Investor Presentation

May 2025

Forward Looking Statements & Non-GAAP Financial Measures

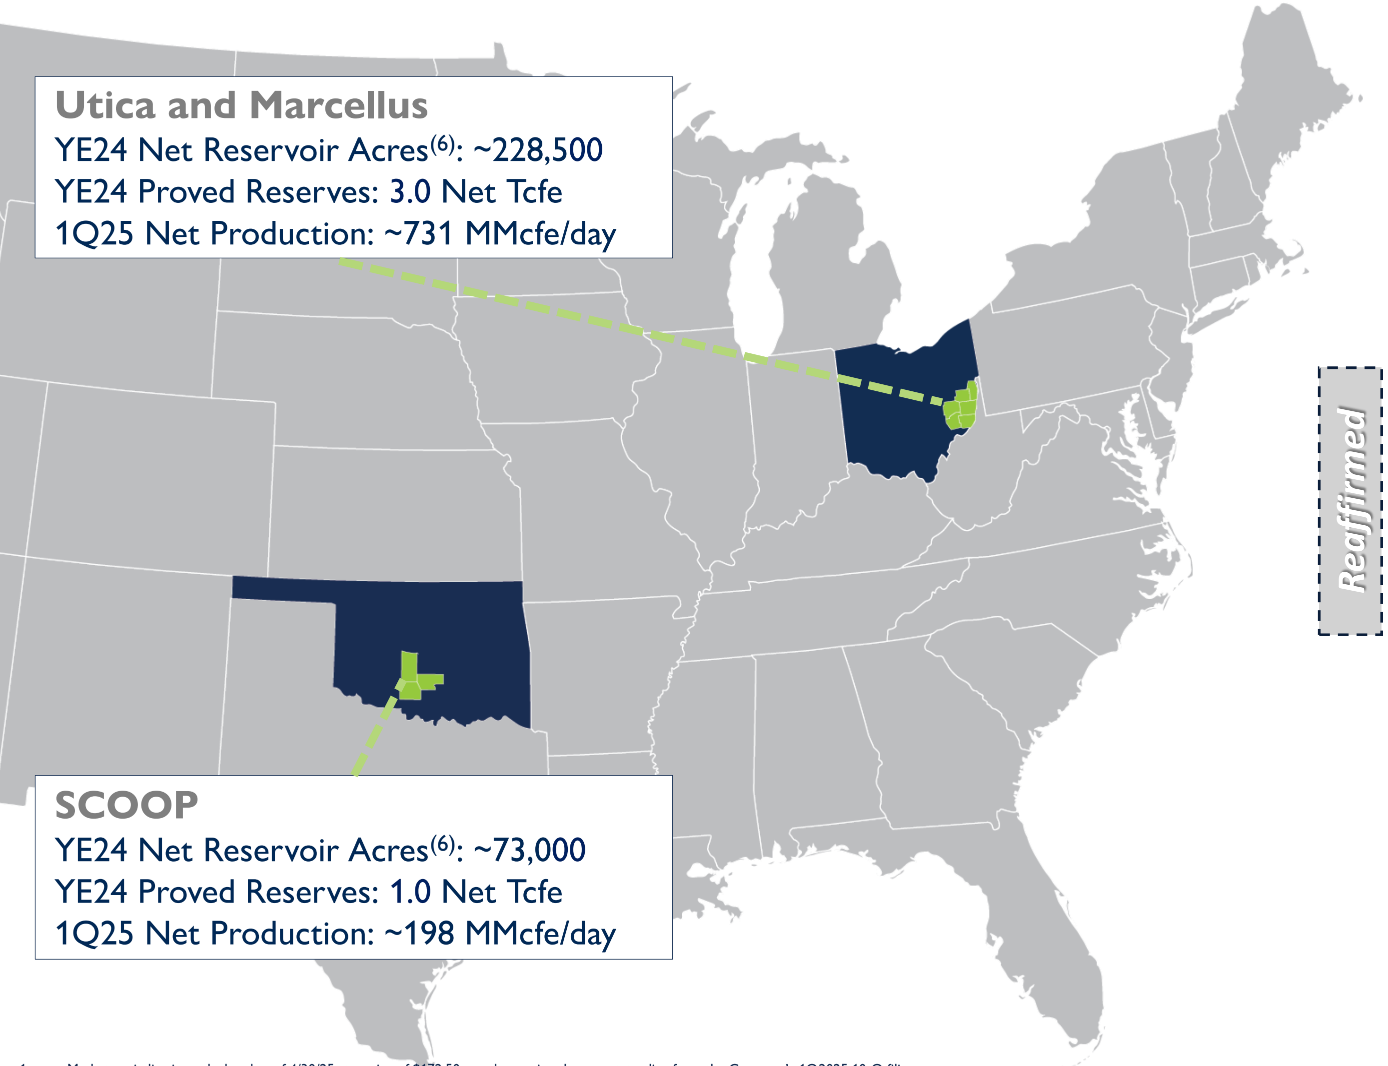
This presentation contains "forward-looking statements" within the meaning of Section 27A of the Securities Act, Section 21E of the Exchange Act, and the Private Securities Litigation Reform Act of 1995, that are subject to risks and uncertainties. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. In some cases, you can identify forward-looking statements by terms such as "may," "will," "should," "could," "would," "expects," "plans," "anticipates," "intends," "believes," "estimates," "projects," "predicts," "potential" and similar expressions intended to identify forward-looking statements. All statements, other than statements of historical facts, included in this presentation that address activities, events or developments that we expect or anticipate will or may occur in the future, including the expected impact of U.S. trade policy and its impact on broader economic conditions, the war in Ukraine and the conflict in the Middle East on our business, our industry and the global economy, estimated future production and net revenues from oil and gas reserves and the present value thereof, future capital expenditures (including the amount and nature thereof), share repurchases, business strategy and measures to implement strategy, competitive strength, goals, expansion and growth of our business and operations, plans, references to future success, reference to intentions as to future matters and other such matters are forward-looking statements. These forward-looking statements are largely based on our expectations and beliefs concerning future events, which reflect estimates and assumptions made by our management. These estimates and assumptions reflect our best judgment based on currently known market conditions and other factors relating to our operations and business environment, all of which are difficult to predict and many of which are beyond our control. Although we believe our estimates and assumptions to be reasonable, they are inherently uncertain and involve a number of risks and uncertainties that are beyond our control. In addition, management's assumptions about future events may prove to be inaccurate. Management cautions all readers that the forward-looking statements contained in this presentation are not guarantees of future performance, and we cannot assure any reader that those statements will be realized or the forward-looking events and circumstances will occur. Actual results may differ materially from those anticipated or implied in the forward-looking statements due to the factors listed in Item 1A. "Risk Factors" and Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Gulfport's Annual Report on Form 10-K for the year ended December 31, 2024, Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Gulfport's Quarterly Reports on Form 10-Q and all forward-looking statements speak only as of the date of this presentation.

Gulfport's proved reserves and adjusted proved reserves are those quantities of natural gas, oil, and natural gas liquids, which, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible—from a given date forward, from known reservoirs, and under existing economic conditions, operating methods, and government regulations—prior to the time at which contracts providing the right to operate expire, unless evidence indicates that renewal is reasonably certain, regardless of whether deterministic or probabilistic methods are used for the estimation.

Gulfport's estimate of its total proved reserves are internally generated and audited by Netherland, Sewell Associates, Inc., independent petroleum engineers. Factors affecting ultimate recovery include the scope of Gulfport's ongoing drilling program, which will be directly affected by the availability of capital, drilling and production costs, availability of drilling services and equipment, drilling results, lease expirations, transportation constraints, regulatory approvals, actual drilling results, including geological and mechanical factors affecting recovery rates, and other factors. Estimates may change significantly as development of Gulfport's natural gas, oil and natural gas liquids assets provide additional data. Gulfport's production forecasts and expectations for future periods are dependent upon many assumptions, including estimates of production decline rates from existing wells and the undertaking and outcome of future drilling activity, which may be affected by significant commodity price declines or drilling cost increases.

Gulfport's management uses certain non-GAAP financial measures for planning, forecasting and evaluating business and financial performance, and believes that they are useful tools to assess Gulfport's operating results. Although these are not measures of performance calculated in accordance with generally accepted accounting principles (GAAP), management believes that these financial measures are useful to an investor in evaluating Gulfport because (i) analysts utilize these metrics when evaluating company performance and have requested this information as of a recent practicable date, (ii) these metrics are widely used to evaluate a company's operating performance, and (iii) we want to provide updated information to investors. Investors should not view these metrics as a substitute for measures of performance that are calculated in accordance with GAAP. In addition, because all companies do not calculate these measures identically, these measures may not be comparable to similarly titled measures of other companies. These non-GAAP financial measures include adjusted EBITDA, adjusted free cash flow, recurring general and administrative expense and present value of estimated future net revenue. A reconciliation of each financial measure to its most directly comparable GAAP financial measure is included as part of this presentation. These non-GAAP measure should be considered in addition to, but not instead of, the financial statements prepared in accordance with GAAP.

Gulfport Energy Overview



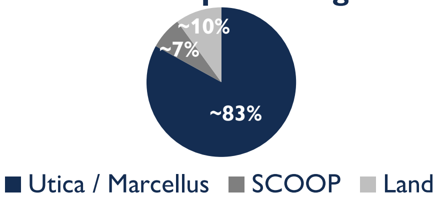
Key Highlights

NYSE:	**GPOR**
Market Cap[1]:	**$3.1 Billion**
Enterprise Value ('EV')[2]:	**$3.8 Billion**
EV / 2026 EBITDA[2,7]:	**3.8x**
Liquidity[3]:	**~$906 Million**
Leverage[4]:	**0.92x**
D&C Capital:	$335 – $355 Million
Maintenance Leasehold Capital:	$35 – $40 Million
2025E Total Base Capital:	**$370 - $395 Million**
2025E Total Net Equivalent Production:	**1,040 – 1,065 MMcfe/day**
2025E Net Liquids Production:	**18.0 – 20.5 MBbl/day**
~89% Natural Gas	
Top-decile adjusted free cash flow yield[5] relative to natural gas peers	
Remaining Inventory:	**~500 gross operated**
>12 years of net inventory at attractive rates of return	

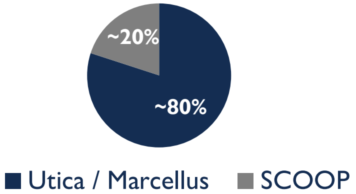
Reaffirmed

2025E Activity

2025E Capital Program



2025E Production Mix



1. Market capitalization calculated as of 4/30/25 at a price of $172.50 per share using shares outstanding from the Company's 1Q2025 10-Q filing.
2. Enterprise value calculated as of 4/30/25 at a price of $172.50 per share using shares outstanding, long-term debt, preferred stock and cash and cash equivalents from the Company's 1Q2025 10-Q financial statements. The impact of the conversion of the 32,887 outstanding preferred shares would increase common shares outstanding by ~2.3 million common shares and increase the EV / 2026 Adjusted EBITDA multiple by 0.37x to 4.1x.
3. As of 3/31/25 and calculated as $5.3 million cash plus $901.1 million borrowing base availability, which takes into effect $35.0 million of borrowings on revolver and $63.9 million of letters of credit.
4. As of 3/31/25 using net debt to LTM Adjusted EBITDA. Net debt and Adjusted EBITDA are non-GAAP measures. Net debt is defined as total long-term debt minus cash and cash equivalents.
5. Adjusted free cash flow is a non-GAAP financial measure; see supplemental slides. Adjusted free cash flow excludes discretionary acreage acquisitions and common stock repurchases. Adjusted free cash flow yield is calculated using adjusted free cash flow divided by market capitalization using shares outstanding from the Company's 1Q2025 10-Q filing.
6. Appalachia acreage includes ~208,000 Utica and ~20,500 Marcellus net reservoir acres. SCOOP acreage includes ~43,000 Woodford and ~30,000 Springer net reservoir acres.
7. EBITDA estimate sourced from Factset as of 4/30/25.

Focused Strategy and Compelling Valuation

High Quality Asset Base Natural Gas Weighted with Liquids Opportunities	• Multi-basin portfolio provides diversification and capital allocation optionality • Capture value accretion in Utica, Marcellus and SCOOP liquids-rich development and prolific Utica dry gas development • Low breakeven inventory supports sustainable returns and adjusted free cash flow[(1)] generation
Improve Margins and **Free Cash Flow Generation**	• Focus on continuously improving cycle times and reducing operating costs • Top decile adjusted free cash flow[(1)] yield and positive adjusted free cash flow[(1)] across wide range of commodity prices
Enhance Shareholder Value through Disciplined Capital Allocation	• Return capital to shareholders through repurchase of undervalued common stock • Reinvest in strategic acquisition opportunities that provide operating synergies, quality resource depth and optionality to our near-term development activities
Maintain **Strong Balance Sheet**	• Maintain financial strength and flexibility to execute strategic and operating plans in volatile commodity environment • Hedging program reduces commodity risk and future cash flow volatility
Committed to **Responsible Stewardship**	• Safety of employees, contractors and communities is our highest priority • Achieved overall "A" rating for Appalachia assets from MiQ for second consecutive year • Provide community support through giving and volunteering in our operating areas

1. Adjusted free cash flow is a non-GAAP financial measure; see supplemental slides. Excludes discretionary acreage acquisitions and common stock repurchases.

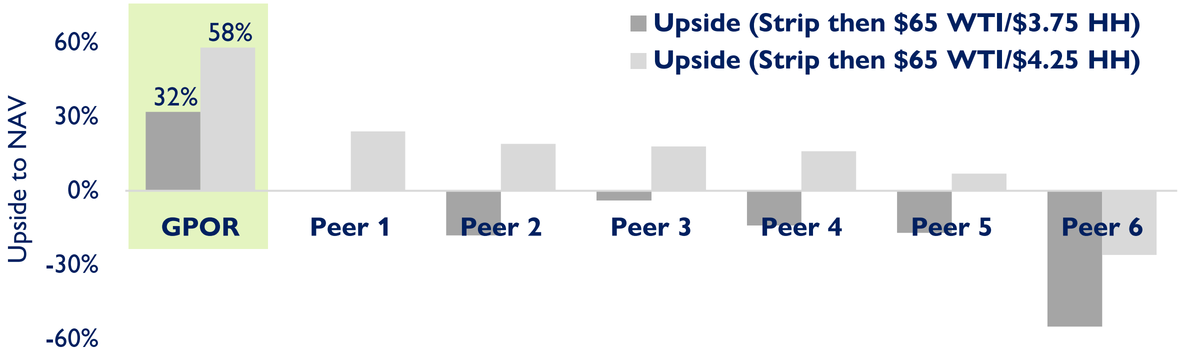
Delivering Value For Shareholders

Common Stock Repurchase Program

Common Stock Repurchases

- Common stock repurchase program authorizes purchases up to $1.0 billion of Gulfport outstanding shares
  - As of March 31, 2025, ~$644 million returned to shareholders since March 2022 at an average price of $108.99 per share
- Total reduction of ~5.9 million shares, reducing common stock outstanding by approximately 17% since the initial authorization date in March 2022
- Expect to allocate substantially all FY 2025 adjusted free cash flow(1), excluding discretionary acreage acquisitions, towards common stock repurchases

NAV Valuation Upside to Current Share Price(2)



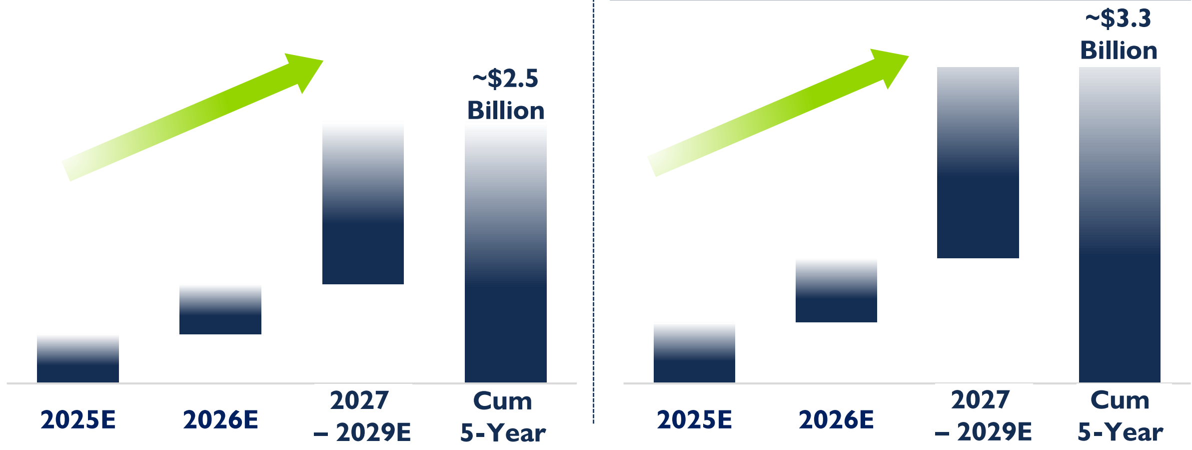
Return of Capital ($MM)	FY 2023	FY 2024
Annual adjusted free cash flow(1)	**$199**	**$257**
Less: discretionary acreage acquisitions	($48)	($45)
Less: shares repurchases executed	($149)	($203)(3)
Remaining adjusted free cash flow(1) available	**$2**	**$9**
% of adjusted free cash flow returned to shareholders	***99%***	***96%***

1. Adjusted free cash flow is a non-GAAP financial measure; see supplemental slides. Excludes discretionary acreage acquisitions and common stock repurchases.
2. Sourced from Enverus Intelligence 4Q2024 Gas NAV Compass. All mentions of NAV are on a post-tax basis. Utilized strip prices as of 4/10/25 and share prices as of 4/17/25. Peers include AR, CNX, CRK, EQT, EXE & RRC.
3. Includes $18.4 million to satisfy tax withholding requirements incurred upon vesting of initial emergence performance stock units granted to certain executive officers in 2021.

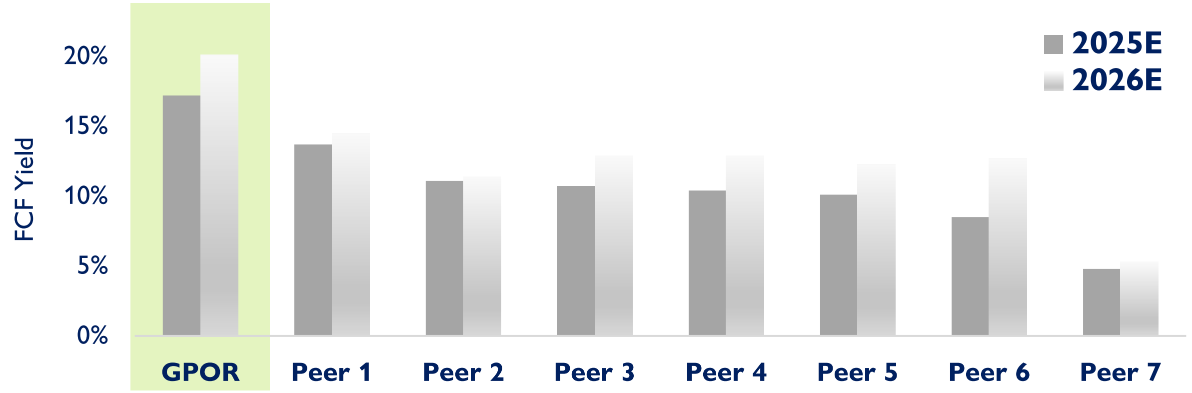
Adjusted Free Cash Flow Generation Potential

2025E – 2029E Adjusted Free Cash Flow[1,2,3] Illustration ($MM)

$3.50 NYMEX & $70 WTI | $4.00 NYMEX & $70 WTI



Adjusted Free Cash Flow Yield[4,5]



Key Highlights

- Sustainable free cash generation underpinned by high-quality assets
- Meaningful adjusted free cash flow profile **generating ~75% - 110% of market capitalization[6]** over the next five years
- Delivering highest adjusted free cash flow yield among natural gas peers
- The focus on maintenance leasehold and land spend, in combination with our discretionary acreage acquisitions, have bolstered our future drilling programs and lowered our go-forward maintenance land spend

	Base Assumptions	Upside Potential
Net Production:	Low single digit growth of 0% – 5%	*Improving base decline, reduced cycle times, potential uplift from managed pressure programs and increase in liquids production*
Cash Costs:	$1.32 – $1.43 / Mcfe	*Reducing per unit cash costs which includes LOE, GP&T, taxes other than income and G&A*
Total Capital:	$335 – $355 Million D&C $35 – $40 Million Land	*Continued operational efficiencies, cost reductions and lower maintenance land spend*
Differentials:	Natural Gas: $0.20 - $0.35 off NYMEX Oil: $5.50 - $6.50 off WTI NGL: 40% - 50% of WTI	*Optimizing marketing strategy to improve sales points reached and realizations*
Commodity Prices:	Flat price scenarios	*Commodity price improvements*

1. Adjusted free cash flow is a non-GAAP financial measure; see supplemental slides. Excludes discretionary acreage acquisitions and common stock repurchases.
2. Based upon flat price cases and base assumptions per year. Includes current hedge position as of April 30, 2025.
3. No payment of cash income taxes assumed in illustration. Company does not currently anticipate paying significant cash income taxes over next five years (*estimating <10% of cumulative 5-year adjusted free cash flow*).
4. Sourced from J.P. Morgan E&P Valuation Analysis utilizing J.P. Morgan estimates & Bloomberg Finance L.P.; Strip pricing as of 4/7/25 ($63.65/$59.47 per bbl WTI & $4.07/$4.23 per MMBtu NYMEX gas in 2025-26); Share prices as of 4/7/25. Peers include AR, CNX, CTRA, EQT, EXE, NFG, & RRC.
5. Adjusted FCF Yield is calculated using estimated adjusted free cash flow divided by current market capitalization.
6. Market capitalization calculated as of 4/30/25 at a price of $172.50 per share using shares outstanding from the Company's 1Q2025 10-Q filing.

Gulfport ENERGY

First Quarter 2025 Results

	1Q2025	*Full Year 2025 Guidance*
Total Net Production	**929.3 Mcfe/day**	**1.04 – 1.065 Bcfe/day**
Total Liquids Net Production	**15.2 MBbls/day**	**18.0 – 21.5 MBbls/day**
Incurred Capital Expenditures[1]	**$159.8 Million**	**$370 – $395 Million**
Per Unit Operating Cost[2]	**$1.31 per Mcfe**	**$1.20 – $1.29 per Mcfe**
Adjusted Free Cash Flow[3]	**$36.6 Million**	***Return substantially all adjusted free cash flow[3], excluding acquisitions, towards common stock repurchases***
Common Stock Repurchases	**$60.0 Million**	
Quarter-end Leverage (Net Debt[4] to Adjusted EBITDA[3])	**0.92x**	***Maintain financial strength***

Key Highlights

- Delivered 1Q2025 performance ahead of Company expectations and on track to execute on our previously provided full year guidance
- Realized natural gas price equivalent, before the effect of hedges, of $4.11 per Mcfe, a $0.45 per Mcfe premium to NYMEX
- Repurchased 5.9 million shares of common stock for ~$644.1 million since March 2022
- Reaffirming full year 2025 guidance with natural gas production expected to increase ~20% by fourth quarter 2025 compared to first quarter 2025
- Reallocating drilling activity in late 2025 toward dry gas Utica development to bolster 2026 development economics and adjusted free cash flow generation
- Achieved significant drilling efficiencies with average drilling footage per day improving 28% over full year 2024
- Accomplished all-time high completion efficiencies in April 2025 with 105.5 continuous pumping hours on a pad
- Completed spring borrowing base redetermination of revolving credit facility and reaffirmed borrowing base at $1.1 billion with elected commitments remaining at $1.0 billion

1. Excludes $1.4 million and $1.2 million of non-D&C capital and non-operated D&C capital for 1Q2025, respectively.
2. Includes LOE, GP&T and taxes other than income.
3. Adjusted EBITDA and adjusted free cash flow are non-GAAP financial measures; see supplemental slides. Adjusted free cash flow excludes discretionary acreage acquisitions and common stock repurchases.
4. As of 3/31/2025 using net debt to LTM Adjusted EBITDA. Net debt and Adjusted EBITDA are non-GAAP measures. Net debt is defined as total long-term debt minus cash and cash equivalents.

Reaffirm Full Year 2025 Guidance

Reaffirmed

Net Liquids Production

18.0 – 20.5 MBbl/day

Expect >30%[(1)] liquids production growth compared to FY 2024, driving strong margins and adjusted free cash flow generation

Reaffirmed

Total Net Production

1,040 – 1,065 MMcfe/day

Forecast flat net daily equivalent production to FY 2024, with natural gas as a percent of total production totaling ~89% for FY 2025

Reaffirmed

Incurred Total Base Capital

$370 – $395 Million

Optimized development program and portfolio allocation expected to drive capital efficiencies and deliver strong corporate margins

Reaffirmed

Per Unit Operating Cost

$1.20 – $1.29 per Mcfe

Continuous optimization of per unit operating expenses, including LOE, taxes other than income and transportation, gathering, processing and compression costs

Resilient Adjusted Free Cash Flow Generation and Yield[(2)]

Compelling valuation for shareholders with top-decile yield relative to peers and increasing adjusted free cash flow generation in improving natural gas commodity environment

Gulfport ENERGY

1. Assumes the midpoint of 2025 guidance.
2. Adjusted free cash flow is a non-GAAP financial measure; see supplemental slides. Adjusted free cash flow yield is calculated using adjusted free cash flow and dividing by current market capitalization.

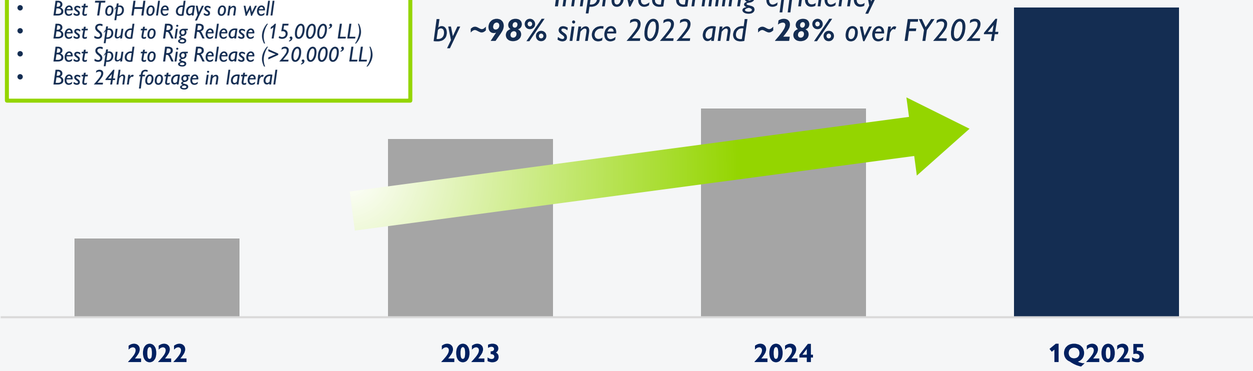
Significant Improvement in Operational Efficiencies

Ohio Drilling and Completion Efficiencies

Average Total Footage per Day

1Q2025 Drilling Highlights
- *Best Top Hole days on well*
- *Best Spud to Rig Release (15,000' LL)*
- *Best Spud to Rig Release (>20,000' LL)*
- *Best 24hr footage in lateral*

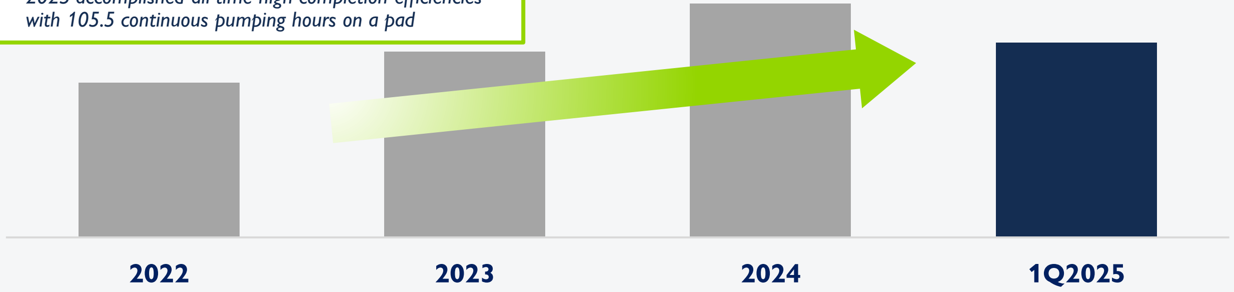
*Improved drilling efficiency by ~**98%** since 2022 and ~**28%** over FY2024*



Average Frac Pumping Hours

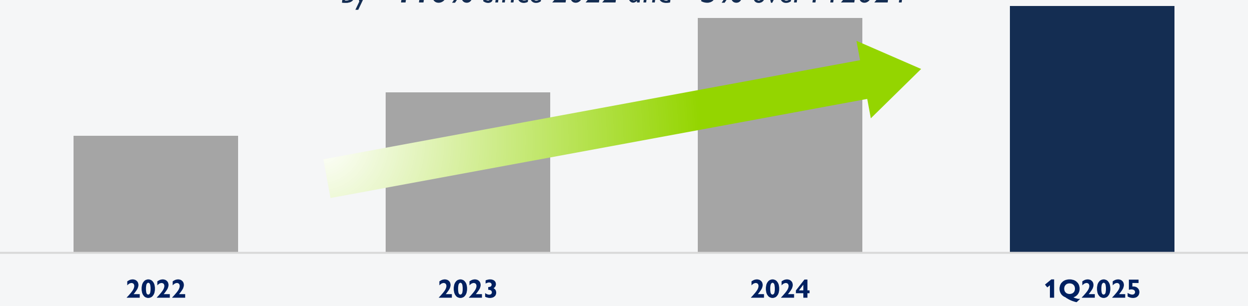
1Q2025 Completion Highlights
- *Exceeded both FY2022 and FY2023 despite unseasonably low water levels impacting 1Q2025*
- *Water sourcing issues eliminated in 2Q2025 and in April 2025 accomplished all-time high completion efficiencies with 105.5 continuous pumping hours on a pad*

*Improved completion efficiency by ~**26%** since 2022*



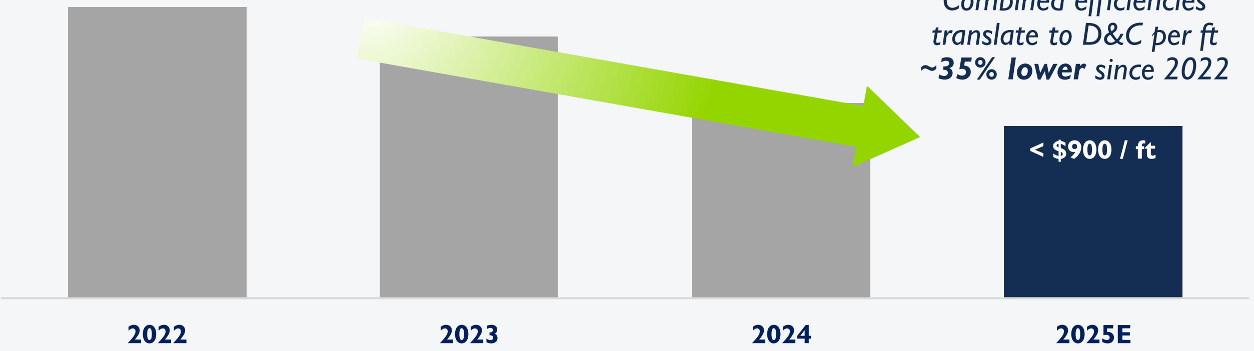
Average Plugs Drilled per Day

*Improved drill out efficiency by ~**110%** since 2022 and ~**5%** over FY2024*



Utica D&C Cost Per Lateral Ft

*Combined efficiencies translate to D&C per ft ~**35% lower** since 2022*



2025 Capital Program and Production Outlook

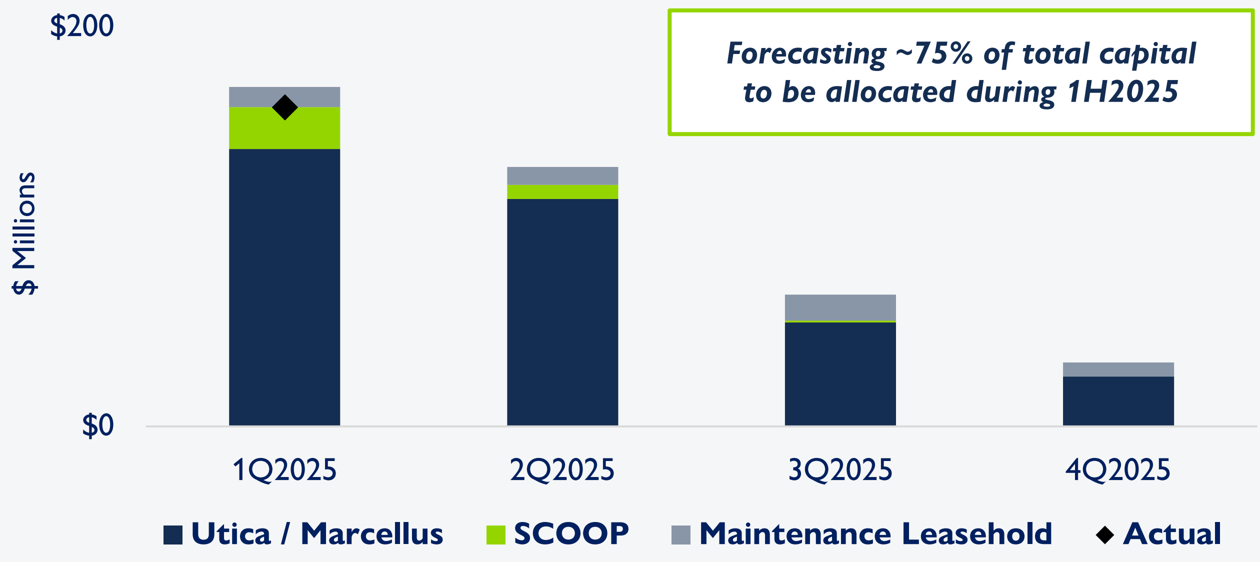
Capital Program

- Reallocating drilling activity in 2H2025 to dry gas Utica development to bolster 2026 development economics and adjusted free cash flow
- Optimized development program and portfolio allocation expected to drive capital efficiencies and robust adjusted free cash flow generation
- Reaffirm total D&C capital of $335 – $355 million
- Forecast investing $35 – $40 million on maintenance leasehold and land

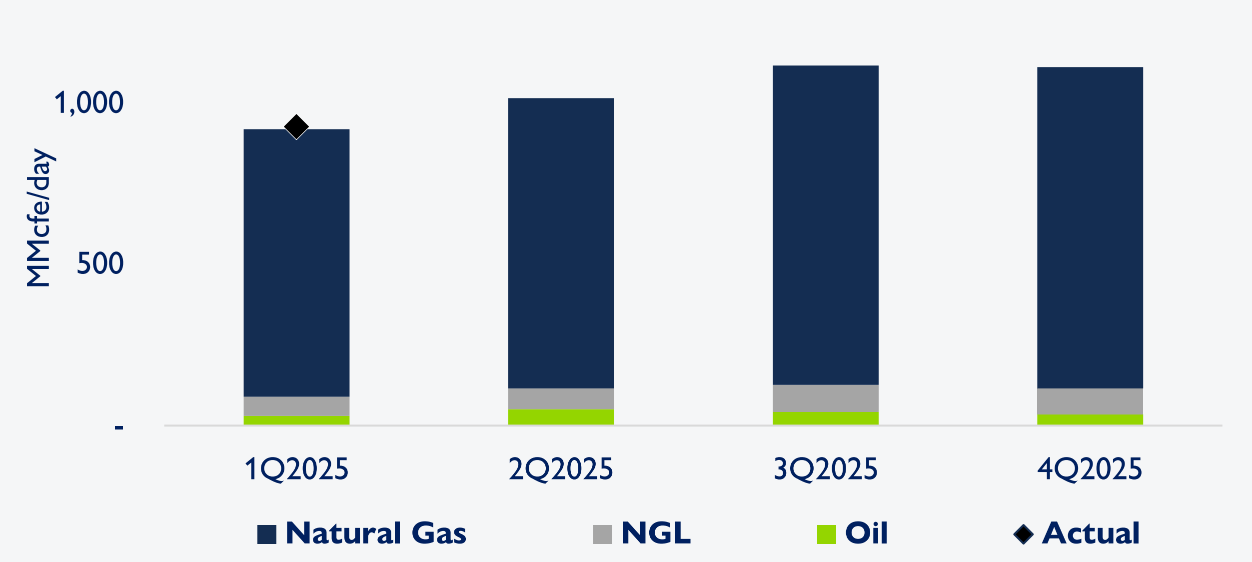
Production

- Anticipate natural gas production to increase by approximately 20% by fourth quarter 2025 compared to first quarter 2025
- Reaffirm full year 2025 net daily equivalent production in the range of 1,040 – 1,065 MMcfe/day
- Full year 2025 net daily liquids production to increase over 30%[1] compared to full year 2024, in the range of 18.0 to 20.5 MBbl/day

Forecasted Total Capital Expenditures



Forecasted Total Net Production



1. Assumes the midpoint of 2025 guidance.

2025 Development Plan Overview

Utica Key Highlights

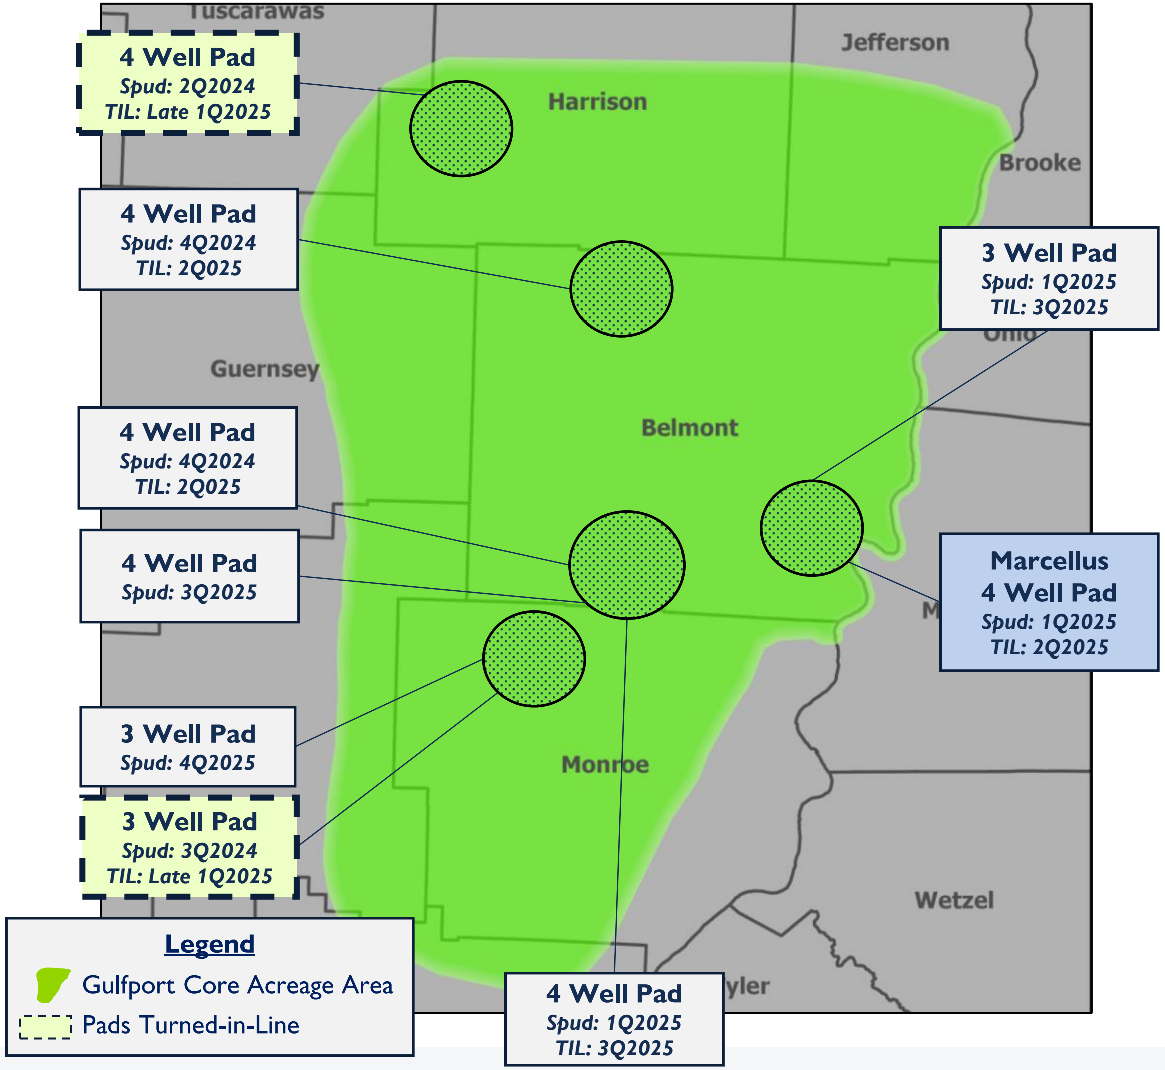
- Extended Utica inventory by >2.5 years through discretionary acreage acquisitions largely within the wet gas area of the play and prioritized for near term development
- Continue to optimize well performance and implement a managed pressure program, yielding consistent EUR's per well
- Plan to drill 20 gross wells and turn-to-sales 22 gross wells during 2025

Marcellus Key Highlights

- Marcellus development is within Utica footprint and captures value enhancement through stacked pay synergies and liquids optionality
- Estimate 55 – 65 locations, >2 years[1] of drillable inventory
- Plan to drill and turn-to-sales 4 gross wells during 2025

SCOOP Key Highlights

- Targeting high return, liquids-rich development in the SCOOP
- Plan to complete drilling and turn-to-sales 2 gross wells during 2025



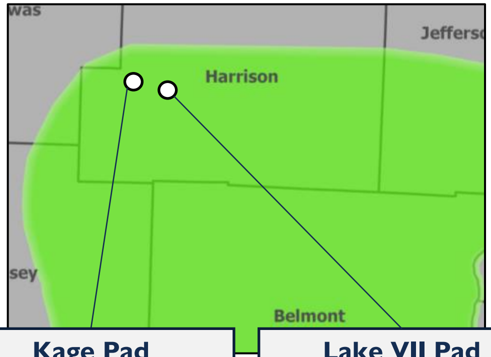
1. Based on assumed development cadence of approximately 20 to 25 wells per year.

Gulfport ENERGY

Utica Liquids-Rich Development Providing Strong Results

Key Highlights

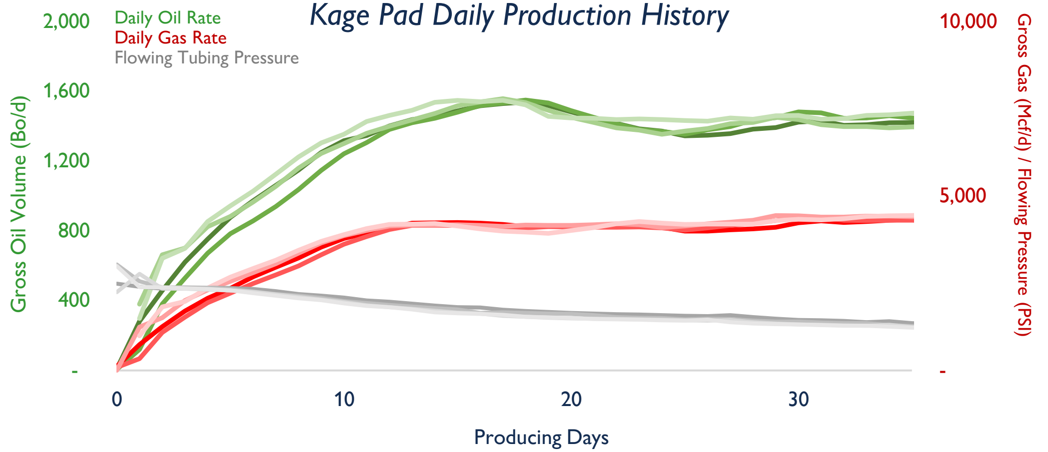
- Turned-to-sales in March 2025, the Kage pad is located further west in the condensate window and delivering strong oil production
  - Well productivity, optimized facility design and revised managed pressure flowback delivering normalized rates nearly double the Lake VII development
  - Avg IP30[1]: ~3,095 Boe/d, 59% Oil, 74% Liquids



Kage Pad
(Normalized to 15,000' LL)
Avg IP30[1]: ~3,095 Boe/d
59% Oil, 74% Liquids

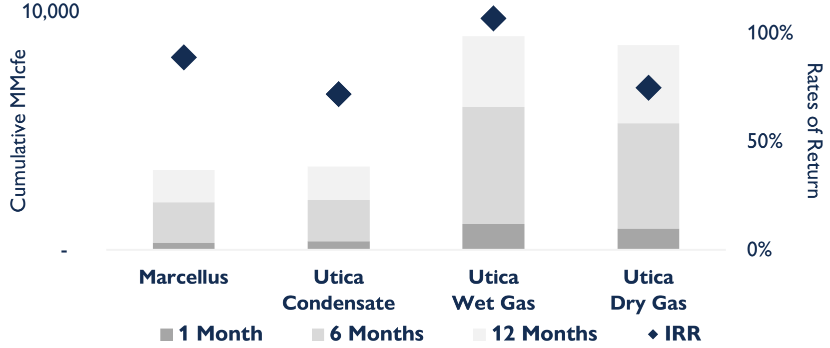
Lake VII Pad
(Normalized to 15,000' LL)
Avg IP90[1]: ~1,797 Boe/d
50% Oil, 67% Liquids

Recent Condensate Well Performance

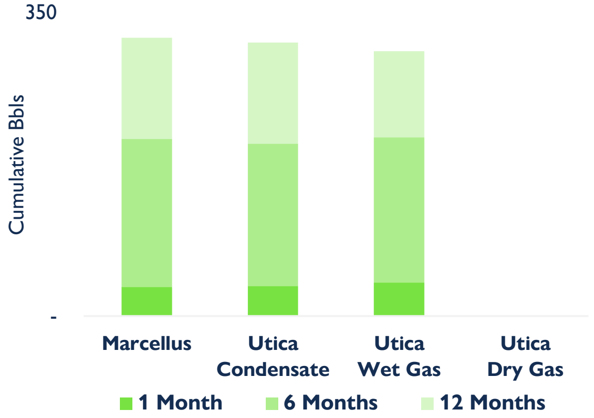


Cumulative MMcfe Production[2,3]

Utica dry gas, Utica liquids and Marcellus providing returns in excess of 70% IRR

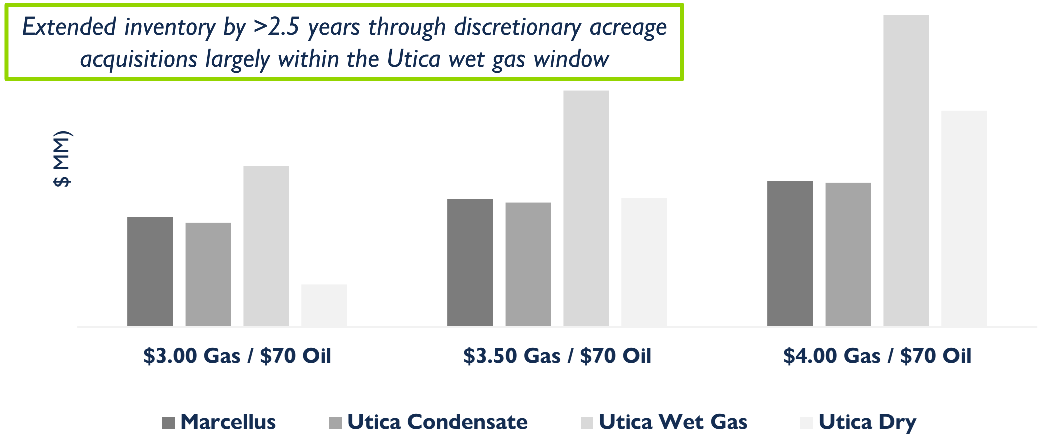


Cumulative Liquids Production[2]



Well Level Free Cash Flow Generated First 24 Months[2] ($MM)

Extended inventory by >2.5 years through discretionary acreage acquisitions largely within the Utica wet gas window

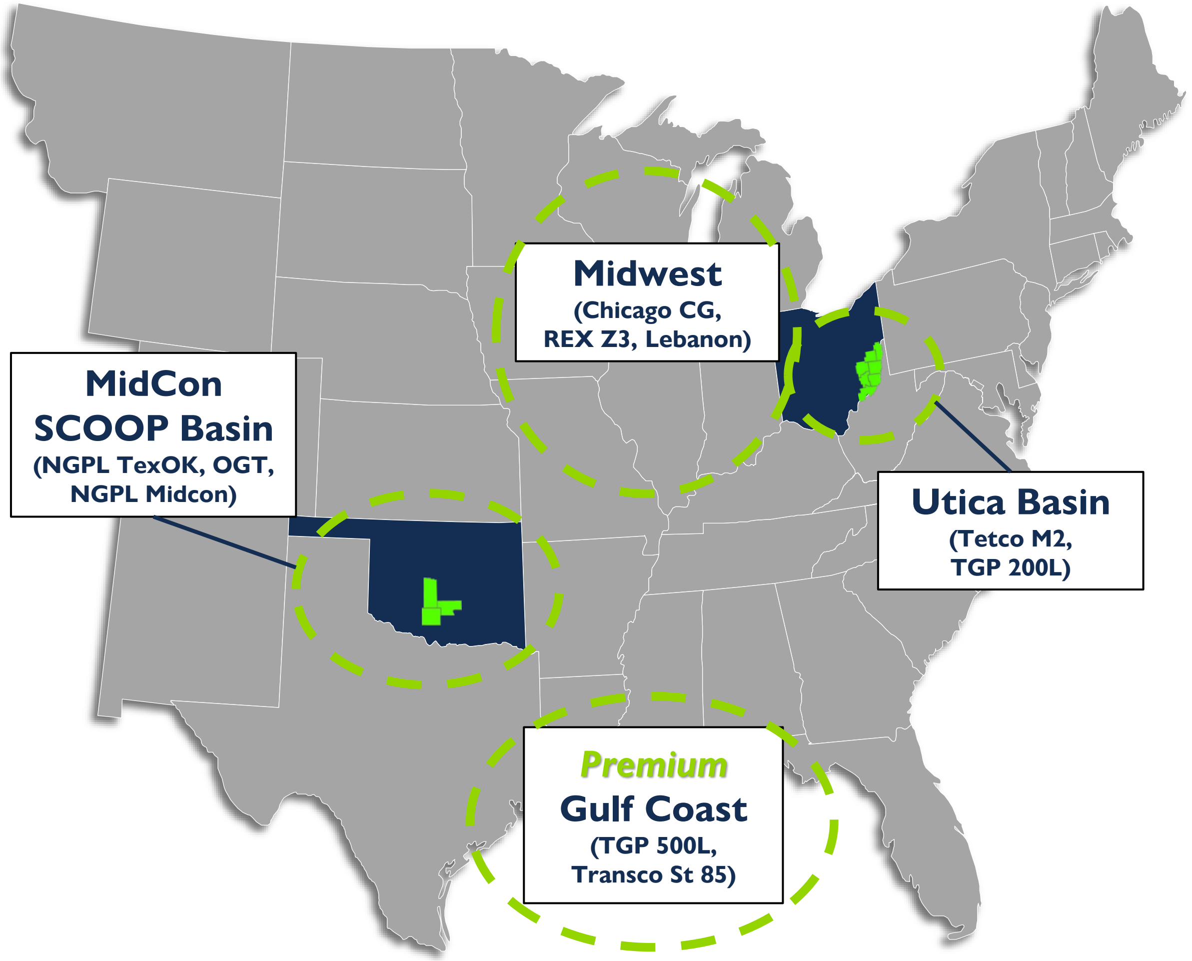


1. Production rate normalized to 15,000 ft lateral and assumes ethane rejection, per Gulfport's gathering contracts. Kage Avg IP30 in full ethane recovery totals 3,240 Boe/d, 56% oil and 77% liquids. Lake VII Avg IP90 in full ethane recovery totals 2,011 Boe/d, 44% oil and 75% liquids.
2. Representing average cumulative production by type curve area over the next five years of development. Utica Wet Gas assumes oil yield of < 15 Bbl / MMcf. Production data normalized to 15,000 ft lateral.
3. Based on flat $3.50 / Mcf natural gas and $70 / Bbl oil. Average internal rates of returns based on a 15,000' lateral length type curve for each defined development area over the next five years of development.

Advantaged Firm Portfolio Provides Access to Diverse Markets

- Diversified and right-sized takeaway capacity
  - 625,000 MMBtu/d[1] of firm takeaway from the Utica
  - 200,000 MMBtu/d[1] of firm takeaway from the SCOOP
- Strategic connectivity from wellhead provides access to premium basin egress pipelines and netback enhancement
- Premium Gulf Coast transportation allows delivery to growing LNG demand center and industrial corridor at NYMEX-plus pricing
- Proactively hedge in-basin exposure to secure pricing

Regional Exposure[1]		2025E[2]
Midwest	450,000 MMBtu/d firm takeaway	30% - 40%
Gulf Coast	175,000 MMBtu/d firm takeaway	10% - 15%
MidCon	200,000 MMBtu/d firm takeaway	15% - 20%
In-Basin Exposure		30% – 40%



1. Primary reservation volume only. Excludes zero-leg and secondary-leg reservation volume. Assumes run-rate gross reservation volume on a MMBtu/d basis.
2. Percentages represent approximate gross production exposure to basin regions.

Strong Capital Structure and Financial Profile

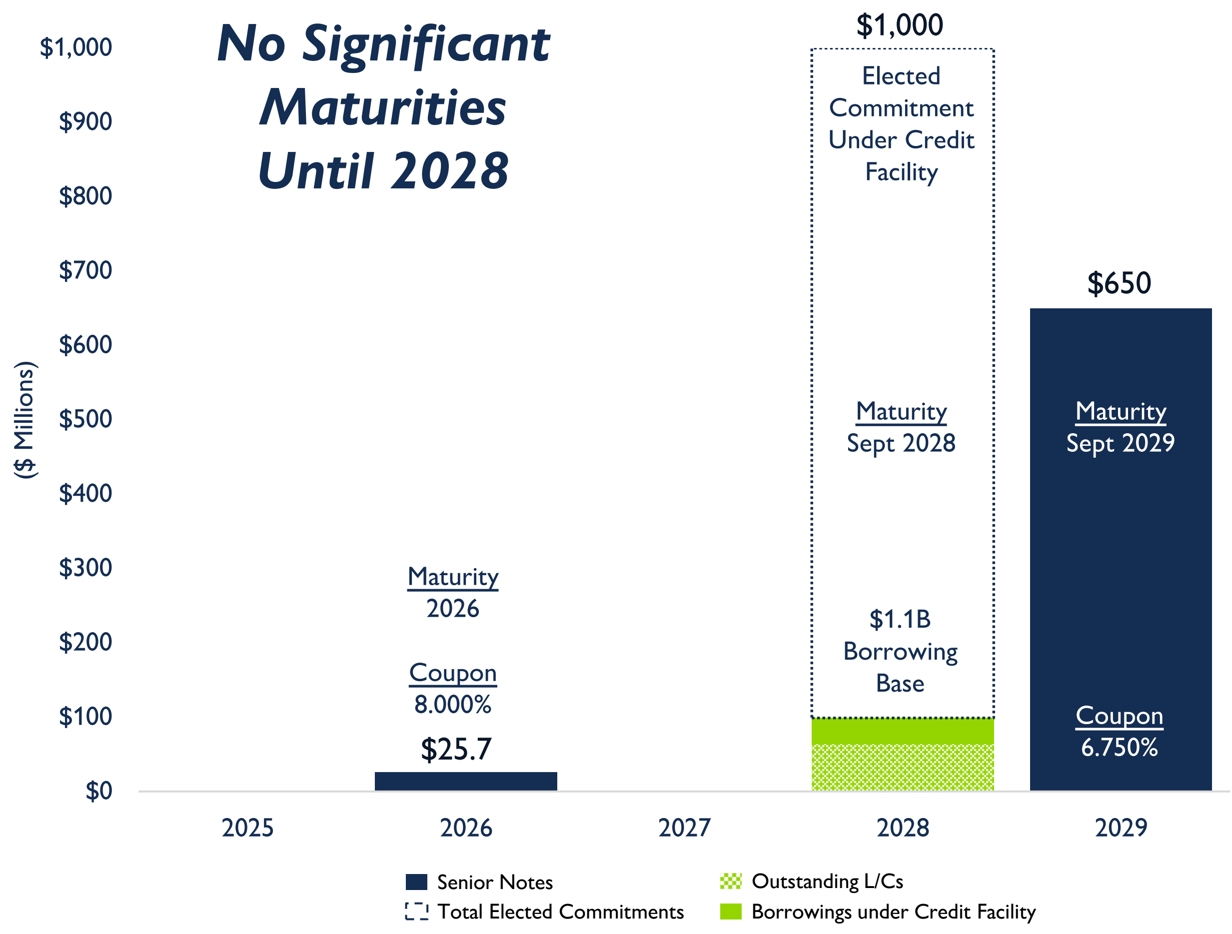
First Quarter 2025 Overview

Cash and Liquidity	• $5.3 million of cash equivalents • ~$906 million of liquidity(1)
Debt	• $35.0 million borrowings under credit facility • $25.7 million of senior notes due 2026 • $650 million of senior notes due 2029 • Leverage of 0.92x(2)

Preferred Equity	• Preferred stock: 32.9 thousand shares
	  • Dividend: 10% Cash / 15% Payment-in-Kind
	  • Convertible to ~2.3 million common shares

Common Equity	• Common stock: 17.8 million shares • Authorized common stock repurchase of up to $1.0 billion • Repurchased ~$644.1 million as of March 31, 2025

As of March 31, 2025



1. Liquidity as of 3/31/2025 and calculated as $5.3 million cash plus $901.1 million borrowing base availability, which takes into effect $35.0 million of borrowings on revolver and $63.9 million of letters of credit.
2. As of 3/31/2025 using net debt to TTM Adjusted EBITDA. Net debt is a non-GAAP measure. It is defined as total long-term debt minus cash and cash equivalents.

Focused on Continuous Improvement and Responsible Stewardship

Environmental

- **Achieved overall "A" rating for Appalachia assets from MiQ for second consecutive year**
- Lowered Scope 1 methane intensity rate(1) by 36% over the last 3 years
- Conducted Company's first climate risk assessment and integrated climate-related risk into Enterprise Risk Management (ERM) program
- Reused or recycled ~75% of our water generated from production and flowback
- Progressed in multi-year program to convert natural-gas driven pneumatic devices to air in the SCOOP

For additional information please refer to Gulfport's Corporate Sustainability Report

www.gulfportenergy.com/sustainability

Improved Methane Intensity Rate

36%(1) since 2021

Reduced Combined Total Recordable Incident Rate

74% since 2021

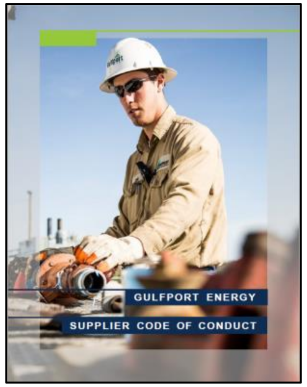
Social

- Reduced combined total recordable incident rate by 44% in 2024 compared to 2023 and 74% since 2021
- Partnered with organizations that support Gulfport's key focus areas: education, health and human services, environmental stewardship and military and veterans
- Paid over $360 million in royalties to local landowners and working interest owners in 2023

Governance

- Experienced 7-member board including, 5 independent directors
- Separated role of Chairman and CEO while retaining Lead Independent Director role
- Increased environmental, safety, and governance short-term compensation incentive metrics to a 30% weighting

Vendor Code of Conduct can be found on Gulfport's website



Note: More details on our initiatives can be found on the Gulfport website: www.gulfportenergy.com
1. Reported full year 2023 and based on EPA required Subpart W reporting.

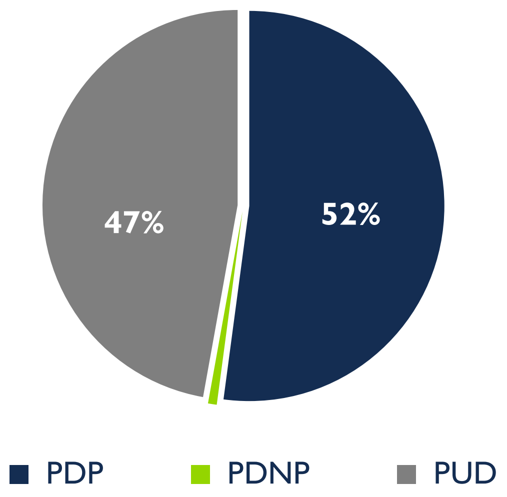
Gulfport ENERGY

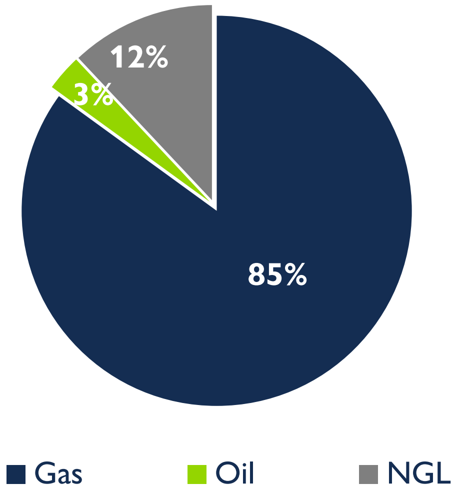
Appendix

2024 Proved Reserve Summary

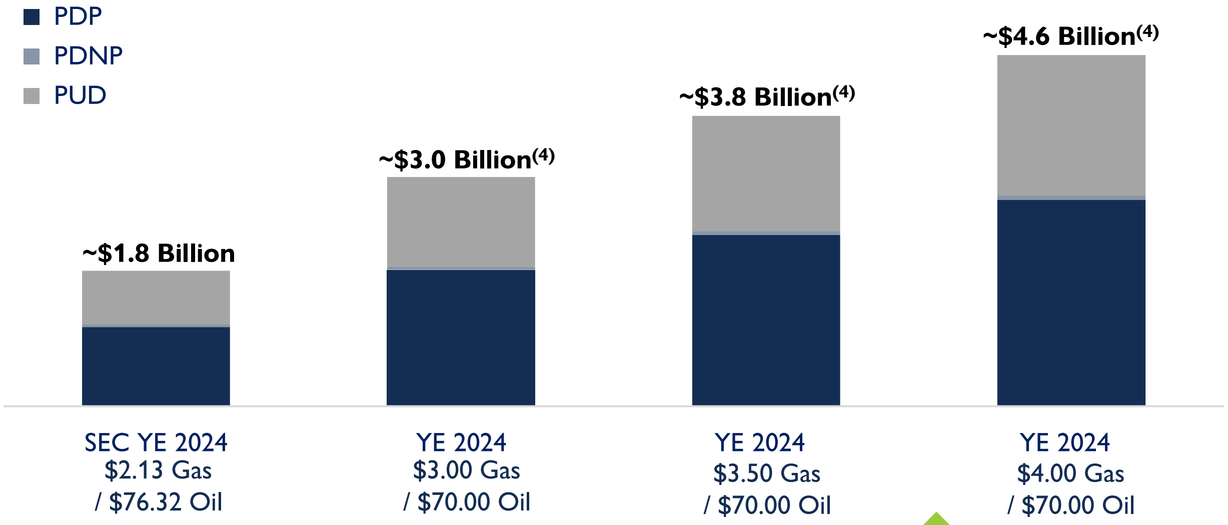
Net Reserves as of December 31, 2024[1]				
	Gas (Bcf)	Oil (MMBbls)	NGL (MMBbls)	Total (Bcfe)
Proved Developed Producing	1,844	7	29	2,061
Proved Developed Non-Producing	34	0	2	47
Proved Undeveloped[2]	1,478	15	49	1,861
Total Proved Reserves	3,356	22	80	3,969

Proved Reserve Components





SEC Year End Proved Reserves PV-10[3,4]



1. Per Company reserve report for year ending 12/31/24.
2. Proved undeveloped reserves, under SEC reserve reporting guidelines, only includes wells scheduled to be drilled within the next five years.
3. PV-10 is a non-GAAP measure; see supplemental slides.
4. Flat price cases at stated price scenarios.

Reaffirm Full Year 2025 Guidance

	FY 2025E	
Production	**Guidance**	
Net Daily Gas Equivalent – MMcfe/day	1,040	1,065
Net Daily Liquids Production – MBbls/day	18.0	20.5
% Gas	~89%	
Realizations (before hedges)[1]		
Natural Gas (Differential to NYMEX) - $/Mcf	($0.20)	($0.35)
NGL (% of WTI)	40%	50%
Oil (Differential to NYMEX WTI) - $/Bbl	($5.50)	($6.50)
Expenses		
Lease Operating Expense - $/Mcfe	$0.19	$0.22
Taxes Other Than Income - $/Mcfe	$0.08	$0.10
GPT&C - $/Mcfe	$0.93	$0.97
Recurring Cash G&A[2] - $/Mcfe	$0.12	$0.14

	FY 2025E	
Incurred Capital Expenditures – $ millions	**Guidance**	
Operated D&C	$335	$355
Maintenance Leasehold and Land	$35	$40
Total Base Capital Expenditures	$370	$395

2025E Adjusted Free Cash Flow Generation

- Significant increase in adjusted free cash flow[3] generation in current commodity market[1]
- Plan to allocate substantially all adjusted free cash flow[3], excluding acquisitions, towards common stock repurchases

Note: Guidance for the year ending 12/31/25 is based on multiple assumptions and certain analyses made by the Company based on its experience and perception of historical trends and current conditions and may change due to future developments. Actual results may not conform to the Company's expectations and predictions. Please refer to page 2 for more detail of forward-looking statements.

1. Based upon current forward pricing at April 16, 2025 and basis marks.
2. Recurring cash G&A is a non-GAAP financial measures; see supplemental slides.
3. Adjusted free cash flow is a non-GAAP financial measures; see supplemental slides. Excludes discretionary acreage acquisitions and common stock repurchases.

Development Plan Overview

	2024 Operated Activity			2025 Operated Activity		
		Well Count	Lateral		Well Count	Lateral

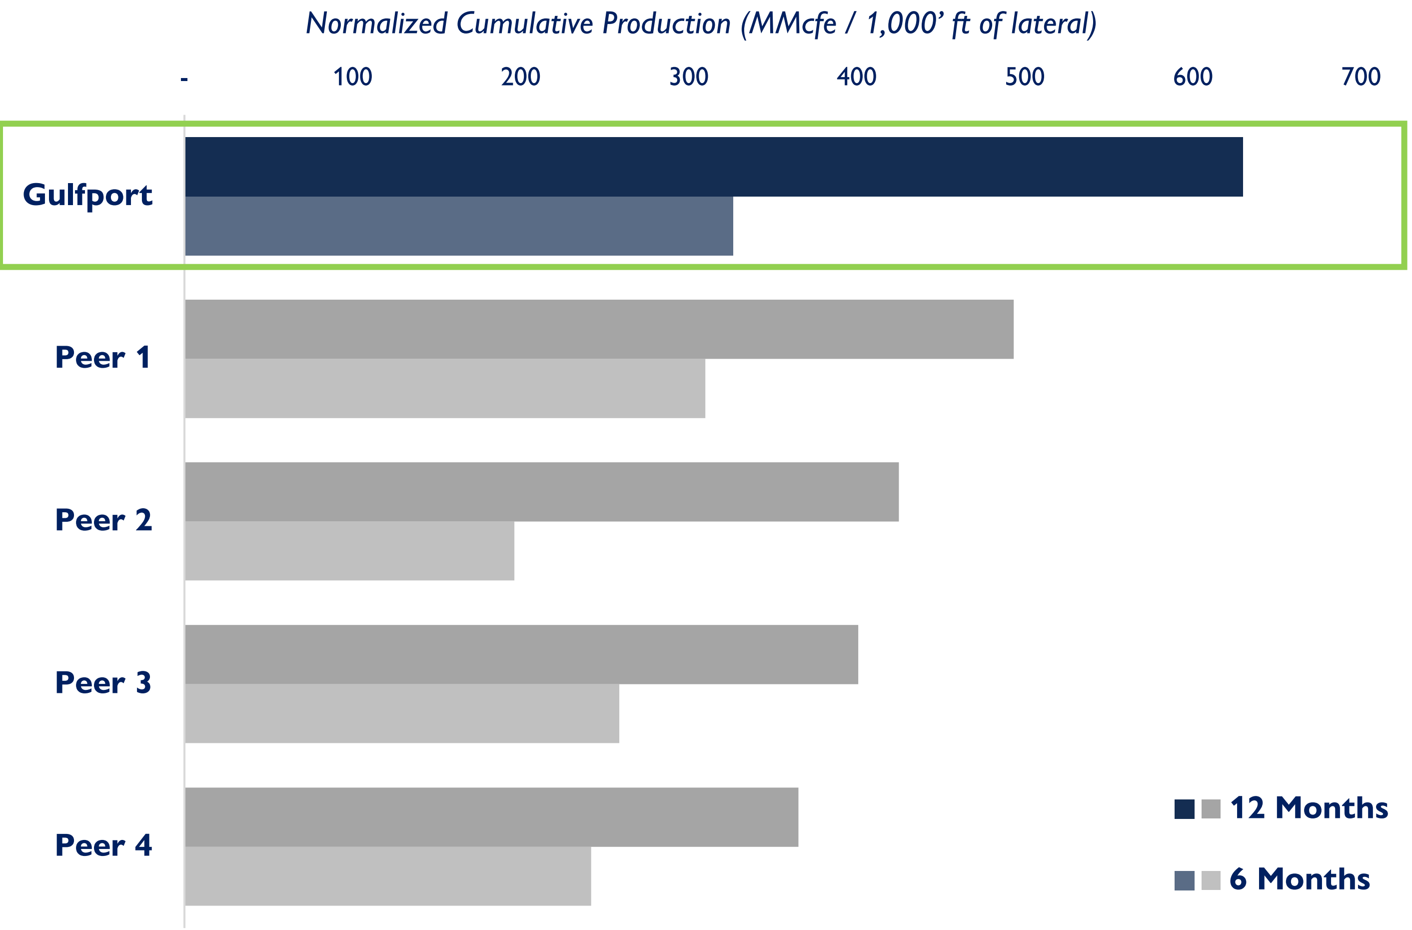
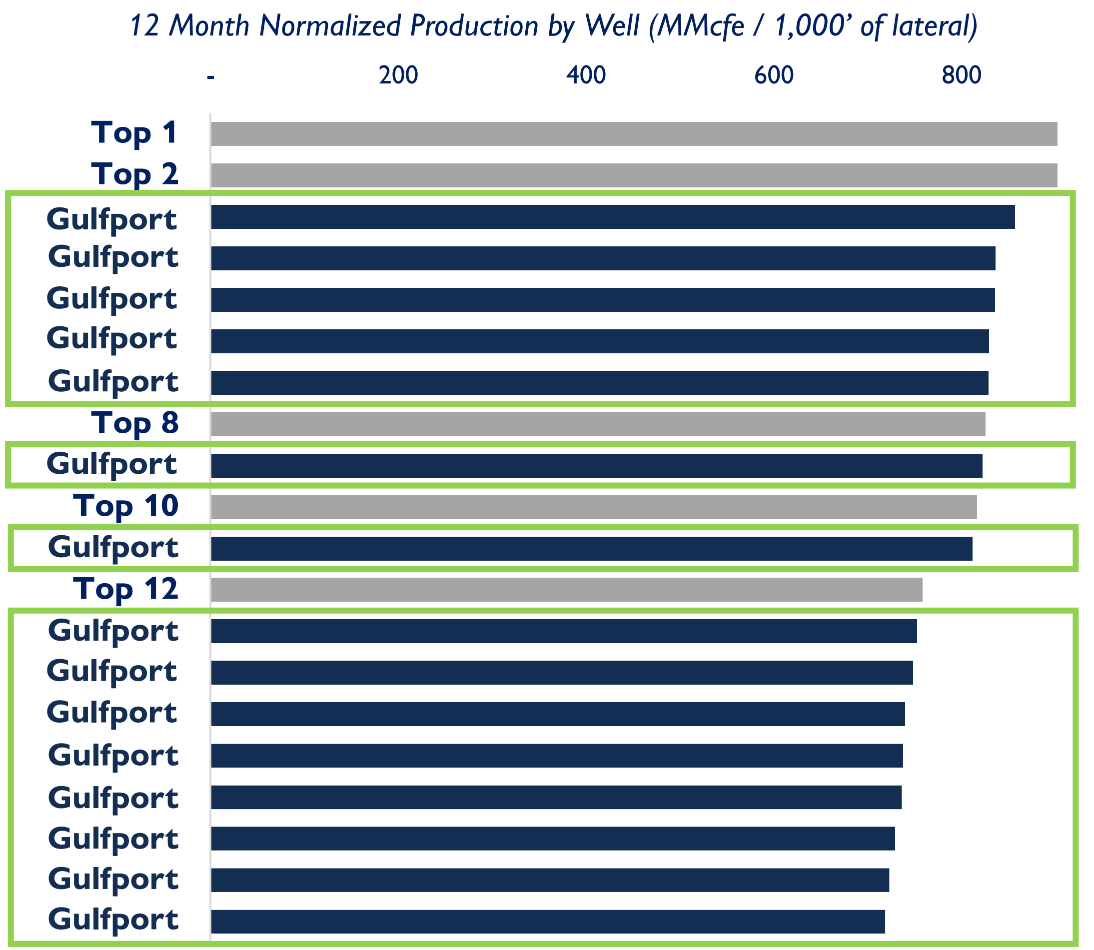
2. April 2025 – December 2025.

Recent Utica Well Performance

Gulfport Utica Well Productivity Outperforming Peers[1]



Top 20 Performing Utica Wells[1]

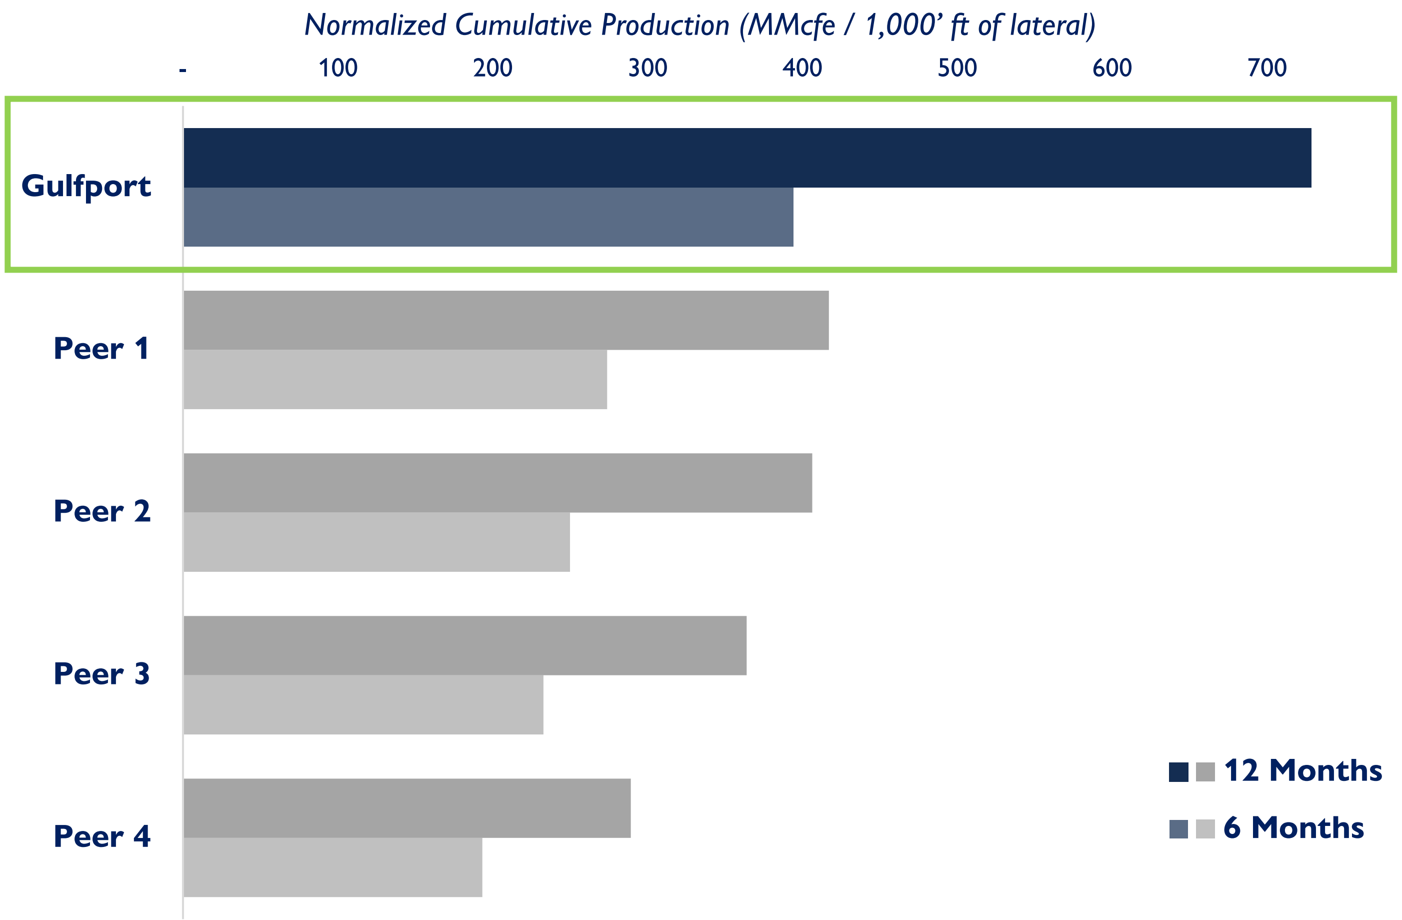


Note: Gulfport well data is sourced internally. All peer data sourced from Enverus. Includes all wells with equal or greater than 7,000' lengths brought online since 2021 with at least twelve months of production data available. Peers include Ascent Resources, Encino Energy, EQT and Expand Energy.

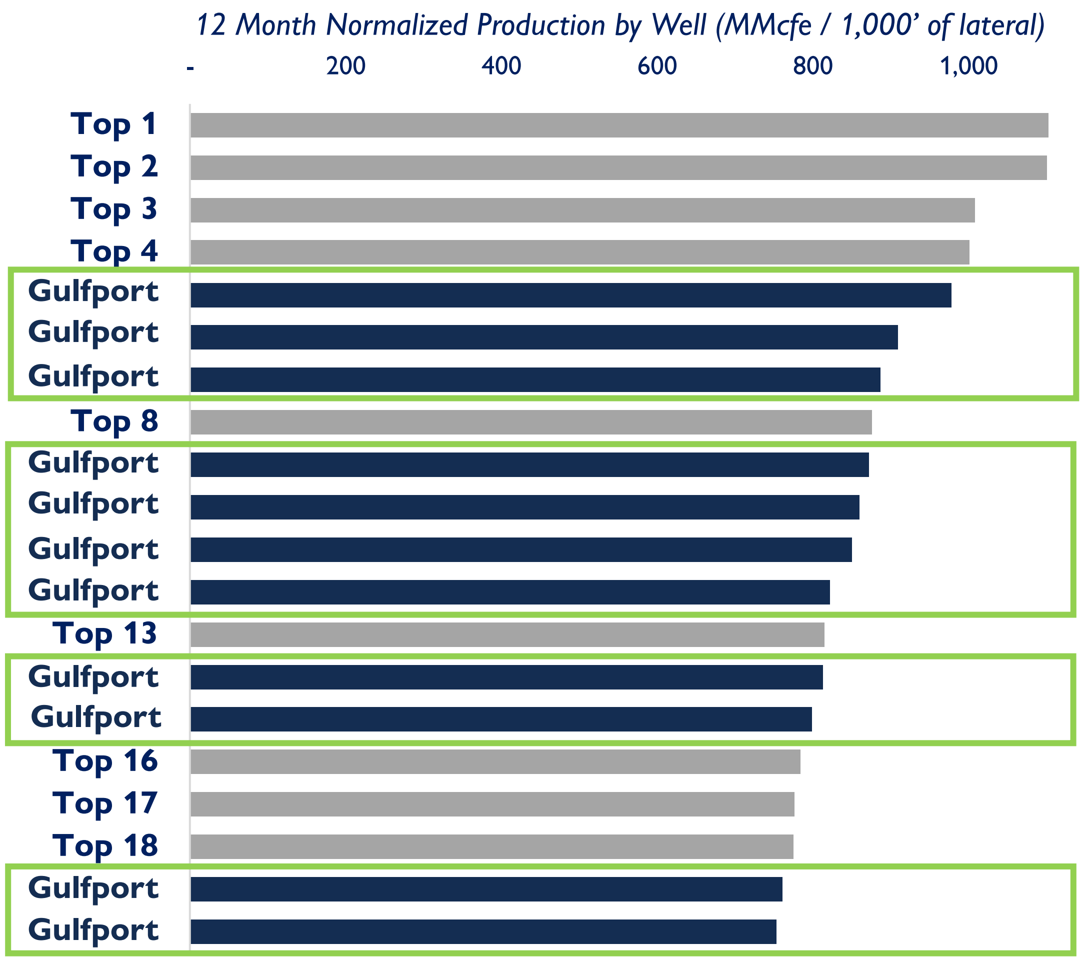
1. Data is two-stream equivalents. Mcfe is equal to one thousand cubic feet of natural gas equivalent, with one barrel of oil being equivalent to 20,000 cubic feet of natural gas.

Recent SCOOP Well Performance

Gulfport Oklahoma Well Productivity Outperforming Peers[1]



Top 20 Performing SCOOP / STACK Wells[1]



Note: Gulfport well data is sourced internally. All peer data sourced from Enverus. Includes all wells with equal or greater than 7,000’ lengths brought online since 2021 with at least twelve months of production data available. Peers include Continental Resources, Devon Energy, ConocoPhillips and Ovintiv.

1. Data is two-stream equivalents. Mcfe is equal to one thousand cubic feet of natural gas equivalent, with one barrel of oil being equivalent to 20,000 cubic feet of natural gas.

Adjusted EBITDA

Adjusted EBITDA is a non-GAAP financial measure equal to net (loss) income, the most directly comparable GAAP financial measure, plus interest expense, income tax expense (benefit), depreciation, depletion and amortization, and accretion, net non-cash derivative loss (gain), non-recurring general and administrative expenses comprised of expenses related to the continued administration of our prior Chapter 11 filing, stock-based compensation and other items which include non-material expenses.

Below is a reconciliation of net (loss) income (a GAAP measure) to Adjusted EBITDA. This non-GAAP measure should be considered by the reader in addition to, but not instead of, the financial statements prepared in accordance with GAAP.

(In thousands) (Unaudited)	Three Months Ended March 31, 2025	Three Months Ended March 31, 2024
Net (loss) income (GAAP)	$ (464)	$ 52,035
Adjustments:		
Interest expense	13,356	15,003
Income tax (benefit) expense	(176)	14,853
DD&A and accretion	66,240	80,578
Non-cash derivative loss	136,658	20,186
Non-recurring general and administrative expenses	365	810
Stock-based compensation expenses	3,040	2,403
Other, net	(702)	(125)
Adjusted EBITDA (Non-GAAP)	$ 218,317	$ 185,743

Adjusted Free Cash Flow

Adjusted free cash flow is a non-GAAP measure defined as adjusted EBITDA plus certain non-cash items that are included in net cash provided by (used in) operating activities but excluded from adjusted EBITDA less interest expense, current income tax expense (benefit), capitalized expenses incurred and capital expenditures incurred, excluding discretionary acreage acquisitions. Gulfport includes ranges of expectations for adjusted free cash flow for 2025. We are unable, however, to provide a quantitative reconciliation of the forward-looking non-GAAP measure to its most directly comparable forward-looking GAAP measure because management cannot reliably quantify certain of the necessary components of such forward-looking GAAP measure. Accordingly, Gulfport is relying on the exception provided by Item 10(e)(1)(i)(B) of Regulation S-K to exclude such reconciliation. Items excluded in net cash provided by operating activities to arrive at adjusted free cash flow include interest expense, income taxes, capitalized expenses as well as one-time items or items whose timing or amount cannot be reasonably estimated.

Below is a reconciliation of net cash provided by operating activities (the most comparable GAAP measure) to free cash flow. This non-GAAP measure should be considered by the reader in addition to, but not instead of, the financial statements prepared in accordance with GAAP.

(In thousands)
(Unaudited)

	Three Months Ended March 31, 2025	Three Months Ended March 31, 2024
Net cash provided by operating activity (GAAP)	$ 177,280	$ 188,022
Adjustments:		
Interest expense	13,356	15,003
Non-recurring general and administrative expenses	365	810
Current income tax benefit	(169)	—
Other, net	(1,875)	(1,138)
Changes in operating assets and liabilities, net		
Accounts receivable - oil, natural gas, and natural gas liquids sales	2,118	(37,457)
Accounts receivable - joint interest and other	20	4,145
Accounts payable and accrued liabilities	27,674	16,656
Prepaid expenses	(485)	(299)
Other assets	33	1
Total changes in operating assets and liabilities	$ 29,360	$ (16,954)
Adjusted EBITDA (Non-GAAP)	$ 218,317	$ 185,743
Interest expense	(13,356)	(15,003)
Current income tax benefit	169	—
Capitalized expenses incurred[1]	(6,165)	(5,654)
Capital expenditures incurred, excluding discretionary acreage acquisitions[2,3,4]	(162,362)	(126,238)
Adjusted free cash flow (Non-GAAP)	$ 36,603	$ 38,848

1. Includes cash capitalized general and administrative expense and incurred capitalized interest expenses.
2. Incurred capital expenditures and cash capital expenditures may vary from period to period due to the cash payment cycle.
3. For the three months ended March 31, 2025, includes $1.4 million and $1.2 million of non-D&C capital and non-operated capital expenditures, respectively.
4. For the three months ended March 31, 2024, includes $1.8 million and $2.7 million of non-D&C capital and non-operated capital expenditures, respectively.

Recurring General and Administrative (G&A) Expense

Recurring general and administrative expense is a non-GAAP financial measure equal to general and administrative expense (GAAP) plus capitalized general and administrative expense, less non-recurring general and administrative expenses comprised of expenses related to the continued administration of our prior Chapter 11 filing. Gulfport includes a recurring cash general and administrative expense estimate for 2025. We are unable, however, to provide a quantitative reconciliation of the forward-looking non-GAAP measure to its most directly comparable forward-looking GAAP measure because management cannot reliably quantify certain of the necessary components of such forward-looking GAAP measure. Accordingly, Gulfport is relying on the exception provided by Item 10(e)(1)(i) (B) of Regulation S-K to exclude such reconciliation. Items excluded in general and administrative expense to arrive at recurring general and administrative expense include capitalized expenses as well as one-time items or items whose timing or amount cannot be reasonably estimated.

Below is a reconciliation of general and administrative expense (the most comparable GAAP measure) to recurring general and administrative expense. This non-GAAP measure should be considered by the reader in addition to, but not instead of, the financial statements prepared in accordance with GAAP.

Present value of estimated future net revenue (PV-10)

PV – 10 is a non-GAAP measure derived from standardized measure of discounted future new cash flows (GAAP). Management uses PV-10, which is calculated without deducting estimated future income tax expenses, as a measure of the value of the Company's current proved reserves and to compare relative values among peer companies. We also understand that securities analysts and rating agencies use this measure in similar ways. While estimated future net revenue and the present value thereof are based on prices, costs and discount factors which may be consistent from company to company, the standardized measure of discounted future net cash flows is dependent on the unique tax situation of each individual company. PV-10 should not be considered in isolation or as a substitute for the standardized measure of discounted future net cash flows or any other measure of a company's financial or operating performance presented in accordance with GAAP.

A reconciliation of the standardized measure of discounted future net cash flows to PV-10 is presented below. Neither PV-10 nor the standardized measure of discounted future net cash flows purport to represent the fair value of our proved oil and gas reserves.

(In thousands)
(Unaudited)

	December 31, 2024			December 31, 2023		
	Proved Developed	Proved Undeveloped	Total Proved	Proved Developed	Proved Undeveloped	Total Proved
Estimated future net revenue	$1,620	$1,876	$3,496	$2,535	$2,235	$4,769
Present value of estimated future net revenue (PV-10)	$1,059	$699	$1,757	$1,590	$819	$2,409
Standardized measure			$1,747			$2,383

Note: Reserves as of December 31, 2024 utilized prices of $76.32/Bbl of oil, $31.30/Bbl for NGLs and $2.13/MMBtu of natural gas. Reserves as of December 31, 2023 utilized prices of $78.21/Bbl of oil, $31.42/Bbl for NGLs and $2.64/MMBtu of natural gas. Prices are determined in accordance with the SEC requirement to use the unweighted arithmetic average of the first day-of-the-month price for the preceding twelve months without giving effect to derivative transactions.

Thank You.
