Cybersecurity Risk Management and Strategy

We have developed and implemented a cybersecurity risk management program intended to protect the confidentiality, integrity, and availability of our critical systems and information. Our cybersecurity risk management program includes a cybersecurity incident response plan.

We design and assess our program based on the National Institute of Standards and Technology Cybersecurity Framework (NIST CSF). This does not imply that we meet any particular technical standards, specifications, or requirements, only that we use the NIST CSF as a guide to help us identify, assess, and manage the cybersecurity risks that are relevant to our business.

Our cybersecurity risk management program is integrated into, and forms an integral part of, our overall enterprise risk management program, and shares common methodologies, reporting channels and governance processes that apply across the enterprise risk management program to other legal, compliance, strategic, operational, and financial risk areas.

We have established a proactive approach to identify and manage material cybersecurity threats which includes, but is not limited to, the following:

•An end-user cybersecurity awareness program that requires annual training completion, monthly simulated phishing emails to assess user susceptibility and provide training on emerging threats, and ongoing awareness communications throughout the year to reinforce learnings and raise awareness of specific, actively exploited threat vectors;

•Security policies and practices aligned with NIST Special Publication 800-171, Revision 2 (NIST 800-171 Rev 2) and the organization's enterprise risk management requirements;

•Annual cybersecurity reporting and strategic update to ITT's Board of Directors;

•Enterprise-wide centralized Security Information and Event Management (SIEM);

•Regular red-team attack simulations led by industry-leading third-party cybersecurity firms;

•Continuous internal and external facing vulnerability management scanning;

•Threat intelligence feeds from various external sources (fee and non-fee based);

•Threat hunting;

•Strategically deployed artificial intelligence-based threat detection technology;

•Cyber risk assessment and classification processes;

•Cyber threat tabletop simulation exercises;

<div style="margin-bottom:3pt;padding-

left:36pt;text-align:justify;text-indent:-18pt">•Cyber Incident Response Plan processes; •Externally led, targeted threat hunting exercises; •Engagement of forensic cybersecurity and data analysis firms (as needed) to conduct independent validation assessments if a breach is suspected and/or validated; •Engagements with third party consultants to build, design, and improve cyber risk management tools and processes; •Third-party technology and service provider risk evaluation process; and •Cybersecurity insurance coverage. During 2024, there were no cybersecurity incidents that had a material effect on the Company. Furthermore, we have not identified risks from known cybersecurity threats, including as a result of any prior cybersecurity incidents, that have materially affected us to date, including our business, business strategy, results of operations, or financial condition. For a discussion of prospective risks related to potential cybersecurity incidents, please refer to Item 1A, Risk Factors. Our cybersecurity risk management program is integrated into, and forms an integral part of, our overall enterprise risk management program, and shares common methodologies, reporting channels and governance processes that apply across the enterprise risk management program to other legal, compliance, strategic, operational, and financial risk areas. truetruetruetrueFor a discussion of prospective risks related to potential cybersecurity incidents, please refer to Item 1A, Risk Factors. Cybersecurity Governance Our Board considers cybersecurity risk as part of its risk oversight function and has delegated to the Audit Committee oversight of cybersecurity and other information technology risks. The Audit Committee oversees management's implementation of our cybersecurity risk management program and discusses with management the Company's cybersecurity and other information technology risks, controls, and procedures. The Board receives annual reports from management on our cybersecurity risks and strategic updates. These reports are designed to provide the Board a view into the progress of previous efforts, an update on existing and new material risks, and an overview of proposed or planned cybersecurity-related projects, and foster a discussion of cyber threats trending within the industry and their applicability to the organization. If a new material risk is identified, or if the Company is impacted by a material security incident, the Audit Committee and the full Board of Directors are notified and apprised of developments. ITT employs a team of certified cybersecurity professionals responsible for assessing and managing cybersecurity risks, led by the Chief Information Security Officer (CISO), who altogether make up ITT's Cyber Security Operations Center (CSOC). The qualifications of our cybersecurity team include the following industry-recognized certifications: ISC2 Certified Information Systems Security Professional (CISSP), Certified Cloud Security Professional (CCSP), Certified Ethical Hacker (C|EH), Security+, and IAPP Certified Information Privacy Professional (CIPP/US). Additionally, our cybersecurity team possesses several certifications from the SANS Institute's Global Information Assurance Certification (GIAC) program, the top cybersecurity accreditation body in the world. These include GIAC Incident Handler Certification (GCIH), GIAC Certified Systems and Network Auditor (GSNA), GIAC Foundational Cybersecurity Technologies (GFACT) and others. The CSOC monitors the global ITT landscape for cyber threats, provides prevention strategies, initiates incident response for detected intrusions, and prescribes proactive and reactive mitigation strategies. The CSOC serves as the cornerstone for protecting, assessing, and managing cybersecurity risks for the enterprise, which includes, but is not limited to, back-office processes, critical manufacturing processes, intellectual property, and sensitive data. The CISO reports to the Chief Information Officer (CIO), who in turn reports to the Chief Financial Officer (CFO). The CIO has over 21 years of experience in information technology, including 14 years at ITT, while the CISO brings over 28 years of experience in information technology, with the last 22 years focused on information security and cybersecurity across various industries. The combined expertise and qualifications of our cybersecurity team enable us to effectively monitor, assess, and respond to cybersecurity threats. <div

style="margin-bottom:12pt;margin-top:6pt;text-align:justify;text-indent:18pt">Management is actively informed about, and monitors, cybersecurity incidents, including their prevention, detection, mitigation, and remediation, through defined processes and reporting mechanisms. This proactive approach includes the alignment of security policies and practices with NIST 800-171 Rev 2 and the organization's enterprise risk management requirements. Twice annually, the CFO and CEO are briefed by the CISO and CIO regarding ongoing projects, investments and changes to the threat landscape that have impacted, or may impact, the organization, ensuring that the highest levels of management are kept abreast of the Company's cybersecurity posture. Overall, this comprehensive approach ensures that management is well-informed and actively involved in safeguarding the Company from cybersecurity threats. This proactive approach includes the alignment of security policies and practices with NIST 800-171 Rev 2 and the organization's enterprise risk management requirements. Twice annually, the CFO and CEO are briefed by the CISO and CIO regarding ongoing projects, investments and changes to the threat landscape that have impacted, or may impact, the organization, ensuring that the highest levels of management are kept abreast of the Company's cybersecurity posture. Overall, this comprehensive approach ensures that management is well-informed and actively involved in safeguarding the Company from cybersecurity threats. 4245000000.0480falsefalsefalsefalse34Deloitte & Touche LLPStamford, Connecticut36307000003283000000298770000023834000002175700000206540000012473000001107300000922300000081000000-5000001000001630000067600000000.052820000046800000000.036600000192000001090000006600000880000045000000

Basis of Presentation The Consolidated Financial Statements and Notes thereto were prepared in conformity with accounting principles generally accepted in the United States of America (GAAP). The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Estimates are revised as additional information becomes available. Estimates and assumptions are used for, but not limited to, revenue recognition, unrecognized tax benefits, deferred tax valuation allowances, projected benefit obligations for postretirement plans, accounting for business combinations, goodwill and other intangible asset impairment testing, environmental liabilities, allowance for credit losses and inventory valuation. Actual results could differ from these estimates. Certain prior year amounts have been reclassified to conform to the current year presentation. Significant Accounting Policies Principles of Consolidation Our consolidated financial statements include the accounts of all majority-owned subsidiaries. ITT consolidates companies in which it has a controlling financial interest or when ITT is considered the primary beneficiary of a variable interest entity. The results of companies acquired or disposed of during the fiscal year are included in the Consolidated Financial Statements from the effective date of acquisition or up to the date of disposal. All intercompany transactions have been eliminated. Revenue Recognition Revenue is derived from the sale of products and services to customers. We recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which we expect to be entitled in exchange for those goods or services. For product sales, we consider practical and contractual limitations in determining whether there is an alternative use for the product. For example, long-term design and build contracts are typically highly customized to a customer's specifications. For contracts with no alternative use and an enforceable right to payment for work performed to date, including a reasonable profit if the contract were to be terminated at the customer's convenience for reason other than nonperformance, we recognize revenue over time. All other product sales are recognized at a point in time. For contracts recognized over time, we use the cost-to-cost method or the units-of-delivery method, depending on the nature of the contract, including length of production time. For contracts recognized at a point in time, we recognize revenue when control passes to the customer, which is generally based on shipping terms that address when title and risk and rewards pass to the customer. However, we also consider certain customer acceptance provisions as certain contracts with customers include installation, testing, certification or other acceptance provisions. In instances where contractual terms include a provision for customer acceptance, we consider whether we have previously demonstrated that the product meets objective criteria specified by either the seller or customer in assessing whether control has passed to the customer. For service contracts, we recognize revenue as the services are rendered if the customer is benefiting from the service as it is performed, or otherwise upon completion of the service. Separately priced extended warranties are recognized as a separate performance obligation over the warranty period. The transaction price in our contracts consists of fixed consideration and the impact of variable consideration including returns, rebates and allowances, and penalties. Variable consideration is generally estimated using a probability-weighted approach based on historical experience, known trends, and current factors including market conditions and status of negotiations. When there is more than one performance obligation, the transaction price is allocated to the performance obligations based on the relative estimated standalone selling prices. If not sold separately, estimated standalone selling prices are determined considering various factors including market and pricing trends, geography, product customization, and profit objectives. Revenue is recognized when the appropriate revenue recognition criteria for the individual performance obligations have been satisfied. Revenue is reported net of any required taxes collected from customers and remitted to government authorities, with the collected taxes recorded as current liabilities until remitted to the relevant government authority. Shipping and handling activities are accounted for as activities to fulfill a promise to transfer a product to a customer. As such, shipping and handling activities are not evaluated as a separate performance obligation. For most contracts, payment is due from the customer within 30 to 90 days after the product is delivered or the service has been performed. For design and build contracts, we generally collect progress payments from the customer throughout the term of the contract, resulting in contract assets or liabilities

depending on the timing of the payments. Contract assets consist of unbilled amounts when revenue recognized exceeds customer billings. Contract liabilities consist of advance payments and billings in excess of revenue recognized. Design and engineering costs for highly complex products to be sold under a long-term production-type contract are capitalized and amortized in a manner consistent with revenue recognition of the related contract or anticipated contract. Other design and development costs are capitalized only if there is a contractual guarantee for reimbursement. Costs to obtain a contract (e.g., commissions) for contracts greater than one year are capitalized and amortized in a manner consistent with revenue recognition of the related contract. Product Warranties Our standard product warranty terms generally include post-sales support and repairs or replacement of a product at no additional charge for a specified period of time. Accruals for estimated expenses related to product warranties are made at the time revenue is recognized and are recorded as a component of costs of revenue. We estimate the liability for warranty claims based on our standard warranties, the historical frequency of claims and the cost to replace or repair our products under warranty. Factors that influence our warranty liability include the number of units sold, the length of warranty term, historical and anticipated rates of warranty claims and the cost per claim. Postretirement Benefit Plans ITT sponsors numerous pension and other employee-related defined benefit plans (collectively, postretirement benefit plans). Substantially all of our U.S. postretirement benefit plans are closed to new participants. Postretirement benefit obligations are generally determined, where applicable, based on participant years of service, future compensation, age at retirement or termination, and the assumed rate of future healthcare cost increases. The determination of projected benefit obligations and the recognition of expenses related to postretirement benefit plans are dependent on various assumptions that are judgmental. The assumptions involved in the measurement of our postretirement benefit plan obligations and net periodic postretirement costs primarily relate to discount rates, mortality and termination rates, and other factors. Management develops each assumption using relevant Company experience in conjunction with market-related data for each individual country in which such plans exist. Actual results that differ from our assumptions are accumulated and are amortized over the estimated future working life, or remaining lifetime, of the plan participants depending on the nature of the retirement plan. The funded status of all plans is recorded on our balance sheet. Actuarial gains and losses and prior service costs or credits that have not yet been recognized through net income are recorded in accumulated other comprehensive income within shareholders' equity, net of taxes, until they are amortized as a component of net periodic postretirement cost. Research & Development Research and development activities are charged to expense as incurred. R&D as a percentage of sales was 3.2%, 3.1%, and 3.2% during 2024, 2023 and 2022, respectively. Income Taxes We determine the provision for income taxes using the asset and liability approach. Under this approach, deferred income tax assets and liabilities are determined based on the estimated future tax effects of differences between the financial reporting and tax bases of assets and liabilities, applying currently enacted tax rates in effect for the year in which we expect the differences will reverse. The ultimate realization of deferred tax assets is dependent on the generation of future taxable income (including the reversals of deferred tax liabilities) during the periods in which those deferred tax assets will become deductible. We record a valuation allowance against our deferred tax assets when it is more likely than not that all or a portion of the deferred tax assets will not be realized. In assessing the need for a valuation allowance, the Company considers all available positive and negative evidence regarding the realizability of its deferred tax assets, including the future reversal of existing taxable temporary differences, taxable income in carryback periods, prudent and feasible tax planning strategies, estimated future taxable income, and whether we have a recent history of losses. The valuation allowance can be affected by changes to tax regulations, interpretations and rulings, changes to enacted statutory tax rates, and changes to future taxable income estimates. We have not provided deferred tax liabilities for the impact of U.S. income taxes on book over tax basis which we consider indefinitely reinvested outside the U.S. We plan foreign earnings remittance amounts based on projected cash flow needs, as well as the working capital and long-term investment requirements of foreign subsidiaries and our domestic operations. Furthermore, we recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position in consideration of applicable tax statutes and related interpretations and precedents and the expected outcome of the proceedings (or negotiations) with the taxing authorities. Tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized on ultimate settlement. The Company has elected to account for Global Intangible Low Taxed Income as a current period expense when incurred. See Note 5, <a href="#i48f27b58da5f46169499f7ae9057b492_262" style="color:#0000ff;font-family:'Arial',sans-serif;font-

size:10pt;font-weight:400;line-height:120%;text-decoration:underline">Income Taxes, for additional information. Earnings Per Share Basic earnings per common share considers the weighted average number of common shares outstanding. Diluted earnings per share considers the outstanding shares utilized in the basic earnings per share calculation as well as the dilutive effect of outstanding stock options and restricted stock that do not contain rights to nonforfeitable dividends. Diluted shares outstanding include the dilutive effect of in-the-money options, unvested restricted stock units and unvested performance stock units. The dilutive effect of such equity awards is calculated based on the average share price for each reporting period using the treasury stock method. Common stock equivalents are excluded from the computation of earnings per share if they have an anti-dilutive effect. See Note 6, Earnings Per Share Data, for additional information. Cash and Cash Equivalents ITT considers all highly liquid investments purchased with an original maturity or remaining maturity at the time of purchase of three months or less to be cash equivalents. Cash equivalents primarily include fixed-maturity time deposits and money market investments. Restricted cash was $0.7 as of December 31, 2024 and December 31, 2023. Restricted cash is presented within Other current assets and Other non-current assets in our Consolidated Balance Sheets. Concentrations of Credit Risk Financial instruments that potentially subject ITT to significant concentrations of credit risk consist principally of cash and cash equivalents, accounts and notes receivables from trade customers, investments, and derivative financial instruments. We maintain cash and cash equivalents with various financial institutions located in different geographical regions, and our policy is designed to limit exposure to any individual counterparty. Derivative financial instruments are transacted with multiple highly reputable financial institutions. As part of our risk management processes, we perform periodic evaluations of the relative credit standing of the financial institutions with which we transact. We have not sustained any material credit losses during the previous three years with respect to financial instruments held at financial institutions. Credit risk with respect to accounts receivable is generally diversified due to the large number of entities comprising ITT's customer base and their dispersion across many different industries and geographic regions. However, our largest customer represented approximately 7% and 10% of the total outstanding trade accounts receivable balance as of December 31, 2024 and December 31, 2023, respectively. Occasionally, we enter into notes receivables with certain of our customers. These notes receivables have maturities of six to 12 months and are guaranteed by reputable banks. ITT performs ongoing credit evaluations of the financial condition of its third-party distributors, resellers and other customers and requires collateral, such as letters of credit and bank guarantees, in certain circumstances. Allowance for Credit Losses We determine our allowance for credit losses using a combination of factors to reduce our trade receivables and contract asset balances to the net amount expected to be collected. The allowance is based on a variety of factors including the length of time receivables are past due, macroeconomic trends and conditions, significant one-time events, historical experience, and expectations of future economic conditions. We also record an allowance for individual accounts when we become aware of specific customer circumstances, such as in the case of bankruptcy filings or deterioration in the customer's operating results or financial position. The past due or delinquency status of a receivable is based on the contractual payment terms of the receivable. If circumstances related to the specific customer change, we adjust estimates of the recoverability of receivables as appropriate. Inventories Inventories, which include the costs of material, labor and overhead, are stated at the lower of cost or net realizable value. Cost is generally computed using the standard cost method, which approximates actual cost on a first-in, first-out (FIFO) basis. Variances between standard and actual costs are charged to cost of sales or capitalized to inventory. Estimated losses from obsolete and slow-moving inventories are recorded to reduce inventory values to their estimated net realizable value and are charged to cost of sales. At the point of loss recognition, a new cost basis for that inventory is established and subsequent changes in facts and circumstances do not result in a recovery in carrying value. Inventories valued under the last-in, first-out (LIFO) method represent 13.4% and 13.8% of total 2024 and 2023 inventories, respectively. We have a LIFO reserve of $21.2 and $19.1 recorded as of December 31, 2024 and 2023, respectively. Plant, Property and Equipment Plant, property and equipment, including capitalized interest applicable to major project expenditures, are recorded at cost. Depreciation is computed on a straight-line basis over the estimated useful lives of the assets. Leasehold improvements are depreciated over the life of the lease or the asset, whichever is shorter. Fully depreciated assets are retained in property and accumulated depreciation accounts until disposal. Repairs and maintenance costs are expensed as incurred. See Note 10, <a href="#i48f27b58da5f46169499f7ae9057b492_277"

style="color:#0000ff;font-family:'Arial',sans-serif;font-size:10pt;font-weight:400;line-height:120%;text-decoration:underline">Plant, Property and Equipment, Net, for additional information. Leases The Company enters into leases for the use of premises and equipment, primarily classified as operating leases. Operating lease costs are recognized as an operating expense over the lease term on a straight-line basis. For leases with terms greater than 12 months, we record a right-of-use asset and lease liability equal to the present value of the lease payments. In determining the discount rate used to measure the right-of-use asset and lease liability, we utilize the Company's incremental borrowing rate and consider the term of the lease, as well as the geographic location of the leased asset. Where options to renew a lease are available, they are included in the lease term and capitalized on the balance sheet to the extent there would be a significant economic penalty not to elect the option. Certain real estate leases are subject to periodic changes in an index or market rate. Although lease liabilities are not remeasured as a result of changes to an index or rate, these changes are treated as variable lease payments and recognized in the period in which the obligation for those payments is incurred. Variable lease expense also includes property tax and property insurance costs. See Note 13, Leases, for additional information. Capitalized Internal Use Software Costs incurred in the preliminary project stage of developing or acquiring internal use software are expensed as incurred. After the preliminary project stage is completed, management has approved the project and it is probable that the project will be completed and the software will be used for its intended purpose, ITT capitalizes certain internal and external costs incurred to acquire or create internal use software, principally related to software coding, designing system interfaces and installation and testing of the software. ITT amortizes capitalized internal use software costs using the straight-line method over the estimated useful life of the software, generally from 3 to 7 years. Investments Investments in fixed-maturity time deposits having an original maturity exceeding three months at the time of purchase, referred to as short-term time deposits, are classified as held-to-maturity and are recorded at amortized cost, which approximates fair value. There were no short-term time deposits held as of December 31, 2024 and December 31, 2023. Investments in entities where we have the ability to exercise significant influence, but do not control, are accounted for under the equity method of accounting and are included in Other noncurrent assets in our Consolidated Balance Sheets. Significant influence typically exists if we have a 20% to 50% ownership interest in the investee. Under this method of accounting, our share of the net earnings or losses of the investee is included in non-operating profit in Other non-operating income, net in our Consolidated Statements of Operations. We evaluate our equity method investments for impairment whenever events or changes in circumstances indicate that the carrying amounts of such investments may be impaired. If a decline in the value of an equity method investment is determined to be other than temporary, a loss is recorded in earnings in the current period. Investments in entities for which we do not have significant operating influence (we generally hold a less than 20% ownership stake in these entities) are initially recorded at the purchase price. For investments in entities with readily determinable fair values (e.g., publicly traded), the investment is measured at fair value each subsequent reporting period. For investments in entities without a readily determinable fair value, we have made an accounting policy election to measure the investment at cost, adjusted for any impairments and/or observable price changes. In both cases, these investments are included in Other noncurrent assets in our Consolidated Balance Sheets, with any gains or losses and dividends received recognized in Other non-operating income, net in our Consolidated Statements of Operations. Investments in corporate-owned life insurance (COLI) policies are recorded at their cash surrender values as of the balance sheet date. The Company's investments in COLI policies are included in other non-current assets in our Consolidated Balance Sheets and were $135.1 and $128.4 at December 31, 2024 and 2023, respectively. Changes in the cash surrender value during the period generally reflect gains or losses in the fair value of assets, premium payments, and policy redemptions. Gains from COLI investments of $4.6, $4.2, and $0.7 were recorded within General and administrative expenses in our Consolidated Statements of Operations during years ended December 31, 2024, 2023 and 2022, respectively. Cash receipts from COLI policies were $0.3, $0.0, and $0.4 during 2024, 2023, and 2022, respectively, and are recognized in investing activities in our Consolidated Statements of Cash Flows. Long-Lived Asset Impairment Long-lived assets, including intangible assets with finite lives and capitalized internal use software, are tested for impairment whenever events or changes in circumstances indicate their carrying value may not be recoverable. We assess the recoverability of long-lived assets based on the undiscounted future cash flow the assets are expected to generate and recognize an impairment loss when estimated undiscounted future cash flows expected to result from the use of the asset plus net proceeds expected from disposition of the asset, if any, are less than the carrying value of the asset. When an impairment is identified, we reduce the carrying amount of the asset to its estimated fair value

based on a discounted cash flow approach or, when available and appropriate, to comparable market values. Goodwill and Intangible Assets Goodwill represents purchase consideration paid in a business combination that exceeds the values assigned to the net assets of the acquired business. Intangible assets include customer relationships, proprietary technology, trademarks, patents and other intangible assets. Intangible assets with a finite life are generally amortized on a straight-line basis over an estimated economic useful life, which generally ranges from 7-20 years, and are tested for impairment if indicators of impairment are identified. Certain of our intangible assets have an indefinite life, namely certain brands and trademarks. Goodwill and indefinite-lived intangible assets are not amortized, but rather are tested for impairment annually (or more frequently if impairment indicators arise, such as changes to the reporting unit structure, significant adverse changes in the business climate or an adverse action or assessment by a regulator). We conduct our annual impairment testing on the first day of the fourth fiscal quarter. We may perform an initial qualitative evaluation which considers present events and circumstances, to determine the likelihood of impairment. If the likelihood of impairment is not considered to be more likely than not, then no further testing is performed. If it is considered to be more likely than not that the asset is impaired based on the qualitative evaluation or we elect not to perform a qualitative evaluation, then a quantitative impairment test is performed. In the quantitative impairment test, the fair value of each reporting unit is compared to its carrying amount. If the fair value of a reporting unit exceeds its carrying value, there is no impairment. If the carrying value of the reporting unit exceeds its estimated fair value, then we record an impairment loss equal to the difference. For indefinite-lived intangibles, if it is considered to be more likely than not that the asset is impaired, we compare the fair value of those assets to their carrying value. We recognize an impairment loss when the estimated fair value of the indefinite-lived intangible asset is less than its carrying value. We estimate the fair value of our reporting units using an income approach. Under the income approach, we estimate fair value based on the present value of estimated future cash flows. We estimate the fair value of our indefinite-lived intangible assets using the relief from royalty method. The relief from royalty method estimates the portion of a company's earnings attributable to an intellectual property asset based on an assumed royalty rate that the company would have paid had the asset not been owned. See Note 11, Goodwill and Other Intangible Assets, Net, for additional information. Business Combinations We allocate the purchase price of acquisitions to the tangible and intangible assets acquired, liabilities assumed, and non-controlling interests in the acquiree based on their estimated fair value at the acquisition date. Changes to acquisition date fair values prior to the expiration of the measurement period, a period not to exceed 12 months from date of acquisition, are recorded as an adjustment to the associated goodwill in the reporting period in which the adjustment amounts are determined. Changes to acquisition date fair values after expiration of the measurement period are recorded in earnings. The excess of the acquisition price over those estimated fair values is recorded as goodwill. Acquisition-related expenses are expensed as incurred and the costs associated with restructuring actions initiated after the acquisition are recognized separately from the business combination. See Note 21, Acquisitions, Investments, and Divestitures, for additional information. Commitments and Contingencies We record accruals for commitments and loss contingencies when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. Significant judgment is required to determine both probability and the estimated amount of loss, and these assessments can involve a series of complex judgments about future events and may rely on estimates and assumptions that have been deemed reasonable by management. We review these accruals quarterly and adjust the accruals to reflect the impact of negotiations, settlements, rulings, advice of legal counsel, and other current information. See Note 18, Commitments and Contingencies, for additional information. Environmental-Related Liabilities and Assets Accruals for environmental matters are recorded on a site-by-site basis when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated, based on current law and existing technologies. Our estimated liability is reduced to reflect the participation of other potentially responsible parties in those instances where it is probable that such parties are legally responsible and financially capable of paying their respective shares of the relevant costs, and that share can be reasonably estimated. Environmental liabilities are primarily included in other non-current liabilities at undiscounted amounts. The Company records an asset related to

*its environmental insurance and other expected third party recoveries. The environmental-related asset represents our best estimate of probable recoveries from third parties for costs incurred in past periods, as well as costs estimated to be incurred in future periods. Environmental costs and related recoveries are recorded within General and administrative expenses in our Consolidated Statements of Operations, other than those related to discontinued operations. See Note 18, Commitments and Contingencies, for additional information. Foreign Currency The national currencies of our foreign subsidiaries are generally the functional currencies. Balance Sheet accounts are translated at the exchange rate in effect at the end of each period, except for equity which is translated at historical rates; Statement of Operations accounts are translated at the average rates of exchange prevailing during the period. Gains and losses resulting from foreign currency translation are reflected in the cumulative translation adjustments component of shareholders' equity. For foreign subsidiaries that do not use the local currency as their functional currency, foreign currency assets and liabilities are remeasured to the foreign subsidiary's functional currency using end of period exchange rates, except for nonmonetary balance sheet accounts, which are remeasured at historical exchange rates. For transactions denominated in other than the functional currency, revenue and expenses are remeasured at average exchange rates in effect during the reporting period in which the transactions occurred, except for expenses related to nonmonetary assets and liabilities. Transaction gains or losses from foreign currency remeasurement are reported in General and administrative expenses in our Consolidated Statements of Operations. During the years ended December 31, 2024, 2023, and 2022, we recognized transaction (loss)/gain of $(2.8), $(7.0) and $6.1, respectively. Derivative Financial Instruments From time to time, the Company may use derivative financial instruments, primarily foreign currency forward and option contracts, to mitigate exposure from foreign currency exchange rate fluctuations as it pertains to receipts from customers, payments to suppliers and intercompany transactions; as well as from commodity price fluctuations. We record derivatives at their fair value as either an asset or liability. For derivatives not designated as hedges, adjustments to reflect changes in the fair value of our derivatives are included in earnings. For cash flow hedges that qualify and are designated for hedge accounting, the effective portion of the change in fair value of the derivative is recorded in accumulated other comprehensive loss and subsequently recognized in earnings when the hedged transaction affects earnings. Any ineffective portion is recognized immediately in earnings. As of December 31, 2024 and 2023, no derivatives were designated as hedges. The differentials paid or received on interest rate swap agreements are recognized as adjustments to interest expense. Derivative contracts involve the risk of non-performance by the counterparty. The fair value of our foreign currency contracts is determined using the net position of the contracts and the applicable spot rates and forward rates as of the reporting date. See Note 20, Derivative Financial Instruments, for additional information. Related Parties Under Accounting Standards Codification (ASC) Topic 850, Related Party Disclosures, related party transactions include those between: (a) a parent entity and its subsidiaries; (b) subsidiaries of a common parent; (c) an entity and trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of the entity's management; (d) an entity and its principal owners, management, or members of their immediate families; and (e) affiliates. There were no material related party transactions during 2024, 2023 or 2022. Description of Business ITT Inc. is a diversified manufacturer of highly engineered critical components and customized technology solutions for the transportation, industrial, and energy markets. Unless the context otherwise indicates, references herein to "ITT," "the Company," and such words as "we," "us," and "our" include ITT Inc. and its subsidiaries. ITT operates in three segments: Motion Technologies, consisting of friction materials, and shock and vibration equipment; Industrial Process, consisting of industrial flow equipment and services; and Connect & Control Technologies, consisting of electronic connectors, fluid handling, motion control, composite materials, and noise and energy absorption products. Financial information for our segments is presented in Note 3, Segment Information. Business Combinations and Divestitures *

On January 19, 2024, the Company completed the acquisition of Svanehøj Group A/S (Svanehøj) for a purchase price of $407.6, net of cash acquired. Subsequent to the acquisition, Svanehøj's results are reported within our IP segment. On September 12, 2024, the Company completed the acquisition of kSARIA Parent, Inc. (kSARIA) for a preliminary purchase price of $461.8, net of cash acquired. The final price is subject to a customary working capital adjustment. Subsequent to the acquisition, kSARIA's results are reported within our CCT segment. On July 22, 2024, the Company completed the sale of its Wolverine Advanced Materials (Wolverine) business, part of the MT segment prior to the divestiture, to an unrelated third party for a price of $186.2 (or $177.9, net of cash divested). The Company evaluates all disposal transactions to determine whether such disposal qualifies as discontinued operations in accordance with Accounting Standards Codification (ASC) 205-20, Discontinued Operations. We concluded that the divestiture does not qualify as a discontinued operation. On December 29, 2023, the Company completed the sale of our Matrix business, an aerospace and defense components manufacturer within our CCT segment, to a third party for total cash proceeds of $1.0. On May 2, 2023, the Company completed the acquisition of Micro-Mode Products, Inc. (Micro-Mode) for a purchase price of $79.0, net of cash acquired. Subsequent to the acquisition, Micro-Mode's results are reported within our CCT segment. Refer to Note 21, Acquisitions, Investments, and Divestitures, for further information. Basis of Presentation The Consolidated Financial Statements and Notes thereto were prepared in conformity with accounting principles generally accepted in the United States of America (GAAP). The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Estimates are revised as additional information becomes available. Estimates and assumptions are used for, but not limited to, revenue recognition, unrecognized tax benefits, deferred tax valuation allowances, projected benefit obligations for postretirement plans, accounting for business combinations, goodwill and other intangible asset impairment testing, environmental liabilities, allowance for credit losses and inventory valuation. Actual results could differ from these estimates. Certain prior year amounts have been reclassified to conform to the current year presentation. 407600000461800000186200000177900000010000000.079000000.0 Principles of Consolidation Our consolidated financial statements include the accounts of all majority-owned subsidiaries. ITT consolidates companies in which it has a controlling financial interest or when ITT is considered the primary beneficiary of a variable interest entity. The results of companies acquired or disposed of during the fiscal year are included in the Consolidated Financial Statements from the effective date of acquisition or up to the date of disposal. All intercompany transactions have been eliminated. Revenue Recognition Revenue is derived from the sale of products and services to customers. We recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which we expect to be entitled in exchange for those goods or services. For product sales, we consider practical and contractual limitations in determining whether there is an alternative use for the product. For example, long-term design and build contracts are typically highly customized to a customer's specifications. For contracts with no alternative use and an enforceable right to payment for work performed to date, including a reasonable profit if the contract were to be terminated at the customer's convenience for reason other than nonperformance, we recognize revenue over time. All other product sales are recognized at a point in time. For contracts recognized over time, we use the cost-to-cost method or the units-of-delivery method, depending on the nature of the contract, including length of production time. For contracts recognized at a point in time, we recognize revenue when control passes to the customer, which is generally based on shipping terms that address when title and risk and rewards pass to the customer. However, we also consider certain customer acceptance provisions as certain contracts with customers include installation, testing, certification or other acceptance provisions. In instances where contractual terms include a provision for customer acceptance, we consider whether we have previously demonstrated that the product meets objective criteria specified by either the seller or customer in assessing

whether control has passed to the customer. For service contracts, we recognize revenue as the services are rendered if the customer is benefiting from the service as it is performed, or otherwise upon completion of the service. Separately priced extended warranties are recognized as a separate performance obligation over the warranty period. The transaction price in our contracts consists of fixed consideration and the impact of variable consideration including returns, rebates and allowances, and penalties. Variable consideration is generally estimated using a probability-weighted approach based on historical experience, known trends, and current factors including market conditions and status of negotiations. When there is more than one performance obligation, the transaction price is allocated to the performance obligations based on the relative estimated standalone selling prices. If not sold separately, estimated standalone selling prices are determined considering various factors including market and pricing trends, geography, product customization, and profit objectives. Revenue is recognized when the appropriate revenue recognition criteria for the individual performance obligations have been satisfied. Revenue is reported net of any required taxes collected from customers and remitted to government authorities, with the collected taxes recorded as current liabilities until remitted to the relevant government authority. Shipping and handling activities are accounted for as activities to fulfill a promise to transfer a product to a customer. As such, shipping and handling activities are not evaluated as a separate performance obligation. For most contracts, payment is due from the customer within 30 to 90 days after the product is delivered or the service has been performed. For design and build contracts, we generally collect progress payments from the customer throughout the term of the contract, resulting in contract assets or liabilities depending on the timing of the payments. Contract assets consist of unbilled amounts when revenue recognized exceeds customer billings. Contract liabilities consist of advance payments and billings in excess of revenue recognized. Design and engineering costs for highly complex products to be sold under a long-term production-type contract are capitalized and amortized in a manner consistent with revenue recognition of the related contract or anticipated contract. Other design and development costs are capitalized only if there is a contractual guarantee for reimbursement. Costs to obtain a contract (e.g., commissions) for contracts greater than one year are capitalized and amortized in a manner consistent with revenue recognition of the related contract. Product Warranties Our standard product warranty terms generally include post-sales support and repairs or replacement of a product at no additional charge for a specified period of time. Accruals for estimated expenses related to product warranties are made at the time revenue is recognized and are recorded as a component of costs of revenue. We estimate the liability for warranty claims based on our standard warranties, the historical frequency of claims and the cost to replace or repair our products under warranty. Factors that influence our warranty liability include the number of units sold, the length of warranty term, historical and anticipated rates of warranty claims and the cost per claim. Postretirement Benefit Plans ITT sponsors numerous pension and other employee-related defined benefit plans (collectively, postretirement benefit plans). Substantially all of our U.S. postretirement benefit plans are closed to new participants. Postretirement benefit obligations are generally determined, where applicable, based on participant years of service, future compensation, age at retirement or termination, and the assumed rate of future healthcare cost increases. The determination of projected benefit obligations and the recognition of expenses related to postretirement benefit plans are dependent on various assumptions that are judgmental. The assumptions involved in the measurement of our postretirement benefit plan obligations and net periodic postretirement costs primarily relate to discount rates, mortality and termination rates, and other factors. Management develops each assumption using relevant Company experience in conjunction with market-related data for each individual country in which such plans exist. Actual results that differ from our assumptions are accumulated and are amortized over the estimated future working life, or remaining lifetime, of the plan participants depending on the nature of the retirement plan. The funded status of all plans is recorded on our balance sheet. Actuarial gains and losses and prior service costs or credits that have not yet been recognized through net income are recorded in accumulated other comprehensive income within shareholders' equity, net of taxes, until they are amortized as a component of net periodic postretirement cost. Research & Development Research and development activities are charged to expense as incurred. R&D as a percentage of sales was 3.2%, 3.1%, and 3.2% during 2024, 2023 and 2022, respectively.0.0320.0310.032 Income Taxes We determine the provision for income taxes using the asset and liability approach. Under this approach, deferred income tax assets and liabilities are determined based on the estimated future tax effects of differences between the financial reporting and tax bases of assets and liabilities, applying currently enacted tax rates in effect for the year in which we expect the differences will reverse. The ultimate realization of deferred tax assets is dependent on the generation of future taxable income (including the reversals of deferred tax liabilities)

during the periods in which those deferred tax assets will become deductible. We record a valuation allowance against our deferred tax assets when it is more likely than not that all or a portion of the deferred tax assets will not be realized. In assessing the need for a valuation allowance, the Company considers all available positive and negative evidence regarding the realizability of its deferred tax assets, including the future reversal of existing taxable temporary differences, taxable income in carryback periods, prudent and feasible tax planning strategies, estimated future taxable income, and whether we have a recent history of losses. The valuation allowance can be affected by changes to tax regulations, interpretations and rulings, changes to enacted statutory tax rates, and changes to future taxable income estimates. We have not provided deferred tax liabilities for the impact of U.S. income taxes on book over tax basis which we consider indefinitely reinvested outside the U.S. We plan foreign earnings remittance amounts based on projected cash flow needs, as well as the working capital and long-term investment requirements of foreign subsidiaries and our domestic operations. Furthermore, we recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position in consideration of applicable tax statutes and related interpretations and precedents and the expected outcome of the proceedings (or negotiations) with the taxing authorities. Tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized on ultimate settlement. The Company has elected to account for Global Intangible Low Taxed Income as a current period expense when incurred. See Note 5, Income Taxes, for additional information. Earnings Per Share Basic earnings per common share considers the weighted average number of common shares outstanding. Diluted earnings per share considers the outstanding shares utilized in the basic earnings per share calculation as well as the dilutive effect of outstanding stock options and restricted stock that do not contain rights to nonforfeitable dividends. Diluted shares outstanding include the dilutive effect of in-the-money options, unvested restricted stock units and unvested performance stock units. The dilutive effect of such equity awards is calculated based on the average share price for each reporting period using the treasury stock method. Common stock equivalents are excluded from the computation of earnings per share if they have an anti-dilutive effect. See Note 6, Earnings Per Share Data, for additional information. Cash and Cash Equivalents ITT considers all highly liquid investments purchased with an original maturity or remaining maturity at the time of purchase of three months or less to be cash equivalents. Cash equivalents primarily include fixed-maturity time deposits and money market investments. Restricted cash was $0.7 as of December 31, 2024 and December 31, 2023. Restricted cash is presented within Other current assets and Other non-current assets in our Consolidated Balance Sheets. 700000 Concentrations of Credit Risk Financial instruments that potentially subject ITT to significant concentrations of credit risk consist principally of cash and cash equivalents, accounts and notes receivables from trade customers, investments, and derivative financial instruments. We maintain cash and cash equivalents with various financial institutions located in different geographical regions, and our policy is designed to limit exposure to any individual counterparty. Derivative financial instruments are transacted with multiple highly reputable financial institutions. As part of our risk management processes, we perform periodic evaluations of the relative credit standing of the financial institutions with which we transact. We have not sustained any material credit losses during the previous three years with respect to financial instruments held at financial institutions. Credit risk with respect to accounts receivable is generally diversified due to the large number of entities comprising ITT's customer base and their dispersion across many different industries and geographic regions. However, our largest customer represented approximately 7% and 10% of the total outstanding trade accounts receivable balance as of December 31, 2024 and December 31, 2023, respectively. Occasionally, we enter into notes receivables with certain of our customers. These notes receivables have maturities of six to 12 months and are guaranteed by reputable banks. ITT performs ongoing credit evaluations of the financial condition of its third-party distributors, resellers and other customers and requires collateral, such as letters of credit and bank guarantees, in certain circumstances. 0.070.10 Allowance for Credit Losses We determine our allowance for credit losses using a combination of factors to reduce our trade receivables and contract asset balances to the net amount expected to be collected. The allowance is based on a variety of factors including the length of time receivables are past due, macroeconomic trends and conditions, significant one-time events, historical experience, and expectations of future economic conditions. We also record an allowance for individual accounts when we become aware of specific customer circumstances, such as in the case of bankruptcy filings or deterioration in the customer's operating results or financial position. The past due or delinquency status of a receivable is based on the contractual payment terms of the receivable. If

circumstances related to the specific customer change, we adjust estimates of the recoverability of receivables as appropriate. Inventories Inventories, which include the costs of material, labor and overhead, are stated at the lower of cost or net realizable value. Cost is generally computed using the standard cost method, which approximates actual cost on a first-in, first-out (FIFO) basis. Variances between standard and actual costs are charged to cost of sales or capitalized to inventory. Estimated losses from obsolete and slow-moving inventories are recorded to reduce inventory values to their estimated net realizable value and are charged to cost of sales. At the point of loss recognition, a new cost basis for that inventory is established and subsequent changes in facts and circumstances do not result in a recovery in carrying value. Inventories valued under the last-in, first-out (LIFO) method represent 13.4% and 13.8% of total 2024 and 2023 inventories, respectively. We have a LIFO reserve of $21.2 and $19.1 recorded as of December 31, 2024 and 2023, respectively. 0.1340.138-21200000-19100000 Plant, Property and Equipment Plant, property and equipment, including capitalized interest applicable to major project expenditures, are recorded at cost. Depreciation is computed on a straight-line basis over the estimated useful lives of the assets. Leasehold improvements are depreciated over the life of the lease or the asset, whichever is shorter. Fully depreciated assets are retained in property and accumulated depreciation accounts until disposal. Repairs and maintenance costs are expensed as incurred. See Note 10, Plant, Property and Equipment, Net, for additional information. Leases The Company enters into leases for the use of premises and equipment, primarily classified as operating leases. Operating lease costs are recognized as an operating expense over the lease term on a straight-line basis. For leases with terms greater than 12 months, we record a right-of-use asset and lease liability equal to the present value of the lease payments. In determining the discount rate used to measure the right-of-use asset and lease liability, we utilize the Company's incremental borrowing rate and consider the term of the lease, as well as the geographic location of the leased asset. Where options to renew a lease are available, they are included in the lease term and capitalized on the balance sheet to the extent there would be a significant economic penalty not to elect the option. Certain real estate leases are subject to periodic changes in an index or market rate. Although lease liabilities are not remeasured as a result of changes to an index or rate, these changes are treated as variable lease payments and recognized in the period in which the obligation for those payments is incurred. Variable lease expense also includes property tax and property insurance costs. See Note 13, Leases, for additional information. Capitalized Internal Use Software Costs incurred in the preliminary project stage of developing or acquiring internal use software are expensed as incurred. After the preliminary project stage is completed, management has approved the project and it is probable that the project will be completed and the software will be used for its intended purpose, ITT capitalizes certain internal and external costs incurred to acquire or create internal use software, principally related to software coding, designing system interfaces and installation and testing of the software. ITT amortizes capitalized internal use software costs using the straight-line method over the estimated useful life of the software, generally from 3 to 7 years. P3YP7Y Investments Investments in fixed-maturity time deposits having an original maturity exceeding three months at the time of purchase, referred to as short-term time deposits, are classified as held-to-maturity and are recorded at amortized cost, which approximates fair value. There were no short-term time deposits held as of December 31, 2024 and December 31, 2023. Investments in entities where we have the ability to exercise significant influence, but do not control, are accounted for under the equity method of accounting and are included in Other noncurrent assets in our Consolidated Balance Sheets. Significant influence typically exists if we have a 20% to 50% ownership interest in the investee. Under this method of accounting, our share of the net earnings or losses of the investee is included in non-operating profit in Other non-operating income, net in our Consolidated Statements of Operations. We evaluate our equity method investments for impairment whenever events or changes in circumstances indicate that the carrying amounts of such investments may be impaired. If a decline in the value of an equity method investment is determined to be other than temporary, a loss is recorded in earnings in the current period. Investments in entities for which we do not have significant operating influence (we generally hold a less than 20% ownership stake in these entities) are initially recorded at the purchase price. For investments in entities with readily determinable fair values (e.g., publicly traded), the investment is measured at fair value each subsequent reporting period. For investments in entities without a readily determinable fair value, we have made an accounting policy election to measure the investment at cost, adjusted for any impairments and/or observable price changes. In both cases, these investments

are included in Other noncurrent assets in our Consolidated Balance Sheets, with any gains or losses and dividends received recognized in Other non-operating income, net in our Consolidated Statements of Operations. Investments in corporate-owned life insurance (COLI) policies are recorded at their cash surrender values as of the balance sheet date. The Company's investments in COLI policies are included in other non-current assets in our Consolidated Balance Sheets and were $135.1 and $128.4 at December 31, 2024 and 2023, respectively. Changes in the cash surrender value during the period generally reflect gains or losses in the fair value of assets, premium payments, and policy redemptions. Gains from COLI investments of $4.6, $4.2, and $0.7 were recorded within General and administrative expenses in our Consolidated Statements of Operations during years ended December 31, 2024, 2023 and 2022, respectively. Cash receipts from COLI policies were $0.3, $0.0, and $0.4 during 2024, 2023, and 2022, respectively, and are recognized in investing activities in our Consolidated Statements of Cash Flows. 0013510000012840000046000004200000700000300000.0400000 Long-Lived Asset Impairment Long-lived assets, including intangible assets with finite lives and capitalized internal use software, are tested for impairment whenever events or changes in circumstances indicate their carrying value may not be recoverable. We assess the recoverability of long-lived assets based on the undiscounted future cash flow the assets are expected to generate and recognize an impairment loss when estimated undiscounted future cash flows expected to result from the use of the asset plus net proceeds expected from disposition of the asset, if any, are less than the carrying value of the asset. When an impairment is identified, we reduce the carrying amount of the asset to its estimated fair value based on a discounted cash flow approach or, when available and appropriate, to comparable market values. Goodwill and Intangible Assets Goodwill represents purchase consideration paid in a business combination that exceeds the values assigned to the net assets of the acquired business. Intangible assets include customer relationships, proprietary technology, trademarks, patents and other intangible assets. Intangible assets with a finite life are generally amortized on a straight-line basis over an estimated economic useful life, which generally ranges from 7-20 years, and are tested for impairment if indicators of impairment are identified. Certain of our intangible assets have an indefinite life, namely certain brands and trademarks. Goodwill and indefinite-lived intangible assets are not amortized, but rather are tested for impairment annually (or more frequently if impairment indicators arise, such as changes to the reporting unit structure, significant adverse changes in the business climate or an adverse action or assessment by a regulator). We conduct our annual impairment testing on the first day of the fourth fiscal quarter. We may perform an initial qualitative evaluation which considers present events and circumstances, to determine the likelihood of impairment. If the likelihood of impairment is not considered to be more likely than not, then no further testing is performed. If it is considered to be more likely than not that the asset is impaired based on the qualitative evaluation or we elect not to perform a qualitative evaluation, then a quantitative impairment test is performed. In the quantitative impairment test, the fair value of each reporting unit is compared to its carrying amount. If the fair value of a reporting unit exceeds its carrying value, there is no impairment. If the carrying value of the reporting unit exceeds its estimated fair value, then we record an impairment loss equal to the difference. For indefinite-lived intangibles, if it is considered to be more likely than not that the asset is impaired, we compare the fair value of those assets to their carrying value. We recognize an impairment loss when the estimated fair value of the indefinite-lived intangible asset is less than its carrying value. We estimate the fair value of our reporting units using an income approach. Under the income approach, we estimate fair value based on the present value of estimated future cash flows. We estimate the fair value of our indefinite-lived intangible assets using the relief from royalty method. The relief from royalty method estimates the portion of a company's earnings attributable to an intellectual property asset based on an assumed royalty rate that the company would have paid had the asset not been owned. See Note 11, Goodwill and Other Intangible Assets, Net, for additional information.P7YP20Y Business Combinations We allocate the purchase price of acquisitions to the tangible and intangible assets acquired, liabilities assumed, and non-controlling interests in the acquiree based on their estimated fair value at the acquisition date. Changes to acquisition date fair values prior to the expiration of the measurement period, a period not to exceed 12 months from date of acquisition, are recorded as an adjustment to the associated goodwill in the reporting period in which the adjustment amounts are determined. Changes to acquisition date fair values after expiration of the measurement period are recorded in earnings. The excess of the acquisition price over those estimated fair values is recorded as goodwill. Acquisition-related expenses are expensed as incurred and the costs associated with restructuring actions initiated after the acquisition are recognized separately from the business combination. See Note 21, Acquisitions, Investments, and Divestitures, for additional information. P12M Commitments and Contingencies We record accruals for commitments and loss contingencies

when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. Significant judgment is required to determine both probability and the estimated amount of loss, and these assessments can involve a series of complex judgments about future events and may rely on estimates and assumptions that have been deemed reasonable by management. We review these accruals quarterly and adjust the accruals to reflect the impact of negotiations, settlements, rulings, advice of legal counsel, and other current information. See Note 18, Commitments and Contingencies, for additional information. Environmental-Related Liabilities and Assets Accruals for environmental matters are recorded on a site-by-site basis when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated, based on current law and existing technologies. Our estimated liability is reduced to reflect the participation of other potentially responsible parties in those instances where it is probable that such parties are legally responsible and financially capable of paying their respective shares of the relevant costs, and that share can be reasonably estimated. Environmental liabilities are primarily included in other non-current liabilities at undiscounted amounts. The Company records an asset related to its environmental insurance and other expected third party recoveries. The environmental-related asset represents our best estimate of probable recoveries from third parties for costs incurred in past periods, as well as costs estimated to be incurred in future periods. Environmental costs and related recoveries are recorded within General and administrative expenses in our Consolidated Statements of Operations, other than those related to discontinued operations. See Note 18, Commitments and Contingencies, for additional information. Foreign Currency The national currencies of our foreign subsidiaries are generally the functional currencies. Balance Sheet accounts are translated at the exchange rate in effect at the end of each period, except for equity which is translated at historical rates; Statement of Operations accounts are translated at the average rates of exchange prevailing during the period. Gains and losses resulting from foreign currency translation are reflected in the cumulative translation adjustments component of shareholders' equity. For foreign subsidiaries that do not use the local currency as their functional currency, foreign currency assets and liabilities are remeasured to the foreign subsidiary's functional currency using end of period exchange rates, except for nonmonetary balance sheet accounts, which are remeasured at historical exchange rates. For transactions denominated in other than the functional currency, revenue and expenses are remeasured at average exchange rates in effect during the reporting period in which the transactions occurred, except for expenses related to nonmonetary assets and liabilities. Transaction gains or losses from foreign currency remeasurement are reported in General and administrative expenses in our Consolidated Statements of Operations. During the years ended December 31, 2024, 2023, and 2022, we recognized transaction (loss)/gain of $(2.8), $(7.0) and $6.1, respectively.28000007000000.0-6100000 Derivative Financial Instruments From time to time, the Company may use derivative financial instruments, primarily foreign currency forward and option contracts, to mitigate exposure from foreign currency exchange rate fluctuations as it pertains to receipts from customers, payments to suppliers and intercompany transactions; as well as from commodity price fluctuations. We record derivatives at their fair value as either an asset or liability. For derivatives not designated as hedges, adjustments to reflect changes in the fair value of our derivatives are included in earnings. For cash flow hedges that qualify and are designated for hedge accounting, the effective portion of the change in fair value of the derivative is recorded in accumulated other comprehensive loss and subsequently recognized in earnings when the hedged transaction affects earnings. Any ineffective portion is recognized immediately in earnings. As of December 31, 2024 and 2023, no derivatives were designated as hedges. The differentials paid or received on interest rate swap agreements are recognized as adjustments to interest expense. Derivative contracts involve the risk of non-performance by the counterparty. The fair value of our foreign currency contracts is determined using the net position of the contracts and the applicable spot rates and forward rates as of the reporting date. See Note 20, Derivative Financial Instruments, for additional information. Related Parties Under Accounting Standards Codification (ASC) Topic 850, Related Party Disclosures<span style="color:#000000;font-family:'Arial',sans-serif;font-size:10pt;font-weight:400;line-

height:120%">, related party transactions include those between: (a) a parent entity and its subsidiaries; (b) subsidiaries of a common parent; (c) an entity and trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of the entity's management; (d) an entity and its principal owners, management, or members of their immediate families; and (e) affiliates. There were no material related party transactions during 2024, 2023 or 2022. 0 RECENT ACCOUNTING PRONOUNCEMENTS From time to time, the Financial Accounting Standards Board ("FASB") or other standards setting bodies issue new accounting pronouncements. Updates to the FASB's accounting standards are communicated through issuance of an Accounting Standards Update ("ASU"). The Company considers the applicability and impact of all ASUs on our business and financial results. Recently adopted accounting pronouncements In November 2023, the FASB issued ASU No. 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures. This ASU updates reportable segment disclosure requirements by requiring disclosures of significant reportable segment expenses that are regularly provided to the Chief Operating Decision Maker ("CODM") and included within each reported measure of a segment's profit or loss. This ASU also requires disclosure of the title and position of the individual identified as the CODM and an explanation of how the CODM uses the reported measures of a segment's profit or loss in assessing segment performance and deciding how to allocate resources. We adopted this guidance for the year ending December 31, 2024 and it has been applied retrospectively to all prior periods presented in the financial statements. See Note 3, Segment Information for more information. Recently issued accounting pronouncements not yet adopted In December 2023, the FASB issued ASU No. 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures. This ASU requires disclosure of specific categories in the rate reconciliation and additional information for reconciling items that meet a quantitative threshold. The amendment also includes other changes to improve the effectiveness of income tax disclosures, including further disaggregation of income taxes paid for individually significant jurisdictions. This ASU is effective for annual periods beginning after December 15, 2024. Adoption of this ASU should be applied on a prospective basis. Early adoption is permitted. We are currently evaluating the impact that this guidance will have on the disclosures within our financial statements, and expect to adopt this ASU for the year ending December 31, 2025. In November 2024, the FASB issued ASU No. 2024-03, Income Statement- Reporting Comprehensive Income-Expense disaggregation disclosures (Subtopic 220-40) Disaggregation of Income Statement Expenses. This ASU requires disclosure of specified information about certain costs and expenses in the notes to financial statements. This ASU is effective for annual periods beginning after December 15, 2026, and interim periods within fiscal years beginning after December 15, 2027. Adoption of this ASU should be applied on a prospective basis. Early adoption is permitted. We are currently evaluating the impact that this guidance will have on the disclosures within our financial statements, and expect to adopt this ASU for the year ending December 31, 2027. During 2024, there were no other new accounting standards issued, or that are pending issuance, that are expected to have a material impact on our consolidated financial statements upon adoption. SEGMENT INFORMATION The Company's segments are reported on the same basis used by our chief operating decision maker (CODM) for evaluating performance and for allocating resources. The Company's CODM is the President and Chief Executive Officer. The CODM allocates resources based on revenue and operating income primarily through the annual budget and periodic forecasting process. The CODM considers budget-to-actual variances when making decisions about allocating capital and personnel to the segments. Our three reportable segments are referred to as: Motion Technologies, Industrial Process, and Connect & Control Technologies. Motion Technologies manufactures brake components, shock absorbers and damping technologies primarily for the global automotive and rail transportation markets. Industrial Process manufactures engineered fluid process equipment serving a diversified mix of customers in global industries such as chemical, energy, marine, mining, and other industrial process markets and is a provider of plant optimization and efficiency solutions and aftermarket services and parts. Connect & Control Technologies manufactures harsh-environment connector solutions, cable assemblies, critical energy absorption, flow control components, and composite materials for the aerospace and defense, general industrial, medical, and energy markets. Assets of our reportable segments exclude general corporate assets, which principally consist of cash, investments, deferred taxes, and certain property, plant and equipment. These assets are included within Corporate and Other, which is described further below. Corporate and Other consists of corporate office expenses including compensation, benefits, occupancy, depreciation, and other administrative costs, as well as charges related to certain matters, such as environmental liabilities, that are managed at a corporate level and are not included in segment results when evaluating performance or allocating resources. In addition, Corporate and Other includes research and development-related expenses associated with a subsidiary that does not constitute a reportable segment. The following table presents our segment revenue and operating income for each segment and reconciles to total consolidated revenue, total segment operating income and income from continuing operations before income tax. <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:1.0%"></td><td style="width:42.174%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:12.204%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.969%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:12.204%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.969%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:12.204%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.969%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:12.207%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom">For the Year Ended December 31, 2024</td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">Motion Technologies</td><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">Industrial Process</td><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">Connect & Control

recognized related to our Industrial Process segment primarily consists of pumps, valves and plant optimization systems and related services which serve the general industrial, energy, chemical and petrochemical, pharmaceutical, mining, pulp and paper, food and beverage, and power generation markets. Many of Industrial Process's products are highly engineered and customized to our customer needs and therefore do not have an alternative use. For these longer term design and build projects, if the contract states that we also have an enforceable right to payment, we recognize revenue over time using the cost-to-cost method as we satisfy the performance obligations identified in the contract. If no right to payment exists, revenue is recognized at a point in time, generally based on shipping terms. A majority of our design and build project contracts currently do not have a right to payment. For pumps that do have an alternative use to us, revenue is recognized at a point in time.

Revenue on service and repair contracts, represents less than 5% of consolidated ITT revenue in 2024, 2023, and 2022, respectively, and is recognized after the services have been rendered or over the service contract period. Our Motion Technologies segment manufactures brake pads, shock absorbers, and energy absorption components primarily for the transportation industry. Our Connect & Control Technologies segment designs and manufactures a range of highly engineered connectors, cable assemblies and specialized control components for critical applications supporting various markets including aerospace and defense, industrial, transportation, medical, and energy. In both of these segments, most products have an alternative use. Therefore, revenue for those products is recognized at a point in time when control passes to the customer. In certain circumstances, we have concluded we do not have an alternative use for the component product. In these cases, due to the short-term nature of the production process we use a units-of-delivery method of revenue recognition. Contract Assets and Liabilities Contract assets consist of unbilled amounts where revenue recognized exceeds customer billings. Contract liabilities consist of advance payments and billings in excess of revenue recognized. The following table represents our net contract assets and liabilities. <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:1.0%"></td><td style="width:67.905%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:2.262%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:7.671%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:2.262%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:2.262%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:7.671%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:2.267%"></td><td style="width:0.1%"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom">As of December 31</td><td colspan="9" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2024</td><td colspan="9" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2023</td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td></tr><tr><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 7.75pt;text-align:left;vertical-align:bottom">Current contract assets</td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:0 1pt"></td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom">$</td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0;text-align:right;vertical-align:bottom">34.4 </td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:0 1pt"></td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:10pt;font-weight:400;line-height:100%">$</td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0;text-align:right;vertical-align:bottom">25.8 </td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt 2px 7.75pt;text-align:left;vertical-align:bottom">Noncurrent contract assets</td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">1.9 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">1.6 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td></tr><tr><td colspan="3" style="background-color:#cceeff;padding:2px 1pt 2px 7.75pt;text-align:left;vertical-align:bottom">Current contract liabilities</td><td colspan="3" style="background-color:#cceeff;padding:0 1pt"></td><td colspan="2" style="background-color:#cceeff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">(119.3)</td><td style="background-color:#cceeff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#cceeff;padding:0 1pt"></td><td colspan="3" style="background-color:#cceeff;padding:0 1pt"></td><td colspan="2" style="background-color:#cceeff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">(95.9)</td><td

During 2024, we recognized revenue of $77.5 related to contract liabilities at December 31, 2023. The aggregate amount of the transaction price allocated to unsatisfied or partially satisfied performance obligations, or backlog, was $1,593.8 as of December 31, 2024. Of this amount, we expect to recognize approximately $1,340 to $1,360 of revenue during 2025 and the remainder thereafter. Our backlog generally represents firm orders that have been received, acknowledged, and entered into our production systems. However, within certain businesses in MT, our customers include automotive OEMs and we may win an award on an automotive platform several years in advance based on estimated levels of future automotive production. These awards allow for the customer to adjust their production levels at any time and therefore are not considered firm orders. Within these businesses we believe orders are firm upon receipt of the customer purchase order, which may require us to fulfill the order in as little as one week. As such, our backlog at any point in time for these businesses is not believed to be significant and therefore has been excluded from the total backlog amount. As of December 31, 2024 and 2023, deferred contract costs, net were $3.2 and $3.8, respectively, primarily related to pre-contract costs. During 2024 and 2023, we amortized $0.6 and $0.7, respectively. The following table represents our revenue disaggregated by end market. <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:99.707%"><tr><td style="width:1.0%"></td><td style="width:39.809%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.559%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:7.257%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.559%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.559%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:7.257%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.559%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.559%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.964%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.559%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.559%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:7.257%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.568%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom">For the Year Ended December 31, 2024</td><td colspan="9" style="padding:2px 1pt;text-align:center;vertical-align:bottom"><span style="color:#000000;font-

2px 0;text-align:right;vertical-align:top">%</td></tr></table> The lower effective tax rate in 2024 compared to 2023 primarily resulted from the Company recording a tax benefit of $6.7 from valuation allowance reversals on U.S. state deferred tax assets and a $5.7 tax benefit of U.S. tax on foreign earnings in 2024. ITT recorded a deferred tax asset of $29.1 on the $138.4 capital loss realized on the Wolverine divestiture. As ITT does not currently anticipate having capital gains sufficient to utilize the capital loss, the Company recorded a full valuation allowance against the deferred tax asset. The higher rate in 2023 was also due to expense of $14.2 relating to a tax audit in Italy covering tax years 2016-2022. The 2023 expense includes $6.8 of U.S. tax on foreign earnings. These tax expenses were offset by $16.1 from valuation allowance reversals on deferred tax assets in Germany. ITT also recognized tax benefits of $4.9 from the filing of an amended 2017 consolidated federal tax return in 2023. The Company provides for deferred taxes on the undistributed earnings and profits of all foreign subsidiaries, determined under U.S. tax law. At December 31, 2024, the amount of undistributed earnings and profits of all foreign subsidiaries was $1,263.3. The Company anticipates that these foreign earnings and future earnings of its foreign subsidiaries that are not indefinitely reinvested will be sufficient to meet its U.S. cash needs. The Company is indefinitely reinvested in any excess of financial reporting over tax basis in its foreign subsidiaries that exceeds undistributed earnings and profits. At December 31, 2024, the indefinitely reinvested excess of financial reporting over tax basis was $89.8.</div><div style="margin-top:6pt;text-align:justify">The following table includes the items comprising our deferred tax assets and liabilities.</div><div style="margin-bottom:6pt;margin-top:5pt"><table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:99.853%"><tr><td style="width:1.0%"></td><td style="width:75.766%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:8.124%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:3.585%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:8.125%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom">As of December 31</td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2024</td><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2023</td></tr><tr><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:top">Deferred Tax Assets:</td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:0 1pt"></td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt 2px 7.75pt;text-align:left;vertical-align:top">Loss carryforwards</td><td style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:10pt;font-weight:700;line-height:100%">$</td><td style="background-color:#ffffff;padding:2px 0;text-align:right;vertical-align:bottom">114.4 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom">$</td><td style="background-color:#ffffff;padding:2px 0;text-align:right;vertical-align:bottom">97.0 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td></tr><tr><td colspan="3" style="background-color:#cceeff;padding:2px 1pt 2px 7.75pt;text-align:left;vertical-align:top">Inventory</td><td colspan="2" style="background-color:#cceeff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">23.7 </td><td style="background-color:#cceeff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#cceeff;padding:0 1pt"></td><td colspan="2" style="background-color:#cceeff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">24.1 </td><td style="background-color:#cceeff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt 2px 7.75pt;text-align:left;vertical-align:top">Accruals</td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">30.5 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">27.1 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td></tr><tr><td colspan="3" style="background-color:#cceeff;padding:2px 1pt 2px 7.75pt;text-align:left;vertical-align:top">Employee

0;text-align:right;vertical-align:bottom"></td></tr></table> The Company continues to maintain a valuation allowance against certain deferred tax assets attributable to a U.S. federal capital loss carryforward, U.S. state net operating losses and tax credits, and certain foreign net deferred tax assets primarily in Luxembourg, Germany, and the U.K. which are not expected to be realized. Management assesses the available positive and negative evidence to estimate whether sufficient future taxable income will be generated to permit the use of deferred tax assets. The cumulative loss incurred over the three-year period ending December 31, 2024 constitutes significant objective negative evidence, resulting in the recognition of a valuation allowance against the net deferred tax assets for these jurisdictions. Such objective negative evidence limits our ability to consider subjective positive evidence, such as our projections of future taxable income. The amount of the deferred tax asset considered realizable,

however, could be adjusted if estimates of future taxable income change or if objective negative evidence in the form of cumulative losses is no longer present and additional weight can be given to subjective evidence. We have the following tax attributes available for utilization at December 31, 2024: <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:99.853%"><tr><td style="width:1.0%"></td><td style="width:73.716%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:8.709%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:2.728%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.347%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom">Attribute</td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">Amount</td><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">First Year of Expiration</td></tr><tr><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td></tr><tr><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:bottom">U.S. state net operating losses</td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom">$</td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0;text-align:right;vertical-align:bottom">273.7 </td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt;text-align:right;vertical-align:bottom">12/31/2025</td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom">U.S. federal tax credits</td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">12.8 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:right;vertical-align:bottom">12/31/2029</td></tr><tr><td colspan="3" style="background-color:#cceeff;padding:2px 1pt;text-align:left;vertical-align:bottom">U.S. state tax credits</td><td colspan="2" style="background-color:#cceeff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">0.6 </td><td style="background-color:#cceeff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#cceeff;padding:0 1pt"></td><td colspan="3" style="background-color:#cceeff;padding:2px 1pt;text-align:right;vertical-align:bottom">12/31/2027</td></tr><tr><td colspan="3" style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:bottom"> Foreign net operating losses(a) </td><td colspan="2" style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">267.1 </td><td style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:2px 1pt;text-align:right;vertical-align:bottom">12/31/2025</td></tr></table> (a)Includes approximately $205.0 of net operating loss carryforwards in Luxembourg as of December 31, 2024. Excess tax benefits related to stock-based compensation of $1.8, $0.9 and $2.4 for 2024, 2023 and 2022, respectively, were recorded as an income tax benefit in the statement of operations and have been reflected in the caption “Excess tax benefits on stock-based compensation” within the effective tax rate reconciliation table. Uncertain Tax Positions We recognize income tax benefits from uncertain tax positions only if, based on the technical merits of the position, it is more likely than not that the tax position will be sustained on examination by the taxing authorities. The tax benefits recognized in the Consolidated Financial Statements from such positions are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. The following table displays a rollforward of our unrecognized tax benefits. <table style="border-

These measures include granting subsidies to help offset the high energy prices. ASU 2021-10 requires entities to provide information about the nature of transactions, related policies and effect of government grants on an entity's financial statements. In particular, in Italy, to qualify for an energy subsidy a company must apply for and receive a certificate attesting that the company is an "energy and gas consuming company" (high energy consumption connected to the production cycle). The amount of subsidies granted is calculated based on a percentage of actual consumption, ranging from 25% to 40%. One of our Italian subsidiaries within our MT segment obtained this certificate and was granted energy subsidies from the Italian government beginning in April 2022. This program concluded in the second quarter of 2023. For the year ended December 31, 2023, we recognized a benefit of $6.3, which we recorded within Costs of revenue in our Consolidated Statements of Operations. There was no other material government assistance received by the Company or any of our subsidiaries during the year. The following table summarizes our inventories. <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:1.0%"></td><td style="width:76.531%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:8.110%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:2.847%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:8.112%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom">As of December 31</td><td colspan="3" style="padding:2px 1pt;text-

The Company confirms the validity of invoices from participating suppliers and agrees to pay the intermediary an amount based on invoice totals. The majority of amounts payable under these programs are due within 90 to 180 days and are considered commercially reasonable. There are no assets pledged as security or other forms of guarantees provided for the committed payments. The following table displays a rollforward of our supply chain financing obligations which is included within Accounts payable in our Consolidated Balance Sheets. <table style="border-

(ITT Italia), an indirect wholly owned subsidiary of the Company, entered into a facility agreement (the ITT Italia Credit Agreement), among the Company, as a guarantor, ITT Italia, as borrower, and BNP Paribas, Italian Branch, as bookrunner, sole underwriter and global coordinator, mandated lead arranger and agent. The ITT Italia Credit Agreement had an initial maturity of three years (January 2027) and provided for term loan borrowings in an aggregate principal amount of €300 (or $328.9), €275 (or $301.5) of which had been borrowed and were used to finance the Company's acquisition of Svanehøj, which closed on January 19, 2024. During the third quarter of 2024, ITT Italia repaid €175, representing the remaining outstanding balance on the ITT Italia Credit Agreement. During 2024, repayments of the facility agreement totaled €275. Debt issuance costs totaled $1.8, which were fully amortized during 2024. The interest rate per annum on the ITT Italia Credit Agreement was based on the EURIBOR rate for Euros, plus a margin of 1.00%. Other Long-term Debt Our other long-term debt is primarily related to outstanding Italian government loans maturing in June 2027 and September 2029, which carries a weighted average fixed interest rate of 0.85% and requires annual principal and interest payments of approximately $1.0 on average, through maturity. Revolving Credit Agreement On August 5, 2021, we entered into a revolving credit facility agreement with a syndicate of third party lenders including Bank of America, N.A., as administrative agent (the 2021 Revolving Credit Agreement). Upon its effectiveness, this agreement replaced our existing $500 revolving credit facility due November 2022 (the 2014 Revolving Credit Agreement). The 2021 Revolving Credit Agreement matures in August 2026 and provides for an aggregate principal amount of up to $700. The 2021 Revolving Credit Agreement provides for a potential increase of commitment of up to $350 for a possible maximum of $1,050 in aggregate commitments at the request of the Company and with the consent of the institutions providing such increase of commitments. On May 10, 2023, we entered into the First Amendment (the Amendment) to the Company's 2021 Revolving Credit Agreement. In connection with the phase out of LIBOR as a reference interest rate, the Amendment replaced LIBOR as a benchmark for United States Dollar revolving borrowings with the term secured overnight financing rate (Term SOFR), and replaced LIBOR as a benchmark for Euro swing line borrowings with the euro overnight short-term rate (ESTR). The Amendment did not have a significant impact on the Company's consolidated financial statements. Since the Amendment, the interest rate per annum on the 2021 Revolving Credit Agreement is based on the Term SOFR rate of the currency we borrow in, plus a margin of 1.00%. There is a 0.125% fee per annum applicable to the commitments under the 2021 Revolving Credit Agreement. The margin and fees are subject to adjustment should the Company's credit ratings change. As of December 31, 2024 and December 31, 2023, we had no outstanding obligations under the current or former revolving credit facility. The 2021 Revolving Credit Agreement contains customary affirmative and negative covenants that, among other things, will limit or restrict our ability to: incur additional debt or issue guarantees; create certain liens; merge or consolidate with another person; sell, transfer, lease or otherwise dispose of assets; liquidate or dissolve; and enter into restrictive covenants. Additionally, the 2021 Revolving Credit Agreement requires us not to permit the ratio of consolidated total indebtedness to consolidated earnings before interest, taxes, depreciation and amortization (EBITDA) (leverage ratio) to exceed 3.50 to 1.00, with a qualified acquisition step up immediately following such qualified acquisition of 4.00 to 1.00 for four quarters, 3.75 to 1.00 for two quarters thereafter, and returning to 3.50 to 1.00 thereafter. As of December 31, 2024, all financial covenants (e.g., leverage ratio) associated with the 2021 Revolving Credit Agreement were within the prescribed thresholds. The following table summarizes our outstanding debt obligations. <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:1.0%"></td><td style="width:71.560%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.619%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.408%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.913%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom">As of December 31</td><td colspan="3" style="padding:2px 1pt;text-

style="margin-bottom:6pt">POSTRETIREMENT BENEFIT PLANS Defined Contribution Plans Substantially all of ITT’s U.S. and certain international employees are eligible to participate in a defined contribution plan. ITT sponsors numerous defined contribution savings plans, which allow employees to contribute a portion of their pre-tax and/or after-tax income in accordance with specified guidelines. Certain plans require us to match a portion of the employee contributions. Company contributions charged to expense amounted to $19.4, $17.3 and $16.5 for 2024, 2023 and 2022, respectively. The ITT Stock Fund, an investment option in our U.S. based defined contribution plan, is considered an employee stock ownership plan and, as a result, participants in the ITT Stock Fund may receive dividends in cash or may reinvest such dividends into the ITT Stock Fund. The ITT Stock Fund held approximately 0.1 shares of ITT common stock at December 31, 2024. Defined Benefit Plans ITT currently sponsors a number of defined benefit pension plans, primarily outside of the U.S., which have approximately 960 active participants. As of December 31, 2024, international pension plans represented 85% of our total projected pension benefit obligation. There is one remaining U.S. pension plan, which is frozen to new participants. International plan benefits are primarily determined based on participant years of service, future compensation, and age at retirement or termination. ITT also provides health care and life insurance benefits for certain unionized employees in the U.S. upon retirement. Nearly all of these plans are closed to new participants. The majority of the liability pertains to retirees with postretirement medical insurance. Balance Sheet Information <span style="color:#000000;font-

was recognized in 2022 related to changes to a postretirement medical plan, covering certain unionized employees and retirees within our IP business. The changes closed the plan to new hires and, beginning in 2023, plan participants receive a fixed contribution into a Health Reimbursement account. <span

style="color:#000000;font-family:'Arial',sans-serif;font-size:10pt;font-style:italic;font-weight:400;line-height:120%">Postretirement Plan Assumptions The determination of projected benefit obligations and the recognition of expenses related to postretirement benefit plans are dependent on various assumptions that are judgmental and developed in consultation with external advisors. Management develops each assumption using relevant Company experience in conjunction with market-related data for each individual country in which such plans exist. Periodically, the Company performs experience studies to validate certain actuarial assumptions such as age of retirement, rates of turnover, utilization of optional forms of payments. The actuarial assumptions are based on the provisions of the applicable accounting pronouncements, review of various market data and discussion with our external advisors. Assumptions are reviewed annually and adjusted as necessary. Changes in these assumptions could materially affect our financial statements. The following table provides the weighted-average assumptions used to determine projected benefit obligations and net periodic postretirement cost as they pertain to our U.S. and non-U.S. defined benefit pension plans and other employee-related defined benefit plans. <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:1.0%"></td><td style="width:45.829%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.940%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.530%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.940%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.530%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.940%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.700%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.940%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.530%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.940%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.530%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.951%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom"> </td><td colspan="15" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2024</td><td colspan="3" style="padding:0 1pt"></td><td colspan="15" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2023</td></tr><tr><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:center;vertical-align:bottom">U.S. Pension</td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:center;vertical-align:bottom">Int'l Pension</td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:center;vertical-align:bottom">Other Benefits</td><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:center;vertical-align:bottom">U.S. Pension</td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:center;vertical-align:bottom">Int'l Pension</td><td colspan="3" style="border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="border-top:1pt solid #000000;padding:2px 1pt;text-align:center;vertical-align:bottom">Other Benefits</td></tr><tr><td colspan="3" style="background-color:#ceceff;border-top:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:top">Obligation Assumptions:</td><td colspan="3" style="background-color:#ceceff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#ceceff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#ceceff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#ceceff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#ceceff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#ceceff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#ceceff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#ceceff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#ceceff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="3" style="background-color:#ceceff;border-top:1pt solid #000000;padding:0 1pt"></td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt 2px 7.75pt;text-align:left;vertical-align:top">Discount rate</td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">5.5 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom">%</td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">3.3 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:9pt;font-

The discount rate assumption is based on current investment yields of high-quality fixed income investments during the retirement benefits maturity period. The pension discount rate is determined by considering an interest rate yield curve comprising AAA/AA bonds, with maturities that are generally between zero and 30 years, developed by the plan's actuaries. Annual benefit payments are then discounted to present value using this yield curve to develop a single discount rate matching the plan's characteristics. We estimate the service and interest components of net periodic benefit cost of the U.S. defined benefit plans by discounting the individual expected cash flows underlying the service cost and interest cost using the applicable spot rates from the yield curve used to discount the cash flows in measuring the benefit obligation. The rate of future compensation increase assumption for foreign plans reflects our long-term actual experience and future and near-term outlook. The rate of future compensation increase assumption is not applicable for the U.S. plan because the plan is frozen. The Company has updated the mortality assumption to reflect the most recent projection update. The assumed rate of future increases in the per capita cost of health care (the health care trend rate) is 8.0% for pre-age 65 retirees and 7.0% for post-age 65 retirees for 2025, decreasing ratably to 4.5% in 2035. To the extent that actual experience differs from these assumptions, the effect will be amortized over the average future working life or life expectancy of the plan participants. Fair Value of Plan Assets As of December 31, 2024 and 2023, our plan assets were not material. Contributions Our postretirement plans are largely unfunded, and therefore plan contributions generally reflect required benefit payments. We fund certain of our international pension plans in countries where funding is allowable and tax-efficient. During 2024 and 2023, we contributed $6.5 and $4.5, respectively, to our global pension plans and we anticipate making contributions of approximately $5 during 2025. We contributed $4.0 and $5.0 to our other employee-related defined benefit plans during 2024 and 2023, respectively. We estimate that the 2025 contributions to our other employee-related defined benefit plans will be approximately

style="margin-bottom:6pt">LONG-TERM INCENTIVE EMPLOYEE COMPENSATION The 2011 Omnibus Incentive Plan (2011 Incentive Plan) was approved by shareholders and established in May 2011 to provide for the awarding of options on common shares and full value restricted common shares or units to employees and non-employee directors. As of December 31, 2024, 36.1 shares were available for future grants under the 2011 Incentive Plan. The Company can make shares available for the exercise of stock options or vesting of restricted shares or units by purchasing shares in the open market. Our long-term incentive plan (LTIP) awards are comprised of two components: restricted stock units (RSUs) and performance stock units (PSUs). The majority of RSUs and PSUs settle in shares; however RSUs and PSUs granted to certain international employees are settled in cash. We account for equity-settled RSUs and PSUs as equity-based compensation awards. We account for cash-settled RSUs and PSUs as liability-based awards. PSUs contain equally weighted performance conditions for total shareholder return (TSR) and return on invested capital (ROIC). PSUs vest based on predetermined performance metrics that align with the Company's stock price and financial performance generally following a three-year performance period and are subject to a payout factor which includes a maximum and minimum payout. PSUs are accounted for as two distinct awards, a TSR award and a ROIC award. LTIP costs are primarily recorded within General and administrative expenses in our Consolidated Statements of Operations, at their grant date fair value over the requisite service period (typically three years) on a straight-line basis and are reduced by forfeitures as they occur. The following table summarizes our share-based compensation expense associated with our LTIP awards. <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:1.0%"></td><td style="width:68.636%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.356%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:2.847%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.356%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:2.847%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.358%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom">For the Year Ended December 31</td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2024</td><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2023</td><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2022</td></tr><tr><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 7.75pt;text-align:left;vertical-align:top">Equity-based awards</td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom">$</td>

As of December 31, 2024, there was $45.5 of total unrecognized compensation cost related to non-vested equity awards. This cost is expected to be recognized ratably over a weighted-average period of 2.1 years. Additionally, unrecognized compensation cost related to liability-based awards was $3.2, which is expected to be recognized ratably over a weighted-average period of 1.8 years. The fair value of equity-settled RSUs is determined using the closing price of the Company’s common stock on the date of grant. The fair value of cash-settled RSUs is remeasured using the closing price of ITT's common stock at the end of each reporting period. Recipients do not have voting rights and do not receive cash dividends during the restriction period. Dividend equivalents on RSUs, which are subject to forfeiture, are accrued and paid in cash upon vesting of the RSU. If a recipient retires or is terminated other than for cause, a pro rata portion of the RSU may vest. For PSUs, the fair value of the ROIC award is based on the closing price of ITT

*common stock on the date of grant less the present value of expected dividend payments during the vesting period. For ROIC awards granted in 2024, a dividend yield of 1.00% was assumed based on ITT's annualized dividend payment of $1.276 per share and the March 4, 2024 closing stock price of $128.01. The fair value of the ROIC award is fixed on the grant date; however, a probability assessment is performed each reporting period to estimate the likelihood of achieving the ROIC targets and the amount of compensation to be recognized. The fair value of the TSR award is measured using a Monte Carlo simulation on the date of grant, measuring potential total shareholder return for ITT relative to the other companies in the S&P 400 Capital Goods Index (the TSR Performance Group). The expected volatility of ITT's stock price is based on the historical volatility of a peer group while expected volatility for the other companies in the TSR Performance Group is based on their own stock price history. For TSR awards granted in 2024, all volatility and correlation measures were based on three years of daily historical price data through March 4, 2024, corresponding to the three-year performance period of the award. As the grant date occurs after the beginning of the performance period, actual TSR performance between the beginning of the performance period (December average closing stock price) and the grant date was reflected in the valuation. For TSR awards granted in 2024, a dividend yield of 1.00% was assumed based on ITT's annualized dividend payment of $1.276 per share and the March 4, 2024 closing stock price of $128.01. </div><div style="text-align:justify;text-indent:18pt">The table below provides a rollforward of our outstanding RSUs and PSUs.</div><div style="margin-bottom:6pt;margin-top:2pt;text-align:justify"><table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:1.0%"></td><td style="width:40.128%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.648%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.530%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:9.426%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.530%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.356%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.530%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:9.864%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.530%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:6.356%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.530%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:9.872%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom"> </td><td colspan="9" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2024</td><td colspan="3" style="padding:0 1pt"></td><td colspan="9" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2023</td><td colspan="3" style="padding:0 1pt"></td><td colspan="9" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2022</td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom">Restricted Stock and

As of December 31, 2024, the total number of PSUs expected to vest based on current performance estimates, including those vested but pending issuance, was 0.5. Non-Qualified Stock Options Prior to 2017, our LTIP award grants also included non-qualified stock options (NQOs). NQOs outstanding and exercisable were nominal as of December 31, 2024 and 2023, and 0.1 as December 31, 2022. As of December 31, 2024, there were no options "out-of-the-money" and all options outstanding were fully vested. A nominal number of NQOs were exercised for the year ended December 31, 2024, and 0.1 during each of the years ended December 31, 2023 and 2022 resulted in cash proceeds of $0.5, $0.6 and $1.8, respectively. CEO Retention Plan On October 30, 2024, the Company adopted a Chief Executive Officer Retention Plan (the CEO Retention Plan) to provide for the grant of additional RSUs to ITT's CEO, Mr. Savi. The initial grant under the CEO Retention Plan consists of RSUs with a grant date fair value of $7.0. Mr. Savi is also eligible to receive a performance-earned annual retention grant (PEAR Grant) in the first quarter of each of calendar year 2025 through 2029. Each PEAR Grant will consist of RSUs with a fair market value determined based on the final PSU payout (expressed as a percentage), each as determined under Mr. Savi's performance unit award agreement for the most recently completed performance period. Performance unit award payouts start above 105% at $4.0 and can range up to $7.0. LTIP costs for the initial grant of RSUs will be recognized on a straight-line basis beginning on the grant date, October 30, 2024, through the vest date, December 31, 2028. LTIP costs for future RSU grants, if any, will be recognized on a straight-line basis over the requisite service period beginning on the date each PEAR Grant is approved by the Company's Board of Directors, through the vest date of the later of December 31, 2028 or one year from the date of grant. During 2024, the Company recognized costs of $0.3 in connection with the CEO Retention Plan. Employee Stock Purchase Plan We sponsor the ITT Inc. 2023 Employee Stock Purchase Plan (2023 ESPP), pursuant to which eligible employees may elect to contribute from 1% to 10% of their eligible compensation, which includes after-tax base salary and annual bonus, subject to certain income limits, to purchase shares of ITT's common stock. The adoption of the 2023 ESPP was approved by our shareholders at our 2023 Annual Shareholders Meeting. The aggregate number of shares of ITT's stock authorized for issuance under the 2023 ESPP was 0.5. Pursuant to the terms of the 2023 ESPP, employees may purchase stock under the 2023 ESPP at a price equal to 95% of ITT's closing stock price on the purchase date. For the year ended December 31, 2024, no stock-based compensation expense was recorded in connection with the 2023 ESPP because the criteria of a non-compensatory plan in accordance with ASC 718, Compensation – Stock Compensation, were met.

36100000 LTIP costs are primarily recorded within General and administrative expenses in our Consolidated Statements of Operations, at their grant date fair value over the requisite service period (typically three years) on a straight-line basis and are reduced by forfeitures as they occur. The following table summarizes our share-based compensation expense associated with our LTIP awards. <table There was no preferred stock outstanding as of December 31, 2024 and 2023. The holders of ITT common stock are entitled to receive dividends when and as declared by ITT's Board of Directors. Dividends are paid quarterly. Dividends declared were $1.276, $1.160 and $1.056 per common share totaling $104.8, $95.9, and $87.7 in 2024, 2023, and 2022, respectively. On October 30, 2019, the Board of Directors approved an indefinite term $500 open-market share repurchase program (the 2019 Plan). During 2024, we exhausted the remaining capacity under the 2019 Plan. On October 4, 2023, the Board of Directors approved an indefinite term $1,000 open-market share repurchase program (the 2023 Plan). There was $975 of remaining capacity left under the 2023 Plan as of December 31, 2024. The following table summarizes our share repurchase activity. <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:1.0%"></td><td style="width:58.256%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.911%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:0.384%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.619%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:1.115%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.915%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom">As of December 31</td><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:center;vertical-align:bottom">2024</td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:center;vertical-align:bottom">2023</td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:center;vertical-align:bottom">2022</td></tr><tr><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 10pt;text-align:left;vertical-align:bottom">Shares repurchased and retired</td><td colspan="2" style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">0.8 </td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:0 1pt"></td><td colspan="2" style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">0.7 </td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3"

style="margin-bottom:6pt">COMMITMENTS AND CONTINGENCIES From time to time, we are involved in litigation, claims, government inquiries, investigations and proceedings, including but not limited to those relating to environmental exposures, intellectual property matters, personal injury claims, product liabilities, regulatory matters, commercial and government contract issues, employment and employee benefit matters, commercial or contractual disputes, and securities matters. Although the ultimate outcome of any legal matter cannot be predicted with certainty, based on present information including our assessment of the merits of the particular claim, as well as our current reserves and insurance coverage, we do not expect that such legal proceedings will have any material adverse impact on our financial statements, unless otherwise noted below. However, there can be no assurance that an adverse outcome in any of the proceedings described below will not result in material fines, penalties or damages, changes to the Company's business practices, loss of (or litigation with) customers or a material adverse effect on our financial statements. Environmental Matters In the ordinary

course of business, we are subject to federal, state, local, and foreign environmental laws and regulations. We are responsible, or are alleged to be responsible, for ongoing environmental investigation and site remediation primarily related to former ITT businesses and former operating locations. These sites are in various stages of investigation and/or remediation under oversight of the U.S. Environmental Protection Agency and similar state environmental agencies with one non-U.S. matter under oversight of Italian environmental authorities. Accruals for environmental matters are recorded on a site-by-site basis when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated. The following table provides a summary of the estimated aggregated environmental liability based on currently available and known information. <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:1.0%"></td><td style="width:73.900%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:9.426%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:2.847%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:9.427%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom"> </td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2024</td><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2023</td></tr><tr><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:middle">Balance as of January 1</td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:middle">$</td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0;text-align:right;vertical-align:middle">56.0 </td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:middle"></td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:0 1pt"></td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:middle"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:10pt;font-weight:400;line-height:100%">$</td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0;text-align:right;vertical-align:middle">57.1 </td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:middle"></td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom">Changes in estimates for pre-existing accruals:</td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td></tr><tr><td colspan="3" style="background-color:#cceeff;padding:2px 1pt 2px 16pt;text-align:left;text-indent:-9pt;vertical-align:bottom">Continuing operations</td><td colspan="2" style="background-color:#cceeff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">2.2 </td><td style="background-color:#cceeff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#cceeff;padding:0 1pt"></td><td colspan="2" style="background-color:#cceeff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">2.6 </td><td style="background-color:#cceeff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom"> Discontinued operations </td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">0.4 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">— </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td></tr><tr><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td><td colspan="3" style="display:none"></td></tr><tr><td colspan="3" style="background-color:#cceeff;padding:2px 1pt;text-align:left;vertical-align:middle">Cash payments</td><td colspan="2" style="background-color:#cceeff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">(3.6)</td><td style="background-color:#cceeff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#cceeff;padding:0 1pt"></td><td colspan="2" style="background-color:#cceeff;padding:2px 0 2px 1pt;text-align:right;vertical-align:middle">(3.9)</td><td style="background-color:#cceeff;padding:2px 1pt 2px 0;text-align:right;vertical-align:middle"></td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:middle">Foreign currency</td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-

The related acquisition and disposition agreements allocate certain assets and liabilities among the parties and contain various representation and warranty clauses and may provide indemnities for a misrepresentation or breach of the representations and warranties by either party or for assumed or excluded liabilities. These provisions address a variety of subjects. The term and monetary amounts of each such provision are defined in the specific agreements and may be affected by various conditions and external factors. Many of the provisions have expired either by operation of law or as a result of the terms of the agreement. We do not have a liability recorded for these expired provisions and are not aware of any claims or other information that would give rise to material payments under such provisions. Guarantees We have $176.5 of guarantees, letters of credit and similar arrangements outstanding at

December 31, 2024, primarily pertaining to commercial or performance guarantees and insurance matters. We have not recorded any material loss contingencies under these guarantees, letters of credit and similar arrangements as of December 31, 2024 as the likelihood of nonperformance by ITT is considered remote. From time to time, we may provide certain third-party guarantees that may be affected by various conditions and external factors, some of which could require that payments be made under such guarantees. We do not consider the maximum exposure or current recorded liabilities under our third-party guarantees to be material either individually or in the aggregate. We do not believe such payments would have a material adverse impact on our Consolidated Financial Statements.

Warranties

ITT warrants numerous products, the terms of which vary widely. In general, ITT warrants its products against defect and specific non-performance. In certain markets, such as automotive, aerospace and rail, liability for product defects could extend beyond the selling price of the product and could be significant if the defect interrupts production or results in a recall.

The table below presents a rollforward of our total warranty liability, which is recorded within Accrued liabilities and Other non-current liabilities in our Consolidated Balance Sheets.

	2024	2023
Warranty liability as of January 1	$ 16.5	$ 16.2
Warranty expense	8.6	5.4
Warranty liability acquired	0.9	—
Payments	(6.3)	(5.1)

From time to time, we use derivative financial instruments to mitigate our exposure to certain of these risks, including foreign exchange rate and commodity price fluctuations. By using derivatives, the Company is further exposed to credit risk. Our exposure to credit risk includes the counterparty's failure to fulfill its financial obligations under the terms of the derivative contract. The Company attempts to minimize its exposure by avoiding concentration risk among its counterparties and by entering into transactions with creditworthy counterparties. Foreign Currency Derivative Contracts The Company enters into foreign currency forward or option contracts to mitigate foreign currency risk associated with transacting with international customers, suppliers, and subsidiaries. The notional amounts and fair values of our outstanding foreign currency derivative contracts, which are recorded within other current assets in our Consolidated Balance Sheets, were as follows: <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:1.0%"></td><td style="width:63.227%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:15.274%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:2.723%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:15.276%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom">As of December 31</td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2024</td><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2023</td></tr><tr><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:bottom"> Notional amount (U.S. dollar equivalent)(a) </td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom">$</td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0;text-align:right;vertical-align:bottom">155.8 </td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:0 1pt"></td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom">$</td>

The cash flow impact upon settlement of our foreign currency derivative contracts is included in operating activities in our Consolidated Statements of Cash Flows. During the year ended December 31, 2024 and December 31, 2023, net cash (outflow) inflows from foreign currency derivative contracts were $(8.3) and $1.5, respectively. The notional amounts and fair values of our outstanding foreign currency derivative contracts, which are recorded within other current assets in our Consolidated Balance

Sheets, were as follows: <table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:1.0%"></td><td style="width:63.227%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:15.274%"></td><td style="width:0.1%"></td><td style="width:0.1%"></td><td style="width:2.723%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:15.276%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom">As of December 31</td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2024</td><td colspan="3" style="padding:0 1pt"></td><td colspan="3" style="padding:2px 1pt;text-align:center;vertical-align:bottom">2023</td></tr><tr><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:bottom"> Notional amount (U.S. dollar equivalent)(a) </td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom">$</td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0;text-align:right;vertical-align:bottom">155.8 </td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:0 1pt"></td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom">$</td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 0;text-align:right;vertical-align:bottom">258.4 </td><td style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td></tr><tr><td colspan="3" style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:2px 1pt;text-align:left;vertical-align:bottom"> Fair value of foreign currency derivative contracts(b) </td><td style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom">$</td><td style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:2px 0;text-align:right;vertical-align:bottom">2.9 </td><td style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:0 1pt"></td><td style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:10pt;font-weight:400;line-height:100%">$</td><td style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:2px 0;text-align:right;vertical-align:bottom">3.8 </td><td style="background-color:#ffffff;border-bottom:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td></tr></table> (a) The higher notional balance as of December 31, 2023 relates to a foreign currency derivative contract related to the purchase price of Svanehøj, which closed in January 2024. The final price is subject to a customary working capital adjustment. kSARIA is a leading manufacturer of mission-critical cable assembly and networking application solutions primarily for the aerospace and defense market. kSARIA is headquartered in New Hampshire, with approximately 1,000 employees across five manufacturing sites in the U.S. and one in Mexico. kSARIA and its acquired subsidiaries generated sales of approximately $175.0 in 2023. Subsequent to the acquisition, kSARIA’s financial results are reported within our CCT segment.</div><div style="margin-bottom:6pt;margin-top:6pt;text-align:justify;text-indent:18pt">The primary areas of the purchase price allocations that are not yet finalized for the kSARIA acquisition relate to the valuation of certain tangible and intangible assets, liabilities, income tax, and residual goodwill, which represents the excess of the purchase price over the fair value of the net tangible and other intangible assets acquired. The Company expects to obtain the information necessary to finalize the fair value of the net assets and liabilities during the measurement period, not to exceed one year from the acquisition date. Changes to the preliminary estimate of the fair value during the measurement period will be recorded as adjustments to those assets and liabilities with a corresponding adjustment to goodwill in the period they occur.</div><div style="margin-top:6pt;text-align:justify;text-indent:18pt">The assets acquired and liabilities assumed for the kSARIA acquisition were recorded at fair value and are shown in the table below, including adjustments to the preliminary purchase price as of September 28, 2024, and during the fourth quarter of 2024. The impact to the current period income statement resulting from the adjustments was not material.</div><div style="margin-bottom:6pt;margin-top:6pt;padding-left:18pt;text-align:justify;text-indent:-18pt"><table style="border-collapse:collapse;display:inline-table;margin-bottom:5pt;vertical-align:text-bottom;width:100.000%"><tr><td style="width:1.0%"></td><td style="width:60.742%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.619%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.619%"></td><td style="width:0.1%"></td><td style="width:1.0%"></td><td style="width:11.620%"></td><td style="width:0.1%"></td></tr><tr><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom"><div>kSARIA - Allocation of Purchase Price</div></td><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom"><div style="text-align:center">Preliminary 9/28/2024</div></td><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom"><div style="text-align:center"> Q4 2024 Adjustments</div></td><td colspan="3" style="padding:2px 1pt;text-align:left;vertical-align:bottom"><div style="text-align:center">Preliminary 12/31/2024</div></td></tr><tr><td colspan="3" style="background-color:#cceeff;border-top:1pt solid #000000;padding:2px 1pt 2px 7.75pt;text-align:left;vertical-align:top">Receivables</td><td style="background-color:#cceeff;border-top:1pt solid #000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom"><span style="color:#000000;font-family:'Arial',sans-serif;font-size:10pt;font-weight:400;line-height:100%">$</td><td style="background-color:#cceeff;border-top:1pt solid #000;padding:2px 0;text-align:right;vertical-align:bottom">28.1 </td><td style="background-color:#cceeff;border-top:1pt solid #000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td style="background-color:#cceeff;border-top:1pt solid #000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom">$</td><td style="background-color:#cceeff;border-top:1pt solid #000;padding:2px 0;text-align:right;vertical-align:bottom">(1.4)</td><td style="background-color:#cceeff;border-top:1pt solid #000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td style="background-color:#cceeff;border-top:1pt solid

Goodwill arising from the acquisition is not expected to be deductible for income tax purposes. Acquisition of Svanehøj On January 19, 2024, the Company completed the acquisition of 100% of the privately held stock of Svanehøj for a purchase price of $407.6, net of cash acquired of $28.0. Svanehøj is a Denmark-based supplier of pumps and related aftermarket services with leading positions in cryogenic applications for the marine sector. Svanehøj employs approximately 400 employees and has operations in Denmark, Singapore and France. Svanehøj had sales of approximately $148 in 2023. Subsequent to the acquisition, Svanehøj's financial results are reported within our IP segment. As of December 31, 2024, the allocation of the purchase price to the assets acquired and liabilities assumed was finalized related to our acquisition of Svanehøj. Acquisition of Micro-Mode On May 2, 2023, the Company completed the acquisition of 100% of the privately held stock of Micro-Mode for a purchase price of $79.0, net of cash acquired. Micro-Mode is a specialty designer and manufacturer of high-bandwidth radio frequency (RF) connectors for harsh environment defense and space applications. Micro-Mode has a single manufacturing site near San Diego, California. Subsequent to the acquisition, Micro-Mode's financial results are reported within our CCT segment. As of December 31, 2024, the allocation of the purchase price to the assets acquired and liabilities assumed was finalized related to our acquisition of Micro-Mode. The assets acquired and liabilities assumed for Svanehøj and Micro-Mode acquisitions were recorded at fair value and are shown in the table below. <table style="border-collapse:collapse;display:inline-table;margin-

Goodwill arising from acquisitions is not expected to be deductible for income tax purposes. (b) The purchase price allocation of Svanehøj was updated subsequent to the preliminary allocation in Q1 2024, including an increase to goodwill of $13.7 and a decrease to intangible assets, other liabilities and inventory of $13.4, $1.5 and $1.1, respectively. There was no material impact to the income statement for any period resulting from the change. Pro forma results of operations have not been presented because the acquisitions were not deemed significant as of the acquisition date. Investments in CRP Technology and CRP USA (CRP) During the second quarter of 2022, we purchased a minority investment of 46% in CRP Technology Srl and 33% in CRP USA LLC (collectively "CRP") for $23.0. CRP is a manufacturer of reinforced composite materials for 3D printing for the aerospace, defense, premium automotive, and motorsports industries. CRP's Windform® high-performance materials enable engineers to develop complex, customized designs while providing lightweight and exceptionally durable products. In both May 2023 and May 2024, ITT purchased an additional 9% of CRP USA LLC for $1.4. These additional investments brought ITT's direct share ownership in CRP USA LLC to 51% as of December 31, 2024. The investment in CRP USA LLC is accounted for as an equity method investment as we do not have control of the entity due to a supermajority board voting requirement. Divestiture of Wolverine On July 22, 2024, the Company completed the sale of its Wolverine business, part of the MT segment prior to the divestiture, to an unrelated third party for a price of $186.2 (or $177.9, net of cash divested). The transaction resulted in a pre-tax gain of $47.8. In connection with the divestiture, cumulative translation losses of $3.6 were reclassified out of Accumulated Other Comprehensive Loss and included in the gain on sale. Subsequent to the sale, Wolverine will act as a third-party supplier to the Company's MT segment. Divestiture of Matrix Composites, Inc. (Matrix) On December 29, 2023, we completed the sale of our Matrix business, an aerospace and defense components manufacturer within our CCT segment, to a third party for total cash proceeds of $1.0. In connection with this transaction, we recorded a pre-tax loss of $15.3. <span style="color:#000000;font-family:'Arial',sans-

serif;font-size:10pt;font-style:italic;font-weight:400;line-height:120%">Divestiture of Product Line During the second quarter of 2023, we completed the sale of a product line within our CCT segment to a third party for $10.5. The Company determined that the product line met the definition of a business per ASC 805, Business Combinations. As a result of the transaction, we recognized a pre-tax gain on sale of $7.2.</div>461800000450000010001750000000.0<div style="margin-top:6pt;text-align:justify;text-indent:18pt">The assets acquired and liabilities assumed for the kSARIA acquisition were recorded at fair value and are shown in the table below, including adjustments to the preliminary purchase price as of September 28, 2024, and during the fourth quarter of 2024. The significant expense categories and amounts align with segment-level information that is regularly provided to the CODM. Other segment items for each reportable segment includes (gain) loss on sale of fixed assets and (gain) loss on sale of businesses.

~~Includes revenue of $1,197.6, $1,075.8, and $978.6 from the United States for 2024, 2023, and 2022, respectively.~~ ~~Includes revenue of $385.9, $387.8, and $404.7 from Germany for 2024, 2023, and 2022, respectively.~~ ~~Includes revenue of $445.3, $351.8, and $307.8 from China for 2024, 2023, and 2022, respectively.~~ ~~Includes approximately $205.0 of net operating loss carryforwards in Luxembourg as of December 31, 2024.~~ ~~Goodwill acquired for our CCT segment is related to our acquisition of Micro mode representing the calculation of the excess purchase price over the net assets acquired.~~ ~~During the fourth quarter of 2023, we completed the sale of our Matrix business, which was previously included within our CCT segment.~~ ~~Goodwill acquired for our IP and CCT segments is related to our acquisitions of Svanehøj and kSARIA, respectively, representing the calculation of the excess purchase price over the net assets acquired.~~ ~~During the third quarter of 2024, we completed the sale of our Wolverine business, which was previously included within our MT segment.~~ ~~During the second quarter of 2024, we completed the sale of our Wolverine business, which was previously included within our MT segment. Indefinite-lived intangibles with a net book value of $7.0 were written off as part of the divestiture. See Note 21, Acquisitions, Investments, and Divestitures, for further information.~~ ~~Other intangible assets for kSARIA reflect favorable lease intangibles.~~ ~~Includes $ of current operating lease liabilities recorded within Accrued and other current liabilities and $ of non-current operating lease liabilities recorded within Other non-current liabilities in our Consolidated Balance Sheets.~~ ***22.673.7*** ~~Included within Other, net in our Consolidated Statements of Cash Flows.~~ ***We use a discount rate for each lease based on an estimated incremental borrowing rate over a similar term as the lease, as the discount rate implicit in each lease cannot be readily determined*** ~~The increase in commercial paper outstanding from December 31, 2023 to December 31, 2024 was primarily related to acquisition activity that was partially financed using commercial paper, and timing of repayments. Note 21, Acquisitions, Investments, and Divestitures, for additional information.~~ ~~Long-term debt is primarily related to a term loan that the Company entered into in September 2024 in connection with the acquisition of kSARIA. See additional details in section titled, "U.S. Term Loan", below.~~ ~~The actuarial gain in 2024 is primarily due to an increase in discount rates during the year.~~ ~~A prior service benefit was recognized in 2022 related to changes to a postretirement medical plan, covering certain unionized employees and retirees within our IP business. The changes closed the plan to new hires and, beginning in 2023, plan participants receive a fixed contribution into a Health Reimbursement account.~~ ***The higher notional balance as of December 31, 2023 relates to a foreign currency derivative contract related to the purchase price of Svanehøj, which closed in January 2024. Our foreign currency derivative contracts are classified within Level 2 of the fair value hierarchy because these contracts are not actively traded and the valuation inputs are based on market observable data of similar instruments.*** ~~(a) None of our derivative contracts were designated as hedging instruments under ASC 815, Derivatives & Hedging.~~ ***Goodwill acquired with kSARIA is primarily attributable to the complementary nature of its product portfolio to ITT's existing connectors portfolio. Goodwill arising from the acquisition is not expected to be deductible for income tax purposes. Goodwill related to the acquisition of Svanehøj is primarily attributable to future benefits expected from our entrance into the marine sector, our expanded presence in the energy market, and geographic expansion. Goodwill arising from acquisitions is not expected to be deductible for income tax purposes. The purchase price allocation of Svanehøj was updated subsequent to the preliminary allocation in Q1 2024, including an increase to goodwill of $13.7 and a decrease to intangible assets, other liabilities and investments of $13.4, $1.5 and $1.1, respectively. There was no material impact to the income statement for any period resulting from the change.***
