# Reconciliation of Core Net Investment Income

We provide information relating to core net investment income (“Core NII”) (a non-GAAP measure) on a supplemental basis. This measure is not provided as a substitute for GAAP net investment income (“GAAP NII”), but in addition to it. Our non-GAAP measures may differ from similar measures by other companies, even in the event of similar terms being utilized to identify such measures. Core NII represents GAAP NII adjusted for additional applicable cash distributions received, or entitled to be received (if any, in either case), on our CLO equity investments. OXLC’s management uses this information in its internal analysis of results and believes that this information may be informative in assessing the quality of OXLC’s financial performance, identifying trends in its results and providing meaningful period-to-period comparisons.

Income from investments in the “equity” class securities of CLO vehicles, for GAAP purposes, is recorded using the effective interest method; this is based on an effective yield to the expected redemption utilizing estimated cash flows, at current cost, including those CLO equity investments that have not made their inaugural distribution for the relevant period end. The result is an effective yield for the investment in which the respective investment’s cost basis is adjusted quarterly based on the difference between the actual cash received, or distributions entitled to be received, and the effective yield calculation. Accordingly, investment income recognized on CLO equity securities in the GAAP statement of operations differs from the cash distributions actually received by the Fund during the period (referred to below as “CLO equity adjustments”).

Furthermore, in order for the Fund to continue qualifying as a regulated investment company for tax purposes, we are required, among other things, to distribute at least 90% of our investment company taxable income annually. While Core NII may provide a better indication of our estimated taxable income than GAAP NII during certain periods, we can offer no assurance that will be the case, however, as the ultimate tax character of our earnings cannot be determined until after tax returns are prepared at the close of a fiscal year. We note that this non-GAAP measure may not serve as a useful indicator of taxable earnings, particularly during periods of market disruption and volatility, and, as such, our taxable income may differ materially from our Core NII.
