Forward-looking statements are not historical facts but instead represent only our beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. These statements include statements other than historical information or statements of current condition and may relate to our future plans and objectives and results, as well as statements about the objective and effectiveness of our risk management and liquidity policies, statements about trends in or growth opportunities for our business, statements about our future status, and activities or reporting under U.S. banking and financial regulation. Forward-looking statements generally are identified by the words A believe, A expect, A anticipate, A estimate, A intend, A strategy, A future, A opportunity, A plan, A may, A should, A will, A would, A will be, A will continue, A will likely result, A and similar expressions. By identifying these statements for you in this manner, we are alerting you to the possibility that our actual results and financial condition will differ, possibly materially, from the anticipated results and financial condition indicated in these forward-looking statements. Important factors that could cause our actual results and financial condition to differ from those indicated in the forward-looking statements include, among others, those discussed below and under A Risk Factors A in Part I, Item 1A of this Annual Report on Form 10-K. A General A Magyar Bancorp, Inc. (the A Company A) is a Delaware-chartered corporation which owns 100% of the outstanding shares of common stock of Magyar Bank. At September 30, 2024, Magyar Bancorp, Inc. had consolidated assets of \$951.9 million, total deposits of \$796.7 million and stockholders' equity of \$110.5 million. Magyar Bancorp, Inc. has not engaged in any significant business activity other than owning all of the shares of common stock of Magyar Bank. The executive office of Magyar Bancorp, Inc. is located at 400 Somerset Street, New Brunswick, New Jersey 08901, and its telephone number is (732) 342-7600. A Magyar Bank is a New Jersey-chartered savings bank headquartered in New Brunswick, New Jersey that was originally founded in 1922. We conduct business from our main office located at 400 Somerset Street, New Brunswick, New Jersey, and our eight branch offices located in New Brunswick, North Brunswick, South Brunswick, Branchburg, Bridgewater, Edison and Martinsville, New Jersey. The telephone number at our main office is (732) 342-7600 and our website is located at www.magbank.com. Information on our website is not and should not be considered a part of this Annual Report. A Our principal business consists of attracting retail deposits from the general public in the areas surrounding our main office in New Brunswick, New Jersey and our branch offices located in Middlesex and Somerset Counties, New Jersey, and investing those deposits, together with funds generated from operations and wholesale funding, in commercial real estate loans, residential mortgage loans, commercial business loans, Small Business Administration (A SBA A) loans, home equity loans, home equity lines of credit, construction and land loans and investment securities. Our revenues are derived principally from interest on loans and securities; our investment securities consist primarily of mortgage-backed securities and U.S. Government and government-sponsored enterprise obligations. We also generate revenues from fees and service charges. Our primary sources of funds are deposits, borrowings and principal and interest payments on loans and securities. We are subject to comprehensive regulation and examination by the New Jersey Department of Banking and Insurance (A NJDBI A) and the Federal Deposit Insurance Corporation (A FDIC A). A 2A A Market Area A We are headquartered in New Brunswick, New Jersey, and our primary deposit market area is concentrated in the communities surrounding our headquarters branch and our branch offices located in Middlesex and Somerset Counties, New Jersey. Our primary lending market area is broader than our deposit market area and includes all of New Jersey. A The economy of our primary market area is largely urban and suburban with a broad economic base that is typical for counties surrounding the New York metropolitan area. The median household income in Middlesex and Somerset Counties ranks among the highest in the nation. A Most of the Bank's customers are individuals and small to medium-sized businesses which are dependent upon the regional economy. Adverse changes in economic and business conditions in the Bank's markets could adversely affect the Bank's borrowers, their ability to repay their loans and to borrow additional funds, and consequently the Bank's financial condition and performance. The majority of the Bank's loans are secured by real estate located in New Jersey. A decline in local economic conditions could adversely affect the values of such real estate. Consequently, a decline in local economic conditions may have a greater effect on the Bank's earnings and capital than on the earnings and capital of larger financial institutions whose real estate loan portfolios are more geographically diverse. A Competition A We face intense competition within our market area both in making loans and attracting deposits. Our market area has a high concentration of financial institutions including large money center and regional banks, community banks and credit unions. Some of our competitors offer products and services that we currently do not offer, such as trust services and private banking. According to the Federal Deposit Insurance Corporation's annual Summary of Deposit report, at June 30, 2024, our market share of deposits was 1.52% and 0.38% in Middlesex and Somerset Counties, respectively. Our market share of deposits was 1.26% and 0.38%, respectively, at June 30, 2023. A Our competition for loans and deposits comes principally from commercial banks, savings institutions, mortgage banking firms and credit unions. We face additional competition for deposits from short-term money market funds, brokerage firms, mutual funds and insurance companies. Our primary focus is to build and develop profitable customer relationships across all lines of business while maintaining our role as a community bank. A Lending Activities A Our lending relationships are primarily with small to mid-sized businesses and individual consumers residing primarily in and around central and northern New Jersey. We primarily originate commercial real estate loans and residential mortgage loans, and to a lesser extent home equity lines of credit, commercial business and construction and land loans. A Loan Portfolio Composition. The following table sets forth the composition of our loan portfolio by type of loan, at the dates indicated. A A September 30, A A 2024 A 2023 A Amount A Percent A Amount A Percent A (Dollars in thousands) A One-to-four-family residential A \$246,201 A A 31.5% A \$237,683 A A 34.1% A Commercial real estate A \$461,319 A A 59.1% A \$389,134 A A 55.8% A Construction and land A \$22,722 A A 2.9% A \$21,853 A A 3.1% A Home equity loans and lines of credit A \$24,728 A A 3.2% A \$16,983 A A 2.4% A Commercial business A \$24,011 A A 3.1% A \$30,194 A A 4.3% A Other A \$2,235 A A 0.3% A \$2,359 A A 0.3% A Total loans receivable A \$781,216 A A 100.0% A \$698,206 A A 100.0% A Net deferred loan costs A \$(1,054) A A (806) A A Total loans receivable, net A \$780,162 A A \$697,400 A A A 3A A Loan Portfolio Maturities and Yields. A A Due After September 30, 2025 A A Fixed A Adjustable A Total A (In thousands) A A A A A One-to-four-family residential A \$142,900 A \$101,406 A \$244,306 A Commercial real estate A \$55,131 A \$380,992 A \$436,123 A Construction and land A \$104 A \$1,546 A \$1,650 A Home equity loans and lines of credit A \$5,474 A \$16,635 A \$22,109 A Commercial business A \$4,302 A \$6,101 A \$10,403 A Other A \$63 A \$2,168 A \$2,231 A Total A \$207,974 A \$508,848 A \$716,822 A A One-to-Four-Family Residential Loans. We originate residential mortgage loans, most of which are secured by properties located in our primary market area and most of which we hold in portfolio. At September 30, 2024, \$246.2 million, or 31.5% of our total loan portfolio, consisted of residential mortgage loans. Generally, residential mortgage loans are originated in amounts up to 80% of the lesser of the appraised value or purchase price of the property, with private mortgage insurance required on loans with a loan-to-value ratio in excess of 80%. A Generally, all residential mortgage loans are underwritten according to Federal Home Loan Mortgage Corporation (A Freddie Mac A) guidelines, policies and procedures. Historically, we have not originated a significant number of loans for the purpose of reselling them in the secondary market. A We also originate home equity loans secured by residences located in our market area. The underwriting standards we use for home equity loans include a determination of the applicant's credit history, an assessment of the applicant's ability to meet existing obligations, the ongoing payments on the proposed loan and the value of the collateral securing the loan. A At September 30, 2024, we had \$144.0 million of fixed-rate residential mortgage loans, which represented 58.5% of our total residential mortgage loan portfolio. At September 30, 2024, our largest fixed-rate residential mortgage loan was \$9.9 million. The loan was performing in accordance with its contractual repayment terms at September 30, 2024. A At September 30, 2024, adjustable-rate residential mortgage loans totaled \$102.2 million, or 41.5% of our total residential mortgage loan portfolio. The largest adjustable-rate residential mortgage loan was for \$2.2 million. The loan was performing in accordance with its contractual repayment terms at September 30, 2024. A Commercial Real Estate Loans. We also originate commercial real estate loans, most of which are secured by properties located in our primary market area. At September 30, 2024, \$461.3 million, or 59.1%, of our total loan portfolio consisted of these types of loans. Commercial real estate loans are generally secured by five-or-more-unit apartment buildings, industrial properties and properties used for business purposes such as small office buildings, warehouses and retail facilities. We generally originate adjustable-rate commercial real estate loans with a maximum term of 25 years with A A adjustable-rate periods every five years. The maximum loan-to-value ratio for our commercial real estate loans is 75%, based on the appraised value of the property. A We consider a number of factors when we originate commercial real estate loans. During the underwriting process we evaluate the business qualifications and financial condition of the borrower, including credit history, profitability of the property being financed, as well as the value and condition of the mortgaged property securing the loan. When evaluating the business qualifications of the borrower, we consider the financial resources of the borrower, the borrower's experience in owning or managing similar property and the borrower's payment history with us and other financial institutions. In evaluating the property securing the loan, we consider the net operating income of the mortgaged property before debt service and depreciation, the ratio of the loan amount to the appraised value of the mortgaged property and the debt service coverage ratio (the ratio of net operating income to debt service) to ensure it is at least 120% of the monthly debt service. A Loans secured by commercial real estate generally are larger than residential mortgage loans and involve greater credit risk. Commercial real estate loans often involve large loan balances to single borrowers or groups of related borrowers. Repayment of these loans depends to a large degree on the results of operations and management of the properties securing the loans or the businesses conducted on such property, and may be affected to a greater extent by adverse conditions in the real estate market or the economy in general. Accordingly, the nature of these loans makes them more difficult for management to monitor and evaluate. A Construction and Land Loans. We also originate construction and land acquisition loans for the development of one-to-four-family homes, apartment buildings and commercial properties. Construction and land loans are generally offered to experienced local developers operating in our primary market area and to individuals for the construction of their personal residences. At September 30, 2024, our construction and land loans totaled \$22.7 million, or 2.9% of total loans. A Construction and land loans generally have a maximum term of 24 months. We provide financing for land acquisition, site improvement and hard construction costs. Land acquisition loans are limited to 50% of the sale price or appraised value of the land, whichever is lower. Site improvement loans are limited to 100% of the bonded site improvement costs. Construction loans are limited to 75% of the lesser of the contract sale price or appraised value of the property. A Construction and land lending is generally considered to involve a higher degree of credit risk than long-term financing on improved, owner-occupied real estate. Risk of loss on a construction and land loan depends largely upon the accuracy of the initial estimate of the value of the property at completion of construction compared to the estimated cost (including interest) of construction and other assumptions. If the estimate of construction cost is inaccurate, we may be required to advance funds beyond the amount originally committed in order to protect the value of the property. Additionally, if our estimate of the value of the completed property is inaccurate, our construction and land loan may exceed the value of the collateral. The advantages of construction lending are that the market

is typically less competitive than standard mortgage products, the interest rate typically charged variable rate, which permits the Bank to protect against sudden changes in its costs of funds, the interest rate is typically higher to reflect the higher degree of credit risk, and the origination fees charged by the Bank to its customers can be amortized over the shorter term of a construction loan, typically, one to two years, which permits the Bank to recognize fees as income over a shorter period of time. A Home Equity Loans and Lines of Credit and Other Loans. We originate home equity lines of credit secured by residences located in our market area. At September 30, 2024, these loans totaled \$24.7 million, or 3.2% of our total loan portfolio. The underwriting standards we use for home equity lines of credit include a determination of the applicant's credit history, an assessment of the applicant's ability to meet existing obligations, the ongoing payments on the proposed loan and the value of the collateral securing the loan. The maximum combined (first and second mortgage liens) loan-to-value ratio for home equity lines of credit is 80%. Home equity lines of credit have adjustable rates of interest, indexed to the prime rate, as reported in The Wall Street Journal, with terms of up to 25 years. We also originate loans secured by the common stock of publicly traded companies, provided their shares are listed on the New York Stock Exchange or the NASDAQ Stock Market. Stock-secured loans are interest-only and are offered for terms up to twelve months and for adjustable rates of interest indexed to the prime rate, as reported in The Wall Street Journal. The loan amount is not to exceed 70% of the value of the stock securing the loan at any time. At September 30, 2024, stock-secured and other loans totaled \$2.1 million, or 0.3% of our total net loan portfolio. A Commercial Business Loans. We make commercial business loans primarily in our market area to a variety of professionals, sole proprietorships and small and mid-sized businesses. Our commercial business loans include term loans 5A and revolving lines of credit. At September 30, 2024, our commercial business loans totaled \$24.0 million, or 3.1% of total loans. A The maximum term of a commercial business loan is 25 years. Such loans are generally used for longer-term working capital purposes such as purchasing equipment or furniture. Commercial business loans are made with either adjustable or fixed rates of interest. A Included in commercial business loans are Small Business Administration (SBA) 7(a) loans, on which the SBA provides guarantees of up to 75% of the principal balance (85% for loans under \$150,000). These loans are made for the purposes of providing working capital and financing the purchase of equipment, inventory or commercial real estate, and may be made inside or outside the State of New Jersey. At September 30, 2024, \$14.9 million, or 95.2% of the Company's SBA loan balances, were to businesses located in the State of New Jersey. Generally, an SBA 7(a) loan has a deficiency in its credit profile that would not allow the borrower to qualify for a traditional commercial loan, which is why the government provides the guarantee. The deficiency may be a higher loan to value ratio, lower debt service coverage ratio or weaker personal financial guarantees. In addition, many SBA 7(a) loans are for start-up businesses where there is no history of financial information. Finally, many SBA borrowers do not have an ongoing and continuous banking relationship with the Bank, but merely work with the Bank on a single transaction. We generally sell the guaranteed portions of these SBA loans in the secondary market. A Commercial business loans generally have greater credit risk than residential mortgage loans. Unlike residential mortgage loans, which generally are made on the basis of the borrower's ability to repay the loan from his or her employment income, and which are secured by real property with ascertainable value, commercial business loans generally are made on the basis of the borrower's ability to repay the loan from the cash flow of the borrower's business. As a result, the repayment of commercial business loans may depend substantially on the success of the borrower's business. As such the performance of these types of loans may be particularly sensitive to local and/or national economic conditions. Further, any collateral securing commercial business loans may depreciate over time, may be difficult to appraise and may fluctuate in value. We try to minimize these risks through our underwriting standards. A Loans to One Borrower and Concentration of Loans. The maximum amount of loans to one borrower is limited by our Board-established loans-to-one-borrower limit, which is currently 15% of Magyar Bank's capital, or \$17.2 million. At September 30, 2024, our largest loan was \$13.2 million commercial real estate loan to finance the purchase and operation of a nursing and rehabilitation home in Edison, New Jersey. The loan was performing in accordance with its terms at September 30, 2024. A The size of loans which the Bank can offer to potential borrowers is less than the size of loans which many of the Bank's competitors with larger capitalization are able to offer. The Bank may engage in loan participations with other banks for loans in excess of the Bank's legal lending limits. However, no assurance can be given that such participations will be available at all or on terms which are favorable to the Bank and its customers. A The Bank has established policies to determine and monitor concentrations of credit risk and to maintain discipline in lending practices with a focus on portfolio diversification. A Asset Quality A We commence collection efforts when a loan becomes 15 days past due with system-generated reminder notices. Subsequent late charge and delinquent notices are issued and the account is monitored on a regular basis thereafter. Personal, direct contact with the borrower is attempted early in the collection process as a courtesy reminder and later to determine the reason for the delinquency and to safeguard our collateral. When a loan is more than 60 days past due, the credit file is reviewed and, if deemed necessary, information is updated or confirmed and collateral re-evaluated. We make every effort to contact the borrower and develop a plan of repayment to cure the delinquency. Loans are placed on non-accrual status when they are delinquent for more than 90 days. When loans are placed on non-accrual status, unpaid accrued interest is fully reversed, and further income is recognized only to the extent received. A summary report of all loans 30 days or more past due is provided to the Board of Directors on a monthly basis. If no repayment plan is in process, the file is referred to counsel for the commencement of foreclosure and/or other collection efforts. A 6A Non-Performing Assets. Non-accrual loans are loans on which the accrual of interest has ceased. Loans are generally placed on non-accrual status if, in the opinion of management, collection is doubtful, or when principal or interest is past due 90 days or more. Interest accrued, but not collected at the date a loan is placed on non-accrual status, is reversed and charged against interest income. Subsequent cash receipts are applied either to the outstanding principal or recorded as interest income, depending on management's assessment of ultimate collectability of principal and interest. Loans are returned to an accrual status when the borrower's ability to make periodic principal and interest payments has returned to normal (i.e., brought current with respect to principal or interest or restructured) and the paying capacity of the borrower and/or the underlying collateral is deemed sufficient to cover principal and interest. A The following table sets forth the amounts and categories of our non-accrual assets at the dates indicated. A September 30, 2024 A 2023 A (Dollars in thousands) A Non-accrual loans: A One-to-four-family residential A \$116A A \$386A Commercial real estate A \$116A A \$2,244A Construction and land A \$6A A \$2,474A Total non-accrual loans A \$232A A \$5,084A Allowance for credit losses: A \$7,548A A \$8,330A Ratios: A Total non-accrual loans to total loans A 0.03% A 0.67% Allowance for credit loss to total non-accrual loans A 325.35% A 163.85% Allowance for credit loss to total loan receivable A 0.97% A 1.19% A A loan is considered individually evaluated when it has been modified for a borrower in financial distress or when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Individually evaluated loans that have been modified are measured based on the present value of expected future discounted cash flows, the market price of the loan or the fair value of the underlying collateral if the loan is collateral dependent. A We record cash receipts on individually evaluated loans that are non-performing as a reduction to principal before applying amounts to interest or late charges unless specifically directed by the Bankruptcy Court to apply payments otherwise. A Delinquent Loans. The following table sets forth certain information with respect to our loan portfolio delinquencies at the dates indicated. Loans delinquent more than three months are generally classified as non-accrual loans. A Loans Delinquent For A 60-89 Days A 90A Days and Over A Total A Number A Amount A Number A Amount A (Dollars in thousands) A September 30, 2024 A 60-89 Days A 90A Days and Over A One-to-four-family residential A 2A A \$627A A 2A A \$116A A 4A A \$743A Commercial real estate A 6A A \$6A A 1A A \$116A A 1A A \$116A A Home equity loans and lines of credit A 1A A \$236A A 3A A \$6A A 1A A \$236A Total A 3A A \$863A A 3A A \$232A A 6A A \$1,095A A One-to-four-family residential A 4A A \$568A A 2A A \$386A A 6A A \$954A Commercial real estate A 1A A \$116A A 2A A \$2,244A A 2A A \$2,340A Construction and land A 6A A \$6A A 2A A \$2,474A A 2A A \$2,474A Total A 5A A \$684A A 5A A \$5,084A A 7A A \$5,768A Real Estate Owned. Real estate we acquire as a result of foreclosure or by deed in lieu of foreclosure is classified as other real estate owned (OREO) until sold. When property is acquired it is recorded at fair value less estimated cost to sell at the date of foreclosure, establishing a new cost basis. Holding costs and declines in fair value result in charges to expense after acquisition. A We held three properties consisting of two residential single-family homes and one commercial real estate property totaling \$3.7 million at September 30, 2024, an increase of \$3.4 million, or 1035.7% from \$328 thousand at September 30, 2023. A Allowance for Credit Losses A Financial assets measured at amortized cost should be presented at the net amount expected to be collected, through an allowance for credit losses that is deducted from the amortized cost basis. The allowance for credit losses (ACL) reflects management's current estimate of credit losses that are expected to occur over the remaining life of a financial asset. The income statement will be affected for the measurement of credit losses for newly recognized financial assets, as well as the expected increases or decreases of expected credit losses that have taken place during the period. A ACL on Loans. The Company maintains its ACL on loans at a level that management believes to be appropriate to absorb estimated credit losses as of the date of the Consolidated Balance Sheet. The ACL is a valuation reserve established and maintained by charges against income. Loans, or portions thereof, are charged-off against the ACL when they are deemed uncollectible. The ACL is an estimate of expected credit losses that considers our historical loss experience, the weighted average expected lives of loans, current economic conditions and forecasts of future economic conditions. The determination of an appropriate ACL is inherently subjective and may have significant changes from period to period. The methodology for determining the ACL has two main components: evaluation of expected credit losses for certain groups of homogeneous loans that share similar risk characteristics and evaluation of loans that do not share risk characteristics with other loans. The ACL is measured on a collective (pool) basis when similar characteristics exist. The Company's loan portfolio is segmented by loan types that have similar risk characteristics and behave similarly during economic cycles. A The ACL for individual loans begins with the use of normal credit review procedures to identify whether a loan no longer shares similar risk characteristics with other pooled loans and, therefore, should be individually assessed. We individually evaluate loans that meet the following criteria: (1) when it is determined that foreclosure is probable, (2) substantial, doubtful and nonperforming loans when repayment is expected to be provided substantially through the operation or sale of the collateral, or (3) when it is determined by management that a loan does not share similar risk characteristics with other loans. Credit loss estimates are calculated based on the following three acceptable methods for measuring the ACL: (1) the present value of expected future cash flows discounted at the loan's original effective interest rate; (2) the loan's observable market price; or (3) the fair value of the collateral when the loan is collateral dependent. Our individual loan evaluations consist primarily of the fair value of collateral method because most of our loans are collateral dependent. Collateral values are reduced to consider expected disposition costs when appropriate. A charge-off is recorded when the estimated fair value of the loan is less than the loan balance. A ACL on Unfunded Loan Commitments. The Company estimates expected credit losses over the contractual period in which the Bank is exposed to credit risk via a contractual obligation to extend credit unless that obligation is unconditionally cancellable by the Bank. The ACL on unfunded loan commitments is included in accounts payable and other liabilities in the Company's Consolidated Balance Sheets and is adjusted through credit loss expense. The estimate includes consideration of the likelihood that funding will occur, the amount of funding that will occur and an estimate of expected credit losses on commitments expected to be funded over its estimated life. A The following table sets forth activity in our allowance for credit losses on loans for the years indicated. A 8A A 9A September 30, 2024 A 2023 A (Dollars in thousands) A Balance at beginning of year A \$8,330A A \$8,433A Effect of adopting ASU 2016-13A A (1,032)A Net charge-offs (recoveries): A One-to-four-family residential A (68)A (4) Commercial business A 6A A 488A Total net charge-offs (recoveries) A (68)A A 484A Provision for credit losses A 182A A 381A Balance at end of year A \$7,548A A \$8,330A Ratios: A Net charge-offs (recoveries) to average loans outstanding A -0.01% A 0.07% Allowance for credit loss to total loans receivable A 0.97% A 1.10% A Allocation of ACL on Loans. The following table sets forth the ACL on loans allocated by loan category and the percent of the allowance to the total allowance at the dates indicated, as well as additional information with respect to net loan charge-offs by category. The ACL on loans allocated to each category is not necessarily indicative of future losses in any particular category and does not restrict the use of the allowance to absorb losses in other categories. Deposits, including certificates of deposit, demand, savings, NOW and money market accounts, have traditionally been the primary source of funds used for our lending and investment activities. We obtain certificates of deposit primarily through our branch network and to a lesser extent via the brokered CD market. We also use borrowings, primarily Federal Home Loan Bank advances, to supplement cash flow needs, to lengthen the maturities of liabilities for interest rate risk management and to manage our cost of funds. Additional sources of funds include principal and interest

accounts vary widely and are influenced by prevailing interest rates, market conditions and levels of competition. A Deposits. Our deposits are generated primarily by customers from our primary market area. We offer a selection of deposit accounts, including demand accounts, NOW accounts, money market accounts, savings accounts, retirement accounts and certificates of deposit. Deposit account terms vary, with the principal differences being the minimum balance required, the amount of time the funds must remain on deposit and the interest rate. We also accept brokered deposits when attractive rates and terms are available. At September 30, 2024, we had \$29.6 million in brokered deposits. A The flow of deposits is influenced significantly by general economic conditions, changes in money market and other prevailing interest rates and competition. The variety of deposit accounts offered allows us to be competitive in obtaining funds and responding to changes in consumer demand. Based on experience, we believe that our deposits are relatively stable. However, the ability to attract and maintain deposits, and the rates paid on these deposits, has been and will continue to be significantly affected by market conditions. A The following table sets forth the distribution of total deposit accounts, by account type, at the dates indicated. We monitor activity on these accounts and, based on historical experience and our current pricing strategy, we believe we will retain a large portion of these accounts upon maturity. A Subsidiary Activities A The Company's only subsidiary is the Bank. The Bank holds three subsidiaries as described below. A Magyar Investment Company is a New Jersey investment corporation subsidiary for the purpose of buying, selling and holding investment securities. The income earned on Magyar Investment Companyâ€™s investment securities are subject to a lower state tax than that assessed on income earned on investment securities maintained at Magyar Bank. A Hungaria Urban Renewal, LLC is a Delaware limited-liability corporation established in 2002 as a qualified intermediary operating for the purpose of acquiring and developing Magyar Bankâ€™s main office. In 2006, Magyar Bank acquired a 100% interest in Hungaria Urban Renewal, LLC, which has no other business other than owning Magyar Bankâ€™s main office site. As part of a tax abatement agreement with the City of New Brunswick, Magyar Bankâ€™s main office will remain in Hungaria Urban Renewal, LLCâ€™s name. A Magyar Service Corporation, a New Jersey corporation, is a wholly owned subsidiary of Magyar Bank. Magyar Service Corporation offers Magyar Bank customers and others a complete range of non-deposit investment products and 11A financial planning services, including insurance products, fixed and variable annuities, and retirement planning for individual and commercial customers. A Employees and Human Capital Resources A At September 30, 2024 we employed 91 full-time employees and 10 part-time employees. Our employees are not represented by any collective bargaining group. Management believes that we have good relations with our employees. A Employee retention helps us operate efficiently and achieve one of our business objectives, which is being a high-level service provider. We believe our commitment to living out our core values, actively prioritizing concern for our employeesâ€™ well-being, supporting our employeesâ€™ career goals, offering competitive wages and providing valuable fringe benefits aids in retention of our top-performing employees. In addition, nearly all of our employees are stockholders of the Company through participation in our Employee Stock Ownership Plan, which aligns associate and stockholder interests by providing stock ownership on a tax-deferred basis at no investment cost to our associates. At September 30, 2024, 35% of our current staff had been with us for ten years or more. A SUPERVISION AND REGULATION A General A Magyar Bank is a New Jersey-chartered savings bank, and its deposit accounts are insured up to applicable limits by the Federal Deposit Insurance Corporation (â€œFDICâ€) under the Deposit Insurance Fund (â€œDIFâ€). Magyar Bank is subject to extensive regulation, examination and supervision by the Commissioner of the New Jersey Department of Banking and Insurance (the â€œCommissionerâ€) as the issuer of its charter, and by the FDIC as deposit insurer and its primary federal regulator. Magyar Bank must file reports with the Commissioner and the FDIC concerning its activities and financial condition, and it must obtain regulatory approval prior to entering into certain transactions, such as mergers with, or acquisitions of, other depository institutions and opening or acquiring branch offices. The Commissioner and the FDIC conduct periodic examinations to assess Magyar Bankâ€™s compliance with various regulatory requirements. This regulation and supervision establishes a comprehensive framework of activities in which a savings bank can engage and is intended primarily for the protection of the DIF and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. A Magyar Bancorp, Inc., as a bank holding company controlling Magyar Bank, is subject to the Bank Holding Company Act of 1956, as amended (â€œBHCAâ€), the rules and regulations of the Federal Reserve Bank (the â€œFRBâ€) under the BHCA the provisions of the New Jersey Banking Act of 1948 (the â€œNew Jersey Banking Actâ€), and to the regulations of the Commissioner under the New Jersey Banking Act applicable to bank holding companies. Magyar Bank and Magyar Bancorp, Inc. are required to file reports with, and otherwise comply with the rules and regulations of the FRB and the Commissioner. Magyar Bancorp, Inc. is required to file certain reports with, and otherwise comply with, the rules and regulations of the Securities and Exchange Commission under the federal securities laws. A Any change in such laws and regulations, whether by the Commissioner, the FDIC, the Federal Reserve Board or through legislation, could have a material adverse impact on Magyar Bank and Magyar Bancorp, Inc. and their operations and stockholders. A Certain of the laws and regulations applicable to Magyar Bank and Magyar Bancorp, Inc. are summarized below. These summaries do not purport to be complete and are qualified in their entirety by reference to such laws and regulations. A New Jersey Banking Regulation A Activity Powers. Magyar Bank derives its lending, investment and other activity powers primarily from the applicable provisions of the New Jersey Banking Act and its related regulations. A Loans-to-One-Borrower Limitations. With certain specified exceptions, a New Jersey-chartered savings bank may not make loans or extend credit to a single borrower or to entities related to the borrower in an aggregate amount that would exceed 15% of the bankâ€™s capital funds. A savings bank may lend an additional 10% of the bankâ€™s capital funds if secured 12A by collateral meeting the requirements of the New Jersey Banking Act. Magyar Bank currently complies with applicable loans-to-one-borrower limitations. A Dividends. Under the New Jersey Banking Act, a stock savings bank may declare and pay a dividend on its capital stock only to the extent that the payment of the dividend would not impair the capital stock of the savings bank. In addition, a stock savings bank may not pay a dividend unless the savings bank would, after the payment of the dividend, have a surplus of not less than 50% of its capital stock, or alternatively, the payment of the dividend would not reduce the surplus. Federal law may also limit the amount of dividends that may be paid by Magyar Bank. See â€œFederal Banking Regulation-Prompt Corrective Actionâ€ below. A Minimum Capital Requirements. Regulations of the Commissioner impose on New Jersey-chartered depository institutions, including Magyar Bank, minimum capital requirements similar to those imposed by the FDIC on insured state banks. See â€œFederal Banking Regulation-Capital Requirementsâ€. A Examination and Enforcement. The NJDBI may examine Magyar Bank whenever it deems an examination advisable. The NJDBI examines Magyar Bank at least every three years. The Commissioner may order any savings bank to discontinue any violation of law or unsafe or unsound business practice and may direct any director, officer, attorney or employee of a savings bank engaged in an objectionable activity, after the Commissioner has ordered the activity to be terminated, to show cause at a hearing before the Commissioner why such person should not be removed. The Commissioner also has authority to appoint a conservator or receiver for a savings bank under certain circumstances such as insolvency or unsafe or unsound condition to transact business. A Federal Banking Regulation A Capital Requirements. Federal regulations require FDIC-insured depository institutions to meet several minimum capital standards: a common equity Tier 1 capital to risk-based assets ratio, a Tier 1 capital to risk-based assets ratio, a total capital to risk-based assets ratio, and a Tier 1 capital to total assets leverage ratio. A The capital standards require the maintenance of common equity TierA 1 capital, TierA 1 capital and total capital to risk-weighted assets of at least 4.5%, 6% and 8%, respectively, and a leverage ratio of at least 4% Tier 1 capital. Common equity TierA 1 capital is generally defined as common stockholdersâ€™ equity and retained earnings. Tier 1 capital is generally defined as common equity Tier 1 and additional Tier 1 capital. Additional Tier 1 capital includes certain noncumulative perpetual preferred stock and related surplus and minority interests in equity accounts of consolidated subsidiaries. Total capital includes Tier 1 capital (common equity Tier 1 capital plus additional Tier 1 capital) and Tier 2 capital. Tier 2 capital is comprised of capital instruments and related surplus, meeting specified requirements, and may include cumulative preferred stock and long-term perpetual preferred stock, mandatory convertible securities, intermediate preferred stock and subordinated debt. Also included in Tier 2 capital is the allowance for loan and lease losses limited to a maximum of 1.25% of risk-weighted assets and, for institutions that have exercised an opt-out election regarding the treatment of Accumulated Other Comprehensive Income (â€œAOCIâ€), up to 45% of net unrealized gains on available-for-sale equity securities with readily determinable fair market values. Institutions that have not exercised the AOCI opt-out have AOCI incorporated into common equity Tier 1 capital (including unrealized gains and losses on available-for-sale-securities). Calculation of all types of regulatory capital is subject to deductions and adjustments specified in the regulations. A In determining the amount of risk-weighted assets for purposes of calculating risk-based capital ratios, all assets, including certain off-balance sheet assets (e.g., recourse obligations, direct credit substitutes, residual interests) are multiplied by a risk weight factor assigned by the regulations based on the risks believed inherent in the type of asset. Higher levels of capital are required for asset categories believed to present greater risk. For example, a risk weight of 0% is assigned to cash and U.S. government securities, a risk weight of 50% is generally assigned to prudently underwritten first lien one-to-four-family residential mortgages, a risk weight of 100% is assigned to commercial and consumer loans, a risk weight of 150% is assigned to certain past due loans and a risk weight of between 0% to 600% is assigned to permissible equity interests, depending on certain specified factors. A In addition to establishing the minimum regulatory capital requirements, the regulations limit capital distributions and certain discretionary bonus payments to management if the institution does not hold a â€œcapital conservation bufferâ€ consisting of 2.5% of common equity Tier 1 capital to risk-weighted asset above the amount necessary to meet its minimum risk-based capital requirements. A 13A A At September 30, 2024, Magyar Bankâ€™s common equity Tier 1 capital to risk-based assets ratio was 14.75%, total capital to risk-based assets ratio was 15.85%, and Tier 1 capital to total assets leverage ratio was 11.11%. At September 30, 2023, Magyar Bankâ€™s common equity Tier 1 capital to risk-based assets ratio was 14.97%, total capital to risk-based assets ratio was 16.22%, and Tier 1 capital to total assets leverage ratio was 11.11%. A Prompt Corrective Action. Federal bank regulatory authorities are required to take â€œprompt corrective actionâ€ with respect to institutions that do not meet minimum capital requirements. For these purposes, the applicable statute establishes five capital categories. An institution is deemed to be â€œwell capitalizedâ€ if it has a total risk-based capital ratio of 10.0% or greater, a Tier 1 risk-based capital ratio of 8.0% or greater, a leverage ratio of 5.0% or greater and a common equity Tier 1 ratio of 6.5% or greater. An institution is â€œadequately capitalizedâ€ if it has a total risk-based capital ratio of 8.0% or greater, a Tier 1 risk-based capital ratio of 6.0% or greater, a leverage ratio of 4.0% or greater and a common equity Tier 1 ratio of 4.5% or greater. An institution is â€œundercapitalizedâ€ if it has a total risk-based capital ratio of less than 8.0%, a Tier 1 risk-based capital ratio of less than 6.0%, a leverage ratio of less than 4.0% or a common equity Tier 1 ratio of less than 4.5%. An institution is deemed to be â€œsignificantly undercapitalizedâ€ if it has a total risk-based capital ratio of less than 6.0%, a Tier 1 risk-based capital ratio of less than 4.0%, a leverage ratio of less than 3.0% or a common equity Tier 1 ratio of less than 3.0%. An institution is considered to be â€œcritically undercapitalizedâ€ if it has a ratio of tangible equity (as defined in the regulations) to total assets that is equal to or less than 2.0%. Effective March 31, 2020, qualifying community banking organizations that elect to use the Community Bank Leverage Ratio framework and that maintain a leverage ratio of greater than 9.0% will be considered to have satisfied the risk-based and leverage capital requirements to be deemed well-capitalized. A Undercapitalized institutions are subject to a variety of mandatory supervisory measures including the requirement to file a capital plan for the FDICâ€™s approval and dividend restrictions as well as other discretionary actions by the regulator. A Federal Home Loan Bank System. Magyar Bank is a member of the Federal Home Loan Bank system, which consists of eleven regional federal home loan banks, each subject to supervision and regulation by the Federal Housing Finance Agency. The federal home loan banks provide a central credit facility primarily for member thrift institutions as well as other entities involved in home mortgage lending. Magyar Bank, as a member of the FHLBNY, is required to purchase and hold shares of capital stock in the FHLBNY in specified amounts. A As of September 30, 2024, Magyar Bank was in compliance with these requirements. A Enforcement. The FDIC has extensive enforcement authority over insured savings banks, including Magyar Bank. This enforcement authority includes, among other things, the ability to assess civil money penalties, issue cease and desist orders and remove directors and officers. In general, these enforcement actions may be initiated in response to violations of laws and regulations, unsafe or unsound practices or non-compliance with agency conditions or agreements. A Deposit Insurance. The DIF of the FDIC insures deposits at Federal Deposit Insurance Corporation insured financial institutions such as Magyar Bank generally up to a maximum of \$250 thousand per separately insured depos

Community Reinvestment Act, FDIC-insured financial institutions have a responsibility to serve the community. In connection with its examination of a state chartered savings bank, the FDIC is required to assess the institution's record of compliance with the CRA. In 2023, the FDIC, the FRB, and the Office of the Comptroller of the Currency issued a final rule to strengthen and modernize the CRA regulations. Under the final rule, banks with assets of at least \$600 million as of December 31 in both of the prior two calendar years and less than \$2 billion as of December 31 in either of the prior two calendar years will be an intermediate bank. The agencies will evaluate intermediate banks under the Retail Lending Test and either the current community development test, referred to in the final rule as the Intermediate Bank Community Development Test, or, at the bank's option, the Community Development Financing Test. The applicability date for the majority of the provisions in the CRA regulations is January 1, 2026, and additional requirements will be applicable on January 1, 2027. An institution's failure to comply with the provisions of the CRA could, at a minimum, result in regulatory restrictions on its activities. We received an Outstanding CRA rating in our most recently completed federal examination, which was conducted by the FDIC in 2022. The Bank Secrecy Act and USA PATRIOT Act. The Bank Secrecy Act (BSA) and the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT Act) require Magyar Bank to implement a compliance program to detect and prevent money laundering, terrorist financing, and illicit crime. Together, the BSA and USA PATRIOT Act require Magyar Bank to implement internal controls, conduct customer due diligence, maintain records, and file reports. The USA PATRIOT Act also required the federal banking agencies to take into consideration the effectiveness of controls designed to combat money laundering activities in determining whether to approve a merger or other acquisition application. Accordingly, if we engage in a merger or other acquisition, our controls designed to combat money laundering would be considered as part of the application process. We have established policies, procedures and systems designed to comply with the BSA, USA PATRIOT Act, and regulations implemented thereunder. A Cyber Security. The federal banking agencies have adopted rules providing for new notification requirements for banking organizations and their service providers for significant cybersecurity incidents. Specifically, the new rules require a banking organization to notify its primary federal regulator as soon as possible, and no later than 36 hours after, the banking organization determines that a computer-security incident rising to the level of a notification incident has occurred. Notification is required for incidents that have materially affected or are reasonably likely to materially affect the viability of a banking organization's operations, its ability to deliver banking products and services, or the stability of the financial sector. Service providers are required under the rule to notify affected banking organization customers as soon as possible when the 15A provider determines that it has experienced a computer-security incident that has materially affected or is reasonably likely to materially affect the banking organization's customers for four or more hours. A Consumer Protection. Magyar Bank and Magyar Bancorp are subject to federal and state fair lending laws. The Equal Credit Opportunity Act and the Fair Housing Act prohibit lenders from discriminating in their lending practices on the basis of characteristics specified in those statutes. In addition, Magyar Bank and Magyar Bancorp are subject to other federal and state laws designed to protect consumers and prohibit unfair, deceptive or abusive business practices, including the Home Ownership Protection Act, Fair Credit Reporting Act, as amended by the Fair and Accurate Credit Transactions Act of 2003, the Gramm-Leach-Bliley Act, the Truth in Lending Act, the Home Mortgage Disclosure Act, the Real Estate Settlement Procedures Act, the National Flood Insurance Act and various state law counterparts. These laws and regulations mandate certain disclosure requirements and regulate the manner in which financial institutions must interact with clients when taking deposits, making loans, collecting and servicing loans and providing other services. Further, the Consumer Financial Protection Bureau has broad authority to prohibit unfair or deceptive acts and practices and is specifically empowered to require certain disclosures to consumers and draft model disclosure forms. Failure to comply with consumer protection laws and regulations can subject financial institutions to enforcement actions, fines and other penalties. The failure to comply with these laws could result in enforcement actions by the federal banking agencies, as well as other federal regulatory agencies and the Department of Justice. A Privacy Regulations. Federal regulations generally require that Magyar Bank disclose its privacy policy, including identifying with whom it shares a customer's non-public personal information, to customers at the time of establishing the customer relationship and annually thereafter. In addition, Magyar Bank is required to provide its customers with the ability to opt-out of having their personal information shared with unaffiliated third parties and not to disclose account numbers or access codes to non-affiliated third parties for marketing purposes. Except as otherwise required or permitted by law, Magyar Bank is prohibited from disclosing such information. Magyar Bank currently has a privacy protection policy in place and believes that such policy is in compliance with the regulations. A Loans to a Bank's Insiders A Federal Regulation. A bank's loans to its executive officers, directors, any owner of 10% or more of its stock (each, an insider) and any entities controlled by any such person (an insider's related interest) are subject to the conditions and limitations imposed by Section 22(h) of the Federal Reserve Act and its implementing regulations. Under these restrictions, the aggregate amount of the loans to any insider and the insider's related interests may not exceed the loans-to-one-borrower limit applicable to member banks, which is comparable to the loans-to-one-borrower limit applicable to Magyar Bank's loans. See New Jersey Banking Regulation's Loans-to-One Borrower Limitations. All loans by a bank to all insiders and insider's related interests in the aggregate may not exceed the bank's unimpaired capital and unimpaired surplus. With certain exceptions, loans to an executive officer, other than loans for the education of the officer's children and certain loans secured by the officer's residence, may not exceed the greater of \$25 thousand or 2.5% of the bank's unimpaired capital and surplus, and in no event more than \$100 thousand. Federal regulation also requires that any proposed loan to an insider or a related interest of that insider be approved in advance by a majority of the Board of Directors of the bank, with any interested directors not participating in the voting, if such loan, when aggregated with any existing loans to that insider and the insider's related interests, would exceed the greater of \$25 thousand or 5% of the bank's unimpaired capital and surplus. Generally, loans to an insider's related interests must be made on substantially the same terms as, and follow credit underwriting procedures that are not less stringent than, those that are prevailing at the time for comparable transactions with other persons. An exception is made for extensions of credit made pursuant to a benefit or compensation plan of a bank that is widely available to employees of the bank and that does not give any preference to insiders of the bank over other employees of the bank. A In addition, federal law prohibits extensions of credit to a bank's insiders and their related interests by any other institution that has a correspondent banking relationship with the bank, unless such extension of credit is on substantially the same terms as those prevailing at the time for comparable transactions with other persons and does not involve more than the normal risk of repayment or present other unfavourable features. A New Jersey Regulation. Provisions of the New Jersey Banking Act impose conditions and limitations on the liabilities to a savings bank of its directors and executive officers and of corporations and partnerships controlled by such persons, that are comparable in many respects to the conditions and limitations imposed on the loans and extensions of credit to insiders and their related interests under federal law, as discussed above. The New Jersey Banking Act also provides that 16A a savings bank that is in compliance with federal law is deemed to be in compliance with such provisions of the New Jersey Banking Act. A Federal Reserve System A Savings banks, such as Magyar Bank, are authorized to borrow from the Federal Reserve Bank's discount window. Magyar Bank is deemed by the FRB to be generally sound and thus is eligible to obtain secondary credit from its FRB. Generally, secondary credit is extended on a very short-term basis to meet the liquidity needs of the institution. Loans must be secured by acceptable collateral and carry a rate of interest above the Federal Open Market Committee's federal funds target rate. A Sarbanes-Oxley Act of 2002 A The Sarbanes-Oxley Act is intended to improve corporate responsibility, to provide for enhanced penalties for accounting and auditing improprieties at publicly traded companies and to protect investors by improving the accuracy and reliability of corporate disclosures pursuant to the securities laws. We have policies, procedures and systems designed to comply with this Act and its implementing regulations, and we review and document such policies, procedures and systems to ensure continued compliance. A Holding Company Regulation A Federal Regulation. Magyar Bancorp, Inc. is regulated as a bank holding company. Bank holding companies are subject to examination, regulation and periodic reporting under the BHCA, as administered by the FRB. Bank holding companies are generally subject to consolidated capital requirements established by the FRB. Bank holding companies under \$3.0 billion in consolidated assets remain exempt from consolidated regulatory capital requirements, unless the FRB determines otherwise in particular cases. A Regulations of the FRB provide that a bank holding company must serve as a source of strength to any of its subsidiary banks and must not conduct its activities in an unsafe or unsound manner. The Dodd-Frank Act codified the source of strength policy and required the promulgation of implementing regulations. Under the prompt corrective action provisions of the Dodd-Frank Act, a bank holding company parent of an undercapitalized subsidiary bank would be directed to guarantee, within limitations, the capital restoration plan that is required of such an undercapitalized bank. See Federal Banking Regulation's Prompt Corrective Action. If the undercapitalized bank fails to file an acceptable capital restoration plan or fails to implement an accepted plan, the FRB may prohibit the bank holding company parent of the undercapitalized bank from paying any dividend or making any other form of capital distribution without the prior approval of the FRB. A As a bank holding company, Magyar Bancorp, Inc. is required to obtain the prior approval of the FRB to acquire all, or substantially all, of the assets of any bank or bank holding company. Prior FRB approval is required for Magyar Bancorp, Inc. to acquire direct or indirect ownership or control of any voting securities of any bank or bank holding company if, after giving effect to such acquisition, it would, directly or indirectly, own or control more than 5% of any class of voting shares of such bank or bank holding company. A Under federal law, depository institutions are liable to the FDIC for losses suffered or anticipated by the FDIC in connection with the default of a commonly controlled depository institution or any assistance provided by the FDIC to such an institution in danger of default. This law would be applicable potentially to Magyar Bancorp, Inc. if it ever acquired as a separate subsidiary a depository institution in addition to Magyar Bank. A In connection with the mutual-to-stock conversion of Magyar Bancorp, MHC, all eligible account holders' and all supplemental eligible account holders' received an interest in liquidation accounts maintained by the Company and the Bank in an aggregate amount equal to (a) Magyar Bancorp, MHC's ownership interest in the Company's total stockholders' equity as of the date of the latest Statement of Balance Sheet included in the offering prospectus for the conversion, plus (b) the value of the net assets of Magyar Bancorp, MHC as of the date of the latest Statement of Balance Sheet of Magyar Bancorp, MHC before the consummation of the conversion (excluding its ownership of the Company). The Company and the Bank hold the liquidation accounts for the benefit of eligible account holders and supplemental eligible account holders who continue to maintain deposits in the Bank after the conversion. The liquidation accounts are intended to preserve for eligible account holders and supplemental eligible account holders who continue to maintain their deposit accounts with the Bank a liquidation interest in the residual net worth, if any, of the Bank (after the payment of all creditors, including depositors to the full extent of their deposit accounts) in the event of a liquidation of (a) the Company and the Bank or (b) the Bank. A 17A A New Jersey Regulation. Under the New Jersey Banking Act, a company owning or controlling a savings bank is regulated as a bank holding company. The New Jersey Banking Act defines the terms "company" and "bank holding company" as such terms are defined under the BHCA. Each bank holding company controlling a New Jersey-chartered bank or savings bank must file certain reports with the Commissioner and is subject to examination by the Commissioner. A Acquisition of Magyar Bancorp, Inc. Under federal law and under the New Jersey Banking Act, no person may acquire control of Magyar Bancorp, Inc. without first obtaining approval of such acquisition of control by the FRB and the Commissioner. A Federal Securities Laws. Magyar Bancorp, Inc. common stock is registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended. Magyar Bancorp, Inc. is subject to the information, proxy solicitation, insider trading restrictions and other requirements under the Securities Exchange Act of 1934. A ITEM 1A. Risk Factors A Not required for smaller reporting companies. A ITEM 1B. Unresolved Staff Comments A Not applicable. A ITEM 1C. Cybersecurity A The Board of Directors and Information Security Officer are responsible for overseeing the Information Security Program. The Board of Directors receives reports from, and oversees, IT Risk Assessment, Cybersecurity Risk Assessment, Annual IT Program Status Report, Vendor Management Risk Assessment, and Internal Vulnerability Reports and current Cyber Events briefings. The Board of Directors also makes budgeting, procedure, and policy decisions designed and intended to improve the Company's residual risk. A The Technology and Security Committee consists of the Company's senior management, the IT Management, and business unit management. The primary function of the Technology and Security Committee is to perform Strategic Planning, discuss hardware and software replacement, new projects, current cybersecurity threats, and ongoing cybersecurity issues and threats. The IT Director provides an IT status report to the Board of Directors on a Monthly basis. A The Company has adopted an Incident Response Plan (the "Plan") to monitor, detect, mitigate and remediate cybersecurity incidents. The Plan requires that business unit management have a working knowledge of the Company's Information Security Program and Incident Response Policies. Pursuant to the Plan, the IT Director identifies information owners for sensitive customer information and creates an incident response team. Each Department Manager, upon notification of a potential unauthorized access, manipulation of data or theft of any item identified under the Gramm-Leach-Bliley Act (the "GLBA") Inventory and Asset Classification, is responsible for further assessing the situation in order to document the suspected or actual breach, and forward the appropriate documentation to IT Management. The documentation of the suspected or actual incident includes the following: (a) Identify the nature and scope of the incident; (b) Identify the information systems affected; (c) Identify the types of customer information potentially affected. A Once the Incident Response Team has determined that unauthorized access, manipulation of data or theft of any item identified under GLBA Inventory and Asset Classification has occurred, Executive Management, the Information Security Officer, the Compliance Officer and the Information Technology Management must be contacted immediately. A If theft of any item identified under GLBA Inventory and Asset Classification has occurred, and it cannot be determined what specific information was included on the Asset, the Asset is treated as if it contained sensitive customer information and Senior Management, the Information Security Officer, the Compliance Officer and Information Technology Management must be contacted immediately. If Management declares an incident or if there is a confirmed theft or loss of customer information, appropriate regulatory authorities, law enforcement, and legal counsel are notified. A 18A A During the fiscal year ended September 30, 2024, the risks from cybersecurity threats, including as a result of any previous cybersecurity incidents, have not materially affected the Company, its business strategy, results of operations, or financial condition. A ITEM 2. Properties A The following table provides certain information with respect to our offices as of September 30, 2024: A A Leased or Original Year of Location Owned Leased or Acquired Lease Expiration Main Office: A A 400 Somerset Street Owned 2005 A A New Brunswick, New Jersey, 08901 A A A Full - Service Branches: A A 3050 State Route A 27 Owned 1969 A A Kendall Park, New Jersey, 08824 A A A 596 Milltown Road Leased 2002 2031 North Brunswick, New Jersey, 08902 A A A 1000 Route 202 South Leased 2006 2031 Branchburg, New Jersey, 08876 A A A 475 North Bridge Street Leased 2010 2024 Bridgewater, New Jersey, 08807 A A A 1167 Inman Avenue Leased 2011 2026 Edison, New Jersey, 08820 A A A 1199 Amboy Avenue Leased 2017 2027 Edison, New Jersey, 08837 A A A 1990 Washington Valley Road Leased 2024 2029 Martinsville, New Jersey, 08836 A A A The net book value of our premises, land and equipment was approximately \$12.5 million and \$13.3 million at September 30, 2024 and 2023, respectively. A For information regarding Magyar Bancorp, Inc.'s investment in mortgages and mortgage-related securities, see Item 1. Business herein. A ITEM 3. Legal Proceedings A In the ordinary course of business, we are a party to various legal actions which are incidental to the operation of our business. Although the ultimate outcome and amount of liability, if any, with respect to these legal actions cannot presently be ascertained with certainty, in the opinion of management, based upon information currently available to us, any resulting liability as of September 30, 2024 is believed to be immaterial to our consolidated financial position, results of operations and cash flows. A ITEM 4. Mine Safety Disclosures A Not applicable. A 19A A PART II A ITEM 5. Market for Registrant's Common Equity, Related Stockholder Matters, and Issuer Purchases of Equity Securities A (a) Our shares of common stock are traded on the NASDAQ Stock Market LLC under the symbol "MGYR". The approximate number of holders of record of Magyar Bancorp, Inc.'s common stock as of September 30, 2024 was 575. Certain shares of Magyar Bancorp, Inc. are held in "ominee" or "street" name and accordingly, the number of beneficial owners of such shares is not known or included in the foregoing number. A The Company declared five dividends totaling \$0.26 per share paid to

A (c)Share repurchases. A On December 8, 2022, the Company announced an additional stock repurchase plan pursuant to which the Company intends to repurchase up to an additional 5% of its outstanding shares, or up to 337,146 shares. The Company had repurchased 296,736 shares at an average price of \$11.92 per share through September 30, 2024, leaving 40,410 shares remaining available for repurchase. The Companý€™s intended use of the repurchased shares is for general corporate purposes. The timing of the repurchases will depend on certain factors including, but not limited to, market conditions and prices, the Companý€™s liquidity requirements and alternative uses of capital. Á The following table reports information regarding repurchases of our common stock during the three months ended September 30, 2024. Á Á Á Á Á Á Remaining NumberÁ Á Total NumberÁ AverageÁ of Shares ThatÁ Á of SharesÁ Á Price PaidÁ Á May be PurchasedÁ PeriodsÁ PurchasedÁ Per ShareÁ Á Under the PlanÁ July 1, 2024 through July 31, 2024Á 98,388Á \$ 12.67Á Á 52,300Á August 1, 2024 through August 31, 2024Á 7,550Á \$ 12.36Á Á 44,750Á September 1, 2024 through September 30, 2024Á 4,340Á \$ 12.37Á Á 40,410Á Á 20Á Á ITEM 6.[Reserved] Á Á ITEM 7.Managementá€™s Discussion and Analysis of Financial Condition and Results of Operations Á Overview Á The Company is a Delaware-chartered stock holding company whose most significant business activity is ownership of 100% of the common stock of Magyar Bank. Magyar Banká€™s principal business is attracting retail deposits from the general public and investing those deposits, together with funds generated from operations, principal repayments on loans and securities and borrowed funds, into one-to-four-family residential mortgage loans, multi-family and commercial real estate mortgage loans, home equity loans and lines of credit, commercial business loans and construction loans. Our results of operations depend primarily on our net interest income which is the difference between the interest we earn on our interest-earning assets and the interest we pay on our interest-bearing liabilities. Our net interest income is primarily affected by the market interest rate environment, the shape of the U.S. Treasury yield curve, the timing of the placement of interest-earning assets and interest-bearing liabilities, and the prepayment rate on our mortgage-related assets. Other factors that may affect our results of operations are general and local economic and competitive conditions, government policies and actions of regulatory authorities. Á During the year ended September 30, 2024, the Companý€™s total assets grew \$44.6 million, or 4.9%, to \$951.9 million compared with \$907.3 million at September 30, 2023. The increase was attributable to an \$82.8 million increase in net loans receivable, a \$.53 million increase in bank-owned life insurance, and a \$.34 million increase in other real estate owned. Offsetting these increases was a \$46.9 million decrease in interest-earning deposits with banks. Á Total deposits increased \$41.2 million, or 5.5%, to \$796.7 million and stockholdersá€™ equity increased \$.58 million, or 5.5%, to \$110.5 million during the year ended September 30, 2024. Á The Companý€™s net income increased \$74 thousand, or 1.0%, to \$.78 million during the year ended September 30, 2024 compared with net income of \$.77 million for the year ended September 30, 2023 from higher net interest income, lower provision for credit losses and higher other income, partially offset by higher income tax and other expenses. Á Throughout fiscal 2025, we expect to continue increasing our commercial real estate and commercial business loans while managing non-interest expenses in an effort to increase profitability of the Company. Á Our business operations are subject to risks and uncertainties that could materially affect our operating results. The extent of such impact will depend on future developments, which are highly uncertain. There continues to be various other risks and uncertainties that could impact the Companý€™s businesses and future results, such as changes to the U.S. economic condition, market interest rates, the Federal Reserve Board's monetary policy, other government policies, and actions of regulatory agencies. Á Comparison of Financial Condition at September 30, 2024 and 2023 Á Total Assets. Total assets increased \$44.6 million, or 4.9%, to \$951.9 million during the year ended September 30, 2024 compared with \$907.3 million at September 30, 2023. The increase was attributable to higher loans receivable, bank-owned life insurance and other real estate owned. Partially offsetting these increases were lower interest-earning deposits with banks, as we used cash and cash equivalents to fund loan growth. Á Loans Receivable. Total loans receivable increased \$83.0 million, or 11.9%, to \$781.2 million at September 30, 2024 from \$698.2 million at September 30, 2023. The growth occurred in commercial real estate loans, which increased \$72.2 million, or 18.6%, to \$461.3 million, in one-to four-family residential mortgage loans (including home equity lines of credit), which increased \$16.3 million, or 6.4%, to \$270.9 million, and in construction and land loans, which increased \$869 thousand, or 4.0%, to \$22.7 million. Offsetting these increases were declines in commercial business loans, which decreased \$6.2 million, or 20.5%, to \$24.0 million and in other consumer loans, which decreased \$124 thousand, or 5.3%, to \$2.2 million. Á Given the significance of commercial real estate (á€œCREá€) loans to our total loan portfolio, the following table further disaggregates these loans by occupied status and by collateral type as of September 30, 2024: Á 21Á Á Á September 30Á Á 2024Á Á AmountÁ PercentÁ Á (In thousands)Á Owner-occupiedÁ Á Á RetailÁ \$41,718Á Á 9.0%A Hotel/MotelÁ 42,438Á Á 9.2%A ProfessionalÁ 35,341Á Á 7.7%A OfficeÁ 10,934Á Á 2.4%A RestaurantÁ 18,743Á Á 4.1%A OtherÁ 28,243Á Á 6.1%A Total owner-occupiedÁ \$177,417Á Á 38.5%A Á Á Á Non-owner occupiedÁ Á Á RetailÁ \$84,435Á Á 18.3%A Multi-familyÁ 86,676Á Á 18.8%A ProfessionalÁ 18,972Á Á 4.1%A OfficeÁ 39,064Á Á 8.5%A RestaurantÁ 8,060Á Á 1.7%A Hotel/MotelÁ 2,566Á Á 0.6%A OtherÁ 44,129Á Á 9.6%A Total non-owner occupiedÁ \$283,902Á Á 61.5%A Total commercial real estate loansÁ \$461,319Á Á 100.0%A Á The Company obtains an appraisal of the real estate collateral securing a CRE loan prior to originating the loan. The appraised value is used to calculate the ratio of the outstanding loan balance to the value of the real estate collateral, or loan-to-value ratio ("LTV"). The original appraisal is used to monitor the LTVs within the CRE portfolio unless an updated appraisal is received, which may happen for a variety of reasons including, but not limited to, payment delinquency, additional loan requests using the same collateral, and loan modifications. The following table presents the ranges in the LTVs of our CRE loans at September 30, 2024: Á Á Number of Á Á LTV rangeÁ Á AmountÁ (Dollars in thousands) 0%-25.0%A 11Á \$ 45,522 25.01%-50.0%A 120Á \$ 111,699 50.01%-60.0%A 71Á \$ 123,684 60.01%-70.0%A 94Á \$ 118,379 70.01%-75.0%A 32Á \$ 47,611 75.01%-80.0%A 7Á \$ 13,188 > 80.0%A 1Á \$ 1,236 TotalsÁ 439Á \$ 461,319 Á As of September 30, 2024 and 2023, non-owner occupied commercial real estate loans (as defined by regulatory guidance) to total risk-based capital were estimated at approximately 270% and 262%, respectively. Management believes that Magyar Bank has implemented appropriate risk management practices, including risk assessments, board-approved underwriting policies and related procedures, which include monitoring loan portfolio performance and stressing of the commercial real estate portfolio under adverse economic conditions. Á Our asset quality with respect to commercial real estate loans has remained strong despite recent economic and market conditions. As of September 30, 2024 and 2023, we had \$116 thousand and \$2.2 million of non-performing commercial real estate loans, respectively. Such amounts totaled 0.03% and 0.60% of total commercial real estate loans as of September 30, 2024 and 2023, respectively. Á 22Á Á In 2024, the Company adopted ASU 2016-13, Financial Instruments - Credit Losses, and subsequent related updates, using the modified retrospective approach for all financial assets measured at amortized cost, including loans, held-to-maturity debt securities, and unfunded commitments. On October 1, 2023, the Company recorded a cumulative effect increase to retained earnings of \$354 thousand, net of tax, which consisted of a \$743 thousand reduction related to loans, and a \$389 thousand increase related to unfunded commitments. There were no such charges for investment securities held by the Company at the date of adoption. Á Investment Securities. Investment securities decreased \$528 thousand, or 0.6%, to \$95.4 million at September 30, 2024 from \$96.0 million at September 30, 2023. Á Securities available-for-sale increased \$.5 million, or 54.2%, to \$15.6 million at September 30, 2024 from \$10.1 million at September 30, 2023. The increase was attributable to purchases totaling \$6.0 million, unrealized gain of \$834 thousand partially offset by principal repayments totaling \$1.3 million. Á Securities held-to-maturity decreased \$6.0 million, or 7.0%, to \$79.8 million at September 30, 2024 from \$85.8 million at September 30, 2023. The decrease was the attributable to principal repayments totaling \$12.5 million and partially offset by purchases totaling \$6.5 million. Á Bank-Owned Life Insurance. The cash surrender value of life insurance held for directors and executive officers of Magyar Bank increased \$.3 million, or 29.5%, to \$23.3 million at September 30, 2024 from \$18.0 million at September 30, 2023. Á In addition to a \$433 thousand increase in the cash surrender value of policies, the Company purchased new life insurance policies on directors and executive officers of the Bank totaling \$6.6 million and redeemed policies totaling \$1.7 million during the twelve months ended September 30, 2024. The Company was in the process of restructuring \$.79 million of its BOLI portfolio at September 30, 2024 that is expected to increase the crediting rate on the restructured BOLI policies from 2.24% (3.20% tax-equivalent yield) to 4.93% (7.04% tax-equivalent yield). The surrender of BOLI policies also impacted income tax expense during the year ended September 30, 2024 as discussed below. Á Other Real Estate Owned. Other real estate owned increased \$.34 million to \$.37 million for the year ended September 30, 2024. The Company acquired four properties totaling \$4.4 million and sold two properties totaling \$1.0 million during the year ended September 30, 2024. Of the three remaining properties owned at September 30, 2024, two totaling \$3.3 million were under contract of sale. Á Deposits. Total deposits increased \$41.2 million, or 5.5%, during the year ended September 30, 2024. The growth in deposits occurred in certificates of deposit (including individual retirement accounts) which increased \$55.0 million, or 52.5%, to \$159.7 million, in interest-bearing checking account balances, which increased \$31.6 million, or 27.4%, to \$146.7 million, and in money market account balances, which increased \$19.7 million, or 6.9%, to \$304.6 million. Offsetting these increases were declines in non-interest checking account balances, which decreased \$55.7 million, or 29.6%, to \$132.8 million and in savings account balances, which decreased \$9.3 million, or 15.0%, to \$52.9 million. Customers sought higher-yielding deposit products during a period of increased interest rates. Á Included in the Companý€™s deposits were \$249.9 million in municipal deposits at September 30, 2024, which represented 29.1% of total deposits. Under current State of New Jersey legislation, municipal deposits exceeding 70% of the Banká€™s capital must be collateralized. Magyar Bank was in compliance with the Stateá€™s requirements at September 30, 2024. Á The Companý€™s deposit strategy in 2024 focused on retaining deposits and managing the overall cost of its interest-bearing liabilities during a period with an inverted yield curve. In addition, the Company opened its eighth retail branch office in Martinsville, New Jersey in October 2024. Á Borrowed Funds. Borrowings decreased \$947 thousand, or 3.2%, to \$28.6 million at September 30, 2024 compared with \$29.5 million at September 30, 2023. Á Stockholdersá€™ Equity. Stockholdersá€™ equity increased \$.57 million, or 5.5%, to \$110.5 million at September 30, 2024 from \$104.8 million at September 30, 2023. The increase was attributable to the Companý€™s net income from operations totaling \$.78 million, partially offset by \$1.7 million in dividends paid and \$.24 million in share repurchases. In addition, other comprehensive income, stock-based compensation expense and the effect of adopting ASU 2016-13 increased the 23Á Á Companý€™s equity by \$.21 million. The Companý€™s book value per share increased to \$16.98 at September 30, 2024 from \$15.70 at September 30, 2023. Á Comparison of Operating Results for the Years Ended September 30, 2024 and 2023 Á Net Income. The Companý€™s net income increased \$74 thousand, or 1.0%, to \$.78 million during the year ended September 30, 2024 compared with \$.77 million for the year ended September 30, 2023 from higher net interest income, lower provision for credit losses and higher other income, partially offset by higher income tax and other expenses. Earnings per share increased to \$1.23 for the year ended September 30, 2024 from \$1.20 for the year ended September 30, 2023. Á Net Interest and Dividend Income. Net interest and dividend income increased \$240 thousand, or 0.9%, to \$28.0 million during the year ended September 30, 2024 compared to \$27.7 million for the year ended September 30, 2023. Á The Companý€™s net interest margin decreased 36 basis points to 3.14% for the year ended September 30, 2024 from 3.50% for the year ended September 30, 2023. Growth in the Companý€™s average interest-earning assets more than offset margin compression between periods

[illegible]

â€” Credit Losses. Â Basis for Opinion Â These financial statements are the responsibility of the Companyâ€™s management. Our responsibility is to express an opinion on the Companyâ€™s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent, with respect to the Company, in accordance with U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. Â We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Companyâ€™s internal control over financial reporting. Accordingly, we express no such opinion. Â Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion. Â Critical Audit Matters Â The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the Audit Committee and that: (1) relate to accounts or disclosures that are material to the financial statements; and (2) involve our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter, in any way, our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate. Â 32A Â Allowance for Credit Losses (ACL) â€” Qualitative Adjustments Â Description of the Matter Â The Companyâ€™s loan portfolio totaled \$780.2 million as of September 30, 2024, and the associated ACL was \$7.5 million. As discussed in Notes B and E to the consolidated financial statements, determining the amount of the ACL requires significant judgment about the expected future losses. The ACL calculation is based on an average charge-off model, to identify a baseline expected loss reserve, which is then adjusted for certain qualitative conditions. Management applies these qualitative adjustments to the baseline reserve, to reflect changes in the environment, both internal and external, that are different from the conditions that existed during the historical loss calculation period. Â We identified these qualitative adjustments within the ACL as a critical audit matter because they involve a high degree of subjectivity. While the determination of these qualitative adjustments includes analysis of observable data over the historical loss period, the judgments required to assess the directionality and magnitude of adjustments are highly subjective. Â How we addressed the matter in our audit Â The primary procedures we performed to address this critical audit matter included: Â â—Testing the design, implementation, and operating effectiveness of internal controls over the calculation of the allowance for credit losses, including the accuracy of inputs into significant factor adjustments. Â â—Testing the completeness and accuracy of the significant data points that management uses in their evaluation of significant qualitative adjustments. Â â—Testing the accuracy of other significant inputs into the calculation including loan balances, historical charge-off and recovery data, and expected loan terms. Â â—Evaluating the directional consistency and magnitude of managementâ€™s conclusions regarding basis points applied (whether positive or negative), based on the trends identified in the underlying data. Â â—Testing the clerical accuracy of the application of the qualitative adjustments to the loan segments within the ACL calculation. Â We have served as the Companyâ€™s auditor since 2023. Â Â /s/ S.R. Snodgrass, P.C. Cranberry Township, Pennsylvania December 19, 2024 Â 33A Â MAGYAR BANCORP, INC. Â 38A MAGYAR BANCORP, INC. AND SUBSIDIARYNotes to Consolidated Financial StatementsSeptember 30, 2024 and 2023 NOTE A - ORGANIZATION Â The Company is a Delaware-chartered bank holding company. The Company owns 100% of the outstanding common stock of Magyar Bank (the â€œBankâ€), a New Jersey-chartered stock savings bank. The Bank offers consumer and commercial banking services to individuals, businesses, and nonprofit organizations throughout the central New Jersey area through its administrative office in New Brunswick, New Jersey and seven full-service branch offices in Middlesex and Somerset Counties in New Jersey. The Company is subject to regulation and supervision by the Board of Governors of the Federal Reserve System. The Bank is supervised and regulated by the Federal Deposit Insurance Corporation (the â€œFDICâ€) and the New Jersey Department of Banking and Insurance (â€œNJDBIâ€). Â Magyar Investment Company, a New Jersey investment corporation subsidiary of the Bank, was formed on August 15, 2006 for the purpose of buying, selling and holding investment securities. Â Magyar Service Corporation, a New Jersey corporation, is a wholly owned, non-bank subsidiary of the Bank. Magyar Service Corporation, which also operates under the name Magyar Financial Services, receives commissions from annuity and life insurance sales referred to a licensed, non-bank financial planner. Â Hungaria Urban Renewal, LLC is a Delaware limited-liability corporation established in 2002 as a qualified intermediary operating for the purpose of acquiring and developing the Bankâ€™s new main office. The Bank owns a 100% interest in Hungaria Urban Renewal, LLC, which has no other business other than owning the Bankâ€™s main office site. Â NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Â 1. Basis of Financial Statement Presentation Â The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America (â€œUS GAAPâ€) and predominant practices within the banking industry. The consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, the Bank, and its wholly-owned subsidiaries Magyar Investment Company, Magyar Service Corporation, and Hungaria Urban Renewal, LLC. All intercompany balances and transactions have been eliminated in the consolidated financial statements. Â The Company has evaluated subsequent events and transactions occurring subsequent to the consolidated balance sheet date of September 30, 2024, for items that should potentially be recognized or disclosed in these consolidated financial statements. The evaluation was conducted through the date these consolidated financial statements were available to be issued. Â In preparing financial statements in conformity with US GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Â The principal estimates that are particularly susceptible to significant change in the near term relate to the allowance for credit losses and the deferred tax asset. The evaluation of the adequacy of the allowance for loan losses includes an analysis of the individual loans and overall risk characteristics and size of the different loan portfolios, and takes into consideration current economic and market conditions, the capability of specific borrowers to pay specific loan obligations, as well as current loan collateral values. However, actual losses on specific loans, which also are encompassed in the analysis, may vary from estimated losses. Â The Company records income taxes using the asset and liability method. Accordingly, deferred tax assets and liabilities: (i) are recognized for the expected future tax consequences of events that have been recognized in the financial statements or tax returns; (ii) are attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases; and (iii) are measured using enacted tax rates expected to apply in the years when those temporary differences are expected to be recovered or settled. Â Where applicable, deferred tax assets are reduced by a valuation allowance for any portions determined not likely to be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax expense 39A MAGYAR BANCORP, INC. AND SUBSIDIARYNotes to Consolidated Financial StatementsSeptember 30, 2024 and 2023 in the period of enactment. The valuation allowance is adjusted, by a charge or credit to income tax expense, as changes in facts and circumstances warrant. Â 2. Cash and Cash Equivalents Â For purposes of reporting cash flows, cash and cash equivalents include cash on hand, amounts due from banks, time deposits with original maturities less than three months and overnight deposits. Â 3. Investment Securities and Allowance for Credit Losses Â The Company classifies its investment securities into one of two portfolios: held to maturity or available for

sale. Investments in debt securities that the Company has the positive intent and ability to hold to maturity are classified as held to maturity securities and reported at amortized cost. Debt securities not classified as held to maturity securities are classified as available for sale securities and reported at fair value, with unrealized holding gains or losses, net of deferred income taxes, reported in the accumulated other comprehensive income (â€œAOCIâ€) component of stockholders' equity. Equity securities, with certain exceptions, are measured at fair value with changes in fair value recognized in net income. Â If the fair value of a security is less than its amortized cost, the security is deemed to be impaired. Management evaluates all securities with unrealized losses quarterly to determine if such impairments are â€œtemporaryâ€ or â€œother-than-temporaryâ€ in accordance with applicable accounting guidance. The Company accounts for temporary impairments based upon security classification as either available for sale or held to maturity. Temporary impairments on â€œavailable for saleâ€ securities are recognized, on a tax-effected basis, through AOCI with offsetting entries adjusting the carrying value of the security and the balance of deferred taxes. Conversely, the Company does not adjust the carrying value of â€œheld to maturityâ€ securities for temporary impairments, although information concerning the amount and duration of impairments on held to maturity securities is generally disclosed in periodic consolidated financial statements. Â The Company accounts for other-than-temporary impairments based upon several considerations. First, other-than-temporary impairments on securities that the Company has decided to sell as of the close of a fiscal period, or will, more likely than not, be required to sell prior to the full recovery of their fair value to a level equal to their amortized cost, are recognized in operations. If neither of these criteria apply, then the other-than-temporary impairment is separated into credit-related and noncredit-related components. The credit-related impairment generally represents the amount by which the present value of the cash flows that are expected to be collected on an other-than-temporarily impaired security fall below its amortized cost while the noncredit-related component represents the remaining portion of the impairment not otherwise designated as credit-related. The Company recognizes credit-related, other-than-temporary impairments in earnings, while noncredit-related, other-than-temporary impairments on debt securities are recognized, net of deferred taxes, in AOCI. Â Premiums and discounts on all securities are amortized or accreted to maturity by use of the level-yield method considering the impact of principal amortization and prepayments on mortgage-backed securities. Gain or loss on sales of securities is recognized on the specific identification method. Â Allowance for Credit Losses on Held-to-Maturity Securities Â The Company accounts for its held-to-maturity securities in accordance with Accounting Standards Codification 326-20, Financial Instruments â€ Credit Loss â€ Measured at Amortized Cost, which requires that the Company measure expected credit losses on held-to-maturity securities on a collective basis by major security type. The estimate of expected credit losses considers historical credit loss information that is adjusted for current economic conditions and reasonable and supportable forecasts. Â The Company classifies its held-to-maturity debt securities into the following major security types: obligations of U.S. government agencies, obligations of U.S. government-sponsored enterprises, private label mortgage-backed securities, obligations of state and political subdivisions and corporate securities. Credit ratings of held-to-maturity debt securities, which are a significant input in calculating the expected credit loss, are reviewed on a quarterly basis. Based on the credit ratings of our held-to-maturity securities and our historical experience of no losses, the Company determined that the expected credit losses on its held-to-maturity portfolio is not significant.Â 40A MAGYAR BANCORP, INC. AND SUBSIDIARYNotes to Consolidated Financial StatementsSeptember 30, 2024 and 2023 Accrued interest receivable on held-to-maturity securities totaled \$225 thousand as of September 30, 2024 and is included within accrued interest receivable on the Company's Consolidated Balance Sheets. This amount is excluded from the estimate of expected credit losses. Generally, held-to-maturity securities are classified as nonaccrual when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about the further collectability of principal or interest. When held-to-maturity securities are placed on nonaccrual status, unpaid interest credited to income is reversed against interest income. Â Allowance for Credit Losses on Available-for-Sale Securities Â The Company measures expected credit losses on available-for-sale securities when the Bank intends to sell, or when it is not more likely than not that it will be required to sell, the security before recovery of its amortized cost basis. If either of the criteria regarding intent or requirement to sell is met, the amortized cost basis of the security is written down to fair value through income. For available-for-sale securities that do not meet the previously mentioned criteria, the Company evaluates whether the decline in fair value has resulted from credit losses or other factors. In making this assessment, the Company considers the extent to which fair value is less than amortized cost, any changes to the rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. If this evaluation indicates that a credit loss exists, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses is recorded for the credit loss, equal to the amount that the fair value is less than the amortized cost basis. Any impairment that has not been recorded through an allowance for credit losses is recognized in other comprehensive income. Â The allowance for credit loss on available-for-sale securities is included within the recorded balance of securities available-for-sale on the Consolidated Balance Sheets. Changes in the allowance for credit losses are recorded within provision for credit losses on the Consolidated Statements of Income. Losses are charged against the allowance when the Company believes the collectability of an available-for-sale security is in jeopardy or when either of the criteria regarding intent or requirement to sell is met. Â Accrued interest receivable on available-for-sale securities totaled \$162 thousand as of September 30, 2024 and is included within accrued interest receivable on the Company's Consolidated Balance Sheets. This amount is excluded from the estimate of expected credit losses. Generally, available-for-sale securities are classified as nonaccrual when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about the further collectability of principal or interest. When available-for-sale securities are placed on nonaccrual status, unpaid interest credited to income is reversed against interest income. Â 4. Regulatory Stock, at Cost Â Federal law requires a member institution of the Federal Home Loan Bank (â€œFHLBâ€) system to purchase and hold restricted stock of its district FHLB according to a predetermined formula. The Company invests in Federal Home Loan Bank of New York stock as required to support borrowing activities, as detailed in Note J to these consolidated financial statements. Although FHLB stock is an equity interest in a FHLB, it does not have a readily determinable fair value because its ownership is restricted and it lacks a market. FHLB stock can be sold back only at its par value of \$100 per share and only to the FHLBs or to another member institution. Accordingly, the FHLB restricted stock is carried at cost, less any applicable impairment charges. Â 5. Loans and Allowance for Credit Losses Â Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are stated at the amount of unpaid principal, adjusted for net deferred loan fees and costs, and reduced by an allowance for credit losses. Interest on loans is accrued and credited to operations based upon the principal amounts outstanding. The allowance for credit losses is established through a provision for possible loan losses charged to operations. Loans are charged against the allowance for credit losses when management believes that the collectability of the principal is unlikely.Â 41A MAGYAR BANCORP, INC. AND SUBSIDIARYNotes to Consolidated Financial StatementsSeptember 30, 2024 and 2023 Income recognition of interest is discontinued when, in the opinion of management, the collectability of such interest becomes doubtful. A loan is generally classified as non-accrual when the scheduled payment(s) due on the loan is delinquent for more than 90 days. When a loan is placed on non-accrual, all previously accrued and unpaid interest is reversed. Loan origination fees and certain direct origination costs are deferred and amortized over the life of the related loans as an adjustment to the yield on loans receivable using the effective interest method. Â Allowance for Credit Losses on Loans Â The Company maintains its allowance for credit loss on loans (â€œACLâ€) at a level that management believes to be appropriate to absorb estimated credit losses as of the date of the Consolidated Balance Sheet. The Company established its allowance in accordance with the guidance included in Accounting Standards Codification 326, Financial Instruments â€ Credit Losses (â€œASC 326â€). The ACL is a valuation reserve established and maintained by charges against income. Loans, or portions thereof, are charged-off against the ACL when they are deemed uncollectible. The ACL is an estimate of expected credit losses that considers our historical loss experience, the weighted average expected lives of loans, current economic conditions and forecasts of future economic conditions. The determination of an appropriate ACL is inherently subjective and may have significant changes from period to period. The methodology for determining the ACL has two main components: evaluation of expected credit losses for certain groups of homogeneous loans that share similar risk characteristics and evaluation of loans that do not share risk characteristics with other loans. The ACL is measured on a collective (pool) basis when similar characteristics exist. The Company's loan portfolio is segmented by loan types that have similar risk characteristics and behave similarly during economic cycles. Â Historical credit loss experience is the basis for the estimate of expected credit losses. We apply our historical loss rates to pools of loans with similar risk characteristics using the Weighted-Average Remaining Maturity (â€œWARMâ€) method. The remaining contractual life of the pools of loans with similar risk characteristics is adjusted by expected scheduled payments and prepayments. After consideration of the historical loss calculation, management applies qualitative adjustments to reflect qualitative changes not already reflected in the historical loss information. Our reasonable and supportable forecast adjustment is based on a regional economic indicator obtained from the United States Government Publishing Office. The Company selected eight qualitative metrics which were correlated with the Bank and its peer group's historical loss patterns. The eight qualitative metrics include: changes in lending policies and procedures, changes in national and local economic conditions as well as business conditions, changes in the nature, complexity, and volume of the portfolio, changes in the experience, ability, and depth of lenders and lending management, changes in the volume and severity of past due and classified loans, changes in the value of collateral securing loans, changes in or the existence of credit concentrations, and changes in the legal and/or regulatory landscape. The adjustments are weighted for relevance before applying to each pool of loans. Each quarter, management reviews the recommended adjustment factors and applies any additional adjustments based on current conditions. Â The ACL for individual loans begins with the use of normal credit review procedures to identify whether a loan no longer shares similar risk characteristics with other pooled loans and, therefore, should be individually assessed. We individually evaluate loans that meet the following criteria: (1) when it is determined that foreclosure is probable, (2) substandard, doubtful and nonperforming loans when repayment is expected to be provided substantially through the operation or sale of the collateral, or (3) when it is determined by management that a loan does not share similar risk characteristics with other loans. Credit loss estimates are calculated based on the following three acceptable methods for measuring the ACL: (1) the present value of expected future cash flows discounted at the loan's original effective interest rate; (2) the loan's observable market price; or (3) the fair value of the collateral when the loan is collateral dependent. Our individual loan evaluations consist primarily of the fair value of collateral method because most of our loans are collateral dependent. Collateral values are reduced to consider expected disposition costs when appropriate. A charge-off is recorded when the estimated fair value of the loan is less than the loan balance. Â The Company has elected to exclude \$4.6 million of accrued interest receivable on loans as of September 30, 2024 from the measurement of its ACL. When a loan is placed on non-accrual status, any outstanding accrued interest is reversed against interest income. Accrued interest on loans is reported in the accrued interest receivable line on the Consolidated Statements of Balance Sheet. Â Allowance for Credit Losses on Unfunded Loan CommitmentsÂ 42A MAGYAR BANCORP, INC. AND SUBSIDIARYNotes to Consolidated Financial StatementsSeptember 30, 2024 and 2023 The Company estimates expected credit losses over the contractual period in which the Bank is exposed to credit risk via a contractual obligation to extend credit unless that obligation is unconditionally cancellable by the Bank. The allowance for credit losses on unfunded loan commitments is included in accounts payable and other liabilities in the Company's Consolidated Balance Sheets and is adjusted through credit loss expense. The estimate includes consideration of the likelihood that funding will occur, the amount of funding that will occur and an estimate of expected credit losses on commitments expected to be funded over its estimated life. Â 6. Premises and Equipment Â Premises and equipment are carried at cost less accumulated depreciation, and include capitalized expenditures for new facilities, major betterments and renewals. Expenditures for maintenance and repairs are charged to expense as incurred. Depreciation is computed using the straight-line method based upon the estimated useful lives of the related assets for financial reporting purposes and using the mandated methods by asset type for income tax purposes. Leasehold improvements are depreciated using the straight-line method based upon the initial term of the lease. Â The Company accounts for the impairment of long-lived assets in accordance with US GAAP, which requires recognition and measurement for the impairment of long-lived assets to be held and used or to be disposed of by sale. The Company had no impaired long-lived assets at September 30, 2024 and 2023. Â 7. Revenue Recognition Â The Company recognizes revenue in the Consolidated Statements of Income as it is earned and when collectability is reasonably assured. The primary source of revenue is interest income from interest earning assets, which is recognized on the accrual basis of accounting using the effective interest method. The recognition of revenues from interest earning assets is based upon formulas from underlying loan agreements, securities contracts, or other similar contracts. Non-interest income is recognized on the accrual basis of accounting as services are provided or as transactions occur. Non-interest income includes earnings on bank-owned life insurance, deposit accounts, merchant services, ATM and debit card fees, mortgage banking activities, commercial loan prepayment penalties and other miscellaneous services and transactions. Â The Company's contracts with customers in the scope of Financial Accounting Standards Board (â€œFASBâ€) Accounting Standards Codification (â€œASCâ€) 606, â€œRevenue from Contracts with Customersâ€ are contracts for deposit accounts and contracts for non-deposit investment accounts through a third party service provider.Â Both types of contracts result in non-interest income being recognized.Â The revenue resulting from deposit accounts, which includes fees such as insufficient funds fees, wire transfer fees and out-of-network ATM transaction fees, is included as a component of service charges on the Consolidated Statements of Income.Â The revenue resulting from non-deposit investment accounts is included as a component of other operating income on the Consolidated Statements of Income.Â 8. Revenue from contracts with customers included in service charges was \$1.1 million and \$1.6 million for the years ended September 30, 2024 and 2023, respectively.Â 9. Revenue from contracts with customers included in other operating income was \$81 thousand and \$89 thousand for the years ended September 30, 2024 and 2023, respectively. Â For our contracts with customers, we satisfy our performance obligations each day as services are rendered.Â For our deposit account revenue, we receive payment on a daily basis as services are rendered and for our non-deposit investment account revenue, we receive payment on a monthly basis from our third-party service provider as services are rendered. Â 8. Other Real Estate Owned Â Real estate acquired through foreclosure, or a deed-in-lieu of foreclosure, is recorded at fair value less estimated selling costs at the date of acquisition or transfer, and subsequently at the lower of its net cost or fair value less estimated selling costs. Adjustments to the carrying value at the date of acquisition or transfer are charged to the allowance for loan losses. The carrying value of the individual properties is subsequently adjusted to the extent it exceeds estimated fair value less estimated selling costs, at which time a provision for losses on such real estate is charged to operations. Â The Company accounts for gains on sales of other real estate owned under ASC Topic 606 Revenue from Contracts with Customers, which uses a principles based methodology. As it pertains to the criteria for determining how a contract 43A MAGYAR BANCORP, INC. AND SUBSIDIARYNotes to Consolidated Financial StatementsSeptember 30, 2024 and 2023 should be accounted for under the new guidance, judgment is required in evaluating if: (a) a commitment on the buyer's part exists; (b) collection is probable in circumstances where the initial investment is minimal; and (c) the buyer has obtained control of the asset, including the significant risks and rewards of the ownership. If there is no commitment on the buyer's part, collection is not probable or the buyer has not obtained control of the asset, then a gain cannot be recognized under the new guidance. Â Operating expenses of holding real estate, net of related income, are charged against income as incurred. Losses on the disposition of real estate, including expenses incurred in connection with the disposition, are charged to operations. Â 9. Pension and Postretirement Plans Â The Company sponsors a qualified defined benefit pension plan and a supplemental executive retirement plan (â€œSERPâ€). The qualified defined benefit pension plan is funded with trust assets invested in a diversified portfolio of debt and equity securities. Accounting for pensions and other postretirement benefits involves estimating the cost of benefits to be provided well into the future and attributing that cost over the time period each employee works. This involves extensive use of assumptions about inflation, investment returns, mortality, turnover, and discount rates. Among other factors, changes in interest rates, investment returns and the market value of plan assets can (a) affect the level of plan funding; (b) cause volatility in the net periodic pension cost; and (c) increase our future contribution requirements. A significant decrease in investment returns or the market value of plan assets or a significant decrease in interest rates could increase our net periodic pension costs and adversely affect our results of operations. A significant increase in our contribution requirements with respect to our qualified defined benefit pension plan could have an adverse impact on our cash flow. Changes in the key actuarial assumptions would impact net periodic benefit expense and the projected benefit obligation for our defined benefit and other postretirement benefit plan. See Note L, â€œPension Plan,â€ and Note M, â€œNon-Qualified Compensation Planâ€ for information on these plans and the assumptions used. Â 10. Income Taxes Â The Company and its subsidiaries file consolidated federal and state income tax returns. Income taxes are allocated based on the contribution of their respective income or loss to the consolidated income tax returns. Â The Company records income taxes on the basis of reported income using the asset and liability method. Accordingly, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. To the extent that current available evidence about the future raises doubt about the realization of a deferred tax asset, a valuation allowance is established. Deferred tax

assets and liabilities are measured using enacted rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that changes the enactment date. The Company follows the provisions of FASB ASC Topic 740, which provides clarification on accounting for uncertainty in income taxes recognized in an enterprise's financial statements. The guidance prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return, and also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. At September 30, 2024 and 2023, no significant income tax uncertainties have been included in the Company's Consolidated Balance Sheets. The Company's policy is to recognize interest and penalties on unrecognized tax benefits in income tax expense in the Consolidated Statements of Income. No interest and penalties were recorded during the years ended September 30, 2024 and 2023. The tax years subject to examination by the taxing authorities are the years ended September 30, 2019 and forward.

11. Advertising Costs

The Company expenses advertising costs as incurred.

12. Earnings Per Share (EPS)

MAGYAR BANCORP, INC. AND SUBSIDIARY Notes to Consolidated Financial Statements September 30, 2024 and 2023 Basic income per share is calculated by dividing income available to common stockholders by the weighted average number of shares of common stock outstanding for the period. The weighted average common shares outstanding include shares allocated to the Employee Stock Ownership Plan. Diluted income per share is calculated by adjusting the weighted average common shares outstanding to reflect the potential dilution that could occur using the treasury stock method if securities or other contracts to issue common stock, such as stock options and unvested restricted stock, were exercised and converted into common stock. The resulting shares issued would share in the earnings of the Company. Shares issued and shares reacquired during the period are weighted for the portion of the period that they were outstanding. In periods of loss, dilution is not calculated and diluted loss per share is equal to basic loss per share. The following table presents a calculation of basic and diluted earnings per share (EPS) for the years ended September 30, 2024 and 2023. Basic and diluted earnings per share were calculated by dividing net income by the weighted-average number of shares outstanding for the periods.

	Years Ended September 30, 2024	September 30, 2024	2023	(Dollars in thousands, except share and per share data)				
Income applicable to common shares	\$7,783	\$7,709						
Weighted average shares outstanding - basic	6,341,610	6,424,796	Potential dilutive common stock equivalents					
Weighted average shares outstanding - diluted	6,341,610	6,424,796	Earnings per share - basic	\$1.23				
All options were anti-dilutive at September 30, 2024 and 2023.			Earnings per share - diluted	\$1.20				
Comprehensive Income and Accumulated Other Comprehensive Loss			Comprehensive income includes net income as well as certain other items which result in a change to equity during the period. The other items allocated to comprehensive income, as well as the related income tax effects, for the years ended September 30, 2024 and 2023 were as follows:					
September 30, 2024	2023	Net of tax	Before Tax					
Amount	Expense	Amount	Expense	Amount				
(In thousands)	(In thousands)	(In thousands)	(In thousands)	(In thousands)				
Unrealized holding gain (loss) arising during period on:								
Available-for-sale investments	\$834	(\$205)	\$629	(\$47)				
Defined benefit pension plan	\$297	(\$91)	\$266	(\$34)				
Total unrealized holding gain arising during period	\$1,131	(\$296)	\$895	(\$81)				
Reclassification of pension costs	\$53	(\$15)	\$38	(\$12)				
Other comprehensive income, net	\$1,184	(\$311)	\$873	(\$469)				
Earnings per share - basic	\$1.23	\$1.20	Earnings per share - diluted	\$1.23				
Earnings per share - diluted	\$1.20	\$1.20	All amounts are net of tax. Related income tax expense or benefit calculated using an income tax rate approximating 25% for available-for-sale investments and 28% for pension plan.					
Comprehensive Income and Accumulated Other Comprehensive Loss			Comprehensive income includes net income as well as certain other items which result in a change to equity during the period. The other items allocated to comprehensive income, as well as the related income tax effects, for the years ended September 30, 2024 and 2023 were as follows:					
September 30, 2024	2023	Net of tax	Before Tax					
Amount	Expense	Amount	Expense	Amount				
(In thousands)	(In thousands)	(In thousands)	(In thousands)	(In thousands)				
Unrealized holding gain (loss) arising during period on:								
Available-for-sale investments, net of tax	(\$853)	(\$1,481)	Defined benefit pension plan, net of tax	(\$63)				
Defined benefit pension plan, net of tax	(\$63)	(\$308)	Total accumulated other comprehensive loss	(\$916)				
Total accumulated other comprehensive loss	(\$916)	(\$1,789)	Bank-Owned Life Insurance					
Bank-Owned Life Insurance			The Company has purchased Bank-Owned Life Insurance (BOLI) policies. BOLI involves the purchasing of life insurance by the Company on directors and officers of the Bank. The proceeds are used to help defray the costs of non-qualified compensation plans. The Company is the owner and beneficiary of the policies. BOLI is recorded on the Consolidated Balance Sheets at its cash surrender value and changes in the cash surrender value are recorded in other income in the Consolidated Statements of Income.					
Off-Balance Sheet Credit Related Financial Instruments			In the ordinary course of business, the Company has entered into commitments to extend credit, including commitments under commercial lines of credit. Such financial instruments are recorded when they are funded. The Company does not engage in the use of derivative financial instruments. See Note P, Financial Instruments With Off-Balance Risk.					
Segment Reporting			The Company acts as an independent, community, financial services provider, and offers traditional banking and related financial services to individual, business and government customers. The Company offers a full array of commercial and retail financial services, including the taking of time, savings and demand deposits; the making of commercial, consumer and home equity loans; and the provision of other financial services.					
MAGYAR BANCORP, INC. AND SUBSIDIARY Notes to Consolidated Financial Statements September 30, 2024 and 2023 Management does not separately allocate expenses, including the cost of funding loan demand, between the commercial and retail operations of the Company. As such, discrete financial information is not available and segment reporting would not be meaningful.			New Accounting Pronouncements					
In connection with the preparation of quarterly and annual reports in accordance with the Securities and Exchange Commission's (SEC) Securities Exchange Act of 1934, SEC Staff Accounting Bulletin Topic 11.M requires the disclosure of the impact that recently issued accounting standards will have on financial statements when they are adopted in the future.			In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments - Credit Losses: Measurement of Credit Losses on Financial Instruments. ASU 2016-13 requires entities to report expected credit losses on financial instruments and other commitments to extend credit rather than the current incurred loss model. These expected credit losses for financial assets held at the reporting date are to be based on historical experience, current conditions, and reasonable and supportable forecasts. This ASU requires enhanced disclosures to help investors and other financial statement users better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an entity's portfolio. The Company adopted ASU 2016-13 on October 1, 2023 using the modified retrospective approach. Results and disclosures for reporting periods beginning after October 1, 2023 are presented under ASC 326 while prior period amounts continue to be reported in accordance with previously applicable GAAP.					
The impact of the change from the incurred loss model to the current expected credit loss model using ACL is included in the following table:			October 1, 2023	Adoption	Pre-adoption			
Assets	ACL on debt securities held-to-maturity	\$6	\$6	ACL on loans	\$6			
One-four family residential	Commercial real estate	\$5,277	\$5,277	Construction and land	\$472			
Home equity loans and lines of credit	Commercial business	\$939	\$939	Other	\$176			
Liabilities	ACL on unfunded commitments	\$6	\$6	Total	\$8,330			
Total	\$8,330	(\$492)	\$7,838	In March 2020, the FASB issued ASU 2020-04, Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting, to provide temporary optional expedients and exceptions to the U.S. GAAP guidance on contract modifications and hedge accounting to ease the financial reporting burdens of the expected market transition from LIBOR and other interbank offered rates to alternative reference rates, such as the Secured Overnight Financing Rate. Under the guidance, modifications of contracts due to reference rate reform will not require contract remeasurement or reassessment of a previous accounting determination. For hedge accounting, modification of critical terms of the hedge due to changes in reference rate reform will not affect hedge accounting or designate the hedging relationship. The guidance also provides specific expedients for fair value hedges, cash flow hedges, and excluded components. Further, the guidance provides a none-time election to sell or transfer held to maturity debt securities that are affected by the reference rate change. The guidance is effective upon issuance through December 31, 2022. In December 2022, the FASB issued ASU 2022-06, Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848, which				
MAGYAR BANCORP, INC. AND SUBSIDIARY Notes to Consolidated Financial Statements September 30, 2024 and 2023 extends the expiration date of Accounting Standards Codification (ASC) Topic 848 to December 31, 2024. ASU 2022-06 is effective for all reporting entities immediately upon issuance and must be applied on a prospective basis. These updates are not expected to have a significant impact on the Company's financial statements.			In March 2022, the FASB issued ASU 2022-02, Financial Instruments - Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures, which eliminates the accounting guidance for troubled debt restructurings by creditors that have adopted ASU 2022-02 and enhances the disclosure requirements for modifications of receivables made with borrowers experiencing financial difficulty. In addition, the amendments in this ASU require disclosure of current period gross write-offs by year of origination for financing receivables in the existing vintage disclosures. This ASU became effective on October 1, 2023 for the Company. The adoption of this ASU resulted in updated disclosures within our financial statements but otherwise did not have a material impact on the Company's consolidated financial statements.			Subsequent Events		
On October 31, 2024, the Company announced that its Board of Directors has approved a quarterly cash dividend of \$0.05 per common share to shareholders of record at the close of business on November 14, 2024, payable on November 27, 2024. On November 22, 2024, the Company declared a special dividend of \$0.04 per common share, payable on December 20, 2024, to shareholders of record at the close of business on December 6, 2024.			NOTE C			STOCK-BASED COMPENSATION AND STOCK REPURCHASE PROGRAM		
The Company follows FASB ASC Section 718, Compensation-Stock Compensation, which covers a wide range of share-based compensation arrangements including share options, restricted share plans, performance-based awards, share appreciation rights, and employee share purchase plans. ASC 718 requires that compensation cost relating to share-based payment transactions be recognized in financial statements. The cost is measured based on the fair value of the equity or liability instruments issued. ASC 718 also requires the Company to realize as a financing cash flow rather than an operating cash flow, as previously required, the benefits of realized tax deductions in excess of previously recognized tax benefits on compensation expense. In accordance with SEC Staff Accounting Bulletin (SAB) No. 107, the Company classified share-based compensation for employees and outside directors within compensation and employee benefits in the Consolidated Statements of Income to correspond with the same line item as the cash compensation paid. Stock options generally vest over a five-year service period and expire ten years from issuance. Management recognizes compensation expense for all option grants over the award's respective requisite service periods. The fair values of all option grants were estimated using the Black-Scholes option-pricing model. Management recognizes compensation expense for the fair values of these awards, which have graded vesting, on a straight-line basis over the requisite service period of the awards. Restricted shares generally vest over a five-year service period on the anniversary of the grant date. Once vested, these awards are irrevocable. The product of the number of shares granted and the grant date market price of the Company's common stock determine the fair value of restricted shares under the Company's restricted stock plans. Management recognizes compensation expense for the fair value of restricted shares on a straight								

[illegible]

[illegible]

it would not be able to realize its portion of its net deferred tax asset in the future which there is currently no valuation allowance, an adjustment to the net deferred tax asset would be charged to earnings in the period such determination was made. The Bankac's statutory income tax rate in the State of New Jersey was 9.0% for the years ended September 30, 2024 and 2023. The State of New Jersey has imposed a temporary surtax on corporations earning New Jersey allocated income in excess of \$1 million for the Company's tax year ended September 30, 2023 and has imposed a surtax on corporations earning New Jersey allocated income in excess of \$10 million for the Company's tax year ended September 30, 2024. The surtax is set at a rate of 2.5% and it currently effective through 2029. Accordingly, the Company used an 11.5% State tax rate for the calculation of its State income tax expense for the years ended September 30, 2024 and 2023.

NOTE L - PENSION PLAN The Company had a noncontributory defined benefit pension plan (the "Plan") covering all eligible employees. On January 26, 2006, the Plan was frozen and amended to eliminate future benefit accruals after February 15, 2006. A following table sets forth the Plan's funded status and amounts recognized in the Company's Consolidated Balance Sheets at September 30, 2024 and September 30, 2023.

	September 30, 2024	September 30, 2023		
(In thousands)	\$3,697	\$3,697		
Change in benefit obligations	\$3,495	\$3,495		
Projected benefit obligation, beginning	\$3,495	\$3,495		
Interest cost	\$193	\$190		
Actuarial (gain) loss	\$283	\$181		
Annuity payments and lump sum distributions	\$(274)	\$(249)		
Projected benefit obligation, end	\$3,697	\$3,495		
Change in plan assets	\$4,076	\$3,886		
Fair value of assets, beginning	\$4,076	\$3,886		
Actual return on plan assets	\$186	\$438		
Annuity payments and lump sum distributions	\$(274)	\$(249)		
Fair value of assets, end	\$4,618	\$4,076		
Funded status included with other assets	\$921	\$580		
Net pension cost for the years ended September 30, 2024 and 2023 included the following components:				
September 30, 2024	\$1,263	\$1,263		
September 30, 2023	\$1,263	\$1,263		
Interest cost on projected benefit obligation	\$193	\$190		
Expected return on plan assets	\$(236)	\$(226)		
Amortization of unrecognized net loss	\$53	\$122		
Net pension cost	\$10A	\$86		
Current Asset Allocation	The Plan's weighted-average asset allocations at September 30, 2024 and 2023, by asset category are as follows:			
September 30, 2024	Equity securities 65%, Debt securities (bond mutual funds) 32%, Other (money market fund) 2%	September 30, 2023	Equity securities 65%, Debt securities (bond mutual funds) 32%, Other (money market fund) 2%	
Total	100%	Total	100%	
Expected Contributions	For the fiscal year ending September 30, 2025, the Company does not expect to make a contribution to the Plan.	Estimated Future Benefit Payments	MAGYAR BANCORP, INC. AND SUBSIDIARY Notes to Consolidated Financial Statements September 30, 2024 and 2023	
The following benefit payments are expected to be paid as follows (in thousands):				
October 1, 2024 through September 30, 2025	\$276	October 1, 2025 through September 30, 2026	\$275	
October 1, 2026 through September 30, 2027	\$274	October 1, 2027 through September 30, 2028	\$271	
October 1, 2028 through September 30, 2029	\$269	October 1, 2029 through September 30, 2030	\$263	
Total	\$2,628	Included in the funded status of the Plan at September 30, 2024 and 2023, are actuarial losses of \$91 thousand and \$440 thousand, respectively. These amounts are included, net of related income tax effects of \$132 thousand in the accumulated other comprehensive loss component of stockholders' equity at September 30, 2024 and 2023. A following table presents the Plan assets that are measured at fair value on a recurring basis by level within the fair value hierarchy under ASC Topic 820. Financial assets are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. See Note Q for further detail regarding fair value hierarchy.

NOTE M - NONQUALIFIED COMPENSATION PLAN The Company maintains a Supplemental Executive Retirement Plan (the "SERP") for the benefit of its senior officers. In addition, the Company also adopted voluntary Deferred Income and Retirement Plans on behalf of its directors. The SERP provides the Company with the opportunity to supplement the retirement income of selected officers to achieve equitable wage replacement at retirement while the Deferred Income Plan provides participating directors with an opportunity to defer all or a portion of their fees into a tax deferred accumulation account for future retirement. The Director Retirement Plan enables the Company to reward its directors for longevity of service in consideration of their availability and consultation. The SERP is based upon achieving a total retirement benefit equal to a percentage of the participants' final annual salary. Under the Director Supplemental Retirement Income Plan (the "SERP"), directors that began service before 2002 are entitled to a benefit upon attainment of his/her benefit age. The directors will receive an annual amount in monthly installments based on his/her total Board and Committee fees in the twelve months prior to attainment of his/her benefit age. The amount will be 10% plus 2 1/2% for each year of service as a Director, with a minimum of 50%, provided the Director has served for at least five years, and a maximum of 60%. The maximum benefit increases for any Director serving as Chairman of the Board for at least five years to 75%. A The Company funds the plans through modified endowment contracts. Income recorded for the plans represents life insurance income as recorded based on the projected increases in cash surrender values of life insurance policies. As of September 30, 2024 and 2023, the Company's life insurance contracts had cash surrender values of approximately \$23.3 million and \$18.0 million, respectively. A The Company is recording benefit costs so that the cost of each participant's retirement benefits is being expensed and accrued over the participant's active employment so as to result in a liability at retirement date equal to the present value of the benefits expected to be provided. The total expense for nonqualified retirement benefits recorded during the years ended September 30, 2024 and 2023 was \$384 thousand and \$375 thousand, respectively. Included in accounts payable and other liabilities at September 30, 2024 and 2023 were accrued retirement benefits totaling \$1.0 million and \$828 thousand, respectively, for these plans. A NOTE N 401(K) EMPLOYEE CONTRIBUTION PLAN The Company has a defined contribution 401(k) plan covering all employees, as defined under the plan document. Employees may contribute to the plan, as defined under the plan document, and the Company can make discretionary contributions. The Company contributed \$255 thousand and \$257 thousand to the plan for the years ended September 30, 2024 and 2023, and is included in compensation and employee benefits in the accompanying Consolidated Statements of Income. A NOTE O - COMMITMENTS 1. Lease Commitments Accounting Standard Update ASC 842, requires lessees to recognize a lease liability and a right-of-use (ROU) asset, measured at the present value of the future minimum lease payments, at the lease commencement date. A The Company has operating leases for six branch locations. Our leases have remaining lease terms of up to 10 years, some of which include options to extend the leases for up to 10 additional years. Operating leases are recorded as ROU assets and lease liabilities and are included within other assets and accounts payable and other liabilities, respectively, on our Consolidated Balance Sheets. A MAGYAR BANCORP, INC. AND SUBSIDIARY Notes to Consolidated Financial Statements September 30, 2024 and 2023 On April 1, 2024, the Bank entered into a lease agreement to rent a retail office space in Martinsville, New Jersey to increase its presence in Somerset County. The initial term of the lease is for five years, ending on March 31, 2029, but does include the option for two additional terms of five years each. In accordance with ASC 842, a lease liability and ROU asset in the amount of \$180 thousand was recognized on April 1, 2024 within accounts payable and other liabilities and other assets, respectively, on our Consolidated Balance Sheets. The discount rate used to determine the lease liability was 4.22% and derived from the Federal Home Loan Bank of New York advance rate for the same term. A Operating lease ROU assets represent our right to use an underlying asset during the lease term and operating lease liabilities represent our obligation to make lease payments arising from the lease. ROU assets and lease liabilities are recognized at lease commencement base on the present value of the remaining lease payments using a discount rate that represents our incremental borrowing rate. The incremental borrowing rate used by the Company to value its operating leases is based on the interpolated term advance rate available from the FHLBNY, based on the remaining lease term. A The following table presents the balance sheet information related to our leases: A September 30, A September 30, A 2024 A 2023 A (Dollars in thousands) A Operating lease right-of-use asset A \$2,223 A \$2,687 A Operating lease liabilities A \$2,413 A \$2,944 A Weighted average remaining lease term in years A 6.0 A 6.4 A Weighted average discount rate A 2.4% A 2.2% A The following table summarizes the maturity of our remaining lease liabilities by year: A September 30, 2024 A (In thousands) A For the Year Ending: A 2025 A 2026 A 2027 A 2028 A 2029 A 2030 and thereafter A 2024 A Total lease payments A \$2,673 A Less imputed interest A \$(260) A Present value of lease liabilities A \$2,413 A Total rental expense, included in occupancy expense, was approximately \$809 thousand for the years ended September 30, 2024 and 2023. A A Contingencies A The Company and its subsidiaries, from time to time, are a party to routine litigation

The Company owns 100% of the outstanding common stock of Magyar Bank (the “Bank”), a New Jersey-chartered stock savings bank. The Bank offers consumer and commercial banking services to individuals, businesses, and nonprofit organizations throughout the central New Jersey area through its administrative office in New Brunswick, New Jersey and seven full-service branch offices in Middlesex and Somerset Counties in New Jersey. The Company is subject to regulation and supervision by the Board of Governors of the Federal Reserve System. The Bank is supervised and regulated by the Federal Deposit Insurance Corporation (the “FDIC”) and the New Jersey Department of Banking and Insurance (the “NJDBIA”). A Magyar Investment Company, a New Jersey investment corporation subsidiary of the Bank, was formed on May 15, 2006 for the purpose of buying, selling and holding investment securities. A Magyar Service Corporation, a New Jersey corporation, is a wholly owned, non-bank subsidiary of the Bank. Magyar Service Corporation, which also operates under the name Magyar Financial Services, receives commissions from annuity and life insurance sales referred to a licensed, non-bank financial planner. A Hungaria Urban Renewal, LLC is a Delaware limited-liability corporation established in 2002 as a qualified intermediary operating for the purpose of acquiring and developing the Bank’s new main office. The Bank owns a 100% interest in Hungaria Urban Renewal, LLC, which has no other business other than owning the Bank’s main office site. Basis of Financial Statement Presentation Å The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America (the “US GAAP”) and predominant practices within the banking industry. The consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, the Bank, and its wholly-owned subsidiaries Magyar Investment Company, Magyar Service Corporation, and Hungaria Urban Renewal, LLC. All intercompany balances and transactions have been eliminated in the consolidated financial statements. Å The Company has evaluated subsequent events and transactions occurring subsequent to the consolidated balance sheet date of September 30, 2024, for items that should potentially be recognized or disclosed in these consolidated financial statements. The evaluation was conducted through the date these consolidated financial statements were available to be issued. Å In preparing financial statements in conformity with US GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Å The principal estimates that are particularly susceptible to significant change in the near term relate to the allowance for credit losses and the deferred tax asset. The evaluation of the adequacy of the allowance for loan losses includes an analysis of the individual loans and overall risk characteristics and size of the different loan portfolios, and takes into consideration current economic and market conditions, the capability of specific borrowers to pay specific loan obligations, as well as current loan collateral values. However, actual losses on specific loans, which also are encompassed in the analysis, may vary from estimated losses. Å The Company records income taxes using the asset and liability method. Accordingly, deferred tax assets and liabilities: (i) Å are recognized for the expected future tax consequences of events that have been recognized in the financial statements or tax returns; (ii) Å are attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases; and (iii) Å are measured using enacted tax rates expected to apply in the years when those temporary differences are expected to be recovered or settled. Å Where applicable, deferred tax assets are reduced by a valuation allowance for any portions determined not likely to be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax expense in the period of enactment. The valuation allowance is adjusted, by a charge or credit to income tax expense, as changes in facts and circumstances warrant. Å 2. Cash and Cash Equivalents Å For purposes of reporting cash flows, cash and cash equivalents include cash on hand, amounts due from banks, time deposits with original maturities less than three months and overnight deposits. Å 3. Investment Securities and Allowance for Credit Losses Å The Company classifies its investment securities into one of two portfolios: held to maturity or available for sale. Investments in debt securities that the Company has the positive intent and ability to hold to maturity are classified as held to maturity securities and reported at amortized cost. Debt securities not classified as held to maturity securities are classified as available for sale securities and reported at fair value, with unrealized holding gains or losses, net of deferred income taxes, reported in the accumulated other comprehensive income (the “AOCI”) component of stockholders’ equity. Equity securities, with certain exceptions, are measured at fair value with changes in fair value recognized in net income. Å If the fair value of a security is less than its amortized cost, the security is deemed to be impaired. Management evaluates all securities with unrealized losses quarterly to determine if such impairments are temporary or other-than-temporary in accordance with applicable accounting guidance. The Company accounts for temporary impairments based upon security classification as either available for sale or held to maturity. Temporary impairments on available-for-sale securities are recognized, on a tax-effected basis, through AOCI with offsetting entries adjusting the carrying value of the security and the balance of deferred taxes. Conversely, the Company does not adjust the carrying value of held-to-maturity securities for temporary impairments, although information concerning the amount and duration of impairments on held to maturity securities is generally disclosed in periodic consolidated financial statements. Å The Company accounts for other-than-temporary impairments based upon several considerations. First, other-than-temporary impairments on securities that the Company has decided to sell as of the close of a fiscal period, or will, more likely than not, be required to sell prior to the full recovery of their fair value to a level equal to their amortized cost, are recognized in operations. If neither of these criteria apply, then the other-than-temporary impairment is separated into credit-related and noncredit-related components. The credit-related impairment generally represents the amount by which the present value of the cash flows that are expected to be collected on an other-than-temporarily impaired security fall below its amortized cost while the noncredit-related component represents the remaining portion of the impairment not otherwise designated as credit-related. The Company recognizes credit-related, other-than-temporary impairments in earnings, while noncredit-related, other-than-temporary impairments on debt securities are recognized, net of deferred taxes, in AOCI. Å Premiums and discounts on all securities are amortized or accreted to maturity by use of the level-yield method considering the impact of principal amortization and prepayments on mortgage-backed securities. Gain or loss on sales of securities is recognized on the specific identification method. Å Allowance for Credit Losses on Held-to-Maturity Securities Å The Company accounts for its held-to-maturity securities in accordance with Accounting Standards Codification 326-20, Financial Instruments “Credit Loss” Measured at Amortized Cost, which requires that the Company measure expected credit losses on held-to-maturity securities on a collective basis by major security type. The estimate of expected credit losses considers historical credit loss information that is adjusted for current economic conditions and reasonable and supportable forecasts. Å The Company classifies its held-to-maturity debt securities into the following major security types: obligations of U.S. government agencies, obligations of U.S. government-sponsored enterprises, private label mortgage-backed securities, obligations of state and political subdivisions and corporate securities. Credit ratings of held-to-maturity debt securities, which are a significant input in calculating the expected credit loss, are reviewed on a quarterly basis. Based on the credit ratings of our held-to-maturity securities and our historical experience of no losses, the Company determined that the expected credit losses on its held-to-maturity portfolio is not significant. Å Accrued interest receivable on held-to-maturity securities totaled \$225 thousand as of September 30, 2024 and is included within accrued interest receivable on the Company’s Consolidated Balance Sheets. This amount is excluded from the estimate of expected credit losses. Generally, held-to-maturity securities are classified as nonaccrual when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about the further collectability of principal or interest. When held-to-maturity securities are placed on nonaccrual status, unpaid interest credited to income is reversed against interest income. Å Allowance for Credit Losses on Available-for-Sale Securities Å The Company measures expected credit losses on available-for-sale securities when the Bank intends to sell, or when it is not more likely than not that it will be required to sell, the security before recovery of its amortized cost basis. If either of the criteria regarding intent or requirement to sell is met, the amortized cost basis of the security is written down to fair value through income. For available-for-sale securities that do not meet the previously mentioned criteria, the Company evaluates whether the decline in fair value has resulted from credit losses or other factors. In making this assessment, the Company considers the extent to which fair value is less than amortized cost, any changes to the rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. If this evaluation indicates that a credit loss exists, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses is recorded for the credit loss, equal to the amount that the fair value is less than the amortized cost basis. Any impairment that has not been recorded through an allowance for credit losses is recognized in other comprehensive income. Å The allowance for credit loss on available-for-sale securities is included within the recorded balance of securities available-for-sale on the Consolidated Balance Sheets. Changes in the allowance for credit losses are recorded within provision for credit losses on the Consolidated Statements of Income.

Losses are charged against the allowance when the Company believes the collectability of an available-for-sale security is in jeopardy or when either of the criteria regarding intent or requirement to sell is met. **4. Accrued interest receivable on available-for-sale securities** totaled \$162 thousand as of September 30, 2024 and is included within accrued interest receivable on the Company's Consolidated Balance Sheets. This amount is excluded from the estimate of expected credit losses. Generally, available-for-sale securities are classified as nonaccrual when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about the further collectability of principal or interest. When available-for-sale securities are placed on nonaccrual status, unpaid interest credited to income is reversed against interest income. **4. Regulatory Stock, at Cost** A Federal law requires a member institution of the Federal Home Loan Bank (FHLB) system to purchase and hold restricted stock of its district FHLB according to a predetermined formula. The Company invests in Federal Home Loan Bank of New York stock as required to support borrowing activities, as detailed in Note J to these consolidated financial statements. Although FHLB stock is an equity interest in a FHLB, it does not have a readily determinable fair value because its ownership is restricted and it lacks a market. FHLB stock can be sold back only at its par value of \$100 per share and only to the FHLBs or to another member institution. Accordingly, the FHLB restricted stock is carried at cost, less any applicable impairment charges. **5. Loans and Allowance for Credit Losses** A Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are stated at the amount of unpaid principal, adjusted for net deferred loan fees and costs, and reduced by an allowance for credit losses. Interest on loans is accrued and credited to operations based upon the principal amounts outstanding. The allowance for credit losses is established through a provision for possible loan losses charged to operations. Loans are charged against the allowance for credit losses when management believes that the collectability of the principal is unlikely. A Income recognition of interest is discontinued when, in the opinion of management, the collectability of such interest becomes doubtful. A loan is generally classified as non-accrual when the scheduled payment(s) due on the loan is delinquent for more than 90 days. When a loan is placed on non-accrual, all previously accrued and unpaid interest is reversed. Loan origination fees and certain direct origination costs are deferred and amortized over the life of the related loans as an adjustment to the yield on loans receivable using the effective interest method. A Allowance for Credit Losses on Loans A The Company maintains its allowance for credit loss on loans (ACL) at a level that management believes to be appropriate to absorb estimated credit losses as of the date of the Consolidated Balance Sheet. The Company established its allowance in accordance with the guidance included in Accounting Standards Codification 326, Financial Instruments "Credit Losses (ASC 326)". The ACL is a valuation reserve established and maintained by charges against income. Loans, or portions thereof, are charged-off against the ACL when they are deemed uncollectible. The ACL is an estimate of expected credit losses that considers our historical loss experience, the weighted average expected lives of loans, current economic conditions and forecasts of future economic conditions. The determination of an appropriate ACL is inherently subjective and may have significant changes from period to period. The methodology for determining the ACL has two main components: evaluation of expected credit losses for certain groups of homogeneous loans that share similar risk characteristics and evaluation of loans that do not share risk characteristics with other loans. The ACL is measured on a collective (pool) basis when similar characteristics exist. The Company's loan portfolio is segmented by loan types that have similar risk characteristics and behave similarly during economic cycles. A Historical credit loss experience is the basis for the estimate of expected credit losses. We apply our historical loss rates to pools of loans with similar risk characteristics using the Weighted-Average Remaining Maturity (WARMA) method. The remaining contractual life of the pools of loans with similar risk characteristics is adjusted by expected scheduled payments and prepayments. After consideration of the historical loss calculation, management applies qualitative adjustments to reflect qualitative changes not already reflected in the historical loss information. Our reasonable and supportable forecast adjustment is based on a regional economic indicator obtained from the United States Government Publishing Office. The Company selected eight qualitative metrics which were correlated with the Bank and its peer group's historical loss patterns. The eight qualitative metrics include: changes in lending policies and procedures, changes in national and local economic conditions as well as business conditions, changes in the nature, complexity, and volume of the portfolio, changes in the experience, ability, and depth of lenders and lending management, changes in the volume and severity of past due and classified loans, changes in the value of collateral securing loans, changes in or the existence of credit concentrations, and changes in the legal and/or regulatory landscape. The adjustments are weighted for relevance before applying to each pool of loans. Each quarter, management reviews the recommended adjustment factors and applies any additional adjustments based on current conditions. A The ACL for individual loans begins with the use of normal credit review procedures to identify whether a loan no longer shares similar risk characteristics with other pooled loans and, therefore, should be individually assessed. We individually evaluate loans that meet the following criteria: (1) when it is determined that foreclosure is probable, (2) substandard, doubtful and nonperforming loans when repayment is expected to be provided substantially through the operation or sale of the collateral, or (3) when it is determined by management that a loan does not share similar risk characteristics with other loans. Credit loss estimates are calculated based on the following three acceptable methods for measuring the ACL: (1) the present value of expected future cash flows discounted at the loan's original effective interest rate; (2) the loan's observable market price; or (3) the fair value of the collateral when the loan is collateral dependent. Our individual loan evaluations consist primarily of the fair value of collateral method because most of our loans are collateral dependent. Collateral values are reduced to consider expected disposition costs when appropriate. A charge-off is recorded when the estimated fair value of the loan is less than the loan balance. A The Company has elected to exclude \$4.6 million of accrued interest receivable on loans as of September 30, 2024 from the measurement of its ACL. When a loan is placed on non-accrual status, any outstanding accrued interest is reversed against interest income. Accrued interest on loans is reported in the accrued interest receivable line on the Consolidated Statements of Balance Sheet. A Allowance for Credit Losses on Unfunded Loan Commitments A The Company estimates expected credit losses over the contractual period in which the Bank is exposed to credit risk via a contractual obligation to extend credit unless that obligation is unconditionally cancellable by the Bank. The allowance for credit losses on unfunded loan commitments is included in accounts payable and other liabilities in the Company's Consolidated Balance Sheets and is adjusted through credit loss expense. The estimate includes consideration of the likelihood that funding will occur, the amount of funding that will occur and an estimate of expected credit losses on commitments expected to be funded over its estimated life. A 6. Premises and Equipment A Premises and equipment are carried at cost less accumulated depreciation, and include capitalized expenditures for new facilities, major betterments and renewals. Expenditures for maintenance and repairs are charged to expense as incurred. Depreciation is computed using the straight-line method based upon the estimated useful lives of the related assets for financial reporting purposes and using the mandated methods by asset type for income tax purposes. Leasehold improvements are depreciated using the straight-line method based upon the initial term of the lease. A The Company accounts for the impairment of long-lived assets in accordance with US GAAP, which requires recognition and measurement for the impairment of long-lived assets to be held and used or to be disposed of by sale. The Company had no impaired long-lived assets at September 30, 2024 and 2023. A 7. Revenue Recognition A The Company recognizes revenue in the Consolidated Statements of Income as it is earned and when collectability is reasonably assured. The primary source of revenue is interest income from interest earning assets, which is recognized on the accrual basis of accounting using the effective interest method. The recognition of revenues from interest earning assets is based upon formulas from underlying loan agreements, securities contracts, or other similar contracts. Non-interest income is recognized on the accrual basis of accounting as services are provided or as transactions occur. Non-interest income includes earnings on bank-owned life insurance, deposit accounts, merchant services, ATM and debit card fees, mortgage banking activities, commercial loan prepayment penalties and other miscellaneous services and transactions. A The Company's contracts with customers in the scope of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 606, "Revenue from Contracts with Customers" are contracts for deposit accounts and contracts for non-deposit investment accounts through a third party service provider. A Both types of contracts result in non-interest income being recognized. A The revenue resulting from deposit accounts, which includes fees such as insufficient funds fees, wire transfer fees and out-of-network ATM transaction fees, is included as a component of service charges on the Consolidated Statements of Income. A The revenue resulting from non-deposit investment accounts is included as a component of other operating income on the Consolidated Statements of Income. A Revenue from contracts with customers included in service charges was \$1.1 million and \$1.6 million for the years ended September 30, 2024 and 2023, respectively. A Revenue from contracts with customers included in other operating income was \$81 thousand and \$89 thousand for the years ended September 30, 2024 and 2023, respectively. A For our contracts with customers, we satisfy our performance obligations each day as services are rendered. A For our deposit account revenue, we receive payment on a daily basis as services are rendered and for our non-deposit investment account revenue, we receive payment on a monthly basis from our third-party service provider as services are rendered. A 8. Other Real Estate Owned A Real estate acquired through foreclosure, or a deed-in-lieu of foreclosure, is recorded at fair value less estimated selling costs at the date of acquisition or transfer, and subsequently at the lower of its net cost or fair value less estimated selling costs. Adjustments to the carrying value at the date of acquisition or transfer are charged to the allowance for loan losses. The carrying value of the individual properties is subsequently adjusted to the extent it exceeds estimated fair value less estimated selling costs, at which time a provision for losses on such real estate is charged to operations. A The Company accounts for gains on sales of other real estate owned under ASC Topic 606 Revenue from Contracts with Customers, which uses a principles based methodology. As it pertains to the criteria for determining how a contract should be accounted for under the new guidance, judgment is required in evaluating if: (a) a commitment on the buyer's part exists; (b) collection is probable in circumstances where the initial investment is minimal; and (c) the buyer has obtained control of the asset, including the significant risks and rewards of the ownership. If there is no commitment on the buyer's part, collection is not probable or the buyer has not obtained control of the asset, then a gain cannot be recognized under the new guidance. A Operating expenses of holding real estate, net of related income, are charged against income as incurred. Losses on the disposition of real estate, including expenses incurred in connection with the disposition, are charged to operations. A 9. Pension and Postretirement Plans A The Company sponsors a qualified defined benefit pension plan and a supplemental executive retirement plan (SERP). The qualified defined benefit pension plan is funded with trust assets invested in a diversified portfolio of debt and equity securities. Accounting for pensions and other postretirement benefits involves estimating the cost of benefits to be provided well into the future and attributing that cost over the time period each employee works. This involves extensive use of assumptions about inflation, investment returns, mortality, turnover, and discount rates. Among other factors, changes in interest rates, investment returns and the market value of plan assets can (a) affect the level of plan funding; (b) cause volatility in the net periodic pension cost; and (c) increase our future contribution requirements. A significant decrease in investment returns or the market value of plan assets or a significant decrease in interest rates could increase our net periodic pension costs and adversely affect our results of operations. A significant increase in our contribution requirements with respect to our qualified defined benefit pension plan could have an adverse impact on our cash flow. Changes in the key actuarial assumptions would impact net periodic benefit expense and the projected benefit obligation for our defined benefit and other postretirement benefit plan. See Note L, "Pension Plan" and Note M, "Non-Qualified Compensation Plan" for information on these plans and the assumptions used. A 10. Income Taxes A The Company and its subsidiaries file consolidated federal and state income tax returns. Income taxes are allocated based on the contribution of their respective income or loss to the consolidated income tax returns. A The Company records income taxes on the basis of reported income using the asset and liability method. Accordingly, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. To the extent that current available evidence about the future raises doubt about the realization of a deferred tax asset, a valuation allowance is established. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that changes the enactment date. A The Company follows the provisions of FASB ASC Topic 740, which provides clarification on accounting for uncertainty in income taxes recognized in an enterprise's financial statements. The guidance prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return, and also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. A At September 30, 2024 and 2023, no significant income tax uncertainties have been included in the Company's Consolidated Balance Sheets. The Company's policy is to recognize interest and penalties on unrecognized tax benefits in income tax expense in the Consolidated Statements of Income. No interest and penalties were recorded during the years ended September 30, 2024 and 2023. The tax years subject to examination by the taxing authorities are the years ended September 30, 2019 and forward. A 11. Advertising Costs A The Company expenses advertising costs as incurred. A 12. Earnings Per Share (EPS) A Basic income per share is calculated by dividing income available to common stockholders by the weighted average number of shares of common stock outstanding for the period. The weighted average common shares outstanding include shares allocated to the Employee Stock Ownership Plan. A Diluted income per share is calculated by adjusting the weighted average common shares outstanding to reflect the potential dilution that could occur using the treasury stock method if securities or other contracts to issue common stock, such as stock options and unvested restricted stock, were exercised and converted into common stock. The resulting shares issued would share in the earnings of the Company. Shares issued and shares reacquired during the period are weighted for the portion of the period that they were outstanding. In periods of loss, dilution is not calculated and diluted loss per share is equal to basic loss per share. A The following table presents a calculation of basic and diluted earnings per share (EPS) for the years ended September 30, 2024 and 2023. Basic and diluted earnings per share were calculated by dividing net income by the weighted-average number of shares outstanding for the periods. A Years Ended A September 30 A 2024 A 2023 A (Dollars in thousands, except share and per share data) A A A Income applicable to common shares A \$7,783 A \$7,709 A A A A Weighted average shares outstanding - basic A 6,341,610 A 6,424,796 A Potential dilutive common stock equivalents A A A A A Weighted average shares outstanding - diluted A 6,341,610 A 6,424,796 A A A A Earnings per share - basic A \$1.23 A \$1.20 A Earnings per share - diluted A \$1.23 A \$1.20 A All options were anti-dilutive at September 30, 2024 and 2023. A 13. Comprehensive Income and Accumulated Other Comprehensive Loss A Comprehensive income includes net income as well as certain other items which result in a change to equity during the period. The other items allocated to comprehensive income, as well as the related income tax effects, for the years ended September 30, 2024 and 2023 were as follows: A September 30, A 2024 A 2023 A A A Net of A A A A Net of A Before Tax A Tax A Before Tax A Tax A Amount A Expense A Amount A Expense A Amount A Unrealized holding gain (loss) arising during period on A A A A A A A A A A Available-for-sale investments A \$834 A \$(205) A \$629 A \$(47) A \$12 A \$(35) Defined benefit pension plan A 297 A (91) A 206 A (39) A 122 A 272 A Total unrealized holding gain arising during period A 1,131 A (296) A 835 A (347) A (110) A 237 A Reclassification of pension costs A 53 A (15) A 38 A (12) A (34) A 88 A Other comprehensive income, net A \$1,184 A \$(311) A \$873 A \$469 A \$(144) A \$325 A (a) All amounts are net of tax. Related income tax expense or benefit calculated using an income tax rate approximating 25% for available-for-sale investments and 28% for pension plan. A Details about the reclassification of accumulated other comprehensive loss components and the affected line item in the Consolidated Statements of Income for the years ended September 30, 2024 and 2023 were as follows: A Amount Reclassified From A A Accumulated Other Comprehensive A Affected Line Item in the Consolidated A Loss For the Year Ended September 30, A Statements of Income A 2024 A 2023 A A (In thousands) A A Defined benefit pension plan (1) A A A A A Amortization of net gain and prior service costs A \$53 A \$122 A Other expenses Related income tax benefit A (15) A (34) A Income taxes Net effect on accumulated other comprehensive loss A 38 A 88 A A Total reclassification A 38 A 88 A A (1) For additional details related to the defined benefit pension plan, see Note L- Pension Plan. A The components of accumulated other comprehensive loss at September 30, 2024 and 2023 were as follows: A September 30, A 2024 A 2023 A A (In thousands) A A A A Available-for-sale investments, net of tax A \$(853) A \$(1,481) Defined benefit pension plan, net of tax A (63) A (308) Total accumulated other comprehensive loss A \$(916) A \$(1,789) A 14. Bank-Owned Life Insurance A The Company has purchased Bank-Owned Life Insurance (BOLI) policies. BOLI involves the purchasing of life insurance by the Company on directors and officers of the Bank. The proceeds are used to help defray the costs of non-qualified compensation plans. The Company is the owner and beneficiary of the policies. BOLI is recorded on the Consolidated Balance Sheets at its cash surrender value and changes in the cash surrender value are recorded in other income in the Consolidated Statements of Income. A 15. Off-Balance Sheet Credit Related Financial Instruments A In the ordinary course of business, the Company has entered into commitments to extend credit, including commitments under commercial lines of credit. Such financial instruments are recorded when they are funded. The Company does not engage in the use of derivative financial instruments. See Note P, "Financial Instruments With Off-Balance Risk" A 16. Segment Reporting A The Company acts as an independent, community, financial services provider, and offers traditional banking and related financial services to individual,

A Loans sold with servicing retained and servicing released during the year ended September 30, 2024 were \$6.4 million and \$0, respectively. Loans sold with servicing retained and servicing released during the year ended September 30, 2023 were \$6.5 million and \$0, respectively. The Company accounts for sales in accordance with ASC 860, Transfers and Servicing. A Upon sale, the receivables are removed from the balance sheet, mortgage servicing rights are recorded as an asset for servicing rights retained, and a gain on sale, if applicable, is recognized for the difference between the carrying value of the receivables and the sales proceeds, net of origination costs. A Gains on sales of loans, representing the difference between the total sales price received for the loans and the allocated cost of the loans, are recognized when loans are sold and delivered to the purchasers. Loans are accounted for as sold when control of the loan is surrendered. A Control over the loans is deemed surrendered when (a) the loans have been isolated from the Company; (b) the buyer has the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the loans; and (c) the Company does not maintain effective control over the loans through either (a) an agreement that entitles and obligates the Company to repurchase or redeem the loans before maturity, or (b) the ability to unilaterally cause the buyer to return specific loans. A The Company services one-to-four family residential mortgage loans and SBA 7(a) loans for investors in the secondary market, which are not included in the Consolidated Balance Sheets. A The Companya€™s fee is a percentage of the principal balance and is recognized as income when received. A At September 30, 2024 and 2023, the Company was servicing mortgage loans sold in the amount of \$1.4 million and \$1.9 million, respectively, and SBA loans sold in the amount of \$38.4 million and \$35.5 million, respectively. Loan servicing includes collecting and remitting loan payments, accounting for principal and interest, contacting delinquent mortgagors, supervising foreclosures and property dispositions in the event of unremedied defaults, making certain insurance and tax payments on behalf of the borrowers and generally administering the loans. Mortgage servicing rights are amortized in proportion to, and over the period of, estimated net servicing revenues and are included in other assets on the Consolidated Balance Sheets. A Activity in loan servicing rights during the years ended September 30, 2024 and 2023 are summarized as follows: A A September 30, A A 2024A A 2023A A (In thousands)A A A A A A Beginning balanceA \$28A A \$a€“A Origination of mortgage servicing rightsA A 151A A A 28A AmortizationA A (20)A A A a€“A Ending balanceA \$159A A \$28A A Loan servicing rights are carried at the lower of amortized cost or fair value. Fair values are estimated using discounted cash flows based on a current market interest rate. X - ReferencesNo definition available. + Details Name: us-gaap_TransfersAndServicingAbstract Namespace Prefix: us-gaap_ Data Type: xbrli:stringItemType Balance Type: na Period Type: duration X - DefinitionThe entire disclosure for a transferor's continuing involvement in financial assets that it has transferred in a securitization or asset-backed financing arrangement, the nature of any restrictions on assets reported by an entity in its statement of financial position that relate to a transferred financial asset (including the carrying amounts of such assets), how servicing assets and servicing liabilities are reported, and (for securitization or asset-backed financing arrangements accounted for as sales) when a transferor has continuing involvement with the transferred financial assets and transfers of financial assets accounted for as secured borrowings, how the transfer of financial assets affects an entity's financial position, financial performance, and cash flows. + ReferencesReference 1: http://www.xbrl.org/2003/role/disclosureRef -Topic 946 -SubTopic 210 -Name Accounting Standards Codification -Section 599 -Paragraph 1 -Subparagraph (SX 210.6-04(11)) income tax expense is comprised of the following components for the years ended September 30, 2024 and 2023: A A For the Year EndedA A September 30, A A 2024A A 2023A A (In thousands)A A A A A A A A CurrentA \$3,423A A \$3,647A DeferredA A (106)A A (615) Total income tax expenseA \$3,317A A \$3,032A A A reconciliation of income tax at the statutory tax rate to the effective income tax expense for the years ended September 30, 2024 and 2023 is as follows: A A September 30, A A 2024A A 2023A A (In thousands)A A A A A A Income tax expense at statutory rateA \$2,331A A \$2,256A Increase (decrease) resulting from: A A A A State income taxes, net of federal income tax benefitA 1,005A A 931A Tax-exempt income, netA A (103)A A (90) BOLI policy surrender taxA A 277A A A a€“A Nondeductible expensesA A 56A A A 58A Share based compensationA A 40A A A 54A Employee stock ownership planA A 6A A A 11A Other, netA A (295)A A (188) Total income tax expenseA \$3,317A A \$3,032A A The major sources of temporary differences and their deferred tax effect at September 30, 2024 and 2023 are as follows: A A September 30, A A 2024A A 2023A A (In thousands)A A A A A A Allowance for credit lossesA \$2,248A A \$2,342A Net unrealized loss, investment securities available-for-saleA A 278A A A 483A Deferred loan feesA A 296A A A 287A Unrealized loss, minimum pension liabilityA A 132A A A 132A Employee benefitsA A 340A A A 265A Allowance for transaction expenseA A 6A A A 11A Straight line rentA A 54A A A 72A Gross deferred tax assetA A 3,354A A A 3,592A A A A A A A DepreciationA A (551)A A (588) Mortgage servicing rightsA A (45)A A (8) Gross deferred tax liabilityA A (596)A A (596) Net deferred tax asset, included in other assetsA \$2,758A A \$2,996A A In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which temporary differences are deductible and carry forwards are available. A There were no valuation allowances for the year ended September 30, 2024 and 2023. The Company has considered future market growth, forecasted earnings, future taxable income, feasible and permissible tax planning strategies in determining the realizability of deferred tax assets. If the Company was to determine that it would not be able to realize a portion of its net deferred tax asset in the future for which there is currently no valuation allowance, an adjustment to the net deferred tax asset would be charged to earnings in the period such determination was made. A The Banka€™s statutory income tax rate in the State of New Jersey was 9.0% for the years ending September 30, 2024 and 2023. The State of New Jersey has imposed a temporary surtax on corporations earning New Jersey allocated income in excess of \$1 million for the Companya€™s tax year ended September 30, 2023 and has imposed a surtax on corporations earning New Jersey allocated income in excess of \$10 million for the Companya€™s tax year ended September 30, 2024. The surtax is set at a rate of 2.5% and it currently effective through 2029. Accordingly, the Company used an 11.5% State tax rate for the calculation of its State income tax expense for the years ended September 30, 2024 and 2023. [illegible]

securities available for sale at fair value. Alcluded are investment contracts, realized and unrealized gains and losses as well as impairments and risk management disclosures. + ReferencesNo definition available. + Details Name: us-gaap FinancialInstrumentsDisclosureTextBlock Namespace Prefix: us-gaap Data Type: dtr-types:textBlockItem Type Balance Type: na Period Type: duration XML 39 R26.htm IDEA: XBRL DOCUMENT v3.24.4 FAIR VALUE DISCLOSURES 12 Months Ended Sep. 30, 2024 Fair Value Disclosures [Abstract] A FAIR VALUE DISCLOSURES NOTE Q - FAIR VALUE DISCLOSURES A The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. The Company's securities available-for-sale are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets or liabilities on a non-recurring basis, such as held-to-maturity securities, mortgage servicing rights, loans receivable and other real estate owned, or OREO. These non-recurring fair value adjustments involve the application of lower-of-cost-or-market accounting or write-downs of individual assets. A In accordance with ASC 820, Fair Value Measurements and Disclosures (ASC 820), the Company groups its assets and liabilities at fair value in three levels, based on the markets in which the assets are traded and the reliability of the assumptions used to determine fair value. These levels are: A Level 1-Valuation is based upon quoted prices for identical instruments traded in active markets. A Level 2-Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market. A Level 3-Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect our own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of option pricing models, discounted cash flow models and similar techniques. The results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. A The Company bases its fair values on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A The following is a description of valuation methodologies used for assets measured at fair value on a recurring basis. A Securities available-for-sale A The Company's available-for-sale portfolio is carried at estimated fair value on a recurring basis, with any unrealized gains and losses, net of taxes, reported as accumulated other comprehensive income (loss) in stockholders' equity. The securities available-for-sale portfolio consists of U.S. government and government-sponsored enterprise obligations and mortgage-backed securities. The fair values of these securities are obtained from an independent nationally recognized pricing service. An independent pricing service provides prices which are categorized as Level 2, as quoted prices in active markets for identical assets are generally not available for the securities. A The following tables provide the level of valuation assumptions used to determine the carrying value of the Company's assets measured at fair value on a recurring basis at September 30, 2024 and 2023: A Total A Level 1A Level 2A Level 3A (In thousands) A September 30, 2024 A Assets: A Mortgage-backed securities - residential A \$89.1A \$89.1A \$89.1A \$89.1A Obligations of U.S. government-sponsored enterprises A Mortgage-backed securities-residential A 11,506A 11,506A 11,506A 11,506A Corporate securities A 4,021A 4,021A 4,021A 4,021A Total securities available for sale A \$15,616A \$15,616A \$15,616A \$15,616A Derivative assets A 1,405A 1,405A 1,405A 1,405A Total assets A \$17,021A \$17,021A \$17,021A \$17,021A Liabilities: A Derivative liabilities A 1,405A 1,405A 1,405A 1,405A Total liabilities A \$1,405A \$1,405A \$1,405A \$1,405A September 30, 2023 A Assets: A Mortgage-backed securities - residential A \$92.1A \$92.1A \$92.1A \$92.1A Obligations of U.S. government agencies A Mortgage-backed securities-residential A 11,506A 11,506A 11,506A 11,506A Corporate securities A 4,021A 4,021A 4,021A 4,021A Total securities available for sale A \$10,125A \$10,125A \$10,125A \$10,125A Derivative assets A 2,579A 2,579A 2,579A 2,579A Total assets A \$12,704A \$12,704A \$12,704A \$12,704A Liabilities: A Derivative liabilities A 2,579A 2,579A 2,579A 2,579A Total liabilities A \$2,579A \$2,579A \$2,579A \$2,579A A The following is a description of valuation methodologies used for assets measured at fair value on a non-recurring basis. A Impaired Loans A Loans which meet certain criteria are evaluated individually for impairment. A loan is impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. All amounts due according to the contractual terms means that both the contractual interest and principal payments of a loan will be collected as scheduled in the loan agreement. Three impairment measurement methods are used, depending upon the collateral securing the asset: 1) the present value of expected future cash flows discounted at the loan's effective interest rate; 2) the asset's observable market price; or 3) the fair value of the collateral if the asset is collateral dependent. The regulatory agencies require this method for loans from which repayment is expected to be provided solely by the underlying collateral. The Company's impaired loans are generally collateral dependent and, as such, are carried at the estimated fair value of the collateral less estimated selling and disposition costs. Fair value is estimated through current appraisals, and adjusted as necessary, by management, to reflect current market conditions and, as such, are generally classified as Level 3. There were no such loans at September 30, 2024. A Appraisals of collateral securing impaired loans are conducted by approved, qualified, and independent third-party appraisers. Such appraisals are ordered via the Bank's credit administration department, independent from the lender who originated the loan, once the loan is deemed impaired, as described in the previous paragraph. Impaired loans are generally re-evaluated with an updated appraisal within one year of the last appraisal. However, the Company also obtains updated appraisals on performing construction loans that are approaching their maturity date to determine whether or not the fair value of the collateral securing the loan remains sufficient to cover the loan amount prior to considering an extension. The Company discounts the appraised value of the collateral for estimated selling and disposition costs and compares the resulting fair value of collateral to the outstanding loan amount. If the outstanding loan amount is greater than the discounted fair value, the Company requires a reduction in the outstanding loan balance or additional collateral before considering an extension to the loan. If the borrower is unwilling or unable to reduce the loan balance or increase the collateral securing the loan, it is deemed impaired and the difference between the loan amount and the fair value of collateral, net of estimated selling and disposition costs, is charged off through a reduction of the allowance for loan loss. A Other Real Estate Owned A Other real estate owned is carried at lower of cost or estimated fair value less disposal costs. The estimated fair value of the real estate is determined through current appraisals, and adjusted as necessary, by management, to reflect current market conditions. As such, other real estate owned is generally classified as Level 3. There were no valuation write-downs for the years ended September 30, 2024 and 2023. During the year ended September 30, 2024, the Company recorded valuation write-ups on three properties received through foreclosure. A Collateral Dependent Loans A Collateral dependent loans are measured and reported at fair value through specific allocations of the allowance for credit losses based on the fair value of the underlying collateral. A The following table provides the level of valuation assumptions used to determine the carrying value of the Company's assets measured at fair value on a non-recurring basis at September 30, 2024 and 2023: A Total A Level 1A Level 2A Level 3A (In thousands) A September 30, 2024 A Other real estate owned A \$1,501A \$1,501A \$1,501A \$1,501A Total A \$1,501A \$1,501A \$1,501A \$1,501A September 30, 2023 A Impaired loans A \$777A \$777A \$777A \$777A Total A \$777A \$777A \$777A \$777A A The following tables present additional quantitative information about assets measured at fair value on a nonrecurring basis and for which Company has utilized Level 3 inputs to determine fair value at September 30, 2024 and 2023: A Quantitative Information about Level 3 Fair Value Measurements (Dollars in thousands) A Fair Value Valuation A September 30, 2024 Estimate Techniques Unobservable Input Range (Weighted Average) A Other real estate owned A 1,501 Appraisal Liquidation expenses (2) -13.0% to -19.6% A Quantitative Information about Level 3 Fair Value Measurements (Dollars in thousands) A Fair Value Valuation A September 30, 2023 Estimate Techniques Unobservable Input Range (Weighted Average) A Impaired loans A 777 Appraisal of collateral (1) Appraisal adjustments (2) -50% to -8.0% (19.4%) A (1)Fair value is generally determined through independent appraisals for the underlying collateral, which generally include various level 3 inputs which are not identifiable. (2)Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated liquidation expenses. The range and weighted average of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal. A The following presents the carrying amount, fair value, and placement in the fair value hierarchy of the Company's financial instruments carried at cost or amortized cost as of September 30, 2024 and 2023. This table excludes financial instruments for which the carrying amount approximates fair value, which includes cash and cash equivalents, FHLBNY stock, bank owned life insurance, accrued interest receivable, interest and non-interest bearing demand, savings deposits, and accrued interest payable. For short-term financial assets such as cash and cash equivalents, the carrying amount is a reasonable estimate of fair value due to the relatively short time between the origination of the instrument and its expected realization. A For financial liabilities such as interest-bearing demand, NOW, and money market savings deposits, the carrying amount is a reasonable estimate of fair value due to these products having no stated maturity. The Company's bank-owned life insurance is not a marketable asset and may generally only be redeemed with the insurance company, and is therefore not included in the table below. A Carrying Amount Fair Value Measurement Placement A Value A Level 1A Level 2A Level 3A (In thousands) A September 30, 2024 A Financial instruments - assets A Investment securities held to maturity A \$79,816A \$79,816A \$79,816A \$79,816A Loan receivable net allowance for credit losses A 772,614A 772,614A 772,614A 772,614A Financial instruments - liabilities A Borrowings A 28,568A 28,568A 28,568A 28,568A September 30, 2023 A Financial instruments - assets A Investment securities held to maturity A \$85,835A \$85,835A \$85,835A \$85,835A Loan receivable net allowance for credit losses A 689,070A 689,070A 689,070A 689,070A Financial instruments - liabilities A Certificates of deposit including retirement certificates A 104,668A 104,668A 104,668A 104,668A Borrowings A 28,177A 28,177A 28,177A 28,177A X - ReferencesNo definition available. + Details Name: us-gaap FairValueDisclosuresAbstract Namespace Prefix: us-gaap Data Type: xbrli:stringItemType Balance Type: na Period Type: duration X - DefinitionThe entire disclosure for the fair value of financial instruments (as defined), including financial assets and financial liabilities (collectively, as defined), and the measurements of those instruments as well as disclosures related to the fair value of non-financial assets and liabilities. Such disclosures about the financial instruments, assets, and liabilities would include: (1) the fair value of the required items together with their carrying amounts (as appropriate); (2) for items for which it is not practicable to estimate fair value, disclosure would include: (a) information pertinent to estimating fair value (including, carrying amount, effective interest rate, and maturity, and (b) the reasons why it is not practicable to estimate fair value; (3) significant concentrations of credit risk including: (a) information about the activity, region, or economic characteristics identifying a concentration, (b) the maximum amount of loss the entity is exposed to based on the gross fair value of the related item, (c) policy for requiring collateral or other security and information as to accessing such collateral or security, and (d) the nature and brief description of such collateral or security; (4) quantitative information about market risks and how such risks are managed; (5) for items measured on both a recurring and nonrecurring basis information regarding the inputs used to develop the fair value measurement; and (6) for items presented in the financial statement for which fair value measurement is elected: (a) information necessary to understand the reasons for the election, (b) discussion of the effect of fair value changes on earnings, (c) a description of [similar groups] items for which the election is made and the relation thereof to the balance sheet, the aggregate carrying value of items included in the balance sheet that are not eligible for the election; (7) all other required (as defined) and desired information. + ReferencesReference 1: http://www.xbrl.org/2003/role/exampleRef -Topic 820 -SubTopic 10 -Name Accounting Standards Codification -Section 55 -Paragraph 107 -Publisher FASB -URI https://asc.fasb.org/1943274/2147482078/820-10-55-107Reference 2: http://www.xbrl.org/2003/role/exampleRef -Topic 820 -SubTopic 10 -Name Accounting Standards Codification -Section 55 -Paragraph 100 -Publisher FASB -URI https://asc.fasb.org/1943274/2147482078/820-10-55-100Reference 3: http://www.xbrl.org/2003/role/disclosureRef -Topic 820 -SubTopic 10 -Name Accounting Standards Codification -Section 50 -Paragraph 2 -Subparagraph (c)(3) -Publisher FASB -URI https://asc.fasb.org/1943274/2147482106/820-10-50-2Reference 4: http://www.xbrl.org/2003/role/disclosureRef -Topic 820 -SubTopic 10 -Name Accounting Standards Codification -Section 50 -Paragraph 6A -Subparagraph (a) -Publisher FASB -URI https://asc.fasb.org/1943274/2147482106/820-10-50-6AReference 5: http://www.xbrl.org/2003/role/disclosureRef -Topic 820 -SubTopic 10 -Name Accounting Standards Codification -Section 50 -Paragraph 2E -Publisher FASB -URI https://asc.fasb.org/1943274/2147482106/820-10-50-2EReference 6: http://www.xbrl.org/2003/role/disclosureRef -Topic 820 -SubTopic 10 -Name Accounting Standards Codification -Section 50 -Paragraph 6A -Subparagraph (h) -Publisher FASB -URI https://asc.fasb.org/1943274/2147482106/820

payment of principal or interest has become 90 days past due or management has serious doubts about the further collectability of principal or interest. When held-to-maturity securities are placed on nonaccrual status, unpaid interest credited to income is reversed against interest income.Allowance for Credit Losses on Available-for-Sale SecuritiesThe Company measures expected credit losses on available-for-sale securities when the Bank intends to sell, or when it is not more likely than not that it will be required to sell, the security before recovery of its amortized cost basis. If either of the criteria regarding intent or requirement to sell is met, the amortized cost basis of the security is written down to fair value through income. For available-for-sale securities that do not meet the previously mentioned criteria, the Company evaluates whether the decline in fair value has resulted from credit losses or other factors. In making this assessment, the Company considers the extent to which fair value is less than amortized cost, any changes to the rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. If this evaluation indicates that a credit loss exists, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses is recorded for the credit loss, equal to the amount that the fair value is less than the amortized cost basis. Any impairment that has not been recorded through an allowance for credit losses is recognized in other comprehensive income.The allowance for credit loss on available-for-sale securities is included within the recorded balance of securities available-for-sale on the Consolidated Balance Sheets. Changes in the allowance for credit losses are recorded within provision for credit losses on the Consolidated Statements of Income. Losses are charged against the allowance when the Company believes the collectability of an available-for-sale security is in jeopardy or when either of the criteria regarding intent or requirement to sell is met.Accrued interest receivable on available-for-sale securities totaled \$162 thousand as of September 30, 2024 and is included within accrued interest receivable on the Company's Consolidated Balance Sheets. This amount is excluded from the estimate of expected credit losses. Generally, available-for-sale securities are classified as nonaccrual when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about the further collectability of principal or interest. When available-for-sale securities are placed on nonaccrual status, unpaid interest credited to income is reversed against interest income. Regulatory Stock, at Cost 4. Regulatory Stock, at CostFederal law requires a member institution of the Federal Home Loan Bank (FHLB) system to purchase and hold restricted stock of its district FHLB according to a predetermined formula. The Company invests in Federal Home Loan Bank of New York stock as required to support borrowing activities, as detailed in Note J to these consolidated financial statements. Although FHLB stock is an equity interest in a FHLB, it does not have a readily determinable fair value because its ownership is restricted and it lacks a market. FHLB stock can be sold back only at its par value of \$100 per share and only to the FHLBs or to another member institution. Accordingly, the FHLB restricted stock is carried at cost, less any applicable impairment charges. Loans and Allowance for Credit Losses 5. Loans and Allowance for Credit LossesLoans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are stated at the amount of unpaid principal, adjusted for net deferred loan fees and costs, and reduced by an allowance for credit losses. Interest on loans is accrued and credited to operations based upon the principal amounts outstanding. The allowance for credit losses is established through a provision for possible loan losses charged to operations. Loans are charged against the allowance for credit losses when management believes that the collectability of the principal is unlikely. Income recognition of interest is discontinued when, in the opinion of management, the collectability of such interest becomes doubtful. A loan is generally classified as non-accrual when the scheduled payment(s) due on the loan is delinquent for more than 90 days. When a loan is placed on non-accrual, all previously accrued and unpaid interest is reversed. Loan origination fees and certain direct origination costs are deferred and amortized over the life of the related loans as an adjustment to the yield on loans receivable using the effective interest method.Allowance for Credit Losses on LoansThe Company maintains its allowance for credit loss on loans (ACL) at a level that management believes to be appropriate to absorb estimated credit losses as of the date of the Consolidated Balance Sheet. The Company established its allowance in accordance with the guidance included in Accounting Standards Codification 326, Financial Instruments Credit Losses (ASC 326). The ACL is a valuation reserve established and maintained by charges against income. Loans, or portions thereof, are charged-off against the ACL when they are deemed uncollectible. The ACL is an estimate of expected credit losses that considers our historical loss experience, the weighted average expected lives of loans, current economic conditions and forecasts of future economic conditions. The determination of an appropriate ACL is inherently subjective and may have significant changes from period to period. The methodology for determining the ACL has two main components: evaluation of expected credit losses for certain groups of homogeneous loans that share similar risk characteristics and evaluation of loans that do not share risk characteristics with other loans. The ACL is measured on a collective (pool) basis when similar characteristics exist. The Company's loan portfolio is segmented by loan types that have similar risk characteristics and behave similarly during economic cycles.Historical credit loss experience is the basis for the estimate of expected credit losses. We apply our historical loss rates to pools of loans with similar risk characteristics using the Weighted-Average Remaining Maturity (WARM) method. The remaining contractual life of the pools of loans with similar risk characteristics is adjusted by expected scheduled payments and prepayments. After consideration of the historical loss calculation, management applies qualitative adjustments to reflect qualitative changes not already reflected in the historical loss information. Our reasonable and supportable forecast adjustment is based on a regional economic indicator obtained from the United States Government Publishing Office. The Company selected eight qualitative metrics which were correlated with the Bank and its peer group's historical loss patterns. The eight qualitative metrics include: changes in lending policies and procedures, changes in national and local economic conditions as well as business conditions, changes in the nature, complexity, and volume of the portfolio, changes in the experience, ability, and depth of lenders and lending management, changes in the volume and severity of past due and classified loans, changes in the value of collateral securing loans, changes in or the existence of credit concentrations, and changes in the legal and/or regulatory landscape. The adjustments are weighted for relevance before applying to each pool of loans. Each quarter, management reviews the recommended adjustment factors and applies any additional adjustments based on current conditions.The ACL for individual loans begins with the use of normal credit review procedures to identify whether a loan no longer shares similar risk characteristics with other pooled loans and, therefore, should be individually assessed. We individually evaluate loans that meet the following criteria: (1) when it is determined that foreclosure is probable, (2) substandard, doubtful and nonperforming loans when repayment is expected to be provided substantially through the operation or sale of the collateral, or (3) when it is determined by management that a loan does not share similar risk characteristics with other loans. Credit loss estimates are calculated based on the following three acceptable methods for measuring the ACL: (1) the present value of expected future cash flows discounted at the loan's original effective interest rate; (2) the loan's observable market price; or (3) the fair value of the collateral when the loan is collateral dependent. Our individual loan evaluations consist primarily of the fair value of collateral method because most of our loans are collateral dependent. Collateral values are reduced to consider expected disposition costs when appropriate. A charge-off is recorded when the estimated fair value of the loan is less than the loan balance.The Company has elected to exclude \$4.6 million of accrued interest receivable on loans as of September 30, 2024 from the measurement of its ACL. When a loan is placed on non-accrual status, any outstanding accrued interest is reversed against interest income. Accrued interest on loans is reported in the accrued interest receivable line on the Consolidated Statements of Balance Sheet.Allowance for Credit Losses on Unfunded Loan CommitmentsThe Company estimates expected credit losses over the contractual period in which the Bank is exposed to credit risk via a contractual obligation to extend credit unless that obligation is unconditionally cancellable by the Bank. The allowance for credit losses on unfunded loan commitments is included in accounts payable and other liabilities in the Company's Consolidated Balance Sheets and is adjusted through credit loss expense. The estimate includes consideration of the likelihood that funding will occur, the amount of funding that will occur and an estimate of expected credit losses on commitments expected to be funded over its estimated life. Premises and Equipment 6. Premises and EquipmentPremises and equipment are carried at cost less accumulated depreciation, and include capitalized expenditures for new facilities, major betterments and renewals. Expenditures for maintenance and repairs are charged to expense as incurred. Depreciation is computed using the straight-line method based upon the estimated useful lives of the related assets for financial reporting purposes and using the mandated methods by asset type for income tax purposes. Leasehold improvements are depreciated using the straight-line method based upon the initial term of the lease. The Company accounts for the impairment of long-lived assets in accordance with US GAAP, which requires recognition and measurement for the impairment of long-lived assets to be held and used or to be disposed of by sale. The Company had no impaired long-lived assets at September 30, 2024 and 2023. Revenue Recognition 7. Revenue RecognitionThe Company recognizes revenue in the Consolidated Statements of Income as it is earned and when collectability is reasonably assured. The primary source of revenue is interest income from interest earning assets, which is recognized on the accrual basis of accounting using the effective interest method. The recognition of revenues from interest earning assets is based upon formulas from underlying loan agreements, securities contracts, or other similar contracts. Non-interest income is recognized on the accrual basis of accounting as services are provided or as transactions occur. Non-interest income includes earnings on bank-owned life insurance, deposit accounts, merchant services, ATM and debit card fees, mortgage banking activities, commercial loan prepayment penalties and other miscellaneous services and transactions.The Company's contracts with customers in the scope of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 606, Revenue from Contracts with Customers are contracts for deposit accounts and contracts for non-deposit investment accounts through a third party service provider. Both types of contracts result in non-interest income being recognized. The revenue resulting from deposit accounts, which includes fees such as insufficient funds fees, wire transfer fees and out-of-network ATM transaction fees, is included as a component of service charges on the Consolidated Statements of Income. The revenue resulting from non-deposit investment accounts is included as a component of other operating income on the Consolidated Statements of Income. Revenue from contracts with customers included in service charges was \$1.1 million and \$1.6 million for the years ended September 30, 2024 and 2023, respectively. Revenue from contracts with customers included in other operating income was \$81 thousand and \$89 thousand for the years ended September 30, 2024 and 2023, respectively.For our contracts with customers, we satisfy our performance obligations each day as services are rendered. For our deposit account revenue, we receive payment on a daily basis as services are rendered and for our non-deposit investment account revenue, we receive payment on a monthly basis from our third-party service provider as services are rendered. Other Real Estate Owned 8. Other Real Estate OwnedReal estate acquired through foreclosure, or a deed-in-lieu of foreclosure, is recorded at fair value less estimated selling costs at the date of acquisition or transfer, and subsequently at the lower of its net cost or fair value less estimated selling costs. Adjustments to the carrying value at the date of acquisition or transfer are charged to the allowance for loan losses. The carrying value of the individual properties is subsequently adjusted to the extent it exceeds estimated fair value less estimated selling costs, at which time a provision for losses on such real estate is charged to operations.The Company accounts for gains on sales of other real estate owned under ASC Topic 606 Revenue from Contracts with Customers, which uses a principles based methodology. As it pertains to the criteria for determining how a contract should be accounted for under the new guidance, judgment is required in evaluating if: (a) a commitment on the buyer's part exists; (b) collection is probable in circumstances where the initial investment is minimal; and (c) the buyer has obtained control of the asset, including the significant risks and rewards of the ownership. If there is no commitment on the buyer's part, collection is not probable or the buyer has not obtained control of the asset, then a gain cannot be recognized under the new guidance. Operating expenses of holding real estate, net of related income, are charged against income as incurred. Losses on the disposition of real estate, including expenses incurred in connection with the disposition, are charged to operations. Pension and Postretirement Plans 9. Pension and Postretirement PlansThe Company sponsors a qualified defined benefit pension plan and a supplemental executive retirement plan (SERP). The qualified defined benefit pension plan is funded with trust assets invested in a diversified portfolio of debt and equity securities. Accounting for pensions and other postretirement benefits involves estimating the cost of benefits to be provided well into the future and attributing that cost over the time period each employee works. This involves extensive use of assumptions about inflation, investment returns, mortality, turnover, and discount rates. Among other factors, changes in interest rates, investment returns and the market value of plan assets can (a) affect the level of plan funding; (b) cause volatility in the net periodic pension cost; and (c) increase our future contribution requirements. A significant decrease in investment returns or the market value of plan assets or a significant decrease in interest rates could increase our net periodic pension costs and adversely affect our results of operations. A significant increase in our contribution requirements with respect to our qualified defined benefit pension plan could have an adverse impact on our cash flow. Changes in the key actuarial assumptions would impact net periodic benefit expense and the projected benefit obligation for our defined benefit and other postretirement benefit plan. See Note L, Pension Plan, and Note M, Non-Qualified Compensation Plan for information on these plans and the assumptions used. Income Taxes 10. Income TaxesThe Company and its subsidiaries file consolidated federal and state income tax returns. Income taxes are allocated based on the contribution of their respective income or loss to the consolidated income tax returns. The Company records income taxes on the basis of reported income using the asset and liability method. Accordingly, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. To the extent that current available evidence about the future raises doubt about the realization of a deferred tax asset, a valuation allowance is established. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The Company follows the provisions of FASB ASC Topic 740, which provides clarification on accounting for uncertainty in income taxes recognized in an enterprise's financial statements. The guidance prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return, and also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.At September 30, 2024 and 2023, no significant income tax uncertainties have been included in the Company's Consolidated Balance Sheets. The Company's policy is to recognize interest and penalties on unrecognized tax benefits in income tax expense in the Consolidated Statements of Income. No interest and penalties were recorded during the years ended September 30, 2024 and 2023. The tax years subject to examination by the taxing authorities are the years ended September 30, 2019 and forward. Advertising Costs 11. Advertising CostsThe Company expenses advertising costs as incurred. Earnings Per Share (EPS) 12. Earnings Per Share (EPS)A Basic income per share is calculated by dividing income available to common stockholders by the weighted average number of shares of common stock outstanding for the period. The weighted average common shares outstanding include shares allocated to the Employee Stock Ownership Plan.Diluted income per share is calculated by adjusting the weighted average common shares outstanding to reflect the potential dilution that could occur using the treasury stock method if securities or other contracts to issue common stock, such as stock options and unvested restricted stock, were exercised and converted into common stock. The resulting shares issued would share in the earnings of the Company. Shares issued and shares reacquired during the period are weighted for the portion of the period that they were outstanding. In periods of loss, dilution is not calculated and diluted loss per share is equal to basic loss per share. The following table presents a calculation of basic and diluted earnings per share (EPS) for the years ended September 30, 2024 and 2023. Basic and diluted earnings per share were calculated by dividing net income by the weighted-average number of shares outstanding for the periods. Years Ended September 30, 2024 2023 (Dollars in thousands, except share and per share data) Income applicable to common shares \$7,783 \$7,709 1 Weighted average shares outstanding - basic 6,341,610 6,424,796 Potential dilutive common stock equivalents 1 1 Weighted average shares outstanding - diluted 6,341,610 6,424,796 2 Earnings per share - basic \$1.23 \$1.20 Earnings per share - diluted \$1.23 \$1.20 All options were anti-dilutive at September 30, 2024 and 2023. Comprehensive Income and Accumulated Other Comprehensive Loss 13. Comprehensive Income and Accumulated Other Comprehensive LossComprehensive income includes net income as well as certain other items which result in a change to equity during the period. The other items allocated to comprehensive income, as well as the related income tax effects, for the years ended September 30, 2024 and 2023 were as follows: September 30, 2024 2023 Net of tax before tax expense \$ Tax expense \$ Amount \$ (In thousands) Unrealized holding gain (loss) arising during period on: Available-for-sale investments \$834 (\$205) \$629 \$ (47) \$12 \$ (35) Defined benefit pension plan \$297 \$ (91) \$206 \$ (394) \$ (122) \$272 Total unrealized holding gain arising during period \$1,131 \$ (296) \$835 \$ (347) \$ (11) \$237 Reclassification of pension costs \$53 \$ (15) \$38 \$ (122) \$ (34) \$88 Other comprehensive income, net \$1,184 \$ (311) \$873 \$ (469) \$ (144) \$325 (a) All amounts are net of tax. Related income tax expense or benefit calculated using an income tax rate approximating 25% for available-for-sale investments and 28% for pension plan. Details about the reclassification of accumulated other comprehensive loss components and the

Bank-Owned Life Insurance	\$ -	\$ -
1. Bank-Owned Life Insurance	\$ -	\$ -
The Company has purchased Bank-Owned Life Insurance (BOLI) policies. BOLI involves the purchasing of life insurance by the Company on directors and officers of the Bank. The proceeds are used to help defray the costs of non-qualified compensation plans. The Company is the owner and beneficiary of the policies. BOLI is recorded on the Consolidated Balance Sheets at its cash surrender value and changes in the cash surrender value are recorded in other income in the Consolidated Statements of Income. Off-Balance Sheet Credit Related Financial Instruments	\$ -	\$ -
15. Off-Balance Sheet Credit Related Financial Instruments	\$ -	\$ -
In the ordinary course of business, the Company has entered into commitments to extend credit, including commitments under commercial lines of credit. Such financial instruments are recorded when they are funded. The Company does not engage in the use of derivative financial instruments. See Note P, "Financial Instruments With Off-Balance Sheet Risk."	\$ -	\$ -
Segment Reporting 16. Segment Reporting	\$ -	\$ -
The Company acts as an independent, community, financial services provider, and offers traditional banking and related financial services to individual, business and government customers. The Company offers a full array of commercial and retail financial services, including the taking of time, savings and demand deposits; the making of commercial, consumer and home equity loans; and the provision of other financial services. Management does not separately allocate expenses, including the cost of funding loan demand, between the commercial and retail operations of the Company. As such, discrete financial information is not available and segment reporting would not be meaningful. New Accounting Pronouncements	\$ -	\$ -
17. New Accounting Pronouncements	\$ -	\$ -
In connection with the preparation of quarterly and annual reports in accordance with the Securities and Exchange Commission's (SEC) Securities Exchange Act of 1934, SEC Staff Accounting Bulletin Topic 11.M requires the disclosure of the impact that recently issued accounting standards will have on financial statements when they are adopted in the future. In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments - Credit Losses: Measurement of Credit Losses on Financial Instruments. ASU 2016-13 requires entities to report expected credit losses on financial instruments and other commitments to extend credit rather than the current incurred loss model. These expected credit losses for financial assets held at the reporting date are to be based on historical experience, current conditions, and reasonable and supportable forecasts. This ASU requires enhanced disclosures to help investors and other financial statement users better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an entity's portfolio. The Company adopted ASU 2016-13 on October 1, 2023 using the modified retrospective approach. Results and disclosures for reporting periods beginning after October 1, 2023 are presented under ASC 326 while prior period amounts continue to be reported in accordance with previously applicable GAAP. The impact of the change from the incurred loss model to the current expected credit loss model using ACL is included in the following table:	\$ -	\$ -

In March 2020, the FASB issued ASU 2020-04, Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting, to provide temporary optional expedients and exceptions to the U.S. GAAP guidance on contract modifications and hedge accounting to ease the financial reporting burdens of the expected market transition from LIBOR and other interbank offered rates to alternative reference rates, such as the Secured Overnight Financing Rate. Under the guidance, modifications of contracts due to reference rate reform will not require contract remeasurement or reassessment of a previous accounting determination. For hedge accounting, modification of critical terms of the hedge due to changes in reference rate reform will not affect hedge accounting or designate the hedging relationship. The guidance also provides specific expedients for fair value hedges, cash flow hedges, and excluded components. Further, the guidance provides a none-time election to sell or transfer held to maturity debt securities that are affected by the reference rate change. The guidance is effective upon issuance through December 31, 2022. In December 2022, the FASB issued ASU 2022-06, Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848, which extends the expiration date of Accounting Standards Codification (ASC) Topic 848 to December 31, 2024. ASU 2022-06 is effective for all reporting entities immediately upon issuance and must be applied on a prospective basis. These updates are not expected to have a significant impact on the Company's financial statements. In March 2022, the FASB issued ASU 2022-02, Financial Instruments - Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures, which eliminates the accounting guidance for troubled debt restructurings by creditors that have adopted ASU 2022-02 and enhances the disclosure requirements for modifications of receivables made with borrowers experiencing financial difficulty. In addition, the amendments in this ASU require disclosure of current period gross write-offs by year of origination for financing receivables in the existing vintage disclosures. This ASU became effective on October 1, 2023 for the Company. The adoption of this ASU resulted in updated disclosures within our financial statements but otherwise did not have a material impact on the Company's consolidated financial statements. Subsequent Events 18. Subsequent Events On October 31, 2024, the Company announced that its Board of Directors has approved a quarterly cash dividend of \$0.05 per common share to shareholders of record at the close of business on November 14, 2024, payable on November 27, 2024. On November 22, 2024, the Company declared a special dividend of \$0.04 per common share, payable on December 20, 2024, to shareholders of record at the close of business on December 6, 2024. Temporary equity is a security with redemption features that are outside the control of the issuer, is not classified as an asset or liability in conformity with GAAP, and is not mandatorily redeemable. Includes any type of security that is redeemable at a fixed or determinable price or on a fixed or determinable date or dates, is redeemable at the option of the holder, or has conditions for redemption which are not solely within the control of the issuer. If convertible, the issuer does not control the actions or events necessary to issue the maximum number of shares that could be required to be delivered under the conversion option if the holder exercises the option to convert the stock to another class of equity. If the security is a warrant or a rights issue, the warrant or rights issue is considered to be temporary equity if the issuer cannot demonstrate that it would be able to deliver upon the exercise of the option by the holder in all cases. Includes stock with put option held by ESOP and stock redeemable by holder only in the event of a change in control of the issuer. + ReferencesReference 1: <http://fasb.org/us-gaap/role/ref/legacyRef> -Topic 210 -SubTopic 10 -Name Accounting Standards Codification -Section 599 -Paragraph 1 -Subparagraph (SX 210.5-02(27)(b)) -Publisher FASB -URI <https://asc.fasb.org/1943274/2147480566/210-10-S99-1> + Details Name: us-gaap_TemporaryEquitySharesAuthorized Namespace Prefix: us-gaap_ Data Type: xbrli:sharesItemType Balance Type: na Period Type: instant X - Details Name: us-gaap_AwardTypeAxis=mygr_TwentyTwentyTwoEquityCompensationPlanMember Namespace Prefix: Data Type: na Balance Type: Period Type: X - Details Name: us-gaap_DerivativeInstrumentRiskAxis=us-gaap_StockOptionMember Namespace Prefix: Data Type: na Balance Type: Period Type: X - Details Name: us-gaap_StatementEquityComponentsAxis=us-gaap_CommonStockMember Namespace Prefix: Data Type: na Balance Type: Period Type: XML 66 R53.htm IDEA: XBRL DOCUMENT v3.24.4 STOCK-BASED COMPENSATION AND STOCK REPURCHASE PROGRAM (Details) - Schedule of Stock Option Activity 12 Months Ended Sep. 30, 2024 USD (\$) \$ / shares shares Sep. 30, 2024 USD (\$) \$ / shares shares Schedule of Stock Option Activity [Abstract] A A Shares, Ending balance | shares 293,200 293,200 Weighted Average Exercise Price, Ending balance | \$ / shares \$ 12.58 \$ 12.58 Weighted Average Remaining Contractual Life, Ending balance 8 years 11 months 23 days 7 years 11 months 23 days Aggregate Intrinsic Value, Ending balance | \$ Aggregate Intrinsic Value, Exercisable | \$ Shares, Exercisable | shares 117,280 117,280 Weighted Average Exercise Price, Exercisable | \$ / shares \$ 12.58 \$ 12.58 Weighted Average Remaining Contractual Life, Exercisable A 7 years 11 months 23 days Shares, Granted | shares A Weighted Average Exercise Price, Granted | \$ / shares A Aggregate Intrinsic Value, Granted | \$ A Shares, Exercised | shares A Weighted Average Exercise Price, Exercised | \$ / shares A Aggregate Intrinsic Value, Exercised | \$ A Shares, Forfeited | shares A Weighted Average Exercise Price, Forfeited | \$ / shares A Aggregate Intrinsic Value, Forfeited | \$ A Shares, Expired | shares A Weighted Average Exercise Price, Expired | \$ / shares A Aggregate Intrinsic Value, Expired | \$ A X - DefinitionAggregate intrinsic value, forfeited. + ReferencesNo definition available. + Details Name: mygr_ShareBasedCompensationArrangementByShareBasedPaymentAwardOptionsForfeitureInPeriodTotalIntrinsicValue Namespace Prefix: mygr_ Data Type: xbrli:monetaryItemType Balance Type: debit Period Type: duration X - DefinitionAggregate intrinsic value, granted. + ReferencesNo definition available. + Details Name: mygr_ShareBasedCompensationArrangementByShareBasedPaymentAwardOptionsGrantedInPeriodTotalIntrinsicValueGranted Namespace Prefix: mygr_ Data Type: xbrli:monetaryItemType

DefinitionInvestments in notes or bonds that are collateralized by a specific group of underlying assets owned by the issuer of the notes or bonds which are short-term, highly liquid investments that are both readily convertible to known amounts of cash and so near their maturity that they present insignificant risk of changes in value because of changes in interest rates. Generally, only investments with original maturities of three months or less qualify under that definition. Original maturity means original maturity to the entity holding the investment. For example, both a three-month US Treasury bill and a three-year Treasury note purchased three months from maturity qualify as cash equivalents. However, a Treasury note purchased three-years ago does not become a cash equivalent when its remaining maturity is three months. + ReferencesNo definition available. + Details Name: us-gaap_AssetBackedSecuritiesAtCarryingValue Namespace Prefix: us-gaap_Data Type: xbrli:monetaryItemType Balance Type: debit Period Type: instant X - DefinitionAmortized cost of investment in debt security measured at fair value with change in fair value recognized in other comprehensive income \(available-for-sale\), with single maturity date and allocated without single maturity date. + ReferencesReference 1: \[Sep. 30, 2023 USD \\(\\\$\\)

Generally, only investments with original maturities of three months or less qualify under that definition. Original maturity means original maturity to the entity holding the investment. For example, both a three-month US Treasury bill and a three-year Treasury note purchased three months from maturity qualify as cash equivalents. However, a Treasury note purchased three-years ago does not become a cash equivalent when its remaining maturity is three months. + ReferencesNo definition available. + Details Name: us-gaap_CommercialPaperAtCarryingValue Namespace Prefix: us-gaap_ Data Type: xbrli:monetaryItemType Balance Type: debit Period Type: instant X - DefinitionAmount of structure or a modification to a structure under construction. All intercompany balances and transactions have been eliminated in the consolidated financial statements.</p><p style="font: 10pt Times New Roman, Times, Serif; margin: 0pt 0 0pt 9pt; text-align: justify; text-indent: 27pt"></p><p style="font: 10pt Times New Roman, Times, Serif; margin: 0pt 0 0pt 9pt; text-align: justify; text-indent: 27pt">The Company has evaluated subsequent events and transactions occurring subsequent to the consolidated balance sheet date of September 30, 2024, for items that should potentially be recognized or disclosed in these consolidated financial

statements. The evaluation was conducted through the date these consolidated financial statements were available to be issued.

In preparing financial statements in conformity with US GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The principal estimates that are particularly susceptible to significant change in the near term relate to the allowance for credit losses and the deferred tax asset. The evaluation of the adequacy of the allowance for loan losses includes an analysis of the individual loans and overall risk characteristics and size of the different loan portfolios, and takes into consideration current economic and market conditions, the capability of specific borrowers to pay specific loan obligations, as well as current loan collateral values. However, actual losses on specific loans, which also are encompassed in the analysis, may vary from estimated losses.

The Company records income taxes using the asset and liability method. Accordingly, deferred tax assets and liabilities: (i) are recognized for the expected future tax consequences of events that have been recognized in the financial statements or tax returns; (ii) are attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases; and (iii) are measured using enacted tax rates expected to apply in the years when those temporary differences are expected to be recovered or settled.

Where applicable, deferred tax assets are reduced by a valuation allowance for any portions determined not likely to be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax expense.

in the period of enactment. The valuation allowance is adjusted, by a charge or credit to income tax expense, as changes in facts and circumstances warrant.

2. Cash and Cash Equivalents

For purposes of reporting cash flows, cash and cash equivalents include cash on hand, amounts due from banks, time deposits with original maturities less than three months and overnight deposits.

3. Investment Securities and Allowance for Credit Losses

The Company classifies its investment securities into one of two portfolios: held to maturity or available for sale. Investments in debt securities that the Company has the positive intent and ability to hold to maturity are classified as held to maturity securities and reported at amortized cost. Debt securities not classified as held to maturity securities are classified as available for sale securities and reported at fair value, with unrealized holding gains or losses, net of deferred income taxes, reported in the accumulated other comprehensive income ("AOCI") component of stockholders' equity. Equity securities, with certain exceptions, are measured at fair value with changes in fair value recognized in net income.

If the fair value of a security is less than its amortized cost, the security is deemed to be impaired. Management evaluates all securities with unrealized losses quarterly to determine if such impairments are "temporary" or "other-than-temporary" in accordance with applicable accounting guidance. The Company accounts for temporary impairments based upon security classification as either available for sale or held to maturity. Temporary impairments on "available for sale" securities are recognized, on a tax-effected basis, through AOCI with offsetting entries adjusting the carrying value of the security and the balance of deferred taxes. Conversely, the Company does not adjust the carrying value of "held to maturity" securities for temporary impairments, although information concerning the amount and duration of impairments on held to maturity securities is generally disclosed in periodic consolidated financial statements.

The Company accounts for other-than-temporary impairments based upon several considerations. First, other-than-temporary impairments on securities that the Company has decided to sell as of the close of a fiscal period, or will, more likely than not, be required to sell prior to the full recovery of their fair value to a level equal to their amortized cost, are recognized in operations. If neither of these criteria apply, then the other-than-temporary impairment is separated into credit-related and noncredit-related components. The credit-related impairment generally represents the amount by which the present value of the cash flows that are expected to be collected on an other-than-temporarily impaired security fall below its amortized cost while the noncredit-related component represents the remaining portion of the impairment not otherwise designated as credit-related. The Company recognizes credit-related, other-than-temporary impairments in earnings, while noncredit-related, other-than-temporary impairments on debt securities are recognized, net of deferred taxes, in AOCI.

Premiums and discounts on all securities are amortized or accreted to maturity by use of the level-yield method considering the impact of principal amortization and prepayments on mortgage-backed securities. Gain or loss on sales of securities is recognized on the specific identification method.

Allowance for Credit Losses on Held-to-Maturity Securities

The Company accounts for its held-to-maturity securities in accordance with Accounting Standards Codification 326-20, *Financial Instruments - Credit Loss - Measured at Amortized Cost*, which requires that the Company measure expected credit losses on held-to-maturity securities on a collective basis by major security type. The estimate of expected credit losses considers historical credit loss information that is adjusted for current economic conditions and reasonable and supportable forecasts.

The Company classifies its held-to-maturity debt securities into the following major security types: obligations of U.S. government agencies, obligations of U.S. government-sponsored enterprises, private label mortgage-backed securities, obligations of state and political subdivisions and corporate securities. Credit ratings of held-to-maturity debt securities, which are a significant input in calculating the expected credit loss, are reviewed on a quarterly basis. Based on the credit ratings of our held-to-maturity securities and our historical experience of no losses, the Company determined that the expected credit losses on its held-to-maturity portfolio is not significant.

Accrued interest receivable on held-to-maturity securities totaled \$225 thousand as of September 30, 2024 and is included within accrued interest receivable on the Company's Consolidated Balance Sheets. This amount is excluded from the estimate of expected credit losses. Generally, held-to-maturity securities are classified as nonaccrual when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about the further collectability of principal or interest. When held-to-maturity securities are placed on nonaccrual status, unpaid interest credited to income is reversed against interest income.

Allowance for Credit

Losses on Available-for-Sale Securities

The Company measures expected credit losses on available-for-sale securities when the Bank intends to sell, or when it is not more likely than not that it will be required to sell, the security before recovery of its amortized cost basis. If either of the criteria regarding intent or requirement to sell is met, the amortized cost basis of the security is written down to fair value through income. For available-for-sale securities that do not meet the previously mentioned criteria, the Company evaluates whether the decline in fair value has resulted from credit losses or other factors. In making this assessment, the Company considers the extent to which fair value is less than amortized cost, any changes to the rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. If this evaluation indicates that a credit loss exists, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses is recorded for the credit loss, equal to the amount that the fair value is less than the amortized cost basis. Any impairment that has not been recorded through an allowance for credit losses is recognized in other comprehensive income.

The allowance for credit loss on available-for-sale securities is included within the recorded balance of securities available-for-sale on the Consolidated Balance Sheets. Changes in the allowance for credit losses are recorded within provision for credit losses on the Consolidated Statements of Income. Losses are charged against the allowance when the Company believes the collectability of an available-for-sale security is in jeopardy or when either of the criteria regarding intent or requirement to sell is met.

Accrued interest receivable on available-for-sale securities totaled \$162 thousand as of September 30, 2024 and is included within accrued interest receivable on the Company's Consolidated Balance Sheets. This amount is excluded from the estimate of expected credit losses. Generally, available-for-sale securities are classified as nonaccrual when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about the further collectability of principal or interest. When available-for-sale securities are placed on nonaccrual status, unpaid interest credited to income is reversed against interest income.

Regulatory Stock, at Cost

Federal law requires a member institution of the Federal Home Loan Bank ("FHLB") system to purchase and hold restricted stock of its district FHLB according to a predetermined formula. The Company invests in Federal Home Loan Bank of New York stock as required to support borrowing activities, as detailed in Note J to these consolidated financial statements. Although FHLB stock is an equity interest in a FHLB, it does not have a readily determinable fair value because its ownership is restricted and it lacks a market. FHLB stock can be sold back only at its par value of \$100 per share and only to the FHLBs or to another member institution. Accordingly, the FHLB restricted stock is carried at cost, less any applicable impairment charges.

5. Loans and Allowance for Credit Losses

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are stated at the amount of unpaid principal, adjusted for net deferred loan fees and costs, and reduced by an allowance for credit losses. Interest on loans is accrued and credited to operations based upon the principal amounts outstanding. The allowance for credit losses is established through a provision for possible loan losses charged to operations. Loans are charged against the allowance for credit losses when management believes that the collectability of the principal is unlikely.

Income recognition of interest is discontinued when, in the opinion of management, the collectability of such interest becomes doubtful. A loan is generally classified as non-accrual when the scheduled payment(s) due on the loan is delinquent for more than 90 days. When a loan is placed on non-accrual, all previously accrued and unpaid interest is reversed. Loan origination fees and certain direct origination costs are deferred and amortized over the life of the related loans as an adjustment to the yield on loans receivable using the effective interest method.

Allowance for Credit Losses on Loans

The Company maintains its allowance for credit loss on loans ("ACL") at a level that management believes to be appropriate to absorb estimated credit losses as of the date of the Consolidated Balance Sheet. The Company established its allowance in accordance with the guidance included in Accounting Standards Codification 326, *Financial Instruments - Credit Losses* ("ASC 326"). The ACL is a valuation reserve established and maintained by charges against income. Loans, or portions thereof, are charged-off against the ACL when they are deemed uncollectible. The ACL is an estimate of expected credit losses that considers our historical loss experience, the weighted average expected lives of loans, current economic conditions and forecasts of future economic conditions. The determination of an appropriate ACL is inherently subjective and may have significant changes from period to period. The methodology for determining the ACL has two main components: evaluation of expected credit losses for certain groups of homogeneous loans that share similar risk characteristics and evaluation of loans that do not share risk characteristics with other loans. The ACL is measured on a collective (pool) basis when similar characteristics exist. The Company's loan portfolio is segmented by loan types that have similar risk characteristics and behave similarly during economic cycles.

Historical credit loss experience is the basis for the estimate of expected credit losses. We apply our historical loss rates to pools of loans with similar risk characteristics using the Weighted-Average Remaining Maturity ("WARM") method. The remaining contractual life of the pools of loans with similar risk characteristics is adjusted by expected scheduled payments and prepayments. After consideration of the historical loss calculation, management applies qualitative adjustments to reflect qualitative changes not already reflected in the historical loss information. Our reasonable and supportable forecast adjustment is based on a regional economic indicator obtained from the United States Government Publishing Office. The Company selected eight qualitative metrics which were correlated with the Bank and its peer group's historical loss patterns. The eight qualitative metrics include: changes in lending policies and procedures, changes in national and local economic conditions as well as business conditions, changes in the nature, complexity, and volume of the portfolio, changes in the experience, ability, and depth of lenders and lending management, changes in the volume and severity of past due and classified loans, changes in the value of collateral securing loans, changes in or the existence of credit concentrations, and changes in the legal and/or regulatory landscape. The adjustments are weighted for relevance before applying to each pool of loans. Each quarter, management reviews the recommended adjustment factors and applies any additional adjustments based on current conditions.

The ACL for individual loans begins with the use of normal credit review procedures to identify whether a loan no longer shares similar risk characteristics with other pooled loans and, therefore, should be individually assessed. We individually evaluate loans that meet the following criteria: (1) when it is determined that foreclosure is probable, (2) substandard, doubtful and nonperforming loans when repayment is expected to be provided substantially through the operation or sale of the collateral, or (3) when it is determined by management that a loan does not share similar risk characteristics with other loans. Credit loss estimates are calculated based on the following three acceptable methods for measuring the ACL: (1) the present value of expected future cash flows discounted at the

loan's original effective interest rate; (2) the loan's observable market price; or (3) the fair value of the collateral when the loan is collateral dependent. Our individual loan evaluations consist primarily of the fair value of collateral method because most of our loans are collateral dependent. Collateral values are reduced to consider expected disposition costs when appropriate. A charge-off is recorded when the estimated fair value of the loan is less than the loan balance.

The Company has elected to exclude \$4.6 million of accrued interest receivable on loans as of September 30, 2024 from the measurement of its ACL. When a loan is placed on non-accrual status, any outstanding accrued interest is reversed against interest income. Accrued interest on loans is reported in the accrued interest receivable line on the Consolidated Statements of Balance Sheet.

Allowance for Credit Losses on Unfunded Loan Commitments

The Company estimates expected credit losses over the contractual period in which the Bank is exposed to credit risk via a contractual obligation to extend credit unless that obligation is unconditionally cancellable by the Bank. The allowance for credit losses on unfunded loan commitments is included in accounts payable and other liabilities in the Company's Consolidated Balance Sheets and is adjusted through credit loss expense. The estimate includes consideration of the likelihood that funding will occur, the amount of funding that will occur and an estimate of expected credit losses on commitments expected to be funded over its estimated life.

6. Premises and Equipment

Premises and equipment are carried at cost less accumulated depreciation, and include capitalized expenditures for new facilities, major betterments and renewals. Expenditures for maintenance and repairs are charged to expense as incurred. Depreciation is computed using the straight-line method based upon the estimated useful lives of the related assets for financial reporting purposes and using the mandated methods by asset type for income tax purposes. Leasehold improvements are depreciated using the straight-line method based upon the initial term of the lease.

The Company accounts for the impairment of long-lived assets in accordance with US GAAP, which requires recognition and measurement for the impairment of long-lived assets to be held and used or to be disposed of by sale. The Company had no impaired long-lived assets at September 30, 2024 and 2023.

7. Revenue Recognition

The Company recognizes revenue in the Consolidated Statements of Income as it is earned and when collectability is reasonably assured. The primary source of revenue is interest income from interest earning assets, which is recognized on the accrual basis of accounting using the effective interest method. The recognition of revenues from interest earning assets is based upon formulas from underlying loan agreements, securities contracts, or other similar contracts. Non-interest income includes earnings on bank-owned life insurance, deposit accounts, merchant services, ATM and debit card fees, mortgage banking activities, commercial loan prepayment penalties and other miscellaneous services and transactions.

The Company's contracts with customers in the scope of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 606, "*Revenue from Contracts with Customers*" are contracts for deposit accounts and contracts for non-deposit investment accounts through a third party service provider. Both types of contracts result in non-interest income being recognized. The revenue resulting from deposit accounts, which includes fees such as insufficient funds fees, wire transfer fees and out-of-network ATM transaction fees, is included as a component of service charges on the Consolidated Statements of Income. The revenue resulting from non-deposit investment accounts is included as a component of other operating income on the Consolidated Statements of Income.

Revenue from contracts with customers included in service charges was \$1.1 million and \$1.6 million for the years ended September 30, 2024 and 2023, respectively. Revenue from contracts with customers included in other operating income was \$91 thousand and \$89 thousand for the years ended September 30, 2024 and 2023, respectively.

For our contracts with customers, we satisfy our performance obligations each day as services are rendered. For our deposit account revenue, we receive payment on a daily basis as services are rendered and for our non-deposit investment account revenue, we receive payment on a monthly basis from our third-party service provider as services are rendered.

8. Other Real Estate Owned

Real estate acquired through foreclosure, or a deed-in-lieu of foreclosure, is recorded at fair value less estimated selling costs at the date of acquisition or transfer, and subsequently at the lower of its net cost or fair value less estimated selling costs. Adjustments to the carrying value at the date of acquisition or transfer are charged to the allowance for loan losses. The carrying value of the individual properties is subsequently adjusted to the extent it exceeds estimated fair value less estimated selling costs, at which time a provision for losses on such real estate is charged to operations.

The Company accounts for gains on sales of other real estate owned under ASC Topic 606 "*Revenue from Contracts with Customers*", which uses a principles based methodology. As it pertains to the criteria for determining how a contract should be accounted for under the new guidance, judgment is required in evaluating if: (a) a commitment on the buyer's part exists; (b) collection is probable in circumstances where the initial investment is minimal; and (c) the buyer has obtained control of the asset, including the significant risks and rewards of the ownership. If there is no commitment on the buyer's part, collection is not probable or the buyer has not obtained control of the asset, then a gain cannot be recognized under the new guidance.

Operating expenses of holding real estate, net of related income, are charged against income as incurred. Losses on the disposition of real estate, including expenses incurred in connection with the disposition, are charged to operations.

9. Pension and Postretirement Plans

The Company sponsors a qualified defined benefit pension plan and a supplemental executive retirement plan ("SERP"). The qualified defined benefit pension plan is funded with trust assets invested in a diversified portfolio of debt and equity securities. Accounting for pensions and other postretirement benefits involves estimating the cost of benefits to be provided well into the future and attributing that cost over the time period each employee works. This involves extensive use of assumptions about inflation, investment returns, mortality, turnover, and discount

rates. Among other factors, changes in interest rates, investment returns and the market value of plan assets can (a) affect the level of plan funding; (b) cause volatility in the net periodic pension cost; and (c) increase our future contribution requirements. A significant decrease in investment returns or the market value of plan assets or a significant decrease in interest rates could increase our net periodic pension costs and adversely affect our results of operations. A significant increase in our contribution requirements with respect to our qualified defined benefit pension plan could have an adverse impact on our cash flow. Changes in the key actuarial assumptions would impact net periodic benefit expense and the projected benefit obligation for our defined benefit and other postretirement benefit plan. See Note L, "Pension Plan," and Note M, "Non-Qualified Compensation Plan" for information on these plans and the assumptions used.

10. Income Taxes

The Company and its subsidiaries file consolidated federal and state income tax returns. Income taxes are allocated based on the contribution of their respective income or loss to the consolidated income tax returns.

The Company records income taxes on the basis of reported income using the asset and liability method. Accordingly, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. To the extent that current available evidence about the future raises doubt about the realization of a deferred tax asset, a valuation allowance is established. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company follows the provisions of FASB ASC Topic 740, which provides clarification on accounting for uncertainty in income taxes recognized in an enterprise's financial statements. The guidance prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return, and also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

At September 30, 2024 and 2023, no significant income tax uncertainties have been included in the Company's Consolidated Balance Sheets. The Company's policy is to recognize interest and penalties on unrecognized tax benefits in income tax expense in the Consolidated Statements of Income. No interest and penalties were recorded during the years ended September 30, 2024 and 2023. The tax years subject to examination by the taxing authorities are the years ended September 30, 2019 and forward.

11. Advertising Costs

The Company expenses advertising costs as incurred.

12. Earnings Per Share ("EPS")

Basic income per share is calculated by dividing income available to common stockholders by the weighted average number of shares of common stock outstanding for the period. The weighted average common shares outstanding include shares allocated to the Employee Stock Ownership Plan.

Diluted income per share is calculated by adjusting the weighted average common shares outstanding to reflect the potential dilution that could occur using the treasury stock method if securities or other contracts to issue common stock, such as stock options and unvested restricted stock, were exercised and converted into common stock. The resulting shares issued would share in the earnings of the Company. Shares issued and shares reacquired during the period are weighted for the portion of the period that they were outstanding. In periods of loss, dilution is not calculated and diluted loss per share is equal to basic loss per share.

The following table presents a calculation of basic and diluted earnings per share ("EPS") for the years ended September 30, 2024 and 2023. Basic and diluted earnings per share were calculated by dividing net income by the weighted average number of shares outstanding for the periods.

Years Ended	2024	2023
(Dollars in thousands, except share and per share data)		
Income applicable to common shares	7,783	7,709
Weighted average shares outstanding - basic	6,341,610	6,424,796
Potential dilutive common stock equivalents		
Basic	6,341,610	6,424,796
Diluted	6,341,610	6,424,796

(1,481)	
	Defined benefit pension plan, net of tax
(63)	
	Total accumulated other comprehensive loss
(916)	

14.

Bank-Owned Life Insurance

The Company has purchased Bank-Owned Life Insurance ("BOLI") policies. BOLI involves the purchasing of life insurance by the Company on directors and officers of the Bank. The proceeds are used to help defray the costs of non-qualified compensation plans. The Company is the owner and beneficiary of the policies. BOLI is recorded on the Consolidated Balance Sheets at its cash surrender value and changes in the cash surrender value are recorded in other income in the Consolidated Statements of Income.

15.

Off-Balance Sheet Credit Related Financial Instruments

In the ordinary course of business, the Company has entered into commitments to extend credit, including commitments under commercial lines of credit. Such financial instruments are recorded when they are funded. The Company does not engage in the use of derivative financial instruments. See Note P, "Financial Instruments With Off-Balance Risk."

16.

Segment Reporting

The Company acts as an independent, community, financial services provider, and offers traditional banking and related financial services to individual, business and government customers. The Company offers a full array of commercial and retail financial services, including the taking of time, savings and demand deposits; the making of commercial, consumer and home equity loans; and the provision of other financial services.

Management does not separately allocate expenses, including the cost of funding loan demand, between the commercial and retail operations of the Company. As such, discrete financial information is not available and segment reporting would not be meaningful.

17.

New Accounting Pronouncements

In connection with the preparation of quarterly and annual reports in accordance with the Securities and Exchange Commission's ("SEC") Securities Exchange Act of 1934, SEC Staff Accounting Bulletin Topic 11.M requires the disclosure of the impact that recently issued accounting standards will have on financial statements when they are adopted in the future.

In June 2016, the FASB issued ASU No. 2016-13, *"Financial Instruments – Credit Losses: Measurement of Credit Losses on Financial Instruments"*. ASU 2016-13 requires entities to report "expected" credit losses on financial instruments and other commitments to extend credit rather than the current "incurred loss" model. These expected credit losses for financial assets held at the reporting date are to be based on historical experience, current conditions, and reasonable and supportable forecasts. This ASU requires enhanced disclosures to help investors and other financial statement users better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an entity's portfolio. The Company adopted ASU 2016-13 on October 1, 2023 using the modified retrospective approach. Results and disclosures for reporting periods beginning after October 1, 2023 are presented under ASC 326 while prior period amounts continue to be reported in accordance with previously applicable GAAP.

The impact of the change from the incurred loss model to the current expected credit loss model using ACL is included in the following table:

	October 1, 2023	Pre-adoption	Impact	As Reported
Assets				
One-to-four family residential	1,259	1,259		1,259
Commercial real estate	5,277	5,277		5,277
Construction and land	472	472		472
Home equity loans and lines of credit	207	207		207
Commercial business	939	939		939
Other	176	176		176
Liabilities				
Total	8,330	8,330		8,330

In March 2020, the FASB issued ASU 2020-04, *Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting*, to provide temporary optional expedients and exceptions to the U.S. GAAP guidance on contract modifications and hedge accounting to ease the financial reporting burdens of the expected market

transition from LIBOR and other interbank offered rates to alternative reference rates, such as the Secured Overnight Financing Rate. Under the guidance, modifications of contracts due to reference rate reform will not require contract remeasurement or reassessment of a previous accounting determination. For hedge accounting, modification of critical terms of the hedge due to changes in reference rate reform will not affect hedge accounting or dedesignate the hedging relationship. The guidance also provides specific expedients for fair value hedges, cash flow hedges, and excluded components. Further, the guidance provides a none-time election to sell or transfer held to maturity debt securities that are affected by the reference rate change. The guidance is effective upon issuance through December 31, 2022. In December 2022, the FASB issued ASU 2022-06, *Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848*, which extends the expiration date of Accounting Standards Codification (ASC) Topic 848 to December 31, 2024. ASU 2022-06 is effective for all reporting entities immediately upon issuance and must be applied on a prospective basis. These updates are not expected to have a significant impact on the Company's financial statements.

In March 2022, the FASB issued ASU 2022-02, *Financial Instruments - Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures*, which eliminates the accounting guidance for troubled debt restructurings by debtors that have adopted ASU 2022-02 and enhances the disclosure requirements for modifications of receivables made with borrowers experiencing financial difficulty. In addition, the amendments in this ASU require disclosure of current period gross write-offs by year of origination for financing receivables in the existing vintage disclosures. This ASU became effective on October 1, 2023 for the Company. The adoption of this ASU resulted in updated disclosures within our financial statements but otherwise did not have a material impact on the Company's consolidated financial statements.

Subsequent Events

On October 31, 2024, the Company announced that its Board of Directors has approved a quarterly cash dividend of \$0.05 per common share to shareholders of record at the close of business on November 14, 2024, payable on November 27, 2024.

On November 22, 2024, the Company declared a special dividend of \$0.04 per common share, payable on December 20, 2024, to shareholders of record at the close of business on December 6, 2024.

Basis of Financial Statement Presentation

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America ("US GAAP") and predominant practices within the banking industry. The consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, the Bank, and its wholly owned subsidiaries Magyar Investment Company, Magyar Service Corporation, and Hungaria Urban Renewal, LLC. All intercompany balances and transactions have been eliminated in the consolidated financial statements.

The Company has evaluated subsequent events and transactions occurring subsequent to the consolidated balance sheet date of September 30, 2024, for items that should potentially be recognized or disclosed in these consolidated financial statements. The evaluation was conducted through the date these consolidated financial statements were available to be issued.

In preparing financial statements in conformity with US GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The principal estimates that are particularly susceptible to significant change in the near term relate to the allowance for credit losses and the deferred tax asset. The evaluation of the adequacy of the allowance for loan losses includes an analysis of the individual loans and overall risk characteristics and size of the different loan portfolios, and takes into consideration current economic and market conditions, the capability of specific borrowers to pay specific loan obligations, as well as current loan collateral values. However, actual losses on specific loans, which also are encompassed in the analysis, may vary from estimated losses.

The Company records income taxes using the asset and liability method. Accordingly, deferred tax assets and liabilities: (i) are recognized for the expected future tax consequences of events that have been recognized in the financial statements or tax returns; (ii) are attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases; and (iii) are measured using enacted tax rates expected to apply in the years when those temporary differences are expected to be recovered or settled.

Where applicable, deferred tax assets are reduced by a valuation allowance for any portions determined not likely to be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax expense in the period of enactment. The valuation allowance is adjusted, by a charge or credit to income tax expense, as changes in facts and circumstances warrant.

Cash and Cash Equivalents

For purposes of reporting cash flows, cash and cash equivalents include cash on hand, amounts due from banks, time deposits with original maturities less than three months and overnight deposits.

Investment Securities and Allowance for Credit Losses

The Company classifies its investment securities into one of two portfolios: held to maturity or available for sale. Investments in debt securities that the Company has the positive intent and ability to hold to maturity are classified as held to maturity securities and reported at amortized cost. Debt securities not classified as held to maturity securities are classified as available for sale securities and reported at fair value, with unrealized holding gains or losses, net of deferred income taxes, reported in the accumulated other comprehensive income ("AOCI") component of stockholders' equity. Equity securities, with certain exceptions, are measured at fair value with changes in fair value recognized in net income.

If the fair value of a security is less than its amortized cost, the security is deemed to be impaired. Management evaluates all securities with unrealized losses quarterly to determine if such impairments are "temporary" or "other-than-temporary" in accordance with applicable accounting guidance. The Company accounts for temporary impairments based upon security classification as either available for sale or held to maturity. Temporary impairments on "available for sale" securities are recognized, on a tax-effected basis, through AOCI with offsetting entries adjusting the carrying value of the security and the balance of deferred taxes. Conversely, the Company does not adjust the carrying value of "held to maturity" securities for temporary impairments, although information concerning the amount and duration of impairments on held to maturity securities is generally disclosed in periodic consolidated financial statements.

The Company accounts for other-than-temporary impairments based upon several considerations. First, other-than-temporary impairments on securities that the Company has decided to sell as of the close of a fiscal period, or will, more likely than not, be required to sell prior to the full recovery of their fair value to a level equal to their amortized cost, are recognized in operations. If neither of these criteria apply, then the other-than-temporary impairment is separated into credit-related and noncredit-related components. The credit-related impairment generally represents the amount by which the present value of the cash flows that are expected to be collected on an other-than-temporarily impaired security fall below its amortized cost while the noncredit-related component represents the remaining portion of the impairment not otherwise designated as credit-related. The Company recognizes credit-related, other-than-temporary impairments in earnings, while noncredit-related, other-than-temporary

impairments on debt securities are recognized, net of deferred taxes, in AOCI.

Premiums and discounts on all securities are amortized or accreted to maturity by use of the level-yield method considering the impact of principal amortization and prepayments on mortgage-backed securities. Gain or loss on sales of securities is recognized on the specific identification method.

Allowance for Credit Losses on Held-to-Maturity Securities

The Company accounts for its held-to-maturity securities in accordance with Accounting Standards Codification 326-20, *Financial Instruments – Credit Loss – Measured at Amortized Cost*, which requires that the Company measure expected credit losses on held-to-maturity securities on a collective basis by major security type. The estimate of expected credit losses considers historical credit loss information that is adjusted for current economic conditions and reasonable and supportable forecasts.

The Company classifies its held-to-maturity debt securities into the following major security types: obligations of U.S. government agencies, obligations of U.S. government-sponsored enterprises, private label mortgage-backed securities, obligations of state and political subdivisions and corporate securities. Credit ratings of held-to-maturity debt securities, which are a significant input in calculating the expected credit loss, are reviewed on a quarterly basis. Based on the credit ratings of our held-to-maturity securities and our historical experience of no losses, the Company determined that the expected credit losses on its held-to-maturity portfolio is not significant.

Accrued interest receivable on held-to-maturity securities totaled \$225 thousand as of September 30, 2024 and is included within accrued interest receivable on the Company's Consolidated Balance Sheets. This amount is excluded from the estimate of expected credit losses. Generally, held-to-maturity securities are classified as nonaccrual when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about the further collectability of principal or interest. When held-to-maturity securities are placed on nonaccrual status, unpaid interest credited to income is reversed against interest income.

Allowance for Credit Losses on Available-for-Sale Securities

The Company measures expected credit losses on available-for-sale securities when the Bank intends to sell, or when it is not more likely than not that it will be required to sell, the security before recovery of its amortized cost basis. If either of the criteria regarding intent or requirement to sell is met, the amortized cost basis of the security is written down to fair value through income. For available-for-sale securities that do not meet the previously mentioned criteria, the Company evaluates whether the decline in fair value has resulted from credit losses or other factors. In making this assessment, the Company considers the extent to which fair value is less than amortized cost, any changes to the rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. If this evaluation indicates that a credit loss exists, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses is recorded for the credit loss, equal to the amount that the fair value is less than the amortized cost basis. Any impairment that has not been recorded through an allowance for credit losses is recognized in other comprehensive income.

The allowance for credit loss on available-for-sale securities is included within the recorded balance of securities available-for-sale on the Consolidated Balance Sheets. Changes in the allowance for credit losses are recorded within provision for credit losses on the Consolidated Statements of Income. Losses are charged against the allowance when the Company believes the collectability of an available-for-sale security is in jeopardy or when either of the criteria regarding intent or requirement to sell is met.

Accrued interest receivable on available-for-sale securities totaled \$162 thousand as of September 30, 2024 and is included within accrued interest receivable on the Company's Consolidated Balance Sheets. This amount is excluded from the estimate of expected credit losses. Generally, available-for-sale securities are classified as nonaccrual when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about the further collectability of principal or interest. When available-for-sale securities are placed on nonaccrual status, unpaid interest credited to income is reversed against interest income.

225000162000

Regulatory Stock, at Cost

Federal law requires a member institution of the Federal Home Loan Bank ("FHLB") system to purchase and hold restricted stock of its district FHLB according to a predetermined formula. The Company invests in Federal Home Loan Bank of New York stock as required to support borrowing activities, as detailed in Note J to these consolidated financial statements. Although FHLB stock is an equity interest in a FHLB, it does not have a readily determinable fair value because its ownership is restricted and it lacks a market. FHLB stock can be sold back only at its par value of \$100 per share and only to the FHLBs or to another member institution. Accordingly, the FHLB restricted stock is carried at cost, less any applicable impairment charges.

100

Loans and Allowance for Credit Losses

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are stated at the amount of unpaid principal, adjusted for net deferred loan fees and costs, and reduced by an allowance for credit losses. Interest on loans is accrued and credited to operations based upon the principal amounts outstanding. The allowance for credit losses is established through a provision for possible loan losses charged to operations. Loans are charged against the allowance for credit losses when management believes that the collectability of the principal is unlikely.

Income recognition of interest is discontinued when, in the opinion of management, the collectability of such interest becomes doubtful. A loan is generally classified as non-accrual when the scheduled payment(s) due on the loan is delinquent for more than 90 days. When a loan is placed on non-accrual, all previously accrued and unpaid interest is reversed. Loan origination fees and certain direct origination costs are deferred and amortized over the life of the related loans as an adjustment to the yield on loans receivable using the effective interest method.

Allowance for Credit Losses on Loans

The Company maintains its allowance for credit loss on loans ("ACL") at a level that management believes to be appropriate to absorb estimated credit losses as of the date of the Consolidated Balance Sheet. The Company established its allowance in accordance with the guidance included in Accounting Standards Codification 326, *Financial Instruments – Credit Losses* ("ASC 326"). The ACL is a valuation reserve established and maintained by charges against income. Loans, or portions thereof, are charged-off against the ACL when they are deemed uncollectible. The ACL is an estimate of expected credit losses that considers our historical loss experience, the weighted average expected lives of loans, current economic conditions and forecasts of future economic conditions. The determination of an appropriate ACL is inherently subjective and may have significant changes from period to period. The methodology for determining the ACL has two main components: evaluation of expected credit losses for certain groups of homogeneous loans that share similar risk characteristics and evaluation of loans that do not share risk characteristics with other loans. The ACL is measured on a collective (pool) basis when similar characteristics exist. The Company's loan portfolio is segmented by loan types that have similar risk characteristics and behave similarly during economic cycles.

Historical credit loss experience is the basis for the estimate of expected credit losses. We apply our historical loss rates to pools of loans with similar risk characteristics using the Weighted-Average Remaining Maturity ("WARM") method. The remaining contractual life of the pools of loans with similar risk characteristics is adjusted by expected scheduled payments and prepayments. After consideration of the historical loss calculation, management applies qualitative adjustments to reflect qualitative changes not already reflected in the historical loss information. Our reasonable and supportable forecast adjustment is based on a regional economic indicator obtained from the

United States Government Publishing Office. The Company selected eight qualitative metrics which were correlated with the Bank and its peer group's historical loss patterns. The eight qualitative metrics include: changes in lending policies and procedures, changes in national and local economic conditions as well as business conditions, changes in the nature, complexity, and volume of the portfolio, changes in the experience, ability, and depth of lenders and lending management, changes in the volume and severity of past due and classified loans, changes in the value of collateral securing loans, changes in or the existence of credit concentrations, and changes in the legal and/or regulatory landscape. The adjustments are weighted for relevance before applying to each pool of loans. Each quarter, management reviews the recommended adjustment factors and applies any additional adjustments based on current conditions.

The ACL for individual loans begins with the use of normal credit review procedures to identify whether a loan no longer shares similar risk characteristics with other pooled loans and, therefore, should be individually assessed. We individually evaluate loans that meet the following criteria: (1) when it is determined that foreclosure is probable, (2) substandard, doubtful and nonperforming loans when repayment is expected to be provided substantially through the operation or sale of the collateral, or (3) when it is determined by management that a loan does not share similar risk characteristics with other loans. Credit loss estimates are calculated based on the following three acceptable methods for measuring the ACL: (1) the present value of expected future cash flows discounted at the loan's original effective interest rate; (2) the loan's observable market price; or (3) the fair value of the collateral when the loan is collateral dependent. Our individual loan evaluations consist primarily of the fair value of collateral method because most of our loans are collateral dependent. Collateral values are reduced to consider expected disposition costs when appropriate. A charge-off is recorded when the estimated fair value of the loan is less than the loan balance.

The Company has elected to exclude \$4.6 million of accrued interest receivable on loans as of September 30, 2024 from the measurement of its ACL. When a loan is placed on non-accrual status, any outstanding accrued interest is reversed against interest income. Accrued interest on loans is reported in the accrued interest receivable line on the Consolidated Statements of Balance Sheet.

Allowance for Credit Losses on Unfunded Loan Commitments

The Company estimates expected credit losses over the contractual period in which the Bank is exposed to credit risk via a contractual obligation to extend credit unless that obligation is unconditionally cancellable by the Bank. The allowance for credit losses on unfunded loan commitments is included in accounts payable and other liabilities in the Company's Consolidated Balance Sheets and is adjusted through credit loss expense. The estimate includes consideration of the likelihood that funding will occur, the amount of funding that will occur and an estimate of expected credit losses on commitments expected to be funded over its estimated life.

4600000

Premises and Equipment

Premises and equipment are carried at cost less accumulated depreciation, and include capitalized expenditures for new facilities, major betterments and renewals. Expenditures for maintenance and repairs are charged to expense as incurred. Depreciation is computed using the straight-line method based upon the estimated useful lives of the related assets for financial reporting purposes and using the mandated methods by asset type for income tax purposes. Leasehold improvements are depreciated using the straight-line method based upon the initial term of the lease.

The Company accounts for the impairment of long-lived assets in accordance with US GAAP, which requires recognition and measurement for the impairment of long-lived assets to be held and used or to be disposed of by sale. The Company had no impaired long-lived assets at September 30, 2024 and 2023.

Revenue Recognition

The Company recognizes revenue in the Consolidated Statements of Income as it is earned and when collectability is reasonably assured. The primary source of revenue is interest income from interest earning assets, which is recognized on the accrual basis of accounting using the effective interest method. The recognition of revenues from interest earning assets is based upon formulas from underlying loan agreements, securities contracts, or other similar contracts. Non-interest income is recognized on the accrual basis of accounting as services are provided or as transactions occur. Non-interest income includes earnings on bank-owned life insurance, deposit accounts, merchant services, ATM and debit card fees, mortgage banking activities, commercial loan prepayment penalties and other miscellaneous services and transactions.

The Company's contracts with customers in the scope of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 606, "Revenue from Contracts with Customers" are contracts for deposit accounts and contracts for non-deposit investment accounts through a third-party service provider. Both types of contracts result in non-interest income being recognized. The revenue resulting from deposit accounts, which includes fees such as insufficient funds fees, wire transfer fees and out-of-network ATM transaction fees, is included as a component of service charges on the Consolidated Statements of Income. The revenue resulting from non-deposit investment accounts is included as a component of other operating income on the Consolidated Statements of Income.

Revenue from contracts with customers included in service charges was \$1.1 million and \$1.6 million for the years ended September 30, 2024 and 2023, respectively. Revenue from contracts with customers included in other operating income was \$81 thousand and \$89 thousand for the years ended September 30, 2024 and 2023, respectively.

For our contracts with customers, we satisfy our performance obligations each day as services are rendered. For our deposit account revenue, we receive payment on a daily basis as services are rendered and for our non-deposit investment account revenue, we receive payment on a monthly basis from our third-party service provider as services are rendered.

110000016000008100089000

Other Real Estate Owned

Real estate acquired through foreclosure, or a deed-in-lieu of foreclosure, is recorded at fair value less estimated selling costs at the date of acquisition or transfer, and subsequently at the lower of its net cost or fair value less estimated selling costs. Adjustments to the carrying value at the date of acquisition or transfer are charged to the allowance for loan losses. The carrying value of the individual properties is subsequently adjusted to the extent it exceeds estimated fair value less estimated selling costs, at which time a provision for losses on such real estate is charged to operations.

The Company accounts for gains on sales of other real estate owned under ASC Topic 606 "Revenue from Contracts with Customers", which uses a principles based methodology. As it pertains to the criteria for determining how a contract should be accounted for under the new guidance, judgment is required in evaluating if: (a) a commitment on the buyer's part exists; (b) collection is probable in circumstances where the initial investment is minimal; and (c) the buyer has obtained control of the asset, including the significant risks and rewards of the ownership. If there is no commitment on the buyer's part, collection is not probable or the buyer has not obtained control of the asset, then a gain cannot be recognized under the new guidance.

Operating expenses of holding real estate, net of related income, are charged against income as incurred. Losses on the disposition of real estate, including expenses incurred in connection with the disposition, are charged to operations.

Pension and Postretirement Plans

The Company sponsors a qualified defined benefit pension plan and a supplemental executive retirement plan ("SERP"). The qualified defined benefit pension plan is funded with trust assets invested in a diversified portfolio of debt and equity securities. Accounting for pensions and other postretirement benefits involves estimating the cost of benefits to be provided well into the future and attributing that cost over the time period each employee works. This involves extensive use of assumptions about inflation, investment returns, mortality, turnover, and discount

rates. Among other factors, changes in interest rates, investment returns and the market value of plan assets can (a) affect the level of plan funding; (b) cause volatility in the net periodic pension cost; and (c) increase our future contribution requirements. A significant decrease in investment returns or the market value of plan assets or a significant decrease in interest rates could increase our net periodic pension costs and adversely affect our results of operations. A significant increase in our contribution requirements with respect to our qualified defined benefit pension plan could have an adverse impact on our cash flow. Changes in the key actuarial assumptions would impact net periodic benefit expense and the projected benefit obligation for our defined benefit and other postretirement benefit plan. See Note L, "Pension Plan," and Note M, "Non-Qualified Compensation Plan" for information on these plans and the assumptions used.

Income Taxes

The Company and its subsidiaries file consolidated federal and state income tax returns. Income taxes are allocated based on the contribution of their respective income or loss to the consolidated income tax returns.

The Company records income taxes on the basis of reported income using the asset and liability method. Accordingly, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. To the extent that current available evidence about the future raises doubt about the realization of a deferred tax asset, a valuation allowance is established. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company follows the provisions of FASB ASC Topic 740, which provides clarification on accounting for uncertainty in income taxes recognized in an enterprise's financial statements. The guidance prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return, and also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

At September 30, 2024 and 2023, no significant income tax uncertainties have been included in the Company's Consolidated Balance Sheets. The Company's policy is to recognize interest and penalties on unrecognized tax benefits in income tax expense in the Consolidated Statements of Income. No interest and penalties were recorded during the years ended September 30, 2024 and 2023. The tax years subject to examination by the taxing authorities are the years ended September 30, 2019 and forward.

Advertising Costs

The Company expenses advertising costs as incurred.

Earnings Per Share ("EPS")

Basic income per share is calculated by dividing income available to common stockholders by the weighted average number of shares of common stock outstanding for the period. The weighted average common shares outstanding include shares allocated to the Employee Stock Ownership Plan.

Diluted income per share is calculated by adjusting the weighted average common shares outstanding to reflect the potential dilution that could occur using the treasury stock method if securities or other contracts to issue common stock, such as stock options and unvested restricted stock, were exercised and converted into common stock. The resulting shares issued would share in the earnings of the Company. Shares issued and shares reacquired during the period are weighted for the portion of the period that they were outstanding. In periods of loss, dilution is not calculated and diluted loss per share is equal to basic loss per share.

The following table presents a calculation of basic and diluted earnings per share ("EPS") for the years ended September 30, 2024 and 2023. Basic and diluted earnings per share were calculated by dividing net income by the weighted average number of shares outstanding for the periods.

Years Ended	September 30,	September 30,

Bank-Owned Life Insurance		

14. Bank-Owned Life Insurance

The Company has purchased Bank-Owned Life Insurance ("BOLI") policies. BOLI involves the purchasing of life insurance by the Company on directors and officers of the Bank. The proceeds are used to help defray the costs of non-qualified compensation plans. The Company is the owner and beneficiary of the policies. BOLI is recorded on the Consolidated Balance Sheets at its cash surrender value and changes in the cash surrender value are recorded in other income in the Consolidated Statements of Income.

Times, Serif; margin: 0pt 0 0pt; text-align: justify; text-indent: 0in">15.

In the ordinary course of business, the Company has entered into commitments to extend credit, including commitments under commercial lines of credit. Such financial instruments are recorded when they are funded. The Company does not engage in the use of derivative financial instruments. See Note P, "Financial Instruments With Off-Balance Risk."

Times, Serif; margin: 0pt 0 0pt; text-align: justify; text-indent: 0in">16.

Segment Reporting

The Company acts as an independent, community, financial services provider, and offers traditional banking and related financial services to individual, business and government customers. The Company offers a full array of commercial and retail financial services, including the taking of time, savings and demand deposits; the making of commercial, consumer and home equity loans; and the provision of other financial services.

Times, Serif; margin: 0pt 0 0pt; text-align: justify; text-indent: 27pt">

Management does not separately allocate expenses, including the cost of funding loan demand, between the commercial and retail operations of the Company. As such, discrete financial information is not available and segment reporting would not be meaningful.

New Accounting Pronouncements

In connection with the preparation of quarterly and annual reports in accordance with the Securities and Exchange Commission's ("SEC") Securities Exchange Act of 1934, SEC Staff Accounting Bulletin Topic 11.M requires the disclosure of the impact that recently issued accounting standards will have on financial statements when they are adopted in the future.

Times, Serif; margin: 0pt 0 0pt; text-align: justify; text-indent: 27pt">

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments - Credit Losses: Measurement of Credit Losses on Financial Instruments*. ASU 2016-13 requires entities to report "expected" credit losses on financial instruments and other commitments to extend credit rather than the current "incurred loss" model. These expected credit losses for financial assets held at the reporting date are to be based on historical experience, current conditions, and reasonable and supportable forecasts. This ASU requires enhanced disclosures to help investors and other financial statement users better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an entity's portfolio. The Company adopted ASU 2016-13 on October 1, 2023 using the modified retrospective approach. Results and disclosures for reporting periods beginning after October 1, 2023 are presented under ASC 326 while prior period amounts continue to be reported in accordance with previously applicable GAAP.

Times, Serif; margin: 0pt 0 0pt; text-align: justify; text-indent: 27pt">

margin: 0pt 0 0pt 9pt; text-align: justify; text-indent: 27pt">Certain directors and executive officers of the Company have loans with the Bank. Such loans were made in the ordinary course of business at the Bank's normal credit terms, including interest rate and collateralization, and do not represent more than a normal risk of collection. Total loans receivable from directors and executive officers, and affiliates thereof, were approximately \$3.9 million at September 30, 2024 and \$5.1 million at September 30, 2023. There were \$854 thousand and \$2.9 million in new loans or advances on existing lines of credit during the year ended September 30, 2024 and 2023, respectively. Total principal repayments and/or reductions due to retirements were approximately \$2.0 million and \$142 thousand for the year ended September 30, 2024 and 2023, respectively.<p><p style="font: 10pt Times New Roman, Times, Serif; margin: 0pt 0 0pt 9pt; text-align: justify; text-indent: 27pt"><p><p style="font: 10pt Times New Roman, Times, Serif; margin: 0pt 0 0pt 9pt; text-align: justify; text-indent: 27pt">At September 30, 2024 and 2023, the Company was servicing loans for others amounting to approximately \$50.2 million and \$48.1 million, respectively. The Company held mortgage servicing rights in the amount of \$159 thousand and \$28 thousand at September 30, 2024 and 2023, respectively. Servicing loans for others generally consists of collecting mortgage payments, maintaining escrow accounts, disbursing payments to investors, and foreclosure processing. Loan servicing income is recorded on the cash basis and includes servicing fees from investors and certain charges collected from borrowers, such as late payment fees. In connection with loans serviced for others, the Company held borrowers' escrow balances of approximately \$21 thousand and \$27 thousand at September 30, 2024 and 2023, respectively.<p><p style="font: 10pt Times New Roman, Times, Serif; margin: 0pt 0 0pt 9pt; text-align: justify; text-indent: 27pt"><p><p style="font: 10pt Times New Roman, Times, Serif; margin: 0pt 0 0pt 9pt; text-align: justify; text-indent: 27pt">The segments of the Company's loan portfolio are disaggregated to a level that allows management to monitor risk and performance. The residential mortgage loan segment is further disaggregated into two classes: first lien, amortizing term loans, and the combination of second lien amortizing term loans and home equity lines of credit. The commercial loan segment is further disaggregated into three classes: loans secured by multifamily structures, loans secured by owner-occupied commercial structures, and loans secured by non-owner occupied nonresidential properties. The construction loan segment consists primarily of developers or investors for the purpose of acquiring, developing and constructing residential or commercial structures and to a lesser extent one-to-four family residential construction loans made to individuals for the acquisition of and/or construction on a lot or lots on which a residential dwelling is to be built. Construction loans to developers and investors have a higher risk profile because the ultimate buyer, once development is completed, is generally not known at the time of the loan. The commercial business loan segment consists of loans made for the purpose of financing the activities of commercial customers and consists of revolving lines of credit and loans partially guaranteed by the U.S. Small Business Administration. The consumer loan segment consists primarily of stock-secured installment loans, but also includes unsecured personal loans and overdraft lines of credit connected with customer deposit accounts.<p><p style="font: 10pt Times New Roman, Times, Serif; margin: 0pt 0 0pt 9pt; text-align: justify; text-indent: 27pt"><p><p style="font: 10pt Times New Roman, Times, Serif; margin: 0pt 0 0pt 9pt; text-align: justify; text-indent: 27pt">Management uses a ten point internal risk rating system to monitor the credit quality of the overall loan portfolio. The first six categories are considered not criticized, and are aggregated as "Pass" rated. The criticized rating categories utilized by management generally follow bank regulatory

The Special Mention category includes assets that are currently protected but are potentially weak, resulting in an undue and unwarranted credit risk, but not to the point of justifying a Substandard classification. Loans in the Substandard category have well-defined weaknesses that jeopardize the liquidation of the debt, and have a distinct possibility that some loss will be sustained if the weaknesses are not corrected.

Loans classified Doubtful have all the weaknesses inherent in loans classified Substandard with the added characteristic that collection or liquidation in full, on the basis of current conditions and facts, is highly improbable.

All loans greater than three months past due are considered Substandard. Any portion of a loan that has been charged off is placed in the Loss category.

To help ensure that risk ratings are accurate and reflect the present and future capacity of borrowers to repay a loan as agreed, the Company has a structured loan rating process with several layers of internal and external oversight. Generally, consumer and residential mortgage loans are included in the Pass categories unless a specific action, such as severe delinquency, bankruptcy, repossession, or death occurs to raise awareness of a possible credit event. The Company's Commercial Loan Officers are responsible for the timely and accurate risk rating of the loans in their portfolios at origination and on an ongoing basis. The Company's Asset Review Committee performs monthly reviews of all commercial relationships internally rated 6 ("Watch") or worse. Confirmation of the appropriate risk grade is performed by an external loan review company that semi-annually reviews and assesses loans within the portfolio. Generally, the external consultant reviews commercial relationships greater than \$500 thousand and/or criticized relationships greater than \$250 thousand. Detailed reviews, including plans for resolution, are performed on loans classified as Substandard on a monthly basis.

The following table presents the classes of the loan portfolio by origination year summarized by the aggregate Pass and the criticized categories of Special Mention, Substandard and Doubtful for loans subject to the Company's internal risk rating system and by performing status for all other loans as of September 30, 2024.

	Pass	Special Mention	Substandard	Doubtful	Total

requires estimated credit losses on loans to be determined based on an expected life of loan model, as compared to an incurred loss model (in effect for periods prior to October 1, 2023). Accordingly, the allowance for credit losses disclosures subsequent to October 1, 2023 are not always comparable to prior dates. In addition, certain new disclosures required under ASU 2016-13 are not applicable to prior periods. As a result, the following tables present disclosures separately for each period, where appropriate. New disclosures required under ASU 2016-13 are only shown for the current period. Please refer to Note B “Summary of Significant Accounting Policies” for a summary of the impact of adopting the provisions of ASU 2016-13 on October 1, 2023.

The following tables set forth the allocation of the Bank’s allowance for credit losses by loan category at the dates indicated. The portion of the allowance for credit losses allocated to each loan category does not represent the total available for future losses which may occur within the loan category since the total allowance for credit losses is a valuation allocation applicable to the entire loan portfolio. The Company generally charges off the collateral or discounted cash flow deficiency on all loans at 90 days past due and all loans rated substandard or worse that are 90 days past due.

The following tables present, by loan category, the changes in the allowance for credit losses for the year ended September 30, 2024 and 2023.

margin: 0pt 0; text-align: justify; text-indent: 0in">NOTE J – SERVICING POLICY</p><p style="font: 10pt Times New Roman, Times, Serif; margin: 0pt 0 0pt 9pt; text-align: justify; text-indent: 27pt"></p><p style="font: 10pt Times New Roman, Times, Serif; margin: 0pt 0 0pt 9pt; text-align: justify; text-indent: 27pt">The Company originates and sells loans receivable secured by one-to-four family residential properties and commercial business loans guaranteed by the Small Business Administration (the "SBA"). The Company has sold loans on a servicing retained basis and on a servicing released basis. Loans sold with servicing retained and servicing released during the year ended September 30, 2024 were \$6.4 million and \$0, respectively. Loans sold with servicing retained and servicing released during the year ended September 30, 2023 were \$6.5 million and \$0, respectively. The Company accounts for sales in accordance with ASC 860, Transfers and Servicing. Upon sale, the receivables are removed from the balance sheet, mortgage servicing rights are recorded as an asset for servicing rights retained, and a gain on sale, if applicable, is recognized for the difference between the carrying value of the receivables and the sales proceeds, net of

Origination costs.

Gains on sales of loans, representing the difference between the total sales price received for the loans and the allocated cost of the loans, are recognized when loans are sold and delivered to the purchasers. Loans are accounted for as sold when control of the loan is surrendered. Control over the loans is deemed surrendered when (a) the loans have been isolated from the Company; (b) the buyer has the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the loans; and (c) the Company does not maintain effective control over the loans through either (a) an agreement that entitles and obligates the Company to repurchase or redeem the loans before maturity, or (b) the ability to unilaterally cause the buyer to return specific loans.

The Company services one-to-four family residential mortgage loans and SBA 7(a) loans for investors in the secondary market, which are not included in the Consolidated Balance Sheets. The Company's fee is a percentage of the principal balance and is recognized as income when received. At September 30, 2024 and 2023, the Company was servicing mortgage loans sold in the amount of \$1.4 million and \$1.9 million, respectively, and SBA loans sold in the amount of \$38.4 million and \$35.5 million, respectively. Loan servicing includes collecting and remitting loan payments, accounting for principal and interest, contacting delinquent mortgagors, supervising foreclosures and property dispositions in the event

of unremedied defaults, making certain insurance and tax payments on behalf of the borrowers and generally administering the loans. Mortgage servicing rights are amortized in proportion to, and over the period of, estimated net servicing revenues and are included in other assets on the Consolidated Balance Sheets. Activity in loan servicing rights during the years ended September 30, 2024 and 2023 are summarized as follows:

	September 30,	
	2024	2023
	(In thousands)	
Beginning balance	\$28	\$151
Origination of mortgage servicing rights	28	28
Amortization	(12px)	(12px)
Ending balance	2.5pt	159

Loan servicing rights are carried at the lower of amortized cost or fair value. Fair values are estimated using discounted cash flows based on a current market interest rate.

Activity in loan servicing rights during the years ended September 30, 2024 and 2023 are summarized as follows:

	September 30,	
	2024	2023
	(In thousands)	
Beginning balance	\$28	\$151
Origination of mortgage servicing rights	28	28
Amortization	(12px)	(12px)
Ending balance	2.5pt	159

NOTE K - INCOME TAXES

NOTE K - INCOME TAXES

The Company's income tax expense

is comprised of the following components for the years ended September 30, 2024 and 2023:

	Current	Deferred	Total income tax expense
	3,423	3,317	3,317
	3,647		3,647
	3,423	3,317	3,317
	3,647		3,647

A reconciliation of income tax at the statutory tax rate to the effective income tax expense for the years ended September 30, 2024 and 2023 is as follows:

	September 30, 2024	September 30, 2023
Income tax expense at statutory rate	2,331	2,256
State income taxes, net of federal income tax benefit	931	931
Tax-exempt income, net	(103)	(103)
Non-deductible expenses	56	58
Share-based compensation	40	54
Employee stock ownership plan	6	11
Other, net	(295)	(188)
Total income tax expense	3,317	3,032

The major sources of temporary differences and their deferred tax effect at September 30, 2024 and 2023 are as follows:

	September 30, 2024	September 30, 2023
BOLI policy surrender tax	277	277
Non-deductible expenses	56	58
Share-based compensation	40	54
Employee stock ownership plan	6	11
Other, net	(295)	(188)
Total income tax expense	3,317	3,032

NOTE M -
NONQUALIFIED COMPENSATION PLAN

The Company maintains a Supplemental Executive Retirement Plan ("SERP") for the benefit of its senior officers. In addition, the Company also adopted voluntary Deferred Income and Retirement Plans on behalf of its directors. The SERP provides the Company with the opportunity to supplement the retirement income of selected officers to achieve equitable wage replacement at retirement while the Deferred Income Plan provides participating directors with an opportunity to defer all or a portion of their fees into a tax deferred accumulation account for future retirement. The Director Retirement Plan enables the Company to reward its directors for longevity of service in consideration of their availability and consultation. The SERP is based upon achieving a total retirement benefit equal to a percentage of the participants' final annual salary.

Under the Director Supplemental Retirement Income Plan (the "Plan"), directors that began service before 2002 are entitled to a benefit upon attainment of his/her benefit age. The directors will receive an annual amount in monthly installments based on his/her total Board and Committee fees in the twelve months prior to attainment of his/her benefit age. The amount will be 10% plus 2 1/2% for each year of service as a Director, with a minimum of 50%, provided the Director has served for at least five years, and a maximum of 60%. The maximum benefit increases for any Director serving as Chairman of the Board for at least five years to 75%.

The Company funds the plans through modified endowment contracts. Income recorded for the plans represents life insurance income as recorded based on the projected increases in cash surrender values of life insurance policies. As of September 30, 2024 and 2023, the Company's life insurance contracts had cash surrender values of approximately \$23.3 million and \$18.0 million, respectively.

The Company is recording benefit costs so that the cost of each participant's retirement benefits is being expensed and accrued over the participant's active employment so as to result in a liability at retirement date equal to the present value of the benefits expected to be provided. The total expense for nonqualified retirement benefits recorded during the years ended September 30, 2024 and 2023 was \$384 thousand and \$375 thousand, respectively. Included in accounts payable and other liabilities at September 30, 2024 and 2023 were accrued retirement benefits totaling \$1.0 million and \$828 thousand, respectively, for these plans. The amount will be 10% plus 2 1/2% for each year of service as a Director, with a minimum of 50%, provided the Director has served for at least five years, and a maximum of 60%. The maximum benefit increases for any Director serving as Chairman of the Board for at least five years to 75%.

NOTE N - 401(K)
EMPLOYEE CONTRIBUTION PLAN

The Company has a defined contribution 401(k) plan covering all employees, as defined under the plan document. Employees may contribute to the plan, as defined under the plan document, and the Company can make discretionary contributions. The Company contributed \$255 thousand and \$257 thousand to the plan for the years ended September 30, 2024 and 2023, and is included in compensation and employee benefits in the accompanying Consolidated Statements of Income.

NOTE O - COMMITMENTS

1. Lease Commitments

Accounting Standard Update ASC 842, "Leases" requires lessees to recognize a lease liability and a right-of-use ("ROU") asset, measured at the present value of the future minimum lease payments, at the lease commencement date.

The Company has operating leases for six branch locations. Our leases have remaining lease terms of up to 10 years, some of which include options to extend the leases for up to 10 additional years. Operating leases are recorded as ROU assets and lease liabilities and are included within other assets and accounts payable and other liabilities, respectively, on our Consolidated Balance Sheets.

On April 1, 2024, the Bank entered into a lease agreement to rent a retail office space in Martinsville, New Jersey to increase its presence in Somerset County. The initial term of the lease is for five years, ending on March 31, 2029, but does include the option for two additional terms of five years each. In accordance with ASC 842, a see ix hidden: hidden-fact-490 lease liability and ROU asset in the amount of \$180 thousand was recognized on April 1, 2024 within accounts payable and other liabilities and other assets, respectively, on our Consolidated Balance Sheets. The discount rate used to determine the lease liability was 4.22% and derived from the Federal Home Loan Bank of New York advance rate for the same term.

Operating lease ROU assets represent our right to use an underlying asset during the lease term and operating lease liabilities represent our obligation to make lease payments arising from the lease. ROU assets and lease liabilities are recognized at lease commencement base on the present value of the remaining lease payments using a discount rate that represents our incremental borrowing rate. The incremental borrowing rate used by the Company to value its operating leases is based on the interpolated term advance rate available from the FHLBNY, based on the remaining lease term.

	September 30,	2024	2023
Operating lease liabilities	\$2,223	\$2,687	\$2,413
Operating lease ROU assets	\$2,223	\$2,687	\$2,413

<p style="font: 10pt Times New Roman, Times, Serif; margin: Opt 0 Opt 13.7pt; text-align: justify; text-indent: 22.3pt">The Company is a party to interest rate derivatives that are not designated as hedging instruments. Under a program, the Company executes interest rate swaps with commercial lending customers to facilitate their respective risk management strategies. These interest rate swaps with customers are simultaneously offset by interest rate swaps that the Bank executes with a third-party financial institution, such that the Bank minimizes its net risk exposure resulting from such transactions. Because the interest rate swaps associated with this program do not meet the strict hedge accounting requirements, changes in the fair value of both the customer swaps and the offsetting swaps are recognized directly in earnings. The changes in the fair value of the swaps offset each other, except for the credit risk of the counterparties, which is determined by taking into consideration the risk rating, probability of default and loss given default for all counterparties and did not have a significant impact on fair value. The Company had \$0 in cash pledged for collateral on its interest rate swaps with financial institutions at September 30, 2024 and 2023.</p>

Fixed rate loan commitments	1.804	3,578
Variable rate loan commitments	26,843	26,472
Total	117,539	121,056

NOTE Q – FAIR VALUE DISCLOSURES

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. The Company's securities available for sale are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets or liabilities on a non-recurring basis, such as held-to-maturity securities, mortgage servicing rights, loans receivable and other real estate owned, or OREO. These non-recurring fair value adjustments involve the application of lower-of-cost-or-market accounting or write-downs of individual assets.

In accordance with ASC 820, Fair Value Measurements and Disclosures ("ASC 820"), the Company groups its assets and liabilities at fair value in three levels, based on the markets in which the assets are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level	Description
Level 1	Valuation is based upon quoted prices for identical instruments traded in active markets.
Level 2	Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market.
Level 3	Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect our own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of option pricing models, discounted cash flow models and similar techniques. The results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability.

The Company bases its fair values on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The following is a description of valuation methodologies used for assets measured at fair value on a recurring basis:

Level 1: Valuation is based upon quoted prices for identical instruments traded in active markets.

Level 2: Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3: Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect our own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of option pricing models, discounted cash flow models and similar techniques. The results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability.

Securities available for sale

The Company's available-for-sale portfolio is carried at estimated fair value on a recurring basis, with any unrealized gains and losses, net of taxes, reported as accumulated other comprehensive income (loss) in stockholders' equity. The securities available-for-sale portfolio consists of U.S. government and government-sponsored enterprise obligations and mortgage-backed securities. The fair values of these securities are obtained from an independent nationally recognized pricing service. An independent pricing service provides prices which are categorized as Level 2, as quoted prices in active markets for identical assets are generally not available for the securities.

The following tables provide the level of valuation assumptions used to determine the carrying value of the Company's assets measured at fair value on a recurring basis at September 30, 2024 and 2023:

	September 30, 2024	September 30, 2023
Total	\$15,616	\$11,506
Level 1	\$—	\$—
Level 2	\$15,616	\$11,506
Level 3	\$—	\$—

(In thousands)

	September 30, 2024	September 30, 2023
Mortgage-backed securities-residential	\$89	\$89
Corporate securities	\$4,021	\$4,021
Derivative assets	\$1,405	\$1,405

Total securities available for sale \$15,616

Derivative assets \$1,405

[illegible]

securing the loan, it is deemed impaired and the difference between the loan amount and the fair value of collateral, net of estimated selling and disposition costs, is charged off through a reduction of the allowance for loan loss.

Other Real Estate Owned

Other real estate owned is carried at lower of cost or estimated fair value less disposal costs. The estimated fair value of the real estate is determined through current appraisals, and adjusted as necessary, by management, to reflect current market conditions. As such, other real estate owned is generally classified as Level 3. There were no valuation write-downs for the years ended September 30, 2024 and 2023. During the year ended September 30, 2024, the Company recorded valuation write-ups on three properties received through foreclosure.

Collateral Dependent Loans

Collateral dependent loans are measured and reported at fair value through specific allocations of the allowance for credit losses based on the fair value of the underlying collateral.

The following table provides the level of valuation assumptions used to determine the carrying value of the Company's assets measured at fair value on a non-recurring basis at September 30, 2024 and 2023:

	September 30, 2024	September 30, 2023
Level 1	1,501	1,501
Level 2	777	777
Level 3	777	777
Total	3,055	3,055
