## DISCLOSURES REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q (“Quarterly Report”) of the Company includes “forward-looking statements” as defined by the SEC. These forward-looking statements may include projections and estimates concerning our capital expenditures, liquidity, capital resources and debt profile, the timing and success of specific projects, the potential impact of international negotiations on the supply and demand of oil, natural gas and natural gas liquids (“NGL”), outcomes and effects of litigation, claims and disputes, elements of our business strategy, compliance with governmental regulation of the oil, natural gas and NGL industry, including environmental regulations, acquisitions and divestitures and the potential effects on our financial condition and other statements concerning our operations, financial performance and financial condition.

Forward-looking statements are generally accompanied by words such as “estimate,” “assume,” “target,” “project,” “predict,” “believe,” “expect,” “anticipate,” “potential,” “could,” “may,” “foresee,” “plan,” “goal,” “should,” “intend” or other words that convey the uncertainty of future events or outcomes. These forward-looking statements are based on certain assumptions and analyses based on our experience and perception of historical trends, current conditions and expected future developments as well as other factors we believe are appropriate under the circumstances. Such statements are not guarantees of future performance and actual results or developments may differ materially from those projected. The Company disclaims any obligation to update or revise these forward-looking statements unless required by law, and it cautions readers not to rely on them unduly. While we consider these expectations and assumptions to be reasonable, they are inherently subject to significant business, economic, competitive, regulatory and other risks, contingencies and uncertainties relating to, among other matters, the risks and uncertainties discussed in “Risk Factors” in Item 1A of the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2022 (the “2022 Form 10-K”) filed with the Securities and Exchange Commission on March 15, 2023 and in Item 1A of this Quarterly Report.

## 1. Basis of Presentation

**Nature of Business.** SandRidge Energy, Inc. is an oil and natural gas acquisition, development and production company headquartered in Oklahoma City, Oklahoma with a principal focus on developing and producing hydrocarbon resources in the United States Mid-Continent region ("Mid-Con").

**Principles of Consolidation.** The condensed consolidated financial statements include the accounts of the Company and its wholly owned or majority-owned subsidiaries, including its proportionate share of the Royalty Trusts. All intercompany accounts and transactions have been eliminated in consolidation.

**Interim Financial Statements.** The accompanying unaudited condensed consolidated financial statements and notes should be read in conjunction with the audited financial statements and notes contained in the Company's 2022 Form 10-K. Certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been condensed or omitted, although the Company believes that the disclosures contained herein are adequate to make the information presented not misleading. In the opinion of management, the financial statements include all adjustments, which consist of normal recurring adjustments unless otherwise disclosed, necessary to fairly state the Company's unaudited condensed consolidated financial statements.

**Significant Accounting Policies.** The unaudited condensed consolidated financial statements were prepared in accordance with the accounting policies stated in the Company's 2022 Form 10-K, as well as the items noted below.

**Use of Estimates.** The preparation of the unaudited condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

The more significant areas requiring the use of assumptions, judgments and estimates include: oil, natural gas, and NGL reserves; impairment tests of long-lived assets; the carrying value of unproved oil and natural gas properties; depreciation, depletion and amortization; asset retirement obligations; determinations of significant alterations to the full

cost pool and related estimates of fair value used to allocate the full cost pool net book value to divested properties, as necessary; valuation allowances for deferred tax assets; income taxes; valuation of derivative instruments; contingencies; and accrued revenue and related receivables. Although management believes the estimates used in the areas noted above are reasonable, actual results could differ significantly from those estimates.

## 2. Fair Value Measurements

The Company measures and reports certain assets and liabilities on a fair value basis and has classified and disclosed its fair value measurements using the levels of the fair value hierarchy noted below. The carrying values of cash, restricted cash, accounts receivable, prepaid expenses, accounts payable and accrued expenses and other current liabilities included in the unaudited condensed consolidated balance sheets approximated fair value at **June 30, 2023** **September 30, 2023** and December 31, 2022.

Level 1	Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
Level 2	Quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability.
Level 3	Measurement based on prices or valuation models that require inputs that are both significant to the fair value measurement and less observable from objective sources (i.e., supported by little or no market activity).

### SANDRIDGE ENERGY, INC. AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED (Unaudited)

Assets and liabilities that are measured at fair value are classified based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, which may affect the valuation of the fair value of assets and liabilities and their placement within the fair value hierarchy levels. The determination of the fair values, stated below, considers the market for the Company's financial assets and liabilities, the associated credit risk and other factors. The Company considers active markets as those in which transactions for the assets and liabilities occur in sufficient frequency and volume to provide pricing information on an ongoing basis. The Company had assets classified in Level 2 of the hierarchy as of December 31, 2022 and none as of **June 30, 2023** **September 30, 2023**.

#### Level 2 Fair Value Measurements

*Commodity Derivative Contracts.* As applicable, the fair values of the Company's oil, natural gas and NGL fixed price swaps are based upon inputs that are either readily available in the public market, such as oil, natural gas and NGL futures prices, volatility factors and discount rates, or can be corroborated from active markets. As applicable, if the Company has a commodity derivative contract in place, the fair value is determined through the use of a discounted cash flow model or option pricing model using the applicable inputs discussed above. The Company applies a weighted average credit default risk rating factor for its counterparties or gives effect to its credit default risk rating, as applicable, in determining the fair value of these derivative contracts. Credit default risk ratings are based on current published credit default swap rates.

#### Fair Value - Recurring Measurement Basis

There were no open commodity derivative contracts as of **June 30, 2023** **September 30, 2023**. As of December 31, 2022 the following table summarizes the Company's assets measured at fair value on a recurring basis by the fair value hierarchy (in thousands):

	Fair Value Measurements					Netting	Assets at Fair Value
	Level 1	Level 2	Level 3				
<b>Assets</b>							
Commodity derivative contracts	\$ —	\$ 4,429	\$ —	\$ —	\$ —	\$ —	\$ 4,429
<b>Total</b>	<b>\$ —</b>	<b>\$ 4,429</b>	<b>\$ —</b>	<b>\$ —</b>	<b>\$ —</b>	<b>\$ —</b>	<b>\$ 4,429</b>

## 3. Derivatives

#### Commodity Derivatives

The Company is exposed to commodity price risk, which impacts the predictability of its cash flows from the sale of oil, natural gas and NGL. On occasion, the Company has attempted to manage this risk on a portion of its forecasted oil, natural gas or NGL production sales through the use of commodity derivative contracts. There were no open commodity derivative contracts as of **June 30, 2023** **September 30, 2023**.

Historically, the Company has not designated any of its derivative contracts as hedges for accounting purposes. As applicable, if the Company has open derivative contracts, the Company has recorded such contracts at fair value with changes in derivative contract fair values recognized as a gain or loss on derivative contracts in the condensed consolidated income statements. Commodity derivative contracts were settled on a monthly basis, and the commodity derivative contract valuations were adjusted on a mark-to-market valuation basis quarterly.

The following table summarizes derivative activity for the three and six-month nine-month periods ended June 30, 2023 September 30, 2023 and 2022 (in thousands):

		Three Months Ended June 30,		Six Months Ended June 30,		Three Months Ended September 30,		Nine Months Ended September 30,

								\$ (867)	

*Master Netting Agreements and the Right of Offset.* As applicable, the Company historically has had master netting agreements with all of its commodity derivative counterparties and has presented its derivative assets and liabilities with the same counterparty on a net basis in the unaudited condensed consolidated balance sheets. As a result of the netting provisions, the Company's maximum amount of loss under commodity derivative transactions due to credit risk is was limited to the net amounts due from its counterparties. There were no open commodity derivatives contracts as of June 30, 2023 September 30, 2023. As of December 31, 2022, the Company's open commodity derivative contracts were held with one counterparty.

There were no open derivative positions as of June 30, 2023 September 30, 2023. The following table summarizes (i) the Company's commodity derivative contracts on a gross basis, (ii) the effects of netting assets and liabilities for which the right of offset exists based on master netting arrangements and (iii) the Company's net derivative asset position as of December 31, 2022 (in thousands):

	Gross Amounts	Gross Amounts Offset	Amounts Net of Offset	Financial Collateral	Net Amount
<b>Assets</b>					
Derivative contracts - current	\$ 4,429	\$ —	\$ 4,429	\$ —	\$ 4,429
Total	\$ 4,429	\$ —	\$ 4,429	\$ —	\$ 4,429

Because we did not designate any of our derivative contracts as hedges for accounting purposes, changes in the fair value of our derivative contracts were recognized as gains and losses in the earnings of the relevant period. As a result, and as applicable, our current period earnings could have been significantly affected by changes in the fair value of our commodity derivative contracts. Changes in fair value were principally measured based on a comparison of future prices to the contract price at the end of the period.

**Fair Value of Derivatives**

The following table presents the fair value of the Company's derivative contracts on a net basis with the same counterparty (in thousands):

Type of Contract	Balance Sheet Classification	December 31, 2022
Natural Gas	Current assets - Derivative Contracts	\$ 4,429
Total net derivative contracts		\$ 4,429

See Note 2 for additional discussion of the fair value measurement of the Company's derivative contracts.

## 5. Acquisitions

On July 11, 2023, the Company closed an acquisition that increased its ownership interest in twenty-six producing wells operated by the Company within the Northwest Stack play for \$10.6 million, after customary post-closing adjustments, with an effective date of April 1, 2023. The Company used its cash on hand to fund the acquisition.

## 6. Accounts Payable and Accrued Expenses

## 6.7. Commitments and Contingencies

Included below is a discussion of the Company's various future commitments and contingencies as of **June 30, 2023** **September 30, 2023**. The Company has provided accruals where necessary for contingent liabilities, based on ASC 450, Contingencies, when it has determined that a liability is probable and reasonably estimable. The Company continuously assesses the potential liability related to the Company's pending litigation and revises its estimates when additional information becomes available. Additionally, the Company currently expenses all legal costs as they are incurred. The commitments and contingencies under these arrangements are not recorded in the accompanying consolidated balance sheets.

**Legal Proceedings.** As previously disclosed, on May 16, 2016, the Company and certain of its direct and indirect subsidiaries (collectively, the "Debtors") filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code in the United States Bankruptcy Court for the Southern District of Texas (the "Bankruptcy Court"). The Bankruptcy Court confirmed the joint plan of organization (the "Plan") of the Debtors on September 9, 2016, and the Debtors subsequently emerged from bankruptcy on October 4, 2016.

Pursuant to the Plan, claims against the Company were discharged without recovery in each of the following consolidated cases (the "Cases"):

### SANDRIDGE ENERGY, INC. AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED (Unaudited)

• *In re SandRidge Energy, Inc. Securities Litigation*, Case No. 5:12-cv-01341-LRW, USDC, Western District of Oklahoma ("In re SandRidge Energy, Inc. Securities Litigation"); and

• *Ivan Nibur, Lawrence Ross, Jose Luna, Matthew Willenbucher, and the Duane & Virginia Lanier Trust v. SandRidge Mississippian Trust I, et al.*, Case No. 5:15-cv-00634-SLP, USDC, Western District of Oklahoma ("Lanier Trust")

Both cases were settled with all defendants except the SandRidge Mississippian Trust I ("the Trust"), which is being sued by a class of purchasers of units under Sections 11, 12(a)(2), and 15 of the Securities Act of 1933 and Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, and Rule 10b-5 promulgated thereunder, based on allegations that the Trust, made misrepresentations or omissions concerning various topics including the performance of wells operated by the Company. The Company is contractually obligated to indemnify the Trust for losses, claims, damages, liabilities and expenses, including reasonable costs of investigation and attorney's fees and expenses, which it is required to advance. Such indemnification is not covered by insurance. Considering the status of the Lanier Trust matter, and the facts, circumstances and legal theories relating thereto, the Company is not able to determine the likelihood of an outcome or provide an estimate of any reasonably possible loss or range of possible loss related thereto. However, such losses, if incurred, could be material. The Company has not established any liabilities relating to the Lanier Trust matter and believes that the plaintiffs' claims are without merit.

Separately, the Company had received a demand by two of the settling individual defendants to fund a proposed settlement of \$17 million with those defendants. The Company refused and filed an action in Oklahoma state court seeking a declaratory judgment that the defendants were not entitled to indemnification. The insurance carriers funded the settlement of \$17 million and filed a counterclaim, which seeks reimbursement of the \$17 million settlement, with each carrier to receive their funded portion of the \$17 million. The Company disputes any liability, as it believes it has meritorious defenses. Considering the status of this matter, and the facts, circumstances and legal theories thereto, the Company is not able to determine the likelihood of an outcome. The Company has not established any liabilities relating to this matter.

In addition to the matters described above, the Company is involved in various lawsuits, claims and proceedings, which are being handled and defended by the Company in the ordinary course of business.

## 8. Income Taxes

For each interim reporting period, the Company estimates the effective tax rate expected for the full fiscal year and uses that estimated rate in providing for income taxes on a current year-to-date basis.

Deferred income taxes are provided to reflect the future tax consequences of temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements. In assessing the realizability of the deferred tax assets, we consider whether it is more likely than not that some or all of the deferred tax assets will not be realized. The ultimate realization of the deferred tax assets is dependent upon the generation of future income in periods in which the deferred tax assets can be utilized. In prior years, we determined that the deferred tax assets did not meet the more likely than not threshold of being utilized and thus recorded a valuation allowance. During the year ended

December 31, 2022, we partially released our valuation allowance on our deferred tax assets by \$64.5 million. We anticipate being able to utilize these deferred tax assets based on the generation of future income. A change in the estimate of future income could cause the valuation allowance to be adjusted in subsequent periods. The Company had no federal or state income tax expense or benefit for the three and six-month nine-month periods ended June 30, 2023 September 30, 2023 and 2022.

Internal Revenue Code ("IRC") Section 382 addresses company ownership changes and specifically limits the utilization of certain deductions and other tax attributes on an annual basis following an ownership change. As a result of the Chapter 11 reorganization and related transactions, the Company experienced an ownership change within the meaning of IRC Section 382 during 2016 that subjected certain of the Company's tax attributes, including net operating losses ("NOLs"), to an IRC Section 382 limitation. This limitation has not resulted in cash taxes for any period subsequent to the ownership change. Since the 2016 ownership change, the Company has generated additional NOLs and other tax attributes that are not currently subject to an IRC Section 382 limitation. The Company adopted the Tax Benefits Preservation Plan, as amended on March 16, 2021, and June 20, 2023, in order to protect the Company's ability to use its tax NOLs and certain other tax benefits.

**SANDRIDGE ENERGY, INC. AND SUBSIDIARIES**  
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED**  
**(Unaudited)**

As of June 30, 2023 September 30, 2023, the Company had approximately \$1.6 billion of federal NOL carryforwards, net of NOLs expected to expire unused due to the 2016 IRC Section 382 limitation. Of the \$1.6 billion of federal NOL carryforwards, \$0.7 billion expire during the years 2025 through 2037, while the remaining \$0.9 billion do not have an expiration date. In addition, the Company had approximately \$1.1 billion of state NOL carryforwards, net of NOLs expected to expire unused due to the 2016 IRC Section 382 limitation. Of the \$1.1 billion in state NOL carryforwards, approximately \$200.0 million \$203.0 million are derived from states the Company currently does not operate in. Of the remaining state NOL carryforwards, \$658.1 \$650.0 million do not have an expiration date and \$247.0 million expire during the years 2026 will begin expiring in 2023 through 2037. Additionally, the Company had federal tax credits in excess of \$33.5 million which begin expiring in 2029.

The Company did not have unrecognized tax benefits at June 30, 2023 September 30, 2023 and December 31, 2022.

The Company's only taxing jurisdiction is the United States (federal and state). The Company's tax years 2019 to present remain open for federal examination. Additionally, tax years 2005 through 2018 remain subject to examination for the purpose of determining the amount of federal NOL and other carryforwards. The number of years open for state tax audits varies, depending on the state, but are generally from three to five years.

## 8.9. Equity

*Capital Stock and Equity Awards.* Our authorized capital stock consists of 300 million shares, which include 250 million shares of common stock, \$0.001 par value per share ("Common Stock" common stock) and 50 million shares of preferred stock, par value \$0.001 per share. At June 30, 2023 September 30, 2023, the Company had 37.0 37.1 million shares of common stock issued and outstanding. Further, at June 30, 2023 September 30, 2023, the Company had 0.1 million of unvested restricted stock awards, 0.3 0.1 million shares of unvested restricted stock units, an immaterial amount of unvested performance share units, and 0.2 million unvested stock options outstanding.

*Warrants.* During the fourth quarter of 2016, the Company issued approximately 4.9 million Series A warrants and 2.1 million Series B warrants to certain holders of general unsecured claims as defined in the 2016 bankruptcy reorganization plan. These warrants were exercisable until October 4, 2022 for one share of common stock per warrant at initial exercise prices of \$41.34 and \$42.03 per share, respectively, subject to adjustments pursuant to the terms of the warrants. The warrants contained customary anti-dilution adjustments in the event of any stock split, reverse stock split, reclassification, stock dividend or other distributions. Upon expiration, the entirety of the 4.9 million Series A warrants and 2.1 million Series B warrants were cancelled and the carrying value was transferred to Additional paid-in capital in the accompanying condensed consolidated balance sheets.

*Share Repurchase Program.* In May 2023, the Company's Board of Directors (the "Board") approved a share repurchase program (the "Program") authorizing the Company to repurchase up to an aggregate of \$75.0 million of the Company's outstanding common stock with the Company's cash on hand. The Program replaced the prior share repurchase program previously approved by the Board in August 2021. Purchases under the Program are intended to meet the requirements of Rule 10b5-1 of the Exchange Act. The Program does not require any specific number of shares to be acquired, and can be modified or discontinued by the Board at any time. The Company did not repurchase any common stock under the Program during the three and six-month nine-month periods ended June 30, 2023 September 30, 2023. There were no repurchases for the three and six-month periods nine-month period ended June 30, 2023 September 30, 2023 under the Company's prior share repurchase program.

*Dividends.* In May 2023, the Board approved a one-time cash dividend of \$2.00 per share of the Company's common stock, which was paid on June 7, 2023 to shareholders of record as of the close of business on May 24, 2023. The aggregate total payout was approximately \$73.8 million. Additionally, in May 2023, the Board announced that it plans for a regular quarterly dividend of \$0.10 per share, subject to quarterly approval by the Board. In August 2023, the Board declared a cash dividend of \$0.10 per share of the Company's common stock, which was paid on August 28, 2023 to commence after shareholders of record as of the second quarter close of business on August 14, 2023. The aggregate total payout was \$3.7 million. In addition to the quarterly dividend payments, the Company paid \$0.3 million in cash dividends on vested stock awards during the three and to be first nine-month periods ended September 30, 2023. As of September 30, 2023, the Company had \$0.3 million in dividends payable in August 2023, subject to quarterly approval by the Board, on unvested stock awards.

**The Tax Benefits Preservation Plan.** On July 1, 2020, the Board declared a dividend distribution of one right (a "Right") for each outstanding share of **Company Common Stock** the Company's common stock to shareholders of record at the close of business on July 13, 2020. On June 20, 2023, the Company entered into an amendment to the Tax Benefits Preservation Plan to extend the expiration time of the Tax Benefits Preservation Plan from July 1, 2023 to July 1, 2026. Each Right entitles its holder, under certain circumstances, to purchase from the Company one one-thousandth of a share of Series A Junior Participating Preferred Stock of the Company, par value \$0.001 per share, at an exercise price of \$5.00 per Right, subject to adjustment. The description and terms of the Rights are set forth in the tax benefits preservation plan, dated as of July 1, 2020, as amended, between the Company and American Stock Transfer & Trust Company, LLC, as rights agent (and any successor rights agent, the "Rights Agent"). The Tax Benefits Preservation Plan will expire on the earliest of: (i) the time at which the Rights are redeemed pursuant to the Tax Benefits Preservation Plan, (ii) the time at which the Rights are exchanged pursuant to the Tax Benefits Preservation Plan, (iii) the closing of any merger or other acquisition transaction involving the Company pursuant to an agreement of the type described in Section 13(f) of the Tax Benefits Preservation Plan, at which time, the Rights are terminated, (iv) the time at which the Board determines that the NOLs are utilized in all material respects or that an ownership change under Section 382 would not adversely impact in any material respect the time period in which the Company could use the NOLs, or materially impair the amount of the NOLs that could be used by the Company in any particular time period, for applicable tax purposes and (v) the Close of Business on July 1, 2026. The Board plans to request shareholder approval for the Tax Benefits Preservation Plan at the 2024 annual meeting.

The Company adopted the Tax Benefits Preservation Plan, as amended on March 16, 2021, and June 20, 2023, in order to protect shareholder value against a possible limitation on the Company's ability to use its tax net operating losses (the "NOLs") and certain other tax benefits to reduce potential future U.S. federal income tax obligations. The NOLs are a valuable asset to the Company, which may inure to the benefit of the Company and its shareholders. However, if the Company experiences an "ownership change," as defined in Section 382 of the Internal Revenue Code of 1986, as amended (the "Code"), its ability to fully utilize the NOLs and certain other tax benefits will be substantially limited and the timing of the usage of the NOLs and such other benefits could be substantially delayed, which could significantly impair the value of those assets. Generally, an "ownership change" occurs if the percentage of the Company's stock owned by one or more of its "five-percent shareholders" (as such term is defined in Section 382 of the Code) increases by more than 50 percentage points over the lowest percentage of stock owned by such shareholder or shareholders at any time over a three-year period. The Tax Benefits Preservation Plan is intended to prevent against such an "ownership change" by deterring any person or group from acquiring beneficial ownership of 4.9% or more of the Company's securities.

**Oil, natural gas and NGL revenues.** The Company's revenues come from the sale of oil, natural gas and NGLs and are recorded at a point in time when control of the oil, natural gas and NGL production passes to the purchaser at the inlet of the processing plant or pipeline, or the delivery point for onloading to a delivery truck. As the Company's purchaser obtains control of the production prior to selling it to other end customers, the Company presents its revenues on a net basis, rather than on a gross basis.

Pricing for the Company's oil, natural gas and NGL contracts is variable and is based on either an index price, net of deductions, or a percentage of the sales price obtained by the purchaser. The transaction price is allocated on a pro-rata basis to each unit of oil, natural gas or NGL sold based on the terms of the contract. **oil, Oil,** natural gas and NGL revenues are also recorded net of royalties, discounts and allowances, and transportation costs, as applicable. Taxes assessed by governmental authorities on oil, natural gas and NGL sales are presented separately from revenues and are included in production, ad valorem, and other tax expense in the condensed consolidated income statements.

**Revenues Receivable.** The Company records an asset in accounts receivable, net on its condensed consolidated balance sheet for revenues receivable from contracts with purchasers at the end of each period. Pricing for revenues receivable is estimated using current month crude oil, natural gas and NGL prices, net of deductions. Revenues receivable are typically collected the month after the Company delivers the related production to its purchaser. As of **June 30, 2023** **September 30, 2023** and December 31, 2022, the Company had revenues receivable of **\$13.5 million** **\$16.8 million** and \$21.8 million, respectively. The Company did not record any bad debt expense on revenues receivable nor write-offs

during the three and six and six-month nine-month periods ended June 30, 2023 September 30, 2023 and 2022, as the Company's purchasers of oil, natural gas and NGL have had no issues of payment collectability or lack of credit worthiness with the Company.

**ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Introduction**

The following discussion and analysis is intended to help the reader understand our business, financial condition, results of operations, liquidity and capital resources. This discussion and analysis should be read in conjunction with the accompanying unaudited condensed consolidated financial statements and the accompanying notes included in this Quarterly Report, as well as our audited consolidated financial statements and the accompanying notes included in the 2022 Form 10-K. Our discussion and analysis includes the following subjects:

- Overview;
- Consolidated Results of Operations;
- Liquidity and Capital Resources; and
- Critical Accounting Policies and Estimates.

The financial information with respect to the three and six-month nine-month periods ended June 30, 2023 September 30, 2023 and 2022, discussed below, is unaudited. In the opinion of management, this information contains all adjustments, which consist only of normal recurring adjustments unless otherwise disclosed, necessary to state fairly the accompanying unaudited condensed consolidated financial statements. The results of operations for the interim periods are not necessarily indicative of the results of operations for the full fiscal year.

## Overview

We are an independent oil and natural gas company with a principal focus on acquisition, development and production activities in the U.S. Mid-Continent region ("Mid-Con").

The chart below shows production by product for the three and six-month nine-month periods ended June 30, 2023 September 30, 2023 and 2022:

1554

## [Table of Contents](#)

Total MBoe production for the three-month period ended June 30, 2023 September 30, 2023 was comprised of approximately 18.1% 16.8% oil, 54.2% 55.5% natural gas and 27.7% NGL compared to 12.8% 15.8% oil, 53.8% 53.7% natural gas and 33.4% 30.5% NGL in 2022. The increase in oil production was primarily driven by the newly drilled wells as part of the Company's our capital development program. The decrease in total MBoe was primarily driven by a reduction of NGL production, as one of the Company's our purchasers elected to retain more ethane in the natural gas stream, which had more favorable market pricing at the time of sales, sales, as well as natural decline of its producing assets. These factors were partially offset by production added during the third quarter from an acquisition that closed on July 11, 2023, which increased our ownership interest in twenty-six wells we operate.

Total MBoe production for the six-month nine-month period ended June 30, 2023 September 30, 2023 was comprised of approximately 17.8% 17.4% oil, 54.4% 54.8% natural gas and 27.8% NGL compared to 13.1% 14.0% oil, 53.8% natural gas and 33.1% 32.2% NGL in 2022.

## Recent Events

- In May 2023, the Board approved a one-time cash dividend of \$2.00 per share of the Company's common stock, which was paid on June 7, 2023 to shareholders of record as of the close of business on May 24, 2023. The aggregate total payout was approximately \$73.8 million. Additionally, in May 2023, the Board announced that it plans a regular quarterly dividend of \$0.10 per share of the Company's common stock, to commence after the second quarter and to be first payable in August 2023, subject to quarterly approval by the Board.
- In May 2023, the Board approved a stock buyback program authorizing the repurchase of up to \$75 million of the Company's outstanding common stock in open market transactions.
- On July 12, 2023 July 11, 2023, the Company announced the closing of we closed an acquisition which increases its increased our ownership interest in twenty-six producing wells operated by the Company within the Northwest Stack play for approximately \$11.3 million \$10.6 million, after customary post-closing adjustments, with an effective date of April 1, 2023. Average net production associated with the acquired interests for the first quarter of 2023 was approximately 500 barrels of oil equivalent per day (~30% oil). We expect the low decline profile and oilier content associated with these properties and interests further strengthen the Company's commodity price realizations, operating margins and cash flow.
- On August 1, 2023, the Board declared a cash dividend of \$0.10 per share of the Company's our common stock, payable on August 28, 2023 to shareholders of record on August 14, 2023. The aggregate total payout was \$3.7 million.
- On November 2, 2023, the Board declared a cash dividend of \$0.10 per share of the Company's common stock, payable on November 27, 2023 to shareholders of record on November 13, 2023.

## Outlook

We will continue to focus on growing the cash value generation capability of our asset base in a safe, responsible and efficient manner, while exercising prudent capital allocations to projects we believe provide high rates of returns in the current commodity price environment. These projects include (1) a continuation of our well reactivation program, (2) artificial lift conversions to more efficient and cost effective systems, (2) a continuation of our well reactivation program and (3) limited opportunistic leasing in proven areas around or adjacent to our area of operations that could further bolster future development. Given near term the commodity price dynamics during the year, and that our Mid-Con assets are 99% held by production, which preserves the tenor of our development option, we concluded our drilling and completion program in the second quarter of 2023. We will continue to monitor forward-looking commodity prices, results, costs and other factors that could influence returns on investments, which will continue to shape our disciplined development decisions in 2023 and beyond. We will also continue to maintain optionality to execute on value accretive merger and acquisition opportunities that could bring synergies, leverage our core competencies, compliment our portfolio of assets, further utilize our NOLs or otherwise yield attractive returns for our shareholders.

## Consolidated Results of Operations

Our consolidated revenues and cash flows are generated from the production and sale of oil, natural gas and NGL. Our revenues, profitability and future growth depend substantially on prevailing prices received for our production, the quantity of oil, natural gas and NGL we produce, and our ability to find and economically develop and produce our reserves. Prices for oil, natural gas and NGL fluctuate widely and are difficult to predict. To provide information on the general trend in pricing, the average New York Mercantile Exchange ("NYMEX") prices for oil and natural gas are shown in the tables below:

	Three-month periods ended

In order to reduce our exposure to price fluctuations, from time to time we may enter into commodity derivative contracts for a portion of our anticipated future oil, natural gas and NGL production as discussed in ["Item 3. Quantitative and Qualitative Disclosures About Market Risk."](#) During periods where the strike prices for our commodity derivative contracts are below market prices at the time of settlement, we may not fully benefit from increases in the market price of oil and natural gas. Conversely, during periods of declining oil and natural gas market prices, our commodity derivative contracts may partially offset declining revenues and cash flows to the extent strike prices for our contracts are above market prices at the time of settlement. See ["Note 3 — Derivatives"](#) to the accompanying unaudited condensed consolidated financial statements included in this Quarterly Report for additional information regarding our commodity derivatives.

The **decrease** **increase** in lease operating expenses for the **three-month period** **three and nine-month periods** ended **June 30, 2023** **September 30, 2023** was primarily due to a reduction in utility costs and lower workover expenses. Despite market driven inflationary pressures and higher production costs associated with more producing wells from the Company's **our well reactivation** **reactivations** and **prior development programs**, lease operating expenses for the six-month period ended June 30, 2023 were kept relatively consistent, compared to the same period in 2022, **program** as well as increased ownership interest from our July 2023 acquisition.

Production, ad valorem, and other taxes for the three and **six-month** **nine-month** periods ended **June 30, 2023** **September 30, 2023** decreased primarily due to lower commodity prices and related revenues. Production, ad valorem, and other taxes for the three month period ended September 30, 2023 decreased as a percentage of oil, natural gas and **six-month periods** **NGL revenue** primarily due to recovery of ad valorem tax payments from our working interest partners. Production, ad valorem, and other taxes for the nine-month period ended **June 30, 2023** **September 30, 2023** increased as a percentage of oil, natural gas and NGL revenue primarily due to an increase in ad valorem taxes as a result of higher oil and gas property valuation assessments by local jurisdictions who use historical commodity price averages that were higher than current commodity prices, when determining ad valorem tax assessments.

#### [Table of Contents](#)

The increase in depreciation and depletion for oil and natural gas properties was primarily the result of capital expenditures for the **third** **fourth** quarter of 2022 through the **second** **third** quarter of 2023 and a decrease in proved reserves at **June 30, 2023** **September 30, 2023**, primarily as a result of lower SEC prices (as defined below), which increased our depletion rate.

#### **Impairment**

A ceiling limitation calculation is performed at the end of each quarter. If the full cost pool balance exceeds the ceiling limitation, an impairment of the full cost pool is required. Calculation of the full cost ceiling test is based on, among other factors, trailing twelve-month first-day-of-the-month index prices ("SEC prices") as adjusted for price differentials and other contractual arrangements. The SEC prices utilized in the calculation of proved reserves included in the full cost ceiling test at **June 30, 2023** **September 30, 2023** were **\$82.82** **\$78.54** per barrel of oil and **\$4.76** **\$3.42** per MMBtu of natural gas, before price differential adjustments.

The ceiling limitation was not exceeded; therefore, no full cost ceiling limitation impairments were recorded during the three and **six-month** **nine-month** periods ended **June 30, 2023** **September 30, 2023** or 2022. During certain periods within the past five years, the SEC prices used in the full cost ceiling test have been lower than the SEC prices used for the **June 30, 2023** **September 30, 2023** full cost ceiling test and resulted in material ceiling limitation impairments. Full cost pool ceiling limitation impairments have no impact to our cash flow or liquidity.

#### [Table of Contents](#)

Based on the SEC prices over the trailing ten months ended **July 31, 2023** **October 1, 2023**, as well as two months of NYMEX strip pricing for **August** **November** and **September** **December** of 2023 as of **July 18, 2023** **October 25, 2023**, we estimate the SEC prices utilized in the **September 30, 2023** **December 31, 2023** full cost ceiling test may be **\$77.22** **\$79.52** per barrel of oil and **\$3.43** **\$2.66** per MMBtu of natural gas (the "estimated **third quarter** year-end prices"). Applying these estimated **third quarter** year-end prices, and holding all other inputs constant to those used in the calculation of our **June 30, 2023** **September 30, 2023** ceiling test, we expect that no full cost ceiling limitation impairment is indicated for the **third** **fourth** quarter of 2023.

Any actual full cost ceiling limitation impairment recognized in future quarters may fluctuate significantly from projected amounts based on the outcome of numerous other factors such as declines in the actual trailing twelve-month SEC prices, lower NGL pricing, changes in estimated future development costs and operating expenses, and other adjustments to our levels of proved reserves.

#### **Other Operating Expenses**

The **change** **increase** in general and administrative expenses for the three **and six-month periods** **months** ended **June 30, 2023** **is** **September 30, 2023** was primarily **due to** **the** result of an increase in computer software upgrades. The nine months ended **September 30, 2022** benefited from a one-time \$0.4 million legal retainer refund received in the second quarter of 2022, related to the 2016 bankruptcy, which lowered general and administrative expenses. Other increases in general and administrative expenses for the **three** **nine months** ended **September 30, 2023** included higher technology, service and **six-month periods** **ended June 30, 2022**, personnel costs.

As applicable, our derivative contracts were not designated as accounting hedges and, as a result, changes in their fair values were recorded each quarter as a component of operating expenses. Internally, management has historically viewed the settlement of commodity derivative contracts at contractual maturity as adjustments to the price received for oil, natural gas and NGL production to determine “effective prices.” In general, cash is received on settlement of contracts due to lower oil and natural gas prices at the time of settlement, compared to the contract price for our commodity derivative contracts; and, cash is paid on settlement of contracts due to higher oil, natural gas and NGL prices at the time of settlement, compared to the contract price for our commodity derivative contracts. See further discussion of derivative contracts in “[Item 3. Quantitative and Qualitative Disclosures about Market Risk](#)” included in Part I of this Quarterly Report.

### Cash Flows

Our cash flows from operations are substantially dependent on current and future prices for oil, natural gas and NGL, which historically have been, and may continue to be, volatile. Cash flows from operations are also affected by timing of cash receipts and disbursements and changes in other working capital assets and liabilities.

Our cash flows for the six-month nine-month periods ended June 30, 2023 September 30, 2023 and 2022 are presented in the following table and discussed below (in thousands):

The \$15.3 million \$45.3 million decrease in cash flows from operations for the six-month nine-month period ended June 30, 2023 September 30, 2023 compared to the same period in 2022 is primarily due to a decrease in revenues from lower commodity prices and production.

### Cash Flows from Investing Activities

Our cash flows used in investing activities during the six-month nine-month period ended June 30, 2023 September 30, 2023 reflects capital expenditures of \$24.3 million \$25.7 million primarily related to capital expenditures made for drilling, capital workovers, and well reactivations, reactivations and \$11.2 million related to an acquisition of proved reserves, which increased ownership interests in properties operated by the Company. We received \$1.3 million \$1.4 million of proceeds from the sale of equipment related to our oil and gas assets.

Our cash flows used in investing activities during the six-month nine-month period ended June 30, 2022 September 30, 2022 reflects capital expenditures of \$12.0 million \$31.1 million primarily related to capital expenditures made for drilling, capital workovers, well reactivations, inventory purchases and \$1.4 million related to an acquisition of proved reserves, which increased ownership interests in properties operated by the Company. We received \$0.3 million Cash outflows were partially offset by \$0.4 million of proceeds from the sale of assets.

### Cash Flows from Financing Activities

Cash used in financing activities for the **six-month** **nine-month** period ended **June 30, 2023** **September 30, 2023** consisted primarily of **\$73.8 million** **\$77.8 million** in cash dividends, **\$0.2 million** **\$0.9 million** of cash used for tax withholdings paid in exchange for shares withheld on employee vested stock awards that were settled by net exercise, and finance lease payments of **\$0.3 million** **\$0.4 million**. Cash used in financing activities for the **six-month** **nine-month** period ended **June 30, 2022** **September 30, 2022** consisted primarily of **\$0.2 million** **\$1.2 million** of cash used to pay employee tax obligations for vested stock awards that were settled by net exercise and **\$0.3 million** in finance lease payments, of **\$0.2 million** offset by immaterial proceeds from the exercise of stock options. Net exercises of stock awards allows the holder of a stock award to tender back to us a number of shares at fair value upon the vesting of such stock award, that equals the employee payroll tax obligation due. We then remit a cash payment to the relevant taxing authority on behalf of the employee for their payroll tax obligations resulting from the vesting of their stock award.

### Contractual Obligations and Off-Balance Sheet Arrangements

At **June 30, 2023** **September 30, 2023**, our contractual obligations included asset retirement obligations, leases and other individually insignificant obligations. Additionally, we have certain financial instruments representing potential commitments that were incurred in the normal course of business to support our operations, including surety bonds. The underlying liabilities insured by these instruments are reflected in our balance sheets, where applicable. Therefore, no additional liability is reflected for the surety bonds or other instruments.

There were no other significant changes in total contractual obligations and off-balance sheet arrangements from those reported in the 2022 Form 10-K.

### Critical Accounting Policies and Estimates

For a description of our critical accounting policies and estimates, refer to [Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations included in the 2022 Form 10-K](#). For a discussion of recent accounting pronouncements, newly adopted and recent accounting pronouncements not yet adopted, see ["Note 1—Basis of Presentation"](#) to the accompanying unaudited condensed consolidated financial statements included in Item 1 of this Quarterly Report. We did not have any material changes in critical accounting policies, estimates, judgments and assumptions during the first **six** **nine** months of 2023.

### ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

#### General

This discussion provides information about the financial instruments we have historically used to manage commodity prices. All contracts were settled in cash and did not require the actual delivery of a commodity at settlement. Additionally, our exposure to credit risk and interest rate risk is also discussed.

**Commodity Price Risk.** Our most significant market risk relates to the prices we receive for our oil, natural gas and NGLs. Due to the historical price volatility of these commodities, from time to time, we have historically entered, depending upon our view of opportunities under the then-prevailing current market conditions, we enter into commodity derivative contracts for a portion of our anticipated production volumes for the purpose of reducing the impact of the variability of oil and natural gas prices.

We have used, and may use, a variety of commodity-based derivative contracts, including fixed price swaps, basis swaps and collars. At **June 30, 2023** **September 30, 2023**, we had no open commodity derivative contracts or obligations to enter into commodity derivative contracts.

Because we historically have not designated any of our derivative contracts as hedges for accounting purposes, changes in the fair value of our derivative contracts were recognized as gains and losses in current period earnings. As a result, and when applicable, current period earnings could have been significantly affected by changes in the fair value of our commodity derivative contracts. Changes in fair value were principally measured based on a comparison of future prices to the contract price at the end of the period.

The following table summarizes derivative activity for the three and **six-month** **nine-month** periods ended **June 30, 2023** **September 30, 2023** and 2022 (in thousands):

		Three Months Ended June 30,		Six Months Ended June 30,		Three Months Ended September 30,			
		2023	2022	2023	2022	2023	2022	2023	2022

						Gain on derivative contracts	\$ —	\$ (4,258)	\$ (1,447)
						Realized settlement gains (losses) on derivative contracts	\$ 218	\$ 5,876	\$ (867)

See “[Note 3 — Derivatives](#)” to the accompanying unaudited condensed consolidated financial statements included in this Quarterly Report for additional information regarding our commodity derivatives.

**Credit Risk.** As applicable, we were exposed to credit risk related to counterparties to our derivative financial contracts. All of our derivative transactions have been carried out in the over-the-counter market. The use of derivative transactions in over-the-counter markets involves the risk that the counterparties may be unable to meet the financial terms of the transactions. The counterparties for all of our derivative transactions have had an “investment grade” credit rating. We have historically monitored the credit ratings of our derivative counterparties and considered our counterparties’ credit default risk ratings in determining the fair value of our derivative contracts. Our derivative contracts have historically been with multiple counterparties to minimize exposure to any individual counterparty, and in addition our counterparties have been large financial institutions.

We did not require collateral or other security from counterparties to support derivative instruments. We historically had master netting agreements with our derivative contract counterparties, which allowed us to net our derivative assets and liabilities by commodity type with the same counterparty. As a result of the netting provisions, our maximum amount of loss under derivative transactions due to credit risk was limited to the net amounts due from the counterparties under the commodity derivative contracts. Therefore, we were not required to post additional collateral under our commodity derivative contracts.

We are also exposed to credit risk related to the collection of receivables from our joint interest partners for their proportionate share of expenditures on wells and properties we operate. Historically, our credit losses on joint interest receivables have been immaterial.

### ITEM 4. Controls and Procedures

## Disclosure Controls and Procedures

Under the supervision and with the participation of the Company's management, including the Company's CEO and CFO, the Company performed an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures pursuant to Exchange Act Rules 13a-15 and 15d-15 as of the end of the period covered by this Quarterly Report. Based on that evaluation, the Company's CEO and CFO concluded that the Company's disclosure controls and procedures were effective as of **June 30, 2023** **September 30, 2023**, to provide reasonable assurance that the information required to be disclosed by the Company in its reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and such information is accumulated and communicated to management, as appropriate to allow timely decisions regarding required disclosure.

## Changes in Internal Control Over Financial Reporting

There was no change in the Company's internal control over financial reporting during the quarter ended **June 30, 2023** **September 30, 2023** that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

### ITEM 1A. Risk Factors

Information regarding our risk factors appears in Item 1A. of our 2022 Form 10-K for the year ended December 31, 2022. These risk factors describe some of the assumptions, risks, uncertainties and other factors that could adversely affect our business or that could otherwise result in changes that differ materially from our expectations. In addition, the following amends our discussion of risk factors contained our 2022 Form 10-K for the year ended December 31, 2022:

#### **Adverse developments and instability in financial institutions and markets may adversely impact our business and financial condition.**

The global macroeconomic environment could be negatively affected by, among other things, disruptions to the banking system and financial market volatility resulting from recent bank failures and actions to reduce inflation. The Company utilizes and typically maintains material balances of cash and cash equivalents and is therefore reliant on banks and financial institutions to safeguard and allow ready access to these assets. The Company has approximately **\$224.0 million** **\$232.2 million** in cash and cash equivalents **including restricted cash** as of **June 30, 2023** **September 30, 2023** held by various **significant, well-capitalized** financial institutions.

We maintain cash and cash equivalents at banks and third-party financial institutions in excess of Federal Deposit Insurance Corporation insurance limits. Accordingly, the failure of a bank, or other adverse conditions in the financial markets, impacting the institutions or counterparties with which the Company, or its customers or vendors, maintain deposits or financing activities, could impact our timely access to liquid assets or its financial performance. There are no assurances or guarantees that deposits greater than the Federal Deposit Insurance Corporation limits will be protected by the U.S. government or that any bank, government or financial institution will be able to obtain the needed liquidity in the event of a failure or similar crisis. If financial institutions are unable to provide timely access to deposits and funds, the Company may be required to seek additional financing which may not be available. As a result of uncertainty in the broader financial markets, there may be additional impacts to our business that cannot be predicted at this time.

### ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

Our current equity-based compensation plans include provisions that allow for the "net exercise" of share-settled vested awards by all plan participants. In a net exercise, any required payroll taxes, federal withholding taxes and exercise price of the shares due from the share-based award holders are settled by having the holder tender back to us a number of shares at fair value equal to the amounts due. Net exercises are treated as purchases and retirements of shares. **There were no**

**Certification of the Company's Chief Executive Officer Pursuant to  
Section 302 of the Sarbanes-Oxley Act of 2002 (18 U.S.C. Section 7241)**

I, Grayson Pranin, certify that:

1. I have reviewed this quarterly report on Form 10-Q of SandRidge Energy, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
