aflac Japan. The Company's annuities have fixed benefits and premiums. For this product, the Company estimates the fair value to be equal to the cash surrender value. This is analogous to the value paid to policyholders on the valuation date if they were to surrender their policy. The Company periodically checks the cash value against discounted cash flow projections for reasonableness. The Company considers its inputs for this valuation to be unobservable and have accordingly classified this valuation as Level 3.

Notes payable

The fair values of the Company's publicly issued notes payable are determined by utilizing available sources of observable inputs from **third party** **third-party** pricing vendors and are classified as Level 2. The fair values of the Company's yen-denominated loans approximate their carrying values and are classified as Level 3.

Transfers between Hierarchy Levels and Level 3 Rollforward

Assets and liabilities are transferred into Level 3 when a significant input cannot be corroborated with market observable data. This occurs when market activity decreases significantly and underlying inputs cannot be observed, current prices are not available, and/or when there are significant variances in quoted prices, thereby affecting transparency. Assets and liabilities are transferred out of Level 3 when circumstances change such that a significant input can be corroborated with market observable data. This may be due to a significant increase in market activity, a specific event, or one or more significant input(s) becoming observable.

The following tables present the changes in fair value of the Company's investments carried at fair value classified as Level 3.

The following is a discussion of the significant unobservable inputs or valuation techniques used in determining the fair value of securities classified as Level 3.

Credit Spreads

The Company holds certain assets that are of a unique, specialized, and/or securitized nature that do not trade on a regular basis in an active market, which makes their fair values difficult to estimate. Most of these assets are managed by external asset managers and the Company utilizes these managers for their expertise when evaluating various inputs used to determine the fair values for these assets, including identifying the appropriate credit or risk spread over risk-free interest rates that incorporates the unique nature or structure of the asset in the valuations. For those assets of a similar nature but not managed by external asset managers, the Company internally estimates the spreads and risk adjustments over risk-free interest rates that reflect the unique nature or structure of the asset as well as the current pricing environment and market conditions for comparable or related investments. Credit or risk spreads are an important input needed to complete the discounted cash flow analyses used to estimate an investment's fair value. Credit or risk spreads underlying these fair values are a significant, unobservable input whose derivation is based on the Company's evaluation of a combination of the external manager's expertise and knowledge, the current pricing environment, and market conditions for the specific asset.

Offered Quotes

In circumstances where the Company's valuation model price is overridden because it implies a value that is not consistent with current market conditions, the Company will solicit bids from a limited number of brokers. The Company also receives unadjusted prices from brokers for certain of its mortgage and asset-backed securities. These quotes are non-binding but are reflective of valuation best estimates at that particular point in time. Offered quotes are an unobservable input in the determination of fair value of mortgage- and asset-backed securities, certain banks/financial institutions, certain other corporate, and equity securities investments.

Private Financials

The Company invests in the debt and equity securities of private companies operating in the cancer, healthtech, insurtech, finance, internet of things, big data and analytics sectors. Due to their private and often small, startup nature, these companies rely on capital provided by institutional and private equity investors for their ongoing operations. They do not have public securities that trade on a regular basis in an active market, which makes their fair values difficult to estimate. The Company values these investments on a cost basis with appropriate adjustments made based on monitoring private financial information provided by these companies. Adjustments to valuations are generally made as new funding tranches are executed or if the financial information provided significantly changes indicating the need for impairment. This private financial information is unobservable and is a significant determinant in the fair value of these corporate venture investments.

For additional information on the Company's investments and financial instruments, see the accompanying Notes 3 and 4 and Notes 1, 3 and 4 of the Notes to the Consolidated Financial Statements in the 2022 Annual Report.

6. DEFERRED POLICY ACQUISITION COSTS

The following tables present a rollforward of deferred policy acquisition costs by reporting segment and disaggregated by product type.

Deferred policy acquisition costs:		Deferred policy acquisition costs:												
Balance at December 31, 2021		\$3,464	\$2,372	\$ 595	\$ 51	\$ 887	\$ 604	\$1,270	\$ 399	\$ 90	\$ 115	\$ 1	\$ 9,848

Balance at December 31, 2022		\$3,035	\$2,161	\$ 525	\$ 55	\$ 904	\$ 613	\$1,304	\$ 418	\$ 88	\$ 135	\$ 1	\$ 9,239	
Foreign currency translation and other														
Foreign currency translation and other														
Balance at December 31, 2023														

The Company uses the following constant level bases to amortize deferred policy acquisition costs:

Policy Type	Constant-level Basis	
	Face Amount	Number of Policies in Force
Life Products (U.S.)	Face Amount	Number of Policies in Force
Health Products (U.S.)		
Health & Life Products (Japan)	Units in Force	

Face amount is the stated dollar amount that the policy's beneficiaries receive upon the death of the insured. For life and health products issued in Japan, the constant-level basis used is units in force, which is a proxy for face amount and insurance in force, respectively. Future DAC amortization is impacted by persistency.

There were no changes to the inputs, or judgments, assumptions and methods used to determine amortization amounts during the nine-month three-month periods ended September 30, 2023 March 31, 2024 and 2022. The Company updated the assumptions used to determine amortization using the same assumptions as those used for measuring the liability for future policy benefits during the nine-month periods ended September 30, 2023 and 2022. The Company recognizes the effects of changes in assumptions prospectively over the remaining contract term as a revision of the future amortization pattern. See Note 1 for more 2023. For additional information on deferred policy acquisition costs, costs, see Notes 1 and 6 of the Notes to the Consolidated Financial Statements in the 2023 Annual Report.

7. POLICY LIABILITIES

Future Policy Benefits

The liability for future policy benefits is determined as the present value of expected future policy benefits to be paid to or on the behalf of policyholders and certain related expenses less the present value of expected future net premiums receivable under the Company's insurance contracts. Future net premiums receivable are future gross premiums receivable under the contract multiplied by the ~~NPR~~ net premium ratio (NPR).

The following tables present the changes in the present value of expected future net premiums and the present value of expected future policy benefits by reporting segment and disaggregated by product type. The present value of expected future net premiums and the present value of expected future policy benefits are presented gross of internal and external ceded reinsurance.

Discount rates are determined using upper-medium grade (low-credit-risk) fixed-income instrument yields that reflect the duration characteristics of the liability. Locked-in discount rates are determined separately for each issue-year cohort as a weighted average single discount rate, calculated as the weighted-average of monthly upper-medium grade (low-credit-risk) fixed-income instrument forward curves in the calendar year, where the weights are the annualized premiums issued for each month of the cohort. The single discount rate for each issue-year cohort is determined by solving for a rate that produces an equivalent NNP to the forward curve and will remain unchanged after the calendar year of issue.

Discount rates are updated each reporting period and require estimation techniques (e.g., interpolation, extrapolation) for determination of points on the curve for which there is limited or no observable market data.

More specifically, the The Company constructs a current discount rate curve separately for discounting cash flows used to calculate each of the Japan and U.S. liabilities for future policy benefits, reflective of the characteristics of the corresponding insurance liabilities, such as currency and tenor.

In the Aflac Japan segment, all long-duration insurance policies are denominated in yen. A significant portion of policies are characterized by tenors exceeding the availability of liquid market data in Japan for single-A rated (as a proxy for upper-medium grade) corporate yen-denominated debt. The discount rate curve is designed to prioritize the observable inputs where available, while past the last liquid point, the data is derived based on estimation techniques consistent with the fair value guidance in ASC 820. The Aflac Japan segment curve utilizes liquid market indices tracking publicly traded yen-denominated single-A corporate debt for the initial 10-year tenor. For the bonds within these market indices where only local ratings are available, the Company prioritizes the bonds with local ratings that are equivalent to a single-A rating based on international rating standards.

For the discount rates applicable to tenors for which the Japan single-A debt market is not liquid but there is sufficient observable market data and/or the observable market data is available for similar instruments (between 10 and 30 years), the Company estimates tenor-specific single-A credit spreads and applies them to risk-free government rates. Lastly, for the tenors where there is limited or no observable single-A or similar market data or risk-free government rates (beyond 30

years), the discount curve is derived by extrapolation of risk free rates beyond their last liquid point following the Smith-Wilson method and grading of the estimated forward credit spread anchored by the ultimate forward rate. The ultimate forward rate is based on the economic value-based solvency regime, which is consistent with the International Association of Insurance Supervisors (IAIS) Insurance Capital Standards (ICS) (which is expected to be introduced in Japan in 2025), and is adjusted for credit and inflation components.

For the Aflac U.S. segment where all long-duration insurance policies are denominated in U.S. dollar and substantially all have cash flow duration within 30 years, for which the U.S. upper-medium grade fixed-income market is liquid and observable, the Company uses data from a liquid fixed-income market index tracking single-A U.S. corporate debt. For the insignificant portion of the policies with cash flow tenors exceeding 30 years, the discount curve beyond that tenor is extrapolated following the Smith-Wilson method from year 30 to the same ultimate forward rate calculated for the Japan discount curve at year 60 and held constant thereafter. The use of the same ultimate rate for U.S. and Japan segments is based on the assumption of long-term global economic convergence.

For the three-month periods ended September 30, 2023 March 31, 2024 and 2022, 2023, the Company recognized \$4.2 billion \$1.1 billion and \$2.4 billion in other comprehensive income (loss) net of tax, respectively, due to changes in the future policy benefits estimate from updating the discount rate assumptions. For the nine-month periods ended September 30, 2023 and 2022, the Company recognized \$1.2 billion and \$11.8 \$(2.8) billion in other comprehensive income (loss) net of tax, respectively, due to changes in the future policy benefits estimate from updating the discount rate assumptions. There were no changes to the methods used to determine the discount rates during the nine-month three-month periods ended September 30, 2023 March 31, 2024 and 2022, 2023.

For the year ended December 31, 2022 December 31, 2023, the Company recognized \$13.7 billion approximately \$(460) million in other comprehensive income (loss) net of tax, due to changes in the future policy benefits estimate from updating the discount rate assumptions. There were no changes to the methods used to determine the discount rates during the year ended December 31, 2022 December 31, 2023.

Mortality rate assumptions are based on industry tables and adjusted for the Company's actual or expected experience where credible or appropriate. These assumptions typically will vary by age, gender, and other demographic characteristics such as smoking status.

Morbidity assumptions are based on the Company's internal data and consider emerging experience. These assumptions are reflective of the coverage and benefits provided and generally vary by age, gender, duration, and any other material policyholder characteristics. In cases where a calendar-year trend is significant, future cash flow projections may include a trend adjustment.

In Japan, separate lapse assumptions are set based on actual or expected experience. These lapse and total termination rate assumptions will vary by line of business and with policyholder characteristics such as duration. In the U.S., the majority of the future cash flows are modeled using total termination rates (which include both lapse and mortality) and are adjusted for actual experience. Policy provisions, such as reaching premium paid-up status, are taken into account when setting assumptions.

For During the three- and nine-month three-month periods ended September 30, 2023 March 31, 2024 and 2022, 2023, the variance of actual experience from expected experience was primarily due to favorable variances in morbidity assumptions as compared to actual experience. During the three-month periods ended September 30, 2023 and 2022, the Company's adjustment for actual variances from expected experience resulted in reserve remeasurement gains of \$54 million and \$18 million in the consolidated statements of earnings, respectively. During the nine-month periods ended September 30, 2023 and 2022, the Company's adjustment for actual variances from expected experience resulted in reserve remeasurement gains of \$161 million and \$77 million in the consolidated statements of earnings, respectively. There were no changes to the inputs, or judgments, assumptions and methods used in measuring the liability for future policy benefits during the nine-month three-month periods ended September 30, 2023 March 31, 2024 and 2022, 2023.

The Company performs an annual review of its assumptions during the third quarter. In 2023, the Company's annual assumption review process resulted in favorable changes to its morbidity and termination assumptions, largely due to reflecting more recent favorable U.S. morbidity experience. These assumption updates, together with the variance of actual from expected experience, resulted in reserve remeasurement gains of \$312 million in the consolidated statement of earnings for the nine-month period ended September 30, 2023. In 2022, the Company's annual review process resulted in favorable changes to its morbidity assumptions due to favorable claims experience, primarily. This, together with the variance of actual experience from expected experience, resulted in reserve remeasurement gains of \$215 million in the consolidated statement of earnings for the year ended December 31, 2022.

The following table summarizes the amount of net earned premiums recognized in the consolidated statements of earnings by reporting segment and disaggregated by product type.

The following tables summarize the amount of undiscounted expected future gross premiums and expected future **policy** benefits and expenses and discounted (discounted at the current period discount rate) expected future gross premiums and expected future **policy** benefits and expenses by reporting segment and disaggregated by product type. These tables are presented gross of internal and external ceded reinsurance. Future gross premiums represent the expected amount of future premiums to be received. For limited-payment policies, the premiums are collected over a shorter period than the policy term over which benefits are provided. As a result, once the policy reaches premium paid-up status, the future gross premiums can be significantly less than the future benefit payments. Further, benefits and expenses are generally greater in the later years of a policy. These are the primary factors that result in future gross premiums lower than future benefit and expense payments for certain lines of business of the Company.

Loss expense as a result of net premium ratio (NPR) capping for the three- and nine-month three-month periods ended September 30, 2023 March 31, 2024 and 2022 2023 was immaterial.

Other Policyholders' Funds

As of September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023, the largest component of the other policyholders' funds liability was the Company's annuity line of business in Aflac Japan. The Company's annuities have fixed benefits and premiums.

The following table presents the changes in other policyholders' funds.

(In millions)	September		(In millions)	March 31, 2024	December 31, 2023
	(In millions)	30, 2023	December 31, 2022

⁽¹⁾ Aflac Japan fixed annuities

⁽²⁾ Weighted-average crediting rate of 1.5% at September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023.

Aflac Japan's fixed annuities have guaranteed fixed crediting rates which results in the policyholders' funds balances being able to cover all guaranteed benefit amounts. The reserves are adequate to fully fund future benefits at any given time.

See Note 1 for additional information on policy liabilities, see Notes 1 and 7 of the Notes to the Consolidated Financial Statements in the 2023 Annual Report.

8. REINSURANCE

The Company periodically enters into fixed quota-share coinsurance agreements in the normal course of business, primarily to provide additional capacity for future growth, optimize capital, limit losses, and minimize exposure to significant risks. For each of its reinsurance agreements, the Company determines whether the agreement provides indemnification against loss or liability relating to insurance risk in accordance with applicable accounting standards. Reinsurance premiums For additional information on

reinsurance, see Notes 1 and 8 and benefits paid or provided are accounted for on bases consistent with those used in accounting for the original policies issued and the terms of the reinsurance contracts. Premiums and benefits are reported net of insurance ceded. Notes to the Consolidated Financial Statements in the 2023 Annual Report.

In January 2023, ALIJ entered into a coinsurance transaction whereby it ceded 28% of the liabilities associated with certain cancer insurance policies. The following table reconciles direct earned premiums, direct benefits and riders claims, excluding reserve remeasurement gains and losses, and reserve remeasurement gains and losses to Aflac Re. This transaction transferred approximately \$2.1 billion of reserves associated with these policies. Approximately \$1.9 billion of assets were transferred from ALIJ to Aflac Re as consideration for assuming the reinsurance risk. This internal reinsurance transaction with Aflac Re has no financial statement impact on a consolidated basis, except for net amounts after the effect of foreign currency accounting reinsurance.

In January 2023, ALIJ also entered into an external coinsurance transaction to cede 1.5% of the liabilities associated with the same cancer insurance policies and riders, in connection with which ALIJ transferred cash consideration to the reinsurer.

	Three Months Ended March 31,

Total benefits and claims, net	\$ 2,010	\$ 2,150

The Company has recorded a deferred profit reinsurance gain liability related to reinsurance transactions, which represents ceded reserves in excess of consideration paid, or consideration received in excess of assumed reserves. The remaining deferred profit reinsurance gain liability of \$590 million \$161 million and \$692 million \$175 million as of September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023, respectively, is included in future policy benefits in the consolidated balance sheets and is being amortized into income over the expected lives of the policies.

The Company has also recorded a reinsurance recoverable for reinsurance transactions, which is included in other assets in the consolidated balance sheets, is reported net of allowance for credit losses and had a remaining balance of \$895 million \$178 million and \$912 million \$183 million as of September 30, 2023 March 31, 2024 and December 31, 2022 December 31, 2023, respectively.

The following table reconciles direct premiums allowance for credit losses related to the Company's reinsurance recoverable balance was \$4 million and direct benefits \$10 million as of March 31, 2024 and claims to net amounts after December 31, 2023, respectively. The credit allowance for the effect of reinsurance recoverable balance is estimated using a PD/LGD method and the elimination key credit quality indicator is the credit rating of inter-segment amounts associated with affiliated reinsurance.

Prior-year amounts have been adjusted for the adoption Company's reinsurance counterparty. The Company uses external credit ratings focused on the reinsurer's financial strength and creditworthiness. As of accounting guidance on January 1, 2023 related to accounting for long-duration insurance contracts, March 31, 2024, the Company's reinsurance counterparties were rated A+. The Company monitors the credit ratings periodically, but not less frequently than quarterly.

These reinsurance transactions are indemnity reinsurance that do not relieve the Company from its obligations to policyholders. In the event that the reinsurer is unable to meet its obligations, the Company remains liable for the reinsured claims.

As *Internal Reinsurance Transactions*

Aflac Re is a part of its capital contingency plan, the Company entered into a committed Bermuda domiciled insurer that reinsurance certain policies issued by ALIJ. The inter-segment amounts associated with these internal reinsurance facility agreement on December 1, 2015, with reserves of approximately ¥120 billion as of September 30, 2023. This reinsurance facility agreement was renewed transactions are eliminated in 2022 and is effective until December 31, 2023. There are also additional commitment periods of a one-year duration, each of which are automatically extended unless notification is received from the reinsurer within 60 days prior to the expiration. The reinsurer can withdraw from the committed facility if Aflac's Standard and Poor's (S&P) rating drops below BBB-. As of September 30, 2023, the Company has not executed a reinsurance treaty under this committed reinsurance facility consolidation.

(a) Redeemed in April 2024

Amounts in the table above are reported net of debt issuance costs and issuance premiums or discounts, if applicable, that are being amortized over the life of the notes.

In March 2024, the Parent Company issued five series of senior notes totaling ¥75.0 billion through a private placement. The first series, which totaled ¥18.3 billion, bears interest at a fixed rate of 1.600% per annum, payable semi-annually, and will mature in March 2034. The second series, which totaled ¥15.0 billion, bears interest at a fixed rate of 1.740% per annum, payable semi-annually, and will mature in March 2036. The third series, which totaled ¥16.5 billion, bears interest at a fixed rate of 1.920% per annum, payable semi-annually, and will mature in March 2039. The fourth series, which totaled ¥5.7 billion, bears interest at a fixed rate of 2.160% per annum, payable semi-annually, and will mature in March 2044. The fifth series, which totaled ¥19.5 billion, bears interest at a fixed rate of 2.400% per annum, payable semi-annually, and will mature in March 2054. These notes are redeemable at the Parent Company's option (i) in whole at any time or (ii) in part from time to time in an amount not less than 5% of the aggregate principal amount then outstanding of the notes to be redeemed.

In March 2024, the Parent Company issued three series of senior notes totaling ¥48.6 billion through a public debt offering under its U.S. shelf registration statement. The first series, which totaled ¥13.0 billion, bears interest at a fixed rate of 1.048% per annum, payable semi-annually, and will mature in March 2029. The second series, which totaled ¥27.9 billion, bears interest at a fixed rate of 1.412% per annum, payable semi-annually, and will mature in March 2031. The third series, which totaled ¥7.7 billion, bears interest at a fixed rate of 1.682% per annum, payable semi-annually, and will mature in March 2034. These notes are redeemable at the Parent Company's option at any time, in whole but not in part, upon the occurrence of certain changes affecting U.S. taxation, as specified in the indenture governing the terms of the issuance. In addition, the notes maturing in March 2029, March 2031 and March 2034 are redeemable at the Parent Company's option, in whole or in part from time to time, on or after December 21, 2028, December 31, 2030 and September 21, 2033, respectively, at a redemption price equal to the aggregate principal amount of the applicable series to be redeemed plus accrued and unpaid interest on the principal amount to be redeemed to, but excluding, the date of redemption.

Interest expense related to the Company's notes payable, which is included in interest expense in the consolidated statements of earnings, was \$46 million and \$47 million for the three-month periods ended March 31, 2024 and 2023, respectively.

A summary of the Company's lines of credit as of **September 30, 2023** **March 31, 2024** follows:

Borrower(s)	Type	Term	Expiration Date	Capacity	Amount Outstanding	Interest Rate on Borrowed Amount	Maturity Period	Commitment Fee	Business Purpose
Aflac Incorporated and Aflac	uncommitted bilateral	364 days	December 28, 2023 6, 2024	\$100 million	\$0 million	The rate quoted by the bank and agreed upon at the time of borrowing	Up to 3 months	None	General corporate purposes
						A rate per annum equal to (a) Tokyo Interbank Market Rate (TIBOR) plus, the alternative applicable TIBOR margin during the availability period from the closing date to the commitment termination date or (b) the TIBOR rate offered by the agent to major banks in yen for the applicable period plus, the applicable alternative TIBOR margin during the term out period	No later than May 10, 2027	.28% to .45%, depending on the Parent Company's debt ratings as of the date of determination

11. SHARE-BASED COMPENSATION

As of **September 30, 2023** **March 31, 2024**, the Company has outstanding share-based awards under the Aflac Incorporated Long-Term Incentive Plan (As Amended and Restated February 14, 2017), as further amended on August 9, 2022 (the Plan). Share-based awards are designed to reward employees for their long-term contributions to the Company and provide incentives for them to remain with the Company. The number and frequency of share-based awards are based on competitive practices, operating results of the Company, government regulations, and other factors.

The Plan, allows for a maximum number of shares issuable over its term of 75 million shares including 38 million shares that may be awarded in respect of awards other than options or stock appreciation rights. If any awards granted under the Plan are forfeited or are terminated before being exercised or settled for any reason other than tax forfeiture, then the shares underlying the awards will again be available under the Plan.

The Plan allows awards to Company employees for incentive stock options (ISOs), non-qualifying stock options (NQSOs), restricted stock, restricted stock units, and stock appreciation rights. Non-employee directors are eligible for grants of NQSOs, restricted stock, and stock appreciation rights. As of **September 30, 2023** **March 31, 2024**, approximately **34.7 million** **33.6 million** shares were available for future grants under this plan. The ISOs and NQSOs have a term of 10 years, and the share-based awards generally vest upon time-based conditions or time and performance-based conditions. Time-based vesting generally occurs after three years. Performance-based vesting conditions generally include the attainment of goals related to Company financial performance. As of **September 30, 2023** **March 31, 2024**, the only performance-based awards issued and outstanding were restricted stock awards and units.

Stock options and stock appreciation rights granted under the amended Plan have an exercise price of at least the fair market value of the underlying stock on the grant date and have an expiration date no later than 10 years from the grant date. Time-based restricted stock awards, restricted stock units and stock options granted after January 1, 2017 generally vest on a **ratable basis over three years, and awards granted prior to the amendment vest on a cliff** basis over three years. The Compensation Committee of the Board of Directors has the discretion to determine vesting schedules.

Share-based awards granted to U.S.-based grantees are settled with authorized but unissued Company stock, while those issued to Japan-based grantees are settled with treasury shares.

The following table provides information on stock options outstanding and exercisable at **September 30, 2023** **March 31, 2024**.

	Stock Option Shares (in thousands)	Weighted-Average Remaining Term (in years)	Aggregate Intrinsic Value (in millions)	Weighted-Average Exercise Price Per Share	Weighted-Average			
					Stock Option Shares (in thousands)	Weighted-Average Remaining Term (in years)	Aggregate Intrinsic Value (in millions)	Weighted-Average Exercise Price Per Share
Outstanding	Outstanding	1,131	2.4	\$ 32.88				
Exercisable	Exercisable	1,131	2.4	50	32.88			
Exercisable								
Exercisable								

The Company received cash from the exercise of stock options in the amount of **\$13 million** **\$5 million** and **\$4 million** during the first **nine** **three** months of **2024** and **2023**, and **2022**, respectively. The tax benefit realized as a result of stock option exercises and restricted stock releases was **\$20 million** **\$24 million** in the first **nine** **three** months of **2023**, **2024**, compared with **\$18 million** **\$17 million** in the first **nine** **three** months of **2022**, **2023**.

As of **September 30, 2023** **March 31, 2024**, total compensation cost not yet recognized in the Company's consolidated financial statements related to restricted stock awards and units was **\$47 million** **\$74 million**, of which **\$25 million** **\$40 million** (1.8 million shares) was related to restricted stock awards and units with a performance-based vesting condition. The Company expects to recognize these amounts over a weighted-average period of approximately **1.6** **1.9** years. There are no other contractual terms covering restricted stock awards once vested.

The following table summarizes restricted stock activity during the **nine-month** **three-month** period ended **September 30, 2023** **March 31, 2024**.

(In thousands of shares)	Shares	Weighted-Average Grant-Date Fair Value	
		Per Share	
Restricted stock at December 31, 2022	2,414	\$	56.21
Granted in 2023	1,145		70.58
Canceled in 2023	(82)		60.10
Vested in 2023	(1,151)		52.80
Restricted stock at September 30, 2023	2,326	\$	62.77

(In thousands of shares)	Shares	Weighted-Average Grant-Date Fair Value	
		Per Share	
Restricted stock at December 31, 2023	2,308	\$	62.96
Granted in 2024	1,213		79.75
Canceled in 2024	(7)		67.50
Vested in 2024	(1,337)		49.24
Restricted stock at March 31, 2024	2,177	\$	72.33

In February 2023, the Company granted 454,303 thousand performance-based stock awards and units, which are contingent on the achievement of the Company's financial performance metrics and its market-based conditions. On the date of grant, the Company estimated the fair value of restricted stock awards and units with market-based conditions using a Monte Carlo simulation model. The model discounts the value of the stock at the assumed vesting date based on the risk-free interest rate. Based on estimates of actual performance versus the vesting thresholds, the calculated fair value percentage payout estimate will be updated each quarter.

The Company uses third-party analyses to assist in developing the assumptions used in, as well as calibrating, a Monte Carlo simulation model. The Company is responsible for determining the assumptions used in estimating the fair value of its share-based payment awards.

For additional information on the Company's long-term share-based compensation plans and the types of share-based awards, see Note 12 of the Notes to the Consolidated Financial Statements included in the **2022** **2023** Annual Report.

12. BENEFIT PLANS

The Company has funded defined benefit plans in Japan and the U.S.; however, the U.S. plan was frozen to new participants effective October 1, 2013. On June 9, 2023, the Company amended the U.S. defined benefit plan to freeze future benefits under the U.S. plan for all participants were frozen effective January 1, 2024, which resulted . U.S. employees, including those that participated in the Company recognizing a curtailment gain of \$49 million in U.S. plan prior to the second quarter of 2023. U.S. employees who are not participants in the defined benefit plan freeze, currently receive a nonelective 401(k) employer contribution. Effective January 1, 2024, the nonelective 401(k) employer contribution will be extended to U.S. employees who are current participants in the defined benefit plan.

The Company also maintains non-qualified, unfunded supplemental retirement plans that provide defined pension benefits in excess of limits imposed by federal tax law for certain Japanese, U.S. and former employees, however employees. However, future benefits under the Company's Supplemental Executive Retirement Plan was frozen to new participants effective January 1, 2015. On June 9, 2023, the Company amended the Supplemental Executive Retirement Plan and the Retirement Plan for Senior Officers to freeze future benefits under these plans for all participants were frozen effective January 1, 2024, provided that actively employed participants may continue to accrue service toward eligibility for early retirement benefits or delayed early retirement benefits.

The Company provides certain health care benefits for eligible U.S. retired employees, their beneficiaries and covered dependents (other postretirement benefits). The health care plan is contributory and unfunded. Effective January 1, 2014, employees eligible for benefits included the following: (1) active employees whose age plus service, in years, equaled or exceeded 80 (rule of 80); (2) active employees who were age 55 or older and have met the 15 years of service requirement; (3) active employees who would meet the rule of 80 in the next five years; (4) active employees who were age 55 or older and who would meet the 15 years of service requirement within the next five years; and (5) current retirees. For certain employees and former employees, additional coverage is provided for all medical expenses for life.

Pension and other postretirement benefit expenses are included in acquisition and operating expenses in the consolidated statements of earnings, which includes other components of net periodic pension cost and postretirement costs (other than service costs) of \$2 million and \$5 million for both the three-month periods ended March 31, 2024 and \$(41) million and \$11 million for the nine-month periods ended September 30, 2023 and 2022, respectively. 2023. Total net periodic benefit cost includes the following components:

During the **nine** **three** months ended **September 30, 2023** **March 31, 2024**, Aflac Japan contributed approximately **\$19 million** **\$6 million** (using the weighted-average yen/dollar exchange rate for the **nine-month** **three-month** period ended **September 30, 2023** **March 31, 2024**) to the Japanese funded defined benefit plan, and Aflac U.S. did not make a contribution to the U.S. funded defined benefit plan.

For additional information regarding the Company's Japanese and U.S. benefit plans, see Note 14 of the Notes to the Consolidated Financial Statements in the **2022** **2023** Annual Report.

13. COMMITMENTS AND CONTINGENT LIABILITIES

In February 2023, the Company renewed an outsourcing agreement with a management consulting and technology services company to provide application maintenance and development services for Aflac Japan. As of September 30, 2023, the agreement has a remaining term of five years and an aggregate remaining cost of ¥19.2 billion (\$128 million using the September 30, 2023 exchange rate).

The Company is a defendant in various lawsuits and receives various regulatory inquiries considered to be in the normal course of business. Members of the Company's senior legal and financial management teams review litigation and regulatory inquiries on a quarterly and annual basis. The final results of any litigation or regulatory inquiries cannot be predicted with certainty. Although some of this litigation is pending in states where large punitive damages, bearing little relation to the actual damages sustained by plaintiffs, have been awarded in recent years, the Company believes the outcome of pending litigation will not have a material adverse effect on its financial position, results of operations, or cash flows.

See Note 3 for details on certain investment commitments.

Guaranty Fund Assessments

The U.S. insurance industry has a policyholder protection system that is monitored and regulated by state insurance departments. These life and health insurance guaranty associations are state entities (in all 50 states as well as Puerto Rico and the District of Columbia) created to protect policyholders of an insolvent insurance company. All insurance companies (with limited exceptions) licensed to sell life or health insurance in a state must be members of that state's guaranty association. Under state guaranty association laws,

certain insurance companies can be assessed (up to prescribed limits) for certain obligations to the policyholders and claimants of impaired or insolvent insurance companies that write the same line or similar lines of business.

Guaranty fund assessments for the three- and nine-month periods ended September 30, 2023 March 31, 2024 and 2022 2023 were immaterial.

14. SUBSEQUENT EVENTS

In October 2023, the Company received BMA approval for Aflac Re For additional information regarding commitments and ALIJ to enter into a coinsurance transaction whereby ALIJ will cede 30% contingent liabilities, see Note 15 of the liabilities associated with certain cancer insurance policies and riders Notes to Aflac Re. The Company intends to execute this transaction the Consolidated Financial Statements in the fourth quarter of 2023. This transaction is expected to transfer approximately ¥286 billion of reserves associated with these policies and is expected to also involve the transfer of assets by ALIJ to Aflac Re to support these reserves. This internal reinsurance transaction will have no financial statement impact on a consolidated basis, except for the effect of foreign currency accounting. 2023 Annual Report.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A)

FORWARD-LOOKING INFORMATION

The Private Securities Litigation Reform Act of 1995 provides a safe harbor to encourage companies to provide prospective information, so long as those informational statements are identified as forward-looking and are accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those included in the forward-looking statements. Aflac Incorporated (the Parent Company) and its subsidiaries (collectively with the Parent Company, the Company) desire to take advantage of these provisions. This report contains cautionary statements identifying important factors that could cause actual results to differ materially from those projected herein, and in any other statements made by Company officials in communications with the financial community and contained in documents filed with the Securities and Exchange Commission (SEC). Forward-looking statements are not based on historical information and relate to future operations, strategies, financial results or other developments. Furthermore, forward-looking information is subject to numerous assumptions, risks and uncertainties. In particular, statements containing words such as the ones listed below or similar words, as well as specific projections of future results, generally qualify as forward-looking. The Company undertakes no obligation to update such forward-looking statements.

• expect	• anticipate	• believe	• goal	• objective
• may	• should	• estimate	• intends	• projects
• will	• assumes	• potential	• target	• outlook

The Company cautions readers that the following factors, in addition to other factors mentioned from time to time, could cause actual results to differ materially from those contemplated by the forward-looking statements:

- difficult conditions in global capital markets and the economy, including inflation and the continued effects caused by COVID-19
- defaults and credit downgrades of investments
- global fluctuations in interest rates and exposure to significant interest rate risk
- concentration of business in Japan
- limited availability of acceptable yen-denominated investments
- foreign currency fluctuations in the yen/dollar exchange rate
- differing interpretations applied to investment valuations
- significant valuation judgments in determination of expected credit losses recorded on the Company's investments
- decreases in the Company's financial strength or debt ratings
- decline in creditworthiness of other financial institutions
- concentration of the Company's investments in any particular single-issuer or sector
- major public health issues, including COVID-19 and any resulting or coincidental economic effects, on the Company's business and financial results
- the Company's ability to attract and retain qualified sales associates, brokers, employees, and distribution partners
- deviations in actual experience from pricing and reserving assumptions
- ability to continue to develop and implement improvements in information technology systems and on successful execution of revenue growth and expense management initiatives
- interruption in telecommunication, information technology and other operational systems, or a failure to maintain the security, confidentiality, integrity or privacy of sensitive data residing on such systems
- subsidiaries' ability to pay dividends to the Parent Company
- inherent limitations to risk management policies and procedures
- operational risks of third party third-party vendors
- tax rates applicable to the Company may change
- failure to comply with restrictions on policyholder privacy and information security
- extensive regulation and changes in law or regulation by governmental authorities
- competitive environment and ability to anticipate and respond to market trends
- catastrophic events, including, but not limited to, as a result of climate change, epidemics, pandemics, (such as COVID-19), tornadoes, hurricanes, earthquakes, tsunamis, war or other military action, major public health issues, terrorism or other acts of violence, and damage incidental to such events
- ability to protect the Aflac brand and the Company's reputation
- ability to effectively manage key executive succession
- changes in accounting standards
- level and outcome of litigation or regulatory inquiries

- allegations or determinations of worker misclassification in the United States

MD&A OVERVIEW

MD&A is intended to inform the reader about matters affecting the financial condition and results of operations of Aflac Incorporated and its subsidiaries for the **nine-month three-month** periods ended **September 30, 2023** **March 31, 2024** and **2022, 2023**, respectively. Results of operations for interim periods are not necessarily indicative of results for the entire year. As a result, the following discussion should be read in conjunction with the consolidated financial statements and notes that are included in the Company's annual report on Form 10-K for the year ended **December 31, 2022** (**2022 December 31, 2023** (2023 Annual Report)). In this MD&A, amounts may not foot due to rounding.

This MD&A is divided into the following sections:

EXECUTIVE SUMMARY

Company Overview

Aflac Incorporated (the Parent Company) and its subsidiaries (collectively, the Company) provide financial protection to millions of policyholders and customers in Japan and the United States (U.S.). The Company's principal business is supplemental health and life insurance products with the goal to provide customers the best value in supplemental insurance products in **Japan and the U.S. and Japan**. The Company's insurance business consists of two reporting segments: Aflac Japan and Aflac U.S. The Parent Company's primary insurance subsidiaries are Aflac Life Insurance Japan Ltd. in Japan (Aflac Japan) and American Family Life Assurance Company of Columbus (Aflac); Continental American Insurance Company (CAIC), branded as Aflac Group Insurance (AGI); American Family Life Assurance Company of New York (Aflac New York); Tier One Insurance Company (TOIC) and Aflac Benefits Solutions, Inc. (ABS), which provides a platform for Aflac Dental and Vision in the U.S. (collectively, Aflac U.S.). The Parent Company, other operating business units that are not individually reportable, and **business reinsurance** activities, including **internal reinsurance activity with Aflac Re Bermuda Ltd. (Aflac Re)**, and **other business** activities not included in Aflac Japan or Aflac U.S. are included in Corporate and other.

In 2022, the Company established Aflac Re Bermuda Ltd. (Aflac Re), a Bermuda domiciled insurer that reinsurance certain policies issued by ALIJ. Aflac Re is subject to regulation in Bermuda, where the Bermuda Monetary Authority (BMA) has broad administrative powers relating to granting and revoking licenses to transact reinsurance business, approval of specific reinsurance transactions, capital requirements and solvency standards, limitations on dividends to shareholders, the nature of and limitations on investments, and the filing of financial statements in accordance with prescribed or permitted accounting practices. Financial results from Aflac Re as well as intercompany eliminations, are included in Corporate and other.

Performance Highlights

Total revenues were **\$5.0 billion** **\$5.4 billion** in the **third quarter** **first three months of 2024**, compared with **\$4.8 billion** in the **first three months of 2023**, compared with **\$4.7 billion** in the **third quarter of 2022**, reflecting net investment gains. Net earnings were **\$1.6 billion** **\$1.9 billion**, or **\$2.64 per diluted share** in the **third quarter of 2023**, compared with **\$1.8 billion**, or **\$2.82 per diluted share** in the **third quarter of 2022**.

Total revenues were **\$14.9 billion** in the **first nine months of 2023**, compared with **\$15.2 billion** in the **first nine months of 2022**. Net earnings were **\$4.4 billion**, or **\$7.28 per diluted share**, in the **first nine months of 2023**, compared with **\$4.2 billion** **\$1.2 billion**, or **\$6.57 per diluted share**, in the **first nine months of 2022**.

Results in the **third quarter** **first three months of 2023** included pretax net investment gains of **\$423 million** **\$951 million**, compared with pretax net investment gains of **\$199 million** **\$123 million** in the **third quarter** **first three months of 2022**. Net investment gains in the **third quarter** **first three months of 2023** included an increase in credit loss allowances of **\$29 million** **\$1 million**; **\$381 million** **\$703 million** of net gains from certain derivative and foreign currency gains or losses; **\$47 million** **\$76 million** of net gains on equity securities; and **\$24 million** of net gains from sales and redemptions.

Results in the **first nine months of 2023** included pretax net investment gains of **\$1.1 billion**, compared with pretax net investment gains of **\$885 million** in the **first nine months of 2022**. Net investment gains in the **first nine months of 2023** included an increase in credit loss allowances of **\$60 million**; **\$1.0 billion** of net gains from certain derivative and foreign currency gains or losses; **\$35 million** of net gains on equity securities; and **\$105 million** **\$173 million** of net gains from sales and redemptions.

The average yen/dollar exchange rate⁽¹⁾ for the three-month period ended **September 30, 2023** **March 31, 2024** was **144.97**, **148.67**, or **5.4% 11.0%** weaker than the average yen/dollar exchange rate⁽¹⁾ of **137.08** **132.30** for the same period in **2022**. The average yen/dollar exchange rate⁽¹⁾ for the nine-month period ended **September 30, 2023** was **138.38**, or **8.5%** weaker than the average yen/dollar exchange rate⁽¹⁾ of **126.65** for the same period in **2022**.

Adjusted earnings⁽²⁾ in the **third quarter** **first three months of 2023** **2024** were **\$1.1 billion** **\$961 million**, or **\$1.84 per diluted share**, compared with **\$910 million** **\$953 million**, or **\$1.44 per diluted share**, in the **third quarter** **first three months of 2022**. The weaker yen/dollar exchange rate negatively impacted adjusted earnings per diluted share by **\$0.06**. Adjusted earnings⁽²⁾ in the **first nine months of 2023** were **\$3.0 billion**, or **\$4.97 per diluted share**, compared with **\$2.8 billion**, or **\$4.35 per diluted share**, in the **first nine months of 2022**. The weaker yen/dollar exchange rate negatively impacted adjusted earnings per diluted share by **\$0.17**, **\$0.08**.

Total investments and cash at September 30, 2023 were \$111.3 billion, compared with \$117.4 billion at December 31, 2022. In the first **nine** **three** months of **2023**, **2024**, Aflac Incorporated repurchased **\$2.1 billion** **\$750 million**, or **30.2 million** **9.3 million** of its common shares. At **September 30, 2023** **March 31, 2024**, the Company had **86.4 million** **68.5 million** remaining shares authorized for repurchase.

Shareholders' equity was **\$22.7 billion** **\$23.5 billion**, or **\$38.63** **\$41.27** per share, at **September 30, 2023** **March 31, 2024**, compared with **\$20.1 billion** **\$22.0 billion**, or **\$32.73** **\$38.00** per share, at **December 31, 2022** **December 31, 2023**. Shareholders' equity at **September 30, 2023** **March 31, 2024** included a cumulative decrease of **\$866 million** **\$1.5 billion** from the effect of changes in discount rate assumptions on insurance contracts, compared with a corresponding cumulative decrease of **\$2.1 billion** **\$2.6 billion** at **December 31, 2022** **December 31, 2023**, and a net unrealized **loss** **gain** on investment

securities and derivatives of **\$427 million** **\$1.1 billion**, compared with a net unrealized **loss** **gain** of **\$729 million** **\$1.1 billion** at **December 31, 2022** **December 31, 2023**. Shareholders' equity at **September 30, 2023** **March 31, 2024** also included an unrealized foreign currency translation loss of **\$4.5 billion** **\$4.7 billion**, compared with an unrealized foreign currency translation loss of **\$3.6 billion** **\$4.1 billion** at **December 31, 2022** **December 31, 2023**. The annualized return on average shareholders' equity in the **third** **first** quarter of **2023** **2024** was **29.1%** **33.0%**.

Shareholders' equity excluding accumulated other comprehensive income (AOCI)⁽²⁾ (adjusted book value) was **\$28.4 billion** **\$28.6 billion**, or **\$48.44** **\$50.22** per share at **September 30, 2023** **March 31, 2024**, compared with **\$26.6 billion** **\$27.5 billion**, or **\$43.18** **\$47.55** per share, at **December 31, 2022** **December 31, 2023**. The annualized adjusted return on equity (ROE) excluding foreign currency impact⁽²⁾ in the **third** **first** quarter of **2023** **2024** was **16.1%** **14.3%**.

⁽¹⁾ Yen/U.S. dollar exchange rates are based on the published MUFG Bank, Ltd. telegraphic transfer middle rate (TTM).

⁽²⁾ See the Results of Operations section of this MD&A for a definition of this non-U.S. GAAP financial measure.

RESULTS OF OPERATIONS

The Company earns its revenues principally from insurance premiums and investments. The Company's operating expenses primarily consist of insurance benefits provided and reserves established for anticipated future insurance benefits, general business expenses, commissions and other costs of selling and servicing its products. Profitability for the Company depends principally on its ability to price its insurance products at a level that enables the Company to earn a margin over the costs associated with providing benefits and administering those products. Profitability also depends on, among other items, actuarial and policyholder behavior experience on insurance products, and the Company's ability to attract and retain customer assets, generate and maintain favorable investment results, effectively deploy capital and utilize tax capacity, and manage expenses.

This document includes references to the Company's financial performance measures which are not calculated in accordance with United States generally accepted accounting principles (U.S. GAAP) (non-U.S. GAAP). The financial measures exclude items that the Company believes may obscure the underlying fundamentals and trends in insurance operations because they tend to be driven by general economic conditions and events or related to infrequent activities not directly associated with insurance operations.

Due to the size of Aflac Japan, where the functional currency is the Japanese yen, fluctuations in the yen/dollar exchange rate can have a significant effect on reported results. In periods when the yen weakens, translating yen into dollars results in fewer dollars being reported. When the yen strengthens, translating yen into dollars results in more dollars being reported. Consequently, yen weakening has the effect of suppressing current period results in relation to the comparable prior period, while yen strengthening has the effect of magnifying current period results in relation to the comparable prior period. A significant portion of the Company's business is conducted in yen and never converted into dollars but translated into dollars for U.S. GAAP reporting purposes, which results in foreign currency impact to earnings, cash flows and book value on a U.S. GAAP basis. Management evaluates the Company's financial performance both including and excluding the impact of foreign currency translation to monitor, respectively, cumulative currency impacts and the currency-neutral operating performance over time. The average yen/dollar exchange rate is based on the published MUFG Bank, Ltd. telegraphic transfer middle rate (TTM).

The Company defines the non-U.S. GAAP financial measures included in this document as follows:

- **Adjusted earnings** are adjusted revenues less benefits and adjusted expenses. Adjusted earnings per share (basic or diluted) are the adjusted earnings for the period divided by the weighted average outstanding shares (basic or diluted) for the period presented. The adjustments to both revenues and expenses account for certain items that cannot be predicted or that are outside of management's control because they tend to be driven by general economic conditions and events or are related to infrequent activities not directly associated with insurance operations. Adjusted revenues are U.S. GAAP total revenues excluding adjusted net investment gains and losses. Adjusted expenses are U.S. GAAP total acquisition and operating expenses including the impact of interest cash flows from derivatives associated with notes payable but excluding any nonrecurring non-recurring or other items not associated with the normal course of the Company's insurance operations and that do not reflect the Company's underlying business performance. Management uses adjusted earnings and adjusted earnings per diluted share to evaluate the financial performance of the Company's insurance operations on a consolidated basis and believes that a presentation of these financial measures is vitally important to an understanding of the underlying profitability drivers and trends of the Company's insurance business. The most comparable U.S. GAAP financial measures for adjusted earnings and adjusted earnings per share (basic or diluted) are net earnings and net earnings per share, respectively.
- **Adjusted net investment gains and losses** are net investment gains and losses adjusted for i) amortized hedge cost/income related to foreign currency exposure management strategies and certain derivative activity, ii) net interest cash flows income/expense from foreign currency and interest rate derivatives associated with certain investment

strategies, which are both reclassified to net investment income, and iii) the impact of interest cash flows from derivatives associated with notes payable, which is reclassified to interest expense as a component of total adjusted expenses. The Company considers adjusted net investment gains and losses important as it represents the remainder amount that is considered outside management's control, while excluding the components that are within management's control and are accordingly reclassified to net investment income and interest expense. The most comparable U.S. GAAP financial measure for adjusted net investment gains and losses is net investment gains and losses.

- **Amortized hedge costs/income** represent costs/income incurred or recognized as a result of using foreign currency derivatives to hedge certain foreign exchange risks in the Company's Japan segment or in Corporate and other. These amortized hedge costs/income are estimated at the inception of the derivatives based on the specific terms of each contract and are recognized on a straight-line basis over the **contractual** term of the **hedge derivative**. The Company believes that amortized hedge costs/income measure the periodic currency risk management costs/income related to hedging certain foreign currency exchange risks and are an important component of net investment income. There is no comparable U.S. GAAP financial measure for amortized hedge costs/income.
- **Adjusted earnings excluding current period foreign currency impact** are computed using the average foreign currency exchange rate for the comparable prior-year period, which eliminates fluctuations driven solely by foreign currency exchange rate changes. Adjusted earnings per diluted share excluding current period foreign currency impact is adjusted earnings excluding current period foreign currency impact divided by the weighted average outstanding diluted shares for the period presented. The Company considers adjusted earnings excluding current period foreign currency impact and adjusted earnings per diluted share excluding current period foreign currency impact important because a significant portion of the Company's business is conducted in Japan and foreign exchange rates are outside management's control; therefore, the Company believes it is important to understand the impact of translating foreign currency (primarily Japanese yen) into U.S. dollars. The most comparable U.S. GAAP financial measures for adjusted earnings excluding current period foreign currency impact and adjusted earnings per diluted share excluding current period foreign currency impact are net earnings and net earnings per share, respectively.
- **Adjusted book value** is the U.S. GAAP book value (representing total shareholders' equity), less AOCI as recorded on the U.S. GAAP balance sheet. Adjusted book value per common share is adjusted book value at the period end divided by the ending outstanding common shares for the period presented. The Company considers adjusted book value and adjusted book value per common share important as they exclude AOCI, which fluctuates due to market movements that are outside management's control. The most comparable U.S. GAAP financial measures for adjusted book value and adjusted book value per common share are total book value and total book value per common share, respectively.
- **Adjusted return on equity excluding foreign currency impact** is adjusted earnings excluding the current period foreign currency impact divided by average shareholders' equity, excluding AOCI. The Company considers adjusted return on equity excluding foreign currency impact important as it excludes changes in foreign currency and components of AOCI, which fluctuate due to market movements that are outside management's control. The most comparable U.S. GAAP financial measure for adjusted return on equity excluding foreign currency impact is **ROE** **return on average equity (ROE)** as determined using net earnings and average total shareholders' equity.
- **U.S. dollar-denominated investment income excluding foreign currency impact** represents amounts excluding foreign currency impact on U.S. dollar-denominated investment income using the average foreign currency exchange rate for the comparable prior year period. The Company considers U.S. dollar-denominated investment income excluding foreign currency impact important as it eliminates the impact of foreign currency changes on the Aflac Japan segment results, which are outside management's control. The most comparable U.S. GAAP financial measure for U.S. dollar-denominated investment income excluding foreign currency impact is the corresponding net investment income amount from the U.S. dollar denominated investments translated to yen.

The following table is a reconciliation of items impacting adjusted earnings and adjusted earnings per diluted share to the most directly comparable U.S. GAAP financial measures of net earnings and net earnings per diluted share, respectively.

The Company's investment strategy is to invest primarily in fixed maturity securities to provide a reliable stream of investment income, which is one of the drivers of the Company's profitability. This investment strategy incorporates asset-liability matching (ALM) to align the expected cash flows of the portfolio to the needs of the Company's liability structure. The Company does not purchase securities with the intent of generating investment gains or losses. However, investment gains and losses may be realized as a result of changes in the financial markets and the creditworthiness of specific issuers, tax planning strategies, and/or general portfolio management and rebalancing. The realization of investment gains and losses is independent of the underwriting and administration of the Company's insurance products.

Net investment gains and losses excluded from adjusted earnings include the following:

- Securities Transactions
- Credit Losses
- Changes in the Fair Value of Equity Securities
- Certain Derivative and Foreign Currency Activities.

[Securities Transactions, Credit Losses and Changes in the Fair Value of Equity Securities](#)

Securities transactions include gains and losses from sales and redemptions of investments where the amount received is different from the amortized cost of the investment. Credit losses include losses for held-to-maturity fixed maturity securities, available-for-sale fixed maturity securities, loan receivables, loan commitments and reinsurance recoverables. Changes in the fair value of equity securities are the result of gains or losses driven by fluctuations in market prices.

[Certain Derivative and Foreign Currency Activities](#)

The Company's derivative activities include:

- foreign currency forwards and options used in hedging foreign exchange risk on U.S. dollar-denominated investments in Aflac Japan's portfolio, with options used on a standalone basis and/or in a collar strategy;
- foreign currency forwards and options used to economically hedge certain portions of forecasted cash flows denominated in yen and hedge the Company's long term exposure to a weakening yen;
- cross-currency interest rate swaps, also referred to as foreign currency swaps, associated with certain senior notes and subordinated debentures;
- foreign currency swaps that are associated with variable interest entity (VIE) bond purchase commitments, and investments in special-purpose entities, including VIEs where the Company is the primary beneficiary;
- interest rate swaps used to economically hedge interest rate fluctuations in certain variable-rate investments;
- interest rate swaptions used to hedge changes in the fair value associated with interest rate fluctuations for certain U.S. dollar-denominated available-for-sale fixed-maturity securities; and
- bond purchase commitments at the inception of investments in consolidated VIEs.

Gains and losses are recognized as a result of valuing these derivatives, net of the effects of hedge accounting. The Company also excludes from adjusted earnings the accounting impacts of remeasurement associated with changes in the foreign currency exchange rate.

For additional information regarding net investment gains and losses, including details of reported amounts for the periods presented, see Notes 3 and 4 of the Notes to the Consolidated Financial Statements.

Other and Non-recurring Items

The U.S. insurance industry has a policyholder protection system that provides funds for the policyholders of insolvent insurers. The system can result in periodic charges to the Company as a result of insolvencies/bankruptcies that occur with other companies in the life insurance industry. Some states permit member insurers to recover assessments paid through full or partial premium tax offsets. These charges neither relate to the ordinary course of the Company's business nor reflect the Company's underlying business performance, but result from external situations not controlled by the Company. The Company excludes any charges associated with U.S. guaranty fund assessments and the corresponding tax benefit or expense from adjusted earnings.

In Japan, the government also requires the insurance industry to contribute to a policyholder protection corporation that provides funds for the policyholders of insolvent insurers; however, these costs are calculated and administered differently than in the U.S. In Japan, these costs are not directly related to specific insolvencies or bankruptcies, but are rather a regular operational cost for an insurance company. Based on this structure, the Company does not remove the Japan policyholder protection expenses from adjusted earnings.

The Company considers the costs associated with the early redemption of its debt to be unrelated to the underlying fundamentals and trends in its insurance operations. Additionally, these costs are driven by changes in interest rates subsequent to the issuance of the debt, and the Company considers these interest rate changes to represent economic conditions not directly associated with its insurance operations.

On June 9, 2023, the Company amended the U.S. defined benefit plan to freeze future benefits under the plan for all participants effective January 1, 2024, which resulted in the Company recognizing a curtailment gain of approximately \$49 million in the second quarter of 2023. The curtailment gain is both unusual and non-recurring and is unrelated to other recurring benefit costs associated with the plan; therefore, the Company has excluded the curtailment gain from adjusted earnings.

Other items excluded from adjusted earnings also included an impairment for certain finite-lived intangible assets of approximately \$11 million in the second quarter of 2023 as a result of the Company exiting the third-party administration business acquired in connection with the purchase of Aflac Benefit Solutions, Inc. (formerly known as Argus Dental & Vision, Inc.) in 2019. The impairment of these intangible assets are not related to the ongoing operations of the business and occur infrequently; therefore, the Company has excluded the impairment from adjusted earnings.

Income Taxes

The Company's combined U.S. and Japanese effective income tax rate on pretax earnings was 13.1% 13.4% for the three-month period ended September 30, 2023 March 31, 2024, compared with (34.0)% 11.5% for the same period in 2022. The Company's combined U.S. and Japanese effective income tax rate on pretax earnings was 11.7% for the nine-month period ended September 30, 2023, compared with 2.5% for the same period in 2022. The combined effective tax rate differs from the U.S. statutory rate primarily due to historic and solar tax credits and the exclusion of foreign currency translation gains and losses held in the Delaware Statutory Trust. For additional information, see the Critical Accounting Estimates - Income Taxes section of Item 7. MD&A in the 2022 2023 Annual Report.

Aflac Japan holds certain U.S. dollar-denominated assets in a Delaware Statutory Trust (DST). These assets are mostly comprised of various U.S. dollar-denominated commercial mortgage loans. The functional currency of the DST for U.S. tax purposes was historically the Japanese yen. In the third quarter of 2022, the Company requested a change in tax accounting method through the Internal Revenue Service's automatic consent procedures to change the functional currency of the DST for U.S. tax purposes to the U.S. dollar. As a result, foreign currency translation gains or losses on assets held in the DST are no longer recognized for U.S. tax purposes. The Company historically recorded a deferred tax liability for foreign currency translation gains on the DST assets, which was released in the third quarter of 2022 as a result of the functional currency change. The change in functional currency resulted in the Company recognizing an income tax benefit of \$695 million (\$1.10 per basic and diluted share, respectively) in the third quarter of 2022.

The Company expects that its effective tax rate on adjusted earnings for future periods will be approximately 20%. The effective tax rate continues to be subject to future tax law changes both in the U.S. and in foreign jurisdictions. See the risk factor entitled "Tax rates applicable to the Company may change" in Item 1A. Risk Factors of the 2022 2023 Annual Report for more information.

Foreign Currency Translation

Aflac Japan's premiums and a significant portion of its investment income are received in yen, and its claims and most expenses are paid in yen. Aflac Japan purchases yen-denominated assets and U.S. dollar-denominated assets, which may be hedged to yen, to support yen-denominated policy liabilities. Yen-denominated income statement accounts are translated to U.S. dollars using the weighted average Japanese yen/U.S. dollar foreign exchange rate for the reporting period, except realized gains and losses on securities transactions which are translated at the exchange rate on the trade date of each transaction. Yen-denominated balance sheet accounts are translated to U.S. dollars using the spot Japanese yen/U.S. dollar foreign exchange rate at the end of the reporting period.

**Reconciliation of Return on Equity to Adjusted Return on Equity
(Excluding the Impact of Foreign Currency)**

The following table is a reconciliation of items impacting adjusted return on equity **excluding the impact of foreign currency** to the most directly comparable U.S. GAAP financial measure of return on equity for the three-month **period** ended **September 30, 2023**, **March 31**.

U.S. GAAP return on equity - net earnings ⁽¹⁾	29.1%
Impact of excluding unrealized foreign currency translation gains (losses)	(4.5)
Impact of excluding unrealized gains (losses) on securities and derivatives	.8
Impact of excluding effect of changes in discount rate assumptions	(3.1)
Impact of excluding pension liability adjustment	.0
Impact of excluding accumulated other comprehensive income	(6.8)
U.S. GAAP return on equity less accumulated other comprehensive income	22.3
Differences between adjusted earnings and net earnings ⁽²⁾	(6.7)
Adjusted return on equity - reported	15.6
Impact of foreign currency ⁽³⁾	(.5)
Adjusted return on equity, excluding impact of foreign currency	16.1

	2024	2023
U.S. GAAP return on equity - net earnings ⁽¹⁾	33.0 %	23.8 %
Impact of excluding unrealized foreign currency translation gains (losses)	(5.1)	(3.2)
Impact of excluding unrealized gains (losses) on securities and derivatives	1.3	.2
Impact of excluding effect of changes in discount rate assumptions	(2.4)	(3.1)
Impact of excluding pension liability adjustment	.0	.0
Impact of excluding accumulated other comprehensive income	(6.2)	(6.1)
U.S. GAAP return on equity less accumulated other comprehensive income	26.8	17.7
Differences between adjusted earnings and net earnings ⁽²⁾	(13.1)	(3.5)
Adjusted return on equity - reported	13.7	14.2
Impact of foreign currency ⁽³⁾	(.6)	N/A
Adjusted return on equity, excluding impact of foreign currency	14.3	14.2

⁽¹⁾ U.S. GAAP return on equity is calculated by dividing net earnings (annualized) by average shareholders' equity.

⁽²⁾ See separate reconciliation of net earnings to adjusted earnings above.

⁽³⁾ Impact of foreign currency is calculated by restating all foreign currency components of the income statement to the weighted average foreign currency exchange rate for the comparable prior year period. The impact is the difference of the restated adjusted earnings compared to reported adjusted earnings. Current For comparative purposes, only current period income is restated using the weighted average prior period exchange rate, which eliminates the foreign currency impact for the current period. This allows for equal comparison of this financial measure.

RESULTS OF OPERATIONS BY SEGMENT

U.S. GAAP financial reporting requires that a company report financial and descriptive information about operating segments in its annual and interim period financial statements. Furthermore, the Company is required to report a measure of segment profit or loss, certain revenue and expense items, and segment assets. The Company's insurance business consists of two segments: Aflac Japan and Aflac U.S. Aflac Japan is the principal contributor to consolidated earnings. In addition, the Parent Company, other business units that are not individually reportable, and business reinsurance activities, including internal reinsurance activity with Aflac Re, and other business activities not included in Aflac Japan or Aflac U.S., as well as intercompany eliminations, are included in Corporate and other. See Item 1. Business in the **2022** 2023 Annual Report for a summary of each segment's products and distribution channels.

Consistent with U.S. GAAP guidance for segment reporting, pretax adjusted earnings is the Company's U.S. GAAP measure of segment performance. The Company believes that a presentation of this measure is vitally important to an understanding of the underlying profitability drivers and trends of its business. Additional performance measures used to evaluate the financial condition and performance of the Company's segments are listed below.

- Operating Ratios
- New Annualized Premium Sales
- New Money Yield
- Return on Average Invested Assets

- Average Weekly Producer
- Premium Persistency

For additional information on the Company's performance measures included in this MD&A, see the Glossary of Selected Terms found directly following Part II. Other Information. See Note 2 of the Notes to the Consolidated Financial Statements for the reconciliation of segment results to the Company's consolidated U.S. GAAP results and additional information.

AFLAC JAPAN SEGMENT

Aflac Japan Pretax Adjusted Earnings

Changes in Aflac Japan's pretax adjusted earnings and profit margins are primarily affected by morbidity, mortality, expenses, persistency and investment yields. The following table presents a summary of operating results for Aflac Japan.

Aflac Japan Summary of Operating Results

(In millions)	Three Months Ended September 30,				Nine Months Ended September 30,

Pretax adjusted earnings

(a) Includes a gain (loss) of \$22 and \$(41) for the three-month periods and \$22 and \$(42) for the nine-month periods ended September 30, 2023 and 2022, respectively, related to remeasurement of the deferred profit liability for limited-payment contracts.

(b) Net interest cash flows income/expense from derivatives associated with certain investment strategies of \$(79) and \$(25) \$(62) for the three-month periods ended March 31, 2024 and \$(214) and \$(37) for the nine-month periods ended September 30, 2023 and 2022, respectively, have been reclassified from net investment gains (losses) and included in adjusted earnings as a component of net investment income.

Prior-year amounts have been adjusted for the adoption of accounting guidance on January 1, 2023 related to accounting for long-duration insurance contracts.

For the three- and nine-month periods three-month period ended September 30, 2023 March 31, 2024, net earned premiums operating results in yen terms decreased, as compared with to the same periods period in 2022, the previous year were as follows:

- Net earned premiums decreased primarily due to limited-pay products reaching premium paid-up status and approximately ¥8 billion related to the internal reinsurance transaction with Aflac Re that occurred in January 2023, partially offset by an unlock of future deferred profit liability assumptions established in the third fourth quarter of 2023, 2023 and approximately ¥6 billion in limited-pay products reaching premium paid-up status.
- Adjusted net investment income in yen terms increased in the three-month period ended September 30, 2023, as compared with the same period in 2022, primarily due to lower hedge costs of ¥7 billion, the weakening of the yen of ¥6 billion, higher variable net investment income of ¥5 billion and higher fixed rate income of ¥3 billion, partially offset by lower floating rate income. For the three- and nine-month periods ended September 30, 2023, total benefits and claims in yen terms decreased, as compared with the same periods in 2022, primarily income due to annual assumption updates the increase in the third quarter of 2023 and 2022. For the three- and nine-month periods ended September 30, 2023, pretax loans on nonaccrual status.
- Total adjusted earnings in yen terms increased, as compared with the same periods in 2022, revenues decreased slightly primarily due to the decrease in total net earned premiums mostly offset by the increase in adjusted net investment income.
- Total benefits and claims and a decrease in total adjusted expenses related decreased primarily due to expense control efforts and the internal reinsurance transaction with Aflac Re that occurred established in January the fourth quarter of 2023.
- Total adjusted expenses decreased primarily due to the internal reinsurance transaction with Aflac Re established in the fourth quarter of 2023 offset by lower revenues, as well as expense control efforts.
- Pretax adjusted earnings increased primarily due to the decrease in both total benefits and claims and total adjusted expenses.

Annualized premiums in force decreased 4.4% 3.8% to ¥1.26 ¥1.23 trillion as of September 30, 2023 March 31, 2024, compared with ¥1.32 ¥1.28 trillion as of September 30, 2022 March 31, 2023. The decrease in annualized premiums in force in yen was driven primarily by limited-pay products reaching premium paid-up status. Annualized premiums in force, translated into dollars at respective period-end exchange rates, were \$8.4 billion \$8.1 billion at September 30, 2023 March 31, 2024, compared with \$9.1 billion \$9.6 billion at September 30, 2022 March 31, 2023. As of September 30, 2023 March 31, 2024, Aflac Japan exceeded 23 million 22 million individual policies in force in Japan, with more than 14 million cancer policies in force in Japan.

Aflac Japan's investment portfolios include U.S. dollar-denominated securities and reverse-dual currency securities (yen-denominated debt securities with dollar coupon payments). In years when the yen strengthens in relation to the dollar, translating Aflac Japan's U.S. dollar-denominated investment income into yen lowers growth rates for net investment income, total adjusted revenues, and pretax adjusted earnings in yen terms. In years when the yen weakens, translating U.S. dollar-denominated investment income into yen magnifies growth rates for net investment income, total adjusted revenues, and pretax adjusted earnings in yen terms.

The following table illustrates the effect of translating Aflac Japan's U.S. dollar-denominated investment income and related items into yen by comparing certain segment results with those that would have been reported had foreign currency exchange rates remained unchanged from the comparable period in the prior year. Amounts excluding foreign currency impact on U.S. dollar-denominated investment income were determined using the average foreign currency exchange rate for the comparable prior year period. See non-U.S. GAAP financial measures defined above.

For the three- and nine-month periods three-month period ended September 30, 2023 March 31, 2024, the total benefits and claims ratio to total premiums decreased, as compared with the same periods in 2022, primarily due to a decrease in the third sector benefit ratio from lower medical hospitalization claims related to deemed hospitalization modifications and an associated update to reserve assumptions in the third quarter of 2023, internal reinsurance activity in 2023, and the continued change in the mix of first and third sector business was flat. The total adjusted expense ratio decreased in the three- and nine-month periods three-month period ended September 30, 2023, as compared with the same periods in 2022, March 31, 2024 primarily due to the decrease in total adjusted revenues and an offsetting decrease in total adjusted expenses due to expense control efforts and associated with the internal reinsurance transaction with Aflac Re that occurred established in January 2023, the fourth quarter of 2023 as well as expense control efforts. In total, the pretax adjusted profit margin increased in the three- and nine-month periods three-month period ended September 30, 2023, as compared with the same periods in 2022, March 31, 2024 primarily due to the lower benefit ratio, the lower expense ratio and an slight offsetting decrease in total adjusted revenues.

Increase (decrease) over prior period									

The **increase** **decrease** in new annualized premium sales on a yen basis in the **third** **first** quarter and the first nine months of **2023** **2024** was primarily driven by due to a decrease in the sales of Aflac Japan's new cancer insurance product and updated first sector products, all of which were launched in the second half of 2022. Further, these products were launched at Dai-ichi Life and other financial institutions in January 2023 and at Japan Post Group in April 2023.

products.

The foundation of Aflac Japan's product portfolio has been, and continues to be, third sector products, which include cancer, medical, income support and other products such as nursing care and work leave insurance products. With continued cost pressure on Japan's health care system, the Company expects the need for third sector products will continue to rise in the future and that the medical and cancer insurance products Aflac Japan provides will continue to be an important part of its product portfolio. Moreover, in November 2022, Aflac Japan refreshed its first sector savings-type products WAYS and Child Endowment and began to actively promote sales of these products after having curtailed sales of both products beginning in 2013. The refreshment of these first sector products position Aflac Japan for potential future long-term sales opportunities by marketing these products to a younger demographic as well as potential cross-selling opportunities of Aflac Japan's third sector products.

Sales of Aflac Japan cancer insurance products in the Japan Post Group channel experienced a material decline beginning in August 2019. Japan Post Group resumed proactive sales of cancer insurance policies in April 2021 and Aflac Japan continues to strengthen the strategic alliance. In April 2023, Japan Post Group began selling Aflac Japan's new cancer insurance product that was first launched in other channels in August 2022. For additional information, see the risk factor entitled "Sales of the Company's products and services are dependent on its ability to attract, retain and support a network of qualified sales associates, brokers and employees in the U.S. and sales associates and other distribution partners in Japan," in Item 1A. Risk Factors in the 2022 Annual Report.

Aflac Japan continues to promote digital and web-based sales to groups and use of its system that enables smart device-based insurance application by allowing the customer and an Aflac Japan operator to see the same screen through their smart devices. Further, Aflac Japan continues to utilize its virtual sales tool that enables online consultations and policy applications to be completed entirely online.

The following table details the contributions to Aflac Japan's new annualized premium sales by agency type for the three-month periods ended September 30, March 31.

(a) Includes Japan Post Group, Dai-ichi Life and Daido Life

During the three-month period ended **September 30, 2023** **March 31, 2024**, Aflac Japan recruited **6** **12** new sales agencies. At **September 30, 2023** **March 31, 2024**, Aflac Japan was represented by approximately **7,100** **6,900** sales agencies, with approximately 113,000 licensed sales associates employed by those agencies. The number of sales agencies has declined in recent years due to Aflac Japan's focus on supporting agencies with strong management frameworks, high productivity and more producing agents.

At **September 30, 2023** **March 31, 2024**, Aflac Japan had agreements to sell its products at 360 banks, approximately 90% of the total number of banks in Japan.

Aflac Japan Investments

The level of investment income in yen is affected by available cash flow from operations, the timing of investing the cash flow, yields on new investments, the effect of yen/dollar exchange rates on U.S. dollar-denominated investment income, and other factors.

As part of the Company's portfolio management and asset allocation process, Aflac Japan invests in yen and U.S. dollar-denominated investments. Yen-denominated investments primarily consist of **JGBs**, **Japan Government Bonds (JGBs)**, public and private fixed maturity securities and public equity securities. Aflac Japan's U.S. dollar-denominated investments include fixed maturity investments, **loan receivables**, and growth assets, including alternative investments in limited partnerships or similar investment vehicles. Aflac Japan **has been investing** **invests** in both publicly traded and privately originated U.S. dollar-denominated investment-grade and below-investment-grade fixed maturity securities and loan receivables, and has entered into foreign currency forwards and options to hedge the currency risk on the fair value of a portion of the U.S. dollar investments.

The following table details the investment purchases for Aflac Japan.

⁽¹⁾ Includes fixed maturity securities, commercial mortgage and other loans, equity securities, and excludes alternative investments in limited partnerships

⁽²⁾ Reported on a gross yield basis; excludes investment expenses, external management fees and amortized hedge costs

⁽³⁾ Net of investment expenses and amortized hedge costs, year-to-date number reflected on a quarterly average basis

The decrease increase in the Aflac Japan new money yield in the three-month period ended September 30, 2023 March 31, 2024 was primarily due to higher allocations to lower higher yielding yen-denominated securities. The increase in the Aflac Japan new money yield in the nine-month period ended September 30, 2023 was primarily due to increases in U.S. interest rates, asset classes. See Notes 3, 4 and 5 of the Notes to the Consolidated Financial Statements and the Investments and Hedging Activities sections of this MD&A for additional information on the Company's investments and hedging strategies.

(a) Net interest cash flows income/expense from derivatives associated with certain investment strategies of \$(9) and \$(1) \$(7) for the three-month periods ended March 31, 2024 and \$(24) and \$1 for the nine-month periods ended September 30, 2023 and 2022, 2023, respectively, have been reclassified from net investment gains (losses) and included in adjusted earnings as a component of net investment income.

Prior-year amounts have been adjusted for the adoption of accounting guidance on January 1, 2023 related to accounting for long-duration insurance contracts.

For the three- and nine-month periods three-month period ended **September 30, 2023** **March 31, 2024**, operating results compared to the same period in the previous year were as follows:

- Net earned premiums increased primarily due to higher net earned premiums increased, as compared with the same periods in 2022, primarily due to the strong contribution from growth initiatives including group life and disability, network dental and vision, and consumer markets businesses.
- Adjusted net investment income increased in the three- and nine-month periods ended **September 30, 2023**, as compared with the same periods in 2022, primarily due to higher floating rate variable income, higher short-term income and higher yielding asset classes.
- Total adjusted revenues increased primarily due to the increase in net earned premiums.
- Total benefits and claims increased primarily due to growth of group life and disability and lower remeasurement gains reflecting actual experience.
- Total adjusted expenses increased slightly primarily due to higher volumes deferred policy acquisition costs amortization and rates an offsetting decrease in insurance and higher variable net investment income. other expenses.
- Pretax adjusted earnings increased in the three- and nine-month periods ended **September 30, 2023**, as compared with the same periods in 2022, primarily due to lower benefits and claims driven by reserve remeasurement gains related to assumption updates in the third quarter of 2023 and an increase in adjusted revenues, partially offset by higher adjusted expenses. Higher adjusted expenses reflect ongoing investments in the U.S. platform, as well as a \$31 million write-off of certain capitalized software development costs in the third quarter of 2023. net earned premiums.

Annualized premiums in force increased **2.9%** **3.1%** to **\$6.1 billion** **\$6.2 billion** at **September 30, 2023** **March 31, 2024**, compared with **\$5.9** **\$6.0 billion** at **September 30, 2022** **March 31, 2023**.

The following table presents a summary of operating ratios for Aflac U.S. followed by a discussion of the significant drivers of changes in operating ratios compared to the same period in the previous year.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2023	2022	2023	2022
Ratios to total adjusted revenues:				
Total benefits and claims	30.7 %	38.5 %	36.2 %	39.9 %
Adjusted expenses:				
Amortization of deferred policy acquisition costs	7.3	7.1	7.2	7.0
Insurance commissions	8.3	8.4	8.4	8.4
Insurance and other expenses	24.9	24.4	24.0	23.7
Total adjusted expenses	40.6	39.9	39.7	39.2
Pretax adjusted earnings	28.8	21.6	24.1	21.0
Ratios to total premiums:				
Total benefits and claims	35.9 %	44.8 %	42.3 %	46.4 %
Adjusted expenses:				
Amortization of deferred policy acquisition costs	8.6	8.3	8.5	8.1

Prior-year amounts have been adjusted for the adoption of accounting guidance on January 1, 2023 related to accounting for long-duration insurance contracts.

	Three Months Ended March 31,	
	2024	2023
Ratios to total adjusted revenues:		
Total benefits and claims	40.4 %	39.2 %
Adjusted expenses:		
Amortization of deferred policy acquisition costs	7.8	7.2
Insurance commissions	8.3	8.6
Insurance and other expenses	22.6	23.8
Total adjusted expenses	38.7	39.6
Pretax adjusted earnings	21.0	21.2
Ratios to total premiums:		
Total benefits and claims	46.5 %	45.6 %

For the three- and nine-month periods three-month period ended **September 30, 2023** **March 31, 2024**, the total benefits and claims ratio to total premiums decreased, as compared with the same periods in 2022, ratio increased primarily due to reserve lower remeasurement gains related to assumption updates in the third quarter of 2023, along with reserve remeasurement gains related to favorable experience. gains. The total adjusted expense ratio increased decreased in the three- and nine-month periods three-month period ended **September 30, 2023**, as compared with the same periods in 2022, **March 31, 2024** primarily due to ongoing investments in the U.S. platform, as well as a \$31 million write-off of certain capitalized software development costs in the third quarter of 2023. The Company expects that this higher total adjusted expense ratio will improve over time as its group life

and disability, network dental and vision and consumer markets businesses grow to scale and improve their profitability. In total, the pretax adjusted profit margin increased slightly in the three- and nine-month periods ended September 30, 2023, as compared with the same periods in 2022, March 31, 2024 primarily due to the lower benefit higher total benefits and claims to total adjusted revenues ratio. For the full year of 2023, the Company expects the benefit ratio to be below the outlook range of 47% to 50% and the expense ratio to be slightly above the outlook range of 37% to 40%.

The following table presents premium persistency for Aflac U.S. on a 12-month rolling basis as of September 30, March 31.

	2023	2022

In the **third** first quarter of **2023**, **2024**, the Aflac U.S. sales force included an average of approximately **6,000** **5,800** U.S. agents, including brokers, who were actively producing business on a weekly basis. The Company believes that this average weekly producer equivalent metric allows sales management to monitor progress and needs, as well as serve as a leading indicator of future production capacity.

In As previously reported in the 2023 Annual Report, in July 2023, the U.S. Department of Labor, U.S. Department of the Treasury Department and U.S. Department of Health and Human Services (the tri-agencies) issued a proposed joint rule that, as written, would impose could have potentially imposed significant limitations on the structure of benefits for hospital indemnity and other fixed indemnity plans, including those sold by Aflac U.S. However, on March 28, 2024, the tri-agencies released the final regulations requiring expanded disclosures to consumers for hospital and fixed indemnity insurance. The current benefit structure for these products allows final regulations, which become effective June 17, 2024, did not include the Company proposals relating to vary the amount of benefits by the services or items received, severity of illness or injury, or any other characteristics particular to a course of treatment. If finalized in its current form, the proposed rule would eliminate Aflac U.S.'s ability to vary the amount of benefits provided by these products. In addition, the proposed rule also proposes to change the regulation and tax treatment of all hospital and fixed indemnity products. Under insurance. As such, the proposal, if premiums are paid on a pretax basis (either by the employer or by employee pretax salary reduction), then the entire amount of the benefit would be taxable income regardless of the amount of the employee's unreimbursed medical expenses. Currently, only the benefits received in excess of unreimbursed medical or medical-related costs are subject to tax. The comment period for the proposed rule closed on September 11, 2023. Aflac U.S. has filed comments opposing the proposed rule. The timing and substance implementation of the final regulations if any, is not known, and any such final rule could be the subject of litigation, anticipated to have a material impact on Aflac U.S. sales.

Aflac U.S. Investments

The level of investment income is affected by available cash flow from operations, the timing of investing the cash flow, yields on new investments, and other factors.

As part of the Company's portfolio management and asset allocation process, Aflac U.S. invests in fixed maturity investments, loan receivables, and growth assets, including public equity securities and alternative investments in limited partnerships. Aflac U.S. has been investing in both publicly traded and privately originated investment-grade and below-investment-grade fixed maturity securities and loan receivables.

The following table details the investment purchases for Aflac U.S.

(a) The change in value of federal historic rehabilitation and solar investments in partnerships of \$64 \$32 and \$19 \$51 for the three-month periods and \$169 and \$61 for the nine-month periods ended September 30, 2023 March 31, 2024, and 2022, 2023, respectively, is included as a reduction to net investment income. Tax credits on these investments of \$63 \$33 and \$19 \$52 for the three-month periods and \$171 and \$63 for the nine-month periods ended September 30, 2023 March 31, 2024, and 2022, 2023, respectively, have been recorded as an income tax benefit in the consolidated statements of earnings. See Note 3 of the Notes to the Consolidated Financial Statements for additional information on these investments.

Prior-year amounts have been adjusted for the adoption of accounting guidance on January 1, 2023 related to accounting for long-duration insurance contracts.

For the three-month period ended September 30, 2023 March 31, 2024, total adjusted revenues increased, as operating results compared with to the same period in 2022, the previous year were as follows:

- Net earned premiums and total benefits and claims increased primarily due to higher total premiums associated with reinsurance activity resulting from agreements established in the internal reinsurance transaction with fourth quarter of 2023.
- Adjusted net investment income increased due to higher Aflac Re that occurred consolidated investment income of \$23 million primarily due to a higher volume of assets as part of the reinsurance agreements established in January the fourth quarter of 2023 partially offset by and \$19 million due to a decrease in lower volume of federal historic rehabilitation and solar tax credit investments, with offsetting tax benefits recognized as a corresponding lower income tax expense.
- Total adjusted revenues increased due to higher net earned premiums and higher adjusted net investment income resulting from income.

- Total adjusted expenses increased primarily due to the impact higher reinsurance activity of historic and solar tax credits. For the nine-month period ended September 30, 2023, total \$37 million as well as an increase in other general operating expenses.
- Pretax adjusted revenues earnings increased as compared with the same period in 2022, primarily due to higher total premiums associated with the internal reinsurance transaction with Aflac Re that occurred in January 2023 and an increase in adjusted net investment income, which was partially offset by the impact of historic and solar tax credits. Total higher total benefits and adjusted expenses increased, as compared with the same periods in 2022, primarily due to higher benefits and claims and expenses associated with the internal reinsurance transaction with Aflac Re that occurred in January 2023. These results also reflect the impact of foreign currency on total net earned premiums and the corresponding benefits. Pretax adjusted earnings increased in the three- and nine-month periods ended September 30, 2023, compared with the same periods in 2022, primarily due to the increase in total adjusted revenue, which was partially offset by higher benefits and claims associated with the internal reinsurance transaction with Aflac Re that occurred in January 2023 and the increase in total adjusted expenses.

The Parent Company invests in partnerships that specialize in rehabilitating historic structures or the installation of solar equipment in order to receive federal historic rehabilitation and solar tax credits. These investments are classified as limited partnerships and included in other investments in the consolidated balance sheets. The change in value of each investment is recorded as a reduction to net investment income. Tax credits generated by these investments are recorded as an income tax benefit in the consolidated statements of earnings.

INVESTMENTS

The Company's investment strategy utilizes disciplined asset and liability management while seeking long-term risk-adjusted investment returns and the delivery of stable income within regulatory and capital objectives, and preserving shareholder value. In attempting to optimally balance these objectives, the Company seeks to maintain on behalf of Aflac Japan a diversified portfolio of yen-denominated investment assets, a U.S. dollar-denominated investment portfolio hedged back to yen and a portfolio of unhedged U.S. dollar-denominated assets. As part of the Company's portfolio management and asset allocation process, Aflac U.S. invests in fixed maturity investments and growth assets, including public equity securities and alternative investments in limited partnerships. Aflac U.S. invests in both publicly traded and privately originated investment-grade and below-investment-grade fixed maturity securities and loans. The Company is also a signatory to the Principles for Responsible Investment, a global framework for incorporating sustainability considerations into investment and ownership decisions.

For additional information concerning the Company's investments, see Notes 3, 4, and 5 of the Notes to the Consolidated Financial Statements.

(c) For consolidated reporting, Aflac U.S.'s investment in Aflac Re is eliminated in Corporate and other

In recent quarters, the Company has noted a trend indicating a gradual strain in the valuations of the commercial real estate market in the United States, with specific concerns regarding office space. The Company monitors this trend and its impact on the valuations of the Company's transitional real estate loans (TREs), commercial mortgage loans (CMLs) and related underlying commercial properties.

Within the commercial mortgage and other loans category, the Company has invested in a variety of commercial mortgage loans (CMLs) and other loans including TREs transitional real estate loans (TREs). The Company's TRE and CML investments are collateralized by commercial real estate, including some that are designed as office space. These properties. The Company considers these investments to be well diversified by geography and among property types. Further, the Company believes that the portfolio is generally well positioned with exposures concentrated in high quality underlying properties with institutional investors who are positioned to manage experienced in managing their assets during periods of market volatility.

While generally resilient, the Company's investments in TREs and CMLs have been affected by conditions in the commercial real estate market, with a greater impact on mortgages secured by office properties. The Company has invested in certain TREs and CMLs that are currently in default of interest or maturity payments. The Company continues to work with the affected borrowers to resolve these specific situations through loan continuance with potential modifications, or through the process of foreclosure or deed in lieu of foreclosure. During Since the third quarter of 2023, the Company took has taken possession, through foreclosure or deed in lieu of foreclosure, of certain commercial real estate properties, securing which secured defaulted loans through foreclosure and deed in lieu of foreclosure. Properties acquired by the Company through foreclosure and deed in lieu of foreclosure are reported as real estate owned (REO) in other investments in the Company's consolidated balance sheet.

The Company utilizes third-party asset managers to source, underwrite and manage each loan, as well as any resulting REO. The Company closely monitors the activities of these managers. In the event that a loan workout is necessary, the Company believes these external managers have the experience and resources to manage the process to maximize recovery.

The Company also monitors its commercial mortgage and other loan investments internally on an ongoing basis, including a review of loans' credit quality indicators and payment status as current, past due, restructured or under foreclosure. See Note 3 of the Notes to the Consolidated Financial Statements for further information concerning credit quality indicators, information on loans that are on nonaccrual status, and REO obtained through foreclosure or deed in lieu of foreclosure. See also Item 1A. Risk Factors of the 2022 2023 Annual Report for a discussion of risk factors associated with the Company's investments.

The ratings of the Company's securities referenced in the table below are based on the ratings designations provided by major rating organizations such as Moody's, Standard & Poor's and Fitch or, if not rated, are determined based on the Company's internal analysis of such securities. When the ratings issued by the rating agencies differ, the Company utilizes the second lowest rating when three or more rating agency ratings are available or the lowest rating when only two rating agency ratings are available.

The distributions of fixed maturity securities the Company owns, by credit rating, were as follows:

Composition of Fixed Maturity Securities by Credit Rating

Generally, declines in fair values can be a result of changes in interest rates, yen/dollar exchange rate, and changes in net spreads driven by a broad market move or a change in the issuer's underlying credit quality. The Company believes these issuers have the ability to continue making timely payments of principal and interest. See the Unrealized Investment Gains and Losses section in Note 3 of the Notes to the Consolidated Financial Statements for further discussions of unrealized losses related to financial institutions and other corporate investments.

Below-Investment-Grade Securities

The Company's portfolio of below-investment-grade securities includes debt securities purchased while the issuer was rated investment grade plus other loans and bonds purchased as part of an allocation to that segment of the market. The following is the Company's below-investment-grade exposure.

(1) Net of allowance for credit losses

(2) Securities initially purchased as investment grade, but have subsequently been downgraded to below investment grade

The Company invests in middle market loans primarily to U.S. corporate borrowers, most of which have below-investment-grade ratings. The objectives of this program include enhancing the yield on invested assets, achieving further diversification of credit risk, and mitigating the risk of rising interest rates and hedge costs through the acquisition of floating rate assets.

The Company maintains an allocation to higher yielding corporate bonds within the Aflac Japan and Aflac U.S. portfolios. Most of these securities were rated below-investment-grade at the time of purchase, but the Company also purchased several that were rated investment grade which, because of market pricing, offer yields commensurate with below-investment-grade risk profiles. The objective of this allocation was to enhance the Company's yield on invested assets and further diversify credit risk. All investments in this program must have a minimum rating at purchase of low BB using the Company's above described rating methodology and are managed by the Company's internal credit portfolio management team.

The Company invests in middle market loans primarily to U.S. corporate borrowers, most of which have below-investment-grade ratings. The objectives of this program include enhancing the yield on invested assets, achieving further diversification of credit risk, and mitigating the risk of rising interest rates and hedge costs through the acquisition of floating rate assets.

Fixed Maturity Securities by Sector

The Company maintains diversification in investments by sector to avoid concentrations to any one sector, thus managing exposure risk. The following table shows the distribution of fixed maturities by sector classification.

Securities by Type of Issuance

The Company has investments in both publicly and privately issued securities. The Company's ability to sell either type of security is a function of overall market liquidity which is impacted by, among other things, the amount of outstanding securities of a particular issuer or issuance, trading history of the issue or issuer, overall market conditions, and idiosyncratic events affecting the specific issue or issuer.

The following table details investment securities by type of issuance.

(a) Principal payments in yen and interest payments in dollars

Aflac Japan has a portfolio of privately issued securities to better match liability characteristics and secure higher yields than those available on Japanese government or other public corporate bonds. Aflac Japan's investments in yen-denominated privately issued securities consist primarily of non-Japanese issuers, are rated investment grade at purchase and have longer maturities, thereby allowing the Company to improve asset/liability matching and overall investment returns. These securities are generally either privately negotiated arrangements or issued under medium-term note programs and have standard documentation commensurate with credit ratings of the issuer, except when internal credit analysis indicates that additional protective and/or event-risk covenants were required. Many of these investments have protective covenants appropriate to the specific investment. These may include a prohibition of certain activities by the borrower, maintenance of certain financial measures, and specific conditions impacting the payment of the Company's notes.

HEDGING ACTIVITIES

The Company uses derivative contracts to hedge foreign currency exchange rate risk and interest rate risk. The Company uses various strategies, including derivatives, to manage these risks. See Item 7A. Quantitative and Qualitative Disclosures About Market Risk in the **2022-2023** Annual Report for more information about market risk and the Company's use of derivatives.

Derivatives are designed to reduce risk on an economic basis while minimizing the impact on financial results. The Company's derivatives programs vary depending on the type of risk being hedged. See Note 4 of the Notes to the Consolidated Financial Statements for:

- A description of the Company's derivatives, hedging strategies and underlying risk exposure.
- Information about the notional amount and fair market value of the Company's derivatives.
- The unrealized and realized gains and losses impact on adjusted earnings of derivatives in cash flow, fair value, net investments in foreign operations, or non-qualifying hedging relationships.

Foreign Currency Exchange Rate Risk Hedge Program

The Company has deployed the following hedging strategies to mitigate exposure to foreign currency exchange rate risk:

- Aflac Japan hedges U.S. dollar-denominated investments back to yen (see *Aflac Japan's U.S. Dollar-Denominated Hedge Program* below).
- Aflac Japan maintains certain unhedged U.S. dollar-denominated securities, which serve as an economic currency hedge of a portion of the Company's investment in Aflac Japan (see *Aflac Japan's U.S. Dollar-Denominated Hedge Program* below).
- The Parent Company designates yen-denominated liabilities (notes payable and loans) as non-derivative hedging instruments and designates certain foreign currency forwards and options as derivative hedges of the Company's net investment in Aflac Japan (see *Enterprise Corporate Hedging Program* below).
- The Parent Company enters into forward and option contracts to accomplish a dual objective of hedging foreign currency exchange rate risk related to dividend payments by its subsidiary, ALIJ, and reducing enterprise-wide hedge costs (see *Enterprise Corporate Hedging Program* below).

The following table presents metrics related to Aflac Japan's U.S. dollar-denominated hedge program and the Parent Company's enterprise corporate hedging program, including associated amortized hedge costs/income, for the periods ended **September 30, March 31**. See the Results of Operations section of this MD&A for the Company's definition of amortized hedge costs/income.

(1) Notional is reported net of any offsetting positions within Aflac Japan or the Parent Company, respectively.

(2) Tenor based on period reporting date to settlement date

Amortized hedge costs/income can fluctuate based upon many factors, including the derivative notional amount, the length of time of the derivative contract, changes in both U.S. and Japan interest rates, and supply and demand for dollar funding. Amortized hedge costs/income have fluctuated in recent periods due to changes in the previously mentioned factors.

[Aflac Japan's U.S. Dollar-Denominated Hedge Program \(U.S. Dollar Program\)](#)

Aflac Japan buys U.S. dollar-denominated investments, typically corporate bonds, and hedges them back to yen with foreign currency forwards and options to hedge foreign currency exchange rate risk. This economically creates yen assets that match yen liabilities during the life of the derivative and provides favorable capital treatment under the Japan solvency margin ratio (SMR) calculations. The currency risk being hedged is generally based on fair value of hedged investments. The following table summarizes the U.S. dollar-denominated investments held by Aflac Japan.

(a) Net of allowance for credit losses

The U.S. Dollar Program includes all U.S. dollar-denominated investments in Aflac Japan other than the investments in certain consolidated VIEs where the instrument is economically converted to yen as a result of a derivative in the consolidated VIE. The Company uses one-sided foreign currency put options to mitigate the settlement risk on U.S. dollar-denominated assets related to extreme foreign currency rate changes. From time to time, Aflac Japan also maintains a collar program on a portion of its U.S. Dollar Program to mitigate against more extreme moves in foreign exchange and therefore support SMR. As of **September 30, 2023** **March 31, 2024**, there were no collars in Aflac Japan, and **none** **some** of the Company's foreign currency options hedging Aflac Japan's U.S. dollar-denominated assets were in-the-money.

As of **September 30, 2023** **March 31, 2024**, the fair value of Aflac Japan's unhedged U.S. dollar-denominated portfolio was **\$1.3 billion** **\$338 million** (excluding certain U.S. dollar-denominated assets shown in the table above as a result of consolidation that have been economically converted to yen using derivatives).

Foreign exchange derivatives used for hedging are periodically settled, which results in cash receipt or payment at maturity or early termination. The following table presents the settlements associated with the Company's currency derivatives used for hedging Aflac Japan's U.S. dollar-denominated investments.

Enterprise Corporate Hedging Program

The Company has designated certain yen-denominated liabilities and foreign currency forwards and options of the Parent Company as accounting hedges of its net investment in Aflac Japan. The Company's consolidated yen-denominated net asset position was partially hedged at **\$6.8 billion** **\$6.6 billion** as of **September 30, 2023** **March 31, 2024**, with hedging instruments comprised of **\$3.5 billion** **\$4.3 billion** of yen-denominated debt and **\$3.3 billion** **\$2.3 billion** of foreign currency forwards and options, compared with **\$11.6 billion** **\$6.8 billion** as of **December 31, 2022** **December 31, 2023**, with hedging instruments comprised of **\$4.0 billion** **\$3.7 billion** of yen-denominated debt and **\$7.6 billion** **\$3.1 billion** of foreign currency forwards and options.

The Company makes its accounting designation of net investment hedge at the beginning of each quarter. If the total of the designated Parent Company non-derivative and derivative notional is equal to or less than the Company's net investment in Aflac Japan, the hedge is deemed to be effective, and the currency exchange effect on the yen-denominated liabilities and the change in estimated fair value of the derivatives are reported in the unrealized foreign currency component of other comprehensive income. The Company's net investment hedge was effective during the three- and nine-month ^{three-month} periods ended **September 30, 2023** **March 31, 2024** and **2022, 2023**, respectively. For additional information on the Company's net investment hedging strategy, see Note 4 of the Notes to the Consolidated Financial Statements.

In order to economically mitigate risks associated with the enterprise-wide exposure to the yen and the level and volatility of hedge costs, the Parent Company enters into foreign currency forward and option contracts. By buying U.S. dollars and selling yen, the Parent Company is effectively lowering its overall economic exposure to the yen, while Aflac Japan's U.S. dollar exposure remains reduced as a result of Aflac Japan's U.S. Dollar Program that economically creates yen assets. Among other objectives, this strategy is intended to offset the enterprise-wide amortized hedge costs by generating amortized hedge income. This activity is reported in Corporate and other. The Company continually evaluates the program's efficacy.

As part of the Company's internal reinsurance platform, Aflac Re enters into foreign currency forwards with the Parent Company, and may enter into such forwards with third parties, to economically manage the currency mismatch between Aflac Re's assets, which are mostly denominated in U.S. dollars, and liabilities, which are mostly denominated in yen, in order to support and optimize **BMA** **Bermuda Monetary Authority** (BMA) capital requirements. For additional information on the Company's internal reinsurance platform, see Note 8 of the Notes to the Consolidated Financial Statements and the Liquidity and Capital Resources section of this MD&A and Note 8 of the Notes to Consolidated Financial Statements in the 2023 Annual Report.

Interest Rate Risk Hedge Program

Aflac Japan and Aflac U.S. use interest rate swaps from time to time to mitigate the risk of investment income volatility for certain variable-rate investments. Additionally, to manage interest rate risk associated with its U.S. dollar-denominated investments held by Aflac Japan, from time to time the Company utilizes interest rate swaptions.

For additional discussion of the risks associated with the foreign currency exposure refer to the Currency Risk section in Item 7A., Quantitative and Qualitative Disclosures about Market Risk, and Item 1A, specifically to the Risk Factors titled "The Company is exposed to foreign currency fluctuations in the yen/dollar exchange rate" and "Lack of availability of acceptable yen-denominated investments could adversely affect the Company's results of operations, financial position or liquidity" in the **2022** **2023** Annual Report.

See Note 4 of the Notes to the Consolidated Financial Statements for additional information on the Company's hedging activities.

DEFERRED POLICY ACQUISITION COSTS

The following table presents deferred policy acquisition costs (DAC) by segment.

(In millions)	September			% Change	(In millions)	March 31, 2024		December 31, 2023	% Change
	30, 2023	December 31, 2022	% Change			2024	2023

See Note 7 of the Notes to the Consolidated Financial Statements for additional information on the Company's policy liabilities.

BENEFIT PLANS

Aflac Japan and Aflac U.S. have various benefit plans. For additional information on the Company's Japanese and U.S. plans, see Note 12 of the Notes to the Consolidated Financial Statements and Note 14 of the Notes to the Consolidated Financial Statements in the ~~2022~~ 2023 Annual Report.

POLICYHOLDER PROTECTION

Policyholder Protection Corporation

The Japanese insurance industry has a policyholder protection system that provides funds for the policyholders of insolvent insurers. Legislation enacted regarding the framework of the Life Insurance Policyholder Protection Corporation (LIPPC) included government fiscal measures supporting the LIPPC. In March 2022, Japan's Diet passed legislation that extended the government's fiscal support of the LIPPC through March 2027. In March 2022, the LIPPC reached the required balance for the total life industry of ¥400 billion as specified by its Articles of Incorporation. As a result, additional contributions are not expected to be required unless the balance is reduced due to payments made by the LIPPC to the policyholders of insolvent insurers. Accordingly, Aflac Japan did not recognize an expense for LIPPC assessments for the ~~nine-month period~~ three-month periods ended ~~September 30, 2023~~. Aflac Japan recognized an expense for LIPPC assessments of ¥.9 billion for the ~~nine-month period ended September 30, 2022~~, March 31, 2024 and ~~2023~~.

Guaranty Fund Assessments

Under U.S. state guaranty association laws, certain insurance companies can be assessed (up to prescribed limits) for certain obligations to the policyholders and claimants of impaired or insolvent insurance companies that write the same line or similar lines of business. The amount of the guaranty fund assessment that an insurer is assessed is based on its proportionate share of premiums in that state. Guaranty fund assessments for the ~~three- and nine-month~~ three-month periods ended ~~September 30, 2023~~ March 31, 2024 and ~~2022~~ 2023 were immaterial.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity refers to the ability to generate sufficient cash resources to meet the payment obligations of the Company. Capital refers to the long-term financial resources available to support the operations of the businesses, fund business growth and provide for an ability to withstand adverse circumstances. Financial leverage (leverage) refers to an investment strategy of using debt to increase the potential ROE. The Company targets and actively manages liquidity, capital and leverage in the context of a number of considerations, including:

- business investment and growth needs
- strategic growth objectives
- financial flexibility and obligations
- capital support for hedging activity
- a constantly evolving business and economic environment
- a balanced approach to capital allocation and shareholder deployment.

The governance framework supporting liquidity, capital, and leverage includes global senior management and board committees that review and approve all significant capital related decisions.

The Company's cash and cash equivalents include unrestricted cash on hand, money market instruments, and other debt instruments with a maturity of 90 days or less when purchased, all of which have minimal market, settlement or other risk exposure. The target minimum amount for the Parent Company's cash and cash equivalents is approximately \$1.8 billion to provide a capital buffer and liquidity support at the holding company. The Company remains committed to prudent liquidity and capital management. At ~~September 30, 2023~~ March 31, 2024, the Company held ~~\$5.5 billion~~ \$5.1 billion in cash and cash equivalents for stress conditions, which includes the Parent Company's target minimum amount of \$1.8 billion.

Aflac Japan and Aflac U.S. generate cash flows from their operations and provide the primary sources of liquidity to the Parent Company through management fees and dividends, with Aflac Japan being the largest contributor. The primary uses of cash by the Parent Company are shareholder dividends, the repurchase of its common stock, interest on its outstanding indebtedness and operating expenses.

The following table presents the amounts provided to the Parent Company for the **nine-month** **three-month** periods ended **September 30, March 31**.

Liquidity Provided by Subsidiaries to Parent Company			
(In millions)	(In millions)	2023	2022

Aflac Japan dividends declared or paid to Parent Company (in yen)			
Aflac Japan dividends declared or paid to Parent Company (in yen)			

The Company intends to maintain higher than historical levels of liquidity and capital at the Parent Company for stress conditions and with the goals of addressing the Company's hedge costs and related potential need for collateral and mitigating against long-term weakening of the Japanese yen. Further, the Company plans to continue to maintain a **portfolio** **population** of unhedged U.S. dollar-denominated investments at Aflac Japan and to consider whether the amount of such investments should be increased or decreased relative to the Company's view of economic equity surplus in Aflac Japan in light of potentially rising hedge costs and other factors. See the **Hedging** **Activity** **Activities** subsection of this MD&A for **more** **additional** **information**.

The Company believes that its balance of cash and cash equivalents and cash generated by operations will be sufficient to satisfy both its short-term and long-term cash requirements and plans for cash, including material cash requirements from known contractual obligations and returning capital to shareholders through share repurchases and dividends. For additional information, see the Liquidity and Capital Resources section of Item 7. MD&A in the **2022** **2023** Annual Report.

In addition to cash and cash equivalents, the Company also maintains credit facilities, both intercompany and with external partners, and a number of other available tools to support liquidity needs on a global basis. In September 2021, the Parent Company filed a shelf registration statement with the SEC that allows the Company to issue an indefinite amount of debt securities, in one or more series, from time to time until September 2024. The Company believes outside sources for additional debt and equity capital, if needed, will continue to be available. **Additionally, as of September 30, 2023, the Parent Company and Aflac had four lines of credit with third parties and eleven intercompany lines of credit.** The

Company was in compliance with all of the covenants of its notes payable and lines of credit at **September 30, 2023** **March 31, 2024**. For additional information, see Note 9 of the Notes to the Consolidated Financial Statements.

As part of enterprise-wide capital management and optimization, the Company also utilizes the **newly-created** intercompany reinsurance platform to execute internal reinsurance transactions with Aflac Re. For additional information, see Note 8 of the Notes to the Consolidated Financial Statements.

The Company's consolidated financial statements convey its financing arrangements during the periods presented. The Company has not engaged in material intra-period short-term financings during the periods presented that are not otherwise reported in its balance sheet or disclosed therein. As of **September 30, 2023** **March 31, 2024**, the Company had no material letters of credit, standby letters of credit, guarantees or standby repurchase obligations. The Company has not entered into transactions involving the transfer of financial assets with an obligation to repurchase financial assets that have been accounted for as a sale under applicable accounting standards, including securities lending transactions. See Notes 3 and 4 of the Notes to the Consolidated Financial Statements and Notes 1, 3, and 4 of the Notes to the Consolidated Financial Statements in the **2022** **2023** Annual Report for more information on the Company's securities lending and derivative activities. See Note 15 of the Notes to the Consolidated Financial Statements in the **2022** **2023** Annual Report for information on material unconditional purchase obligations that are not recorded on the Company's balance sheet. With the exception of disclosed activities in those referenced footnotes and the Risk Factors in the **2022** **2023** Annual Report entitled, "The Company is exposed to foreign currency fluctuations in the yen/dollar exchange rate" and "Lack of availability of acceptable yen-denominated investments could adversely affect the Company's results of operations, financial position or liquidity," the Company is not aware of any trend, demand, commitment, event or uncertainty that would reasonably result in its liquidity increasing or decreasing by a material amount.

Consolidated Cash Flows

The Company consistently generates positive cash flows from operations, and has the ability to adjust cash flow management from other sources of liquidity including reinvestment cash flows and selling investments in order to meet short-term cash needs.

The Company translates cash flows for Aflac Japan's yen-denominated items into U.S. dollars using weighted-average exchange rates. In periods when the yen weakens, translating yen into dollars causes fewer dollars to be reported. When the yen strengthens, translating yen into dollars causes more dollars to be reported.

The following table summarizes consolidated cash flows by activity for the **nine-month** **three-month** periods ended **September 30**, **March 31**.

Operating Activities

The principal cash inflows for the Company's insurance activities come from insurance premiums and investment income. The principal cash outflows are the result of policy claims, operating expenses, income tax, as well as interest expense. As a result of policyholder aging, claims payments are expected to gradually increase over the life of a policy. Therefore, future policy benefit reserves are accumulated in the early years of a policy and are designed to help fund future claims payments.

The Company expects its future cash flows from premiums and investment portfolios to be sufficient to meet its cash needs for benefits and expenses.

Investing Activities

The Company's investment objectives provide for liquidity primarily through the purchase of publicly traded investment-grade debt securities. Prudent portfolio management dictates that the Company attempts to match the duration of its assets with the duration of its liabilities. Currently, when the Company's fixed maturity securities mature, the proceeds may be reinvested at a yield below that required for the accretion of policy benefit liabilities on policies issued in earlier years. However, the long-term nature of the Company's business and its strong cash flows provide the Company with the ability to minimize the effect of mismatched durations and/or yields identified by various asset adequacy analyses. From time to time or when market opportunities arise, the Company disposes of selected fixed maturity securities that are available-for-sale to improve the duration matching of assets and liabilities, improve future investment yields, and/or re-balance its portfolio. As a result, dispositions before maturity can vary significantly from year to year.

As part of its overall corporate strategy, the Company has committed \$400 million to Aflac Ventures, LLC (Aflac Ventures), as opportunities emerge. As of March 31, 2024, of the \$400 million committed, approximately \$282 million has been deployed. Aflac Ventures is a subsidiary of Aflac Global Ventures, LLC (Aflac Global Ventures) which is reported in Corporate and other. The central mission of Aflac Global Ventures is to support the organic growth and business development needs of Aflac Japan and Aflac U.S. with an emphasis on digital applications designed to improve the customer experience, gain efficiencies, and develop new markets in an effort to enhance and defend long-term shareholder value. Investments are included in equity securities or the other investments line in the consolidated balance sheets.

As part of an arrangement with Federal Home Loan Bank of Atlanta (FHLB), Aflac U.S. obtains low-cost funding from FHLB supported by acceptable forms of collateral pledged by Aflac U.S. In the first nine months of 2023, Aflac U.S. borrowed and repaid \$147 million under this program. As of September 30, 2023, Aflac U.S. had outstanding borrowings of \$481 million reported in its balance sheet.

See Note 3 of the Notes to the Consolidated Financial Statements for details on certain investment commitments.

Financing Activities

Cash flows from financing activities consist primarily of share repurchases, dividends to shareholders and, from time to time, debt issuances and redemptions.

In March 2024, the Parent Company issued five series of senior notes totaling ¥75.0 billion through a private placement. The first series, which totaled ¥18.3 billion, bears interest at a fixed rate of 1.600% per annum, payable semi-annually, and will mature in March 2034. The second series, which totaled ¥15.0 billion, bears interest at a fixed rate of 1.740% per annum, payable semi-annually, and will mature in March 2036. The third series, which totaled ¥16.5 billion, bears interest at a fixed rate of 1.920% per annum, payable semi-annually, and will mature in March 2039. The fourth series, which totaled ¥5.7 billion, bears interest at a fixed rate of 2.160% per annum, payable semi-annually, and will mature in March 2044. The fifth series, which totaled ¥19.5 billion, bears interest at a fixed rate of 2.400% per annum, payable semi-annually, and will mature in March 2054. These notes are redeemable at the Parent Company's option (i) in whole at any time or (ii) in part from time to time in an amount not less than 5% of the aggregate principal amount then outstanding of the notes to be redeemed.

In March 2024, the Parent Company issued three series of senior notes totaling ¥48.6 billion through a public debt offering under its U.S. shelf registration statement. The first series, which totaled ¥13.0 billion, bears interest at a fixed rate of 1.048% per annum, payable semi-annually, and will mature in March 2029. The second series, which totaled ¥27.9 billion, bears interest at a fixed rate of 1.412% per annum, payable semi-annually, and will mature in March 2031. The third series, which totaled ¥7.7 billion, bears interest at a fixed rate of 1.682% per annum, payable semi-annually, and will mature in March 2034. These notes are redeemable at the Parent Company's option at any time, in whole but not in part, upon the occurrence of certain changes affecting U.S. taxation, as specified in the indenture governing the terms of the issuance. In addition, the notes maturing in March 2029, March 2031 and March 2034 are redeemable at the Parent Company's option, in whole or in part from time to time, on or after December 21, 2028, December 31, 2030 and September 21, 2033, respectively, at a redemption price equal to the aggregate principal amount of the applicable series to be redeemed plus accrued and unpaid interest on the principal amount to be redeemed to, but excluding, the date of redemption.

Cash returned to shareholders through treasury stock purchases and dividends was \$2.8 billion during the nine-month period ended September 30, 2023, compared with \$2.5 billion during the nine-month period ended September 30, 2022.

The following tables present a summary of treasury stock activity during the nine-month periods ended September 30, March 31.

In **October 2023**, **April 2024**, the board of directors declared the **fourth second** quarter cash dividend of **\$.42 \$.50** per share, an increase of **5.0% 19.0%** compared with the same period in **2022** **2023**. The dividend is payable on **December 1, 2023** **June 3, 2024** to shareholders of record at the close of business on **November 15, 2023** **May 22, 2024**. In **November 2023**, the board of directors also announced a 19.0% increase in the quarterly cash dividend, effective with the first quarter of 2024. The first quarter 2024 cash dividend of **\$.50** per share is payable on **March 1, 2024** to shareholders of record at the close of business on **February 21, 2024**.

Regulatory Restrictions

Aflac Japan

Aflac Japan is required to meet certain financial criteria as governed by Japanese corporate law in order to provide dividends to the Parent Company. Under these criteria, dividend capacity at the Japan subsidiary is basically defined as total equity excluding common stock and capital reserves (representing statutorily required amounts in Japan) but reduced for net after-tax unrealized losses on available-for-sale securities. These dividend capacity requirements are generally aligned with the SMR. Japan's Financial Services Agency (FSA) maintains its own solvency standard which is quantified through the SMR. Aflac Japan's SMR is sensitive to interest rate, credit spread, and foreign exchange rate changes; therefore, the Company continues to evaluate alternatives for reducing this sensitivity, including the reduction of subsidiary dividends paid to the Parent Company and Parent

Company capital contributions. In the event of a rapid change in market risk conditions causing SMR to decline, the Company has one senior unsecured revolving credit facility in the amount of ¥100 billion and a committed reinsurance facility in the amount of approximately ¥120 billion as a capital contingency plan. Additionally, subject to market conditions, the Company expects that it could take action to enter into derivatives on unhedged U.S. dollar-denominated investments with foreign currency options or forwards or execute additional internal reinsurance transactions with Aflac Re. See Notes 8 and 9 of the Notes to the Consolidated Financial Statements for additional information.

The Company has already undertaken various measures to mitigate the sensitivity of Aflac Japan's SMR. For example, the Company employs policy reserve matching (PRM) investment strategies, which is a Japan-specific accounting treatment that reduces SMR interest rate sensitivity since PRM-designated investments are carried at amortized cost consistent with corresponding liabilities. In order for a PRM-designated asset to be held at amortized cost, there are certain criteria that must be maintained. The primary criterion relates to maintaining the duration of designated assets and liabilities within a specified tolerance range. If the duration difference is not maintained within the specified range without rebalancing, then a certain portion of the assets must be reclassified as available-for-sale and held at fair value with any associated unrealized gain or loss recorded in surplus. To rebalance, assets may need to be sold in order to maintain the duration with the specified range, resulting in realizing a gain or loss from the sale. For U.S. GAAP, PRM investments are categorized as available-for-sale. The Company also uses foreign currency derivatives to hedge a portion of its U.S. dollar-denominated investments. See Notes 3, 4 and 8 of the Notes to the Consolidated Financial Statements in the 2022 2023 Annual Report for additional information on the Company's investment strategies, hedging activities, and reinsurance, respectively.

As of September 30, 2023 March 31, 2024, Aflac Japan's SMR remains high and reflects a strong capital and surplus position. The Company is committed to maintaining strong capital levels, consistent with maintaining current insurance financial strength and credit ratings.

The FSA is considering the introduction of an economic value-based solvency regime based on the Insurance Capital Standards (ICS) for insurance companies in Japan. The FSA continues to conduct field testing with insurance companies in Japan for the purpose of investigating the impact of the introduction of such regulations. Final specifications are expected to be decided in 2024, and a new capital regime to replace the current solvency regime is expected to be introduced in 2025, Aflac Japan's 2025 fiscal year.

Aflac U.S.

A life insurance company's statutory capital and surplus is determined according to rules prescribed by the National Association of Insurance Commissioners (NAIC), as modified by the insurance department in the insurance company's state of domicile. Statutory accounting rules are different from U.S. GAAP and are intended to emphasize policyholder protection and company solvency. The continued long-term growth of the Company's business may require increases in the statutory capital and surplus of its insurance operations. The Company's insurance operations may secure additional statutory capital through various sources, such as internally generated statutory earnings, reduced dividends paid to the Parent Company, capital contributions by the Parent Company from funds generated through debt or equity offerings, or reinsurance transactions. The NAIC's Risk-based capital (RBC) formula is used by insurance regulators to help identify inadequately capitalized insurance companies. The RBC formula quantifies insurance risk, business risk, asset risk and interest rate risk by weighing the types and mixtures of risks inherent in the insurer's operations. As of September 30, 2023 March 31, 2024, Aflac U.S.'s combined RBC ratio remains high and reflects a strong capital and surplus position.

Aflac, CAIC and TOIC are domiciled in Nebraska and are subject to its regulations. The maximum amount of dividends that can be paid to the Parent Company by Aflac, CAIC and TOIC without prior approval of Nebraska's director of insurance is the greater of the net income from operations, which excludes net investment gains, for the previous year determined under statutory accounting principles, or 10% of statutory capital and surplus as of the previous year-end. Dividends declared by Aflac during 2023 2024 in excess of \$1.1 billion would be considered extraordinary and require such approval. Similar laws apply in New York, the domiciliary jurisdiction of Aflac New York.

State insurance departments conduct periodic examinations of the books and records, financial reporting, policy filings and market conduct of insurance companies domiciled in their states, generally once every three to five years. Examinations are generally carried out in cooperation with the insurance departments of other states under guidelines promulgated by the NAIC. In 2024, the Nebraska Department of Insurance and the New York State Department of Financial Services will commence full-scope, risk-focused financial examinations on their respective state domiciled insurance entities. The examinations will cover the reporting period January 1, 2020 – December 31, 2023. Other

Privacy Aflac Re is licensed by the BMA as a long-term insurer and Cybersecurity Governance is subject to the Bermuda Insurance Act of 1978 (Bermuda Insurance Act). Aflac Re is required to file an annual return for its Bermuda Solvency Capital Requirement (BSCR) which utilizes an Economic Balance Sheet (EBS) framework to determine Aflac Re's Enhanced Capital Requirement (ECR). Aflac Re is also subject to a Minimum Margin of Solvency (MMS) related to its statutory financial statements. The MMS is equal to the greater of \$500,000, 1.5% of the total statutory assets, or 25% of ECR.

The Company's Board of Directors has adopted Under the Bermuda Insurance Act, Aflac Re is prohibited from paying dividends in an information security policy directing management to establish and operate a global information security program with the goals of monitoring existing and emerging threats and ensuring that the Company's information assets and data, and the data of its customers, are appropriately protected from loss or theft. The Board has delegated oversight of the Company's information security program to the Audit and Risk Committee. The Company's senior officers, including the Global Chief Information Security Officer, are responsible for the operation of the global information security program and communicate quarterly with the Audit and Risk Committee on the program, including with respect to solvency margin. Further, Aflac Re may not reduce its total statutory capital by 15% or more without prior regulatory approval. Additionally, Aflac Re is not permitted to the state of the program, compliance with applicable regulations, current and evolving threats, and recommendations for changes in the information security program. The global information security program also includes a cybersecurity incident response plan to pay any dividends that is designed to cause Aflac Re to provide a management framework across Company functions for a coordinated assessment and response to potential security incidents. This framework establishes a protocol to report certain incidents to the Global Chief Information Security Officer and other senior officers, with the goal of timely assessing such incidents, determining applicable disclosure requirements and communicating with the Audit and Risk Committee. The incident response plan directs the executive officers to report certain incidents immediately and directly to the Lead Non-Management Director, meet its minimum capital requirements.

For information regarding commitments and contingent liabilities, see Note 13 of the Notes to the Consolidated Financial Statements.

Additional Information

Investors should note that the Company announces material financial information in its SEC filings, press releases and public conference calls. In accordance with SEC guidance, the Company may also use the Investor Relations section of the Company's website (<http://investors.aflac.com>) to communicate with investors about the Company. It is possible that the financial and other information the Company posts there could be deemed to be material information. The information on the Company's website is not part of this document. Further, the Company's references to website URLs are intended to be inactive textual references only.

CRITICAL ACCOUNTING ESTIMATES

The Company prepares its financial statements in accordance with U.S. GAAP. These principles are established primarily by the Financial Accounting Standards Board (FASB). In this MD&A, references to U.S. GAAP issued by the FASB are derived from the FASB Accounting Standards Codification™ (ASC). The preparation of financial statements in conformity with U.S. GAAP requires the Company to make estimates based on currently available information when recording transactions resulting from business operations. The estimates that the Company deems to be most critical to an understanding of its results of operations and financial condition are those related to the valuation of investments and derivatives, DAC, liabilities for future policy benefits, and income taxes. The preparation and evaluation of these critical accounting estimates involve the use of various assumptions developed from management's analyses and judgments. Calculations of DAC and the liability for future policy benefits require the use of estimates based on actuarial valuation techniques. The application of these critical accounting estimates determines the values at which 92% 93% of the Company's assets and 78% of its liabilities are reported as of **September 30, 2023** **March 31, 2024**, and thus has a direct effect on net earnings and shareholders' equity. Subsequent experience or use of other assumptions could produce significantly different results.

On January 1, 2023, the Company adopted Accounting Standards Update (ASU) 2018-12, Financial Services - Insurance: Targeted Improvements to the Accounting for Long-Duration Contracts (LDI). The update significantly changes how insurers account for long-duration contracts and amends existing recognition, measurement, presentation, and disclosure requirements applicable to the Company related to liabilities for future policy benefits and DAC. As part of this adoption, the Company measures together all payments under an insurance contract including future expected claims and unpaid policy claims and related expenses, as an integrated reserve. This resulted in unpaid policy claims on long-duration insurance contracts and accrued claim adjustment expenses that were presented separately in the Company's consolidated balance sheets pre-adoption to now be presented as part of liabilities for future policy benefits.

For additional information, see Note 1 of the Notes to the Consolidated Financial Statements in this document and in the 2022 Annual Report.

Deferred Policy Acquisition Costs

Amortization of DAC is computed using the same contract groupings (also referred to as cohorts) and mortality and termination assumptions that are used in computing the liability for future policy benefits, and these assumptions are reviewed and updated at least annually. The effects of changes in assumptions are recognized prospectively over the remaining contract term as a revision of future amortization pattern, while current period amortization is calculated based on the actual experience during the quarter. For additional information, see Note 6 of the Notes to the Consolidated Financial Statements.

Future Policy Benefits

The Company's liabilities for future policy benefits are determined in accordance with applicable guidelines as defined under U.S. GAAP and Actuarial Standards of Practice and represent claims that are expected to occur in the future and already incurred claims (which represent claims that have been incurred and are in the process of payment as well as an estimate of those claims that have been incurred but have not yet been reported to the Company) and are measured using the net level premium method. Future policy benefits are calculated using assumptions and estimates including mortality, morbidity, termination (also referred to as lapses), expense, and discount rates. The assumptions and estimates that the Company uses depend on its judgment regarding the likelihood of future events and are inherently uncertain.

Cash flow assumptions (mortality, morbidity, and termination) are established at policy inception and are evaluated each quarter to determine if an update is needed. To facilitate a more detailed review of cash flow assumptions, experience studies are performed annually during the third quarter. Changes in cash flow assumptions are recognized in reserve remeasurement (gains) losses in the consolidated statements of earnings. Expense assumptions are established at policy inception and are not updated. Actual experience is reflected in the calculation of future policy benefits each quarter, and changes in the liability due to actual experience are recognized in reserve remeasurement (gains) losses in the consolidated statements of earnings.

Discount rates used to calculate net premiums are locked in at policy inception and represent the basis to recognize interest expense in the consolidated statements of earnings. Discount rates used to measure the carrying value of liability for future policy benefits in the consolidated balance sheets are updated each reporting period, and the differences between the liability balances calculated using the locked-in discount rates and the updated discount rates are recognized in accumulated other comprehensive income (loss) (AOCI). The discount rate methodology is designed to prioritize observable inputs based on market data available in the local debt markets where the respective policies were issued in the currency in which the policies are denominated. For the discount rates applicable to tenors for which the single-A debt market is not liquid or there is little or no observable market data, the Company uses various estimation techniques consistent with the fair value guidance in ASC 820, which include, but are not limited to: (i) for tenors where there is less observable market data and/or the observable market data is available for similar instruments, estimating tenor-specific single-A credit spreads and applying them to risk-free government rates; (ii) for tenors where there is very limited or no observable single-A or similar market data, interpolation and extrapolation techniques.

Upon adoption, if interest rates decreased by 100 basis points the Company's FPB balance as of December 31, 2022 would increase by \$13.3 billion, and if interest rates increased by 100 basis points the Company's FPB balance as of December 31, 2022 would decrease by \$10.4 billion.

See Note 7 of the Notes to the Consolidated Financial Statements for details of future policy benefits activity.

There have been no other changes in the items the Company has identified as critical accounting estimates during the **nine-month** **three-month** period ended **September 30, 2023** **March 31, 2024**. For additional information, see the Critical Accounting Estimates section of Item 7. MD&A included in the **2022** **2023** Annual Report.

New Accounting Pronouncements

On January 1, 2023, the Company adopted LDTI employing a modified retrospective transition method, which requires the amended guidance be applied as of the beginning of the earliest period presented beginning on the January 1, 2021 transition date (Transition Date). The Transition Date impact from adoption resulted in a decrease in AOCI of approximately \$18.6 billion and a decrease in retained earnings of approximately \$0.3 billion.

For information on new accounting pronouncements and the impact, if any, on the Company's financial position or results of operations, see Note 1 of the Notes to the Consolidated Financial Statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company is exposed primarily to the following types of market risks: currency risk, interest rate risk, credit risk and equity risk. The Company regularly monitors its market risks and uses a variety of strategies to manage its exposure to these market risks. A description of the Company's market risk exposures may be found under "Quantitative and Qualitative Disclosures About Market Risk" in Part II, Item 7A, of the **2022** **2023** Annual Report. There have been no material changes to the Company's market risk exposures from the market risk exposures previously disclosed in the **2022** **2023** Annual Report.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this quarterly report (the Evaluation Date). Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the Evaluation Date, the Company's disclosure controls and procedures are effective.

Changes in Internal Control Over Financial Reporting

There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rule 13a-15(f) under the Exchange Act) during the **third** **first** fiscal quarter of **2023** **2024** that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1A. Risk Factors

Readers should carefully consider the risk factors that may affect the Company's business or operations described under "Risk Factors" in Part I, Item 1A. of the Company's Annual Report on Form 10-K for the year ended December 31, 2022 and Part II, Item 1A. of the Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2023.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds and Issuer Purchases of Equity Securities

Issuer Purchases of Equity Securities

During the first **nine** **three** months of **2023**, **2024**, the Parent Company repurchased shares of its common stock as follows:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
			72.15	2,440,300
January 1 - January 31	2,440,300	\$ 72.15	2,440,300	114,201,523
February 1 - February 28	3,542,907	69.48	3,200,100	111,001,423
March 1 - March 31	4,711,768	64.20	4,707,900	106,293,523
April 1 - April 30	2,608,037	66.00	2,607,869	103,685,654
May 1 - May 31	4,322,919	66.50	4,321,165	99,364,489
June 1 - June 30	3,537,309	68.15	3,531,796	95,832,693
July 1 - July 31	2,478,733	71.10	2,478,733	93,353,960
August 1 - August 31	3,700,973	75.48	3,700,973	89,652,987
September 1 - September 30	3,215,602	76.19	3,209,947	86,443,040
Total	30,558,548 ⁽¹⁾	\$ 69.92	30,198,783	86,443,040 ⁽²⁾

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Announced Plans or Programs	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
				Period	Total Number of Shares Purchased
January 1 - January 31	0	\$ 0.00	0	77,745,381	
February 1 - February 29	5,308,570	78.58	4,859,803	72,885,578	
March 1 - March 31	4,424,657	83.34	4,416,656	68,468,922	
Total	9,733,227 ⁽¹⁾	\$ 80.75	9,276,459	68,468,922 ⁽²⁾	

(a) During the first **nine** **three** months of **2023**, **359,765** **2024**, **456,768** shares were purchased in connection with income tax withholding obligations related to the vesting of restricted-share-based awards during the period.

(b) The total remaining shares available for purchase at **September 30, 2023** **March 31, 2024**, are related to a 100,000,000 share repurchase authorization by the board of directors announced in November 2022.

Item 5. Other Information

Insider Trading Arrangements

During the first quarter of 2024, no directors or executive officers adopted or terminated a contract, instruction or written plan for the purchase or sale of the Company's securities intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) or a non-Rule 10b5-1 trading arrangement as defined in Regulation S-K Item 408(c).

Item 6. Exhibits

(a) EXHIBIT INDEX

- 3.0 - Articles of Incorporation, as amended – incorporated by reference from Form 10-Q for June 30, 2008, Exhibit 3.0.
- 3.1 - Bylaws of **the Corporation, Aflac Incorporated**, as amended and restated – incorporated by reference from Form 8-K dated **February 11, 2022** **November 17, 2023**, Exhibit 3.1.
- 4.1 - Thirty-Eighth Supplemental Indenture, dated as of March 21, 2024, between Aflac Incorporated and The Bank of New York Mellon Trust Company, N.A., as trustee (including the form of 1.048% Senior Note due 2029) – incorporated by reference from Form 8-K dated March 21, 2024, Exhibit 4.1.
- 4.2 - Thirty-Ninth Supplemental Indenture, dated as of March 21, 2024, between Aflac Incorporated and The Bank of New York Mellon Trust Company, N.A., as trustee (including the form of 1.412% Senior Note due 2031) – incorporated by reference from Form 8-K dated March 21, 2024, Exhibit 4.2.
- 4.3 - Fortieth Supplemental Indenture, dated as of March 21, 2024, between Aflac Incorporated and The Bank of New York Mellon Trust Company, N.A., as trustee (including the form of 1.682% Senior Note due 2034) – incorporated by reference from Form 8-K dated March 21, 2024, Exhibit 4.3.
- 31.1 - Certification of CEO dated **November 2, 2023** **May 2, 2024**, required by Rule 13a-14(a) or Rule 15d-14(a) of the Securities Exchange Act of 1934.
- 31.2 - Certification of CFO dated **November 2, 2023** **May 2, 2024**, required by Rule 13a-14(a) or Rule 15d-14(a) of the Securities Exchange Act of 1934.
- 32 - Certification of CEO and CFO dated **November 2, 2023** **May 2, 2024**, pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

Glossary of Selected Terms

Throughout this Quarterly Report on Form 10-Q, the Company may use certain performance metrics and other terms which are defined below.

Adjusted Net Investment Income - Net Investment Income adjusted for i) amortized hedge cost/income related to foreign currency exposure management strategies and certain derivative activity and ii) net interest **cash flows** income/expense from foreign currency and interest rate derivatives associated with certain investment strategies, which are reclassified from net investment gains and **(losses)** losses to net investment income. The Company considers adjusted net investment income important because it provides a more comprehensive understanding of the costs and income associated with the Company's investments and related hedging strategies. The metric is used in segment reporting as a component of segment profitability.

Affiliated Corporate Agency - Agency in Japan directly affiliated with a specific corporation that sells insurance policies primarily to its employees.

Annualized Premiums in Force - **The** amount of gross premium that a policyholder must pay over a full year in order to keep coverage. The growth of net earned premiums (defined below) is directly affected by the change in premiums in force and by the change in weighted-average yen/dollar exchange rates.

Average Weekly Producer - The total number of writing agents who have produced greater than \$0.00 during the production week - excluding any manual adjustments **divided** by the number of weeks in the time period. The Company believes this metric allows sales management to monitor progress and needs, as well as serve as a leading indicator of future production capacity.

Capital Buffer - Established dollar amount of liquidity at the Parent Company reserved for injecting capital into the insurance entities or general liquidity support for general expenses at the Parent Company.

Earnings Per Basic Share - Net earnings divided by weighted-average number of shares outstanding for the period.

Earnings Per Diluted Share - Net earnings divided by the weighted-average number of shares outstanding for the period plus the weighted-average shares for the dilutive effect of share-based awards outstanding.

Group Insurance - Insurance issued to a group, such as an employer or trade association, that covers employees or association members and their dependents through certificates of coverage.

Individual Insurance - Insurance issued to an individual with the policy designed to cover that person and his or her dependents.

In force Policies - A count of policies that are active contracts at the end of a period.

Liquidity Support - Internally defined and established dollar amount of liquidity reserved for supporting potential collateral and settlements of derivatives at the Parent Company.

Net Investment Income - The income derived from interest and dividends on invested assets, after deducting investment expenses.

Net Earned Premiums - is a financial measure that appears on the Company's consolidated statements of earnings and in its segment reporting. This measure reflects collected or due premiums that have been earned ratably on policies in force during the reporting period, reduced by premiums that have been ceded to third parties and increased by premiums assumed through reinsurance.

New Annualized Premium Sales - (sometimes referred to as new sales or sales) An operating measure that is not reflected on the Company's financial statements. New annualized premium sales generally represent annual premiums on policies and riders the Company sold and incremental increases from policy conversions that would be collected over a 12-month period assuming the policies remain in force for that entire period. For Aflac Japan, new annualized premium sales are determined by applications submitted during the reporting period. For Aflac U.S., new annualized premium sales are determined by **applications**. **applications** that are issued during the reporting period. Policy conversions are defined as the positive difference in the annualized premium when a policy upgrades in the current reporting period. **The Company believes that this metric is a key indicator of the Company's future source of earnings.**

New Money Yield - Gross yields earned on purchases of fixed maturities, loan receivables, and equities. Purchases exclude capitalized interest, securities lending/repurchase agreements, short-term/cash activity, and alternatives. New money yield for equities is based on the assumed dividend yield at the time of purchase. The new money yield for Aflac Japan excludes the impact of any derivatives and associated amortized hedge costs associated with USD-denominated investments. Management uses this metric as a leading indicator of future investment earning potential.

Operating Ratios - Used to evaluate the Company's financial condition and profitability. Examples include: (1) Ratios to total adjusted revenues, which present expenses as a percentage of total revenues and (2) Ratios to total premium, including benefit ratio.

Premium Persistency – Percentage of premiums remaining in force at the end of a period, usually one year, and presented on a trailing 12-month basis. For example, 95% persistency would mean that 95% of the premiums in force at the beginning of the period were still in force at the end of the period. The Company believes that this metric is a key driver of in force levels, which is a key measure of the size of the Company's business and future sources of earnings.

Pretax Adjusted Earnings – Earnings as adjusted earnings before the application of income taxes. This measure is used in the Company's segment reporting.

Pretax Adjusted Profit Margin – Adjusted earnings divided by adjusted revenues, before taxes are applied. This measure is used in the Company's segment reporting.

Return on Average Invested Assets – Net investment income as a percentage of average invested assets during the period. Management uses this metric to demonstrate how **our** the Company's actual net investment income results represent an overall return on the portfolio to provide a more comparative metric as the size of **our** the Company's investment portfolio changes over time.

Risk-based Capital (RBC) Ratio – Statutory adjusted capital divided by statutory required capital. This insurance ratio is based on rules prescribed by the National Association of Insurance Commissioners (NAIC) and provides an indication of the amount of statutory capital the insurance company maintains, relative to the inherent risks in the insurer's operations.

Solvency Margin Ratio (SMR) – Solvency margin total divided by one half of the risk total. This insurance ratio is prescribed by the Japan Financial Services Agency (FSA) and is used for all life insurance companies in Japan to measure the adequacy of the company's ability to pay policyholder claims in the event actual risks exceed expected levels.

Statutory Earnings – Earnings determined according to accounting rules prescribed by the National Association of Insurance Commissioners (NAIC), as modified by the insurance department in the insurance company's state of domicile. These statutory accounting rules are different from U.S. GAAP and are intended to emphasize policyholder protection and company solvency.

Weighted-Average Foreign Currency Exchange Rate – Japan segment operating earnings for the period (excluding hedge costs) in yen divided by Japan segment operating earnings for the period (excluding hedge costs) in dollars. Management uses this metric to evaluate and determine consolidated results on foreign currency effective basis.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

EXHIBIT 31.1

Certification of Chief Executive Officer

I, Daniel P. Amos, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Aflac Incorporated;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
