Volatility also may be defined as a probability-weighted measure of the dispersion of returns about the mean. The volatility of a share price is the standard deviation of the continuously compounded rates of return on the share over a specified period. That is the same as the standard deviation of the differences in the natural logarithms of the stock prices plus dividends, if any, over the period."}}}, "auth_ref": []}, "us-gaap_ShareBasedCompensationArrangementByShareBasedPaymentAwardFairValueAssumptionsRiskFreeInterestRate": {"xbrltype": "percentItemType", "nsuri": "http://fasb.org/us-gaap/2024", "localname": "ShareBasedCompensationArrangementByShareBasedPaymentAwardFairValueAssumptionsRiskFreeInterestRate", "presentation": ["http://www.accuray.com/20240630/taxonomy/role/Role_DisclosureStockIncentivePlanAndEmployeeStockPurchasePlanESPPDetails", "http://www.accuray.com/20240630/taxonomy/role/Role_DisclosureStockIncentivePlanAndEmployeeStockPurchasePlanScheduleOfAssumptionsUsedForDeterminingFairValu"], "lang": {"en-us": {"role": {"label": "Share-Based Compensation Arrangement by Share-Based Payment Award, Fair Value Assumptions, Risk Free Interest Rate", "terseLabel": "Risk-free interest rate (as a percent)", "documentation": "The risk-free interest rate assumption that is used in valuing an option on its own shares."}}}, "auth_ref": ["r644"]}, "us-gaap_ShareBasedCompensationArrangementByShareBasedPaymentAwardFairValueAssumptionsRiskFreeInterestRateMaximum": {"xbrltype": "percentItemType", "nsuri": "http://fasb.org/us-gaap/2024", "localname": "ShareBasedCompensationArrangementByShareBasedPaymentAwardFairValueAssumptionsRiskFreeInterestRateMaximum", "presentation": ["http://www.accuray.com/20240630/taxonomy/role/Role_DisclosureStockIncentivePlanAndEmployeeStockPurchasePlanESPPDetails", "http://www.accuray.com/20240630/taxonomy/role/Role_DisclosureStockIncentivePlanAndEmployeeStockPurchasePlanScheduleOfAssumptionsUsedForDeterminingFairValu"], "lang": {"en-us": {"role": {"label": "Share-Based Compensation Arrangement by Share-Based Payment Award, Fair Value Assumptions, Risk Free Interest Rate, Maximum", "terseLabel": "Risk-free interest rate, Maximum (as a percent)", "documentation": "The maximum risk-free interest rate assumption that is used in valuing an option on its own shares."}}}, "auth_ref": []}, "us-gaap_ShareBasedCompensationArrangementByShareBasedPaymentAwardFairValueAssumptionsRiskFreeInterestRateMinimum": {"xbrltype": "percentItemType", "nsuri": "http://fasb.org/us-gaap/2024", "localname": "ShareBasedCompensationArrangementByShareBasedPaymentAwardFairValueAssumptionsRiskFreeInterestRateMinimum", "presentation": ["http://www.accuray.com/20240630/taxonomy/role/Role_DisclosureStockIncentivePlanAndEmployeeStockPurchasePlanESPPDetails", "http://www.accuray.com/20240630/taxonomy/role/Role_DisclosureStockIncentivePlanAndEmployeeStockPurchasePlanScheduleOfAssumptionsUsedForDeterminingFairValu"], "lang": {"en-us": {"role": {"label": "Share-Based Compensation Arrangement by Share-Based Payment Award, Fair Value Assumptions, Risk Free Interest Rate, Minimum", "terseLabel": "Risk-free interest rate, Minimum (as a percent)", "documentation": "The minimum risk-free interest rate assumption that is used in valuing an option on its own shares."}}}, "auth_ref": []}, "us-gaap_ShareBasedCompensationArrangementByShareBasedPaymentAwardLineItems": {"xbrltype": "stringItemType", "nsuri": "http://fasb.org/us-gaap/2024", "localname": "ShareBasedCompensationArrangementByShareBasedPaymentAwardLineItems", "presentation": ["http://www.accuray.com/20240630/taxonomy/role/DisclosureStockIncentivePlanAndEmployeeStockPurchasePlanSummaryOfActivityOfRsusAndPsusDetails", "http://www.accuray.com/20240630/taxonomy/role/Role_DisclosureStockIncentivePlanAndEmployeeStockPurchasePlanAdditionalInformationDetails", "http://www.accuray.com/20240630/taxonomy/role/Role_DisclosureStockIncentivePlanAndEmployeeStockPurchasePlanESPPDetails", "http://www.accuray.com/20240630/taxonomy/role/Role_DisclosureStockIncentivePlanAndEmployeeStockPurchasePlanScheduleOfAssumptionsUsedForDeterminingFairValu", "http://www.accuray.com/20240630/taxonomy/role/Role_DisclosureStockIncentivePlanAndEmployeeStockPurchasePlanScheduleOfOptionActivityUnderCompanySIncentiveP"], "lang": {"en-us": {"role": {"label": "Share-Based Compensation Arrangement by Share-Based Payment Award [Line Items]", "terseLabel": "Share Based Compensation Arrangement By Share Based Payment Award [Line Items]", "documentation": "Line items represent financial concepts included in a table. The Company and its Significant Accounting Policies The Company Accuray Incorporated (together with its subsidiaries, the “Company” or “Accuray”) designs, develops and sells advanced radiosurgery and radiation therapy systems for the treatment of tumors throughout the body. The Company is incorporated in Delaware and is headquartered in Madison, Wisconsin. The Company has primary offices in the United States, Switzerland, China, Hong Kong, and Japan, and conducts its business worldwide. Basis of Presentation and Principles of Consolidation The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation. The accompanying consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles (“U.S. GAAP”), pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). Reclassifications Certain amounts in the notes to consolidated financial statements have been reclassified to conform to current year presentation. Such reclassifications had no impact on the Company’s consolidated financial statements. Risks and Uncertainties The Company is subject to risks and uncertainties caused, directly or indirectly, by events with significant geopolitical and macroeconomic impacts, including, but not limited to, inflation; actions taken to counter inflation, including rising interest rates; foreign currency exchange rate fluctuations; uncertainty and volatility in the banking and financial services sector; tightening credit markets; geopolitical concerns, such as the Russia-Ukraine and Israel-Hamas conflicts and increasing tension between China and the U.S., including with respect to Taiwan; uncertainty caused by the China anti-corruption campaign and timing of the China stimulus program; the upcoming U.S. presidential election; and other factors that may emerge. In particular, the Company is also continuing to navigate supply chain and inflation challenges, and adverse foreign currency exchange rate fluctuations, all of which continues to be a significant headwind that affects the Company’s results of operations. The Company expects that the business of its customers and its own business will continue to be adversely impacted, directly or indirectly, by these macroeconomic and geopolitical issues. Delays in deliveries and installations that originated from the COVID-19 pandemic and its effects on the global economic environment may continue, to some degree, through the remainder of calendar year 2024, which could have a negative impact on our revenue during such period. In addition, ongoing supply chain challenges and logistics costs, including difficulties in obtaining a sufficient supply of component materials and increased component costs, have adversely affected the Company’s gross margins and net income (loss), and the Company’s current expectations are that gross margins and net income (loss) will continue to be adversely affected by increased material costs and freight and logistic expenses through at least the remainder of calendar year 2024, if not longer. In addition, the Company expects inflation and the ongoing supply chain challenges and logistics costs to impact its cash from operations through at least the remainder of calendar year 2024, if not longer. In addition, reduced budgets and lower capital deployment priority for radiotherapy equipment, along with longer customer installation timelines, in the United States have negatively impacted our revenue during fiscal year 2024, and we expect this will continue to have an impact through fiscal year 2026. Furthermore, certain parts required for the manufacturing and servicing of the Company's products, such as electronic components, are scarce and could be difficult to source, even at increased prices, if the supplier were adversely affected by macroeconomic and geopolitical issues. If such parts become unavailable to the Company, it would not be able to manufacture or service our products, which would adversely impact revenue, gross margins, and net income (loss). The extent of the ongoing impact of these macroeconomic events on our business, our markets and on global economic activity, however, is uncertain and the related financial impact cannot be reasonably estimated with any certainty at this time. The Company’s past results may not be indicative of its future performance, and historical trends, including conversion of backlog to revenue, income (loss) from operations, net income (loss), net income (loss) per share and cash flows may differ materially. The Company continues to critically review its liquidity and anticipated capital requirements in light of the significant uncertainty created by geopolitical and macroeconomic conditions. Based on the Company’s cash and cash equivalents balance, available debt facilities, current business plan and revenue prospects, the Company believes that it will have sufficient cash resources and anticipated cash flows to fund its operations for at least the next 12 months. The Company, however, is unable to predict with certainty the impact of geopolitical and macroeconomic conditions, including its effect on the global supply chain, inflation and foreign currency exchange rates, will have on its ability to maintain compliance with the debt covenants contained in the credit agreement related to its Credit Facilities (the "Credit Agreement"), including financial covenants regarding the consolidated fixed charge coverage ratio and consolidated senior net leverage ratio. On April 25, 2024, the Company entered into a Third Amendment (the “Third Amendment”) to the Credit Agreement to update the calculation of Consolidated EBITDA (as defined in the Credit Agreement) to maintain compliance with the debt covenants as of March 31, 2024. The Company was in compliance with such covenants at June 30, 2024. Failing to comply with the covenants to the Credit Agreement, as amended, could adversely affect the Company’s ability to finance its future operations or capital needs, withstand a future downturn in its business or the economy in general, engage in business activities, including future opportunities that may be in its interest, and plan for or react to market conditions or otherwise execute its business strategies. The Company’s ability to comply with the covenants and other terms governing the Credit Facilities will depend in part on its future operating performance. In addition, because substantially all of the Company’s assets are pledged as a security under the Credit Facilities, if the Company is not able to cure any default or repay outstanding borrowings, such assets are subject to the risk of foreclosure by the Company’s lenders. Failure to meet the covenant requirements in the future could cause the Company to be in default and the maturity of the related debt could be accelerated and become immediately payable. This may require the Company to obtain waivers or additional amendments to the Credit Agreement in order to maintain compliance and there can be no certainty that any such waiver or amendment will be available, or what the cost of such waiver or amendment, if obtained, would be. If the Company is unable to obtain necessary waivers or amendments and the debt under such credit facility is accelerated, the Company would be required to obtain replacement financing at prevailing market rates, which may not be favorable to the Company. There is no guarantee that the Company would be able to satisfy its obligations if any of its indebtedness is accelerated. Use of Estimates The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosures at the date of the financial statements. The Company assessed certain accounting matters that generally require consideration of forecasted financial information in context with the information reasonably available to the Company. Actual results could differ materially from those estimates. Foreign Currency The Company’s international subsidiaries use their local currencies as their functional currencies. For those subsidiaries, assets and liabilities are translated at exchange rates in effect at the balance sheet date and income and expense accounts at the average exchange rate. Resulting translation adjustments are excluded from the determination of net income or loss and are recorded in accumulated other comprehensive income (loss) as a separate component of stockholders’ equity. Net foreign currency exchange transaction gains or losses are included as a component of other expense, net, in the Company’s consolidated statements of operations and comprehensive income (loss). Cash,

Cash Equivalents and Restricted Cash The Company considers currency on hand, demand deposits, time deposits, and all highly liquid investments with an original maturity of three months or less at the date of purchase to be cash and cash equivalents. Cash and cash equivalents are held in various financial institutions in the United States and internationally. Restricted cash primarily consists of cash held in bank accounts which are under the control of the lender to the Credit Facilities, certificates of deposit held as guarantees in connection with customer contracts and corporate leases, and funds held as guarantees for Value-Added Tax ("VAT") obligations in a foreign jurisdiction. Fair Value Measurements The carrying values of the Company's financial instruments including cash equivalents, restricted cash, accounts receivable, and accounts payable, are approximately equal to their respective fair values due to the relatively short-term nature of these instruments. The Company's Credit Facilities approximated fair value due to variable interest rate charged on the borrowings, which reprice frequently. See Note 7, Fair Value Measurements, of the notes to consolidated financial statements for further information. Concentration of Credit Risk and Other Risks and Uncertainties The Company's cash and cash equivalents are primarily deposited with several major financial institutions. At times, deposits in these institutions exceed the amount of insurance provided on such deposits. The Company has not experienced any losses in such accounts and believes that it is not exposed to any significant risk on these balances. The Company had one customer that represented 10% or more of total net revenue for the years ended June 30, 2024, 2023, and 2022, respectively. The Company had one customer as of June 30, 2024 and June 30, 2023, respectively, that accounted for more than 10% of accounts receivable, net. Single-source suppliers presently provide the Company with several components. In most cases, if a supplier was unable to deliver these components, the Company believes that it would be able to find other sources for these components subject to any regulatory qualifications, if required. Accounts Receivable Accounts receivable consist of amounts billed and unbilled from customers and are recorded at the invoiced amount. The Company performs ongoing credit evaluations of its customers and maintains reserves for potential credit losses based upon the expected collectability of all accounts receivable. Accounts receivable are deemed past due in accordance with the contractual terms of the agreement. The Company writes off accounts receivable when they are determined to be uncollectible. Inventories Inventories are stated at the lower of cost (on a first-in, first-out basis) or net realizable value. Excess and obsolete inventories are written down based on historical sales and forecasted demand, as judged by management. Revenue Recognition The Company's revenue consists of product revenue resulting from the sale of systems, system upgrades and service revenue. The Company accounts for a contract with a customer when there is a legally enforceable contract between the Company and its customer, the rights of the parties are identified, the contract has commercial substance, and collectability of the contract consideration is probable. The Company's revenues are measured based on the consideration specified in the contract with each customer, net of any discounts and taxes collected from customers that are remitted to government authorities. The Company's revenue is primarily derived from sales of CyberKnife and TomoTherapy platforms and services, which include post-contract customer support ("PCS"), installation services, training and other professional services. The majority of the Company's revenue arrangements consist of multiple performance obligations, which can include system, upgrades, installation, training, services, construction, and consumables. For bundled arrangements, the Company accounts for individual products and services separately if a product or service is separately identifiable from other items in the bundled package and if a customer can benefit from it on its own or with other resources that are readily available to the customer. The Company's products are generally sold without a right of return, and the Company's contracts generally provide a fixed transaction price. The Company may offer incentives in the form of discounts, including volume system discounts, which are included in the contract and used to calculate the final fixed price of the arrangement. These discounts may pertain to all performance obligations in a specific contract or may be allocated to a specific performance obligation. The Company reviews payment terms extending beyond one year. If it is determined that a material financing component exists, we recognize this as interest income over time. The Company applies the practical expedient to not adjust for a material financing component if the gap between payment and delivery was expected, at the contract inception, to be less than one year. The Company offers customers the opportunity to trade in their older systems for a discount off the purchase of a new system. The Company generally does not provide specific trade-in prices or upgrade rights at the time of purchase of the original system. Trade-in or upgrade transactions are based on the fair value of the products when sold and are separately negotiated, taking into consideration circumstances existing at the time the trade-in or upgrade is delivered. Accordingly, implied trade-ins and upgrades discounts are not considered separate performance obligations in system sales agreements. During fiscal years 2024, 2023 and 2022, no fair value has been assigned to any of the systems that were traded-in. The stand-alone selling price ("SSP") of performance obligations is determined based on observable prices at which the Company separately sells the products and services. If the SSP is not directly observable, then the Company estimates the SSP considering market conditions, entity-specific factors, and information about the customer or class of customer that is reasonably available. The contract consideration allocation is based on the SSP at contract inception and updated should a significant contract modification occur. The consideration (net of any discounts) is allocated among separate products and services in a bundle based on their relative SSPs. Contract modifications typically add additional goods or services or change pricing. For such modifications, the most recent SSP is used for reallocation to the remaining performance obligations. The Company recognizes revenue for certain performance obligations at the point in time when control is transferred, such as the delivery and right to use the products and upgrades occurs. Service revenue is recognized over the term of the service period as the customer benefits from the services throughout the service period. Revenue related to services that are not part of a service contract and performed on a time-and-materials basis are recognized when performed. Service contracts comprise a single stand-ready performance obligation satisfied over time as our customers simultaneously receive and consume benefits from the Company's performance. This performance obligation constitutes a series of services that are substantially the same and provided over time using the same measure of progress. Revenues derived from these arrangements are recognized over time using an output method based upon the passage of time as this provides a faithful depiction of the pattern of transfer of control. The Company recognizes an asset for the incremental costs of obtaining a contract with a customer when the Company expects to generate future economic benefits from the related revenue-generating contracts. The Company capitalizes incremental contract acquisition costs, and amortizes such costs over a five year period, the period which the Company expects to benefit, based on historical service renewal rates, and expectations of future customer renewals. Most of the Company's contract costs are associated with its internal sales force compensation program and a portion of its employee bonus program. The Company capitalizes and amortizes the incremental costs of obtaining a contract, primarily related to certain bonuses and sales commissions. The capitalized bonuses and sales commissions are amortized over a period of five years commencing upon the initial transfer of control of the system to the customer. The pattern of amortization is commensurate with the pattern of transfer of control of the performance obligations to the customer. The amortization of these contract assets is included in cost of sales, research and development, sales and marketing, and general and administrative expenses based on department headcount allocations in the consolidated statements of operations. The Company elected to use the practical expedient and expense as incurred commissions related to service renewals and upgrades because the amortization period is one year or less. The Company invoices its customers based on the billing schedules in its sales arrangements. Payment terms vary from 30 to 90 days, or longer, from the date of invoice. Contract assets for the periods presented primarily represent the difference between the revenue that was recognized based on the relative standalone selling price of the related performance

obligations satisfied, and the contractual billing terms. Deferred revenue for periods presented primarily relates to service contracts where the service fees are billed up-front, generally quarterly or annually, prior to services being performed. The associated deferred revenue is generally recognized over the term of the service period.

The Company did not have any significant impairment losses on its contract assets for any period presented.

Deferred Revenue and Customer Advances

Deferred revenue represents the amount billed under an arrangement in excess of the amount of revenue recognized. It primarily consists of unfulfilled obligations from open contracts for which performance has already started including short-shipped items, deferred warranty, training, maintenance services and other unperformed or incomplete performance obligations. Service contracts outside of the warranty period, for maintenance services, in general, are considered month-to-month contracts. Deferred revenue includes deferred warranty expected to be recognized over the remaining warranty period for systems already installed.

Customer advances represent payments made by customers in advance of product shipment per the agreed upon contract terms.

Property and Equipment

Property and equipment are stated at cost and are depreciated using the straight-line method over the estimated useful lives of the related assets. Leasehold improvements are depreciated on a straight-line basis over the remaining term of the lease or the estimated useful life of the asset, whichever is shorter. Machinery and equipment are depreciated over five years*. Furniture and fixtures are depreciated over* four years*. Computer and office equipment and computer software are depreciated over* three years*. Repairs and maintenance costs, which are not considered improvements and do not extend the useful life of the property and equipment, are expensed as incurred.*

Software Capitalization Costs

Costs for the development of new software products and the substantial enhancements to existing software products for internal use are capitalized when it is considered probable that the software will be fully developed and used to perform its intended function. Capitalized costs for the development of internal use software are included in property, plant and equipment, net on the consolidated balance sheets. Capitalized costs for internal use software are amortized on a straight-line basis over its estimated useful life, which is generally five years. Costs related to the preliminary project stage, post-implementation, training and maintenance are expensed as incurred.

Costs for the development of software the Company plans to sell, lease or market on its own or as part of another product is capitalized once technological feasibility is achieved. The Company will capitalize costs until the product is ready to be sold, at which time, it will amortize the capitalized costs over the estimated useful life. Costs for the development of software the Company plans to sell is recorded in Other assets on the consolidated balance sheets.

Impairment of Long-Lived Assets

The Company reviews long-lived assets, including intangible assets, equity method investment in the JV, property and equipment, for impairment whenever events or changes in business circumstances indicate that the carrying amount of the assets may not be fully recoverable using pretax undiscounted cash flows. Impairment, if any, is measured as the amount by which the carrying value of a long-lived asset exceeds its fair value.

Goodwill

Goodwill is not amortized but is evaluated for impairment on an annual basis and when impairment indicators are present. The Company has assessed that it has one *operating segment and* one *reporting unit, and the consolidated net assets, including existing goodwill and other intangible assets, are considered to be the carrying value of the reporting unit. The Company estimates the fair value of the reporting unit based on the Company's closing stock price on the trading day closest to the annual review date multiplied by the outstanding shares on that date. If the carrying value of the reporting unit is in excess of its fair value, an impairment may exist, and the Company must perform the second step of the analysis, in which the estimated fair value of the goodwill is compared to its carrying value to determine the impairment charge, if any. If the estimated fair value of the reporting unit exceeds the carrying value of the reporting unit, goodwill is not impaired and no further analysis is required. There was* no *impairment of goodwill identified in the fiscal years ended* June 30, 2024, 2023 and 2022*.*

Shipping and Handling

The Company's billings for shipping and handling for product shipments to customers are included in cost of products. Shipping and handling costs incurred for inventory purchases are capitalized in inventory and expensed in cost of products.

Research and Development Costs

Costs related to research, design and development of products are charged to research and development expense as incurred. These costs include direct compensation, benefits, and other headcount related costs for research and development personnel, costs for materials used in research and development activities, costs for outside services, and allocated portions of facilities and other corporate costs.

The Company has entered into research and clinical study arrangements with selected hospitals, cancer treatment centers, academic institutions and research institutions worldwide. These agreements support the Company's internal research and development capabilities.

Share-Based Compensation

The Company issues share-based compensation awards to employees and directors in the form of stock options, restricted stock units ("RSUs"), performance units ("PSUs") and employee stock purchase plan ("ESPP") awards (collectively, "awards").

The exercise price of stock options granted is equal to the market value of the Company's common stock on the date of grant. Share-based compensation for stock options and ESPP awards are measured on the date of grant using a Black-Scholes option pricing model. Share-based compensation expense for RSUs and PSUs is measured based on the value of the Company's common stock on the date of grant.

The Company measures and recognizes compensation expense for all stock-based awards based on the awards' fair value. Share-based compensation expense for stock options, RSUs, and the ESPP awards is recognized on a straight-line basis over the service period of the award. Share-based compensation expense for PSUs is recognized on a straight-line basis over the period of time for the performance conditions to be satisfied and only for those awards expected to vest. *Forfeitures are recorded as they occur.*

Loss Contingencies

The Company is involved in various lawsuits, claims and proceedings that arise in the ordinary course of business. The Company records a provision for a liability when it believes that it is both probable that a liability has been incurred and the amount can be reasonably estimated. Significant judgment is required to determine both probability and the estimated amount. The Company reviews these provisions quarterly and adjusts these provisions to reflect the impact of negotiations, settlements, rulings, advice of legal counsel, and updated information.

Earnings Per Common Share

Basic earnings per share is computed based on the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share is computed based on the weighted average number of shares of common stock plus the effect of dilutive potential common shares outstanding during the period. Dilutive potential common shares include outstanding share awards. Potentially dilutive shares of the Company's common stock are excluded from the computation of diluted net loss per share for loss periods presented because including them would have been anti-dilutive. Dilutive earnings per share is the same as basic earnings per share for the periods in which the Company had a net loss because the inclusion of outstanding common stock would be anti-dilutive.

family:Times New Roman;min-width:fit-content;">A reconciliation of the numerator and denominator used in the calculation of basic and diluted net loss per share attributable to stockholders is as follows (in thousands): <table style="margin-left:auto;border-spacing:0;table-layout:fixed;width:100.0%;border-collapse:separate;margin-right:auto;"> <tr style="visibility:collapse;"> <td align:right;">(0.16 </td> <td style="white-space:nowrap;vertical-align:bottom;border-bottom:2.25pt double #ffffff03;">) </td> <td style="white-space:pre-wrap;vertical-align:bottom;"> </td> <td style="white-space:nowrap;vertical-align:bottom;border-bottom:2.25pt double #000000;"> $</p></td> <td style="white-space:pre-wrap;vertical-align:bottom;border-bottom:2.25pt double #000000;text-align:center;"><p style="font-size:10pt;margin-top:0;font-family:Times New Roman;margin-bottom:0;text-align:right;">(0.10</p></td> <td style="white-space:nowrap;vertical-align:bottom;border-bottom:2.25pt double #ffffff03;"><p style="font-size:10pt;margin-top:0;font-family:Times New Roman;margin-bottom:0;text-align:left;">)</p></td> <td style="white-space:pre-wrap;vertical-align:bottom;"><p style="font-size:10pt;margin-top:0;font-family:Times New Roman;margin-bottom:0;text-align:left;"> </p></td> <td style="white-space:nowrap;vertical-align:bottom;border-bottom:2.25pt double #000000;"><p style="font-size:10pt;margin-top:0;font-family:Times New Roman;margin-bottom:0;text-align:left;"><span style="color:#000000;min-width:fit-content;">$ </td> <td style="white-space:pre-wrap;vertical-align:bottom;border-bottom:2.25pt double #000000;text-align:center;"> (0.06 </td> <td style="white-space:nowrap;vertical-align:bottom;border-bottom:2.25pt double #ffffff03;">) </td> </tr> <tr style="height:10pt;background-color:#ffffff;word-break:break-word;"> <td style="white-space:pre-wrap;vertical-align:top;"> Anti-dilutive share-based awards, excluded </td> <td style="white-space:pre-wrap;vertical-align:bottom;"> </td> <td style="white-space:nowrap;vertical-align:bottom;"> </td> <td style="white-space:pre-wrap;vertical-align:bottom;text-align:center;"> 14,052 </td> <td style="white-space:nowrap;vertical-align:bottom;"> </td> <td style="white-space:pre-wrap;vertical-align:bottom;"> </td> <td style="white-space:nowrap;vertical-align:bottom;"> </td> <td style="white-space:pre-wrap;vertical-align:bottom;text-align:center;"> 12,862 </td> <td style="white-space:nowrap;vertical-align:bottom;"> </td> <td style="white-space:pre-wrap;vertical-align:bottom;"> </td> <td style="white-space:nowrap;vertical-align:bottom;"> </td> <td style="white-space:pre-wrap;vertical-align:bottom;text-align:center;"> 12,828 </td> <td style="white-space:nowrap;vertical-align:bottom;"> </td> </tr> </table> Outstanding Convertible Notes—Diluted Share Impact Due to the optional cash settlement feature and management's intent to settle the principal amount thereof, in cash, the shares of common stock issuable upon conversion of the outstanding principal amount of the 3.75% Convertible Senior Notes due 2026 and the 3.75% Convertible Senior Notes due 2022 (collectively, the "Notes") are included in the calculation of diluted net income (loss) per share only if their inclusion is dilutive for periods during which the Notes were outstanding. The shares of common stock issuable upon conversion of the outstanding principal amount of the Notes as of June 30, 2024, 2023 and 2022 were 17.1 million, 17.1 million and 17.6 million, respectively, and were not included in the basic and diluted net loss per common share as the effect of adding the shares were anti-dilutive. See Note 9, Debt, of the consolidated financial statements for more information about the Notes. Leases The Company is the lessee in a lease contract when the Company obtains the right to use the asset. Operating leases are included in the line items right-of-use assets, lease liabilities, current, and lease liabilities, long-term in the consolidated balance sheet. Right-of-use asset represents the Company's right to use an underlying asset for the lease term and lease obligations represent the Company's obligations to make lease payments arising from the lease, both of which are recognized based on the present value of the future minimum lease payments over the lease term at the commencement date. Leases with a lease term of 12 months or less at inception are not recorded on the consolidated balance sheet and are expensed on a straight-line basis over the lease term in the consolidated statements of operations. The Company determines the lease term by agreement with lessor, including lease renewal and extension. As the leases do not provide an implicit interest rate, the Company uses its incremental borrowing rate based on the information available at commencement date in determining the present value of future payments. The Company elected a practical expedient to account for lease and non-lease components together as a single lease component. Equity Method Investment The Company has an equity investment in CNNC Accuray (Tianjin) Medical Technology Co. Ltd., the Company's JV. The Company applies the equity method of accounting to its ownership interest in the JV as the Company has the ability to exercise significant influence over the JV but lacks controlling financial interest and is not the primary beneficiary. The Company's investment in the JV is measured at cost and adjusted for the Company's share of the JV's income or loss, intra-entity profits, dividend distributions, currency translation adjustments, and impairments, if any. The Company recognizes its proportionate share of income or loss from the JV on a one-quarter lag due to the timing of the availability of the JV's financial records. Profit earned by the Company from the JV is eliminated through cost of goods sold until it is realized; such profits would generally be considered realized when the inventory has been sold through to third parties. The JV's equity method goodwill is not amortized but is evaluated for impairment on an annual basis and when impairment indicators are present. Our impairment analysis considers qualitative and quantitative factors that may have a significant impact on the JV's fair value. Qualitative factors include the investee's financial condition and business outlook, industry and sector performance, operational and financing cash flow activities, and other relevant factors affecting the JV. When indicators of impairment exist, we prepare quantitative assessments of the fair value of our non-marketable equity investments, which require judgment and the use of estimates, including discount rates, investee revenue and costs, and comparable market data, among others. Income Taxes The Company is required to estimate its income taxes in each of the tax jurisdictions in which it operates prior to the completion and filing of tax returns for such periods. This process involves estimating actual current tax expense together with assessing temporary differences in the treatment of items for tax purposes versus financial accounting purposes that may create net deferred tax assets and liabilities. The Company accounts for income taxes under the asset and liability method, which requires, among other things, that deferred income taxes be provided for temporary differences between the tax bases of the Company's assets and liabilities and their financial statement reported amounts. In addition, deferred tax assets are recorded for the future benefit of utilizing net operating losses, research and development credit carryforwards and other deferred tax assets. The Company records a valuation allowance to reduce its deferred tax assets to the amount the Company believes is more likely than not to be realized. Because of the uncertainty of the realization of the deferred tax assets, the Company has recorded a full valuation allowance against its domestic and certain foreign net deferred tax assets. The calculation of unrecognized tax benefits involves dealing with uncertainties in the application of complex global tax regulations. Management regularly assesses the Company's tax positions in light of legislative, bilateral tax treaty, regulatory and judicial developments in the countries in which the Company does business. The Company anticipates there will be no material changes in uncertain tax positions in the next 12 months. Accumulated Other Comprehensive Income (Loss) <span

style="color:#000000;white-space:pre-wrap;font-size:10pt;font-family:Times New Roman;min-width:fit-content;">The components of comprehensive income (loss) consist of net income (loss), changes in foreign currency exchange rate translation and net changes related to a defined benefit pension plan. The changes in foreign currency exchange rate translation and net changes related to the defined benefit pension plan are excluded from earnings and reported as a component of stockholders' equity. The foreign currency translation adjustment results from those subsidiaries not using the United States dollar as their functional currency since the majority of their economic activities are denominated in their applicable local currency. Accordingly, all assets and liabilities related to these operations are translated at the current exchange rates at the end of each period, whereas revenues and expenses are translated at average exchange rates in effect during the period. The resulting cumulative translation adjustments are recorded directly to the accumulated other comprehensive loss account in stockholders' equity. Recent Accounting Pronouncements Accounting Pronouncements Not Yet Effective In December 2023, the Financial Accounting Standards Board ("FASB") issued a new accounting standard update ("ASU") 2023-09 to improve the transparency and usefulness of income tax disclosures. The accounting standard expands disclosures to the entity's income tax rate reconciliation table and requires cash taxes paid disaggregated by jurisdiction. These changes will be applied on a prospective basis. The update is effective for fiscal years beginning after December 15, 2024, with early adoption permitted. The Company plans to adopt ASU 2023-09 on July 1, 2025. The ASU requires retrospective application to all prior periods presented in the financial statements. The Company is currently assessing the timing and impact of adopting the updated provisions. In November 2023, the FASB issued ASU 2023-07 to improve reportable segment disclosures. The ASU is intended to improve reportable segment disclosure requirements, primarily through enhanced disclosures about significant expenses. The ASU requires disclosures to include significant segment expenses that are regularly provided to the chief operating decision maker ("CODM"), a description of other segment items by reportable segment, and any additional measures of a segment's profit or loss used by the CODM when deciding how to allocate resources. The ASU also requires all annual disclosures to be disclosed in interim periods. The update will be effective for fiscal years beginning after December 15, 2023 and interim periods within fiscal years beginning after December 15, 2024. The Company adopted ASU 2023-07 on July 1, 2024. The Company has assessed the impact of this update and it believes that it will not have a material impact on its consolidated financial statement disclosure requirements. Basis of Presentation and Principles of Consolidation The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation. The accompanying consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles ("U.S. GAAP"), pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC"). Reclassifications Certain amounts in the notes to consolidated financial statements have been reclassified to conform to current year presentation. Such reclassifications had no impact on the Company's consolidated financial statements. Risks and Uncertainties The Company is subject to risks and uncertainties caused, directly or indirectly, by events with significant geopolitical and macroeconomic impacts, including, but not limited to, inflation; actions taken to counter inflation, including rising interest rates; foreign currency exchange rate fluctuations; uncertainty and volatility in the banking and financial services sector; tightening credit markets; geopolitical concerns, such as the Russia-Ukraine and Israel-Hamas conflicts and increasing tension between China and the U.S., including with respect to Taiwan; uncertainty caused by the China anti-corruption campaign and timing of the China stimulus program; the upcoming U.S. presidential election; and other factors that may emerge. In particular, the Company is also continuing to navigate supply chain and inflation challenges, and adverse foreign currency exchange rate fluctuations, all of which continues to be a significant headwind that affects the Company's results of operations. The Company expects that the business of its customers and its own business will continue to be adversely impacted, directly or indirectly, by these macroeconomic and geopolitical issues. Delays in deliveries and installations that originated from the COVID-19 pandemic and its effects on the global economic environment may continue, to some degree, through the remainder of calendar year 2024, which could have a negative impact on our revenue during such period. In addition, ongoing supply chain challenges and logistics costs, including difficulties in obtaining a sufficient supply of component materials and increased component costs, have adversely affected the Company's gross margins and net income (loss), and the Company's current expectations are that gross margins and net income (loss) will continue to be adversely affected by increased material costs and freight and logistic expenses through at least the remainder of calendar year 2024, if not longer. In addition, the Company expects inflation and the ongoing supply chain challenges and logistics costs to impact its cash from operations through at least the remainder of calendar year 2024, if not longer. In addition, reduced budgets and lower capital deployment priority for radiotherapy equipment, along with longer customer installation timelines, in the United States have negatively impacted our revenue during fiscal year 2024, and we expect this will continue to have an impact through fiscal year 2026. Furthermore, certain parts required for the manufacturing and servicing of the Company's products, such as electronic components, are scarce and could be difficult to source, even at increased prices, if the supplier were adversely affected by macroeconomic and geopolitical issues. If such parts become unavailable to the Company, it would not be able to manufacture or service our products, which would adversely impact revenue, gross margins, and net income (loss). The extent of the ongoing impact of these macroeconomic events on our business, our markets and on global economic activity, however, is uncertain and the related financial impact cannot be reasonably estimated with any certainty at this time. The Company's past results may not be indicative of its future performance, and historical trends, including conversion of backlog to revenue, income (loss) from operations, net income (loss), net income (loss) per share and cash flows may differ materially. The Company continues to critically review its liquidity and anticipated capital requirements in light of the significant uncertainty created by geopolitical and macroeconomic conditions. Based on the Company's cash and cash equivalents balance, available debt facilities, current business plan and revenue prospects, the Company believes that it will have sufficient cash resources and anticipated cash flows to fund its operations for at least the next 12 months. The Company, however, is unable to predict with certainty the impact of geopolitical and macroeconomic conditions, including its effect on the global supply chain, inflation and foreign currency exchange rates, will have on its ability to maintain compliance with the debt covenants contained in the credit agreement related to its Credit Facilities (the "Credit Agreement"), including financial covenants regarding the consolidated fixed charge coverage ratio and consolidated senior net leverage ratio. On April 25, 2024, the Company entered into a Third Amendment (the "Third Amendment") to the Credit Agreement to update the calculation of Consolidated EBITDA (as defined in the Credit Agreement) to maintain compliance with the debt covenants as of March 31, 2024. The Company was in compliance with such covenants at June 30, 2024. Failing to comply with the covenants to the Credit Agreement, as amended, could adversely affect the Company's ability to finance its future operations or capital needs, withstand a future downturn in its business or the economy in general, engage in business activities, including future opportunities that may be in its interest, and plan for or react to market conditions or otherwise execute its business strategies. The Company's ability to comply with the covenants and other terms governing the Credit Facilities will depend in part on its future operating performance. In addition, because substantially all of the Company's assets are pledged as a security under the Credit Facilities, if the Company is not able to cure any default or repay outstanding borrowings, such assets are subject to the risk of foreclosure by the Company's lenders. Failure to meet the covenant requirements in the future could cause the Company to be in default and the maturity of the related debt could be accelerated and become immediately payable. This may require the Company to obtain waivers or additional amendments to the Credit Agreement in order to maintain compliance and there can be no certainty that any such waiver or amendment will be available, or what the cost of such waiver or amendment, if obtained, would be. If the Company is unable to obtain necessary waivers or amendments and the debt under such credit facility is accelerated, the Company would be required to obtain replacement financing at prevailing market rates, which may not be favorable to the Company. There is no guarantee that the Company would be able to satisfy its obligations if any of its indebtedness is accelerated. Use of Estimates The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosures at the date of the financial statements. The Company assessed certain accounting matters that generally require consideration of forecasted financial information in context with the information reasonably available to the Company. Actual results could differ materially from those estimates. Foreign Currency The Company's international subsidiaries use their local currencies as their functional currencies. For those subsidiaries, assets and liabilities are translated at exchange rates in effect at the balance sheet date and income and expense accounts at the average exchange rate. Resulting translation adjustments are excluded from the determination of net income or loss and are recorded in accumulated other comprehensive income (loss) as a separate component of stockholders' equity. Net foreign currency exchange transaction gains or losses are included as a component of other expense, net, in the Company's consolidated statements of operations and comprehensive income (loss). Cash, Cash Equivalents and Restricted Cash The Company considers currency on hand, demand deposits, time deposits, and all highly liquid investments with an original maturity of three months or less at the date of purchase to be cash and cash equivalents. Cash and cash equivalents are held in various financial institutions in the United States and internationally.

* Restricted cash primarily consists of cash held in bank accounts which are under the control of the lender to the Credit Facilities, certificates of deposit held as guarantees in connection with customer contracts and corporate leases, and funds held as guarantees for Value-Added Tax ("VAT") obligations in a foreign jurisdiction. Fair Value Measurements The carrying values of the Company's financial instruments including cash equivalents, restricted cash, accounts receivable, and accounts payable, are approximately equal to their respective fair values due to the relatively short-term nature of these instruments. The Company's Credit Facilities approximated fair value due to variable interest rate charged on the borrowings, which reprice frequently. See Note 7. Fair Value Measurements, of the notes to consolidated financial statements for further information. Concentration of Credit Risk and Other Risks and Uncertainties The Company's cash and cash equivalents are primarily deposited with several major financial institutions. At times, deposits in these institutions exceed the amount of insurance provided on such deposits. The Company has not experienced any losses in such accounts and believes that it is not exposed to any significant risk on these balances. The Company had one customer that represented 10% or more of total net revenue for the years ended June 30, 2024, 2023, and 2022, respectively. The Company had one customer as of June 30, 2024 and June 30, 2023, respectively, that accounted for more than 10% of accounts receivable, net. Single-source suppliers presently provide the Company with several components. In most cases, if a supplier was unable to deliver these components, the Company believes that it would be able to find other sources for these components subject to any regulatory qualifications, if required. 1 1 1 0.10 0.10 0.10 1 1 0.10 0.10 Accounts Receivable Accounts receivable consist of amounts billed and unbilled from customers and are recorded at the invoiced amount. The Company performs ongoing credit evaluations of its customers and maintains reserves for potential credit losses based upon the expected collectability of all accounts receivable. Accounts receivable are deemed past due in accordance with the contractual terms of the agreement. The Company writes off accounts receivable when they are determined to be uncollectible. Inventories Inventories are stated at the lower of cost (on a first-in, first-out basis) or net realizable value. Excess and obsolete inventories are written down based on historical sales and forecasted demand, as judged by management. Revenue Recognition The Company's revenue consists of product revenue resulting from the sale of systems, system upgrades and service revenue. The Company accounts for a contract with a customer when there is a legally enforceable contract between the Company and its customer, the rights of the parties are identified, the contract has commercial substance, and collectability of the contract consideration is probable. The Company's revenues are measured based on the consideration specified in the contract with each customer, net of any discounts and taxes collected from customers that are remitted to government authorities. The Company's revenue is primarily derived from sales of CyberKnife and TomoTherapy platforms and services, which include post-contract customer support ("PCS"), installation services, training and other professional services. The majority of the Company's revenue arrangements consist of multiple performance obligations, which can include system, upgrades, installation, training, services, construction, and consumables. For bundled arrangements, the Company accounts for individual products and services separately if a product or service is separately identifiable from other items in the bundled package and if a customer can benefit from it on its own or with other resources that are readily available to the customer. The Company's products are generally sold without a right of return, and the Company's contracts generally provide a fixed transaction price. The Company may offer incentives in the form of discounts, including volume system discounts, which are included in the contract and used to calculate the final fixed price of the arrangement. These discounts may pertain to all performance obligations in a specific contract or may be allocated to a specific performance obligation. The Company reviews payment terms extending beyond one year. If it is determined that a material financing component exists, we recognize this as interest income over time. The Company applies the practical expedient to not adjust for a material financing component if the gap between payment and delivery was expected, at the contract inception, to be less than one year. The Company offers customers the opportunity to trade in their older systems for a discount off the purchase of a new system. The Company generally does not provide specific trade-in prices or upgrade rights at the time of purchase of the original system. Trade-in or upgrade transactions are based on the fair value of the products when sold and are separately negotiated, taking into consideration circumstances existing at the time the trade-in or upgrade is delivered. Accordingly, implied trade-ins and upgrades discounts are not considered separate performance obligations in system sales agreements. During fiscal years 2024, 2023 and 2022, no fair value has been assigned to any of the systems that were traded-in. The stand-alone selling price ("SSP") of performance obligations is determined based on observable prices at which the Company separately sells the products and services. If the SSP is not directly observable, then the Company estimates the SSP considering market conditions, entity-specific factors, and information about the customer or class of customer that is reasonably available. The contract consideration allocation is based on the SSP at contract inception and updated should a significant contract modification occur. The consideration (net of any discounts) is allocated among separate products and services in a bundle based on their relative SSPs. Contract modifications typically add additional goods or services or change pricing. For such modifications, the most recent SSP is used for reallocation to the remaining performance obligations. The Company recognizes revenue for certain performance obligations at the point in time when control is transferred, such as the delivery and right to use the products and upgrades occurs. Service revenue is recognized over the term of the service period as the customer benefits from the services throughout the service period. Revenue related to services that are not part of a service contract and performed on a time-and-materials basis are recognized when performed. Service contracts comprise a single stand-ready performance obligation satisfied over time as our customers simultaneously receive and consume benefits from the Company's performance. This performance obligation constitutes a series of services that are substantially the same and provided over time using the same measure of progress. Revenues derived from these arrangements are recognized over time using an output method based upon the passage of time as this provides a faithful depiction of the pattern of transfer of control. The Company recognizes an asset for the incremental costs of obtaining a contract with a customer when the Company expects to generate future economic benefits from the related revenue-generating contracts. The Company capitalizes incremental contract acquisition costs, and amortizes such costs over a five year period, the period which the Company expects to benefit, based on historical service renewal rates, and expectations of future customer renewals. Most of the Company's contract costs are associated with its internal sales force compensation program and a portion of its employee bonus program. The Company capitalizes and amortizes the incremental costs of obtaining a contract, primarily related to certain bonuses and sales commissions. The capitalized bonuses and sales commissions are amortized over a period of five years commencing upon the initial transfer of control of the system to the customer. The pattern of amortization is commensurate with the pattern of transfer of control of the performance obligations to the customer. The amortization of these contract assets is included in cost of sales, research and development, sales and marketing, and general and administrative expenses based on department headcount allocations in the consolidated statements of operations. The Company elected to use the practical expedient and expense as incurred commissions related to service renewals and upgrades because the amortization period is one year or less. The Company invoices its customers based on the billing schedules in its sales arrangements. Payment terms vary from 30 to 90 days, or longer, from the date of invoice. Contract assets for the periods presented primarily represent the difference between the revenue that was recognized based on the relative standalone selling price of the related performance obligations satisfied, and the contractual billing terms. Deferred revenue for periods presented primarily relates to service contracts where the service fees are billed up-front, generally quarterly or annually, prior to services being performed. The associated deferred revenue is generally recognized over the term of the service period. The Company did not have any significant impairment losses on its contract assets for any period presented. Deferred Revenue and Customer Advances <p style="text-*

indent:2.267%;font-size:10pt;margin-top:12pt;font-family:Times New Roman;margin-bottom:0;text-align:left;">Deferred revenue represents the amount billed under an arrangement in excess of the amount of revenue recognized. It primarily consists of unfulfilled obligations from open contracts for which performance has already started including short-shipped items, deferred warranty, training, maintenance services and other unperformed or incomplete performance obligations. Service contracts outside of the warranty period, for maintenance services, in general, are considered month-to-month contracts. Deferred revenue includes deferred warranty expected to be recognized over the remaining warranty period for systems already installed. Customer advances represent payments made by customers in advance of product shipment per the agreed upon contract terms. Property and Equipment Property and equipment are stated at cost and are depreciated using the straight-line method over the estimated useful lives of the related assets. Leasehold improvements are depreciated on a straight-line basis over the remaining term of the lease or the estimated useful life of the asset, whichever is shorter. Machinery and equipment are depreciated over five years. Furniture and fixtures are depreciated over four years. Computer and office equipment and computer software are depreciated over three years. Repairs and maintenance costs, which are not considered improvements and do not extend the useful life of the property and equipment, are expensed as incurred. P5Y P4Y P3Y P3Y Software Capitalization Costs Costs for the development of new software products and the substantial enhancements to existing software products for internal use are capitalized when it is considered probable that the software will be fully developed and used to perform its intended function. Capitalized costs for the development of internal use software are included in property, plant and equipment, net on the consolidated balance sheets. Capitalized costs for internal use software are amortized on a straight-line basis over its estimated useful life, which is generally five years. Costs related to the preliminary project stage, post-implementation, training and maintenance are expensed as incurred. Costs for the development of software the Company plans to sell, lease or market on its own or as part of another product is capitalized once technological feasibility is achieved. The Company will capitalize costs until the product is ready to be sold, at which time, it will amortize the capitalized costs over the estimated useful life. Costs for the development of software the Company plans to sell is recorded in Other assets on the consolidated balance sheets. Impairment of Long-Lived Assets The Company reviews long-lived assets, including intangible assets, equity method investment in the JV, property and equipment, for impairment whenever events or changes in business circumstances indicate that the carrying amount of the assets may not be fully recoverable using pretax undiscounted cash flows. Impairment, if any, is measured as the amount by which the carrying value of a long-lived asset exceeds its fair value. Goodwill Goodwill is not amortized but is evaluated for impairment on an annual basis and when impairment indicators are present. The Company has assessed that it has one operating segment and one reporting unit, and the consolidated net assets, including existing goodwill and other intangible assets, are considered to be the carrying value of the reporting unit. The Company estimates the fair value of the reporting unit based on the Company's closing stock price on the trading day closest to the annual review date multiplied by the outstanding shares on that date. If the carrying value of the reporting unit is in excess of its fair value, an impairment may exist, and the Company must perform the second step of the analysis, in which the estimated fair value of the goodwill is compared to its carrying value to determine the impairment charge, if any. If the estimated fair value of the reporting unit exceeds the carrying value of the reporting unit, goodwill is not impaired and no further analysis is required. There was no impairment of goodwill identified in the fiscal years ended June 30, 2024, 2023 and 2022. 1 1 0 0 0 Shipping and Handling The Company's billings for shipping and handling for product shipments to customers are included in cost of products. Shipping and handling costs incurred for inventory purchases are capitalized in inventory and expensed in cost of products. Research and Development Costs Costs related to research, design and development of products are charged to research and development expense as incurred. These costs include direct compensation, benefits, and other headcount related costs for research and development personnel, costs for materials used in research and development activities, costs for outside services, and allocated portions of facilities and other corporate costs. The Company has entered into research and clinical study arrangements with selected hospitals, cancer treatment centers, academic institutions and research institutions worldwide. These agreements support the Company's internal research and development capabilities. Share-Based Compensation The Company issues share-based compensation awards to employees and directors in the form of stock options, restricted stock units ("RSUs"), performance units ("PSUs") and employee stock purchase plan ("ESPP") awards (collectively, "awards"). The exercise price of stock options granted is equal to the market value of the Company's common stock on the date of grant. Share-based compensation for stock options and ESPP awards are measured on the date of grant using a Black-Scholes option pricing model. Share-based compensation expense for RSUs and PSUs is measured based on the value of the Company's common stock on the date of grant. The Company measures and recognizes compensation expense for all stock-based awards based on the awards' fair value. Share-based compensation expense for stock options, RSUs, and the ESPP awards is recognized on a straight-line basis over the service period of the award. Share-based compensation expense for PSUs is recognized on a straight-line basis over the period of time for the performance conditions to be satisfied and only for those awards expected to vest. Forfeitures are recorded as they occur. Loss Contingencies The Company is involved in various lawsuits, claims and proceedings that arise in the ordinary course of business. The Company records a provision for a liability when it believes that it is both probable that a liability has been incurred and the amount can be reasonably estimated. Significant judgment is required to determine both probability and the estimated amount. The Company reviews these provisions quarterly and adjusts these provisions to reflect the impact of negotiations, settlements, rulings, advice of legal counsel, and updated information. Earnings Per Common Share Basic earnings per share is computed based on the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share is computed based on the weighted average number of shares of common stock plus the effect of dilutive potential common shares outstanding during the period. Dilutive potential common shares include outstanding share awards. Potentially dilutive shares of the Company's common stock are excluded from the computation of diluted net loss per share for loss periods presented because including them would have been anti-dilutive. Dilutive earnings per share is the same as basic earnings per share for the periods in which the Company had a net loss because the inclusion of outstanding common stock would be anti-dilutive. A reconciliation of the numerator and denominator used in the calculation of basic and diluted net loss per share attributable to stockholders is as follows (in thousands): <table style="margin-left:auto;border-spacing:0;table-layout:fixed;width:100.0%;border-collapse:separate;margin-right:auto;"><tr style="visibility:collapse;"><td style="width:64.546%;"></td><td style="width:1.601%;"></td><td style="width:1%;"></td><td style="width:8.363000000000001%;"></td><td style="width:1%;"></td><td style="width:1.601%;"></td><td style="width:1%;"></td><td style="width:8.363000000000001%;"></td><td style="width:1%;"></td><td style="width:1.16%;"></td><td style="width:1%;"></td><td style="width:8.363000000000001%;"></td><td style="width:1%;"></td></tr><tr style="height:8pt;background-color:#ffffff;white-space:pre-wrap;word-break:break-word;text-align:left;"><td style="vertical-align:bottom;"> </td><td style="vertical-align:bottom;"><p style="font-size:8pt;margin-top:0;font-family:Times New

98272000 94884000 94884000 92095000 92095000 -0.16 -0.16 -0.1 -0.1 -0.06 -0.06 14052000 12862000 12828000 0.0375 0.0375 17100000 17100000 17600000 Leases The Company is the lessee in a lease contract when the Company obtains the right to use the asset. Operating leases are included in the line items right-of-use assets, lease liabilities, current, and lease liabilities, long-term in the consolidated balance sheet. Right-of-use asset represents the Company's right to use an underlying asset for the lease term and lease obligations represent the Company's obligations to make lease payments arising from the lease, both of which are recognized based on the present value of the future minimum lease payments over the lease term at the commencement date. Leases with a lease term of 12 months or less at inception are not recorded on the consolidated balance sheet and are expensed on a straight-line basis over the lease term in the consolidated statements of operations. The Company determines the lease term by agreement with lessor, including lease renewal and extension. As the leases do not provide an implicit interest rate, the Company uses its incremental borrowing rate based on the information available at commencement date in determining the present value of future payments. The Company elected a practical expedient to account for lease and non-lease components together as a single lease component. Equity Method Investment The Company has an equity investment in CNNC Accuray (Tianjin) Medical Technology Co. Ltd., the Company's JV. The Company applies the equity method of accounting to its ownership interest in the JV as the Company has the ability to exercise significant influence over the JV but lacks controlling financial interest and is not the primary beneficiary. The Company's investment in the JV is measured at cost and adjusted for the Company's share of the JV's income or loss, intra-entity profits, dividend distributions, currency translation adjustments, and impairments, if any. The Company recognizes its proportionate share of income or loss from the JV on a one-quarter lag due to the timing of the availability of the JV's financial records. Profit earned by the Company from the JV is eliminated through cost of goods sold until it is realized; such profits would generally be considered realized when the inventory has been sold through to third parties. <span style="color:#212529;white-space:pre-wrap;font-size:10pt;font-

family:Times New Roman;min-width:fit-content;">The JV's equity method goodwill is not amortized but is evaluated for impairment on an annual basis and when impairment indicators are present. Our impairment analysis considers qualitative and quantitative factors that may have a significant impact on the JV's fair value. Qualitative factors include the investee's financial condition and business outlook, industry and sector performance, operational and financing cash flow activities, and other relevant factors affecting the JV. When indicators of impairment exist, we prepare quantitative assessments of the fair value of our non-marketable equity investments, which require judgment and the use of estimates, including discount rates, investee revenue and costs, and comparable market data, among others. Income Taxes The Company is required to estimate its income taxes in each of the tax jurisdictions in which it operates prior to the completion and filing of tax returns for such periods. This process involves estimating actual current tax expense together with assessing temporary differences in the treatment of items for tax purposes versus financial accounting purposes that may create net deferred tax assets and liabilities. The Company accounts for income taxes under the asset and liability method, which requires, among other things, that deferred income taxes be provided for temporary differences between the tax bases of the Company's assets and liabilities and their financial statement reported amounts. In addition, deferred tax assets are recorded for the future benefit of utilizing net operating losses, research and development credit carryforwards and other deferred tax assets. The Company records a valuation allowance to reduce its deferred tax assets to the amount the Company believes is more likely than not to be realized. Because of the uncertainty of the realization of the deferred tax assets, the Company has recorded a full valuation allowance against its domestic and certain foreign net deferred tax assets. The calculation of unrecognized tax benefits involves dealing with uncertainties in the application of complex global tax regulations. Management regularly assesses the Company's tax positions in light of legislative, bilateral tax treaty, regulatory and judicial developments in the countries in which the Company does business. The Company anticipates there will be no material changes in uncertain tax positions in the next 12 months. P12M Accumulated Other Comprehensive Income (Loss) The components of comprehensive income (loss) consist of net income (loss), changes in foreign currency exchange rate translation and net changes related to a defined benefit pension plan. The changes in foreign currency exchange rate translation and net changes related to the defined benefit pension plan are excluded from earnings and reported as a component of stockholders' equity. The foreign currency translation adjustment results from those subsidiaries not using the United States dollar as their functional currency since the majority of their economic activities are denominated in their applicable local currency. Accordingly, all assets and liabilities related to these operations are translated at the current exchange rates at the end of each period, whereas revenues and expenses are translated at average exchange rates in effect during the period. The resulting cumulative translation adjustments are recorded directly to the accumulated other comprehensive loss account in stockholders' equity. Recent Accounting Pronouncements Accounting Pronouncements Not Yet Effective In December 2023, the Financial Accounting Standards Board ("FASB") issued a new accounting standard update ("ASU") 2023-09 to improve the transparency and usefulness of income tax disclosures. The accounting standard expands disclosures to the entity's income tax rate reconciliation table and requires cash taxes paid disaggregated by jurisdiction. These changes will be applied on a prospective basis. The update is effective for fiscal years beginning after December 15, 2024, with early adoption permitted. The Company plans to adopt ASU 2023-09 on July 1, 2025. The ASU requires retrospective application to all prior periods presented in the financial statements. The Company is currently assessing the timing and impact of adopting the updated provisions. In November 2023, the FASB issued ASU 2023-07 to improve reportable segment disclosures. The ASU is intended to improve reportable segment disclosure requirements, primarily through enhanced disclosures about significant expenses. The ASU requires disclosures to include significant segment expenses that are regularly provided to the chief operating decision maker ("CODM"), a description of other segment items by reportable segment, and any additional measures of a segment's profit or loss used by the CODM when deciding how to allocate resources. The ASU also requires all annual disclosures to be disclosed in interim periods. The update will be effective for fiscal years beginning after December 15, 2023 and interim periods within fiscal years beginning after December 15, 2024. The Company adopted ASU 2023-07 on July 1, 2024. The Company has assessed the impact of this update and it believes that it will not have a material impact on its consolidated financial statement disclosure requirements. Note 2. Revenue Contract Balances The timing of revenue recognition, billings, and cash collections results in trade receivables, unbilled receivables, and deferred revenues on the consolidated balance sheets. The Company may offer longer or extended payment terms of more than one year for qualified customers in some circumstances. At times, revenue recognition occurs before the billing, resulting in an unbilled receivable, which represents a contract asset. The contract asset is a component of accounts receivable and other assets for the current and non-current portions, respectively. When the Company receives advances or deposits from customers before revenue is recognized, this results in a contract liability. It can take two or more years from the time of order to revenue recognition due to the Company's long sales cycle. Changes in the contract assets and contract liabilities are as follows (dollars in thousands):   <table style="margin-left:auto;border-spacing:0;table-layout:fixed;width:100.0%;border-collapse:separate;margin-right:auto;"> <tr style="visibility:collapse;"> <td style="width:50.09%;"></td> <td style="width:1.241%;"></td> <td style="width:1%;"></td> <td style="width:9.347%;"></td> <td style="width:1%;"></td> <td style="width:1.241%;"></td> <td style="width:1%;"></td> <td style="width:9.347%;"></td> <td style="width:1%;"></td> <td style="width:1.221%;"></td> <td style="width:1%;"></td> <td style="width:9.126999999999999%;"></td> <td style="width:1%;"></td> <td style="width:1.221%;"></td> <td style="width:1%;"></td> <td style="width:9.166999999999998%;"></td> <td style="width:1%;"></td> </tr> <tr style="height:8pt;background-color:#ffffff;white-space:pre-wrap;word-break:break-word;"> <td style="vertical-align:bottom;text-align:left;"> </td> <td style="vertical-align:bottom;"> </td> <td colspan="2" style="vertical-align:bottom;"> </td> <td style="vertical-align:bottom;"> </td> <td style="vertical-align:bottom;"> </td> <td colspan="2" style="vertical-align:bottom;"> </td> <td style="vertical-align:bottom;"> </td> <td style="vertical-align:bottom;"> </td> <td colspan="6" style="vertical-align:bottom;border-bottom:0.5pt solid #000000;text-align:left;"> Change </td> <td style="vertical-align:bottom;border-bottom:0.5pt solid #ffffff03;text-align:left;"> </td> </tr> <tr style="height:8pt;background-color:#ffffff;white-space:pre-wrap;word-break:break-word;"> <td style="vertical-align:bottom;"> </td> <td style="vertical-align:bottom;"> </td> <td colspan="2" style="vertical-align:bottom;border-bottom:0.5pt solid #000000;text-align:left;"> June 30,

The Company's historical experience indicates that some of its customers will cancel or renegotiate contracts as economic conditions change or when product offerings change during the long sales cycle. The Company anticipates a portion of its open contracts may never result in revenue recognition, primarily due to the long sales cycle and factors outside of its control, including changes in customers' needs or financial condition, changes in government or health insurance reimbursement policies, or changes to regulatory requirements. Based on historical experience and management's best estimate, approximately 26% of the Company's $797.4 million open system sales contracts may never result in revenue.</p><p style="font-size:10pt;margin-top:0;font-family:Times New Roman;margin-bottom:0;text-align:left;"> </p><p style="font-size:10pt;margin-top:2pt;font-family:Times New Roman;margin-bottom:0;text-align:left;">Capitalized Contract Costs</p><p style="font-size:10pt;margin-top:0;font-family:Times New Roman;margin-bottom:0;text-align:left;"> </p><p style="text-indent:2.267%;font-size:10pt;margin-top:2pt;font-family:Times New Roman;margin-bottom:0;text-align:left;">As of June 30, 2024, and 2023, the balance of capitalized costs to obtain a contract was $9.6 million and $11.0 million, respectively. The Company has classified the capitalized costs to obtain a contract as a component of prepaid expenses and other current assets and other assets with respect to the current and non-current portions of capitalized costs, respectively, on the consolidated balance sheets. </p><div style="font-size:10pt;font-family:Times New Roman;"><p 611000 Note 3. Supplemental Financial Information Consolidated Balance Sheets Financing receivables A financing receivable is a contractual right to receive money, on demand or on fixed or determinable dates, that is recognized as an asset on the Company's balance sheets. The Company's financing receivables, consisting of its accounts receivable with contractual maturities of more than one year, are included in other assets on the consolidated balance sheets. The Company evaluates the credit quality of a customer at contract inception and monitors credit quality over the term of the underlying transactions. The Company performs a credit analysis for all new orders and reviews payment history, current order backlog, financial performance of the customers and other variables that augment or mitigate the inherent credit risk of a particular transaction. Such variables include the underlying value and liquidity of the collateral, the essential use of the equipment, the contract term and the inclusion of credit enhancements, such as guarantees, letters of credit or security deposits. Actual cash collections may differ from the contracted maturities due to early customer buyouts, refinancing, or defaults. The Company classifies accounts as high risk when it considers the financing receivable to be impaired or when management believes there is a significant near-term risk of non-payment. The Company performs an assessment each quarter on the allowance for credit losses related to its financing receivables. <p style="text-indent:2.267%;font-size:10pt;margin-top:12pt;font-family:Times New
