FAIR VALUE OF FINANCIAL INSTRUMENTS Fair value, as defined under ASC 820, is the price that we would receive upon selling an investment or pay to transfer a liability in an orderly transaction to a market participant in the principal or most advantageous market for the investment or liability. ASC 820 emphasizes that valuation techniques maximize the use of observable market inputs and minimize the use of unobservable inputs. Inputs refer broadly to the assumptions that market participants would use in pricing an asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of us. Unobservable inputs reflect the assumptions market participants would use in pricing an asset or liability based on the best information available to us on the reporting period date. ASC 820 classifies the inputs used to measure these fair values into the following hierarchies: <table style="margin-left:auto;border-spacing:0;table-layout:auto;width:95.0%;border-collapse:separate;margin-right:auto;"><tr style="visibility:collapse;"><td style="width:11.579%;box-sizing:content-box;"></td><td style="width:88.421%;box-sizing:content-box;"></td></tr><tr style="height:8pt;white-space:pre-wrap;word-break:break-word;text-align:right;"><td style="padding-top:0.01in;vertical-align:top;padding-bottom:0in;padding-right:0.01in;"> Level 1: </td><td style="padding-top:0.01in;vertical-align:middle;padding-bottom:0in;padding-right:0.01in;"> Inputs that are quoted prices (unadjusted) in active markets for identical assets or liabilities, accessible by us at the measurement date. </td></tr><tr style="height:8pt;white-space:pre-wrap;word-break:break-word;text-align:right;"><td style="padding-top:0.01in;vertical-align:top;padding-bottom:0in;padding-right:0.01in;"> Level 2: </td><td style="padding-top:0.01in;vertical-align:top;padding-bottom:0in;padding-right:0.01in;"> Inputs that are quoted prices for similar assets or liabilities in active markets, or that are quoted prices for identical or similar assets or liabilities in markets that are not active and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term, if applicable, of the financial instrument. </td></tr><tr style="height:8pt;white-space:pre-wrap;word-break:break-word;text-align:right;"><td style="padding-top:0.01in;vertical-align:top;padding-bottom:0in;padding-right:0.01in;"> Level 3: </td><td style="padding-top:0.01in;vertical-align:top;padding-bottom:0in;padding-right:0.01in;"> Inputs that are unobservable for an asset or liability because they are based on our own assumptions about how market participants would price the asset or liability. </td></tr></table> A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Generally, most of our investments, our 2031 Asset-Backed Debt, 2036 Asset-Backed Debt, 2036-R Asset-Backed Debt, and our Credit Facility are classified as Level 3. Our 2026 Notes are classified as Level 2 as they are financial instruments with readily observable market inputs. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the price used in an actual transaction may be different than our valuation and those differences may be material. The inputs into the determination of fair value may require significant management judgment or estimation. Even if observable market data is available, such information may be the result of consensus pricing information, disorderly transactions or broker quotes which include a disclaimer that the broker would not be held to such a price in an actual transaction. The non-binding nature of consensus pricing and/or quotes accompanied by disclaimer would result in classification as Level 3 information, assuming no additional corroborating evidence were available. Corroborating evidence that would result in classifying these non-binding broker/dealer bids as a Level 2 asset includes observable orderly market-based transactions for the same or similar assets or other relevant observable market-based inputs that may be used in pricing an asset. Our investments are generally structured as floating rate loans, mainly first lien secured debt, but also may include second lien secured debt, subordinated debt and equity investments. The transaction price, excluding transaction costs, is typically the best estimate of fair value at inception. Ongoing reviews by our Investment Adviser and independent valuation firms are based on an assessment of each underlying investment, incorporating valuations that consider the evaluation of financing and sale transactions with third parties, expected cash flows and market-based information including comparable transactions, performance multiples and yields, among other factors. These non-public investments valued using unobservable inputs are included in Level 3 of the fair value hierarchy. A review of fair value hierarchy classifications is conducted on a quarterly basis. Changes in our ability to observe valuation inputs may result in a reclassification for certain financial assets or liabilities. In addition to using the above inputs to value cash equivalents, investments, our 2023 Notes, our 2026 Notes, our 2031 Asset-Backed Debt, our 2036 Asset-Backed Debt, 2036-R Asset-Backed Debt and our Credit Facility, we employ the valuation policy approved by our board of directors that is consistent with ASC 820. Consistent with our valuation policy, we evaluate the source of inputs, including any markets in which our investments are trading, in determining fair value. See Note 2. As outlined in the table below, some of our Level 3 investments using a market approach valuation technique are valued using the average of the bids from brokers or dealers. The

bids include a disclaimer, may not have corroborating evidence, may be the result of a disorderly transaction and may be the result of consensus pricing. The Investment Adviser assesses the source and reliability of bids from brokers or dealers. If the board of directors has a bona fide reason to believe any such bids do not reflect the fair value of an investment, it may independently value such investment by using the valuation procedure that it uses with respect to assets for which market quotations are not readily available. In accordance with ASC 820, we do not categorize any investments for which fair value is measured using the net asset value per share as a practical expedient within the fair value hierarchy. The remainder of our investment portfolio and our long-term Credit Facility are valued using a market comparable or an enterprise market value technique. With respect to investments for which there is no readily available market value, the factors that the board of directors may take into account in pricing our investments at fair value include, as relevant, the nature and realizable value of any collateral, the portfolio company's ability to make payments, its earnings and discounted cash flow, the markets in which the portfolio company does business, comparison to publicly traded securities, discounted for lack of marketability and other relevant factors. When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, the pricing indicated by the external event, excluding transaction costs, is used to corroborate the valuation. When using earnings multiples to value a portfolio company, the multiple used requires the use of judgment and estimates in determining how a market participant would price such an asset. These non-public investments using unobservable inputs are included in Level 3 of the fair value hierarchy. Generally, the sensitivity of unobservable inputs or combination of inputs such as industry comparable companies, market outlook, consistency, discount rates and reliability of earnings and prospects for growth, or lack thereof, affects the multiple used in pricing an investment. As a result, any change in any one of those factors may have a significant impact on the valuation of an investment. Generally, an increase in a market yield will result in a decrease in the valuation of a debt investment, while a decrease in a market yield will have the opposite effect. Generally, an increase in an earnings before interest, taxes, depreciation and amortization, or EBITDA, multiple will result in an increase in the valuation of an investment, while a decrease in an EBITDA multiple will have the opposite effect. We have adopted the principles under ASC Subtopic 825-10, Financial Instruments, or ASC 825-10, which provides companies with an option to report selected financial assets and liabilities at fair value, and made an irrevocable election to apply ASC 825-10 to the Credit Facility. We elected to use the fair value option for the Credit Facility to align the measurement attributes of both our assets and liabilities while mitigating volatility in earnings from using different measurement attributes. Due to that election and in accordance with GAAP, we did not incur any expenses relating to amendment costs on the Credit Facility for the three months ended December 31, 2024 and did not incur any expenses relating to amendment costs on the Credit Facility during the three months ended December 31, 2023. ASC 825-10 establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities and to more easily understand the effect on earnings of a company's choice to use fair value. ASC 825-10 also requires entities to display the fair value of the selected assets and liabilities on the face of the Consolidated Statements of Assets and Liabilities and changes in fair value of the Credit Facility are reported in our Consolidated Statements of Operations. We elected not to apply ASC 825-10 to any other financial assets or liabilities, including our 2026 Notes, 2031 Asset-Backed Debt, 2036 Asset-Backed Debt, and the 2036-R Asset-Backed Debt.   For the three months ended December 31, 2024, the Credit Facility had a net change in unrealized appreciation (depreciation) of $0.1 million. For the three months ended December 31, 2023, the Credit Facility had a net change in unrealized appreciation (depreciation) of less than $(0.1) million. As of December 31, 2024 and September 30, 2024, the net unrealized appreciation (depreciation) on the Credit Facility totaled approximately $0.1 million and zero, respectively. We use a nationally recognized independent valuation service to measure the fair value of the Credit Facility in a manner consistent with the valuation process that our board of directors uses to value our investments.</p><p style="text-indent:4%;font-size:10pt;margin-top:0;font-family:Times New Roman;margin-bottom:0;text-align:justify;"><span style="color:#000000;white-space:pre-wrap;font-size:8pt;font-family:Times New Roman;font-kerning:none;min-width:fit-content;">Our Level 3 valuation techniques, unobservable inputs and ranges were categorized as follows for ASC 820 purposes ($ in thousands):   <table style="margin-left:auto;border-spacing:0;table-layout:auto;width:100.0%;border-collapse:separate;margin-right:auto;"> <tr style="visibility:collapse;"> <td style="width:29.566%;box-sizing:content-box;"></td> <td style="width:1.3%;box-sizing:content-box;"></td> <td style="width:1%;box-sizing:content-box;"></td> <td style="width:14.083%;box-sizing:content-box;"></td> <td style="width:1%;box-sizing:content-box;"></td> <td style="width:1.46%;box-sizing:content-box;"></td> <td style="width:15.943%;box-sizing:content-box;"></td> <td style="width:1.46%;box-sizing:content-box;"></td> <td style="width:16.783%;box-sizing:content-box;"></td> <td style="width:1.46%;box-sizing:content-box;"></td> <td style="width:15.943%;box-sizing:content-box;"></td> </tr> <tr style="height:8pt;background-color:#ffffff;white-space:pre-wrap;word-break:break-word;"> <td style="padding-top:0.01in;vertical-align:bottom;padding-bottom:0in;border-bottom:0.5pt solid #000000;padding-right:0.01in;"> Asset Category </td> <td style="padding-top:0.01in;vertical-align:bottom;padding-bottom:0in;border-bottom:0.5pt solid #ffffff03;padding-right:0.01in;"> </td> <td colspan="2" style="padding-top:0.01in;vertical-align:bottom;padding-bottom:0in;border-bottom:0.5pt solid #000000;padding-right:0.01in;text-align:left;"> Fair value at December 31, 2024 </td> <td style="padding-top:0.01in;vertical-align:bottom;padding-

Our portfolio may consist of temporary investments in U.S. Treasury Bills (of varying maturities), repurchase agreements, money market funds or repurchase agreement-like treasury securities. These temporary investments with original maturities of 90 days or less are deemed cash equivalents and are included in the Consolidated Schedule of Investments. At the end of each fiscal quarter, we may take proactive steps to preserve investment flexibility for the next quarter by investing in cash equivalents, which is dependent upon the composition of our total assets at quarter-end. We may accomplish this in several ways, including purchasing U.S. Treasury Bills and closing out positions on a net cash basis after quarter-end, temporarily drawing down on the Credit Facility, or utilizing repurchase agreements or other balance sheet transactions as are deemed appropriate for this purpose. These amounts are excluded from average adjusted gross assets for purposes of computing the Investment Adviser's management fee. U.S. Treasury Bills with maturities greater than 60 days from the time of purchase are valued consistent with our valuation policy. As of December 31, 2024 and September 30, 2024, cash and cash equivalents consisted of money market funds and non-money market fund in the amounts of $26.7 million and $22.2 million and $75.6 million and $89.8 million at fair value, respectively.</p>267000002220000075600000089800000<p style="font-size:10pt;margin-top:0;font-family:Times New Roman;margin-bottom:0;text-align:left;">9. DEBT The annualized weighted average cost of debt for the three months ended December 31, 2024 and 2023, inclusive of the fee on the undrawn commitment on the Credit Facility, amendment costs and debt issuance costs, was 7.0% and 6.8%, respectively. On April 5, 2018, our board of directors approved the application of the modified asset coverage requirements set forth in Section 61(a)(2) of the 1940 Act, as amended by the Consolidated Appropriations Act of 2018 (which includes the Small Business Credit Availability Act, or SBCAA). As a result, the asset coverage requirement applicable to us for senior securities was reduced from 200% (i.e., $1 of debt outstanding for each $1 of equity) to 150% (i.e., $2 of debt outstanding for each $1 of equity), effective as of April 5, 2019, subject to compliance with certain disclosure requirements. As of December 31, 2024 and September 30, 2024, our asset coverage ratio, as computed in accordance with the 1940 Act, was 171% and 174%, respectively. Credit Facility Funding I's multi-currency Credit Facility with affiliates of Truist Bank, or the Lenders, was upsized during the quarter ended December 31, 2024 to $736.0 million (increased from $636 million in December 2024) as of December 31, 2024, subject to satisfaction of certain conditions and the regulatory restrictions that the 1940 Act imposes on us as a BDC, has an interest rate spread above SOFR (or an alternative risk-free floating interest rate index) of 225basis points, a maturity date of August 2029 and a revolving period that ends in August 2027. As of December 31, 2024 and September 30, 2024, Funding I had $608.8 million and $443.9 million of outstanding borrowings under the Credit Facility, respectively. The Credit Facility had a weighted average interest rate of 6.8% and 7.5%, exclusive of the fee on undrawn commitments as of December 31, 2024 and September 30, 2024, respectively. As**

of December 31, 2024 and September 30, 2024, we had $127.2 million and $192.1 million of unused borrowing capacity under the Credit Facility, respectively, subject to leverage and borrowing base restrictions. During the revolving period, the Credit Facility bears interest at SOFR (or an alternative risk-free floating interest rate index) plus 225 basis points and, after the revolving period, the rate will reset to Base Rate (or an alternative risk-free floating interest rate index) plus 250 basis points for the remaining two years, maturing in August 2029. The Credit Facility is secured by all of the assets of Funding I. Both, we and Funding I have made customary representations and warranties and are required to comply with various covenants, reporting requirements and other customary requirements for similar credit facilities. The Credit Facility contains covenants, including, but not limited to, restrictions of loan size, industry requirements, average life of loans, geographic and individual portfolio concentrations, minimum portfolio yield and loan payment frequency. Additionally, the Credit Facility requires the maintenance of a minimum equity investment in Funding I and income ratio as well as restrictions on certain payments and issuance of debt. The Credit Facility compliance reporting is prepared on a basis of accounting other than GAAP. As of December 31, 2024, we were in compliance with the covenants relating to the Credit Facility. We own 100% of the equity interest in Funding I and treat the indebtedness of Funding I as our leverage. Our Investment Adviser serves as collateral manager to Funding I under the Credit Facility. Our interest in Funding I (other than the management fee) is subordinate in priority of payment to every other obligation of Funding I and is subject to certain payment restrictions set forth in the Credit Facility. We may receive cash distributions on our equity interests in Funding I only after it has made all required payments of (1) cash interest and, if applicable, principal to the Lenders, (2) administrative expenses and (3) claims of other unsecured creditors of Funding I. The Investment Adviser has irrevocably directed that any management fee owed with respect to such services is to be paid to the Company so long as the Investment Adviser remains the collateral manager. 2023 Notes In November 2017, we issued $138.6 million aggregate principal amount of our 2023 Notes that matured on December 15, 2023. COMMITMENTS AND CONTINGENCIES From time to time, we may be a party to legal proceedings, including proceedings relating to the enforcement of our rights under contracts with our portfolio companies. While the outcome of these legal proceedings cannot be predicted with certainty, we do not expect that these proceedings will have a material effect upon our financial condition or results of operations. Unfunded debt and equity investments, if any, are disclosed in the Consolidated Schedules of Investments. As of December 31, 2024 and September 30, 2024, we had $695.8 million and $632.2 million, respectively, in commitments to fund investments. Additionally, as described in Note 4, the Company had unfunded commitments of $87.5 million and zero to PSSL as of December 31, 2024 and September 30, 2024, respectively, that may be contributed primarily for the purpose of funding new investments approved by the PSSL board of directors or investment committee. 695800000632200000875000000 PennantPark Floating Rate Capital Ltd. is a BDC whose objectives are to generate both current income and capital appreciation while seeking to preserve capital by investing primarily in floating rate loans and other investments made to U.S. middle-market companies. We believe that floating rate loans to U.S. middle-market companies offer attractive risk-reward to investors due to a limited amount of capital available for such companies. We use the term “middle-market” to refer to companies with annual revenues between $50 million and $1 billion. Our investments are typically rated below investment grade. Securities rated below investment grade are often referred to as “leveraged loans,” “high yield” securities or “junk bonds” and are often higher risk compared to debt instruments that are rated above investment grade and have speculative characteristics. However, when compared to junk bonds and other non-investment grade debt, senior secured floating rate loans typically have more robust capital-preserving qualities, such as historically lower default rates than junk bonds, represent the senior source of capital in a borrower’s capital structure and often have certain of the borrower’s assets pledged as collateral. Our debt investments may generally range in maturity from three to ten years and are made to U.S. and, to a limited extent, non-U.S. corporations, partnerships and other business entities which operate in various industries and geographical regions. Under normal market conditions, we generally expect that at least 80% of the value of our managed assets will be invested in floating rate loans and other investments bearing a variable-rate of interest. We generally expect that first lien secured debt will represent at least 65% of our overall portfolio. We also generally expect to invest up to 35% of our overall portfolio opportunistically in other types of investments, including second lien secured debt and subordinated debt and, to a lesser extent, equity investments. We seek to create a diversified portfolio by generally targeting an investment size between $5 million and $30 million, on average, although we expect that this investment size will vary proportionately with the size of our capital base. Our investment activity depends on many factors, including the amount of debt and equity capital available to middle-market companies, the level of merger and acquisition activity for such companies, the general economic environment and the competitive environment for the types of investments we make. We have used, and expect to continue to use, our debt capital, proceeds from the rotation of our portfolio and proceeds from public and private offerings of securities to finance our investment objectives.
