Registrant's telephone number, including area code:

(281)  
(281) 765-7100

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, \$0.01 Par Value	PTEN	The Nasdaq Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes Yesx or No

0

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No or No Nox

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ☒ Yes ☒ No ☐

☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). ☒ Yes ☒ No ☐

☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer", "smaller reporting company", and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>	<input type="checkbox"/>
			Smaller reporting company	<input type="checkbox"/>	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	<input type="checkbox"/>	Emerging growth company	<input type="checkbox"/>	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒ ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐ ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

☒

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant as of **June 30, 2023** **June 30, 2024**, the last business day of the registrant's most recently completed second fiscal quarter, was approximately **\$2.4 billion**, **\$4.0 billion**, calculated by reference to the closing price of **\$11.97** **\$10.36** for the common stock on the Nasdaq Global Select Market on that date.

As of **February 20, 2024** **February 5, 2025**, the registrant had outstanding **408,192,236****386,390,297** shares of common stock, \$0.01 par value, its only class of common stock.

**SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS**

This Annual Report on Form 10-K (this "Report") and other public filings, press releases and presentations by us contain "forward-looking statements" within the meaning of the Securities Act of 1933, as amended (the "Securities Act"), the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the Private Securities Litigation Reform Act of 1995, as amended. As used in this Report, "we," "us," "our," "ours" and like terms refer collectively to Patterson-UTI Energy, Inc. and its consolidated subsidiaries. Patterson-UTI Energy, Inc. conducts its operations through its wholly-owned subsidiaries and has no employees or independent business operations. These forward-looking statements involve risk and uncertainty. These forward-looking statements include, without limitation, statements relating to: liquidity; revenue, cost and margin expectations and backlog; financing of operations; oil and natural gas prices; rig counts and frac spreads; source and sufficiency of funds required for building new equipment, upgrading existing equipment and acquisitions (if opportunities arise); demand and pricing for our services; competition; equipment availability; government regulation; legal proceedings; debt service obligations; impact of inflation and economic downturns; and other matters. Our forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts and often use words such as "anticipate," "believe," "budgeted," "continue," "could," "estimate," "expect," "intend," "may," "plan," "predict," "potential," "potentially," "project," "pursue," "should," "strategy," "target," or "will," or the negative thereof and other words and expressions of similar meaning. The forward-looking statements are based on certain assumptions and analyses we make in light of our experience and our perception of historical trends, current conditions, expected future developments and other factors we believe are appropriate in the circumstances.

Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to have been correct. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from actual future results expressed or implied by the forward-looking statements. These risks and uncertainties also include those set forth under "Risk Factors"

contained in Item 1A of this Report and in Management's Discussion and Analysis of Financial Condition and Results of Operations included in this Report and other sections of our filings with the United States Securities and Exchange Commission (the "SEC") under the Exchange Act and the Securities Act, as well as, among others, risks and uncertainties relating to:

- the successful integration and expected benefits of the merger (the "NexTier merger") with NexTier Oilfield Solutions Inc. ("NexTier") and the acquisition (the "Ulterra acquisition") of Ulterra Drilling Technologies, L.P. ("Ulterra") on our financial condition, results of operations, strategy and plans and our ability to realize those benefits;
- synergies, costs and financial and operating impacts of acquisitions, including the NexTier merger and the Ulterra acquisition;
  - the successful integration of NexTier and Ulterra operations and the future financial and operating results of the combined company;
  - the combined company's plans, objectives, expectations and intentions with respect to future operations and services;
  - adverse oil and natural gas industry conditions; conditions, including the impact of commodity price volatility on industry outlook;
- global economic conditions, including inflationary pressures and risks of economic downturns or recessions in the United States and elsewhere;
- volatility in customer spending and in oil and natural gas prices that could adversely affect demand for our services and their associated effect on rates;
- excess supply of drilling and completions equipment, including as a result of reactivation, improvement or construction;
- competition and demand for our services;
- the impact of the ongoing Ukraine/Russia and Israel/Hamas Middle East conflicts and instability in other international regions;
- strength and financial resources of competitors;
- utilization, margins and planned capital expenditures;
- ability to obtain insurance coverage on commercially reasonable terms and liabilities from operational risks for which we do not have and receive full indemnification or insurance;
- operating hazards attendant to the oil and natural gas business;
- failure by customers to pay or satisfy their contractual obligations (particularly with respect to fixed-term contracts);

1

- 
- the ability to realize backlog;
  - specialization of methods, equipment and services and new technologies, including the ability to develop and obtain satisfactory returns from new technology; technology and the risk of obsolescence of existing technologies;
  - the ability to attract and retain management and field personnel;
  - loss of key customers;
  - shortages, delays in delivery, and interruptions in supply, of equipment and materials;
  - cybersecurity events;
  - difficulty in building and deploying new equipment;
  - complications with the design or implementation of our new enterprise resource planning system;
  - governmental regulation, including climate legislation, regulation and other related risks;
  - environmental, social and governance practices, including the perception thereof;
  - environmental risks and ability to satisfy future environmental costs;
  - technology-related disputes;
  - legal proceedings and actions by governmental or other regulatory agencies;
  - changes to tax, tariff and import/export regulations and sanctions by the United States or other countries;
  - the ability to effectively identify and enter new markets; markets or pursue strategic acquisitions;
  - public health crises, pandemics and epidemics;
  - weather;
  - operating costs;

- expansion and development trends of the oil and natural gas industry;
- financial flexibility, including availability of capital and the ability to repay indebtedness when due;
- adverse credit and equity market conditions;
- our return of capital to stockholders, including timing and amounts (including any plans or commitments in respect thereof) of any dividends and share repurchases;
- stock price volatility;
- compliance with covenants under our debt agreements; and
- other financial, operational and legal risks and uncertainties detailed from time to time in our filings with the SEC.

We caution that the foregoing list of factors is not exhaustive. Additional information concerning these and other risk factors is contained elsewhere in this Report and may be contained in our future filings with the SEC. You are cautioned not to place undue reliance on any of our forward-looking statements. The forward-looking statements speak only as of the date made and, other than as required by law, we undertake no obligation to update publicly or revise any of these forward-looking statements, whether as a result of new information, future events or otherwise. In the event that we update any forward-looking statement, no inference should be made that we will make additional updates with respect to that statement, related matters or any other forward-looking statements. All subsequent written and oral forward-looking statements concerning us or other matters and attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements above.

2

## PART I

### Item 1. *Business*

#### Available Information

This Report, along with our Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, are available free of charge through our internet website ([www.patenergy.com](http://www.patenergy.com)) as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. The information contained on our website is not part of this Report or other filings that we make with the SEC. The SEC maintains an internet site ([www.sec.gov](http://www.sec.gov)) that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC.

#### Overview

We are a Houston, Texas-based leading provider of drilling and completion services to oil and natural gas exploration and production companies in the United States and other select countries, including contract drilling services, integrated well completion services and directional drilling services in the United States, and specialized drill bit solutions in the United States, Middle East and many other regions around the world. We operate under three reportable business segments: (i) drilling services, (ii) completion services, and (iii) drilling products.

#### Drilling Services

Our contract drilling business operates in the continental United States and internationally in Colombia and Ecuador and, from time to time, we pursue contract drilling opportunities in other select markets. We also provide a comprehensive suite of directional drilling services in most major producing onshore oil and natural gas basins in the United States, and we provide services that improve the statistical accuracy of wellbore placement for directional and horizontal wells. We also service and re-certify equipment for drilling contractors, and we provide electrical controls and automation to the energy, marine and mining industries, in North America and other select markets.

#### Completion Services

Our well completion services business consists of services for hydraulic fracturing, wireline and pumping, completion support, and cementing. It also includes our power solutions natural gas fueling business and our proppant last mile logistics and storage business. Our completion services business operates in several of the most active basins in the continental United States, including the Permian, the Marcellus Shale/Utica, the Eagle Ford, Mid-Continental, Haynesville, and the Bakken/Rockies. The high density of our operations in the basins in which we are most active provides us the opportunity to leverage our fixed costs and to quickly respond with what we believe are highly efficient, integrated solutions that are best suited to address customer requirements.

#### Drilling Products

We serve the energy and mining markets by manufacturing and distributing drill bits throughout North America and internationally in over 30 countries. Our drilling equipment is used in oil and natural gas exploration and production and in mining operations. We have manufacturing and repair facilities located in Fort Worth, Texas, Leduc, Alberta and Saudi Arabia and repair facilities located in Argentina, Colombia and Oman.

Oman.

#### Other

Other consists of our oilfield rentals business, with a fleet of premium oilfield rental tools, along with the results of our ownership, as a non-operating working interest owner, in oil and natural gas assets located in Texas and New Mexico.

Mexico.

3

## Recent Developments

*Recent Developments in Market Conditions* — Quarterly average oil prices and our quarterly average number of rigs operating in the United States for 2021, 2022, 2023 and 2023 2024 are as follows:

	1st Quarter	2nd Quarter	3rd Quarter	4th Quarter
<b>2021:</b>				
Average oil price per Bbl <sup>(1)</sup>	\$ 57.79	\$ 66.09	\$ 70.62	\$ 77.45
Average rigs operating per day – U.S. <sup>(2)</sup>	69	73	80	106
<b>2022:</b>				
Average oil price per Bbl <sup>(1)</sup>	\$ 94.45	\$ 108.72	\$ 93.18	\$ 82.79
Average rigs operating per day – U.S. <sup>(2)</sup>	115	121	128	131
<b>2023:</b>				
Average oil price per Bbl <sup>(1)</sup>	\$ 75.93	\$ 73.54	\$ 82.25	\$ 78.53
Average rigs operating per day – U.S. <sup>(2)</sup>	131	128	120	118

  

	1st Quarter	2nd Quarter	3rd Quarter	4th Quarter
<b>2022</b>				
Average oil price per Bbl <sup>(1)</sup>	\$ 94.45	\$ 108.72	\$ 93.18	\$ 82.79
Average rigs operating per day – U.S. <sup>(2)</sup>	115	121	128	131
<b>2023</b>				
Average oil price per Bbl <sup>(1)</sup>	\$ 75.93	\$ 73.54	\$ 82.25	\$ 78.53
Average rigs operating per day – U.S. <sup>(2)</sup>	131	128	120	118
<b>2024</b>				
Average oil price per Bbl <sup>(1)</sup>	\$ 77.50	\$ 81.81	\$ 76.43	\$ 70.73
Average rigs operating per day – U.S. <sup>(2)</sup>	121	114	107	105

<sup>(1)</sup> The average oil price represents the average monthly West Texas Intermediate (WTI) spot price as reported by the United States Energy Information Administration.

<sup>(2)</sup> A rig is considered to be operating if it is earning revenue pursuant to a contract on a given day.

Our revenues, profitability and cash flows are highly dependent upon prevailing prices for oil and natural gas and expectations about future prices. Crude oil prices, and demand for drilling upon our customers' ability to access, and completion equipment willingness to deploy, capital to fund their operating and services increased from 2021 to 2022, and industry supply capital expenditures. Commodity prices have historically been volatile, but have been relatively range-bound since the end of Tier-1, super-spec rigs became constrained. Commodity price volatility in the second quarter of 2023 resulted in a decline in industry activity; commodity prices subsequently increased during the third quarter before declining in the fourth quarter of 2023. We expect our rig count in the United States will average 120 rigs in the first quarter, 2022. The current demand for equipment and services remains dependent on impacted by macro conditions, including commodity prices, geopolitical environment, inflationary pressures, economic conditions in the United States and elsewhere, as well as customer consolidation and focus by exploration and production companies and service companies on capital returns. Oil prices averaged \$78.53 \$70.73 per barrel in the fourth quarter of 2023 2024 and closed at \$78.72 \$73.52 per barrel on February 20, 2024 February 3, 2025. Natural gas prices (based on the Henry Hub Spot Market Price) averaged \$2.74 \$2.45 per MMBtu in the fourth quarter of 2023 2024 and closed at \$1.50 \$3.30 per MMBtu on February 20, 2024 February 3, 2025.

Our

In our drilling services segment, our average active U.S. rig count in the United States for the fourth quarter of 2023 2024 was 118 105 rigs. This was a decrease from our average active rig count for the third quarter of 2023 2024 of 120 107 rigs. Our active U.S. rig count in the United States at December 31, 2023 December 31, 2024 of 121 103 rigs was less than the rig count of 132 121 rigs at December 31, 2022 December 31, 2023, reflecting the industry-wide activity declines due in large part to the decline in commodity

prices increased drilling efficiencies and reduced demand for drilling services in the United States, market consolidation. We expect our rig count in the United States will average 120 106 rigs in the first quarter of 2024, 2025. Term contracts help support our operating rig count. Based on contracts in place in the United States as of February 14, 2024 February 5, 2025, we expect an average of 79 64 rigs operating under term contracts during the first quarter of 2024 2025 and an average of 52 40 rigs operating under term contracts during 2024.

Our completion services business was impacted by calendar inefficiencies during the second half of 2023 resulting from a decline in customer activity during the third quarter. Completion services activity stabilized in 2025.

During the fourth quarter of 2023, 2024, our completion services segment was impacted by several long-term dedicated customers reducing sequential completion activity after meeting their annual production targets. We believe expect a seasonal uptick in activity will modestly decline in during the first quarter as customer budgets reset with the start of 2024.

the new year.

Activity in our drilling products segment was relatively steady in 2024 compared to the prior year. Drilling products demand increased from the third quarter of 2023 despite a decline in the global rig count. Drilling Products demand is expected to remain steady through the first quarter, given the expectation for a steady U.S. market in the U.S. and moderate continued growth in international markets relative to what we saw in the fourth quarter.

markets.

Our 2024 2025 capital expenditure forecast is approximately \$740 million.

\$600 million.

*Recent Developments in Joint Ventures, Business Combinations and Financial Matters—* In December 2024, one of our subsidiaries closed a previously announced joint venture with subsidiaries of ADNOC Drilling and SLB. Our subsidiary holds a 15 percent interest in a newly created company named Turnwell Industries, which has been awarded a contract to drill and complete 144 unconventional wells for ADNOC. In exchange for the minority equity interest, we are providing unconventional drilling and completion expertise to Turnwell, as well as a limited cash contribution to fund our portion of initial working capital.

On September 1, 2023, we completed the our merger (the “NexTier merger”) with NexTier merger. Oilfield Solutions Inc. (“NexTier”), a predominately U.S. land-focused oilfield service provider, with a diverse set of well completion and production services across a variety of active basins Each share of common stock of NexTier issued and outstanding immediately prior to the effective time (including outstanding restricted shares) was converted into the right to receive 0.752 shares of our common stock, which based on the closing price of our common stock of \$14.91 on September 1, 2023, valued the transaction at approximately \$2.8 billion; \$2.8 billion, including the assumption of debt. NexTier is a predominately U.S. land-focused oilfield service provider, with a diverse set of well completion and production services across a variety of active basins.

On August 14, 2023, we completed the our acquisition (the “Ulterra acquisition”) of Ulterra acquisition. Drilling Technologies, L.P. (“Ulterra”), a global provider of specialized drill bit solutions. Total consideration for the acquisition included the issuance of 34.9 million shares of our common stock and payment of approximately \$376 million \$373 million of cash (after purchase price adjustments), which based on the closing price of

4

our common stock of \$14.94 on August 14, 2023, valued the transaction at closing at approximately \$897 million \$894 million. Ulterra is a global provider of specialized drill bit solutions.

On September 13, 2023, we completed the offering of \$400 million in aggregate principal amount of our 7.15% Senior Notes due 2033 (the “2033 Notes”). The net proceeds before offering expenses were approximately \$396 million, which we used to repay amounts outstanding under our revolving credit facility.

Prior Credit Agreement (as defined below).

On August 29, 2023 January 31, 2025, we entered into Amendment No. 4 to the Second Amended and Restated Credit Agreement with the lenders party thereto and Wells Fargo Bank, National Association, as administrative agent, and the other parties thereto (the “Credit Agreement”). The Credit Agreement Amendment”, which amended and restated our Amended and Restated Credit Agreement dated as of March 27, 2018 (as amended, restated, supplemented or otherwise modified at December 31, 2024, the “Credit Agreement”), by and among us, as borrower, Wells Fargo Bank, National Association, as administrative agent, letter of credit issuer, swing line lender and lender and each of the other letter of credit issuers and lenders party thereto.

The Credit Agreement Amendment, among other things, (i) deemed certain outstanding letters of credit issued for the account of BEP Diamond Holdings Corp. (the entity we acquired in the Ulterra acquisition) with a face amount of \$2.5 million to have been issued under the Credit Agreement, and (ii) extended the maturity date for \$85 million of revolving credit commitments of certain lenders under the Credit Agreement from March 27, 2025 to March 27, 2026. As a result, of the \$600 million of revolving credit The commitments under the Credit Agreement the maturity date for \$501.7 million of such commitments is March 27, 2026; the maturity date for \$48.3 million of such commitments is March 27, 2025; are \$500 million, and the maturity date loans and commitments under the Credit Agreement mature on January 31, 2030.

The Credit Agreement provides for a committed senior unsecured credit facility that permits aggregate revolving credit borrowings of up to \$500 million, with a letter of credit sub-facility of \$100 million and a swing line sub-facility that, at any time outstanding, is limited to the remaining lesser of \$50 million of such commitments is March 27, 2024.

During and the first quarter of 2023, we elected to repurchase portions of our 3.95% Senior Notes due 2028 (the "2028 Notes") and our 5.15% Senior Notes due 2029 (the "2029 Notes") in the open market. The principal amounts retired through these transactions totaled \$6.0 million of our 2028 Notes and \$3.0 million of our 2029 Notes, plus accrued interest. We recorded corresponding gains on the extinguishment of these amounts totaling \$0.8 million and \$0.3 million, respectively, net amount of the proportional write-off swing line provider's unused commitment. Subject to customary conditions, we may request that the lenders' aggregate commitments be increased by up to \$200 million, not to exceed total commitments of associated deferred financing costs \$700 million. For a description of the Credit Agreement, see "Liquidity and original issuance discounts. These gains are Capital Resources" included in "Interest expense, net Part II, Item 7— "Management's Discussion and Analysis of amount capitalized" in our consolidated statements Financial Condition and Results of operations included as a part of Item 8 Operations" of this Report.

As of December 31, 2023 December 31, 2024, we had no borrowings outstanding under our revolving credit facility. Prior Credit Agreement. We had \$2.6 million \$2.1 million in letters of credit outstanding under the Prior Credit Agreement at December 31, 2023 December 31, 2024 and, as a result, had available borrowing capacity of approximately \$597 million \$613 million under the Prior Credit Agreement at that date.

Industry Segments

Our revenues, operating income and loss and identifiable assets are primarily attributable to three industry segments:

- drilling services,
- drilling services,
- completion services, and
- drilling products.

Drilling Services Operations

General — We provide our contract drilling services to oil and natural gas operators in the United States, Colombia and Colombia, Ecuador. As of December 31, 2023 December 31, 2024, we had 192 152 marketed land-based drilling rigs based in the following regions:

Region	Number of Rigs	
West Texas	70	82
Appalachia	21	27
Rockies Oklahoma	16	23
Oklahoma Rockies	15	19
South Texas	11	18
East Texas	11	15
Colombia	7	8
Ecuador	1	
Total	152	192

All of these drilling rigs are electric rigs. An electric rig converts the power from its diesel or natural gas engines into electricity to power the rig. The U.S. land rig industry has in recent years referred to certain high specification rigs as "super-spec" rigs, which we consider to be at least a 1,500 horsepower, AC-powered rig that has at least a 750,000-pound hookload, a 7,500-psi circulating system, and is pad-capable. Due to evolving customer preferences, we refer to certain premium rigs as "Tier-1, super-spec" rigs,

which we consider as being a super-spec rig that also has a third mud pump and raised drawworks that allows for more clearance underneath the rig floor. As of December 31, 2023 December 31, 2024, we had 173 super-spec rigs, of which 131 were 135 Tier-1, super-spec rigs.

We also have a substantial inventory of drill pipe and drilling rig components, which may be used in the activation of additional drilling rigs or as upgrades or replacement parts for marketed rigs.

Drilling rigs are typically equipped with engines, drawworks, top drives, masts, pumps to circulate the drilling fluid, blowout preventers, drill pipe and other related equipment. Over time, components on a drilling rig are replaced or rebuilt. We spend invest significant funds each year as part of a program to modify, upgrade and maintain our drilling rigs. We have addressed our customers' needs for drilling horizontal wells in shale and other unconventional resource plays by improving the capabilities of our drilling fleet. Over the years, we have made performance and safety improvements to our rig fleet. Our APEX<sup>®</sup> rigs are AC-powered electric rigs with many having high pressure mud systems, walking systems and increased hookload capacity. During fiscal years 2024, 2023 2022 and 2021, 2022, we spent approximately \$335 million, \$256 million, \$265 million, \$335 million, and \$110 million, \$272 million, respectively, on these capital expenditures. expenditures in our Drilling Services operations.

Depth and complexity of the well, drill site conditions and the number of wells to be drilled on a pad are the principal factors in determining the specifications of the rig selected for a particular job.

Our contract drilling operations depend on the availability of drill pipe, drill bits, replacement parts and other related rig equipment, fuel and other materials and qualified personnel. Some of these have been in short supply from time to time.

We perform repair and/or upgrade work to our drilling rig equipment at our yard facilities located in Texas, Oklahoma, Wyoming, Colorado, North Dakota, Ohio, Pennsylvania, and internationally in Colombia.

**Drilling Contracts** — Most of our drilling contracts are with established customers on a competitive bid or negotiated basis. Our bid for each job depends upon location, equipment to be used, estimated risks involved, estimated duration of the job, availability of drilling rigs and other factors particular to each proposed contract. Our drilling contracts are generally either on a well-to-well basis or a term basis. Well-to-well contracts are generally short-term in nature and cover the drilling of a single well or a series of wells. Term contracts are entered into for a specified period of time (we define term contracts as contracts with a duration of six months or more) or for a specified number of wells.

Our drilling contracts obligate us to provide and operate a drilling rig and to pay certain operating expenses, including wages of our drilling personnel and necessary maintenance expenses. Most drilling contracts are subject to termination by the customer on short notice and may or may not contain provisions for an early termination payment to us in the event that the contract is terminated by the customer.

Our drilling contracts provide for payment on a daywork basis, pursuant to which we provide the drilling rig and crew to the customer. The customer provides the program for the drilling of the well. Our compensation is based on a contracted rate per day during the period the drilling rig is utilized. We often receive a lower rate when the drilling rig is moving or when drilling operations are interrupted or restricted by adverse weather conditions or other conditions beyond our control. Daywork contracts typically provide separately for mobilization of the drilling rig.

**Contract Drilling Activity** — Information regarding our contract drilling activity for the last three years follows:

	Year Ended December 31,		
	2023	2022	2021
Average rigs operating per day – U.S. <sup>(1)</sup>	124	124	82
Number of wells drilled during the year – U.S.	2,530	2,489	1,662
Number of operating days – U.S.	45,270	45,216	29,960

	Year Ended December 31,		
	2024	2023	2022
Average rigs operating per day – U.S. <sup>(1)</sup>	112	124	124
Number of wells drilled during the year – U.S.	2,376	2,530	2,489
Number of operating days – U.S.	40,899	45,270	45,216

<sup>(1)</sup> A rig is considered to be operating if it is earning revenue pursuant to a contract on a given day.

**Rig Fleet Evaluation** — On a periodic basis, we evaluate our fleet of drilling rigs for marketability based on the condition of inactive rigs, expenditures that would be necessary to bring inactive rigs to working condition and the expected demand for drilling services by rig type. The components comprising rigs that will no longer be marketed are evaluated, and those components with continuing utility to our other marketed rigs are transferred to other rigs or to our yards to be used as spare equipment. The remaining components of these rigs are retired. We During the third quarter of 2024, we identified 42 legacy, non-Tier-1 super-spec drilling rigs and related equipment to be abandoned. Based on the strong customer preference across the industry for Tier-1 super-spec drilling rigs, in addition to efficiency gains and technology advancements that have reduced the total number of rigs needed for the U.S. drilling

market, we believe the 42 rigs that were abandoned had no impairment limited commercial opportunity. Accordingly, we recorded a charge of \$114 million related to this abandonment during the marketability third quarter of 2024. No similar charges were incurred in 2022 or condition of our drilling rigs during 2023.

---

**Drilling Technology** — We continue to enhance the technology offerings that can be used with our drilling operations. Our proprietary operating system for APEX® drilling rigs, Cortex®, can allow for the deployment of custom applications for rig performance, control and optimization. For instance, our GenAssist® application can employ smart engine logic turning engines on and off to reduce fuel consumption and emissions. Our Cortex® Key edge server can connect to various systems at the well site, streaming large data sets and providing a single, high-speed data aggregation source. Our EcoCell® lithium battery hybrid energy management system is capable of utilizing stored energy to help reduce fuel consumption and emissions.

**Directional Drilling** — We generally utilize our own proprietary downhole motors and equipment to provide a comprehensive suite of directional drilling services, including directional drilling, measurement-while-drilling ("MWD") and supply and rental of downhole performance motors, in most major onshore oil and natural gas basins in the United States. We generally design, assemble and maintain such as our own fleet of downhole Mpack® drilling motors, and MWD equipment, equipment, such as our Mpower™ MWD systems. Our customers primarily consist of oil and natural gas operators in the United States.

**Wellbore Placement Optimization Services** — We provide software and services used to improve the accuracy of directional and horizontal wellbores, wellbore quality, and on-bottom ROP (rate of penetration). Our MWD Survey FDIR (fault detection, isolation and recovery) service is a data analytics technology to analyze MWD survey data in real-time and more accurately identify the position of a well. Our HiFi Nav™ offering enhances FDIR by targeting improved vertical placement of the directional well within the reservoir. Our HiFi Guidance™ service utilizes trajectory optimization to determine optimal steering recommendations and placement within the reservoir, targeting minimal sliding, faster ROP, and a higher percentage of the wellbore placed in the desired drilling window. We provide these services to customers with onshore and offshore operations.

**Other Drilling Services** — We service and re-certify equipment for drilling contractors, and we provide electrical controls and automation to the energy, marine and mining industries in North America and other select markets.

## Completion Services Operations

Our completion services business consists of services for hydraulic fracturing, wireline and pumping, completion support, and cementing. It also includes our power solutions natural gas fueling business and our proppant last mile logistics and storage business. Our completion services business operates in several of the most active basins in the continental United States including the Permian, the Marcellus Shale/Utica, the Eagle Ford, Mid-Continental, Haynesville, and the Bakken/Rockies. The high density of our operations in the basins in which we are most active provides us the opportunity to leverage our fixed costs and to quickly respond with what we believe are highly efficient, integrated solutions that are best suited to address customer requirements. Our completion services are designed in partnership with our customers to enhance both initial production rates and estimated ultimate recovery from new and existing wells.

We utilize our in-house capabilities, including our data control instruments business, to offer a technologically advanced and efficiency focused range of completion techniques. The majority of revenue for this segment is generated by our hydraulic fracturing business.

**Hydraulic Fracturing** — Hydraulic fracturing services are performed to enhance production of oil and natural gas from formations with low permeability and restricted flow of hydrocarbons. The process of hydraulic fracturing involves pumping a highly viscous, pressurized fracturing fluid, typically a mixture of water, chemicals and proppant, into a well casing or tubing in order to fracture underground mineral formations. These fractures release trapped hydrocarbon particles and free a channel for the oil or natural gas to flow freely to the wellbore for collection. Fracturing fluid mixtures include proppant that becomes lodged in the cracks created by the hydraulic fracturing process, "propping" them open to facilitate the flow of hydrocarbons upward through the well. To address evolving customer preferences for emissions-reducing equipment, we have invested in natural gas-powered equipment, including our 100% natural gas-powered Emerald™ line of hydraulic fracturing equipment.

**Completion Support Services** — In late 2020, NexTier began evolving its completion service offerings to develop Our Power Solutions business is an integrated natural gas treatment and delivery solution. In 2021, NexTier launched its Power Solutions business, solution, which focuses on gas sourcing, compression, transport, decompression, treatment and related services for fracturing oilfield service operations. We believe this integration solution assists our customers by reducing emissions at the wellsite and throughout their operations. As part of NexTier's our wellsite integration strategy to provide and integrate a variety of services for its our customers at the wellsite to maximize efficiencies and profitability, in 2022, NexTierwe acquired sand hauling, wellsite storage, and last mile logistics assets and rebranded its entire last mile logistics operation as NexMile Logistics, assets. The assets acquired were combined with NexTier's our existing last mile logistics assets to create a leading player in the delivery and storage of proppant at the wellsite.

**Wireline and Pumping Services** — Our wireline services involve the use of a truck equipped with a spool of wireline that is unwound and lowered into oil and natural gas wells to convey specialized tools or equipment for well completion, well intervention, pipe recovery and reservoir evaluation purposes. We offer our wireline services in conjunction with our hydraulic

in "plug-and-perf" well completion to maximize efficiency for our customers. "Plug-and-perf" is a multi-stage well completion technique for cased-hole wells that consists of pumping a plug and perforating guns to a specified depth. Once the plug is set, the zone is perforated and the tools are removed from the well, a ball is pumped down to isolate the zones below the plug and the hydraulic fracturing treatment is applied. In addition, we offer wireline and pumping services that are not integrated with our fracturing services. We are one of the leading providers of perforating, pumpdown, pipe recovery, pressure pumping, and wellsite make-up and pressure testing services. We are highly experienced in safely servicing deep, high-pressure, high-temperature wells in some of the most active onshore basins in the United States. Our in-house manufacturing capabilities allow us to manage costs and lead times with regard to hardware and perforating guns, switches and accessories, providing us with a competitive advantage and enabling higher returns.

**Cementing** — Our cementing services incorporate custom engineered mixing and blending equipment that is designed to deliver precision and accuracy in providing annulus isolation and hydraulic seal, while protecting freshwater zones from our customers' zone of interest. Our cement division has the expertise to cement shallow to complex high temperature, high pressure wells. We also offer engineering software and technical guidance for remedial cementing applications and acidizing to optimize the performance of our customers' wells. We are one of the largest providers of specialty cementing services in the United States. Our operations are supported by multiple full-service laboratory facilities with advanced capabilities.

**Completion Service Contracts** — Our completion services operations are conducted pursuant to a work order for a specific job or pursuant to a contract generally for a specified period of time, which may include minimum revenue, usage or stage requirements. We are compensated based on a combination of charges for equipment, personnel, materials, mobilization and other items.

**Equipment** — We have well completion equipment used in providing hydraulic fracturing services as well as cementing and acid pumping services. We periodically evaluate our completion services assets for marketability based on the condition of inactive equipment, expenditures that would be necessary to bring the equipment to working condition and the expected demand for such equipment. The components of equipment that will no longer be marketed are evaluated, and those components with continuing utility will be used as parts to support active equipment. The remaining components of this equipment are retired. **We had no impairment related to the marketability or condition of our equipment during 2023.**

**Materials** — Our completion services operations require the use of acids, chemicals, proppants, fluid supplies and other materials, any of which can be in short supply, including severe shortages, from time to time, and can be subject to significant price volatility. We purchase these materials from various suppliers. These purchases are made in the spot market or pursuant to other arrangements that **may or** may not cover all of our required supply. These supply arrangements sometimes require us to purchase the supply or pay liquidated damages if we do not purchase the material. Given the limited number of suppliers of certain of our materials, we may not always be able to make alternative arrangements if we are unable to reach an agreement with a supplier for delivery of any particular material or should one of our suppliers, including trucking companies, fail to timely deliver our materials.

#### Drilling Products Operations

Our Ulterra business has manufacturing and distribution sites of drilling equipment in North America and internationally, which are geographically positioned to serve the energy and mining markets in over 30 countries. Ulterra's drilling equipment is used in oil and natural gas exploration and production and in mining operations. Ulterra has manufacturing and repair facilities located in Fort Worth, Texas, Leduc, Alberta and Saudi Arabia and repair facilities located in Argentina, Colombia and Oman.

Ulterra's primary business is the design, manufacture, sale and rental of matrix and steel-bodied polycrystalline diamond compact ("PDC") drill bits. PDC drill bits are typically rented, except in select international markets where they are sold. Used bits may be repaired and refurbished for the subsequent customer. Ulterra has an industry-leading position in the North American PDC drill bit market.

We periodically evaluate our drill bits for marketability based on the condition of inactive equipment, expenditures that would be necessary to bring the equipment to working condition and the expected demand for such equipment. The components of equipment that will no longer be marketed are evaluated, and those components with continuing utility will be used as parts to support active equipment. The remaining components of this equipment are retired. **We had no impairment related to the marketability or condition of our equipment during 2023.**

**2024.**

#### Other Operations

Our oilfield rentals business has a fleet of premium rental tools **and equipment** and provides specialized services for land-based oil and natural gas drilling, completion and workover activities in many of the major producing oil and natural gas basins in the United States.

---

In addition, we own and invest, as a non-operating working interest owner, in oil and natural gas assets that are primarily located in Texas and New Mexico.

## Research, Engineering and Technology

We employ research, engineering and technology teams across our businesses, who work on initiatives to enhance our existing product and service offerings and develop new products and services to meet customer demands.

## Contracts

We believe that our contracts for drilling services, completion services, drilling products and other services and products generally provide for indemnification rights and obligations that are customary for the markets in which we conduct those operations. However, each contract contains the actual terms setting forth our rights and obligations and those of the customer or supplier, any of which rights and obligations may deviate from what is customary due to particular industry conditions, customer or supplier requirements, applicable law or other factors.

## Customers

Our customer base includes major, independent and other oil and natural gas operators. With respect to our consolidated operating revenues in 2023, 2024, we received approximately 49% 53% from our ten largest customers and approximately 35% 38% from our five largest customers. During 2023, 2024, one customer accounted for approximately \$588 million \$605 million, or approximately 14% 11%, of our consolidated operating revenues. The loss of, or reduction in business from, one or more of our larger customers could have a material adverse effect on our business, financial condition, cash flows and results of operations.

## Backlog

We maintain a backlog of commitments for contract drilling services under term contracts, which we define as contracts with a duration of six months or more. Our contract drilling backlog in the United States as of December 31, 2023 December 31, 2024 and 2022 2023 was approximately \$700 million \$426 million and \$830 million \$700 million, respectively. Approximately 16% 7.1% of our contract drilling backlog in the United States at December 31, 2023 December 31, 2024 is reasonably expected to remain after 2024, 2025. See Note 3 of Notes to consolidated financial statements in Item 8 of this Report and "Item 1A. Risk Factors – Our current backlog of contract drilling revenue may decline and may not ultimately be realized, as fixed-term contracts may in certain instances be terminated without an early termination payment" for information pertaining to backlog.

## Competition

The businesses in which we operate are highly competitive. Historically, available equipment used in our drilling services and completion services businesses has frequently exceeded demand, particularly in an industry downturn. The price for our services is a key competitive factor, in part because equipment used in these businesses can be moved from one area to another in response to market conditions. In addition to price, we believe availability, condition and technical specifications of equipment (including emission reduction capabilities), quality of personnel, service quality and safety record are key factors in determining which contractor is awarded a job. We expect that the market for our services will continue to be highly competitive.

## Human Capital and Sustainability

We strive to be a leader in our industry in the area of environmental, social, governance and other sustainability-related issues, and we remain committed to managing these issues for the long-term benefit of our employees, our communities and our business. We aim to minimize our environmental impact in the communities in which we work and live, while providing services for our customers in a safe and responsible manner. We invest extensively in the safety, health and well-being of our people, who, through the diversity of their backgrounds, experiences and talents, are our greatest strength. Importantly, we maintain a rigorous focus on ethics and integrity at every level of our operations, values which are embedded in our culture and a practice on which all of our success depends.

*Environment* – We continue to pursue initiatives to mitigate climate change risk and make improvements in air quality, water quality, land usage, use of energy and reducing waste materials. For example, we utilize natural gas engines, dual-fuel equipment and other technologies that reduce our carbon and other greenhouse gas emissions as compared to our traditional diesel-only equipment, and we employ spill prevention plans and use additional protective measures in environmentally sensitive areas.

We have strengthened our position as a leader in alternative fuel technology with the commercialization of our EcoCell® lithium battery hybrid energy management system. The EcoCell® system is capable of efficiently displacing one of the gensets on a drilling rig to reduce both fuel consumption and emissions. The value of this technology is enhanced when used in combination with our Cortex® power management system and our dual-fuel engines, as the natural gas substitution rate can be optimized.

Through our Current Power business, we provide in-house electrical engineering, control system automation and installation services to connect drilling rigs to utility electrical lines. This capability enables our customers to use utility power, instead of natural gas or diesel fuel, to power drilling operations. Using utility power is an optimal power solution for our drilling rigs as it minimizes emission impacts at the wellsite.

Some of our key human capital areas of focus include:

*Employees* – We had approximately 10,600 9,200 full-time employees as of January 31, 2024 January 31, 2025. The number of employees fluctuates depending on the current and expected demand for our services. We consider our employee relations to be satisfactory. None of our U.S. employees are represented by a union. Although some of our

Colombian employees may be union members, we have not entered into any collective bargaining arrangements with the unions with which those employees are affiliated.

*Training and Safety* – Our training programs include opportunities for employees to advance in their professional careers through intensive, multi-day classroom training programs in numerous skills and competencies, as well as management training programs. These programs are geared to providing our employees with opportunities to advance throughout our company.

The safety of our employees and others is our highest priority, as our goal is to provide an incident-free work environment. We have robust safety training programs that are designed to comply with applicable laws and industry standards and to benefit our employees, communities and our business. All U.S. field-based employees are required to have annual safety education that incorporates learning associated with hazard awareness, safe systems of work, permission to work, stop work authority, energy isolation, material handling and management of change.

*Diversity, Inclusion and Respect* – We are committed to fostering a work environment where all people feel valued and respected. We embrace our diversity of people, thoughts and talents, and combine these strengths to pursue extraordinary results for our company, our employees and our stockholders. We are committed to recruiting, hiring and retaining the highest caliber talent for our business by utilizing outreach initiatives and partnerships with a diverse group of organizations, industry associations and networks.

We require new supervisors and managers in the United States to attend an instructor-led course relative to diversity, inclusion and respect to ensure they understand our expectations regarding their obligations to promote a work environment where all employees are valued and respected. Supplemental diversity, inclusion and respect training for supervisors and managers is required on a biannual basis.

All other employees are educated annually on our commitment to a respectful workplace for all to ensure they understand their role as they engage with co-workers.

*Maintaining our Core Values* – We provide annual training for our employees on our Code of Business Conduct and Ethics, which addresses conflicts of interest, confidentiality, fair dealing with others, proper use of company assets, compliance with laws, insider trading, keeping of books and records, zero tolerance for discrimination and harassment in the work environment, as well as reporting of violations.

*Health and Benefits* – Our health and benefits program provides for extensive preventative care and is designed to improve our employees' fitness for work, personal safety on the job and overall well-being. We have implemented policies allowing many of our office-based employees the flexibility to work from home.

#### Government and Environmental Regulation

Our operations and facilities are subject to numerous federal, state, foreign, regional and local laws, rules and regulations related to various aspects of our business and the oil and natural gas industry including:

- drilling of oil and natural gas wells,
- hydraulic fracturing, wireline and pumping, completion support and cementing,
- provision of specialized drill bit solutions,
- directional drilling services,

10

- services that improve the accuracy of directional and horizontal wellbores, including for customers with offshore operations, wellbore quality, and on-bottom ROP,
  - containment and disposal of hazardous materials, oilfield waste, other waste materials and acids,
  - use of underground storage tanks and injection wells,
  - servicing of equipment for drilling contractors,
  - provision of electrical controls and automation,
  - conducting international operations, and
- 
- our employees.

Our business operations are subject to various environmental, as well as employee health and safety, laws and regulations, including those addressing the management, disposal and releases of regulated substances. For more information, please refer to our discussion under "Item 1A. Risk Factors – Environmental and occupational health and safety laws and regulations, including violations thereof, could materially adversely affect our operating results.

"

Our activities include the performance of hydraulic fracturing services to enhance the production of oil and natural gas from formations with low permeability, such as shale and other unconventional formations. See "Item 1A. Risk Factors – The adoption of any future federal, state, or local laws or implementing regulations imposing reporting obligations on, or limiting or banning, the hydraulic fracturing process could make it more difficult to complete natural gas and oil wells and could have a material adverse effect on our business, results of operations, and financial condition."

There has been an increasing focus of local, state, national and international regulatory bodies on greenhouse gas ("GHG") emissions and climate change issues. Several states and geographic regions in the United States, as well as foreign jurisdictions, have adopted legislation and regulations to reduce emissions of GHGs, including cap and trade regimes and commitments to contribute to meeting the goals of international treaties related to GHG emissions. See "Item 1A. Risk Factors – Our and our customers' operations are subject to a number of risks arising out of the threat of climate change that could result in increased operating and capital costs, limit the areas in which oil and natural gas production may occur and reduce demand for our services."

We operate throughout North America and internationally in over 30 countries and, accordingly, are subject to the U.S. Foreign Corrupt Practices Act ("FCPA") and similar anti-bribery and anti-corruption laws in other jurisdictions. Our operations also are subject to other laws and regulations in relation to our international operations, including with respect to the import and export of certain goods and economic sanctions. See "Item 1A. Risk Factors – Political, economic and social instability risk and laws associated with conducting international operations could adversely affect our opportunities and future business."

The adoption of laws, rules and regulations affecting the oil and natural gas industry for economic, environmental and other policy reasons could increase costs relating to drilling, completion and production, delay the permitting of, or related to, such operations, restrict or prohibit oil and natural gas development in certain areas, reduce the demand for oil and natural gas and otherwise have an adverse effect on our operations or business, and could have a material adverse effect on our business, financial condition, cash flows and results of operations. To date, applicable environmental and other laws and regulations in the places in which we operate have not required the expenditure of significant resources outside the ordinary course of business. We do not anticipate any material capital expenditures for environmental control facilities or extraordinary expenditures to comply with environmental rules and regulations in the foreseeable future. However, compliance costs under existing laws or under any new requirements could become material, and we could incur liability in any instance of noncompliance.

## Risks and Insurance

We have indemnification agreements with many of our customers, and we also maintain liability and other forms of insurance. In general, our contracts typically contain provisions requiring our customers to indemnify us for, among other things, reservoir and certain pollution damage.

In addition, we maintain insurance coverage of the types and in the amounts we believe to be customary in the industry, but we do not insure against all risks, either because insurance is not available or because it is not commercially justifiable. The insurances that we maintain include coverage for fire, windstorm and other risks of physical loss to our equipment and certain other assets, **employer's/employers' liability**, automobile liability, commercial general liability, workers' compensation as well as insurance for other specific **risks, risks, together with excess loss liability insurance coverage. We have also elected to retain a greater amount of risk through increased deductibles as compared to prior years, or self-insurance on certain insurance policies.** We cannot assure that any insurance obtained by us will be adequate to cover any losses or liabilities nor can we assure that any insurance obtained by us will continue to be made available for purchase or made available on acceptable terms. While we carry insurance to cover physical damage to, or loss of, a substantial portion of our equipment and certain other assets, such insurance does not cover the full replacement cost of such equipment or other **assets. We have also elected assets, and in some**

11

certain cases, such as losses arising from or attributable to **retain a greater amount of risk through increased fire and/or explosion resulting from our hydraulic fracturing operations at the wellsite, is subject to significantly higher deductibles on certain insurance policies. For example, in the United States we generally maintain a \$1.5 million per occurrence deductible on than are applicable to our workers' compensation insurance coverage, a \$1.0 million per occurrence deductible on our equipment insurance coverage, a \$10.0 million per occurrence deductible on our general liability coverage, and, for our automobile insurance coverage, a per occurrence deductible ranging from \$2.0 million to \$10.0 million, other coverages.** We also self-insure a number of risks, including loss of earnings and business interruption and most of our cybersecurity risks, and we do not carry a significant amount of insurance to cover risks of underground reservoir damage.

If a significant accident or other event occurs that is not fully covered by insurance or an enforceable and recoverable indemnity from a third party, it could have a material adverse effect on our business, financial condition, cash flows and results of operations. See "Item 1A. Risk Factors – Our operations are subject to a number of operational risks, including environmental and weather risks,

which could expose us to significant losses and damage claims. We are not fully insured against all of these risks and our contractual indemnity provisions may not fully protect us."

## Seasonality

Seasonality has not significantly affected our overall operations. Toward the end of calendar years, we experience slower activity in connection with the holidays and as customers' capital expenditure budgets are **depleted. depleted and/or their annual drilling and completion targets have been met.** Occasionally, our operations **have been are** negatively impacted by severe weather conditions.

## Raw Materials and Subcontractors

We use many suppliers of raw materials and services. Although these materials and services have historically been available, there is no assurance that such materials and services will continue to be available on favorable terms or at all. We also utilize numerous independent subcontractors from various trades.

### Item 1A. Risk Factors.

You should consider each of the following factors as well as the other information in this Report in evaluating our business and our prospects. Additional risks and uncertainties not presently known to us or that we currently consider immaterial may also impair our business operations. If any of the following risks actually occur, our business, financial condition, cash flows and results of operations could be harmed. You should also refer to the other information set forth in this Report, including our consolidated financial statements and the related notes.

#### Risk Factors Summary

The following is a summary of the principal risks included in this Report that we believe could adversely affect our business, financial condition, cash flows and results of operations:

#### Business and Operating Risks

- We are dependent on the oil and natural gas industry and market prices for oil and natural gas. Declines in customers' operating and capital expenditures and in oil and natural gas prices may adversely affect our operating results.
- Global economic conditions may adversely affect our operating results.
- A surplus of equipment and a highly competitive oil service industry may adversely affect our utilization and profit margins and the carrying value of our assets.
- Our operations are subject to a number of operational risks, including environmental and weather risks, which could expose us to significant losses and damage claims. We are not fully insured against all of these risks and our contractual indemnity provisions may not fully protect us.
- Our current backlog of contract drilling revenue may decline and may not ultimately be realized, as fixed-term contracts may in certain instances be terminated without an early termination payment.
- New technologies may cause our operating methods, equipment, products and services to become less competitive, and higher levels of capital expenditures may be necessary to remain competitive.
- Loss of key personnel and competition for experienced personnel may negatively impact our financial condition and results of operations.
- The loss or consolidation of large key customers could have a material adverse effect on our financial condition and results of operations.

12

- 
- Shortages, delays in delivery, and interruptions in supply, of equipment and materials could adversely affect our operating results.
  - Our business is subject to cybersecurity risks and threats.
  - Our commitments under supply agreements could exceed our requirements, exposing us to risks including price, timing of delivery and quality of equipment and materials upon which our business relies.
  - Growth through acquisitions, the building or upgrading of equipment and the development of technology is not assured.
  - Our Complications with the design or implementation of our new enterprise resource planning system could adversely impact our business relationships may be subject to disruption due to uncertainty associated with any pending or recently completed acquisitions, including the NexTier merger or the Ulterra acquisition, which could have a material adverse effect on our results of operations, cash flows and financial position. operations.

- Public health crises, pandemics and epidemics may have a significant adverse impact on our business, liquidity, results of operations and financial condition.

Fuel conservation measures, alternative fuel requirements and increasing consumer demand for alternatives to oil and natural gas could reduce demand for oil and natural gas, which would, in turn, reduce the demand for our services.

#### Risks Relating to the NexTier Merger and Ulterra Acquisition

- Our ability to utilize our historic U.S. net operating loss carryforwards is expected to be limited as a result of the completion of the NexTier merger.
- Uncertainties associated with the NexTier merger and the Ulterra acquisition may cause a loss of management personnel and other key employees, which could adversely affect our future business and operations.
  - We have incurred and are expected to continue incurring transaction costs in connection with the NexTier merger and the Ulterra acquisition, which may be in exce

of those we anticipated.

- The benefits and synergies attributable to the NexTier merger and the Ulterra acquisition may vary from expectations.

#### Legal and Regulatory Risks

- The adoption of any future federal, state, or local laws or implementing regulations imposing reporting obligations on, or limiting or banning, the hydraulic fracturing process could make it more difficult to complete natural gas and oil wells and could have a material adverse effect on our business, results of operations, and financial condition.
- Our and our customers' operations are subject to a number of risks arising out of the threat of climate change that could result in increased operating and capital costs, limit the areas in which oil and natural gas production may occur and reduce demand for our services.
- Environmental and occupational health and safety laws and regulations, including violations thereof, could materially adversely affect our operating results.
- Technology Intellectual property disputes could negatively impact our operations, costs, revenues and competitiveness.
- The design, manufacture, sale or rental, and servicing of products, including drill bits and electrical controls, may subject us to liability for personal injury, property damage and environmental contamination should such equipment fail to perform to specifications.contamination.
- Legal proceedings and governmental investigations could have a negative impact on our business, financial condition and results of operations.
- Political, economic and social instability risk and laws associated with conducting international operations could adversely affect our opportunities and future business.
- We are subject to complex and evolving laws and regulations regarding data privacy and security.

#### Financial Risks

- Investor sentiment and public perception related to the oil and natural gas industry and to ESG initiatives could increase our costs of capital and our reporting requirements and impact our operations.
- Variable rate indebtedness subjects us to interest rate risk, which could cause our debt service obligations to increase significantly.

13

- 
- Our ability to access capital markets could be limited, and a downgrade in our credit rating could negatively impact our cost of and ability to access capital.
  - We may not be able to generate sufficient cash to service all of our debt and we may be forced to take other actions to satisfy our obligations under our debt, which may not be successful.
  - Our return of capital to stockholders, including through the payment of dividends and repurchases of our common stock, is within the discretion of our Board of Directors, and there is no guarantee that we will return capital to shareholders, including through the payment of dividends and repurchases of our common stock, in the future or at levels anticipated by our stockholders.

- Our ability to utilize our historic U.S. net operating loss carryforwards is expected to be limited as a result of the completion of the NexTier merger.

#### Risks Related to Our Common Stock and Corporate Structure

- The market price of our common stock may be highly volatile, and investors may not be able to resell shares at or above the price paid.
- Anti-takeover measures in our charter documents and under state law could discourage an acquisition and thereby affect the related purchase price.
- Our bylaws provide that the Court of Chancery of the State of Delaware and the federal district courts of the United States are the exclusive forums for substantially all disputes between us and our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers or employees.

#### Business and Operating Risks

***We are dependent on the oil and natural gas industry and market prices for oil and natural gas. Declines in customers' operating and capital expenditures and in oil and natural gas prices may adversely affect our operating results.***

We depend on our customers' willingness to make operating and capital expenditures to explore for, develop and produce oil and natural gas. When these expenditures decline, our business may suffer. Our customers' willingness to explore, develop and produce depends largely upon prevailing industry conditions that are influenced by numerous factors over which we have no control, such as:

- the supply of and demand for oil and natural gas, including current natural gas storage capacity and usage,

- the prices, and expectations about future prices, of oil and natural gas,
- the supply of and demand for drilling services, completion services and drilling products,
- the cost of exploring for, developing, producing and delivering oil and natural gas,
- the availability of capital for oil and natural gas industry participants, including our customers, and the extent to which they are willing or able to deploy capital,
- the availability of and constraints in pipeline, storage and other transportation capacity in the basins in which we operate,
- the environmental, tax and other laws and governmental regulations regarding the exploration, development, production, use and delivery of oil and natural gas, and in particular, public pressure on, and legislative and regulatory interest within, federal, state, foreign, regional and local governments to stop, significantly limit or regulate drilling services and completion services activities, including hydraulic fracturing,
- increased focus by the investment and financing community and the general public on sustainability practices in the oil and natural gas industry, and
- merger and divestiture activity among oil and natural gas producers.

In particular, our revenues, profitability and cash flows are highly dependent upon prevailing prices for oil and natural gas and expectations about future prices. Oil and natural gas prices and markets can be extremely volatile. Prices, and expectations about future prices, are affected by factors such as:

- market supply and demand,
- the desire and ability of the Organization of Petroleum Exporting Countries ("OPEC"), its members and other oil-producing nations, such as Russia, to set and maintain production and price targets,
- the level of production by OPEC and non-OPEC countries,

14

- domestic and international military, political, economic, health and weather conditions, including the impacts of war, including the impact of the ongoing armed conflicts between Russia and Ukraine and Israel and Hamas in the Middle East and the continuation of, or any escalation in the severity of, these conflicts, or terrorist activity, pandemics and other unexpected disasters or events,
- changes to tax, tariff and import/export regulations and sanctions by the United States or other countries,
- legal and other limitations or restrictions on exportation and/or importation of oil and natural gas,
- technical advances affecting energy consumption and production, and
- the development, price, availability and market acceptance of alternative fuels and energy sources.

All of these factors are beyond our control. Crude oil Commodity prices and demand for drilling and completion equipment and services increased in 2022, and industry supply have historically been volatile, but have been relatively range-bound since the end of Tier-1, super-spec rigs became constrained. Commodity price volatility in the second quarter of 2023 resulted in a decline in industry activity; commodity prices subsequently increased during the third quarter before declining in the fourth quarter of 2023. 2022. The current demand for equipment and services remains dependent on impacted by macro conditions, including commodity prices, geopolitical environment, inflationary pressures, economic conditions in the United States and elsewhere, as well as customer consolidation and focus by exploration and production companies and service companies on capital returns. Oil prices averaged \$78.53 \$70.73 per barrel in the fourth quarter of 2023 2024 and closed at \$78.72 \$73.52 per barrel on February 20, 2024 February 3, 2025. Natural gas prices (based on the Henry Hub Spot Market Price) averaged \$2.74 \$2.45 per MMBtu in the fourth quarter of 2023 2024 and closed at \$1.50 \$3.30 per MMBtu on February 20, 2024 February 3, 2025.

In light of these and other factors, we expect oil and natural gas prices to continue to be volatile unpredictable and to affect our financial condition, operations and ability to access sources of capital. Higher oil and natural gas prices do not necessarily result in increased activity because demand for our services is generally driven by our customers' expectations of future oil and natural gas prices, as well as our customers' ability to access, and willingness to deploy, capital to fund their operating and capital expenditures. A decline in demand for oil and natural gas, prolonged low oil or natural gas prices, expectations of decreases in oil and natural gas prices or a reduction in the ability of our customers to access capital would likely result in reduced capital expenditures by our customers and decreased demand for our services, which could have a material adverse effect on our operating results, financial condition and cash flows. Even during periods of historically moderate or high prices for oil and natural gas, companies exploring for oil and natural gas may cancel or curtail programs or reduce their levels of capital expenditures for exploration and production for a variety of reasons, including the depletion of capital expenditure budgets and/or meeting annual drilling and completion targets, which could reduce demand for our services.

**Global economic conditions may adversely affect our operating results.**

Concerns regarding global economic conditions, energy costs, geopolitical issues, supply chain disruptions, public health crises or global pandemics, inflation and the availability and cost of credit have contributed, and may in the future contribute, to increased economic uncertainty. Demand for energy and for oil and natural gas end products is highly sensitive to economic conditions; as a result, global economic conditions, indications that economic growth is slowing and volatility in commodity prices may cause our customers to reduce or curtail their drilling and well completion programs, which could result in a decrease in demand for our services. In addition, uncertainty in the capital markets, whether due to global economic conditions, low commodity prices or otherwise, may result in

reduced access to, or an inability to obtain, financing by us, our customers and our suppliers and result in reduced demand for our services. An economic slowdown or recession in the United States or in any other country that significantly affects the supply of or demand for oil or natural gas could negatively impact our operations and therefore adversely affect our results. Furthermore, these factors may result in certain of our customers experiencing an inability or unwillingness to pay suppliers, including us. The global economic environment in the past has experienced significant deterioration in a relatively short period, such as a result of the COVID-19 pandemic or the ongoing armed conflicts between Russia and Ukraine and Israel and Hamas, in the Middle East, and there is no assurance that the global economic environment, or expectations for the global economic environment, will not quickly deteriorate again due to one or more factors, including as a result of actual or perceived threats to geopolitical stability, and changes in production from OPEC, its members and other oil-producing nations, nations, or governmental actions or restrictions in response to events such as a global pandemic. A deterioration in the global economic environment could have a material adverse effect on our business, financial condition, cash flows and results of operations.

***A surplus of equipment and a highly competitive oil service industry may adversely affect our utilization and profit margins and the carrying value of our assets.***

Our industry is highly competitive, and at times available drilling services equipment, completion services equipment, and drilling products exceed often exceeds the demand for such equipment and products. A low commodity price environment or capital spending reductions by our customers due to additional customer consolidation, (which is currently occurring in the industry), investor requirements or other reasons can result in substantially more equipment and products being available than are needed to meet demand. Low commodity prices and a rise in new and upgraded equipment or products can result in excess capacity and substantial competition for a declining number of drilling services and completion services contracts and drilling products rentals and sales.

15

Operating costs for our drilling services and completion services businesses include all direct and indirect costs associated with the operation, maintenance and support of our equipment, which is often not affected by changes in our rates and utilization. During periods of reduced revenue and/or activity, certain of our fixed costs, such as depreciation, may not decline and often we may incur additional costs. During times of reduced utilization, reductions in costs may not be immediate as we may incur additional costs associated with maintaining and stacking equipment, or we may not be able to fully reduce the cost of our support operations in a particular geographic region due to the need to support the remaining operations in that region. Accordingly, a decline in revenue due to lower rates and/or utilization may not be offset by a corresponding decrease in operating costs, which could have a material adverse impact on our business, financial condition and results of operations.

Even in an environment of high oil and natural gas prices and/or increased drilling and completion activity, reactivation and improvement of existing drilling services and completion services equipment, construction of new technology drilling services and completion services equipment, movement of drilling services and completion services equipment from region to region in response to market conditions or otherwise can lead to a surplus of equipment.

In times of reduced demand for our industry's services, certain of our industry competitors may initiate bankruptcy proceedings or engage in debt refinancing transactions, management changes, or other strategic initiatives in an attempt to reduce operating costs to maintain a position in the market. This could result in such competitors emerging with stronger or healthier balance sheets and, in turn, an improved ability to compete with us in the future. We may also see corporate consolidations among both our customers, and competitors and/or vendors, which could significantly alter industry conditions and competition within the industry, and have a material adverse effect on our business, financial condition, cash flows and results of operations.

We periodically seek to increase the prices on our services to offset rising costs, earn returns on our capital investment, and otherwise generate higher returns for our stockholders. However, we operate in a very competitive industry, and we are not always successful in raising or maintaining our existing prices. Even if we are able to increase our prices, we may not be able to do so at a rate that is sufficient to offset rising costs, including capital expenditures, without adversely affecting our activity levels. The inability to maintain our pricing and to increase our pricing as costs, including capital expenditures, increase could have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may be unable to replace fixed-term contracts that expire or are terminated early, extend expiring contracts or obtain new contracts in the spot market, and the rates and other material terms under any new or extended contracts may be on substantially less favorable rates and terms.

Accordingly, high competition and a surplus of equipment and products can cause oil and natural gas service contractors to have difficulty maintaining pricing, utilization and profit margins and, at times, result in operating losses. We cannot predict the future level of competition or surplus equipment and products in the oil and natural gas service businesses or the level of demand for our drilling services, completion services or drilling products.

A surplus of operable land drilling rigs, other drilling services equipment and drilling products, increasing rig specialization and surplus of completion services equipment, which can be exacerbated by capital spending reductions by our customers, could affect the fair market value of our drilling services equipment, completion services equipment, and drilling products, which in turn could result in additional impairments of our assets. A prolonged period of lower oil and natural gas prices or changes in customer preferences and requirements could result in future impairment to our long-lived assets. For example, we recognized impairment charges of \$7.0 million, \$4.5 million \$3.8 million, \$7.0 million and \$267 million \$4.5 million in 2024, 2023 and 2022, and 2021, respectively.

***Our operations are subject to a number of operational risks, including environmental and weather risks, which could expose us to significant losses and damage claims. We are not fully insured against all of these risks and our contractual indemnity provisions may not fully protect us.***

Our operations are subject to many hazards inherent in the businesses in which we operate, including inclement weather, blowouts, explosions, fires, loss of well control, motor vehicle accidents, equipment failure, unplanned power outages and surges, computer system disruptions or cybersecurity incidents, pollution, exposure and reservoir damage. These hazards could cause personal injury or death, work stoppage, and serious damage to equipment and other property, as well as significant environmental and reservoir damages. These risks could expose us to substantial liability for personal injury, wrongful death, property damage, loss of oil and natural

gas production, pollution and other environmental **damages, and consequential** damages. An accident or other event resulting in significant environmental or property damage, or injuries or fatalities involving our employees or other persons could also trigger investigations by federal, state or local authorities. Such an accident or other event could cause us to incur substantial expenses in connection with the investigation, remediation and resolution, as well as cause lasting damage to our reputation, loss of customers and an inability to obtain insurance.

16

We have indemnification agreements with many of our customers, and we also maintain liability and other forms of insurance. In general, our contracts typically contain provisions requiring our customers to indemnify us for, among other things, reservoir and certain pollution damage. Our right to indemnification may, however, be unenforceable or limited due to negligent or willful acts or omissions by us, our subcontractors and/or suppliers. In addition, certain states, including Louisiana, New Mexico, Texas and Wyoming, have enacted statutes generally referred to as "oilfield anti-indemnity acts" expressly prohibiting certain indemnity agreements contained in or related to oilfield services agreements. Such oilfield anti-indemnity acts may restrict or void a party's indemnification of us.

Our customers and other third parties may dispute, or be unable to meet, their indemnification obligations to us due to financial, legal or other reasons. Accordingly, we may be unable to transfer these risks to our customers and other third parties by contract or indemnification agreements. Incurring a liability for which we are not fully indemnified or insured could have a material adverse effect on our business, financial condition, cash flows and results of operations.

In addition, we maintain insurance coverage of the types and in the amounts we believe to be customary in the industry, but we do not insure against all risks, either because insurance is not available or because it is not commercially justifiable. See "Item 1. Business – Risks and Insurance" for a description of our insurance coverage. We also self-insure a number of risks, including loss of earnings and business interruption and most of our cybersecurity risks, and we do not carry a significant amount of insurance to cover risks of underground reservoir damage.

Our insurance may not in all situations provide sufficient funds to protect us from all liabilities that could result from our operations. Our coverage includes aggregate policy limits and exclusions. As a result, we retain the risk for any loss in excess of these limits or that is otherwise excluded from our coverage. There can be no assurance that insurance will be available to cover any or all of our operational **or other** risks, or, even if available, that insurance premiums or other costs will not rise significantly in the future, so as to make the cost of such insurance prohibitive, or that our coverage will cover a specific loss. Further, we may experience difficulties in collecting from insurers or such insurers may deny all or a portion of our claims for insurance coverage. Incurring a liability for which we are not fully insured or indemnified could materially adversely affect our business, financial condition, cash flows and results of operations.

If a significant accident or other event occurs that is not fully covered by insurance or an enforceable and recoverable indemnity from a third party, it could have a material adverse effect on our business, financial condition, cash flows and results of operations.

***Our current backlog of contract drilling revenue may decline and may not ultimately be realized, as fixed-term contracts may in certain instances be terminated without an early termination payment.***

Fixed-term drilling contracts customarily provide for termination at the election of the customer, with an early termination payment to us if a contract is terminated prior to the expiration of the fixed term. However, in certain circumstances, for example, destruction of a drilling rig that is not replaced within a specified period of time, our bankruptcy, or a breach of our contract obligations, the customer may not be obligated to make an early termination payment to us. Additionally, during depressed market conditions or otherwise, customers may be unable to satisfy their contractual obligations or may seek to terminate, suspend or renegotiate or otherwise fail to honor their contractual obligations, including as a result of their bankruptcy. In addition, we may not be able to perform under these contracts due to events beyond our control, and our customers may seek to terminate or renegotiate our contracts for various reasons, including those described above. As a result, we may be unable to realize all of our current contract drilling backlog. In addition, the termination, suspension or renegotiation of fixed-term contracts without the receipt of early termination payments could have a material adverse effect on our business, financial condition, cash flows and results of operations.

As of **December 31, 2023** **December 31, 2024**, our contract drilling backlog in the United States for future revenues under term contracts, which we define as contracts with a duration of six months or more, was approximately **\$700 million** **\$426 million**. Please see Note 3 of Notes to consolidated financial statements in Item 8 of this Report for a description of our calculation of backlog. Our contract drilling backlog may decline, as fixed-term drilling contract coverage over time may not be offset by new contracts or may be reduced by price adjustments to existing contracts, including as a result of a decline in the price of oil and natural gas, capital spending reductions by our customers or other factors. For these and other reasons, our contract drilling backlog may not generate sufficient liquidity for us during periods of reduced demand for our services or otherwise.

***New technologies may cause our operating methods, equipment, products and services to become less competitive, and higher levels of capital expenditures may be necessary to remain competitive.***

The market for our services and products is characterized by continual technological and process developments that have resulted in, and will likely continue to result in, substantial improvements in the functionality and performance, including environmental performance, of drilling services equipment, completion services equipment, and drilling products. Our customers are increasingly demanding the services of newer, higher specification drilling rigs and completion services and other equipment, as well as new and improved technology, such as drilling automation technology and lower-emissions operations and services,

17

specialized drill bit solutions and data analytics. Accordingly, we may have to allocate a higher proportion of our capital expenditures to maintain and improve existing rigs and completion services and other equipment, purchase and construct newer, higher specification drilling rigs and completion services and other equipment to meet the increasingly sophisticated needs of our customers, and develop new and improved technology, specialized drill bit solutions and data analytics. In addition, technological changes, process improvements and other factors that increase operational efficiencies could continue to result in oil and natural gas wells being drilled and completed more quickly, which could reduce the number of revenue earning days. Technological and process developments in the completion services and other drilling services businesses could have similar effects.

We continually attempt to develop or acquire new technologies for use in our business. For example, we have invested in natural gas-powered equipment, including electric, direct drive, and dual fuel pumps, to replace legacy diesel completion services equipment. In the event that we are successful in developing or acquiring new technologies for use in our business, there is no guarantee of future demand for those technologies. Customers may be reluctant or unwilling to adopt our new technologies. We may also have difficulty negotiating satisfactory terms for our new technologies, including terms that would enable us to obtain acceptable returns on our investment in the development or acquisition of new technologies.

Development and acquisition of new technology is critical to maintaining our competitiveness. There can be no assurance that we will be able to successfully develop or acquire technology that our customers demand. Some of our competitors have greater financial, technical and personnel resources that may allow them to enjoy technological advantages and develop, acquire and implement new technology on a more timely basis or in a more cost-effective manner. If we are not successful keeping pace with technological advances in a timely and cost-effective manner, demand for our services may decline. If any technology that we need to successfully compete is not available to us or that we implement in the future does not work as we expect, we may be adversely affected. Additionally, new technologies, services or standards could render some of our equipment, services and products obsolete, which could reduce our competitiveness and have a material adverse impact on our business, financial condition, cash flows and results of operation.

***Loss of key personnel and competition for experienced personnel may negatively impact our financial condition and results of operations.***

We greatly depend on the efforts of our key employees to manage our operations. The loss of members of management could have a material adverse effect on our business. In addition, we utilize highly skilled field-based and non-field-based personnel in operating and supporting our businesses and in developing new technologies. In times of increasing demand for our services, it may be difficult to attract and retain qualified field-based and non-field-based personnel, particularly after a prolonged industry downturn. During periods of high demand for our services or inflation, wage rates for personnel are also likely to increase (and, during recent periods of high demand and inflation, have increased), resulting in higher operating costs. During periods of lower demand for our services, we may experience reductions in force and voluntary departures of personnel, which could adversely affect our business and make it more difficult to meet customer demands when demand for our services improves. In addition, even in a period of generally lower demand for our services, if there is a high demand for our services in certain areas, it may be difficult to attract and retain qualified personnel to perform services in such areas. The loss of key employees, the failure to attract and retain qualified personnel and the increase in labor costs could have a material adverse effect on our business, financial condition, cash flows and results of operations.

***The loss or consolidation of large key customers could have a material adverse effect on our financial condition and results of operations.***

Business consolidations within the oil and natural gas industry in recent years have resulted in some of our largest customers combining and using their size and purchasing power to seek economies of scale and pricing concessions. Continuing consolidation within the industry may result in reduced capital spending within the industry generally and by our customers specifically, all of which may lead to decreased demand for our products and services. There is no assurance that we will be able to maintain our level of business and profitability with a customer after its consolidation or replace that business and profit with other customers. Additionally, consolidation among our competitors could significantly alter industry conditions and competition within the industry. As a result, the acquisition of one or more of our key customers or consolidation among our competitors may have a significant adverse impact on our business, results of operations, financial condition and cash flows. We are unable to predict what effect further consolidation in the industry may have on capital spending by our customers, prices that we can charge, our selling strategies, our competitive position, our ability to retain customers or our ability to negotiate favorable agreements with our customers, and our revenue and profitability.

With respect to our consolidated operating revenues in 2023, 2024, we received approximately 49% 53% from our ten largest customers, approximately 35% 38% from our five largest customers and 14% 11% from our largest customer. The loss of, or reduction in business from, one or more of our larger customers, due to consolidation or otherwise, could have a material adverse effect on our business, financial condition, cash flows and results of operations.

***Shortages, delays in delivery, and interruptions in supply, of equipment and materials could adversely affect our operating results.***

Periodically, the oilfield services industry has experienced shortages of equipment for upgrades, drill pipe, raw materials, replacement parts and other equipment and materials, including, in the case of our completion services operations, proppants, cement, acid, gel and water. These shortages can cause the price of these items to increase significantly and require that orders for the items be placed well in advance of expected use. In addition, any interruption in supply could result in significant delays in delivery of equipment and materials or prevent operations. Interruptions may be caused by, among other reasons:

- weather issues, whether short-term such as a hurricane, or long-term such as a drought,
- labor shortages or other labor issues,
- transportation, fuel shortages and other logistical challenges, and

- a shortage in the number of vendors able or willing to provide the necessary equipment and materials, including as a result of commitments of vendors to other customers or third parties or bankruptcies or consolidation.

These price increases, delays in delivery and interruptions in supply may require us to delay operations, increase capital and repair expenditures or otherwise incur higher operating costs. During recent years, there have been significant disruptions and delays across the global supply chain, which have created a tightening of supplies and shortages in a number of areas, including basic raw materials. Severe shortages, delays in delivery and interruptions in supply could increase our costs and limit our ability to construct, operate, maintain and upgrade drilling services equipment, completion services equipment, drilling products and other equipment and could have a material adverse effect on our business, financial condition, cash flows and results of operations.

#### ***Our business is subject to cybersecurity risks and threats.***

Our operations are increasingly dependent on effective and secure information technologies and services, including our own systems and the systems of third party vendors and service providers upon which we rely, such as those providing cloud services to us. Threats to information technology systems associated with cybersecurity risks and cyber incidents or attacks continue to grow, and include, among other things, storms and natural disasters, terrorist attacks, utility outages, attempts to gain unauthorized access to data and systems, theft, viruses, malware, ransomware, denial-of-service attacks, design defects, human error, or complications encountered as existing systems are maintained, repaired, replaced, or upgraded. Risks associated with these threats include, among other things:

- theft or misappropriation of funds, including via "phishing" or similar attacks directed at us or third parties, including our customers and vendors;
- loss, corruption, or misappropriation of intellectual property, or other proprietary or confidential information (including customer, supplier, or employee data);
- disruption or impairment of our and our customers' and vendors' business operations and safety procedures;
- personal injuries and destruction or damage to property;
- downtime and loss of revenue;
- injury to our reputation, including the perception of our products or services as having security vulnerabilities;
- negative impacts on our ability to compete;
- loss or damage to our and our customers' and vendors' information technology systems, including operational technologies and worksite data delivery systems;
- exposure to litigation and legal and regulatory liability and costs; and
- increased costs to prevent, respond to or mitigate cybersecurity events.

Some of our office personnel remain are on a "remote work" model. This model has significantly increased the use of remote networking and online conferencing services that enable employees to work outside of our corporate infrastructure and, in some cases, use their own personal devices. This may expose us to additional cybersecurity risks or related incidents. Additionally, geopolitical tensions or conflicts such as the ongoing armed conflicts between Russia and Ukraine and Israel and Hamas and the continuation of, or any escalation in the severity of, these conflicts, may further heighten the risk of cybersecurity attacks and other cyber events.

In particular, sophisticated nation state actors have targeted critical infrastructure and may continue to do so in the future.

Although we utilize various procedures and controls to mitigate our exposure to or limit the effects of the risks described above, cybersecurity attacks and other cyber events are evolving and unpredictable. In addition, there has been an increase in state-sponsored cyberattacks, which are often conducted by capable, well-funded groups. The rapid evolution and increased adoption of artificial intelligence technologies amplifies these concerns. There can be no assurance that the procedures and controls that we implement, or that our third party service providers implement, will be sufficient to protect our people, systems, information or other property. Moreover, we have no control over the information technology systems of our customers, suppliers, and others with which our systems may connect and communicate. As a result, the occurrence of a cyber incident could go unnoticed for a period of time. Even when an attack has been detected, it is not always immediately apparent what the full nature and scope of any potential harm may be, or how best to remediate it. We self-insure most of our cybersecurity risks, and any such incident could have a material adverse effect on our business, financial condition, cash flows and results of operations. As cyber incidents continue to evolve, we may be required to incur additional costs to continue to modify or enhance our protective measures or to investigate or remediate the effects of cyber incidents.

***Our commitments under supply agreements could exceed our requirements, exposing us to risks including price, timing of delivery and quality of equipment and materials upon which our business relies.***

We have purchase commitments with certain vendors to supply equipment and materials, including, in the case of our completion services business, proppants. Some of these agreements are take-or-pay or similar agreements with minimum purchase obligations. If demand for our services decreases from current levels, demand for the equipment that we use and the materials that we supply as part of these services will also decrease. In addition, our customers may self-source certain materials. If demand for our services and/or materials decreases enough, we could have contractual minimum commitments that exceed the required amount of materials we need to supply to our customers. In this instance, we could be required to purchase materials that we do not have a present need for, pay for materials that we do not take delivery of or pay prices in excess of market prices at the time of purchase.

***Growth through acquisitions, the building or upgrading of equipment and the development of technology is not assured.***

We have grown our drilling rig fleet and completion services fleet and expanded our business lines and use of technology in the past through mergers, acquisitions, upgrades, new construction and technology development. For example, in 2023, we significantly expanded our completions business through the NexTier merger, and we added a specialized drill bit solutions business through the Ulterra acquisition. There can be no assurance that acquisition opportunities will be available in the future or that we will be able to execute timely or efficiently any plans for building or upgrading equipment or developing or acquiring new technology. We are also likely to continue to face intense competition from other companies for available acquisition opportunities. In addition, because improved technology has enhanced the ability to recover oil and natural gas, our competitors may continue to upgrade and build new equipment and develop new technology, including drilling automation technology and lower-emissions operations and services.

There can be no assurance that we will:

- successfully complete any acquisitions we attempt on the terms announced, or at all,
- have sufficient capital resources to complete additional acquisitions, build or upgrade equipment or develop or acquire new technology,
- through due diligence conducted prior to an acquisition, successfully uncover situations that could result in financial or legal exposure, or appropriately quantify the exposure from known risks,
- successfully integrate additional equipment, acquired or developed technology or other assets or businesses, including the combination of our business with the businesses of NexTier and Ulterra, into our operations and internal controls, including financial reporting disclosure and enterprise resource planning, cybersecurity and information technology systems,
- effectively manage the growth and increased size, complexity and geography of our organization, and increased scrutiny from governmental authorities, including as a result of the NexTier merger, Ulterra acquisition or any other completed merger or acquisition,
- maintain existing business relationships and contract terms with our customers, distributors, suppliers, vendors, landlords, joint venture partners and other business partners, as well as with those of any acquired business, such as NexTier or Ulterra,
- successfully deploy idle, stacked, upgraded or additional equipment and acquired or developed technology,
- maintain key employees, the crews necessary to operate additional equipment, and the personnel necessary to evaluate, acquire, develop and deploy new technology, or be successful in hiring replacements for departing personnel,
- avoid unknown liabilities and unforeseen increased expenses or delays associated with the NexTier merger, Ulterra acquisition or any other merger or acquisition, or
- successfully improve our financial condition, results of operations, business or prospects, or provide an adequate return of capital, as a result of the NexTier merger, Ulterra acquisition or any other completed acquisition, the building or upgrading equipment or the development of new technology.

In addition, because we, NexTier and Ulterra previously operated independently, it is possible that the integration process could result in:

- diversion of the attention of our management; and
- the disruption of, or the loss of momentum in, our ongoing businesses or inconsistencies in standards, controls, procedures and policies.

Our failure to achieve consolidation savings, to integrate acquired businesses and technology and other assets into our existing operations successfully or to minimize any unforeseen operational difficulties could have a material adverse effect on our business. In addition, we may incur liabilities arising from events occurring prior to any completed acquisitions, prior to our establishment of adequate compliance oversight or in connection with disputes over acquired or developed technology. While we generally seek to obtain indemnities or insurance for liabilities arising from events occurring before such acquisitions, we may be unable to do so, and any indemnities or insurance we do obtain will be limited in amount and duration, and indemnities may be held to be unenforceable or the seller may not be able to indemnify us.

We may incur substantial indebtedness to finance future acquisitions, build or upgrade equipment or acquire or develop new technology, and we also may issue equity, convertible or debt securities in connection with any such acquisitions, building or upgrade program or technology development. Use of cash for these purposes may adversely affect our cash available for capital expenditures and other uses, debt service requirements could represent a significant burden on our results of operations and financial condition,

and the issuance of additional equity or convertible securities could be dilutive to existing stockholders. Also, continued growth and resulting integration efforts could strain our management, operations, employees and other resources.

#### **Our**

**Complications with the design or implementation of our new enterprise resource planning system could adversely impact our business relationships and operations.**

We rely extensively on information systems and technology to manage our business and summarize operating results. We are in the process of implementing a new enterprise resource planning ("ERP") system that expands and enhances one of our existing ERP systems to address the operations of our combined company. This ERP system will replace our existing operating and financial systems. The ERP system is designed to accurately maintain our financial records, enhance operational functionality and provide timely information to our management team related to the operation of our integrated business. The ERP system implementation process will require the investment of significant personnel and financial resources. We may be subject unable to disruption due to uncertainty associated with any pending or recently completed acquisitions, including successfully implement the NexTier merger or the Ulterra acquisition, which could have a material adverse effect on our results of operations, cash flows and financial position.

Parties with which we do business may experience uncertainty associated with any pending or recently completed acquisitions, such as the NexTier merger and the Ulterra acquisition, including with respect to current or future business relationships with us. Our business relationships may be subject to disruption as customers, distributors, suppliers, vendors, landlords, joint venture partners ERP system without experiencing delays, increased costs and other business partners may attempt difficulties. If we are unable to delay or defer entering into successfully design and implement the new business relationships, negotiate changes in existing business relationships or consider entering into business relationships with parties other than us. These disruptions could have a material adverse effect on ERP system as planned, our results of operations, cash flows and financial position, as well as a material adverse effect on our ability to realize the expected cost savings and other benefits of the applicable transaction.

**Public health crises, pandemics and epidemics may have a significant adverse impact on our business, liquidity, results of operations and cash flows could be negatively impacted. Additionally, if we do not effectively implement the ERP system as planned or the ERP system does not operate as intended, the effectiveness of our internal control over financial condition.**

The effects of public health crises, pandemics reporting and epidemics, including related governmental actions disclosure controls and restrictions related thereto, have had, procedures could be adversely affected or our ability to assess those controls adequately could be delayed.

**Fuel conservation measures, alternative fuel requirements and may in the future have, a significant adverse impact on the global economy, including the worldwide increasing consumer demand for alternatives to oil and natural gas and the level of demand for our services.**

**We are not able to enumerate all potential risks to our business from the emergence of a public health crisis, pandemic or epidemic; however, we believe that in addition to the impacts described above, other current and potential impacts include, but are not limited to: volatility in oil and natural gas prices; liquidity challenges; customers, suppliers and other third parties seeking to terminate, reject, renegotiate or otherwise avoid, and otherwise failing to perform, their contractual obligations to us; credit rating downgrades of our corporate debt and potentially higher borrowing costs in the future; a need to preserve liquidity; cybersecurity issues; litigation risk and possible loss contingencies; disruption to our supply chain; loss of workers and labor shortages; general oilfield cost inflation; a reduction of our workforce; costs associated with rationalization of our portfolio of real estate facilities; asset impairments and other accounting charges; infections and quarantining of our employees and the personnel of our customers, suppliers and other third parties; actions undertaken by international, national, regional and local governments and health officials; and a structural shift in the global economy and its demand for oil and natural gas.**

**The full extent of the impact of public health crises, pandemics and epidemics on the oil and natural gas industry and our business, liquidity, results of operations and financial condition will depend largely on the scale of such event, including the duration and spread of a subject pathogen, the impact of governmental actions designed to prevent the spread thereof and the further development, availability, timely distribution and acceptance of effective treatments and vaccines.**

**Fuel conservation measures could reduce demand for oil and natural gas, which would, in turn, reduce the demand for our services.**

Fuel conservation measures, alternative fuel requirements and increasing consumer demand for alternatives to oil and natural gas could reduce demand for oil and natural gas. The impact of the changing demand for oil and natural gas may have a material adverse effect on our business, financial condition, cash flows and results of operations. Additionally, the increased competitiveness of alternative energy sources (such as wind, solar geothermal, tidal, and biofuels) or increased focus on reducing the use of oil and natural gas (such as governmental mandates that ban the sale of new gasoline-powered automobiles, and new legislation such as the Inflation Reduction Act of 2022, which contains tax inducements and other provisions that incentivize investment, development, and deployment of alternative energy sources and technologies) could reduce demand for oil and natural gas and therefore for our services, which would lead to a reduction in our revenues.

#### **Risks Relating to the NexTier Merger and Ulterra Acquisition**

**Our ability to utilize our historic U.S. net operating loss carryforwards is expected to be limited as a result of the completion of the NexTier merger.**

As of December 31, 2023, we had approximately \$1.9 billion of gross U.S. federal net operating losses, approximately \$62.3 million of gross Canadian net operating losses, approximately \$22.6 million of gross Colombian net operating losses and approximately \$1.1 billion of post-apportionment U.S. state net operating losses as of December 31, 2023, before valuation allowances. The majority of U.S. federal net operating losses will expire in varying amounts, if unused, between 2030 and 2037. U.S. federal net operating losses generated after 2017 can be carried forward indefinitely. Canadian net operating losses will expire in varying amounts, if unused, between 2036 and 2043. Colombian net operating losses will expire in varying amounts, if unused, between 2028 and 2032. U.S. state net operating losses will expire in varying amounts, if unused, between 2024 and 2043.

Section 382 of the Code ("Section 382") generally imposes an annual limitation on the amount of NOLs that may be used to offset taxable income when a corporation has undergone an "ownership change" (as determined under Section 382). An ownership change generally occurs if one or more stockholders (or groups of stockholders) who are each deemed to own at least 5% of such corporation's stock has increased their ownership by more than 50 percentage points over their lowest ownership percentage within a rolling three-year period. In the event that an ownership change occurs, utilization of the relevant corporation's NOLs would be subject to an annual limitation under Section 382, generally determined, subject to certain adjustments, by multiplying (i) the fair market value of such corporation's stock at the time of the ownership change by (ii) a percentage approximately equivalent to the yield on long-term tax-exempt bonds during the month in which the ownership change occurs. Any unused annual limitation may be carried over to later years.

We experienced an ownership change (under Section 382) as a result of the closing of the NexTier merger. Our ability to utilize our available NOLs and other tax attributes to reduce future taxable income following this "ownership change" depends on many factors, including our future income, which cannot be assured. Based on information currently available, we expect this ownership change could cause some of our NOLs incurred prior to January 1, 2018 to expire before we would be able to utilize them to reduce taxable income in future periods, and may also require NOLs to be utilized later than they otherwise would be able to be utilized, increasing cash taxes payable in earlier years.

***Uncertainties associated with the NexTier merger and the Ulterra acquisition may cause a loss of management personnel and other key employees, which could adversely affect our future business and operations.***

We are dependent on the experience and industry knowledge of our officers and other key employees to execute our business plans. Our success will depend in part upon our ability to retain key management personnel and other key employees. Current and prospective employees may experience uncertainty about their roles within the combined company or other concerns regarding the operations of the combined company following the transactions, any of which may have an adverse effect on our ability to retain or attract key management and other key personnel. In addition, the loss of key personnel could diminish the anticipated benefits of the transactions and the integration of the companies may be more difficult. Furthermore, we may have to incur significant costs in identifying, hiring and retaining replacements for departing employees and may lose significant expertise and talent relating to the business of each of the companies. No assurance can be given that we will be able to retain or attract key management personnel and other key employees to the same extent that we have previously been able to retain or attract our own employees.

***We have incurred and are expected to continue incurring transaction costs in connection with the NexTier merger and the Ulterra acquisition, which may be in excess of those we anticipated.***

We have incurred and are expected to continue to incur non-recurring costs associated with completing the NexTier merger and the Ulterra acquisition, combining the operations of the three companies and achieving desired synergies. These costs have been, and may continue to be, substantial. We have incurred and will continue to incur costs related to formulating and implementing integration plans, including facilities and systems consolidation costs and other employment-related costs. We will continue to assess the magnitude of these costs, and additional unanticipated costs may be incurred in connection with the integration of the companies' businesses. While we have assumed that a certain level of expenses would be incurred, there are many factors beyond our control that could affect the total amount or the timing of the expenses. The elimination of duplicative costs, as well as the realization of other efficiencies related to the integration of the businesses, may not offset integration-related costs to the extent anticipated. The costs described above and any unanticipated costs and expenses could have an adverse effect on our financial condition and operating results.

22

---

***The benefits and synergies attributable to the NexTier merger and the Ulterra acquisition may vary from expectations.***

We may fail to realize the anticipated benefits and synergies expected from the NexTier merger and the Ulterra acquisition, which could adversely affect our business, financial condition and operating results. The success of the transactions will depend, in significant part, on our ability to successfully integrate the acquired businesses and realize the anticipated strategic benefits and synergies from the transactions. The anticipated benefits of the transactions may not be realized fully or at all, or may take longer to realize than expected. Actual operating, technological, strategic and revenue opportunities, if achieved at all, may be less significant than expected or may take longer to achieve than anticipated. If we are not able to achieve these objectives and realize the anticipated benefits and synergies expected from the NexTier merger and the Ulterra acquisition within the anticipated timing or at all, our business, financial condition and operating results may be adversely affected.

**Legal and Regulatory Risks**

***The adoption of any future federal, state, or local laws or implementing regulations imposing reporting obligations on, or limiting or banning, the hydraulic fracturing process could make it more difficult to complete natural gas and oil wells and could have a material adverse effect on our business, results of operations, and financial condition.***

Various federal and state legislative and regulatory initiatives have been or could be undertaken that could result in additional requirements or restrictions being imposed on hydraulic fracturing operations or result in the failure to obtain or difficulty or delay in obtaining required permits, renewals or authorizations. For example, the federal Bureau of Land Management ("BLM") published a final rule in 2015 establishing new or more stringent standards for performing hydraulic fracturing on federal and Indian lands. The BLM rescinded the 2015 rule in late 2017; however, new or more stringent regulations may be promulgated by the Biden administration. The United States may seek to adopt federal regulations or enact federal laws that would impose additional regulatory requirements on or even prohibit hydraulic fracturing in some areas. Legislation and/or regulations have been adopted in many U.S. states that require additional disclosure regarding chemicals used in the hydraulic fracturing process. Legislation, regulations, and/or policies have also been adopted at the state level that impose other types of requirements on hydraulic fracturing operations (such as limits on operations in the event of certain levels of seismic activity). Additional legislation and/or regulations have been adopted or are being considered at the state and local level that could impose further chemical disclosure or other regulatory requirements (such as prohibitions on hydraulic fracturing operations in certain areas) and/or other limitations on hydraulic fracturing operations via time, place, and manner restrictions that could affect our operations, operations, and it is possible that these state and local efforts may increase in the absence of federal actions and/or in light of federal regulatory uncertainty. Four states (New York, Maryland, Vermont, and Washington) have banned the use of high volume hydraulic fracturing, Oregon has adopted a five-year moratorium, California has taken regulatory action to phase out hydraulic fracturing permitting and activities in the state, and Colorado has enacted legislation providing local governments with regulatory authority over hydraulic fracturing operations. Local jurisdictions in some states have adopted ordinances that restrict or in certain cases prohibit the use of hydraulic fracturing, although many of these ordinances have been challenged and some have been overturned. The adoption of any future federal, state or local laws or regulations imposing reporting obligations on, or limiting or banning, the hydraulic fracturing process could make it more difficult to complete natural gas and oil wells and could have a material adverse effect on our business, results of operations, and financial condition.

***Our and our customers' operations are subject to a number of risks arising out of the threat of climate change that could result in increased operating and capital costs, limit the areas in which oil and natural gas production may occur and reduce demand for our services.***

The physical and regulatory effects of climate change could have a negative impact on our operations, our customers' operations and the overall demand for our customers' products and, accordingly, our services. There is an increasing focus of local, state, regional, national and international regulatory bodies on GHG emissions and climate change issues. Legislation to regulate GHG emissions has periodically been introduced in the U.S. Congress, and there has been a wide-ranging policy debate, both in the United States and internationally, regarding the impact of these gases and possible means for their regulation. These efforts have included consideration of cap-and-trade programs, carbon taxes, GHG reporting, tracking programs, attestation requirements and regulations that directly limit GHG emissions from certain sources. Some of the proposals would require industries to meet stringent new standards that would require substantial reductions in carbon emissions. Those reductions could be costly and difficult to implement. In the absence of federal GHG-limiting legislation, addition to such legislative efforts, the EPA has determined that GHG emissions present a danger to public health and the environment and has adopted regulations that, among other things, establish construction and operating permit reviews for GHG emissions from certain large stationary sources, require the monitoring and annual reporting of GHG emissions from certain oil and natural gas system sources, implement CAA emission standards directing the reduction of methane emissions from certain new,

modified, or reconstructed facilities in the oil and natural gas sector, and together with the U.S. Department of Transportation, implement GHG emissions limits on vehicles manufactured for operation in the United States.

The United States is currently a member. For example, generators are subject to limits on their emissions of the Paris Agreement, which requires countries to review other hazardous air pollutants including mercury under an expanded Mercury and "represent a progression" in their nationally determined contributions, which set emissions reduction goals, every five years. Under the Paris Agreement, Air Toxics Standards rule adopted by the Biden Administration has committed in 2024. In December 2023, the EPA issued a final rule updating New Source Performance Standards (NSPS) and providing emission guidelines to reduce methane and other pollutants from the oil and gas industry. Additionally, the location and operation of oil and natural gas production is impacted by laws concerning impacts to protected species and their habitats. The federal Endangered Species Act, as amended ("ESA"), restricts activities in the United States that may affect endangered or threatened species and/or their habitats. If endangered species and/or their habitats are located in areas of the United States with oil and natural gas exploration and production operations, such operations can be prohibited or delayed or require potentially costly mitigation efforts. Additionally, in the absence of federal action and listing of endangered species and habitats, states and local governments may increasingly attempt to reducing its greenhouse gas emissions by 50-52% from 2005 levels by 2030. step in to subject such species and habitats to state protections under analogous state statutes. Changes to the designation of previously unprotected species as threatened or endangered or designation of previously unprotected habitat as critical habitat in areas of the United States can result in limitations on exploration and production activities, impacting our and our customers' operating costs and demand for services.

In November 2021, the United States and other countries entered into the Glasgow Climate Pact, which

includes a range of measures designed to address climate change, including but not limited to the phase-out of fossil fuel subsidies, reducing methane emissions 30% by 2030, and cooperating toward the advancement of the development of clean energy. Several states and geographic regions in the United States have also adopted legislation and regulations to reduce emissions of GHGs, including cap and trade regimes and commitments to contribute to meeting the goals of the Paris Agreement.

certain emissions reduction goals.

Governmental, scientific, and public concern over the threat of climate change arising from GHG emissions has resulted in increasing political risks in the United States. PresidentA number of new GHG-related initiatives went into effect under the prior Biden and Administration, which initiatives may be modified or reversed under the Democratic Party have identified climate change as a priority, and it is possible that additional executive orders and/or regulatory action targeting greenhouse gas emissions, or prohibiting or restricting oil and natural gas development activities in certain areas, will be proposed and/or promulgated during Trump Administration. The Trump Administration may diverge from the Biden Administration. In 2021, Administration's positions and could withdraw from or otherwise roll back existing GHG commitments. For example, in January 2025, President Biden issued Trump signed an executive order imposing a moratorium on new oil and natural gas leasing on federal lands and offshore waters pending completion of a comprehensive review and reconsideration of federal oil and natural gas permitting and leasing practices. President Biden's order also established climate change as a primary foreign policy and national security consideration, affirms that achieving net-zero greenhouse gas emissions by or before midcentury is a critical priority, affirms the Biden Administration's desire to establish withdraw the United States as a leader in addressing climate change, generally further integrates climate change from the Paris Agreement. While it is not possible at this time to predict exactly which and environmental justice considerations into government agencies' decision-making, to what extent such commitments will be modified, and eliminates fossil fuel subsidies, among other measures. Although a federal judge for the U.S. District Court of the Western District of Louisiana issued a permanent injunction in 13 states that filed a lawsuit against the pause of oil and natural gas leasing on public lands or in offshore waters, the Biden Administration how any such actions may take other regulatory steps in the future that could impact our operations. Other business, such actions impacting oil could prompt more activity from state and natural gas production activities that could be pursued by the Biden administration may include more restrictive requirements for the establishment of pipeline infrastructure or the permitting of liquefied natural gas export facilities, such as the January 2024 pause on permitting of certain new liquefied natural gas export facilities. Moreover, in August 2022, President Biden signed into law the Inflation Reduction Act, which contains tax inducements local legislative bodies and administrative agencies to pass stricter GHG laws, regulations, and other provisions that incentivize investment, development, and deployment of alternative energy sources and technologies, which could increase operating costs within the oil and natural gas industry and accelerate the transition away from fossil fuels, binding commitments.

It is not possible at this time to predict the timing and effects of climate change or whether additional climate-related legislation, regulations or other measures will be adopted at the local, state, regional, national and international levels. However, continued efforts by governments and non-governmental organizations to reduce GHG emissions appear likely, and additional legislation, regulation or other measures that control or limit GHG emissions or otherwise seek to address climate change could adversely affect our business. The cost of complying with any new law, regulation or treaty will depend on the details of the particular program. We will continue to monitor and assess any new policies, legislation or regulations in the areas where we operate to determine the impact of GHG emissions and climate change on our operations and take appropriate actions, where necessary. Any direct and indirect costs of meeting these requirements may adversely affect our business, results of operations and financial condition. Because our business depends on the level of activity in the oil and natural gas industry, existing or future laws or regulations related to GHGs and climate change, including incentives to conserve energy or use alternative energy sources, could have a negative impact on our business if such laws or regulations increase compliance costs, add operating restrictions, or reduce demand for our customers' products and, accordingly, our services.

Increasing attention to the risks of climate change has resulted in an increased possibility of lawsuits or investigations brought by public and private entities against oil and natural gas companies in connection with their GHG emissions. Should we be targeted by any such litigation or investigations, we may incur liability, which, to the extent that societal pressures or political or other factors are involved, could be imposed without regard to the causation of or contribution to the asserted damage, or to other mitigating factors.

These political, litigation, and financial risks may result in our customers restricting or cancelling production activities, incurring liability for infrastructure damage as a result of climatic changes, or impairing their ability to continue to operate in an economic manner, which also could reduce demand for our products and services. One or more of these developments could have a material adverse effect on our business, financial condition, cash flows and results of operations. Finally, increasing concentrations of GHGs in the Earth's atmosphere may produce climate changes that have significant physical effects, such as increased frequency and severity of storms, floods and other climatic events. If any such effects were to occur, they could have an adverse effect on our and our customers' facilities and operations.

#### **Environmental and occupational health and safety laws and regulations, including violations thereof, could materially adversely affect our operating results.**

Our business is subject to numerous federal, state, foreign, regional and local laws, rules and regulations governing the discharge of substances into the environment, protection of the environment and worker health and safety, including, without limitation, laws concerning the containment and disposal of hazardous substances, oil field waste and other waste materials, the use of underground storage tanks, and the use of underground injection wells. The cost of compliance with these laws and regulations could be substantial.

For example, in the United States, the Comprehensive Environmental Response Compensation and Liability Act of 1980, as amended ("CERCLA"), and comparable state statutes impose strict liability on owners and operators of sites, including prior owners and operators who are no longer active at a site, as well as persons who disposed of or arranged for the disposal of "hazardous substances" found at sites.

The Resource Conservation and Recovery Act ("RCRA"), as amended, and comparable state statutes and implementing regulations govern the disposal of "hazardous wastes." Although CERCLA currently excludes petroleum from the definition of "hazardous substances," and RCRA also excludes certain classes of exploration and production wastes from regulation, such exemptions may be deleted, limited, or modified in the future. The Clean Water Act ("CWA") and analogous state laws provide for administrative, civil and criminal penalties for unauthorized discharges and, together with the Oil Pollution Act of 1999, as amended, impose liability for the remedial costs and associated damages arising out of any unauthorized discharges, including oil and produced water spills, into jurisdictional waters.

Our operations are also subject to federal, state, foreign, regional and local laws, rules and regulations for the control of air emissions, including those associated with the Clean Air Act. We and our customers may be required to make capital expenditures in the future for air pollution control equipment in connection with obtaining and maintaining operating permits and approvals for air emissions. We are also subject to regulation by numerous other regulatory agencies, including, but not limited to, the U.S. Department of Labor, which oversees employment practice standards.

Furthermore, the U.S. Occupational Safety and Health Administration ("OSHA") promulgates and enforces laws and regulations governing the protection of the health and safety of employees. The OSHA hazard communication standard, EPA community right-to-know regulations under Title III of CERCLA and similar state statutes require that information be maintained about hazardous materials used or produced in our operations and that this information be provided to employees, state and local governments and citizens. Also, OSHA has established a variety of standards related to workplace exposure to hazardous substances and employee health and safety.

Other jurisdictions where we may conduct operations have similar environmental, employee health and safety and other regulatory regimes with which we would be required to comply. These laws, rules and regulations also require that facility sites and other properties associated with our operations be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. In addition, new projects or changes to existing projects may require the submission and approval of environmental assessments or permit applications. These laws, rules and regulations are subject to frequent change, and the clear trend is to place increasingly stringent limitations on activities that may affect the environment.

A failure to comply with these requirements could expose us to:

- substantial civil, criminal and/or administrative penalties or judgments,
- modification, denial or revocation of permits or other authorizations,
- imposition of limitations on our operations, and
- performance of site investigatory, remedial or other corrective actions.

In addition, environmental laws and regulations in the places that we operate impose a variety of requirements on "responsible parties" related to the prevention of spills and liability for damages from such spills. As an owner and operator of land-based drilling rigs and completion services equipment, a manufacturer and servicer of equipment and automation to the energy, marine and mining industries and a provider of directional drilling and other services, we may be deemed to be a responsible party under these laws and regulations. In the event hydrocarbons and other materials may have been disposed of, or released in or under properties currently or formerly owned or operated by us or our predecessors, which may have resulted, or may result, in soil and groundwater contamination in certain locations, any contamination found on, under or originating from the properties may be subject to remediation requirements under federal, state, foreign, regional and local laws, rules and regulations. In addition, some of these properties have been operated by third parties over whom we have no control of their treatment of hydrocarbon and other materials or the manner in which they may have disposed of or released such materials. We could be required to remove or remediate wastes disposed of or released by prior owners or operators. In addition, it is possible we could be held responsible for oil and natural gas properties in which we own an interest but are not the operator.

25

---

**Technology Intellectual property disputes could negatively impact our operations, costs, revenues and competitiveness.**

Our services and products use proprietary technology and equipment, which can involve potential infringement of a third party's rights, or a third party's infringement of our rights, including patent rights. The majority of the intellectual property rights relating to our drilling services equipment, completion services equipment, and drilling products are owned by us or certain of our supplying vendors. However, in the event that we or one of our customers or supplying vendors becomes involved in a dispute over infringement of intellectual property rights relating to equipment or technology owned or used by us, services performed by us or products provided by us, we may lose access to important equipment or technology or our ability to provide services or products, or we could be required to cease use of some equipment or technology or forced to modify our equipment, technology, services or products. We could also be required to pay license fees or royalties for the use of equipment or technology or provision of services or products. In addition, we may lose a competitive advantage in the event we are unsuccessful in enforcing our rights against third parties, third parties are successful in enforcing their rights against us, or our competitors are able to develop technology independently that is similar to ours without infringing on our patents or gaining access to our trade secrets.

Regardless of the merits, any such claims may result in significant legal and other costs, including reputational harm, and may distract management from running our business. Some of our competitors and current and potential vendors have a substantial amount of intellectual property related to new equipment and technologies. We cannot guarantee that our equipment, technology, services or products will not be determined to infringe currently issued or future issued patents or other intellectual property rights belonging to others, including, without limitation, situations in which our equipment, technology, services or products may be covered by patent applications filed by other parties. Technology disputes involving us or our customers or supplying vendors could have a material adverse impact on our business, financial condition, cash flows and results of operations.

Certain subsidiaries we acquired in the Ultrerra acquisition are defendants in a claim brought by a subsidiary of NOV Inc. alleging breach of a license agreement related to certain patents. Such subsidiaries have asserted defenses to the claim and are defending vigorously against this claim. An unfavorable judgment or resolution of this claim not covered by indemnity could have a material adverse effect impact on our business, financial condition and results of operations.

**results.**

**The design, manufacture, sale or rental and servicing of products, including drill bits and electrical controls, may subject us to liability for personal injury, property damage and environmental contamination should such equipment fail to perform to specifications.**

**contamination.**

We provide products, including specialized drill bit solutions and electrical controls, to customers involved in oil and natural gas exploration, development and production and in the marine and mining industries. Because of applications that use our products and services, a failure of such equipment, or a failure of our customer to maintain or operate the equipment properly, could cause harm to our reputation, contractual and warranty-related liability, damage to the equipment, damage to the property of customers and others, personal injury and environmental contamination, leading to claims against us. Any lawsuits or claims against us could have a material adverse effect on our business, financial condition and results of operations.

**Legal proceedings and governmental investigations could have a negative impact on our business, financial condition and results of operations.**

The nature of our business makes us susceptible to legal proceedings and governmental investigations from time to time. In addition, during periods of depressed market conditions, we may be subject to an increased risk of our customers, vendors, current and former employees and others initiating legal proceedings against us. Lawsuits or claims against us could have a material adverse effect on our business, financial condition and results of operations. Any legal proceedings or claims, even if fully indemnified or insured, could negatively affect our reputation among our customers and the public, and make it more difficult for us to compete effectively or obtain adequate insurance in the future. Please see "Our operations are subject to a number of operational risks, including environmental and weather risks, which could expose us to significant losses and damage claims. We are not fully insured against all of these risks and our contractual indemnity provisions may not fully protect us."

***Political, economic and social instability risk and laws associated with conducting international operations could adversely affect our opportunities and future business.***

We provide specialized drill bit solutions throughout North America and internationally in over 30 countries, as well as contract drilling services in Colombia, Colombia and Ecuador. We also sell products, including electrical controls, for use in numerous oil and natural gas producing regions outside of North America. In addition, through our Superior QC business, we occasionally provide remote data analytics and other services to customers to support their operations outside of the United States. One of our subsidiaries recently closed a joint venture in Abu Dhabi. We also continue to evaluate opportunities from time to time to provide our services and products outside of the United States. International operations and sales or rentals of products are subject to certain political, economic and other uncertainties generally not encountered in U.S. operations, including increased risks of social and political unrest, changing political conditions and changing laws and policies affecting trade and investment, strikes, work stoppages, labor disputes and other slowdowns, terrorism, war, kidnapping of employees, blockades, regional economic downturns, nationalization, forced negotiation or modification of contracts, difficulty resolving disputes and enforcing contractual rights, difficulty in collecting international accounts receivable, potentially longer payment cycles, expropriation of equipment as well as expropriation of oil and natural gas exploration and drilling rights, foreign taxation and customs regulations, the overlap of different tax structures, changes in taxation policies, foreign exchange restrictions and restrictions on repatriation of income and capital, currency rate fluctuations, increased governmental ownership and regulation of the economy and industry in the markets in which we may operate, economic and financial instability of national oil companies, and restrictive governmental regulation, bureaucratic delays and general hazards associated with foreign sovereignty over certain areas in which operations are conducted.

There can be no assurance that there will not be changes in local laws, regulations and administrative requirements, or the interpretation thereof, which could have a material adverse effect on the cost of entry into international markets, the profitability of international operations or the ability to continue those operations in certain areas. Because of the impact of local laws, any current and future international operations in certain areas may be conducted through entities in which local citizens own interests and through entities (including joint ventures) ventures, such as our Abu Dhabi joint venture in which we hold only a minority interest or pursuant to arrangements under which we conduct operations under contract to local entities. While we do not control the actions of our joint venture partners, their actions could have an effect on our investment in the joint ventures and more generally our overall reputation. While we believe that neither operating through such entities nor pursuant to such arrangements would have a material adverse effect on our operations or revenues, there can be no assurance that we will in all cases be able to structure or restructure our operations to conform to local law (or the administration thereof) on terms we find acceptable. Additionally, we may be subject to foreign governmental regulations favoring or requiring the awarding of contracts to local contractors or requiring foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction. These regulations could adversely affect our ability to compete.

There can be no assurance that we will:

- identify attractive opportunities in international markets,
- have sufficient capital resources to pursue and consummate international opportunities,
- successfully integrate international drilling and completion operations or other assets or businesses,
- effectively manage the start-up, development and growth of an international organization and assets,
- hire, attract and retain the personnel necessary to successfully conduct international operations, or
- receive awards for work and successfully improve our financial condition, results of operations, business or prospects as a result of the entry into one or more international markets.

In addition, the U.S. Foreign Corrupt Practices Act ("FCPA") and similar anti-bribery laws in other jurisdictions generally prohibit companies and their intermediaries from making improper payments to foreign officials for the purpose of obtaining or retaining business. Some parts of the world where our services are or could be provided or where our consumers for products are located have experienced governmental corruption to some degree and, in certain circumstances, strict compliance with anti-bribery laws may conflict with local customs and practice and could impact business. Any failure to comply with the FCPA or other anti-bribery legislation could subject us to civil, criminal and/or administrative penalties or other sanctions, which could have a material adverse impact on our business, financial condition and results of operation. In addition, investors could negatively view potential violations, inquiries or allegations of misconduct under the FCPA or similar laws, which could adversely affect our reputation and the market for our shares. We could also face fines, sanctions and other penalties from authorities in the relevant foreign jurisdictions, including prohibition of our participating in or curtailment of business operations in those jurisdictions and the seizure of drilling rigs, completion services equipment, manufacturing facilities, drilling products or other assets.

Many countries, including the United States, control the import and export of certain goods, services and technology and impose related import and export recordkeeping and reporting obligations. Governments also may impose economic sanctions against certain countries, persons and other entities that may restrict or prohibit transactions involving

such countries, persons and entities. In particular, U.S. sanctions are targeted against certain countries that are heavily involved in the oil and natural gas industry. The laws and regulations concerning import and export activity, recordkeeping and reporting, including customs, export controls and economic sanctions, are complex and constantly changing. Any failure to comply with applicable legal or regulatory requirements governing international trade could also result in criminal and civil penalties and sanctions, such as fines, imprisonment, debarment from government contracts, seizure of shipments and loss of import and export privileges.

We may incur substantial indebtedness to finance an international transaction or operations, and we also may issue equity, convertible or debt securities in connection with any such transactions or operations. Debt service requirements could represent a significant burden on our results of operations and financial condition, and the issuance of additional equity or convertible securities could be dilutive to existing stockholders. Also, international expansion could strain our management, operations, employees and other resources.

The occurrence of one or more events arising from the types of risks described above could have a material adverse impact on our business, financial condition and results of operations.

***We are subject to complex and evolving laws and regulations regarding data privacy and security.***

Governments around the world have implemented, and continue to implement, laws and regulations regarding data privacy and security, including with respect to the protection and processing of personal employee and customer data. These laws and regulations vary from jurisdiction to jurisdiction, and we are obligated to comply in all jurisdictions in which we conduct business. In the normal course of business, we and our third-party vendors or service providers may collect, process, and store data that is subject to those specific laws and regulations governing personal data. Failure to comply with these laws and regulations could subject us to significant liability, including fines, penalties, and potential criminal sanctions.

**Financial Risks**

***Investor sentiment and public perception related to the oil and natural gas industry and to ESG initiatives could increase our costs of capital and our reporting requirements and impact our operations.***

There are financial risks for oil and natural gas producers, as stockholders and bondholders currently invested in oil and natural gas companies and concerned about the potential effects of climate change, ESG and other sustainability-related issues may elect in the future to shift some or all of their investments into non-fossil fuel energy related sectors, or into competitors who are perceived to have stronger ESG practices and disclosures. At the same time, some stakeholders and regulators have increasingly expressed or pursued opposing views, legislation, and investment expectations with respect to ESG, including the enactment or proposal of "anti-ESG" legislation or policies. In addition, other parties such institutional lenders may consider sustainability factors in lending to us or our customers. Limitations of investments in and financing for oil and natural gas could result in the restriction, delay, or cancellation of drilling and completion programs or development of production activities. Our ESG practices and, through the publishing of our Sustainability Report from time to time, disclosures may be subject to increased scrutiny and may not satisfy investor the requirements of all stakeholders or their requirements may not be made known to us. We may continue to face pressure regarding our ESG practices and disclosures.

We have developed, and will continue to develop, goals and other objectives related to ESG and sustainability matters. Statements related to these goals and objectives made in our published Sustainability Report and other public disclosure reflect our current plans and do not constitute a guarantee that they will be achieved. Our ability to achieve any stated goal or objective is subject to numerous factors and conditions, some of which are outside of our control. Our efforts to accurately report on ESG and sustainability matters, including our efforts to research, establish, accomplish and accurately report on our goals and objectives, expose us to numerous operational, reputational, financial, legal, and other risks. Standards for tracking and reporting on ESG and sustainability matters, including climate-related matters, have not been harmonized and continue to evolve. Our processes and controls for reporting on ESG and sustainability matters, including our goals and objectives, may not always comply with evolving and disparate standards for identifying, measuring, disclosing and reporting such metrics, including any climate change and sustainability-related public company disclosure requirements adopted by the SEC, and such standards may change over time, which could result in significant revisions to our current ESG practices and disclosures.

The lending and investment practices of institutional lenders and investors have been the subject of intensive lobbying efforts in recent years, oftentimes public in nature, not to provide funding for oil and natural gas producers, and some lenders and insurers have announced that they will not lend to or provide insurance for oil and natural gas companies. Limitation of investments in and financings for oil and natural gas could result in the restriction, delay, or cancellation of drilling and completion programs or development of production activities. An increasing number of our customers consider sustainability factors in awarding work. If we are unable to meet the ESG standards or investment criteria set by our customers, investors and other parties, which continue to evolve, if we are unable to successfully continue our sustainability enhancement efforts, or if, notwithstanding our own efforts, our industry becomes the focus of increasing ESG and sustainability related pressures, we may lose customers, we may lose investors, our cost of capital may increase, our stock price may be negatively impacted, our reputation may be negatively affected, and it may be more difficult for us to effectively compete or assess acquisitions. At the same time, some stakeholders and

regulators have increasingly expressed or pursued opposing views, legislation, and investment expectations with respect to ESG, including the enactment or proposal of "anti-ESG" legislation or policies. By publishing our Sustainability Report from time to time, our business may also face increased scrutiny related to ESG activities and be unable to satisfy all stakeholders.

***Variable rate indebtedness subjects us to interest rate risk, which could cause our debt service obligations to increase significantly.***

***We have***

In January 2025, we put in place a committed senior unsecured revolving credit facility that includes a revolving credit facility. Interest amended the Prior Credit Agreement. Under the Credit Agreement, interest is paid on the outstanding principal amount of borrowings under the credit facility at a floating rate based on, at our election, the SOFR rate (subject to (plus a 0.10% per annum adjustment) or base rate, in each case subject to a 0% 0.00% floor. The Under the Credit Agreement, the applicable margin on SOFR rate loans varies from 1.00% 1.25% to 2.00% 2.25% and the applicable margin on base rate loans varies from 0.00% 0.25% to 1.00% 1.25%, in each case determined based on our credit rating. As of December 31, 2023 December 31, 2024, under the Prior Credit Agreement, the applicable margin on SOFR rate loans was 1.75% and the applicable margin on base rate loans was 0.75%. As of December 31, 2023 December 31, 2024, we had no borrowings outstanding under our revolving credit facility.

the Prior Credit Agreement.

We also have in place a reimbursement agreement pursuant to which we are required to reimburse the issuing bank on demand for any amounts that it has disbursed under any of our letters of credit issued thereunder. We are obligated to pay the issuing bank interest on all amounts not paid by us on the date of demand or when otherwise due at the LIBOR Prime rate plus 2.25% 2.00% per annum. As of December 31, 2023 December 31, 2024, no amounts had been disbursed under any letters of credit, and we had \$87.7 million \$38.8 million in letters of credit outstanding under the reimbursement agreement.

Interest rates could rise for various reasons in the future and increase our total interest expense, depending upon the amounts borrowed at floating rates under these agreements or under future agreements, as well as the terms of any future amendments to our existing agreements or future agreements.

***Our ability to access capital markets could be limited, and a downgrade in our credit rating could negatively impact our cost of and ability to access capital.***

From time to time, we may need to access capital markets to obtain financing. Our ability to access capital markets for financing could be limited by oil and natural gas prices, our existing capital structure, the state of the economy, the health or market perceptions of the drilling and overall oil and natural gas industry, the liquidity of the capital markets and ESG-related regulatory and investor requirements and other factors. Many of the factors that affect our ability to access capital markets are outside of our control. No assurance can be given that we will be able to access capital markets on terms acceptable to us when required to do so, which could have a material adverse impact on our business, financial condition and results of operations.

Additionally, our ability to access capital markets or to otherwise obtain sufficient financing is enhanced by our senior unsecured debt ratings as provided by major U.S. credit rating agencies. Factors that may impact our credit ratings include debt levels, liquidity, asset quality, cost structure, commodity pricing levels, industry conditions and other considerations. A ratings downgrade could adversely impact our ability in the future to access debt markets, increase the cost of future debt, impact the terms of future amendments to our senior unsecured credit facility and potentially require us to post letters of credit for certain obligations.

***We may not be able to generate sufficient cash to service all of our debt and we may be forced to take other actions to satisfy our obligations under our debt, which may not be successful.***

Our ability to make scheduled payments on or to refinance our debt obligations depends on our financial and operating performance, including the ability of our subsidiaries to generate sufficient cash flows, which is subject to prevailing economic and competitive conditions and to certain financial, business and other factors beyond our control. We cannot assure you that we will maintain a level of cash flows from operating activities sufficient to permit us to pay the principal, premium, if any, and interest on our indebtedness.

In addition, if our cash flows and capital resources are insufficient to fund our debt service obligations, we may be forced to reduce or delay capital expenditures, sell assets or operations, seek additional capital or restructure or refinance our debt. We cannot assure you that we would be able to take any of these actions, that these actions would be successful and would permit us to meet our scheduled debt service obligations or that these actions would be permitted under the terms of our existing or future debt agreements. In the absence of such cash flows and capital resources, we could face substantial liquidity problems and might be required to dispose of material assets or operations to meet our debt service and other obligations. However, our debt agreements contain restrictions on our ability to dispose of assets. We may not be able to consummate those dispositions, and any proceeds may not be adequate to meet any debt service obligations then due.

29

***Our return of capital to stockholders, including through the payment of dividends and repurchases of our common stock, is within the discretion of our Board of Directors, and there is no guarantee that we will return capital to shareholders, including through the payment of dividends and repurchases of our common stock, in the future or at levels anticipated by our stockholders.***

Although we currently plan to return capital to stockholders, the amount and timing of returns of capital to stockholders may vary from time to time. The amount and timing of all returns of capital, including future dividend payments and purchases pursuant to our stock buyback program, if any, are subject to the discretion of the Board of Directors and will depend upon business conditions, results of operations, financial condition, terms of our debt agreements and other factors. Our Board of Directors may, without advance notice, reduce or suspend our dividend or limit, suspend or terminate our stock repurchase program. There can be no assurance that we will pay a dividend or make repurchases of our common stock in the future. The payment of dividends and stock repurchases could diminish our cash reserves, which may impact our ability to meet our working capital needs, satisfy our debt obligations, make capital expenditures, grow and pursue strategic opportunities and acquisitions. In addition, any elimination of, or downward revision in, our stock buyback program or dividend payments could have an adverse effect on the market price of our common stock.

***Our ability to utilize our historic U.S. net operating loss carryforwards is expected to be limited as a result of the completion of the NexTier merger.***

As of December 31, 2024, we had approximately \$1.5 billion of gross U.S. federal net operating losses, approximately \$58.7 million of gross Canadian net operating losses and approximately \$910 million of post-apportionment U.S. state net operating losses as of December 31, 2024, before valuation allowances. The majority of the U.S. federal net operating losses are generated after 2017

and can be carried forward indefinitely. Canadian net operating losses will expire in varying amounts, if unused, between 2036 and 2044. U.S. state net operating losses will expire in varying amounts, if unused, between 2025 and 2044.

Section 382 of the Internal Revenue Code ("Section 382") generally imposes an annual limitation on the amount of NOLs that may be used to offset taxable income when a corporation has undergone an "ownership change" (as determined under Section 382). An ownership change generally occurs if one or more stockholders (or groups of stockholders) who are each deemed to own at least 5% of such corporation's stock has increased their ownership by more than 50 percentage points over their lowest ownership percentage within a rolling three-year period. In the event that an ownership change occurs, utilization of the relevant corporation's NOLs would be subject to an annual limitation under Section 382, generally determined, subject to certain adjustments, by multiplying (i) the fair market value of such corporation's stock at the time of the ownership change by (ii) a percentage approximately equivalent to the yield on long-term tax-exempt bonds during the month in which the ownership change occurs. Any unused annual limitation may be carried over to later years.

We experienced an ownership change (under Section 382) as a result of the closing of the NexTier merger. Our ability to utilize our available NOLs and other tax attributes to reduce future taxable income following this "ownership change" depends on many factors, including our future income, which cannot be assured. Based on information currently available, we expect this ownership change could cause some of our NOLs incurred prior to January 1, 2018 to expire before we would be able to utilize them to reduce taxable income in future periods, and may also require NOLs to be utilized later than they otherwise would be able to be utilized, increasing cash taxes payable in earlier years.

#### **Risks Related to Our Common Stock and Corporate Structure**

***The market price of our common stock may be highly volatile, and investors may not be able to resell shares at or above the price paid.***

The trading price of our common stock may be volatile. Securities markets worldwide experience significant price and volume fluctuations. This market volatility, as well as other general economic, market or political conditions, could reduce the market price of our common stock in spite of our operating and/or financial performance. The following factors, in addition to other factors described in this "Risk Factors" section and elsewhere in this Report, may have a significant impact on the market price of our common stock:

- investor perception of us and the industry and markets in which we operate;
- general financial, domestic, international, economic, and market conditions, including overall fluctuations in the U.S. equity markets;
- increased focus by the investment community on sustainability practices at our company and in the oil and natural gas industry generally;
- changes in customer needs, expectations or trends and our ability to maintain relationships with key customers;
- our ability to implement our business strategy;
- changes in our capital structure, including the issuance of additional debt;
- public announcements (including the timing of these announcements) regarding our business, financial performance and prospects or new services or products, service or product enhancements, technological advances or strategic actions, such as acquisitions or divestitures, restructurings or significant contracts, by our competitors or us;
- trading activity in our stock, including portfolio transactions in our stock by us, our executive officers and directors, and significant stockholders or trading activity that results from the ordinary course rebalancing of stock indices in which we may be included;
- any elimination of, or downward revision in, our stock buyback program or dividend payments;
- short-interest in our common stock, which could be significant from time to time;
- our inclusion in, or removal from, any stock indices;
- changes in earnings estimates or buy/sell recommendations by securities analysts;
- whether or not we meet earnings estimates of securities analysts who follow us; and
- regulatory or legal developments in the United States and the foreign countries where we operate.

30

***Anti-takeover measures in our charter documents and under state law could discourage an acquisition and thereby affect the related purchase price.***

We are a Delaware corporation subject to the Delaware General Corporation Law, including Section 203, an anti-takeover law. Our restated certificate of incorporation authorizes our Board of Directors to issue up to one million shares of preferred stock and to determine the price, rights (including voting rights), conversion ratios, preferences and privileges of that stock without further vote or action by the holders of the common stock. It also prohibits stockholders from acting by written consent without the holding of a meeting. In addition, our bylaws impose certain advance notification requirements as to business that can be brought by a stockholder before annual stockholder meetings and as to persons nominated as directors by a stockholder. As a result of these measures and others, potential acquirers might find it more difficult or be discouraged from attempting to effect an acquisition

transaction with us. This may deprive holders of our securities of certain opportunities to sell or otherwise dispose of the securities at above-market prices pursuant to any such transactions.

***Our bylaws provide that the Court of Chancery of the State of Delaware and the federal district courts of the United States are the exclusive forums for substantially all disputes between us and our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers or employees.***

Our bylaws provide that, to the fullest extent permitted by law, the Court of Chancery of the State of Delaware (or, if the Court of Chancery does not have, or declines to accept, jurisdiction, another state court or a federal court located within the State of Delaware) is the exclusive forum for any claims, including claims in the right of Patterson-UTI: (a) that are based upon a violation of a duty by a current or former director, officer, employee or stockholder in such capacity, or (b) as to which the General Corporation Law of the State of Delaware confers jurisdiction upon the Court of Chancery. This provision would not apply to suits brought to enforce a duty or liability created by the Exchange Act or any other claim for which the U.S. federal courts have exclusive jurisdiction. Our bylaws further provide that the sole and exclusive forum for any complaint asserting a cause of action arising under the Securities Act, to the fullest extent permitted by law, shall be the federal district courts of the United States. The enforceability of similar exclusive federal forum provisions in other companies' organizational documents has been challenged in legal proceedings, and while the Delaware Supreme Court has ruled that this type of exclusive federal forum provision is facially valid under Delaware law, there is uncertainty as to whether other courts would enforce such provisions and that investors cannot waive compliance with the federal securities laws and the rules and regulations thereunder. These exclusive forum provisions may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or our directors, officers or other employees, which may discourage such lawsuits against us and our directors, officers and other employees. Alternatively, if a court were to find either exclusive forum provision in our bylaws to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which could have a material adverse effect on our business, financial condition, and results of operations.

#### **Item 1B. Unresolved Staff Comments.**

None.

#### **Item 1C. Cybersecurity**

We have implemented and maintain a cybersecurity program that is aligned with the NIST Framework and reasonably designed to protect our information and to assess, identify, and manage risks from cybersecurity threats that may result in material adverse effects on the confidentiality, integrity, and availability of our information systems.

##### *Governance*

Our Board of Directors has delegated the primary responsibility to oversee cybersecurity matters to the Audit Committee. The Audit Committee regularly periodically reviews the measures implemented by the Company to identify and mitigate data protection and cybersecurity risks. As part of such reviews, the Audit Committee receives reports and presentations from members of our senior leadership for overseeing the company's cybersecurity risk management, including the Senior Vice President of Information Technology, which address a wide range of topics including recent developments, evolving standards, vulnerability assessments, third-party and independent reviews, the threat environment, technological trends and information security considerations arising with respect to the Company's peers and third parties. Such members of our senior leadership also report to the Board at least annually on cybersecurity matters, including information security and cybersecurity risk. We have protocols by which certain cybersecurity incidents that meet established reporting thresholds are escalated within the Company and, where appropriate, reported promptly to the Board of Directors and Audit Committee.

31

Our Audit Committee is responsible for overseeing information security and cybersecurity risk. Senior leadership communicates with the Audit Committee at least quarterly regarding information security and cybersecurity risk and formally reports to the entire Board of Directors on information security and cybersecurity risk at least annually.

At the management level, our Senior Vice President of Information Technology, who has extensive cybersecurity knowledge and skills gained from over 18 19 years of work experience at our company and elsewhere, heads the team responsible for implementing, monitoring, and maintaining information security and cybersecurity practices across our businesses and reports directly to the our Chief Financial Officer.

The Senior Vice President of Information Technology receives reports on information security and cybersecurity threats from our Director of Infrastructure and Cybersecurity and in conjunction with management, regularly reviews risk management measures implemented by our company to identify and mitigate information security and cybersecurity risks. A number of experienced information security team members responsible for various parts of the business also report to the Senior Vice President of Information Technology on an ongoing basis. In addition to our internal cybersecurity capabilities, we also regularly engage assessors, consultants, auditors, and other third parties to assist with assessing, identifying, and managing cybersecurity risks.

We have adopted a cybersecurity incident reporting process ("IRP") that applies in the event of a cybersecurity threat or incident to provide a standardized framework for responding to security incidents. response. The IRP sets out a coordinated approach to investigating, containing, documenting, and mitigating incidents, including reporting findings and keeping senior management, the Board of Directors and other key stakeholders informed and involved as appropriate.

##### *Risk Management and Strategy*

Our senior management and representatives from our business units regularly communicate with the Board of Directors on risk management matters, including cybersecurity risks. Senior management conducts regular risk assessments to identify risks that have the potential to significantly affect our business over the short-, medium- and longer term and reviews with the Board of Directors risk mitigation and oversight measures, including prioritization of risk management and allocation of responsibility within our company for the management of a particular risk.

We continue to improve our cybersecurity risk assessment program and activities for assessing, identifying and managing cybersecurity risks through industry standard security frameworks and leading practices, including risk assessments and remediations, software and services, continuous systems monitoring, vendor risk management processes, incident response plans, phishing simulations, employee training, tabletop exercises and communication programs, among other measures. We also employ processes designed to assess, identify, and manage the potential impact of a security incident at critical third-party vendors, service providers or customers or otherwise implicating the third-party technology and systems we use.

All employees with a company-provided email **receive** **are assigned** annual cyber awareness training. In addition, we perform monthly phishing simulations, with remediation training required as necessary.

While we have not experienced material cybersecurity threats or incidents, or threats or incidents that are reasonably likely to materially affect us, there can be no guarantee that we will not be the subject of future successful attacks, threats or incidents. Information on cybersecurity risks and threats we face can be found in Part I, Item 1A "Risk Factors" of this Report under the heading "Our business is subject to cybersecurity risks and threats."

## Item 2. Properties

Our property consists primarily of drilling rigs and related equipment, completion services equipment and rental bits. We own substantially all of the equipment used in our businesses.

Our corporate headquarters is in leased office space and is located at 10713 W. Sam Houston Parkway N., Suite 800, Houston, Texas, 77064. Our telephone number at that address is (281) 765-7100.

*Drilling Services* — Our drilling services are supported by multiple offices and yard facilities located throughout our areas of operations, including Texas, Oklahoma, Colorado, North Dakota, Wyoming, Pennsylvania, Ohio, and internationally in **Colombia**. **Colombia and Ecuador**. Our servicing of equipment for drilling contractors is supported by offices and yard facilities located in Texas. Our electrical controls and automation operation is supported by an office and yard facility in Texas.

32

---

*Completion Services* — Our completion services are supported by multiple offices and yard facilities located in the Permian, Marcellus Shale/Utica Basins, Haynesville and Eagle Ford, among others.

*Drilling Products* — Our drilling products segment is supported by multiple offices and manufacturing and distributing facilities located **through** **throughout** North America and internationally in over 30 countries.

*Other* — Our oilfield rental operations are supported by offices and yard facilities located in Texas, Oklahoma and Ohio. Our interests in oil and natural gas assets are primarily located in Texas and New Mexico.

We own or lease administrative offices, manufacturing facilities, research centers, and other facilities throughout the world, none of which is individually material. We believe that our existing facilities are suitable and adequate to meet our needs.

We incorporate by reference in response to this item the information set forth in Item 1 of this Report and the information set forth in Note 6 of the Notes to Consolidated Financial Statements included in Item 8 of this Report.

## Item 3. Legal Proceedings.

**We**

**Certain subsidiaries we acquired in the Ulterra acquisition are defendants in a claim brought by a subsidiary of NOV Inc. alleging breach of a license agreement related to certain patents. Such subsidiaries have asserted defenses to the claim and are defending vigorously against this claim.**

**The case is Grant Prideco, Inc., et al. v. Schlumberger Technology Corp., et al., in Texas State Court, District of Harris County, 11th Judicial District. On February 6, 2023, Grant Prideco, Inc., ReedHycalog UK, Ltd. ReedHycalog, LP, National Oilwell Varco, LP ("NOV") sued Ulterra Drilling Technologies, LP ("Ulterra") and several other companies. NOV seeks a declaration that United States Patent No. 8,721,752 (the "752 Patent") is a "Licensed RH Patent" per the terms of a license agreement between Ulterra and NOV. NOV also alleges a breach of contract based on the license agreement between NOV and Ulterra and seeks allegedly owed royalties since October 22, 2021. NOV also seeks attorney's fees.**

On February 27, 2023, Ulterra filed a plea to the jurisdiction, and subject thereto, an answer, affirmative defenses and counterclaims. Ulterra's counterclaims include: (i) declaratory judgments of non-infringement of U.S. Pat. No. 7,568,534 and the '752 patent; (ii) a declaratory judgment of no royalties after Oct. 22, 2021; (iii) a declaratory judgment that certain other identified patents are expired and therefore not infringed after Oct. 22, 2021; and (iv) a declaratory judgment of no breach of contract. On the same day, Ulterra filed a notice of removal in federal court for the Southern District of Texas, Houston Division (SDTX 4:23-cv-00730), as well as a corresponding notice in Texas state court. NOV moved to dismiss and remand the case back to state court. On February 17, 2024, the Court denied NOV's motion.

Discovery is closed and dispositive motions are scheduled to be fully briefed by the end of March 2025. Trial is currently scheduled for March 31, 2025. An unfavorable judgment or resolution of this claim not covered by indemnity could have a material impact on our financial results.

Additionally, we are party to various legal proceedings arising in the normal course of our business. We do not believe that the outcome of these proceedings, either individually or in the aggregate, will have a material adverse effect on our financial condition, cash flows and results of operations.

#### Item 4. Mine Safety Disclosure.

Not applicable.

33

## PART II

### Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

#### (a) Market Information

Our common stock, par value \$0.01 per share, is publicly traded on the Nasdaq Global Select Market and is quoted under the symbol "PTEN." Our common stock is included in the S&P SmallCap 600 Index and several other market indices.

#### (b) Holders

As of February 9, 2024 February 6, 2025, there were approximately 800 holders of record of our common stock.

#### (c) Dividends

On February 14, 2024 February 5, 2025, our Board of Directors approved a cash dividend on our common stock in the amount of \$0.08 per share to be paid on March 15, 2024 March 17, 2025 to holders of record as of March 1, 2024 March 3, 2025. The amount and timing of all future dividend payments, if any, are subject to the discretion of the Board of Directors and will depend upon business conditions, results of operations, financial condition, terms of our debt agreements and other factors. Our Board of Directors may, without advance notice, reduce or suspend our dividend in order for any reason, including to improve our financial flexibility and position our company for long-term success. There can be no assurance that we will pay a dividend in the future.

#### (d) Issuer Purchases of Equity Securities

The table below sets forth the information with respect to purchases of our common stock made by us during the quarter ended December 31, 2023 December 31, 2024.

Period Covered	Total Number of Shares Purchased <sup>(1)</sup>	Average Price Paid per Share	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs	
			Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs (in thousands) <sup>(2)</sup>
October 2023	58,178	\$ 12.87	—	\$ 281,031
November 2023	1,858,670	\$ 11.91	1,834,546	\$ 259,183
December 2023	5,121,552	\$ 11.07	4,825,639	\$ 205,676
Total	7,038,400		6,660,185	

Period Covered	Total Number of Shares Purchased <sup>(1)</sup>	Average Price Paid per Share	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs	
			Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs (in thousands) <sup>(2)</sup>
October 2024	10,599	\$ 8.32	—	\$ 779,655
November 2024	—	\$ —	—	\$ 779,655

December 2024	2,625,921	\$	7.89	2,625,921	\$	758,934
Total	2,636,520			2,625,921		

- (1) 378,215 10,599 shares were withheld in the fourth quarter with respect to employees' tax withholding obligations upon the settlement of performance unit awards and the vesting of restricted stock units. These shares were acquired at fair market value. These acquisitions were made pursuant to the terms of the Patterson-UTi Energy, Inc. Amended and Restated 2014 2021 Long-Term Incentive Plan, as amended the Patterson-UTi Energy, Inc. 2021 Long-Term Incentive Plan, as amended, and the NexTier Oilfield Solutions Inc. Equity and Incentive Award Plan and the NexTier Oilfield Solutions Inc. (Former C&J Energy) Management Incentive Plan, and not pursuant to the stock buyback program.
- (2) In September 2013, our Board of Directors approved a stock buyback program. In April 2023, our Board of Directors approved an increase of the authorization under the stock buyback program to allow for an aggregate of \$300 million of future share repurchases. In February 2024, our Board of Directors approved an increase of the authorization under the stock buyback program to allow for an aggregate of \$1 billion \$1.0 billion of future share repurchases. All purchases executed to date have been through open market transactions. Purchases under the buyback program are made at management's discretion, at prevailing prices, subject to market conditions and other factors. Purchases may be made at any time without prior notice. There is no expiration date associated with the buyback program.

### (e) Performance Graph

The following graph compares the cumulative stockholder return of our common stock for the period from December 31, 2018 December 31, 2019 through December 31, 2023 December 31, 2024, with the cumulative total return of the S&P 500 Index, the S&P SmallCap 600 Index and the Oilfield Service Index.

The graph assumes investment of \$100 on December 31, 2018 December 31, 2019 and reinvestment of all dividends.

### Item 6.

### RESERVED

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management Overview — We are a Houston, Texas-based Texas-based leading provider of drilling and completion services to oil and natural gas exploration and production companies in the United States and other select countries, including contract drilling services, integrated well completion services and directional drilling services in the United States, and specialized drill bit solutions in the United States, Middle East and many other regions around the world. We operate under three reportable business segments: (i) drilling services, (ii) completion services, and (iii) drilling products.

Drilling Services

Our contract drilling business operates in the continental United States and internationally in Colombia and Ecuador and, from time to time, we pursue contract drilling opportunities in other select markets. We also provide a comprehensive suite of directional drilling services in most major producing onshore oil and natural gas basins in the United States, and we provide services that improve the statistical accuracy of wellbore placement for directional and horizontal wells. We also service and re-certify equipment for drilling contractors, and we provide electrical controls and automation to the energy, marine and mining industries, in North America and other select markets.

We have addressed our customers' needs for drilling horizontal wells in shale and other unconventional resource plays by improving the capabilities of our drilling fleet. The U.S. land rig industry has in recent years referred to certain high specification rigs as "super-spec" rigs, which we consider to be at least a 1,500 horsepower, AC-powered rig that has at least a 750,000-pound hookload, a 7,500-psi circulating system, and is pad-capable. Due to evolving customer preferences, we refer to certain premium rigs as "Tier-1, super spec" rigs, which we consider as being a super-spec rig that also has a third mud pump and raised drawworks that allows for more clearance underneath the rig floor. As of December 31, 2023 December 31, 2024, our rig fleet included 173 super-spec rigs, of which 131 were 135 Tier-1, super-spec rigs.

Completion Services

Our well completion services business consists of services for hydraulic fracturing, wireline and pumping, completion support, and cementing. It also includes our power solutions natural gas fueling business and our proppant last mile logistics and storage business. Our completion services business operates in several of the most active basins in the continental United States including the Permian, the Marcellus Shale/Utica, the Eagle Ford, Mid-Continental, Haynesville, and the Bakken/Rockies.

To address evolving customer preferences for emissions-reducing equipment, we have invested in natural gas-powered equipment, including electric, direct drive, and dual fuel pumps, to replace legacy diesel completion services equipment.

Drilling Products

We serve the energy and mining markets by manufacturing and distributing drill bits through throughout North America and internationally in over 30 countries. Our drilling equipment is used in oil and natural gas exploration and production and in mining operations. We have manufacturing and repair facilities located in Fort Worth, Texas, Leduc, Alberta and Saudi Arabia and repair facilities located in Argentina, Colombia and Oman.

Recent Developments in Market Conditions and Outlook — Crude oil Commodity prices and demand for drilling and completion equipment and services increased from 2021 to 2022, and industry supply have historically been volatile but have been relatively range-bound since the end of Tier-1, super-spec rigs became constrained. Commodity price volatility in the second quarter of 2023 resulted in a decline in industry activity; commodity prices subsequently increased during the third quarter before declining in the fourth quarter of 2023, 2022. The current demand for equipment and services remains dependent on impacted by macro conditions, including commodity prices, geopolitical environment, inflationary pressures, economic conditions in the United States and elsewhere, as well as customer consolidation and focus by exploration and production companies and service companies on capital returns.

Oil prices averaged \$78.53 \$70.73 per barrel in the fourth quarter of 2023 2024 and closed at 78.72 \$73.52 per barrel on February 20, 2024 February 3, 2025. Natural gas prices (based on the Henry Hub Spot Market Price) averaged \$2.74 \$2.45 per MMBtu in the fourth quarter of 2023 2024 and closed at \$1.50 \$3.30 per MMBtu on February 20, 2024 February 3, 2025.

Quarterly average oil prices and our quarterly average number of rigs operating in the United States for 2021, 2022, 2023 and 2023 2024 are as follows:

	1st	2nd	3rd	4th
	Quarter	Quarter	Quarter	Quarter
2021:				
Average oil price per Bbl <sup>(1)</sup>	\$ 57.79	\$ 66.09	\$ 70.62	\$ 77.45
Average rigs operating per day – U.S. <sup>(2)</sup>	69	73	80	106
2022:				

Average oil price per Bbl <sup>(1)</sup>	\$	94.45	\$	108.72	\$	93.18	\$	82.79
Average rigs operating per day – U.S. <sup>(2)</sup>		115		121		128		131
<b>2023:</b>								
Average oil price per Bbl <sup>(1)</sup>	\$	75.93	\$	73.54	\$	82.25	\$	78.53
Average rigs operating per day – U.S. <sup>(2)</sup>		131		128		120		118

		1 <sup>st</sup> Quarter		2 <sup>nd</sup> Quarter		3 <sup>rd</sup> Quarter		4 <sup>th</sup> Quarter
<b>2022</b>								
Average oil price per Bbl <sup>(1)</sup>	\$	94.45	\$	108.72	\$	93.18	\$	82.79
Average rigs operating per day – U.S. <sup>(2)</sup>		115		121		128		131
<b>2023</b>								
Average oil price per Bbl <sup>(1)</sup>	\$	75.93	\$	73.54	\$	82.25	\$	78.53
Average rigs operating per day – U.S. <sup>(2)</sup>		131		128		120		118
<b>2024</b>								
Average oil price per Bbl <sup>(1)</sup>	\$	77.50	\$	81.81	\$	76.43	\$	70.73
Average rigs operating per day – U.S. <sup>(2)</sup>		121		114		107		105

<sup>(1)</sup> The average oil price represents the average monthly WTI spot price as reported by the United States Energy Information Administration.

<sup>(2)</sup> A rig is considered to be operating if it is earning revenue pursuant to a contract on a given day.

#### Our

In our drilling services segment, our average active U.S. rig count in the United States for the fourth quarter of 2023 2024 was 118 105 rigs. This was a decrease from our average active rig count for the third quarter of 2023 2024 of 120 107 rigs. Our active U.S. rig count in the United States at December 31, 2023 December 31, 2024 of 121 103 rigs was less than the rig count of 132 121 rigs at December 31, 2022 December 31, 2023, reflecting the industry-wide activity declines due in large part to the decline in commodity prices increased drilling efficiencies and reduced demand for drilling services in the United States. market consolidation. We expect our rig count in the United States will average 120 106 rigs in the first quarter of 2024, 2025. Term contracts help support our operating rig count. Based on contracts in place in the United States as of February 14, 2024 February 5, 2025, we expect an average of 79 64 rigs operating under term contracts during the first quarter of 2024 2025 and an average of 52 40 rigs operating under term contracts during 2024.

#### 2025.

We maintain a backlog of commitments for contract drilling services under term contracts, which we define as contracts with a duration of six months or more. Our contract drilling backlog in the United States as of December 31, 2023 December 31, 2024 and 2022 2023 was approximately \$700 million \$426 million and \$830 million \$700 million, respectively. Approximately 16% 7.1% of our total contract drilling backlog in the United States at December 31, 2023 December 31, 2024 is reasonably expected to remain after 2024, 2025. See Note 3 of Notes to consolidated financial statements in Item 8 of this Report and "Item 1A. Risk Factors – Our current backlog of contract drilling revenue may decline and may not ultimately be realized, as fixed-term contracts may in certain instances be terminated without an early termination payment."

Our completion services business was impacted by calendar inefficiencies during the second half of 2023 resulting from a decline in customer activity during the third quarter. Completion services activity stabilized in

During the fourth quarter of 2023, 2024, our completion services segment was impacted by several long-term dedicated customers reducing sequential completion activity after meeting their annual production targets. We believe expect a seasonal uptick in activity will modestly decline in during the first quarter of 2024.

2025 as customer budgets reset with the start of the new year.

Activity in our drilling products segment was relatively steady in 2024 compared to the prior year. Drilling products demand increased from the third quarter of 2023 despite a decline in the global rig count. Drilling Products demand is expected to remain steady through the first quarter, given the expectation for a steady U.S. market in the U.S. and moderate continued growth in international markets relative to what we saw in markets.

During the fourth quarter.

quarter, we performed work pursuant to an integrated drilling and completion arrangement that included performance incentives, and we are working to expand customer adoption of these types of arrangements.

Cash capital expenditures for 2023 2024 totaled \$616 million \$678 million. This was an increase from the \$437 million \$616 million of cash capital expenditures in 2022 2023 due largely to a full year of investing in and maintaining assets related to the Ultrera acquisition and NexTier merger and the Ultrera acquisition. The incremental capital spending related to these assets was partially offset by a decrease in 2023, business activity in 2024. Additionally, we received proceeds from sale of assets or idle equipment of \$25.8 million and \$26.5 million in 2024 and 2023, respectively. Based on our current outlook for activity, we expect our capital expenditures for 2024 2025 to be approximately \$740 million.

\$600 million.

*Recent Developments in Joint Ventures and Business Combinations* — In December 2024, one of our subsidiaries closed a previously announced joint venture with subsidiaries of ADNOC Drilling and SLB. Our subsidiary holds a 15 percent interest in a newly created company named Turnwell Industries, which has been awarded a contract to drill and complete 144 unconventional wells for ADNOC. In exchange for the minority equity interest, we are providing unconventional drilling and completion expertise to Turnwell, as well as a limited cash contribution to fund our portion of initial working capital.

On September 1, 2023, we completed our merger (the “NexTier merger”) with NexTier Oilfield Solutions Inc. (“NexTier” (“NexTier”). Each share of common stock of NexTier issued and outstanding immediately prior to the effective time (including outstanding restricted shares) was converted into the right to receive 0.752 shares of our common stock, which based on the closing price of our common stock of \$14.91 on September 1, 2023, valued the transaction at approximately \$2.8 billion, \$2.8 billion, including the assumption of debt. NexTier is a predominately U.S. land-focused oilfield service provider, with a diverse set of well completion and production services across a variety of active basins.

On August 14, 2023, we completed our acquisition (the “Ulterra acquisition”) of Ulterra Drilling Technologies, L.P. (“Ulterra” (“Ulterra”). Total consideration for the acquisition included the issuance of 34.9 million shares of our common stock and payment of approximately \$376 million \$373 million of cash (after purchase price adjustment), which based on the closing price of our common stock of \$14.94 on August 14, 2023, valued the transaction at closing at approximately \$897 million \$894 million. Ulterra is a global provider of specialized drill bit solutions.

*Recent Developments in Debt Financing* — On January 31, 2025, we entered into the Second Amended and Restated Credit Agreement with the lenders party thereto and Wells Fargo Bank, National Association, as administrative agent, and the other parties thereto (the “Credit Agreement”). The Credit Agreement amended and restated our Amended and Restated Credit Agreement dated as of March 27, 2018 (as amended, restated, supplemented or otherwise modified at December 31, 2024, the “Prior Credit Agreement”). The commitments under the Credit Agreement are \$500 million, and the loans and commitments under the Credit Agreement mature on January 31, 2030.

The Credit Agreement provides for a committed senior unsecured credit facility that permits aggregate revolving credit borrowings of up to \$500 million, with a letter of credit sub-facility of \$100 million and a swing line sub-facility that, at any time outstanding, is limited to the lesser of \$50 million and the amount of the swing line provider's unused commitment. Subject to customary conditions, we may request that the lenders' aggregate commitments be increased by up to \$200 million, not to exceed total commitments of \$700 million. For a description of the Credit Agreement, see “Liquidity and Capital Resources” included in Part II, Item 7— “Management's Discussion and Analysis of Financial Condition and Results of Operations” of this Report.

As of December 31, 2024, we had no borrowings outstanding under our Prior Credit Agreement. We had \$2.1 million in letters of credit outstanding under the Prior Credit Agreement at December 31, 2024 and, as a result, had available borrowing capacity of approximately \$613 million under the Prior Credit Agreement at that date.

On September 13, 2023, we completed the offering of \$400 million in aggregate principal amount of our 7.15% Senior Notes due 2033 (the “2033 Notes”). The net proceeds before offering expenses were approximately \$396 million, which we used to repay amounts outstanding under our revolving credit facility.

37

On August 29, 2023, we entered into Amendment No. 4 to Amended and Restated Prior Credit Agreement (the “Credit Agreement Amendment”), which amended our Amended and Restated Credit Agreement, dated as of March 27, 2018 (as amended, the “Credit Agreement”), by and among us, as borrower, Wells Fargo Bank, National Association, as administrative agent, letter of credit issuer, swing line lender and lender and each of the other letter of credit issuers and lenders party thereto.

The Credit Agreement Amendment, among other things, (i) deemed certain outstanding letters of credit issued for the account of BEP Diamond Holdings Corp. (the entity we acquired in the Ulterra acquisition) with a face amount of \$2.5 million to have been issued under the Credit Agreement, and (ii) extended the maturity date for \$85 million of revolving credit commitments of certain lenders under the Credit Agreement from March 27, 2025 to March 27, 2026. As a result, of the \$600 million of revolving credit commitments under the Credit Agreement, the maturity date for \$501.7 million of such commitments is March 27, 2026; the maturity date for \$48.3 million of such commitments is March 27, 2025; and the maturity date for the remaining \$50 million of such commitments is March 27, 2024.

As of December 31, 2023, we had no borrowings outstanding under our revolving credit facility. We had \$2.6 million in letters of credit outstanding under the Credit Agreement at December 31, 2023 and, as a result, had available borrowing capacity of approximately \$597 million at that date.

During the first quarter of 2023, we elected to repurchase portions of our 3.95% Senior Notes due 2028 (the “2028 Notes”) and our 5.15% Senior Notes due 2029 (the “2029 Notes”) in the open market. The principal amounts retired through these transactions totaled \$6.0 million of our 2028 Notes and \$3.0 million of our 2029 Notes, plus accrued interest. We recorded corresponding gains on the extinguishment of these amounts totaling \$0.8 million and \$0.3 million, respectively, net of the proportional write-off of associated deferred financing costs and original issuance discounts. These gains are included in “Interest expense, net of amount capitalized” in our consolidated statements of operations included as a part of Item 8 of this Report.

During the fourth quarter of 2022, we elected to repurchase portions of our 2028 Notes and 2029 Notes (as defined above) in the open market. The principal amounts retired through these transactions totaled \$21.0 million of our 2028 Notes and \$1.4 million of our 2029 Notes, plus accrued interest. We recorded corresponding gains on the

extinguishment of these amounts totaling \$2.3 million and \$0.1 million, respectively, net of the proportional write-off of associated deferred financing costs and original issuance discounts. These gains are included in "Interest expense, net of amount capitalized" in our consolidated statements of operations included as a part of Item 8 of this Report.

below).

*Impact on our Business from Oil and Natural Gas Prices and Other Factors* — Our revenues, profitability and cash flows are highly dependent upon prevailing prices for oil and natural gas, expectations about future prices, and upon our customers' ability to access, and willingness to deploy, capital to fund their operating and capital expenditures. During periods of improved oil and natural gas prices, the capital spending budgets of oil and natural gas operators tend to expand, which generally results in increased demand for our services. Conversely, in periods when oil and natural gas prices are relatively low or when our customers have a reduced ability to access, or willingness to deploy capital, the demand for our services generally weakens, and we experience downward pressure on pricing for our services. Even during periods of historically moderate or high prices for oil and natural gas, companies exploring for oil and natural gas may cancel or curtail programs or reduce their levels of capital expenditures for exploration and production for a variety of reasons, including the depletion of capital expenditure budgets and/or meeting annual drilling and completion targets, which could reduce demand for our services. We may also be impacted by delayed customer payments and payment defaults associated with customer liquidity issues and bankruptcies.

The North American oil and natural gas services industry is cyclical and, at times, experiences downturns in demand. During these periods, there has been substantially more oil and natural gas service equipment available than necessary to meet demand. As a result, oil and natural gas service contractors have had difficulty sustaining profit margins and, at times, have incurred losses during the downturn periods. We cannot predict either the future level of demand for our oil and natural gas services or future conditions in the oil and natural gas service businesses.

In addition to the dependence on oil and natural gas prices and demand for our services, we are highly impacted by operational risks, competition, labor issues, weather, the availability, from time to time, of products used in our businesses, supplier delays and various other factors that could materially adversely affect our business, financial condition, cash flows and results of operations. See "Risk Factors" in Item 1A of this Report.

38

For the three years ended December 31, 2023 December 31, 2024, our operating revenues and net income consisted of the following (dollars in thousands):

	2023		2022		2021	
Drilling services	\$ 1,919,759	46.3 %	\$ 1,544,820	58.3 %	\$ 784,218	57.8 %
Completion services	2,017,440	48.7 %	1,022,413	38.6 %	523,756	38.6 %
Drilling products	134,679	3.2 %	—	0.0 %	—	0.0 %

	<u>\$ 5,377,911</u>	<u>100.0 %</u>	<u>\$ 4,146,456</u>	<u>100.0 %</u>	<u>\$ 2,647,592</u>	<u>100.0 %</u>

## Results of Operations

Effective as of the third quarter of 2023, we revised our reportable segments to align with certain changes in how our Chief Operating Decision Maker ("CODM") manages and allocates resources to our business as a result of the Ultrerra acquisition and NexTier merger. We now have the following reportable business segments: (i) drilling services, (ii) completion services and (iii) drilling products. Accordingly, we recast our results of operations for the first half of 2023 and the year ended December 31, 2022 to align with our revised reportable segments.

## Comparison of the years ended December 31, 2023 and 2022

A discussion of our financial condition and results of operations for the fiscal year ended December 31, 2023 compared to the fiscal year ended December 31, 2022 is included in Part II, Item 7— "Management's Discussion and Analysis of Financial Condition and Results of Operations" of our Annual Report on Form 10-K for the fiscal year ended December 31, 2023, filed with the SEC on February 27, 2024.

## Comparison of the years ended December 31, 2024 and 2023

The following tables summarize results of operations by business segment for the years ended **December 31, 2023**, **December 31, 2024** and **2022**:

Drilling Services <sup>(1)</sup>	Year Ended December 31,		
	2023	2022	% Change
	(Dollars in thousands)		
Revenues	\$ 1,919,759	\$ 1,544,820	24.3 %
Direct operating costs	1,119,200	1,025,904	9.1 %

Average revenue per operating day – U.S. <sup>(3)</sup>	\$ 35.86	\$ 36.24	(1.0) %
Average direct operating costs per operating day – U.S. <sup>(3)</sup>	\$ 19.80	\$ 19.42	2.0 %
Average adjusted gross profit per operating day – U.S. <sup>(3)</sup>	\$ 16.06	\$ 16.83	(4.6) %

<sup>(1)</sup> Drilling services segment represents our contract drilling, directional drilling, oilfield technology and electrical controls and automation businesses.

<sup>(2)</sup> Adjusted gross profit is defined as revenues less direct operating costs (excluding depreciation, amortization and impairment expense). See Non-GAAP Financial Measures below for a reconciliation of GAAP gross profit to adjusted gross profit by segment.

<sup>(3)</sup> Operational data relates to our contract drilling business. A rig is considered to be operating if it is earning revenue pursuant to a contract on a given day.

### Revenues increased

Total revenues and direct operating costs decreased primarily due to improved pricing from a decrease in operating days in our contract drilling business within the United States.

Direct Average revenue per operating day remained relatively flat while average direct operating costs per operating day increased slightly. The decline in operating days impacted the fixed cost leverage for U.S. drilling rigs.

The decrease in operating days for our U.S. contract drilling business reflects the industry-wide activity declines due to increased drilling efficiencies and market consolidation.

Depreciation, amortization and impairment expense increased primarily due to inflationary pressure on labor a charge of \$114 million related to the abandonment of 42 legacy, non-Tier-1 super-spec drilling rigs and supplies.

The increase in capital related equipment. See Note 6 of Notes to consolidated financial statements for additional information.

Capital expenditures was decreased primarily due to higher maintenance capital expenditures related to upgrading reduced investment in our ancillary drilling services not included within our contract drilling business and timing of certain rig components.

order placement.

39

Completion Services <sup>(1)</sup>	Year Ended December 31,		
	2024	2023	% Change
	(Dollars in thousands)		
Revenues	\$ 3,232,785	\$ 2,017,440	60.2 %
Direct operating costs	2,658,170	1,567,940	69.5 %
Adjusted gross profit <sup>(2)</sup>	574,615	449,500	27.8 %
Selling, general and administrative	41,557	26,050	59.5 %
Depreciation, amortization and impairment	564,155	283,230	99.2 %
Impairment of goodwill	885,240	—	NA
Other operating income, net	(17,792)	—	NA
Operating income (loss)	\$ (898,545)	\$ 140,220	(740.8 %)
Capital expenditures	\$ 320,329	\$ 214,746	49.2 %

Completion Services <sup>(1)</sup>	Year Ended December 31,		
	2023	2022	% Change
	(Dollars in thousands)		
Revenues	\$ 2,017,440	\$ 1,022,413	97.3 %
Direct operating costs	1,567,940	781,385	100.7 %
Adjusted gross profit <sup>(2)</sup>	449,500	241,028	86.5 %
Selling, general and administrative	26,050	8,763	197.3 %
Depreciation, amortization and impairment	283,230	98,162	188.5 %

Capital expenditures	\$ 214,746	\$ 137,935	55.7 %

(1) Completion services represents the combination of well completion business from the NexTier merger and our legacy pressure pumping business.

(2) Adjusted gross profit is defined as revenues less direct operating costs (excluding depreciation, amortization and impairment expense). See Non-GAAP Financial Measures below for a reconciliation of GAAP gross profit to adjusted gross profit by segment.

The changes in the results of our completion services segment for the year ended December 31, 2023 December 31, 2024 as compared to December 31, 2022 December 31, 2023 can be primarily attributed to the NexTier merger, which closed on September 1, 2023. The NexTier merger had a material impact on our reported results of operations. In order to provide a more meaningful basis The results for comparison, the discussion on changes below is focused on changes between comparable periods, excluding year ended December 31, 2024 represent the effects combination of the well completion business from the NexTier merger. However, these comparisons do not necessarily reflect what merger and our legacy pressure pumping business. Due to the results full integration of our legacy pressure pumping business would have been had into the NexTier merger not occurred and our legacy pressure pumping business continued legal entity in the first quarter of 2024, we are unable to operate as provide a standalone business.

Completion services revenues and direct operating costs, meaningful year-over-year comparison excluding the effects impact of the NexTier merger, decreased \$80.5 million and \$49.3 million merger.

During the year ended December 31, 2024, or 7.9% and 6.3%, respectively due we recorded an \$885 million impairment charge to calendar inefficiencies and lower customer pricing in 2023.

Selling, general and administrative expense, excluding the effects of the NexTier merger, was relatively flat, totaling \$9.5 million in 2023 compared to \$8.8 million in 2022.

Depreciation, amortization and impairment, excluding the effects of the NexTier merger, increased \$44.2 million, or 45%. The increase was primarily attributable to the change in the estimated useful lives of certain components to reflect recent trends in increased intensity and pumping hours per day in servicing larger jobs; goodwill associated with our completion services reporting unit. See Note 17 of Notes to consolidated financial statements for additional information on this change information.

Other operating income, net in accounting estimate.

Capital expenditures, excluding the effects of the NexTier merger, decreased \$32.8 million or 23.8%. The decrease 2024 was primarily due to the activation of our twelfth spread in 2022.

Revenue decreased from 2022 due to a lower volume of services provided by our oilfield rentals business.

Depreciation, depletion, amortization and impairment expense decreased primarily due to a \$10.5 million decrease \$7.0 million impairment recorded in our oil and natural gas revenues resulting from unfavorable crude oil market prices and decreased production. Average WTI-Cushing prices business in 2023 were \$77.58 per barrel as compared to \$94.90 per barrel a \$3.8 million impairment in 2022. This decrease was partially offset by a \$4.7 million increase in revenues from our oilfield rentals business.

Selling, general and administrative expense increased primarily due to increased the reorganization of acquired Ulterra and NexTier support personnel costs as a result of higher headcount, wage growth and changes in stock-based compensation. A portion of the increased personnel costs resulted from incremental headcount for to corporate functions as part of following the NexTier merger.

merger and the Ulterra acquisition.

Merger and integration expense increased decreased due to closing the timing of the NexTier merger and the Ulterra acquisition, and NexTier merger which both closed in the third quarter of 2023.

The increase was primarily attributable to \$84.8 million of accelerated stock-based compensation expense and additional cash compensation associated with severance payments as well as certain legal, financial advisory, and \$22.6 million change in other professional fees in order to consummate the transactions.

Other operating income, net increased was primarily due to a \$5.2 million favorable legal settlement and a \$6.5 million reversal of cumulative compensation costs associated with certain performance-based restricted stock units in 2023.

Interest income increased Additionally, there was a \$5.8 million credit loss expense in 2024 due to interest received from a higher average cash balance deterioration in 2023.

the financial condition of a customer.

Interest expense increased primarily due to the issuance offering of 2033 Notes in the third quarter of 2023 and finance leases acquired as part 2023. See Note 9 of the Ulterra acquisition and NexTier merger.

Notes to consolidated financial statements for additional information on our long-term debt.

The increase decrease in capital expenditures was primarily due to the purchase of an aircraft in 2023.

#### Comparison of the years ended December 31, 2022 and 2021

Effective as of the third quarter of 2023, we revised our reportable segments to align with certain changes in how our CODM manages and allocates resources to our business as a result of the Ulterra acquisition and NexTier merger. We now have the following reportable business segments: (i) drilling services, (ii) completion services, and (iii) drilling products. Accordingly, we recast our results of operations for the years ended December 31, 2022 and 2021 to align with our revised reportable segments.

The following tables summarize our recast results of operations by business segment for the years ended December 31, 2022 and 2021:

41

Drilling Services <sup>(1)</sup>	Year Ended December 31,		
	2022	2021	% Change
	(Dollars in thousands)		
Revenues	\$ 1,544,820	\$ 784,218	97.0 %
Direct operating costs	1,025,904	577,983	77.5 %
Adjusted gross profit <sup>(2)</sup>	518,916	206,235	151.6 %
Selling, general and administrative	15,027	10,861	38.4 %
Depreciation, amortization and impairment	354,116	660,402	(46.4)%
Other operating (income) expenses, net	(34)	25	NA
Operating income (loss)	\$ 149,807	\$ (465,053)	NA
Capital expenditures	\$ 272,521	\$ 118,496	130.0 %
Operating days – U.S. <sup>(3)</sup>	45,216	29,960	50.9 %
Average revenue per operating day – U.S.	\$ 27.57	\$ 21.64	27.4 %
Average direct operating costs per operating day – U.S.	\$ 17.32	\$ 15.11	14.6 %
Average adjusted gross profit per operating day – U.S. <sup>(3)</sup>	\$ 10.25	\$ 6.53	56.9 %

<sup>(1)</sup> Drilling services segment represents our contract drilling, directional drilling, oilfield technology and electrical controls and automation businesses.

<sup>(2)</sup> Adjusted gross profit is defined as revenues less direct operating costs (excluding depreciation, amortization and impairment expense). See Non-GAAP Financial Measures below for a reconciliation of GAAP gross profit to adjusted gross profit by segment.

<sup>(3)</sup> Operational data relates to our contract drilling business. A rig is considered to be operating if it is earning revenue pursuant to a contract on a given day.

Revenues increased primarily due to an increase in operating days and improved pricing within our contract drilling business as well as increased job activity and improved pricing within our directional drilling business. Average revenue per operating day increased primarily due to improved pricing.

Direct operating costs increased due to an increase in operating days, increased reactivation costs and inflationary cost pressure on labor and supplies within our contract drilling business. A portion of the increase in direct operating costs related to increased job activity and cost inflation within our directional drilling business.

Depreciation, amortization and impairment expense decreased primarily due to a \$220 million impairment charge related to the abandonment of 43 legacy non-super-spec rigs and contract drilling equipment and the abandonment of an \$11.4 million developed technology intangible asset and \$2.5 million of directional drilling equipment in 2021. Additionally, depreciation, amortization and impairment expense decreased partially due to a lower depreciable asset base during 2022 as a result of the impairment charge taken in 2021.

The increase in capital expenditures was primarily due to rig reactivations, higher maintenance capital expenditures and upgrading certain rig components.

Completion Services <sup>(1)</sup>	Year Ended December 31,		
	2022	2021	% Change
	(Dollars in thousands)		
Revenues	\$ 1,022,413	\$ 523,756	95.2 %
Direct operating costs	781,385	475,953	64.2 %
Adjusted gross profit <sup>(2)</sup>	241,028	47,803	404.2 %
Selling, general and administrative	8,763	7,361	19.0 %
Depreciation, amortization and impairment	98,162	159,305	(38.4)%
Operating income (loss)	\$ 134,103	\$ (118,863)	N/A
Capital expenditures	\$ 137,935	\$ 34,676	297.8 %

<sup>(1)</sup> Completion services in 2022 and 2021 represents only our legacy pressure pumping business as the NexTier merger was completed in 2023.

<sup>(2)</sup> Adjusted gross profit is defined as revenues less direct operating costs (excluding depreciation, amortization and impairment expense). See Non-GAAP Financial Measures below reconciliation of GAAP gross profit to adjusted gross profit by segment.

Revenues increased primarily due to an increase in the number of higher revenue fracturing jobs, improved pricing and continued improvement in asset utilization and efficiency.

42

Direct operating costs increased primarily due to an increase in the number of higher cost fracturing jobs as well as inflationary cost pressure on labor and supplies.

Depreciation, amortization and impairment expense decreased due to a lower depreciable asset base in 2022 partially as a result of a \$32.2 million impairment charge taken in 2021. This impairment charge was related to the abandonment of approximately 0.2 million horsepower within our fleet. Additionally, a portion of the decrease related to certain equipment that reached the end of its useful life during 2022. This decrease in 2022 outpaced incremental depreciation resulting from equipment additions in 2020 and 2021, when our capital expenditures were significantly lower.

The increase in capital expenditures was primarily due to costs associated with reactivating stacked equipment as well as upgrades and the increase in maintenance capital expenditures associated with a higher average number of active spreads.

Drilling products	Year Ended December 31,

Operating income (loss)	\$ 13,776	\$ (3,182)	N/A
Capital expenditures	\$ 25,215	\$ 11,627	116.9 %

<sup>(1)</sup> Adjusted gross profit is defined as revenues less direct operating costs (excluding depreciation, depletion, amortization and impairment expense). See Non-GAAP Financial Measures below for a reconciliation of GAAP gross profit to adjusted gross profit by segment.

Revenue increased from 2021 primarily due to a \$17.7 million increase in our oilfield rentals business revenues due to higher service volumes and improved pricing as well as a \$13.5 million increase in our oil and natural gas revenues resulting from favorable crude oil market prices and increased production. Average WTI-Cushing prices in 2022 were \$94.90 per barrel as compared to \$68.14 per barrel in 2021.

Direct operating costs increased due to incremental production costs from our oil and natural gas assets as well as a higher service volume provided by our oilfield rentals business and cost inflation.

Depreciation, depletion, amortization and impairment increased primarily due to a \$4.5 million impairment in our oil and natural gas assets in 2022.

The increase in capital expenditures was primarily related to incremental spending in our oilfield rentals and oil and natural gas businesses.

43

Corporate	Year Ended December 31,		
	2022	2021	% Change
	(Dollars in thousands)		
Selling, general and administrative	\$ 91,973	\$ 73,495	25.1 %
Merger and integration expenses	\$ 2,069	\$ 12,060	(82.8)%
Depreciation	\$ 5,171	\$ 5,859	(11.7)%
Other operating (income) expenses, net	\$ (12,558)	\$ 738	N/A
Credit loss expense	\$ —	\$ (1,500)	N/A
Interest income	\$ 360	\$ 222	62.2 %
Interest expense	\$ 40,256	\$ 41,978	(4.1)%
Other expense	\$ (3,273)	\$ (275)	1,090.2 %
Capital expenditures	\$ 1,126	\$ 1,521	(26.0)%

Selling, general and administrative expense increased primarily due to increased personnel costs as a result of higher headcount, wage growth and changes in stock-based compensation.

Merger and integration expenses were recognized in 2021 related to the Pioneer acquisition, which closed on October 1, 2021, and the subsequent divestiture of Pioneer's well servicing rig business and wireline business, which closed on December 31, 2021.

Other operating (income) expenses, net includes net gains associated with the disposal of assets. Accordingly, the related gains or losses have been excluded from the results of specific segments. The \$12.5 million other operating income in 2022 was primarily due to the release of an \$11.5 million cumulative translation adjustment from accumulated other comprehensive income into net income (loss) in our consolidated statements of operations upon substantially completing our exit from our Canadian operations.

Interest expense was favorably impacted by a gain on debt extinguishment of \$2.5 million associated with the repurchase of portions of our 2028 Notes and 2029 Notes in 2022. Excluding the effects of the gain, interest expense would have increased by \$0.7 million, a 1.8% increase. Additionally, on December 30, 2021, we repaid the final \$50 million of borrowings under the 2019 Term Loan Agreement, and as a result had no remaining borrowings under the Term Loan Agreement as of December 31, 2021. Accordingly, we did not incur interest expense related to the Term Loan Agreement in 2022.

The \$3.0 million change in other expense was primarily due to foreign currency adjustments related to our Colombian operations.

## Income Taxes

The effective tax rate increased by approximately 12.0% decreased to (1.0)% for 2024 compared to 19.9% for 2023 compared to 7.9% for 2022. 2023. Our effective income tax rate fluctuates based on, among other factors, changes in pre-tax income in countries with varying statutory tax rates, changes in valuation allowances, and the impacts of various other permanent adjustments.

The ability to recognize a portion impact of our U.S. federal and state net operating losses resulted in goodwill impairments that are not deductible for income tax had a significant impact through changes in valuation allowances, in on our effective tax rate for the year ended December 31, 2023 December 31, 2024. This benefit was partly offset by state and local income taxes and various other permanent adjustments.

We continue to monitor income tax developments in the United States and other countries where we have legal entities. We will incorporate into our future financial statements the impacts, if any, of future regulations and additional authoritative guidance when finalized.

## Liquidity and Capital Resources

Our primary sources of liquidity are cash and cash equivalents, availability under our revolving credit facility and cash provided by operating activities. As of ~~December 31, 2023~~ ~~December 31, 2024~~, we had approximately ~~\$435 million~~ ~~\$453 million~~ in working capital, including ~~\$193 million~~ ~~\$239 million~~ of cash and cash equivalents, and approximately ~~\$597 million~~ ~~\$613 million~~ available under our revolving credit facility.

As part of the NexTier merger, we assumed the obligations of NexTier Completions Solutions Inc. ("NCS") under a Master Loan and Security Agreement (as amended, the "Master Agreement") with Caterpillar Financial Services Corporation. The Master Agreement allows NCS to enter into secured equipment financing term loans from time to time (the "Equipment Loans"). The Equipment Loans may be drawn in multiple tranches, with each loan evidenced by a separate promissory note. The Master Agreement and the Equipment Loans contain customary affirmative and negative covenants, including limitations on further encumbrance of the collateral other than the applicable loans under the Master ~~Prior Credit~~ Agreement. We were in compliance with these covenants at December 31, 2023. The Equipment

44

Loans bear interest at a rate of 5.25% per annum, and we pay interest on the 1st of each month. The Equipment Loans will mature on June 1, 2025.

On ~~August 29, 2023~~ ~~January 31, 2025~~, we entered into the Credit Agreement, ~~Amendment~~, which amended our and restated the ~~Prior~~ Credit Agreement. The ~~Credit Agreement Amendment~~, among other things, (i) deemed certain outstanding letters of credit issued for the account of BEP Diamond Holdings Corp. (the entity we acquired in the Ulterra acquisition) with a face amount of \$2.5 million to have been issued under the Credit Agreement and (ii) extended the maturity date for \$85 million of revolving credit commitments of certain lenders under the Credit Agreement from March 27, 2025 to March 27, 2026. As a result, of the \$600 million of revolving credit commitments under the Credit Agreement the maturity date for \$501.7 million of such commitments is March 27, 2026; the maturity date for \$48.3 million of such commitments is March 27, 2025; ~~are \$500 million~~, and the maturity date for loans and commitments under the remaining \$50 million of such commitments is March 27, 2024 ~~Credit Agreement mature on January 31, 2030~~.

The Credit Agreement ~~is provides for~~ a committed senior unsecured ~~revolving~~ credit facility that permits aggregate ~~revolving credit~~ borrowings of up to ~~\$600 million~~ ~~\$500 million~~, including with a letter of credit facility that, at any time outstanding, is limited to sub-facility of \$100 million and a swing line ~~facility~~ sub-facility that, at any time outstanding, is limited to the lesser of \$50 million and the amount of the swing line provider's unused commitment. Subject to customary conditions, we may request that the lenders' aggregate commitments be increased by up to ~~\$300 million~~ ~~\$200 million~~, not to exceed total commitments of ~~\$900 million~~ ~~\$700 million~~.

Loans under the Credit Agreement bear interest by reference, at our election, to the SOFR rate (subject (in addition to a 0.10% per annum adjustment) or base rate, in each case subject to a 0% floor. The applicable margin on SOFR rate loans varies from ~~1.00%~~ ~~1.25%~~ to ~~2.00%~~ ~~2.25%~~ and the applicable margin on base rate loans varies from ~~0.00%~~ ~~0.25%~~ to ~~1.00%~~ ~~1.25%~~, in each case determined based on our credit rating. As of December 31, 2023, the applicable margin on SOFR rate loans was 1.75% and the applicable margin on base rate loans was 0.75%. A letter of credit fee is payable by us equal to the applicable margin for SOFR rate loans times the daily amount available to be drawn under outstanding letters of credit. The commitment fee rate payable to the lenders varies from ~~0.10%~~ ~~0.150%~~ to ~~0.30%~~ ~~0.350%~~ based on our credit rating.

None of our subsidiaries are currently required to be a guarantor under the Credit Agreement. However, if any subsidiary guarantees or incurs debt, which does not qualify for certain limited exceptions and is otherwise, in the aggregate with all other similar debt, in excess of Priority Debt (as defined in the Credit Agreement), such subsidiary is required to become a guarantor under the Credit Agreement.

The Credit Agreement contains representations, warranties, affirmative and negative covenants and events of default and associated remedies that we believe are customary for agreements of this nature, including certain restrictions on our ability and the ability of each of our subsidiaries to grant liens and on the ability of each of our non-guarantor subsidiaries to incur debt. If our credit rating is below investment grade at both Moody's and S&P, we will become subject to a restricted payment covenant, which would generally require us to have a Pro Forma Debt Service Coverage Ratio (as defined in the Credit Agreement) greater than or equal to 1.50 to 1.00 immediately before and immediately after making any restricted payment. Restricted payments include, among other things, dividend payments, repurchases of our common stock, distributions to holders of our common stock or any other payment or other distribution to third parties on account of our or our subsidiaries' equity interests. Our credit rating is currently investment grade at both credit rating agencies. The Credit Agreement also requires that our total debt to capitalization ratio, expressed as a percentage, not exceed 50% as of the last day of each fiscal quarter. The Credit Agreement generally defines the total debt to capitalization ratio as the ratio of (a) total borrowed money indebtedness to (b) the sum of such indebtedness plus consolidated net worth, with consolidated net worth determined as of the end of the most recently ended fiscal quarter. We were in compliance with ~~these the~~ covenants under the ~~Prior Credit Agreement~~ at ~~December 31, 2023~~ ~~December 31, 2024~~.

On March 16, 2015, we entered into a Reimbursement Agreement (the (as amended from time to time, the "Reimbursement Agreement") with The Bank of Nova Scotia ("Scotiabank"), pursuant to which we may from time to time request that Scotiabank issue an unspecified amount of letters of credit. As of ~~December 31, 2023~~ ~~December 31, 2024~~, we had ~~\$87.7million~~ ~~\$38.8 million~~ in letters of credit outstanding under the Reimbursement Agreement.

Under the terms of the Reimbursement Agreement, we will reimburse Scotiabank on demand for any amounts that Scotiabank has disbursed under any of our letters of credit issued thereunder. Fees, charges and other reasonable expenses for the issuance of letters of credit are payable by us at the time of issuance at such rates and

amounts as are in accordance with Scotiabank's prevailing practice. We are obligated to pay to Scotiabank interest on all amounts not paid by us on the date of demand or when otherwise due at the LIBOR Prime rate plus 2.25% 2.00% per annum, calculated daily and payable monthly, in arrears, on the basis of a calendar year for the actual number of days elapsed, with interest on overdue interest at the same rate as on the reimbursement amounts. A letter of credit fee is payable by us equal to 1.50% times the amount of outstanding letters of credit.

We have also agreed that if obligations under the Credit Agreement are secured by liens on any of our or our subsidiaries' property, then our reimbursement obligations and (to the extent similar obligations would be secured under the Credit Agreement) other obligations under the Reimbursement Agreement and any letters of credit will be equally and ratably secured by all property subject to such liens securing the Credit Agreement.

45

Pursuant to a Continuing Guaranty dated as of March 16, 2015, our payment obligations under the Reimbursement Agreement are jointly and severally guaranteed as to payment and not as to collection by our subsidiaries that from time to time guarantee payment under the Credit Agreement. None of our subsidiaries are currently required to guarantee payment under the Credit Agreement.

We had \$92.4 million \$42.9 million of outstanding letters of credit at December 31, 2023 December 31, 2024, which was comprised of \$87.7 million \$38.8 million outstanding under the Reimbursement Agreement, \$2.5 million \$2.1 million outstanding under the Prior Credit Agreement, and \$2.2 million \$2.0 million outstanding with financial institutions providing for short-term borrowing capacity, overdraft protection and bonding requirements. We maintain these letters of credit primarily for the benefit of various insurance companies as collateral for retrospective premiums and retained losses which could become payable under terms of the underlying insurance contracts and compliance with contractual obligations. These letters of credit expire annually at various times during the year and are typically renewed.

As of December 31, 2024, no amounts had been drawn under the letters of credit.

Our outstanding long-term debt at December 31, 2023 December 31, 2024 was \$1.2 billion and consisted of \$483million \$483 million of our 2028 Notes, \$345million \$345 million of our 2029 Notes, \$400million \$400 million of our 2033 Notes and \$18.7 million \$6.4 million of our Equipment Loans. We were in compliance with all covenants under the associated agreements and indentures at December 31, 2023 December 31, 2024.

For a full description of the Prior Credit Agreement, the Reimbursement Agreement, the 2028 Notes, the 2029 Notes, and the 2033 Notes, and the Equipment Loans, see Note 9 of Notes to consolidated financial statements included as a part of Item 8 of this Report.

On August 29, 2023, we entered into a Term Loan Agreement with Wells Fargo Bank, National Association, as administrative agent and a lender, and the other lenders party thereto (the "Term Loan Agreement"). The Term Loan Agreement was a committed senior unsecured term loan facility (the "Term Loan Facility") that permitted a single borrowing of up to \$300 million, which could be drawn by us on or before November 27, 2023. We terminated the Term Loan Facility on September 13, 2023 and, as a result, the commitments under the Term Loan Agreement also terminated in full. We did not borrow under the Term Loan Facility.

## Cash Requirements

We believe our current liquidity, together with cash expected to be generated from operations, should provide us with sufficient ability to fund our current plans to maintain and make improvements to our existing equipment, service our debt, pay cash dividends and repurchase our common stock and senior notes for at least the next 12 months.

If we pursue other opportunities that require capital, we believe we would be able to satisfy these needs through a combination of working capital, cash flows from operating activities, borrowing capacity under our revolving credit facility or additional debt or equity financing. However, there can be no assurance that such capital will be available on reasonable terms, if at all.

A portion of our capital expenditures can be adjusted and managed by us to match market demand and activity levels. Based on our current outlook for activity, we expect our capital expenditures for 2024 2025 to be approximately \$740 million; \$600 million. The majority of these expenditures are expected to be used for normal, recurring items necessary to support our business.

We anticipate \$96.4 million \$52.2 million of expenditures in 2024 2025 related to various contractual obligations such as certain commitments to purchase proppants and lease liabilities.

As of December 31, 2023 December 31, 2024, we had working capital of \$435 million; \$453 million, including cash, and cash equivalents and restricted cash of \$193 million \$241 million, compared to working capital of \$278 million; \$435 million, including cash, and cash equivalents and restricted cash of \$138 million; \$193 million, at December 31, 2022 December 31, 2023.

During 2023; 2024, our sources of cash flow included:

- \$1.0 1.2 billion from operating activities, and
- \$26 25.8 million in proceeds from the disposal of property and equipment; and equipment.
- \$396 million in net proceeds before offering expenses from the issuance of our 2033 Notes.

During 2023, 2024, our uses of cash flow and borrowings under our revolving credit facility included:

- \$616.678 million to make capital expenditures for the betterment and refurbishment of drilling services and completion services equipment and, to a much lesser extent, equipment for our other businesses, to acquire and procure equipment to support our drilling services, completion services, drilling products, oilfield rentals and manufacturing operations to acquire an aircraft and to fund investments in oil and natural gas properties on a non-operating working interest basis,
- \$357 million, net of acquired cash, for the Ulterra acquisition,
- \$65 million, net of acquired cash, for the NexTier merger,

46

- \$201.290 million for repurchases of our common stock,
- \$100.127 million to pay dividends on our common stock,
- \$16.45.5 million for payments related to finance leases, and
- \$8 million for repurchases of our 2028 Notes and 2029 Notes, and
- \$12.17.5 million for other investing and financing activities activities.

We paid cash dividends during the year ended December 31, 2023 December 31, 2024 as follows:

	Per Share	Total (in thousands)
Paid on March 16, 2023	\$ 0.08	\$ 16,916
Paid on June 15, 2023	0.08	16,591
Paid on September 21, 2023	0.08	33,217
Paid on December 15, 2023	0.08	33,310
Total cash dividends	\$ 0.32	\$ 100,034

	Per Share	Total (in thousands)
Paid on March 15, 2024	\$ 0.08	\$ 32,553
Paid on June 17, 2024	0.08	31,815
Paid on September 16, 2024	0.08	31,225
Paid on December 16, 2024	0.08	31,198
Total cash dividends	\$ 0.32	\$ 126,791

On February 14, 2024 February 5, 2025, our Board of Directors approved a cash dividend on our common stock in the amount of \$0.08 per share to be paid on March 15, 2024 March 17, 2025 to holders of record as of March 1, 2024 March 3, 2025. The amount and timing of all future dividend payments, if any, are subject to the discretion of the Board of Directors and will depend upon business conditions, results of operations, financial condition, terms of our debt agreements and other factors. Our Board of Directors may, without advance notice, reduce or suspend our dividend in order for any reason, including to improve our financial flexibility and position our company for long-term success. There can be no assurance that we will pay a dividend in the future.

We may, at any time and from time to time, seek to retire or purchase our outstanding debt for cash through open-market purchases, privately negotiated transactions, redemptions or otherwise. Such repurchases, if any, will be upon such terms and at such prices as we may determine, and will depend on prevailing market conditions, our liquidity requirements, contractual restrictions and other factors. The amounts involved may be material.

In September 2013, our Board of Directors approved a stock buyback program. In April 2023, February 2024, our Board of Directors approved an increase of the authorization under the stock buyback program to allow for an aggregate of \$300 million \$1.0 billion of future share repurchases. All purchases executed to date have been through open market transactions. Purchases under the buyback program are made at management's discretion, at prevailing prices, subject to market conditions and other factors. Purchases may be made at any time without prior notice. There is no expiration date associated with the buyback program. As of December 31, 2023 December 31, 2024, we had remaining authorization to purchase approximately \$206 million \$759 million of our outstanding common stock under the stock buyback program. In February 2024, our Board of Directors approved an increase of the authorization under the stock buyback program to allow for an aggregate of \$1 billion of future share repurchases. Shares of stock purchased under the buyback program are held as treasury shares.

We acquired shares of stock from employees during 2024, 2023 2022 and 2021 2022 that are accounted for as treasury stock. Certain of these shares were acquired to satisfy the exercise price and employees' tax withholding obligations upon the exercise of stock options. The remainder of these shares were acquired to satisfy payroll withholding obligations upon the settlement of performance unit awards and the vesting of restricted stock units. These shares were acquired at fair market value. These acquisitions were made pursuant to the terms of the Patterson-UTL Energy, Inc. Amended and Restated 2014 Long-Term Incentive Plan, as amended (the "2014 Plan") and, the Patterson-UTL Energy, Inc. 2021 Long-Term Incentive Plan (the "2021 Plan"), the NexTier Oilfield Solutions Inc. Equity and Incentive Award Plan and the NexTier Oilfield Solutions Inc. (Former C&J Energy) Management Incentive Plan, and not pursuant to the stock buyback program. Upon the issuance of shares for the Pioneer acquisition in October 2021, we withheld shares with respect to Pioneer employees' tax withholding obligations.

47

Treasury stock acquisitions during the years ended December 31, 2023 December 31, 2024, 2022 2023 and 2021 2022 were as follows (dollars in thousands):

	2023		2022		2021	
	Shares	Cost	Shares	Cost	Shares	Cost
Treasury shares at beginning of period	88,758,722	\$ 1,453,079	84,128,995	\$ 1,372,641	83,402,322	\$ 1,366,313
Purchases pursuant to stock buyback program	14,086,229	168,631	3,254,599	57,173	—	—
Acquisitions pursuant to long-term incentive plan	2,735,060	35,965	1,372,101	23,237	451,196	3,727
Purchases in connection with Pioneer acquisition	—	—	—	—	275,477	2,601
Other	—	—	3,027	28	—	—
Treasury shares at end of period	105,580,011	\$ 1,657,675	88,758,722	\$ 1,453,079	84,128,995	\$ 1,372,641

	2024		2023		2022	
	Shares	Cost	Shares	Cost	Shares	Cost
Treasury shares at beginning of period	105,580,011	\$ 1,657,675	88,758,722	\$ 1,453,079	84,128,995	\$ 1,372,641
Purchases pursuant to stock buyback program	26,646,698	280,327	14,086,229	168,631	3,254,599	57,173
Acquisitions pursuant to long-term incentive plan	1,213,319	13,065	2,735,060	35,965	1,372,101	23,237
Other	—	—	—	—	3,027	28
Treasury shares at end of period	133,440,028	\$ 1,951,067	105,580,011	\$ 1,657,675	88,758,722	\$ 1,453,079

As of December 31, 2023 December 31, 2024, we had unrecognized compensation costs of \$51.4 million \$42.8 million and \$11.1 million \$12.8 million related to our unvested restricted stock units and our unvested Performance Units, respectively. The weighted-average remaining vesting periods for these awards were 1.63 1.71 years and 1.13 1.04 years, respectively as of December 31, 2023 December 31, 2024. See Note 12 of Notes to consolidated financial statements in Item 8 of this Report for additional discussion regarding our stock-based compensation.

**Commitments** — As of December 31, 2023 December 31, 2024, we had commitments to purchase major equipment totaling approximately \$153 million \$65.9 million.

Our completion services segment has entered into agreements to purchase minimum quantities of proppants from certain vendors. As of December 31, 2023 December 31, 2024, the remaining minimum obligation under these agreements was approximately \$39.7 million \$19.8 million, of which approximately, \$33.7 million, \$4.0 million \$17.4 million and \$2.0 million \$2.4 million relate to the remainder of 2024, 2025 and 2026, respectively.

See Note 10 of Notes to consolidated financial statements in Item 8 of this Report for additional information on our current commitments and contingencies as of December 31, 2023 December 31, 2024.

As part of the Ulterra acquisition and NexTier merger, we acquired additional operating and finance leases.

Operating lease liabilities totaled \$51.4 million \$47.6 million and finance lease liabilities totaled \$56.9 million \$25.4 million at December 31, 2023 December 31, 2024. See Note 13 of Notes to consolidated financial statements in Item 8 of this Report for additional information on our operating and finance leases as of December 31, 2023 December 31, 2024.

**Trading and Investing** — We have not engaged in trading activities that include high-risk securities, such as derivatives and non-exchange traded contracts. We invest cash primarily in highly liquid, short-term investments such as overnight deposits and money market accounts.

## Critical Accounting Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from such estimates. Accounting estimates and assumptions discussed in this section are those considered to be the most critical to an understanding of our financial statements because they involve significant judgments and uncertainties. We believe

the following critical accounting estimates used in preparing our consolidated financial statements address all important areas where the nature of the estimates or assumptions is material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change. For additional information on our accounting policies, see Note 1 of Notes to consolidated financial statements included as a part of Item 8 of this Report.

*Depreciation and amortization* — Our industry is very capital intensive, as property and equipment represented 45%51.6% of our total assets as of December 31, 2023December 31, 2024 and depreciation, depletion, amortization and impairment represented 19%18.7% of our total operating costs and expenses in 2023, 2024. Our property and equipment is carried at cost less accumulated depreciation and amortization. No provision for salvage value is considered in determining depreciation of our property and equipment. We calculate depreciation and amortization on our assets based on the estimated useful lives that we believe are reasonable. The estimated useful lives are subject to key assumptions such as maintenance, utilization and job variation. These estimates may change due to a number of factors such as changes in operating conditions or advances in technology. The method of depreciation does not change whenever equipment becomes idle. Maintenance and repairs are charged to expense when incurred. Renewals and betterments which extend the life or improve existing property and equipment are capitalized. In the third quarter of 2023, we changed the estimated useful lives of certain property and equipment within our completion services segment. See Note 1 of Notes to consolidated financial statements included as a part of Item 8 of this Report.

48

The following table outlines a 10% change in the useful lives on our major categories of property and equipment and the impact on operating income for the year ended December 31, 2023December 31, 2024:

		Useful Lives	Change	Impact (in thousands)		
				Useful Lives	Change	Impact (in thousands)
Drilling services equipment	1-15 years	10%	\$	47,423		
Completion services equipment	1-25 years	10%		13,567		
			\$	60,990		
					\$	

*Impairment of long-lived assets* — We review our long-lived assets, including property and equipment and definite-lived intangible assets, for impairment whenever events or changes in circumstances indicate that the carrying amounts of certain assets may not be recovered over their estimated remaining useful lives ("triggering events"). AssetsIn connection with this review, assets are grouped at the lowest level at which identifiable cash flows are largely independent of other asset groupings for impairment assessment. If there is a triggering event, we groupings. We estimate the undiscounted future cash flows over the life of the respective assetsasset or the primary asset groupings in our assessment of its recoverability, an asset group. These estimates of cash flows are based on historical cyclical trends in the industry as well as our expectations regarding the continuation of these trends in the future. If estimated undiscounted cash flows expected to result from the use and eventual dispositionAs of an assetDecember 31, 2024, no impairment was indicated for our long-lived tangible or asset group is less than its respective carrying amount, an impairment loss is recognized in the amount by which the carrying amount exceeds its estimated fair value. This analysis is based on estimates such as management's short-term and long-term forecast of operating performance, including revenue growth rates and expected profitability margins, customer attrition rates, contributory asset charges, estimates of the remaining useful life and service potential of the assets within the asset group, and a discount rate based on our weighted average cost of capital. We determined no triggering events occurred in 2023 related to our long-lived definite-lived intangible assets. See Note 6 of Notes to consolidated financial statements included as a part of Item 8 of this Report.

While we believe our judgments and assumptions are reasonable, geopolitical instability, global or regional decreases in the demand of our services and products, or other unforeseen macroeconomic considerations could negatively impact the expected cash flows used in our recoverability tests on our asset groups. Such changes could result in impairment charges in the future, which could be material to our results of operations and financial statements as a whole.

*Fair values of assets acquired and liabilities assumed in acquisitions* — Assets acquired and liabilities assumed in a business combination are recorded at their estimated fair values on the date of acquisition. The difference between the purchase price amount and the net fair value of assets acquired and liabilities assumed is recognized as goodwill on the balance sheet if the purchase price exceeds the estimated net fair value or as a bargain purchase gain on the income statement if the purchase price is less than the estimated net fair value. We apply significant judgment in estimating the fair value of assets acquired and liabilities assumed, which involves the use of significant estimates and assumptions with respect to rig counts, cash flow projections, estimated economic useful lives, operating and capital cost estimates, customer attrition rates, contributory asset charges, royalty rates and discount rates. Changes in these judgments or estimates can have a material impact on the valuation of the respective assets and liabilities acquired and our results of operations in periods after acquisition, such as through depreciation and amortization expense. The allocation of the purchase price may be modified up to one year after the acquisition date as more information is obtained about the fair value of assets acquired and liabilities assumed. See Note 2 of Notes to consolidated financial statements included as a part of Item 8 of this Report.

*Goodwill* — We assess goodwill at least annually on July 31, or more frequently when events and circumstances occur indicating recorded goodwill may be impaired. Goodwill is tested at the reporting unit level, which is at or one level below our operating segments. We determine whether it is more likely than not that the fair value of a reporting unit is less

than its carrying value after considering qualitative, market and other factors, and if that is the case, any factors. Any necessary goodwill impairment is determined using a quantitative impairment test. If the resulting fair value of goodwill is less than the carrying value of goodwill, an impairment loss would be recognized for the amount of the shortfall. The fair value of a reporting unit is determined using significant unobservable inputs, or level 3 in the fair value hierarchy. These inputs are based on internal management estimates, forecasts, and significant judgment.

We determined our drilling products operating segment consists of a single reporting unit and, accordingly, goodwill acquired from the Ulterra acquisition was allocated to that reporting unit. We determined our completion services operating segment consists of two reporting units; completion services, which is primarily comprised of our hydraulic fracturing operations and other integrated service offerings, and cementing services.

Negative market indicators such as lower industry-wide drilling rig and pressure pumping fleet count forecasts, increased volatility and pricing declines in the pressure pumping market, and continued efficiency gains and technology advancements reducing operating days have led to our reduced outlook for activity. During the fourth third quarter of 2023, our share price experienced a sustained decline which resulted 2024, we viewed the reduction in a decrease to our market capitalization. This activity forecasts combined with the recent decline in share the market price was deemed of our common stock as a triggering event that warranted a quantitative assessment for goodwill impairment for all three of our reporting units.

impairment.

We estimated the fair value of the drilling products and the completion services reporting units using the income approach. Under this approach, we used a discounted cash flow model, which utilizes utilized present values of cash flows to estimate fair value. Forecasted cash flows considered reflected known market conditions as in the third quarter of December 31, 2023, 2024 and management's management's anticipated business outlook for each reporting unit. Future cash flows were projected based on estimates of revenue growth rates, gross profit, selling, general and administrative expense, changes in working capital, and capital expenditures. The terminal period used within the discounted cash flow model for each reporting unit consisted of a 1% growth estimate. The future Future cash flows were then discounted using a market-participant, risk-adjusted weighted average cost of capital of 10% 10.25% for the drilling products reporting unit and 12% 10.75% for the completion services reporting unit. Financial and credit market volatility directly impacts our fair value measurement through the weighted average cost of capital used to determine a discount rate. During times of volatility, significant judgment must be applied to determine whether credit market changes are a short-term or long-term trend.

We estimated the fair value of the cementing services reporting unit in our completion services operating segment using a market approach. The market approach was based on trading multiples of earnings before interest, taxes, depreciation and amortization for companies comparable to the cementing services reporting unit.

49

The forecast for the completion services reporting unit assumed lower activity in 2025 compared to average activity levels for full year 2024 and increases in estimated activity of 2% to 8% beginning in 2026 through 2029. Those estimates were based on future drilling rig and pressure pumping fleet count forecasts during the third quarter of 2024 and estimated market share. Additionally, the forecast reflected the expectation that industry-wide pricing pressure will persist within the completions market and continue to compress adjusted gross profit. These factors negatively impacted the estimated value of the reporting unit.

Based on the results of the quantitative assessment, the fair value of the completion services reporting unit was less than its carrying value. Accordingly, we recorded an \$885 million impairment charge to goodwill for the completion services reporting unit during the third quarter of 2024.

The forecast for the drilling products reporting unit assumes assumed continued growth domestically as well as in international markets. Geopolitical instability in regions in which we expect to maintain and grow market share, a global decrease in the demand of drilling products, or other unforeseen macroeconomic considerations could negatively impact the key assumptions used in our goodwill assessment for our drilling products reporting unit.

The forecast for the completion services reporting unit assumes activity in 2024 consistent with 2023 exit levels and moderate increases in activity of 3% to 5% beginning in 2025 and holding flat until the terminal period, which was consistent with rig count forecasts as of December 31, 2023. A sustained decrease in oil prices and rig count could negatively affect the key assumptions used in our goodwill assessment for completion services.

Based on the results of the goodwill impairment tests performed during the third quarter of 2024, the fair values of the drilling products completion services, and cementing services reporting units exceeded their carrying values by approximately 4%, 11%, 13% and 80% 73%, respectively. Accordingly, no impairment was recorded for any of the drilling products and cementing services reporting units.

Assuming all changes are isolated, a decrease of 100 bps in our long-term revenue growth rate for our drilling products reporting unit would reduce our estimated fair value by approximately 6% 5%, while a 100 bps increase to our discount rate would reduce our estimated fair value by approximately 10%.

Assuming all changes are isolated, a decrease of 100 bps in our long-term revenue growth rate for our completion services reporting unit would reduce our estimated fair value by approximately 6%, while a 100 bps increase to our discount rate would reduce our estimated fair value by approximately 8%.

A decrease in fair value resulting from unfavorable changes to these assumptions, or others, could result in goodwill impairment in future periods that could be material to our results of operations and financial statements as a whole.

*Accruals for self-insured levels of insurance coverage* — We maintain insurance coverage for fire, windstorm and other risks of physical loss to our equipment and certain other assets, employers' liability, automobile liability, commercial general liability, workers' compensation and insurance for other specific risks. We also self-insure a number of other risks, including loss of earnings and business interruption and most of our cybersecurity risks, and do not carry a significant amount of insurance to cover risks of underground reservoir damage. Our insurance accruals are based on claims filed and estimates of claims incurred but not reported and are developed by our management with assistance from our third-

party actuary and third-party claims administrator. The insurance accruals are influenced by our past claims experience factors and by published industry development factors. If we experience insurance claims or costs above or below our historically evaluated levels, our estimates could be materially affected. The frequency and number of claims or incidents could vary significantly over time, which could materially affect our self-insurance liabilities. Additionally, the actual costs to settle the self-insurance liabilities could materially differ from the original estimates and cause us to incur additional costs in future periods associated with prior year claims. A sensitivity analysis of the impact on earnings for these periods if other assumptions had been used in recording these liabilities is not practicable given the number of underlying assumptions and the wide range of reasonably possible outcomes. See "Item 1A. Risk Factors – Our operations are subject to a number of operational risks, including environmental and weather risks, which could expose us to significant losses and damage claims. We are not fully insured against all of these risks and our contractual indemnity provisions may not fully protect us."

**Income taxes** — We are subject to income taxes in the United States and other foreign jurisdictions. We compute our provision for income taxes using the asset and liability method, under which deferred tax assets and liabilities are recognized for operating loss and tax credit carryforwards and for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the results of operations in the period that includes the enactment date. In assessing the realizability of our deferred tax assets, if it is more likely than not that a portion of the deferred tax assets will not be realized in a future period, the deferred tax assets will be reduced by a valuation allowance. We believe the valuation allowance is a critical accounting estimate because it is susceptible to change from period to period, requires assumptions about our future income over the lives of the deferred tax assets, and because the impact of increasing or decreasing the valuation allowance is potentially material to our results of operations.

Our methodology for recording income taxes requires a significant amount of judgment in the use of assumptions and estimates. Additionally, we forecast certain tax elements, such as future taxable income, as well as evaluate the feasibility of implementing tax planning strategies. Given the inherent uncertainty involved with the use of such variables, there can be significant variation between anticipated and actual results. Unforeseen events may significantly impact these variables, and changes to these variables could have a material impact on our income tax accounts. The final determination of our income tax liabilities involves the interpretation of local tax laws and related authorities in each jurisdiction. Changes in the operating environments, including changes in tax law, could impact the determination of our income tax liabilities for a tax year.

50

We continue to monitor income tax developments, including OECD Pillar 2 legislation, in the United States and other countries where we have legal entities. We recognize tax benefits related to uncertain tax positions when, in our judgment, it is more likely than not that such positions will be sustained on examination, including resolutions of any related appeals or litigation, based on the technical merits. We adjust our liabilities for uncertain tax positions when our judgment changes as a result of new information previously unavailable. We routinely monitor the potential impact of these situations. As of December 31, 2023 December 31, 2024, we have no unrecognized tax benefits.

#### Volatility of Oil and Natural Gas Prices and its Impact on Operations and Financial Condition

Our revenues, profitability and cash flows are highly dependent upon prevailing prices for oil and natural gas and expectations about future prices. Crude oil prices, and demand for drilling upon our customers' ability to access, and completion equipment willingness to deploy, capital to fund their operating and services increased from 2021 to 2022, and industry supply capital expenditures. Commodity prices have historically been volatile, but have been relatively range-bound since the end of Tier-1, super-spec rigs became constrained. Commodity price volatility in the second quarter of 2023 resulted in a decline in industry activity, commodity prices subsequently increased during the third quarter before declining in the fourth quarter of 2023. 2022. The current demand for equipment and services remains dependent on impacted by macro conditions, including commodity prices, geopolitical environment, inflationary pressures, economic conditions in the United States and elsewhere, as well as customer consolidation and focus by exploration and production companies and service companies on capital returns. Oil prices averaged \$78.53 \$70.73 per barrel in the fourth quarter of 2023, 2024. Natural gas prices (based on the Henry Hub Spot Market Price) averaged \$2.74 \$2.45 per MMBtu in the fourth quarter of 2023.

2024.

In light of these and other factors, we expect oil and natural gas prices to continue to be volatile unpredictable and to affect our financial condition, operations and ability to access sources of capital. Higher oil and natural gas prices do not necessarily result in increased activity because demand for our services is generally driven by our customers' expectations of future oil and natural gas prices, as well as our customers' ability to access, and willingness to deploy, capital to fund their operating and capital expenditures. A decline in demand for oil and natural gas, prolonged low oil or natural gas prices, expectations of decreases in oil and natural gas prices or a reduction in the ability of our customers to access capital would likely result in reduced capital expenditures by our customers and decreased demand for our services, which could have a material adverse effect on our operating results, financial condition and cash flows. Even during periods of historically moderate or high prices for oil and natural gas, companies exploring for oil and natural gas may cancel or curtail programs or reduce their levels of capital expenditures for exploration and production for a variety of reasons, including the depletion of capital expenditure budgets and/or meeting annual drilling and completion targets, which could reduce demand for our services.

#### Impact of Inflation

Inflation rates have begun to moderate. However, we continue to actively monitor market trends primarily related to sourcing labor, supplies and equipment.

#### Recently Issued Accounting Standards

For a discussion of recently issued accounting standards, see Note 1 of Notes to consolidated financial statements included as a part of Item 8 of this Report.

51

## Non-GAAP Financial Measures

### Adjusted EBITDA

Adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA") is not defined by accounting principles generally accepted in the United States of America ("GAAP"). We define Adjusted EBITDA as net income (loss) **from continuing operations** plus income tax expense (benefit), net interest expense, depreciation, depletion, amortization and impairment expense **(including impairment of goodwill)** and merger and integration expense. We present Adjusted EBITDA as a supplemental disclosure because we believe it provides to both management and investors additional information with respect to the performance of our fundamental business activities and a comparison of the results of our operations from period to period and against our peers without regard to our financing methods or capital structure. We exclude the items listed above from net income (loss) **from continuing operations** in arriving at Adjusted EBITDA because these amounts can vary substantially from company to company within our industry depending upon accounting methods and book values of assets, capital structures and the method by which the assets were acquired. Adjusted EBITDA should not be construed as an alternative to the GAAP measure of net income (loss) **from continuing operations**. Our computations of Adjusted EBITDA may not be the same as similarly titled measures of other companies. Set forth below is a reconciliation of the non-GAAP financial measure of Adjusted EBITDA to the GAAP financial measure of net income (loss) **from continuing operations**.

	Year Ended December 31,		
	2023	2022	2021
	(in thousands)

### Adjusted Gross Profit

We define "Adjusted gross profit" as revenues less direct operating costs (excluding depreciation, depletion, amortization and impairment **expense**) **expense, which does not include impairment of goodwill**). Adjusted gross profit is included as a supplemental disclosure because it is a useful indicator of our operating performance.

**Item 7A. Quantitative and Qualitative Disclosures About Market Risk**

As of **December 31, 2023** **December 31, 2024**, we would have had exposure to interest rate market risk associated with any outstanding borrowings and letters of credit that we had under the **Prior** Credit Agreement and amounts owed under the Reimbursement Agreement.

Loans under the **Prior** Credit Agreement **bear bore** interest by reference, at our election, to the SOFR rate (subject to a 0.10% per annum adjustment) or base rate, in each case subject to a 0% floor. The applicable margin on SOFR rate loans **varies varied** from 1.00% to 2.00% and the applicable margin on base rate loans **varies varied** from **0.00% 0%** to 1.00%, in each case determined based on our credit rating. As of **December 31, 2023 December 31, 2024**, the applicable margin on SOFR rate loans was 1.75% and the applicable margin on base rate loans was 0.75%. A letter of credit fee **is was** payable by us equal to the applicable margin for SOFR rate loans times the daily amount available to be drawn under outstanding letters of credit. The commitment fee rate payable to the lenders **varies varied** from 0.10% to 0.30% based on our credit rating. As of **December 31, 2023 December 31, 2024**, we had **\$2.6 million \$2.1 million** in letters of credit outstanding and, as a result, had available borrowing capacity of approximately **\$597 million \$613 million** at that date.

Under the terms of the Reimbursement Agreement, we will reimburse Scotiabank on demand for any amounts that Scotiabank has disbursed under any of our letters of credit issued thereunder. We are obligated to pay Scotiabank interest on all amounts not paid by us on the date of demand or when otherwise due at the **LIBOR Prime** rate plus **2.25% 2.00%** per annum.

Some of our revenues in foreign countries are denominated in U.S. dollars, and therefore, changes in foreign currency exchange rates impact our earnings to the extent that costs associated with those U.S. dollar revenues are denominated in the local currency. Similarly, some of our revenues are denominated in foreign currencies, but have associated U.S. dollar costs, which also give rise to foreign currency exchange rate exposure.

The carrying values of cash, **and** cash equivalents **and restricted cash**, trade receivables and accounts payable approximate fair value due to the short-term maturity of these items.

#### Item 8. Financial Statements and Supplementary Data.

Financial Statements are filed as a part of this Report at the end of Part IV hereof beginning at page F-1, Index to Consolidated Financial Statements, and are incorporated herein by this reference.

#### Item 9.Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

#### Item 9A. Controls and Procedures.

##### Disclosure Controls and Procedures:

Under the supervision and with the participation of our management, including our Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), we conducted an evaluation of the effectiveness of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Exchange Act, as of the end of the period covered by this Report. Based on this evaluation, our CEO and CFO concluded that, as of **December 31, 2023 December 31, 2024**, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and is accumulated and reported to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

##### Management's Report on Internal Control over Financial Reporting:

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of our management, including our CEO and CFO, we carried out an evaluation of the effectiveness of our internal control over financial reporting as of **December 31, 2023 December 31, 2024**, based on the *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, our management has concluded that our internal control over financial reporting was effective as of **December 31, 2023 December 31, 2024**.

**We completed the Ulterra acquisition on August 14, 2023 and the NexTier merger on September 1, 2023. We excluded Ulterra's and NexTier's disclosure controls and procedures that are subsumed by their internal control over financial reporting from the scope of management's assessment of the effectiveness of our disclosure controls and procedures. This exclusion is in accordance with the guidance issued by the Staff of the Securities and Exchange Commission that an assessment of recent business combinations may be omitted from management's assessment of internal control over financial reporting for one year following the acquisition. As a result of our integration of the Ulterra and NexTier disclosure controls and procedures, certain controls will be evaluated and may be changed. Ulterra and NexTier's total revenues constituted approximately 3% and 26% of our consolidated revenues, respectively, for the year ended December 31, 2023. Ulterra's and NexTier's total assets constituted approximately 3% and 23% of our consolidated total assets, respectively, as of December 31, 2023.**

The effectiveness of our internal control over financial reporting as of **December 31, 2023 December 31, 2024** has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears on page F-2 of this Report and which is incorporated by reference into Item 8 of this Report.

##### Changes in Internal Control over Financial Reporting:

There have been no changes to our internal control over financial reporting during the most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**Item 9B. Other Information.**

**None (c)** During the three months ended December 31, 2024, certain of our officers and directors listed below adopted or terminated trading arrangements for the sale of shares of our common stock in amounts and prices determined in accordance with a formula set forth in each such plan:

Name and Title	Action	Date	Plans		Number of Shares to be Sold	Expiration
			Rule 10b5-1	Non-Rule 10b5-1		
Robert Drummond Jr.,	Director	Termination	November 8, 2024	X	1,250,000	Plan terminated November 8, 2024

**Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections.**

**None.**

54

None.

**PART III**

Certain information required by Part III is omitted from this Report because we expect to file a definitive proxy statement (the "Proxy Statement") pursuant to Regulation 14A of the Securities Exchange Act of 1934 no later than 120 days after the end of the fiscal year covered by this Report and certain information included therein is incorporated herein by reference.

**Item 10. Directors, Executive Officers and Corporate Governance.**

The information required by this Item is incorporated herein by reference to the Proxy Statement.

We have adopted a Code of Business Conduct and Ethics for Senior Financial Executives, which covers, among others, our principal executive officer and principal financial and accounting officer. The text of this code is located on our website under "Corporate Governance." Our Internet address is [www.patenergy.com](http://www.patenergy.com). We intend to disclose any amendments to or waivers from this code on our website within four business days following the date of the amendment or waiver.

**Item 11. Executive Compensation.**

The information required by this Item is incorporated herein by reference to the Proxy Statement.

**Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.**

The information required by this Item is incorporated herein by reference to the Proxy Statement.

**Item 13. Certain Relationships and Related Transactions, and Director Independence.**

The information required by this Item is incorporated herein by reference to the Proxy Statement.

**Item 14. Principal Accounting Fees and Services.**

The information required by this Item is incorporated herein by reference to the Proxy Statement.

55

**PART IV**

Item 15. Exhibits and Financial Statement Schedule.

(a)(1) Financial Statements

See Index to Consolidated Financial Statements on page F-1 of this Report.

(a)(2) Report of Independent Registered Public Accounting Firm

The report of our independent registered public accounting firm (PCAOB ID: 238 238) with respect to the above-referenced financial statements and their report on internal control over financial reporting are included on page F-2 of this Report.

(a)(3) Financial Statement Schedule

Schedule II — Valuation and qualifying accounts is filed herewith on page S-1.

All other financial statement schedules have been omitted because they are not applicable or the information required therein is included elsewhere in the financial statements or notes thereto.

(a)(3) Exhibits

The following exhibits are filed herewith or incorporated by reference herein. Our Commission file number is 0-22664.

2.1

[Agreement and Plan of Merger, dated July 5, 2021, among Patterson-UTI Energy, Inc., Crescent Merger Sub Inc., Crescent Ranch Second Merger Sub LLC, and Pioneer Energy Services Corp. \(filed July 6, 2021 as Exhibit 2.1 to our Current Report on Form 8-K and incorporated herein by reference\).](#)

## Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Patterson-UTI Energy, Inc.

### Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Patterson-UTI Energy, Inc. and its subsidiaries (the "Company" "Company") as of December 31, 2023 December 31, 2024 and 2022, 2023, and the related consolidated statements of operations, of comprehensive income (loss), of changes in stockholders' equity and of cash flows for each of the three years in the period ended December 31, 2023 December 31, 2024, including the related notes and schedule of valuation and qualifying accounts for each of the three years in the period ended December 31, 2023 December 31, 2024 appearing on page S-1 (collectively referred to as the "consolidated" "consolidated financial statements" "statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2023 December 31, 2024, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2023 December 31, 2024 and 2022, 2023, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023 December 31, 2024 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2023 December 31, 2024, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

### Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As described in Management's Report on Internal Control over Financial Reporting, management has excluded Ulterra Drilling Technologies, L.P. (Ulterra) and NexTier Oilfield Solutions Inc. (NexTier) from its assessment of internal control over financial reporting as of December 31, 2023, because they were business combinations during 2023. We have also excluded Ulterra and NexTier from our audit of internal control over financial reporting. Ulterra and NexTier are wholly-owned subsidiaries whose total assets and total revenues excluded from management's assessment and our audit of internal control over financial reporting represent approximately 3% and 23% of total assets, respectively, and approximately 3% and 26% of total revenues, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2023.

### Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in

F-2

accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing a separate opinion on the critical audit matters or on the accounts or disclosures to which they relate.

#### Acquisition of Ulterra

#### Goodwill Impairment Assessment – Valuation of Customer Relationships

##### Drilling Products Reporting Unit

As described in Note 27 to the consolidated financial statements, the Company's goodwill balance for the drilling products reporting unit was \$450.5 million as of December 31, 2024. Management evaluates goodwill for impairment at least annually on August 14, 2023, the Company completed the acquisition of Ulterra for total consideration transferred of \$897 million. Of the acquired intangible assets, \$245 million of customer relationships were recorded. Fair value was July 31, or more frequently when events and circumstances occur indicating recorded goodwill may be impaired. Management estimated by management using a multi-period excess earnings method for customer relationships. Management applied significant judgment in estimating the fair value of assets acquired and liabilities assumed, which involved the use of significant estimates and assumptions with respect to future rig counts, drilling products reporting unit using the income approach. Under this approach, management used a discounted cash flow projections, estimated economic useful lives, operating model, which utilizes present values of cash flows to estimate fair value. Future cash flows were projected based on estimates of revenue growth rates, gross profit, selling, general and administrative expense, changes in working capital, and capital expenditures. The terminal period used within the discounted cash flow model for the reporting unit consisted of a growth estimate. Future cash flows were then discounted using a market-participant, risk-adjusted weighted average cost estimates, customer attrition rates, contributory asset charges, royalty rates and discount rate.

of capital.

The principal considerations for our determination that performing procedures relating to the valuation goodwill impairment assessment of customer relationships acquired in the acquisition of Ulterra drilling products reporting unit is a critical audit matter are (i) the significant judgment by management when developing the fair value estimate of the customer relationships acquired; drilling products reporting unit; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions related to cash flow projections, customer attrition estimates of certain revenue growth rates contributory asset charges, and the discount rate; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the acquisition accounting, management's goodwill impairment assessment, including controls over management's the valuation of the customer relationships acquired, drilling products reporting unit. These procedures also included, among others (i) reading the purchase agreement; (ii) testing management's process for developing the fair value estimate of the customer relationships acquired; (iii) drilling products reporting unit; (ii) evaluating the appropriateness of the multi-period excess earnings method income approach used by management; (iv) (iii) testing the completeness and accuracy of the underlying data used in the multi-period excess earnings method; income approach; and (v) (iv) evaluating the reasonableness of the significant assumptions used by management related to cash flow projections, customer attrition estimates of certain revenue growth rates contributory asset charges, and the discount rate. Evaluating management's assumption related to cash flow projections estimates of certain revenue growth rates involved evaluating whether the assumption used by management was reasonable considering (i) the current and past performance of the Ulterra business; drilling products reporting unit; (ii) the consistency with external market and industry data; and (iii) whether the assumption was consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in evaluating (i) the appropriateness of the multi-period excess earnings method income approach and (ii) the reasonableness of the customer attrition rates, contributory asset charges, and the discount rate assumptions.

#### Merger with NexTier – Valuation of Customer Relationships, Trade Name and Developed Technology

As described in Note 2 to the consolidated financial statements, on September 1, 2023, the Company completed the merger with NexTier for total consideration transferred of \$2,799 million. Of the acquired intangible assets, \$540 million of customer relationships, \$85 million of a trade name, and \$143 million of developed technology were recorded. Fair value was estimated by management using a multi-period excess earnings method for the customer relationships and a relief from royalty method for the trade name and developed technology. Management applied significant judgment in estimating the fair value of assets acquired and liabilities assumed, which involved the use of significant estimates and assumptions with respect to future rig counts, cash flow projections, estimated economic useful lives, operating and capital cost estimates, customer attrition rates, contributory asset charges, royalty rates and discount rate.

The principal considerations for our determination that performing procedures relating to the valuation of the customer relationships, trade name and developed technology acquired in the merger with NexTier is a critical audit matter are (i) the significant judgment by management when developing the fair value estimate of the customer relationships, trade

name and developed technology acquired; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumption.

F-3

assumptions related to cash flow projections, customer attrition rates, contributory asset charges, royalty rates, and the discount rate for the customer relationships, cash flow projections and the royalty rate for the trade name, and cash flow projections and the royalty rate for the developed technology; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the acquisition accounting, including controls over management's valuation of the customer relationships, trade name and developed technology acquired. These procedures also included, among others (i) reading the merger agreement; (ii) testing management's process for developing the fair value estimate of the customer relationships, trade name and developed technology acquired; (iii) evaluating the appropriateness of the multi-period excess earnings and relief from royalty methods used by management; (iv) testing the completeness and accuracy of the underlying data used in the multi-period excess earnings and relief from royalty methods; and (v) evaluating the reasonableness of the significant assumptions used by management related to cash flow projections, customer attrition rates, contributory asset charges, royalty rates, and the discount rate for the customer relationships, cash flow projections and the royalty rate for the trade name, and cash flow projections and the royalty rate for the developed technology. Evaluating management's assumption related to cash flow projections for the customer relationships, trade name and developed technology involved considering (i) the current and past performance of the NexTier business; (ii) the consistency with external market and industry data; and (iii) whether the assumption was consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in evaluating (i) the appropriateness of the multi-period excess earnings and relief from royalty methods and (ii) the reasonableness of the customer attrition rates, contributory asset charges, royalty rates, and the discount rate assumptions for the customer relationships and the royalty rate assumption for the trade name and developed technology.

PATTERSON-UTI ENERGY, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 1. Description of Business and Summary of Significant Accounting Policies

#### *A description of the business and basis of presentation follows:*

*Description of business* — Patterson-UTL Energy, Inc., through its wholly-owned subsidiaries and consolidating interest of a joint venture (collectively referred to herein as “we,” “us,” “our,” “ours” and like terms), is a Houston, Texas-based leading provider of drilling and completion services to oil and natural gas exploration and production companies in the United States and other select countries, including contract drilling services, integrated well completion services and directional drilling services in the United States, and specialized drill bit solutions in the United States, Middle East and many other regions around the world. We operate under three reportable business segments: (i) drilling services, (ii) completion services, and (iii) drilling products. We have other operations through which we provide oilfield rental tools in select markets in the United States. In addition, we own and invest, as a non-operating, working interest owner, in oil and natural gas assets that are primarily located in Texas and New Mexico.

On August 14, 2023, we completed our acquisition (the “Ulterra acquisition”) of Ulterra Drilling Technologies, L.P. (“Ulterra”). Ulterra is a global provider of specialized drill bit solutions. On September 1, 2023, we completed our merger (the “NexTier merger”) with NexTier Oilfield Solutions Inc. (“NexTier”). NexTier is a predominately U.S. land-focused oilfield service provider, with a diverse set of well completion and production services across a variety of active basins. See Note 2 for additional details on the acquisition and merger.

In the fourth quarter of 2021, we completed the acquisition of Pioneer Energy Services Corp. (“Pioneer”). Pioneer provided land-based contract drilling services and production services to a diverse group of oil and natural gas exploration and production companies in the United States and internationally in Colombia. The purchase price allocation was finalized in 2022. The measurement period adjustments did not have a material impact on our consolidated financial statements.

On December 31, 2021, we completed the sale of the acquired Pioneer well servicing rig business and wireline business to Clearwell Dynamics, LLC. The sale price was \$43.0 million in cash consideration, subject to customary purchase price adjustments at closing for cash and working capital. The results of operations of these businesses were presented as a discontinued operation during the fourth quarter of 2021.

*Basis of presentation* — The consolidated financial statements include the accounts of Patterson-UTL, its wholly-owned subsidiaries and the consolidating interest of a joint venture. All significant intercompany accounts and transactions have been eliminated. Except for wholly-owned subsidiaries and our interest in a joint venture, we have no controlling financial interests in any other entity which would require consolidation. As used in these notes, “we,” “us,” “our,” “ours” and like terms refer collectively to Patterson-UTL Energy, Inc. and its consolidated subsidiaries. Patterson-UTL Energy, Inc. conducts its business operations through its wholly-owned subsidiaries and has no employees or independent operations.

Certain prior year amounts have been reclassified to conform to current year presentation. These reclassifications include the change in our reportable segments in 2023. Effective as of the third quarter of 2023, we revised our reportable segments to align with certain changes in how our Chief Operating Decision Maker (“CODM”) manages and allocates resources to our business as a result of the Ulterra acquisition and NexTier merger. We now have the following reportable business segments: (i) drilling services, (ii) completion services, and (iii) drilling products. Accordingly, we recast our results of operations for all years presented to align with our revised reportable segments. These reclassifications had no effect on our previously reported operating and net income (loss) within our consolidated statements of operations or cash flows from operating, investing and financing activities within our consolidated statements of cash flows.

The U.S. dollar is the reporting currency and functional currency for most of our operations except certain of our foreign subsidiaries, which use their local currencies as their functional currency. Assets and liabilities of these foreign subsidiaries are translated into U.S. dollars using the exchange rates in effect as of the balance sheet date. The effects of these translation adjustments are reflected in accumulated other comprehensive income, which is a separate component of stockholders’ equity.

The consolidated financial statements for the year ended December 31, 2023 include the results of Ulterra from August 14, 2023 to December 31, 2023, and the results of NexTier from September 1, 2023 to December 31, 2023.

#### F-10

#### *A summary of the significant accounting policies follows:*

*Management estimates* — The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from such estimates estimates.

*Cash and cash equivalents* — Cash equivalents are highly liquid, short-term investments with original maturities of three months or less from their date of purchase.

*Restricted cash* — Restricted cash includes amounts restricted as cash collateral for the issuance of standby letters of credit.

The following table provides a reconciliation of cash and restricted cash reported within the consolidated balance sheet sheets that sum to the total of such amounts shown in the statement statements of cash flows for the years ended December 31, 2023 December 31, 2024 and 2022:

Year Ended December 31,

	2023	2022
Cash and cash equivalents	\$ 190,108	\$ 137,553
Restricted cash	2,572	—
Total cash, cash equivalents and restricted cash	\$ 192,680	\$ 137,553

2023:

**Revenue recognition** — Revenues from our drilling services, completion services, drilling products, and other activities are recognized as services are performed. All of the wells we drilled in 2023, 2022 and 2021 were drilled under daywork contracts. Revenue is presented net of any sales tax charged to the customer that we are required to remit to local or state governmental taxing authorities.

Reimbursements for the purchase of supplies, equipment, personnel services, shipping and other services that are provided at the request of our customers are recorded as revenue when incurred. The related costs are recorded as operating expenses when incurred.

	Year Ended December 31,	
	2024	2023
Cash and cash equivalents	\$ 239,182	\$ 190,108
Restricted cash	2,111	2,572
Total cash, cash equivalents and restricted cash	\$ 241,293	\$ 192,680

As a result of the Ultrerra acquisition, our revenues now include a significant amount of rental revenue included within the new “Drilling products” segment. See Note 3 for details.

**Accounts receivable** — Trade accounts receivable are recorded at the invoiced amount. The allowance for credit losses represents our estimate of the amount of probable credit losses existing in our accounts receivable. Significant individual accounts receivable balances and balances which have been outstanding greater than 90 days are reviewed individually for collectability. Account balances, when determined to be uncollectible, are charged against the allowance.

**Inventories** — Inventories consist primarily of sand and other products to be used in conjunction with our completion services activities, materials used in our equipment servicing business, spare parts for drilling services and raw materials for drilling products. Such inventories are stated at the lower of cost or net realizable value. As The majority of our inventory is consumed, expense is recorded in direct operating cost in the consolidated statements of operations using the weighted average cost method for non-manufacturing inventory and standard cost method for manufacturing inventory, cost.

We periodically review the nature and quantities of inventory on hand and evaluate the net realizable value of items based on historical usage patterns, known changes to equipment or processes and customer demand for specific products. Provision for excess or obsolete inventories is determined based on historical usage of inventory on-hand, volume on-hand versus anticipated usage, technological advances and consideration of current market conditions. Inventories that have not turned over for more than a year are subject to slow-moving reserve provisions. In addition, inventories that have become obsolete due to technological advances excess volume on-hand or are no longer configured to operate with our equipment are written off.

**Other current assets** — Other current assets include reimbursement from our workers compensation insurance carrier for claims in excess of our deductible in the amount of \$31.0\$33.2 million and \$34.6\$31.0 million at December 31, 2023 December 31, 2024 and 2022, 2023, respectively. We also maintain prepayments for items such as insurance, rent and inventory.

**Long-lived assets with definite lives** — Property and equipment and definite-lived intangible assets are carried at cost less accumulated depreciation, amortization, depletion and impairment. Depreciation and amortization is recorded on the straight-line method over the estimated useful lives. The method of depreciation does not change whenever property and equipment become idle.

F-11

The estimated useful lives are shown below:

	Useful Lives
Equipment	1-25 25 year:
Rental equipment	4-84- runs
Buildings and leasehold improvements	1-30 30 year:
Other	3-20 20 year:

Amortization of definite-lived intangible assets is calculated on the straight-lined method over the estimated useful lives of the assets, which range from 3 to 15 years.

Long-lived assets with definite lives, including property and equipment and certain intangible assets, are evaluated for impairment whenever events or changes in circumstances indicate that the carrying amounts of certain assets may not be recovered over their estimated remaining useful lives ("triggering events"). Assets are grouped at the lowest level at which identifiable cash flows are largely independent of other asset groupings for impairment assessment. If there is a triggering event, we estimate future cash flows over the life of the respective assets or asset groupings in our assessment of its recoverability. These estimates of cash flows are based on historical cyclical trends in the industry as well as our expectations regarding the continuation of these trends in the future. If estimated undiscounted cash flows expected to result from the use and eventual disposition of an asset or asset group is less than its respective carrying amount, an impairment loss is recognized in the amount by which the carrying amount exceeds its estimated fair value.

*Maintenance and repairs* — Maintenance and repairs are charged to expense when incurred. Renewals and betterments which extend the life or improve existing property and equipment are capitalized.

*Disposals* — Upon disposition of property and equipment, the cost and related accumulated depreciation are removed and any resulting gain or loss is reflected in our consolidated statements of operations.

*Oil and natural gas properties* — Working interests in oil and natural gas properties are accounted for using the successful efforts method of accounting. Under the successful efforts method of accounting, exploration costs which result in the discovery of oil and natural gas reserves and all development costs are capitalized to the appropriate well. Exploration costs which do not result in discovering oil and natural gas reserves are charged to expense when such determination is made. Costs of exploratory wells are initially capitalized to wells-in-progress until the outcome of the drilling is known. We review wells-in-progress quarterly to determine whether sufficient progress is being made in assessing the reserves and economic viability of the respective projects. If no progress has been made in assessing the reserves and economic viability of a project after one year following the completion of drilling, we consider the well costs to be impaired and recognize the costs as expense. Geological and geophysical costs, including seismic costs, and costs to carry and retain undeveloped properties are charged to expense when incurred. The capitalized costs of both developmental and successful exploratory type wells, consisting of lease and well equipment and intangible development costs, are depreciated, depleted and amortized using the units-of-production method, based on engineering estimates of total proved developed oil and natural gas reserves for each respective field. Oil and natural gas leasehold acquisition costs are depreciated, depleted and amortized using the units-of-production method, based on engineering estimates of total proved oil and natural gas reserves for each respective field.

We review our proved oil and natural gas properties for impairment whenever a triggering event occurs, such as downward revisions in reserve estimates or decreases in expected future oil and natural gas prices. Proved properties are grouped by field and undiscounted cash flow estimates are prepared based on management's expectation of future pricing over the lives of the respective fields. These cash flow estimates are reviewed by an independent petroleum engineer. If the net book value of a field exceeds our undiscounted cash flow estimate, impairment expense is measured and recognized as the difference between net book value and fair value. The fair value estimates used in measuring impairment are based on internally developed unobservable inputs including reserve volumes and future production, pricing and operating costs (Level 3 inputs in the fair value hierarchy of fair value accounting). We review unproved oil and natural gas properties quarterly to assess potential impairment. Our impairment assessment is made on a lease-by-lease basis and considers factors such as management's intent to drill, lease terms and abandonment of an area. If an unproved property is determined to be impaired, the related property costs are expensed. Impairment expense related to oil and natural gas properties of approximately \$7.0 million, \$4.5 million and \$1.3 million was recorded for the years ended December 31, 2023, 2022 and 2021, respectively.

*Goodwill* — As a result of both the Ulterra acquisition and the NexTier merger, we have recognized goodwill. Goodwill from acquisitions is recorded as the excess of the consideration transferred plus the fair value of any non-controlling interest in the acquiree at the acquisition date over the fair values of the identifiable net assets acquired. Goodwill is considered to have an indefinite useful economic life and is not amortized. We assess impairment of goodwill at least annually, as of July 31, or on an interim basis if events or circumstances indicate that the fair value of goodwill may have decreased below its carrying value. If the carrying value of a reporting unit exceeds its fair value, we would recognize an impairment in an amount equal to the excess, limited to the total amount of

goodwill allocated to the reporting unit. During the third quarter of 2024, we recorded an \$885 million impairment charge to goodwill related to our completion services reporting unit. See Note 7 for details.

## F-12

**Leases** — We have operating leases for operating locations, corporate offices and certain operating equipment. We determine if a contract contains a lease at inception or as a result of an acquisition. A right-of-use asset and corresponding lease liability are recognized on our consolidated balance sheet at commencement at an amount based on the present value of the remaining lease payments over the lease term. **Renewal options are included in The lease term may include the right-of-use asset and option to extend or terminate the lease liability if when it is reasonably certain that we will exercise the option, and termination options are included in the right-of-use asset and lease liability if it is not reasonably certain we will exercise the option.** By our policy election, right-of-use assets and lease liabilities with an initial term of one year or less are not recognized for leasing arrangements, and non-lease and lease components are treated as a single lease component instead of bifurcating those components. Lease expense is recognized on a straight-line basis. If available, we use the rate implicit in the lease at commencement date to discount the lease payments. If the implicit rate is not readily determinable, we use our incremental borrowing rate based on the information available at the commencement date in the determination of the present value of future lease payments.

**In the third quarter of 2023, as part of the Ulterra acquisition and the NexTier merger, we acquired operating and finance leases. We inherited NexTier's and Ulterra's lease classifications as of the time of each respective acquisition. We have elected as an accounting policy election by class of underlying assets to not recognize assets or liabilities at the acquisition date for leases that had a remaining lease term of twelve months or less. See Notes 2 and 13 for details.**

For finance leases, we amortize the right-of-use asset on a straight-line basis over the earlier of the useful life of the right-of-use asset or the end of the lease term and record this amortization in depreciation and amortization expense in the consolidated statements of operations. If available, we use the rate implicit in the lease at commencement date to discount the lease payments. If the implicit rate is not available, we use our incremental borrowing rate based on the information available at the commencement date in the determination of the present value of future lease payments. **We The lease term may include the term of any renewal option for to extend or terminate the right-of-use asset and lease liability if when it is reasonably certain that we will exercise the option. We also include the term of any termination option for the right-of-use asset and lease liability if it is not reasonably certain we will exercise the option.** By our policy election, right-of-use assets and lease liabilities with an initial term of one year or less are not recognized for leasing arrangements, and non-lease and lease components are treated as a single lease component instead of bifurcating those components. For finance leases where we have determined we are reasonably certain to exercise a purchase option to acquire the underlying asset, we amortize the right-of-use asset over the lease term and record this amortization in "Depreciation, depletion, amortization and impairment" in the consolidated statements of operations. We adjust the lease liability to reflect lease payments made during the period and interest incurred on the lease liability using the effective interest method. The incurred interest expense is recorded in "Interest expense" in the consolidated statements of operations.

**In the third quarter of 2023, as part of the Ulterra acquisition and the NexTier merger, we acquired certain operating and finance leases. We inherited NexTier's and Ulterra's lease classifications as of the time of each respective acquisition. We elected as an accounting policy election by class of underlying assets to not recognize assets or liabilities at the acquisition date for leases that had a remaining lease term of twelve months or less. See Notes 2 and 13 for details.**

**Revenue recognition** — Revenues from our drilling services, completion services, drilling products, and other activities are recognized upon the transfer of control of the related services and products to the customer. See Note 3 for details.

**Income taxes** — The asset and liability method is used in accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for operating loss and tax credit carryforwards and for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the results of operations in the period that includes the enactment date. If applicable, a valuation allowance is recorded to reduce the carrying amounts of deferred tax assets unless it is more likely than not that such assets will be realized. Our policy is to account for interest and penalties with respect to income taxes as operating expenses.

**Stock-based compensation** — We recognize the cost of share-based payments under the fair-value-based method. Under this method, compensation cost related to share-based payments is measured based on the estimated fair value of the awards at the date of grant, net of estimated forfeitures. This expense is recognized over the expected life of the awards, as described in Note 12.

**Concentration of Credit Risk** — Our assets that are potentially subject to concentrations of credit risk are cash, cash equivalents and restricted cash and trade accounts receivable. Cash balances are maintained in financial institutions, which at times exceed federally insured limits. We monitor the financial condition of the financial institutions in which accounts are maintained and **has we have** not experienced any losses in such accounts. We maintain an allowance for credit losses based upon several factors, including historical collection experience, current aging status of the customer accounts and financial condition of our customers. There were no material changes in the allowance for credit losses in **2023 2024** and **2022, 2023**.

**Change in Accounting Estimate** — In the third quarter of 2023, we changed the estimated useful lives of certain property and equipment within our completion services segment. **The change in the estimated useful lives was necessitated by recent trends in increased intensity and pumping hours per day of certain components used in servicing larger jobs. We determined the estimated useful life of fluid ends is now less than one year, which results in these components no longer being capitalized to property and equipment but instead recorded to inventory and expensed as direct operating costs as they are consumed. Additionally, we shortened the estimated useful lives of certain other completion components that remain in property and equipment, which resulted in a decrease in the weighted average estimated useful lives of these assets from nine years to seven years. The**

effect of our change in estimated useful lives of these assets was a decrease in operating income of \$30.7 million and a decrease in net income of \$24.3 million for the year ended December 31, 2023, which resulted in a decrease in basic and diluted earnings per share of \$0.09 and \$0.09 per share, respectively.

F-13

**Recently Adopted Accounting Standards** — In October 2021, the FASB issued an accounting standards update, which requires contract assets and contract liabilities (i.e., deferred revenue) acquired in a business combination to be recognized and measured by the acquirer on the acquisition date in accordance with ASC 606, Revenue from Contracts with Customers. Generally, this new guidance will result in the acquirer recognizing contract assets and contract liabilities at the same amounts recorded by the acquiree. Historically, such amounts were recognized by the acquirer at fair value in acquisition accounting. The amendments should be applied prospectively to acquisitions occurring on or after the effective date. The amendments in the update are effective for public business entities for fiscal years beginning after December 15, 2022, with early adoption permitted. We adopted this new guidance on January 1, 2023, and there was no material impact on our consolidated financial statements.

**Recently Issued Accounting Standards** — In March 2020, the FASB issued an accounting standards update to provide temporary optional expedients that simplify the accounting for contract modifications to existing debt agreements expected to arise from the market transition from LIBOR to alternative reference rates. The amendments in the update are guidance was effective as of March 12, 2020 through December 31, 2022 upon issuance and may generally can be applied to applicable contract modifications from the beginning of an interim period that includes or is subsequent to March 12, 2020. In December 2022, the FASB issued an update, which deferred the sunset date to through December 31, 2024. We do not expect this adopted the optional relief guidance provided under Topic 848 after modifying our debt agreements to update the reference rate from LIBOR to SOFR or Prime Rate. The adoption of the new guidance will did not have a material impact on our consolidated financial statements.

In November 2023, the FASB issued an accounting standards update to improve reportable segment disclosure requirements and enhance disclosures about significant segment expenses. The amendments We adopted this new accounting pronouncement effective January 1, 2024 and expanded our consolidated financial statement disclosures in order to comply with the update are effective update. See Note 17 for public business entities for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024 on a retrospective basis. We are currently evaluating the effect of this pronouncement on our disclosures. details.

#### **Recently Issued Accounting Standards**

— In December 2023, the FASB issued an accounting standards update to improve income tax disclosure requirements. The amendments We plan to adopt this accounting pronouncement during fiscal year 2025, with the first disclosure enhancements reflected in our 2025 fiscal year Form 10-K. We are currently evaluating the impact this pronouncement will have on our disclosures.

In November 2024, the FASB issued guidance expanding disclosure requirements related to certain income statement expenses, which requires public entities to disclose additional information about specific expense categories in the update are notes to the financial statements on an interim and annual basis. This guidance is effective for public business entities for fiscal years annual reporting periods beginning after December 15, 2024 December 15, 2026, and should be applied prospectively. interim periods beginning after December 15, 2027, with early adoption permitted. We are currently evaluating the effect of this pronouncement on our disclosures.

## **2. Acquisitions and Discontinued Operations**

### **Pioneer Energy Services Corp.**

#### **Business Combinations**

#### **Ultrerra Drilling Technologies, L.P.**

On **October 1, 2021** August 14, 2023, we completed the acquisition of Pioneer by acquiring 100% of its equity interests. Ultrerra acquisition. Total consideration for the acquisition included the issuance of approximately 26.3 million 34.9 million shares of our common stock and payment of \$30 million approximately \$373 million of cash (after purchase price adjustments), which based on the closing price of our common stock of \$9.44 \$14.94 on **October 1, 2021** August 14, 2023, valued the transaction at closing at approximately \$278 million.

Pioneer provided land-based contract drilling services and production services to a diverse group \$894 million.

The total fair value of oil and natural gas exploration and production companies in the United States and internationally in Colombia.

consideration transferred was determined as follows (in thousands, except stock price):

Shares of our common stock issued to Ulterra	34,90
Our common stock price on August 14, 2023	\$ 14.94
Common stock equity consideration	\$ 521,406
Plus net cash consideration	372,757
Total consideration transferred	\$ 894,163

The acquisition **has been** accounted for as a business combination using the acquisition method. Under the acquisition method of accounting, the fair value of the consideration transferred is allocated to the tangible and intangible assets acquired and the liabilities assumed based on their estimated fair values as of the acquisition date.

The total fair value of the consideration transferred was determined as follows (in thousands, except stock price):

Shares of our common stock issued to Pioneer shareholders	26,274
Our common stock price on October 1, 2021	\$ 9.44
Fair value of common stock issued	\$ 248,025
Plus cash consideration	\$ 30,007
Total fair value of consideration transferred	\$ 278,032

Approximately \$41.5 million of revenues and \$30.5 million of direct operating expenses attributed to the Pioneer acquisition are included in our consolidated statements of operations for the period from the closing date on October 1, 2021 through December 31, 2021, excluding the acquired well servicing rig business and the wireline businesses that have been presented as a discontinued operation in our consolidated statements of operations. Revenues and direct operating expenses for our discontinued operations are presented below. During 2021, we incurred costs related to the Pioneer acquisition totaling \$12.1 million, which are included in our consolidated statements of operations as "Merger and integration expenses."

#### Pro Forma

The results of Pioneer's operations since the Pioneer merger date of October 1, 2021, are included in our consolidated statements of operations. The following pro forma condensed combined financial information was derived from our and Pioneer's historical financial

F-14

statements, excluding the well servicing rig business and wireline business that were disposed on December 31, 2021, and gives effect to the acquisition as if it had occurred on January 1, 2020. The below information reflects pro forma adjustments based on available information and certain assumptions we believe are reasonable, including (i) adjustments related to the depreciation and amortization of the fair value of acquired fixed assets, (ii) removal of the historical interest expense, loss on debt extinguishment and reorganization expenses of the acquired entities and (iv) the tax benefit of the aforementioned pro forma adjustments.

The pro forma results of operations do not include any cost savings or other synergies that may result from the Pioneer acquisition. The pro forma results of operations also do not include any estimated costs that have been or will be incurred to integrate Pioneer operations. The pro forma results of operations include our merger and integration-related costs of \$12.1 million and Pioneer's merger related costs of \$4.6 million for the year ended December 31, 2021.

The pro forma condensed combined financial information has been included for comparative purposes and is not necessarily indicative of the results that might have actually occurred had the Pioneer acquisition taken place on January 1, 2020; furthermore, the financial information is not intended to be a projection of future results. The following table summarizes our selected financial information on a pro forma basis (in thousands, except per share data):

	2021
	(Unaudited)
Revenues	\$ 1,464,351
Net loss	\$ (666,032)

#### Discontinued Operations

On December 31, 2021, we completed the sale of the acquired well servicing rig business and wireline business to Clearwell Dynamics, LLC. The sale price was \$43.0 million in cash consideration, subject to customary purchase price adjustments at closing for cash and working capital. The results of operations of these businesses were presented as a discontinued operation in the consolidated financial statements during the fourth quarter of 2021.

Summarized operating results from discontinued operations that are included in our consolidated statements of operations for the year ended December 31, 2021 are shown below (in thousands):

	2021
Operating revenues:	

Wireline revenue	\$	9,868
Well servicing revenue		19,652
Total operating revenues		29,520
<b>Operating costs and expenses:</b>		
Wireline		10,465
Well servicing		16,585
Total operating costs and expenses		27,050
Operating income		2,470
Total other income (expense)		64
Income from discontinued operations before income taxes		2,534
Income tax benefit		—
Income from discontinued operations, net of tax	\$	2,534

#### Ulterra Drilling Technologies, L.P.

On August 14, 2023, we completed the Ulterra acquisition. Total consideration for the acquisition included the issuance of 34.9 million shares of our common stock and payment of approximately \$376 million of cash, which based on the closing price of our common stock of \$14.94 on August 14, 2023, valued the transaction at closing at approximately \$897 million.

The total fair value of the consideration transferred was determined as follows (in thousands, except stock price):

F-15

Shares of our common stock issued to Ulterra		34,900
Our common stock price on August 14, 2023	\$	14.94
Common stock equity consideration	\$	521,406
Plus net cash consideration <sup>(1)</sup>		375,740
Total consideration transferred	\$	897,146

<sup>(1)</sup> Net cash consideration included \$370 million cash consideration as adjusted for customary purchase price adjustments set forth in the Ulterra merger agreement relating to cash, net working capital, indebtedness and transaction expenses of Ulterra as of the closing. The adjustment is subject to a post-closing target net working capital adjustment in accordance with the Ulterra merger agreement.

The acquisition has been accounted for as a business combination using the acquisition method. Under the acquisition method of accounting, the fair value of the consideration transferred is allocated to the tangible and intangible assets acquired and the liabilities assumed based on their estimated fair values as of the acquisition date.

The aggregate purchase price noted above was allocated to the major categories of assets acquired and liabilities assumed based on preliminary estimated fair values as of the date of the business combination. We applied significant judgment in estimating the fair value of assets acquired and liabilities assumed, which involved the use of significant estimates and assumptions with respect to future rig counts, cash flow projections, estimated economic useful lives, operating and capital cost estimates, customer attrition rates, contributory asset charges, royalty rates and discount rate (10.5% (10.5%)). The carrying amounts of cash and cash equivalents, accounts receivable, other assets, accounts payable and accrued liabilities approximate their fair values due to their nature or the short-term maturity of instruments. The remaining assets acquired and liabilities assumed are based on inputs that are not observable in the market and thus represent Level 3 inputs. The fair value of inventory and rental equipment was determined using a replacement cost approach. Intangible assets primarily consist of customer relationships and developed technology, the fair values of which were determined using an income approach. Property and equipment was valued using a combination of indirect cost and a market approach. The fair value was estimated by using a multi-period excess earnings method for customer relationships and a relief from royalty method for trade name and developed technology. Certain data necessary to complete the purchase price allocation is not yet available, including final tax returns that provide the underlying tax basis of Ulterra's assets and liabilities. The measurement period adjustments was finalized in the fourth third quarter of 2023 2024. The valuation period adjustments did not have a material impact on our consolidated financial statements. We will complete the purchase price allocation during the 12-month period following the acquisition date.

The following table summarizes the fair values of the assets acquired and liabilities assumed at the date of acquisition:

Assets acquired:		
Cash and cash equivalents	\$	18,426
Accounts receivable		68,467
Inventory <sup>(1)</sup>		36,313
Rental equipment <sup>(2)</sup>		109,055
Property and equipment		27,583
Intangible assets		313,000
Operating lease right of use asset		7,513
Finance lease right of use asset		5,228
Other assets		14,274
Total assets acquired		599,859
Liabilities assumed:		
Accounts payable		23,258
Accrued liabilities		31,608
Operating lease liability		7,513
Finance lease liability		5,228
Deferred tax liabilities		83,993
Total liabilities assumed		151,600
Less: noncontrolling interest		(8,729)
Net assets acquired		439,530
Goodwill		457,616
Total consideration transferred	\$	897,146
Assets acquired:		
Cash and cash equivalents	\$	18,426
Accounts receivable		68,467
Inventory <sup>(1)</sup>		36,313
Rental equipment <sup>(2)</sup>		109,055
Property and equipment		27,583
Intangible assets		313,000
Operating lease right of use asset		7,513
Finance lease right of use asset		5,228
Other assets		15,989
Total assets acquired		601,574
Liabilities assumed:		
Accounts payable		23,258
Accrued liabilities		33,323
Operating lease liability		7,513
Finance lease liability		5,228
Deferred tax liabilities		79,863
Total liabilities assumed		149,185
Less: noncontrolling interest		(8,729)
Net assets acquired		443,660
Goodwill		450,503
Total consideration transferred	\$	894,163

(1) We recorded an adjustment of \$5.5 million to write-up acquired drill bits classified as inventory to estimated fair value. This adjustment will be recorded as direct operating expense as acquired drill bits are sold.

(2) We recorded an adjustment of ~~\$74.4 million~~ ~~\$74.4 million~~ to write-up acquired drill bits classified as long-lived assets to estimated fair value. This adjustment will be depreciated as acquired drill bits are rented over a weighted-average estimated useful ~~life~~ ~~life~~ of 7.5 ~~runs~~. ~~runs~~.

The goodwill recognized in the acquisition represents the excess of the gross consideration transferred over the fair value of the underlying net tangible and identifiable intangible assets acquired and liabilities assumed. Goodwill represents the potential for new growth opportunities internationally with the acquisition of Ulterra as well as the recognition of deferred taxes for the difference between the fair value of the assets acquired and liabilities assumed and the respective carry-over tax basis. Goodwill is not deductible for tax purposes. All of the goodwill was assigned to our Drilling Products segment. See Note 7.

Approximately ~~\$135~~ ~~\$135~~ million of revenues and ~~\$3.4~~ ~~\$3.4~~ million of net loss attributed to the Ulterra acquisition are included in the consolidated statements of operations for the period from the closing date on August 14, 2023 through ~~December 31, 2023~~ ~~December 31, 2023~~. During the twelve months ended December 31, 2023, we ~~We~~ incurred ~~costs~~ ~~\$5.6 million of merger and integration expense~~ related to the Ulterra acquisition ~~totaling \$5.6 million, which are included in our consolidated statements of operations as "Merger 2023. We did not incur any material merger and integration expense."~~ ~~expense related to the Ulterra acquisition in 2024.~~

A portion of the fair value consideration transferred has been provisionally assigned to identifiable intangible assets as follows:

	Fair Value	Weighted Average Useful Life
	(in thousands)	(in years)
Customer relationships	\$ 245,000	15
Trade name	16,000	11
Developed technology	52,000	5
Intangible assets	<u>\$ 313,000</u>	

	Fair Value	Weighted Average Useful Life
	(in thousands)	(in years)
Customer relationships	\$ 245,000	15
Trade name	16,000	11
Developed technology	52,000	5
Intangible assets	<u>\$ 313,000</u>	

## Pro Forma

The following pro forma condensed combined financial information was derived from our and Ulterra's historical financial statements and gives effect to the acquisition as if it had occurred on January 1, 2022. The below information reflects pro forma adjustments based on available information and certain assumptions we believe are reasonable, including (i) adjustments related to the depreciation and amortization of the step up to fair value of ~~\$77.6~~ ~~\$77.6~~ million for acquired intangibles, ~~\$74.4~~ ~~\$74.4~~ million for acquired drill bits classified as long-lived assets, and ~~\$5.5~~ ~~\$5.5~~ million for acquired drill bits classified as inventory, (ii) removal of ~~\$12.8~~ ~~\$12.8~~ million in 2023 and ~~\$28.1~~ ~~\$28.1~~ million in 2022 of historical interest expense of the acquired entity and (iii) ~~\$17.4~~ ~~\$17.4~~ million in 2023 and ~~\$11.3~~ ~~\$11.3~~ million in 2022 of tax benefit relating to the aforementioned pro forma adjustments.

The pro forma results of operations do not include any anticipated cost savings or other synergies that may result from the Ulterra acquisition nor do they include any estimated costs that will be incurred to integrate Ulterra operations. The pro forma results of operations include our merger and integration expense of ~~\$5.6~~ ~~\$5.6~~ million as if they had been incurred in the first quarter of 2022.

The pro forma condensed combined financial information has been included for comparative purposes and is not necessarily indicative of the results that might have actually occurred had the Ulterra acquisition taken place on January 1, 2022. Furthermore, the financial information is not intended to be a projection of future results. The following table summarizes our selected financial information on a pro forma basis (in thousands, except per share data):

	2023	2022
	(Unaudited)	(Unaudited)
Revenues	\$ 4,369,596	\$ 3,017,778
Net income	\$ 190,136	\$ 141,458

NexTier Oilfield Solutions Inc.

On September 1, 2023, we completed the NexTier merger. Under the terms of the merger agreement, NexTier became our wholly-owned subsidiary. Each share of NexTier common stock issued and outstanding immediately prior to the effective time of the merger was converted into the right to receive 0.752 shares of our common stock. Additionally, certain equity awards that were granted and outstanding under NexTier long-term incentive plans were assumed by us, and such equity awards were converted into equity awards in respect of our common stock in accordance with the merger agreement.

NexTier is a predominately U.S. land-focused oilfield service provider, with a diverse set of well completion and production services across a variety of active basins.

F-17

The total fair value of the consideration transferred was determined as follows (in thousands, except exchange ratio and stock price):

Number of shares of NexTier common stock outstanding as of September 1, 2023	228,846
Multiplied by the exchange ratio	0.752
Number of shares of Patterson-UTL Energy, Inc. common stock issued in connection with the merger	172,092
Patterson-UTL Energy, Inc. common stock price on September 1, 2023	\$ 14.91
Common stock equity consideration	2,565,895
Acceleration of RSU awards	1,997
Fair value of replacement equity awards <sup>(1)</sup>	70,416
NexTier long-term debt repaid by Patterson-UTL Energy, Inc.	161,000
Consideration transferred	\$ 2,799,308

  

Number of shares of NexTier common stock outstanding as of September 1, 2023	228,846
Multiplied by the exchange ratio	0.75
Number of shares of Patterson-UTL Energy, Inc. common stock issued in connection with the merger	172,092
Patterson-UTL Energy, Inc. common stock price on September 1, 2023	\$ 14.91
Common stock equity consideration	2,565,895
Acceleration of RSU awards	1,997
Fair value of replacement equity awards <sup>(1)</sup>	70,416
NexTier long-term debt repaid by Patterson-UTL Energy, Inc.	161,000
Consideration transferred	\$ 2,799,308

<sup>(1)</sup> In connection with the merger, each of the share-based awards held by legacy NexTier employees were replaced with our share-based awards on the merger date. The fair value of the replacement awards has been allocated between each employee's pre-combination and post-combination services. Amounts allocated to pre-combination services have been included as consideration transferred as part of the merger. See Note 12 for replacement awards details.

The transaction has been accounted for as a business combination using the acquisition method with Patterson-UTL Energy, Inc. determined to be the acquirer. Under the acquisition method of accounting, the fair value of the consideration transferred is allocated to the tangible and intangible assets acquired and the liabilities assumed based on their estimated fair values as of the acquisition date.

The aggregate purchase price noted above was allocated to the major categories of assets acquired and liabilities assumed based on preliminary estimated fair values as of the date of the business combination. We applied significant judgment in estimating the fair value of assets acquired and liabilities assumed, which involved the use of significant estimates and assumptions with respect to future rig counts, cash flow projections, estimated economic useful lives, operating and capital cost estimates, customer attrition rates, contributory asset charges, royalty rates and discount rate (14.0% (14.0%)). The carrying amounts of cash and cash equivalents, accounts receivable, inventory, other assets, accounts payable, accrued liabilities, and other liabilities approximate their fair values due to their nature or the short-term maturity of instruments. The remaining assets acquired and liabilities assumed are based on inputs that are not observable in the market and thus represent Level 3 inputs. The fair value of property and equipment was determined using a combination of replacement cost and indirect cost. Intangible assets were valued using an income approach. The fair value was estimated by using multi-period excess earnings method for customer relationships and a relief from royalty method for trade name and developed technology. Certain data necessary to complete the purchase price allocation is not yet available, including final tax returns that provide the underlying tax basis of NexTier's assets and liabilities. The measurement period adjustments was finalized in the fourth third quarter of 2023 2024. The valuation period adjustments did not have a material impact on our consolidated financial statements. We will complete the purchase price allocation during the 12-month period following the acquisition date.

The following table summarizes the fair values of the assets acquired and liabilities assumed at the date of the merger:

F-18

Assets acquired:		
Cash and cash equivalents	\$	95,815
Accounts receivable		420,200
Inventory		71,930
Property and equipment <sup>(1)</sup>		1,045,610
Intangible assets		768,000
Operating lease right of use asset		19,091
Finance lease right of use asset		50,733
Other assets		84,677
Total assets acquired		2,556,056
Liabilities assumed:		
Accounts payable		358,873
Accrued liabilities		129,535
Operating lease liability		19,091
Finance lease liability		50,733
Deferred tax liabilities		86,293
Long-term debt		22,533
Other liabilities		11,815
Total liabilities assumed		678,873
Net assets acquired		1,877,183
Goodwill		922,125
Total consideration transferred	\$	2,799,308

Assets acquired:		
Cash and cash equivalents	\$	95,815
Accounts receivable		420,200
Inventory		71,930
Property and equipment <sup>(1)</sup>		1,045,610
Intangible assets		768,000
Operating lease right of use asset		19,091
Finance lease right of use asset		50,733
Other assets		84,677
Total assets acquired		2,556,056
Liabilities assumed:		
Accounts payable		358,873
Accrued liabilities		129,535
Operating lease liability		19,091
Finance lease liability		50,733
Deferred tax liabilities		86,293
Long-term debt		22,533
Other liabilities		11,815
Total liabilities assumed		678,873
Net assets acquired		1,877,183
Goodwill		922,125
Total consideration transferred	\$	2,799,308

<sup>(1)</sup> We recorded an adjustment of ~~\$262.7 million~~ ~~\$263 million~~ to write-up acquired property and equipment to estimated fair value. This adjustment will be depreciated on a straight-line basis over a weighted average period of six ~~years~~ ~~years~~.

The goodwill recognized in the merger represents the excess of the gross consideration transferred over the fair value of the underlying net tangible and identifiable intangible assets acquired and liabilities assumed. Goodwill largely consisted of the expected synergies and economies of scale from the combined operations of Patterson-UTI Energy, Inc. and NexTier as well as the recognition of deferred taxes for the difference between the fair value of the assets acquired and liabilities assumed and the respective carry-over tax basis. The goodwill is not deductible for tax purposes. All of the goodwill was assigned to our completion services segment. See Note 7.

Approximately \$1.1\$1.1 billion of revenues and \$12.5\$12.5 million of net income attributed to the NexTier merger are included in the consolidated statements of operations for the period from the closing date on September 1, 2023 through December 31, 2023December 31, 2023. During the twelve months ended December 31, December 31, 2024 and 2023, we incurred costs related to the NexTier merger totaling \$92.5\$28.7 million and \$92.5 million, respectively, which are included in our consolidated statements of operations as "Merger and integration expense."

A portion of the fair value consideration transferred has been provisionally assigned to identifiable intangible assets as follows:

	Fair Value	Weighted Average Useful Life
	(in thousands)	(in years)
Customer relationships	\$ 540,000	10
Trade name	85,000	10
Developed technology	143,000	5
Intangible assets	<u>\$ 768,000</u>	

	Fair Value	Weighted Average Useful Life
	(in thousands)	(in years)
Customer relationships	\$ 540,000	10

Intangible assets	<u>\$ 768,000</u>	

#### Pro Forma

The following pro forma condensed combined financial information was derived from our and NexTier's historical financial statements and gives effect to the acquisition as if it had occurred on January 1, 2022. The below information reflects pro forma adjustments based on available information and certain assumptions we believe are reasonable, including (i) adjustments related to the depreciation and amortization of the step up to fair value of \$720.7\$720.7 million for acquired intangibles and \$262.7\$262.7 million for acquired property and equipment, (ii) removal of \$ 17.7\$17.7 million in 2023 and \$30.0\$30.0 million in 2022 of historical interest expense of the acquired entity and (iii) \$15.1\$15.1 million in 2023 and \$72.7\$72.7 million of tax benefit in 2022 relating to the aforementioned pro forma adjustments.

F-19

The pro forma results of operations do not include any anticipated cost savings or other synergies that may result from the NexTier merger nor do they include any estimated costs that will be incurred to integrate NexTier operations. The pro forma results of operations include our merger and integration expense of \$92.5\$92.5 million as if they had been incurred in the first quarter of 2022.

The pro forma condensed combined financial information has been included for comparative purposes and is not necessarily indicative of the results that might have actually occurred had the NexTier merger taken place on January 1, 2022. Furthermore, the financial information is not intended to be a projection of future results. The following table summarizes our selected financial information on a pro forma basis (in thousands, except per share data):

	2023	2022
	(Unaudited)	(Unaudited)
Revenues	\$ 6,604,824	\$ 5,892,414

### 3. Revenues

#### ASC Topic 606 Revenue from Contracts with Customers

*Drilling Services and Completion Services* — revenue is recognized based on our customers' ability to benefit from our services in an amount that reflects the consideration we expect to receive in exchange for those services. This typically happens when the service is performed. The services we provide represent a series of distinct services, generally provided daily, that are substantially the same, with the same pattern of transfer to the customer. Because our customers benefit equally throughout the service

period, generally measured in days, and our efforts in providing services are incurred relatively evenly over the period of performance, revenue is recognized as we provide services to the customer.

Drilling Services revenue primarily consists of daywork drilling contracts for which related revenues and expenses are recognized as services are performed. For certain contracts, we receive payments for the mobilization of rigs and other drilling equipment. We defer revenue and related direct operating expense related to mobilizations and recognize those revenues and expenses on a straight-line basis as drilling services are provided. Costs incurred to relocate rigs and other drilling equipment to areas in which a contract has not been secured are expensed as incurred and are recorded in Drilling Services operating expense in the Consolidated Statements of Operations and Comprehensive Income (Loss). For certain contracts, we are also entitled to early termination payments if our customers choose to terminate a contract prior to the expiration of the contractual term. We recognize revenue associated with early termination payments when all contractual requirements have been met.

Completion Services revenue consists of services and products related to our suite of completion businesses including hydraulic fracturing, completion support services, wireline and pumpdown services, and cementing. These services are pursuant to contractual arrangements, such as term contracts and pricing agreements. Revenue from these services is earned as services are rendered, which is generally on a per stage or fixed monthly rate except for our cementing services. All revenue is recognized when a contract with a customer exists, the performance obligations under the contract have been satisfied over time, the amount to which we have the right to invoice has been determined and collectability of amounts subject to invoice is probable. Contract fulfillment costs, such as mobilization costs and shipping and handling costs, are expensed as incurred and are recorded in Completion Services operating expense in the Consolidated Statements of Operations and Comprehensive Income (Loss). To the extent fulfillment costs are considered separate performance obligations that are billable to the customer, the amounts billed are recorded as revenue in the Consolidated Statements of Operations and Comprehensive Income (Loss).

Once a stage has been completed or products and services have been provided, a field ticket is created that includes charges for the service performed and the chemicals, proppant, and compressed natural gas consumed during the course of the service. The field ticket may also include charges for the mobilization of the equipment and inventory to the location, any additional equipment used on the job, and other miscellaneous items. The field ticket represents the amounts to which we have the right to invoice and to recognize as revenue.

A portion of our contracts contain variable consideration; however, this variable consideration is typically unknown at the time of contract inception, and is not known until the job is complete, at which time the variability is resolved. Examples of variable consideration include the number of hours that will be incurred and the amount of consumables (such as chemicals and proppants) that will be used to complete a job.

Revenue is presented net of any sales tax charged to the customer that we are required to remit to local or state governmental taxing authorities. Reimbursements for the purchase of supplies, equipment, personnel services, shipping and other services that are provided at the request of our customers are recorded as revenue when incurred. The related costs are recorded as operating expenses when incurred.

#### ASC Topic 842 Revenue from Equipment Rentals

*Drilling Products Revenue* — revenues are primarily generated from the rental of drilling equipment, comprised of drill bits and downhole tools. These arrangements provide the customer with the right to control the use of the identified asset. Generally, the lease terms in such arrangements are for periods of two to three days and do not provide customers with options to purchase the underlying asset.

*Other* — we are a non-operating working interest owner of oil and natural gas assets primarily located in Texas and New Mexico. The ownership terms are outlined in joint operating agreements for each well between the operator of the well and the various interest owners, including us, who are considered non-operators of the well. We receive revenue each period for our working interest in the well during the period.

#### Accounts Receivable and Contract Liabilities

Accounts receivable is our right to consideration once it becomes unconditional. Payment terms typically range from 30 to 60 days.

Accounts receivable balances were \$900\$697 million and \$561 million\$900 million as of December 31, 2023December 31, 2024 and 2022, 2023, respectively. These balances do not include amounts related to our oil and natural gas working interests nor do they include amounts related to our lease revenues under Topic 842 as those contracts are excluded from Topic 606. Accounts receivable balances are included in "Accounts receivable" in our consolidated balance sheets.

We do not have any significant contract asset balances. Contract liabilities include prepayments received from customers prior to the requested services being completed. Once the services are complete and have been invoiced, the prepayment is applied against the customer's account to offset the accounts receivable balance. Also included in contract liabilities are payments received from customers for reactivation or initial mobilization of newly constructed or upgraded rigs that were moved on location to the initial well site. These payments are allocated to the overall performance obligation and amortized over the initial term of the contract. Total contract liability balances were \$103 million\$75.6 million and \$148 million\$103 million as of December 31, 2023December 31, 2024 and December 31, 2022December 31, 2023, respectively. In 2023, 2024, we recognized \$136\$102 million million of revenue that was included in the contract liability balance at the beginning of the period. Revenue related to our contract liabilities balance is expected to be recognized through 2028. In 2023, we recognized \$136 million of revenue that was included in the contract liability balance at the beginning of the period, of which the recognition of \$28.9 million\$28.9 million was due to deferred revenue from a customer prepayment, which became recognizable after the customer changed its drilling schedule. scheduleIn 2022, we recognized \$. 59.7 million of revenue that was included in the contract liability balance at the beginning of the period. Revenue related to our contract liabilities balance is expected to be recognized through 2026. The \$98.9 million\$75.2 million current portion of our contract liability balance is included in "Accrued liabilities" and \$4.1 million\$0.4 million noncurrent portion of our contract liability balance is included in "Other liabilities" in our consolidated balance sheets.

F-20

#### Contract Costs

Costs incurred for newly constructed rigs or rig upgrades based on a contract with a customer are considered capital improvements and are capitalized to drilling equipment and depreciated over the estimated useful life of the asset.

### Remaining Performance Obligations

We maintain a backlog of commitments for contract drilling services under term contracts, which we define as contracts with a duration of six months or more. Our contract drilling backlog in the United States as of **December 31, 2023** **December 31, 2024** was approximately **\$700 million**, **\$426 million**. Approximately **16%** **7.1%** of our total contract drilling backlog in the United States at **December 31, 2023** **December 31, 2024** is reasonably expected to remain at **December 31, 2024** **December 31, 2025**. We generally calculate our backlog by multiplying the dayrate under our term drilling contracts by the number of days remaining under the contract. The calculation does not include any revenues related to fees for other services such as for mobilization, other than initial mobilization, demobilization and customer reimbursables, nor does it include potential reductions in rates for unscheduled standby or during periods in which the rig is moving or incurring maintenance and repair time in excess of what is permitted under the drilling contract. For contracts that contain variable dayrate pricing, our backlog calculation uses the dayrate in effect for periods where the dayrate is fixed, and, for periods that remain subject to variable pricing, uses commodity pricing or other related indices in effect at **December 31, 2023** **December 31, 2024**. In addition, our term drilling contracts are generally subject to termination by the customer on short notice and provide for an early termination payment to us in the event that the contract is terminated by the customer. For contracts on which we have received notice for the rig to be placed on standby, our backlog calculation uses the standby rate for the period over which we expect to receive the standby rate. For contracts on which we have received an early termination notice, our backlog calculation includes the early termination rate, instead of the dayrate, for the period over which we expect to receive the lower rate. Please see "Our current backlog of contract drilling revenue may decline and may not ultimately be realized, as fixed-term contracts may in certain instances be terminated without an early termination payment" included in Item 1A of this Report.

4.

### 4. Inventory

Inventory consisted of the following at **December 31, 2023** **December 31, 2024** and **2022** **2023** (in thousands):

	2023	2022
Raw materials and supplies	\$ 141,311	\$ 63,008
Work-in-process	7,437	2,341
Finished goods	32,057	28
Inventory	<u>\$ 180,805</u>	<u>\$ 65,377</u>

	2024	2023
Raw materials and supplies	\$ 121,694	\$ 141,311
Work-in-process	6,681	7,437
Finished goods	38,648	32,057
Inventory	<u>\$ 167,023</u>	<u>\$ 180,805</u>

### 5. Other Current Assets

Other current assets consisted of the following at **December 31, 2023** **December 31, 2024** and **2022** **2023** (in thousands):

	2023	2022
Federal and state income taxes receivable	\$ 26,949	\$ 11,313
Workers' compensation receivable	31,006	34,632
Prepaid expenses	46,394	11,960
Other	36,773	3,064
Other current assets	<u>\$ 141,122</u>	<u>\$ 60,969</u>

	2024	2023
Federal and state income taxes receivable	\$ 24,777	\$ 26,949
Workers' compensation receivable	33,240	31,006
Prepaid expenses	34,004	46,394
Other	31,172	36,773
Other current assets	<u>\$ 123,193</u>	<u>\$ 141,122</u>

## 6. Property and Equipment

Property and equipment consisted of the following at **December 31, 2023**, **December 31, 2024** and **2022** **2023** (in thousands):

	2023	2022
Equipment	\$ 8,506,727	\$ 7,551,099
Oil and natural gas properties	238,337	236,156
Buildings	248,693	175,212
Rental equipment	119,653	—
Land	38,811	23,610
Total property and equipment	9,152,221	7,986,077
Less accumulated depreciation, depletion, amortization and impairment	(5,811,809)	(5,725,501)
Property and equipment, net	\$ 3,340,412	\$ 2,260,576

F-21

	2024	2023
Equipment	\$ 8,416,063	\$ 8,506,727
Oil and natural gas properties	243,663	238,337
Buildings	248,739	248,693
Rental equipment	136,256	119,653
Land	37,847	38,811
Total property and equipment	9,082,568	9,152,221
Less accumulated depreciation, depletion, amortization and impairment	(6,072,226)	(5,811,809)
Property and equipment, net	\$ 3,010,342	\$ 3,340,412

*Depreciation, depletion, amortization and impairment* — The following table summarizes depreciation, depletion, amortization and impairment expense related to property and equipment and intangible assets for **2024**, **2023**, **2022** and **2021** **2022** (in thousands):

	2023	2022	2021
Depreciation and impairment expense	\$ 682,672	\$ 472,969	\$ 818,999
Amortization expense	41,521	2,891	24,606
Depletion expense	7,223	8,085	5,573
Total	\$ 731,416	\$ 483,945	\$ 849,178

On a periodic

	2024	2023	2022
Depreciation and impairment expense	\$ 1,039,536	\$ 682,672	\$ 472,969
Amortization expense	124,716	41,521	2,891
Depletion expense	7,621	7,223	8,085
Total	\$ 1,171,873	\$ 731,416	\$ 483,945

We review our long-lived assets, including property and equipment and definite-lived intangible assets, for impairment whenever events or changes in circumstances indicate that the carrying amounts of certain assets may not be recovered over their estimated remaining useful lives ("triggering events"). In connection with this review, assets are grouped at the lowest level at which identifiable cash flows are largely independent of other asset groupings. We estimate the undiscounted future cash flows over the life of the respective asset or the primary asset in an asset group. These estimates of cash flows are based on historical cyclical trends in the industry as well as our expectations regarding the continuation of these trends in the future. Provisions for asset impairment are charged against income when estimated future cash flows, on an undiscounted basis, are less than the asset's net book value. Any provision for impairment is measured at fair value.

Negative market indicators such as lower industry-wide drilling rig count forecasts, increased volatility and pricing declines in the pressure pumping market, and continued efficiency gains and technology advancements reducing operating days have led to our reduced outlook for activity. The reduction in activity forecasts, the recent decline in the market price of our common stock, and the results of the fair value determination of certain of our reporting units, were triggering events indicating that certain of our long-lived tangible and intangible assets may be impaired. We deemed it necessary to perform recoverability tests on our asset groups within our completion services reporting unit and our Latin American contract drilling asset group as of September 30, 2024. Future cash flows were estimated over the expected remaining life of the primary asset for each asset group,

and we evaluate determined that, on an undiscounted basis, expected cash flows exceeded the carrying value of the asset groups. As such, no impairment was indicated for our long-lived tangible or definite-lived intangible assets.

We also evaluated our fleet of drilling rigs for marketability based on the condition of inactive rigs, expenditures that would be necessary to bring inactive rigs them to working condition and the expected demand for drilling services by rig type. The components comprising rigs that will no longer be marketed are were evaluated, and those components with continuing utility to our other marketed rigs are transferred were identified for transfer to other rigs or to our yards to be used as spare equipment. The remaining components of these rigs are were abandoned. There were no impairments in 2022 or 2023. In During the fourth third quarter of 2021, 2024, we identified 4342 legacy, non-super-spec non-Tier-1 super-spec drilling rigs and related equipment to be abandoned. Based on the strong customer preference across the industry for Tier-1 super-spec drilling rigs, in addition to efficiency gains and technology advancements that have reduced the total number of rigs needed for the U.S. drilling market, we believed believe the 4342 rigs that were abandoned had limited commercial opportunity. We Accordingly, we recorded a \$220 charge of \$114 million charge related to this abandonment in the fourth quarter of 2021.

2024. No similar charges were incurred in 2022 or 2023.

We also periodically evaluate our other drilling service assets. In the fourth quarter of 2021, we abandoned certain directional drilling equipment totaling \$2.5 million and recorded a charge on our developed technology intangible asset of \$11.4 million due to advances in technology that rendered those assets, and their related spare parts inventory, obsolete. There were no similar charges in 2022 or 2023.

We also periodically evaluate our completion services tangible long-lived assets for marketability based on the condition of inactive equipment, expenditures that would be necessary to bring the equipment to working condition and the expected demand for such equipment. The components of equipment that will no longer be marketed are evaluated, and those components with continuing utility will be used as parts to support active equipment. The remaining components of this equipment are abandoned. In the fourth quarter of 2021, we recorded a charge of \$32.2 million related to the abandonment of approximately 0.2 million horsepower within our completion services fleet. The majority of these units were frac pumps but also included pump down units. These units were abandoned due to changes in customer preferences for dual fuel, advancements in technology, and prohibitive reactivation costs. There were no similar material abandonments in 2022, 2023 or 2024 except for the aforementioned 42 legacy, non-Tier-1 super spec drilling rigs and related equipment.

Geopolitical instability, global or regional decreases in the demand of our services and products, or other unforeseen macroeconomic considerations could negatively impact the expected cash flows used in our recoverability tests on our asset groups. Such changes could result in impairment charges in 2022 or 2023.

We also periodically evaluate the future, which could be material to our drilling products assets for marketability based on the condition results of inactive equipment, expenditures that would be necessary to bring the equipment to working condition operations and the expected demand for such equipment. There have been no impairment charges recorded since the acquisition of these assets financial statements as part of the Ulterra acquisition in the third quarter of 2023. a whole.

## 7. Goodwill and Intangible Assets

**Goodwill** — We had no goodwill balance as of December 31, 2022. As a result of both the Ulterra acquisition and the NexTier merger in 2023, we recognized goodwill. Goodwill is evaluated at least annually on July 31, or more frequently when events and circumstances occur indicating recorded goodwill may be impaired. Goodwill is tested at the reporting unit level, which is at or one level below our operating segments. We determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value after considering qualitative, market and other factors, and if that is the case, any factors. Any necessary goodwill impairment is determined using a quantitative impairment test. If the resulting fair value of goodwill is less than the carrying value of goodwill, an impairment loss would be recognized for the amount of the shortfall. The fair value of a reporting unit is determined using significant unobservable inputs, or level 3 in the fair value hierarchy. These inputs are based on internal management estimates, forecasts, and significant judgment.

We determined our drilling products operating segment consists of a single reporting unit and, accordingly, goodwill acquired from the Ulterra acquisition was allocated to that reporting unit. We determined our completion services operating segment consists of two reporting units; completion services, which is primarily comprised of our hydraulic fracturing operations and other integrated service offerings, and cementing services.

### Goodwill Impairment Assessment

Negative market indicators such as lower industry-wide drilling rig and pressure pumping fleet count forecasts, increased volatility and pricing declines in the pressure pumping market, and continued efficiency gains and technology advancements reducing operating days have led to our reduced outlook for activity. During the fourth third quarter of 2023, our share price experienced a sustained decline which resulted 2024, we viewed the reduction in a decrease to our market capitalization. This activity forecasts combined with the decline in share the market price was deemed of our common stock as a triggering event that warranted a quantitative assessment for goodwill impairment for all three of our reporting units.

impairment.

We estimated the fair value of the drilling products and the completion services reporting units using the income approach. Under this approach, we used a discounted cash flow model, which utilizes utilized present values of cash flows to estimate fair value. Forecasted cash flows considered reflected known market conditions as in the third quarter of December 31, 2023, 2024 and management's anticipated business outlook for each reporting

F-22

unit. Future cash flows were projected based on estimates of revenue **growth rates**, gross profit, selling, general and administrative expense, changes in working capital, and capital expenditures. The terminal period used within the discounted cash flow model for each reporting unit consisted of a **1% 1%** growth estimate. **The future Future** cash flows were **then** discounted using a market-participant, risk-adjusted weighted average cost of capital of **10% 10.25%** for the drilling products reporting unit and **12% 10.75%** for the completion services reporting unit. **Financial and credit market volatility directly impacts our fair value measurement through the weighted average cost of capital used to determine a discount rate. During times of volatility, significant judgment must be applied to determine whether credit market changes are a short-term or long-term trend.**

We estimated the fair value of the cementing services reporting unit **in our completion services operating segment** using a market approach. The market approach was based on trading multiples of **earnings before interest, taxes, depreciation and amortization for** companies comparable to the cementing services reporting unit.

The forecast for the completion services reporting unit assumed lower activity in 2025 compared to average activity levels for full year 2024 and increases in estimated activity of 2% to 8% beginning in 2026 through 2029. Those estimates were based on future drilling rig and pressure pumping fleet count forecasts during the third quarter of 2024 and estimated market share. Additionally, the forecast reflected the expectation that industry-wide pricing pressure will persist within the completions market and continue to compress adjusted gross profit. These factors negatively impacted the estimated value of the reporting unit.

Based on the results of the quantitative assessment, the fair value of the completion services reporting unit was less than its carrying value. Accordingly, we recorded an \$885 million impairment charge to goodwill for the completion services reporting unit during the third quarter of 2024.

The forecast for the drilling products reporting unit **assumes assumed** continued growth **domestically as well as** in international markets. Geopolitical instability in regions in which we expect to maintain and grow market share, a global decrease in the demand of drilling products, or other unforeseen macroeconomic considerations could negatively impact the key assumptions used in our goodwill assessment for our drilling products reporting unit.

The forecast for the completion services reporting unit assumes activity in 2024 consistent with 2023 exit levels and moderate increases in activity of 3% to 5% beginning in 2025 and holding flat until the terminal period, which was consistent with rig count forecasts as of December 31, 2023. A sustained decrease in oil prices and rig count could negatively affect the key assumptions used in our goodwill assessment for completion services.

Based on the results of the goodwill impairment tests **performed during the third quarter of 2024**, the fair values of the drilling products **completion services**, and cementing services reporting units exceeded their carrying values by approximately **4%, 11%, 13% and 80% 73%**, respectively. Accordingly, no impairment was recorded for **any of the drilling products and cementing services** reporting units.

Goodwill by operating segment as of **December 31, 2022** December 31, 2023 and **2023 2024** and changes for the years then ended are as follows (in thousands):

	Completion Services	Drilling Products	Total
Balance, December 31, 2022	\$ —	\$ —	\$ —
Goodwill acquired	921,656	451,341	1,372,997
Measurement period adjustment	469	6,275	6,744
Balance, December 31, 2023	<u>\$ 922,125</u>	<u>\$ 457,616</u>	<u>\$ 1,379,741</u>

  

	Completion Services	Drilling Products	Total
Balance, December 31, 2023	\$ 922,125	\$ 457,616	\$ 1,379,741
Measurement period adjustment	—	(7,113)	(7,113)
Impairment	(885,240)	—	(885,240)
Balance, December 31, 2024	<u>\$ 36,885</u>	<u>\$ 450,503</u>	<u>\$ 487,388</u>

**Intangible Assets** — Our intangible assets were recorded at fair value on the date of acquisition and are amortized on a straight-line basis. The following table identifies the segment and weighted average useful life of each of our intangible assets:

Segment	Segment	Useful Life	Weighted Average Useful Life
(in years)			
Customer relationships	Drilling Services, Completion Services and Drilling Products	11.5	11.1
Developed technology	Drilling Services, Completion Services and Drilling Products	5.2	4.6
Trade name	Completion Services and Drilling Products	10.2	9.7
Other	Drilling Services and Completion Services	3.1	1.8

During 2021, we achieved certain internal advancements in our directional drilling technology that have rendered obsolete certain technology acquired as part of the MS Directional acquisition. Accordingly, we recorded a charge of \$11.4 million to abandon these developed technology intangibles and certain related internal use software.

The gross carrying amount and accumulated amortization of intangible assets as of December 31, 2023, December 31, 2024 and 2022 2023 are as follows (in thousands):

	2023			2022			2024		
	Gross Carrying	Accumulated	Net Carrying	Gross Carrying	Accumulated	Net Carrying	Gross Carrying	Accumulated	Car
	Amount	Amortization	Amount	Amount	Amortization	Amount	Amount	Amortization	Am
Customer relationships	\$ 786,715	\$ (25,563 )	\$ 761,152	\$ 1,800	\$ (1,071 )	\$ 729			
Developed technology	202,772	(16,435 )	186,337	7,772	(3,773 )	3,999			
Trade name	101,000	(3,406 )	97,594	—	—	—			
Other	7,345	(731 )	6,614	1,450	(333 )	1,117			
Intangible assets, net	\$ 1,097,832	\$ (46,135 )	\$ 1,051,697	\$ 11,022	\$ (5,177 )	\$ 5,845			

Amortization and impairment expense on intangible assets of approximately \$41.5\$124 million, \$1.3 million, \$41.5 million, and \$24.0 million \$1.3 million was recorded for the years ended December 31, 2023, December 31, 2024, 2023 and 2022, and 2021, respectively, which included an \$11.4 million impairment in 2021.

F-23

respectively.

The remaining amortization expense associated with finite-lived intangible assets, excluding in-process software, is expected to be as follows (in thousands):

Year ending December 31,		
2024	\$	121,307
2025		121,039
2026		120,702
2027		120,674
2028		105,481
Thereafter		456,608
Total	\$	1,045,811

Year ending December 31,		
2025	\$	123,645
2026		123,277
2027		121,250
2028		105,236
2029		80,068
Thereafter		373,535
Total	\$	927,011

## 8. Accrued Liabilities

Accrued liabilities consisted of the following at December 31, 2023 December 31, 2024 and 2022 2023 (in thousands):

	2023	2022
Salaries, wages, payroll taxes and benefits	\$ 129,982	\$ 73,308
Workers' compensation liability	67,396	67,853
Property, sales, use and other taxes	62,194	10,119
Insurance, other than workers' compensation	11,524	3,644
Accrued interest payable	19,172	10,522
Deferred revenue	98,914	110,215
Federal and state income taxes payable	3,437	4,644
Accrued merger and integration expense	15,113	—
Other	38,536	28,482
Accrued liabilities	\$ 446,268	\$ 308,787

	2024	2023
Salaries, wages, payroll taxes and benefits	\$ 110,212	\$ 129,982
Workers' compensation liability	73,730	67,396
Property, sales, use and other taxes	54,445	62,194
Insurance, other than workers' compensation	10,703	11,524
Accrued interest payable	17,484	19,172
Deferred revenue	75,195	98,914
Federal and state income taxes payable	—	3,437
Accrued merger and integration expense	4,723	15,113
Other	39,259	38,536
Accrued liabilities	\$ 385,751	\$ 446,268

## 9. Long-Term Debt

Long-term debt consisted of the following at December 31, 2023 December 31, 2024 and 2022 2023 (in thousands):

Effective Interest Rate	December 31, 2023	December 31, 2022
-------------------------	-------------------	-------------------

3.95% Senior Notes Due 2028	4.03%	482,505	\$ 488,505
5.15% Senior Notes Due 2029	5.26%	344,895	347,900
7.15% Senior Notes Due 2033	7.28%	400,000	—
Equipment Loans Due 2025	5.25%	18,686	—
		1,246,086	836,405
Less deferred financing costs and discounts		(8,919)	(5,468)
Less current portion		(12,226)	—

*Credit Agreement* — On August 29, 2023 January 31, 2025, we entered into Amendment No. 4 to the Second Amended and Restated Credit Agreement with the lenders party thereto and Wells Fargo Bank, National Association, as administrative agent, and the other parties thereto (the "Credit Agreement"). The Credit Agreement Amendment), which amended and restated our Amended and Restated Credit Agreement dated as of March 27, 2018 March 27, 2018 (as amended, restated, supplemented or otherwise modified at December 31, 2024, the "Credit "Prior Credit Agreement"). The commitments under the Credit Agreement are \$500 million, and the loans and commitments under the Credit Agreement mature on January 31, 2030.

The Credit Agreement provides for a committed senior unsecured credit facility that permits aggregate revolving credit borrowings of up to \$500 million, with a letter of credit sub-facility of \$100 million and a swing line sub-facility that, at any time outstanding, is limited to the lesser of \$50 million and the amount of the swing line provider's unused commitment. Subject to customary conditions, we may request that the lenders' aggregate commitments be increased by up to \$200 million, not to exceed total commitments of \$700 million. For a description of the Credit Agreement, see "Liquidity and Capital Resources" included in Part II, Item 7— "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this Report.

On April 5, 2024, we entered into a Commitment Increase Agreement (the "Commitment Increase Agreement"), which increased the commitments under our Amended and Restated Credit Agreement, dated as of March 27, 2018 (as modified by the Commitment Increase Agreement and amended to date, the "Prior Credit Agreement"), by and among us, as borrower, Wells Fargo Bank, National Association, as administrative agent, letter of credit issuer, swing line lender and lender and each of the other letter of credit issuers and lenders party thereto.

The Commitment Increase Agreement increased the commitments under our Prior Credit Agreement to \$615 million. The maturity date for \$567 million of such commitments was March 27, 2026; and the maturity date for \$48.3 million of such commitments was March 27, 2025.

On August 29, 2023, we entered into Amendment No. 4 to Amended and Restated Credit Agreement (the "Credit Agreement Amendment"), which, among other things, (i) deemed certain outstanding letters of credit issued for the account of BEP Diamond Holdings Corp. (the entity we acquired in the Ulterra acquisition) with a face amount of \$2.5 million to have been issued under the Credit Agreement and (ii) extended the maturity date for \$85 million \$85.0 million of revolving credit commitments of certain lenders under the Prior Credit Agreement from March 27, 2025 March 27, 2025 to March 27, 2026 March 27, 2026. As a result, of the \$600 million of revolving credit commitments under the Credit Agreement, the maturity date for \$501.7 million of such commitments is March 27, 2026; the maturity date for \$48.3 million of such commitments is March 27, 2025; and the maturity date for the remaining \$50 million of such commitments is March 27, 2024.

The Prior Credit Agreement is a committed senior unsecured revolving credit facility that permits aggregate borrowings of up to \$600 million, \$615 million, including a letter of credit facility that, at any time outstanding, is limited to \$100 million \$100 million and a swing line facility that, at any time outstanding, is limited to the lesser of \$50 million \$50.0 million and the amount of the swing line provider's unused commitment. Subject to customary conditions, we may request that the lenders' aggregate commitments be increased by up to \$300 million, not to exceed total commitments of \$900 million.

F-24

Loans under the Prior Credit Agreement bear interest by reference, at our election, to the SOFR rate (subject to a 0.10% 0.10% per annum adjustment) or base rate, in each case subject to a 0% 0% floor. The applicable margin on SOFR rate loans varies from 1.00% 1.00% to 2.00% 2.00% and the applicable margin on base rate loans varies from 0.00% 0.00% to 1.00% 1.00%, in each case determined based on our credit rating. As of December 31, 2023 December 31, 2024, the applicable margin on SOFR rate loans was

~~1.75%~~ ~~1.75%~~ and the applicable margin on base rate loans was ~~0.75%~~ ~~0.75%~~. A letter of credit fee is payable by us equal to the applicable margin for SOFR rate loans times the daily amount available to be drawn under outstanding letters of credit. The commitment fee rate payable to the lenders varies from ~~0.10%~~ ~~0.10%~~ to ~~0.30%~~ ~~0.30%~~ based on our credit rating.

None of our subsidiaries are currently required to be a guarantor under the ~~Prior~~ Credit Agreement. However, if any subsidiary guarantees or incurs debt, which does not qualify for certain limited exceptions and is otherwise, in the aggregate with all other similar debt, in excess of Priority Debt (as defined in the ~~Prior~~ Credit Agreement), such subsidiary is required to become a guarantor under the ~~Prior~~ Credit Agreement.

The ~~Prior~~ Credit Agreement contains representations, warranties, affirmative and negative covenants and events of default and associated remedies that we believe are customary for agreements of this nature, including certain restrictions on our ability and the ability of each of our subsidiaries to grant liens and on the ability of each of our non-guarantor subsidiaries to incur debt. If our credit rating is below investment grade at both Moody's and S&P, we will become subject to a restricted payment covenant, which would generally require us to have a Pro Forma Debt Service Coverage Ratio (as defined in the ~~Prior~~ Credit Agreement) greater than or equal to 1.50 to 1.00 immediately before and immediately after making any restricted payment. Restricted payments include, among other things, dividend payments, repurchases of our common stock, distributions to holders of our common stock or any other payment or other distribution to third parties on account of our or our subsidiaries' equity interests. Our credit rating is currently investment grade at both credit rating agencies. The ~~Prior~~ Credit Agreement also requires that our total debt to capitalization ratio, expressed as a percentage, not exceed ~~50%~~ ~~50%~~ as of the last day of each fiscal quarter. The ~~Prior~~ Credit Agreement generally defines the total debt to capitalization ratio as the ratio of (a) total borrowed money indebtedness to (b) the sum of such indebtedness plus consolidated net worth, with consolidated net worth determined as of the end of the most recently ended fiscal quarter. We were in compliance with these covenants at ~~December 31, 2023~~ ~~December 31, 2024~~.

As of ~~December 31, 2023~~ ~~December 31, 2024~~, we had noborrowings outstanding under our revolving credit facility. We had ~~\$2.6 million~~ ~~\$2.1 million~~ in letters of credit outstanding under the ~~Prior~~ Credit Agreement at ~~December 31, 2023~~ ~~December 31, 2024~~ and, as a result, had available borrowing capacity of approximately ~~\$597 million~~ ~~\$613 million~~ at that date.

*2015 Reimbursement Agreement* — On March 16, 2015, we entered into a Reimbursement Agreement (~~the~~ ~~(as amended from time to time, the~~ "Reimbursement Agreement") with The Bank of Nova Scotia ("Scotiabank"), pursuant to which we may from time to time request that Scotiabank issue an unspecified amount of letters of credit. As of ~~December 31, 2023~~ ~~December 31, 2024~~, we had ~~\$87.7 million~~ ~~\$38.8 million~~ in letters of credit outstanding under the Reimbursement Agreement.

Under the terms of the Reimbursement Agreement, we will reimburse Scotiabank on demand for any amounts that Scotiabank has disbursed under any of our letters of credit issued thereunder. Fees, charges and other reasonable expenses for the issuance of letters of credit are payable by us at the time of issuance at such rates and amounts as are in accordance with Scotiabank's prevailing practice. We are obligated to pay to Scotiabank interest on all amounts not paid by us on the date of demand or when otherwise due at the ~~LIBOR Prime~~ rate plus ~~2.25%~~ ~~2.00%~~ per annum, calculated daily and payable monthly, in arrears, on the basis of a calendar year for the actual number of days elapsed, with interest on overdue interest at the same rate as on the reimbursement amounts. A letter of credit fee is payable by us equal to ~~1.50%~~ ~~1.50%~~ times the amount of outstanding letters of credit.

We have also agreed that if obligations under the Credit Agreement are secured by liens on any of our or our subsidiaries' property, then our reimbursement obligations and (to the extent similar obligations would be secured under the Credit Agreement) other obligations under the Reimbursement Agreement and any letters of credit will be equally and ratably secured by all property subject to such liens securing the Credit Agreement.

Pursuant to a Continuing Guaranty dated as of March 16, 2015, our payment obligations under the Reimbursement Agreement are jointly and severally guaranteed as to payment and not as to collection by our subsidiaries that from time to time guarantee payment under the Credit Agreement. None of our subsidiaries are currently required to guarantee payment under the Credit Agreement.

*2028 Senior Notes, 2029 Senior Notes and 2033 Senior Notes* — On January 19, 2018, we completed an offering of ~~\$525 million~~ ~~\$525 million~~ in aggregate principal amount of ~~our~~ ~~3.95%~~ ~~3.95%~~ Senior Notes due 2028 (the "2028 Notes"). On November 15, 2019, we completed an offering of ~~\$350 million~~ ~~\$350 million~~ in aggregate principal amount of ~~our~~ ~~5.15%~~ ~~5.15%~~ Senior Notes due 2029 (the "2029 Notes"). On September 13, 2023, we completed an offering of ~~\$400 million~~ ~~\$400 million~~ in aggregate principal amount of ~~our~~ ~~7.15%~~ ~~7.15%~~ Senior Notes due 2033 (the "2033 Notes"). The net proceeds before offering expenses from the offering of the 2033 Notes were approximately ~~\$396 million~~, ~~\$396 million~~, which we used to repay amounts outstanding under our ~~revolving credit facility~~, ~~Prior Credit Agreement~~.

F-25

We pay interest on the 2028 Notes on February 1 and August 1 of each ~~year~~, ~~year~~. The 2028 Notes will mature on ~~February 1, 2028~~ ~~February 1, 2028~~. The 2028 Notes bear interest at a rate of ~~3.95%~~ ~~3.95%~~ per annum.

We pay interest on the 2029 Notes on May 15 and November 15 of each ~~year~~, ~~year~~. The 2029 Notes will mature on ~~November 15, 2029~~ ~~November 15, 2029~~. The 2029 Notes bear interest at a rate of ~~5.15%~~ ~~5.15%~~ per annum.

We pay interest on the 2033 Notes on April 1 and October 1 of each ~~year~~, ~~year~~. The 2033 Notes will mature on ~~October 1, 2033~~ ~~October 1, 2033~~. The 2033 Notes bear interest at a rate of ~~7.15%~~ ~~7.15%~~ per annum.

The 2028 Notes, 2029 Notes and 2033 Notes (together, the "Senior Notes") are our senior unsecured obligations, which rank equally with all of our other existing and future senior unsecured debt and will rank senior in right of payment to all of our other future subordinated debt. The Senior Notes will be effectively subordinated to any of our future secured debt to the extent of the value of the assets securing such debt. In addition, the Senior Notes will be structurally subordinated to the liabilities (including trade payables) of

our subsidiaries that do not guarantee the Senior Notes. None of our subsidiaries are currently required to be a guarantor under the Senior Notes. If our subsidiaries guarantee the Senior Notes in the future, such guarantees (the "Guarantees") will rank equally in right of payment with all of the guarantors' future unsecured senior debt and senior in right of payment to all of the guarantors' future subordinated debt. The Guarantees will be effectively subordinated to any of the guarantors' future secured debt to the extent of the value of the assets securing such debt.

At our option, we may redeem the Senior Notes in whole or in part, at any time or from time to time at a redemption price equal to 100% of the principal amount of such Senior Notes to be redeemed, plus accrued and unpaid interest, if any, on those Senior Notes to the redemption date, plus a "make-whole" premium. Additionally, commencing on November 1, 2027, in the case of the 2028 Notes, on August 15, 2029, in the case of the 2029 Notes, and on July 1, 2033, in the case of the 2033 Notes, at our option, we may redeem the respective Senior Notes in whole or in part, at a redemption price equal to 100% 100% of the principal amount of the Senior Notes to be redeemed, plus accrued and unpaid interest, if any, on those Senior Notes to the applicable redemption date.

The indentures pursuant to which the Senior Notes were issued include covenants that, among other things, limit our and our subsidiaries' ability to incur certain liens, engage in sale and lease-back transactions or consolidate, merge, or transfer all or substantially all of their assets. These covenants are subject to important qualifications and limitations set forth in the indentures.

Upon the occurrence of a change of control triggering event, as defined in the indentures, each holder of the Senior Notes may require us to purchase all or a portion of such holder's Senior Notes at a price equal to 101% 101% of their principal amount, plus accrued and unpaid interest, if any, to, but excluding, the applicable repurchase date.

The indentures also provide for events of default which, if any of them occurs, would permit or require the principal of, premium, if any, and accrued interest, if any, on the Senior Notes to become or to be declared due and payable.

**Equipment Loans** — As part of the NexTier merger, we assumed the obligations of NexTier Completions Solutions Inc. ("NCS") under a Master Loan and Security Agreement (as amended, the "Master Agreement") with Caterpillar Financial Services Corporation. The Master Agreement allows NCS to enter into secured equipment financing term loans from time to time (the "Equipment Loans"). The Equipment Loans may be drawn in multiple tranches, with each loan evidenced by a separate promissory note. The Master Agreement and the Equipment Loans contain customary affirmative and negative covenants, including limitations on further encumbrance of the collateral other than the applicable loans under the Master Agreement. We were in compliance with these covenants at December 31, 2023. The Equipment Loans bear interest at a rate of 5.25% per annum, and we pay interest on the 1<sup>st</sup> of each month. The Equipment Loans will mature on June 1, 2025.

**Drilling Products Letters of Credit** — As part of the Ulterra merger, we assumed letters of credit of \$2.5 million outstanding with financial institutions providing for short-term borrowing capacity, overdraft protection and bonding requirements. We maintain these letters of credit primarily for compliance with contractual obligations. These letters of credit expire annually at various times during the year and are typically renewed. As of December 31, 2023, no amounts had been drawn under the letters of credit.

F-26

Presented below is a schedule of the principal repayment requirements of long-term debt by fiscal year as of December 31, 2023 December 31, 2024 (in thousands):

2029		344,895
Thereafter		400,000
Total	\$	1,233,795

## 10. Commitments Contingencies and Other Matters

### Contingencies

*Commitments* – As of December 31, 2023 December 31, 2024, we maintained letters of credit in the aggregate amount of \$92.4 million \$42.9 million primarily for the benefit of various insurance companies as collateral for retrospective premiums and retained losses that could become payable under the terms of the underlying insurance contracts and compliance with contractual obligations. These letters of credit expire annually at various times during the year and are typically renewed. As of December 31, 2023 December 31, 2024, no amounts had been drawn under the letters of credit.

As of December 31, 2023 December 31, 2024, we had \$35.0 million in surety bond exposure issued as financial assurance on an insurance agreement.

As of December 31, 2024, we had commitments to purchase major equipment totaling approximately \$153 million.

\$65.9 million.

Our completion services segment has entered into agreements to purchase minimum quantities of proppants from certain vendors. We purchased \$135 million, \$93.0 million \$103 million, \$135 million and \$66.9 million \$93.0 million of proppants under take-or-pay or similar agreements during the years ended December 31, 2023 December 31, 2024, 2022 2023 and 2021, 2022, respectively. As of December 31, 2023 December 31, 2024, the remaining minimum obligation under these agreements was approximately \$39.7 million, \$19.8 million, of which approximately, \$33.7 million, \$4.0 million \$17.4 million and \$2.0 million \$2.4 million relate to the remainder of 2024, 2025 and 2026, respectively.

*Contingencies* – Our operations are subject to many hazards inherent in the businesses in which we operate, including inclement weather, blowouts, explosions, fires, loss of well control, motor vehicle accidents, equipment failure, unplanned power outages and surges, computer system disruptions or cybersecurity incidents, pollution, exposure and reservoir damage. These hazards could cause personal injury or death, work stoppage, and serious damage to equipment and other property, as well as significant environmental and reservoir damages. These risks could expose us to substantial liability for personal injury, wrongful death, property damage, loss of oil and natural gas production, pollution and other environmental damages. An accident or other event resulting in significant environmental or property damage, or injuries or fatalities involving our employees or other persons could also trigger investigations by federal, state or local authorities. Such an accident or other event could cause us to incur substantial expenses in connection with the investigation, remediation and resolution, as well as cause lasting damage to our reputation, loss of customers and an inability to obtain insurance.

We have indemnification agreements with many of our customers, and we also maintain liability and other forms of insurance. In general, our contracts typically contain provisions requiring our customers to indemnify us for, among other things, reservoir and certain pollution damage. Our right to indemnification may, however, be unenforceable or limited due to negligent or willful acts or omissions by us, our subcontractors and/or suppliers. In addition, certain states, including Louisiana, New Mexico, Texas and Wyoming, have enacted statutes generally referred to as “oilfield anti-indemnity acts” expressly prohibiting certain indemnity agreements contained in or related to oilfield services agreements. Such oilfield anti-indemnity acts may restrict or void a party’s indemnification of us.

Our customers and other third parties may dispute, or be unable to meet, their indemnification obligations to us due to financial, legal or other reasons. Accordingly, we may be unable to transfer these risks to our customers and other third parties by contract or indemnification agreements. Incurring a liability for which we are not fully indemnified or insured could have a material adverse effect on our business, financial condition, cash flows and results of operations.

In addition, we maintain insurance coverage of the types and in the amounts we believe to be customary in the industry, but we do not insure against all risks, either because insurance is not available or because it is not commercially justifiable. The insurances that we maintain include coverage for fire, windstorm and other risks of physical loss to our equipment and certain other assets, employer’s employers’ liability, automobile liability, commercial general liability, workers’ compensation as well as insurance for other specific risks, risks, together with excess loss liability insurance coverage. We have also elected to retain a greater amount of risk through increased deductibles as compared to prior years, or self-insurance on certain insurance policies. We cannot assure that any insurance obtained by us will be adequate to cover any losses or liabilities nor can we assure that any insurance obtained by us will continue to be made available for purchase or made available on acceptable terms. While we carry insurance to cover physical damage to, or loss of, a substantial portion of our equipment and certain other assets, such insurance does not cover the full replacement cost of such equipment or other assets. We have also elected assets, and in some certain cases, such as losses arising from or attributable to retain a greater amount of risk through increased fire and/or explosion resulting from our hydraulic fracturing operations at the wellsite, is subject to significantly higher deductibles on certain insurance policies. For example, in the United States we generally maintain a \$1.5

F-27

million per occurrence deductible on than are applicable to our workers’ compensation insurance coverage, a \$1.0 million per occurrence deductible on our equipment insurance coverage, a \$10.0 million per occurrence deductible on our general liability coverage, and, for our automobile insurance coverage, a per occurrence deductible ranging from \$2.0 million to \$10.0 million. other coverages. We also self-insure a number of risks, including loss of earnings and business interruption and most of our cybersecurity risks, and we do not carry a significant amount of insurance to cover risks of underground reservoir damage.

We

Certain subsidiaries we acquired in the Ulterra acquisition are defendants in a claim brought by a subsidiary of NOV Inc. alleging breach of a license agreement related to certain patents. Such subsidiaries have asserted defenses to the claim and are defending vigorously against this claim.

The case is *Grant Prideco, Inc., et al. v. Schlumberger Technology Corp., et al.*, in Texas State Court, District of Harris County, 11th Judicial District. On February 6, 2023, Grant Prideco, Inc., ReedHycalog UK, Ltd. ReedHycalog, LP, National Oilwell Varco, LP ("NOV") sued Ulterra Drilling Technologies, LP ("Ulterra") and several other companies. NOV seeks a declaration that United States Patent No. 8,721,752 (the "752 Patent") is a "Licensed RH Patent" per the terms of a license agreement between Ulterra and NOV. NOV also alleges a breach of contract based on the license agreement between NOV and Ulterra and seeks allegedly owed royalties since October 22, 2021. NOV also seeks attorney's fees.

On February 27, 2023, Ulterra filed a plea to the jurisdiction, and subject thereto, an answer, affirmative defenses and counterclaims. Ulterra's counterclaims include: (i) declaratory judgments of non-infringement of U.S. Pat. No. 7,568,534 and the '752 patent; (ii) a declaratory judgment of no royalties after Oct. 22, 2021; (iii) a declaratory judgment that certain other identified patents are expired and therefore not infringed after Oct. 22, 2021; and (iv) a declaratory judgment of no breach of contract. On the same day, Ulterra filed a notice of removal in federal court for the Southern District of Texas, Houston Division (SDTX 4:23-cv-00730), as well as a corresponding notice in Texas state court. NOV moved to dismiss and remand the case back to state court. On February 17, 2024, the Court denied NOV's motion.

Discovery is closed and dispositive motions are scheduled to be fully briefed by the end of March 2025. Trial is currently scheduled for March 31, 2025. An unfavorable judgment or resolution of this claim not covered by indemnity could have a material impact on our financial results.

Additionally, we are party to various legal proceedings arising in the normal course of our business. We do not believe that the outcome of these proceedings, either individually or in the aggregate, will have a material adverse effect on our financial condition, cash flows or results of operations.

**Other Matters** — We have a Change in Control Agreement with one of our Executive Vice Presidents (the "Specified Employee"). The Change in Control Agreement generally has an initial term with automatic twelve-month renewals unless we notify the Specified Employee at least ninety days before the end of such renewal period that the term will not be extended. If a change in control occurs during the term of the agreement and the Specified Employee's employment is terminated (i) by us other than for cause or other than automatically as a result of death, disability or retirement, or (ii) by the Specified Employee for good reason (as those terms are defined in the Change in Control Agreement), then the Specified Employee shall generally be entitled to, among other things:

- a bonus payment equal to the highest bonus paid after the Change in Control Agreement was entered into (such bonus payment prorated for the portion of the fiscal year preceding the termination date);
- a payment equal to 2 times the sum of (i) the highest annual salary in effect for such Specified Employee and (ii) the average of the three annual bonuses earned by the Specified Employee for the three fiscal years preceding the termination date and

• **continued coverage under our welfare plans for up to two years.**

The Change in Control Agreement provides the Specified Employee with a full gross-up payment for any excise taxes imposed on payments and benefits received under the Change in Control Agreements or otherwise, including other taxes that may be imposed as a result of the gross-up payment.

We have Employment Agreements with our Chief Executive Officer, Chief Financial Officer, Chief Business Officer and General Counsel. Each Employment Agreement generally has an initial three-year term, subject to automatic annual renewal. The executive may terminate his employment under his Employment Agreement by providing written notice of such termination at least 30 days before the effective date of such termination. Under specified circumstances, we may terminate the executive's employment under his Employment Agreement for Cause (as defined in the Employment Agreement) by providing written notice 10 - 30 days, depending on the nature of the cause trigger, before the effective date of such termination and granting at least 10 - 20 days, depending on the nature of the cause trigger, to cure the cause for such termination or (ii) by providing written notice of such termination at least 30 days before the effective date of such termination and by granting at least 20 days to cure the cause for such termination, provided that if the matter is reasonably determined by us to not be capable of being cured, the executive may be terminated for cause on the date the written notice is delivered. The Employment Agreement also provides for, among other things, severance payments and the continuation of certain benefits following our decision to terminate the executive other than for Cause, or termination by the executive for Good Reason (as defined in each Employment Agreement). Under these provisions, if the executive's employment is terminated by us without Cause, or the executive terminates his employment for Good Reason:

- the executive will have the right to receive a lump-sum payment consisting of 3 times (in the case of the Chief Executive Officer) or 2.5 times (in the case of the Chief Financial Officer, Chief Business Officer and General Counsel) the sum of (i) his base salary and (ii) the average annual cash bonus received by him for the three years prior to the date of termination;
- the executive will have the right to receive a pro-rated lump-sum payment equal to his annual cash bonus based on actual results for the year, payable at the same time annual cash bonuses are paid to active employees;
- we will accelerate vesting of all time-based equity, phantom equity and long-term cash incentive awards on the 60th day following the executive's termination and will cause all performance-based equity, phantom equity and long-term cash incentive awards to continue in effect through the end of the applicable performance period and vest based on actual results as if the executive had remained employed through the end of the applicable performance period; and
- we will pay the executive certain accrued obligations and certain obligations pursuant to the terms of employee benefit plans.

If our decision to terminate other than for Cause or by the executive for Good Reason occurs following a Change in Control (as defined in his Employment Agreement), the executive will generally be entitled to the same severance payments and benefits described above except that the pro-rated lump-sum payment for annual cash bonuses will be based on his highest annual cash bonus for the last three years, and the executive will be entitled to 36 months (in the case of the Chief Executive Officer) or 30 months (in the case of the Chief Financial Officer, Chief Business Officer and General Counsel) of subsidized benefits continuation coverage.

F-28

Additionally, our Chief Business Officer is party to a letter agreement with us, which was entered into in connection with the closing of the NexTier merger. The letter agreement provides that, following the one-year anniversary of the closing of the NexTier merger, our Chief Business Officer will not have Good Reason (as defined in his Employment Agreement) to terminate his employment with us due to the transition of his role in connection with the NexTier merger and any resulting changes in his authority, duties or responsibilities. The letter agreement also provides a \$2 million cash retention bonus, payable in eight quarterly installments following the closing of the NexTier merger, subject to our Chief Business Officer's continued employment in good standing with us on each applicable payment date. Any unpaid portions of the retention bonus will become payable if our Chief Business Officer's employment is terminated by us without cause or by our Chief Business Officer for Good Reason (unless, within six months of the closing of the NexTier merger, our Chief Business Officer resigns for Good Reason as a result of the transition of his role, in which case the full amount of the retention bonus will be forfeited with any previously paid portions offset against any severance amounts payable to our Chief Business Officer).

## 11. Stockholders' Equity

**Cash Dividend** — On February 14, 2024/February 5, 2025, our Board of Directors approved a cash dividend on our common stock in the amount of \$0.08/\$0.08 per share to be paid on March 15, 2024/March 17, 2025 to holders of record as of March 1, 2024/March 3, 2025. The amount and timing of all future dividend payments, if any, are subject to the discretion of the Board of Directors and will depend upon business conditions, results of operations, financial condition, terms of our debt agreements and other factors. Our Board of Directors may, without advance notice, reduce or suspend our dividend for any reason, including to improve our financial flexibility and position our company for long-term success. There can be no assurance that we will pay a dividend in the future.

**Share Repurchases and Acquisitions** — In September 2013, our Board of Directors approved a stock buyback program. In April 2023, February 2024, our Board of Directors approved an increase of the authorization under the stock buyback program to allow for an aggregate of \$300 million/\$1.0 billion of future share repurchases. All purchases executed to date have been through open market transactions. Purchases under the buyback program are made at management's discretion, at prevailing prices, subject to market conditions and other factors. Purchases may be made at any time without prior notice. There is no expiration date associated with the buyback program. As of December 31, 2023/December 31, 2024, we had remaining authorization to purchase approximately \$206 million/\$759 million of our outstanding common stock under the stock buyback program. In February 2024, our Board of Directors approved an increase of the authorization under the stock buyback program to allow for an aggregate of \$1 billion of future share repurchases. Shares of stock purchased under the buyback program are held as treasury shares.

We acquired shares of stock from employees during 2024, 2023 2022 and 2021 2022 that are accounted for as treasury stock. Certain of these shares were acquired to satisfy the exercise price and employees' tax withholding obligations upon the exercise of stock options. The remainder of these shares were acquired to satisfy payroll withholding obligations upon the settlement of performance unit awards and the vesting of restricted stock units. These shares were acquired at fair market value. These acquisitions were made pursuant to the terms of the Patterson-UTL Energy, Inc. Amended and Restated 2014 Long-Term Incentive Plan, as amended (the "2014 Plan") and, the Patterson-UTL Energy, Inc. 2021 Long-Term Incentive Plan (the "2021 Plan"), the NexTier Oilfield Solutions Inc. Equity and Incentive Award Plan and the NexTier Oilfield Solutions Inc. (Former C&J Energy) Management Incentive Plan, and not pursuant to the stock buyback program.

Treasury stock acquisitions during the years ended December 31, 2023/December 31, 2024, 2022 2023 and 2021 2022 were as follows (dollars in thousands):

	2023		2022		2021	
	Shares	Cost	Shares	Cost	Shares	Cost
Treasury shares at beginning of period	88,758,722	\$ 1,453,079	84,128,995	\$ 1,372,641	83,402,322	\$ 1,366,313

Purchases in connection with Pioneer acquisition	—	—	—	—	275,477	2,601
Other	—	—	3,027	28	—	—
Treasury shares at end of period	105,580,011	\$ 1,657,675	88,758,722	\$ 1,453,079	84,128,995	\$ 1,372,641

**Release of Cumulative Translation Adjustment** — In April 2022, we sold certain assets to substantially complete our exit from our Canadian operations. We used the Canadian dollar as our functional currency for our Canadian operations. Prior to the substantial completion of our exit, the effects of exchange rate changes were reflected in accumulated other comprehensive income, which is a separate component of stockholders' equity. Upon substantial completion of our exit, we released the \$7.7 million cumulative translation adjustment, net of tax of \$3.8 million, from accumulated other comprehensive income into net income (loss) in the second quarter of 2022. The release resulted in an \$11.5 million pre-tax gain, which was recorded in other operating income, net.

## 12. Stock-based Compensation

We use share-based payments to compensate employees and non-employee directors. We recognize the cost of share-based payments under the fair-value-based method. Share-based awards include equity instruments in the form of stock options or restricted stock units that have included service conditions and, in certain cases, performance conditions. Our share-based awards also include share-settled performance unit awards. Share-settled performance unit awards are accounted for as equity awards. We issue shares of common stock when vested stock options are exercised and after restricted stock units and share-settled performance unit awards vest.

The 2021 Plan was originally approved by our stockholders on June 3, 2021. Subject to stockholder approval, our Board of Directors and our stockholders have approved an amendment a series of amendments to the 2021 Plan (the "2021 Plan Amendments") to increase the number of shares available for issuance under the 2021 Plan by 5.445 million shares (the "First Amendment"). On June 8, 2023, our stockholders approved the First Amendment. On September 1, 2023, in connection with the NexTier merger, our Board of Directors approved a second amendment to the 2021 Plan (the "Second Amendment," and together with the First Amendment, the "2021 Plan Amendments") to assume approximately 10 million shares previously reserved for issuance under the NexTier Oilfield Solutions Inc. Equity and Incentive Award Plan (the "NexTier Plan"). Plan. Following the 2021 Plan Amendments, the aggregate number of shares of Common Stock authorized for grant under the 2021 Plan is approximately 29.0 million.

39.1 million.

On September 1, 2023, the Board of Directors also approved amendments to the NexTier Plan and the NexTier Oilfield Solutions Inc. (Former C&J Energy) Management Incentive Plan (the "Former C&J Energy Plan" and, together with the NexTier Plan, the "Assumed Plans") to assume awards that were previously granted under the Assumed Plans (consisting of stock options, time- and performance-based restricted stock units and cash-settled performance unit awards), which, in connection with the NexTier merger, were converted into equity share-based awards in respect of shares of Patterson-UTI Energy, Inc. common stock.

The aggregate number of shares of Common Stock authorized for grant under the 2021 Plan is approximately 29.0 million, which includes approximately 4.9 million shares previously authorized for issuance under our 2014 Plan and approximately 10 million shares assumed from the NexTier merger.

Our share-based compensation plans at December 31, 2023 December 31, 2024 are as follows:

Plan Name	Shares Authorized	Shares Underlying Awards	Shares Available
	for Grant	Outstanding	for Grant
2021 Plan	28,963,412	5,004,289	13,910,294
NexTier Plan	—	2,660,633	—
Former C&J Energy Plan	—	789,337	—
2014 Plan	—	2,571,965	—

A summary of the 2021 Plan follows:

- The Compensation Committee of the Board of Directors administers the 2021 Plan other than the awards to directors.
- All employees, officers and directors are eligible for awards.

Plan Name	Shares Authorized	Shares Underlying Awards	Shares Available
	for Grant	Outstanding	for Grant
2021 Plan	39,074,510	6,440,885	17,520,596
NexTier Plan	—	977,011	—
Former C&J Energy Plan	—	406,405	—
2014 Plan	—	1,719,275	—

- The Compensation Committee determines the vesting schedule for awards. Awards typically vest over one year for non-employee directors and three years for employees.
- The Compensation Committee sets the term of awards and no option term can exceed 10 years.
- The 2021 Plan provides that the total compensation paid to each non-employee director for their service as such, whether in cash or in equity awards under the 2021 Plan (based on the grant date fair value of any such awards) during a single fiscal year may not exceed \$750,000; however, the foregoing limit will instead be \$1,000,000 for any fiscal year in which the non-employee director is first appointed to the Board of Directors or any fiscal year in which the non-employee director serves as chairman or lead director.
- All options granted under the 2021 Plan are granted with an exercise price equal to or greater than fair market value of our common stock at the time the option is granted.
- The 2021 Plan provides for awards of incentive and non-incentive stock options, stock appreciation rights ("SARs"), restricted stock awards, other stock unit awards, performance share awards, performance unit awards and dividend equivalent rights.

Options granted under the 2014 Plan typically vested over one year for non-employee directors and three years for employees. All options were granted with an exercise price equal to the fair market value of the related common stock at the time of grant.

F-30

**Stock Options** — We estimate the grant date fair values of stock options using the Black-Scholes-Merton valuation model. Volatility assumptions are based on the historic volatility of our common stock over the most recent period equal to the expected term of the options as of the date such options are granted. The expected term assumptions are based on our experience with respect to employee stock option activity. Dividend yield assumptions are based on the expected dividends at the time the options are granted.

The risk-free interest rate assumptions are determined by reference to United States Treasury yields. No options were granted during the years ended **December 31, 2023**, **December 31, 2024**, **2022**, **2023** and **2021**, **2022**.

Stock option activity for the year ended **December 31, 2023**, **December 31, 2024** follows:

	Shares	Weighted Average	
		Exercise Price Per Share	
Outstanding at beginning of year	2,905,150	\$	22.19
Assumed <sup>(a)</sup>	652,573	\$	27.97
Exercised	—	\$	—
Expired	(692,500)	\$	22.82
Outstanding at end of year	2,865,223	\$	23.36
Exercisable at end of year	2,865,223	\$	23.36

(a)

	Shares	Weighted Average	
		Exercise Price Per Share	
Outstanding at beginning of year	2,865,223	\$	23.36
Exercised	—	\$	—
Expired	(1,071,218)	\$	25.19
Outstanding at end of year	1,794,005	\$	22.26
Exercisable at end of year	1,794,005	\$	22.26

Awards assumed in connection with the NexTier merger. All of these assumed awards had been previously granted by NexTier under the NexTier Plan or the Former C&J Energy Plan, in periods prior to the NexTier merger.

Options outstanding and exercisable at **December 31, 2023**, **December 31, 2024** have no intrinsic value and a weighted-average remaining contractual term of **1.691.20** years. Additional information with respect to options granted, vested and exercised during the years ended **December 31, 2023**, **December 31, 2024**, **2022**, **2023** and **2021**, **2022** follows (in thousands, except per share data):

	2023	2022	2021		2024	2023	2022
Weighted-average grant date fair value of stock options granted (per share)	NA	NA	NA	Weighted-average grant date fair value of stock options granted (per share)	NA	NA	NA
Aggregate grant date fair value of stock options vested during the year	\$ —	\$ —	\$ 89				
Aggregate intrinsic value of stock options exercised	\$ —	\$ 410	\$ —				

As of **December 31, 2023**, **December 31, 2024**, no options to purchase shares were outstanding and unvested.

**Restricted Stock Units (Equity Based)** — For all restricted stock unit awards made to date, shares of common stock are not issued until the units vest. Restricted stock units are subject to forfeiture for failure to fulfill service conditions and, in certain cases, performance conditions. Forfeitable dividend equivalents are accrued on certain restricted stock units that will be paid upon vesting. We use the straight-line method to recognize periodic compensation cost over the vesting period.

Restricted stock unit activity for the year ended **December 31, 2023**, **December 31, 2024** follows:

	Time Based	Performance Based	Weighted Average	
			Grant Date Fair Value Per Share	

Non-vested restricted stock units outstanding at beginning of year	3,090,846	359,315	\$	12.71
Granted	1,840,861	165,276	\$	11.60
Assumed <sup>(a)</sup>	7,438,031	—	\$	5.62
Vested	(6,379,970)	—	\$	5.95
Forfeited	(162,100)	(3,058)	\$	13.78
Non-vested restricted stock units outstanding at end of year	<u>5,827,668</u>	<u>521,533</u>	\$	<u>10.60</u>

(a)

	Time Based	Performance Based	Weighted Average Grant Date Fair Value Per Share
Non-vested restricted stock units outstanding at beginning of year	5,827,668	521,533	\$ 10.60
Granted	3,113,411	—	\$ 10.49
Vested	(3,245,228)	(45,661)	\$ 9.11
Forfeited	(268,194)	(23,358)	\$ 11.33
Non-vested restricted stock units outstanding at end of year	<u>5,427,657</u>	<u>452,514</u>	\$ 11.34

Awards assumed in connection with the NexTier merger. All of these assumed awards had been previously granted by NexTier under the NexTier Plan or the Former C&J Energy Plan, in periods prior to the NexTier merger.

As of **December 31, 2023** **December 31, 2024**, approximately **6.15.5** million non-vested restricted stock units outstanding are expected to vest. Additional information as of **December 31, 2023** **December 31, 2024** with respect to these non-vested restricted stock units follows (dollars in thousands):

Aggregate intrinsic value	\$	65,937
Weighted-average remaining vesting period		1.63 years
Unrecognized compensation cost	\$	51,434
Aggregate intrinsic value	\$	45,167
Weighted-average remaining vesting period		1.71 years
Unrecognized compensation cost	\$	42,828

F-31

**Restricted Stock Units (Liability Based)** — We converted NexTier's cash-settled performance based units into our cash-settled restricted stock units in connection with the NexTier merger. These awards are accounted for as liability classified awards and remeasured at fair value at each reporting period. Compensation expense is recorded over the vesting period and is initially based on the fair value at the award conversion date. Compensation expense is subsequently remeasured at each reporting date during the vesting period based on the change in our stock price. Dividend cash equivalents are not paid on cash-settled units. As of **December 31, 2023** **December 31, 2024**, **\$2.4** and **\$6.2 million** **are \$3.3 million** is included in "Accrued **Liabilities**" and "**Other Liabilities**" **liabilities**" in our consolidated balance sheets **respectively**, for these awards. We recognized **\$5.0 million** **\$0.6 million** of compensation expense for these awards during the year ended **December 31, 2023** **December 31, 2024**.

**Performance Unit Awards** — We have granted share-settled performance unit awards to certain employees (the "Performance Units") on an annual basis since 2010. The Performance Units provide for the recipients to receive shares of common stock upon the achievement of certain performance goals during a specified period established by the Compensation Committee. The performance period for the Performance Units is generally the three-year period commencing on April 1 of the year of **grant**, **grant**, **except as described below for the Performance Units granted in May 2024**.

The performance goals for the Performance Units are tied to our total shareholder return for the performance period as compared to total shareholder return for a peer group determined by the Compensation Committee. For the performance units granted in April **2021 and April 2022**, the peer group includes **three market indices and one market index**, **respectively**, **index**. The performance goals are considered to be market conditions under the relevant accounting standards and the market conditions were factored into the determination of the fair value of the respective Performance Units. **The For the Performance Units granted in April 2022 and May 2023**, the recipients will receive the target number of shares if our total shareholder return during the performance period, when compared to the peer group, is at the **55th 55th** percentile. If our total shareholder return during the performance period, when compared to the peer group, is at the **75th 75th** percentile or higher, then the recipients will receive two times the target number of shares. If our total shareholder return during the performance period, when compared to the peer group, is at the **25th 25th** percentile, then the recipients will only receive one-half of the target number

of shares. If our total shareholder return during the performance period, when compared to the peer group, is between the 25th 25<sup>th</sup> and 55th 55<sup>th</sup> percentile, or the 55th 55<sup>th</sup> and 75th 75<sup>th</sup> percentile, then the shares to be received by the recipients will be determined using linear interpolation for levels of achievement between these points.

The Performance Units granted in May 2024 (the "2024 Performance Units") are subject to three separate performance periods—a one-year performance period (the "First Performance Period"), a two-year performance period (the "Second Performance Period") and a three-year performance period (the "Third Performance Period"), each commencing on April 1, 2024. One-third of the total target number of shares subject to the 2024 Performance Units may become earned in respect of each performance period based on our total shareholder return during such performance period (the target number of shares eligible to vest in the applicable performance period, the "Performance Period Target Amount"). The recipients will earn the Performance Period Target Amount if our total shareholder return during the applicable performance period, when compared to the peer group, is at the 55th percentile. If our total shareholder return during the applicable performance period, when compared to the peer group, is at the 75th percentile or higher, then the recipients will earn two times the Performance Period Target Amount. If our total shareholder return during the applicable performance period, when compared to the peer group, is at the 25th percentile, then the recipients will only earn one-half of the Performance Period Target Amount. If our total shareholder return during the applicable performance period, when compared to the peer group, is between the 25th and 55th percentile, or the 55th and 75th percentile, then the shares to be earned by the recipients will be determined using linear interpolation for levels of achievement between these points. Notwithstanding the foregoing, a number of shares no greater than the Performance Period Target Amount may be earned for each of the First Performance Period and the Second Performance Period, unless our total shareholder return during the Third Performance Period is greater than our total shareholder return for, as applicable, the First Performance Period and/or the Second Performance Period, in which case, the number of shares earned in respect of the First Performance Period and/or the Second Performance Period, as applicable, will be determined as if our total shareholder return during the Third Performance Period was our total shareholder return during the First Performance Period and/or the Second Performance Period, as applicable. If our total shareholder return during the Third Performance Period is zero or negative, no more than the aggregate target number of shares subject to the 2024 Performance Units may be earned, regardless of results during the First Performance Period and the Second Performance Period. A full three-year service vesting period applies to the Performance Units and no shares will vest and be delivered in respect of the 2024 Performance Units until after the completion of the Third Performance Period.

The payout under the 2024 Performance Units may not exceed the target number of shares if our absolute total shareholder return is negative or zero.

The total target number of shares granted with respect to the Performance Units for the years 2018-2023 2019-2024 is set forth below:

	2023	2022	2021	2020	2019	2018
	Performance	Performance	Performance	Performance	Performance	Performance
	Unit Awards	Unit Awards	Unit Awards	Unit Awards	Unit Awards	Unit Awards
Target number of shares	631,700	414,000	843,000	500,500	489,800	310,700

In April 2021, 621,400 shares were issued to settle the 2018 Performance Units.

	2024	2023	2022	2021	2020	2019
	Performance	Performance	Performance	Performance	Performance	Performance
	Unit Awards	Unit Awards	Unit Awards	Unit Awards	Unit Awards	Unit Awards
Target number of shares	875,100	631,700	414,000	843,000	500,500	489,800

In April 2022, 979,600 shares were issued to settle the 2019 Performance Units. In May 2023, 1,001,000 shares were issued to settle the 2020 Performance Units. In May 2024, 718,581 shares were issued to settle the 2021 Performance Units. The Performance Units granted in 2021, 2022, 2023 and 2023 2024 have not reached the end of their respective performance periods.

Because the Performance Units are share-settled awards, they are accounted for as equity awards and measured at fair value on the date of grant using a Monte Carlo simulation model. The fair value of the Performance Units is set forth below (in thousands):

	2023	2022	2021	2020	2019	2018
	Performance	Performance	Performance	Performance	Performance	Performance
	Unit Awards	Unit Awards	Unit Awards	Unit Awards	Unit Awards	Unit Awards
Aggregate fair value at date of grant	\$ 8,440	\$ 10,743	\$ 7,225	\$ 826	\$ 9,958	\$ 8,004

	2024	2023	2022	2021	2020	2019
	Performance	Performance	Performance	Performance	Performance	Performance
	Unit Awards	Unit Awards	Unit Awards	Unit Awards	Unit Awards	Unit Awards
Aggregate fair value at date of grant	\$ 10,904	\$ 8,440	\$ 10,743	\$ 7,225	\$ 826	\$ 9,958

The weighted-average fair value calculations for performance units granted during the years ended December 31, 2023 December 31, 2024, 2022 2023 and 2021 2022 were based on the following weighted-average assumptions set forth below:

	2023	2022	2021
Risk-free interest rate <sup>(1)</sup>	3.6 %	2.9 %	0.4 %
Expected stock volatility <sup>(2)</sup>	72.1 %	86.5 %	83.2 %
Expected dividend yield <sup>(3)</sup>	3.0 %	1.0 %	1.3 %

Expected term (in years)	3	3	3
--------------------------	---	---	---

  

	2024	2023	2022
Risk-free interest rate <sup>(1)</sup>	4.6 %	3.6 %	2.9 %
Expected stock volatility <sup>(2)</sup>	56.9 %	72.1 %	86.5 %
Expected dividend yield <sup>(3)</sup>	2.9 %	3.0 %	1.0 %
Expected term (in years)	3	3	3

(1) The risk-free interest rate is based on U.S. Treasury securities for the expected term of the ~~performance units~~ **Performance Units**.

(2) Expected volatilities are based on the daily closing price of our stock based upon historical experience over a three-year period.

(3) Expected dividend yield is based on the annualized dividend in effect on the measurement date and the stock price on the grant date.

**F-32**

These fair value amounts are charged to expense on a straight-line basis over the performance period. Compensation expense associated with the Performance Units is set forth below (in thousands):

							2024	2023	2022	2021	2020
							Performance	Performance	Performance	Performance	Performance
							Unit Awards	Unit Awards	Unit Awards	Unit Awards	Unit Awards

As of ~~December 31, 2023~~ **December 31, 2024**, we had unrecognized compensation cost of ~~\$11.1 million~~ **\$12.8 million** related to our unvested Performance Units. The weighted-average remaining vesting period for these unvested Performance Units was ~~1.13~~ **1.04** years as of ~~December 31, 2023~~ **December 31, 2024**.

**Dividends on Equity Awards** — Dividend equivalents are paid or accrued on certain restricted stock units. These dividends are recognized as reductions of retained earnings for the portion of restricted stock units expected to vest.

**Phantom Units** — In May 2020, the Compensation Committee approved a grant of long-term performance-based phantom units to our Chief Executive Officer and President, William A. Hendricks, Jr. (the "Phantom Units"). The Phantom Units were granted outside of the 2014 Plan. Pursuant to this phantom unit grant, Mr. Hendricks could earn from ~~0% 0% to 200%~~ **200%** of a target award of 298,500 phantom units based on our achievement of the same performance conditions over the same performance period that applied to the Performance Units granted in April 2020. The Phantom Units settled in May 2023, with a cash payment of ~~\$7.4~~ **\$7.4** million.

### 13. Leases

#### ASC Topic 842 Leases

We have operating and finance leases primarily for office locations, including for both field locations and corporate offices, certain operating equipment, and light duty vehicles. The terms and conditions for these leases vary by the type of underlying asset.

During the third quarter of 2023, we acquired \$7.5 million \$7.5 million and \$19.1 million \$19.1 million of operating leases for operating locations, corporate offices, certain operating equipment and light duty vehicles primarily related to the Ulterra acquisition and NexTier merger, respectively.

We also acquired \$5.2 million \$5.2 million and \$50.7 million \$50.7 million of finance leases for light duty vehicles and certain operating equipment related to the Ulterra acquisition and NexTier merger, respectively.

Operating leases have remaining lease terms of approximately one month to ten years as of December 31, 2023 December 31, 2024, and finance leases have remaining lease terms of approximately one month to six years as of December 31, 2023 December 31, 2024.

Lease expense consisted of the following for the years ended December 31, 2024, 2023 2022 and 2021 2022 (in thousands):

	Year Ended December 31,		
	2023	2022	2021
Operating lease cost	\$ 10,073	\$ 5,664	\$ 4,984
Finance lease cost:			
Amortization of right-of-use assets	6,360	—	—
Interest on lease liabilities	1,395	—	—
Total finance lease cost	7,755	—	—
Short-term lease expense <sup>(1)</sup>	2,278	—	41
Total lease expense <sup>(2)</sup>	\$ 20,106	\$ 5,664	\$ 5,025

  

	Year Ended December 31,		
	2024	2023	2022
Operating lease cost	\$ 18,147	\$ 10,073	\$ 5,664
Finance lease cost:			
Amortization of right-of-use assets	21,394	6,360	—
Interest on lease liabilities	2,255	1,395	—
Total finance lease cost	23,649	7,755	—
Short-term lease expense <sup>(1)</sup>	360	2,278	—
Total lease expense <sup>(2)</sup>	\$ 42,156	\$ 20,106	\$ 5,664

<sup>(1)</sup> Short-term lease expense represents expense related to leases with a contract term of one year or less.

<sup>(2)</sup> Total Operating lease expense is recorded in operating costs for the respective segments and within "selling, "selling, general and administrative"administrative", amortization of right-of-use assets is recorded within "depreciation, depletion, amortization and impairment", and interest on lease liabilities is recorded within "interest expense" in our consolidated statements of operations.

The difference differences between the statutory U.S. federal income tax rate and the effective income tax rate for the years ended December 31, 2023 December 31, 2024, 2023 and 2022 and 2021 is are summarized as follows:

	2023	2022	2021
Statutory tax rate	21.0 %	21.0 %	21.0 %
State income taxes - net of the federal income tax benefit	3.2	3.0	3.0
State deferred tax remeasurement	(0.3)	9.4	(0.8)
Valuation allowance	(9.2)	(33.4)	(13.3)
U.S. impact of foreign operations	—	1.3	—
Acquisition related costs	1.1	—	—
Effect of foreign taxes	0.1	1.6	(0.1)
Non-deductible compensation	1.8	4.3	(0.3)
Share-based compensation	1.6	(1.9)	(0.3)
Non-deductible expenses	0.7	1.2	(0.2)
Other differences, net	(0.1)	1.4	(0.3)
Effective tax rate	<u>19.9 %</u>	<u>7.9 %</u>	<u>8.7 %</u>

	2024	2023	2022
Statutory tax rate	21.0 %	21.0 %	21.0 %
State income taxes - net of the federal income tax benefit	0.5	3.2	3.0
State deferred tax remeasurement	(0.7)	(0.3)	9.4
Goodwill impairment	(19.4)	—	—
Valuation allowance	(1.3)	(9.2)	(33.4)
U.S. impact of foreign operations	(0.2)	—	1.3
Acquisition related costs	—	1.1	—
Effect of foreign taxes	0.3	0.1	1.6
Non-deductible compensation	(0.7)	1.8	4.3
Share-based compensation	(0.3)	1.6	(1.9)
Non-deductible expenses	(0.7)	0.7	1.2
Other differences, net	0.5	(0.1)	1.4
Effective tax rate	<u>(1.0 %)</u>	<u>19.9 %</u>	<u>7.9 %</u>

Our effective income tax rate fluctuates based on, among other factors, changes in pre-tax income in countries with varying statutory tax rates, changes in valuation allowances, and the impacts of various other permanent adjustments.

The ability to recognize a portion impact of our U.S. federal and state net operating losses resulted in goodwill impairment that is not deductible for income tax had a significant impact through changes in valuation allowances, in on our effective tax rate for the year ended December 31, 2023 December 31, 2024. This benefit was partly offset by state and local income taxes and various other permanent adjustments.

The tax effect of temporary differences and tax attributes representing deferred tax assets and liabilities at December 31, 2023 December 31, 2024 and 2022 2023 are as follows (in thousands):

	2023	2022
Deferred tax assets:		
Net operating loss carryforwards	\$ 498,948	\$ 382,936
Tax credits	13,488	4,222
Expense associated with stock options and restricted stock	10,892	8,178
Workers' compensation allowance	7,024	15,770

Other deferred tax asset	69,480	25,020
	599,832	436,126
Less:		
Allowance to reduce deferred tax asset to expected realizable value	(75,250)	(91,685)
Total deferred tax assets	524,582	344,441
Deferred tax liabilities:		
Property and equipment basis difference	(729,376)	(355,129)
Other	(39,386)	(14,840)
Total deferred tax liabilities	(768,762)	(369,969)
Net deferred tax liability	\$ (244,180)	\$ (25,528)

	2024	2023
Deferred tax assets:		
Net operating loss carryforwards	\$ 406,876	\$ 498,948
Tax credits	17,254	13,488
Expense associated with stock options and restricted stock units	8,344	10,892
Workers' compensation allowance	9,437	7,024
Other deferred tax asset	79,132	69,480
	521,043	599,832
Less:		
Allowance to reduce deferred tax asset to expected realizable value	(86,693)	(75,250)
Total deferred tax assets	434,350	524,582
Deferred tax liabilities:		
Property and equipment basis difference	(654,541)	(729,376)
Other	(17,906)	(39,386)
Total deferred tax liabilities	(672,447)	(768,762)
Net deferred tax liability	\$ (238,097)	\$ (244,180)

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized, and when necessary, valuation allowances are provided. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. We assess the realizability of our deferred tax assets quarterly and consider carryback availability, the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. During 2023, 2024, we reduced/increased the valuation allowance against our net deferred tax assets by \$16.4 million, \$11.4 million, which primarily related to U.S. federal/state and state/foreign activity.

F-35

For income tax purposes, we had approximately \$1.9 billion/\$1.5 billion of gross U.S. federal net operating losses, approximately \$62.3 million/\$58.7 million of gross Canadian net operating losses, approximately \$22.6 million of gross Colombian net operating losses and approximately \$1.1 billion/\$910 million of post-apportionment U.S. state net operating losses as of December 31, 2023/December 31, 2024, before valuation allowances. The majority of the U.S. federal net operating losses will expire in varying amounts, if unused, between 2030 and 2037. U.S. federal net operating losses are generated after 2017 and can be carried forward indefinitely. Canadian net operating losses will expire in varying amounts, if unused, between 2036 and 2043. Colombian net operating losses will expire in varying amounts, if unused, between 2028 and 2032. 2044. U.S. state net operating losses will expire in varying amounts, if unused, between 2024/2025 and 2043.

2044.

As of December 31, 2023/December 31, 2024, we have not recognized any liabilities associated with unrecognized tax benefits. We have established a policy to account for interest and penalties related to uncertain income tax positions as operating expenses. As of December 31, 2023/December 31, 2024, the tax years ended December 31, 2010 through December 31, 2022/December 31, 2023 are open for examination by U.S. taxing authorities. As of December 31, 2023/December 31, 2024, the tax years ended December 31, 2015/December 31, 2017 through December 31, 2022/December 31, 2023 are open for examination by Canadian taxing authorities. As of December 31, 2023/December 31, 2024, the tax years ended December 31, 2017/December 31, 2018 through December 31, 2022/December 31, 2023 are open for examination by Colombian taxing authorities.

We continue to monitor income tax developments, including OECD Pillar 2 legislation, in the United States and other countries where we have legal entities. We will incorporate into our future financial statements the impacts, if any, of future regulations and additional authoritative guidance when finalized.

## 15. Earnings Per Share

We provide a dual presentation of our net income (loss) per common share in our consolidated statements of operations: basic net income (loss) per common share ("Basic EPS") and diluted net income (loss) per common share ("Diluted EPS").

Basic EPS excludes dilution and is determined by dividing the earnings attributable to common stockholders by the weighted average number of common shares outstanding during the period.

Diluted EPS is based on the weighted average number of common shares outstanding plus the dilutive effect of potential common shares, including stock options and non-vested performance units and **non-vested** restricted stock units. The dilutive effect of stock options, non-vested performance units and non-vested restricted stock units is determined using the treasury stock method.

The following table presents information necessary to calculate net income (loss) per share for the years ended **December 31, 2023**, **December 31, 2024**, **2022** and **2021**, as well as potentially dilutive securities excluded from the weighted average number of diluted common shares outstanding because their inclusion would have been anti-dilutive (in thousands, except per share amounts):

	2023	2022	2021
<b>BASIC EPS:</b>			
Net income (loss) from continuing operations attributable to common stockholders	\$ 246,292	\$ 154,658	\$ (657,079)
Net income from discontinued operations attributable to common stockholders	\$ —	\$ —	\$ 2,534
Net income (loss) attributable to common stockholders	\$ 246,292	\$ 154,658	\$ (654,545)
Weighted average number of common shares outstanding, excluding non-vested shares of restricted stock	279,501	215,935	195,021
Basic income (loss) from continuing operations per common share	\$ 0.88	\$ 0.72	\$ (3.37)
Basic income from discontinued operations per common share	\$ —	\$ —	\$ 0.01
Basic net income (loss) per common share	\$ 0.88	\$ 0.72	\$ (3.36)
<b>DILUTED EPS:</b>			
Net income (loss) from continuing operations attributable to common stockholders	\$ 246,292	\$ 154,658	\$ (657,079)

Diluted net income (loss) per common share	\$ 0.88	\$ 0.70	\$ (3.36)
Potentially dilutive securities excluded as anti-dilutive	9,214	3,541	9,551

F-36

	2024	2023	2022
<b>BASIC EPS:</b>			
Net income (loss) attributable to common stockholders	\$ (968,031)	\$ 246,292	\$ 154,658
Weighted average number of common shares outstanding, excluding non-vested restricted stock units	397,196	279,501	215,935
Basic net income (loss) per common share	\$ (2.44)	\$ 0.88	\$ 0.72
<b>DILUTED EPS:</b>			
Net income (loss) attributable to common stockholders	\$ (968,031)	\$ 246,292	\$ 154,658
Weighted average number of common shares outstanding, excluding non-vested restricted stock units	397,196	280,061	219,496
Diluted net income (loss) per common share	\$ (2.44)	\$ 0.88	\$ 0.70
Potentially dilutive securities excluded as anti-dilutive	7,674	9,214	3,541

## 16. Employee Benefits

We maintain a 401(k) plan for all eligible employees. Our operating results include expenses of approximately **\$18.7** \$34.6 million in 2024, \$18.7 million in 2023 **\$11.0** and \$11.0 million in 2022 and \$7.6 million in 2021 for our contributions to the plan.

## 17. Business Segments

Our Chief Operating Decision Maker (“CODM”) is our Chief Executive Officer, who has ultimate responsibility for enterprise decisions. Effective as of the third quarter of 2023, we revised our reportable segments to align with certain changes in how our

CODM manages and allocates resources to our business as a result of the Ulterra acquisition and NexTier merger. Accordingly, Our business is organized based on the services and products we now have the following reportable business provided in three segments: (i) drilling services, (ii) completion services, and (iii) drilling products. As a result of the revised reportable The CODM evaluates segment structure, we have restated the corresponding items of performance based primarily on segment information for all periods presented.

operating income (loss).

Drilling Services — represents our contract drilling, directional drilling, oilfield technology and electrical controls and automation businesses.

Completion Services — represents the combination of our well completion business, which includes hydraulic fracturing, wireline and pumping, completion support, cementing and our legacy pressure pumping business.

Drilling Products — represents our manufacturing and distribution of drill bits business, which was acquired with our acquisition of Ulterra on August 14, 2023.

Property and equipment, net and revenue Our results for the year ended December 31, 2024 are not comparable for our domestic Completion Services and international operations Drilling Products reportable segments since results for 2023 include a partial period beginning on the closing date for each acquisition.

#### Geographic Information

## 18. Fair Values of Financial Instruments

The carrying values of cash, and cash equivalents and restricted cash, trade receivables and accounts payable approximate fair value due to the short-term maturity of these items. These fair value estimates are considered Level 1 fair value estimates in the fair value hierarchy of fair value accounting.

The estimated fair value of our outstanding debt balances as of December 31, 2023 December 31, 2024 and 2022 2023 is set forth below (in thousands):

	December 31, 2023		December 31, 2022	
	Carrying	Fair	Carrying	Fair
	Value	Value	Value	Value
3.95% Senior Notes Due 2028	\$ 482,505	\$ 450,540	\$ 488,505	\$ 431,556
5.15% Senior Notes Due 2029	344,895	329,032	347,900	313,164
7.15% Senior Notes Due 2033	400,000	424,946	—	—
Equipment Loans Due 2025	18,686	18,766	—	—
Total debt	\$ 1,246,086	\$ 1,223,284	\$ 836,405	\$ 744,720

	2024		2023	
	Carrying	Fair	Carrying	Fair
	Value	Value	Value	Value
3.95% Senior Notes Due 2028	\$ 482,505	\$ 461,720	\$ 482,505	\$ 450,540
5.15% Senior Notes Due 2029	344,895	336,490	344,895	329,032
7.15% Senior Notes Due 2033	400,000	419,265	400,000	424,946
Equipment Loans Due 2025	6,395	6,424	18,686	18,766
Total debt	\$ 1,233,795	\$ 1,223,899	\$ 1,246,086	\$ 1,223,284

The fair values of the 2028 Notes, the 2029 Notes and the 2033 Notes at December 31, 2023 December 31, 2024 and December 31, 2022 2023 are based on quoted market prices, which are considered Level 1 fair value estimates in the fair value hierarchy of fair value accounting. The fair value of the Equipment Loans is based on 5.25%, a 5.25% stated rate of interest, which is considered a Level 2 fair value estimates estimate in the fair value hierarchy of fair value accounting.

The fair values of the 2028 Notes implied a 5.79% market rate rates of interest at December 31, 2023 and a 6.69% market rate of interest at December 31, 2022, based on their quoted market prices. The fair values of used to determine the 2029 Notes implied a 6.10% market rate of interest at December 31, 2023 and a 7.01% market rate of interest at December 31, 2022, based on their quoted market prices. The fair values of the 2033 Notes implied a 6.28% market rate of interest at December 31, 2023, based on their quoted market price. The fair value of the Equipment Loans implied a 5.36% market rate our outstanding debt balances as of interest at December 31, 2023, based on their benchmark yield.

December 31, 2024 and 2023 are set forth below:

F-39

	2024	2023
3.95% Senior Notes Due 2028	5.49 %	5.79 %
5.15% Senior Notes Due 2029	5.73 %	6.10 %
7.15% Senior Notes Due 2033	6.42 %	6.28 %
Equipment Loans Due 2025	5.28 %	5.36 %

10.8

NON-EMPLOYEE DIRECTOR  
RESTRICTED STOCK UNIT AWARD AGREEMENT

PATTERSON-UTI ENERGY, INC.  
2021 LONG-TERM INCENTIVE PLAN

As of February 21, 2024, THIS RESTRICTED STOCK UNIT AWARD AGREEMENT (the "Agreement") is between Patterson-UTI Energy, Inc., a Delaware corporation ("Patterson-UTI" (the "Company")), had one class of securities registered under Section 12 and \_\_\_\_\_ (the "Recipient") effective as of the Securities Exchange Act \_\_\_\_ day of 1934, \_\_\_\_\_, 20 \_\_\_\_ (the "Grant Date"), pursuant to the Patterson-UTI Energy, Inc. 2021 Long-Term Incentive Plan, as amended: amended from time to time (the "Plan"), which is incorporated by reference herein in its entirety.

WHEREAS, the Company desires to grant to the Recipient the restricted stock units specified herein (the "RSUs"), subject to the terms and conditions of this Agreement and the Plan; and

NOW, THEREFORE, in consideration of the premises, mutual covenants and agreements contained herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto, intending to be legally bound hereby, agree as follows:

1. **Definitions.** For purposes of this Agreement, the following terms shall have the meanings indicated:

- (a) "Forfeiture Restrictions" shall mean any prohibitions and restrictions set forth herein with respect to the sale or other disposition of RSUs issued to the Recipient hereunder and the obligation to forfeit and surrender such RSUs to the Company.
- (b) "Restricted Period" shall mean the period designated by the Company during which the RSUs are subject to Forfeiture Restrictions under this Agreement.

Capitalized terms not otherwise defined in this Agreement shall have the meanings given to such terms in the Plan.

- 2. **Grant of Restricted Stock Units.** Effective as of the Grant Date, the Company hereby grants to the Recipient pursuant to the terms and conditions of the Plan and this Agreement the following number of RSUs: \_\_\_\_\_. Each RSU represents the right to receive one share of the Company's common stock, \$0.01 par value \$0.01 per share ("common stock" "Common Stock") on the conditions set forth herein. During the Restricted Period, the RSUs will be evidenced by entries in a bookkeeping ledger account which reflect the number of RSUs credited under the Plan for the Recipient's benefit.
- 3. **Vesting and Settlement.** The RSUs that are granted hereby shall be subject to the Forfeiture Restrictions. The Restricted Period and all of the Forfeiture Restrictions on the RSUs shall lapse and the RSUs shall vest as follows (it being understood that the number of RSUs as to which all restrictions have lapsed and which have vested in the Recipient at any time shall be the greatest of the number of vested RSUs specified in subparagraph (a), (b), (c) or "shares"): (d) below:

The following summary

- (a) Subject to continued service as a Director through such date, the Recipient shall become 100% vested as to the RSUs on the first anniversary of our common stock and the Grant Date.
- (b) If the Recipient's service as a Director is terminated (including as a result of our restated certificate of incorporation and amended and restated bylaws does not purport a failure to be complete re-elected) before all of the RSUs have vested other than as a result of (i) removal for cause (as determined in the Board's sole discretion), or (ii) voluntary resignation or refusal to stand for re-election, except where such resignation or refusal to stand for re-election is (x) part of a Board-approved director succession plan, (y) pursuant to the Company's majority voting policy or (z) a result of physical disability, serious illness or injury that materially impairs her or his ability to continue as a Director, then the Recipient shall become vested in the number of RSUs equal to the product of (A) 100% of the RSUs that are granted hereby, multiplied by (B) a fraction, the numerator of which is the number of days in the period commencing on and including the Grant Date and ending on and including the date of the Recipient's termination of service, and the denominator of which is qualified 365.

- (c) If the Recipient's service as a Director is terminated before all of the RSUs have vested as a result of (i) removal for cause (as determined in the Board's sole discretion), or (ii) voluntary resignation or refusal to stand for re-election, where such resignation or refusal to stand for re-election is not (x) part of a Board-approved director succession plan, (y) pursuant to the Company's majority voting policy or (z) a result of physical disability, serious illness or injury that materially impairs her or his ability to continue as a Director, then any RSUs that have not vested shall be immediately forfeited and the Recipient shall cease to have any rights with respect to such forfeited RSUs.
- (d) Upon the occurrence of a Change of Control, the RSUs that have not vested as of the date of such Change of Control shall be 100% vested; *provided, however*, that this subparagraph (d) shall not apply if the Recipient is the Covered Person or forms part of the Covered Person for purposes of such Change of Control.

RSUs that do not become vested pursuant to subparagraphs (a), (b) or (d) above shall be forfeited and the Recipient shall cease to have any rights with respect to such forfeited RSUs.

On the date the RSUs granted hereunder become vested, the Recipient shall be entitled to receive one Share, which shall be delivered or transferred as soon as administratively practicable thereafter, in exchange for each vested RSU granted hereunder and after such delivery or transfer the Recipient shall have no further rights with respect to such RSU. The Company shall cause to be delivered or transferred to the Recipient (or the Recipient's legal representative or heir) a stock certificate representing those shares of the Common Stock issued in exchange for RSUs awarded hereby or shall cause the shares to be registered on the applicable stock transfer records in the Recipient's (or the Recipient's legal representative's or heir's) name, and such shares of the Common Stock shall be transferable by the Recipient (except to the extent that any proposed transfer would, in the opinion of counsel satisfactory to the Company, constitute a violation of applicable federal or state securities law).

4. **Dividend Equivalents.** During the Restricted Period, Dividend Equivalents with respect to the RSUs shall be accrued and credited, without interest, to a notional account and shall be subject to the same vesting and payment schedule as the underlying RSUs and payable in cash.
5. **Section 409A.** The RSUs granted hereby are subject to the payment timing and other restrictions set forth in Section 12.14 of the Plan.
6. **Transfer Restrictions.** The RSUs granted hereby may not be sold, assigned, pledged, exchanged, hypothecated or otherwise transferred, encumbered or disposed of to the extent then subject to the Forfeiture Restrictions. Any such attempted sale, assignment, pledge, exchange, hypothecation, transfer, encumbrance or disposition in violation of this Agreement shall be void and the Company shall not be bound thereby. Notwithstanding the foregoing, the Recipient may assign or transfer the RSUs granted hereby pursuant to a domestic relations order or with the consent of the Committee (i) for charitable donations; (ii) to the Recipient's spouse, children or grandchildren (including any adopted and stepchildren and grandchildren), or (iii) a trust for the benefit of the Recipient or the persons referred to in clause (ii) (each transferee thereof, a "Permitted Assignee"); *provided* that such Permitted Assignee shall be bound by and subject to all of the terms and conditions of the Plan and this Award Agreement and shall execute an agreement satisfactory to the Company evidencing such obligations, relating to the RSUs; and *provided further* that the Recipient shall remain bound by the terms and conditions of the Plan. Further, any Shares delivered upon the vesting of the RSUs awarded hereunder may not be sold or otherwise disposed of in any manner which would constitute a violation of any applicable federal or state securities laws, and the Recipient agrees (y) that the Company may refuse to cause the transfer of such shares to be registered on the applicable stock transfer records if such proposed transfer would, in the opinion of counsel satisfactory to the Company, constitute a violation of any applicable securities law, and (z) that the Company may give related instructions to the transfer agent, if any, to stop registration of the transfer of such shares. The Recipient acknowledges and agrees that the Company may provide Recipient information to a brokerage firm specified by the Company, which information would allow the brokerage firm to open an account in the name of the Recipient for the purpose of holding the RSUs and receiving any Shares upon the vesting of the RSUs.
7. **Capital Adjustments and Reorganizations.** The existence of the RSUs shall not affect in any way the right or power of the Company or any company the stock of which is awarded pursuant to this Agreement to make or authorize any adjustment, recapitalization, reorganization, joint venture, subsidiary or division

-2-

sale, or other change in its capital structure or its business, engage in any merger or consolidation, issue any debt or equity securities, dissolve or liquidate, or sell, lease, exchange or otherwise dispose of all or any part of its assets or business, or engage in any other corporate act or proceeding.

8. **No Fractional Shares.** All provisions of this Agreement concern whole Shares. Notwithstanding anything contained in this Agreement to the contrary, if the application of any provision of this Agreement would yield a fractional share, such fractional share shall be rounded down to the next whole Share.
9. **No Obligation to Retain Services.** This Agreement is not a services or employment agreement, and no provision of this Agreement shall be construed or interpreted to guarantee the Recipient the right to remain a Director for any specified term.
10. **Amendment and Waiver.** Except as otherwise provided in Section 11.1 of the Plan, this Agreement may be amended, modified or superseded only by written instrument executed by the Company and the Recipient. Only a written instrument executed and delivered by the party waiving compliance hereof shall make any waiver of the terms or conditions effective. Any waiver granted by the Company shall be effective only if executed and delivered by a duly authorized executive officer of the Company. The failure of any party at any time or times to require performance of any provisions hereof shall in no manner affect the right to enforce the same. No waiver by any party of any term or condition, or of any breach of any term or condition, contained in this Agreement, in one or more instances, shall be construed as a continuing waiver of any such condition or breach, a waiver of any other term or condition, or a waiver of any breach of any other term or condition.
11. **Governing Law and Severability.** This Agreement and all determinations made and actions taken hereunder, to the extent not otherwise governed by the Code or the laws of the United States, shall be governed by the laws of the State of Delaware without reference to principles of conflict of laws, and construed accordingly. The invalidity of any provision of this Agreement shall not affect any other provision of this Agreement, which shall remain in full force and effect.
12. **Successors and Assigns.** Subject to the limitations which this Agreement imposes upon the transferability of the RSUs granted hereby, this Agreement shall bind, be enforceable by and inure to the benefit of the Company and its successors and assigns, and to the Recipient and the Recipient's Permitted Assignees, executors, administrators, agents, legal and personal representatives.
13. **Counterparts.** This Agreement may be executed in two or more counterparts, each of which shall be an original for all purposes but all of which taken together shall constitute but one and the same instrument.
14. **Grant Subject to Terms of Plan and this Agreement.** The Recipient acknowledges and agrees that the grant of the RSUs hereunder is made pursuant to and governed by the terms of the Plan and this Agreement, ratifies and consents to any action taken by the Company, the Board or the Committee concerning the Plan and agrees that the grant of the RSUs pursuant to this Agreement is subject in all respects to the more detailed provisions of the Plan.

[SIGNATURES BEGIN ON FOLLOWING PAGE]

-3-

IN WITNESS WHEREOF, the Company has caused this Agreement to be duly executed by an officer thereunto duly authorized, and the Recipient has executed this Agreement, all effective as of the date first above written.

## AMENDMENT NO. 1 TO REIMBURSEMENT AGREEMENT

AMENDMENT NO. 1, dated as of October 16, 2024 (this "Amendment"), to the Reimbursement Agreement, dated as of March 16, 2015 (as amended, restated, supplemented, or otherwise modified, the "Reimbursement Agreement"), between Patterson-UTI Energy, Inc. (the "Applicant") and The Bank of Nova Scotia (the "Bank"). Capitalized terms used and not otherwise defined in this Amendment shall have the meanings assigned to such terms in the Reimbursement Agreement.

### RECITALS

WHEREAS, the Applicant and the Bank desire to amend the Reimbursement Agreement on the terms and subject to the conditions set forth in this Amendment;

NOW THEREFORE, in consideration of the premises and the agreements contained herein, the parties hereby agree as follows:

1. **Amendments to Reimbursement Agreement.** The Reimbursement Agreement is hereby amended as follows:

- (a) Section 3 of the Reimbursement Agreement is hereby deleted in its entirety and replaced by the following:

The Applicant authorizes and directs the Bank to pay any Drawing on demand and in such currency as the Bank may determine to be appropriate, all commission in respect of each Credit (so long as the Bank shall be contingently obligated under such Credit) and fees and charges for issuing or amending such a Credit computed and payable at such time and at such rates as and in accordance with the Bank's prevailing practice and all other reasonable expenses which the Bank may incur in connection with each Credit including, without limitation, charges and expenses of other banks or other parties paid or to be paid by the Bank on behalf of the Applicant. Such payment by the Bank shall be made without reference to or confirmation of the Applicant. Moreover, the Applicant will pay to the Bank interest on all amounts not paid by the Applicant on the date of demand or when otherwise due at the reference rate of interest then in effect in the relevant currency and location, being the Prime Rate *plus* 2.0% per annum, calculated daily and payable monthly not in advance on the basis of a calendar year for the actual number of days elapsed, with interest on overdue interest at the same rate as on the principal.

"Prime Rate" means the rate of interest per annum last quoted by The Wall Street Journal as the "Prime Rate" in the United States or, if The Wall Street Journal ceases to quote such rate, the highest per annum interest rate published by the Federal Reserve Board in Federal Reserve Statistical Release H.15 (519) (Selected Interest Rates) as the "bank prime loan" rate or, if such rate is no longer quoted therein, any similar rate quoted therein (as determined by the Bank) or any similar release by the Federal Reserve Board (as determined by the Bank).

- (b) A new Section 17 is hereby added as follows:

**"Governing Law; Jurisdiction; Waivers.** This Agreement shall be governed by, and construed in accordance with, the law of the State of New York.

THE APPLICANT AND THE BANK IRREVOCABLY AGREE THAT ANY ACTION OR PROCEEDING ARISING OUT OF THIS AGREEMENT SHALL BE BROUGHT IN THE COURTS OF THE STATE OF NEW YORK OR THE COURTS OF THE UNITED STATES OF AMERICA FOR THE SOUTHERN DISTRICT OF NEW YORK, AND EACH PARTY HEREBY IRREVOCABLY WAIVES ANY OBJECTION, INCLUDING, WITHOUT LIMITATION, ANY OBJECTION TO THE LAYING OF VENUE OR BASED ON THE GROUNDS OF FORUM NON CONVENIENS, WHICH IT MAY NOW OR HEREAFTER HAVE TO THE BRINGING OF ANY SUCH ACTION OR PROCEEDING IN SUCH

RESPECTIVE JURISDICTIONS. Nothing in this Agreement will affect the right of any party hereto to serve process in any other manner permitted by applicable law.

EACH PARTY HERETO HEREBY IRREVOCABLY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN ANY LEGAL PROCEEDING DIRECTLY OR INDIRECTLY ARISING OUT OF OR RELATING TO THIS AGREEMENT, ANY CREDIT, OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY (WHETHER BASED ON CONTRACT, TORT OR ANY OTHER THEORY)."

2. **Representations and Warranties.** The Applicant hereby represents and warrants to the Bank that (i) this Amendment has been duly executed and delivered by the Applicant and constitutes a legal, valid, and binding obligation of the Applicant, enforceable against it in accordance with its terms, (ii) the representations and warranties of the Applicant set forth in the Reimbursement Agreement (as amended by this Amendment) or in any other Loan Document are true and correct in all material respects on and as of the date hereof with the same effect as if made on the date hereof, except for those which expressly relate to an earlier date, in which case, they were true and correct in all material respects as of such earlier date, and (iii) on and as of the Amendment Effective Date, no Default or Event of Default has occurred and is continuing.

3. Conditions to Effectiveness. This Amendment shall become effective on the date on which the Bank shall have received (such date, the "Amendment Effective Date"):
- (a) Duly executed counterparts of this Amendment that, when taken together, bear the authorized signatures of the Applicant and the Bank; and
  - (b) Such other documents, instruments, opinions, certifications, undertakings, further assurances, and other matters as the Bank shall reasonably request in connection with this Amendment.
4. Effect of this Amendment. Except as specifically stated herein, all terms and conditions of the Reimbursement Agreement shall remain in full force and effect and are hereby in all respects ratified and confirmed. All references in the Reimbursement Agreement to "hereunder", "hereof", "herein", or words of like import, and all references to the "Reimbursement Agreement" in any other document or instrument, shall be deemed to mean the Reimbursement Agreement, as amended by this Amendment. This Amendment shall not constitute a novation of the Reimbursement Agreement, but shall constitute an amendment thereto. The parties hereto agree to be bound by the terms and obligations of the Reimbursement Agreement, as amended by this Amendment, as though the terms and obligations of the Reimbursement Agreement were set forth herein. Nothing herein shall be deemed to entitle the Applicant to a consent to, or a waiver, amendment, modification or other change of, any of the terms, conditions, obligations, covenants, or agreements contained in the Reimbursement Agreement, as amended hereby, in similar or different circumstances.
5. Counterparts. This Amendment may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Delivery by facsimile or electronic transmission of an executed counterpart of a signature page to this Amendment shall be effective as delivery of an original executed counterpart of this Amendment.
6. Successors and Assigns. This Amendment shall be binding upon and inure to the benefit of the Applicant and the Bank, and their respective successors and permitted assigns, and no other party shall derive any rights or benefits herefrom.
7. Severability. Should any one or more of the provisions of this Amendment be determined to be invalid, illegal or unenforceable as to one or more of the parties hereto, all other provisions nevertheless shall remain effective and binding on the parties hereto.
- 

8. Governing Law. THIS AMENDMENT SHALL BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAW OF THE STATE OF NEW YORK.
9. Construction. This Amendment and all other agreements and documents executed in connection herewith have been prepared through the joint efforts of all of the parties hereto. Neither the provisions of this Amendment or any such other agreements and documents nor any alleged ambiguity shall be interpreted or resolved against any party hereto on the ground that such party's counsel drafted this Amendment or such other agreements and documents, or based on any other rule of strict construction. Each party hereto represents and declares that such party has carefully read this Amendment and all other agreements and documents executed in connection herewith and therewith, and that such party knows the contents thereof and signs the same freely and voluntarily. The parties hereby acknowledge that they have been represented by legal counsel of their own choosing in negotiations for and preparation of this Amendment and all other agreements and documents executed in connection therewith and that each of them has read the same and had their contents fully explained by such counsel and is fully aware of their contents and legal effect.

[Remainder of Page Intentionally Left Blank; Signature Page Follows]

---

IN WITNESS WHEREOF, the parties hereto have caused a counterpart of this Amendment to be duly executed and delivered as of the date first above written.

Patterson-UTI Energy, Inc., as the Applicant

THE BANK OF NOVA SCOTIA, as the Bank

By: /s/ Joe Lattanzi

Name: Joe Lattanzi

Title: Managing Director

Exhibit 19.1

## INSIDER TRADING COMPLIANCE POLICY

### 1 Introduction

In the course of business, you may learn confidential information concerning Patterson-UTI Energy, Inc. (together with its subsidiaries, the "**Company**") or other publicly traded companies with which the Company does business. Federal and state laws prohibit buying, selling or making other transfers of securities by persons who are aware of material nonpublic information concerning a company or its securities. These laws also prohibit persons with such information from passing it on to others who may trade on the basis of such information.

In light of these prohibitions, the Company has adopted the following policy (this "**Policy**") regarding trading in securities by its directors, officers, employees and consultants. You are responsible for not violating federal or state securities laws or this Policy. Violations of insider trading laws will expose the individuals involved to disciplinary action (including, but not limited to, termination of service or employment with the Company), as well as potential civil or criminal liability.

This Policy also applies to your family members who reside with you (including a spouse, a child, a child away at college, stepchildren, grandchildren, parents, stepparents, grandparents, siblings and in-laws), anyone else who lives in your household (other than household employees), and any family members who do not live in your household but whose transactions in Company securities are directed by you or are subject to your influence or control, such as parents or children who consult with you before they trade in Company securities (collectively referred to as "**Family Members**"). This Policy also applies to corporations or other business entities controlled, influenced or managed by you and your Family Members, and trusts for which you are the trustee or have a beneficial or pecuniary interest (collectively referred to as "**Controlled Entities**"). Unless otherwise indicated, all references to "**you**" in this Policy should be read to include all of your Family Members and Controlled Entities.

The Securities and Exchange Commission ("**SEC**"), Nasdaq and state regulators (as well as the N.Y. Attorney General and the Department of Justice) are very effective at detecting and pursuing insider trading cases. The SEC has successfully prosecuted cases against employees trading through foreign accounts, trading by Family Members and friends or Controlled Entities, and trading involving only a small number of shares.

There is no prosecution threshold for insider trading cases. For individuals who trade on material nonpublic information (or tip information to others), possible penalties include:

1. A civil penalty of disgorgement, or return, of profit gained or loss avoided, plus a fine of up to three times the profit gained or loss avoided;
2. Criminal fines (no matter how small the profit) of up to \$5 million; and
3. A jail term of up to twenty years.

In addition, if you are director, executive officer or other designated officer or employee of the Company (as notified by the Company), you must also comply with additional restrictions set forth in the Insider Trading Compliance Memorandum (the "**Compliance Memorandum**") when trading in the Company's securities. The Compliance Memorandum, among other things, may restrict you from trading in the Company's securities during certain designated periods each quarter and require you to preclear your transactions with the Company's Chief Financial Officer or General Counsel. If you are subject to those additional restrictions, the Compliance Memorandum will have been provided to you separately.

Employees not otherwise subject to the Compliance Memorandum who are proposing to enter into 10b5-1 plans must be aware of and comply with the **"Restrictions on Trading - Rule 10b5-1 Trading Plans"**

section of the Compliance Memorandum, which, among other things, requires review and approval by the Legal Department of any 10b5-1 trading plan prior to its adoption.

If you have any questions regarding this Policy or the Compliance Memorandum, please contact the Chief Financial Officer or General Counsel.

## 2 **Policy**

- A. No "Insider Trading".** You may not trade (directly or indirectly, through Family Members or Controlled Entities) in the stock or other securities of the Company or its Business Partners (as defined below) when you are aware of material nonpublic information concerning the Company or its securities or concerning Business Partners or their securities. This policy against "insider trading" includes trading in Company securities or engaging in transactions in other third party derivative securities with respect to such Company securities. For purposes of this Policy, references to "trading" and "transactions" in Company securities include, among other things: purchases and sales of Company securities in public markets; sales of Company securities obtained through the exercise of employee stock options granted by the Company, including broker-assisted cashless exercise (e.g., the broker sells some or all of the shares underlying the option on the open market); making gifts of Company securities (including charitable donations); or using Company securities to secure a loan. Conversely, references to "trading" and "transactions" do not include: the vesting of Company stock options, restricted stock or restricted stock units; or the withholding of shares to satisfy a tax withholding obligation upon the vesting of restricted stock or restricted stock units. Further, transactions in mutual funds that are invested in Company securities are not transactions subject to this Policy as long as (a) you or your Family Member or any applicable law Controlled Entity does not control the investment decisions on individual stocks within the fund or portfolio and (2) Company securities do not represent a substantial portion of the assets of the fund or portfolio.

This policy also applies to trading or engaging in transactions with respect to the securities of other companies (a) with which the Company has a business relationship, such as customers, suppliers, or joint venture partners, or (b) that are involved in a potential transaction or business relationship with the Company (together, "Business Partners") when you are aware of material nonpublic information relating to those companies as a result of your employment or service on behalf of the Company. The SEC and federal prosecutors may presume that trading by Family Members or Controlled Entities is based on information you supplied and may treat any such transactions as if you had traded yourself. There is no exception for small transactions or transactions that may seem necessary or justifiable for independent reasons, such as the need to raise money for an emergency expenditure. You are responsible for ensuring that your Family Members and Controlled Entities comply with this Policy. You should also be aware that insider trading could include situations where, among other things, you trade in securities of other companies (e.g., competitors) that are economically linked to the Company based on your awareness of material nonpublic information concerning the Company or its securities.

- B. No "Tipping".** You, your Family Members and Controlled Entities may not convey material nonpublic information concerning the Company or another company to others, or suggest that anyone purchase or sell any company's securities while you are aware of material nonpublic information concerning that company or that company's securities. This practice, known as "tipping", also violates the securities laws and can result in the same civil and criminal penalties that apply if you engage in insider trading directly, even if you do not receive any money or derive any benefit from trades made by persons to whom you passed material nonpublic information. Persons with whom you have a history, pattern or practice of sharing confidences—such as Family Members, close friends and financial and personal counselors—may be presumed to act on the basis of information known to you; therefore, special care should be taken so that material nonpublic information is not disclosed to such persons. To avoid even the appearance of impropriety, you should at all times refrain from providing advice or making recommendations regarding the purchase or sale of securities of the Company or of Business Partners of which you have nonpublic information as a result of your employment or association with the Company.

- C. Maintaining Confidentiality.** You should avoid communicating nonpublic information concerning the Company or its Business Partners to any person (including Family Members and friends) except Company personnel who have a legitimate business need for the information. Nonpublic information regarding the Company or its Business Partners should not be disclosed to persons outside the Company unless you are specifically authorized to disclose such information and the person receiving the information has agreed, in writing, if appropriate, to keep the information confidential. This policy applies without regard to the materiality of the information. Consistent with the foregoing, you should be discreet with nonpublic information and refrain from discussing it in public places where it can be overheard, such as elevators and other public spaces in the Company's offices, restaurants, taxis and airplanes. Likewise, you should take care to protect sensitive information from access by unauthorized persons, for example, by allowing sensitive information displayed on a laptop computer to be viewed by someone sitting next to you on an airplane.
- D. Post Termination.** This Policy continues to apply to your transactions in Company securities even after you have terminated employment or other services to the Company. If you are aware of material nonpublic information concerning the Company or its securities when your employment or service relationship terminates, you may not transact or trade in Company securities until that information has become public or is no longer material.
- E. Company Transactions.** From time to time, the Company may engage in transactions in its own securities. It is the Company's policy to comply with all applicable securities and state laws (including appropriate approvals by the Board of Directors or appropriate committee, if required) when engaging in transactions in Company securities (and, for transactions under the Company's equity-compensation plans, in accordance with the terms of such plans).

### 3 **Materiality and Public Knowledge of Information**

In applying the policies described above, it is important to determine whether information is material nonpublic information.

- A. Material Information.** Information is considered material if:

- there is a substantial likelihood that a reasonable investor would consider the information important in deciding whether to buy, hold, or sell the securities in question; or
- the information, if disclosed, could be viewed by a reasonable investor as having significantly altered the total mix of information available.

Material information may be good or bad news. Chances are, if a person learns something that leads that person to want to buy or sell securities, the information will be considered material. Thus, even speculative information can be material, and information may be material even if that information alone would not determine an investor's decision to buy, sell or hold. Furthermore, the SEC takes the view that the mere fact that a person knows the information is enough to bar him or her from trading, even if the reasons for the potential trade are not based on that information.

By way of example, the following information is often deemed material:

- annual or quarterly financial results for the entire company or a material business segment of the company (or even monthly results under certain circumstances, including in particular when they would indicate a material departure from market expectations);
  - extraordinary borrowing or liquidity problems;
  - changes in control;
  - unexpected or unusual gains or losses in major operations;
- 
- negotiations and agreements regarding acquisitions, divestitures, business combinations or tender offers;
  - the institution of, or developments in, significant pending, threatened or actual litigation, investigations, or regulatory actions and proceedings, or strategies with respect to the foregoing;
  - internal earnings or other financial estimates or forecasts, especially if significantly different from "street" estimates, and other confidential financial information, including changes in dividend policy;
  - significant operational information, including results of drilling or pressure pumping activity, changes in price, customers, suppliers, or contracts or changes in management, directors, or auditors;

- the declaration of a stock split or the proposed or contemplated issuance, redemption, or repurchase of securities (including the establishment of a repurchase program for Company securities);
- material defaults under agreements or actions by creditors, clients, or suppliers relating to a company's credit rating;
- marketing changes;
- the interruption of production or other aspects of a company's business as a result of an accident, fire, natural disaster, or breakdown of labor negotiations or any major shut-down;
- labor negotiations;
- major environmental incidents; and
- significant actual or potential cybersecurity incidents, events or risks that affect the Company or third-party providers that support the Company's business operations, including computer system or network compromises, viruses or other destructive software, and data breach incidents that may disclose personal, business or other confidential information.

This list of examples is not intended to be exhaustive, and other types of information may also be material. Federal, state and Nasdaq investigators will scrutinize a questionable trade after the fact with the benefit of hindsight, so you should consider erring on the side of deciding that the information is material and not trade. If you have questions regarding specific transactions, please contact the Legal Department.

**B. Nonpublic Information.** Information is considered public only after it has been effectively disclosed in a manner sufficient to ensure that it is available to the investing public and enough time has elapsed to permit the investment market to absorb and evaluate the information. Selective disclosure to a few persons does not make information public. The Company generally discloses material information to the public in the form of press releases distributed through the major wire services or in filings made with the SEC.

When material information has been publicly disclosed, you should continue to refrain from buying or selling the securities in question until the information has been adequately disseminated to the public so that investors have had the opportunity to evaluate the information. Therefore, you should not enter into a trade immediately after the Company has made a public announcement of material information. The appropriate period between an announcement and a subsequent trade depends on the nature of the information disclosed. Generally, information regarding relatively simple matters will be deemed for purposes of this Policy to have been adequately disseminated to and absorbed by the market after two full

trading days after the time of its release in a Regulation FD-compliant manner. For example, if an announcement is made on a Monday after the securities markets have closed, trading is not permitted until Thursday morning. When more complex matters, such as a prospective major acquisition or disposition, are announced, it may be necessary to allow additional time for the information to be absorbed by investors. If you have any question whether sufficient time has passed since an announcement by the Company, you should contact the Legal Department for guidance.

**Exhibit 19.2**

## INSIDER TRADING COMPLIANCE MEMORANDUM

**MEMORANDUM FOR:** All directors and executive officers of Patterson-UTI Energy, Inc. and other designated officers and employees of Patterson-UTI Energy, Inc. and its subsidiaries

**FROM:** Patterson-UTI Energy, Inc.  
Legal Department

Federal insider trading laws and regulations generally prohibit any director, officer or employee of Patterson-UTI Energy, Inc. (the "Company") or any of its subsidiaries who are aware of material nonpublic information (as defined in the Insider Trading Compliance Policy and Part VII of this memorandum) concerning the Company or its securities from trading in Company securities or passing on such information to others who may trade in Company securities on the basis of such information. Substantial civil and criminal legal penalties can be imposed for violation of these laws. For purposes of the insider trading laws, Company securities include options and include direct holdings as well as indirect holdings, such as holdings through employee benefit plans. References to information about the Company include information about its subsidiaries.

The Company's Insider Trading Compliance Policy establishes the policy applicable to all directors, officers, employees and consultants of the Company, and persons related to its directors, officers, employees and consultants, prohibiting trading on material nonpublic information about the Company and Company securities. The Insider Trading Compliance Policy also applies to trading or engaging in transactions with respect to the securities of other companies (a) with which the Company has a business relationship, such as customers, suppliers, or joint venture partners, or (b) that are involved in a potential transaction or business relationship with the Company (together, "Business Partners") when you are aware of material nonpublic information about such other companies as a result of your employment or service on behalf of the Company. The policies described in this memorandum are complementary to that broad prohibition and apply to all Company directors and executive officers and to **our restated certificate** other designated officers and employees of **incorporation** the Company and **amended** its subsidiaries who have been designated based on their regular access to internal Company financial and **restated bylaws**. References other material information as well as their Family Members and Controlled Entities (as defined in the Insider Trading Policy). The Advance Notification Group (as defined in Part V of this Memorandum) is also subject to **"we," "our" and "us"** procedures for advance notification of proposed transactions as set forth in Part V.

Recipients of this memorandum who are directors or Section 16 reporting officers should also refer to **Patterson-UTI, unless** a separate memorandum entitled "U.S. Federal Securities Law Considerations" covering matters under Section 16 and Rule 144.

## **I. Restrictions on Trading**

**General Policy.** It is the **context** policy of the Company that if you possess material nonpublic information concerning the Company or its securities, *then neither you nor your Family Members or Controlled Entities* ( may trade (including gift) Company securities or pass on such information to others. As noted above, this policy also extends to trading in securities of Business Partners when you are aware of material nonpublic information relating to those companies as a result of your employment or service on behalf of the Company. Please see the Insider Trading Policy for more information.

**Quarterly Blackout Periods.** Persons covered by this memorandum must refrain from trading in Company securities during the quarterly blackout period commencing on the twentieth day of the last month of each fiscal quarter and extending until the completion of two full trading days from the release of the Company's quarterly or annual financial results in a Form 10-Q or Form 10-K for the prior fiscal period. A "no trade" period will, therefore, begin on each of December 20, March 20, June 20 and September 20. If, for example, a Form 10-Q or Form 10-K is filed after the market closes on a Monday and before the market opens on a Tuesday, the "no-trade" period will extend through the Tuesday and Wednesday trading days, and transactions could again occur on Thursday. Even if a "no trade" period is not in effect, persons covered by this memorandum (including their Family

---

Members and Controlled Entities) must refrain from trading the Company's securities if they are aware of material nonpublic information concerning the Company or its securities.

**Additional Restrictions in Specific Circumstances.** From time to time, the Company may recommend, or require, that directors, officers, selected employees and others (including their Family Members and Controlled Entities) refrain from trading because of developments known to the Company and not yet disclosed to the public. In such a case, the persons so advised should not trade Company securities until advised that the restriction has been terminated and should not disclose to others inside or outside of the Company the fact that the Company has imposed a trading restriction.

Directors and officers of a public company are prohibited from purchasing, selling or otherwise **requires**. References acquiring equity securities of that company during specified pension fund blackout periods if the director or officer acquires the equity securities in connection with service or employment. If circumstances ever arise necessitating imposition of a pension fund blackout period that triggers such a trading prohibition, directors and officers subject to **"stockholders" refer** it will be notified.

**No Safe Harbor.** The existence of blackout periods and situation-specific trading restrictions should not be considered a safe harbor for trading during other periods, and all directors, officers and other employees should use good judgment at all times. For example, occasions may arise when individuals covered by this memorandum become aware prior to **holders** the beginning of **our common** the quarterly blackout period that earnings for that quarter are likely to exceed, or fall below, market expectations to an extent that is material. In such a case, those individuals should refrain from trading even prior to the normal commencement of the quarterly blackout period.

**Rule 10b5-1 Trading Plans.** SEC Rule 10b5-1 provides generally that a purchase or sale is "on the basis of" material nonpublic information if the person engaging in the transaction is aware of the material nonpublic information when the person makes the purchase or sale. In addition, the rule creates an exception to this general rule that is available if the person demonstrates that, before becoming aware of any material nonpublic information, the person had entered into a binding contract to purchase or sell the security, had instructed another person to purchase or sell the security for the instructing person's account, or had adopted a written plan for trading securities, and (in each case) the contract, instruction or plan meets certain requirements. The contract, instruction or plan must also be entered into in good faith and without

any purpose of evading the prohibitions of the SEC's rules, and persons utilizing such a contract, instruction or plan must have acted in good faith with respect to the contract, instruction or plan. (In some circumstances, terminating or modifying a contract, instruction or plan that is in place could call into question whether it was entered into in good faith.) If adopted by a director or Section 16 reporting officer (or their Family Members or Controlled Entities), any such contract, instruction or plan must include a representation by the adopting person that such person is not aware of any material nonpublic information and is adopting the contract, instruction or plan in good faith and without any purpose of evading the prohibitions of the SEC's rules.

Persons subject to the Insider Trading Compliance Policy may enter into such a plan (a "10b5-1 trading plan"), in which case restrictions on trading otherwise applicable under this memorandum will not apply to the extent transactions are executed in compliance with the plan and applicable law. A 10b5-1 trading plan may not be entered into at a time when the person entering into it is aware of material nonpublic information and may not be entered into during a quarterly blackout period. The 10b5-1 trading plan must be reviewed and approved by the Legal Department prior to its adoption. If you wish to implement a 10b5-1 trading plan, you must first pre-clear the plan with the Legal Department prior to the entry into the plan in accordance with the procedures set forth in Part V of this memorandum. SEC rules provide for a "cooling-off" period before trading takes place under a 10b5-1 trading plan. For directors and officers (and their Family Members and Controlled Entities), trading cannot begin until the later of: (a) 90 days after the adoption of the 10b5-1 trading plan; or (b) two business days following the disclosure of the Company's financial results in a Form 10-Q or 10-K for the fiscal quarter in which the 10b5-1 trading plan was adopted (although in no event will such cooling-off period exceed 120 days). The cooling-off period is 30 days after adoption of the 10b5-1 trading plan for all other persons (other than the Company).

- 2 -

With certain exceptions, which may be discussed with legal counsel, SEC rules also provide for restrictions on entering into multiple overlapping 10b5-1 trading plans effecting trades at the same time. SEC rules also prohibit you from entering into more than one 10b5-1 trading plan designed to effect the open-market purchase or sale of the total amount of securities as a single transaction during any rolling 12-month period. A single-transaction plan is "designed to effect" the purchase or sale of securities as a single transaction when the terms of the plan would, for practical purposes, directly or indirectly require execution in a single transaction. A 10b5-1 trading plan that authorizes an agent to sell only such securities as are necessary to satisfy tax withholding obligations arising exclusively from the vesting of a compensatory award, such as restricted stock, unless restricted stock units or stock appreciation rights (but not options), and over which you do not otherwise exercise control over the context otherwise requires.

#### General

Patterson-UTI's restated certificate of incorporation authorizes Patterson-UTI such sales (an "eligible STC 10b5-1 trading plan"), is not subject to issue 801,000,000 shares the limitations set forth in this paragraph. Prior to adoption, an eligible STC 10b5-1 trading plan must meet all other requirements set forth in this memorandum. The SEC rules governing 10b5-1 trading plans are complex, and the compliance of capital stock, consisting any 10b5-1 trading plan with the applicable SEC rules is the responsibility of (i) 800,000,000 shares the person entering into such plan. You are advised to consult with legal counsel if you choose to enter into a 10b5-1 trading plan. In addition, it is the Company's policy that 10b5-1 trading plans are subject to the advance notification procedures described in Part V of common stock this memorandum prior to their implementation.

SEC rules also provide that the Company must make certain disclosures following any directors' and (ii) 1,000,000 shares officers' adoption or termination of preferred stock, par value \$0.01 per share.

#### Common Stock

##### Voting Rights

The holders of Patterson-UTI shares are entitled to one vote for each share held of record on all matters submitted to a vote of stockholders, 10b5-1 trading plans. Accordingly, directors or officers should be aware that information regarding their 10b5-1 trading plans, including the election duration of directors. Holders the arrangement and total securities to be sold or purchased, will be publicly disclosed in the Company's SEC filings.

Modifications/amendments and terminations of Patterson-UTI shares do not an existing 10b5-1 trading plan are strongly discouraged due to legal risks, and can affect the validity of trades that have cumulative voting rights.

##### Dividends

The holders taken place under the plan prior to such modification/amendment or termination. Under Rule 10b5-1 and our policies, any modification/amendment to the amount, price, or timing of Patterson-UTI shares are entitled the purchase or sale of the securities underlying the 10b5-1 trading plan will be deemed to receive dividends when, as be a termination of the current 10b5-1 trading plan and if declared by creation of a new 10b5-1 trading Plan, and will be subject to all requirements applicable to the Patterson-UTI board adoption of directors out of funds legally available therefor. However, if any shares of Patterson-UTI preferred stock are at a new 10b5-1 trading plan (e.g., the time outstanding, the payment of dividends on Patterson-UTI shares or other distributions (including Patterson-UTI's repurchase of Patterson-UTI shares) 10b5-1 plan is required to be adopted during an open trading window, will be subject to the declaration cooling-off period described above, etc.). If you are considering administrative changes

to your 10b5-1 trading plan, such as changing the account information or the broker administering your plan, you should consult with the Legal Department in advance to confirm that any such change does not constitute an effective termination of your plan.

As such, the modification/amendment of an existing 10b5-1 trading plan must be reviewed and payment approved in advance by the Legal Department in accordance with advance notice procedures set forth in Part V of this memorandum, and will be subject to all cumulative dividends the other requirements set forth in this memorandum regarding the adoption of a new 10b5-1 trading plan.

In addition, the termination (other than through an amendment or modification) of an existing 10b5-1 trading plan must be reviewed and approved in advance by the Legal Department in accordance with advance notice procedures set forth in Part V of this memorandum. Except in limited circumstances, the Legal Department will not approve the termination of a 10b5-1 trading plan unless you terminate a 10b5-1 trading plan at a time when you are not aware of material non-public information and there is not a quarterly blackout period.

## II. Speculative Trading in Options on outstanding shares of Patterson-UTI preferred stock.

### Liquidation

#### In Company Securities

Call and put options on Company common stock are traded in markets such as the event Chicago Board Options Exchange. When a person engages in a transaction involving a put or a call option on Company stock, that person is in effect speculating on future movements in the Company's stock price. Because of the dissolution, liquidation inherently speculative nature of options, purchasing or winding up selling options or writing options (becoming obligated to perform under an option contract) on Company stock by a director, officer or employee can have the appearance of Patterson-UTI, impropriety, even if the holders of Patterson-UTI shares will be entitled to share ratably individual engaging in any assets remaining after the satisfaction in full of the prior rights of creditors, including holders of Patterson-UTI indebtedness, and the payment of the aggregate liquidation preference of any preferred stock.

#### Other Rights

The holders of Patterson-UTI shares do transaction does not have any conversion, redemption material nonpublic information at the time of the transaction. Similar concerns may exist with respect to other third-party derivative securities with respect to Company stock. The Company believes that it is important for its employees to avoid even the appearance of

speculative trading in Company securities. Therefore, it is the Company's policy that the persons subject to this memorandum and their Family Members and Controlled Entities are prohibited from purchasing, selling or preemptive rights.

Transfer Agent writing options on Company securities or engaging in transactions in other third-party derivative securities with respect to Company stock.

## III. Hedging and Registrar

### The transfer agent Pledging of Company Securities

Certain forms of hedging or monetization transactions, such as zero-cost collars and registrar forward sale contracts, allow a holder to lock in much of the value of his or her stock holdings, often in exchange for Patterson-UTI shares all or part of the potential for upside appreciation in the stock. These transactions would allow the holder to continue to own the covered securities, but without the full risks and rewards of ownership. When that occurs, the holder's interests and the interests of the Company may be misaligned and may signal a message to the trading market that may not be in the best interests of the Company at the time it is Continental Stock Transfer & Trust Company.

#### Listing

Our common stock is listed conveyed. Similarly, securities held in a margin account may be sold by the broker without the customer's consent if the customer fails to meet a margin call. Likewise, securities pledged (or hypothecated) as collateral for a loan may be sold in foreclosure if the borrower defaults on the Nasdaq Global Select Market loan. A margin sale or foreclosure sale may occur at a time when the pledger is aware of material nonpublic information or otherwise is not permitted to trade in Company securities during quarterly blackout periods.

Recipients of this memorandum who are directors or executive officers (including their spouses and minor children) are prohibited from engaging in hedging transactions involving Company securities or pledging Company securities under the symbol "PTEN." Company's policy entitled "Anti-Hedging and Anti-Pledging."

## Preferred Stock

## The Patterson-UTI board

In light of the concerns discussed above, all other recipients of this memorandum are strongly discouraged from engaging in hedging or pledging transactions involving Company securities and any such transactions are subject to all the other requirements set forth in this memorandum.

### IV. Application of Policy to Transactions Associated with Option Exercises

Whether option exercises and associated transactions are subject to the trading restrictions described in Part I of this memorandum, including the quarterly blackout period, depends on the nature of the exercise transaction and, in particular, whether there is an associated sale.

If you exercise an option by paying the exercise price in cash and do not sell the shares acquired, you need not observe any such trading restrictions.

If you exercise through a broker's cashless exercise procedure (which involves a market sale by the broker), or if you otherwise make a contemporaneous sale of the shares you acquire on exercise, you must observe such trading restrictions just as you would for an ordinary market transaction.

If you elect to fund any tax withholding obligations related to the exercise of an option by instructing the plan administrator to cause the sale of shares deliverable under the option or by selling shares you already own, you must observe such trading restrictions in exercising the option. (Please note that tax withholding generally is not applicable to exercises by directors.)

Under the terms of some of the Company's stock incentive plans, you are allowed to pay the exercise price by using stock you already own in a "stock-for-stock" exercise or by having the Company withhold shares otherwise deliverable to you without selling those shares on your behalf (commonly called a "net exercise"). In addition, you may elect to fund any tax withholding obligations related to the exercise of an option by having the Company withhold shares otherwise deliverable to you without selling those shares on your behalf (commonly called "share withholding"). Because the Company is the other party to the transaction and would normally be deemed to have the same information as the insider, such a transaction may not be subject to the prohibitions on insider trading under the securities laws. Any exercise of options using the stock-for-stock or net exercise procedure

- 4 -

---

or use of share withholding to fund tax withholding obligations are subject to the advance notification procedures described in Part V of this memorandum.

### V. Advance Notification Procedures (applicable to Advance Notification Group only)

All directors can, without and executive officers of the Company, and other designated officers and employees of the Company and its subsidiaries, and their Family Members and Controlled Entities (the "Advance Notification Group") are subject to the advance notification requirements described in this Part V, even if the contemplated transactions would occur during the open window.

Any member of the Advance Notification Group who intends to trade in securities of the Company or exercise an employee or director stock option must obtain approval from the Company's Chief Financial Officer or, if it has been determined that the Chief Financial Officer is not available or is the transacting person, then the Company's General Counsel, prior to any purchase, sale, or other trade of its stockholders, issue one any securities of the Company (including a gift or more additional series transfer to a trust) or exercising an employee or director stock option. It may take up to two days to obtain a definitive answer on your request, so plan accordingly. To obtain approval, you will need to provide information regarding the type of preferred stock transaction and determine the number of shares involved, and either confirm that you possess no material nonpublic information concerning the Company or advise of any circumstances that you believe could present an issue in that regard. If you do not complete execution of the transaction within five business days after obtaining approval, you must check with the approver again before engaging in transactions beyond the five business day window provided. Notwithstanding the foregoing, if you acquire material nonpublic information concerning the Company prior to the execution of the transaction, you may not execute the transaction.

In addition, 10b5-1 trading plans, described in Part I of this memorandum, are subject to review by the Legal Department, but the review may require a longer period of time.

The advance notification procedure is intended as a means to enable the Company to assist in preventing situations that could result in legal exposure and embarrassment to individuals and the company. In the case of Section 16 reporting persons, the same procedure provides a check against transactions that could create a "short-swing profits" liability for the reporting person and will assist the Company in making sure that transactions are reported to the SEC in a timely manner. However, compliance with the insider trading laws and the short-swing profits rules is ultimately the individual responsibility of each series person subject to this memorandum.

Some transactions other than the ones listed above (e.g., scheduled grants and awards) may also require filings or other compliance measures, but the rights, preferences Company will have advance knowledge of those other transactions. The requestor should also be prepared to comply with SEC Rule 144 and limitations of each

series by appropriate board resolutions. The terms file Form 144, if necessary, at the time of any preferred sale.

## VI. Policy on Maintaining Confidentiality

You should avoid communicating nonpublic information about the Company to any person (including Family Members and friends) unless the person has a need to know the information for company-related reasons. This policy applies without regard to the materiality of the information. Consistent with the foregoing, you should be discreet with nonpublic information and refrain from discussing it in public places where it can be overheard, such as elevators and other public spaces in the Company's offices, restaurants, taxis and airplanes. Likewise, you should take care to protect sensitive information from access by unauthorized persons, for example, by allowing sensitive information displayed on a laptop computer to be viewed by someone sitting next to you on an airplane. To avoid even the appearance of impropriety, you should at all times refrain from providing advice or making recommendations regarding the purchase or sale of securities of the Company or of other companies of which you have knowledge as a result of your employment or association with the Company. *If you communicate information that someone else uses to trade illegally in securities, legal penalties can apply to you whether or not you personally derive any benefit from the illegal trading.*

- 5 -

## VII. Materiality and Public Knowledge of Information

In applying the policies described above, it is important to determine whether information is material nonpublic information. Information is considered material if:

- there is a substantial likelihood that a reasonable investor would consider the information important in deciding whether to buy, hold, or sell the securities in question; or
- the information, if disclosed, could be viewed by a reasonable investor as having significantly altered the total mix of information available.

Material information may be good or bad news. Chances are, if a person learns something that leads that person to want to buy or sell securities, the information will be considered material. Thus, even speculative information can be material, and information may be material even if that information alone would not determine an investor's decision to buy, sell or hold. Furthermore, the SEC takes the view that, subject to the affirmative defenses under Rule 10b5-1 referred to in Part I above, the mere fact that a person knows the information is enough to bar him or her from trading, even if the reasons for the potential trade are not based on that information. By way of example, the following information is often deemed material: annual or quarterly financial results for the entire company or a material business segment of the company (or even monthly results under certain circumstances, including in particular when they would indicate a material departure from market expectations); extraordinary borrowing or liquidity problems; changes in control; unexpected or unusual gains or losses in major operations; negotiations and agreements regarding acquisitions, divestitures, business combinations or tender offers; the institution of, or developments in, significant pending, threatened or actual litigation, investigations, or regulatory actions and proceedings, or strategies with respect to the foregoing; internal earnings or other financial estimates or forecasts, especially if significantly different from "street" estimates, and other confidential financial information, including changes in dividend policy; significant operational information, including results of drilling or pressure pumping activity, changes in price, customers, suppliers, or contracts or changes in management, directors, or auditors; the declaration of a stock split or the proposed or contemplated issuance, redemption, or repurchase of securities (including the establishment of a repurchase program for Company securities); material defaults under agreements or actions by creditors, clients, or suppliers relating to a company's credit rating; marketing changes; the interruption of production or other aspects of a company's business as a result of an accident, fire, natural disaster, or breakdown of labor negotiations or any major shut-down; labor negotiations; major environmental incidents; and significant actual or potential cybersecurity incidents, events or risks that affect the Company or third-party providers that support the Company's business operations, including computer system or network compromises, viruses or other destructive software, and data breach incidents that may disclose personal, business or other confidential information. This list of examples is not intended to be exhaustive, and other types of information may also be material. Federal, state and Nasdaq investigators will scrutinize a questionable trade after the fact with the benefit of hindsight, so you should consider erring on the side of deciding that the information is material and not trade. If you have questions regarding specific transactions, please contact the Legal Department.

Information is considered public only after it has been effectively disclosed in a manner sufficient to ensure that it is available to the investing public. Selective disclosure to a few persons does not make information public and enough time has elapsed to permit the investment market to absorb and evaluate the information. The Company generally discloses material information to the public in the form of press releases distributed through the major wire services or in filings made with the SEC.

When material information has been publicly disclosed, you should continue to refrain from buying or selling the securities in question until the information has been adequately disseminated to the public so that investors have had the opportunity to evaluate the information.

Therefore, you should not enter into a trade immediately after the Company has made a public announcement of material information. The appropriate period between an announcement and a subsequent trade depends on the nature of the information disclosed. Generally, information regarding relatively simple matters will be deemed for purposes of this policy to have been adequately disseminated to and absorbed by the market after two full trading days after the Company releases the information via a Regulation FD-compliant method. For example, if

- 6 -

---

an announcement is made on a Monday after the securities markets have closed, trading is not permitted until Thursday morning. When more complex matters, such as a prospective major acquisition or disposition, are announced, it may be necessary to allow additional time for the information to be absorbed by investors. If you have any question whether sufficient time has passed since an announcement by the Company, you should contact the Legal Department for guidance.

#### VIII. Enforcement and Penalties

The SEC, Nasdaq and other national securities exchanges in the United States have extensive surveillance facilities that are used to monitor trading in stocks and stock options. If a securities transaction becomes the subject of scrutiny, the transaction will be viewed after the fact. As a result, before engaging in any transaction, all persons covered by this memorandum should carefully consider how regulators and others might view the transaction with the benefit of hindsight.

No person to whom this memorandum is directed should engage in any transaction in which he or she may even appear to be trading while in possession of material nonpublic information. Failure to observe this policy may result in serious legal difficulties for the individual, as well as the Company, including the possibility of civil lawsuits by shareholders against the person(s) accused of trading on inside information.

The consequences of insider trading can be severe under U.S. law. The SEC takes the position that these laws apply to all transactions in shares or options of companies listed for trading in the United States, whether or not the actual trades take place in the United States. There is no prosecution threshold for insider trading cases. For individuals who trade on material nonpublic information (or tip information to others), possible penalties include:

1. A civil penalty of disgorgement, or return, of profit gained or loss avoided, plus a fine of up to three times the profit gained or loss avoided;
2. Criminal fines (no matter how small the profit) of up to \$5 million; and
3. A jail term of up to twenty years.

In addition to civil and criminal penalties, persons contemporaneously trading at the time of a violation of the insider trading laws have the right to sue the insider for an amount equal to the profit gained or loss avoided by the insider in such transaction, offset by any amounts the insider is required to disgorge by the SEC.

Moreover, employees who engage in illegal trading activity or who improperly disclose confidential information to others will be subject to and qualified by disciplinary action, including, but not limited to, termination of employment with the certificate of designation relating to any applicable series of preferred stock. Undesignated preferred stock may enable the Patterson-UTI board of directors to render more difficult Company and/or to discourage an attempt to obtain control of Patterson-UTI by means of a tender offer, proxy contest, merger or otherwise, and to thereby protect the continuity of

its subsidiaries.

- 7 -

---

Patterson-UTI's management. As a result, the issuance of shares of a series of preferred stock may discourage bids for Patterson-UTI shares or may otherwise adversely affect the market price of Patterson-UTI shares or any other series of Patterson-UTI preferred stock. The issuance of shares of preferred stock may also adversely affect the rights

#### ACKNOWLEDGMENT

I hereby acknowledge receipt of the holders of Patterson-UTI shares. For example, any preferred stock issued may rank senior memorandum entitled "Insider Trading Compliance." I have reviewed and understand the memorandum and agree to Patterson-UTI shares as to dividend rights, liquidation preference or both, may have full or limited voting rights and may be convertible into Patterson-UTI shares or other securities.

#### Section 203 of DGCL

Patterson-UTI is subject to Section 203 of the Delaware General Corporation Law ("DGCL"). Subject to limited exceptions, Section 203 of the DGCL prohibits "business combinations," including certain mergers, sales and leases of assets, issuances of securities and similar transactions abide by a corporation or a subsidiary with an

"interested stockholder" who beneficially owns 15% or more of a corporation's voting stock, within three years after the person or entity becomes an interested stockholder, unless: (1) the transaction that will cause the person to become an interested stockholder is approved by the board of directors of the corporation prior to the transaction, (2) after the completion of the transaction in which the person becomes an interested stockholder, the interested stockholder holds at least 85% of the voting stock of the corporation not including (a) shares held by officers and directors of the interested stockholder and (b) shares held by specified employee benefit plans, or (3) at or subsequent to such time the person becomes an interested stockholder, the business combination is approved by the board of directors and holders of at least 66 2/3% of the outstanding voting stock, excluding shares held by the interested stockholder.

#### Other Provisions Having a Possible Anti-Takeover Effect

In addition to being subject to Section 203 of the DGCL, Patterson-UTI's restated certificate of incorporation and amended and restated bylaws contain certain provisions that could discourage potential takeover attempts and make more difficult attempts by stockholders to change management. The following paragraphs set forth a summary of these provisions:

##### *Special Meetings of Stockholders*

The Patterson-UTI restated certificate of incorporation provides that special meetings of stockholders may be called only by the Patterson-UTI board of directors (or a majority of the members thereof), the chief executive officer, the president or the holders of a majority of the outstanding stock entitled to vote at such special meeting. This provision will make it more difficult for Patterson-UTI stockholders to call a special meeting.

##### *No Stockholder Action by Written Consent*

The Patterson-UTI restated certificate of incorporation provides that stockholder action may be taken only at annual or special meetings and not by written consent of the stockholders.

#### Exclusive Forum

The Patterson-UTI amended and restated bylaws provide that, unless Patterson-UTI selects or consents to the selection of an alternative forum: (a) the sole and exclusive forum for any complaint asserting any internal corporate claims (as defined below), to the fullest extent permitted by law, and subject to applicable jurisdictional requirements, shall be the Court of Chancery of the State of Delaware (or, if the Court of Chancery does not have, or declines to accept, jurisdiction, another state court or a federal court located within the State of Delaware); and (b) the sole and exclusive forum for any complaint asserting a cause of action arising under the Securities Act, to the fullest extent permitted by law, shall be the federal district courts of the United States. For purposes of the provision, internal corporate claims means claims, including claims in the right of Patterson-UTI: (i) that are based upon a violation of a duty by a current or former director, officer, employee or stockholder in such capacity, or (ii) as to which the DGCL confers jurisdiction upon the Court of Chancery. Any person or entity purchasing or otherwise acquiring or holding any interest in shares of stock of Patterson-UTI shall be deemed to have notice of and consented to the provision.

Re:

Notice of Adjustment of NexTier Equity Awards in Connection with Merger *Signature*

Dear Equity Award Holder:

In connection with the closing of the merger (the "*Merger*" *Print Name*

) of NexTier Oilfield Solutions Inc. (" *Date*

NexTier") with and into certain wholly-owned subsidiaries of Patterson-UTI Energy, Inc. ("Patterson-UTI") *Received* on September 1, 2023 (the "*Closing Date*"), and in accordance with the Agreement and Plan of Merger dated June 14, 2023, outstanding equity awards of NexTier ("*NexTier Equity Awards*") were automatically assumed by Patterson-UTI and converted into equity awards of Patterson-UTI in a manner intended to preserve, to the fullest extent possible, the economic value of the NexTier Equity Awards as of the Closing Date (the "*Award Conversions*").

This was accomplished through the application of an exchange ratio (the "*Exchange Ratio*") to each of your outstanding NexTier Equity Awards. The Exchange Ratio, both for purposes of the Award Conversions and as used to convert shares of common stock held by NexTier's stockholders into shares of Patterson-UTI common stock in connection with the Merger, was 0.7520 (meaning that, for each share of NexTier common stock held by a NexTier stockholder, the holder would be issued 0.7520 shares of Patterson-UTI common stock).

The following is a description of the details of each of the Award Conversions. To the extent that you did not hold each type of NexTier Equity Award outlined below immediately prior to the Closing Date, only certain of the below Award Conversions will apply to you. For details on your individual Patterson-UTI equity award holdings following application of the Award Conversions, please log into your existing Shareworks account where information regarding the converted equity should be available within one to two business days following the Closing Date.

**Time-Based Restricted Stock Units:**

Each NexTier time-based restricted stock unit (each, an "RSU") that you held immediately prior to the Closing Date was converted, on the same terms and conditions that applied to your RSUs as of immediately prior to the Closing Date, into an RSU with respect to a number of shares of Patterson-UTI common stock (rounded down to the nearest whole share) equal to the product of (a) the number of shares of NexTier common stock subject to your NexTier RSUs as of immediately prior to the Closing Date, and (b) the Exchange Ratio.

By way of example, suppose you held 100 NexTier RSUs before the Closing Date. In connection with the Merger, your NexTier RSUs were adjusted as described above so that you now hold 75 Patterson-UTI RSUs. Your Patterson-UTI RSUs continue to vest on the same vesting schedule as applied prior to the Closing Date.

**Performance-Based Restricted Stock Units:**

Each NexTier performance-based restricted stock unit and cash-settled performance unit (each, a "PSU") that you held immediately prior to the closing was converted into a time-vesting RSU covering (or, with respect to cash-settled performance units, with a settlement value determined by reference to) a number of shares of Patterson-UTI common stock (rounded up or down to the nearest whole share) equal to the product of (a) the number of shares of NexTier common stock subject to your NexTier PSUs (assuming the performance-based vesting conditions were achieved at the maximum level) and (b) the Exchange Ratio. All other terms and conditions that applied to your NexTier PSUs as of immediately prior to the Closing Date continue to apply to your Patterson-UTI time vesting RSUs.

By way of example, suppose that before the Closing Date you held 100 NexTier PSUs assuming the target level of performance objectives applicable to your PSUs was achieved. In connection with the Merger, your NexTier PSUs would be deemed earned at the maximum level of performance (i.e., 200 PSUs) 20. Your 200 NexTier PSUs were then adjusted as described above into 150 Patterson-UTI time-based RSUs, which will then become vested generally subject to your continued employment through the conclusion of the performance period that was previously applicable to your NexTier PSUs.

---

**Stock Options:**

Each NexTier stock option that you held immediately prior to the Closing Date was converted, on the same terms and conditions as were applicable to such stock options as of immediately prior to the Closing Date, into an option to purchase a number of shares of Patterson-UTI common stock (rounded down to the nearest whole share), equal to the product of (a) the number of shares of NexTier common stock subject to such stock option as of immediately prior to the Closing Date and (b) the Exchange Ratio, at an exercise price per share of Patterson-UTI common stock (rounded up to the nearest whole cent) equal to (1) the exercise price per share of NexTier common stock subject to the NexTier stock option immediately prior to the Closing Date, divided by (2) the Exchange Ratio.

By way of example, suppose you held an option to purchase 100 shares of NexTier common stock at an exercise price of \$20 per share before the Closing Date. In connection with the Merger, your option was adjusted as described above so that you now hold an option to purchase 75 shares of Patterson-UTI common stock at an exercise price of \$26.60.

***It is important to understand that while there may be some minor differences in actual adjustments due to rounding of shares and dollar values as required under the Merger Agreement, the Award Conversions had no material impact on the economic value of your NexTier Equity Awards.***

If you have any questions, please reach out to Mitch Williamson or Robin Brice.

Sincerely,

PATTERSON-UTI ENERGY, INC.

## CERTIFICATIONS

I, William Andrew Hendricks, Jr., certify that:

1. I have reviewed this annual report on Form 10-K of Patterson-UTL Energy, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 32.1

CERTIFICATION PURSUANT TO  
18 U.S.C. SECTION 1350,  
AS ADOPTED PURSUANT TO  
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002  
NOT FILED PURSUANT TO THE SECURITIES EXCHANGE ACT OF 1934

In connection with the Annual Report of Patterson-UTI Energy, Inc. (the "Company") on Form 10-K for the period ended December 31, 2023 December 31, 2024, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), William Andrew Hendricks, Jr., Chief Executive Officer, and C. Andrew Smith, Chief Financial Officer, of the Company, each certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to his knowledge:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

A signed original of this written statement required by Section 906 has been provided to the Company and will be retained by the Company and furnished to the Securities and Exchange Commission upon request. The foregoing is being furnished solely pursuant to said Section 906 and Rule 13a-14(b) promulgated under the Securities Exchange Act of 1934, as amended, and is not being filed as part of the Report or as a separate disclosure document.

Exhibit 97

PATTERSON-UTI ENERGY, INC.  
CLAWBACK POLICY

Recoupment of Incentive-Based Compensation

It is the policy of Patterson-UTI Energy, Inc. (the "Company") that, in the event the Company is required to prepare an accounting restatement of the Company's financial statements due to the Company's material non-compliance with any financial reporting requirement under the federal securities laws (including any such correction that is material to the previously issued financial statements, or that would result in a material misstatement if the error were corrected in the current period or left uncorrected in the current period), the Company will recover on a reasonably prompt basis the amount of any Incentive-Based Compensation Received by a Covered Executive during the Recovery Period that exceeds the amount that otherwise would have been Received had it been determined based on the restated financial statements.

#### **Policy Administration and Definitions**

This Policy is administered by the Compensation Committee (the "Committee") of the Company's Board of Directors and is intended to comply with, and as applicable to be administered and interpreted consistent with, and subject to the exceptions set forth in, Listing Standard 5608 adopted by The Nasdaq Stock Market to implement Rule 10D-1 under the Securities Exchange Act of 1934, as amended (collectively, "Rule 10D-1").

For purposes of this Policy:

"Incentive-Based Compensation" means any compensation granted, earned, or vested based in whole or in part on the Company's attainment of a financial reporting measure that was Received by a person (i) on or after October 2, 2023 and after the person began service as a Covered Executive, and (ii) who served as a Covered Executive at any time during the performance period for the Incentive-Based Compensation. A financial reporting measure is (i) any measure that is determined and presented in accordance with the accounting principles used in preparing the Company's financial statements and any measure derived wholly or in part from such a measure, and (ii) any measure based in whole or in part on the Company's stock price or total shareholder return.

Incentive-Based Compensation is deemed to be "Received" in the fiscal period during which the relevant financial reporting measure is attained, regardless of when the compensation is actually paid or awarded.

"Covered Executive" means any "executive officer" of the Company as defined under Rule 10D-1.

"Recovery Period" means the three completed fiscal years immediately preceding the date that the Company is required to prepare the accounting restatement described in this Policy, all as determined pursuant to Rule 10D-1, and any transition period of less than nine months that is within or immediately following such three fiscal years.

If the Committee determines the amount of Incentive-Based Compensation Received by a Covered Executive during a Recovery Period exceeds the amount that would have been Received if determined or calculated based on the Company's restated financial results, such excess amount of Incentive-Based Compensation shall be subject to recoupment by the Company pursuant to this Policy. For Incentive-Based Compensation based on stock price or total shareholder return, where the amount of erroneously awarded compensation is not subject to mathematical recalculation directly from the information in an accounting restatement, the Committee will determine the amount based on a reasonable estimate of the effect of the accounting restatement on the relevant stock price or total shareholder return. In all cases, the calculation of the excess amount of Incentive-Based Compensation to be recovered will be determined without regard to any taxes paid with respect to such compensation. The Company will maintain

---

and will provide to The Nasdaq Stock Market documentation of all determinations and actions taken in complying with this Policy.

The Company may effect any recovery pursuant to this Policy by requiring payment of such amount(s) to the Company, by set-off, by reducing future compensation, or by such other means or combination of means as the Committee determines to be appropriate. The Company need not recover the excess amount of Incentive-Based Compensation if and to the extent that the Committee determines that such recovery is impracticable, subject to and in accordance with any applicable exceptions under the NASDAQ Stock Market listing rules, and not required under Rule 10D-1, including if the Committee determines that the direct expense paid to a third party to assist in enforcing this Policy would exceed the amount to be recovered after making a reasonable attempt to recover such amounts. The Company is authorized to take appropriate steps to implement this Policy with respect to Incentive-Based Compensation arrangements with Covered Executives. Any determinations made by the Committee under this Policy shall be final and binding on all affected individuals.

Any right of recoupment or recovery pursuant to this Policy is in addition to, and not in lieu of, any other remedies or rights of recoupment that may be available to the Company pursuant to the terms of any other policy, any employment agreement or plan or award terms, and any other legal remedies available to the Company; provided that the Company shall not recoup amounts pursuant to such other policy, terms or remedies to the extent it is recovered pursuant to this Policy. The Company shall not indemnify any

Covered Executive against the loss of any Incentive-Based Compensation (or provide any advancement of expenses in such instance), including any payment or reimbursement for the cost of third-party insurance purchased by any Covered Executives to fund potential recovery obligations under this Policy.
