FORM 6-K

**REPORT OF FOREIGN PRIVATE ISSUER
PURSUANT TO RULE 13a-16 OR 15d-16 OF
THE SECURITIES EXCHANGE ACT OF 1934**

February 5, 2025
Commission File Number 001-10888

TotalEnergies SE
(Translation of registrant's name into English)

2, place Jean Millier
La Défense 6
92400 Courbevoie
France
(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F ☒ Form 40-F ☐

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): ☐

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): ☐

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

THIS REPORT ON FORM 6-K SHALL BE DEEMED TO BE INCORPORATED BY REFERENCE IN THE REGISTRATION STATEMENT ON FORM F-3 (NOS. 333-278983, 333-278983-01, 333-278983-02 AND 333-278983-03) OF TOTALENERGIES SE, TOTALENERGIES CAPITAL INTERNATIONAL, TOTALENERGIES CAPITAL CANADA LTD. AND TOTALENERGIES CAPITAL AND THE REGISTRATION STATEMENT ON FORM S-8 (NOS. 333-278948 AND 333-280516) OF TOTALENERGIES SE, AND TO BE PART THEREOF FROM THE DATE ON WHICH THIS REPORT IS FURNISHED, TO THE EXTENT NOT SUPERSEDED BY DOCUMENTS OR REPORTS SUBSEQUENTLY FILED OR FURNISHED.

TotalEnergies SE is providing on this Form 6-K its results for the fourth quarter of 2024 and the year ended December 31, 2024, a description of certain recent developments relating to its business, as well as a capitalization table as of December 31, 2024.

EXHIBIT INDEX

| <u>Exhibit No.</u> | <u>Description</u> |
|------------------------------|---|
| Exhibit 99.1 | Results for the Fourth Quarter of 2024 and Year Ended December 31, 2024 |
| Exhibit 99.2 | Recent Developments |
| Exhibit 99.3 | Capitalization and Indebtedness |

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

TotalEnergies SE

Date: February 5th, 2025

Title: Company Treasurer

OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The terms "TotalEnergies", "TotalEnergies company" and "Company" in this exhibit are used to designate TotalEnergies SE and the consolidated entities directly or indirectly controlled by TotalEnergies SE.

The financial and extra-financial information on pages 1-24 of this exhibit relating to TotalEnergies with respect to the fourth quarter of 2024 and the year ended December 31, 2024 has been derived from TotalEnergies' unaudited consolidated balance sheets as of December 31, 2024, unaudited statements of income, comprehensive income, cash flow and business segment information for the fourth quarter of 2024 and the year ended December 31, 2024 and unaudited consolidated statements of changes in shareholders' equity for the year ended December 31, 2024 on pages 26 et seq. of this exhibit.

The following discussion should be read in conjunction with the aforementioned financial statements and with the information, including TotalEnergies' audited consolidated financial statements and related notes, provided in TotalEnergies' Annual Report on Form 20-F for the year ended December 31, 2023, filed with the Securities and Exchange Commission ("SEC") on March 29, 2024.

A. KEY FIGURES

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | In millions of dollars, except earnings per share and number of shares | 2024 | 2023 | 2024 vs 2023 |
|--------|--------|--------------------|---------|---|---------|---------|--------------------|
| 52,508 | 52,021 | +1% | 59,237 | Sales | 214,550 | 237,128 | -10% |
| 3,956 | 2,294 | +72% | 5,063 | Net income (TotalEnergies share) | 15,758 | 21,384 | -26% |
| 10,529 | 10,048 | +5% | 11,696 | Adjusted EBITDA ⁽¹⁾ | 43,143 | 50,030 | -14% |
| 4,992 | 4,635 | +8% | 5,724 | Adjusted net operating income ⁽²⁾ from business segments | 20,566 | 25,107 | -18% |
| 2,305 | 2,482 | -7% | 2,802 | Exploration & Production | 10,004 | 10,942 | -9% |
| 1,432 | 1,063 | +35% | 1,456 | Integrated LNG | 4,869 | 6,200 | -21% |
| 575 | 485 | +19% | 527 | Integrated Power | 2,173 | 1,853 | +17% |
| 318 | 241 | +32% | 633 | Refining & Chemicals | 2,160 | 4,654 | -54% |
| 362 | 364 | -1% | 306 | Marketing & Services | 1,360 | 1,458 | -7% |
| 4,406 | 4,074 | +8% | 5,226 | Adjusted net income ⁽¹⁾ (TotalEnergies share) | 18,264 | 23,176 | -21% |
| 1.70 | 0.96 | | 2.09 | Fully-diluted earnings per shares (\$) | 6.69 | 8.67 | |
| 2,282 | 2,310 | -1% | 2,387 | Fully-diluted weighted-average shares (millions) | 2,315 | 2,434 | -5% |
| 3,745 | 5,562 | -33% | 632 | Cash flow used in investing activities | 17,332 | 16,454 | +5% |
| 3,839 | 4,102 | -6% | 6,139 | Organic investments ⁽¹⁾ | 16,423 | 18,126 | -9% |
| 24 | 1,662 | -99% | (5,404) | Acquisitions net of assets sales ⁽¹⁾ | 1,406 | (1,289) | ns |
| 3,863 | 5,764 | -33% | 735 | Net investments ⁽¹⁾ | 17,829 | 16,837 | +6% |
| 12,507 | 7,171 | +74% | 16,150 | Cash flow from operating activities | 30,854 | 40,679 | -24% |
| 7,151 | 6,821 | +5% | 8,500 | Cash flow from operations excluding working capital (CFFO) ⁽¹⁾ | 29,917 | 35,946 | -17% |
| 7,398 | 7,009 | +6% | 8,529 | Debt Adjusted Cash Flow (DACF) ⁽¹⁾ | 30,614 | 36,451 | -16% |

Gearing⁽¹⁾ of 8.3% at December 31, 2024 vs. 12.9% at September 30, 2024 and 5.0% at December 31, 2023

(1) Adjusted EBITDA, adjusted net income, organic investments, acquisitions net of assets sales, net investments, cash flow from operations excluding working capital (CFFO), debt adjusted cash flow (DACF) and gearing are non-GAAP financial measures. Refer to the Glossary on page 25 for the definitions and further information on non-GAAP measures (alternative performance measures) and to pages 16 and following for reconciliation tables.

(2) Detail of adjustment items shown in the business segment information starting on page 34.

Key figures of environment, greenhouse gas emissions (GHG) and production

Environment – liquids and gas price realizations, refining margins

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | | 2024 | 2023 | 2024 vs 2023 |
|-------|------|--------------------|-------|---|------|-------|--------------------|
| 74.7 | 80.3 | -7% | 84.3 | Brent (\$/b) | 80.8 | 82.6 | -2% |
| 3.0 | 2.2 | +34% | 2.9 | Henry Hub (\$/Mbtu) | 2.4 | 2.7 | -9% |
| 13.6 | 11.5 | +18% | 13.6 | TTF (\$/Mbtu) ⁽¹⁾ | 11.0 | 13.1 | -16% |
| 14.0 | 13.0 | +7% | 15.2 | JKM (\$/Mbtu) ⁽²⁾ | 11.9 | 13.8 | -14% |
| 71.8 | 77.0 | -7% | 80.2 | Average price of liquids ^{(3), (4)} (\$/b) Consolidated subsidiaries | 77.1 | 76.2 | +1% |
| 6.26 | 5.78 | +8% | 6.17 | Average price of gas ^{(3), (5)} (\$/Mbtu) Consolidated subsidiaries | 5.54 | 6.64 | -16% |
| 10.37 | 9.91 | +5% | 10.28 | Average price of LNG ^{(3), (6)} (\$/Mbtu) Consolidated subsidiaries and equity affiliates | 9.80 | 10.76 | -9% |
| 25.9 | 15.4 | +68% | 52.6 | European Refining Margin (ERM) ^{(3), (7)} (\$/t) | 39.5 | 71.0 | -44% |

- (1) TTF (Title Transfer Facility) is a virtual trading point in the Netherlands for transferring rights in respect of physical gas. It is the most liquid and widely used price benchmark for the natural gas markets in Europe. TTF is operated by Gasunie Transport Services (GTS), the owner and operator of the national transmission network in the Netherlands. It is traded in €/MWh.
- (2) JKM (Japan-Korea Marker) measures the prices of spot liquid natural gas (LNG) trades in Asia. It is based on prices reported in spot market trades and/or bids and offers collected after the close of the Asian trading day at 16:30 Singapore time.
- (3) Does not include oil, gas and LNG trading activities, respectively.
- (4) Sales in \$ / Sales in volume for consolidated affiliates.
- (5) Sales in \$ / Sales in volume for consolidated affiliates.
- (6) Sales in \$ / Sales in volume for consolidated and equity affiliates.
- (7) This market indicator for European refining, calculated based on public market prices (\$/t), uses a basket of crudes, petroleum product yields and variable costs representative of the European refining system of TotalEnergies.

Greenhouse gas emissions (GHG)⁽¹⁾

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | Scope 1+2 emissions (MtCO ₂ e) | 2024 | 2023 | 2024 vs 2023 |
|------|------|--------------------|------|---|------|------|--------------------|
| 9.6 | 8.8 | +9% | 7.9 | Scope 1+2 from operated facilities ⁽²⁾ | 34.3 | 34.6 | -1% |
| 7.9 | 7.4 | +7% | 7.2 | of which Oil & Gas | 29.4 | 30.3 | -3% |
| 1.7 | 1.4 | +21% | 0.7 | of which CCGT | 4.9 | 4.3 | +14% |
| 12.2 | 11.7 | +4% | 11.5 | Scope 1+2 – equity share | 46.4 | 48.9 | +5% |

Estimated quarterly emissions.

- (1) The six greenhouse gases in the Kyoto protocol, namely CO₂, CH₄, N₂O, HFCs, PFCs and SF₆, with their respective GWP (Global Warming Potential) as described in the 2021 IPCC report. HFCs, PFCs and SF₆ are virtually absent from the Company's emissions or are considered as non-material and are therefore not counted.
- (2) Scope 1+2 GHG emissions of operated facilities are defined as the sum of direct emissions of greenhouse gases from sites or activities that are included in the scope of reporting (as defined in the Company's 2023 annual report on Form 20-F filed on March 29, 2024) and indirect emissions attributable to brought-in energy (electricity, heat, steam), excluding purchased industrial gases (H₂).

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | Methane emissions (ktCH ₄) | 2024 | 2023 | 2024 vs 2023 |
|------|------|--------------------|------|--|------|------|--------------------|
| 7 | 7 | - | 9 | Methane emissions from operated facilities | 29 | 34 | -15% |
| 9 | 8 | +13% | 11 | Methane emissions - equity share | 33 | 40 | -18% |

In 2024, Scope 1+2 emissions from operated installations amounted to 34.3 million tons CO₂e.

In 2024, methane emissions from operated facilities were down 15% compared to 2023 mainly due to a continuous decrease in flaring and fugitive emissions in Exploration & Production, which were down 55% compared to the 2020 reference level, reaching the objective of -50% one year early. In 2025, TotalEnergies therefore reinforces its ambition through a new methane emissions reduction objective of -60% vs. 2020.

In 2024, Scope 3⁽¹⁾ Category 11 emissions are estimated to be 347 Mt CO₂e vs. 355 Mt CO₂e in 2023.

¹TotalEnergies reports Scope 3 GHG emissions, category 11, which correspond to indirect GHG emissions related to the end use of energy products sold to the Company's customers, i.e., from their combustion, i.e., combustion of the products to obtain energy. The Company follows the oil & gas industry reporting guidelines published by IPIECA, which comply with the GHG Protocol methodologies. In order to avoid double counting, this methodology accounts for the largest volume in the oil, biofuels and gas value chains, i.e., the higher of the two production volumes or sales. For TotalEnergies in 2024, the calculation of scope 3 GHG emissions for the oil and biofuels value chains considers product sales (higher than production) and for the gas value chain, marketable gas production (higher than gas sales either as LNG or as part of direct sales to B2B/B2C).

Production*

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | Hydrocarbon production | 2024 | 2023 | 2024 vs 2023 |
|-------|-------|--------------------|-------|---|-------|-------|--------------------|
| 2,427 | 2,409 | +1% | 2,462 | Hydrocarbon production (kboe/d) | 2,434 | 2,483 | -2% |
| 1,292 | 1,324 | -2% | 1,341 | Oil (including bitumen) (kb/d) | 1,314 | 1,388 | -5% |
| 1,135 | 1,086 | +5% | 1,121 | Gas (including condensates and associated NGL) (kboe/d) | 1,120 | 1,095 | +2% |
| 2,427 | 2,409 | +1% | 2,462 | Hydrocarbon production (kboe/d) | 2,434 | 2,483 | -2% |
| 1,445 | 1,466 | -1% | 1,506 | Liquids (kb/d) | 1,468 | 1,550 | -5% |
| 5,323 | 5,093 | +5% | 5,158 | Gas (Mcf/d) | 5,211 | 5,028 | +4% |

* Company production = Exploration & Production production + Integrated LNG production.

Hydrocarbon production was 2,434 thousand barrels of oil equivalent per day in 2024, up 2% year-on-year (excluding the Canada disposal representing 3.5%) and was comprised of:

- +3% due to start-ups and ramp-ups, including Mero-2 and Mero-3 in Brazil, Absheron in Azerbaijan, Bloc 10 in Oman, Tommeliten Alpha in Norway, Akpo West in Nigeria, Fenix in Argentina and Anchor in the United States,
- +1% due to higher availability of production facilities,
- +1% portfolio effect related to the entry into the producing fields of SARB Umm Lulu in the United Arab Emirates and Ratawi in Iraq and to the acquisition of interests in the Eagle Ford shale gas plays in Texas,
- 3% due to the natural field decline.

B. ANALYSIS OF BUSINESS SEGMENT RESULTS

Financial information by business segment is reported in accordance with the internal reporting system and shows internal segment information that is used to manage and measure the performance of TotalEnergies and which is reviewed by the main operational decision-making body of TotalEnergies, namely the Executive Committee.

Management presents adjusted financial indicators to assist investors in better understanding, in conjunction with the Company's financial results presented in accordance with IFRS, the economic performance of the Company. Adjustment items are of three types: inventory valuation effect, effect of changes in fair value, and special items.

The inventory valuation effect: in accordance with IAS 2, TotalEnergies values inventories of petroleum products in its financial statements according to the First-In, First-Out (FIFO) method and other inventories using the weighted-average cost method. Under the FIFO method, the cost of inventory is based on the historic cost of acquisition or manufacture rather than the current replacement cost. In volatile energy markets, this can have a significant distorting effect on the reported income. Accordingly, the adjusted results of the Refining & Chemicals and Marketing & Services segments are presented according to the replacement cost method. This method is used to assess the segments' performance and facilitate the comparability of the segments' performance with those of its main competitors. In the replacement cost method, which approximates the Last-In, First-Out (LIFO) method, the variation of inventory values in the statement of income is, depending on the nature of the inventory, determined using either the month-end prices differential between one period and another or the average prices of the period rather than the historical value. The inventory valuation effect is the difference between the results under the FIFO and the replacement cost methods.

Effect of changes in fair value: the effect of changes in fair value presented as an adjustment item reflects, for trading inventories and storage contracts, differences between internal measures of performance used by TotalEnergies' Executive Committee and the accounting for these transactions under IFRS. IFRS requires that trading inventories be recorded at their fair value using period-end spot prices. In order to best reflect the management of economic exposure through derivative transactions, internal indicators used to measure performance include valuations of trading inventories based on forward prices. TotalEnergies, in its trading activities, enters into storage contracts, whose future effects are recorded at fair value in TotalEnergies' internal economic performance. IFRS precludes recognition of this fair value effect. Furthermore, TotalEnergies enters into derivative instruments to risk manage certain operational contracts or assets. Under IFRS, these derivatives are recorded at fair value while the underlying operational transactions are recorded as they occur. Internal indicators defer the fair value on derivatives to match with the transaction occurrence.

Special items: due to their unusual nature or particular significance, certain transactions qualifying as "special items" are excluded from the business segment figures. In general, special items relate to transactions that are significant, infrequent or unusual. However, in certain instances, transactions such as restructuring costs or assets disposals, which are not considered to be representative of the normal course of business, may qualify as special items although they may have occurred in prior years or are likely to occur in following years.

TotalEnergies measures performance at the segment level on the basis of Adjusted net operating income. Adjusted net operating income comprises operating income of the relevant segment after deducting the amortization and the depreciation of intangible assets other than mineral interest, translation adjustments and gains or losses on the sale of assets, as well as all other income and expenses related to capital employed (dividends from nonconsolidated companies, income from equity affiliates and capitalized interest expenses) and after income taxes applicable to the above, excluding the effect of the adjustments describe below.

The income and expenses not included in net operating income adjusted that are included in net income (TotalEnergies share) are interest expenses related to net financial debt, after applicable income taxes (net cost of net debt), non-controlling interests, and the adjusted items.

The operational profit and assets are broken down by business segment prior to the consolidation and inter-segment adjustments.

Sales prices between business segments approximate market prices.

The reporting structure for the business segments' financial information is based on the following five business segments:

- An Exploration & Production segment that encompasses the activities of exploration and production of oil and natural gas, conducted in about 50 countries;
- An Integrated LNG segment covering the integrated gas chain (including upstream and midstream LNG activities) as well as biogas, hydrogen and gas trading activities;
- An Integrated Power segment covering generation, storage, electricity trading and B2B-B2C distribution of gas and electricity;
- A Refining & Chemicals segment constituting a major industrial hub comprising the activities of refining, petrochemicals and specialty chemicals. This segment also includes the activities of oil Supply, Trading and marine Shipping;
- A Marketing & Services segment including the global activities of supply and marketing in the field of petroleum products.

In addition, the Corporate segment includes holdings operating and financial activities.

B.1 Exploration & Production

1. Production

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | Hydrocarbon production | 2024 | 2023 | 2024 vs 2023 |
|-------|-------|--------------------|-------|------------------------|-------|-------|--------------------|
| 1,933 | 1,944 | -1% | 1,998 | EP (kboe/d) | 1,947 | 2,034 | -4% |
| 1,385 | 1,414 | -2% | 1,448 | Liquids (kb/d) | 1,408 | 1,492 | -6% |
| 2,924 | 2,830 | +3% | 2,946 | Gas (Mct/d) | 2,880 | 2,900 | -1% |

2. Results

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | In millions of dollars, except effective tax rate | 2024 | 2023 | 2024 vs 2023 |
|-------|-------|--------------------|---------|---|--------|---------|--------------------|
| 2,305 | 2,482 | -7% | 2,802 | Adjusted net operating income ⁽¹⁾ | 10,004 | 10,942 | -9% |
| 207 | 183 | +13% | 130 | including adjusted income from equity affiliates | 742 | 539 | +38% |
| 50.5% | 45.1% | | 47.7% | Effective tax rate ⁽²⁾ | 47.8% | 50.0% | |
| 1,688 | 2,161 | -22% | (1,282) | Cash flow used in investing activities | 8,385 | 7,260 | +15% |
| 2,104 | 2,330 | -10% | 3,117 | Organic investments | 9,060 | 10,232 | -11% |
| (258) | (42) | ns | (4,306) | Acquisitions net of assets sales | (207) | (2,706) | ns |
| 1,846 | 2,288 | -19% | (1,189) | Net investments | 8,853 | 7,526 | +18% |

| | | | | | | | |
|-------|-------|-----|-------|--|--------|--------|------|
| 4,500 | 4,763 | -6% | 5,708 | Cash flow from operating activities | 17,388 | 18,531 | -6% |
| 3,945 | 4,273 | -8% | 4,690 | Cash flow from operations excluding working capital (CFFO) | 17,049 | 19,126 | -11% |

(1) Detail of adjustment items shown in the business segment information starting on page 34.

(2) Effective tax rate = (tax on adjusted net operating income) / (adjusted net operating income – income from equity affiliates – dividends received from investments – impairment of goodwill + tax on adjusted net operating income).

In the fourth quarter of 2024, Exploration & Production:

- adjusted net operating income was \$2,305 million, down 7% quarter-to-quarter, driven by lower oil prices that were partially compensated by increased production and higher gas realizations;
- cash flow from operating activities was \$4,500 million, down 6% quarter-to-quarter; and
- cash flow from operations excluding working capital (CFFO) was \$3,945 million, down 8% quarter-to-quarter for the same reasons stated above.

In the full year of 2024, Exploration & Production:

- adjusted net operating income was \$10,004 million, down 9% year-on-year, mainly driven by lower oil and gas prices and by the impact of the disposal of the Canadian oil sands assets;
- cash flow from operating activities was \$17,388 million, down 6% year-on-year; and
- cash flow from operations excluding working capital (CFFO) was \$17,049 million, down 11% year-on-year, for the same reasons stated above.

B.2 Integrated LNG

1. Production

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | Hydrocarbon production for LNG | 2024 | 2023 | 2024 vs 2023 |
|-------|-------|--------------------|-------|--------------------------------|-------|-------|--------------------|
| 494 | 465 | +6% | 464 | Integrated LNG (kboe/d) | 487 | 449 | +8% |
| 60 | 52 | +14% | 58 | Liquids (kb/d) | 60 | 58 | +3% |
| 2,399 | 2,263 | +6% | 2,212 | Gas (Mcf/d) | 2,331 | 2,128 | +10% |

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | Liquefied Natural Gas in Mt | 2024 | 2023 | 2024 vs 2023 |
|------|------|--------------------|------|---|------|------|--------------------|
| 10.8 | 9.5 | +14% | 11.8 | Overall LNG sales | 39.8 | 44.3 | -10% |
| 3.8 | 3.8 | +1% | 4.0 | Incl. Sales from equity production* | 15.5 | 15.2 | +1% |
| 9.4 | 8.4 | +11% | 10.8 | Incl. Sales by TotalEnergies from equity production and third party purchases | 34.7 | 40.1 | -14% |

* The Company's equity production may be sold by TotalEnergies or by the joint ventures.

Hydrocarbon production for LNG in the fourth quarter of 2024 was up 6% quarter-to-quarter, notably due to the end of unplanned maintenance at Ichthys LNG, which occurred in the third quarter.

LNG sales, although down year-on-year reflecting lower LNG demand in Europe, were up 14% quarter-to-quarter, notably due to increased spot volumes in a context of seasonal inventory replenishment.

2. Results

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | In millions of dollars, except the average price of LNG | 2024 | 2023 | 2024 vs 2023 |
|-------|-------|--------------------|-------|--|-------|-------|--------------------|
| 10.37 | 9.91 | +5% | 10.28 | Average price of LNG (\$/Mbtu) ⁽¹⁾ Consolidated subsidiaries and equity affiliates | 9.80 | 10.76 | -9% |
| 1,432 | 1,063 | +35% | 1,456 | Adjusted net operating income ⁽²⁾ | 4,869 | 6,200 | -21% |
| 525 | 538 | -2% | 500 | including adjusted income from equity affiliates | 1,978 | 2,103 | -6% |
| 1,657 | 500 | x3.3 | 827 | Cash flow used in investing activities | 3,487 | 3,120 | +12% |
| 554 | 451 | +23% | 790 | Organic investments | 2,169 | 2,063 | +5% |
| 1,116 | 65 | x17.2 | 48 | Acquisitions net of assets sales | 1,367 | 1,096 | +25% |

| 1,447 | 888 | +63% | 1,763 | Cash flow from operations excluding working capital (CFFO) | 4,903 | 7,293 | -33% |

(1) Sales in \$ / Sales in volume for consolidated and equity affiliates. Does not include LNG trading activities.

(2) Detail of adjustment items shown in the business segment information starting on page 34.

In the fourth quarter of 2024, Integrated LNG:

- adjusted net operating income was \$1,432 million, up 35% quarter-to-quarter, driven by higher hydrocarbon production for LNG, an average LNG selling price above \$10/Mbtu and LNG trading results benefitting from higher market volatility;
- cash flow from operating activities was \$2,214 million, 2.7 times higher quarter-to-quarter; and
- cash flow from operations excluding working capital (CFFO) was \$1,447 million, up 63% quarter-to-quarter, for the same reasons stated above and due to a positive timing effect in dividend payments from some equity affiliates of around \$150 million.

In the full year of 2024, Integrated LNG:

- adjusted net operating income was \$4,869 million, down 21% year-on-year, mainly due to lower average LNG selling prices and low market volatility during the first three quarters that impacted gas trading results;

- cash flow from operating activities was \$5,185 million, down 39% year-on-year; and
- cash flow from operations excluding working capital (CFFO) was \$4,903 million, down 33% year-on-year for the same reasons stated above.

B.3 Integrated Power

1. Productions, capacities, clients and sales

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | Integrated Power | 2024 | 2023 | 2024 vs 2023 |
|------|------|--------------------|------|---|------|-------|--------------------|
| 11.4 | 11.1 | +2% | 8.0 | Net power production (TWh) ⁽¹⁾ | 41.1 | 33.4 | +23% |
| 6.5 | 6.7 | -4% | 5.5 | o/w power production from renewables | 26.0 | 18.9 | +38% |
| 4.9 | 4.4 | +12% | 2.5 | o/w power production from gas flexible capacities | 15.1 | 14.5 | +4% |
| 21.5 | 21.6 | -1% | 17.3 | Portfolio of power generation net installed capacity (GW) ⁽²⁾ | 21.5 | 17.3 | +24% |
| 15.1 | 14.5 | +4% | 13.0 | o/w renewables | 15.1 | 13.0 | +16% |
| 6.5 | 7.1 | -9% | 4.3 | o/w power gas flexible capacities | 6.5 | 4.3 | +50% |
| 97.2 | 89.6 | +9% | 80.1 | Portfolio of renewable power generation gross capacity (GW) ^{(2), (3)} | 97.2 | 80.1 | +21% |
| 26.0 | 24.2 | +8% | 22.4 | o/w installed capacity | 26.0 | 22.4 | +16% |
| 6.1 | 6.0 | +1% | 5.9 | Clients power – BtB and BtC (Million) ⁽²⁾ | 6.1 | 5.9 | +2% |
| 2.8 | 2.8 | - | 2.8 | Clients gas – BtB and BtC (Million) ⁽²⁾ | 2.8 | 2.8 | - |
| 13.8 | 10.9 | +26% | 13.9 | Sales power – BtB and BtC (TWh) | 50.7 | 52.1 | -3% |
| 30.1 | 13.9 | x2.2 | 30.7 | Sales gas – BtB and BtC (TWh) | 98.6 | 100.9 | -2% |

(1) Solar, wind, hydroelectric and gas flexible capacities.

(2) End of period data.

(3) Includes 20% of Adani Green Energy Ltd's gross capacity, 50% of Clearway Energy Group's gross capacity and 49% of Casa dos Ventos' gross capacity.

Net power production was 11.4 TWh in the fourth quarter of 2024, up 2% quarter-to-quarter, due to the seasonal increase in power production from flexible capacities in Europe.

In the full year of 2024, net power production was up 23% year-on-year, at 41 TWh. Notably, production from renewables increased 38% year-on-year and accounted for more than 60% of the electricity generated.

Gross installed renewable power generation capacity reached 26 GW at the end of the fourth quarter of 2024, up 1.8 GW quarter-to-quarter.

Results

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | In millions of dollars | 2024 | 2023 | 2024 vs 2023 |
|-------|-------|--------------------|-------|--|-------|-------|--------------------|
| 575 | 485 | +19% | 527 | Adjusted net operating income ⁽¹⁾ | 2,173 | 1,853 | +17% |
| (25) | 29 | ns | 21 | including adjusted income from equity affiliates | - | 137 | -100% |
| (509) | 2,221 | ns | 1,209 | Cash flow used in investing activities | 3,897 | 4,836 | -19% |
| 109 | 707 | -85% | 674 | Organic investments | 2,355 | 2,582 | -9% |
| (662) | 1,529 | ns | 532 | Acquisitions net of assets sales | 1,514 | 2,363 | -36% |

| 604 | 636 | -5% | 705 | Cash flow from operations excluding working capital (CFFO) | 2,555 | 2,152 | +19% |

(1) Detail of adjustment items shown in the business segment information starting on page 34.

In the fourth quarter of 2024, Integrated Power adjusted net operating income was \$575 million, up 19% quarter-to-quarter.

In the full year of 2024, Integrated Power:

- adjusted net operating income was \$2,173 million, up nearly 20% year-on-year, in line with growth in the business;
- cash flow from operating activities was \$2,972 million, down 17% year-on-year; and
- cash flow from operations excluding working capital (CFFO) was \$2,555 million, up nearly 20% year-on-year, in line with growth in the business. These results demonstrate the relevance of the integrated model, with all segments of the value chain contributing to achieving of the annual guidance (> \$2.5 billion CFFO).

B.4 Downstream (Refining & Chemicals and Marketing & Services)

1. Results

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | In millions of dollars | 2024 | 2023 | 2024 vs 2023 |

(1) Detail of adjustment items shown in the business segment information starting on page 34.

B.5 Refining & Chemicals

1. Refinery and petrochemicals throughput and utilization rates

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | Refinery throughput and utilization rate | 2024 | 2023 | 2024 vs 2023 |
|-------|-------|--------------------|-------|--|-------|-------|--------------------|
| 1,432 | 1,539 | -7% | 1,381 | Total refinery throughput (kb/d) | 1,472 | 1,436 | +2% |
| 424 | 451 | -6% | 444 | France | 422 | 414 | +2% |
| 541 | 625 | -13% | 582 | Rest of Europe | 605 | 592 | +2% |
| 467 | 463 | +1% | 355 | Rest of world | 446 | 431 | +3% |
| 82% | 86% | | 79% | Utilization rate based on crude only* | 83% | 81% | |

* Based on distillation capacity at the beginning of the year, excluding the African refinery SIR (divested) from 3^d quarter 2024 and the African refinery Natref (divested) during the 4th quarter 2024.

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | Petrochemicals production and utilization rate | 2024 | 2023 | 2024 vs 2023 |
|-------|-------|--------------------|-------|--|-------|-------|--------------------|
| 1,233 | 1,314 | -6% | 1,114 | Monomers* (kt) | 5,082 | 4,896 | +4% |
| 1,080 | 1,167 | -7% | 985 | Polymers (kt) | 4,433 | 4,130 | +7% |
| 79% | 85% | | 60% | Steam cracker utilization rate** | 79% | 69% | |

* Olefins.

** Based on olefins production from steam crackers and their treatment capacity at the start of the year, excluding Lavera (divested) from 2^d quarter 2024.

In the fourth quarter of 2024, Refining throughput was down 7% quarter-to-quarter, mainly due to a turnaround at the Leuna refinery, in Germany.

In the full year of 2024, the utilization rate based on crude was 83%, below the annual objective of 85% due to unplanned shutdowns notably at the Normandy and Donges platforms, in France as well as at the Port-Arthur refinery in the United States.

2. Results

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | In millions of dollars, except ERM | 2024 | 2023 | 2024 vs 2023 |
|-------|------|--------------------|-------|---|-------|-------|--------------------|
| 25.9 | 15.4 | +68% | 52.6 | European Refining Margin Marker (ERM) (\$/t) ⁽¹⁾ | 39.5 | 71.0 | -44% |
| 318 | 241 | +32% | 633 | Adjusted net operating income ⁽²⁾ | 2,160 | 4,654 | -54% |
| 498 | 319 | +56% | 989 | Cash flow used in investing activities | 1,530 | 1,953 | -22% |
| 581 | 329 | +77% | 1,002 | Organic investments | 1,711 | 2,040 | -16% |

| 822 | 530 | +55% | 1,173 | Cash flow from operations excluding working capital (CFFO) | 3,760 | 5,853 | -36% |

(1) This market indicator for European refining, calculated based on public market prices (\$/t), uses a basket of crudes, petroleum product yields and variable costs representative of the European refining system of TotalEnergies. Does not include oil trading activities.

(2) Detail of adjustment items shown in the business segment information starting on page 34.

In the fourth quarter of 2024, Refining & Chemicals:

- adjusted net operating income was \$318 million, up 32% quarter-to-quarter, due to a \$10/t increase in European refining margins;
- cash flow from operating activities was \$3,832 million, 6.8 times higher quarter-to-quarter; and
- cash flow from operations excluding working capital (CFFO) was \$822 million, up 55% quarter-to-quarter, for the same reasons stated above and due to dividends received from equity affiliates during the quarter.

In the full year of 2024 Refining & Chemicals:

- adjusted net operating income was \$2,160 million, down 54% year-on-year, reflecting lower refining margins in Europe and the Rest of the World;
- cash flow from operating activities was \$3,808 million, down 52% year-on-year; and
- cash flow from operations excluding working capital (CFFO) was \$3,760 million, down 36% year-on-year, for the same reason stated above.

B.6 Marketing & Services

1. Petroleum product sales

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | Sales in kb/d* | 2024 | 2023 | 2024 vs 2023 |
|-------|-------|--------------------|-------|----------------------------------|-------|-------|--------------------|
| 1,312 | 1,383 | -5% | 1,341 | Total Marketing & Services sales | 1,342 | 1,375 | -2% |
| 724 | 795 | -9% | 755 | Europe | 752 | 776 | -3% |
| 587 | 588 | - | 587 | Rest of world | 591 | 599 | -1% |

* Excludes trading and bulk refining sales.

Sales of petroleum products in the fourth quarter of 2024 were down 5% quarter-to-quarter, mainly due to seasonality of European fuel demand.

2. Results

| 4Q24 | 3Q24 | 4Q24 vs 3Q24 | 4Q23 | In millions of dollars | 2024 | 2023 | 2024 vs 2023 |
|------|------|--------------------|---------|--|---------|---------|--------------------|
| 362 | 364 | -1% | 306 | Adjusted net operating income ⁽¹⁾ | 1,360 | 1,458 | -7% |
| 352 | 310 | +14% | (1,166) | Cash flow used in investing activities | (138) | (859) | ns |
| 432 | 232 | +86% | 502 | Organic investments | 951 | 1,065 | -11% |
| (80) | 78 | ns | (1,668) | Acquisitions net of assets sales | (1,089) | (1,924) | ns |
| 352 | 310 | +14% | (1,166) | Net investments | (138) | (859) | ns |
| 778 | 581 | +34% | 1,759 | Cash flow from operating activities | 2,901 | 1,957 | +48% |
| 534 | 647 | -17% | 519 | Cash flow from operations excluding working capital (CFFO) | 2,319 | 2,318 | - |

(1) Detail of adjustment items shown in the business segment information starting on page 34.

In the fourth quarter of 2024, Marketing & Services:

- adjusted net operating income was stable quarter-to-quarter at \$362 million;
- cash flow from operating activities was \$778 million, up 34% quarter-to-quarter; and
- cash flow from operations excluding working capital (CFFO) was \$534 million, down 17% quarter-to-quarter.

C. TOTALENERGIES RESULTS

1. Net income (TotalEnergies share)

Net income (TotalEnergies share) was \$3,956 million in the fourth quarter of 2024 compared to \$2,294 million in the third quarter of 2024.

Adjusted net income (TotalEnergies share) was \$4,406 million in the fourth quarter of 2024 compared to \$4,074 million in the third quarter of 2024, mainly due to the increase in hydrocarbon production, in gas prices and in refining margins partially offset by lower oil prices.

Adjusted net income excludes the after-tax inventory effect, special items and the impact of changes in fair value.

Adjustments to net income were (\$0.5) billion in the fourth quarter of 2024, consisting mainly of:

- (\$0.4) billion related to impairments,
- \$0.2 billion in inventory effects,
- (\$0.3) billion related to the effect of changes in fair value.

2. Fully-diluted shares and share buybacks

As of December 31, 2024, the number of diluted shares was 2,270 million.

TotalEnergies repurchased:

- 32.9 million shares for cancellation in the fourth quarter of 2024 for \$2 billion,
- 121 million shares for cancellation in the full year of 2024 for \$8 billion.

3. Acquisitions - asset sales

Acquisitions were:

- \$1,233 million in the fourth quarter of 2024, primarily related to Sapura OMV in Malaysia and interests in dry gas fields operated by Lewis Energy in the Eagle Ford in Texas,
- \$4,646 million in the full year of 2024, related to the above acquisitions as well as the acquisitions of a 20% interest from Lewis Energy Group in the Dorado (Eagle Ford) gas field in Texas, the German renewable energy aggregator Quadra Energy, 1.5 GW of flexible gas capacity in Texas, 1.3 GW of flexible gas capacity in the United Kingdom and interest in offshore wind in Germany in 2023 and in The Netherlands in 2024.

Divestments were:

- \$1,209 million in the fourth quarter of 2024, primarily related to the farm down of renewable and flexible assets in the United States, the sale of a 50% interest in the West Burton plant in the United Kingdom as well as the sales of TotalEnergies EP Brunei, TotalEnergies' interest in Total PARCO in Pakistan and a minority interest in the Natref refinery, in South Africa,
- \$3,240 million in the full year of 2024, related to the above divestments as well as to the closing of the retail network transaction with Alimentation Couche-Tard in Belgium, Luxembourg and the Netherlands, the sale of a 15% interest in Absheron in Azerbaijan, the farm down of the Seagreen offshore wind farm in the United Kingdom, and the sale of petrochemical assets in Lavera, France.

4. Cash flow

TotalEnergies' cash flow from operating activities was \$12,507 million in the fourth quarter of 2024, compared to a cash flow from operations excluding working capital (CFFO) of

\$7,151 million, which reflects positive variation from a \$5,4 billion working capital release, including around \$1.5 billion related to exceptional items.

The change in working capital was a decrease of \$5,201 million in the fourth quarter of 2024 in accordance with IFRS. The difference of \$(155) million between IFRS and replacement cost method corresponds to the following adjustments: (i) the pre-tax inventory valuation effect of \$(282) million, (ii) plus the mark-to-market effect of Integrated LNG's and Integrated Power's contracts of \$129 million, (iii) plus the capital gains from the renewables project sale of \$0 million and (iv) less the organic loan repayments from equity affiliates of \$2 million.

The change in working capital, as determined using the replacement cost method excluding the mark-to-market effect of Integrated LNG and Integrated Power's contracts, including capital gain from renewable project sales and including organic loan repayment from equity affiliates, was a decrease of \$5,356 million in the fourth quarter of 2024, compared to a decrease of \$7,650 million in the fourth quarter of 2023.

TotalEnergies' net cash flow¹ was:

- \$3,288 million in the fourth quarter of 2024 compared to \$1,057 million in the third quarter 2024, reflecting the \$330 million increase in CFFO and the \$1,901 million decrease in net investments to \$3,863 million in the fourth quarter 2024,
- \$12,088 million in the full year of 2024 compared to \$19,109 million in the full year of 2023, reflecting the \$6,029 million decrease in CFFO and the \$992 million increase in net investments to \$17,829 million in 2024.

¹ Net cash flow is a non-GAAP financial measure. Refer to the Glossary on page 25 for the definitions and further information on non-GAAP measures (alternative performance measures) and to pages 16 and following for reconciliation tables.

D. PROFITABILITY

Return on equity was 15.8% for the twelve months ended December 31, 2024.

| In millions of dollars | January 1, 2024 December 31, 2024 | October 1, 2023 September 30, 2024 | January 1, 2023 December 31, 2023 |
|---------------------------------------|--------------------------------------|---------------------------------------|--------------------------------------|
| Adjusted net income | 18,586 | 19,398 | 23,450 |
| Average adjusted shareholders' equity | 117,835 | 116,572 | 115,006 |
| Return on equity (ROE) | 15.8% | 16.6% | 20.4% |

Return on average capital employed (ROACE)² was 14.8% for the twelve months ended December 31, 2024.

| In millions of dollars | January 1, 2024 December 31, 2024 | October 1, 2023 September 30, 2024 | January 1, 2023 December 31, 2023 |
|-------------------------------|--------------------------------------|---------------------------------------|--------------------------------------|
| Adjusted net operating income | 19,974 | 20,701 | 24,684 |
| Average capital employed | 135,174 | 142,195 | 130,517 |
| ROACE | 14.8% | 14.6% | 18.9% |

E. Annual 2024 Sensitivities*

| | Change | Estimated impact on adjusted net operating income | Estimated impact on cash flow from operations |
|---------------------------------------|------------------|---|---|
| Dollar | +/- 0.1 \$ per € | -/+ 0.1 B\$ | -0 B\$ |
| Average liquids price** | +/- 10\$/b | +/- 2.3 B\$ | +/- 2.8 B\$ |
| European gas price – TTF | +/- 2 \$/Mbtu | +/- 0.4 B\$ | +/- 0.4 B\$ |
| European Refining Margin Marker (ERM) | +/- 10 \$/t | +/- 0.4 B\$ | +/- 0.5 B\$ |

* Sensitivities are revised once per year upon publication of the previous year's fourth quarter results. Sensitivities are estimates based on assumptions about TotalEnergies' portfolio in 2025. Actual results could vary significantly from estimates based on the application of these sensitivities. The impact of the \$-€ sensitivity on adjusted net operating income is essentially attributable to Refining & Chemicals.

** In a 70-80 \$/b Brent environment.

F. SUMMARY AND OUTLOOK

At the beginning of 2025, Brent prices remain volatile between \$70 and \$80/b, supported by the willingness of OPEC+ countries to balance oil markets that are facing strong supply growth from non-OPEC countries (US, Guyana, Brazil). According to the IEA, global oil demand is anticipated to grow by 1.1 Mb/d in 2025, up from a 0.8 Mb/d increase in 2024.

European gas prices increased at the end of 2024 and forward markets currently expect prices to be above \$13/Mbtu in the first quarter of 2025, supported by high winter consumption and rapid inventory declines in Europe in the context of the interruption of Russian imports via Ukraine. Gas markets are expected to remain in tension in 2025 due to very limited expected capacity additions related to delays of some projects. TotalEnergies expects more than 40 Mt of LNG sales in 2025. Given the evolution of oil and gas prices in the recent months and the lag effect on price formulas, TotalEnergies anticipates its average LNG selling price will be above \$10/Mbtu in the first quarter 2025.

In 2025, TotalEnergies anticipates its hydrocarbon production will grow more than 3%, benefiting from the ramp-up of 2024 start-ups and production start-ups, notably Ballymore in the Gulf of Mexico and Mero-4 in Brazil.

First quarter 2025 hydrocarbon production is expected to be between 2.5 and 2.55 Mboe/d thanks to the ramp-up of 2024 start-ups and the closing of the acquisitions of SapuraOMV in Malaysia and of interests in the Eagle Ford shale gas play in Texas that occurred during the fourth quarter 2024.

The Integrated Power segment is expected to expand in 2025 supported by electricity production growth greater than 20% to reach an annual net electricity generation of more than 50 TWh. Cash flow before working capital (CFFO) is expected to be between \$2.5 and \$3 billion in 2025³.

By combining hydrocarbon and electricity production growth, the Company expects to increase energy production by 5% in 2025. Integrated Power production will represent 10% of hydrocarbon production.

For 2025, TotalEnergies expects net investments of \$17 to \$17.5 billion, of which \$4.5 billion is dedicated to low carbon energies, mostly Integrated Power. Organic investments are expected to amount to approximately \$17 billion, focused on core growth projects to achieve 2030 production targets, down from the \$18 billion guidance presented during the

2 ROACE is a non-GAAP financial measure. Refer to the Glossary on page 25 for the definitions and further information on Non-GAAP measures (alternative performance measures).

FORWARD-LOOKING STATEMENTS

This document may contain forward-looking statements (including within the meaning of the Private Securities Litigation Reform Act of 1995), notably with respect to the financial condition, results of operations, business activities and strategy of TotalEnergies. This document may also contain statements regarding the perspectives, objectives, areas of improvement and goals of TotalEnergies, including with respect to climate change and carbon neutrality (net zero emissions). An ambition expresses an outcome desired by TotalEnergies, it being specified that the means to be deployed do not depend solely on TotalEnergies. These forward-looking statements may generally be identified by the use of the future or conditional tense or forward-looking words such as “will”, “should”, “could”, “would”, “may”, “likely”, “might”, “envisions”, “intends”, “anticipates”, “believes”, “considers”, “plans”, “expects”, “thinks”, “targets”, “aims” or similar terminology. Such forward-looking statements included in this document are based on economic data, estimates and assumptions prepared in a given economic, competitive and regulatory environment and considered to be reasonable by TotalEnergies as of the date of this document.

These forward-looking statements are not historical data and should not be interpreted as assurances that the perspectives, objectives or goals announced will be achieved. They may prove to be inaccurate in the future, and may evolve or be modified with a significant difference between the actual results and those initially estimated, due to the uncertainties notably related to the economic, financial, competitive and regulatory environment, or due to the occurrence of risk factors, such as, notably, the price fluctuations in crude oil and natural gas, the evolution of the demand and price of petroleum products, the changes in production results and reserves estimates, the ability to achieve cost reductions and operating efficiencies without unduly disrupting business operations, changes in laws and regulations including those related to the environment and climate, currency fluctuations, technological innovations, meteorological conditions and events, as well as socio-demographic, economic and political developments, changes in market conditions, loss of market share and changes in consumer preferences, or pandemics such as COVID-19. Additionally, certain financial information is based on estimates particularly in the assessment of the recoverable value of assets and potential impairments of assets relating thereto.

Readers are cautioned not to consider forward-looking statements as accurate, but as an expression of the Company's views only as of the date this document is published. TotalEnergies SE and its subsidiaries have no obligation, make no commitment and expressly disclaim any responsibility to investors or any stakeholder to update or revise, particularly as a result of new information or future events, any forward-looking information or statement, objectives or trends contained in this document. In addition, the Company has not verified, and is under no obligation to verify any third-party data contained in this document or used in the estimates and assumptions or, more generally, forward-looking statements published in this document.

For additional factors, you should read the information set forth under “Item 3. -3.1 Risk Factors”, “Item 4. Information on the Company”, “Item 5. Operating and Financial Review and Prospects” and “Item 11. Quantitative and Qualitative Disclosures about Market Risk” in TotalEnergies' Form 20-F for the year ended December 31, 2023.

Additionally, the developments of environmental and climate change-related issues in this document are based on various frameworks and the interests of various stakeholders which are subject to evolve independently of the Company's will. Moreover, the Company's disclosures on such issues, including climate-related disclosures, may include information that is not necessarily “material” under US securities laws for SEC reporting purposes or under applicable securities law.

GLOSSARY

Acquisitions net of assets sales is a non-GAAP financial measure and its most directly comparable IFRS measure is Cash flow used in investing activities. Acquisitions net of assets sales refers to acquisitions minus assets sales (including other operations with non-controlling interests). This indicator can be a valuable tool for decision makers, analysts and shareholders alike because it illustrates the allocation of cash flow used for growing the Company's asset base via external growth opportunities.

Adjusted EBITDA (Earnings Before Interest, Tax, Depreciation and Amortization) is a non-GAAP financial measure and its most directly comparable IFRS measure is Net Income. It refers to the adjusted earnings before depreciation, depletion and impairment of tangible and intangible assets and mineral interests, income tax expense and cost of net debt, i.e., all operating income and contribution of equity affiliates to net income. This indicator can be a valuable tool for decision makers, analysts and shareholders alike to measure and compare the Company's profitability with utility companies (energy sector).

Adjusted net income (TotalEnergies share) is a non-GAAP financial measure and its most directly comparable IFRS measure is Net Income (TotalEnergies share). Adjusted Net Income (TotalEnergies share) refers to Net Income (TotalEnergies share) less adjustment items to Net Income (TotalEnergies share). Adjustment items are inventory valuation effect, effect of changes in fair value, and special items. This indicator can be a valuable tool for decision makers, analysts and shareholders alike to evaluate the Company's operating results and to understand its operating trends by removing the impact of non-operational results and special items.

Capital Employed is a non-GAAP financial measure. They are calculated at replacement cost and refer to capital employed (balance sheet) less inventory valuations effect. Capital employed (balance sheet) refers to the sum of the following items: (i) Property, plant and equipment, intangible assets, net, (ii) Investments & loans in equity affiliates, (iii) Other non-current assets, (iv) Working capital which is the sum of: Inventories, net, Accounts receivable, net, other current assets, Accounts payable, Other creditors and accrued liabilities (v) Provisions and other non-current liabilities and (vi) Assets and liabilities classified as held for sale. Capital Employed can be a valuable tool for decision makers, analysts and shareholders alike to provide insight on the amount of capital investment used by the Company or its business segments to operate. Capital Employed is used to calculate the Return on Average Capital Employed (ROACE).

Cash Flow From Operations excluding working capital (CFFO) is a non-GAAP financial measure and its most directly comparable IFRS measure is Cash flow from operating activities. Cash Flow From Operations excluding working capital is defined as cash flow from operating activities before changes in working capital at replacement cost, excluding the mark-to-market effect of Integrated LNG and Integrated Power contracts, including capital gain from renewable projects sales and including organic loan repayments from equity affiliates. This indicator can be a valuable tool for decision makers, analysts and shareholders alike to help understand changes in cash flow from operating activities, excluding the impact of working capital changes across periods on a consistent basis and with the performance of peer companies in a manner that, when viewed in combination with the Company's results prepared in accordance with GAAP, provides a more complete understanding of the factors and trends affecting the Company's business and performance. This performance indicator is used by the Company as a base for its cash flow allocation and notably to guide on the share of its cash flow to be allocated to the distribution to shareholders.

Debt adjusted cash flow (DACF) is a non-GAAP financial measure and its most directly comparable IFRS measure is Cash flow from operating activities. DACF is defined as Cash Flow From Operations excluding working capital (CFFO) without financial charges. This indicator can be a valuable tool for decision makers, analysts and shareholders alike because it corresponds to the funds theoretically available to the Company for investments, debt repayment and distribution to shareholders, and therefore facilitates comparison of the Company's results of operations with those of other registrants, independent of their capital structure and working capital requirements.

Free cash flow after Organic Investments is a non-GAAP financial measure and its most directly comparable IFRS measure is Cash flow from operating activities. Free cash flow after Organic Investments, refers to Cash Flow From Operations excluding working capital minus Organic Investments. Organic Investments refer to Net Investments excluding acquisitions, asset sales and other transactions with non-controlling interests. This indicator can be a valuable tool for decision makers, analysts and shareholders alike because it illustrates operating cash flow generated by the business post allocation of cash for Organic Investments.

Gearing is a non-GAAP financial measure and its most directly comparable IFRS measure is the ratio of total financial liabilities to total equity. Gearing is a Net-debt-to-capital ratio, which is calculated as the ratio of Net debt excluding leases to (Equity + Net debt excluding leases). This indicator can be a valuable tool for decision makers, analysts and shareholders alike to assess the strength of the Company's balance sheet.

Net cash flow (or free cash flow) is a non-GAAP financial measure and its most directly comparable IFRS measure is Cash flow from operating activities. Net cash flow refers to Cash Flow From Operations excluding working capital minus Net Investments. Net cash flow can be a valuable tool for decision makers, analysts and shareholders alike because it illustrates cash flow generated by the operations of the Company post allocation of cash for Organic Investments and Acquisitions net of assets sales (acquisitions - assets sales - other operations with non-controlling interests). This performance indicator corresponds to the cash flow available to repay debt and allocate cash to shareholder distribution or share buybacks.

Net investments is a non-GAAP financial measure and its most directly comparable IFRS measure is Cash flow used in investing activities. Net Investments refer to Cash flow used in investing activities including other transactions with non-controlling interests, including change in debt from renewable projects financing, including expenditures related to carbon credits, including capex linked to capitalized leasing contracts and excluding organic loan repayment from equity affiliates. This indicator can be a valuable tool for decision makers, analysts and shareholders alike to illustrate the cash directed to growth opportunities, both internal and external, thereby showing, when combined with the Company's cash flow statement prepared under IFRS, how cash is generated and allocated for uses within the organization. Net Investments are the sum of Organic Investments and Acquisitions net of assets sales each of which is described in the Glossary.

Organic investments is a non-GAAP financial measure and its most directly comparable IFRS measure is Cash flow used in investing activities. Organic investments refers to Net Investments, excluding acquisitions, asset sales and other operations with non-controlling interests. Organic Investments can be a valuable tool for decision makers, analysts and shareholders alike because it illustrates cash flow used by the Company to grow its asset base, excluding sources of external growth.

Payout is a non-GAAP financial measure. Payout is defined as the ratio of the dividends and share buybacks for cancellation to the Cash Flow From Operations excluding working capital. This indicator can be a valuable tool for decision makers, analysts and shareholders as it provides the portion of the Cash Flow From Operations excluding working capital distributed to the shareholder.

Return on Average Capital Employed (ROACE) is a non-GAAP financial measure. ROACE is the ratio of Adjusted Net Operating Income to average Capital Employed at replacement cost between the beginning and the end of the period. This indicator can be a valuable tool for decision makers, analysts and shareholders alike to measure the profitability of the Company's average Capital Employed in its business operations and is used by the Company to benchmark its performance internally and externally with its peers.

RECENT DEVELOPMENTS

The term "TotalEnergies" or the "Company" in this exhibit is used to designate TotalEnergies SE and the consolidated entities that are directly or indirectly controlled by TotalEnergies SE. The entities in which TotalEnergies SE directly or indirectly owns a shareholding are separate and independent legal entities.

TotalEnergies proposes a dividend of €3.22/share for fiscal year 2024, a 7% increase

On February 4, 2025, the Board of Directors of the Company (the "Board of Directors") met, and decided to propose at the Shareholders' Meeting on May 23, 2025, the distribution of a dividend of €3.22/share for fiscal year 2024, a 7% increase compared to the dividend for fiscal year 2023 of €3.01/share. This increase is comparable to the 7.1% increase for fiscal year 2023 versus 2022.

Consequently, taking into account the three interim dividends of €0.79/share previously decided by the Board of Directors, the final dividend for fiscal year 2024 will be €0.85/share, an increase of 7.6% compared to the final dividend of 2023 and the 3 interim dividends of 2024.

The Board of Directors highlighted the growth of the dividend paid during years 2023, 2024 and 2025, which have increased or will increase by 7.1%, 7.0% and 7.2% respectively, the Board of Directors is considering a first interim dividend for 2025 (paid in the 4th quarter of 2025) at the level of the final dividend for fiscal year 2024.

Subject to approval at the Shareholders' Meeting, the final dividend will be detached and paid in cash, according to the following timetable:

| | <u>Shareholders</u> | <u>American Depositary Shares holders</u> |
|------------------|---------------------|---|
| Ex-dividend date | June 19, 2025 | June 18, 2025 |
| Payment date | July 1, 2025 | July 11, 2025 |

TotalEnergies and CAF extend and deepen their partnership for a further four years' period

On January 28, 2025, a day after the TotalEnergies CAF Africa Cup of Nations Morocco 2025 Final Draw, Patrick Pouyanné, Chairman and CEO of TotalEnergies and Dr Patrice Motsepe, President of the Confédération Africaine de Football (CAF) concluded an agreement extending their partnership for a further four years' period.

TotalEnergies will sponsor 12 major CAF events and CAF competitions in the period 2025-2028. These includes, amongst others, the TotalEnergies CAF Women's Africa Cup of Nations Morocco 2024, TotalEnergies CAF Africa Cup of Nations Morocco 2025, and TotalEnergies CAF Africa Cup of Nations Kenya, Tanzania and Uganda 2027.

With the extension of this partnership, TotalEnergies continues to passionately support the development of football on the African continent and deepens this support by becoming a partner of the CAF African Schools Football Championship starting from 2025 - CAF's flagship program to promote football for young girls and boys in Africa.

TotalEnergies and African Football

The story of TotalEnergies and CAF's partnership around passion for football began in 2016. This agreement made the Company the major partner of African football, as sponsor of more than 1,500 matches and title sponsor of the CAF's 10 main championships: three inter-club and seven national competitions, including the prestigious CAF Africa Cup of Nations (AFCON), now known as the TotalEnergies CAF Africa Cup of Nations.

Between 2025 and 2028, TotalEnergies will sponsor:

- The TotalEnergies CAF Africa Cup of Nations
- The TotalEnergies CAF Women's Africa Cup of Nations
- The TotalEnergies CAF African Nations Championship
- The TotalEnergies CAF U-17 Africa Cup of Nations
- The TotalEnergies CAF U-20 Africa Cup of Nations

-
- The TotalEnergies CAF U-23 Africa Cup of Nations
 - The TotalEnergies CAF Futsal Africa Cup of Nations
 - The TotalEnergies CAF Champions League
 - The TotalEnergies CAF Confederation Cup
 - The TotalEnergies CAF Super Cup
 - The CAF Awards
 - The CAF African Schools Football Championship

TotalEnergies in Africa

TotalEnergies has been present in Africa for over 90 years and is the continent's leading multi-energy company. Committed to energy transition, it operates across the energy value chain.

In Exploration & Production, Africa accounted for 19% of the Company's hydrocarbon output in 2023 (471,000 barrels of oil equivalent per day). In distribution, the Company is the leading marketer of petroleum products and related services, with a network of nearly 4,700 service stations across the continent. TotalEnergies also formulates and markets lubricants, thanks to nine production plants in operation, and supplies liquefied petroleum gas (LPG), notably for clean cooking, to 50 million people in Africa.

TotalEnergies contributes to diversify the energy mix in Africa by developing natural gas — including four liquefied natural gas (LNG) plants, one of which is under development — and a portfolio of around 2 GW of renewable energy projects. On the continent, the Company continues to reduce emissions from its operated sites and for its customers, offering solutions to enhance energy efficiency

Renewable Power: TotalEnergies is expected to supply 1.5 TWh to STMicroelectronics in France over 15 years

On January 28, 2025, TotalEnergies and STMicroelectronics (NYSE:STM), a global semiconductor leader serving customers across the spectrum of electronics applications, have signed a physical¹ Power Purchase Agreement (PPA) to supply renewable electricity to STMicroelectronics sites in France. This 15-year contract, started in January 2025, represents an overall volume of 1.5 TWh.

TotalEnergies is expected to provide STMicroelectronics with the renewable power (including the guarantee of origin) produced by two recent wind and solar farms of 75 MW operated by TotalEnergies. This power comes with structuration services to transform intermittent production in a constant volume ("baseload") of green electricity. It's the first time in France that such a 15-year contract, is provided. The positive impact of the wind and solar projects on the environment and on the communities was a key success factor in the signing of the deal.

The PPA with STMicroelectronics follows similar contracts signed with Saint-Gobain, Air Liquide, Amazon, LyondellBasell, Merck, Microsoft, Orange and Sasol, and provides a further illustration of TotalEnergies' ability to develop innovative solutions by leveraging its diverse asset portfolio to support its customers' decarbonization efforts.

GGIP in Iraq: TotalEnergies launches construction of an early gas treatment unit to stop flaring and supply power plants

On January 10, 2025, TotalEnergies (45%, operator) and its partners Basra Oil Company (30%) and QatarEnergy (25%) launched the construction works of ArtawiGas25, a first processing facility for the associated gas from the Ratawi field, located in the Basra region.

This facility, which is part of the Gas Growth Integrated Project (GGIP), represents an investment of around USD 250 million and is expected to process 50 million cubic feet per day (Mcf/d) of gas previously flared. The gas is expected to supply local power plants, covering the demand of approximately 200,000 households in the Basra region.

Signed in September 2021, the GGIP project is a USD 10 billion multi-energy project designed to enhance the development of Iraq's natural resources and improve the country's electricity supply. The GGIP includes a large-scale gas processing plant, with a first phase of 300 Mcf/d that is expected to recover gas being flared on three oil fields and supply gas to 1.5 GW of power generation capacity.

¹ In the case of a "physical" Power Purchase Agreement, the renewable electricity and the associated guarantees of origin are delivered to the customer, as opposed to the "virtual" PPA, where only the guarantees of origin are delivered to the customer, and the electricity produced is sold to the grid.

In anticipation of the start-up of this main gas processing facility, the ArtawiGas25 project is expected to significantly reduce gas flaring at the Ratawi field as early as end 2025. The innovative modular design of ArtawiGas25 could also pave the way for potential replication across other Iraqi oil fields. ArtawiGas25 is expected to create up to 160 direct and indirect jobs for Iraqi nationals during construction phase and 30 jobs during operation phase.

Integrated Power: TotalEnergies sells 50% of its shares in a gas power plant in the United Kingdom

On December 16, 2024, TotalEnergies announced the sale to EPUKI, the UK subsidiary of EPH, of 50% of its shares in West Burton Energy, a company wholly acquired in June 2024 with the announced intention to resell one half.

West Burton Energy owns a 1.3 GW gas fired power plant and a 49 MW battery storage system in the United Kingdom. The plant is expected to be operated by the joint venture between TotalEnergies and EPUKI.

Oman: TotalEnergies and OQAE sign agreements to develop 300 MW of renewable projects

On December 11, 2024, in line with its multi-energy strategy in the Sultanate of Oman, TotalEnergies announced, together with its partner OQ Alternative Energy (OQAE), the National Renewable Energy Champion, the signing of landmark agreements to develop 300 MW of renewable energy projects in the country. The electricity is expected to be delivered through long-term PPA to Petroleum Development Oman (PDO), the leading exploration and production company in the Sultanate.

With respectively 49% and 51% shares, TotalEnergies and OQAE are expected to lead three renewable projects:

- North Solar, a 100 MW solar project, located in Saih Nihaydah in northern Oman;
- Riyah-1 and Riyah-2, two 100 MW wind projects, located in Amin and West Nimr fields in southern Oman.

The construction is expected to start in early 2025, and the electricity production is expected to be in late 2026. These solar and wind projects are expected to generate over 1.4 TWh of renewable electricity annually.

Northern Endurance Partnership launches one of the first Carbon Capture and Storage (CCS) projects in the UK with the participation of TotalEnergies

On December 10, 2024, Northern Endurance Partnership (NEP) announced proceeding with the execution of the first CCS project in the UK. NEP, in which TotalEnergies holds a 10% shareholding interest, is expected to permanently store up to an initial 4 million tons of CO² per year.

The NEP infrastructure is expected to initially serve three carbon capture projects in the Teesside region (N2T Power, H2Teesside and Teesside Hydrogen CO² Capture). Infrastructure includes an onshore CO² gathering network, compression facilities and a 145 km offshore pipeline connected to subsea injection facilities in the Endurance saline aquifer located around 1,000m below the seabed.

Construction is expected to start from mid-2025 with first CO² storage expected in 2028.

Malaysia: TotalEnergies completes the acquisition of the upstream gas assets of SapuraOMV

On December 10, 2024, TotalEnergies finalized the acquisition of the interests of OMV (50%) and Sapura Upstream Assets (50%) in

SapuraOMV Upstream (SapuraOMV), an independent gas producer in Malaysia.

SapuraOMV's main assets are its 40% operated interest in block SK408 and 30% operated interest in block SK310, both located offshore Sarawak in Malaysia. The assets have production costs (ASC932) below 5 \$/boe and an overall emission intensity below 10 kg CO₂e/boe.

Integrated Power & Renewables: TotalEnergies implements its strategy of capital recycling with an acquisition in Germany and a farm down in the U.S.

On December 4, 2024, TotalEnergies announced the signing of an agreement with Swiss asset manager Partners Group for the acquisition of VSB Group, a Germany-based renewable energy project developer for a consideration of €1,57 billion (equity value and shareholder loan).

Additionally, in line with its Integrated Power business model, TotalEnergies has signed an agreement with funds managed by Apollo (NYSE: APO) for the sale of 50% of a portfolio of 2 GW solar

and battery energy storage systems (BESS) projects located in Texas. This transaction is expected to provide \$800 million cash to TotalEnergies (\$550 million equity from Apollo and \$250 million shareholder loan refinancing).

Germany: TotalEnergies acquires VSB and consolidates its Integrated Power business

This transaction is expected to strengthen TotalEnergies Integrated Power value chain in Germany, which represents half of VSB's portfolio. This complements TotalEnergies' recent acquisitions of battery storage developer Kyon Energy and energy manager Quadra Energy, as well as its major offshore wind positions in northern Germany. In addition, this transaction is expected to reinforce TotalEnergies' top 3 position in renewable power in France.

The completion of the transaction remains subject to the approval of applicable merger control authorities.

USA: TotalEnergies sells 50% of a 2 GW solar and BESS portfolio

The portfolio consists of three solar projects with a total capacity of 1.7 GW, and two battery storage projects with a capacity of 300 MW. Following this transaction, subject to certain conditions precedent, TotalEnergies is expected to retain a 50% stake and remain the operator of the assets, which are Danish Fields, Cottonwood, and Hill Solar I. The electricity production of these projects has either already been sold to third parties or will be commercialized by TotalEnergies.

Saudi Arabia: TotalEnergies and Aljomaih Energy & Water Company awarded 300 MW solar project

On December 3, 2024, on the occasion of the visit of the President of the French Republic Emmanuel Macron to the Kingdom of Saudi Arabia, and in the presence of His Royal Highness Prince Abdulaziz bin Salman Al Saud, Saudi Minister of Energy, the consortium comprising TotalEnergies and Saudi developer Aljomaih Energy and Water Company (AEW) signed a 25-year PPA with the Saudi Power Procurement Company (SPPC) related to the 300 MW solar power project, Rabigh 2.

This project is part of Round 5 of the National Renewable Energy Program (NREP), which is supervised by the Ministry of Energy aiming to achieve an optimal energy mix for electricity production by having gas and renewable energy at approximately 50% each by 2030 and reduce dependence on liquid fuels in electricity generation in line with Saudi Vision 2030. The solar plant is expected to be developed, built, owned and operated by the consortium with a connection to the grid planned in 2026.

This renewable project is a new milestone for TotalEnergies in Saudi Arabia where TotalEnergies is currently building the 119 MW *Wadi Al Dawasir* solar power plant, which is expected to start operation in early 2025.

Aramco, TotalEnergies and Saudi Investment Recycling Company (SIRC) assess the development of a sustainable aviation fuels unit

On December 3, 2024, on the occasion of the visit of the President of the French Republic Emmanuel Macron to the Kingdom of Saudi Arabia, and in the presence of His Royal Highness Prince Abdulaziz bin Salman Al Saud, Saudi Minister of Energy, Aramco, TotalEnergies, and SIRC, the major player that collects and valorizes organic materials into sustainable products in Saudi Arabia, announced the signing of a Joint Development and Cost Sharing Agreement (JDCSA) to assess the development of a sustainable aviation fuels (SAF) production unit in the Kingdom of Saudi Arabia.

This collaboration is expected to draw on the expertise of the three partners to develop a production unit of sustainable aviation fuel by converting local residues from the circular economy, such as used cooking oil and animal fats.

TotalEnergies celebrates fifty years of operations in Saudi Arabia

On December 3, 2024, on the occasion of French President Emmanuel Macron's state visit to the Kingdom of Saudi Arabia and as the Company celebrates fifty years of operations in the country, TotalEnergies underlines the importance of its strategic partnership in the field of energy with the Kingdom under the patronage of His Royal Highness Prince Abdulaziz bin Salman Al Saud, Saudi Minister of Energy. The Company deploys with success its multi energy strategy in the Kingdom with its flagships projects in the downstream oil sector, thanks to its partnership with Aramco and the development of renewables with various local partners.

SATORP: TotalEnergies' largest refining and chemicals platform in the world

-
- Jointly held by Aramco (62.5%) and TotalEnergies (37.5%), SATORP is one of the world's best performing integrated refining and petrochemicals platforms, with a production capacity of 460,000 barrels a day.
 - Located in Jubail and commissioned in 2014, SATORP is one of the first platforms in the Middle East North Africa region to receive ISCC+ certification (July 2022), a sign of international recognition of its circular projects such as the production of polymers from an oil made of recycled plastic waste.
 - In 2022, SATORP played a vital role in ensuring France's energy security. When sanctions shut Russian diesel out of Europe, SATORP delivered around 300 000 tons of diesel to France, which has made it possible to guarantee France's security of supply.

AMIRAL: an \$11 billion petrochemical complex

- The construction of the Amiral petrochemical complex, which benefits from synergies with the SATORP platform, is already a third of the way through in line with its initial schedule, which is scheduled to start in 2027. The Amiral project alone, jointly developed by Aramco (62.5%) and TotalEnergies (37.5%), represents an investment of about \$11 billion.

Solar: our multi-energy strategy to serve the Kingdom's objectives

- TotalEnergies is currently building the Wadi Al Dawasir solar power plant (119 MW) with its partners Toyota Tshusho (40%) and Al Taqaa Zahid (40%). It will be connected to the grid and operational at the beginning of 2025.
- In addition, the consortium composed of TotalEnergies and Saudi developer *Aljomaih Energy and Water Company* (AEW) signed, in November 2024, a 25-year PPA with *Saudi Power Procurement Company* (SPPC) for the Rabigh 2 solar project (300 MW). The solar power plant is expected to be developed, built, owned and operated by the consortium with a grid connection planned for 2026.
- Finally, TotalEnergies is developing smaller-scale solar projects through its 50%-owned subsidiary Safeer with Al Taqa Zahid for industrial and commercial customers.

Sustainable aviation fuels (SAF): a production unit under study

- After successful tests carried out in 2024, Aramco and TotalEnergies have embarked on a project to co-process used cooking oil to produce SAF at SATORP starting from 2026.
- In addition, Aramco, TotalEnergies and SIRC are assessing the development of a SAF production unit in synergy with SATORP.
- This collaboration is expected to draw on the expertise of the three partners to develop a production unit of SAF by converting local residues from the circular economy, such as used cooking oil and animal fats.

TotalEnergies' statement on its investments related to Adani Group in India

On November 25, 2024, TotalEnergies has learnt through public announcements made by the US authorities of the indictment of certain individual Adani group executives in relation to an alleged corruption scheme linked to the business of Adani Green Energy Limited (AGEL). This indictment does not target AGEL itself, nor any AGEL-related companies.

In accordance with its code of conduct, TotalEnergies rejects corruption in any form.

TotalEnergies, which is not targeted nor involved in the facts described by such indictment, will take all relevant actions to protect its interests as a minority (19.75%) shareholder of AGEL and as a joint-venture partner (50%) in project companies with AGEL.

Until such time when the accusations against the Adani group individuals and their consequences have been clarified, TotalEnergies will not make any new financial contribution as part of its investments in the Adani group of companies.

TotalEnergies recalls that its investments in Adani's entities were undertaken in full compliance with applicable laws, and with TotalEnergies' own internal governance processes pursuant to due diligence and representations made by the sellers. In particular, TotalEnergies was not made aware of the existence of an investigation into the alleged corruption scheme.

TotalEnergies' investments in and with AGEL

In January 2021 TotalEnergies acquired a minority interest in the listed company AGEL, of which it now owns 19.75%. As part of its strategy to enhance its development in renewables in India through

direct access to a portfolio of assets, TotalEnergies also has acquired 50% stake in three joint ventures operating renewable assets (AGEL23 in 2020, AREL9 in 2023, AREL64 in 2024).

Hydrogen: TotalEnergies accelerates decarbonization of its platform at La Mède

On November 25, 2024, in line with its 2030 ambition to decarbonize the hydrogen used in its European refineries, TotalEnergies joined forces with Air Liquide to produce renewable hydrogen at La Mède in southeast France. This new project complements the Masshyla project to produce green hydrogen by electrolysis led by TotalEnergies in partnership with ENGIE. These projects are expected to reduce the La Mède biorefinery's CO² annual emissions by 130,000 tons.

Renewable hydrogen for biofuels production, with Air Liquide

Air Liquide is expected to build and operate a renewable hydrogen production unit at the La Mède platform. With an annual capacity of 25,000 tons, this unit is expected to recycle coproducts from the TotalEnergies biorefinery. The hydrogen is expected to be used in the biorefinery to produce biodiesel and SAF. The project's total investment amounts to €150 million for TotalEnergies and Air Liquide. The new unit is expected to start production in 2028.

At the same time, TotalEnergies is continuing the development, with its partner ENGIE, of the Masshyla project of green hydrogen production by water electrolysis with a capacity of 10,000 tons per year, to contribute to the decarbonization of both the biorefinery and local customers at the Fos-Berre industrial-port zone. The two partners aim to start up the first 20 MW electrolyser in 2029, subject to confirmation of European and French subsidies and the necessary public authorizations.

COP29: TotalEnergies and Oil India join forces to collaborate on methane emissions detection and measurement

On November 19, 2024, TotalEnergies and Oil India Limited (OIL) signed a Cooperation Agreement to carry out methane emissions detection and measurement campaigns using TotalEnergies' pioneer Airborne Ultralight Spectrometer for Environmental Applications (AUSEA) technology at OIL sites in India.

State-owned enterprise OIL recently joined the Oil and Gas Decarbonization Charter (OGDC), a global industry initiative launched at COP28, co-chaired by TotalEnergies' CEO.

In line with the OGDC's principle of sharing good practices, TotalEnergies makes this technology available to other operators among the signatories, as an effective and recognized tool to detect, measure and eventually abate methane emissions on their own assets.

AUSEA, a one-of-a-kind technology by TotalEnergies

Mounted on a drone, the AUSEA gas analyzer, developed by TotalEnergies and its R&D partners, consists of a dual sensor capable of detecting methane and carbon dioxide emissions, while at the same time identifying their source. This technology marks a step change in methane emissions detection and measurement compared to traditional techniques. By allowing access to hard-to-reach emission points, on all types of industrial facilities, both offshore and onshore, AUSEA is reputed as one of the most accurate technologies in the industry.

TotalEnergies, bp, Equinor and Shell join forces to help increase access to energy

On November 15, 2024, TotalEnergies, bp, Equinor and Shell announced a commitment to invest in support of the UN Sustainable Development Goal 7 (UN SDG7), which aims to ensure access to affordable, reliable, sustainable, and modern energy for all. The four energy majors have come together with a \$500 million joint investment commitment, intended to create positive energy access impact for people in key regions over the coming years.

bp, Equinor, Shell and TotalEnergies decided to join forces to help address the challenges of energy access. With \$500 million of committed capital, the joint investment seeks to support promising, high-impact projects, primarily in Sub-Saharan Africa, South and Southeast Asia, aiming to help millions of people in underserved communities gain access to electricity and improved cooking conditions. Their shared intent is for the committed capital to be invested in a broad range of solutions, including solar home systems, mini/metro grids, clean cooking solutions, and enabling technologies (such as e-mobility, energy storage and management solutions). Over the coming years, this has the potential to support UN SDG 7 while also generating co-benefits like job creation and improved health outcomes.

A global private equity firm with a strong track record in impact investing, has been selected to manage the joint investment. Its expertise is expected to support the investments being strategically directed to create both social impact and financial returns, while engaging with governments,

international organizations, financial institutions, the private sector, civil society, and philanthropies. This includes sharing learnings, providing technical assistance, and addressing market barriers.

COP29: TotalEnergies deploys continuous, real-time methane emissions detection equipment on all its operated upstream assets

On November 14, 2024, as part of its ambition to aim for near-zero methane emissions by 2030, TotalEnergies announced that the Company is going a step further in the monitoring and reduction of its methane emissions with the deployment of continuous, real-time detection equipment at all of its operated Upstream sites.

Since 2022, TotalEnergies has been pursuing its ambition to aim for near-zero methane operated emissions in 2030: the Company is expected to meet as soon as 2024 its target to reduce emissions by 50% compared to 2020, a year ahead of plan. TotalEnergies is thus well on track to achieve the targeted 80% reduction by 2030. This achievement is the result of numerous initiatives, including the successful deployment of its AUSEA drone campaigns.

Complementing its portfolio of detection technologies already in place, TotalEnergies is going a step further by installing continuous detection equipment on all its operated Upstream assets, enabling real-time identification of methane emissions, both fugitive and stationary, and immediate corrective actions to stop them.

This continuous detection plan is expected to be fully implemented by end-2025 and is expected to use existing and proven technologies such as Internet of Things (IoT) sensors, InfraRed cameras, flowmeters and Predictive Emissions Monitoring Systems on combustion sources.

Continuous, real-time detection on this scale—both for existing facilities and projects under development, such as the GranMorgu FPSO in Suriname —is a pioneering move in the industry and sets a new standard for the Company.

China: TotalEnergies will supply 2 million tons of LNG per year to Sinopec for 15 years

On November 4, 2024, as part of its strategy to grow its Liquefied Natural Gas (LNG) business, TotalEnergies announced the signing of a sales agreement (HoA) with Sinopec for the delivery of 2 million tons of LNG per year for 15 years, starting in 2028.

Thanks to this major agreement with one of the leading LNG players in the country, TotalEnergies strengthens its long-term position in the LNG market in China, one of the largest markets in the world. This agreement comes within the strategic cooperation agreement signed earlier this year between TotalEnergies and Sinopec during President Xi Jinping's state visit to France.

FORWARD-LOOKING STATEMENTS

This document may contain forward-looking statements (including forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995), notably with respect to the financial condition, results of operations, business activities and strategy of TotalEnergies. This document may also contain statements regarding the perspectives, objectives, areas of improvement and goals of TotalEnergies, including with respect to climate change and carbon neutrality (net zero emissions). An ambition expresses an outcome desired by TotalEnergies, it being specified that the means to be deployed do not depend solely on TotalEnergies. These forward-looking statements may generally be identified by the use of the future or conditional tense or forward-looking words such as "will", "should", "could", "would", "may", "likely", "might", "envisions", "intends", "anticipates", "believes", "considers", "plans", "expects", "thinks", "targets", "commits," "aims" or similar terminology. Such forward-looking statements included in this document are based on economic data, estimates and assumptions prepared in a given economic, competitive and regulatory environment and considered to be reasonable by TotalEnergies as of the date of this document.

These forward-looking statements are not historical data and should not be interpreted as assurances that the perspectives, objectives or goals announced will be achieved. They may prove to be inaccurate in the future, and may evolve or be modified with a significant difference between the actual results and those initially estimated, due to the uncertainties notably related to the economic, financial, competitive and regulatory environment, or

due to the occurrence of risk factors, such as, notably, the price fluctuations in crude oil and natural gas, the evolution of the demand and price of petroleum products, the changes in production results and reserves estimates, the ability to achieve cost reductions and operating efficiencies without unduly disrupting business operations, changes in laws and regulations including those related to the environment and climate, currency fluctuations, technological innovations, meteorological conditions and events, as well as socio-demographic, economic and political developments, changes in market conditions, loss of market share and changes in consumer preferences, or pandemics such as the COVID-19 pandemic. Additionally, certain financial information is based on estimates particularly in the assessment of the recoverable value of assets and potential impairments of assets relating thereto.

Readers are cautioned not to consider forward-looking statements as accurate, but as an expression of the Company's views only as of the date this document is published. TotalEnergies SE and its subsidiaries have no obligation, make no commitment and expressly disclaim any responsibility to investors or any stakeholder to update or revise, particularly as a result of new information or future events, any forward-looking information or statement, objectives or trends contained in this document. In addition, the Company has not verified, and is under no obligation to verify any third-party data contained in this document or used in the estimates and assumptions or, more generally, forward-looking statements published in this document.

The information on risk factors that could have a significant adverse effect on TotalEnergies' business, financial condition, including its operating income and cash flow, reputation, outlook or the value of financial instruments issued by TotalEnergies is provided in the most recent version of the Universal Registration Document which is filed by TotalEnergies SE with the French Autorité des Marchés Financiers and the latest annual report on Form 20-F filed with the SEC.

Additionally, the developments of environmental and climate change-related issues in this document are based on various frameworks and the interests of various stakeholders which are subject to evolve independently of our will. Moreover, our disclosures on such issues, including climate-related disclosures, may include information that is not necessarily "material" under US securities laws for SEC reporting purposes or under applicable securities law.

Cautionary Note to U.S. Investors – The SEC permits oil and gas companies, in their filings with the SEC, to separately disclose proved, probable and possible reserves that a company has determined in accordance with SEC rules. We may use certain terms in this press release, such as "potential reserves" or "resources", that the SEC's guidelines strictly prohibit us from including in filings with the SEC. U.S. investors are urged to consider closely the disclosure in the Form 20-F of TotalEnergies SE, File N° 1-10888, available from us at 2, place Jean Millier – Arche Nord Coupole/Regnault - 92078 Paris-La Défense Cedex, France, or at the Company website totalenergies.com. You can also obtain this form from the SEC by calling 1-800-SEC-0330 or on the SEC's website sec.gov.
