[illegible]

on July 10, 2024. The income tax provision has been computed based on the Company's estimated annual effective tax rate. The effective income tax rate differs from the federal income tax rate of 21% primarily due to the geographical mix of earnings and larger amounts being subject to tax at a rate greater than the U.S. statutory rate, which was partially offset by tax benefits related to tax-exempt investment income. (2)A Per Share DataA A A The Company presents both basic and diluted net income per share (the "EPS") amounts. Basic EPS is calculated by dividing net income by the weighted average number of common shares outstanding during the period (including 17,495,175 and 17,125,284 common shares held in a grantor trust as of JuneA 30, 2024 and 2023, respectively). The common shares held in the grantor trust are for delivery upon settlement of vested but mandatorily deferred restricted stock units ("RSUs"). Shares held by the grantor trust do not affect diluted shares outstanding since the shares deliverable under vested RSUs were already included in diluted shares outstanding. Diluted EPS is based upon the weighted average number of basic and common equivalent shares outstanding during the period and is calculated using the treasury stock method for stock incentive plans. Common equivalent shares are excluded from the computation in periods in which they have an anti-dilutive effect. A A A The weighted average number of common shares used in the computation of basic and diluted earnings per share was as follows:For the Three Months Ended June 30,For the Six Months Ended June 30,(In thousands)2024202320242023Basic400,273A 406,296A 401,295A 409,364A Diluted403,737A 409,643A 404,679A 412,819A (3)A Recent Accounting Pronouncements and Accounting PoliciesRecently adopted accounting pronouncements:A A A All accounting and reporting standards that became effective in 2024 were either not applicable to the Company or their adoption did not have a material impact on the Company. 6 Accounting and reporting standards that are not yet effective:A A A All recently issued but not yet effective accounting and reporting standards are either not applicable to the Company or are not expected to have a material impact on the Company.7 (4) Consolidated Statements of Comprehensive (Loss) IncomeA A A The following table presents the components of the changes in accumulated other comprehensive (loss) income ("AOCI"):(In thousands)Unrealized Investment (Losses) GainsCurrency Translation AdjustmentsAccumulated Other Comprehensive(Loss) IncomeAs of and for the six months ended June 30, 2024Changes in AOCIBeginning of period\$(586,354)\$(339,484)\$(925,838)Other comprehensive loss before reclassifications(156,023)(24,343)(180,366)Amounts reclassified from AOCI72,563A A 72,563A Other comprehensive loss(83,460)(24,343)(107,803)Unrealized investment gain related to noncontrolling interest1A A 1A End of period\$(669,813)\$(363,827)\$(1,033,640)Amounts reclassified from AOCIPre-tax\$91,852A (1)\$A 91,852A Tax effect (19,289)(2)\$A (19,289)After-tax amounts reclassified\$72,563A A \$72,563A Other comprehensive lossPre-tax\$(109,937)\$(24,343)\$(134,280)Tax effect26,477A A 26,477A Other comprehensive loss\$(83,460)\$(24,343)\$(107,803)As of and for the three months ended June 30, 2024Changes in AOCIBeginning of period\$(656,476)\$(367,054)\$(1,023,530)Other comprehensive (loss) income before reclassifications(54,711)3,227A (51,484)Amounts reclassified from AOCI41,373A A 41,373A Other comprehensive (loss) income(13,338)3,227A (10,111)Unrealized investment gain to noncontrolling interest1A A 1A Ending balances\$(669,813)\$(363,827)\$(1,033,640)Amounts reclassified from AOCIPre-tax\$52,371A (1)\$A 52,371A Tax effect (10,998)(2)\$A (10,998)After-tax amounts reclassified\$41,373A A \$41,373A Other comprehensive (loss) incomePre-tax\$(20,640)3,227A \$(17,413)Tax effect7,302A A 7,302A Other comprehensive (loss) income\$(13,338)3,227A \$(10,111)8 (In thousands)Unrealized Investment (Losses) GainsCurrency Translation AdjustmentsAccumulated Other Comprehensive(Loss) IncomeAs of and for the six months ended June 30, 2023Changes in AOCIBeginning of period\$(892,905)\$(371,676)\$(1,264,581)Other comprehensive income before reclassifications99,093A 15,394A 114,487A Amounts reclassified from AOCI(31,578)\$A (31,578)Other comprehensive income67,515A 15,394A 82,909A Unrealized investment loss related to noncontrolling interest(1)\$A (1)End of period\$(825,391)\$(356,282)\$(1,181,673)Amounts reclassified from AOCIPre-tax\$(39,972)(1)\$A (39,972)Tax effect 8,394A (2)\$A 8,394A After-tax amounts reclassified\$(31,578)\$A (31,578)Other comprehensive incomePre-tax\$87,978A \$15,394A \$103,372A Tax effect(20,463)\$A (20,463)Other comprehensive income\$67,515A \$15,394A \$82,909A As of and for the three months ended June 30, 2023Changes in AOCIBeginning of period\$(712,107)\$(366,810)\$(1,078,917)Other comprehensive (loss) income before reclassifications(56,122)10,528A (45,594)Amounts reclassified from AOCI(57,162)\$A (57,162)Other comprehensive (loss) income(113,284)10,528A (102,756)Unrealized investment loss related to noncontrolling interestA A A Ending balances\$(825,391)\$(356,282)\$(1,181,673)Amounts reclassified from AOCIPre-tax\$(72,357)(1)\$A (72,357)Tax effect 15,195A (2)\$A 15,195A After-tax amounts reclassified(57,162)\$A (57,162)Other comprehensive (loss) incomePre-tax\$(144,043)\$10,528A (133,515)Tax effect30,759A A 30,759A Other comprehensive (loss) incomes\$(113,284)\$10,528A (102,756) (1) Net investment (losses) gains in the consolidated statements of income.(2) Income tax expense in the consolidated statements of income. (7)A Investments in Equity SecuritiesA A A At JuneA 30, 2024 and DecemberA 31, 2023, investments in equity securities were as follows:A (In thousands)CostGross UnrealizedFairValueCarryingValueGainsLossesJune 30, 2024Common stocks\$603,574A \$139,146A (\$46,165)\$696,555A \$696,555A Preferred stocks\$374,409A 19,762A (12,634)381,537A 381,537A Total\$977,983A \$158,908A (\$58,799)\$1,078,092A \$1,078,092A December 31, 2023Common stocks\$664,997A \$191,806A (\$18,749)\$838,054A \$838,054A Preferred stocks\$284,335A 3,075A (35,117)\$252,293A \$252,293A Total\$949,332A \$194,881A (\$53,866)\$1,090,347A \$1,090,347A (8)A Arbitrage Trading AccountA A A At JuneA 30, 2024 and DecemberA 31, 2023, the fair and carrying values of the arbitrage trading account were \$1,222 million and \$938 million, respectively. The primary focus of the trading account is merger arbitrage. Merger arbitrage is the business of investing in the securities of publicly held companies which are the targets in announced tender offers and mergers. Arbitrage investing differs from other types of investing in its focus on transactions and events believed likely to bring about a change in value over a relatively short time period (usually four months or less). A A A The Company uses put options and call options in order to mitigate the impact of potential changes in market conditions on the merger arbitrage trading account. These options are reported at fair value. As of JuneA 30, 2024, the fair value of long option contracts outstanding was \$3 million (notional amount of \$401 million) and the fair value of short option contracts was \$81 million (notional amount of \$401 million). Other than with respect to the use of these trading account securities, the Company does not make use of derivatives.13 (9)A Net Investment IncomeA A A Net investment income consisted of the following:A A For the Three Months Ended June 30,For the Six Months Ended June 30,(In thousands)2024202320242023Investment income (loss) earned on:Fixed maturity securities, including cash and cash equivalents and loans receivable\$324,136A \$217,830A \$659,384A \$413,473A Arbitrage trading account (1)16,682A 17,037A 34,693A 25,293A Equity securities12,386A 15,254A 23,721A 29,000A Investment funds2,476A (1,186)(3,873)993A Real estate(3,705)(2,123)(16,868)(5,834)Gross investment income\$374,975A \$246,812A \$697,057A \$472,925A Investment expense(2,846)(1,660)(5,090)(4,374)Net investment income\$372,129A \$245,152A \$691,967A \$468,551A (1) Net investment income includes earnings from trading account receivables from brokers and clearing organizations. (10) Investment FundsA A A The Company evaluates whether it is an investor in a variable interest entity ("VIE"). Such entities do not have sufficient equity at risk to finance their activities without additional subordinated financial support, or the equity investors, as a group, do not have the characteristics of a controlling financial interest (primary beneficiary).A The Company determines whether it is the primary beneficiary of an entity subject to consolidation based on a qualitative assessment of the VIE's capital structure, contractual terms, nature of the VIE's operations and purpose, and the Company's relative exposure to the related risks of the VIE on the date it becomes initially involved in the VIE and on an ongoing basis. The Company is not the primary beneficiary in any of its investment funds, and accordingly, carries its interests in investment funds under the equity method of accounting.A A A A A The Company's maximum exposure to loss with respect to these investments is limited to the carrying amount reported on the Company's consolidated balance sheet and its unfunded commitments, which were \$275 million as of JuneA 30, 2024.A A A Investment funds consisted of the following:Carrying Value as of Income (Loss) fromInvestment FundsJune 30,December 31,For the Six Months Ended June 30,(In thousands)2024202320242023Financial services\$436,057A \$433,407A (\$18,231)\$(20,321)Transportation\$66,485A \$44,278A (3,732)23,843A Real Estate198,111A 201,625A 12,880A 2,963A Infrastructure140,699A 130,589A 7,828A 5,936A Energy131,719A 114,794A 8,505A 3,439A Other funds\$376,048A \$396,962A (11,123)(14,867)Total\$1,589,119A \$1,621,655A (\$3,873)\$993A A A The Company's share of the earnings or losses from investment funds is generally reported on a one-quarter lag in order to facilitate the timely completion of the Company's consolidated financial statements.Financial services investment funds include the minority investment in Lifson Re, a Bermuda reinsurance company. Effective January 1, 2021, Lifson Re participated on a fully collateralized basis in a majority of the Company's reinsurance placements for a 22.5% share of placed amounts. The percentage increased from 22.5% to 30.0% effective July 1, 2022. This pertains to all traditional reinsurance/retrocessional placements for both property and casualty business where there is more than 14 one open market reinsurer participating. For the six months ended June 30, 2024 and 2023, the Company ceded approximately \$206A million and \$281A million, respectively, of written premiums to Lifson Re. Other funds include deferred compensation trust assets of \$41A million and \$36A million as of JuneA 30, 2024 and DecemberA 31, 2023, respectively. These assets support other liabilities reflected in the balance sheet of an equal amount for employees who have elected to defer a portion of their compensation. The change in the net asset value of the trust is recorded in other funds within net investment income with an offsetting equal amount within corporate expenses. (11) Real EstateA A A Investment in real estate represents directly owned property held for investment, as follows:Carrying ValueJune 30,December 31,(In thousands)20242023Properties in operation\$1,051,755A \$1,022,654A Properties under development227,551A 227,220A Total\$1,279,306A \$1,249,874A A A As of JuneA 30, 2024, properties in operation included a long-term ground lease in Washington, D.C., an office complex

New York City and the completed portion of a mixed-use project in Washington, D.C. Properties in operation are net of accumulated depreciation and amortization of \$35,389,000 and \$32,745,000 as of June 30, 2024 and December 31, 2023, respectively. Related depreciation expense was \$4,164,000 and \$4,394,000 for the six months ended June 30, 2024 and 2023, respectively. Future minimum rental income expected on operating leases relating to properties in operation is \$15,013,195 in 2024, \$32,278,604 in 2025, \$33,991,743 in 2026, \$32,850,623 in 2027, \$33,376,327 in 2028, \$31,999,237 in 2029 and \$416,884,751 thereafter. A A A A mixed-use project in Washington, D.C. had been under development in 2024 and 2023, with the completed portion reported in properties in operation as of June 30, 2024. (12) Loans Receivable At June 30, 2024 and December 31, 2023, loans receivable were as follows: (In thousands) June 30, 2024/December 31, 2023 Amortized cost (net of allowance for expected credit losses): Real estate loans \$347,742A \$200,381A Commercial loans1,583A 890A Total\$349,325A \$201,271A Fair value: Real estate loans\$347,727A \$197,354A Commercial loans1,583A 890A Totals\$349,310A \$198,244A The real estate loans are secured by commercial and residential real estate primarily located in the UK and New York. These loans generally earn interest at fixed or stepped interest rates and have maturities through 2026. The commercial loans are with small business owners who have secured the related financing with the assets of the business. Commercial loans primarily earn interest on a fixed basis and have varying maturities generally not exceeding 10 years. The following table presents the rollforward of the allowance for expected credit losses for loans receivable for the six months ended June 30, 2024 and 2023:15 2024/2023 (In thousands) Real Estate Loans Commercial Loans Total Real Estate Loans Commercial Loans Total Allowance for expected credit losses, beginning of period \$2,983A \$21A \$3,004A \$1,100A \$691A \$1,791A Change in expected credit losses (1,190) (1) (1,191) (2,558) 201A 2,759A Allowance for expected credit losses, end of period \$1,793A \$20A \$1,813A \$3,658A \$892A \$4,550A During the six months ended June 30, 2024, the Company decreased the allowance for expected credit losses due to a decrease in the weighted average life of the loan portfolio. During the six months ended June 30, 2023, the Company increased the allowance for expected credit losses due to changes in economic assumptions utilized in its credit loss model. The following table presents the rollforward of the allowance for expected credit losses for loans receivable for the three months ended June 30, 2024 and 2023:2024/2023 (In thousands) Real Estate Loans Commercial Loans Total Real Estate Loans Commercial Loans Total Allowance for expected credit losses, beginning of period \$2,587A \$22A \$2,609A \$1,039A \$570A \$1,609A Change in expected credit losses (794) (2) (796) 2,619A 322A 2,941A Allowance for expected credit losses, end of period \$1,793A \$20A \$1,813A \$3,658A \$892A \$4,550A The Company monitors the performance of its loans receivable and assesses the ability of the borrower to pay principal and interest based upon loan structure, underlying property values, cash flow and related financial and operating performance of the property and market conditions. A A A A In evaluating the real estate loans, the Company considers their credit quality indicators, including loan to value ratios, which compare the outstanding loan amount to the estimated value of the property, the borrower's financial condition and performance with respect to loan terms, the position in the capital structure, the overall leverage in the capital structure and other market conditions. 16 (13)A Net Investment (Losses) Gains A A A A Net investment (losses) gains were as follows: For the Three Months Ended June 30, For the Six Months Ended June 30, (In thousands) 2024/2023 2024/2023 Net investment (losses) gains A A A A Fixed maturity securities: A A Gains \$3,092A \$115A \$6,649A \$1,058A Losses (5,362) (3,640) (7,685) (21,770) Equity securities (1): Net realized gains on investment sales (2) 61,521A 111,072A 101,798A 112,132A Change in unrealized (losses) gains (66,717) 21,260A (40,905) 64,664A Investment funds 217A (98) 1,210A (88) Real estate (3) (1,958) (55,449) (4,174) (44,710) Loans receivable A A A A A A Other (4) (51,099) (4,613) (105,696) (20,028) Net realized and unrealized (losses) gains on investments in earnings before allowance for expected credit losses (60,306) 68,647A (48,803) 91,258A Change in allowance for expected credit losses on investments: Fixed maturity securities 998A (7,052) 14,879A (6,835) Loans receivable 796A (2,941) 1,191A (2,759) Change in allowance for expected credit losses on investments 1,794A (9,933) 16,070A (9,594) Net investment (losses) gains (58,512) 58,654A (32,733) 81,664A Income tax benefit 12,401A (12,587) 5,769A (17,437) After-tax net investment (losses) gains (46,111) (46,067A) (\$26,964) \$64,227A Change in unrealized investment (losses) gains on available for sale securities: A A A A Fixed maturity securities without allowance for expected credit losses (11,394) (\$148,021) (\$99,988) \$79,094A Fixed maturity securities with allowance for expected credit losses (7,683) 3,694A (6,696) 1,50A Investment funds (1,338) 462A (3,041) 2,398A Other (225) (178) (212) (664) Total change in unrealized investment (losses) gains (20,640) (144,043) (109,937) 87,978A Income tax benefit (expense) 7,302A 30,759A 26,477A (20,463) Noncontrolling interests 1A A A A (1) After-tax change in unrealized investment (losses) gains on available for sale securities (13,337) (\$13,284) (\$83,459) \$67,514A (1) The net realized gains or losses on investment sales represent the total gains or losses from the purchase dates of the equity securities. The change in unrealized (losses) gains consists of two components: (i) the reversal of the gain or loss recognized in previous periods on equity securities sold and (ii) the change in unrealized gain or loss resulting from mark-to-market adjustments on equity securities still held. (2) In June 2023, the Company completed a sale of the property and casualty insurance services division of Breckenridge IS, Inc. and recognized a pre-tax net realized gain on investment of \$88 million on the sale (proceeds from the sale is presented on the business disposition line within the Consolidated Statements of Cash Flows). (3) During the second quarter of 2023, the Company recognized an impairment loss of \$51 million on a real estate investment. (4) Primarily relates to realized foreign currency losses upon the disposition of fixed maturity securities. 17 (14)A Fixed Maturity Securities in an Unrealized Loss Position A A A A The following tables summarize all fixed maturity securities in an unrealized loss position at June 30, 2024 and December 31, 2023 by the length of time those securities have been continuously in an unrealized loss position: A A Less Than 12 Months 12 Months or Greater Total (In thousands) Fair Value Gross Unrealized Losses Fair Value Gross Unrealized Losses June 30, 2024 U.S. government and government agency \$422,945A \$3,391A \$795,297A \$51,081A \$1,218,242A \$54,472A State and municipal 357,529A 9,335A 1,758,572A 114,831A 2,116,101A 119,766A Mortgage-backed 530,802A 4,258A 1,356,573A 182,908A 1,887,375A 187,166A Asset-backed 947,780A 4,434A 1,079,695A 57,188A 2,027,475A 61,622A Corporate 2,068,015A 17,788A 4,333,968A 222,444A 6,401,983A 240,232A Foreign government 563,150A 15,565A 759,174A 178,120A 1,322,324A 193,685A Fixed maturity securities \$4,890,221A \$50,371A \$10,083,279A \$806,572A \$14,973,500A \$856,943A December 31, 2023 U.S. government and government agency \$384,392A \$6,655A \$1,014A \$999,015A \$57,669A State and municipal 264,273A 3,013A 1,680,034A 119,449A 1,944,307A 122,462A Mortgage-backed 278,819A 2,025A 1,360,748A 175,131A 1,639,567A 177,156A Asset-backed 413,511A 2,070A 2,176,035A 17,136A 2,589,546A 73,206A Corporate 874,754A 11,975A 4,418,309A 231,288A 5,293,063A 243,263A Foreign government 204,908A 1,758A 794,174A 135,661A 999,082A 137,419A Fixed maturity securities \$2,420,657A \$27,496A \$11,043,923A \$783,679A \$13,464,580A \$811,175A A A A A Substantially all of the securities in an unrealized loss position are rated investment grade, except for the securities in the foreign government classification. A A significant amount of the unrealized loss on foreign government securities is the result of changes in currency exchange rates. A A A A A summary of the Company's non-investment grade fixed maturity securities that were in an unrealized loss position at June 30, 2024 is presented in the table below: (\$ in thousands) Number of Securities Aggregate Fair Value Gross Unrealized Loss Foreign government 51A \$99,230A \$159,930A State and municipal 5A 24,865A 4,838A Corporate 30A 42,131A 2,651A Mortgage-backed 16A 4,107A 201A Total 102A \$170,333A \$167,620A A A A A For fixed maturity securities that management does not intend to sell or to be required to sell, the portion of the decline in value that is considered to be due to credit factors is recognized in earnings, and the portion of the decline in value that is considered to be due to non-credit factors is recognized in other comprehensive income (loss). A A A A The Company has evaluated its fixed maturity securities in an unrealized loss position and believes the unrealized losses are due primarily to temporary market and sector-related factors rather than to issuer-specific factors. None of these securities are delinquent or in default under financial covenants. Based on its assessment of these issuers, the Company expects them to continue to meet their contractual payment obligations as they become due. 18 (15) Fair Value Measurements A A A A The Company's fixed maturity available for sale securities, equity securities and its arbitrage trading account securities are carried at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A A The Company utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels, as follows: Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date. Level 2 - Quoted prices for similar assets or valuations based on inputs that are observable. Level 3 - Estimates of fair value based on internal pricing methodologies using unobservable inputs. Unobservable inputs are only used to measure fair value to the extent that observable inputs are not available. A A A A Substantially all of the Company's fixed maturity securities were priced by independent pricing services. The prices provided by the independent pricing services are estimated based on observable market data in active markets utilizing pricing models and processes, which may include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, sector groupings, matrix pricing and reference data. The pricing services may prioritize inputs differently on any given day for any security based on market conditions, and not all inputs are available for each security evaluation on any given day. The pricing services used by the Company have indicated that they will only produce an estimate of fair value if objectively verifiable information is available. The determination of whether markets are active or inactive is based upon the volume and level of activity for a particular asset class. The Company reviews the prices provided by pricing services for reasonableness and periodically performs independent price tests of a sample of securities to ensure proper valuation. A A A A If prices from independent pricing services are not available for fixed maturity securities, the Company estimates the fair value. For Level 2 securities, the Company utilizes pricing models and processes which may include benchmark yields, sector groupings, matrix pricing, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, bids, offers and reference data. Where broker quotes are used, the Company generally requests two or more quotes and sets a price within the range of quotes received based

reporting lags are likely to have less variation from initial loss estimates. For lines with short reporting lags, which include auto, primary workersâ€™ compensation, other liability (claims-made) and property business, the key assumption is the loss emergence pattern used to project ultimate loss estimates from known losses paid or reported to date. For lines of business with long reporting lags, which include other liability (occurrence), products liability, excess workersâ€™ compensation and liability reinsurance, the key assumption is the expected loss ratio since there is often little paid or incurred loss data to consider. Historically, the Company has experienced less variation from its initial loss estimates for lines of business with short reporting lags than for lines of business with long reporting lags. The key assumptions used in calculating the most recent estimate of the loss reserves are reviewed each quarter and adjusted, to the extent necessary, to reflect the latest reported loss data, current trends and other factors observed.

The table below provides a reconciliation of the beginning and ending reserve balances:

	June 30, (In thousands)	2024	2023																																																																																																																																																												
Net reserves at beginning of period	\$5,661,820	\$1,248,879	\$1,248,879																																																																																																																																																												
Net provision for losses and loss expenses	Claims occurring during the current year	(1)	(1)																																																																																																																																																												
1)	3,411,888	3,064,046	A Increase in estimates for claims occurring in prior years	(2)	(3)	314,700	28,853	A Loss reserve discount accretion	17,786	15,510	A Total	3,444,374	3,108,409	A Net payments for claims	Â€	Â€	Current year	383,639	375,365	Prior years	2,505,566	2,019,371	Total	2,589,205	2,394,736	Foreign currency translation	(56,143)	5,929	Net reserves at end of period	16,460,846	14,968,481	Ceded reserves at end of period	(106,344,291)	(51,515)	Gross reserves at end of period	19,567,190	17,919,996																																																																																																																										
Claims occurring during the current year are net of loss reserve discounts of \$26 million and \$22 million for the six months ended June 30, 2024 and 2023, respectively.	(2)	(2)	The change in estimates for claims occurring in prior years is net of loss reserve discount. On an undiscounted basis, the estimates for claims occurring in prior years increased by \$7 million and decreased by \$6 million for the six months ended June 30, 2024 and 2023, respectively.	(3)	(3)	For certain retrospectively rated insurance policies and reinsurance agreements, reserve development is offset by additional or return premiums. Favorable development, net of additional and return premiums, was \$2 million and adverse development was \$21 million for the six months ended June 30, 2024 and 2023, respectively.	The ultimate net impact of COVID-19 on the Company's reserves remains uncertain. As of June 30, 2024, the Company had recognized losses for COVID-19-related claims activity, net of reinsurance, of approximately \$388A million, of which \$329A million relates to the Insurance segment and \$59A million relates to the Reinsurance & Monoline Excess segment. Such \$388A million of COVID-19-related losses included \$385A million of reported losses and \$3A million of IBNR. During the six months ended June 30, 2024, favorable prior year development (net of additional and return premiums) of \$2A million included \$7A million for the Reinsurance & Monoline Excess segment partially offset by \$5 million of adverse prior year development for the Insurance segment. For the Insurance segment, the adverse development during the first half of 2024 was driven by commercial auto liability and other liability (mainly umbrella and excess liability), and was partially offset by favorable development for workers' compensation and professional liability. The adverse commercial auto liability development was concentrated in accident years 2020 through 2023. The other liability development was mainly driven by umbrella and excess liability claims, and was focused in accident years 2017 through 2021. A significant portion of the umbrella and excess liability development related to underlying commercial auto exposures. The Company believes that commercial auto-related claims are being particularly impacted by social inflation, which is contributing to an increase in the frequency of large losses beyond expectations. Social inflation can include higher settlement demands from plaintiffs, use of aggressive actions by the plaintiffs' bar such as litigation funding, negative public sentiment towards large businesses and corporations, and erosion of tort reforms, among other factors. The favorable workers' compensation development for the Insurance segment was mainly related to accident years 2016 through 2023, while the favorable professional liability development was mainly in accident years 2018 through 2022. For workers' compensation, favorable reported claim frequency, below expectations, continued to be the main driver of the favorable reserve development. For professional liability, reported loss experience for accident years 2018 through 2022 was better than expected, which drove the favorable reserve development. Accident years 2020 through 2022 also feature business written at peak pricing levels, which the Company now believes will result in higher profitability than initially anticipated. For the Reinsurance & Monoline Excess segment, the favorable development during the first half of 2024 was driven mainly by favorable development in excess workers' compensation, partially offset by adverse development in the non-proportional reinsurance assumed liability line of business. The favorable excess workers' compensation development was driven by continued lower claim frequency and reported losses relative to expectations, and to favorable claim settlements spread across many prior accident years. The unfavorable development for non-proportional reinsurance was concentrated mainly in accident years 2017 through 2019 and was associated primarily with our U.S. and U.K. excess general liability reinsurance businesses, including coverage for cedants insuring construction projects. During the six months ended June 30, 2023, adverse prior year development (net of additional and return premiums) of \$21 million included \$19 million for the Insurance segment and \$2 million for the Reinsurance & Monoline Excess segment. Overall adverse development was recognized during the first quarter of 2023 in both business segments due to property catastrophe losses related to 2022 events that were still being adjusted and settled. In particular, losses related to U.S. winter storms that occurred in December were a significant driver of the development, as information gathering and evaluation of these losses were still ongoing into the first quarter. As a result, prior year reserve development (net of additional and return premiums) overall was adverse by \$24A million in the first quarter, but was favorable by \$3A million during the second quarter of 2023. For the Insurance segment, in addition to the property prior year adverse development discussed above, the adverse development during the six months ended June 30, 2023 included adverse prior year development on casualty lines for the 2016 through 2019 accident years, which was largely offset by favorable prior year development on casualty lines for the 2021 and 2022 accident years. The adverse development on the 2016 through 2019 accident years was concentrated in the other liability line of business, and to a lesser degree, professional liability, including medical professional. The development, which particularly impacted business attaching excess of primary policy limits, was driven by a larger than expected number of large losses reported. The Company believes social inflation is contributing to an increase in the frequency of large losses for these accident years. Social inflation can include higher settlement demands from plaintiffs, use of tactics such as litigation funding by the plaintiffs' bar, negative public sentiment towards large businesses and corporations, and erosion of tort reforms, among others. The favorable prior year development on casualty lines for the 2021 and 2022 accident years in the Insurance segment was concentrated in the professional liability, workers' compensation, and other liability lines of business, partially offset by adverse development in commercial auto liability. Due to uncertainty regarding incurred loss frequency and severity in light of ongoing social inflation and the impacts of the COVID-19 pandemic, the Company set its initial loss ratios for the 2021 and 2022 accident years prudently, and largely maintained these estimates through the end of each respective accident year. The reported loss experience for these lines of business for the 2021 and 2022 accident years has been better than was expected, and the Company has begun to react to this favorable emergence as the accident years mature beyond 12 months. Commercial auto liability experienced adverse prior year development during the six months ended June 30, 2023 for the 2021 accident year, which was driven by a larger than expected number of large losses reported. For the Reinsurance & Monoline Excess segment, the adverse development during the six months ended June 30, 2023 was driven mainly by adverse development in property (discussed above) and non-proportional reinsurance assumed liability lines of business, largely offset by favorable development in excess workers' compensation. The favorable excess workers' compensation development was driven by continued lower claim frequency and reported losses relative to our expectations, and to favorable claim settlements. The favorable development was spread across many prior accident years. The adverse development on reinsurance assumed liability was associated primarily with our U.S. assumed reinsurance business, and related to accounts reinsuring excess and umbrella business and construction projects. The adverse development was concentrated mainly in accident years 2017 through 2020.	24	(17)	A Fair Value of Financial Instruments	Â€	Â€	The following table presents the carrying amounts and estimated fair values of the Company's financial instruments:	Â€	Â€	June 30,	2024	December 31,	2023	(In thousands)	Carrying Amount	Fair Value	Carrying Amount	Fair Value	Assets:	Fixed maturity securities	21,082,676	Â€	21,084,502	Â€	20,178,308	Â€	20,181,547	Â€	Equity securities	1,078,092	Â€	1,078,092	Â€	1,090,347	Â€	1,090,347	Â€	Arbitrage trading account	1,221,861	Â€	1,221,861	Â€	938,049	Â€	938,049	Â€	Loans receivable	349,325	Â€	349,310	Â€	271	Â€	198,244	Â€	Cash and cash equivalents	1,580,270	Â€	1,580,270	Â€	1,363,195	Â€	1,363,195	Â€	Trading account receivables from brokers and clearing organizations	40,705	Â€	40,705	Â€	303,614	Â€	303,614	Â€	Â€	Â€	Â€	Due from broker	Â€	Â€	Â€	Â€	36,747	Â€	36,747	Â€	Liabilities:	Due to broker	128,563	Â€	128,563	Â€	Â€	Â€	Trading account securities sold but not yet purchased	81,273	Â€	81,273	Â€	9,357	Â€	9,357	Â€	Senior notes and other debt	1,828,422	Â€	1,422,506	Â€	1,827,951	Â€	1,480,076	Â€	Subordinated debentures	1,009,449	Â€	825,344	Â€	1,009,090	Â€	929,598	Â€	Â€	Â€	Â€	Â€	The estimated fair values of the Company's fixed maturity securities, equity securities and arbitrage trading account securities are based on various valuation techniques that rely on fair value measurements as described in Note 15. The fair value of loans receivable are estimated by using current institutional purchaser yield requirements for loans with similar credit characteristics, which is considered a Level 2 input. The fair value of the senior notes and other debt and the subordinated debentures is based on spreads for similar securities, which is considered a Level 2 input.	(18)	(18)	A Premiums and Reinsurance Related Information	The following is a summary of insurance and reinsurance financial information: For the Three Months Ended June 30, For the Six Months Ended June 30, (In thousands)	2024	2023	Written premiums:	Direct\$3,380,470	\$2,985,563	\$6,419,537	\$5,724,317	Assumed\$37,302	351,210	\$60,991	661,773	Ceded\$(590,993)	(525,258)	(1,102,458)	(999,751)	Total net premiums written\$3,126,779	\$2,811,515	\$5,978,070	\$5,386,339	Earned premiums:	Direct\$3,048,872	\$2,725,650	\$5,985,516	\$5,

(1) Certain amounts included in earned

of uncertainty and greater variability regarding estimates of excess workers' compensation and assumed reinsurance loss reserves, which predominantly comprise these reserves. In the case of excess workersâ€™ compensation, our policies generally attach at \$1 million or higher. The claims which reach our layer therefore tend to involve the most serious injuries and many remain open for the lifetime of the claimant, which extends the claim settlement tail. These claims also occur less frequently but tend to be larger than primary claims, which increases claim variability. In the case of assumed reinsurance our loss reserve estimates are based, in part, upon information received from ceding companies. If information received from ceding companies is not timely or correct, the Companyâ€™s estimate of ultimate losses may not be accurate. Furthermore, due to delayed reporting of claim information by ceding companies, the claim settlement tail for assumed reinsurance is also extended. Management considers the impact of delayed reporting and the extended tail in its selection of loss development factors for these lines of business.Â Â Â Â Information received from ceding companies is used to set initial expected loss ratios, to establish case reserves and to estimate reserves for incurred but not reported losses on assumed reinsurance business. This information, which is generally provided through reinsurance intermediaries, is gathered through the underwriting process and from periodic claim reports and other correspondence with ceding companies. The Company performs underwriting and claim audits of selected ceding 33 companies to determine the accuracy and completeness of information provided to the Company. The information received from the ceding companies is supplemented by the Companyâ€™s own loss development experience with similar lines of business as well as industry loss trends and loss development benchmarks.Â Â Â Â Following is a summary of the Companyâ€™s reserves for losses and loss expenses by business segment:(In thousands)June 30,2024December 31,2023Insurance\$13,179,601Â \$12,430,202Reinsurance & Monoline Excess\$3,281,245Â \$3,231,618Â Net reserves for losses and loss expenses16,460,846Â \$15,661,820Â Ceded reserves for losses and loss expenses\$3,106,344Â \$3,077,832Â Gross reserves for losses and loss expenses\$19,567,190Â \$18,739,652Â Â Â Â Following is a summary of the Companyâ€™s net reserves for losses and loss expenses by major line of business:(In thousands)ReportedCaseReservesIncurredButNotReportedTotalJune 30, 2024Other liability\$2,014,203Â \$4,899,611Â \$6,913,814Professional liability608,694Â 1,433,033Â 2,041,727Workersâ€™ compensation(1)1,031,963Â 789,452Â 1,821,415Auto670,434Â 840,670Â 1,511,104Short-tail lines(2)372,994Â 518,547Â 891,541Total Insurance4,698,288Â \$4,881,313Â \$13,179,601Reinsurance & Monoline Excess(1)(3)1,644,683Â 6,336,562Â \$3,281,245Totals\$6,342,971Â \$10,117,875Â \$16,460,846December 31, 2023Other liability\$1,912,594Â \$4,607,507Â \$6,520,101Professional liability527,555Â 1,438,102Â 1,965,657Workersâ€™ compensation(1)1,019,445Â 790,944Â 1,810,389Auto645,707Â 700,850Â 1,346,557Short-tail lines(2)375,129Â 412,369Â 787,498Total Insurance4,480,430Â \$7,949,772Â \$12,430,202Reinsurance & Monoline Excess(1)(3)1,673,581Â 1,558,037Â \$3,231,618Totals\$6,154,011Â \$9,507,809Â \$15,661,820Â (1) Reserves for workersâ€™ compensation and Reinsurance & Monoline Excess are net of an aggregate net discount of \$390 million as of both JuneÂ 30, 2024 and DecemberÂ 31, 2023.(2) Short-tail lines include commercial multi-peril (non-liability), inland marine, accident and health, fidelity and surety, boiler and machinery, high net worth homeowners and other lines.(3) Reinsurance & Monoline Excess includes property and casualty reinsurance, as well as operations that solely retain risk on an excess basis and certain program management business.Â Â Â Â The Company evaluates reserves for losses and loss adjustment expenses on a quarterly basis. Changes in estimates of prior year losses are reported when such changes are made. The changes in prior year loss reserve estimates are generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims and aggregate claim trends.Â Â Â Â Certain of the Company's insurance and reinsurance contracts are retrospectively rated, whereby the Company collects more or less premiums based on the level of loss activity. For those contracts, changes in loss and loss adjustment expenses for prior years may be fully or partially offset by additional or return premiums.34Â Â Â Â Net prior year development (i.e., the sum of prior year reserve changes and prior year earned premiums changes) for the six months ended June 30, 2024 and 2023 are as follows:(In thousands)20242023Increase in prior year loss reserves\$(14,700)\$(28,853)Increase in prior year earned premiums16,373Â 8,055Net favorable (unfavorable) prior year development\$1,673Â \$(20,798)The ultimate net impact of COVID-19 on the Companyâ€™s reserves remains uncertain. As of JuneÂ 30, 2024, the Company had recognized losses for COVID-19-related claims activity, net of reinsurance, of approximately \$388Â million, of which \$329Â million relates to the Insurance segment and \$59Â million relates to the Reinsurance & Monoline Excess segment. Such \$388Â million of COVID-19-related losses included \$385 million of reported losses and \$3 million of IBNR. During the six months ended June 30, 2024, favorable prior year development (net of additional and return premiums) of \$2 million included \$7 million for the Reinsurance & Monoline Excess segment partially offset by \$5 million of adverse prior year development for the Insurance segment.For the Insurance segment, the adverse development during the first half of 2024 was driven by commercial auto liability and other liability (mainly umbrella and excess liability), and was partially offset by favorable development for workersâ€™ compensation and professional liability. The adverse commercial auto liability development was concentrated in accident years 2020 through 2023. The other liability development was mainly driven by umbrella and excess liability claims, and was focused in accident years 2017 through 2021. A significant portion of the umbrella and excess liability development related to underlying commercial auto exposures. The Company believes that commercial auto-related claims are being particularly impacted by social inflation, which is contributing to an increase in the frequency of large losses beyond expectations. Social inflation can include higher settlement demands from plaintiffs, use of aggressive actions by the plaintiffsâ€™ bar such as litigation funding, negative public sentiment towards large businesses and corporations, and erosion of tort reforms, among other factors. The favorable workersâ€™ compensation development for the Insurance segment was mainly related to accident years 2016 through 2023, while the favorable professional liability development was mainly in accident years 2018 through 2022. For workersâ€™ compensation, favorable reported claim frequency, below expectations, continued to be the main driver of the favorable reserve development. For professional liability, reported loss experience for accident years 2018 through 2022 was better than expected, which drove the favorable reserve development. Accident years 2020 through 2022 also feature business written at peak pricing levels, which the Company now believes will result in higher profitability than initially anticipated.For the Reinsurance & Monoline Excess segment, the favorable development during the first half of 2024 was driven mainly by favorable development in excess workersâ€™ compensation, partially offset by adverse development in the non-proportional reinsurance assumed liability line of business. The favorable excess workersâ€™ compensation development was driven by continued lower claim frequency and reported losses relative to expectations, and to favorable claim settlements spread across many prior accident years. The unfavorable development for non-proportional reinsurance was concentrated mainly in accident years 2017 through 2019 and was associated primarily with our U.S. and U.K. excess general liability reinsurance businesses, including coverage for cedants insuring construction projects. During the six months ended June 30, 2023, adverse prior year development (net of additional and return premiums) of \$21 million included \$19 million for the Insurance segment and \$2 million for the Reinsurance & Monoline Excess segment.Overall adverse development was recognized during the first quarter of 2023 in both business segments due to property catastrophe losses related to 2022 events that were still being adjusted and settled. In particular, losses related to U.S. winter storms that occurred in December were a significant driver of the development, as information gathering and evaluation of these losses were still ongoing into the first quarter. As a result, prior year reserve development (net of additional and return premiums) overall was adverse by \$24 million in the first quarter, but was favorable by \$3 million during the second quarter of 2023.For the Insurance segment, in addition to the property prior year adverse development discussed above, the adverse development during the six months ended June 30, 2023 included adverse prior year development on casualty lines for the 2016 through 2019 accident years, which was largely offset by favorable prior year development on casualty lines for the 2021 and 2022 accident years. The adverse development on the 2016 through 2019 accident years was concentrated in the other liability line of business, and to a lesser degree, professional liability, including medical professional. The development, which particularly impacted business attaching excess of primary policy limits, was driven by a larger than expected number of large losses reported. The Company believes social inflation is contributing to an increase in the frequency of large losses for these accident years. Social inflation can include higher settlement demands from plaintiffs, use of tactics such as litigation funding 35 by the plaintiffsâ€™ bar, negative public sentiment towards large businesses and corporations, and erosion of tort reforms, among others. The favorable prior year development on casualty lines for the 2021 and 2022 accident years in the Insurance segment was concentrated in the professional liability, workersâ€™ compensation, and other liability lines of business, partially offset by adverse development in commercial auto liability. Due to uncertainty regarding incurred loss frequency and severity in light of ongoing social inflation and the impacts of the COVID-19 pandemic, the Company set its initial loss ratios for the 2021 and 2022 accident years prudently, and largely maintained these estimates through the end of each respective accident year. The reported loss experience for these lines of business for the 2021 and 2022 accident years has been better than was expected, and the Company has begun to react to this favorable emergence as the accident years mature beyond 12 months. Commercial auto liability experienced adverse prior year development during the six months ended June 30, 2023 for the 2021 accident year, which was driven by a larger than expected number of large losses reported. For the Reinsurance & Monoline Excess segment, the adverse development during the six months ended June 30, 2023 was driven mainly by adverse development in property (discussed above) and non-proportional reinsurance assumed liability lines of business, largely offset by favorable development in excess workers' compensation. The favorable excess workersâ€™ compensation development was driven by continued lower claim frequency and reported losses relative to our expectations, and to favorable claim settlements. The favorable development was spread across many prior accident years. The adverse development on reinsurance assumed liability was associated primarily with our U.S. assumed reinsurance business, and related to accounts reinsuring excess and umbrella business and construction projects. The adverse development was concentrated mainly in accident years 2017 through 2020.Reserve Discount. The Company discounts its liabilities for certain workersâ€™ compensation reserves. The amount of workersâ€™ compensation reserves that were discounted was \$1,324 million and \$1,352 million at JuneÂ 30, 2024 and DecemberÂ 31, 2023, respectively. The aggregate net discount for those reserves, after reflecting the effects of ceded reinsurance, was \$390 million at both JuneÂ 30, 2024 and DecemberÂ 31, 2023. At JuneÂ 30, 2024, discount rates by year ranged from 0.7% to 6.5%, with a weighted average discount rate of 3.5%.Â Â Â Â Substantially all of the workersâ€™ compensation discount (97% of total discounted reserves at JuneÂ 30, 2024) relates to excess workersâ€™ compensation reserves. In order to properly match loss expenses with income earned on investment securities supporting the liabilities, reserves for excess workersâ€™ compensation business are discounted using risk-free discount rates determined by reference to the U.S. Treasury yield curve. These rates are determined annually based on the weighted average rate for the period. Once established, no adjustments are made to the discount rate for that period, and any increases or decreases in loss reserves in subsequent years are discounted at the same rate, without regard to when any such adjustments are recognized. The expected loss and loss expense payout patterns subject to discounting are derived from the Companyâ€™s loss payout experience.Â Â Â Â The Company also discounts reserves for certain other long-duration workersâ€™ compensation reserves (representing approximately 3% of total discounted reserves at JuneÂ 30, 2024), including reserves for quota share reinsurance and reserves related to losses regarding occupational lung disease. These reserves are discounted at statutory rates permitted by the Department of Insurance of the State of Delaware.Â Â Â Â Assumed Reinsurance Premiums. The Company estimates the amount of assumed reinsurance premiums that it will receive under treaty reinsurance agreements at the inception of the contracts. These premium estimates are revised as the actual amount of assumed premiums is reported to the Company by the ceding companies. As estimates of assumed premiums are made or revised, the related amount of earned premiums, commissions and incurred losses associated with those premiums are recorded. Estimated assumed premiums receivable were approximately \$66 million at JuneÂ 30, 2024 and \$65 million at DecemberÂ 31, 2023. The assumed premium estimates are based upon terms set forth in reinsurance agreements, information received from ceding companies during the underwriting and negotiation of agreements, reports received from ceding companies and discussions and correspondence with reinsurance intermediaries. The Company also considers its own view of market conditions, economic trends and experience with similar lines of business. These premium estimates represent managementâ€™s best estimate of the ultimate amount of premiums to be received under its assumed reinsurance agreements.Â Â Â Â Allowance for Expected Credit Losses on Investments.Â Â Â Â Fixed Maturity Securities â€œ For fixed maturity securities in an unrealized loss position where the Company intends to sell, or it is more likely than not that it will be required to sell the security before recovery in value, the amortized cost basis is written down to fair value through net investment gains (losses). For fixed maturity securities in an unrealized loss position where the Company does not intend to sell, or it is more likely than not that it will not be required to sell the security before recovery in value, the Company evaluates whether the decline in fair value has resulted from credit losses or all other factors (non-credit factors). In making this assessment, the Company considers the extent to which fair value is less than amortized 36 cost, changes to the rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. If this assessment indicates that a credit loss exists, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, an allowance for expected credit losses is recorded for the credit loss through net investment gains (losses), limited by the amount that the fair value is less than the amortized cost basis. The allowance is adjusted for any change in expected credit losses and subsequent recoveries through net investment gains (losses).Â Â Â Â The impairment related to non-credit factors is recognized in other comprehensive income (loss).Â Â Â Â The Companyâ€™s credit assessment of allowance for expected credit losses uses a third party model for available for sale and held to maturity securities, as well as loans receivable. The allowance for expected credit losses is generally based on the performance of the underlying collateral under various economic and default scenarios that involve subjective judgments and estimates by management. Modeling these securities involves various factors, such as projected default rates, the nature and realizable value of the collateral, if any, the ability of the issuer to make scheduled payments, historical performance and other relevant economic and performance factors. A discounted cash flow analysis is used to ascertain the amount of the allowance for expected credit losses, if any.Â Â In general, the model reverts to the rating-level long-term average marginal default rates based on 10 years of historical data, beyond the forecast period. For other inputs, the model in most cases reverts to the baseline long-term assumptions linearly over 5 years beyond the forecast period. The long-term assumptions are based on the historical averages.Â Â Â Â The Company classifies its fixed maturity securities by credit rating, primarily based on ratings assigned by credit rating agencies. For purposes of classifying securities with different ratings, the Company uses the average of the credit ratings assigned, unless in limited situations the Companyâ€™s own analysis indicates an internal rating is more appropriate. Securities that are not rated by a rating agency are evaluated and classified by the Company on a case-by-case basis.Â Â Â Â Summary of the Companyâ€™s non-investment grade fixed maturity securities that were in an unrealized loss position at JuneÂ 30, 2024 is presented in the table below: (\$ in thousands)Number of SecuritiesAggregateFair ValueÂ Gross Unrealized LossForeign government51Â \$99,230Â \$159,930State and municipal54,28654,838Corporate30Â 42,1312,651Mortgage-backed16Â 4,1074,101Total102Â \$170,333Â \$167,620Â Â Â Â As of JuneÂ 30, 2024, the Company has recorded an allowance for expected credit losses on fixed maturity securities of \$22 million. The Company has evaluated the remaining fixed maturity securities in an unrealized loss position and believes the unrealized losses are due primarily to temporary market and sector-related factors rather than to issuer-specific factors. None of these securities are delinquent or in default under financial covenants. Based on its assessment of these issuers, the Company expects them to continue to meet their contractual payment obligations as they become due. Loans Receivable â€œ For loans receivable, the Company estimates an allowance for expected credit losses based on relevant information about past events, including historical loss experience, current conditions and forecasts that affect the expected collectability of the amortized cost of the financial asset.Â The allowance for expected credit losses is presented as a reduction to amortized cost of the financial asset in the consolidated balance sheet and changes to the estimate for expected credit losses are recognized through net investment gains (losses). Loans receivable are reported net of an allowance for expected credit losses of \$3Â million as of both JuneÂ 30, 2024 and DecemberÂ 31, 2023.Â Â Â Â Fair Value Measurements. The Companyâ€™s fixed maturity available for sale securities, equity securities, and its arbitrage trading account securities are carried at fair value. Fair value is defined as â€œthe price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.â€ The Company utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for similar assets in active markets. Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs may only be used to measure fair value to the extent that observable inputs are not available. The fair value of the vast majority of the Companyâ€™s portfolio is based on observable data (other than quoted prices) and, accordingly, is classified as Level 2.37Â Â Â Â In classifying particular financial securities in the fair value hierarchy, the Company uses its judgment to determine whether the market for a security is active and whether significant pricing inputs are observable. The Company determines the existence

of an active market by assessing whether transactions occur with sufficient frequency and volume to provide reliable pricing information. The Company determines whether inputs are observable based on the use of such information by pricing services and external investment managers, the uninterrupted availability of such inputs, the need to make significant adjustments to such inputs and the volatility of such inputs over time. If the market for a security is determined to be inactive or if significant inputs used to price a security are determined to be unobservable, the security is categorized in Level 3 of the fair value hierarchy. Because many fixed maturity securities do not trade on a daily basis, the Company utilizes pricing models and processes which may include benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Market inputs used to evaluate securities include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data. Quoted prices are often unavailable for recently issued securities that are infrequently traded or securities that are only traded in private transactions. For publicly traded securities for which quoted prices are unavailable, the Company determines fair value based on independent broker quotations and other observable market data. For securities traded only in private negotiations, the Company determines fair value based primarily on the cost of such securities, which is adjusted to reflect prices of recent placements of securities of the same issuer, financial data, projections and business developments of the issuer and other relevant information. The following is a summary of pricing sources for the Company's fixed maturity securities available for sale as of June 30, 2024: (\$ in thousands) Carrying Value Percent of Total Pricing source: Independent pricing services \$20,530,775 97.6% Syndicate manager 108,796 0.5% Directly by the Company based on: Observable data 399,541 1.9% Total \$21,039,112 100.0% An independent pricing services Substantially all of the Company's fixed maturity securities available for sale were priced by independent pricing services (generally one U.S. pricing service plus additional pricing services with respect to a limited number of foreign securities held by the Company). The prices provided by the independent pricing services are generally based on observable market data in active markets (e.g., broker quotes and prices observed for comparable securities). The determination of whether markets are active or inactive is based upon the volume and level of activity for a particular asset class. The Company reviews the prices provided by pricing services for reasonableness based upon current trading levels for similar securities. If the prices appear unusual to the Company, they are re-examined and the value is either confirmed or revised. In addition, the Company periodically performs independent price tests of a sample of securities to ensure proper valuation and to verify our understanding of how securities are priced. As of June 30, 2024, the Company did not make any adjustments to the prices provided by the pricing services. Based upon the Company's review of the methodologies used by the independent pricing services, these securities were classified as Level 2. The Company has a 15% participation in a Lloyd's syndicate, and the Company's share of the securities owned by the syndicate is priced by the syndicate's manager. The majority of the securities are liquid, short duration fixed maturity securities. The Company reviews the syndicate manager's pricing methodology and audited financial statements and holds discussions with the syndicate manager as necessary to confirm its understanding and agreement with security prices. Based upon the Company's review of the methodologies used by the syndicate manager, these securities were classified as Level 2. Observable data If independent pricing is not available, the Company prices the securities directly. Prices are based on observable market data where available, including current trading levels for similar securities and non-binding quotations from brokers. The Company generally requests two or more quotes. If more than one quote is received, the Company sets a price within the range of quotes received based on its assessment of the credibility of the quote and its own evaluation of the security. The Company generally does not adjust quotes obtained from brokers. Since these securities were priced based on observable data, they were classified as Level 2. A Cash flow model If the above methodologies are not available, the Company prices securities using a discounted cash flow model based upon assumptions as to prevailing credit spreads, interest rates and interest rate volatility, time to 38 maturity and subordination levels. Discount rates are adjusted to reflect illiquidity where appropriate. These securities were classified as Level 3. Results of Operations for the Six Months Ended June 30, 2024 and 2023 Business Segment Results Following is a summary of gross and net premiums written, net premiums earned, loss ratios (losses and loss expenses incurred expressed as a percentage of net premiums earned), expense ratios (underwriting expenses expressed as a percentage of net premiums earned) and GAAP combined ratios (sum of loss ratio and expense ratio) for each of our business segments for the six months ended June 30, 2024 and 2023. The GAAP combined ratio represents a measure of underwriting profitability, excluding investment income. A GAAP combined ratio in excess of 100 indicates an underwriting loss; a number below 100 indicates an underwriting profit. (In thousands) 2024 2023 Insurance: Gross premiums written \$6,281,900 \$5,620,406 Net premiums written \$5,256,163 \$4,691,277 Net premiums earned \$4,883,338 \$4,358,110 Loss ratio 62.9% 62.8% Expense ratio 28.4% 28.3% GAAP combined ratio 91.3% 91.1% Reinsurance & Monoline Excess: Gross premiums written \$798,624 \$765,685 Net premiums written \$721,907 \$695,062 Net premiums earned \$727,424 \$686,049 Loss ratio 51.3% 53.9% Expense ratio 29.4% 30.1% GAAP combined ratio 80.7% 84.0% Consolidated: Gross premiums written \$7,080,528 \$6,386,091 Net premiums written \$5,978,070 \$5,386,339 Net premiums earned \$5,610,762 \$5,044,159 Loss ratio 61.4% 61.6% Expense ratio 28.6% 28.5% GAAP combined ratio 90.0% 90.1% A Net Income to Common Stockholders. The following table presents the Company's net income to common stockholders and net income per diluted share for the six months ended June 30, 2024 and 2023: (In thousands, except per share data) 2024 2023 Net income to common stockholders \$814,380 \$650,434 Weighted average diluted shares 404,679 412,819 Net income per diluted share \$2.01 \$1.58 A The Company reported net income to common stockholders of \$814 million in 2024 compared to \$650 million in 2023. The \$164 million increase in net income was primarily due to an after-tax increase in net investment income of \$171 million mainly due to higher interest rates, a larger fixed maturity securities portfolio and investment income associated with our Argentine inflation-linked securities, an after-tax increase in underwriting income of \$49 million due to growth in premium rates, an after-tax increase in foreign currency gains of \$34 million mainly due to the strengthening of the U.S. dollar against other currencies in 2024, an after-tax reduction in corporate expenses of \$6 million, an after-tax increase in profits from non-insurance businesses of \$4 million and an after-tax increase in minority interest of \$2 million, partially offset by an after-tax reduction in net investment gains of \$88 million mainly due to the foreign currency losses from Argentine peso-denominated investments and reversal of prior unrealized gains on equity securities, an increase of \$13 million in tax expense due to a change in the effective tax rate and an after-tax reduction in profit from insurance service businesses of \$1 million. The number of weighted average diluted shares decreased 8.1 million for 2024 compared to 2023, mainly reflecting shares repurchased in 2024 and 2023. A Premiums. Gross premiums written were \$7,081 million in 2024, an increase of 11% from \$6,386 million in 2023. The increase was due to a \$662 million increase in the Insurance segment and a \$33 million increase in the Reinsurance & Monoline 40 Excess segment. Approximately 81% of premiums expiring in 2024 were renewed, and 80% of premiums expiring in 2023 were renewed. A Average renewal rates (per unit of exposure) for insurance and facultative reinsurance increased 6.9% in 2024, and increased 7.9% excluding workers' compensation. A A summary of gross premiums written in 2024 compared with 2023 by line of business within each business segment follows: Insurance - gross premiums increased 12% to \$6,282 million in 2024 from \$5,620 million in 2023. Gross premiums increased \$299 million (14%) for other liability, \$262 million (19%) for short-tail lines, \$112 million (17%) for auto and \$1 million (less than 1%) for workers' compensation, partially offset by a reduction of \$12 million (2%) for professional liability. Reinsurance & Monoline Excess - gross premiums increased 4% to \$799 million in 2024 from \$766 million in 2023. Gross premiums increased \$44 million (22%) for property and \$15 million (10%) for monoline excess, partially offset by a reduction of \$26 million (6%) for casualty. A Net premiums written were \$5,978 million in 2024, an increase of 11% from \$5,386 million in 2023. Ceded reinsurance premiums as a percentage of gross written premiums were 16% in both 2024 and 2023. A Premiums earned increased 11% to \$5,611 million in 2024 from \$5,044 million in 2023. Insurance premiums (including the impact of rate changes) are generally earned evenly over the policy term, and accordingly, recent rate increases will be earned over the upcoming quarters. Premiums earned in 2024 are related to business written during both 2024 and 2023. Audit premiums were \$184 million in 2024 compared with \$183 million in 2023. A Net Investment Income. Following is a summary of net investment income for the six months ended June 30, 2024 and 2023: Amount Average Annualized Yield (\$ in thousands) 2024 2023 2024 2023 Fixed maturity securities, including cash and cash equivalents and loans receivables \$659,384 \$413,473 5.7% 4.0% Arbitrage trading account 34,693 35,293 5.7 5.9 Equity securities 23,712 29,000 4.8 5.1 Investment funds (3,873) 993 (0.5) 1.0 Real estate (16,868) (5,834) (2.7) (0.9) Gross investment income 697,057 472,925 4.9 4.3 Investment expenses (5,090) (4,374) 4.8 4.3 Total \$691,967 \$468,551 4.9 4.3 A Net investment income increased 48% to \$692 million in 2024 from \$469 million in 2023 due primarily to a \$246 million increase in income from fixed maturity securities mainly driven by higher interest rates, a larger fixed maturity securities portfolio and our Argentine inflation-linked securities which is not expected to continue at this level (see below for further discussion), partially offset by an \$11 million decrease in real estate, a \$5 million decrease in income from investment funds, a \$5 million decrease in equity securities, a \$1 million decrease from arbitrage trading account and a \$1 million increase in investment expenses. The Company expects investment income to benefit as it continues to invest maturing securities at the current higher rates. The Company maintained the shortened duration of its fixed maturity security portfolio, with a small increase in average duration from 2.4 to 2.5 years, thereby reducing the potential impact of mark-to-market on the portfolio and positioning the Company to react quickly to changes in the current interest rate environment. Average invested assets, at cost (including cash and cash equivalents), were \$28.2 billion in 2024 up 9.2% from \$25.8 billion in 2023. Pre-tax net investment income associated with the Argentine inflation-linked securities for the six months ended June 30, 2024 was \$159 million. Such investment income increased as a result of an adjustment to the inflation rate that was made by the Argentine government in late 2023. As certain of our Argentine bonds matured and were sold in the first six months of 2024 and the inflation rate has continued to decline, we do not expect investment income relating to these securities to continue at this level. The proceeds from the Argentine inflation-linked securities that matured and were sold in the first six months of 2024 have been reinvested. A Insurance Service Fees. The Company earns fees from an insurance distribution business (part of which was sold in June 2023), a third-party administrator and as a servicing carrier of workers' compensation assigned risk plans for certain states. Insurance service fees were \$53 million in 2024 and \$58 million in 2023. The decrease in service fees resulted from the sale of the property and casualty insurance services division of Breckenridge IS, Inc. A Net Realized and Unrealized (Losses) Gains on Investments. The Company buys and sells securities and other investment assets on a regular basis in order to maximize its total return on investments. Decisions to sell securities and other investment assets are based on management's view of the underlying fundamentals of specific investments as well as management's expectations regarding interest rates, credit spreads, currency values and general economic conditions. Net realized and unrealized losses on investments were \$49 million in 2024 compared with net gains of \$91 million in 2023. The losses of \$49 million in 2024 reflected an increase in unrealized losses on equity securities of \$41 million and net realized losses on investments of \$8 million. The gains of \$91 million in 2023 reflected net realized gains on investments of \$26 million (primarily a pre-tax net realized gain of \$88 million on the sale of the property and casualty insurance services division of Breckenridge IS, Inc., partially offset by an impairment of \$51 million recognized on a real estate investment) and an increase in unrealized gains on equity securities of \$65 million. Change in Allowance for Expected Credit Losses on Investments. Based on credit factors, the allowance for expected credit losses is increased or decreased depending on the percentage of unrealized loss relative to amortized cost by security, changes in rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. The pre-tax change in allowance for expected credit losses on investments decreased by \$16 million (\$13 million after-tax) and increased by \$10 million (\$8 million after-tax) in 2024 and 2023, respectively, which are both reflected in net investment gains, primarily due to a change in estimate. Revenues from Non-Insurance Businesses. Revenues from non-insurance businesses were derived from businesses engaged in the distribution of promotional merchandise, world-wide textile solutions and aviation-related businesses that provide services to aviation markets, including (i) the distribution, manufacturing, repair and overhaul of aircraft parts and components, (ii) the sale of new and used aircraft, and (iii) avionics, fuel, maintenance, storage and charter services. Revenues from non-insurance businesses were \$247 million in 2024 and \$238 million in 2023. The increase mainly relates to aviation-related business and commercial and residential textile business, partially offset by the decrease from promotional merchandise business. A Losses and Loss Expenses. Losses and loss expenses increased to \$3,444 million in 2024 from \$3,108 million in 2023. The consolidated loss ratio was 61.4% in 2024 and 61.6% in 2023. Catastrophe losses, net of reinsurance recoveries, were \$120 million in 2024 and \$101 million in 2023. Favorable prior year reserve development (net of premium offsets) was \$2 million in 2024 and adverse prior year reserve development was \$21 million in 2023. The loss ratio excluding catastrophe losses and prior year reserve development increased 0.1 points to 59.3% in 2024 from 59.2% in 2023. A A summary of loss ratios in 2024 compared with 2023 by business segment follows: Insurance - The loss ratio was 62.9% in 2024 and 62.8% in 2023. Catastrophe losses were \$114 million in 2024 compared with \$93 million in 2023. Adverse prior year reserve development was \$6 million in 2024 and \$19 million in 2023. The loss ratio excluding catastrophe losses and prior year reserve development increased 0.1 points to 60.4% in 2024 from 60.3% in 2023. Reinsurance & Monoline Excess - The loss ratio was 51.3% in 2024 and 53.9% in 2023. Catastrophe losses were \$6 million in 2024 compared with \$8 million in 2023. Favorable prior year reserve development was \$8 million in 2024 and adverse prior year reserve development was \$2 million in 2023. The loss ratio excluding catastrophe losses and prior year reserve development decreased 0.9 points to 51.5% in 2024 from 52.4% in 2023. Other Operating Costs and Expenses. Following is a summary of other operating costs and expenses for the six months ended June 30, 2024 and 2023: (\$ in thousands) 2024 2023 Policy acquisition and insurance operating expenses \$1,603,529 \$1,436,510 Insurance service expenses 44,523 49,111 Net foreign currency (gains) losses (23,295) 721 Other costs and expenses 136,767 142,913 Total \$1,761,524 \$1,649,255 4 A A Policy acquisition and insurance operating expenses are comprised of commissions paid to agents and brokers, premium taxes and other assessments and internal underwriting costs. Policy acquisition and insurance operating expenses increased 12% and net premiums earned increased 11% from 2023. The expense ratio (underwriting expenses expressed as a percentage of net premiums earned) increased 0.1 points to 28.6% in 2024 from 28.5% in 2023. A A Service expenses, which represent the costs associated with the fee-based businesses, was \$45 million in 2024, down from \$49 million in 2023, as a result of the sale of the property and casualty insurance services division of Breckenridge IS, Inc. A Net foreign currency (gains) losses result from transactions denominated in a currency other than a company's operating functional currency. Net foreign currency gains were \$23 million in 2024 compared to losses of \$21 million in 2023, primarily due to the strengthening of the U.S. dollar against other currencies in 2024. A Other costs and expenses represent general and administrative expenses of the parent company and other expenses not allocated to business segments, including the cost of certain long-term incentive plans and new business ventures. Other costs and expenses decreased to \$137 million in 2024 from \$143 million in 2023, primarily due to lower new start-up operating unit expenses. A A Expenses from Non-Insurance Businesses. Expenses from non-insurance businesses represent costs associated with businesses engaged in the distribution of promotional merchandise, world-wide textile solutions and aviation-related businesses that include (i) cost of goods sold related to aircraft and products sold and services provided, and (ii) general and administrative expenses. Expenses from non-insurance businesses were \$240 million in 2024 compared to \$236 million in 2023. The increase mainly relates to commercial and residential textile business, partially offset by the decrease from promotional merchandise business. Interest Expense. Interest expense was \$63 million in 2024 and \$64 million in 2023. Income Taxes. The effective income tax rate was 23.3% and 21.8% for the six months ended June 30, 2024 and 2023, respectively. The higher effective income tax rate for the six months ended June 30, 2024, as compared to the earlier period, was primarily due to the geographical mix of earnings and larger amounts being subject to tax at a rate greater than the U.S. statutory rate. A A The Company has not provided U.S. deferred income taxes on the undistributed earnings of approximately \$400 million of its non-U.S. subsidiaries since these earnings are intended to be permanently reinvested in the non-U.S. subsidiaries. In the future, if such earnings were distributed, the Company projects that the incremental tax, if any, will be immaterial. From 2023, as part of the Inflation Reduction Act of 2022, a 1% excise tax is imposed on common share repurchase activity, net of common share issuances, and is included in the cost of treasury stock acquired. 43 Results of Operations for the Three Months Ended June 30, 2024 and 2023 Business Segment Results Following is a summary of gross and net premiums written, net premiums earned, loss ratios (losses and loss expenses incurred expressed as a percentage of net premiums earned), expense ratios (underwriting expenses expressed as a percentage of net premiums earned) and GAAP combined ratios (sum of loss ratio and expense ratio) for each of our business segments for the three months ended June 30, 2024 and 2023. The GAAP combined ratio represents a measure of underwriting profitability, excluding investment income. A GAAP combined ratio in excess of 100 indicates an underwriting loss; a number below 100 indicates an underwriting profit. (In thousands) 2024 2023 Insurance: Gross premiums written \$3,360,850 \$2,994,059 Net premiums written 2,810,448 2,505,856 Net premiums earned 2,484,569 2,215,186 Loss ratio 64.0% 63.1% Expense ratio 28.4% 27.8% GAAP combined ratio 92.4% 90.9% Reinsurance & Monoline Excess: Gross premiums written \$356,922 \$342,714 Net premiums written 316,331 305,659 Net premiums earned 361,846 337,541 Loss ratio 52.8% 51.2% Expense ratio 29.0% 30.1% GAAP combined ratio 81.8% 81.3% Consolidated: Gross premiums written \$3,717,772 \$3,336,773 Net premiums written 3,126,779 2,811,515 Net premiums earned 2,846,415 2,552,727 Loss

ratio62.6Å %61.5Å %Expense ratio28.5Å %28.1Å %GAAP combined ratio91.1Å %89.6Å %Å Å Å Net Income to Common Stockholders. The following table presents the Companyâ€™s net income to common stockholders and net income per diluted share for the three months ended June 30, 2024 and 2023:(In thousands, except per share data)20242023Net income to common stockholders\$371,909Å \$356,308Å Weighted average diluted shares403,737Å 409,643Å Net income per diluted share\$0.92Å \$0.87Å Å Å Å The Company reported net income to common stockholders of \$372 million in 2024 compared to \$356 million in 2023. The \$16 million increase in net income was primarily due to an after-tax increase in net investment income of \$97 million mainly due to higher interest rates, a larger fixed maturity securities portfolio and investment income associated with our Argentine inflation-linked securities, an after-tax increase in foreign currency gains of \$16 million mainly due to the strengthening of the U.S. dollar in 2024, an after-tax increase in profits from non-insurance businesses of \$3 million, an after-tax reduction in corporate expenses of \$2 million and an after-tax increase in profit from insurance service businesses of \$2 million, partially offset by an after-tax reduction in net investment gains of \$89 million mainly due to the foreign currency losses from Argentine peso-denominated investments and reversal of prior unrealized gains on equity securities, an after-tax reduction in underwriting income of \$8 million and an increase of \$7 million in tax expense due to a change in the effective tax rate. The number of weighted average diluted shares decreased 5.9 million for 2024 compared to 2023, mainly reflecting shares repurchased in 2024 and 2023.Å Å Å Å Premiums. Gross premiums written were \$3,718 million in 2024, an increase of 11% from \$3,337 million in 2023. The increase was due to a \$367 million increase in the Insurance segment and a \$14 million increase in the Reinsurance & Monoline Excess segment. Approximately 80% of premiums expiring in 2024 and 2023 were renewed.44 Å Å Å Å Average renewal rates (per unit of exposure) for insurance and facultative reinsurance increased 7.3% in 2024, and increased 8.3% excluding workers' compensation.Å Å Å Å Å Å Å summary of gross premiums written in 2024 compared with 2023 by line of business within each business segment follows:â€œInsurance - gross premiums increased 12% to \$3,361 million in 2024 from \$2,994 million in 2023. Gross premiums increased \$166 million (15%) for other liability, \$128 million (17%) for short-tail lines, \$58 million (16%) for auto, \$9 million (2%) for professional liability and \$6 million (2%) for workers' compensation.â€œReinsurance & Monoline Excess - gross premiums increased 4% to \$357 million in 2024 from \$343 million in 2023. Gross premiums increased \$17 million (15%) for property and \$2 million (5%) for monoline excess, and decreased \$5 million (2%) for casualty.Å Å Å Å Net premiums written were \$3,127 million in 2024, an increase of 11% from \$2,812 million in 2023. Ceded reinsurance premiums as a percentage of gross written premiums were both 16% in 2024 and 2023.Å Å Å Å Premiums earned increased 12% to \$2,846 million in 2024 from \$2,553 million in 2023. Insurance premiums (including the impact of rate changes) are generally earned evenly over the policy term, and accordingly, recent rate increases will be earned over the upcoming quarters. Premiums earned in 2024 are related to business written during both 2024 and 2023. Audit premiums were \$96 million in 2024 compared with \$92 million in 2023 due to an increase in exposures.Å Å Å Å Net Investment Income. Following is a summary of net investment income for the three months ended June 30, 2024 and 2023:AmountAverageÅ AnnualizedYield(\$ in thousands)2024202320242023Fixed maturity securities, including cash and cash equivalents and loans receivable\$324,136Å \$217,830Å 5.5Å %4.2Å %Investment funds25,476Å (1,186)6.5Å (0.3)Arbitrage trading account16,682Å 17,037Å 5.5Å 5.7Å Equity securities12,386Å 15,254Å 5.0Å 5.4Å Real estate(\$3,705)(2,123)(1.2)(0.6)Gross investment income374,975Å 246,812Å 5.3Å 3.8Å Investment expenses(2,846)(1,660)â€œÅ Å Å Å Total\$372,129Å \$245,152Å 5.2Å %3.8Å %Å Å Å Net investment income increased 52% to \$372 million in 2024 from \$245 million in 2023 due primarily to an \$106 million increase in income from fixed maturity securities mainly driven by higher interest rates, a larger fixed maturity securities portfolio and our Argentine inflation-linked securities which is not expected to continue at this level (see below for further discussion) and a \$27 million increase in income from investment funds primarily due to transportation funds and real estate funds, partially offset by a \$3 million decrease in equity securities, a \$2 million decrease in real estate and a \$1 million increase in investment expenses. The Company expects investment income to benefit as it continues to invest maturing securities at the current higher rates. The Company maintained the shortened duration of its fixed maturity security portfolio, with a small increase in average duration from 2.4 to 2.5 years, thereby reducing the potential impact of mark-to-market on the portfolio and positioning the Company to react quickly to changes in the current interest rate environment. Average invested assets, at cost (including cash and cash equivalents), were \$28.5 billion in 2024 and \$26.0 billion in 2023.Pre-tax net investment income associated with the Argentine inflation-linked securities for the three months ended June 30, 2024 was \$63 million. Such investment income increased as a result of an adjustment to the inflation rate that was made by the Argentine government in late 2023. As certain of our Argentine bonds were sold during the three months ended June 30, 2024 and the inflation rate has continued to decline, we do not expect investment income relating to these securities to continue at this level. The proceeds from the Argentine inflation-linked securities that were sold in the second quarter of 2024 have been reinvested.Å Å Å Å Insurance Service Fees. The Company earns fees from an insurance distribution business, a third-party administrator and as a servicing carrier of workers' compensation assigned risk plans for certain states. Insurance service fees increased to \$28 million in 2024 from \$25 million in 2023.45 Å Å Å Å Net Realized and Unrealized (Losses) Gains on Investments. The Company buys and sells securities and other investment assets on a regular basis in order to maximize its total return on investments. Decisions to sell securities and other investment assets are based on managementâ€™s view of the underlying fundamentals of specific investments as well as managementâ€™s expectations regarding interest rates, credit spreads, currency values and general economic conditions. Net realized and unrealized losses on investments were \$60 million in 2024 compared with net gains of \$69 million in 2023. The losses of \$60 million in 2024 reflected an increase in unrealized losses on equity securities of \$66 million, partially offset by net realized gains on investments of \$6 million. The gains of \$69 million in 2023 reflected net realized gains on investments of \$48 million (primarily a pre-tax net realized gain of \$88 million on the sale of the property and casualty insurance services division of Breckenridge IS, Inc., partially offset by an impairment of \$51 million recognized on a real estate investment) and an increase in unrealized gains on equity securities of \$21 million.Change in Allowance for Expected Credit Losses on Investments. Based on credit factors, the allowance for expected credit losses is increased or decreased depending on the percentage of unrealized loss relative to amortized cost by security, changes in rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. The pre-tax change in allowance for expected credit losses on investments decreased by \$2 million (\$1.6 million after-tax) and increased by \$10 million (\$8 million after-tax) in 2024 and 2023, respectively, which are both reflected in net investment gains, primarily due to a change in estimate.Revenues from Non-Insurance Businesses. Revenues from non-insurance businesses were derived from businesses engaged in the distribution of promotional merchandise, world-wide textile solutions and aviation-related businesses that provide services to aviation markets, including (i) the distribution, manufacturing, repair and overhaul of aircraft parts and components, (ii) the sale of new and used aircraft, and (iii) avionics, fuel, maintenance, storage and charter services. Revenues from non-insurance businesses were \$126 million in 2024 and \$114 million in 2023. The increase mainly relates to aviation-related business and commercial and residential textile business, partially offset by the decrease from promotional merchandise business.Å Å Å Å Losses and Loss Expenses. Losses and loss expenses increased to \$1,781 million in 2024 from \$1,570 million in 2023. The consolidated loss ratio was 62.6% in 2024 and 61.5% in 2023. Catastrophe losses, net of reinsurance recoveries were \$90 million in 2024 and \$54 million in 2023. Favorable prior year reserve development (net of premium offsets) was \$1 million in 2024 and \$3 million in 2023. The loss ratio excluding catastrophe losses and prior year reserve development decreased by 0.1% to 59.4% in 2024 from 59.5% in 2023.Å Å Å Å Å Å summary of loss ratios in 2024 compared with 2023 by business segment follows:â€œInsurance - The loss ratio was 64.0% in 2024 and 63.1% in 2023. Catastrophe losses were \$87 million in 2024 compared with \$48 million in 2023. Favorable prior year reserve development was \$3 million in 2024 and adverse prior year development was \$7 million in 2023. The loss ratio excluding catastrophe losses and prior year reserve development remained flat at 60.6% in both 2024 and 2023.â€œReinsurance & Monoline Excess - The loss ratio was 52.8% in 2024 and 51.2% in 2023. Catastrophe losses were \$3 million in 2024 compared with \$6 million in 2023. Adverse prior year reserve development was \$2 million in 2024 and favorable prior year reserve development was \$10 million in 2023. The loss ratio excluding catastrophe losses and prior year reserve development decreased 1.1 points to 51.5% in 2024 from 52.6% in 2023.Other Operating Costs and Expenses. Following is a summary of other operating costs and expenses for the three months ended June 30, 2024 and 2023:(\$ in thousands)20242023Policy acquisition and insurance operating expenses\$811,997Å \$718,234Å Insurance service expenses23,084Å 23,931Å Net foreign currency (gains) losses(10,118)1,226Å Other costs and expenses67,972Å 70,291Å Total\$892,935Å \$823,682Å Å Å Å Å Policy acquisition and insurance operating expenses are comprised of commissions paid to agents and brokers, premium taxes and other assessments and internal underwriting costs. Policy acquisition and insurance operating expenses increased 13% and net premiums earned increased 12% from 2023. The expense ratio (underwriting expenses expressed as a percentage of net premiums earned) increased 0.4 points to 28.5% in 2024 from 28.1% in 2023 mainly due to higher commissions from business mix. 46 Å Å Å Å Service expenses, which represent the costs associated with the fee-based businesses, were \$23 million in 2024, down from \$24 million in 2023.Å Å Å Å Net foreign currency gains result from transactions denominated in a currency other than a company's operating functional currency. Net foreign currency gains were \$10 million in 2024 compared to losses of \$11 million in 2023, primarily related to the strengthening of the U.S. dollar in 2024.Other costs and expenses represent general and administrative expenses of the parent company and other expenses not allocated to business segments, including the cost of certain long-term incentive plans and new business ventures. Other costs and expenses decreased to \$68 million in 2024 from \$70 million in 2023, primarily due to lower new start-up operating unit expenses. Å Å Å Å Expenses from Non-Insurance Businesses. Expenses from non-insurance businesses represent costs associated with businesses engaged in the distribution of promotional merchandise, world-wide textile solutions and aviation-related businesses that include (i) cost of goods sold related to aircraft and products sold and services provided, and (ii) general and administrative expenses. Expenses from non-insurance businesses were \$121 million in 2024 compared to \$114 million in 2023. The increase mainly relates to aviation-related business and commercial and residential textile business, partially offset by the decrease from promotional merchandise business.Interest Expense. Interest expense was \$32 million in both 2024 and 2023. Income Taxes. The effective income tax rate was 23.7% and 22.2% for the three months ended June 30, 2024 and 2023, respectively. The higher effective income tax rate for both the three months ended June 30, 2024 and 2023 was primarily due to the geographical mix of earnings and larger amounts being subject to tax at a rate greater than the U.S. statutory rate. The Company has not provided U.S. deferred income taxes on the undistributed earnings of approximately \$400 million of its non-U.S. subsidiaries since these earnings are intended to be permanently reinvested in the non-U.S. subsidiaries. In the future, if such earnings were distributed, the Company projects that the incremental tax, if any, will be immaterial.From 2023, as part of the Inflation Reduction Act of 2022, a 1% excise tax is imposed on common share repurchase activity, net of common share issuances, and is included in the cost of treasury stock acquired. 47 InvestmentsÅ Å Å Å As part of its investment strategy, the Company establishes a level of cash and highly liquid short-term and intermediate-term securities that, combined with expected cash flow, it believes is adequate to meet its payment obligations. In addition to fixed maturity securities, the Company invests in equity securities, merger arbitrage securities, investment funds, private equity, loans and real estate related assets. The Company's investments in investment funds and its other alternative investments have experienced, and the Company expects to continue to experience, greater fluctuations in investment income.Å Å Å Å The Company also attempts to maintain an appropriate relationship between the average duration of the investment portfolio and the approximate duration of its liabilities (i.e., policy claims and debt obligations). The average duration of the fixed maturity portfolio, including cash and cash equivalents, was 2.5 years at JuneÅ 30, 2024 and 2.4 years at DecemberÅ 31, 2023. The Companyâ€™s fixed maturity investment portfolio and investment-related assets as of JuneÅ 30, 2024 were as follows:(\$ in thousands)CarryingValuePercentofÅ TotalFixed maturity securities:U.S. government and government agencies1,822,376Å 6.5Å %State and municipal:Special revenue1,508,209Å 5.4Å State general obligation443,673Å 1.6Å Local general obligation379,024Å 1.4Å Corporate backed161,332Å 0.6Å Pre-refunded(187,978Å 0.3Å Total state and municipal2,580,216Å 9.3Å Mortgage-backed:Agency1,855,209Å 6.6Å Commercial158,051Å 2.0Å Residential-Prime179,841Å 0.6Å Residential-Alt2,508Å â€œÅ Total mortgage-backed2,595,609Å 9.2Å Asset-backed4,014,446Å 14.3Å Corporate:Industrial3,893,745Å 13.9Å Financial3,196,583Å 11.4Å Utilities711,967Å 2.5Å Other610,125Å 2.2Å Total corporate8,412,420Å 30.0Å Foreign government and foreign government agencies1,657,609Å 5.9Å Total fixed maturity securities21,082,676Å 75.2Å Equity securities:Common stocks696,555Å 2.5Å Preferred stocks381,537Å 1.4Å Total equity securities1,078,092Å 3.9Å Investment funds1,589,119Å 5.7Å Cash and cash equivalents(221,411,140Å 5.0Å Real estate1,279,306Å 4.6Å Arbitrage trading account1,221,861Å 4.4Å Loans receivable349,325Å 1.2Å Total investments\$28,011,519Å 100.0Å % (1) Pre-refunded securities are securities for which an escrow account has been established to fund the remaining payments of principal and interest through maturity. Such escrow accounts are funded almost exclusively with U.S. Treasury and U.S. government agency securities.(2) Cash and cash equivalents includes trading accounts receivable from brokers and clearing organizations, trading account securities sold but not yet purchased and unsettled purchases.48 Fixed Maturity Securities. The Companyâ€™s investment policy with respect to fixed maturity securities is generally to purchase instruments with the expectation of holding them to their maturity. However, management of the available for sale portfolio is considered necessary to maintain an approximate matching of assets and liabilities as well as to adjust the portfolio as a result of changes in financial market conditions and tax considerations.The Companyâ€™s philosophy related to holding or selling fixed maturity securities is based on its objective of maximizing total return. The key factors that management considers in its investment decisions as to whether to hold or sell fixed maturity securities are its view of the underlying fundamentals of specific securities as well as its expectations regarding interest rates, credit spreads and currency values. In a period in which management expects interest rates to rise, the Company may sell longer duration securities in order to mitigate the impact of an interest rate rise on the fair value of the portfolio. Similarly, in a period in which management expects credit spreads to widen, the Company may sell lower quality securities, and in a period in which management expects certain foreign currencies to decline in value, the Company may sell securities denominated in those foreign currencies. The sale of fixed maturity securities in order to achieve the objective of maximizing total return may result in realized gains or losses; however, there is no reason to expect these gains or losses to continue in future periods.Equity Securities. Equity securities primarily represent investments in common and preferred stocks in companies with potential growth opportunities in different sectors, mainly in the financial institutions, energy and technology sectors.Investment Funds. At JuneÅ 30, 2024, the carrying value of investment funds was \$1.6 billion, including investments in financial services funds of \$436 million, other funds of \$376 million (which includes a deferred compensation trust asset of \$41 million), transportation funds of \$306 million, real estate funds of \$198 million, infrastructure funds of \$141 million and energy funds of \$132 million. Investment funds are generally reported on a one-quarter lag.Real Estate. Real estate is directly owned property held for investment. At JuneÅ 30, 2024, real estate properties in operation included a long-term ground lease in Washington D.C., an office complex in New York City and the completed portion of a mixed-use project in Washington D.C. In addition, part of the previously mentioned mixed-use project in Washington D.C. is under development. The Company expects to fund further development costs for the project with a combination of its own funds and external financing.Arbitrage Trading Account. The arbitrage trading account is comprised of direct investments in arbitrage securities. Merger arbitrage is the business of investing in the securities of publicly held companies that are the targets in announced tender offers and mergers.Loans Receivable. Loans receivable, which are carried at amortized cost (net of allowance for expected credit losses), had an amortized cost of \$349 million and an aggregate fair value of \$349 million at JuneÅ 30, 2024. The amortized cost of loans receivable is net of an allowance for expected credit losses of \$2 million as of JuneÅ 30, 2024. Loans receivable include real estate loans of \$348 million that are secured by commercial and residential real estate located primarily in the UK and New York. Real estate loans generally earn interest at fixed or stepped interest rates and have maturities through 2026. Loans receivable include commercial loans of \$1 million that are secured by business assets and have fixed interest rates with varying maturities not exceeding 10 years.Market Risk. The fair value of the Companyâ€™s investments is subject to risks of fluctuations in credit quality and interest rates. The Company uses various models and stress test scenarios to monitor and manage interest rate risk. The Company attempts to manage its interest rate risk by maintaining an appropriate relationship between the effective duration of the investment portfolio and the approximate duration of its liabilities (i.e., policy claims and debt obligations). The effective duration for the fixed maturity portfolio (including cash and cash equivalents) was 2.5 years at JuneÅ 30, 2024 and 2.4 years at DecemberÅ 31, 2023.In addition, the fair value of the Companyâ€™s international investments is subject to currency risk. The Company attempts to manage its currency risk by matching its foreign currency assets and liabilities where considered appropriate.49 Liquidity and Capital ResourcesÅ Å Å Å Cash Flow. Cash flow provided from operating activities increased to \$1,628 million in the six months ended June 30, 2024 from \$1,154 million in the six months ended June 30, 2023, primarily due to increased premium receipts. Å Å Å Å The Company's insurance subsidiaries' principal sources of cash are premiums, investment income, service fees and proceeds from sales and maturities of portfolio investments. The principal uses of cash are payments for claims, taxes, operating expenses and dividends. The Company expects its insurance subsidiaries to fund the payment of losses with cash received from premiums, investment income and fees. The Company generally targets an average duration for its investment portfolio that is within 1.5 years of the average duration of its liabilities so that portions of its investment portfolio mature throughout the claim cycle and are available for the payment of claims if necessary. In the event operating cash flow and proceeds

from maturities and prepayments of fixed income securities are not sufficient to fund claim payments and other cash requirements, the remainder of the Company's cash and investments is available to pay claims and other obligations as they become due. The Company's investment portfolio is highly liquid, with approximately 80% invested in cash, cash equivalents and marketable fixed maturity securities as of June 30, 2024. If the sale of fixed maturity securities were to become necessary, a realized gain or loss equal to the difference between the cost and sales price of securities sold would be recognized. As of June 30, 2024, the Company had senior notes, subordinated debentures and other debt outstanding with a carrying value of \$2,838 million and a face amount of \$2,862 million. The maturities of the outstanding debt are \$7 million in 2024, \$250 million in 2027, \$350 million in 2044, \$470 million in 2050, \$400 million in 2052, \$185 million in 2058, \$300 million in 2059, \$250 million in 2060, and \$650 million in 2061. On April 1, 2022, the Company entered into a senior unsecured revolving credit facility that provides for revolving, unsecured borrowings up to an aggregate of \$300 million with a \$50 million sublimit for letters of credit. The Company may increase the amount available under the facility to a maximum of \$500 million subject to obtaining lender commitments for the increase and other customary conditions. Borrowings under the facility may be used for working capital and other general corporate purposes. All borrowings under the facility must be repaid by April 1, 2027, except that letters of credit outstanding on that date may remain outstanding until April 1, 2028 (or such later date approved by all lenders). Our ability to utilize the facility is conditioned on the satisfaction of representations, warranties and covenants that are customary for facilities of this type. As of June 30, 2024, there were no borrowings outstanding under the facility. As of June 30, 2024, total common stockholders' equity was \$7.8 billion, common shares outstanding were 380,646,644 and stockholders' equity per outstanding share was \$20.42. During the six months ended June 30, 2024, the Company repurchased 4,298,510 shares of its common stock for \$223.8 million. In the second quarter of 2024, the board of directors of the Company declared a regular quarterly cash dividend of \$0.08 per share and a special quarterly cash dividend of \$0.33 per share. In the first quarter of 2024, the board of directors of the Company declared a regular quarterly cash dividend of \$0.07 per share. The number of common shares outstanding excludes shares held in a grantor trust established by the Company for delivery upon settlement of vested but mandatorily deferred RSUs. As of June 30, 2024, Total Capital. Total capitalization (equity, debt and subordinated debentures) was \$10.6 billion at June 30, 2024. The percentage of the Company's capital attributable to senior notes, subordinated debentures and other debt was 27% at June 30, 2024 and 28% at December 31, 2023. 5. Quantitative and Qualitative Disclosure About Market Risk. A reference is made to the information under "Investments - Market Risk" under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Form 10-Q. Item 4. Controls and Procedures. A disclosure of Controls and Procedures. The Company's management, including its Chief Executive Officer and Chief Financial Officer, has conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures pursuant to Securities Exchange Act Rule 13a-14 as of the end of the period covered by this quarterly report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company has in place effective controls and procedures designed to ensure that information required to be disclosed by the Company in the reports it files or submits under the Securities Exchange Act of 1934, as amended, and the rules thereunder, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. A change in Internal Control over Financial Reporting. During the quarter ended June 30, 2024, there were no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. PART II. OTHER INFORMATION. Item 1. Legal Proceedings. A. Please see Note 20 to the notes to the interim consolidated financial statements. Item 1A. Risk Factors. There have been no material changes from the risk factors previously disclosed in the Company's annual report on Form 10-K for the fiscal year ended December 31, 2023. Item 2. Unregistered Sales of Equity Securities and Use of Proceeds. A. A set forth below is a summary of the shares repurchased by the Company during the three months ended June 30, 2024, and the number of shares remaining authorized for purchase by the Company: Total number of shares purchased Average price paid per share Total number of shares purchased as part of publicly announced plans or programs Maximum number of shares that may yet be purchased under the plans or programs April 2021 631,967 \$51.85 1,631,967 18,229,958 May 2021 238,660 \$52.28 1,238,660 16,991,298 June 2021 427,883 \$52.10 1,427,883 15,563,415 Item 5. Other Information. None of the Company's directors or officers adopted, modified or terminated a Rule 10b5-1 trading arrangement or a non-Rule 10b5-1 trading arrangement during the quarter ended June 30, 2024, as such terms are defined under Item 408(a) of Regulation S-K. Item 6. Exhibits. Number 31. Certification of the Chief Executive Officer pursuant to Rule 13a-14(a) 15d-14(a). A. Certification of the Chief Financial Officer pursuant to Rule 13a-14(a) 15d-14(a). A. Certification of the Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. 52 SIGNATURES Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this Report to be signed on its behalf by the undersigned thereunto duly authorized. Robert Berkley, Jr., President and Chief Executive Officer of W. R. Berkley Corporation (the "registrant"), certify that: 1. I have reviewed this quarterly report on Form 10-Q of the registrant; 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report; 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report; 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have: a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared; b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles; c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions): a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting. Date: August 2, 2024 /s/ Richard M. Baio A. Richard M. Baio A. Executive Vice President, Chief Financial Officer and Treasurer EX-32.1 4 wrb630202410-qex321.htm EX-32.1 Document Exhibit A. 32. CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002. In connection with the Quarterly Report of W. R. Berkley Corporation (the "Company") on Form 10-Q for the period ended June 30, 2024 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), we, W. Robert Berkley, Jr., President and Chief Executive Officer of the Company, and Richard M. Baio, Senior Vice President - Chief Financial Officer and Treasurer of the Company, certify, pursuant to 18 U.S.C. §1350, as adopted pursuant to §906 of the Sarbanes-Oxley Act of 2002, that: (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company. /s/ W. Robert Berkley, Jr. A. W. Robert Berkley, Jr. President and Chief Executive Officer A. /s/ Richard M. Baio A. Richard M. Baio Executive Vice President, Chief Financial Officer and Treasurer August 2, 2024 A signed original of this written statement required by Section 906 has been provided to W. R. Berkley Corporation (the "Company") and will be retained by the Company and furnished to the Securities and Exchange Commission or its staff upon request. The primary focus of the trading account is merger arbitrage. Merger arbitrage is the business of investing in the securities of publicly held companies which are the targets in announced tender offers and mergers. Arbitrage investing differs from other types of investing in its focus on transactions and events believed likely to bring about a change in value over a relatively short time period (usually four months or less). Â Â Â Â Â The Company uses put options and call options in order to mitigate the impact of potential changes in market conditions on the merger arbitrage trading account. These options are reported at fair value. As of JuneÂ 30, 2024, the fair value of long option contracts outstanding was \$3 million (notional amount of \$401 million) and the fair value of short option contracts was \$81 million (notional amount of \$401 million). Other than with respect to the use of these trading account securities, the Company does not make use of derivatives. Such entities do not have sufficient equity at risk to finance their activities without additional subordinated financial support, or the equity investors, as a group, do not have the characteristics of a controlling financial interest (primary beneficiary).Â The Company determines whether it is the primary beneficiary of an entity subject to consolidation based on a qualitative assessment of the VIE's capital structure, contractual terms, nature of the VIE's operations and purpose, and the Company's relative exposure to the related risks of the VIE on the date it becomes initially involved in the VIE and on an ongoing basis. The Company is not the primary beneficiary in any of its investment funds, and accordingly, carries its interests in investment funds under the equity method of accounting.Â Â Â Â Â Â The Companyâ€™s maximum exposure to loss with respect to these investments is limited to the carrying amount reported on the Companyâ€™s consolidated balance sheet and its unfunded commitments, which were \$275 million as of JuneÂ 30, 2024.Â Â Â Â Â Investment funds consisted of the following:Carrying Value as of Income (Loss) fromInvestment FundsJune 30,December 31,For the Six Months Ended June 30,(In thousands)2024202320242023Financial services\$436,057Â \$433,407Â \$(18,231)Â \$(20,321)Transportation306,485Â 344,278Â \$(3,732)23,843Â Real Estate198,111Â 201,625Â 12,880Â 2,963Â Infrastructure140,699Â 130,589Â 7,828Â 5,936Â Energy131,719Â 114,794Â 8,505Â 3,439Â Other funds376,048Â 396,962Â (11,123) (14,867)Totals\$1,589,119Â \$1,621,655Â \$(3,873)993Â Â Â Â The Company's share of the earnings or losses from investment funds is generally reported on a one-quarter lag in order to facilitate the timely completion of the Company's consolidated financial statements.Financial services investment funds include the minority investment in Lifson Re, a Bermuda reinsurance company. Effective January 1, 2021, Lifson Re participated on a fully collateralized basis in a majority of the Companyâ€™s reinsurance placements for a 22.5% share of placed amounts. The percentage increased from 22.5% to 30.0% effective July 1, 2022. This pertains to all traditional reinsurance/retrocessional placements for both property and casualty business where there is more than one open market reinsurer participating. For the six months ended June 30, 2024 and 2023, the Company ceded approximately \$206Â million and \$281Â million, respectively, of written premiums to Lifson Re. Other funds include deferred compensation trust assets of \$41Â million and \$36Â million as of JuneÂ 30, 2024 and DecemberÂ 31, 2023, respectively. These assets support other liabilities reflected in the balance sheet of an equal amount for employees who have elected to defer a portion of their compensation. The change in the net asset value of the trust is recorded in other funds within net investment income with an offsetting equal amount within corporate expenses. The change in unrealized (losses) gains consists of two components: (i) the reversal of the gain or loss recognized in previous periods on equity securities sold and (ii) the change in unrealized gain or loss resulting from mark-to-market adjustments on equity securities still held. (2) In June 2023, the Company completed a sale of the property and casualty insurance services division of Breckenridge IS, Inc. and recognized a pre-tax net realized gain on investment of \$88 million on the sale (proceeds from the sale is presented on the business disposition line within the Consolidated Statements of Cash Flows).(3) During the second quarter of 2023, the Company recognized an impairment loss of \$51 million on a real estate investment.(4) Primarily relates to realized foreign currency losses upon the disposition of fixed maturity securities. (1) Claims occurring during the current year are net of loss reserve discounts of \$26 million and \$22 million for the six months ended June 30, 2024 and 2023, respectively.(2) The change in estimates for claims occurring in prior years is net of loss reserve discount. On an undiscounted basis, the estimates for claims occurring in prior years increased by \$7 million and decreased by \$6 million for the six months ended June 30, 2024 and 2023, respectively. (3) For certain retrospectively rated insurance policies and reinsurance agreements, reserve development is offset by additional or return premiums. Favorable development, net of additional and return premiums, was \$2 million and adverse development was \$21 million for the six months ended June 30, 2024 and 2023, respectively.The ultimate net impact of COVID-19 on the Companyâ€™s reserves remains uncertain. As of June 30, 2024, the Company had recognized losses for COVID-19-related claims activity, net of reinsurance, of approximately \$388 million, of which \$329 million relates to the Insurance segment and \$59 million relates to the Reinsurance & Monoline Excess segment. Such \$388 million of COVID-19-related losses included \$385 million of reported losses and \$3 million of IBNR.During the six months ended June 30, 2024, favorable prior year development (net of additional and return premiums) of \$2A million included \$7A million for the Reinsurance & Monoline Excess segment partially offset by \$5 million of adverse prior year development for the Insurance segment. For the Insurance segment, the adverse development during the first half of 2024 was driven by commercial auto liability and other liability (mainly umbrella and excess liability), and was partially offset by favorable development for workersâ€™ compensation and professional liability. The adverse commercial auto liability development was concentrated in accident years 2020 through 2023. The other liability development was mainly driven by umbrella and excess liability claims, and was focused in accident years 2017 through 2021. A significant portion of the umbrella and excess liability development related to underlying commercial auto exposures. The Company believes that commercial auto-related claims are being particularly impacted by social inflation, which is contributing to an increase in the frequency of large losses beyond expectations. Social inflation can include higher settlement demands from plaintiffs, use of aggressive actions by the plaintiffsâ€™ bar such as litigation funding, negative public sentiment towards large businesses and corporations, and erosion of tort reforms, among other factors. The favorable workersâ€™ compensation development for the Insurance segment was mainly related to accident years 2016 through 2023, while the favorable professional liability development was mainly in accident years 2018 through 2022. For workersâ€™ compensation, favorable reported claim frequency, below expectations, continued to be the main driver of the favorable reserve development. For professional liability, reported loss experience for accident years 2018 through 2022 was better than expected, which drove the favorable reserve development. Accident years 2020 through 2022 also feature business written at peak pricing levels, which the Company now believes will result in higher profitability than initially anticipated.For the Reinsurance & Monoline Excess segment, the favorable development during the first half of 2024 was driven mainly by favorable development in excess workersâ€™ compensation, partially offset by adverse development in the non-proportional reinsurance assumed liability line of business. The favorable excess workersâ€™ compensation development was driven by continued lower claim frequency and reported losses relative to expectations, and to favorable claim settlements spread across many prior accident years. The unfavorable development for non-proportional reinsurance was concentrated mainly in accident years 2017 through 2019 and was associated primarily with our U.S. and U.K. excess general liability reinsurance businesses, including coverage for cedants insuring construction projects. During the six months ended June 30, 2023, adverse prior year development (net of additional and return premiums) of \$21 million included \$19 million for the Insurance segment and \$2 million for the Reinsurance & Monoline Excess segment.Overall adverse development was recognized during the first quarter of 2023 in both business segments due to property catastrophe losses related to 2022 events that were still being adjusted and settled. In particular, losses related to U.S. winter storms that occurred in December were a significant driver of the development, as information gathering and evaluation of these losses were still ongoing into the first quarter. As a result, prior year reserve development (net of additional and return premiums) overall was adverse by \$24A million in the first quarter, but was favorable by \$3A million during the second quarter of 2023.For the Insurance segment, in addition to the property prior year adverse development discussed above, the adverse development during the six months ended June 30, 2023 included adverse prior year development on casualty lines for the 2016 through 2019 accident years, which was largely offset by favorable prior year development on casualty lines for the 2021 and 2022 accident years. The adverse development on the 2016 through 2019 accident years was concentrated in the other liability line of business, and to a lesser degree, professional liability, including medical professional. The development, which particularly impacted business attaching excess of primary policy limits, was driven by a larger than expected number of large losses reported. The Company believes social inflation is contributing to an increase in the frequency of large losses for these accident years. Social inflation can include higher settlement demands from plaintiffs, use of tactics such as litigation funding by the plaintiffsâ€™ bar, negative public sentiment towards large businesses and corporations, and erosion of tort reforms, among others. The favorable prior year development on casualty lines for the 2021 and 2022 accident years in the Insurance segment was concentrated in the professional liability, workersâ€™ compensation, and other liability lines of business, partially offset by adverse development in commercial auto liability. Due to uncertainty regarding incurred loss frequency and severity in light of ongoing social inflation and the impacts of the COVID-19 pandemic, the Company set its initial loss ratios for the 2021 and 2022 accident years prudently, and largely maintained these estimates through the end of each respective accident year. The reported loss experience for these lines of business for the 2021 and 2022 accident years has been better than was expected, and the Company has begun to react to this favorable emergence as the accident years mature beyond 12 months. Commercial auto liability experienced adverse prior year development during the six months ended June 30, 2023 for the 2021 accident year, which was driven by a larger than expected number of large losses reported. For the Reinsurance & Monoline Excess segment, the adverse development during the six months ended June 30, 2023 was driven mainly by adverse development in property (discussed above) and non-proportional reinsurance assumed liability lines of business, largely offset by favorable development in excess workers' compensation. The favorable excess workersâ€™ compensation development was driven by continued lower claim frequency and reported losses relative to our expectations, and to favorable claim settlements. The favorable development was spread across many prior accident years. The adverse development on reinsurance assumed liability was associated primarily with our U.S. assumed reinsurance business, and related to accounts reinsuring excess and umbrella business and construction projects. The adverse development was concentrated mainly in accident years 2017 through 2020. These matters are generally related to insurance and reinsurance claims and are considered in the establishment of loss and loss expense reserves. In addition, the Company may also become involved in legal actions which seek extra-contractual damages, punitive damages or penalties, including claims alleging bad faith in handling of insurance claims. The Company expects its ultimate liability with respect to such matters will not be material to its financial condition. However, adverse outcomes on such matters are possible, from time to time, and could be material to the Companyâ€™s results of operations in any particular financial reporting period.On December 22, 2023, one of the Companyâ€™s subsidiaries filed a lawsuit against certain reinsurers to recover in excess of \$90 million in respect of certain losses paid to its policyholders under certain event cancellation and related insurance policies. The Company believes its claims against the reinsurers are meritorious and expects a positive resolution to its lawsuit. While an adverse outcome is possible, the Company believes that the outcome, in any case, will not be material to the Companyâ€™s financial condition. <div style="margin-bottom:6pt;margin-top:6pt">— The unaudited consolidated financial statements, which include the accounts of W. R. Berkley Corporation and its subsidiaries (the “Company”), have been prepared on the basis of U.S. generally accepted accounting principles (“GAAP”) for interim financial information. Accordingly, they do not include all the information and notes required by GAAP for annual financial statements. The unaudited consolidated financial statements reflect all adjustments, consisting only of normal recurring items, which are necessary to present fairly the Company’s financial position and results of operations on a basis consistent with the prior audited consolidated financial statements. Operating results for interim periods are not necessarily indicative of the results that may be expected for the year. All significant intercompany accounts and transactions have been eliminated.

</div><div style="margin-bottom:6pt;margin-top:6pt;text-indent:36pt">The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and

liabilities at the date of the financial statements and the revenues and expenses reflected during the reporting period. For further information related to areas of judgment and estimates and other information necessary to understand the Company's financial position and results of operations, refer to the audited consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2023.

Reclassifications have been made in the 2023 financial statements as originally reported to conform to the presentation of the 2024 financial statements. The Company reclassified a program management business from the Insurance segment to the Reinsurance & Monoline Excess segment. The reclassified business is a program management business offering support on a nationwide basis for commercial casualty and property program administrators. In addition, share and per share amounts have been adjusted to reflect the 3-for-2 common stock split effected on July 10, 2024.

The income tax provision has been computed based on the Company's estimated annual effective tax rate. The effective income tax rate differs from the federal income tax rate of 21% primarily due to the geographical mix of earnings and larger amounts being subject to tax at a rate greater than the U.S. statutory rate, which was partially offset by tax benefits related to tax-exempt investment income.

Per Share Data

The Company presents both basic and diluted net income per share ("EPS") amounts. Basic EPS is calculated by dividing net income by the weighted average number of common shares outstanding during the period (including 17,495,175 and 17,125,284 common shares held in a grantor trust as of June 30, 2024 and 2023, respectively). The common shares held in the grantor trust are for delivery upon settlement of vested but mandatorily deferred restricted stock units ("RSUs"). Shares held by the grantor trust do not affect diluted shares outstanding since the shares deliverable under vested RSUs were already included in diluted shares outstanding. Diluted EPS is based upon the weighted average number of basic and common equivalent shares outstanding during the period and is calculated using the treasury stock method for stock incentive plans. Common equivalent shares are excluded from the computation in periods in which they have an anti-dilutive effect.

The weighted average number of common shares used in the computation of basic and diluted earnings per share was as follows:

	2024	2023
Basic	17,495,175	17,125,284
Diluted	17,495,175	17,125,284

The Company presents both basic and diluted net income per share (“EPS”) amounts. Basic EPS is calculated by dividing net income by the weighted average number of common shares outstanding during the period (including 17,495,175 and 17,125,284 common shares held in a grantor trust as of June 30, 2024 and 2023, respectively). The common shares held in the grantor trust are for delivery upon settlement of vested but mandatorily deferred restricted stock units (“RSUs”). Shares held by the grantor trust do not affect diluted shares outstanding since the shares deliverable under vested RSUs were already included in diluted shares outstanding. Diluted EPS is based upon the weighted average number of basic and common equivalent shares outstanding during the period and is calculated using the treasury stock method for stock incentive plans. Common equivalent shares are excluded from the computation in periods in which they have an anti-dilutive effect.

The weighted average number of common shares used in the computation of basic and diluted earnings per share was as follows:

	Basic	Diluted	Weighted Average
For the Three Months Ended June 30,	17,495,175	17,495,175	17,495,175
For the Six Months Ended June 30,	17,125,284	17,125,284	17,125,284

Table 1

(1) Represents the amount of impairment that has resulted from credit-related factors. The change in the allowance for expected credit losses is recognized in the consolidated statements of income. Amount excludes unrealized losses relating to non-credit factors.

The following table presents the rollforward of the allowance for expected credit losses for held to maturity securities for the six months ended June 30, 2024 and 2023:

	2024	2023
Allowance for expected credit losses, beginning of period	\$43	

				\$	114
Provision for expected credit losses			(9)		(61)
Allowance for expected credit losses, end of period			\$		34

Funds

The Company evaluates whether it is an investor in a variable interest entity ("VIE"). Such entities do not have sufficient equity at risk to finance their activities without additional subordinated financial support, or the equity investors, as a group, do not have the characteristics of a controlling financial interest (primary beneficiary). The Company determines whether it is the primary beneficiary of an entity subject to consolidation based on a qualitative assessment of the VIE's capital structure, contractual terms, nature of the VIE's operations and purpose, and the Company's relative exposure to the related risks of the VIE on the date it becomes initially involved in the VIE and on an ongoing basis. The Company is not the primary beneficiary in any of its investment funds, and accordingly, carries its interests in investment funds under the equity method of accounting.

The Company's maximum exposure to loss with respect to these investments is limited to the carrying amount reported on the Company's consolidated balance sheet and its unfunded commitments, which were \$275 million as of June 30, 2024.

Investment funds consisted of the following:

Investment Fund	Carrying Value as of June 30, 2024	Unfunded Commitments as of June 30, 2024	Total Exposure as of June 30, 2024

The Company's share of the earnings or losses from investment funds is generally reported on a one-quarter lag in order to facilitate the timely completion of the Company's consolidated financial statements.

Financial services investment funds include the minority investment in Lifson Re, a Bermuda reinsurance company. Effective January 1, 2021, Lifson Re participated on a fully collateralized basis in a majority of the Company's reinsurance placements for a 22.5% share of placed amounts. The percentage increased from 22.5% to 30.0% effective July 1, 2022. This pertains to all traditional reinsurance/retrocessional placements for both property and casualty business where there is more than one open market reinsurer participating. For the six months ended June 30, 2024 and 2023, the Company ceded approximately \$206 million and \$281 million, respectively, of written premiums to Lifson Re.

Other funds include deferred compensation trust assets of \$41 million and \$36 million as of June 30, 2024 and December 31, 2023, respectively. These assets support other liabilities reflected in the balance sheet of an equal amount for employees who have elected to defer a portion of their

compensation. The change in the net asset value of the trust is recorded in other funds within net investment income with an offsetting equal amount within corporate expenses.

Investment funds consisted of the following:

The real estate loans are secured by commercial and residential real estate primarily located in the UK and New York. These loans generally earn interest at fixed or stepped interest rates and have maturities through 2026. The commercial loans are with small business owners who have secured the related financing with the assets of the business. Commercial loans primarily earn interest on a fixed basis and have varying maturities generally not exceeding 10 years.

During the six months ended June 30, 2024, the Company decreased the allowance for expected credit losses due to a decrease in the weighted average life of the loan portfolio. During the six months ended June 30, 2023, the Company increased the allowance for expected credit losses due to changes in economic assumptions utilized in its credit loss model.

The following table presents the rollforward of the allowance for expected credit losses for loans receivable for the three months ended June 30, 2024 and 2023:

	2024	2023
Allowance at beginning of period	\$1.0 million	\$1.0 million
Provision for expected credit losses	\$11.803 million	\$0.1 million
Net charge-offs	\$0.1 million	\$0.533 million
Recovery of previously charged-off amounts	\$9.310 million	\$0.1 million
Other adjustments	\$0.1 million	\$0.533 million
Allowance at end of period	\$7.697 million	\$0.1 million
Nonaccrual loans	\$0.1 million	\$0.386 million
Loans on nonaccrual status less than 90 days past due	\$9.603 million	\$0.1 million
Loans on nonaccrual status 90 or more days past due	\$0.1 million	\$0.386 million
Loans on nonaccrual status greater than 90 days past due	\$7.996 million	\$0.1 million

The Company monitors the performance of its loans receivable and assesses the ability of the borrower to pay principal and interest based upon loan structure, underlying property values, cash flow and related financial and operating performance of the property and market conditions.			
In evaluating the real estate loans, the Company considers their credit quality indicators, including loan to value ratios, which compare the outstanding loan amount to the estimated value of the property, the borrower's financial condition and performance with respect to loan terms, the position in the capital structure, the overall leverage in the capital structure and other market conditions.			
At June 30, 2024 and December 31, 2023, loans receivable were as follows:			
	June 30, 2024	December 31, 2023	Change

(1) The net realized gains or losses on investment sales represent the total gains or losses from the purchase dates of the equity securities. The change in unrealized (losses) gains consists of two components: (i) the reversal of the gain or loss recognized in previous periods on equity securities sold and (ii) the change in unrealized gain or loss resulting from mark-to-market adjustments on equity securities still held.

(2) In June 2023, the Company completed a sale of the property and casualty insurance services division of Breckenridge IS, Inc. and recognized a pre-tax net realized gain on investment of \$88 million on the sale (proceeds from the sale is presented on the business disposition line within the Consolidated Statements of Cash Flows).

(3) During the second quarter of 2023, the Company recognized an impairment loss of \$51 million on a real estate investment.

(4) Primarily relates to realized foreign currency losses upon the disposition of fixed maturity securities. Net investment (losses) gains were as follows:

	For the Three Months Ended June 30,	For the Six Months Ended June 30,	For the Nine Months Ended June 30,	For the Twelve Months Ended June 30,	For the Fiscal Year Ended June 30,
	2023	2023	2023	2023	2023
Net investment (losses) gains	\$51 million	\$51 million	\$51 million	\$51 million	\$51 million

(In thousands)

	2024	2023
Net investment (losses) gains	\$51 million	\$51 million

Substantially all of the securities in an unrealized loss position are rated investment grade, except for the securities in the foreign government classification. A significant amount of the unrealized loss on foreign government securities is the result of changes in currency exchange rates.

A summary of the Company's non-investment grade fixed maturity securities that were in an unrealized loss position at June 30, 2024 is presented in the table below:

Number of Securities	Fair Value (\$ in thousands)	Gross Unrealized Loss	Foreign government
51			

#000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom">\$</td><td style="background-color:#cceeef;border-top:1pt solid #000000;padding:2px 0;text-align:right;vertical-align:bottom">99,230 </td><td style="background-color:#cceeef;border-top:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#cceeef;padding:0 1pt"></td><td style="background-color:#cceeef;border-top:1pt solid #000000;padding:2px 0 2px 1pt;text-align:left;vertical-align:bottom">\$</td><td style="background-color:#cceeef;border-top:1pt solid #000000;padding:2px 0;text-align:right;vertical-align:bottom">159,930 </td><td style="background-color:#cceeef;border-top:1pt solid #000000;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td></tr><tr><td colspan="3" style="background-color:#ffffff;padding:2px 1pt;text-align:left;vertical-align:bottom">State and municipal</td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">5 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">24,865 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td><td colspan="3" style="background-color:#ffffff;padding:0 1pt"></td><td colspan="2" style="background-color:#ffffff;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">4,838 </td><td style="background-color:#ffffff;padding:2px 1pt 2px 0;text-align:right;vertical-align:bottom"></td></tr><tr><td colspan="3" style="background-color:#cceeef;padding:2px 1pt;text-align:left;vertical-align:bottom">Corporate</td><td colspan="2" style="background-color:#cceeef;padding:2px 0 2px 1pt;text-align:right;vertical-align:bottom">30 </td><td colspan="3" style="background-

Unobservable inputs are only used to measure fair value to the extent that

observable inputs are not available.

Substantially all of the Company's fixed maturity securities were priced by independent pricing services. The prices provided by the independent pricing services are estimated based on observable market data in active markets utilizing pricing models and processes, which may include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, sector groupings, matrix pricing and reference data. The pricing services may prioritize inputs differently on any given day for any security based on market conditions, and not all inputs are available for each security evaluation on any given day. The pricing services used by the Company have indicated that they will only produce an estimate of fair value if objectively verifiable information is available. The determination of whether markets are active or inactive is based upon the volume and level of activity for a particular asset class. The Company reviews the prices provided by pricing services for reasonableness and periodically performs independent price tests of a sample of securities to ensure proper valuation.

If prices from independent pricing services are not available for fixed maturity securities, the Company estimates the fair value. For Level 2 securities, the Company utilizes pricing models and processes which may include benchmark yields, sector groupings, matrix pricing, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, bids, offers and reference data. Where broker quotes are used, the Company generally requests two or more quotes and sets a price within the range of quotes received based on its assessment of the credibility of the quote and its own evaluation of the security. The Company generally does not adjust quotes received from brokers. For securities traded only in private negotiations, the Company determines fair value based primarily on the cost of such securities, which is adjusted to reflect prices of recent placements of securities of the same issuer, financial projections, credit quality and business developments of the issuer and other relevant information.

For Level 3 securities, the Company generally uses a discounted cash flow model to estimate the fair value of fixed maturity securities. The cash flow models are based upon assumptions as to prevailing credit spreads, interest rate and interest rate volatility, time to maturity and subordination levels. Projected cash flows are discounted at rates that are adjusted to reflect illiquidity, where appropriate.

The following tables present the assets and liabilities measured at fair value on a recurring basis as of June 30, 2024 and December 31, 2023 by level:

[illegible]

The estimated fair values of the Company's fixed maturity securities, equity securities and arbitrage trading account securities are based on various valuation techniques that rely on fair value measurements as described in Note 15. The fair value of loans receivable are estimated by using current institutional purchaser yield requirements for loans with similar credit characteristics, which is considered a Level 2 input. The fair value of the senior notes and other debt and the subordinated debentures is based on spreads for similar securities, which is considered a Level 2 input.

The following tables present the assets and liabilities measured at fair value on a recurring basis as of June 30, 2024 and December 31, 2023 by level:

	Level 1	Level 2	Level 3	Total

			\$	(7,601)					\$	—							\$	—							\$	—				\$	—

[illegible]

height:120%"> — The Company's reserves for losses and loss expenses are comprised of case reserves and incurred but not reported liabilities ("IBNR"). When a claim is reported, a case reserve is established for the estimated ultimate payment based upon known information about the claim. As more information about the claim becomes available over time, case reserves are adjusted up or down as appropriate. Reserves are also established on an aggregate basis to provide for IBNR liabilities and expected loss reserve development on reported claims.

Loss reserves included in the Company's financial statements represent management's best estimates based upon an actuarially derived point estimate and other considerations. The Company uses a variety of actuarial techniques and methods to derive an actuarial point estimate for each operating unit. These methods include paid loss development, incurred loss development, paid and incurred Bornhuetter-Ferguson methods and frequency and severity methods. In circumstances where one actuarial method is considered more credible than the others, that method is used to set the point estimate. The actuarial point estimate may also be based on a judgmental weighting of estimates produced from each of the methods considered. Industry loss experience is used to supplement the Company's own data in selecting "tail factors" in areas where the Company's own data is limited. The actuarial data is analyzed by line of business, coverage and accident or policy year, as appropriate, for each operating unit.

The establishment of the actuarially derived loss reserve point estimate also includes consideration of qualitative factors that may affect the ultimate losses. These qualitative considerations include, among others, the impact of re-underwriting initiatives, changes in the mix of business, changes in distribution sources and changes in policy terms and conditions.

The key assumptions used to arrive at the best estimate of loss reserves are the expected loss ratios, rate of loss cost inflation, and reported and paid loss emergence patterns. Expected loss ratios represent management's expectation of losses at the time the business is priced and written, before any actual claims experience has emerged. This expectation is a significant determinant of the estimate of loss reserves for recently written business where there is little paid or incurred loss data to consider. Expected loss ratios are generally derived from historical loss ratios adjusted for the impact of rate changes, loss cost trends and known changes in the type of risks underwritten. Expected loss ratios are estimated for each key line of business within each operating unit. Expected loss cost inflation is particularly important for the long-tail lines, such as excess casualty, and claims with a high medical component, such as workers' compensation. Reported and paid loss emergence patterns are used to project current reported or paid loss amounts to their ultimate settlement value. Loss development factors are based on the historical emergence patterns of paid and incurred losses, and are derived from the

Company's own experience and industry data. The paid loss emergence pattern is also significant to excess and assumed workers' compensation reserves because those reserves are discounted to their estimated present value based upon such estimated payout patterns.

Loss frequency and severity are measures of loss activity that are considered in determining the key assumptions described in our discussion of loss and loss expense reserves, including expected loss ratios, rate of loss cost inflation and reported and paid loss emergence patterns. Loss frequency is a measure of the number of claims per unit of insured exposure, and loss severity is a measure of the average size of claims. Factors affecting loss frequency include the effectiveness of loss controls and safety programs and changes in economic activity or weather patterns. Factors affecting loss severity include changes in policy limits, retentions, rate of inflation and judicial interpretations.

Another factor affecting estimates of loss frequency and severity is the loss reporting lag, which is the period of time between the occurrence of a loss and the date the loss is reported to the Company. The length of the loss reporting lag affects our ability to accurately predict loss frequency (loss frequencies are more predictable for lines with short reporting lags) as well as the amount of reserves needed for incurred but not reported losses (less IBNR is required for lines with short reporting lags). As a result, loss reserves for lines with short reporting lags are likely to have less variation from initial loss estimates. For lines with short reporting lags, which include auto, primary workers' compensation, other liability (claims-made) and property business, the key assumption is the loss emergence pattern used to project ultimate loss estimates from known losses paid or reported to date. For lines of business with long reporting lags, which include other liability (occurrence), products liability, excess workers' compensation and liability reinsurance, the key assumption is the expected loss ratio since there is often little paid or incurred loss data to consider. Historically, the Company has experienced less variation from its initial loss estimates for lines of business with short reporting lags than for lines of business with long reporting lags.

The key assumptions used in calculating the most recent estimate of the loss reserves are reviewed each quarter and adjusted, to the extent necessary, to reflect the latest reported loss data, current trends and other factors observed.

\$ 19,567,190	\$ 17,919,996		
</div><div style="margin-top: 3pt"> (1) Claims occurring during the current year are net of loss reserve discounts of \$26 million and \$22 million for the six months ended June 30, 2024 and 2023, respectively.			
(2) The change in estimates for claims occurring in prior years is net of loss reserve discount. On an undiscounted basis, the estimates for claims occurring in prior years increased by \$7 million and decreased by \$6 million for the six months ended June 30, 2024 and 2023, respectively.			
(3) For certain retrospectively rated insurance policies and reinsurance agreements, reserve development is offset by additional or return premiums. Favorable development, net of additional and return premiums, was \$2 million and adverse development was \$21 million for the six months ended June 30, 2024 and 2023, respectively.			
The ultimate net impact of COVID-19 on the Company's reserves remains uncertain. As of June 30, 2024, the Company had recognized losses for COVID-19-related claims activity, net of reinsurance, of approximately \$388 million, of which \$329 million relates to the Insurance segment and \$59 million relates to the Reinsurance & Monoline Excess segment. Such \$388 million of COVID-19-related losses included \$385 million of reported losses and \$3 million of IBNR.			

During the six months ended June 30, 2024, favorable prior year development (net of additional and return premiums) of \$2 million included \$7 million for the Reinsurance & Monoline Excess segment partially offset by \$5 million of adverse prior year development for the Insurance segment.

For the Insurance segment, the adverse development during the first half of 2024 was driven by commercial auto liability and other liability (mainly umbrella and excess liability), and was partially offset by favorable development for workers' compensation and professional liability. The adverse commercial auto liability development was concentrated in accident years 2020 through 2023. The other liability development was mainly driven by umbrella and excess liability claims, and was focused in accident years 2017 through 2021. A significant portion of the umbrella and excess liability development related to underlying commercial auto exposures. The Company believes that commercial auto-related claims are being particularly impacted by social inflation, which is contributing to an increase in the frequency of large losses beyond expectations. Social inflation can include higher settlement demands from plaintiffs, use of aggressive actions by the plaintiffs' bar such as litigation funding, negative public sentiment towards large businesses and corporations, and erosion of tort reforms, among other factors.

The favorable workers' compensation development for the Insurance segment was mainly related to accident years 2016 through 2023, while the favorable professional liability development was mainly in accident years 2018 through 2022. For workers' compensation, favorable reported claim frequency, below expectations, continued to be the main driver of the favorable reserve development. For professional liability, reported loss experience for accident years 2018 through 2022 was better than expected, which drove the favorable reserve development. Accident years 2020 through 2022 also feature business written at peak pricing levels, which the Company now believes will result in higher profitability than initially anticipated.

For the Reinsurance & Monoline Excess segment, the favorable development during the first half of 2024 was driven mainly by favorable development in excess workers' compensation, partially offset by adverse development in the non-proportional reinsurance assumed liability line of business. The favorable excess workers' compensation development was driven by continued lower claim frequency and reported losses relative to expectations, and to favorable claim settlements

height:120%">spread across many prior accident years. The unfavorable development for non-proportional reinsurance was concentrated mainly in accident years 2017 through 2019 and was associated primarily with our U.S. and U.K. excess general liability reinsurance businesses, including coverage for cedants insuring construction projects.

During the six months ended June 30, 2023, adverse prior year development (net of additional and return premiums) of \$21 million included \$19 million for the Insurance segment and \$2 million for the Reinsurance & Monoline Excess segment.

Overall adverse development was recognized during the first quarter of 2023 in both business segments due to property catastrophe losses related to 2022 events that were still being adjusted and settled. In particular, losses related to U.S. winter storms that occurred in December were a significant driver of the development, as information gathering and evaluation of these losses were still ongoing into the first quarter. As a result, prior year reserve development (net of additional and return premiums) overall was adverse by \$24 million in the first quarter, but was favorable by \$3 million during the second quarter of 2023.

For the Insurance segment, in addition to the property prior year adverse development discussed above, the adverse development during the six months ended June 30, 2023 included adverse prior year development on casualty lines for the 2016 through 2019 accident years, which was largely offset by favorable prior year development on casualty lines for the 2021 and 2022 accident years. The adverse development on the 2016 through 2019 accident years was concentrated in the other liability line of business, and to a lesser degree, professional liability, including medical professional. The development, which particularly impacted business attaching excess of primary policy limits, was driven by a larger than expected number of large losses reported. The Company believes social inflation is contributing to an increase in the frequency of large losses for these accident years. Social inflation can include higher settlement demands from plaintiffs, use of tactics such as litigation funding by the plaintiffs' bar, negative public sentiment towards large businesses and corporations, and erosion of tort reforms, among others.

The favorable prior year development on casualty lines for the 2021 and 2022 accident years in the Insurance segment was concentrated in the professional liability, workers' compensation, and other liability lines of business, partially offset by adverse development in commercial auto liability. Due to uncertainty regarding incurred loss frequency and severity in light of ongoing social

inflation and the impacts of the COVID-19 pandemic, the Company set its initial loss ratios for the 2021 and 2022 accident years prudently, and largely maintained these estimates through the end of each respective accident year. The reported loss experience for these lines of business for the 2021 and 2022 accident years has been better than was expected, and the Company has begun to react to this favorable emergence as the accident years mature beyond 12 months. Commercial auto liability experienced adverse prior year development during the six months ended June 30, 2023 for the 2021 accident year, which was driven by a larger than expected number of large losses reported.

For the Reinsurance & Monoline Excess segment, the adverse development during the six months ended June 30, 2023 was driven mainly by adverse development in property (discussed above) and non-proportional reinsurance assumed liability lines of business, largely offset by favorable development in excess workers' compensation. The favorable excess workers' compensation development was driven by continued lower claim frequency and reported losses relative to our expectations, and to favorable claim settlements. The favorable development was spread across many prior accident years. The adverse development on reinsurance assumed liability was associated primarily with our U.S. assumed reinsurance business, and related to accounts reinsuring excess and umbrella business and construction projects. The adverse development was concentrated mainly in accident years 2017 through 2020.

(1) Claims occurring during the current year are net of loss reserve discounts of \$26 million and \$22 million for the six months ended June 30, 2024 and 2023, respectively.

(2) The change in estimates for claims occurring in prior years is net of loss reserve discount. On an undiscounted basis, the estimates for claims occurring in prior years increased by \$7 million and decreased by \$6 million for the six months ended June 30, 2024 and 2023, respectively.

(3) For certain retrospectively rated insurance policies and reinsurance agreements, reserve development is offset by additional or return premiums. Favorable development, net of additional and return premiums, was \$2 million and adverse development was \$21 million for the six months ended June 30, 2024 and 2023, respectively.

The following table presents the carrying amounts and estimated fair values of the Company's financial instruments:

	Cash	Accounts receivable	Prepaid expenses	Other assets	Total
June 30, 2024	\$15,661,820,000	\$14,248,879,000	\$341,188,800	\$306,404,600	\$14,700,000
June 30, 2023	\$28,853,000	\$17,786,000	\$15,510,000	\$344,374,000	\$310,840,900
June 30, 2022	\$38,363,900	\$375,365,000	\$220,556,600	\$201,935,614	\$396,215,000
June 30, 2021	\$592,900,000	\$164,608,460,000	\$149,684,810,000	\$310,634,400,295	\$151,500,195,600
June 30, 2020	\$200,000,000	\$210,000,000	\$388,000,000	\$329,000,000	\$590,000,000
June 30, 2019	\$388,000,000	\$385,000,000	\$385,000,000	\$385,000,000	\$385,000,000

The Company reinsures a portion of its insurance exposures in order to reduce its net liability on individual risks and catastrophe losses. The Company also cedes premiums to state assigned risk plans and captive insurance companies. Estimated amounts due from reinsurers are reported net of an allowance for expected credit losses.

The following table presents the rollforward of the allowance for expected credit losses associated with due from reinsurers for the six months ended June 30, 2024 and 2023:

	2024	2023	Change	2024	2023	Change

2024			2,277		\$			

125		
2023	8,381	
\$	332	

22771250008381332000 Litigation and Contingent Liabilities

In the ordinary course of business, the Company is subject to disputes, litigation and arbitration arising from its insurance and reinsurance businesses. These matters are generally related to insurance and reinsurance claims and are considered in the establishment of loss and loss expense reserves. In addition, the Company may also become involved in legal actions which seek extra-contractual damages, punitive damages or penalties, including claims alleging bad faith in handling of insurance claims. The Company expects its ultimate liability with respect to such matters will not be material to its financial condition. However, adverse outcomes on such matters are possible, from time to time, and could be material to the Company's results of operations in any particular financial reporting period.

On December 22, 2023, one of the Company's subsidiaries filed a lawsuit against certain reinsurers to recover in excess of \$90 million in respect of certain losses paid to its policyholders under certain event cancellation and related insurance policies. The Company believes its claims against the reinsurers are meritorious and expects a positive resolution to its lawsuit. While an adverse outcome is possible, the Company believes that the outcome, in any case, will not be material to the Company's financial condition.

Segments

The Company's reportable segments include the following two business segments, plus a corporate segment:

- Insurance** - predominantly commercial insurance business, including excess and surplus lines, admitted lines and specialty personal lines throughout the United States, as well as insurance business in Asia, Australia, Canada, Continental Europe, Mexico, Scandinavia, South America and the United Kingdom.
- Reinsurance & Monoline Excess** - reinsurance business on a facultative and treaty basis, primarily in the United States, the United Kingdom, Continental Europe, Australia, the Asia-Pacific Region and South Africa, as well as operations that solely retain risk on an excess basis and certain program management business.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies. Income tax expense and benefits are calculated based upon the Company's overall effective tax rate.

Summary financial information about the Company's reporting segments is presented in the following tables. Income (loss) before income taxes by segment includes allocated investment income. Identifiable assets by segment are those assets used in or allocated to the operation of each segment.
