AND SUBSIDIARIESNOTES TO CONSOLIDATED FINANCIAL STATEMENTS(Unaudited)Note 1 â€” Basis of PresentationEast West Bancorp, Inc. is a registered bank holding company that offers a full range of banking services to individuals and businesses through its subsidiary bank, East West Bank and its subsidiaries (â€œEast West Bankâ€ or the â€œBankâ€). The unaudited interim Consolidated Financial Statements in this Quarterly Report on FormÂ 10-Q (this â€œForm 10-Qâ€) include the accounts of East West, East West Bank and East Westâ€™s subsidiaries. Intercompany transactions and accounts have been eliminated in consolidation. As of JuneÂ 30, 2024, East West also has one wholly-owned subsidiary that is a statutory business trust (the â€œTrustâ€). In accordance with Financial Accounting Standards Board Accounting Standards Codification (â€œASCâ€) Topic 810, Consolidation, the Trust is not included on the Consolidated Financial Statements.The unaudited interim Consolidated Financial Statements are presented in accordance with U.S. Generally Accepted Accounting Principles (â€œGAAPâ€), applicable guidelines prescribed by regulatory authorities and general practices in the banking industry. While the unaudited interim Consolidated Financial Statements reflect all adjustments that, in the opinion of management, are necessary for fair presentation, they primarily serve to update the Companyâ€™s 2023 Form 10-K, and may not include all the information and notes necessary to constitute a complete set of financial statements. Accordingly, they should be read in conjunction with the audited Consolidated Financial Statements and notes thereto included in the Companyâ€™s 2023 Form 10-K.The preparation of the Consolidated Financial Statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the Consolidated Financial Statements, income and expenses during the reporting periods, and the related disclosures. Although our estimates consider current conditions and how we expect them to change in the future, it is reasonably possible that actual results could be materially different from those estimates. Hence, the current periodâ€™s results of operations are not necessarily indicative of results that may be expected for any future interim period or for the year as a whole. Certain items on the Consolidated Financial Statements and notes for the prior periods have been reclassified to conform to the current presentation. Events subsequent to the Consolidated Balance Sheet date have been evaluated through the date the Consolidated Financial Statements are issued for inclusion in the accompanying Consolidated Financial Statements.Note 2 â€” Current Accounting Developments and Summary of Significant Accounting PoliciesAccounting Pronouncements Adopted in 2024StandardRequired Date of AdoptionDescriptionEffect on Financial StatementsASU 2023-02, Investments â€” Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Tax Credit Structures Using the Proportional Amortization MethodJanuary 1, 2024ASU 2023-02 expands the scope of the proportional amortization method (â€œPAMâ€) to equity tax credit investment programs if certain conditions are met. Previously, PAM could only be used for investments in low-income housing tax credit structures. Under this guidance, companies are able to elect, on a tax credit program-by-tax credit program basis, to apply PAM to all equity investments meeting the criteria in ASC 323-740-25-1.The amendments in this guidance must be applied on a modified retrospective or a retrospective basis.The Company adopted ASU 2023-02 on January 1, 2024, for all tax credit investments under a modified retrospective basis. The impact of the adoption decreased opening retained earnings on January 1, 2024 by $9 million.The following standards were also adopted on January 1, 2024, but they did not have a material impact on the Companyâ€™s Consolidated Financial Statements:â€¢ASU 2023-01, Leases (Topic 842): Common Control Arrangementsâ€¢ASU 2022-03, Fair Value Measurement (Topic 820) Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions 10Significant Accounting Policies UpdateIncome Taxes â€” The Company has elected to apply PAM to qualifying affordable housing partnership, new markets, historic, production and renewable energy tax credit investments. Under PAM, the Company amortizes the initial cost of the investment in proportion to the income tax credits and other income tax benefits received, and recognizes the amortization in Income tax expense on the Consolidated Statement of Income.Note 3 â€” Fair Value Measurement and Fair Value of Financial InstrumentsUnder applicable accounting standards, the Company measures a portion of its assets and liabilities at fair value. These assets and liabilities are predominantly recorded at fair value on a recurring basis. From time to time, certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, they are subject to fair value adjustments only as required through the application of an accounting method such as lower of cost or fair value or write-down of individual assets. The Company categorizes its assets and liabilities into three levels based on the established fair value hierarchy and conducts a review of fair value hierarchy classifications on a quarterly basis. For more information regarding the fair value hierarchy and how the Company measures fair value, see Note 1 â€” Summary of Significant Accounting Policies â€” Significant Accounting Policies â€” Fair Value to the Consolidated Financial Statements in the Companyâ€™s 2023 Form 10-K.Assets and Liabilities Measured at Fair Value on a Recurring BasisThe following section describes the valuation methodologies used by the Company to measure financial assets and liabilities on a recurring basis, as well as the general classification of these instruments within the fair value hierarchy.Available-for-Sale Debt Securities â€” The fair value of AFS debt securities is generally determined by independent external pricing service providers who have experience in valuing these securities or by taking the average quoted market prices obtained from independent external brokers. The valuations provided by the third-party pricing service providers are based on observable market inputs, which include benchmark yields, reported trades, issuer spreads, benchmark securities, bids, offers, prepayment expectations and reference data obtained from market research publications. Inputs used by the third-party pricing service providers in valuing collateralized mortgage obligations and other securitization structures also include newly issued data, monthly payment information, whole loan collateral performance, tranche evaluation and â€œto be announcedâ€ prices. In valuing securities issued by state and political subdivisions, inputs used by third-party pricing service providers also include material event notices. The valuations provided by the brokers incorporate information from their trading desks, research and other market data.On a monthly basis, the Company validates the valuations provided by third-party pricing service providers to ensure that the fair value determination is consistent with the applicable accounting guidance and the financial instruments are properly classified in the fair value hierarchy. To perform this validation, the Company evaluates the fair values of securities by comparing the fair values provided by the third-party pricing service providers to prices from other available independent sources for the same securities. When significant variances in prices are identified, the Company further compares the inputs used by different sources to ascertain the reliability of these sources. On a quarterly basis, the Company reviews the valuation inputs and methodology furnished by third-party pricing service providers for each security category. On an annual basis, the Company assesses the reasonableness of broker pricing by reviewing the related pricing methodologies. This review includes corroborating pricing with market data, performing pricing input reviews under current market-related conditions, and investigating security pricing by instrument as needed.When a quoted price in an active market exists for the identical security, this price is used to determine the fair value and the AFS debt security is classified as Level 1. Level 1 AFS debt securities consist of U.S. Treasury securities.

When pricing is unavailable from third-party pricing service providers for certain securities, the Company requests market quotes from various independent external brokers and utilizes the average quoted market prices. In addition, the Company obtains market quotes from other official published sources. As these valuations are based on observable inputs in the current marketplace, they are classified as Level 2.Equity Securities â€” Equity securities consist of mutual funds and Visa Inc. (â€œVisaâ€) Class C common stock (â€œVisa C sharesâ€). The Company invested in these mutual funds for CRA purposes. The Company uses net asset value (â€œNAVâ€) information to determine the fair value of these equity securities. When NAV is available periodically and the equity securities can be put back to the transfer agents at the publicly available NAV, the fair value of the equity securities is classified as Level 1. When NAV is available periodically, but the equity securities may not be readily marketable at its periodic NAV in the secondary market, the fair value of these equity securities is classified as Level 2.11As of December 31, 2023, the Company held Visa Class B common stock (â€œVisa B sharesâ€), which were subject to certain transfer restrictions and held at cost. On January 24, 2024, Visa filed a Certificate of Amendment and an eighth Restated Certificate of Incorporation that redenominated the Visa B shares to Visa Class B-1 common stock (â€œVisa B-1 sharesâ€). On April 8, 2024, Visa commenced a public offering to permit the exchange of Visa B-1 shares for a combination of shares of Visa Class B-2 common stock (â€œVisa B-2 sharesâ€) and Visa C shares. In exchange for the Companyâ€™s 2,266 Visa B-1 shares, the Company received 1,133 Visa B-2 shares and 449 Visa C shares. The Visa B-2 shares remain subject to the same transfer restrictions and will continue to be held at cost. As the Visa C shares are convertible into Visaâ€™s publicly traded Class A common stock (â€œVisa A sharesâ€) following a lock-up period, the Company recognized the Visa C shares at fair value of $471 thousand as of June 30, 2024 and recorded a gain of $422Â thousand for the three months ended June 30, 2024, based on the closing price of the Visa A shares. As the fair value of the Visa C shares is determined by quoted prices on an active exchange market, the Visa C shares are classified as Level 1.Interest Rate Contracts â€” Interest rate contracts consist of interest rate swaps and options. The fair value of the interest rate swaps is determined using the market standard methodology of netting the discounted future fixed cash payments (or receipts) and the discounted expected variable cash receipts (or payments). The fair value of the interest rate options, which consist of floors and caps, is determined using the market standard methodology ofÂ discounting the future expected cash receipts that will occur if variable interest rates fall below (rise above) the strike rate of the floors (caps).Â In addition, to comply with the provisions of ASC 820, Fair Value Measurement, the Company incorporates credit valuation adjustments to appropriately reflect both its own and the respective counterpartyâ€™s nonperformance risk in the fair value measurements of its derivatives. The credit valuation adjustments associated with the Companyâ€™s derivatives utilize model-derived credit spreads, which are Level 3 inputs. Considering the observable nature of all other significant inputs utilized, the Company classifies these derivative instruments as Level 2.Foreign Exchange Contracts â€” The fair value of foreign exchange contracts is determined at each reporting period based on changes in the applicable foreign exchange rates. These are over-the-counter contracts where quoted market prices are not readily available. Valuation is measured using conventional valuation methodologies with observable market data. Due to the short-term nature of the majority of these contracts, the counterpartiesâ€™ credit risks are considered nominal and result in no adjustments to the valuation of the foreign exchange contracts. Due to the observable nature of the inputs used in deriving the fair value of these contracts, the valuation of foreign exchange contracts is classified as Level 2. In addition, the Bank managed its foreign currency exposure in the net investment in its China subsidiary, East West Bank (China) Limited, a non-U.S. dollar (â€œUSDâ€) functional currency subsidiary, with foreign currency non-deliverable forward contracts. These foreign currency non-deliverable forward contracts were designated as net investment hedges. The fair value of foreign currency non-deliverable forward contracts is determined by comparing the contracted foreign exchange rate to the current market foreign exchange rate. Key inputs of the current market exchange rate include the spot and forward rates of the contractual currencies. Foreign exchange forward curves are used to determine which forward rate pertains to a specific maturity. Due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are classified as Level 2.Credit Contracts â€” Credit contracts utilized by the Company are comprised of credit risk participation agreements (â€œRPAsâ€) entered into by the Company with institutional counterparties. The fair value of the RPAs is calculated by determining the total expected asset or liability exposure of the derivatives to the borrowers and applying the borrowersâ€™ credit spread to that exposure. Total expected exposure incorporates both the current and potential future exposure of the derivatives, derived from using observable inputs, such as yield curves and volatilities. Due to the observable nature of all other significant inputs used in deriving the estimated fair value, credit contracts are classified as Level 2.12Equity Contracts â€” Equity contracts consist of warrants to purchase common or preferred stock of public and private companies, and any liability-classified contingently issuable shares of the Company. The fair value of the warrants is based on the Black-Scholes option pricing model. For warrants from public companies, the model uses the underlying stock price, stated strike price, warrant expiration date, risk-free interest rate based on a duration-matched U.S. Treasury rate, and market-observable company-specific equity volatility as inputs to value the warrants. Due to the observable nature of the inputs used in deriving the estimated fair value, warrants from public companies are classified as Level 2. For warrants from private companies, the model uses inputs such as the offering price observed in the most recent round of funding, stated strike price, warrant expiration date, risk-free interest rate based on duration-matched U.S. Treasury rate and equity volatility. The Company applies proxy volatilities based on the industry sectors of the private companies. The model values are then adjusted for a general lack of liquidity due to the private nature of the underlying companies. Since both equity volatility and liquidity discount assumptions are subject to managementâ€™s judgment, measurement uncertainty is inherent in the valuation of private company warrants. Due to the unobservable nature of the equity volatility and liquidity discount assumptions used in deriving the estimated fair value, warrants from private companies are classified as Level 3. On a quarterly basis, the changes in the fair value of warrants from private companies are reviewed for reasonableness, and a measurement of uncertainty analysis on the equity volatility and liquidity discount assumptions is performed.In connection with the Companyâ€™s acquisition of a 49.99% equity interest in Rayliant Global Advisors Limited (â€œRayliantâ€) during the third quarter of 2023, the Company granted 349,138 performance-based restricted stock units (â€œRSUsâ€) as part of its consideration, in addition to $95Â million in cash. The vesting of these equity contracts on September 1, 2028, is contingent on Rayliant meeting certain financial performance targets during the performance period. The fair value of liability-classified equity contracts varies based on the operating revenue and operating EBITDA of Rayliant to be achieved during the future performance period, and these performance-based RSUs are expected to vest into a variable number of the Companyâ€™s common stock, ranging from 20% to 200% of the target performance-based RSUs granted. Due to the unobservable nature of the input assumptions, these equity contracts are classified as Level 3. For additional information on the equity contracts, refer to Note 6 â€” Derivatives to the Consolidated Financial Statements in this Form 10-Q.Commodity Contracts â€” Commodity contracts consist of swaps and options referencing commodity products. The fair value of the commodity option contracts is determined using the Black-Scholes model and assumptions that include expectations of future commodity price and volatility. The future commodity contract price is derived from observable inputs such as the market price of the commodity. Commodity swaps are structured as an exchange of fixed cash flows for floating cash flows. The fair value of the commodity swaps is determined using the market standard methodology of netting the discounted future fixed cash payments (or receipts) and the discounted expected variable cash receipts (or payments) based on the market prices of the commodity. The fixed cash flows are predetermined based on the known volumes and fixed price as specified in the swap agreement. The floating cash flows are correlated with the change of forward commodity prices, which is derived from market corroborated futures settlement prices. As a result, the Company classifies these derivative instruments as Level 2 due to the observable nature of the significant inputs utilized.13The following tables present financial assets and Nonrecurring fair value adjustments result from the impairment on certain individually evaluated loans held-for-investment and affordable housing partnership, tax credit and CRA investments, from the write-downs of OREO and other nonperforming assets, or from the application of lower of cost or fair value on loans held-for-sale.Individually Evaluated Loans Held-for-Investment â€” Individually evaluated loans held-for-investment are classified as Level 3 assets. The following two methods are used to derive the fair value of individually evaluated loans held-for-investment:â€¢Discounted cash flow valuation techniques consist of developing an expected stream of cash flows over the life of the loans, and then calculating the present value of the loans by discounting the expected cash flows at a designated discount rate.â€¢When the repayment of an individually evaluated loan is dependent on the sale of the collateral, the fair value of the loan is determined based on the fair value of the underlying collateral, which may take the form of real estate, inventory, equipment, contracts or guarantees. The fair value of the underlying collateral is generally based on third-party appraisals, or an internal valuation if a third-party appraisal is not required by regulations, or is unavailable. An internal valuation utilizes one or more valuation techniques such as the income, market and/or cost approaches.Affordable Housing Partnership, Tax Credit and CRA Investments, Net â€” The Company conducts due diligence and secures applicable internal and external approval on its affordable housing partnership, tax credit and CRA investments prior to the closing date and initial funding date and through the placed-in-service date. Subsequent to closing, the Company continues its periodic monitoring process to ensure book values are realizable and that there is no significant tax credit recapture risk. This monitoring process includes reviewing the investment entityâ€™s financial statements, production reports and annual tax returns, the annual financial statements of the guarantor (if any) and a comparison of the actual performance of the investment against the financial projections prepared at the time the investment was made. The Company assesses its tax credit and other investments for possible other-than-temporary impairment on an annual basis or when events or circumstances suggest that the carrying amount of the investments may not be realizable. These circumstances can include, but are not limited to the following factors:â€¢expected future cash flows that are less than the carrying amount of the investment;â€¢changes in the economic, market or technological environment that could adversely affect the investeeâ€™s operations; â€¢the potential for tax credit recapture; andâ€¢other factors that raise doubt about the investeeâ€™s ability to continue as a going concern, such as negative cash flows from operations and the continuing prospects of the underlying operations of the investment.All available information is considered in assessing whether a decline in value is other-than-temporary. Generally, none of the aforementioned factors are individually conclusive and the relative importance placed on individual facts may vary depending on the situation. In accordance with ASC 323-10-35-32, Investments â€” Equity Method and Joint Ventures, an impairment charge would only be recognized in earnings for a decline in value that is determined to be other-than-temporary.Other Real Estate Owned â€” The

Companyâ€™s OREO represents properties acquired through foreclosure, or through full or partial satisfaction of loans held-for-investment such as an acceptance of a deed-in-lieu of foreclosure. These OREO properties are recorded at estimated fair value less the costs to sell at the time of foreclosure or at the lower of cost or estimated fair value less the costs to sell subsequent to acquisition. On a monthly basis, the current fair market value of each OREO property is reviewed to ensure that the current carrying value is appropriate. OREO properties are classified as LevelÂ 3.Loans Held-for-Sale â€” Loans held-for-investment subsequently transferred to held-for-sale are recorded at the lower of cost or fair value upon transfer. Loans held-for-sale may be measured at fair value on a nonrecurring basis when fair value is less than cost. Fair value is generally determined based on available market data for similar loans and therefore, loans held-for-sale are classified as Level 2.17Other Nonperforming Assets â€” Other nonperforming assets are recorded at fair value upon transfer from loans to foreclosed assets. Subsequently, foreclosed assets are recorded at the lower of carrying value or fair value. Fair value is based on independent market prices, appraised values of the collateral or managementâ€™s estimated recovery of the foreclosed asset. The Company records an impairment when the foreclosed assetâ€™s fair value declines below its carrying value. The fair value measurement of other nonperforming assets is classified within one of the three levels in a valuation hierarchy based upon the observability of inputs to the valuation as of the measurement date.The following tables present the carrying amounts of assets that were still held and had fair value adjustments measured on a nonrecurring basis as of JuneÂ 30, 2024 and DecemberÂ 31, 2023:Assets MeasuredÂ atÂ FairÂ ValueÂ onÂ aÂ NonrecurringÂ Basisas of June 30, 2024($ inÂ thousands)LevelÂ 1LevelÂ 2LevelÂ 3FairÂ Value MeasurementsLoans held-for-investment:Commercial:Commercial and industrial (â€œC&Iâ€)â€”Â $â€”Â $44,605Â $44,605Â Commercial real estate (â€œCREâ€):CREâ€”Â â€”Â 17,069Â 17,069Â Construction and landâ€”Â â€”Â 11,316Â 11,316Â Total commercialâ€”Â â€”Â 72,990Â 72,990Â Consumer:Residential mortgage:Single-family residentialâ€”Â â€”Â 92Â 92Â Total consumerâ€”Â â€”Â 92Â 92Â Total loans held-for-investment$â€”Â $â€”Â $73,082Â $73,082Â OREO (1)$â€”Â $â€”Â $8,565Â $8,565Â (1)Represents the carrying value of OREO property that was written down subsequent to its initial classification as OREO and includes in Other assets on the Consolidated Balance Sheet.AssetsÂ MeasuredÂ atÂ FairÂ ValueÂ onÂ aÂ NonrecurringÂ Basisas of December 31, 2023($ inÂ thousands)LevelÂ 1LevelÂ 2LevelÂ 3FairÂ Value MeasurementsLoans held-for-investment:Commercial:C&I$â€”Â $â€”Â $22,035Â $22,035Â CRE:CREâ€”Â â€”Â 22,653Â 22,653Â Total commercialâ€”Â â€”Â 44,688Â 44,688Â Consumer:Residential mortgage:Home equity lines of credit (â€œHELOCsâ€)â€”Â â€”Â 1,204Â 1,204Â Total consumerâ€”Â â€”Â 1,204Â 1,204Â Total loans held-for-investment$â€”Â $â€”Â $45,892Â $45,892Â Affordable housing partnership, tax credit and CRA investments, net$â€”Â $â€”Â $868Â $868Â 18The following table presents the decrease in the fair value of certain assets held at the end of the respective reporting periods, for which a nonrecurring fair value adjustment was recognized for the three and six months ended JuneÂ 30, 2024 and 2023:Three Months Ended June 30,Six Months Ended June 30,($ inÂ thousands)20242023202420232023Loans held-for-investment:Commercial:C&I$(14,764)$(10,419)$(24,769)$(11,674)CRE:CRE(2,260)(2,252)(2,260)(2,252)Construction and land(920)â€”Â (2,144)â€”Â Total CRE(3,180)(2,252)(4,404)(2,252)Total commercial(17,944)(12,671)(29,173)(13,926)Consumer:Residential mortgage:Single-family residential(23)â€”Â (1,407)â€”Â Total consumer(23)â€”Â (1,407)â€”Â Total loans held-for-investment$(17,967)$(12,671)$(30,580)$(13,926)Affordable housing partnership, tax credit and CRA investments, net$â€”Â (961)â€”Â $(787)OREO$(2,576)$â€”Â $(2,576)$â€”Â The following table presents the quantitative information about the significant unobservable inputs used in the valuation of Level 3 fair value measurements that are measured on a nonrecurring basis as of JuneÂ 30, 2024 and DecemberÂ 31, 2023:($ in thousands)FairÂ Value Measurements (LevelÂ 3)Valuation TechniquesUnobservable InputsRange ofÂ InputsWeighted-Average of InputsJune 30, 2024Loans held-for-investment$7,219Â Fair value of collateralDiscount20% â€” 50%24%(1)$13,793Â Fair value of collateralContract valueNMNM$52,070Â Fair value of propertySelling cost8% â€” 20%10%(1)OREO$8,565Â Fair value of propertySelling cost8%8%December 31, 2023Loans held-for-investment$16,328Â Fair value of collateralDiscount15% â€” 75%45%(1)$3,009Â Fair value of collateralContract valueNMNM$26,555Â Fair value of propertySelling cost8%8%Affordable housing partnership, tax credit and CRA investments, net$868Â Individual analysis of each investmentExpected future tax benefits and distributionsNMNMNM â€” Not meaningful.(1)Weighted-average of inputs is based on the relative fair value of the respective assets as of JuneÂ 30, 2024 and DecemberÂ 31, 2023.19Disclosures about the Fair Value of Financial InstrumentsThe following tables present the fair value estimates for financial instruments as of JuneÂ 30, 2024 and DecemberÂ 31, 2023, excluding financial instruments recorded at fair value on a recurring basis as they are included in the tables presented elsewhere in this Note. The Company manages credit exposure from certain transactions by entering into master netting agreements and collateral arrangements with the counterparties. The relevant agreements allow for an efficient closeout of the transaction, liquidation and set-off of collateral against the net amount owed by the counterparty following a default. It is the Companyâ€™s policy to take possession, where possible, of the assets underlying resale agreements. As a result of the Companyâ€™s credit risk mitigation practices with respect to resale agreements as described above, the Company did not hold any reserves for credit impairment with respect to these agreements as of both JuneÂ 30, 2024 and DecemberÂ 31, 2023.Securities Purchased under Resale Agreements â€” Total securities purchased under resale agreements were $485 million and $785 million as of JuneÂ 30, 2024 and DecemberÂ 31, 2023, respectively. The weighted-average yields were 1.56% and 2.42% for the three months ended June 30, 2024 and 2023, respectively; and 2.66% and 2.46% for the six months ended JuneÂ 30, 2024 and 2023, respectively.Balance Sheet Offsetting The Companyâ€™s resale and repurchase agreements are transacted under legally enforceable master netting agreements that, in the event of default by the counterparty, provide the Company the right to liquidate securities held and to offset receivables and payables with the same counterparty. The Company nets resale and repurchase transactions with the same counterparty on the Consolidated Balance Sheet when it has a legally enforceable master netting agreement and the transactions are eligible for netting under ASC 210-20-45-11, Balance Sheet Offsetting Repurchase and Reverse Repurchase Agreements. Collateral received includes securities and loans that are not recognized on the Consolidated Balance Sheet. Collateral pledged consists of securities that are not netted on the Consolidated Balance Sheet against the related collateralized liability. Securities received or pledged as collateral in resale and repurchase agreements with other financial institutions may also be sold or re-pledged by the secured party, and are usually delivered to and held by the third-party trustees.The following table presents the resale agreements included on the Consolidated Balance Sheet as of JuneÂ 30, 2024 and DecemberÂ 31, 2023:Gross Amounts of Recognized AssetsGross Amounts Offset on the Consolidated Balance SheetNet Amounts of Assets Presented on the Consolidated Balance SheetGross Amounts NotÂ OffsetÂ onÂ the Consolidated BalanceÂ Sheet($ in thousands)Collateral Received (1)Net AmountResale agreements as of JuneÂ 30, 2024$485,000Â $â€”Â $485,000Â $(402,645)$82,355Â Resale agreements as of DecemberÂ 31, 2023$785,000Â $â€”Â $785,000Â $(715,358)$69,642Â (1)Represents the fair value of assets the Company has received under resale agreements, limited for table presentation purposes to the amount of the recognized asset due from each counterparty. In comparison, as of DecemberÂ 31, 2023, the Company had 547 AFS debt securities in a gross unrealized loss position with no credit impairment, primarily consisting of 255 U.S. government agency and U.S. government-sponsored enterprise mortgage-backed securities, 66 corporate debt securities, and 99 non-agency mortgage-backed securities.Allowance for Credit Losses on Available-for-Sale Debt SecuritiesThe Company evaluates each AFS debt security where the fair value declines below amortized cost. For a discussion of the factors and criteria the Company uses in analyzing securities for impairment related to credit losses, see Note 1 â€” Summary of Significant Accounting Policies â€” Significant

Accounting Policies â€” Allowance for Credit Losses on Available-for-Sale Debt Securities to the Consolidated Financial Statements in the Companyâ€™s 2023 Form 10-K.The gross unrealized losses presented in the preceding tables were primarily attributable to interest rate movement and the widening of liquidity and/or credit spreads. U.S. Treasury, U.S. government agency, U.S. government-sponsored agency, and U.S. government-sponsored enterprise debt and mortgage-backed securities are issued, guaranteed, or otherwise supported by the U.S. government and have a zero credit loss assumption. The remaining securities that were in an unrealized loss position as of JuneÂ 30, 2024 were mainly comprised of the following:â€¢Corporate debt securities â€” The market value decline as of JuneÂ 30, 2024 was primarily due to interest rate movement and spread widening. A portion of the corporate debt securities is comprised of subordinated debt securities issued by U.S. banks. Despite the reduction of the market value of these securities after the banking sector disruption in 2023, these securities are nearly all rated investment grade by nationally recognized statistical rating organizations (â€œNRSROsâ€) and issued by well-capitalized financial institutions with strong profitability. The contractual payments from these corporate debt securities have been and are expected to be received on time. The Company will continue to monitor the market developments in the banking sector and the credit performance of these securities.â€¢Non-agency mortgage-backed securities â€” The market value decline as of JuneÂ 30, 2024 was primarily due to interest rate movement and spread widening. Since these securities are rated investment grade by NRSROs, or have high priority in the cash flow waterfall within the securitization structure, and the contractual payments have historically been on time, the Company believes the risk of credit losses on these securities is low.As of both JuneÂ 30, 2024 and DecemberÂ 31, 2023, the Company intended to hold the AFS debt securities with unrealized losses through the anticipated recovery period and it was more-likely-than-not that the Company would not have to sell these securities before the recovery of their amortized cost. The issuers of these securities have not, to the Companyâ€™s knowledge, established any cause for default on these securities. As a result, the Company expects to recover the entire amortized cost basis of these securities. Accordingly, there was no allowance for credit losses provided against these securities as of both JuneÂ 30, 2024 and December 31, 2023. In addition, there was no provision for credit losses recognized for the three and six months ended June 30, 2024 and 2023.Allowance for Credit Losses on Held-to-Maturity Debt SecuritiesThe Company separately evaluates its HTM debt securities for any credit losses using an expected loss model, similar to the methodology used for loans. For additional information on the Companyâ€™s credit loss methodology, refer to Note 1 â€” Summary of Significant Accounting Policies â€” Significant Accounting Policies â€” Allowance for Credit Losses on Held-to-Maturity Debt Securities to the Consolidated Financial Statements in the Companyâ€™s 2023 Form 10-K.The Company monitors the credit quality of the HTM debt securities using external credit ratings. As of JuneÂ 30, 2024, all HTM securities were rated investment grade by NRSROs and issued, guaranteed, or supported by U.S. government entities and agencies. Accordingly, the Company applied a zero credit loss assumption and no allowance for credit losses was recorded as of both JuneÂ 30, 2024 and December 31, 2023. Overall, the Company believes that the credit support levels of the debt securities are strong, and based on current assessments and macroeconomic forecasts, expects that full contractual cash flows will be received.25Realized Gains and LossesThe following table presents the gross realized gains from the sales and impairment write-off of AFS debt securities and the related tax expense (benefit) included in earnings for the three and six months ended June 30, 2024 and 2023:Three Months Ended June 30,Six Months Ended June 30,($ inÂ thousands)2024202320242023Gross realized gains from sales$1,785Â $â€”Â $1,834Â $â€”Â Impairment write-off (1)$â€”Â $â€”Â $â€”Â $(10,000)Related tax expense (benefit) $528Â $â€”Â $542Â $(2,956)(1)During the first quarter of 2023, the Company recognized a $10Â million impairment write-off on a subordinated debt security as a component of noninterest income in the Companyâ€™s Consolidated Statement of Income.Interest IncomeThe following table presents the composition of interest income on debt securities for the three and six months ended June 30, 2024 and 2023:Three Months Ended June 30,Six Months Ended June 30,($ inÂ thousands)2024202320242023Taxable interest$106,690Â $64,139Â $177,018Â $125,188Â Nontaxable interest5,042Â 4,831Â 10,106Â 9,713Â Total interest income on debt securities$111,732Â $68,970Â $187,124Â $134,901Â 26Contractual Maturities of Available-for-Sale and Held-to-Maturity Debt SecuritiesThe following tables present the contractual maturities, amortized cost, fair value and weighted-average yields of AFS and HTM debt securities as of JuneÂ 30, 2024. The Companyâ€™s goal is to manage interest rate sensitivity and volatility to mitigate the effect of interest rate changes on earnings or capital. The Company also uses foreign exchange contracts to manage the foreign exchange rate risk associated with certain foreign currency-denominated assets and liabilities, as well as the Bankâ€™s investment in East West Bank (China) Limited. The Company recognizes all derivatives on the Consolidated Balance Sheet at fair value. While the Company designates certain derivatives as hedging instruments in a qualifying hedge accounting relationship, other derivatives serve as economic hedges. For additional information on the Companyâ€™s derivatives and hedging activities, see Note 1 â€” Summary of Significant Accounting Policies â€” Significant Accounting Policies â€” Derivatives to the Consolidated Financial Statements of the Companyâ€™s 2023 Form 10-K.28The following table presents the notional amounts and fair values of the Companyâ€™s derivatives as of JuneÂ 30, 2024 and DecemberÂ 31, 2023. Certain derivative contracts are cleared though central clearing organizations where variation margin is applied daily as settlement to the fair values of the contracts. The fair values are presented on a gross basis prior to the application of bilateral collateral and master netting agreements, but after the application of variation margin payments as settlement to fair values of contracts cleared through central clearing organizations. Applying variation margin payments as settlement to the fair values of derivative contracts cleared through the London Clearing House (â€œLCHâ€) and the Chicago Mercantile Exchange (â€œCMEâ€) resulted in reductions in the derivative asset and liability fair values by $28 million and $37 million, respectively, as of JuneÂ 30, 2024. In comparison, applying variation margin payments as settlement to LCH- and CME-cleared derivative transactions resulted in reductions in both the derivative asset and liability fair values by $43 million as of DecemberÂ 31, 2023. Total derivative asset and liability fair values are adjusted to reflect the effects of legally enforceable master netting agreements and cash collateral received or paid. The resulting net derivative asset and liability fair values are included in Other assets and Accrued expenses and other liabilities, respectively, on the Consolidated Balance Sheet.June 30, 2024December 31, 2023Fair ValueFair Value($ inÂ thousands)Notional AmountAssetsÂ LiabilitiesÂ Notional AmountAssetsÂ LiabilitiesÂ Derivatives designated as hedging instruments:Cash flow hedges:Interest rate contracts$5,250,000Â $11,484Â $54,557Â $5,250,000Â $50,421Â $13,124Â Net investment hedges:Foreign exchange contractsâ€”Â â€”Â â€”Â 81,480Â 3,394Â â€”Â Total derivatives designated as hedging instruments$5,250,000Â $11,484Â $54,557Â $5,331,480Â $53,815Â $13,124Â Derivatives not designated as hedging instruments:Interest rate contracts$16,927,202Â $448,106Â $446,957Â $17,387,909Â $423,486Â $420,812Â Commodity contracts (1)â€”Â 60,946Â 70,900Â â€”Â 79,604Â 121,670Â Foreign exchange contracts3,865,583Â 33,684Â 25,598Â 5,827,149Â 53,678Â 42,564Â Credit contracts (2)117,751Â â€”Â 14Â 118,391Â 1Â 25Â Equity contractsâ€”Â 240Â (3)15,119Â (4)â€”Â 336Â (3)15,119Â (4)Total derivatives not designated as hedging instruments$20,910,536Â $542,976Â $558,588Â $23,333,449Â $557,105Â $600,190Â Gross derivative assets/liabilities$554,460Â $613,145Â $610,920Â $613,314Â Less: Master netting agreements(106,525)(106,525)(75,534)(75,534)Less: Cash collateral received(335,285)(2,665)(237,258)(636)Net derivative assets/liabilities$112,650Â $503,955Â $298,128Â $537,144Â (1)The notional amount of the Companyâ€™s commodity contracts totaled 18,230 thousand barrels of crude oil and 421,525 thousand units of natural gas, measured in million British thermal units (â€œMMBTUsâ€) as of JuneÂ 30, 2024. As of JuneÂ 30, 2024, interest rate contracts in notional amounts of $5.3Â billion were designated as cash flow hedges to convert certain variable-rate loans from floating-rate payments to fixed-rate payments. Gains and losses on the hedging derivative instruments are recognized in AOCI and reclassified to earnings in the same period the hedged cash flows impact earnings and within the same income statement line item as the hedged cash flows. Considering the interest rates, yield curve and notional amount as of JuneÂ 30, 2024, the Company expects to reclassify an estimated $43Â million of after-tax net losses on derivative instruments designated as cash flow hedges from AOCI into earnings during the next 12 months.29The following table presents the pre-tax changes in AOCI from cash flow hedges for the three and six months ended June 30, 2024 and 2023. Under the RPAs, a portion of the credit exposure is transferred from one party (the purchaser of credit protection) to another party (the seller of credit protection). The seller of credit protection is required to make payments to the purchaser of credit protection if the underlying borrower defaults on the related interest rate contract. The Company may enter into protection sold or protection purchased RPAs. Credit risk on RPAs is managed by monitoring the credit worthiness of the borrowers and the institutional counterparties, which is a part of the Companyâ€™s normal credit review and monitoring process. All referenced entities of the protection sold RPAs were investment grade and the weighted-average remaining maturity was 2.3 years and 2.8 years as of JuneÂ 30, 2024 and DecemberÂ 31, 2023, respectively. Assuming the underlying borrowers referenced in the interest rate contracts defaulted, the maximum exposure in the protection sold RPAs would be $63 thousand and $177 thousand as of JuneÂ 30, 2024 and DecemberÂ 31, 2023, respectively.As of both JuneÂ 30, 2024 and DecemberÂ 31, 2023, the Company had one outstanding protection purchased RPA with notional amount of $25 million and minimal fair value.32Equity Contracts â€” As part of the loan origination process, the Company may obtain warrants to purchase the preferred and/or common stock of the borrowersâ€™ companies, which are mainly in the technology and life sciences sectors. Warrants grant the Company the right to buy a certain class of the underlying companyâ€™s equity at a certain price before expiration. In connection with the Companyâ€™s investment in Rayliant during the third quarter of 2023, the Company granted performance-based RSUs as part of its consideration. As of JuneÂ 30, 2024, the aggregate fair value amounts of all derivative instruments with credit risk-related contingent features that were in a net liability position totaled $2 million, for which $2 million collateral was posted to cover these positions. In comparison, as of DecemberÂ 31, 2023, the aggregate fair value amounts of all derivative instruments with credit risk-related contingent features that were in a net liability position totaled $9 thousand, for which no collateral was posted to cover these positions. In the event that the credit rating of East West Bank had been downgraded to below investment grade, the Company would have been required to post minimal additional collateral as of both JuneÂ 30, 2024 and DecemberÂ 31, 2023.Offsetting of DerivativesThe following tables present the gross derivative fair values, the balance sheet netting adjustments, and the resulting net fair values recorded on the Consolidated Balance Sheet, as well as the cash and noncash collateral associated with master netting arrangements. For the Companyâ€™s accounting policy on loans held-for-sale, refer to Note 1 â€” Summary of Significant Accounting Policies â€” Significant Accounting Policies â€” Loans Held-for-Sale to the Consolidated Financial Statements in the Companyâ€™s 2023 Form 10-K.The Companyâ€™s FRBSF and FHLB borrowings are primarily secured by loans held-for-investment. Loans held-for-investment totaling $37.0 billion and $37.2 billion, respectively, were pledged to secure borrowings and provide additional borrowing capacity as of JuneÂ 30, 2024 and DecemberÂ 31, 2023.Credit Quality IndicatorsAll loans are subject to the Companyâ€™s credit review and monitoring process. For the commercial loan portfolio, loans are risk rated based on an analysis of the borrowerâ€™s current payment performance or delinquency, repayment sources, financial and liquidity factors, including industry and geographic considerations. For the consumer loan portfolio, payment performance or delinquency is typically the driving indicator for risk ratings.The Company utilizes internal credit risk ratings to assign each individual loan a risk rating of 1 through 10:â€¢Pass â€” loans risk rated 1 through 5 are assigned an internal risk rating category of â€œPass.â€ Loans risk rated 1 are typically loans fully secured by cash. Pass loans have sufficient sources of repayment to repay the loan in full, in accordance with all terms and conditions.â€¢Special mention â€” loans assigned a risk rating of 6 have potential weaknesses that warrant closer attention by management; these are assigned an internal risk rating category of â€œSpecial Mention.â€â€¢Substandard â€” loans assigned a risk rating of 7 or 8 have well-defined weaknesses that may jeopardize the full and timely repayment of the loan; these are assigned an internal risk rating category of â€œSubstandard.â€â€¢Doubtful â€” loans assigned a risk rating of 9 have insufficient sources of repayment and a high probability of loss; these are assigned an internal risk rating category of â€œDoubtful.â€35â€¢Loss â€” loans assigned a risk rating of 10 are uncollectible and of such little value that they are no longer considered bankable assets; these are assigned an internal risk rating category of â€œLoss.â€Loan exposures categorized as criticized consist of special mention, substandard, doubtful and loss categories. The Company reviews the internal risk ratings of its loan portfolio on a regular basis, and adjusts the ratings based on changes in the borrowersâ€™ financial status and the collectability of the loans.The following tables summarize the Companyâ€™s loans held-for-investment and year-to-date gross write-offs by loan portfolio segments, internal risk ratings and vintage year as of the periods presented. The vintage year is the year of loan origination, renewal or major modification. AssetsThe Company acquires assets from borrowers through loan restructurings, workouts, or foreclosures. Assets acquired may include real properties (e.g., real estate, land, and buildings)
and commercial and personal properties. The Company recognizes foreclosed assets upon receiving assets in satisfaction of a loan (e.g., taking legal title or physical possession).Foreclosed
assets, consisting of OREO and other nonperforming assets, are included in Other assets on the Consolidated Balance Sheet. The Company had $30 million of foreclosed assets as of JuneÂ 30,
2024, compared with $11Â million as of DecemberÂ 31, 2023. The Company commences the foreclosure process on consumer mortgage loans after a borrower becomes more than 120 days
delinquent in accordance with the Consumer Financial Protection Bureau guidelines. The carrying value of the consumer real estate loans that were in an active or suspended foreclosure
process was $8 million as of both JuneÂ 30, 2024 and DecemberÂ 31, 2023.Loan Modifications to Borrowers Experiencing Financial DifficultyAs part of the Companyâ€™s loss mitigation efforts,
the Company may agree to modify the contractual terms of a loan to assist borrowers experiencing financial difficulty. The Company negotiates loan modifications on a case-by-case basis to
achieve mutually agreeable terms that maximize loan collectability and meet the borrowerâ€™s financial needs. The Company considers various factors to identify borrowers experiencing
financial difficulty. The primary factor for consumer borrowers is delinquency status. For commercial loan borrowers, these factors include credit risk ratings, the probability of loan risk rating
downgrades, and overall risk profile changes. The modification may include, but is not limited to, payment deferrals, interest rate reductions, term extensions, principal forgiveness, or a
combination of such modifications. Commercial loan borrowers that require immaterial modifications such as insignificant interest rate changes, short-term extensions (90 days or less) from the
original maturity date, or temporary waivers or extensions of financial covenants which would not constitute material credit actions, are generally not considered to be experiencing financial
difficulty and are not included in the disclosure. Insignificant payment deferrals (three months or less in the last 12 months) are also not included in the disclosure.41The following tables

for Credit LossesThe Company has a current expected credit losses framework for all financial assets measured at amortized cost and certain off-balance sheet credit exposures. The
Companyâ€™s allowance for credit losses, which includes both the allowance for loan losses and the allowance for unfunded credit commitments, is calculated with the objective of maintaining
a reserve sufficient to absorb losses inherent in our credit portfolios. The measurement of the allowance for credit losses is based on managementâ€™s best estimate of lifetime expected credit
losses, periodic evaluation of the loan portfolio, lending-related commitments and other relevant factors.The allowance for credit losses is deducted from the amortized cost basis of a financial
asset or a group of financial assets so that the balance sheet reflects the net amount the Company expects to collect. Amortized cost is the principal balance outstanding, net of purchase
premiums and discounts, deferred fees and costs, and escrow advances. Subsequent changes in expected credit losses are recognized in net income as a provision for, or a reversal of, credit
loss expense.The allowance for credit losses estimation involves procedures to consider the unique risk characteristics of the portfolio segments. The majority of the Companyâ€™s credit
exposures that share risk characteristics with other similar exposures are collectively evaluated. The collectively evaluated loans include performing loans and unfunded credit commitments. If
an exposure does not share risk characteristics with other exposures, the Company generally estimates expected credit losses on an individual basis.45Allowance for Collectively Evaluated

LoansThe allowance for collectively evaluated loans consists of a quantitative component that assesses the different risk factors considered in our models and a qualitative component that considers risk factors external to the models. Each of these components are described below.Quantitative Component â€” The Company applies quantitative methods to estimate loan losses by considering a variety of factors such as historical loss experience, the current credit quality of the portfolio, and an economic outlook over the life of the loan. The Company incorporates forward-looking information using macroeconomic scenarios which include variables that are considered key drivers of increases and decreases in credit losses. The Company utilizes a probability-weighted, multiple-scenario forecast approach. These scenarios may consist of a base forecast representing management's view of the most likely outcome, combined with downside or upside scenarios reflecting possible worsening or improving economic conditions. The quantitative models incorporate a probability-weighted calculation of these macroeconomic scenarios over a reasonable and supportable forecast period. If the life of the loans extends beyond the reasonable and supportable forecast period, the Company will consider historical experience or long-run macroeconomic trends over the remaining life of the loans to estimate the allowance for loan losses.There were no changes to the reasonable and supportable forecast period, except to the C&I segment, and no changes to the reversion to the historical loss experience method for the three and six months ended June 30, 2024 and 2023. The reasonable and supportable forecast period for the C&I segment changed from 11 quarters to eight quarters due to model redevelopment during the third quarter of 2023.The following table provides key credit risk characteristics and macroeconomic variables that the Company uses to estimate the expected credit losses by portfolio segment:Portfolio SegmentRisk CharacteristicsMacroeconomic VariablesC&IAge percentage, size at origination, delinquency status, sector and risk ratingUnemployment rate, Gross Domestic Product (â€œGDPâ€), and U.S. Treasury rates (1) CRE, Multifamily residential, and Construction and landDelinquency status, maturity date, collateral value, property type, and geographic locationUnemployment rate, GDP, and U.S. Treasury ratesSingle-family residential and HELOCsFICO score, delinquency status, maturity date, collateral value, and geographic locationUnemployment rate, GDP, and Home Price IndicesOther consumerLoss rate approachImmaterial (2)(1)Macroeconomic variables were updated due to model redevelopment.(2)Macroeconomic variables are included in the qualitative estimate.Quantitative Component â€” Allowance for Loan Losses for the Commercial Loan PortfolioThe Companyâ€™s C&I lifetime loss rate model estimates the loss rate expected over the life of a loan. This loss rate is applied to the amortized cost basis, excluding accrued interest receivable, to determine expected credit losses. The lifetime loss rate modelâ€™s reasonable and supportable period spans eight quarters, thereafter, immediately reverting to the historical average loss rate, expressed through the loan-level lifetime loss rate.To generate estimates of expected loss at the loan level for CRE, multifamily residential, and construction and land loans, projected probabilities of default (â€œPDsâ€) and loss given defaults (â€œLGDsâ€) are applied to the estimated exposure at default, considering the term and payment structure of the loan. The forecast of future economic conditions returns to long-run historical economic trends within the reasonable and supportable period.To estimate the life of a loan under both models, the contractual term of the loan is adjusted for estimated prepayments based on historical prepayment experience.Quantitative Component â€” Allowance for Loan Losses for the Consumer Loan PortfolioFor single-family residential and HELOC loans, projected PDs and LGDs are applied to the estimated exposure at default, considering the term and payment structure of the loan, to generate estimates of expected loss at the loan level. The forecast of future economic conditions returns to long-run historical economic trends after the reasonable and supportable period. To estimate the life of a loan for the single-family residential and HELOC loan portfolios, the contractual term of the loan is adjusted for estimated prepayments based on historical prepayment experience. For other consumer loans, the Company uses a loss rate approach.46Qualitative Component â€” The Company considers the following qualitative factors in the determination of the collectively evaluated allowance if these factors have not already been captured by the quantitative model. Such qualitative factors may include, but are not limited to:â€¢loan growth trends;â€¢the volume and severity of past due financial assets, and criticized or adversely classified financial assets;â€¢the Companyâ€™s lending policies and procedures, including changes in lending strategies, underwriting standards, collection, write-off and recovery practices;â€¢knowledge of a borrowerâ€™s operations;â€¢the quality of the Companyâ€™s credit review system;â€¢the experience, ability and depth of the Companyâ€™s management and associates;â€¢the effect of other external factors such as the regulatory and legal environments, or changes in technology; â€¢actual and expected changes in international, national, regional, and local economic and business conditions in which the Company operates; and â€¢risk factors in certain industry sectors not captured by the quantitative models.The magnitude of the impact of these factors on the Companyâ€™s qualitative assessment of the allowance for credit losses changes from period to period according to changes made by management in its assessment of these factors. The extent to which these factors change may be dependent on whether they are already reflected in quantitative loss estimates during the current period and the extent to which changes in these factors diverge from period to period.While the Companyâ€™s allowance methodologies strive to reflect all relevant credit risk factors, there continues to be uncertainty associated with, but not limited to, potential imprecision in the estimation process due to the inherent time lag of obtaining information and normal variations between expected and actual outcomes. The Company may hold additional qualitative reserves that are designed to provide coverage for losses attributable to such risk.Allowance for Individually Evaluated LoansWhen a loan no longer shares similar risk characteristics with other loans, such as in the case of certain nonaccrual loans, the Company estimates the allowance for loan losses on an individual loan basis. The allowance for loan losses for individually evaluated loans is measured as the difference between the recorded value of the loans and their fair value. For loans evaluated individually, the Company uses one of three different asset valuation measurement methods: (1) the fair value of collateral less costs to sell; (2) the present value of expected future cash flows; or (3) the loan's observable market price. If an individually evaluated loan is determined to be collateral dependent, the Company applies the fair value of the collateral less costs to sell method. If an individually evaluated loan is determined not to be collateral dependent, the Company uses the present value of future cash flows or the observable market value of the loan.â€¢Collateral-Dependent Loans â€” The allowance of a collateral-dependent loan is limited to the difference between the recorded value and fair value of the collateral less cost of disposal or sale. As of JuneÂ 30, 2024, collateral-dependent commercial and consumer loans totaled $75 million and $23 million, respectively. In comparison, collateral-dependent commercial and consumer loans totaled $30 million and $12 million, respectively, as of DecemberÂ 31, 2023. The Company's collateral-dependent loans were secured by real estate. As of both JuneÂ 30, 2024 and DecemberÂ 31, 2023, the collateral value of the properties securing the collateral-dependent loans, net of selling costs, exceeded the recorded value of the majority of the loans.47The following tables summarize the activity in the allowance for loan losses by portfolio segments for the three and six months ended June 30, 2024 and 2023:Three Months Ended June 30, 2024CommercialConsumerCREResidential Mortgage($ inÂ thousands)C&ICREMultifamily ResidentialConstruction and LandSingle-Family ResidentialHELOCsOther ConsumerTotalAllowance for loan losses, beginning of period$373,631Â $187,460Â $37,418Â $10,819Â $55,922Â $3,563Â $1,467Â $670,280Â Provision for (reversal of) credit losses on loans(a)17,783Â 18,287Â 2,628Â 4,422Â (6,366) (232)240Â 36,762Â Gross charge-offs(13,134)(11,103)â€”Â (920)(35)â€”Â (130)(25,322)Gross recoveries1,817Â 150Â 208Â 1Â 2Â 9Â â€”Â 2,187Â Total net (charge-offs) recoveries(11,317) (10,953)208Â (919)(33)9Â (130)(23,135)Foreign currency translation adjustment(113)â€”Â â€”Â â€”Â â€”Â â€”Â (113)Allowance for loan losses, end of period$379,984Â $194,794Â $40,254Â $14,322Â $49,523Â $3,340Â $1,577Â $683,794Â Three Months Ended June 30, 2023CommercialConsumerCREResidential Mortgage($ inÂ thousands)C&ICREMultifamily ResidentialConstruction and LandSingle-Family ResidentialHELOCsOther ConsumerTotalAllowance for loan losses, beginning of period$376,325Â $155,067Â $24,526Â $9,322Â $48,007Â $4,971Â $1,675Â $619,893Â Provision for (reversal of) credit losses on loans(a)5,259Â 15,685Â (1,604)1,995Â 3,501Â (444) (367)24,025Â Gross charge-offs(7,335)(2,366)â€”Â â€”Â â€”Â (6)(48)(9,755)Gross recoveries2,065Â 119Â 16Â 8Â 5Â 5Â â€”Â 2,218Â Total net (charge-offs) recoveries (5,270) (2,247)16Â 8Â 5Â (1)(48)(7,537)Foreign currency translation adjustment(981)â€”Â â€”Â â€”Â â€”Â â€”Â (981)Allowance for loan losses, end of period$375,333Â $168,505Â $22,938Â $11,325Â $51,513Â $4,526Â $1,260Â $635,400Â Six Months Ended June 30, 2024CommercialConsumerCREResidential Mortgage($ inÂ thousands)C&ICREMultifamily ResidentialConstruction and LandSingle-Family ResidentialHELOCsOther ConsumerTotalAllowance for loan losses, beginning of period$392,685Â $170,592Â $34,375Â $10,469Â $55,018Â $3,947Â $1,657Â $668,743Â Provision for (reversal of) credit losses on loans(a)18,057Â 37,419Â 5,660Â 5,803Â (5,467) (664)108Â 60,916Â Gross charge-offs(34,132)(13,501)(6)(2,144)(35)â€”Â (188)(50,006)Gross recoveries3,527Â 284Â 225Â 194Â 7Â 57Â â€”Â 4,294Â Total net (charge-offs) recoveries(30,605) (13,217)219Â (1,950)(28)57Â (188)(45,712)Foreign currency translation adjustment(153)â€”Â â€”Â â€”Â â€”Â â€”Â (153)Allowance for loan losses, end of period$379,984Â $194,794Â $40,254Â $14,322Â $49,523Â $3,340Â $1,577Â $683,794Â 48Six Months Ended June 30, 2023CommercialConsumerCREResidential Mortgage($ inÂ thousands)C&ICREMultifamily ResidentialConstruction and LandSingle-Family ResidentialHELOCsOther ConsumerTotalAllowance for loan losses, December 31, 2022$371,700Â $149,864Â $23,373Â $9,109Â $35,564Â $4,475Â $1,560Â $595,645Â Impact of ASU 2022-02 adoption5,683Â 337Â 6Â â€”Â 1Â 1Â â€”Â 6,028Â Allowance for loan losses, beginning of period377,383Â 150,201Â 23,379Â 9,109Â 35,565Â 4,476Â 1,560Â 601,673Â Provision for (reversal of) credit losses on loans(a)4,581Â 20,361Â (469)2,205Â 15,943Â 136Â (212)42,545Â Gross charge-offs(9,235)(2,372)â€”Â â€”Â â€”Â (97)(88)(11,792)Gross recoveries3,276Â 315Â 28Â 11Â 5Â 11Â â€”Â 3,646Â Total net (charge-offs) recoveries(5,959)(2,057)28Â 11Â 5Â (86)(88)(8,146)Foreign currency translation adjustment(672)â€”Â â€”Â â€”Â â€”Â â€”Â â€”Â (672)Allowance for loan losses, end of period$375,333Â $168,505Â $22,938Â $11,325Â $51,513Â $4,526Â $1,260Â $635,400Â In addition to the allowance for loan losses, the Company maintains an allowance for unfunded credit commitments. The Company has three general areas for which it provides the allowance for unfunded credit commitments: (1) recourse obligations for loans sold, (2) letters of credit, and (3) unfunded lending commitments. The allowance for unfunded credit commitments is maintained at a level that management believes to be sufficient to absorb estimated expected credit losses related to unfunded credit facilities. See Note 11 â€” Commitments and Contingencies to the Consolidated Financial Statements in this Form 10-Q for additional information related to unfunded credit commitments. The slight increase in the allowance for credit losses was primarily driven by the Companyâ€™s net loan growth, qualitative risk assessment and economic forecasts that reflected continued caution regarding inflation, the high interest rate environment and the CRE market outlook.The Company considers multiple economic scenarios to develop the estimate of the allowance for loan losses. The scenarios may consist of a baseline forecast representing management's view of the most likely outcome, and downside or upside scenarios that reflect possible worsening or improving economic conditions. As of June 30, 2024, the Company assigned the same weightings to its baseline, upside and downside scenarios as compared with December 31, 2023. The current baseline economic forecast continues to reflect key risks such as high inflation, high interest rates, concerns over global conflicts and oil prices. Compared to December 2023, the June 2024 baseline forecast for GDP growth showed some improvement in the near term (full years 2024 and 2025) and a slight worsening for longer-term (2026 and beyond). Unemployment rate has remained low with the June 2024 forecast showing a small uptick for the remainder of 2024, compared to the December 2023 forecast for the same periods. The downside scenario assumed the economy falls into recession in the third quarter of 2024 as a result of still-elevated interest rates, global and domestic political tensions, and concerns about bank failures. The upside scenario assumed a more optimistic economic outlook, including stronger growth, stable financial market, and full employment starting in the fourth quarter of 2024.49Loan Transfers, Sales and PurchasesThe Companyâ€™s primary business focus is on directly originated loans. The Company also purchases loans from and participates in loan financing with other banks. In the normal course of business, the Company also provides other financial institutions with the ability to participate in commercial loans that it originates, by selling loans to such institutions. Purchased loans may be transferred from held-for-investment to held-for-sale, and write-downs to allowance for loan losses are recorded, when appropriate. The Company invests in certain affordable housing projects in the form of ownership interests in limited partnerships or limited liability companies that qualify for CRA consideration and tax credits. These entities are formed to develop and operate apartment complexes designed as high-quality affordable housing for lower income tenants throughout the U.S. To fully utilize the available tax credits, each of these entities must meet the affordable housing regulatory requirements for a 15-year minimum compliance period. The Company also invests in small business investment companies and new markets tax credit projects that qualify for CRA consideration, as well as eligible projects that qualify for production, historic and renewable energy tax credits. Investments in new markets tax credits promote development in low-income communities, investments in production and renewable energy tax credits help promote the development of renewable energy sources, and investments in historic tax credits promote the rehabilitation of historic buildings and economic revitalization of the surrounding areas.The majority of affordable housing partnership, tax credit and CRA investments discussed above are variable interest entities where the Company is a limited partner in these investments, and an unrelated third party is typically the general partner or managing member who has control over the significant activities of these investments. While the Companyâ€™s interest in some of the investments may exceed 50% of the outstanding equity interests, the Company does not consolidate these investments due to the general partnerâ€™s or managing memberâ€™s ability to manage the entity, which is indicative of the general partnerâ€™s or managing memberâ€™s power over the entity. The Companyâ€™s maximum exposure to loss in connection with these partnerships consists of the unamortized investment balance and any tax credits claimed that may become subject to recapture.The Company records its investments in qualifying affordable housing partnerships, net, using PAM. Following the adoption of ASU 2023-02 on January 1, 2024, the Company elects to account for its tax credit investments using PAM on a program-by-program basis if certain conditions are met. Based on the Companyâ€™s annual goodwill impairment test as of DecemberÂ 31, 2023, there was no impairment. Additional information pertaining to the Companyâ€™s accounting policy for goodwill is summarized in Note 1 â€” Summary of Significant Accounting Policies â€” Significant Accounting Policies â€” Goodwill to the Consolidated Financial Statements in the Companyâ€™s 2023 Form 10-K. The Company performed an analysis of goodwill during the second quarter of 2024 that consisted of a qualitative assessment to determine if it was more likely than not that the carrying values of each reporting unit exceeded their estimated fair values. The results of this analysis indicated that no impairment of goodwill existed as of JuneÂ 30, 2024.The Company has an equity method investment in Rayliant and its carrying value was $110Â million as of JuneÂ 30, 2024, of which $101Â million was comprised of equity method goodwill. As of JuneÂ 30, 2024, all advances were secured by real estate loans.During the first quarter of 2024, the Company redeemed approximately $117 million of junior subordinated debt and repaid $4.5Â billion of BTFP borrowings upon maturity. These outstanding commitments to extend credit are not reflected in the accompanying Consolidated Financial Statements. While the Company does not anticipate losses from these transactions, commitments to extend credit are included in determining the appropriate level of allowance for unfunded credit commitments.The following table presents the Companyâ€™s credit-related commitments as of JuneÂ 30, 2024 and DecemberÂ 31, 2023:June 30, 2024December 31, 2023($ in thousands)Expire in One Year or LessExpire After One Year Through Three YearsExpire After Three Years Through Five YearsExpire After Five YearsTotalTotalLoan commitments$4,769,476Â $3,376,989Â $632,152Â $143,822Â $8,922,439Â $9,141,447Â Commercial letters of credit and standby letters of credit (â€œSBLCsâ€)1,206,498Â 357,450Â 150,329Â 1,122,720Â 2,836,997Â 2,610,761Â Total$5,975,974Â $3,734,439Â $782,481Â $1,266,542Â $11,759,436Â $11,752,208Â Loan commitments are agreements to lend to customers provided there are no violations of any conditions established in the agreement. Commitments generally have fixed expiration dates or other termination clauses and may require commitment fees. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future funding requirements.53Commercial letters of credit are issued to facilitate domestic and foreign trade transactions, while SBLCs are generally contingent upon the failure of the customers to perform according to the terms of the underlying contract with the third party. As a result, the total contractual amounts do not necessarily represent future funding requirements. The Companyâ€™s historical experience is that SBLCs typically expire without being funded. Additionally, in many cases, the Company holds collateral in various forms against these SBLCs. As part of its risk management activities, the Company monitors the creditworthiness of customers in conjunction with its SBLC exposure. Customers are obligated to reimburse the Company for any payment made on the customersâ€™ behalf. If the customers fail to pay, the Company would, as applicable, liquidate the collateral and/or offset existing accounts. As of JuneÂ 30, 2024, total letters of credit of $2.8 billion consisted of SBLCs of $2.8 billion and commercial letters of credit of $31 million. In comparison, as of DecemberÂ 31, 2023, total letters of credit of $2.6 billion consisted of SBLCs of $2.6 billion and commercial letters of credit of $24 million. As of both JuneÂ 30, 2024 and DecemberÂ 31, 2023, substantially all letters of credit were graded â€œPassâ€ using the Bankâ€™s internal credit risk rating system.The Company applies the same credit underwriting criteria to extend loans, commitments, and conditional obligations to customers. Each customerâ€™s creditworthiness is evaluated on a case-by-case basis. Collateral and financial guarantees may be obtained based on managementâ€™s assessment of a customerâ€™s credit risk. Collateral may include cash, accounts receivable, inventory, personal property, plant and equipment, and real estate property.Estimated exposure to loss from these commitments is included in the allowance for unfunded credit commitments and amounted to $39 million and $38 million as of JuneÂ 30, 2024 and DecemberÂ 31, 2023, respectively.Guarantees â€” From time to time, the Company sells or securitizes single-family and multifamily residential loans with recourse in the ordinary course of business. The Company is obligated to repurchase up to the recourse component of the loans if the loans default. The allowance for unfunded credit commitments is included in Accrued expenses and other liabilities on the Consolidated Balance Sheet. The Company continues to experience minimal losses from the single-family and multifamily residential loan portfolios sold or securitized with recourse.Litigation â€” The Company is a party to various legal actions arising in the ordinary course of its business. In accordance with ASC 450, Contingencies, the Company accrues reserves for outstanding lawsuits, claims and proceedings when a loss contingency is probable and can be reasonably estimated. The Company estimates the amount of loss contingencies using current available information from legal proceedings, advice from legal counsel and available insurance coverage. Due to the inherent subjectivity of the assessments and unpredictability of the outcomes of the legal proceedings, any amounts accrued or included in this aggregate amount may not represent the ultimate loss to the Company from the legal proceedings in question. Thus, the Companyâ€™s exposure and ultimate losses may be higher, and possibly significantly more, than the amounts accrued.54While it is impossible to ascertain the ultimate resolution or range of financial liability, based on information known to the Company as of JuneÂ 30, 2024, the Company does not believe there are any pending legal proceedings to which the Company is a party that, individually or in the aggregate, would reasonably be expected to have a material adverse effect on the Companyâ€™s financial condition. In light of the inherent uncertainty in legal proceedings, however, there can be no assurance that the ultimate resolution will not exceed established reserves and it is possible that the outcome of a particular matter, or a combination of matters, may be material to the Companyâ€™s financial condition for a particular period, depending upon the size of the loss and the Companyâ€™s income for that particular period. Note 12 â€” Stock Compensation PlansPursuant to the Companyâ€™s 2021 Stock Incentive Plan, as amended, the Company may issue stock, stock options, restricted stock, RSUs including performance-based RSUs, stock purchase warrants, stock appreciation rights, phantom stock and dividend equivalents to eligible employees, non-employee directors, consultants, and other service providers of East West and its subsidiaries. While a portion of RSUs are time-based vesting awards, others vest subject to the attainment of additional specified performance goals, referred to as â€œperformance-based RSUs.â€ Performance-based RSUs are granted annually upon approval by the Companyâ€™s Compensation and Management Development Committee based on the performance in the year prior to the grant date of the award. The number of awards that vest can range from zero percent to a maximum of 200% of the granted number of awards based on the Companyâ€™s achievement of specified performance criteria over a performance period of three years. These segments are defined by the type of customers served, and the related products and services provided. The segments reflect how financial information is currently evaluated by management. Operating segment results are based on the Companyâ€™s internal management reporting process, which reflects assignments and allocations of certain balance sheet and income statement items. The information presented is not indicative of how the segments would perform if they operated as independent entities.The Consumer and Business Banking segment primarily provides financial products and services to consumer and commercial customers through the Companyâ€™s domestic branch network and digital banking platforms. This segment offers consumer and commercial deposits, mortgage and home equity loans, and other products and services. It also originates commercial loans for small- and medium-sized enterprises through the Companyâ€™s branch network. Other products and services provided by this segment include wealth management, treasury management, interest rate risk hedging and foreign exchange services.The Commercial Banking segment primarily generates commercial loan and deposit products. Commercial loan products include CRE lending, construction financing, commercial business lending, working capital lines of credit, trade finance, letters of credit, affordable housing lending, asset-based lending, asset-backed finance, project finance and equipment financing. Commercial deposit products and other financial services include treasury management, foreign exchange services and interest rate and commodity risk hedging.The remaining centralized functions, including the corporate treasury activities of the Company and eliminations of inter-segment amounts, have been aggregated and included in the Other segment, which provides broad administrative support to the two core segments, namely the Consumer and Business Banking and the Commercial Banking segments.58The Company utilizes an internal reporting process to measure the performance of the three operating segments within the Company. The internal reporting process derives operating segment results by utilizing allocation methodologies for revenues and expenses. Net interest income of each segment represents the difference between actual interest earned on assets and interest incurred on liabilities of the segment, adjusted for funding charges or credits through the Companyâ€™s internal funds transfer pricing (â€œFTPâ€) process. Noninterest income and noninterest expense directly attributable to a business segment are assigned to that segment. Indirect costs, including technology-related costs and corporate overhead, are allocated based on a segmentâ€™s estimated usage using factors including but not limited to, full-time equivalent employees, net interest income, and loan and deposit volume. Charge-offs are recorded to the segment directly associated with the respective loans charged off, and provision for credit losses is recorded to the segments based on the related loans for which allowances are evaluated. The Companyâ€™s internal reporting process utilizes a full-allocation methodology. Under this methodology, corporate and indirect expenses incurred by the Other segment are allocated to the Consumer and Business Banking and the Commercial Banking segments, except certain corporate treasury-related expenses and insignificant unallocated expenses.The corporate treasury function within the Other segment is responsible for the Companyâ€™s liquidity and interest rate management, and the internal FTP process. The FTP process is formulated with the goal of encouraging loan and deposit growth that is consistent with the Companyâ€™s overall profitability objectives, as well as providing a reasonable and consistent basis for the measurement of its business segmentsâ€™ net interest margins and profitability. The FTP process charges a cost to fund loans (â€œFTP charges for loansâ€) and allocates credits for funds provided from deposits (â€œFTP credits for depositsâ€) using internal FTP rates. FTP charges for loans are determined based on a matched cost of funds, which is tied to the pricing and term characteristics of the loans. FTP credits for deposits are based on matched funding credit rates, which are tied to the implied or stated maturity of the deposits. FTP credits for deposits reflect the long-term value generated by the deposits. The net spread between the total internal FTP charges and credits is recorded as part of net interest income in the Other segment. The FTP process transfers the corporate interest rate risk exposure to the treasury function within the Other segment, where such exposures are centrally managed. The Companyâ€™s internal FTP assumptions and methodologies are reviewed at least annually to ensure that the process is reflective of current market conditions.The following tables present the operating results and other key financial measures for the individual operating segments as of and for the three and six months ended June 30, 2024 and 2023:($ in thousands)Consumer and Business BankingCommercial BankingOtherTotalThree Months Ended June 30, 2024Net interest income (loss) before provision for credit losses$293,292Â $260,780Â (843)553,229Â (Reversal of) provision for credit losses(3,245)40,245Â â€”Â 37,000Â Noninterest income26,769Â 50,720Â 7,184Â 84,673Â Noninterest expense108,124Â 92,064Â 36,246Â 236,434Â Segment income (loss) before income taxes215,182Â 179,191Â (29,905)364,468Â Segment net income$151,578Â $126,441Â $10,211Â $288,230Â As of June 30, 2024Segment assets$19,909,978Â $35,510,954Â $17,047,340Â $72,468,272Â ($ in thousands)Consumer and Business BankingCommercial BankingOtherTotalThree Months Ended June 30, 2023Net interest income (loss) before provision for credit losses$307,522Â $263,040Â $(3,816)$566,746Â Provision for credit losses5,524Â 20,476Â â€”Â 26,000Â Noninterest income27,120Â 42,538Â 8,973Â 78,631Â Noninterest expense107,027Â 88,333Â 66,429Â 261,789Â Segment income (loss) before income taxes222,091Â 196,769Â (61,272)357,588Â Segment net income$156,853Â $139,030Â $16,148Â $312,031Â As of June 30, 2023Segment assets$18,411,209Â $33,754,957Â $16,366,515Â $68,532,681Â 59($ in thousands)Consumer and Business BankingCommercial BankingOtherTotalSix Months Ended June 30, 2024Net interest income before provision for credit losses$585,056Â $521,129Â $12,183Â $1,118,368Â (Reversal of) provision for credit losses(680)62,680Â â€”Â 62,000Â Noninterest income52,311Â 97,186Â 14,164Â 163,661Â Noninterest expense227,424Â 198,371Â 57,514Â 483,309Â Segment income (loss) before income taxes410,623Â 357,264Â (31,167)736,720Â Segment net income$289,250Â $252,022Â $32,033Â $573,305Â As of June 30, 2024Segment assets$19,909,978Â $35,510,954Â $17,047,340Â $72,468,272Â ($ in thousands)Consumer and Business BankingCommercial BankingOtherTotalSix Months Ended June 30, 2023Net interest income before reversal of credit losses$611,764Â $499,763Â $55,080Â $1,166,607Â Provision for credit losses20,536Â 25,464Â â€”Â 46,000Â Noninterest income (loss)53,122Â 86,137Â (650)138,609Â Noninterest expense220,850Â 175,581Â 83,805Â 480,236Â Segment income (loss) before income taxes423,500Â 384,855Â (29,375)778,980Â Segment net income$299,100Â $273,487Â $61,883Â $634,470Â As of June 30, 2023Segment assets$18,411,209Â $33,754,957Â $16,366,515Â $68,532,681Â 60ITEM 2. This information is intended to facilitate the understanding and assessment of significant changes and trends related to the Companyâ€™s results of operations and financial condition. This discussion and analysis should be read in conjunction with the Consolidated Financial Statements and the accompanying notes presented elsewhere in this Quarterly Report on Form 10-Q (this â€œForm 10-Qâ€), and the Companyâ€™s Annual Report on Form 10-K for the year ended DecemberÂ 31, 2023, filed with the United States (â€œU.S.â€) Securities and Exchange Commission (â€œSECâ€) on FebruaryÂ 29, 2024 (the â€œCompanyâ€™s 2023 Form 10-Kâ€).Organization and StrategyEast West is a bank holding company incorporated in Delaware on August 26, 1998, and is registered under the Bank Holding Company Act of 1956, as amended. The Company commenced business on December 30, 1998 when, pursuant to a reorganization, it acquired all of the voting stock of the Bank, which became its principal asset. The Bank is an independent commercial bank headquartered in California that focuses on the financial service needs of individuals and businesses that operate in both the U.S. and Asia. Through over 110 locations in the U.S. and Asia, the Company provides a full range of consumer and commercial products and services through the following three business segments: (1) Consumer and Business Banking and (2) Commercial Banking, with the remaining operations recorded in (3) Other. The Companyâ€™s principal activity is lending to and accepting deposits from businesses and individuals. We are committed to enhancing long-term shareholder value by growing loans, deposits and revenue, improving profitability, and investing for the future while managing risks, expenses and capital. Our business model is built on customer loyalty and engagement, understanding our customersâ€™ financial goals, and meeting our customersâ€™ financial needs through our diverse products and services. We expect our relationship-focused business model to continue generating organic growth from existing customers and to expand our targeted customer bases. For additional information on our strategy, and the products and services provided by the Bank, see Item 1. Business â€” Strategy and Banking Services in the Companyâ€™s 2023 Form 10-K.Current DevelopmentsEconomic DevelopmentsRecent external data indicate that inflation is heading closer to the Board of Governors of the Federal Reserve Systemâ€™s (â€œFederal Reserveâ€) 2% target. The inflation readings have shown consistent improvement in recent months, which has led to expectations of rate cuts in September 2024. However, the higher-for-longer interest rate environment continues to negatively impact the market value of banking organizationsâ€™ investment securities, while the commercial real estate (â€œCREâ€) market remains under pressure from tighter credit conditions and decreased demand for office space. Factors such as the economic impacts of unrest, wars, and acts of terrorism could lead to higher energy and food prices, contributing to increased inflationary pressures, which may result in the likelihood that the Federal Reserve will cut interest rates slower than anticipated. The Company monitors changes in economic and industry conditions and their impacts on the Companyâ€™s business, customers, employees, communities and markets.Further discussion of the potential impacts on the Companyâ€™s business due to the higher interest rate environment has been provided in Item 1A. â€” Risk Factors â€” Risks Related to Financial Matters in the Companyâ€™s 2023 Form 10-K.Federal Deposit Insurance Corporation Special Assessment In November 2023, the Federal Deposit Insurance Corporation (â€œFDICâ€) approved a final rule to implement a special deposit insurance assessment to recover losses to the Deposit Insurance Fund (â€œDIFâ€) arising from the protection of uninsured depositors following the receiverships of failed institutions in the spring of 2023. Under the final rule, the assessment base for the special assessment is equal to an insured depository institutionâ€™s estimated uninsured deposits, reported for the quarter ended December 31, 2022, minus the first $5 billion in estimated uninsured deposits. The FDIC will collect the special assessment over eight quarterly assessment periods starting with the first quarter of 2024, at a quarterly rate of 3.36 basis points (â€œbpsâ€). The Company recognized the entire assessment expense of approximately $70 million in the fourth quarter of 2023. In addition, the FDIC retained the ability to make further adjustments to the special assessment depending on subsequent adjustments to the DIFâ€™s estimated loss.62As of the date of the publication of the final rule, the FDIC estimated that losses to the DIF totaled $16.3 billion. The FDIC has subsequently updated its estimate of the DIFâ€™s losses that are recoverable through the special assessment, which as of June 2024 totaled $19.2 billion. The FDIC also projected that the special assessment would be collected for an additional two quarters beyond the initial eight-quarter collection period, at an estimated quarterly rate of 2.34 bps. As a result, in addition to the $10 million of FDIC special assessment charge (â€œFDIC chargeâ€) recorded in the first quarter of 2024, an additional $2 million of FDIC charge was recorded in the second quarter of 2024.Climate AccountabilityOn March 6, 2024, the SEC adopted final rules requiring registrants to disclose certain climate-related information in registration statements and Annual Reports on Form 10-K. The final rules include disclosures related to climate-related risks and risk management as well as the board and managementâ€™s governance of such risks. The rules also incorporate requirements to disclose the financial effects of certain severe weather events and other natural conditions in the audited financial statements. Larger registrants would be required to disclose information about greenhouse gas (â€œGHGâ€) emissions, to the extent material, which would be subject to a phased-in third-party assurance requirement. The compliance date for the majority of the disclosures would be required starting with the 2025 Form 10-K. The compliance date for disclosures over material expenditures and their impact on a companyâ€™s financial statements, and Scope 1 and Scope 2 GHG emissions would be required starting with the 2026 Form 10-K. The attestation requirements would be phased in as limited assurance for the 2029 Form 10-K and reasonable assurance for the 2033 Form 10-K.On April 4, 2024, the SEC voluntarily stayed implementation of the rules pending the completion of judicial review of consolidated legal challenges to the rules by the United States Court of Appeals for the Eighth Circuit. As such, the compliance dates listed in the final rule are tentative. The Company is evaluating the impact of the climate disclosure rules and monitoring the outcome of the litigation regarding their adoption.In October 2023, California Governor Gavin Newsom signed into law Senate Bill 253, the Climate Corporate Data Accountability Act (â€œCCDAAâ€) and Senate Bill 261, the Climate-Related Financial Risk Act (â€œCRFRAâ€). On June 28, 2024, the Newsom administration released proposed amendments to the CCDAA and CRFRA, which could delay the implementation deadlines under each of these laws by two years from their respective initial compliance dates. If so amended, the reporting requirements under the CCDAA related to Scope 1 and 2 emissions will begin in 2028, the reporting requirements of Scope 3 emissions will begin in 2029, and the initial round of the climate risk disclosure reports under the CRFRA will be due by January 1, 2028. The Company is monitoring the status of these proposed amendments and their effect on any reporting requirements. For additional information on the California climate bills, see Item 1. â€” Business â€” Supervision and Regulation â€” Climate-Related Risk Management in the Companyâ€™s 2023 Form 10-K.Regulatory UpdateOn October 24, 2023, the Agencies issued a final rule revising their framework for evaluating banksâ€™ records of community reinvestment under the Community Reinvestment Act (â€œCRAâ€). The updates to the final rule strengthened and modernized the regulations implementing the CRA to better achieve the purposes of the law. On March 21, 2024, the agencies issued an interim final rule that extended the applicability date of certain provisions in the CRA final rule and requested comment on the extension. The Agencies extended the applicability date of the facility-based assessment areas and public file provisions from April 1, 2024 to January 1, 2026. Therefore, banks will not have to make changes to their assessment areas or their public files as a result of the 2023 CRA final rule until January 1, 2026. In addition, the Agencies also issued technical, non-substantive amendments to the CRA final rule and related agency regulations that reference it. For example, one of these technical amendments clarified that banks do not need to make changes to their public notices until January 1, 2026. The Company is evaluating impact of the interim final rule. For additional information on the CRA final rule, refer to Item 1. â€” Business â€” Supervision and Regulation â€” Community Reinvestment Act in the Companyâ€™s 2023 Form 10-K.On June 20, 2024, the FDIC released a final rule that requires covered insured depository institutions (â€œIDIsâ€) to develop and submit detailed plans demonstrating how they could be resolved in an orderly and timely manner in the event of receivership. IDIs with total assets of $100 billion or more are required to submit full resolution plans, and IDIs with total assets between $50 billion and $100 billion, including the Bank, are required to submit more limited informational filings. The first informational filings required under the final rule will be due no earlier than October 1, 2025. Under the final rule, if the FDIC deemed a resolution plan or informational filing not credible and the IDI failed to resubmit a credible plan, the IDI could become subject to an enforcement action. The Company has established a working group with senior executive management to prepare and complete a credible resolution plan for timely submission as part of the initial informational filing required by the final rule. 63On July 19, 2024, the federal banking agencies jointly released a statement on a proposed rule to update anti-money laundering and countering the financing of terrorism (â€œAML/CFTâ€) program requirements for the institutions they supervise, including the Bank. The proposed rule sets forth

the minimum requirements of an AML/CFT program, codifies longstanding supervisory expectations, and conforms to changes made by the Anti-Money Laundering Act of 2020. Under the proposed rule an institution would be required to have an effective, risk-based, and reasonably designed AML/CFT program and to perform AML/CFT risk assessments. The Company is evaluating the impact of this proposed rule.Financial ReviewThree Months Ended June 30,Six Months Ended June 30,($ and shares inÂ thousands,Â exceptÂ perÂ share, and ratio data)20242023202420023Summary of operations:Net interest income before provision for credit losses$553,229Â $566,746Â $1,118,368Â $1,166,607Â Noninterest income84,673Â 78,631Â 163,661Â 138,609Â Total revenue637,902Â 645,377Â 1,282,029Â 1,305,216Â Provision for credit losses37,000Â 26,000Â 62,000Â 46,000Â Noninterest expense236,434Â 261,789Â 483,309Â 480,236Â Income before income taxes364,468Â 357,588Â 736,720Â 778,980Â Income tax expense76,238Â 45,557Â 163,415Â 144,510Â Net income $288,230Â $312,031Â $573,305Â $634,470Â Per share:Basic earnings$2.07Â $2.21Â $4.12Â $4.49Â Diluted earnings$2.06Â $2.20Â $4.09Â $4.47Â Adjusted diluted earnings (1)$2.07Â $2.20Â $4.15Â $4.52Â Dividends declared$0.55Â $0.48Â $1.10Â $0.96Â Weighted-average number of shares outstanding:Basic138,980Â 141,468Â 139,195Â 141,291Â Diluted139,801Â 141,876Â 140,047Â 141,910Â Performance metrics:Return on average assets (â€œROAâ€)1.63Â %1.85Â %1.61Â %1.93Â %Return on average common equity (â€œROEâ€)16.36Â %19.43Â %16.38Â %20.27Â %Return on average tangible common equity (â€œTCEâ€) (1)17.54Â %21.01Â %17.57Â %21.95Â %Common dividend payout ratio26.89Â %21.98Â %27.11Â %21.60Â %Net interest margin3.27Â %3.55Â %3.30Â %3.75Â %Efficiency ratio (2)37.06Â %40.56Â %37.70Â %36.79Â %Adjusted efficiency ratio (1)34.25Â %31.83Â %34.47Â %31.13Â %At period end:June 30, 2024December 31, 2023Total assets$72,468,272Â $69,612,884Â Total loans$52,786,818Â $52,210,898Â Total deposits$59,999,785Â $56,092,438Â Common shares outstanding at period-end138,604Â 140,027Â Book value per share$52.06Â $49.64Â Tangible book value per share (1)$48.65Â $46.27Â (1)For additional information regarding the reconciliation of these non-U.S. Generally Accepted Accounting Principles (â€œGAAPâ€) financial measures, refer to Item 2. The decrease was primarily due to lower net interest income, higher provision for credit losses and the impacts related to the expanded application of the proportional amortization method (â€œPAMâ€) to its tax credit investments portfolio during the quarter. Net income for the first half of 2024 was $573 million, a decrease of $61 million or 10%, from first half of 2023 net income of $634 million. The decrease was primarily due to lower net interest income, higher income tax expense and provision for credit losses, partially offset by higher noninterest income. Noteworthy items about the Companyâ€™s performance for the second quarter and first half of 2024 included: â¢Net interest income and net interest margin. Second quarter 2024 net interest income before provision for credit losses was $553 million, a decrease of $14 million or 2% from the second quarter of 2023. Second quarter 2024 net interest margin of 3.27% declined by 28 bps year-over-year. For the first half of 2024, net interest income before provision for credit losses was $1.1 billion, a decrease of $48 million or 4% year-over-year. The net interest margin for the first half of 2024 was 3.30%, down 45 bps year-over-year. â¢Profitability ratios. Second quarter 2024 ROA, ROE and the return on average TCE of 1.63%, 16.36% and 17.54%, respectively, were down year-over-year. ROA, ROE and the return on average TCE of 1.61%, 16.38% and 17.57%, respectively, for the first half of 2024, were also down year-over-year. Return on average TCE is a non-GAAP financial measure. MD&A â€” Reconciliation of GAAP to Non-GAAP Financial Measures in this Form 10-Q.â¢Efficiency ratios. Second quarter 2024 efficiency ratio of 37.06% improved 350 bps from 40.56% for the second quarter of 2023. For the first half of 2024, the efficiency ratio was 37.70%, compared with 36.79% for the first half of 2023. Adjusted efficiency ratios were 34.25% and 34.47% for the second quarter and first half of 2024, respectively, compared with 31.83% and 31.13%, respectively, for the same year-ago periods. Adjusted efficiency ratio is a non-GAAP financial measure. For additional details, see the reconciliation of non-GAAP financial measures presented under Item 2. Total assets reached $72.5 billion as of JuneÂ 30, 2024, an increase of $2.9 billion or 4%, from DecemberÂ 31, 2023, primarily driven by a $2.7 billion or 44% increase in available-for-sale (â€œAFSâ€) debt securities.â¢Deposit growth. Total deposits were $60.0 billion as of JuneÂ 30, 2024, an increase of $3.9 billion or 7%, from $56.1 billion as of DecemberÂ 31, 2023, primarily reflecting growth across the Consumer and Business Banking and Commercial Banking segments. â¢Strong capital levels. Stockholdersâ€™ equity was $7.2 billion as of JuneÂ 30, 2024, up 4% from $7.0 billion as of DecemberÂ 31, 2023. Book value and tangible book value per share of $52.06 and $48.65, respectively, as of JuneÂ 30, 2024, were both up 5% from $49.64 and $46.27, respectively, compared with DecemberÂ 31, 2023. MD&A - Reconciliation of GAAP to non-GAAP Financial Measures in this Form 10-Q.Results of OperationsNet Interest IncomeThe Companyâ€™s primary source of revenue is net interest income, which is the interest income earned on interest-earning assets less interest expense paid on interest-bearing liabilities. Net interest margin is the ratio of net interest income to average interest-earning assets. Net interest income and net interest margin are impacted by several factors, including changes in average balances and the composition of interest-earning assets and funding sources, market interest rate fluctuations and the slope of the yield curve, repricing characteristics and maturity of interest-earning assets and interest-bearing liabilities, the volume of noninterest-bearing sources of funds and asset quality.65 Net interest income and net interest margin for the second quarter and first half of 2024 decreased year-over-year. The decreases in net interest income and net interest margin were primarily due to higher deposit funding costs and shifts in the deposit mix to higher cost time and money market deposits and higher Federal Home Loan Bank (â€œFHLBâ€) advances, partially offset by higher loan yields and loan growth, a decrease in Bank Term Funding Program (â€œBTFPâ€) average balances, and increases in AFS debt securitiesâ€™ yield and volumes. The changes in yields and rates primarily reflected the impact of the higher benchmark interest rates. Average interest-earning assets were $68.1 billion for the second quarter of 2024, an increase of $4.0 billion or 6% from $64.1 billion for the second quarter of 2023. The year-over-year increase in average interest-earning assets primarily reflected loan growth, an increase in AFS debt securities, and a decrease in interest-bearing cash and deposits with banks. For the first half of 2024, the average interest-earning assets were $68.1 billion, an increase of $5.3 billion or 8% from $62.8 billion for the first half of 2023. The year-over-year increase in average interest-earning assets primarily reflected loan growth and increases in AFS debt securities and interest-bearing cash and deposits with banks.The yield on average interest-earning assets for the second quarter of 2024 was 6.11%, an increase of 44 bps from 5.67% for the second quarter of 2023. The yield on average interest-earning assets for the first half of 2024 was 6.08%, an increase of 49 bps from 5.59% for the first half of 2023. The year-over-year increases in the yield on average interest-earning assets primarily resulted from higher benchmark interest rates.66The average loan yield for the second quarter of 2024 was 6.73%, an increase of 40 bps from 6.33% for the second quarter of 2023. The average loan yield for the first half of 2024 was 6.72%, an increase of 48 bps from 6.24% for the first half of 2023. The year-over-year increases in the average loan yield reflected the loan portfolioâ€™s sensitivity to higher benchmark interest rates and loan growth. Approximately 58% and 60% of loans held-for-investment were variable rate as of JuneÂ 30, 2024 and 2023, respectively.Deposits are an important source of funding for the Company. Average deposits were $58.7Â billion for the second quarter of 2024, which increased $4.4 billion or 8% from $54.3 billion for the second quarter of 2023. For the first half of 2024, average deposits were $58.1 billion, which increased $3.5Â billion or 6% from $54.6 billion for the first half of 2023. 67Average noninterest-bearing deposits were $14.7 billion for the second quarter of 2024, a decrease of $2.2 billion or 13% from $16.9 billion for the second quarter of 2023. For the first half of 2024, average noninterest-bearing deposits were $14.8 billion, a decrease of $3.5Â billion or 19% from $18.3 billion for the first half of 2023. The year-over-year decreases in noninterest-bearing deposits reflected the deposit mix shift to time and money market deposits. Average noninterest-bearing deposits made up 25% and 31% of average deposits for the second quarters of 2024 and 2023, respectively, and 26% and 34% for the first halves of 2024 and 2023, respectively.The average cost of deposits was 2.96% for the second quarter of 2024, an 84 bp increase from 2.12% for the second quarter of 2023. The average cost of interest-bearing deposits was 3.94% for the second quarter of 2024, an 85 bp increase from 3.09% for the second quarter of 2023. The average cost of deposits was 2.90% for the first half of 2024, a 104 bp increase from 1.86% for the first half of 2023. The average cost of interest-bearing deposits was 3.89% for the first half of 2024, a 109 bp increase from 2.80% for the first half of 2023. These year-over-year increases primarily reflected shifts in the deposit mix to time and money market deposits, and rising deposit costs in response to the higher interest rate environment.The average cost of funds calculation includes deposits, BTFP, short-term borrowings and federal funds purchased, FHLB advances, securities sold under repurchase agreements (â€œrepurchase agreementsâ€), and long-term debt and finance lease liabilities. For the second quarter of 2024, the average cost of funds was 3.11%, an 80 bp increase from 2.31% for the second quarter of 2023. For the first half of 2024, the average cost of funds was 3.04%, a 103 bp increase from 2.01% for the first half of 2023. The year-over year increases were mainly driven by the increased cost of deposits as discussed above.The Company utilizes various tools to manage interest rate risk. The total change for each category of interest-earning assets and interest-bearing liabilities is segmented into changes attributable to variations in volume and yield/rate. Changes that are not solely due to either volume or yield/rate are allocated proportionally based on the absolute value of the change related to average volume and average yield/rate.Three Months Ended June 30,Six Months Ended June 30,2024 vs. 20232024 vs. 2023ChangesÂ DueÂ toChangesÂ DueÂ to($ inÂ thousands)Total ChangeVolumeYield/RateTotal ChangeVolumeYield/RateInterest-earning assets:Interest-bearing cash and deposits with banks$(11,589)$(14,488)$2,899Â $27,146Â $14,515Â $12,631Â Assets purchased under resale agreements (1)(2,084)(830)(1,254)(472)(767)295Â Debt securities:AFS debt securities42,950Â 23,146Â 19,804Â 52,611Â 26,517Â 26,094Â HTM debt securities(188) (211)23Â (388)(315)(73)Total debt securities42,762Â 22,935Â 19,827Â 52,223Â 26,202Â 26,021Â Loans:C&I34,849Â 18,298Â 16,551Â 85,086Â 35,294Â 49,792Â CRE22,385Â 10,100Â 12,285Â 64,008Â 29,740Â 34,268Â Residential mortgage39,931Â 19,553Â 20,378Â 86,111Â 43,661Â 42,450Â Other consumer12Â (166)178Â (25)(365)340Â Total loans97,177Â 47,785Â 49,392Â 235,180Â 108,330Â 126,850Â Restricted equity securities2,014Â 1,365Â 649Â 2,314Â 1,269Â 1,045Â Total interest and dividend income$128,280Â $56,767Â $71,513Â $316,391Â $149,549Â $166,842Â Interest-bearing liabilities:Checking deposits$3,109Â $(6,131)$9,240Â $33,756Â $1,116Â $32,640Â Money market deposits48,986Â 30,302Â 18,684Â 107,545Â 48,887Â 58,658Â Savings deposits1,041Â (830)1,871Â 1,492Â (1,962)3,454Â Time deposits90,869Â 48,410Â 42,459Â 190,617Â 87,546Â 103,071Â BTFP, short-term borrowings and federal funds purchased(49,000) (49,003)3Â (15,719)(15,803)84Â FHLB advances48,840Â 48,840Â â€“Â 50,149Â 49,622Â 527Â Repurchase agreements(153)(162)9Â (1,170)(1,497)327Â Long-term debt and finance lease liabilities(1,895)(2,381)486Â (2,040)(2,706)666Â Total interest expense$141,797Â $69,045Â $72,752Â $364,630Â $165,203Â $199,427Â Change in net interest income$(13,517)$(12,278)$(1,239)$(48,239)$(15,654)$(32,585)(1)Includes the impact of securities purchased under resale agreements for the second quarter and first half of 2024. Noninterest income for the second quarter of 2024 was $85 million, an increase of $6 million or 8%, compared with $79 million for the second quarter of 2023. The increase was primarily due to increases in lending, wealth management and deposit account fees, partially offset by lower other investment income. Noninterest income for the first half of 2024 was $164 million, an increase of $25 million or 18%, compared with $139 million for the same period in 2023. The increase was primarily due to net gains on AFS debt securities, and increases in lending, wealth management and deposit account fees.Deposit account fees were $26 million for the second quarter of 2024, an increase of $3 million or 10%, compared with $23 million for the second quarter of 2023. For the first half of 2024, deposit account fees were $51 million, an increase of $5 million or 9%, compared with $46 million for the same period in 2023. The increases were primarily related to analysis service fees, which reflected customer growth and fee increases.Lending fees were $24 million for the second quarter of 2024, an increase of $3 million or 16%, compared with $21 million for the second quarter of 2023. For the first half of 2024, lending fees were $47 million, an increase of $6 million or 14%, compared with $41 million for the same period in 2023. The increases were primarily due to higher trade finance and unused commitment fees driven by customer growth.Wealth management fees were $9 million for the second quarter of 2024, an increase of $2 million or 36%, compared with $7 million for the second quarter of 2023. For the first half of 2024, wealth management fees were $18 million, an increase of $5 million or 36%, compared with $13 million for the same period in 2023. The increases reflected customer demand for higher-yielding products in response to the interest rate environment. Net gains on AFS debt securities were $2 million for both the second quarter and first half of 2024, which primarily reflected the sale of mortgage-backed securities. In comparison, net losses on AFS debt securities were $10 million for the first half of 2023, due to the write-off of an impaired subordinated debt security during the first quarter of 2023.Other investment income was $1 million for the second quarter of 2024, a decrease of $3 million or 85%, compared with $4 million for the same period in 2023. For the first half of 2024, other investment income was $3 million, a decrease of $3 million or 43%, compared with $6 million for the same period in 2023. The decreases primarily reflected reduced earnings from the Companyâ€™s equity method CRA investments in 2024, compared with the same year-ago periods. 72Noninterest Expense The following table presents the components of noninterest expense for the second quarters and first halves of 2024 and 2023:Three Months Ended June 30,Six Months Ended June 30, ($ in thousands)20242023% Change20242023% ChangeCompensation and employee benefits$133,588Â $124,937Â 7Â %$275,400Â $254,591Â 8Â %Occupancy and equipment expense15,031Â 16,088Â (7)%30,261Â 31,675Â (4)%Deposit insurance premiums and regulatory assessments10,708Â 8,262Â 30Â %30,357Â 16,172Â 88Â %Deposit account expense12,050Â 10,559Â 14Â %24,238Â 20,168Â 20Â %Computer software and data processing expenses11,392Â 10,692Â 7Â %22,736Â 21,399Â 6Â %Other operating expense37,613Â 35,337Â 6Â %71,058Â 70,207Â 1Â %Amortization of tax credit and CRA investments16,052Â 55,914Â (71)%29,259Â 66,024Â (56)%Total noninterest expense$236,434Â $261,789Â (10)%$483,309Â $480,236Â 1Â %Second quarter 2024 noninterest expense of $236 million decreased $26Â million or 10%, compared with $262 million for the second quarter of 2023. The decrease was primarily due to a decrease in amortization of tax credit and CRA investments, partially offset by an increase in compensation and employee benefits. For the first half of 2024, noninterest expense of $483 million increased $3 million or 1%, compared with $480 million for the same period in 2023, primarily due to increases in compensation and employee benefits, deposit insurance premiums and regulatory assessments and deposit account expense, partially offset by a decrease in amortization of tax credit and CRA investments.Compensation and employee benefits were $134 million for the second quarter of 2024, an increase of $9 million or 7%, compared with $125 million for the second quarter of 2023. For the first half of 2024, compensation and employee benefits were $275 million, an increase of $20 million or 8%, compared with $255 million for the same period in 2023. The increases were primarily driven by annual merit increases and staffing growth.Deposit insurance premiums and regulatory assessments were $11 million for the second quarter of 2024, an increase of $3 million or 30%, compared with $8 million for the same period in 2023. Deposit insurance premiums and regulatory assessments were $30 million for the first half of 2024, an increase of $14 million or 88%, compared with $16 million for the same period in 2023. The increases were primarily due to additional FDIC charges of $2 million and $12 million recorded during the second quarter and first half of 2024, respectively. For additional information about the FDIC special assessment, refer to Item 2. MD&A â€” Overview â€” Current Developments in this Form 10-Q. Deposit account expense was $12 million for the second quarter of 2024, an increase of $1 million or 14%, compared with $11 million for the same period in 2023. The increase was primarily due to higher commercial vendor payments, which were driven by an increase in program participants; and deposit referral fees, which were driven by higher deposit balances. For the first half of 2024, deposit account expense was $24 million, an increase of $4 million or 20%, compared with $20 million for the same period in 2023. The increases were primarily due to higher deposit referral fees driven by higher deposit balances, and higher commercial vendor payments due to an increase in program participants. The increase in the first half of 2024 was further impacted by higher insured cash sweep product fees driven by higher deposit balances. Amortization of tax credit and CRA investments was $16 million for the second quarter of 2024, a decrease of $40 million or 71%, compared with $56 million for the second quarter of 2023. For the first half of 2024, amortization of tax credit and CRA investments was $29 million, a decrease of $37 million or 56%, compared with $66 million for the same period in 2023. The decreases were primarily due to the impacts related to the expanded application of PAM since the adoption of Accounting Standards Update (â€œASUâ€) 2023-02, Investments â€” Equity Method and Joint Ventures on January 1, 2024, and the timing of tax credit investments that closed in a given period. The decreases in both periods were primarily driven by a decrease in net interest income, partially offset by a decrease in provision for credit losses. Net interest income before provision for credit losses decreased $14 million or 5% year-over-year to $293 million for the second quarter of 2024, and $27 million or 4% year-over-year to $585 million for the first half of 2024. These decreases were primarily driven by a higher cost of interest-bearing deposits and a continued shift to interest-bearing products in the deposit mix. Provision for credit losses decreased $9 million or 159% year-over-year to $3 million in reversal of provision for credit losses for the second quarter of 2024, and $21 million or 103% year-over-year to $1 million in reversal of provision for credit losses for the first half of 2024. These decreases were primarily driven by the improvement in the macroeconomic outlook in the residential mortgage loan sector in the second quarter of 2024.75Commercial BankingThe Commercial Banking segment primarily generates commercial loan and deposit products. Commercial loan products include CRE lending, construction finance, commercial business lending, working capital lines of credit, trade finance, letters of credit, affordable housing lending, asset-based lending, asset-backed finance, project finance and equipment financing. Commercial deposit products and other financial services include treasury management, foreign exchange services, and interest rate and commodity risk hedging.The following tables present additional financial information for the Commercial Banking segment for the periods indicated:Three Months Ended June 30,Change from 2023($ in thousands)20242023$%Net interest income before provision for credit losses$260,780Â $263,040Â $(2,260)(1)%Noninterest income50,720Â 42,538Â 8,182Â 19Â %Total revenue311,500Â 305,578Â 5,922Â 2Â %Provision for credit losses40,245Â 20,476Â 19,769Â 97Â %Noninterest expense 92,064Â 88,333Â 3,731Â 4Â %Segment income before income taxes179,191Â 196,769Â (17,578)(9)%Income tax expense52,750Â 57,739Â (4,989)(9)%Segment net income$126,441Â $139,030Â $(12,589)(9)%Average loans$32,593,938Â $31,229,460Â $1,364,478Â 4Â %Average deposits$21,454,905Â $16,788,456Â $4,666,449Â 28Â %($ inÂ thousands)Six Months Ended June 30,Change from 202320242023$%Net interest income before provision for credit losses$521,129Â $499,763Â $21,366Â 4Â %Noninterest income97,186Â 86,137Â 11,049Â 13Â %Total revenue618,315Â 585,900Â 32,415Â 6Â %Provision for credit losses62,680Â 25,464Â 37,216Â 146Â %Noninterest expense198,371Â 175,581Â 22,790Â 13Â %Segment income before income taxes357,264Â 384,855Â (27,591)(7)%Income tax expense105,242Â 111,368Â (6,126)(6)%Segment net income$252,022Â $273,487Â $(21,465)(8)%Average loans$32,690,743Â $31,134,716Â $1,556,027Â 5Â %Average deposits$21,254,547Â $17,034,343Â $4,220,204Â 25Â %Commercial Banking segment net income decreased $13 million or 9% year-over-year to $126 million for the second quarter of 2024. This decrease was primarily due to higher provision for credit losses, partially offset by higher noninterest income. Provision for credit losses increased $20 million or 97% year-over-year to $40 million for the second quarter of 2024, primarily driven by higher net charge-offs in the C&I and CRE portfolios. Noninterest income increased $8 million or 19% year-over-year to $51 million for the second quarter of 2024, primarily driven by higher deposit account fees, foreign exchange income and lending fees.76Commercial Banking segment net income decreased $21 million or 8% year-over-year to $252 million for the first half of 2024. This decrease was primarily due to higher provision for credit losses and noninterest expense, partially offset by revenue growth. Net interest income before provision for credit losses increased $21 million or 4% year-over-year to $521 million for the first half of 2024. This increase was primarily driven by higher loan interest income from commercial loan growth. Provision for credit losses increased $37 million or 146% year-over-year to $63 million for the first half of 2024, primarily driven by higher net charge-offs in the C&I and CRE portfolios. Noninterest income increased $11 million or 13% year-over-year to $97 million for the first half of 2024, mainly driven by higher deposit account fees and lending fees. Noninterest expense increased $23 million or 13% year-over-year to $198 million for the first half of 2024, primarily due to higher compensation and employee benefits, deposit account expense, and deposit insurance premiums and regulatory assessments.OtherCentralized functions, including the corporate treasury activities of the Company and eliminations of inter-segment amounts, have been aggregated and included in the Other segment, which provides broad administrative support to the two core segments, namely the Consumer and Business Banking and the Commercial Banking segments.The following tables present additional financial information for the Other segment for the periods indicated:Three Months Ended June 30,Change from 2023($ in thousands)20242023$%Net interest loss before provision for credit losses(843)(3,816)$2,973Â 78Â %Noninterest income7,184Â 8,973Â (1,789)(20)%Total revenue6,341Â 5,157Â 1,184Â 23Â %Noninterest expense 36,246Â 66,429Â (30,183)(45)%Segment loss before income taxes (29,905)(61,272)31,367Â 51Â %Income tax benefit40,116Â 77,420Â (37,304)(48)%Segment net income$10,211Â $16,148Â $(5,937)(37)%Average deposits$2,373,767Â $4,230,592Â $(1,856,825)(44)%($ inÂ thousands)Six Months Ended June 30,Change from 202320242023$%Net interest income before provision for credit losses$12,183Â $55,080Â $(42,897)(78)%Noninterest income14,164Â (650)14,814Â NMTotal revenue26,347Â 54,430Â (28,083)(52)%Noninterest expense 57,514Â 83,805Â (26,291)(31)%Segment loss before income taxes (31,167)(29,375)(1,792)(6)%Income tax benefit63,200Â 91,258Â (28,058)(31)%Segment net income $32,033Â $61,883Â $(29,850)(48)%Average deposits$2,487,582Â $4,027,869Â $(1,540,287)(38)%NM â€” Not meaningful.The Other segment reported segment loss before income taxes of $30 million and segment net income of $10 million, reflecting an income tax benefit of $40 million for the second quarter of 2024. The decrease in segment net income was primarily driven by lower income tax benefit, partially offset by lower noninterest expense. Noninterest expense decreased $30 million, primarily due to lower amortization of tax credit and CRA investments from the expanded use of PAM since the adoption of ASU 2022-02 on January 1, 2024. For additional information on the PAM, see Note 2 â€” Current Accounting Developments and Summary of Significant Accounting Policies and Note 8 â€” Affordable Housing Partnership, Tax Credit and Community Reinvestment Act Investments, Net.77The Other segment reported segment loss before income taxes of $31 million and segment net income of $32 million, reflecting an income tax benefit of $63 million for the first half of 2024. The decrease in segment net income was primarily driven by lower net interest income and income tax benefit, partially offset by lower noninterest expense and higher noninterest income. The $43 million decrease in net interest income before provision for credit losses was primarily driven by lower FTP spread income absorbed by the Other segment, partially offset by higher yields on interest-bearing cash and deposits with banks and debt securities. Noninterest income increased $15 million for the first half of 2024, mainly due to a $10 million

write-off of an impaired AFS debt security during the first quarter of 2023 and an increase in foreign exchange income. Noninterest expense decreased $26 million, primarily due to lower amortization of tax credit and CRA investments from the aforementioned adoption of ASU 2022-02 on January 1, 2024.The income tax expense or benefit in the Other segment consists of the remaining unallocated income tax expense or benefit after allocating income tax expense to the two core segments, and reflects the impact of tax credit investment activity. Income tax expense is allocated to the Consumer and Business Banking and the Commercial Banking segments by applying statutory income tax rates to the segment income before income taxes. Tax credit investment amortization is allocated to the Other segment.Balance Sheet AnalysisDebt SecuritiesThe Company maintains a portfolio of high quality and liquid debt securities with a moderate duration profile. It closely manages the overall portfolio credit, interest rate and liquidity risks. The Companyâ€™s debt securities provide:â€¢interest income for earnings and yield enhancement;â€¢funding availability for needs arising during the normal course of business;â€¢the ability to execute interest rate risk management strategies in response to changes in economic or market conditions; andâ€¢collateral to support pledging agreements as required and/or to enhance the Companyâ€™s borrowing capacity.While the Company does not intend to sell its debt securities, it may sell AFS debt securities in response to changes in the balance sheet and related interest rate risk to meet liquidity, regulatory and strategic requirements.78The following table presents the distribution of the Companyâ€™s AFS and HTM debt securities portfolio as of JuneÂ 30, 2024 and DecemberÂ 31, 2023, and by credit ratings as of JuneÂ 30, 2024:June 30, 2024December 31, 2023Ratings as of June 30, 2024 (1)($ in thousands)Amortized CostFair Value% of Fair ValueAmortized CostFair Value% of Fair ValueAAA/AABBBBB and LowerNo Rating (2)AFS debt securities:U.S. Treasury securities$676,291Â $623,757Â 7Â %$1,112,587Â $1,060,375Â 17Â %100Â %â€”Â %â€”Â %â€”Â %â€”Â %â€”Â %U.S. government agency and U.S. government-sponsored enterprise debt securities309,956Â 260,388Â 3Â %412,086Â 364,446Â 6Â %100Â %â€”Â %â€”Â %â€”Â %â€”Â %â€”Â %U.S. government agency and U.S. government-sponsored enterprise mortgage-backed securities (3)6,455,081Â 6,163,665Â 69Â %2,488,304Â 2,195,853Â 35Â %100Â %â€”Â %â€”Â %â€”Â %â€”Â %Municipal securities295,437Â 256,563Â 3Â %297,283Â 261,016Â 4Â %98Â %â€”Â %â€”Â %â€”Â %2Â %Non-agency mortgage-backed securities925,027Â 795,255Â 9Â %1,052,913Â 921,187Â 15Â %89Â %â€”Â %â€”Â %â€”Â %â€”Â %11Â %Corporate debt securities653,501Â 507,130Â 6Â %653,501Â 502,425Â 8Â %â€”Â %31Â %66Â %3Â %â€”Â %Foreign government bonds245,523Â 233,724Â 3Â %239,333Â 227,874Â 4Â %45Â %55Â %â€”Â %â€”Â %â€”Â %Asset-backed securities39,061Â 38,593Â 0Â %43,234Â 42,300Â 1Â %56Â %44Â %â€”Â %â€”Â %â€”Â %Collateralized loan obligations44,500Â 44,453Â 0Â %617,250Â 612,861Â 10Â %100Â %â€”Â %â€”Â %â€”Â %â€”Â %Total AFS debt securities$9,644,377Â $8,923,528Â 100Â %$6,916,491Â $6,188,337Â 100Â %92Â %3Â %4Â %0Â %1Â %HTM debt securities:U.S. Treasury securities$532,294Â $487,707Â 20Â %$529,548Â $488,551Â 20Â %100Â %â€”Â %â€”Â %â€”Â %â€”Â %U.S. government agency and U.S. government-sponsored enterprise debt securities1,003,094Â 802,895Â 33Â %1,001,836Â 814,932Â 33Â %100Â %â€”Â %â€”Â %â€”Â %â€”Â %U.S. government agency and U.S. government-sponsored enterprise mortgage-backed securities (4)1,214,541Â 972,255Â 41Â %1,235,784Â 1,004,697Â 41Â %100Â %â€”Â %â€”Â %â€”Â %â€”Â %Municipal securities188,321Â 142,370Â 6Â %188,872Â 145,791Â 6Â %100Â %â€”Â %â€”Â %â€”Â %â€”Â %Total HTM debt securities$2,938,250Â $2,405,227Â 100Â %$2,956,040Â $2,453,971Â 100Â %100Â %â€”Â %â€”Â %â€”Â %â€”Â %Total debt securities$12,582,627Â $11,328,755Â $9,872,531Â $8,642,308Â (1)Credit ratings express opinions about the credit quality of a debt security. The Company determines the credit rating of a security according to the lowest credit rating made available by nationally recognized statistical rating organizations (â€œNRSROsâ€). Debt securities rated investment grade, which are those with ratings similar to BBB- or above (as defined by NRSROs), are generally considered by the rating agencies and market participants to be low credit risk. Ratings percentages are allocated based on fair value.(2)For debt securities not rated by NRSROs, the Company uses other factors which include but are not limited to the priority in collections within the securitization structure, and whether the contractual payments have historically been on time.(3)Includes Government National Mortgage Association (â€œGNMAâ€) AFS debt securities totaling $5.2Â billion of both amortized cost and fair value as of JuneÂ 30, 2024, and $1.3Â billion of amortized cost and $1.2 billion of fair value as of DecemberÂ 31, 2023.(4)Includes GNMA HTM debt securities totaling $89Â million of amortized cost and $71Â million of fair value as of JuneÂ 30, 2024, and $92 million of amortized cost and $75 million of fair value of as of DecemberÂ 31, 2023.As of JuneÂ 30, 2024, the Companyâ€™s AFS and HTM debt securities portfolios had an effective duration (defined as the sensitivity of the value of the portfolio to interest rate changes) of 2.8 and 7.2, respectively, compared with 3.6 and 7.5, respectively, as of DecemberÂ 31, 2023. The decrease in the AFS effective duration was primarily due to the purchases of floating rate GNMA securities. The decrease in the HTM effective duration was due to the portfolio seasoning. The Company estimated that the effective duration of its AFS debt securities was 3.4 for an instantaneous 100 bps parallel increase and 2.4 for an instantaneous 100 bps parallel decrease as of JuneÂ 30, 2024.Available-for-Sale Debt SecuritiesThe fair value of AFS debt securities totaled $8.9Â billion as of JuneÂ 30, 2024, an increase of $2.7Â billion or 44% from $6.2Â billion as of DecemberÂ 31, 2023. The increase was primarily due to the purchases of GNMA securities, which were mainly funded by an increase in deposits. The Companyâ€™s AFS debt securities are carried at fair value with non-credit related unrealized gains and losses, net of tax, reported in Other comprehensive income (loss) on the Consolidated Statement of Comprehensive Income. Pre-tax net unrealized losses on AFS debt securities were $721 million as of JuneÂ 30, 2024, compared with $728 million as of DecemberÂ 31, 2023.79As of JuneÂ 30, 2024 and DecemberÂ 31, 2023, 99% and 97%, respectively, of the carrying value of the AFS debt securities portfolio was rated investment grade by NRSROs. Of the AFS debt securities with gross unrealized losses, substantially all were rated investment grade as of both JuneÂ 30, 2024 and DecemberÂ 31, 2023. There was no allowance for credit losses provided against the AFS debt securities as of each of JuneÂ 30, 2024 and DecemberÂ 31, 2023. Additionally, there were no credit losses recognized in earnings for the three and six months ended June 30, 2024 and 2023. Held-to-Maturity Debt SecuritiesAll HTM debt securities were issued, guaranteed, or supported by the U.S. government or government-sponsored enterprises. Accordingly, the Company applied a zero credit loss assumption for these securities and no allowance for credit loss was recorded as of both JuneÂ 30, 2024 and DecemberÂ 31, 2023. For additional information on AFS and HTM securities, see Note 1 â€” Summary of Significant Accounting Policies to the Consolidated Financial Statements in the Companyâ€™s 2023 Form 10-K and Note 3 â€” Fair Value Measurement and Fair Value of Financial Instruments and Note 5 â€” Securities to the Consolidated Financial Statements in this Form 10-Q.Loan PortfolioThe Company offers a broad range of financial products designed to meet the credit needs of its borrowers. Accordingly, the Company offers a wide variety of deposit products to meet the needs of its consumer and commercial customers. As a result, we believe our deposit base is seasoned, stable and well-diversified. Total deposits were $60.0 billion as of JuneÂ 30, 2024, an increase of $3.9 billion or 7% from $56.1 billion as of DecemberÂ 31, 2023. The increase in deposits was primarily driven by a shift in the deposit mix to time deposits and continued customer migration to higher yielding deposit products. Time deposits comprised 36% and 32% of total deposits as of JuneÂ 30, 2024 and DecemberÂ 31, 2023, respectively. Noninterest-bearing demand deposits comprised 25% and 28% of total deposits as of JuneÂ 30, 2024 and DecemberÂ 31, 2023, respectively. Uninsured deposits represent the portion of deposit accounts in U.S. offices that exceed the FDIC insurance limit. Management believes that presenting uninsured domestic deposits as reported on Schedule RC-OM item 2 of the Bankâ€™s Call Report, with an adjustment to exclude collateralized and affiliate deposits provides a more accurate view of the deposits at risk, given that collateralized deposits are secured, and affiliate deposits are not customer-facing and are eliminated in consolidation. The following table summarizes the Companyâ€™s uninsured domestic deposit balances reported on Schedule RC-OM item 2 of the Bankâ€™s Call Report as of JuneÂ 30, 2024 and DecemberÂ 31, 2023, after certain adjustments:($ in thousands)June 30, 2024December 31, 2023Uninsured deposits, per regulatory reporting requirements$30,205,323Â $27,592,714Â Less: Collateralized deposits(5,435,260)(4,631,047)Affiliate deposits(369,150)(491,992)Uninsured deposits, excluding collateralized and affiliate deposits(a)$24,400,913Â $22,469,675Â Total domestic deposits per Call Report(b)$57,072,611Â $53,486,990Â Uninsured deposits, excluding collateralized and affiliate deposits, ratio(a) / (b)43Â %42Â %87Additional information regarding the impact of deposits on net interest income, with a comparison of average deposit balances and rates, is provided in Item 2. MD&A â€” Liquidity Risk Management â€” Liquidity in this Form 10-Q.Other Sources of FundingThe Company had $4.5 billion of BTFP borrowings outstanding as of DecemberÂ 31, 2023. These borrowings were repaid upon maturity during the first quarter of 2024.The Company had $3.5 billion of FHLB advances as of JuneÂ 30, 2024, compared with no FHLB advances as of DecemberÂ 31, 2023. FHLB advances as of JuneÂ 30, 2024 had floating interest rates of 5.51% to 5.58% with remaining maturities between three months and 1.2 years.The Company uses long-term debt to provide funding to acquire interest-earning assets, and to enhance liquidity and regulatory capital adequacy. Long-term debt consists of junior subordinated debt, which qualifies as Tier 2 capital for regulatory capital purposes. During the first quarter of 2024, the Company redeemed approximately $117 million of junior subordinated debt. Refer to Note 10 â€” Short-Term Borrowings and Long-Term Debt to the Consolidated Financial Statements in this Form 10-Q for additional information on the junior subordinated debt.Regulatory Capital and RatiosThe federal banking agencies have risk-based capital adequacy requirements intended to ensure that banking organizations maintain capital that is commensurate with the degree of risk associated with their operations. The Company and the Bank are each subject to these regulatory capital adequacy requirements. See Item 1. Business â€” Supervision and Regulation â€” Regulatory Capital Requirements and Regulatory Capital-Related Development in the Companyâ€™s 2023 Form 10-K for additional details.The Company adopted ASU 2016-13 on January 1, 2020, which requires the measurement of the allowance for credit losses to be based on managementâ€™s best estimate of lifetime expected credit losses inherent in the Companyâ€™s relevant financial assets. The Company has elected the phase-in option provided by a final rule that delays an estimate of the current expected credit losses (â€œCECLâ€) effect on regulatory capital for two years and phases in the impact over three years. The rule permits certain banking organizations to exclude from regulatory capital the initial adoption impact of CECL, plus 25% of the cumulative changes in the allowance for credit losses under CECL for each period until December 31, 2021, followed by a three-year phase-out period in which the aggregate benefit is reduced by 25% in 2022, 50% in 2023 and 75% in 2024. Accordingly, our capital ratios as of JuneÂ 30, 2024 reflect a delay of 25% of the estimated impact of CECL on regulatory capital. The following table presents the Companyâ€™s and the Bankâ€™s capital ratios as of JuneÂ 30, 2024 and DecemberÂ 31, 2023 under the Basel III Capital Rules, and those required by regulatory agencies for capital adequacy and well-capitalized classification purposes:Basel III Capital RulesJune 30, 2024December 31, 2023CompanyBankCompanyBankMinimum Regulatory RequirementsMinimum Regulatory Requirements including Capital Conservation BufferWell-Capitalized RequirementsRisk-based capital ratios:Common Equity Tier 1 capital (1)13.7Â %13.1Â %13.3Â %12.6Â %4.5Â %7.0Â %6.5Â %Tier 1 capital (2)13.7Â %13.1Â %13.3Â %12.6Â %6.0Â %8.5Â %8.0Â %Total capital15.1Â %14.3Â %14.8Â %13.8Â %8.0Â %10.5Â %10.0Â %Tier 1 leverage (1)10.4Â %9.9Â %10.2Â %9.6Â %4.0Â %4.0Â %5.0Â %(1)The Common Equity Tier 1 capital and Tier 1 leverage well-capitalized requirements apply to the Bank only. (2)The well-capitalized Tier 1 capital ratio requirements for the Company and the Bank are 6.0% and 8.0%, respectively.88The Company is committed to maintaining strong capital levels to assure its investors, customers and regulators that the Company and the Bank are financially sound. As of both JuneÂ 30, 2024 and DecemberÂ 31, 2023, the Company and the Bank continued to exceed all â€œwell-capitalizedâ€ capital requirements and the minimum capital requirements under the Basel III Capital Rules. Total risk-weighted assets were $54.0 billion as of JuneÂ 30, 2024, an increase of $304 million from $53.7 billion as of DecemberÂ 31, 2023. The increase in the risk-weighted assets was mainly due to growth in loans.Risk ManagementOverviewIn the normal course of business, the Company is exposed to a variety of risks, some of which are inherent to the financial services industry and others of which are more specific to the Companyâ€™s business. The Company operates under a Board-approved enterprise risk management (â€œERMâ€) framework, which outlines the company-wide approach to risk management and oversight, and describes the structures and practices employed to manage the current and emerging risks inherent to the Company. The Companyâ€™s ERM program incorporates risk management throughout the organization in identifying, managing, monitoring, and reporting risks. It identifies the Companyâ€™s major risk categories as: credit, liquidity, capital, market, operational, compliance, legal, strategic, technology and reputational.The Risk Oversight Committee (â€œROCâ€) of the Board of Directors monitors the ERM program through such identified risk categories and provides oversight of the Companyâ€™s risk appetite and control environment. The ROC provides focused oversight of the Companyâ€™s identified enterprise risk categories on behalf of the full Board of Directors. Under the authority of the ROC, management committees apply targeted strategies to manage the risks to which the Companyâ€™s operations are exposed.The Companyâ€™s ERM program is executed along the three lines of defense model, which provides for a consistent and standardized risk management control environment across the enterprise. The first line of defense is comprised of production, operational and support units. The second line of defense is comprised of various risk management and control functions charged with monitoring and managing major risk categories and/or risk subcategories. The third line of defense is comprised of the Internal Audit and Independent Asset Review (â€œIARâ€) functions. Internal Audit reports to the Chief Audit Executive (â€œCAEâ€) who reports to the Boardâ€™s Audit Committee. Internal Audit provides assurance and evaluates the effectiveness of risk management, control, and governance processes as established by the Company. IAR serves as an internal loan review and independent credit risk monitoring function within the Bank that works under the direction of the CAE and reports to the Audit Committee. IAR provides management and the Audit Committee with an objective and independent assessment of the Bankâ€™s credit profile and credit risk management processes. Further discussion and analysis of selected primary risk areas are discussed in the following subsections of Risk Management.Credit Risk ManagementCredit risk is the risk that a borrower or a counterparty will fail to perform according to the terms and conditions of a loan or investment and expose the Company to loss. Credit risk exists with many of the Companyâ€™s assets and exposures such as loans, debt securities and certain derivatives. The majority of the Companyâ€™s credit risk is associated with lending activities.The ROC has primary oversight responsibility for the identified enterprise risk categories including credit risk. The ROC monitors managementâ€™s assessment of asset quality, credit risk trends, credit quality administration, underwriting standards, and portfolio credit risk management strategies and processes, such as diversification and liquidity, all of which enable management to control credit risk. At the management level, the Credit Risk Management Committee has primary oversight responsibility for credit risk. The Senior Credit Supervision function manages credit policy for the line of business transactional credit risk, assuring that all exposure is risk-rated according to the requirements of the credit risk rating policy. The Senior Credit Supervision function also evaluates and reports the overall credit risk exposure to senior management and the ROC. Reporting directly to the Boardâ€™s Audit Committee, the IAR function provides additional validation of the Companyâ€™s robust credit risk management culture by performing an independent and objective assessment of underwriting and documentation quality. A key focus of our credit risk management is adherence to a well-controlled underwriting and loan monitoring process.The Company assesses the overall performance and credit quality of the

loans held-for-investment portfolio through an integrated analysis of specific performance ratios. This approach forms the basis of the discussion in the sections immediately following: Credit Quality, Nonperforming Assets and Allowance for Credit Losses.89Credit QualityThe Company utilizes a credit risk rating system to assist in monitoring credit quality. Loans are evaluated using the Companyâ€™s internal credit risk rating of 1 through 10. For more information on the Companyâ€™s credit quality indicators and internal credit risk ratings, refer to Note 7 â€“ Loans Receivable and Allowance for Credit Losses to the Consolidated Financial Statements in this Form 10-Q.The following table presents the Companyâ€™s criticized loans as of JuneÂ 30, 2024 and DecemberÂ 31, 2023:Change($ in thousands)June 30, 2024December 31, 2023$%Criticized loans:Special mention loans$435,679Â $404,241Â $31,438Â 8Â %Classified loans (1)644,564Â 573,969Â 70,595Â 12Â %Total criticized loans (2)$1,080,243Â $978,210Â $102,033Â 10Â %Special mention loans to loans held-for-investment0.83Â %0.77Â %Classified loans to loans held-for-investment1.22Â %1.10Â %Criticized loans to loans held-for-investment2.05Â %1.87Â %(1)Consists of substandard, doubtful and loss categories.(2)Excludes loans held-for-sale.Criticized loans were $1.1 billion as of JuneÂ 30, 2024, an increase of $102 million or 10%, compared with $978 million as of December 31, 2023. The increase was primarily driven by higher criticized CRE loans, partially offset by lower criticized C&I and multifamily residential loans.Nonperforming AssetsNonperforming assets are comprised of nonaccrual loans, other real estate owned (â€œOREOâ€) and other nonperforming assets. Other nonperforming assets and OREO are repossessed assets and properties, respectively, acquired through foreclosure, or through full or partial satisfaction of loans held-for-investment. Nonperforming assets were $196 million or 0.27% of total assets as of JuneÂ 30, 2024, an increase of $82 million or 72%, compared with $114 million or 0.16% of total assets as of DecemberÂ 31, 2023.90The following table presents nonperforming assets information as of JuneÂ 30, 2024 and DecemberÂ 31, 2023:Change($ in thousands)June 30, 2024December 31, 2023$%Commercial:C&I$66,960Â $37,036Â $29,924Â 81Â %CRE:CRE31,280Â 23,249Â 8,031Â 35Â %Multifamily residential4,607Â 4,669Â (62)(1)%Construction and land11,316Â â€”Â 11,316Â 100Â %Total CRE47,203Â 27,918Â 19,285Â 69Â %Consumer:Residential mortgage:Single-family residential38,284Â 24,377Â 13,907Â 57Â %HELOCs13,230Â 13,411Â (181)(1)%Total residential mortgage51,514Â 37,788Â 13,726Â 36Â %Other consumer205Â 132Â 73Â 55Â %Total nonaccrual loans165,882Â 102,874Â 63,008Â 61Â %OREO, net30,400Â 11,141Â 19,259Â 173Â %Total nonperforming assets$196,282Â $114,015Â $82,267Â 72Â %Nonperforming assets to total assets 0.27Â %0.16Â %Nonaccrual loans to loans held-for-investment0.31Â %0.20Â %Allowance for loan losses to nonaccrual loans412.22Â %650.06Â %Loans are generally placed on nonaccrual status when they become 90 days past due or when the full collection of principal or interest becomes uncertain regardless of the length of past due status. These increases in net charge-offs were primarily driven by higher losses in the C&I and CRE portfolios.Liquidity Risk ManagementLiquidityLiquidity risk arises from the Companyâ€™s inability to meet its customer deposit withdrawals and obligations to other counterparties as they come due, or to obtain adequate funding at a reasonable cost to meet those obligations. Liquidity risk also considers the stability of deposits. The objective of liquidity management is to manage the potential mismatch of asset and liability cash flows. Maintaining an adequate level of liquidity depends on the institutionâ€™s ability to efficiently meet both expected and unexpected cash flow and collateral needs without adversely affecting daily operations or the financial condition of the institution. To achieve this objective, the Company analyzes its liquidity risk, maintains readily available liquid assets, and utilizes diverse funding sources including its stable core deposit base.93The ROC has primary oversight responsibility over liquidity risk management. At the management level, the Companyâ€™s Asset/Liability Committee (â€œALCOâ€) establishes the liquidity guidelines that govern the day-to-day active management of the Companyâ€™s liquidity position by requiring sufficient asset-based liquidity to cover potential funding requirements and avoid over-dependence on volatile, less reliable funding markets. These guidelines are established and monitored for both the Bank and East West on a stand-alone basis to ensure that the Company can serve as a source of strength for its subsidiaries. The ALCO regularly monitors the Companyâ€™s liquidity status and related management processes, and provides regular reports on the Companyâ€™s liquidity position relative to policy limits and guidelines to the Board of Directors. The liquidity management practices have been effective under normal operating and stressed market conditions.The Company also maintains a Contingency Funding Plan that provides an early-warning methodology to detect liquidity problems and provide a timely response. The Contingency Funding Plan describes the procedures, roles and responsibilities, and communication protocols for managing any identified liquidity problem. Management monitors the early-warning indicators defined in the Contingency Funding Plan, which include metrics for measuring the Companyâ€™s internal liquidity status as well as company-specific and market-wide external factors. When early-warning signals are detected, the ALCO is informed, and the problem is evaluated for severity. The ALCO will approve the course of action and appropriate contingency funding sources, if any, that are needed.Liquidity Risk â€“ Liquidity Sources. The Companyâ€™s primary source of funding is from deposits, generated by its banking business, which we believe is a relatively stable and low-cost source of funding. Our loans are funded by deposits, which amounted to $60.0 billion as of JuneÂ 30, 2024, compared with $56.1 billion as of DecemberÂ 31, 2023. The Companyâ€™s loan-to-deposit ratio was 88% as of JuneÂ 30, 2024, compared with 93% as of DecemberÂ 31, 2023.In addition to deposits, the Company has access to various sources of wholesale financing, including borrowing capacity with the FHLB and Federal Reserve Bank of San Francisco (â€œFRBSFâ€), and several master repurchase agreements with major brokerage companies to sustain an adequate liquid asset portfolio, meet daily cash demands and allow management flexibility to execute its business strategy. However, general financial market and economic conditions could impact our access and cost of external funding. Additionally, the Companyâ€™s access to capital markets is affected by the ratings received from various credit rating agencies.Unencumbered loans and/or debt securities were pledged to the FHLB and the FRBSF discount window as collateral. The Company has established operational procedures to enable borrowing against these assets, including regular monitoring of the total pool of loans and debt securities eligible as collateral. Eligibility of collateral is defined in guidelines from the FHLB and FRBSF and is subject to change at their discretion. See Item 2 â€“ MD&A â€“ Balance Sheet Analysis â€“ Deposits and Other Sources of Funding in this Form 10-Q for further details related to the Companyâ€™s funding sources. The Company believes its cash and cash equivalents, and available borrowing capacity described below provide sufficient liquidity above its expected cash needs.The Company maintains its source of liquidity in the form of cash and cash equivalents and borrowing capacity with its eligible loans and debt securities as collateral. The following table presents the Companyâ€™s total cash and cash equivalents and collateralized borrowing capacity as of JuneÂ 30, 2024 and DecemberÂ 31, 2023:Change($ inÂ thousands)June 30, 2024December 31, 2023$%Cash and cash equivalents$4,365,691Â $4,614,984Â $(249,293)(5)%Interest-bearing deposits with banks24,530Â 10,498Â 14,032Â 134Â %Collateralized borrowing capacity:FHLB8,301,613Â 12,373,002Â (4,071,389)(33)%FRBSF12,076,988Â 9,830,769Â 2,246,219Â 23Â %Unpledged available securities5,843,564Â 1,988,526Â 3,855,038Â 194Â %Total$30,612,386Â $28,817,779Â $1,794,607Â 6Â %The Companyâ€™s cash and cash equivalents and collateralized borrowing capacity totaled $30.6 billion as of JuneÂ 30, 2024, compared with $28.8 billion as of DecemberÂ 31, 2023. The increase was primarily related to an increase in available borrowing capacity at the FRBSF due to the repayment of BTFP borrowings, and an increase in unpledged available securities. This increase was partially offset by a decrease in available borrowing capacity at the FHLB, primarily due to the increase in FHLB advances during the first quarter of 2024.94Liquidity Risk â€“ Cash Requirements. In the ordinary course of business, the Company enters contractual obligations that require future cash payments, including funding for customer deposit withdrawals, repayments for short- and long-term borrowings, and other cash commitments. For additional information on these obligations, see Note 9 â€“ Deposits to the Consolidated Financial Statements in the Companyâ€™s 2023 Form 10-K, and Note 8 â€“ Affordable Housing Partnership, Tax Credit and Community Reinvestment Act Investments, Net and Note 10 â€“ Short-Term Borrowings and Long-Term Debt to the Consolidated Financial Statements in this Form 10-Q.The Company also has off-balance sheet arrangements which represent transactions that are not recorded on the Consolidated Balance Sheet. The Companyâ€™s off-balance sheet arrangements include (1) commitments to extend credit, such as loan commitments, commercial letters of credit for foreign and domestic trade, standby letters of credit (â€œSBLCsâ€), and financial guarantees, to meet the financing needs of its customers, (2) future interest obligations related to customer deposits and the Companyâ€™s borrowings, and (3) transactions with unconsolidated entities that provide financing, liquidity, market risk or credit risk support to the Company, or engage in leasing, hedging or research and development services with the Company. Because many of these commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future funding requirements. The Company does not expect the total commitment amounts as of JuneÂ 30, 2024 to have a material current or future impact on the Companyâ€™s financial conditions or results of operations. Information about the Companyâ€™s loan commitments, commercial letters of credit and SBLCs is provided in Note 11 â€“ Commitments and Contingencies to the Consolidated Financial Statements in this Form 10-Q.The Consolidated Statement of Cash Flows summarizes the Companyâ€™s sources and uses of cash by type of activity for the six months ended JuneÂ 30, 2024 and 2023. Excess cash generated by operating and investing activities may be used to repay outstanding debt or invest in liquid assets.Liquidity Risk â€“ Liquidity for East West. In addition to bank level liquidity management, the Company manages liquidity at the parent company level for various operating needs including payment of dividends, repurchases of common stock, principal and interest payments on its borrowings, acquisitions and additional investments in its subsidiaries. East Westâ€™s primary source of liquidity is from cash dividends distributed by its subsidiary, East West Bank. The Bank is subject to various statutory and regulatory restrictions on its ability to pay dividends as discussed in Item 1. Business â€“ Supervision and Regulation â€“ Dividends and Other Transfers of Funds in the Companyâ€™s 2023 Form 10-K. East West held $303 million and $446 million in cash and cash equivalents as of JuneÂ 30, 2024 and DecemberÂ 31, 2023, respectively. Management believes that East West has sufficient cash and cash equivalents to meet the projected cash obligations for the coming year.Liquidity Risk â€“ Liquidity Stress Testing. The Company utilizes liquidity stress analysis to determine the appropriate amounts of liquidity to maintain at the Company, foreign subsidiary and foreign branch to meet contractual and contingent cash outflows under a range of scenarios. Scenario analyses include assumptions about significant changes in key funding sources, market triggers, potential uses of funding and economic conditions in certain countries. In addition, Company specific events are incorporated into the stress testing. Liquidity stress tests are conducted to ascertain potential mismatches between liquidity sources and uses over various time horizons and under a variety of stressed conditions. Given the range of potential stresses, the Company maintains contingency funding plans on a consolidated basis and for individual entities. As of JuneÂ 30, 2024, the Company believes it has adequate liquidity resources to conduct operations and meet other needs in the ordinary course of business, and is not aware of any events that are reasonably likely to have a material adverse effect on its liquidity, capital resources or operations. Given the changing market and economic conditions, the Company will continue to actively evaluate the impact on its business and financial position. For more details on how economic conditions may impact our liquidity, see Item 1A. Risk Factors in the Companyâ€™s 2023 Form 10-K.Market Risk ManagementMarket risk refers to the risk of potential loss due to adverse movements in market risk factors, including interest rates, foreign exchange rates, commodity prices, and credit spreads. The Company is primarily exposed to interest rate risk through its core business activities of extending loans and acquiring deposits. There have been no significant changes in our risk management practices as described in Item 7. MD&A â€“ Market Risk Management in the Companyâ€™s 2023 Form 10-K.95Interest Rate Risk ManagementInterest rate risk is the risk that market fluctuations in interest rates can have a negative impact on the Companyâ€™s earnings and capital stemming from mismatches in the Companyâ€™s asset and liability cash flows primarily arising from customer-related activities such as lending and deposit-taking. The Company is subject to interest rate risk because:â€¢Assets and liabilities may mature or reprice at different times. If assets reprice faster than liabilities and interest rates are generally rising, earnings will initially increase;â€¢Assets and liabilities may reprice at the same time but by different amounts;â€¢Short- and long-term market interest rates may change by different amounts. For example, the shape of the yield curve may affect the yield of new loans and funding costs differently;â€¢The remaining maturity of various assets or liabilities may shorten or lengthen as interest rates change. For example, if long-term mortgage interest rates increase sharply, mortgage-related products may pay down at a slower rate than anticipated, which could impact portfolio income and valuation; orâ€¢Interest rates may have a direct or indirect effect on loan demand, collateral values, mortgage origination volume, and the fair value of other financial instruments.The ALCO coordinates the overall management of the Companyâ€™s interest rate risk, meets regularly to review the Companyâ€™s open market positions and establishes policies to monitor and limit exposure to market risk. Interest rate risk management is carried out primarily through strategies involving the Companyâ€™s loan portfolio, debt securities portfolio, available funding channels and capital market activities. In addition, the Companyâ€™s policies permit the use of derivative instruments to assist in managing interest rate risk.We measure and monitor interest rate risk exposure through various risk management tools, which include a simulation model that performs interest rate sensitivity analyses under multiple interest rate scenarios against a baseline. The simulation model incorporates the marketâ€™s forward rate expectations and the Companyâ€™s earning assets and liabilities. The Company uses both a static balance sheet and a forward growth balance sheet to perform the interest rate sensitivity analyses. The simulated interest rate scenarios include an instantaneous non-parallel shift in the yield curve and a gradual non-parallel shift in the yield curve (â€œrate rampâ€). In addition, the Company also performs simulations using other alternative interest rate scenarios, including various permutations of the yield curve flattening, steepening or inverting. The Company uses the results of these simulations to formulate and gauge strategies to achieve a desired risk profile within its capital and liquidity guidelines.The net interest income simulation model is based on the maturity and repricing characteristics of the Companyâ€™s interest rate sensitive assets, liabilities, and related derivative contracts. This model also incorporates various assumptions, which management believes to be reasonable but that may have a significant impact on the results. These

key assumptions include the timing and magnitude of changes in interest rates, the yield curve evolution and shape, the correlation between various interest rate indices, financial instrumentsâ€™ future repricing characteristics and spread relative to benchmark rates, and the effect of interest rate floors and caps. The modeled results are highly sensitive to deposit decay and deposit beta assumptions, which we derive from a regression analysis of the Companyâ€™s historical deposit data.Simulation results are highly dependent on modeled behaviors and input assumptions. To the extent that actual behaviors are different from the assumptions used in the models, there could be material changes to the interest rate sensitivity results. The key behavioral models impacting interest rate sensitivity simulations include deposit repricing, deposit balance forecasts, and mortgage prepayments. These models and assumptions are documented, supported, and periodically back-tested to assess the reasonableness and effectiveness. The Company also regularly monitors the sensitivity of the other important modeling assumptions, such as loan and security prepayments and early withdrawal on fixed-rate customer liabilities. The Company makes appropriate calibrations to the model as needed and continually validates the model, methodology and results. Changes to key model assumptions are reviewed by the ALCO. Scenario results do not reflect strategies that the management could employ to limit the impact of changing interest rate expectations. The simulation does not represent a forecast of the Companyâ€™s net interest income but is a tool utilized to assess the risk of the impact of changing market interest rates across a range of interest rate environments.96The Company employs a variety of quantitative and qualitative approaches to capture historical deposit repricing and balance behaviors. These historical observations are performed at a granular level based on key product characteristics, including distinctions for brokered, public, and large commercial deposits, which are then combined with forward-looking market expectations and the competitive landscape to generate the deposit repricing and balance forecasting models. The Company uses these deposit repricing models to forecast deposit interest expense. The repricing models provide sufficient granularity to reflect key behavioral differences across product and customer types. The deposit beta is a key parameter of the deposit rate forecast. The deposit beta defines the sensitivity of deposit rates to changes in the Effective Fed Funds Rate.In June 2024, the Company assumed a weighted-average beta of 52.3% for total deposits, an increase of approximately 1.7% from December 31, 2023, which was due to deposit product mix changes as product level deposit beta assumptions were not updated. The Company updated the deposit mix assumptions in March 2024 to assume that noninterest-bearing deposits would migrate to interest-bearing certificates of deposit (â€œCDsâ€). The updated assumptions reduced the proportion of noninterest-bearing deposits for the base case and decreasing interest rate scenarios, and reduced the repricing speed of the CD portfolio to better reflect its maturity profile. In June 2024, the repricing speed of the CD portfolio was updated to maintain the existing maturity profile due to deposit mix changes from interest rate shocks.As loan and security prepayment assumptions are key components of the Companyâ€™s model, the Company incorporates third-party vendor models to forecast prepayment behavior on mortgage loans and securities, which have mortgage loans as underlying collateral. These third-party vendor models have access to more comprehensive industry-level data which can capture specific borrower and collateral characteristics over a variety of interest rate cycles. The Company will periodically assess and adjust the vendor models when appropriate to include its own available observations and expectations. In 2023, the Company updated its version of the vendor prepayment model to better support the transition from London Interbank Offered Rate to Secured Overnight Financing Rate (â€œSOFRâ€) indexed loans and updated tuning factors to slow prepayment speeds on single-family residential mortgages to better align them with actual and expected prepayments.Twelve-Month Net Interest Income SimulationNet interest income simulation modeling measures interest rate risk through earnings volatility. The simulation projects the cash flow changes in interest rate sensitive assets and liabilities, expressed in terms of net interest income, over a specified time horizon for defined interest rate scenarios. Net interest income simulations provide insight into the impact of market rate changes on earnings, which help guide risk management decisions. The Company assesses interest rate risk by comparing the changes of net interest income in different interest rate scenarios.The following table presents the Companyâ€™s net interest income sensitivity related to an instantaneous and sustained non-parallel shift in market interest rates by 100 and 200 bps as of JuneÂ 30, 2024 and DecemberÂ 31, 2023, on a balance sheet assuming flat forward rates and flat loan and deposit growth on the date of analysis. The non-parallel shift scenarios were calibrated internally based on historical analysis.NetÂ Interest Income Volatility (1)ChangeÂ in Interest Rates (in bps)June 30, 2024December 31, 2023+2000.3Â %1.3Â %+1000.7Â %1.2Â %-100(2.5)%(1.8)%-200(5.1)%(4.1)%(1)The percentage change represents net interest income change over a 12-month period in a stable interest rate environment versus in the various interest rate scenarios.The composition of the Companyâ€™s loan portfolio creates sensitivity to interest rate movements due to a mismatch of repricing behavior between the floating-rate loan portfolio and deposit products. In the table above, net interest income volatility expressed in relation to base-case net interest income decreased for rising rate scenarios and increased for decreasing rate scenarios as of JuneÂ 30, 2024. This change reflects deposit product mix assumptions, which assume noninterest-bearing deposits decrease in higher interest rate environments and are replaced with term deposit products.The Company also models scenarios based on gradual shifts in interest rates and assesses the corresponding impacts. These interest rate scenarios provide additional information to estimate the Companyâ€™s underlying interest rate risk. The rate ramp table below shows the net interest income volatility under a gradual non-parallel shift of the yield curve, in even monthly increments over the first 12 months, followed by rates held constant thereafter based on a flat balance sheet as of the date of the analysis. 97Net Interest Income VolatilityChangeÂ in Interest Rates (in bps)June 30, 2024December 31, 2023+200 Rate Ramp1.8Â %0.8Â %+100 Rate Ramp1.0Â %0.5Â %-100 Rate Ramp(1.5)%(0.6)%-200 Rate Ramp(3.2)%(1.3)%As of JuneÂ 30, 2024, the Companyâ€™s net interest income profile reflects an asset sensitive position, where assets reprice faster or more significantly than liabilities. Net interest income is expected to increase when interest rates rise as the Company has a large population of variable rate loans, primarily tied to Prime and Term SOFR indices. The Companyâ€™s interest income is sensitive to changes in short-term interest rates. As of JuneÂ 30, 2024, the Company designated interest rate contracts with a notional amount of $5.3 billion as cash flow hedges, which reduced net interest income volatility by approximately 1.5% of the base net interest income for every 100 bps change in interest rate.A majority of the Companyâ€™s deposit portfolio is composed of non-maturity deposits, which are not directly tied to short-term interest rate indices, but are, nevertheless, sensitive to changes in short-term interest rates. The modeled results are highly sensitive to modeled behavior and assumptions. Actual net interest income results may deviate from the modelâ€™s net interest income due to earning asset growth variation and deposit mix changes based on customer preferences relative to the interest rate environment. During a period of declining interest rates, balance sheet growth could offset headwinds to net interest income from yield compression.Economic Value of Equity at RiskEconomic value of equity (â€œEVEâ€) is a cash flow calculation that takes the present value of all asset cash flows and subtracts the present value of all liability cash flows. This calculation is used for asset/liability management and measures changes in the economic value of the bankâ€™s assets and liabilities due to changes in interest rates. The economic value approach provides a comparatively broader scope than the net interest income volatility approach since it represents the discounted present value of cash flows over the expected life of the instruments. Due to this longer horizon, EVE is useful to identify risks arising from repricing, prepayment and maturity gaps between assets and liabilities on the balance sheet, as well as from off-balance sheet derivative exposures, over their lifetime. This long-term economic perspective into the Companyâ€™s interest rate risk profile allows the Company to identify anticipated negative effects of interest rate fluctuations. However, the difference in time horizons can cause the EVE analysis to diverge from the shorter-term net interest income analysis presented above. Given the uncertainty of the magnitude, timing and direction of future interest rate movements, the shape of the yield curve, and potential changes to the balance sheet, actual results may vary from those predicted by the Companyâ€™s model.The following table presents the Companyâ€™s EVE sensitivity related to an instantaneous non-parallel shift in market interest rates by 100 and 200 bps as of JuneÂ 30, 2024 and DecemberÂ 31, 2023. The non-parallel shift scenarios were calibrated internally based on historical analysis.EVE Volatility (1)ChangeÂ in Interest Rates (in bps)June 30, 2024December 31, 2023+200 (11.1)%(10.3)%+100(5.3)%(5.4)%-1002.8Â %3.0Â %-2005.8Â %6.0Â %(1)The percentage change represents net portfolio value change of the Company in a stable interest rate environment versus in the various interest rate scenarios.As of JuneÂ 30, 2024, the Companyâ€™s EVE is expected to decrease when interest rates rise. The change in EVE sensitivity was due to changes in the structure of the balance sheet as well as changes in the underlying valuations and durations of assets and liabilities.98DerivativesIt is the Companyâ€™s policy not to speculate on the future direction of interest rates, foreign currency exchange rates and commodity prices. However, the Company periodically enters into derivative transactions in order to manage its exposure to market risk, primarily interest rate risk and foreign currency risk. The Company believes these derivative transactions, when properly structured and managed, provide a hedge against inherent risk in certain assets and liabilities or against risk in specific transactions. Hedging transactions may be implemented using a variety of derivative instruments such as swaps, forwards, options, and collars. The Company uses interest rate swaps to hedge the variability in interest received on certain floating-rate commercial loans and interest paid on certain floating-rate borrowings. Foreign exchange derivatives are used in net investment hedging strategies to mitigate the risk of changes in the U.S. dollar equivalent value of a designated monetary amount of the Companyâ€™s net investment in East West Bank (China) Limited. Prior to entering any hedge accounting activity, the Company analyzes the costs and benefits of the hedge in comparison to alternative strategies. The Company also repositions its hedging derivatives portfolio based on the current assessment of economic and financial conditions, including the interest rate and foreign currency environments, balance sheet composition and trends, and the relative mix of its cash and derivative positions.In addition, the Company enters into derivative transactions in order to accommodate its customers with their business needs or to assist customers with their risk management objectives, such as managing exposure to fluctuations in interest rates, foreign currencies and commodity prices. To economically hedge against the derivative contracts entered into with the Companyâ€™s customers, the Company enters into offsetting derivative contracts with third-party financial institutions, some of which are cleared through central clearing organizations. The exposures from derivative transactions are collateralized by cash and/or eligible securities based on limits as set forth in the respective agreements between the Company and counterparty financial institutions. The fair value changes of the derivative contracts traded with third-party financial institutions are expected to be largely comparable to the fair value changes of the derivative transactions executed with customers throughout the terms of these contracts, except for the credit valuation adjustment component in the contracts and the spread variances between the customer derivatives and the offsetting financial counterparty positions. The Company also utilizes foreign exchange contracts that are not designated as hedging instruments to mitigate the economic effect of fluctuations in certain foreign currency on-balance sheet assets and liabilities, primarily foreign currency denominated deposits offered to its customers.The Company is subject to credit risk associated with the counterparties to the derivative contracts. This counterparty credit risk is a multi-dimensional form of risk, affected by both the exposure and credit quality of the counterparty, both of which are sensitive to market-induced changes. The Companyâ€™s Credit Risk Management Committee provides oversight of credit risk, and the Company has guidelines in place to manage counterparty concentration, tenor limits, and collateral. The Company manages the credit risk of its derivative positions by diversifying its positions among various counterparties, by entering into legally enforceable master netting agreements, and by requiring collateral arrangements, where possible. The Company may also transfer counterparty credit risk related to interest rate swaps to third-party financial institutions through the use of credit risk participation agreements. Certain derivative contracts are required to be cleared through central clearinghouses, to further mitigate counterparty credit risk, where variation margin is applied daily as settlement to the fair value of the derivative contracts. In addition, the Company incorporates credit value adjustments and other market standard methodologies to appropriately reflect the counterpartyâ€™s and the Companyâ€™s own nonperformance risk in the fair value measurement of its derivatives. As of JuneÂ 30, 2024, the Company anticipates performance by its counterparties and has not incurred any related credit losses.99The following table summarizes certain information on derivative instruments designated as accounting hedges and utilized by the Company in its management of interest rate and foreign currency risks as of JuneÂ 30, 2024 and DecemberÂ 31, 2023:June 30, 2024December 31, 2023($ in thousands)Interest Rate Contracts Hedging Loans (1)(2)(3)Interest Rate Contracts Hedging Loans (1)(2)(3)Cash flow hedgesNotional amount$4,000,000Â $4,000,000Â Weighted-average:Receive rate4.95Â %4.95Â %Pay rate7.31Â %7.32Â %Remaining term (in months)29.8Â 35.8Â ($ in thousands)Foreign Exchange ContractsForeign Exchange ContractsNet investment hedgesNotional amount$â€”Â $81,480Hedged percentage (4)â€”Â %44Â %Remaining term (in months)â€”Â 2.7Â (1)Represents receive-fixed/pay-floating interest rate swaps and excludes interest rate collars. Certain of these policies include critical accounting estimates, which are subject to valuation assumptions, subjective or complex judgments about matters that are inherently uncertain, and it is likely that materially different amounts could be reported under different assumptions and conditions. The Company has procedures and processes in place to facilitate making these judgments. The following accounting policies are critical to the Companyâ€™s Consolidated Financial Statements:â€¢allowance for credit losses;â€¢fair value estimates;â€¢goodwill impairment; andâ€¢income taxes.For additional information on the Companyâ€™s critical accounting estimates involving significant judgments, see Item 7. Non-GAAP financial measures are not prepared in accordance with, or as an alternative to U.S. GAAP. Generally, a non-GAAP financial measure is a numerical measure of a companyâ€™s performance that either excludes or includes amounts, or is subject to adjustments that have such an effect, that are not normally excluded or included in the most directly comparable financial measure that is calculated and presented in accordance with U.S. GAAP. The non-GAAP financial measures discussed in this Form 10-Q are adjusted diluted EPS, return on average TCE, adjusted efficiency ratio, and tangible book value per share. Certain additional non-GAAP financial measures that are components of the foregoing non-GAAP financial measures are also set forth and reconciled in the table below. The Company believes these non-GAAP financial measures, when taken together with the corresponding U.S. GAAP financial measures, provide meaningful supplemental information regarding its performance, and allow comparability to prior periods. These non-GAAP financial measures may be different from non-GAAP financial measures used by other companies, limiting their usefulness for comparison purposes.The following tables present the reconciliations of U.S. GAAP to non-GAAP financial measures for the periods presented:Three Months Ended June 30,Six Months Ended June 30, ($ and shares inÂ thousands,Â exceptÂ perÂ shareÂ data)20242023202420232023Net income(a)$288,230Â $312,031Â $573,305Â $634,470Â Add: FDIC charge (1)1,880Â â€”Â 12,185Â â€”Â Â Write-off of AFS debt security (2)â€”Â Â â€”Â Â â€”Â 10,000Â Tax effect of adjustment (3)(556)â€”Â (3,602)(2,929)Adjusted net income (non-GAAP)(b)$289,554Â $312,031Â $581,888Â $641,541Â Diluted weighted-average number of shares outstanding(c)139,801Â 141,876Â 140,047Â 141,910Â Diluted EPS(a)/(c)2.06Â 2.20Â 4.09Â 4.47Â Add: FDIC charge (1)0.01Â â€”Â 0.06Â â€”Â Â Write-off of AFS debt security (2)â€”Â Â â€”Â Â â€”Â 0.05Â Adjusted diluted EPS (non-GAAP)(b)/(c)$2.07Â $2.20Â $4.15Â $4.52Â Three Months Ended June 30,Six Months Ended June 30, ($ in thousands)20242023202420232023Net income(a)$288,230Â $312,031Â $573,305Â $634,470Â Add: Amortization of core deposit intangiblesâ€”Â 440Â â€”Â 881Â Â Â Amortization of mortgage servicing assets332Â 342Â 640Â 698Â Tax effect of amortization adjustments (3)(98)(230)(189)(463)Tangible net income (non-GAAP)(b)$288,464Â $312,583Â $573,756Â $635,586Â Average stockholdersâ€™ equity(c)$7,087,500Â $6,440,996Â $7,040,029Â $6,312,872Â Less: Average goodwill(465,697)(465,697)(465,697)(465,697)Â Â Average other intangible assets (4) (6,110) (6,921)(6,292)(7,306)Average tangible book value (non-GAAP)(d)$6,615,693Â $5,968,378Â $6,568,040Â $5,839,869Â ROE (5)(a)/(c)16.36Â %19.43Â %16.38Â %20.27Â %Return on average TCE (5) (non-GAAP)(b)/(d)17.54Â %21.01Â %17.57Â %21.95Â %101Three Months Ended June 30,Six Months Ended June 30, ($ in thousands)20242023202420232023Net interest income before provision for credit losses(a)$553,229Â $566,746Â $1,118,368Â $1,166,607Â Total noninterest income84,673Â 78,631Â 163,661Â 138,609Â Total revenue(b)$637,902Â $645,377Â $1,282,029Â $1,305,216Â Noninterest income84,673Â 78,631Â 163,661Â 138,609Â Add: Write-off of AFS debt security (2)â€”Â Â â€”Â Â â€”Â 10,000Â Adjusted noninterest income (non-GAAP)(c)84,673Â 78,631Â 163,661Â 148,609Â Adjusted revenue (non-GAAP)(a)+(c)=(d)$637,902Â $645,377Â $1,282,029Â $1,315,216Â Total noninterest expense (e)$236,434Â $261,789Â $483,309Â $480,236Â Less: Amortization of tax credit and CRA investments(16,052)(55,914)(29,259)(66,024)Â Amortization of core deposit intangiblesâ€”Â (440)â€”Â (881)Â FDIC charge (1)(1,880)â€”Â (12,185)â€”Â Â Repurchase agreementsâ€™ extinguishment cost (6)â€”Â Â â€”Â Â â€”Â (3,872)Adjusted noninterest expense (non-GAAP)(f)$218,502Â $205,435Â $441,865Â $409,459Â Efficiency ratio(e)/(b)37.06Â %40.56Â %37.70Â %36.79Â %Adjusted efficiency ratio (non-GAAP)

Basis of Presentation

Basis of Presentation

East West Bancorp, Inc. is a registered bank holding company that offers a full range of banking services to individuals and businesses through its subsidiary bank, East West Bank and its subsidiaries ("East West Bank" or the "Bank"). The unaudited interim Consolidated Financial Statements in this Quarterly Report on Form 10-Q (this "Form 10-Q") include the accounts of East West, East West Bank and East West's subsidiaries. Intercompany transactions and accounts have been eliminated in consolidation. As of June 30, 2024, East West also has one wholly-owned subsidiary that is a statutory business trust (the "Trust"). In accordance with Financial Accounting Standards Board Accounting Standards Codification ("ASC") Topic 810, *Consolidation*, the Trust is not included on the Consolidated Financial Statements.

The unaudited interim Consolidated Financial Statements are presented in accordance with U.S. Generally Accepted Accounting Principles ("GAAP"), applicable guidelines prescribed by regulatory authorities and general practices in the banking industry. While the unaudited interim Consolidated Financial Statements reflect all adjustments that, in the opinion of management, are necessary for fair presentation, they primarily serve to update the Company's 2023 Form 10-K, and may not include all the information and notes necessary to constitute a complete set of financial statements. Accordingly, they should be read in conjunction with the audited Consolidated Financial Statements and notes thereto included in the Company's 2023 Form 10-K.

The preparation of the Consolidated Financial Statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the Consolidated Financial Statements, income and expenses during the reporting periods, and the related disclosures. Although our estimates consider current conditions and how we expect them to change in the future, it is reasonably possible that actual results could be materially different from those estimates. Hence, the current period's results of operations are not necessarily indicative of results that may be expected for any future interim period or for the year as a whole. Certain items on the Consolidated Financial Statements and notes for the prior periods have been reclassified to conform to the current presentation. Events subsequent to the Consolidated Balance Sheet date have been evaluated through the date the Consolidated Financial Statements are issued for inclusion in the accompanying Consolidated Financial Statements.

Current Accounting Developments and Summary of Significant Accounting Policies

Current Accounting Developments and Summary of Significant Accounting Policies

Accounting Pronouncements Adopted in 2024

Standard	Required Date of Adoption	Description	Effect on Financial Statements
ASU 2023-02, *Investments — Equity Method and Joint Ventures* (Topic 323): *Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method*	January 1, 2024	ASU 2023-02 expands the scope of the proportional amortization method ("PAM") to equity tax credit investment programs if certain conditions are met. Previously, PAM could only be used for investments in low-income housing tax credit structures. Under this guidance, companies are able to elect, on a tax credit program-by-tax credit program basis, to apply PAM to all equity investments meeting the criteria in ASC 323-740-25-1. The amendments in this guidance must be applied on a modified retrospective or a retrospective basis.	The Company adopted ASU 2023-02 on January 1, 2024, for all tax credit investments under a modified retrospective basis. The impact of the adoption decreased opening retained earnings on January 1, 2024 by $9 million.

The following standards were also adopted on January 1, 2024, but they did not have a material impact on the Company's Consolidated Financial Statements:

- ASU 2023-01, *Leases* (Topic 842): *Common Control Arrangements*
- ASU 2022-03, *Fair Value Measurement* (Topic 820) *Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions*

Significant Accounting Policies Update

Income Taxes — The Company has elected to apply PAM to qualifying affordable housing partnership, new markets, historic, production and renewable energy tax credit investments. Under PAM, the Company amortizes the initial cost of the investment in proportion to the income tax credits and other income tax benefits received, and recognizes the amortization in *Income tax expense* on the Consolidated Statement of Income.

Fair Value Measurement and Fair Value of Financial Instruments	6 Months Ended Jun. 30, 2024
Fair Value Disclosures [Abstract]	

Fair Value Measurement and Fair Value of Financial Instruments

Fair Value Measurement and Fair Value of Financial Instruments

Under applicable accounting standards, the Company measures a portion of its assets and liabilities at fair value. These assets and liabilities are predominantly recorded at fair value on a recurring basis. From time to time, certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, they are subject to fair value adjustments only as required through the application of an accounting method such as lower of cost or fair value or write-down of individual assets. The Company categorizes its assets and liabilities into three levels based on the established fair value hierarchy and conducts a review of fair value hierarchy classifications on a quarterly basis. For more information regarding the fair value hierarchy and how the Company measures fair value, see *Note 1 — Summary of Significant Accounting Policies — Significant Accounting Policies — Fair Value* to the Consolidated Financial Statements in the Company's 2023 Form 10-K.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following section describes the valuation methodologies used by the Company to measure financial assets and liabilities on a recurring basis, as well as the general classification of these instruments within the fair value hierarchy.

Available-for-Sale Debt Securities — The fair value of AFS debt securities is generally determined by independent external pricing service providers who have experience in valuing these securities or by taking the average quoted market prices obtained from independent external brokers. The valuations provided by the third-party pricing service providers are based on observable market inputs, which include benchmark yields, reported trades, issuer spreads, benchmark securities, bids, offers, prepayment expectations and reference data obtained from market research publications. Inputs used by the third-party pricing service providers in valuing collateralized mortgage obligations and other securitization structures also include newly issued data, monthly payment information, whole loan collateral performance, tranche evaluation and "to be announced" prices. In valuing securities issued by state and political subdivisions, inputs used by third-party pricing service providers also include material event notices. The valuations provided by the brokers incorporate information from their trading desks, research and other market data.

On a monthly basis, the Company validates the valuations provided by third-party pricing service providers to ensure that the fair value determination is consistent with the applicable accounting guidance and the financial instruments are properly classified in the fair value hierarchy. To perform this validation, the Company evaluates the fair values of securities by comparing the fair values provided by the third-party pricing service providers to prices from other available independent sources for the same securities. When significant variances in prices are identified, the Company further compares the inputs used by different sources to ascertain the reliability of these sources. On a quarterly basis, the Company reviews the valuation inputs and methodology furnished by third-party pricing service providers for each security category. On an annual basis, the Company assesses the reasonableness of broker pricing by reviewing the related pricing methodologies. This review includes corroborating pricing with market data, performing pricing input reviews under current market-related conditions, and investigating security pricing by instrument as needed.

When a quoted price in an active market exists for the identical security, this price is used to determine the fair value and the AFS debt security is classified as Level 1. Level 1 AFS debt securities consist of U.S. Treasury securities. When pricing is unavailable from third-party pricing service providers for certain securities, the Company requests market quotes from various independent external brokers and utilizes the average quoted market prices. In addition, the Company obtains market quotes from other official published sources. As these valuations are based on observable inputs in the current marketplace, they are classified as Level 2.

Equity Securities — Equity securities consist of mutual funds and Visa Inc. ("Visa") Class C common stock ("Visa C shares"). The Company invested in these mutual funds for CRA purposes. The Company uses net asset value ("NAV") information to determine the fair value of these equity securities. When NAV is available periodically and the equity securities can be put back to the transfer agents at the publicly available NAV, the fair value of the equity securities is classified as Level 1. When NAV is available periodically, but the equity securities may not be readily marketable at its periodic NAV in the secondary market, the fair value of these equity securities is classified as Level 2.

As of December 31, 2023, the Company held Visa Class B common stock ("Visa B shares"), which were subject to certain transfer restrictions and held at cost. On January 24, 2024, Visa filed a Certificate of Amendment and an eighth Restated Certificate of Incorporation that redenominated the Visa B shares to Visa Class B-1 common stock ("Visa B-1 shares"). On April 8, 2024, Visa commenced a public offering to permit the exchange of Visa B-1 shares for a combination of shares of Visa Class B-2 common stock ("Visa B-2 shares") and Visa C shares. In exchange for the Company's 2,266 Visa B-1 shares, the Company received 1,133 Visa B-2 shares and 449 Visa C shares. The Visa B-2 shares remain subject to the same transfer restrictions and will continue to be held at cost. As the Visa C shares are convertible into Visa's publicly traded Class A common stock ("Visa A shares") following a lock-up period, the Company recognized the Visa C shares at fair value of $471 thousand as of June 30, 2024 and recorded a gain of $422 thousand for the three months ended June 30, 2024, based on the closing price of the Visa A shares. As the fair value of the Visa C shares is determined by quoted prices on an active exchange market, the Visa C shares are classified as Level 1.

Interest Rate Contracts — Interest rate contracts consist of interest rate swaps and options. The fair value of the interest rate swaps is determined using the market standard methodology of netting the discounted future fixed cash payments (or receipts) and the discounted expected variable cash receipts (or payments). The fair value of the interest rate options, which consist of floors and caps, is determined using the market standard methodology of discounting the future expected cash receipts that will occur if variable interest rates fall below (rise above) the strike rate of the floors (caps). In addition, to comply with the provisions of ASC 820, *Fair Value Measurement*, the Company incorporates credit valuation adjustments to appropriately reflect both its own and the respective counterparty's nonperformance risk in the fair value measurements of its derivatives. The credit valuation adjustments associated with the Company's derivatives utilize model-derived credit spreads, which are Level 3 inputs. Considering the observable nature of all other significant inputs utilized, the Company classifies these derivative instruments as Level 2.

Foreign Exchange Contracts — The fair value of foreign exchange contracts is determined at each reporting period based on changes in the applicable foreign exchange rates. These are over-the-counter contracts where quoted market prices are not readily available. Valuation is measured using conventional valuation methodologies with observable market data. Due to the short-term nature of the majority of these contracts, the counterparties' credit risks are considered nominal and result in no adjustments to the valuation of the foreign exchange contracts. Due to the observable nature of the inputs used in deriving the fair value of these contracts, the valuation of foreign exchange contracts is classified as Level 2. In addition, the Bank managed its foreign currency exposure in the net investment in its China subsidiary, East West Bank (China) Limited, a non-U.S. dollar ("USD") functional currency subsidiary, with foreign currency non-deliverable forward contracts. These foreign currency non-deliverable forward contracts were designated as net investment hedges. The fair value of foreign currency non-deliverable forward contracts is determined by comparing the contracted foreign exchange rate to the current market foreign exchange rate. Key inputs of the current market exchange rate include the spot and forward rates of the contractual currencies. Foreign exchange forward curves are used to determine which forward rate pertains to a specific maturity. Due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are classified as Level 2.

Credit Contracts — Credit contracts utilized by the Company are comprised of credit risk participation agreements ("RPAs") entered into by the Company with institutional counterparties. The fair value of the RPAs is calculated by determining the total expected asset or liability exposure of the derivatives to the borrowers and applying the borrowers' credit spread to that exposure. Total expected

exposure incorporates both the current and potential future exposure of the derivatives, derived from using observable inputs, such as yield curves and volatilities. Due to the observable nature of all other significant inputs used in deriving the estimated fair value, credit contracts are classified as Level 2.

Equity Contracts — Equity contracts consist of warrants to purchase common or preferred stock of public and private companies, and any liability-classified contingently issuable shares of the Company. The fair value of the warrants is based on the Black-Scholes option pricing model. For warrants from public companies, the model uses the underlying stock price, stated strike price, warrant expiration date, risk-free interest rate based on a duration-matched U.S. Treasury rate, and market-observable company-specific equity volatility as inputs to value the warrants. Due to the observable nature of the inputs used in deriving the estimated fair value, warrants from public companies are classified as Level 2. For warrants from private companies, the model uses inputs such as the offering price observed in the most recent round of funding, stated strike price, warrant expiration date, risk-free interest rate based on duration-matched U.S. Treasury rate and equity volatility. The Company applies proxy volatilities based on the industry sectors of the private companies. The model values are then adjusted for a general lack of liquidity due to the private nature of the underlying companies. Since both equity volatility and liquidity discount assumptions are subject to management's judgment, measurement uncertainty is inherent in the valuation of private company warrants. Due to the unobservable nature of the equity volatility and liquidity discount assumptions used in deriving the estimated fair value, warrants from private companies are classified as Level 3. On a quarterly basis, the changes in the fair value of warrants from private companies are reviewed for reasonableness, and a measurement of uncertainty analysis on the equity volatility and liquidity discount assumptions is performed.

In connection with the Company's acquisition of a 49.99% equity interest in Rayliant Global Advisors Limited ("Rayliant") during the third quarter of 2023, the Company granted 349,138 performance-based restricted stock units ("RSUs") as part of its consideration, in addition to $95 million in cash. The vesting of these equity contracts on September 1, 2028, is contingent on Rayliant meeting certain financial performance targets during the performance period. The fair value of liability-classified equity contracts varies based on the operating revenue and operating EBITDA of Rayliant to be achieved during the future performance period, and these performance-based RSUs are expected to vest into a variable number of the Company's common stock, ranging from 20% to 200% of the target performance-based RSUs granted. Due to the unobservable nature of the input assumptions, these equity contracts are classified as Level 3. For additional information on the equity contracts, refer to *Note 6 — Derivatives* to the Consolidated Financial Statements in this Form 10-Q.

Commodity Contracts — Commodity contracts consist of swaps and options referencing commodity products. The fair value of the commodity option contracts is determined using the Black-Scholes model and assumptions that include expectations of future commodity price and volatility. The future commodity contract price is derived from observable inputs such as the market price of the commodity. Commodity swaps are structured as an exchange of fixed cash flows for floating cash flows. The fair value of the commodity swaps is determined using the market standard methodology of netting the discounted future fixed cash payments (or receipts) and the discounted expected variable cash receipts (or payments) based on the market prices of the commodity. The fixed cash flows are predetermined based on the known volumes and fixed price as specified in the swap agreement. The floating cash flows are correlated with the change of forward commodity prices, which is derived from market corroborated futures settlement prices. As a result, the Company classifies these derivative instruments as Level 2 due to the observable nature of the significant inputs utilized.

The following tables present financial assets and liabilities that are measured at fair value on a recurring basis as of June 30, 2024 and December 31, 2023:

The following table presents quantitative information about the significant unobservable inputs used in the valuation of Level 3 fair value measurements as of June 30, 2024 and December 31, 2023. The significant unobservable inputs presented in the table below are those that the Company considers significant to the fair value of the Level 3 assets. The Company considers unobservable inputs to be significant if, by their exclusion, the fair value of the Level 3 assets would be impacted by a predetermined percentage change.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Assets measured at fair value on a nonrecurring basis include certain individually evaluated loans held-for-investment, affordable housing partnership, tax credit and CRA investments, OREO, loans held-for-sale, and other nonperforming assets. Nonrecurring fair value adjustments result from the impairment on certain individually evaluated loans held-for-investment and affordable housing partnership, tax credit and CRA investments, from the write-downs of OREO and other nonperforming assets, or from the application of lower of cost or fair value on loans held-for-sale.

Individually Evaluated Loans Held-for-Investment — Individually evaluated loans held-for-investment are classified as Level 3 assets. The following two methods are used to derive the fair value of individually evaluated loans held-for-investment:

- Discounted cash flow valuation techniques consist of developing an expected stream of cash flows over the life of the loans, and then calculating the present value of the loans by discounting the expected cash flows at a designated discount rate.
- When the repayment of an individually evaluated loan is dependent on the sale of the collateral, the fair value of the loan is determined based on the fair value of the underlying collateral, which may take the form of real estate, inventory, equipment, contracts or guarantees. The fair value of the underlying collateral is generally based on third-party appraisals, or an internal valuation if a third-party appraisal is not required by regulations, or is unavailable. An internal valuation utilizes one or more valuation techniques such as the income, market and/or cost approaches.

Affordable Housing Partnership, Tax Credit and CRA Investments, Net — The Company conducts due diligence and secures applicable internal and external approval on its affordable housing partnership, tax credit and CRA investments prior to the closing date and initial funding date and through the placed-in-service date. Subsequent to closing, the Company continues its periodic monitoring process to ensure book values are realizable and that there is no significant tax credit recapture risk. This monitoring process includes reviewing the investment entity's financial statements, production reports and annual tax returns, the annual financial statements of the guarantor (if any) and a comparison of the actual performance of the investment against the financial projections prepared at the time the investment was made. The Company assesses its tax credit and other investments for possible other-than-temporary impairment on an annual basis or when events or circumstances suggest that the carrying amount of the investments may not be realizable. These circumstances can include, but are not limited to the following factors:

- expected future cash flows that are less than the carrying amount of the investment;
- changes in the economic, market or technological environment that could adversely affect the investee's operations;
- the potential for tax credit recapture; and
- other factors that raise doubt about the investee's ability to continue as a going concern, such as negative cash flows from operations and the continuing prospects of the underlying operations of the investment.

All available information is considered in assessing whether a decline in value is other-than-temporary. Generally, none of the aforementioned factors are individually conclusive and the relative importance placed on individual facts may vary depending on the situation. In accordance with ASC 323-10-35-32, *Investments — Equity Method and Joint Ventures*, an impairment charge would only be recognized in earnings for a decline in value that is determined to be other-than-temporary.

Other Real Estate Owned — The Company's OREO represents properties acquired through foreclosure, or through full or partial satisfaction of loans held-for-investment such as an acceptance of a deed-in-lieu of foreclosure. These OREO properties are recorded at estimated fair value less the costs to sell at the time of foreclosure or at the lower of cost or estimated fair value less the costs to sell subsequent to acquisition. On a monthly basis, the current fair market value of each OREO property is reviewed to ensure that the current carrying value is appropriate. OREO properties are classified as Level 3.

Loans Held-for-Sale — Loans held-for-investment subsequently transferred to held-for-sale are recorded at the lower of cost or fair value upon transfer. Loans held-for-sale may be measured at fair value on a nonrecurring basis when fair value is less than cost. Fair value is generally determined based on available market data for similar loans and therefore, loans held-for-sale are classified as Level 2.

Other Nonperforming Assets — Other nonperforming assets are recorded at fair value upon transfer from loans to foreclosed assets. Subsequently, foreclosed assets are recorded at the lower of carrying value or fair value. Fair value is based on independent market prices, appraised values of the collateral or management's estimated recovery of the foreclosed asset. The Company records an impairment when the foreclosed asset's fair value declines below its carrying value. The fair value measurement of other nonperforming assets is classified within one of the three levels in a valuation hierarchy based upon the observability of inputs to the valuation as of the measurement date.

The following tables present the carrying amounts of assets that were still held and had fair value adjustments measured on a nonrecurring basis as of June 30, 2024 and December 31, 2023:

RESALE AND REPURCHASE AGREEMENTS [Abstract]

Securities Purchased under Resale Agreements

Securities Purchased under Resale Agreements

The Company's resale agreements expose it to credit risk from both the counterparties and the underlying collateral. The Company manages credit exposure from certain transactions by entering into master netting agreements and collateral arrangements with the counterparties. The relevant agreements allow for an efficient closeout of the transaction, liquidation and set-off of collateral against the net amount owed by the counterparty following a default. It is the Company's policy to take possession, where possible, of the assets underlying resale agreements. As a result of the Company's credit risk mitigation practices with respect to resale agreements as described above, the Company did not hold any reserves for credit impairment with respect to these agreements as of both June 30, 2024 and December 31, 2023.

Securities Purchased under Resale Agreements — Total securities purchased under resale agreements were $485 million and $785 million as of June 30, 2024 and December 31, 2023, respectively. The weighted-average yields were 1.56% and 2.42% for the three months ended June 30, 2024 and 2023, respectively; and 2.66% and 2.46% for the six months ended June 30, 2024 and 2023, respectively.

Balance Sheet Offsetting

The Company's resale and repurchase agreements are transacted under legally enforceable master netting agreements that, in the event of default by the counterparty, provide the Company the right to liquidate securities held and to offset receivables and payables with the same counterparty. The Company nets resale and repurchase transactions with the same counterparty on the Consolidated Balance Sheet when it has a legally enforceable master netting agreement and the transactions are eligible for netting under ASC 210-20-45-11, *Balance Sheet Offsetting Repurchase and Reverse Repurchase Agreements*. Collateral received includes securities and loans that are not recognized on the Consolidated Balance Sheet. Collateral pledged consists of securities that are not netted on the Consolidated Balance Sheet against the related collateralized liability. Securities received or pledged as collateral in resale and repurchase agreements with other financial institutions may also be sold or re-pledged by the secured party, and are usually delivered to and held by the third-party trustees.

The following table presents the resale agreements included on the Consolidated Balance Sheet as of June 30, 2024 and December 31, 2023:

				Gross Amounts Not Offset on the Consolidated Balance Sheet	
($ in thousands)	**Gross Amounts of Recognized Assets**	**Gross Amounts Offset on the Consolidated Balance Sheet**	**Net Amounts of Assets Presented on the Consolidated Balance Sheet**	**Collateral Received (1)**	**Net Amount**
Resale agreements as of June 30, 2024	$ 485,000	$ —	$ 485,000	$ (402,645)	$ 82,355
Resale agreements as of December 31, 2023	$ 785,000	$ —	$ 785,000	$ (715,358)	$ 69,642

(1) Represents the fair value of assets the Company has received under resale agreements, limited for table presentation purposes to the amount of the recognized asset due from each counterparty. The application of collateral cannot reduce the net position below zero. Therefore, excess collateral, if any, is not reflected above.

In addition to the amounts included in the table above, the Company also has balance sheet netting related to derivatives. Refer to *Note 6 — Derivatives* to the Consolidated Financial Statements in this Form 10-Q for additional information.

As of June 30, 2024, the Company had 567 AFS debt securities in a gross unrealized loss position with no credit impairment, primarily consisting of 304 U.S. government agency and U.S. government-sponsored enterprise mortgage-backed securities, 66 corporate debt securities and 91 non-agency mortgage-backed securities. In comparison, as of December 31, 2023, the Company had 547 AFS debt securities in a gross unrealized loss position with no credit impairment, primarily consisting of 255 U.S. government agency and U.S. government-sponsored enterprise mortgage-backed securities, 66 corporate debt securities, and 99 non-agency mortgage-backed securities.

Allowance for Credit Losses on Available-for-Sale Debt Securities

The Company evaluates each AFS debt security where the fair value declines below amortized cost. For a discussion of the factors and criteria the Company uses in analyzing securities for impairment related to credit losses, see *Note 1 — Summary of Significant Accounting Policies — Significant Accounting Policies — Allowance for Credit Losses on Available-for-Sale Debt Securities* to the Consolidated Financial Statements in the Company's 2023 Form 10-K.

The gross unrealized losses presented in the preceding tables were primarily attributable to interest rate movement and the widening of liquidity and/or credit spreads. U.S. Treasury, U.S. government agency, U.S. government-sponsored agency, and U.S. government-sponsored enterprise debt and mortgage-backed securities are issued, guaranteed, or otherwise supported by the U.S. government and have a zero credit loss assumption. The remaining securities that were in an unrealized loss position as of June 30, 2024 were mainly comprised of the following:

- **Corporate debt securities** — The market value decline as of June 30, 2024 was primarily due to interest rate movement and spread widening. A portion of the corporate debt securities is comprised of subordinated debt securities issued by U.S. banks. Despite the reduction of the market value of these securities after the banking sector disruption in 2023, these securities are nearly all rated investment grade by nationally recognized statistical rating organizations ("NRSROs") and issued by well-capitalized financial institutions with strong profitability. The contractual payments from these corporate debt securities have been and are expected to be received on time. The Company will continue to monitor the market developments in the banking sector and the credit performance of these securities.
- **Non-agency mortgage-backed securities** — The market value decline as of June 30, 2024 was primarily due to interest rate movement and spread widening. Since these securities are rated investment grade by NRSROs, or have high priority in the cash flow waterfall within the securitization structure, and the contractual payments have historically been on time, the Company believes the risk of credit losses on these securities is low.

As of both June 30, 2024 and December 31, 2023, the Company intended to hold the AFS debt securities with unrealized losses through the anticipated recovery period and it was more-likely-than-not that the Company would not have to sell these securities before the recovery of their amortized cost. The issuers of these securities have not, to the Company's knowledge, established any cause for default on these securities. As a result, the Company expects to recover the entire amortized cost basis of these securities. Accordingly, there was no allowance for credit losses provided against these securities as of both June 30, 2024 and December 31, 2023. In addition, there was no provision for credit losses recognized for the three and six months ended June 30, 2024 and 2023.

Allowance for Credit Losses on Held-to-Maturity Debt Securities

The Company separately evaluates its HTM debt securities for any credit losses using an expected loss model, similar to the methodology used for loans. For additional information on the Company's credit loss methodology, refer to *Note 1 — Summary of Significant Accounting Policies — Significant Accounting Policies — Allowance for Credit Losses on Held-to-Maturity Debt Securities* to the Consolidated

Financial Statements in the Company's 2023 Form 10-K.

The Company monitors the credit quality of the HTM debt securities using external credit ratings. As of June 30, 2024, all HTM securities were rated investment grade by NRSROs and issued, guaranteed, or supported by U.S. government entities and agencies. Accordingly, the Company applied a zero credit loss assumption and no allowance for credit losses was recorded as of both June 30, 2024 and December 31, 2023. Overall, the Company believes that the credit support levels of the debt securities are strong, and based on current assessments and macroeconomic forecasts, expects that full contractual cash flows will be received.

Derivatives

The Company uses derivative instruments to manage exposure to market risk, primarily interest rate and foreign currency risks, as well as to assist customers with their risk management objectives. The Company's goal is to manage interest rate sensitivity and volatility to mitigate the effect of interest rate changes on earnings or capital. The Company also uses foreign exchange contracts to manage the foreign exchange rate risk associated with certain foreign currency-denominated assets and liabilities, as well as the Bank's investment in East West Bank (China) Limited. The Company recognizes all derivatives on the Consolidated Balance Sheet at fair value. While the Company designates certain derivatives as hedging instruments in a qualifying hedge accounting relationship, other derivatives serve as economic hedges. For additional information on the Company's derivatives and hedging activities, see *Note 1 — Summary of Significant Accounting Policies — Significant Accounting Policies — Derivatives* to the Consolidated Financial Statements of the Company's 2023 Form 10-K.

The following table presents the notional amounts and fair values of the Company's derivatives as of June 30, 2024 and December 31, 2023. Certain derivative contracts are cleared though central clearing organizations where variation margin is applied daily as settlement to the fair values of the contracts. The fair values are presented on a gross basis prior to the application of bilateral collateral and master netting agreements, but after the application of variation margin payments as settlement to fair values of contracts cleared through central clearing organizations. Applying variation margin payments as settlement to the fair values of derivative contracts cleared through the London Clearing House ("LCH") and the Chicago Mercantile Exchange ("CME") resulted in reductions in the derivative asset and liability fair values by $28 million and $37 million, respectively, as of June 30, 2024. In comparison, applying variation margin payments as settlement to LCH- and CME-cleared derivative transactions resulted in reductions in both the derivative asset and liability fair values by $43 million as of December 31, 2023. Total derivative asset and liability fair values are adjusted to reflect the effects of legally enforceable master netting agreements and cash collateral received or paid. The resulting net derivative asset and liability fair values are included in *Other assets* and *Accrued expenses and other liabilities*, respectively,

on the Consolidated Balance Sheet.

Derivatives Designated as Hedging Instruments

Cash Flow Hedges — The Company uses interest rate swaps to hedge the variability in the interest amount received on certain floating-rate commercial loans, or paid on certain floating-rate borrowings due to changes in contractually specified interest rates. As of June 30, 2024, interest rate contracts in notional amounts of $5.3 billion were designated as cash flow hedges to convert certain variable-rate loans from floating-rate payments to fixed-rate payments. Gains and losses on the hedging derivative instruments are recognized in AOCI and reclassified to earnings in the same period the hedged cash flows impact earnings and within the same income statement line item as the hedged cash flows. Considering the interest rates, yield curve and notional amount as of June 30, 2024, the Company expects to reclassify an estimated $43 million of after-tax net losses on derivative instruments designated as cash flow hedges from AOCI into earnings during the next 12 months.

The following table presents the pre-tax changes in AOCI from cash flow hedges for the three and six months ended June 30, 2024 and 2023. The after-tax impact of cash flow hedges on AOCI is shown in *Note 14 — Accumulated Other Comprehensive Income (Loss)* to the Consolidated Financial Statements in this Form-10-Q.

Net Investment Hedges — The Company enters into foreign currency forward contracts to hedge a portion of the Bank's investment in East West Bank (China) Limited, a non-USD functional currency subsidiary in China. The hedging instruments designated as net investment hedges were used to hedge against the risk of adverse changes in the foreign currency exchange rate of the Chinese Renminbi ("RMB"). The net investment hedge in place as of December 31, 2023 expired during the three months ended March 31, 2024. No new net investment hedge was entered during the three months ended June 30, 2024. The following table presents the pre-tax gains or losses recognized in AOCI on net investment hedges for the three and six months ended June 30, 2024 and 2023:

Derivatives Not Designated as Hedging Instruments

Customer-Related Positions and Economic Hedge Derivatives — The Company enters into interest rate, commodity, and foreign exchange derivatives at the request of its customers and generally enters into offsetting derivative contracts with third-party financial institutions to mitigate the inherent market risk. The Company also utilizes foreign exchange contracts to mitigate the effect of currency fluctuations on certain foreign currency-denominated on-balance sheet assets and liabilities, primarily foreign currency denominated deposits that it offers to its customers. A majority of the foreign exchange contracts had original maturities of one year or less as of both June 30, 2024 and December 31, 2023.

The following table presents the notional amounts and the gross fair values of the interest rate and foreign exchange derivatives entered into with customers and with third-party financial institutions as economic hedges to customers' positions as of June 30, 2024 and December 31, 2023:

The Company enters into energy commodity contracts with its customers in the oil and gas sector, which allow them to hedge against the risk of fluctuation in energy commodity prices. Offsetting contracts entered with third-party financial institutions are used as economic hedges to manage the Company's exposure on its customer-related positions. Credit Contracts — The Company periodically enters into credit RPAs with institutional counterparties to manage the credit exposure of the interest rate contracts associated with syndication loans. Under the RPAs, a portion of the credit exposure is transferred from one party (the purchaser of credit protection) to another party (the seller of credit protection). The seller of credit protection is required to make payments to the purchaser of credit protection if the underlying borrower defaults on the related interest rate contract. The Company may enter into protection sold or protection purchased RPAs. Credit risk on RPAs is managed by monitoring the credit worthiness of the borrowers and the institutional counterparties, which is a part of the Company's normal credit review and monitoring process. All referenced entities of the protection sold RPAs were investment grade and the weighted-average remaining maturity was 2.3 years and 2.8 years as of June 30, 2024 and December 31, 2023, respectively. Assuming the underlying borrowers referenced in the interest rate contracts defaulted, the maximum exposure in the protection sold RPAs would be $63 thousand and $177 thousand as of June 30, 2024 and December 31, 2023, respectively.

As of both June 30, 2024 and December 31, 2023, the Company had one outstanding protection purchased RPA with notional amount of $25 million and minimal fair value.

Equity Contracts — As part of the loan origination process, the Company may obtain warrants to purchase the preferred and/or common stock of the borrowers' companies, which are mainly in the technology and life sciences sectors. Warrants grant the Company the right to buy a certain class of the underlying company's equity at a certain price before expiration. In connection with the Company's investment in Rayliant during the third quarter of 2023, the Company granted performance-based RSUs as part of its consideration. The vesting of these equity contracts is contingent on Rayliant meeting certain financial performance targets during the future performance period. For additional information on these equity contracts, refer to *Note 3 — Fair Value Measurement and Fair Value of Financial*

Credit-Risk-Related Contingent Features — Certain of the Company's over-the-counter derivative contracts contain early termination provisions that require the Company to settle any outstanding balances upon the occurrence of a specified credit-risk-related event. Such an event primarily relates to a downgrade of the credit rating of East West Bank to below investment grade. As of June 30, 2024, the aggregate fair value amounts of all derivative instruments with credit risk-related contingent features that were in a net liability position totaled $2 million, for which $2 million collateral was posted to cover these positions. In comparison, as of December 31, 2023, the aggregate fair value amounts of all derivative instruments with credit risk-related contingent features that were in a net liability position totaled $9 thousand, for which no collateral was posted to cover these positions. In the event that the credit rating of East West Bank had been downgraded to below investment grade, the Company would have been required to post minimal additional collateral as of both June 30, 2024 and December 31, 2023.

Offsetting of Derivatives

The following tables present the gross derivative fair values, the balance sheet netting adjustments, and the resulting net fair values recorded on the Consolidated Balance Sheet, as well as the cash and noncash collateral associated with master netting arrangements. The gross amounts of derivative assets and liabilities are presented after the application of variation margin payments as settlements to the fair values of contracts cleared through central clearing organizations, where applicable. The collateral amounts in the following tables are limited to the outstanding balances of the related asset or liability. Therefore, instances of over-collateralization are not shown:

Accrued interest receivable on loans held-for-investment was $266 million and $267 million as of June 30, 2024 and December 31, 2023, respectively, and was included in *Other assets* on the Consolidated Balance Sheet. The interest income reversed was insignificant for both the three and six months ended June 30, 2024 and 2023. For the Company's accounting policy on accrued interest receivable related to loans held-for-investment, see *Note 1 — Summary of Significant Accounting Policies — Significant Accounting Policies — Loans Held-for-Investment* to the Consolidated Financial Statements of the Company's 2023 Form 10-K. The Company also has loans held-for-sale. For the Company's accounting policy on loans held-for-sale, refer to *Note 1 — Summary of Significant Accounting Policies — Significant Accounting Policies — Loans Held-for-Sale* to the Consolidated Financial Statements in the Company's 2023 Form 10-K.

The Company's FRBSF and FHLB borrowings are primarily secured by loans held-for-investment. Loans held-for-investment totaling $37.0 billion and $37.2 billion, respectively, were pledged to secure borrowings and provide additional borrowing capacity as of June 30, 2024 and December 31, 2023.

Credit Quality Indicators

All loans are subject to the Company's credit review and monitoring process. For the commercial loan portfolio, loans are risk rated based on an analysis of the borrower's current payment performance or delinquency, repayment sources, financial and liquidity factors, including industry and geographic considerations. For the consumer loan portfolio, payment performance or delinquency is typically the driving indicator for risk ratings.

The Company utilizes internal credit risk ratings to assign each individual loan a risk rating of 1 through 10:

- **Pass** — loans risk rated 1 through 5 are assigned an internal risk rating category of "Pass." Loans risk rated 1 are typically loans fully secured by cash. Pass loans have sufficient sources of repayment to repay the loan in full, in accordance with all terms and conditions.
- **Special mention** — loans assigned a risk rating of 6 have potential weaknesses that warrant closer attention by management; these are assigned an internal risk rating category of "Special Mention."
- **Substandard** — loans assigned a risk rating of 7 or 8 have well-defined weaknesses that may jeopardize the full and timely repayment of the loan; these are assigned an internal risk rating category of "Substandard."
- **Doubtful** — loans assigned a risk rating of 9 have insufficient sources of repayment and a high probability of loss; these are assigned an internal risk rating category of "Doubtful."
- **Loss** — loans assigned a risk rating of 10 are uncollectible and of such little value that they are no longer considered bankable assets; these are assigned an internal risk rating category of "Loss."

Loan exposures categorized as criticized consist of special mention, substandard, doubtful and loss categories. The Company reviews the internal risk ratings of its loan portfolio on a regular basis, and adjusts the ratings based on changes in the borrowers' financial status and the collectability of the loans.

The following tables summarize the Company's loans held-for-investment and year-to-date gross write-offs by loan portfolio segments, internal risk ratings and vintage year as of the periods presented. The vintage year is the year of loan origination, renewal or major modification. Revolving loans that are converted to term loans presented in the tables below are excluded from term loans by vintage year columns.

Nonaccrual and Past Due Loans

Loans that are 90 or more days past due are generally placed on nonaccrual status unless the loan is well-collateralized and in the process of collection. Loans that are less than 90 days past due but have identified deficiencies, such as when the full collection of principal or interest becomes uncertain, are also placed on nonaccrual status. Foreclosed Assets

The Company acquires assets from borrowers through loan restructurings, workouts, or foreclosures. Assets acquired may include real properties (e.g., real estate, land, and buildings) and commercial and personal properties. The Company recognizes foreclosed assets upon receiving assets in satisfaction of a loan (e.g., taking legal title or physical possession).

Foreclosed assets, consisting of OREO and other nonperforming assets, are included in *Other assets* on the Consolidated Balance Sheet. The Company had $30 million of foreclosed assets as of June 30, 2024, compared with $11 million as of December 31, 2023. The Company commences the foreclosure process on consumer mortgage loans after a borrower becomes more than 120 days delinquent in accordance with the Consumer Financial Protection Bureau guidelines. The carrying value of the consumer real estate loans that were in an active or suspended foreclosure process was $8 million as of both June 30, 2024 and December 31, 2023.

Loan Modifications to Borrowers Experiencing Financial Difficulty

As part of the Company's loss mitigation efforts, the Company may agree to modify the contractual terms of a loan to assist borrowers experiencing financial difficulty. The Company negotiates loan modifications on a case-by-case basis to achieve mutually agreeable terms that maximize loan collectability and meet the borrower's financial needs. The Company considers various factors to identify borrowers experiencing financial difficulty. The primary factor for consumer borrowers is delinquency status. For commercial loan borrowers, these factors include credit risk ratings, the probability of loan risk rating downgrades, and overall risk profile changes. The modification may include, but is not limited to, payment deferrals, interest rate reductions, term extensions, principal forgiveness, or a combination of such modifications. Commercial loan borrowers that require immaterial modifications such as insignificant interest rate changes, short-term extensions (90 days or less) from the original maturity date, or temporary waivers or extensions of financial covenants which would not constitute material credit actions, are generally not considered to be experiencing financial difficulty and are not included in the disclosure. Insignificant payment deferrals (three months or less in the last 12 months) are also not included in the disclosure.

The following tables present the amortized cost of loans that were modified during the three and six months ended June 30, 2024 and 2023 by loan class and modification type:

Allowance for Credit Losses

The Company has a current expected credit losses framework for all financial assets measured at amortized cost and certain off-balance sheet credit exposures. The Company's allowance for credit losses, which includes both the allowance for loan losses and the allowance for unfunded credit commitments, is calculated with the objective of maintaining a reserve sufficient to absorb losses inherent in our credit portfolios. The measurement of the allowance for credit losses is based on management's best estimate of lifetime expected credit losses, periodic evaluation of the loan portfolio, lending-related commitments and other relevant factors.

The allowance for credit losses is deducted from the amortized cost basis of a financial asset or a group of financial assets so that the balance sheet reflects the net amount the Company expects to collect. Amortized cost is the principal balance outstanding, net of purchase premiums and discounts, deferred fees and costs, and escrow advances. Subsequent changes in expected credit losses are recognized in net income as a provision for, or a reversal of, credit loss expense.

The allowance for credit losses estimation involves procedures to consider the unique risk characteristics of the portfolio segments. The majority of the Company's credit exposures that share risk characteristics with other similar exposures are collectively evaluated. The collectively evaluated loans include performing loans and unfunded credit commitments. If an exposure does not share risk characteristics with other exposures, the Company generally estimates expected credit losses on an individual basis.

Allowance for Collectively Evaluated Loans

The allowance for collectively evaluated loans consists of a quantitative component that assesses the different risk factors considered in our models and a qualitative component that considers risk factors external to the models. Each of these components are described below.

Quantitative Component — The Company applies quantitative methods to estimate loan losses by considering a variety of factors such as historical loss experience, the current credit quality of the portfolio, and an economic outlook over the life of the loan. The Company incorporates forward-looking information using macroeconomic scenarios which include variables that are considered key drivers of increases and decreases in credit losses. The Company utilizes a probability-weighted, multiple-scenario forecast approach. These scenarios may consist of a base forecast representing management's view of the most likely outcome, combined with downside or upside scenarios reflecting possible worsening or improving economic conditions. The quantitative models incorporate a probability-weighted calculation of these macroeconomic scenarios over a reasonable and supportable forecast period. If the life of the loans extends beyond the reasonable and supportable forecast period, the Company will consider historical experience or long-run macroeconomic trends over the remaining life of the loans to estimate the allowance for loan losses.

There were no changes to the reasonable and supportable forecast period, except to the C&I segment, and no changes to the reversion to the historical loss experience method for the three and six months ended June 30, 2024 and 2023. The reasonable and supportable forecast period for the C&I segment changed from 11 quarters to eight quarters due to model redevelopment during the third quarter of 2023.

The following table provides key credit risk characteristics and macroeconomic variables that the Company uses to estimate the expected credit losses by portfolio segment:

Portfolio Segment	Risk Characteristics	Macroeconomic Variables
C&I	Age percentage, size at origination, delinquency status, sector and risk rating	Unemployment rate, Gross Domestic Product ("GDP"), and U.S. Treasury rates [1]
CRE, Multifamily residential, and Construction and land	Delinquency status, maturity date, collateral value, property type, and geographic location	Unemployment rate, GDP, and U.S. Treasury rates
Single-family residential and HELOCs	FICO score, delinquency status, maturity date, collateral value, and geographic location	Unemployment rate, GDP, and Home Price Indices
Other consumer	Loss rate approach	Immaterial [2]

(1) Macroeconomic variables were updated due to model redevelopment.
(2) Macroeconomic variables are included in the qualitative estimate.

Quantitative Component — Allowance for Loan Losses for the Commercial Loan Portfolio

The Company's C&I lifetime loss rate model estimates the loss rate expected over the life of a loan. This loss rate is applied to the amortized cost basis, excluding accrued interest receivable, to determine expected credit losses. The lifetime loss rate model's reasonable and supportable period spans eight quarters, thereafter, immediately reverting to the historical average loss rate, expressed through the loan-level lifetime loss rate.

To generate estimates of expected loss at the loan level for CRE, multifamily residential, and construction and land loans, projected probabilities of default ("PDs") and loss given defaults ("LGDs") are applied to the estimated exposure at default, considering the term and payment structure of the loan. The forecast of future economic conditions returns to long-run historical economic trends within the reasonable and supportable period.

To estimate the life of a loan under both models, the contractual term of the loan is adjusted for estimated prepayments based on historical prepayment experience.

Quantitative Component — Allowance for Loan Losses for the Consumer Loan Portfolio

For single-family residential and HELOC loans, projected PDs and LGDs are applied to the estimated exposure at default, considering the term and payment structure of the loan, to generate estimates of expected loss at the loan level. The forecast of future economic conditions returns to long-run historical economic trends after the reasonable and supportable period. To estimate the life of a loan for the single-family residential and HELOC loan portfolios, the contractual term of the loan is adjusted for estimated prepayments based on historical prepayment experience. For other consumer loans, the Company uses a loss rate approach.

Qualitative Component — The Company considers the following qualitative factors in the determination of the collectively evaluated allowance if these factors have not already been captured by the quantitative model. Such qualitative factors may include, but are not limited to:

- loan growth trends;
- the volume and severity of past due financial assets, and criticized or adversely classified financial assets;
- the Company's lending policies and procedures, including changes in lending strategies, underwriting standards, collection, write-off and recovery practices;
- knowledge of a borrower's operations;
- the quality of the Company's credit review system;
- the experience, ability and depth of the Company's management and associates;
- the effect of other external factors such as the regulatory and legal environments, or changes in technology;
- actual and expected changes in international, national, regional, and local economic and business conditions in which the Company operates; and
- risk factors in certain industry sectors not captured by the quantitative models.

The magnitude of the impact of these factors on the Company's qualitative assessment of the allowance for credit losses changes from period to period according to changes made by management in its assessment of these factors. The extent to which these factors change may be dependent on whether they are already reflected in quantitative loss estimates during the current period and the extent to which changes in these factors diverge from period to period.

While the Company's allowance methodologies strive to reflect all relevant credit risk factors, there continues to be uncertainty associated with, but not limited to, potential imprecision in the estimation process due to the inherent time lag of obtaining information and normal variations between expected and actual outcomes. The Company may hold additional qualitative reserves that are designed to provide coverage for losses attributable to such risk.

Allowance for Individually Evaluated Loans

When a loan no longer shares similar risk characteristics with other loans, such as in the case of certain nonaccrual loans, the Company estimates the allowance for loan losses on an individual loan basis. The allowance for loan losses for individually evaluated loans is measured as the difference between the recorded value of the loans and their fair value. For loans evaluated individually, the Company uses one of three different asset valuation measurement methods: (1) the fair value of collateral less costs to sell; (2) the present value of expected future cash flows; or (3) the loan's observable market price. If an individually evaluated loan is determined to be collateral dependent, the Company applies the fair value of the collateral less costs to sell method. If an individually evaluated loan is determined not to be collateral dependent, the Company uses the present value of future cash flows or the observable market value of the loan.

- ***Collateral-Dependent Loans —*** The allowance of a collateral-dependent loan is limited to the difference between the recorded value and fair value of the collateral less cost of disposal or sale. As of June 30, 2024, collateral-dependent commercial and consumer loans totaled $75 million and $23 million, respectively. In comparison, collateral-dependent commercial and consumer loans totaled $30 million and $12 million, respectively, as of December 31, 2023. The Company's collateral-dependent loans were secured by real estate. As of both June 30, 2024 and December 31, 2023, the collateral value of the properties securing the collateral-dependent loans, net of selling costs, exceeded the recorded value of the majority of the loans.

In addition to the allowance for loan losses, the Company maintains an allowance for unfunded credit commitments. The Company has three general areas for which it provides the allowance for unfunded credit commitments: (1) recourse obligations for loans sold, (2) letters of credit, and (3) unfunded lending commitments. The allowance for unfunded credit commitments is maintained at a level that management believes to be sufficient to absorb estimated expected credit losses related to unfunded credit facilities. See *Note 11 — Commitments and Contingencies* to the Consolidated Financial Statements in this Form 10-Q for additional information related to unfunded credit commitments. The following table summarizes the activities in the allowance for unfunded credit commitments for the three and six months ended June 30, 2024 and 2023:

The allowance for credit losses was $723 million as of June 30, 2024, an increase of $17 million, compared with $706 million as of December 31, 2023. The slight increase in the allowance for credit losses was primarily driven by the Company's net loan growth, qualitative risk assessment and economic forecasts that reflected continued caution regarding inflation, the high interest rate environment and the CRE market outlook.

The Company considers multiple economic scenarios to develop the estimate of the allowance for loan losses. The scenarios may consist of a baseline forecast representing management's view of the most likely outcome, and downside or upside scenarios that reflect possible worsening or improving economic conditions. As of June 30, 2024, the Company assigned the same weightings to its baseline, upside and downside scenarios as compared with December 31, 2023. The current baseline economic forecast continues to reflect key risks such as high inflation, high interest rates, concerns over global conflicts and oil prices. Compared to December 2023, the June 2024 baseline forecast for GDP growth showed some improvement in the near term (full years 2024 and 2025) and a slight worsening for longer-term (2026 and beyond). Unemployment rate has remained low with the June 2024 forecast showing a small uptick for the remainder of 2024, compared to the December 2023 forecast for the same periods. The downside scenario assumed the economy falls into recession in the third quarter of 2024 as a result of still-elevated interest rates, global and domestic political tensions, and concerns about bank failures. The upside scenario assumed a more optimistic economic outlook, including stronger growth, stable financial market, and full employment starting in the fourth quarter of 2024.

Affordable Housing Partnership, Tax Credit and Community Reinvestment Act Investments, Net

The CRA encourages banks to meet the credit needs of their communities, particularly low- and moderate-income individuals and neighborhoods. The Company invests in certain affordable housing projects in the form of ownership interests in limited partnerships or limited liability companies that qualify for CRA consideration and tax credits. These entities are formed to develop and operate apartment complexes designed as high-quality affordable housing for lower income tenants throughout the U.S. To fully utilize the available tax credits, each of these entities must meet the affordable housing regulatory requirements for a 15-year minimum compliance period. The Company also invests in small business investment companies and new markets tax credit projects that qualify for CRA consideration, as well as eligible projects that qualify for production, historic and renewable energy tax credits. Investments in new markets tax credits promote development in low-income communities, investments in production and renewable energy tax credits help promote the development of renewable energy sources, and investments in historic tax credits promote the rehabilitation of historic buildings and economic revitalization of the surrounding areas.

The majority of affordable housing partnership, tax credit and CRA investments discussed above are variable interest entities where the Company is a limited partner in these investments, and an unrelated third party is typically the general partner or managing member who has control over the significant activities of these investments. While the Company's interest in some of the investments may exceed 50% of the outstanding equity interests, the Company does not consolidate these investments due to the general partner's or managing member's ability to manage the entity, which is indicative of the general partner's or managing member's power over the entity. The Company's maximum exposure to loss in connection with these partnerships consists of the unamortized investment balance and any tax credits claimed that may become subject to recapture.

The Company records its investments in qualifying affordable housing partnerships, net, using PAM. Following the adoption of ASU 2023-02 on January 1, 2024, the Company elects to account for its tax credit investments using PAM on a program-by-program basis if certain conditions are met. For the Company's accounting policies on PAM, see *Note 2 — Current Accounting Developments and Summary of Significant Accounting Policies — Significant Accounting Policies Update — Income Taxes* to the Consolidated Financial Statements in this Form 10-Q. For discussion on the Company's impairment evaluation and monitoring process of tax credit investments, refer to *Note 3 — Fair Value Measurement and Fair Value of Financial Instruments — Affordable Housing Partnership, Tax Credit and CRA Investments, Net* to the Consolidated Financial Statements in this Form 10-Q.

Commitments and Contingencies

Commitments and Contingencies Disclosure [Abstract]

Commitments and Contingencies

Commitments and Contingencies

Commitments to Extend Credit — In the normal course of business, the Company provides loan commitments and letters of credit to customers on predetermined terms. These outstanding commitments to extend credit are not reflected in the accompanying Consolidated Financial Statements. While the Company does not anticipate losses from these transactions, commitments to extend credit are included in determining the appropriate level of allowance for unfunded credit commitments.

The following table presents the Company's credit-related commitments as of June 30, 2024 and December 31, 2023:

	June 30, 2024					December 31, 2023
($ in thousands)	Expire in One Year or Less	Expire After One Year Through Three Years	Expire After Three Years Through Five Years	Expire After Five Years	Total	Total
Loan commitments	$ 4,769,476	$ 3,376,989	$ 632,152	$ 143,822	$ 8,922,439	$ 9,141,447
Commercial letters of credit and standby letters of credit ("SBLCs")	1,206,498	357,450	150,329	1,122,720	2,836,997	2,610,761
Total	**$ 5,975,974**	**$ 3,734,439**	**$ 782,481**	**$ 1,266,542**	**$ 11,759,436**	**$ 11,752,208**

Loan commitments are agreements to lend to customers provided there are no violations of any conditions established in the agreement. Commitments generally have fixed expiration dates or other termination clauses and may require commitment fees. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future funding requirements.

Commercial letters of credit are issued to facilitate domestic and foreign trade transactions, while SBLCs are generally contingent upon the failure of the customers to perform according to the terms of the underlying contract with the third party. As a result, the total contractual amounts do not necessarily represent future funding requirements. The Company's historical experience is that SBLCs typically expire without being funded. Additionally, in many cases, the Company holds collateral in various forms against these SBLCs. As part of its risk management activities, the Company monitors the creditworthiness of customers in conjunction with its SBLC exposure. Customers are obligated to reimburse the Company for any payment made on the customers' behalf. If the customers fail to pay, the Company would, as applicable, liquidate the collateral and/or offset existing accounts. As of June 30, 2024, total letters of credit of $2.8 billion consisted of SBLCs of $2.8 billion and commercial letters of credit of $31 million. In comparison, as of December 31, 2023, total letters of credit of $2.6 billion consisted of SBLCs of $2.6 billion and commercial letters of credit of $24 million. As of both June 30, 2024 and December 31, 2023, substantially all letters of credit were graded "Pass" using the Bank's internal credit risk rating system.

The Company applies the same credit underwriting criteria to extend loans, commitments, and conditional obligations to customers. Each customer's creditworthiness is evaluated on a case-by-case basis. Collateral and financial guarantees may be obtained based on management's assessment of a customer's credit risk. Collateral may include cash, accounts receivable, inventory, personal property, plant and equipment, and real estate property.

Estimated exposure to loss from these commitments is included in the allowance for unfunded credit commitments and amounted to $39 million and $38 million as of June 30, 2024 and December 31, 2023, respectively.

Guarantees — From time to time, the Company sells or securitizes single-family and multifamily residential loans with recourse in the ordinary course of business. The Company is obligated to repurchase up to the recourse component of the loans if the loans default. The following table presents the maximum potential future payments and carrying value of loans sold or securitized with recourse as of June 30, 2024 and December 31, 2023:

	Maximum Potential Future Payments						Carrying Value [1]	
	June 30, 2024					December 31, 2023	June 30, 2024	December 31, 2023
($ in thousands)	Expire in One Year or Less	Expire After One Year Through Three Years	Expire After Three Years Through Five Years	Expire After Five Years	Total	Total	Total	Total

Multifamily residential loans sold or securitized with recourse	—	—	155	14,841	14,996	14,996	18,445	19,020
Total	**$ 3**	**$ 15**	**$ 180**	**$ 19,539**	**$ 19,737**	**$ 20,884**	**$ 23,186**	**$ 24,908**

(1) Represents the unpaid principal balance.

The Company's recourse reserve related to these guarantees is included in the allowance for unfunded credit commitments and totaled $43 thousand and $40 thousand as of June 30, 2024 and December 31, 2023, respectively. The allowance for unfunded credit commitments is included in *Accrued expenses and other liabilities* on the Consolidated Balance Sheet. The Company continues to experience minimal losses from the single-family and multifamily residential loan portfolios sold or securitized with recourse.

Litigation — The Company is a party to various legal actions arising in the ordinary course of its business. In accordance with ASC 450, *Contingencies*, the Company accrues reserves for outstanding lawsuits, claims and proceedings when a loss contingency is probable and can be reasonably estimated. The Company estimates the amount of loss contingencies using current available information from legal proceedings, advice from legal counsel and available insurance coverage. Due to the inherent subjectivity of the assessments and unpredictability of the outcomes of the legal proceedings, any amounts accrued or included in this aggregate amount may not represent the ultimate loss to the Company from the legal proceedings in question. Thus, the Company's exposure and ultimate losses may be higher, and possibly significantly more, than the amounts accrued.

While it is impossible to ascertain the ultimate resolution or range of financial liability, based on information known to the Company as of June 30, 2024, the Company does not believe there are any pending legal proceedings to which the Company is a party that, individually or in the aggregate, would reasonably be expected to have a material adverse effect on the Company's financial condition. In light of the inherent uncertainty in legal proceedings, however, there can be no assurance that the ultimate resolution will not exceed established reserves and it is possible that the outcome of a particular matter, or a combination of matters, may be material to the Company's financial condition for a particular period, depending upon the size of the loss and the Company's income for that particular period.

The number of awards that vest can range from zero percent to a maximum of 200% of the granted number of awards based on the Company's achievement of specified performance criteria over a performance period of three years. For information on accounting on stock-based compensation plans, see *Note 1 — Summary of Significant Accounting Policies — Significant Accounting Policies — Stock-Based Compensation* to the Consolidated Financial Statements of the Company's 2023 Form 10-K.

The following table presents a summary of the activities for the Company's time- and performance-based RSUs that were settled in shares for the six months ended June 30, 2024. The number of performance-based RSUs stated below reflects the number of awards granted on the grant date.

Segment Reporting [Abstract]

Business Segments

Business Segments

The Company organizes its operations into three reportable operating segments: (1) Consumer and Business Banking; (2) Commercial Banking; and (3) Other. These segments are defined by the type of customers served, and the related products and services provided. The segments reflect how financial information is currently evaluated by management. Operating segment results are based on the

Company's internal management reporting process, which reflects assignments and allocations of certain balance sheet and income statement items. The information presented is not indicative of how the segments would perform if they operated as independent entities.

The Consumer and Business Banking segment primarily provides financial products and services to consumer and commercial customers through the Company's domestic branch network and digital banking platforms. This segment offers consumer and commercial deposits, mortgage and home equity loans, and other products and services. It also originates commercial loans for small- and medium-sized enterprises through the Company's branch network. Other products and services provided by this segment include wealth management, treasury management, interest rate risk hedging and foreign exchange services.

The Commercial Banking segment primarily generates commercial loan and deposit products. Commercial loan products include CRE lending, construction financing, commercial business lending, working capital lines of credit, trade finance, letters of credit, affordable housing lending, asset-based lending, asset-backed finance, project finance and equipment financing. Commercial deposit products and other financial services include treasury management, foreign exchange services and interest rate and commodity risk hedging.

The remaining centralized functions, including the corporate treasury activities of the Company and eliminations of inter-segment amounts, have been aggregated and included in the Other segment, which provides broad administrative support to the two core segments, namely the Consumer and Business Banking and the Commercial Banking segments.

The Company utilizes an internal reporting process to measure the performance of the three operating segments within the Company. The internal reporting process derives operating segment results by utilizing allocation methodologies for revenues and expenses. Net interest income of each segment represents the difference between actual interest earned on assets and interest incurred on liabilities of the segment, adjusted for funding charges or credits through the Company's internal funds transfer pricing ("FTP") process. Noninterest income and noninterest expense directly attributable to a business segment are assigned to that segment. Indirect costs, including technology-related costs and corporate overhead, are allocated based on a segment's estimated usage using factors including but not limited to, full-time equivalent employees, net interest income, and loan and deposit volume. Charge-offs are recorded to the segment directly associated with the respective loans charged off, and provision for credit losses is recorded to the segments based on the related loans for which allowances are evaluated. The Company's internal reporting process utilizes a full-allocation methodology. Under this methodology, corporate and indirect expenses incurred by the Other segment are allocated to the Consumer and Business Banking and the Commercial Banking segments, except certain corporate treasury-related expenses and insignificant unallocated expenses.

The corporate treasury function within the Other segment is responsible for the Company's liquidity and interest rate management, and the internal FTP process. The FTP process is formulated with the goal of encouraging loan and deposit growth that is consistent with the Company's overall profitability objectives, as well as providing a reasonable and consistent basis for the measurement of its business segments' net interest margins and profitability. The FTP process charges a cost to fund loans ("FTP charges for loans") and allocates credits for funds provided from deposits ("FTP credits for deposits") using internal FTP rates. FTP charges for loans are determined based on a matched cost of funds, which is tied to the pricing and term characteristics of the loans. FTP credits for deposits are based on matched funding credit rates, which are tied to the implied or stated maturity of the deposits. FTP credits for deposits reflect the long-term value generated by the deposits. The net spread between the total internal FTP charges and credits is recorded as part of net interest income in the Other segment. The FTP process transfers the corporate interest rate risk exposure to the treasury function within the Other segment, where such exposures are centrally managed. The Company's internal FTP assumptions and methodologies are reviewed at least annually to ensure that the process is reflective of current market conditions.

Current Accounting Developments and Summary of Significant Accounting Policies (Policies)	6 Months Ended Jun. 30, 2024
Accounting Policies [Abstract]	

Consolidation

East West Bancorp, Inc. is a registered bank holding company that offers a full range of banking services to individuals and businesses through its subsidiary bank, East West Bank and its subsidiaries ("East West Bank" or the "Bank"). The unaudited interim Consolidated Financial Statements in this Quarterly Report on Form 10-Q (this "Form 10-Q") include the accounts of East West, East West Bank and East West's subsidiaries. Intercompany transactions and accounts have been eliminated in consolidation. As of June 30, 2024, East West also has one wholly-owned subsidiary that is a statutory business trust (the "Trust"). In accordance with Financial Accounting Standards Board Accounting Standards Codification ("ASC") Topic 810, *Consolidation*, the Trust is not included on the Consolidated Financial Statements.

Basis of Presentation

The unaudited interim Consolidated Financial Statements are presented in accordance with U.S. Generally Accepted Accounting Principles ("GAAP"), applicable guidelines prescribed by regulatory authorities and general practices in the banking industry. While the unaudited interim Consolidated Financial Statements reflect all adjustments that, in the opinion of management, are necessary for fair presentation, they primarily serve to update the Company's 2023 Form 10-K, and may not include all the information and notes necessary to constitute a complete set of financial statements. Accordingly, they should be read in conjunction with the audited Consolidated Financial Statements and notes thereto included in the Company's 2023 Form 10-K.

Accounting Pronouncements

Accounting Pronouncements Adopted in 2024

Standard	Required Date of Adoption	Description	Effect on Financial Statements
ASU 2023-02, *Investments — Equity Method and Joint Ventures* (Topic 323): *Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method*	January 1, 2024	ASU 2023-02 expands the scope of the proportional amortization method ("PAM") to equity tax credit investment programs if certain conditions are met. Previously, PAM could only be used for investments in low-income housing tax credit structures. Under this guidance, companies are able to elect, on a tax credit program-by-tax credit program basis, to apply PAM to all equity investments meeting the criteria in ASC 323-740-25-1. The amendments in this guidance must be applied on a modified retrospective or a retrospective basis.	The Company adopted ASU 2023-02 on January 1, 2024, for all tax credit investments under a modified retrospective basis. The impact of the adoption decreased opening retained earnings on January 1, 2024 by $9 million.

Income Taxes — The Company has elected to apply PAM to qualifying affordable housing partnership, new markets, historic, production and renewable energy tax credit investments. Under PAM, the Company amortizes the initial cost of the investment in proportion to the income tax credits and other income tax benefits received, and recognizes the amortization in *Income tax expense* on the Consolidated Statement of Income.

Balance Sheet Offsetting

The Company's resale and repurchase agreements are transacted under legally enforceable master netting agreements that, in the event of default by the counterparty, provide the Company the right to liquidate securities held and to offset receivables and payables with the same counterparty. The Company nets resale and repurchase transactions with the same counterparty on the Consolidated Balance Sheet when it has a legally enforceable master netting agreement and the transactions are eligible for netting under ASC 210-20-45-11, *Balance Sheet Offsetting Repurchase and Reverse Repurchase Agreements*. Collateral received includes securities and loans that are not recognized on the Consolidated Balance Sheet. Collateral pledged consists of securities that are not netted on the Consolidated Balance Sheet against the related collateralized liability.

Credit Quality

Credit Quality Indicators

Indicators

All loans are subject to the Company's credit review and monitoring process. For the commercial loan portfolio, loans are risk rated based on an analysis of the borrower's current payment performance or delinquency, repayment sources, financial and liquidity factors, including industry and geographic considerations. For the consumer loan portfolio, payment performance or delinquency is typically the driving indicator for risk ratings.

The Company utilizes internal credit risk ratings to assign each individual loan a risk rating of 1 through 10:

- **Pass** — loans risk rated 1 through 5 are assigned an internal risk rating category of "Pass." Loans risk rated 1 are typically loans fully secured by cash. Pass loans have sufficient sources of repayment to repay the loan in full, in accordance with all terms and conditions.
- **Special mention** — loans assigned a risk rating of 6 have potential weaknesses that warrant closer attention by management; these are assigned an internal risk rating category of "Special Mention."
- **Substandard** — loans assigned a risk rating of 7 or 8 have well-defined weaknesses that may jeopardize the full and timely repayment of the loan; these are assigned an internal risk rating category of "Substandard."
- **Doubtful** — loans assigned a risk rating of 9 have insufficient sources of repayment and a high probability of loss; these are assigned an internal risk rating category of "Doubtful."
- **Loss** — loans assigned a risk rating of 10 are uncollectible and of such little value that they are no longer considered bankable assets; these are assigned an internal risk rating category of "Loss."

Loan exposures categorized as criticized consist of special mention, substandard, doubtful and loss categories. The Company reviews the internal risk ratings of its loan portfolio on a regular basis, and adjusts the ratings based on changes in the borrowers' financial status and the collectability of the loans.

Allowance for Credit Losses

Allowance for Credit Losses

The Company has a current expected credit losses framework for all financial assets measured at amortized cost and certain off-balance sheet credit exposures. The Company's allowance for credit losses, which includes both the allowance for loan losses and the allowance for unfunded credit commitments, is calculated with the objective of maintaining a reserve sufficient to absorb losses inherent in our credit portfolios. The measurement of the allowance for credit losses is based on management's best estimate of lifetime expected credit losses, periodic evaluation of the loan portfolio, lending-related commitments and other relevant factors.

The allowance for credit losses is deducted from the amortized cost basis of a financial asset or a group of financial assets so that the balance sheet reflects the net amount the Company expects to collect. Amortized cost is the principal balance outstanding, net of purchase premiums and discounts, deferred fees and costs, and escrow advances. Subsequent changes in expected credit losses are recognized in net income as a provision for, or a reversal of, credit loss expense.

The allowance for credit losses estimation involves procedures to consider the unique risk characteristics of the portfolio segments. The majority of the Company's credit exposures that share risk characteristics with other similar exposures are collectively evaluated. The collectively evaluated loans include performing loans and unfunded credit commitments. If an exposure does not share risk characteristics with other exposures, the Company generally estimates expected credit losses on an individual basis.

Allowance for Collectively Evaluated Loans

The allowance for collectively evaluated loans consists of a quantitative component that assesses the different risk factors considered in our models and a qualitative component that considers risk factors external to the models. Each of these components are described below.

Quantitative Component — The Company applies quantitative methods to estimate loan losses by considering a variety of factors such as historical loss experience, the current credit quality of the portfolio, and an economic outlook over the life of the loan. The Company incorporates forward-looking information using macroeconomic scenarios which include variables that are considered key drivers of increases and decreases in credit losses. The Company utilizes a probability-weighted, multiple-scenario forecast approach. These scenarios may consist of a base forecast representing management's view of the most likely outcome, combined with downside or upside scenarios reflecting possible worsening or improving economic conditions. The quantitative models incorporate a probability-weighted calculation of these macroeconomic scenarios over a reasonable and supportable forecast period. If the life of the loans extends beyond the reasonable and supportable forecast period, the Company will consider historical experience or long-run macroeconomic trends over the remaining life of the loans to estimate the allowance for loan losses.

There were no changes to the reasonable and supportable forecast period, except to the C&I segment, and no changes to the reversion to the historical loss experience method for the three and six months ended June 30, 2024 and 2023. The reasonable and supportable forecast period for the C&I segment changed from 11 quarters to eight quarters due to model redevelopment during the third quarter of 2023.

The following table provides key credit risk characteristics and macroeconomic variables that the Company uses to estimate the expected credit losses by portfolio segment:

Portfolio Segment	Risk Characteristics	Macroeconomic Variables
C&I	Age percentage, size at origination, delinquency status, sector and risk rating	Unemployment rate, Gross Domestic Product ("GDP"), and U.S. Treasury rates [1]
CRE, Multifamily residential, and Construction and land	Delinquency status, maturity date, collateral value, property type, and geographic location	Unemployment rate, GDP, and U.S. Treasury rates
Single-family residential and HELOCs	FICO score, delinquency status, maturity date, collateral value, and geographic location	Unemployment rate, GDP, and Home Price Indices
Other consumer	Loss rate approach	Immaterial [2]

(1) Macroeconomic variables were updated due to model redevelopment.
(2) Macroeconomic variables are included in the qualitative estimate.

Quantitative Component — Allowance for Loan Losses for the Commercial Loan Portfolio

The Company's C&I lifetime loss rate model estimates the loss rate expected over the life of a loan. This loss rate is applied to the amortized cost basis, excluding accrued interest receivable, to determine expected credit losses. The lifetime loss rate model's reasonable and supportable period spans eight quarters, thereafter, immediately reverting to the historical average loss rate, expressed through the loan-level lifetime loss rate.

To generate estimates of expected loss at the loan level for CRE, multifamily residential, and construction and land loans, projected probabilities of default ("PDs") and loss given defaults ("LGDs") are applied to the estimated exposure at default, considering the term and payment structure of the loan. The forecast of future economic conditions returns to long-run historical economic trends within the reasonable and supportable period.

To estimate the life of a loan under both models, the contractual term of the loan is adjusted for estimated prepayments based on historical prepayment experience.

Quantitative Component — Allowance for Loan Losses for the Consumer Loan Portfolio

For single-family residential and HELOC loans, projected PDs and LGDs are applied to the estimated exposure at default, considering the term and payment structure of the loan, to generate estimates of expected loss at the loan level. The forecast of future economic conditions returns to long-run historical economic trends after the reasonable and supportable period. To estimate the life of a loan for the single-family residential and HELOC loan portfolios, the contractual term of the loan is adjusted for estimated prepayments based on historical prepayment experience. For other consumer loans, the Company uses a loss rate approach.

Qualitative Component — The Company considers the following qualitative factors in the determination of the collectively evaluated allowance if these factors have not already been captured by the quantitative model. Such qualitative factors may include, but are not limited to:

- loan growth trends;
- the volume and severity of past due financial assets, and criticized or adversely classified financial assets;
- the Company's lending policies and procedures, including changes in lending strategies, underwriting standards, collection, write-off and recovery practices;
- knowledge of a borrower's operations;
- the quality of the Company's credit review system;
- the experience, ability and depth of the Company's management and associates;
- the effect of other external factors such as the regulatory and legal environments, or changes in technology;
- actual and expected changes in international, national, regional, and local economic and business conditions in which the Company operates; and
- risk factors in certain industry sectors not captured by the quantitative models.

The magnitude of the impact of these factors on the Company's qualitative assessment of the allowance for credit losses changes from period to period according to changes made by management in its assessment of these factors. The extent to which these factors change may be dependent on whether they are already reflected in quantitative loss estimates during the current period and the extent to which changes in these factors diverge from period to period.

While the Company's allowance methodologies strive to reflect all relevant credit risk factors, there continues to be uncertainty associated with, but not limited to, potential imprecision in the estimation process due to the inherent time lag of obtaining information and normal variations between expected and actual outcomes. The Company may hold additional qualitative reserves that are designed to provide coverage for losses attributable to such risk.

Allowance for Individually Evaluated Loans

When a loan no longer shares similar risk characteristics with other loans, such as in the case of certain nonaccrual loans, the Company estimates the allowance for loan losses on an individual loan basis. The allowance for loan losses for individually evaluated loans is measured as the difference between the recorded value of the loans and their fair value. For loans evaluated individually, the Company uses one of three different asset valuation measurement methods: (1) the fair value of collateral less costs to sell; (2) the present value of expected future cash flows; or (3) the loan's observable market price. If an individually evaluated loan is determined to be collateral dependent, the Company applies the fair value of the collateral less costs to sell method. If an individually evaluated loan is determined not to be collateral dependent, the Company uses the present value of future cash flows or the observable market value of the loan.

- ***Collateral-Dependent Loans —*** The allowance of a collateral-dependent loan is limited to the difference between the recorded value and fair value of the collateral less cost of disposal or sale.

Goodwill

The Company's goodwill impairment test is performed annually, as of December 31, or more frequently as events occur or circumstances change that would more-likely-than-not reduce the fair value of a reporting unit below its carrying value.

Litigation

Litigation — The Company is a party to various legal actions arising in the ordinary course of its business. In accordance with ASC 450, *Contingencies,* the Company accrues reserves for outstanding lawsuits, claims and proceedings when a loss contingency is probable and can be reasonably estimated. The Company estimates the amount of loss contingencies using current available information from legal proceedings, advice from legal counsel and available insurance coverage. Due to the inherent subjectivity of the assessments and unpredictability of the outcomes of the legal proceedings, any amounts accrued or included in this aggregate amount may not represent the ultimate loss to the Company from the legal proceedings in question.

ASU 2023-02, *Investments — Equity Method and Joint Ventures* (Topic 323): *Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method*	January 1, 2024	ASU 2023-02 expands the scope of the proportional amortization method ("PAM") to equity tax credit investment programs if certain conditions are met. Previously, PAM could only be used for investments in low-income housing tax credit structures. Under this guidance, companies are able to elect, on a tax credit program-by-tax credit program basis, to apply PAM to all equity investments meeting the criteria in ASC 323-740-25-1. The amendments in this guidance must be applied on a modified retrospective or a retrospective basis.	The Company adopted ASU 2023-02 on January 1, 2024, for all tax credit investments under a modified retrospective basis. The impact of the adoption decreased opening retained earnings on January 1, 2024 by $9 million.

The following table presents quantitative information about the significant unobservable inputs used in the valuation of Level 3 fair value measurements as of June 30, 2024 and December 31, 2023. The significant unobservable inputs presented in the table below are those that the Company considers significant to the fair value of the Level 3 assets. The Company considers unobservable inputs to be significant if, by their exclusion, the fair value of the Level 3 assets would be impacted by a predetermined percentage change.

Schedule Of Notional And Gross Fair Values Of Derivatives

6 Months Ended
Jun. 30, 2024

The following table presents the notional amounts and fair values of the Company's derivatives as of June 30, 2024 and December 31, 2023. Certain derivative contracts are cleared though central clearing organizations where variation margin is applied daily as settlement to the fair values of the contracts. The fair values are presented on a gross basis prior to the application of bilateral collateral and master netting agreements, but after the application of variation margin payments as settlement to fair values of contracts cleared through central clearing organizations. Applying variation margin payments as settlement to the fair values of derivative contracts cleared through the London Clearing House ("LCH") and the Chicago Mercantile Exchange ("CME") resulted in reductions in the derivative asset and liability fair values by $28 million and $37 million, respectively, as of June 30, 2024. In comparison, applying variation margin payments as settlement to LCH- and CME-cleared derivative transactions resulted in reductions in both the derivative asset and liability fair values by $43 million as of December 31, 2023. Total derivative asset and liability fair values are adjusted to reflect the effects of legally enforceable master netting agreements and cash collateral received or paid. The resulting net derivative asset and liability fair values are included in *Other assets* and *Accrued expenses and other liabilities*, respectively, on the Consolidated Balance Sheet.
