Form 20-F [X]Â Â Â Form 40-F [Â Â Â] INFORMATION CONTAINED IN THIS FORM 6-K REPORT Attached hereto asÂ Exhibit 99.1Â is a press release of Golden Ocean Group Ltd. (the â€œCompanyâ€) dated August 28, 2024, announcing the Companyâ€™s results for the second quarter ended June 30, 2024. The information contained in this Report on Form 6-K, excluding the commentary of Peder Simonsen, is hereby incorporated by reference into the Companyâ€™s Registration Statement on Form F-3 (File No. 333-266220) filed with the U.S. Securities and Exchange Commission with an effective date of July 19, 2022. SIGNATURES Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.Â GOLDEN OCEAN GROUP LTD.Â Â Â Â Â Â Â Â Â Â Â By:Â /s/ Peder Simonsen Â Date: August 28, 2024 Name:Â Peder Simonsen Â Title:Â Interim Principal Executive Officer and Principal Financial Officer Â EX-99.1 2 d11454171_ex99-1.htm INTERIM FINANCIAL INFORMATION GOLDEN OCEAN GROUP LIMITED Second Quarter 2024 AugustÂ 28, 2024 Hamilton, Bermuda, AugustÂ 28, 2024 - Golden Ocean Group Limited (NASDAQ/OSE: GOGL) (the â€œCompanyâ€ or â€œGolden Oceanâ€), the world's largest listed owner of large size dry bulk vessels, today announced its unaudited results for the quarter ended JuneÂ 30, 2024. Highlights â€“ Net income of \$62.5 million and earnings per share of \$0.31 (basic) for the second quarter of 2024, compared with net income of \$65.4 million and earnings per share of \$0.33 (basic) for the first quarter of 2024. â€“ Adjusted EBITDA1Â of \$120.3 million for the second quarter of 2024, compared with \$114.3 million for the first quarter of 2024. â€“ Adjusted net income1 of \$63.4 million for the second quarter of 2024, compared to \$58.4 million for the first quarter of 2024. â€“ Reported TCE2 rates for Capesize and Panamax vessels of \$28,005 per day and \$15,721 per day, respectively, and \$23,535 per day for the entire fleet in the second quarter of 2024. â€“ Entered into an agreement to sell one Panamax vessel for net consideration of \$20.8 million. â€“ Published its ESG report for 2023, showing an improvement in its Carbon Intensity Indicator by 13.3% compared to its 2019 baseline. â€“ Estimated TCE rates, inclusive of charter coverage calculated on a load-to-discharge basis, are approximately: â€¢ \$26,200 per day for 83% of Capesize available days and \$17,200 per day for 94% of Panamax available days for the third quarter of 2024. â€¢ \$25,800 per day for 29% of Capesize available days and \$17,900 per day for 18% of Panamax available days for the fourth quarter of 2024. â€“ Announced a cash dividend of \$0.30 per share for the second quarter of 2024, which is payable on or about September 20, 2024, to shareholders of record on September 11, 2024. Shareholders holding the Companyâ€™s shares through Euronext VPS may receive this cash dividend later, on or about September 23, 2024. Peder Simonsen, Interim Chief Executive Officer and Chief Financial Officer, commented: "Despite a volatile macro and geopolitical backdrop, the dry bulk shipping market remains healthy, and Golden Ocean continues to deliver above-market performance. This is attributable to the quality of our modern, fuel-efficient fleet as well as our strong commercial capabilities. While we continue to opportunistically secure charter coverage, we retain significant exposure to a market we believe will strengthen as the year progresses. Demand fundamentals in large vessel segments are particularly constructive, with Chinese demand for bauxite and new iron ore export projects under development in the Atlantic Basin are expected to be long-term drivers. The supply side is also favorable as fleet growth is moderating and environmental regulations are expected to constrain effective fleet capacity. Golden Ocean is well positioned to continue to generate strong cash flows, based on our fleet premium and our industry-leading cash breakeven levels. Accordingly, the Company expects to continue to deliver strong returns for our shareholders." GOLDEN OCEAN GROUP LIMITED, SECOND QUARTER 2024 2 1Adjusted EBITDA (adjusted earnings before interest, taxes, depreciation and amortization), Adjusted net income/(loss) and Adjusted basic earnings/(loss) per share are non-GAAP measures. A reconciliation of adjusted EBITDA, Adjusted net income/(loss) and Adjusted basic earnings/(loss) per share to the most directly comparable GAAP measure is included in the back part of this report. 2TCE rate, or time charter equivalent rate, is a non-GAAP measure. A reconciliation of TCE rate to the most directly comparable GAAP measure is included in the back part of this report. GOLDEN OCEAN GROUP LIMITED, SECOND QUARTER 2024 3 Fleet Development & Performance As of the date of this report, the Company's fleet consists of 93 vessels, including one newbuilding, with an aggregate capacity of approximately 14.0 million deadweight tonnes ("dwt"). The Company's fleet consists of: a. 84 vessels owned by the Company (52 Capesize and 32 Panamax vessels); b. Eight Capesize vessels chartered in on long-term leases with profit-sharing arrangements; and c. One 85,000 dwt Kamsarmax vessel on order. In June 2024, the Company entered into an agreement to sell one Panamax vessel for net consideration of \$20.8 million. The vessel was delivered to its new owner in the third quarter of 2024 and the gain from sale of approximately \$4.3 million will be recorded in the third quarter of 2024. As of the date of this report, the Company has one vessel under construction with \$23.0 million of related outstanding contractual commitments due by the fourth quarter of 2024. The commitments will be funded by drawing the balance on the committed debt financing. Six drydocks are expected to be carried out in the third quarter of 2024 (five for Capesize vessels and one for Panamax vessel), of which one have been substantially completed as of today. The Companyâ€™s estimated TCE rates for the third quarter of 2024 are \$26,200 per day for 83% of available days for Capesize vessels and \$17,200 per day for 94% of available days for Panamax vessels. These estimates are forward-looking statements and based on time charter contracts entered into by the Company as well as current spot fixtures on the load-to-discharge method, whereby revenue is recognized on a straight-line basis over the voyage from the commencement of loading to the completion of discharge. The actual TCE rates to be earned will depend on the number of contracted days and the number of ballast days at the end of the period when vessels are sailing without cargo. According to the load-to-discharge accounting method, the Company will not be able to recognize revenue for any ballast days or uncontracted days at the end of the third quarter of 2024. At the same time, expenses for uncontracted days cannot be deferred and will be recognized. The Company has secured 29% of total days at an average rate of \$25,800 per day for Capesize vessels and 18% of total days for Panamax vessels at an average rate of \$17,900 per day in the fourth quarter of 2024. Corporate Development In April 2024, the Company entered into and fully drew down a \$180 million credit facility to refinance six Newcastlemax vessels. The credit facility which is secured by the six vessels has a five-year tenor and an age adjusted amortization profile of 20 years. The facility is priced with interest rate of SOFR plus a margin of 160 basis points per annum, and includes sustainability linked pricing element with an additional 5 basis points pricing adjustment, dependent on emission reduction performance. The Company announced today a cash dividend of \$0.30 per share for the second quarter of 2024, which is payable on or about SeptemberÂ 20, 2024, to shareholders of record on SeptemberÂ 11, 2024. Shareholders holding the Companyâ€™s shares through Euronext VPS may receive this cash dividend later on or about SeptemberÂ 23, 2024. GOLDEN OCEAN GROUP LIMITED, SECOND QUARTER 2024 4 Second Quarter 2024 Results Second Quarter 2024 Income Statements The Company reported net income of \$62.5 million and basic earnings per share of \$0.31 for the second quarter of 2024, compared to net income of \$65.4 million and basic earnings per share of \$0.33 for the first quarter of 2024. Adjusted net income for the second quarter of 2024 was \$63.4 million, compared to \$58.4 million for the first quarter of 2024. Adjusted EBITDA was \$120.3 million for the second quarter of 2024, an increase of \$6.0 million from \$114.3 million for the first quarter of 2024. Operating revenues were \$250.1 million in the second quarter of 2024, an increase of \$3.4 million from \$246.7 million in the first quarter of 2024. The Company achieved an average TCE rate for the entire fleet of \$23,535 per day in the second quarter of 2024 compared to that of \$22,628 per day in the first quarter of 2024. The total number of onhire days decreased by 275 days in comparison to the first quarter of 2024, due in part to a 158-days reduction in trading activity days. Further, four vessels were in regular and repair drydocks during the second quarter of 2024, compared with the two vessels in previous quarter, resulting in 193 offhire days, compared to 97 offhire days in the first quarter of 2024. Voyage expenses increased by \$2.7 million to \$52.7 million from the first quarter of 2024 as a result of more voyage charters in the second quarter of 2024. Other revenues were \$0.2 million in the second quarter of 2024, compared to \$1.0 million in the first quarter of 2024, which was a result of reduction in management fee revenues. There was no gain from disposal of vessels recorded in the second quarter of 2024, compared to \$1.1 million recorded in the first quarter of 2024 related to the sale of a Panamax vessel. Ship operating expenses amounted to \$66.3 million in the second quarter of 2024 compared to \$62.6 million in the first quarter of 2024. In the second quarter of 2024, ship operating expenses included \$54.1 million in running and other various expenses (compared to \$54.7 million in the first quarter of 2024). Running expenses mainly consisted of crew costs, repairs and maintenance, spares and insurance. In addition to running expenses, ship operating expenses included \$6.4 million in drydocking expenses (compared with \$4.7 million in the first quarter of 2024) and \$4.3 million in various energy saving initiatives and digitalization expenses (compared to \$0.9 million in the first quarter of 2024). In the second quarter of 2024, \$1.5 million in estimated ship operating expenses for vessels on time charter-in contracts were reclassified from charterhire expenses to ship operating expenses (compared with \$2.4 million in the first quarter of 2024) and calculated based on numbers of chartered in days and an estimated operating expenses rate per day of \$5,700. GOLDEN OCEAN GROUP LIMITED, SECOND QUARTER 2024 5 Charter hire expenses were \$4.8 million in the second quarter of 2024

compared to \$7.3 million in the first quarter of 2024. Most of the decrease relates to the 158-day decrease in chartered-in days compared to the first quarter of 2024. Administrative expenses were \$5.1 million in the second quarter of 2024, compared to \$7.4 million in the first quarter of 2024, a decrease primarily due to non-recurring personnel expenses recorded in the first quarter of 2024. Depreciation was \$35.2 million in the second quarter of 2024, and was largely unchanged compared to the first quarter of 2024. Net interest expense was \$25.3 million in the second quarter of 2024, a decrease from \$27.2 million in the first quarter of 2024, mainly due to a decrease in debt balances. In the second quarter of 2024, the Company recorded a \$2.4 million net gain on derivatives, mainly resulting from \$1.4 million in unrealized loss on the mark-to-market changes of interest rate swaps, \$4.1 million in realized gains/interest income on interest rate swaps and a \$0.6 million realized loss on forward freight agreements. The Company recorded a loss from associated companies of \$0.4 million in the second quarter of 2024 compared to a loss of \$4.6 million in the first quarter of 2024. Second Quarter 2024 Cash Flow Statements and Balance Sheet as of June 30, 2024 As of June 30, 2024, the Company had cash and cash equivalents of \$103.1 million, including restricted cash balances of \$3.6 million, a decrease of \$44.4 million from the first quarter of 2024. In addition, the Company had undrawn available credit lines of \$150.0 million under its revolving credit facilities. In the second quarter of 2024, cash provided by operating activities amounted to \$76.9 million, including a negative working capital change of \$23.5 million and dividends of \$0.4 million received from associated companies. For the three months ended June 30, 2024, total net cash used in investing activities was \$25.5 million, relating to installments and other costs relating to our Kamsarmax newbuilding contracts. Net cash used in financing activities was \$95.8 million in the second quarter of 2024 and included full drawdown under the new \$180 million sustainability-linked credit facility, which refinanced the \$233 million facility with outstanding balance of \$178.6 million, and a partial \$21.6 million drawdown on the \$85 million credit facility upon delivery of one newbuilding in the period. Further, \$25.8 million in scheduled debt repayment, \$25.0 million in repayment of the Company's revolving credit facilities, \$6.1 million in repayment of finance leases, \$1.9 million in debt fees and \$60.0 million in dividend payments were recorded. GOLDEN OCEAN GROUP LIMITED, SECOND QUARTER 2024 6 As of June 30, 2024, the book value of the Company's long-term debt was \$1,335.5 million, including the current portion of long-term debt of \$115.4 million. The book value of finance lease obligations was \$77.8 million, including the current portion of finance lease obligations of \$20.1 million. The Dry Bulk Market The dry bulk displayed strength in the second quarter of 2024 and has remained healthy through the first half of the year. A Freight rate momentum carried over from the prior quarter, supported by year-over-year demand growth across all commodity groups as well as longer sailing distances. A Once again, larger vessel segments where the Company's fleet is focused, showed relative strength on the back of strong demand trade of iron ore and bauxite in the Atlantic basin. Global dry bulk fleet utilization (calculated as total tonne-mile demand divided by total available fleet capacity) was 89.0% in the second quarter of 2024, according to Maritime Analytics, indicating a continued tight market balance. Total seaborne transportation of dry bulk goods was 1,252 mt in the second quarter of 2024, representing an increase of 3.0% compared with the first quarter of 2024 and an increase of 3.3% compared with the second quarter of 2023. Global steel production increased by 3.0% in the second quarter of 2024 compared with the first quarter of 2024, driven by a 5.5% increase in production in China, the world's largest steel producer. Indian steel production declined by 2.8% in the second quarter of 2024 compared with the first quarter of 2024 but increased by 4.6% compared with the second quarter of 2023, continuing a steady long-term upwards trajectory. A Outside of China and India, steel production increased by 0.6% compared with the prior quarter and is expected to increase further over the next several years as construction activity recovers from current depressed levels. Second quarter global iron ore imports decreased by 2.0% compared with the first quarter of 2024, but increased by 5.4% compared with the second quarter of 2023. Chinese iron ore imports increased by 13.4% compared with the first quarter of 2024 and by 6.9% compared with the second quarter of 2023. Imports of iron ore to China from Brazil increased by 26.0% in the second quarter of 2024 compared with the second quarter of 2023, but declined compared with the first quarter of 2024. Brazilian iron ore exports are expected to remain robust in 2024, providing strong support to tonne-mile demand for Capesize vessels. Global coal imports increased by 5.6% in the second quarter of 2024 compared with the first quarter of 2024 and by 3.5% compared with the second quarter of 2023, driven by elevated imports to China, India, and Taiwan. A Chinese coal imports reached a record level during the second quarter of 2024. Trade of minor bulks, including bauxite, increased by 5.7% compared with the first quarter of 2024 and by 1.9% compared with the second quarter of 2023 driven by strong exports of bauxite from West Africa to China. A Bauxite exports from Guinea to China have grown significantly in recent years and totaled approximately 40% of Brazilian iron ore exports through the first six months of 2024. A This trade, which is primarily carried out by Capesize vessels, provided strong incremental demand through the first half of 2024. GOLDEN OCEAN GROUP LIMITED, SECOND QUARTER 2024 7 Transportation of essential agribulks, which represented 12.9% of total seaborne volumes in the second quarter of 2024, increased by 5.2% compared with the first quarter of 2024 and by 1.9% compared with the second quarter of 2023, reaching a record level. A Tonne-mile demand from agribulks continues to benefit from longer sailing distances, and Maritime Analytics expects global agribulk tonne-mile demand to grow by 8.8% in 2024 before moderating to 1.9% in 2025. The global fleet of dry bulk vessels amounted to 1,019.8 million dwt at the end of the second quarter of 2024, absorbing a net increase of 8.1 million dwt in the quarter. A total of 12.2 million dwt of vessels or 1.2% of the global fleet as of the start of the quarter has been ordered during the quarter. A Capesize vessels represented approximately half of all orders, based on dwt, although these vessels are not expected to be delivered until 2027 at the earliest. A The orderbook as a percentage of the global fleet stood at 9.8% at the end of the quarter, roughly unchanged from the start of 2024, but well below an average of approximately 24% over the last 25 years and remains near historical low levels. The Capesize orderbook increased slightly to 7.3% as of the end of the quarter, compared with an average of approximately 29% over the last 25 years, and the lowest among the dry bulk segments. A Vessel recycling was not meaningful in the Capesize and Panamax segments in the second quarter of 2024, and port congestion remained at low levels from a historical perspective. Effective fleet capacity continues to be impacted by longer sailing distances as vessels have avoided the Suez Canal due to geopolitical tensions in the region, which was partly offset by a slight improvement in conditions that have affected Panama Canal transits over the last several quarters. Strategy and Outlook Inflation continues to ease across key economies, despite persistent inflation in services industries. The International Monetary Fund (IMF) has maintained its global GDP growth forecasts to 3.2% in 2024 and increased its 2025 forecast slightly to 3.3% in its July forecast. The GDP growth forecast for emerging Asian economies has been revised upwards to 5.4% in 2024 and 5.1% in 2025. The latest forecast is being driven by India, where GDP is forecast to grow by 7.0% in 2024 (a 0.2% increase from the prior forecast), and 6.5% in 2025, while the IMF forecasts China's GDP to grow by 5.0% and 4.5% in 2024 and 2025, respectively, representing increases of 0.4% for each year compared with the prior forecast. Global tonne-mile demand is forecast to increase 4.2% in 2024 and 3.1% in 2025, according to Maritime Analytics, driven by volume growth in agribulk and minor bulk and longer distances for iron ore trade. Fleet utilization is forecast to remain elevated, implying continued strength of dry bulk freight rates. Any potential disruption to trade flows, including those caused by geopolitical events, may drive fleet inefficiency and push utilization and rates higher. The timing of the reopening of the Suez Canal remains uncertain, and a normalization of canal transit would likely negatively impact tonne-miles. GOLDEN OCEAN GROUP LIMITED, SECOND QUARTER 2024 8 While the Chinese government seemingly continues to support rather than grow the country's real estate sector, stimulus has benefited other sectors across the country's economy. Additionally, China announced in July the largest interest rate cut since 2020, along with subsidies for electric vehicles, which generate significant demand for bauxite, and other measures to stimulate consumer spending. It is expected that China will continue to stimulate manufacturing and maintain infrastructure spending to further bolster its economy. Although iron ore inventories suggest somewhat weaker domestic steel demand, steel exports continue to grow, increasing by 20% for the first half of 2024 compared to first half of 2023. A prolonged weakness in China's economic development is the main risk for the dry bulk market, but it is expected that China will continue to stimulate to further bolster its economy. India's economy is expected to continue to grow at a strong pace. Inflation is gradually easing and is projected to remain within the Reserve Bank of India's target range. Both domestic and foreign investment is expected to increase, driven in part by government initiatives, and a growing middle class is fueling consumer spending. A The country's rapid industrialization, infrastructure development, and rising consumption patterns are driving demand for various dry bulk commodities. In particular, ambitious infrastructure projects, including roads, and railways, require significant quantities of construction materials, including cement, steel, and aggregates. New iron ore export projects coming online over the next several years are also expected to require further vessel capacity, particularly in the Capesize segment. A The largest of these projects is the Simandou mine in Guinea, which contains the world's largest untapped reserves of high-grade iron ore. A Major mining companies, including Rio Tinto, are actively involved in the project, and significant investments are being made in infrastructure, including a railway and port facilities. A Exports from these projects are expected to drive tonne-mile demand for the larger segments. The outlook for fleet supply remains highly positive. An orderbook near 30-year lows as a percentage of the operating fleet is highly supportive of expectations for an improving freight market. With strong visibility into fleet growth given limited shipyard capacity, there is very limited risk to fleet supply growth forecasts through 2027. Additionally, there is a potential upside to effective fleet supply given geopolitical tensions and other factors impacting key shipping lanes as well as port congestion, which has historically been prone to volatility, remains at low levels. Dry bulk fleet supply growth will also be challenged due to tightening environmental regulations. To comply with stricter regulatory standards, ship owners are likely to reduce vessel speeds, retrofit ships with energy-saving technologies and potentially scrap older, less efficient vessels which may impact fleet capacity. These factors, combined with the varying levels of compliance

among ships, are expected to create a more segmented or "tiered" market. Golden Ocean is particularly well-positioned against this backdrop with a large fleet of modern, fuel-efficient vessels concentrated in the larger vessel segments. Golden Ocean has been successfully pursuing a strategy of investing in the Company's fleet to ensure the ability to generate cash flow under any market circumstances. The Company has simultaneously managed its industry-leading daily cash breakeven levels, which average approximately \$13,900 per day for the full fleet. This strategy of maintaining low breakeven rates, coupled with a modern and efficient fleet that can command premium rates, ensures that the Company is well-protected against market downturns while also poised to generate significant cash flow during strong markets. GOLDEN OCEAN GROUP LIMITED, SECOND QUARTER 2024 9 The Board of Directors continues to prioritize returning value to its shareholder and has consistently allocated capital towards dividends. While the amount and timing of future dividends will be based on the Company's financial performance, investment opportunities, and the overall market situation, the Company intends to continue to distribute a significant portion of its earnings to shareholders. Golden Ocean continues to monitor macroeconomic factors and their potential effects on the large size dry bulk market sector. The Board of Directors Golden Ocean Group Limited Hamilton, Bermuda August 28, 2024 A Questions should be directed to: Peder Simonsen: Interim Chief Executive Officer and Chief Financial Officer, Golden Ocean Management AS + 47 22 01 73 40 Forward-Looking Statements Matters discussed in this earnings report may constitute forward-looking statements. The Private Securities Litigation Reform Act of 1995, or the PSLRA, provides safe harbor protections for forward-looking statements in order to encourage companies to provide prospective information about their business. Forward-looking statements include statements concerning plans, objectives, goals, strategies, future events or performance, and underlying assumptions and other statements, which are other than statements of historical facts. The Company is taking advantage of the safe harbor provisions of the PSLRA and is including this cautionary statement in connection therewith. This document and any other written or oral statements made by the Company or on its behalf may include forward-looking statements, which reflect the Company's current views with respect to future events and financial performance. This earnings report includes assumptions, expectations, projections, intentions and beliefs about future events. These statements are intended as "forward-looking statements." The Company cautions that assumptions, expectations, projections, intentions and beliefs about future events may and often do vary from actual results and the differences can be material. When used in this document, the words "believe," "expect," "anticipate," "estimate," "intend," "plan," "targets," "likely," "will," "could" and similar expressions or phrases may identify forward-looking statements. The forward-looking statements in this report are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, management's examination of historical operating trends, data contained in the Company's records and other data available from third parties. Although the Company believes that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond the Company's control, the Company cannot assure you that it will achieve or accomplish these expectations, beliefs or projections. As a result, you are cautioned not to rely on any forward-looking statements. GOLDEN OCEAN GROUP LIMITED, SECOND QUARTER 2024 10 In addition to these important factors and matters discussed elsewhere herein, important factors that, in the Company's view, could cause actual results to differ materially from those discussed in the forward-looking statements, include among other things: general market trends in the dry bulk industry, which is cyclical and volatile, including fluctuations in charter hire rates and vessel values; a decrease in the market value of the Company's vessels; changes in supply and demand in the dry bulk shipping industry, including the market for the Company's vessels and the number of newbuildings under construction; delays or defaults in the construction of the Company's newbuildings could increase the Company's expenses and diminish the Company's net income and cash flows; an oversupply of dry bulk vessels, which may depress charter rates and profitability; the Company's future operating or financial results; the Company's continued borrowing availability under the Company's debt agreements and compliance with the covenants contained therein; the Company's ability to procure or have access to financing, the Company's liquidity and the adequacy of cash flows for the Company's operations; the failure of the Company's contract counterparties to meet their obligations, including changes in credit risk with respect to the Company's counterparties on contracts; the loss of a large customer or significant business relationship; the strength of world economies; the volatility of prevailing spot market and charter-hire charter rates, which may negatively affect the Company's earnings; the Company's ability to successfully employ the Company's dry bulk vessels and replace the Company's operating leases on favorable terms, or at all; changes in the Company's operating expenses and voyage costs, including bunker prices, fuel prices (including increased costs for low sulfur fuel), drydocking, crewing and insurance costs; the adequacy of the Company's insurance to cover the Company's losses, including in the case of a vessel collision; vessel breakdowns and instances of offhire; the Company's ability to fund future capital expenditures and investments in the construction, acquisition and refurbishment of the Company's vessels (including the amount and nature thereof and the timing of completion of vessels under construction, the delivery and commencement of operation dates, expected downtime and lost revenue); risks associated with any future vessel construction or the purchase of second-hand vessels; effects of new products and new technology in the Company's industry, including the potential for technological innovation to reduce the value of the Company's vessels and charter income derived therefrom; the impact of an interruption or failure of the Company's information technology and communications systems, including the impact of cyber-attacks, upon the Company's ability to operate; potential liability from safety, environmental, governmental and other requirements and potential significant additional expenditures (by the Company and the Company's customers) related to complying with such regulations; changes in governmental rules and regulations or actions taken by regulatory authorities and the impact of government inquiries and investigations; the arrest of the Company's vessels by maritime claimants; government requisition of the Company's vessels during a period of war or emergency; the Company's compliance with complex laws, regulations, including environmental laws and regulations and the U.S. Foreign Corrupt Practices Act of 1977; potential difference in interests between or among certain members of the Board of Directors, executive officers, senior management and shareholders; the Company's ability to attract, retain and motivate key employees; work stoppages or other labor disruptions by the Company's employees or the employees of other companies in related industries; potential exposure or loss from investment in derivative instruments; stability of Europe and the Euro or the inability of countries to refinance their debts; inflationary pressures and the central bank policies intended to combat overall inflation and rising interest rates and foreign exchange rates; fluctuations in currencies; the impact that any discontinuance, modification or other reform or the establishment of alternative reference rates have on the Company's floating interest rate debt instruments; acts of piracy on ocean-going vessels, public health threats, terrorist attacks and international hostilities and political instability; potential physical disruption of shipping routes due to accidents, climate-related (acute and chronic), political instability, terrorist attacks, piracy, international sanctions or international hostilities, including the developments in the Ukraine region and in the Middle East, including the conflicts in Israel and Gaza, and the Houthi attacks in the Red Sea; general domestic and international political and geopolitical conditions or events, including any further changes in U.S. trade policy that could trigger retaliatory actions by affected countries; the impact of adverse weather and natural disasters; the impact of increasing scrutiny and changing expectations from investors, lenders and other market participants with respect to the Company's Environmental, Social and Governance policies; changes in seaborne and other transportation; the length and severity of epidemics and pandemics and governmental responses thereto and the impact on the demand for seaborne transportation in the dry bulk sector; impacts of supply chain disruptions and market volatility surrounding impacts of the Russian-Ukrainian conflict and the developments in the Middle East; fluctuations in the contributions of the Company's joint ventures to the Company's profits and losses; the potential for shareholders to not be able to bring a suit against us or enforce a judgement obtained against us in the United States; the Company's treatment as a passive foreign investment company by U.S. tax authorities; being required to pay taxes on U.S. source income; the Company's operations being subject to economic substance requirements; the Company potentially becoming subject to corporate income tax in Bermuda in the future; the volatility of the stock price for the Company's common shares, from which investors could incur substantial losses, and the future sale of the Company's common shares, which could cause the market price of the Company's common shares to decline; and other important factors described from time to time in the reports filed by the Company with the U.S. Securities and Exchange Commission, including the Company's most recently filed Annual Report on Form 20-F for the year ended December 31, 2023. GOLDEN OCEAN GROUP LIMITED, SECOND QUARTER 2024 11 The Company cautions readers of this report not to place undue reliance on these forward-looking statements, which speak only as of their dates. Except to the extent required by applicable law or regulation, the Company undertakes no obligation to release publicly any revisions to these forward-looking statements to reflect events or circumstances after the date of this report or to reflect the occurrence of unanticipated events. These forward-looking statements are not guarantees of the Company's future performance, and actual results and future developments may vary materially from those projected in the forward-looking statements.
