As part of the Business Combination, FGMC changed its name to iCoreConnect Inc. Upon the closing of the Business Combination (the “Closing”), the Company’s certificate of incorporation provided for, among other things, a total number of authorized shares of capital stock of 140,000,000 shares, of which 40,000,000 shares were designated Series A preferred stock, $0.0001 par value per share and 100,000,000 were designated common stock, $0.0001 par value per share.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Business Combination is accounted for as a reverse recapitalization in accordance with U.S. GAAP. Under this method of accounting, FGMC is treated as the “acquired” company and Old iCore is treated as the acquirer for financial reporting purposes. Accordingly, for accounting purposes, the Business Combination was treated as the equivalent of Old iCore issuing stock for the net assets of FGMC, accompanied by a recapitalization. The net assets of FGMC are stated at historical cost, with no goodwill or intangible assets recorded.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Upon the consummation of the Business Combination, each issued and outstanding share of Old iCore Common Stock was canceled and converted into Company Common Stock based upon the Exchange Ratio (as defined in the Merger Agreement). The shares and corresponding capital amounts and loss per share related to Old iCore Common Stock prior to the Business Combination have been retroactively restated to reflect the Exchange Ratio. All non-redeemed shares of FGMC common stock were converted into new iCoreConnect Inc. Series A preferred stock (the “Preferred Stock”) on a one for one basis.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Unvested outstanding stock options to purchase shares of Old iCore Common Stock (“Old iCore Options”) granted under the iCoreConnect Inc 2016 Stock Incentive Plan (“2016 Plan”) converted into stock options for shares of Company Common Stock upon the same terms and conditions that were in effect with respect to such stock options immediately prior to the Business Combination, after giving effect to the Exchange Ratio (the “Exchanged Options”). In addition, the Company has an accumulated deficit, and net working capital deficit of $115,038,758 and $5,367,985. The Company's activities were primarily financed through private placements of equity securities and issuance of debt. The Company intends to raise additional capital through the issuance of debt and/or equity securities to fund its operations. The Company is reliant on future fundraising to finance operations in the near future. The financing may not be available on terms satisfactory to the Company, if at all. In light of these matters, there is substantial doubt that the Company will be able to continue as a going concern.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="font-size:10pt;font-family:times new roman;margin:0px">Currently, management continues to develop its healthcare communications system and continues to develop alliances with strategic partners to generate revenues that will sustain the Company. Management will also seek to raise additional funds. While management believes in the viability of its strategy to increase revenues and in its ability to raise additional funds, there can be no assurances to that effect. Management's ability to continue as a going concern is ultimately dependent upon its ability to continually increase the Company's customer base and realize increased revenues from signed contracts. ASC 820 established a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurement) as follows:</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Level 1 - Observable inputs that reflect quoted prices are available in active markets for identical assets or liabilities as of the reporting date. The Company maintains an allowance for doubtful accounts for estimated losses

resulting from the potential inability of certain customers to make required future payments on amounts due. Management determines the adequacy of this allowance by periodically evaluating the aging and past due nature of individual customer accounts receivable balances and considering the customer's current financial situation as well as the existing industry economic conditions and other relevant factors that would be useful in assessing the risk of collectability. If the future financial condition of our customers were to deteriorate, resulting in their inability to make specific required payments, additions to the allowance for doubtful accounts may be required. In addition, if the financial condition of our customers improves and collections of amounts outstanding commence or are reasonably assured, then we may reverse previously established allowances for doubtful accounts. The Company has estimated and recorded an allowance for doubtful accounts of $102,061 and $65,000 as of December 31, 2023 and 2022, respectively. </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Property and Equipment, net</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Property, equipment, and leasehold improvements are recorded at their historical cost. This accounting standard requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. During December 31, 2023, the Company determined that the carrying value of certain customer relationships exceed their fair value and impairment of long-lived assets existed. The Company took an impairment of $105,676 and adjusted the value of customer relationships to their fair value.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company accounts for goodwill and intangible assets in accordance with ASC 350, Intangibles - Goodwill and Other. Goodwill represents the excess of the purchase price of an entity over the estimated fair value of the assets acquired and liabilities assumed. ASC 350 requires that goodwill and other intangibles with indefinite lives be tested for impairment annually or on an interim basis if events or circumstances indicate that the fair value of an asset has decreased below its carrying value. During the fourth quarter of 2020, the Company adopted ASU No. 2017-04, Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment. This guidance simplifies the accounting for goodwill impairment by removing Step 2 of the goodwill impairment test, which requires a hypothetical purchase price allocation. Goodwill impairment will now be the amount by which the carrying value exceeds its fair value, not to exceed the carrying amount of goodwill. As of December 31, 2023 the Company determined that the carrying value of certain customer relationships exceed their fair value and impairment existed in the amount of $105,676. The Company adjusted the value of its customer relationships to their fair value. This guidance sets forth a five-step revenue recognition model which replaced the prior revenue recognition guidance in its entirety and is intended to eliminate numerous industry-specific pieces of revenue recognition guidance and to require more detailed disclosures. The five steps of the revenue recognition model are: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; and (5) recognize revenue when (or as) the entity satisfies a performance obligation.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">At contract inception, the Company assesses the goods and services promised in the contract with customers and identifies a performance obligation for each. To determine the performance obligation, the Company considers all products and services promised in the contract regardless of whether they are explicitly stated or implied by customary business practices. The timing of satisfaction of the performance obligation is not subject to significant judgment. The Company measures revenue as the amount of consideration expected to be received in exchange for transferring goods and services. Revenue is recognized net of any taxes collected from customers that are subsequently remitted to governmental authorities.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">We recognize revenue for our service in accordance with accounting standard ASC 606. We primarily generate revenue from multiple software as a service (SaaS) offering, which typically include subscriptions to our online software solutions. The Company's secondary source of revenue is professional services and other revenue related to customer onboarding, IT services and equipment sales that often precede a subscription service offering purchased by the customer. Approximately 90% of our revenue is subscription based with the remainder being professional services and other IT related revenue. The geographic concentration of our revenue is 100% in North America.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Management has determined that it has the following performance obligations related to its products and services: multiple software as a service (SaaS) offering, which typically include subscriptions to our online software solutions. The Company's secondary source of revenue is professional services and other revenue related to customer onboarding, IT services and equipment sales that often precede a subscription service offering purchased by the customer. Revenue from Software as a Service, hardware, service repairs, and support & maintenance are all recognized at a point in time when control of the goods is transferred to the customer, generally occurring upon shipment or delivery dependent upon the terms of the underlying contract, or services is completed. Our customers do not have the right to take possession of the online software solution. Revenue from subscriptions, including additional fees for items such as incremental contacts, is recognized ratably over the subscription period beginning on the date the subscription is made available to customers. Substantially all subscription contracts are one year. We recognize revenue from on-boarding services and equipment as the services are provided. Amounts billed that have not yet met the applicable revenue recognition criteria are recorded as deferred revenue.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">For the year ended December 31, 2023 and 2022, disaggregated revenues were recurring revenues of $7,400,659 and $7,206,156, respectively and non-recurring revenues of $750,928 and $781,746, respectively.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">For contracts with customers that contain multiple performance obligations, the Company accounts for the promised performance obligations separately as individual performance obligations if they are distinct. In determining whether performance obligations meet the criteria for being distinct, the Company considers several factors, including the degree of interrelation and interdependence between obligations and whether or not the good or service significantly modifies or transforms another good or service in the contract. After identifying the separate performance obligations, the transaction price is allocated to the separate performance obligations on a relative standalone selling price basis. The Company generally determines the standalone selling prices based on the prices charged to customers. Judgment may be used to determine the standalone selling prices for items that are not sold separately, including taking into consideration either historical pricing practices or an adjusted market assessment. Unsatisfied and partially unsatisfied performance obligations as of the end of the reporting period primarily consist of products and services for which customer purchase orders have been accepted and that are in the process of being delivered.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Transaction price is calculated as the selling price less any variable consideration, consisting of rebates and discounts. Discounts provided to customers are known at contract inception. Rebates are calculated on the “expected value” method where the Company (1) estimates the probability of each rebate amount which could be earned by the distributor, (2) multiplies each estimated amount by its assigned probability factor, and (3) calculates a final sum of each of the probability-weighted amounts calculated in step (2). The sum calculated in step (3) is the rebate amount, which along with discounts reduces the amount of revenue recognized.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company has elected to account for shipping and handling activities that occur after the customer has obtained control of a good as a fulfillment cost rather than as an additional promised service. The Company uses the risk-free interest rate on the implied yield currently available on U.S. Treasury issues with an equivalent remaining term approximately equal to the expected life of the award. The Company has never paid any cash dividends on its common stock and does not anticipate paying any cash dividends in the foreseeable future. The fair value of shares of restricted stock issued are determined by the Company based on the estimated fair value of the Company’s common stock.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Beneficial Conversion Features and Warrants</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company evaluates the conversion feature of convertible debt instruments to determine whether the conversion feature was beneficial as described in ASC 470-30, Debt with Conversion and Other Options. The Company records a beneficial conversion feature (“BCF”) related to the issuance of convertible debt that has conversion features at fixed or adjustable rates that are in-the-money when issued and records the relative fair value of any warrants issued with those instruments. The BCF for the convertible instruments is recognized and measured by allocating a portion of the proceeds to the warrants and as a reduction to the carrying amount of the convertible instrument equal to the intrinsic value of the conversion features, both of which are credited to additional paid-in capital. The Company calculates the fair value of warrants with the convertible instruments using the Black-Scholes valuation model.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Under these guidelines, the Company first allocates the value of the proceeds received from a convertible debt transaction between the convertible debt instrument and any other detachable instruments included in the transaction (such as warrants) on a relative fair value basis. A BCF is then measured as the intrinsic value of the conversion option at the commitment date, representing the difference between the effective conversion price and the Company’s stock price on the commitment date multiplied by the number of shares into which the debt instrument is convertible. The allocated value of the BCF and warrants are recorded as a debt discount and accreted over the expected term of the convertible debt as interest expense. If the intrinsic value of the BCF is greater than the proceeds allocated to the convertible debt instrument, the amount of the discount assigned to the BCF is limited to the amount of the proceeds allocated to the convertible debt instrument.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Leases </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company adopted ASU No. 2016-02, Leases and a series of related Accounting Standards Updates that followed (collectively referred to as “Topic 842”). Topic 842 requires organizations to recognize right-of-use (“ROU”) lease assets and lease liabilities on the balance sheet and to disclose key information about leasing arrangements. The classification criteria for distinguishing between finance leases and operating leases are substantially similar to the classification criteria for distinguishing between capital leases and operating leases in the previous lease guidance. The FASB retained the distinction between finance leases and operating leases, leaving the effect of leases in the statement of comprehensive income and the statement of cash flows largely unchanged from previous U.S. GAAP. The Company utilized the transition method allowed under ASU 2018-11 in which an entity initially applies the new lease standard at the adoption date and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption, if any.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company determines, at contract inception, whether or not an arrangement contains a lease and evaluates the contract for classification as an operating or finance lease. For all leases, ROU assets and lease liabilities are recognized based on the present value of lease payments, including annual rent increases, over the lease term at commencement date. If the Company’s lease does not provide an implicit rate in the contract, the Company uses its incremental, secured borrowing rate based on lease term information available as of the adoption date or lease commencement date in determining the present value of lease payments. If this is the case, the single identifiable asset or the group of similar assets is accounted for as an asset acquisition. If this is not the case, The Company then further evaluate whether the single identifiable asset or group of similar identifiable assets and activities includes, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs. The standard replaces the existing incurred credit loss model with the Current Expected Credit Losses ("CECL") model. It is required to measure credit losses based on the Company's estimate of expected losses rather than incurred losses, which generally results in earlier recognition of allowances for credit losses. Under ASC 326, the Company evaluates specific criteria, including aging and historical write-offs, the current economic condition of customers, and future economic conditions of countries utilizing a consumption index to determine the appropriate allowance for credit losses. This accounting standard requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. During December 31, 2023, the Company determined that the carrying value of certain customer relationships exceed their fair value and impairment of long-lived assets existed. ASC 350 requires that goodwill and other intangibles with indefinite lives be tested for impairment annually or on an interim basis if events or circumstances indicate that the fair value of an asset has decreased below its carrying value. During the fourth quarter of 2020, the Company adopted ASU No. 2017-04, Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment. This guidance simplifies the accounting for goodwill impairment by removing Step 2 of the goodwill impairment test, which requires a hypothetical purchase price allocation. Goodwill impairment will now be the amount by which the carrying value exceeds its fair value, not to exceed the carrying amount of goodwill. As of December 31, 2023 the Company determined that the carrying value of certain customer relationships exceed their fair value and impairment existed in the amount of $105,676. This guidance sets forth a five-step revenue recognition model which replaced the prior revenue recognition guidance in its entirety and is intended to eliminate numerous industry-specific pieces of revenue recognition guidance and to require more detailed disclosures. The five steps of the revenue recognition model are: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; and (5) recognize revenue when (or as) the entity satisfies a performance obligation.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">At contract inception, the Company assesses the goods and services promised in the contract with customers and identifies a performance obligation for each. To determine the performance obligation, the Company considers all products and services promised in the contract regardless of whether they are explicitly stated or implied by customary business practices. The timing of satisfaction of the performance obligation is not subject to significant judgment. The Company measures revenue as the amount of consideration expected to be received in exchange for transferring goods and services. Our customers do not have the right to take possession of the online software solution. Revenue from subscriptions, including additional fees for items such as incremental contacts, is recognized ratably over the subscription period beginning on the date the subscription is made available to customers. In determining whether performance obligations meet the criteria for being distinct, the Company considers several factors, including the degree of interrelation and interdependence between obligations and whether or not the good or service significantly modifies or transforms another good or service in the contract. After identifying the separate performance obligations, the transaction price is allocated to the separate performance obligations on a relative standalone selling price basis. The Company generally determines the standalone selling prices based on the prices charged to customers. Judgment may be used to determine the standalone selling prices for items that are not sold separately, including taking into consideration either historical pricing practices or an adjusted market assessment. Unsatisfied and partially unsatisfied performance obligations as of the end of the reporting period primarily consist of products and services for which customer purchase orders have been accepted and that are in the process of being delivered.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Transaction price is calculated as the selling price less any variable consideration, consisting of rebates and discounts. Rebates are calculated on the "expected value" method where the Company (1) estimates the probability of each rebate amount which could be earned by the distributor, (2) multiplies each estimated amount by its assigned probability factor, and (3) calculates a final sum of each of the probability-weighted amounts calculated in step (2). The sum calculated in step (3) is the rebate amount, which along with discounts reduces the amount of revenue recognized.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company has elected to account for shipping and handling activities that occur after the customer has obtained control of a good as a fulfillment cost rather than as an additional promised service. An employee’s requisite service period is the period of time over which an employee must provide service in exchange for an award under a share-based payment arrangement and generally is presumed to be the vesting period. The Company records a beneficial conversion feature (“BCF”) related to the issuance of convertible debt that has conversion features at fixed or adjustable rates that are in-the-money when issued and records the relative fair value of any warrants issued with those instruments. The BCF for the convertible instruments is recognized and measured by allocating a portion of the proceeds to the warrants and as a reduction to the carrying amount of the convertible instrument equal to the intrinsic value of the conversion features, both of which are credited to additional paid-in capital. The Company calculates the fair value of warrants with the convertible instruments using the Black-Scholes valuation model.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Under these guidelines, the Company first allocates the value of the proceeds received from a convertible debt transaction between the convertible debt instrument and any other detachable instruments included in the transaction (such as warrants) on a relative fair value basis. A BCF is then measured as the intrinsic value of the conversion option at the commitment date, representing the difference between the effective conversion price and the Company’s stock price on the commitment date multiplied by the number of shares into which the debt instrument is convertible. The allocated value of the BCF and warrants are recorded as a debt discount and accreted over the expected term of the convertible debt as interest expense. If the intrinsic value of the BCF is greater than the proceeds allocated to the convertible debt instrument, the amount of the discount assigned to the BCF is limited to the amount of the proceeds allocated to the convertible debt instrument.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company adopted ASU No. 2016-02, Leases and a series of related Accounting Standards Updates that followed (collectively referred to as “Topic 842”). The classification criteria for distinguishing between finance leases and operating leases are substantially similar to the classification criteria for distinguishing between capital leases and operating leases in the previous lease guidance. The FASB retained the distinction between finance leases and operating leases, leaving the effect of leases in the statement of comprehensive income and the statement of cash flows largely unchanged from previous U.S. GAAP. The Company utilized the transition method allowed under ASU 2018-11 in which an entity initially applies the new lease standard at the adoption date and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption, if any.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company determines, at contract inception, whether or not an arrangement contains a lease and evaluates the contract for classification as an operating or finance lease. If the Company’s lease does not provide an implicit rate in the contract, the Company uses its incremental, secured borrowing rate based on lease term information available as of the adoption date or lease commencement date in determining the present value of lease payments. Related parties also include principal owners of the Company, its management, members of the immediate families of principal owners of the Company and its management and other parties with which the Company may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests. A party which can significantly influence the management or operating policies of the transacting parties or if it has an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests is also a related party. </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company applies the principles provided in the Financial Accounting Standards Board (FASB) Accounting Standards Codification (“ASC”) 805, Business Combinations, to determine whether an acquisition involves an asset or a business. In determining whether an acquisition should be accounted for as a business combination or asset acquisition, The Company first determines whether substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or a group of similar identifiable assets. If this is the case, the single identifiable asset or the group of similar assets is accounted for as an asset acquisition. If this is not the case, The Company then further evaluate whether the single identifiable asset or group of similar identifiable assets and activities includes, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs. The chief operating decision maker is the Company’s Chief Executive Officer, who currently reviews the financial performance and the results of operations of the Company’s operating subsidiaries on a consolidated basis when making decisions about allocating resources and assessing performance of the Company. The standard replaces the existing incurred credit loss model with the Current Expected Credit Losses (“CECL”) model. It is required to measure credit losses based on the Company’s estimate of expected losses rather than incurred losses, which generally results in earlier recognition of allowances for credit losses. Under ASC 326, the Company evaluates specific criteria, including aging and historical write-offs, the current economic condition of customers, and future economic conditions of countries utilizing a consumption index to determine the appropriate allowance for credit losses. The Company completed its assessment of the new standard and did not adjust the opening balance of retained earnings relating to its trade receivables. The Company writes off receivables once it is determined that they are no longer collectible, as local laws allow.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Not Yet Adopted</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">In October 2023, the FASB issued Accounting Standards Update (“ASU”) 2023-06, “Disclosure Improvements – Codification Amendments in Response to the

SEC's Disclosure Update and Simplification Initiative." This standard affects a wide variety of Topics in the Codification. The effective date for each amendment will be the date on which the SEC's removal of that related disclosure from Regulation S-X or Regulation S-K becomes effective. Early adoption is prohibited. The Company does not expect the adoption of this standard to have a material impact on the Company's consolidated financial statements and related disclosures.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">In November 2023, the FASB issued ASU 2023-07, "Segment Reporting - Improving Reportable Segment Disclosures (Topic 280)." The standard is intended to improve reportable segment disclosure requirements, primarily through enhanced disclosures about significant expenses. The standard requires disclosure to include significant segment expenses that are regularly provided to the CODM, a description of other segment items by reportable segment, and any additional measures of a segment's profit or loss used by the CODM when deciding how to allocate resources. The standard also requires all annual disclosures currently required by ASC Topic 280 to be included in interim periods. This standard is effective for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024, with early adoption permitted and requires retrospective application to all prior periods presented in the financial statements. The Company is currently evaluating the impact of this standard on its consolidated financial statements and related disclosures.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">In December 2023, the FASB issued ASU 2023-09, "Improvements to Income Tax Disclosures," a final standard on improvements to income tax disclosures. The standard requires disaggregated information about a reporting entity's effective tax rate reconciliation as well as information on income taxes paid. The standard is effective for fiscal years beginning after December 15, 2024, with early adoption permitted and should be applied prospectively. In addition, the Company purchased 1,278 common stock warrants issued to a lender in 2019 as part of a Note Payable that had been fully satisfied in 2020. These warrants include anti-dilutive provisions and as such resulted in an additional 28,883 warrants that were to be issued at a strike price of $0.15. The Company purchased these warrants at their restated strike price for $45,000.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">During the year ended December 31, 2022, the Company issued 13,158 Common Stock Warrants in connection with issuances of promissory notes, of which 1,424 were issued to related parties. These warrants were designated Common Stock Warrants with an initial term of 5 years and an exercise price of $0.60 and $0.75 and contained no down round provisions. The Company may not effect, and a holder will not be entitled to, convert the Common Stock Warrants, which, upon giving effect to such conversion or exercise, would cause the aggregate number of shares of common stock beneficially owned by the Purchaser (together with its affiliates) to exceed 4.99%. The Company issued convertible debt in December 2022 at a price of $2.39 thereby affecting the down round provision on 659,585 warrants with a trigger price that is lower than $0.30 for any equity instrument issued. As such the Company has recorded a charge of $1,794,704 as a Dividend to Common Stockholders reflecting the increase in value of shares to be received by the warrant holder along with an increase in 366,331 warrants issuable to these holders for a total of 1,014,791 warrants at a new exercise price of $2.39.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">On May 18, 2023 the Company determined that it not had not properly accounted for certain warrants issued by the Company in 2021 with provisions (the "down round provisions") that required the lowering of the exercise price of the warrant and a proportionate increase in the number of shares underlying the warrants upon the issuance of new securities at a price per shares that is lower than the exercise price of the original warrant as per ASU 2017-11. The Company did not properly account for such down round provisions when the criteria for revaluation was met. The down round provisions require the Company to record a non-cash charge for the incremental fair value of the additional shares to be issued upon the occurrence of the triggering event which is $1,794,704 for the year ended December 31,2022.</p><p style="font-size:10pt;font-family:times new roman;margin:0px">As part of the Merger, all outstanding warrants as of August 25, 2023 totaling 368,368 were converted on a cashless basis into 117,301 shares of common stock. The purchase price of the stock will be at 75% of the lowest individual daily weighted average price of the past five (5) trading days with the amount to be drawn down as the lesser of $250,000 or 300% of the average shares traded for the ten (10) days prior to the Closing Request Date with a minimum $25,000 put allowance. As part of the agreement, the Company issued 8,378 shares of common stock as a commitment fee. In January 2022 the Company exercised this equity line of credit of an aggregate amount of $350,000 in exchange for 158,273 shares of common stock. The balance available as of December 31, 2022, to draw on the equity line of credit after the draw was $4,650,000. This line expired in January 2023.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">On September 12, 2023, the Company entered into a purchase agreement with Arena Business Solutions Global SPC II, Ltd ("Arena"), pursuant to which Arena has committed to purchase up to $40 million of the Company's common stock, at the Company's direction from time to time, subject to the satisfaction of the conditions. Such sales of Common Stock are subject to certain limitations, and may occur from time to time at the Company's sole discretion over the approximately 36-month period commencing on the date of the Purchase Agreement subject to registration with the Securities and Exchange Commission. The Company may direct Arena to purchase amounts of its Common Stock under the Purchase Agreement that the Company specifies from time to time in a written notice (an "Advance Notice") delivered to Arena on any trading day up to the Commitment Amount. The maximum amount that the Company may specify in any one Advance Notice is equal to the following: (A) if the Advance Notice is received by 8:30 A.M. Eastern time, then the maximum amount that the Company may specify is equal to the lesser of (i) an amount equal to 40% of the average Daily Value Traded of the Common Stock of the ten trading days immediately preceding such Advance Notice, or (ii) $20.0 million; and (B) if the Advance Notice is received after 8:30 A.M. Eastern Time but prior to 10:30 A.M. Eastern Time, then the maximum amount that the Company may specify in an Advance Notice is equal to the lesser of: (i) an amount equal to 30% of the average Daily Value Traded of the Common Stock on the ten trading days immediately preceding such Advance Notice, or (ii) $15.0 million. For these purposes, "Daily Value Traded" is the product obtained by multiplying the daily trading volume of the Company's Common Stock on Nasdaq during regular trading hours, as reported by Bloomberg L.P., by the VWAP (as defined in the Purchase Agreement) for that trading day. Subject to the satisfaction of the conditions under the Purchase Agreement, the Company deliver Advance Notices from time to time, provided that the Pricing Period for all prior advances has been completed. For these purposes, "Pricing Period" means one trading day, as notified by the Company to Arena in the applicable Advance Notice, commencing on the date of the Advance Notice. The purchase price of the shares of Common Stock will be equal to 97% of the simple average of the daily VWAP of the Common Stock during the Pricing Period.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Unless earlier terminated as provided in the Purchase Agreement, the Purchase Agreement will terminate automatically on the earliest to occur of: (i) the first day of the month next following the 36-month anniversary of the date of the Purchase Agreement; and (ii) the date on which Arena shall have purchased shares of Common Stock under the Purchase Agreement for an aggregate gross purchase price equal to Commitment Amount under the Purchase Agreement. The Company has the right to terminate the Purchase Agreement at any time, at no cost or penalty, upon five trading days' prior written notice to Arena, provided that there are no outstanding Advance Notices the shares of Common Stock under which have not yet been issued. The Company places its cash with high-credit-quality financial institutions. At times, such cash may be in excess of the Federal Deposit Insurance Corporation (“FDIC”) insurance coverage limit of $250,000 per depositor. As a result, there could be a concentration of credit risk related to amounts on deposit in excess of FDIC insurance coverage. The Company has not experienced any losses due to these excess deposits and believes the risk is not significant. With respect to trade receivables, management routinely assesses the financial strength of its customers and, as a consequence, believes that the receivable credit risk exposure is limited.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-

Access to the Company’s software products usually requires immediate payment but can extend several months under certain circumstances. Management periodically and regularly reviews customer account activity in order to assess the adequacy of allowances for doubtful accounts, considering such factors as economic conditions and each customer’s payment history and creditworthiness. If the financial condition of our customers were to deteriorate, or if they were otherwise unable to make payments in accordance with management’s expectations, we might have to increase our allowance for doubtful accounts, modify their financial terms and/or pursue alternative collection methods.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company has no significant customers (greater than 10% of total revenue) in its 2023 and 2022 revenue. Commercial Code (“UCC”) (Arizona Revised Statutes 47-611) purporting to set a foreclosure sale, under the UCC, of its assets that were previously pledged as security to
Sonoran Pacific Resources, LLP, an Arizona limited liability partnership (“SPR”) and Jerry Smith (“Smith”) (collectively, the “lender”). On November 1, 2022, iCoreConnect
entered into a settlement agreement and release (the “Settlement Agreement”) with SPR and Smith in connection with the above litigation. In order to resolve all matters
subject to the dispute, the Settlement Agreement provided that on, or before, the 60th day following the effective date of the Settlement Agreement, which was November 1,
2022 (such 60th day, the “Payment Date”), iCoreConnect shall redeem, and/or or iCoreConnect’s designees shall acquire, a total of 9,000,000 shares of iCoreConnect Common
Stock from SPR and certain shareholders or affiliates of SPR at a purchase price of $0.08 per share. The Settlement Agreement further provided that in addition to the
purchase of the foregoing 9,000,000 shares, iCoreConnect or its designee will have the option, but not the obligation, to acquire or redeem any or all of the remaining
5,401,887 shares held by certain shareholders or affiliates of SPR on, or before, the Payment Date, at the cost of $0.08 per share. In connection with the dispute, iCoreConnect
had previously posted a cash bond of $200,000 with the court. Pursuant to the Settlement Agreement, $100,000 was released to SPR upon execution of the Settlement
Agreement, which amount will be credited toward the payment of the 9,000,000 shares described above. The foregoing share purchase obligation was satisfied on December
30, 2022. Upon the payment for the shares, the remaining $100,000 of the bond was released to SPR in consideration for the release of all claims and liens and the dismissal
of the litigation. Upon iCoreConnect’s compliance with the above share repurchase obligations, J.D. Smith, the son of Jerry Smith, resigned as a director and chairman of
Board of Directors. The Settlement Agreement provides that upon the performance of each of the parties of their obligations thereunder, SPR and Smith, on the one hand, and
iCoreConnect, on the other hand, each agrees to a complete release of the other party or parties. The Settlement Agreement was fully completed on December 30, 2022 and a
full release received from the courts. </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt;

(the “Agreement”) with Preferred Dental Development, LLC (the “Seller”). The Seller was engaged in the business of providing dental billing and claims services. Pursuant to
the Agreement, the Company purchased the assets of the Seller utilized in the Seller’s business. As consideration for the acquired assets: (i) the Company issued a note to the
Seller in the amount of $1,200,000, and (ii) the Company issued to Seller $400,000 worth of shares of Company common stock at $10.00 per share totaling 40,000 shares.

then Chief Operating Officer, a related party with a maturity date six (6) months after issuance with an interest charge of 14% per annum which shall accrue and be paid on the maturity date. The Company has the right to prepay this note without penalty. At maturity in November 2022, this note including accrued interest totaling $107,500 was reissued under the same terms with a maturity of date of three (3) months. The Company also issued to the Holder a warrant to purchase 18,813 shares of Company Common Stock with a 5-year term. The exercise price per share of Common stock under this Warrant is $0.25 per share for 9,407 warrants and $0.20 per share for 9,406 warrants. In March 2023, the term of this note was extended to September 1, 2023. In June 2023 the Company signed a $145,010 unsecured promissory note with the same lender with a maturity date of September 1, 2023 after issuance with an interest rate charge of 18% per annum which shall accrue and be paid on the maturity date. The Company has the right to prepay this note without penalty. In October 2023 after the maturity of the notes, the Company entered into two separate new notes; (a) $200,000 Promissory Note with 12% interest per annum which shall be paid on the maturity date which is December 31, 2023. In conjunction with the issuance of the Promissory Note, the Company also issued the investor a five-year warrant (the “Warrant”) to purchase 14,000 shares of Company common stock with an exercise price of $2.16 per share, which was 120% of the closing price of the Company’s common stock on the date of issuance; (b) the Company issued the investor a convertible promissory note in principal amount of $94,685.91 The maturity of the Convertible Promissory Note is May 26, 2024 and carries an interest rate of 12% per annum and is initially convertible into Company common stock at a conversion rate of $1.80 per share, which was the closing price of the Company’s common stock on the date of issuance. In conjunction with the Convertible Promissory Note, the Company also issued the investor 6,629 shares of Company common stock and a five-year warrant to purchase 6,629 shares of Company common stock with an exercise price of $2.15 per share, which was 120% of the closing price of the Company’s common stock on the date of issuance. In December 2023, the Company entered into an amendment with holder of an Amendment to Convertible Promissory Notes issued in October 2023 whereby the holder of the Note agreed that the Note would not be convertible into shares of Company Common Stock unless and until the Company’s shareholders approve such conversion per NASDAQ Listing Rule 5635(d). The Company and the Note holder also entered into amendments to the warrants to purchase common stock issued in connection with the issuance of the Note, pursuant to which the holder of the Warrants agreed that the Warrants would not become exercisable unless and until the Company’s shareholders approve the exercise of the Warrants pursuant to NASDAQ Listing Rule 5635(d).The promissory notes are subordinated to the Company’s senior lenders. Pursuant to the terms and conditions of the Purchase Agreement, the Investors agreed to purchase from the Company unsecured convertible notes in the aggregate principal amount of up to $2,375,000. The Purchase Agreement contemplates funding of the investment across two tranches. At the first closing (the “Initial Closing”) an aggregate principal amount of $1,375,000 will be issued upon the satisfaction of certain customary closing conditions in exchange for aggregate gross proceeds of $1,250,000, representing an original issue discount of 10%. On such date (the “Initial Closing Date”), the Company will also issue the Investors 85,174 shares of Company common stock (the “Commitment Shares”). Subject to satisfying the conditions discussed below, the Company has the right under the Purchase Agreement, but not the obligation, to require that the Investors purchase additional Notes at one additional closing. Upon notice, the Company may require that the Investors purchase an additional aggregate principal amount of $1,100,000 of Notes, in exchange for aggregate gross proceeds of $1,000,000, if, among other items, (i) the Registration Statement (as described below) is effective; and (ii) the Shareholder Approval (as described below) has been obtained. The Notes will mature 12 months from their respective issuance date (the “Maturity Date”), unless earlier converted. Commencing on the six-month anniversary of the issue date, the Company will be required to make monthly amortization payments pursuant to the Note of approximately 1/6th of the principal amount of the Note per month (the “Amortization Payments”). The Notes will be the Company’s unsecured obligations and equal in right of payment with all of our other indebtedness and other indebtedness of any of our subsidiaries. The Notes were issued with an original issue discount of 10.0% per annum, and will not accrue additional interest during the term; provided that the interest rate of the Notes will automatically increase to 16% per annum (the “Default Rate”) upon the occurrence and continuance of an event of default. Each holder of Notes may convert all, or any part, of the outstanding Notes, at any time at such holder’s option, into shares of the Company’s common stock at an initial “Conversion Price” of $1.848 per share, which is subject to proportional adjustment upon the occurrence of any stock split, stock dividend, stock combination and/or similar transactions. With limited exceptions, if the Company at any time while a Note is outstanding, issues any common stock or securities entitling any person or entity to acquire shares of common stock (upon conversion, exercise or otherwise), at an effective price per share less than the Conversion Price then the Conversion Price shall be reduced to the same price as the new investment. A holder shall not have the right to convert any portion of a Note to the extent that, after giving effect to such conversion, the holder (together with certain related parties) would beneficially own in excess of 4.99%, or the “Maximum Percentage”, of shares of the Company’s common stock outstanding immediately after giving effect to such conversion. If the Company fails to make any Amortization Payments when due, then each holder may alternatively elect to convert all or any portion of such holder’s Notes at a conversion price equal to the lesser of (i) the Conversion Price, and (ii) 90% of the lowest VWAP of the common stock during the five (5) consecutive trading days immediately prior to such conversion. The Company maintains an allowance for doubtful accounts for estimated losses resulting from the potential inability of certain customers to make required future payments on amounts due. Management determines the adequacy of this allowance by periodically evaluating the aging and past due nature of individual customer accounts receivable balances and considering the customer’s current financial situation as well as the existing industry economic conditions and other relevant factors that would be useful in assessing the risk of collectability. If the future financial condition of the Company’s customers were to deteriorate, resulting in their inability to make specific required payments, additions to the allowance for doubtful accounts may be required. In addition, if the financial condition of customers improves and collections of amounts outstanding commence or are reasonably assured, then the Company may reverse previously established allowances for doubtful accounts. The Company has estimated and recorded an allowance for doubtful accounts of approximately $37,097 at March 31, 2024 and $102,061 December 31, 2023. </p><p style="font-size:10pt;font-family:times new roman;margin:0px"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Software Development Costs and Acquired Software</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company accounts for software development costs, including costs to develop software products or the software component of products to be sold to external users. This accounting standard requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. As part of its impairment assessment in 2023 the Company determined that the carrying value of an intangible asset for customer list exceed its fair value and as such recorded an impairment expense in quarter 4 of 2023 in the amount of $105,676. This guidance sets forth a five-step revenue recognition model which replaced the prior revenue recognition guidance in its entirety and is intended to eliminate numerous industry-specific pieces of revenue recognition guidance and to require more detailed disclosures. The five steps of the revenue recognition model are: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; and (5) recognize revenue when (or as) the entity satisfies a performance obligation.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">At contract inception, the Company assesses the goods and services promised in the contract with customers and identifies a performance obligation for each. To determine the performance obligation, the Company considers all products and services promised in the contract regardless of whether they are explicitly stated or implied by customary business practices. The timing of satisfaction of the performance obligation is not subject to significant judgment. The Company measures revenue as the amount of consideration expected to be received in exchange for transferring goods and services. Revenue is recognized net of any taxes collected from customers that are subsequently remitted to governmental authorities.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company’s customers are acquired through its own salesforce and through the referrals from its many state association marketing partners. The Company primarily generates revenue from multiple software as a service (SaaS) offerings, which typically include subscriptions to its online software solutions. The Company’s secondary source of revenue is professional services and other revenue related to customer onboarding, IT services and equipment sales that often precede a subscription service offering purchased by the customer. Approximately 90% of the Company’s revenue is subscription based with the remainder being professional services and other IT related revenue. Revenue from Software as a Service, hardware, service repairs, and support & maintenance are all recognized at a point in time when control of the goods is transferred to the customer, generally occurring upon shipment or delivery dependent upon the terms of the underlying contract, or services is completed. Our customers do not have the right to take possession of the online software solution. Revenue from subscriptions, including additional fees for items such as incremental contacts, is recognized ratably over the subscription period beginning on the date the subscription is made available to customers. Substantially all subscription contracts are one year. We recognize revenue from on-boarding services and equipment as the services are provided. Amounts billed that have not yet met the applicable revenue recognition criteria are recorded as deferred revenue.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">For contracts with customers that contain multiple performance obligations, the Company accounts for the promised performance obligations separately as individual performance obligations if they are distinct. In determining whether performance obligations meet the criteria for being distinct, the Company considers several factors, including the degree of interrelation and interdependence between obligations and whether or not the good or service significantly modifies or transforms another good or service in the contract. After identifying the separate performance obligations, the transaction price is allocated to the separate performance obligations on a relative standalone selling price basis. The Company generally determines the standalone selling prices based on the prices charged to customers. Judgment may be used to determine the standalone selling prices for items that are not sold separately, including taking into consideration either historical pricing practices or an adjusted market assessment. Unsatisfied and partially unsatisfied performance obligations as of the end of the reporting period primarily consist of products and services for which customer purchase orders have been accepted and that are in the process of being delivered.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Transaction price is calculated as the selling price less any variable consideration, consisting of rebates and discounts. Discounts provided to customers are known at contract inception. Rebates are calculated on the “expected value” method where the Company (1) estimates the probability of each rebate amount which could be earned by the distributor, (2) multiplies each estimated amount by its assigned probability factor, and (3) calculates a final sum of each of the probability-weighted amounts calculated in step (2). The sum calculated in step (3) is the rebate amount, which along with discounts reduces the amount of revenue recognized.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company has elected to account for shipping and handling activities that occur after the customer has obtained control of a good as a fulfillment cost rather than as an additional promised service. The Company records a beneficial conversion feature (“BCF”) related to the issuance of convertible debt that has conversion features at fixed or adjustable rates that are in-the-money when issued and records the relative fair value of any warrants issued with those instruments. The BCF for the convertible instruments is recognized and measured by allocating a portion of the proceeds to the warrants and as a reduction to the carrying amount of the convertible instrument equal to the intrinsic value of the conversion features, both of which are credited to additional paid-in capital. The Company calculates the fair value of warrants with the convertible instruments using the Black-Scholes valuation model.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Under these guidelines, the Company first allocates the value of the proceeds received from a convertible debt transaction between the convertible debt instrument and any other detachable instruments included in the transaction (such as warrants) on a relative fair value basis. A BCF is then measured as the intrinsic value of the conversion option at the commitment date, representing the difference between the effective conversion price and the Company's stock price on the commitment date multiplied by the number of shares into which the debt instrument is convertible. The allocated value of the BCF and warrants are recorded as a debt discount and accreted over the expected term of the convertible debt as interest expense. If the intrinsic value of the BCF is greater than the proceeds allocated to the convertible debt instrument, the amount of the discount assigned to the BCF is limited to the amount of the proceeds allocated to the convertible debt instrument.</p><p style="font-size:10pt;font-family:times new roman;margin:0px"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Leases </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company adopted ASU No. 2016-02, Leases and a series of related Accounting Standards Updates that followed (collectively referred to as "Topic 842"). The classification criteria for distinguishing between finance leases and operating leases are substantially similar to the classification criteria for distinguishing between capital leases and operating leases in the previous lease guidance. The FASB retained the distinction between finance leases and operating leases, leaving the effect of leases in the statement of comprehensive income and the statement of cash flows largely unchanged from previous U.S. GAAP. The Company utilized the transition method allowed under ASU 2018-11 in which an entity initially applies the new lease standard at the adoption date and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption, if any.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company determines, at contract inception, whether or not an arrangement contains a lease and evaluates the contract for classification as an operating or finance lease. For all leases, ROU assets and lease liabilities are recognized based on the present value of lease payments, including annual rent increases, over the lease term at commencement date. If the Company's lease does not provide an implicit rate in the contract, the Company uses its incremental, secured borrowing rate based on lease term information available as of the adoption date or lease commencement date in determining the present value of lease payments. Any renewal periods are considered in the analysis of each lease to the extent that the Company considers them to be reasonably certain of being exercised. </p> <p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Business Combinations </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company applies the principles provided in the Financial Accounting Standards Board (FASB) Accounting Standards Codification ("ASC") 805, Business Combinations, to determine whether an acquisition involves an asset or a business. ASC 350 requires that goodwill and other intangibles with indefinite lives be tested for impairment annually or on an interim basis if events or circumstances indicate that the fair value of an asset has decreased below its carrying value. The Company assess goodwill impairment by the amount by which the carrying value exceeds its fair value, not to exceed the carrying amount of goodwill. As of March 31, 2024 and December 31, 2023 there was no impairment of the Company's Goodwill.</p>105676<p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">We have 6 primary sources of revenue as of March 31, 2024 and December 31, 2023:</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">We have 6 primary sources of revenue</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><table cellpadding="0" style="border-spacing:0;font-size:10pt;width:100%"><tbody><tr style="height:15px"><td style="width:4%;"><p style="font-size:10pt;font-family:times new roman;margin:0px"> </p></td><td style="width:4%;vertical-align:top;"><p style="font-size:10pt;font-family:times new roman;margin:0px">1. </p></td><td style="vertical-align:top;"><p style="font-size:10pt;font-family:times new roman;margin:0px">Electronic Prescription Software </p></td></tr><tr style="height:15px"><td><p style="font-size:10pt;font-family:times new roman;margin:0px"> </p></td><td style="vertical-align:top;"><p style="font-size:10pt;font-family:times new roman;margin:0px">2. </p></td><td style="vertical-

This guidance sets forth a five-step revenue recognition model which replaced the prior revenue recognition guidance in its entirety and is intended to eliminate numerous industry-specific pieces of revenue recognition guidance and to require more detailed disclosures. The five steps of the revenue recognition model are: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; and (5) recognize revenue when (or as) the entity satisfies a performance obligation.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">At contract inception, the Company assesses the goods and services promised in the contract with customers and identifies a performance obligation for each. To determine the performance obligation, the Company considers all products and services promised in the contract regardless of whether they are explicitly stated or implied by customary business practices. The timing of satisfaction of the performance obligation is not subject to significant judgment. The Company measures revenue as the amount of consideration expected to be received in exchange for transferring goods and services. Revenue is recognized net of any taxes collected from customers that are subsequently remitted to governmental authorities.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company’s customers are acquired through its own salesforce and through the referrals from its many state association marketing partners. The Company primarily generates revenue from multiple software as a service (SaaS) offerings, which typically include subscriptions to its online software solutions. The Company’s secondary source of revenue is professional services and other revenue related to customer onboarding, IT services and equipment sales that often precede a subscription service offering purchased by the customer. Approximately 90% of the Company’s revenue is subscription based with the remainder being professional services and other IT related revenue. The geographic concentration of the Company’s revenue is 100% in North America.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">For the three months ended March 31, 2024 and 2022, disaggregated revenues were recurring revenues of $2,595,050 and $1,703,815, respectively and non-recurring revenues of $128,313 and $136,556, respectively.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Management has determined that it has the following performance obligations related to its products and services: multiple SaaS offerings, which typically include subscriptions to our online software solutions. Revenue from Software as a Service, hardware, service repairs, and support & maintenance are all recognized at a point in time when control of the goods is transferred to the customer, generally occurring upon shipment or delivery dependent upon the terms of the underlying contract, or services is completed. Our customers do not have the right to take possession of the online software solution. Revenue from subscriptions, including additional fees for items such as incremental contacts, is recognized ratably over the subscription period beginning on the date the subscription is made available to customers. Substantially all subscription contracts are one year. We recognize revenue from on-boarding services and equipment as the services are provided. Amounts billed that have not yet met the applicable revenue recognition criteria are recorded as deferred revenue.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">For contracts with customers that contain multiple performance obligations, the Company accounts for the promised performance obligations separately as individual performance obligations if they are distinct. In determining whether performance obligations meet the criteria for being distinct, the Company considers several factors, including the degree of interrelation and interdependence between obligations and whether or not the good or service significantly modifies or transforms another good or service in the contract. After identifying the separate performance obligations, the transaction price is allocated to the separate performance obligations on a relative standalone selling price basis. The Company generally determines the standalone selling prices based on the prices charged to customers. Judgment may be used to determine the standalone selling prices for items that are not sold separately, including taking into consideration either historical pricing practices or an adjusted market assessment. Unsatisfied and partially unsatisfied performance obligations as of the end of the reporting period primarily consist of products and services for which customer purchase orders have been accepted and that are in the process of being delivered.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Transaction price is calculated as the selling price less any variable consideration, consisting of rebates and discounts. Discounts provided to customers are known at contract inception. Rebates are calculated on the “expected value” method where the Company (1) estimates the probability of each rebate amount which could be earned by the distributor, (2) multiplies each estimated amount by its assigned probability factor, and (3) calculates a final sum of each of the probability-weighted amounts calculated in step (2). The sum calculated in step (3) is the rebate amount, which along with discounts reduces the amount of revenue recognized.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company has elected to account for shipping and handling activities that occur after the customer has obtained control of a good as a fulfillment cost rather than as an additional promised service. As a result, the Company accrues the costs of shipping and handling when the related revenue is recognized. Costs incurred for shipping and handling are included in costs of goods sold on the Consolidated Statements of Operations. Amounts billed to a customer for shipping and handling are reported as revenue on the Consolidated Statements of Operations.</p>25950501703815128313136556<p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Advertising costs are reported in selling, general and administrative expenses and include advertising, marketing and promotional programs and are charged as expenses in the year in which they are incurred. ASU 2017-11 simplifies the accounting for certain financial instruments with down round features, a provision in an equity-linked financial instrument (or embedded feature) that provides a downround adjustment of the current exercise price based on the price of the future equity offerings. The standard requires companies to disregard the down round feature when assessing whether the instrument is indexed to its own stock, for the purposes of determining liability of equity classification. Companies that provide earning per share (“EPS”) data will adjust their diluted EPS calculation for the effect of the feature when triggered (i.e. when the exercise price of the related equity-linked financial instrument is adjusted downward because of the down round feature) and will also recognize the effect of the trigger within equity.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company follows the asset and liability approach to accounting for income taxes. Under this method, deferred tax assets and liabilities are measured based on differences between the financial reporting and tax bases of assets and liabilities measured using enacted tax rates and laws that are expected to be in effect when differences are expected to reverse. Valuation allowances are established when it is necessary to reduce deferred income tax assets to the amount, if any, expected to be realized in future years.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">ASC 740, Accounting for Income taxes (“ASC 740”), requires that deferred tax assets be evaluated for future realization and reduced by a valuation allowance to the extent we believe a portion more likely than not will not be realized. We consider many factors when assessing the likelihood of future realization of our deferred tax assets, including our recent cumulative loss experience and expectations of future taxable income by taxing jurisdictions, the carry forwarding periods available to us for tax reporting purposes and other relevant factors.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company has not recognized a liability for uncertain tax positions. A reconciliation of the beginning and ending amount of unrecognized tax benefits or penalties has not been provided since there has been no unrecognized benefit or penalty. If there were an unrecognized tax benefit or penalty, the Company would recognize interest accrued related to unrecognized tax benefits in interest expense and penalties in operating expenses. The Company files U.S. Federal income tax returns and various returns in state jurisdictions. The Company’s open tax years subject to examination by the Internal Revenue Service and the state Departments of Revenue generally remain open for three years from the date of filing.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Basic net loss per share is computed by dividing net loss by the weighted average number of shares of Common Stock outstanding for the period. Diluted net loss per share reflects the potential dilution of securities by adding other Common Stock equivalents, including stock options, shares issuable on exercise of warrants, convertible preferred stock and convertible notes in the weighted average number of common shares outstanding for a period, if dilutive. Common stock equivalents that are anti-dilutive were excluded from the computation of diluted earnings per share which consisted of all outstanding common stock options and warrants.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company evaluates the conversion feature of convertible debt instruments to determine whether the conversion feature was beneficial as described in ASC 470-30, Debt with Conversion and Other Options. The Company records a beneficial conversion feature (“BCF”) related to the issuance of convertible debt that has conversion features at fixed or adjustable rates that are in-the-money when issued and records the relative fair value of any warrants issued with those instruments. The BCF for the convertible instruments is recognized and measured by allocating a portion of the proceeds to the warrants and as a reduction to the carrying amount of the convertible instrument equal to the intrinsic value of the conversion features, both of which are credited to additional paid-in capital. The Company calculates the fair value of warrants with the convertible instruments using the Black-Scholes valuation model.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Under these guidelines, the Company first allocates the value of the proceeds received from a

convertible debt transaction between the convertible debt instrument and any other detachable instruments included in the transaction (such as warrants) on a relative fair value basis. A BCF is then measured as the intrinsic value of the conversion option at the commitment date, representing the difference between the effective conversion price and the Company's stock price on the commitment date multiplied by the number of shares into which the debt instrument is convertible. The allocated value of the BCF and warrants are recorded as a debt discount and accreted over the expected term of the convertible debt as interest expense. If the intrinsic value of the BCF is greater than the proceeds allocated to the convertible debt instrument, the amount of the discount assigned to the BCF is limited to the amount of the proceeds allocated to the convertible debt instrument.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company adopted ASU No. 2016-02, Leases and a series of related Accounting Standards Updates that followed (collectively referred to as "Topic 842"). Topic 842 requires organizations to recognize right-of-use ("ROU") lease assets and lease liabilities on the balance sheet and to disclose key information about leasing arrangements. The classification criteria for distinguishing between finance leases and operating leases are substantially similar to the classification criteria for distinguishing between capital leases and operating leases in the previous lease guidance. The FASB retained the distinction between finance leases and operating leases, leaving the effect of leases in the statement of comprehensive income and the statement of cash flows largely unchanged from previous U.S. GAAP. The Company utilized the transition method allowed under ASU 2018-11 in which an entity initially applies the new lease standard at the adoption date and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption, if any.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company determines, at contract inception, whether or not an arrangement contains a lease and evaluates the contract for classification as an operating or finance lease. For all leases, ROU assets and lease liabilities are recognized based on the present value of lease payments, including annual rent increases, over the lease term at commencement date. If the Company's lease does not provide an implicit rate in the contract, the Company uses its incremental, secured borrowing rate based on lease term information available as of the adoption date or lease commencement date in determining the present value of lease payments. Any renewal periods are considered in the analysis of each lease to the extent that the Company considers them to be reasonably certain of being exercised.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company applies the principles provided in the Financial Accounting Standards Board (FASB) Accounting Standards Codification ("ASC") 805, Business Combinations, to determine whether an acquisition involves an asset or a business. In determining whether an acquisition should be accounted for as a business combination or asset acquisition, The Company first determines whether substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or a group of similar identifiable assets. If this is the case, the single identifiable asset or the group of similar assets is accounted for as an asset acquisition. If this is not the case, The Company then further evaluate whether the single identifiable asset or group of similar identifiable assets and activities includes, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs. If so, the transaction is accounted for as a business combination.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company accounts for business combinations using the acquisition method of accounting which requires that (i) identifiable assets acquired (including identifiable intangible assets) and liabilities assumed generally be measured and recognized at estimated fair value as of the acquisition date and (ii) the excess of the purchase price over the net estimated fair value of identifiable assets acquired and liabilities assumed be recognized as goodwill, which is not amortized for accounting purposes but is subject to testing for impairment at least annually. </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company measures and recognizes asset acquisitions that are not deemed to be business combinations based on the cost to acquire the assets. Goodwill is not recognized in an asset acquisition with any consideration in excess of net assets acquired allocated to acquired assets on a relative estimated fair value basis. Transaction costs are expensed in a business combination and transaction costs directly attributable to an asset acquisition are considered a component of the cost of the asset acquisition.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">On January 1, 2023, the Company adopted ASU 2016-13 Financial Instruments —Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments (ASC 326). This standard replaced the incurred loss methodology with an expected loss methodology that is referred to as the current expected credit loss ("CECL") methodology. CECL requires an estimate of credit losses for the remaining estimated life of the financial asset using historical experience, current conditions, and reasonable and supportable forecasts and generally applies to financial assets measured at amortized cost, including loan receivables and held-to-maturity debt securities, and some off-balance sheet credit exposures such as unfunded commitments to extend credit. Financial assets measured at amortized cost will be presented at the net amount expected to be collected. </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">The Company completed its assessment on the adoption date of the new standard and did not adjust the opening balance of retained earnings relating to its trade receivables. The standard is intended to improve reportable segment disclosure requirements, primarily through enhanced disclosures about significant expenses. The standard requires disclosure to include significant segment expenses that are regularly provided to the CODM, a description of other segment items by reportable segment, and any additional measures of a segment's profit or loss used by the CODM when deciding how to allocate resources. The standard also requires all annual disclosures currently required by ASC Topic 280 to be included in interim periods. This standard is effective for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024, with early adoption permitted and requires retrospective application to all prior periods presented in the financial statements. The Company completed its assessment of the new standard and determined that the standard did not apply as the Company currently only has one reportable segment.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">Not Yet Adopted</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;">In October 2023, the FASB issued Accounting Standards Update ("ASU") 2023-06, "Disclosure Improvements – Codification Amendments in Response to the SEC's Disclosure Update and Simplification Initiative." securities purchase agreement (the “Purchase Agreement”) with certain institutional investors (the “Investors”). Pursuant to the terms and conditions of the Purchase
Agreement, the Investors agreed to purchase from the Company unsecured convertible notes in the aggregate principal amount of up to $2,375,000. The Purchase Agreement
contemplates funding of the investment across two tranches. At the first closing (the “Initial Closing”) an aggregate principal amount of $1,375,000 will be issued upon the
satisfaction of certain customary closing conditions in exchange for aggregate gross proceeds of $1,250,000, representing an original issue discount of 10%. On such date (the
“Initial Closing Date”), the Company will also issue the Investors 85,174 shares of Company common stock (the “Commitment Shares”). Subject to satisfying the conditions
discussed below, the Company has the right under the Purchase Agreement, but not the obligation, to require that the Investors purchase additional Notes at one additional
closing. Upon notice, the Company may require that the Investors purchase an additional aggregate principal amount of $1,100,000 of Notes, in exchange for aggregate gross
proceeds of $1,000,000, if, among other items, (i) the Registration Statement (as described below) is effective; and (ii) the Shareholder Approval (as described below) has been
obtained. The Notes will mature 12 months from their respective issuance date (the “Maturity Date”), unless earlier converted. Commencing on the six-month anniversary of
the issue date, the Company will be required to make monthly amortization payments pursuant to the Note of approximately 1/6th of the principal amount of the Note per
month (the “Amortization Payments”). The Notes will be the Company’s unsecured obligations and equal in right of payment with all of our other indebtedness and other
indebtedness of any of our subsidiaries. The Notes were issued with an original issue discount of 10.0% per annum, and will not accrue additional interest during the term;
provided that the interest rate of the Notes will automatically increase to 16% per annum (the “Default Rate”) upon the occurrence and continuance of an event of default.
Each holder of Notes may convert all, or any part, of the outstanding Notes, at any time at such holder’s option, into shares of the Company’s common stock at an initial
“Conversion Price” of $1.848 per share, which is subject to proportional adjustment upon the occurrence of any stock split, stock dividend, stock combination and/or similar
transactions. With limited exceptions, if the Company at any time while a Note is outstanding, issues any common stock or securities entitling any person or entity to acquire
shares of common stock (upon conversion, exercise or otherwise), at an effective price per share less than the Conversion Price then the Conversion Price shall be reduced to
the same price as the new investment. A holder shall not have the right to convert any portion of a Note to the extent that, after giving effect to such conversion, the holder
(together with certain related parties) would beneficially own in excess of 4.99%, or the “Maximum Percentage”, of shares of the Company’s common stock outstanding
immediately after giving effect to such conversion. If the Company fails to make any Amortization Payments when due, then each holder may alternatively elect to convert all
or any portion of such holder’s Notes at a conversion price equal to the lesser of (i) the Conversion Price, and (ii) 90% of the lowest VWAP of the common stock during the five
(5) consecutive trading days immediately prior to such conversion. The Company received a waiver for untimely filing of its regulatory reporting requirements from the lender.

described below) is effective; and (ii) the Shareholder Approval (as described below) has been obtained. The Notes will mature 12 months from their respective issuance date
(the “Maturity Date”), unless earlier converted. Commencing on the six-month anniversary of the issue date, the Company will be required to make monthly amortization
payments pursuant to the Note of approximately 1/6th of the principal amount of the Note per month (the “Amortization Payments”). The Notes will be the Company’s
unsecured obligations and equal in right of payment with all of our other indebtedness and other indebtedness of any of our subsidiaries. The Notes were issued with an
original issue discount of 10.0% per annum, and will not accrue additional interest during the term; provided that the interest rate of the Notes will automatically increase to
16% per annum (the “Default Rate”) upon the occurrence and continuance of an event of default. Each holder of Notes may convert all, or any part, of the outstanding Notes,
at any time at such holder’s option, into shares of the Company’s common stock at an initial “Conversion Price” of $1.848 per share<p style="FONT-SIZE: 10pt; FONT-

In conjunction with the issuance of the Promissory Note, the Company also issued the investor a five-year warrant (the “Warrant”) to purchase 14,000 shares of Company common stock with an exercise price of $2.16 per share, which was 120% of the closing price of the Company’s common stock on the date of issuance; (b) the Company issued the investor a convertible promissory note in principal amount of $94,685.91 The maturity of the Convertible Promissory Note is May 26, 2024 and carries an interest rate of 12% per annum and is initially convertible into Company common stock at a conversion rate of $1.80 per share, which was the closing price of the Company’s common stock on the date of issuance. In conjunction with the Convertible Promissory Note, the Company also issued the investor 6,629 shares of Company common stock and a five-year warrant to purchase 6,629 shares of Company common stock with an exercise price of $2.15 per share, which was 120% of the closing price of the Company’s common stock on the date of issuance. In December 2023, the Company entered into an amendment with holder of an Amendment to Convertible Promissory Notes issued in October 2023 whereby the holder of the Note agreed that the Note would not be convertible into shares of Company Common Stock unless and until the Company’s shareholders approve such conversion per NASDAQ Listing Rule 5635(d). The Company and the Note holder also entered into amendments to the warrants to purchase common stock issued in connection with the issuance of the Note, pursuant to which the holder of the Warrants agreed that the Warrants would not become exercisable unless and until the Company’s shareholders approve the exercise of the Warrants pursuant to NASDAQ Listing Rule 5635(d). On April 8, 2024 with an effective date of January 1, 2024, the Company entered into a securities purchase agreement with a related party pursuant to which the Company issued the related party a convertible note in the principal amount of $200,000 in exchange for $200,000. The maturity of the convertible note is April 30, 2024 and carries an interest rate of 12% per annum and is initially convertible into Company common stock at a conversion rate equal to 120% of the closing price of the Company’s common stock on the date of issuance. In conjunction with the April 8, 2024 Note, we issued the investor a five-year warrant to purchase 30,000 shares of our common stock with an exercise price of $1.50. the Company to concentrations of credit risk consist of cash and trade accounts receivables. The Company places its cash with high-credit-quality financial institutions. At
times, such cash may be in excess of the Federal Deposit Insurance Corporation (“FDIC”) insurance coverage limit of $250,000 per depositor. As a result, there could be a
concentration of credit risk related to amounts on deposit in excess of FDIC insurance coverage. The Company has not experienced any losses due to these excess deposits and
believes the risk is not significant. With respect to trade receivables, management routinely assesses the financial strength of its customers and, as a consequence, believes
that the receivable credit risk exposure is limited.</p><p style="FONT-SIZE: 10pt; FONT-FAMILY: times new roman; MARGIN: 0px; text-align:justify;"> </p><p style="FONT-

management views as industry norms. Access to the Company’s software products usually requires immediate payment but can extend several months under certain
circumstances. Management periodically and regularly reviews customer account activity in order to assess the adequacy of allowances for doubtful accounts, considering
such factors as economic conditions and each customer’s payment history and creditworthiness. If the financial condition of our customers were to deteriorate, or if they were
otherwise unable to make payments in accordance with management’s expectations, we might have to increase our allowance for doubtful accounts, modify their financial

May 8, 2024, The Company executed a securities purchase agreement (the “Purchase Agreement”) with an institutional investor (the “Investor”). Pursuant to the terms and
conditions of the Purchase Agreement, the Investor agreed to purchase from the Company unsecured convertible notes in the aggregate principal amount of $304,700. At
closing an aggregate principal amount of $304,700 will be issued upon the satisfaction of certain customary closing conditions in exchange for aggregate gross proceeds of
$277,000, representing an original issue discount of 10%. On such date, the Company will also issue the Investors 17,034 shares of Company common stock (the “Commitment
Shares”). The Note will mature 12 months from its respective issuance date (the “Maturity Date”), unless earlier converted. Commencing on the six-month anniversary of the
issue date, the Company will be required to make monthly amortization payments pursuant to the Note of approximately 1/6th of the principal amount of the Note per month
(the “Amortization Payments”). The Note will be the Company’s unsecured obligations and equal in right of payment with all of our other indebtedness and other indebtedness
of any of our subsidiaries. The Notes were issued with an original issue discount of 10.0% per annum, and will not accrue additional interest during the term; provided that
the interest rate of the Notes will automatically increase to 16% per annum (the “Default Rate”) upon the occurrence and continuance of an event of default. Each holder of
Note may convert all, or any part, of the outstanding Note, at any time at such holder’s option, into shares of the Company’s common stock at an initial “Conversion Price” of
$1,416 per share, which is subject to proportional adjustment upon the occurrence of any stock split, stock dividend, stock combination and/or similar transactions. With
limited exceptions, if the Company at any time while a Note is outstanding, issues any common stock or securities entitling any person or entity to acquire shares of common
stock (upon conversion, exercise or otherwise), at an effective price per share less than the Conversion Price then the Conversion Price shall be reduced to the same price as
the new investment. A holder shall not have the right to convert any portion of a Note to the extent that, after giving effect to such conversion, the holder (together with
certain related parties) would beneficially own in excess of 4.99%, or the “Maximum Percentage”, of shares of the Company’s common stock outstanding immediately after
giving effect to such conversion. If the Company fails to make any Amortization Payments when due, then each holder may alternatively elect to convert all or any portion of
such holder’s Notes at a conversion price equal to the lesser of (i) the Conversion Price, and (ii) 90% of the lowest VWAP of the common stock during the five (5) consecutive
trading days immediately prior to such conversion. The Company received a waiver for untimely filing of its regulatory reporting requirements from the lender.</p><p
