Loans acquired are shown in the table by origination year, not merger date. The Company had an immaterial amount of revolving loans converted to term loans at September 30, 2024 and December 31, 2023.

BORROWING ARRANGEMENTS
  Subordinated Debt
 In December 2018, the Company issued $14.1 million of subordinated notes that have a maturity date of December 2030 and a weighted average fixed rate of 6.41% for the first seven years. After the fixed rate periods, these notes will float at the Wall Street Journal prime rate, with a floor of 4.0% and a ceiling of 7.5%. These notes pay interest quarterly, are unsecured, and may be called by the Company at any time after the remaining maturity is five years or less. Additionally, these notes are intended to qualify for Tier 2 capital treatment, subject to regulatory limitations.
  On September 29, 2020, the Company issued $50.0 million in subordinated debt notes. Proceeds were reduced by approximately $926 thousand in debt issuance costs. These notes have a maturity date of September 2030 with a fixed rate of 4.50% for the first five years. After the expiration of the fixed rate period, the<se notes will reset quarterly at a variable rate equal to the then current three-month Secured Overnight Financing Rate ("SOFR"), as published by the Federal Reserve Bank of New York, plus 438 basis points. These notes pay interest semi-annually, are unsecured, and may be called by the Company at any time after the remaining maturity is five years or less. Additionally, these notes are intended to qualify for Tier 2 capital treatment, subject to regulatory limitations.
 As of September 30, 2024, the total amount of subordinated notes outstanding was $64.1 million less approximately $186 thousand of remaining debt issuance costs for a total balance of $63.9 million. As of December 31, 2023, the total amount of subordinated notes outstanding was $64.1 million less approximately $325 thousand of remaining debt issuance costs for a total balance of $63.8 million.</div> <div>

STOCK-BASED COMPENSATION</div> <div>
 </div> <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt; font-style: italic;">Equity Incentive Plan</div> <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt;">The 2019 Equity Incentive Plan ("Plan") was approved by the Company's Board of Directors on January 16, 2019 and by its shareholders on March 6, 2019. The purpose of the Plan is to: (i) attract and retain the best available personnel for positions of substantial responsibility, (ii) provide additional incentive to employees, directors and consultants, and (iii) promote the success of the Company's business. The Plan permits the grant of incentive stock options, non-statutory stock options, stock appreciation rights, restricted stock, restricted stock units, performance units, performance shares, and other stock-based awards. The maximum aggregate number of shares of common stock that may be issued pursuant to all awards under the Plan was 4,919,509 at September 30, 2024. The maximum aggregate number of shares that may be issued under the Plan may be increased annually by up to 3% of the total issued and outstanding common shares of the Company at the beginning of each fiscal year.</div> <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt;">
 </div> <div style="text-align: justify;">The fair value of each option award is estimated on the date of grant using the Black-Scholes model that uses the assumptions noted in the table below. Expected volatilities are based on historical volatilities of the Company's common stock and similar peer company averages. The Company uses historical data to estimate option exercise and post-vesting termination behavior. The expected term of options granted represents the period of time that options granted are expected to be outstanding, which takes in to account that the options are not transferable. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of the grant.
 </div> <div>

OFF-BALANCE-SHEET ACTIVITIES, COMMITMENTS AND CONTINGENCIES
  <span style="font-size: 10pt; font-family: 'Times New Roman'; font-style: italic; background-color: rgb(255, 255, 255); font-weight: normal; color: rgb(0, 0, 0); font-variant: normal; text-transform: none;">Financial instruments with off-balance-sheet risk<span style="background-color: rgb(255, 255, 255); font-weight: normal; color: rgb(0, 0, 0); font-family: 'Times New Roman'; font-size: 10pt; font-style: normal; font-variant: normal; text-transform: none;"> - The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Company's consolidated financial statements. The Company's exposure to credit loss is represented by the contractual amount of these commitments. The Company follows the same credit policies in making commitments as it does for recorded instruments.
  Financial instruments whose contract amounts represent credit risk outstanding at the dates indicated follow (dollars in thousands):

  Commitments to grant loans and extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and

may require payment of a fee. The commitments for lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company, is based on management's credit evaluation of the customer.
  <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt; background-color: rgb(255, 255, 255); font-weight: normal; color: rgb(0, 0, 0); font-style: normal; font-variant: normal; text-transform: none;">Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those letters of credit are primarily issued to support public and private borrowing arrangements. Essentially all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company requires collateral supporting those commitments if deemed necessary. <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt; background-color: rgb(255, 255, 255); font-weight: normal; color: rgb(0, 0, 0); font-style: normal; font-variant: normal; text-transform: none;">
  FHLB letters of Credit - The Company may use FHLB letters of credit to pledge to certain public deposits. At September 30, 2024 there were FHLB letters of credit outstanding of $75.0 million. There were no FHLB letters of credit outstanding at December 31, 2023.</div> <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt;">
 </div> <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt;"> Litigation – The Company is a defendant in legal actions arising from time to time in the normal course of business. Management believes that the ultimate liability, if any, arising from these matters will not materially affect the consolidated financial statements, based on information known as of the date the consolidated financial statements were issued.

CAPITAL AND REGULATORY MATTERS</div> <div>
 </div> <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt;">The Company and its bank subsidiary are subject to various regulatory capital requirements administered by its banking regulators. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's and its bank subsidiary's financial statements. Under capital guidelines and the regulatory framework for prompt corrective action, the Company and its bank subsidiary must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Prompt corrective action provisions are not applicable to bank holding companies.</div> <div>
 </div> <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt;">Quantitative measures established by regulation to ensure capital adequacy require the Company and its bank subsidiary to maintain minimum amounts and ratios (set forth in the following table) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average assets (as defined). Management believes, as of September 30, 2024 and December 31, 2023, that the Company and its bank subsidiary met all capital adequacy requirements to which they are subject.</div> <div>
 </div> <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt;">As of September 30, 2024 and December 31, 2023, the Company met the definition of "well-capitalized" under the applicable regulations of the Board of Governors of the Federal Reserve System and the bank subsidiary was "well capitalized" under the FDIC's regulatory framework for prompt corrective action and the Basel III capital guidelines. To be categorized as well capitalized, an institution must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following tables. There are no conditions or events since September 30, 2024 that management believes have changed the bank subsidiary's category.</div> <div>
 </div> <div style="text-align: justify; font-family: 'Times New Roman'; font-size: 10pt;">The Company and its bank subsidiary's actual capital amounts and ratios at the dates indicated follows (dollars in thousands):</div> <div>

  <span style="background-color: rgb(255, 255, 255); font-weight: normal; color: rgb(0, 0, 0); font-family: 'Times New Roman'; font-size: 10pt; font-style: normal; font-variant: normal; text-transform: none;">The Company is subject to the Basel III capital ratio requirements which include a “capital conservation buffer” of 2.50% above the regulatory minimum risk-based capital adequacy requirements. This 2.50% capital conservation buffer is reflected in the table above. Both the Company’s and the Bank’s actual ratios, as outlined in the table above, exceeded the Basel III risk-based capital requirement with the capital conservation buffer as of September 30, 2024.

  State banking regulations place certain restrictions on dividends paid by banks to their shareholders. Dividends paid by the Company’s bank subsidiary would be prohibited if the effect thereof would cause the bank subsidiary’s capital to be reduced below applicable minimum capital requirements. The Company and its bank subsidiary’s actual capital amounts and ratios at the dates indicated follows (dollars in thousands):

These interest rate swaps are designated and qualify as fair value hedges and are entered into to reduce exposure to changes in fair value of fixed rate financial instruments. The notional amounts of the interest rate swaps do not represent amounts exchanged by the parties. The amount exchanged is determined by reference to the notional amounts and the other terms of the individual interest rate swap agreements.
 The following table reflects the changes in fair value hedges included in the Consolidated Statements of Comprehensive Income (Loss) for the periods indicated (dollars in thousands);

FAIR VALUE DISCLOSURES
  Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability is not adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are: (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.
  Valuation techniques that are consistent with the market approach, the income approach and/or the cost approach are required by GAAP. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset. Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy for valuation inputs gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:
  <table cellpadding="0" cellspacing="0" class="DSPFListTable" style="font-family: 'Times New Roman'; font-size: 10pt; width: 100%; text-align: left; color: #000000;"> <tr> <td style="width: 20.25pt;"></td> <td style="width: 27pt; vertical-align: top; font-family: 'Times New Roman'; font-size: 10pt;">●</td> <td style="width: auto; vertical-align: top; text-align: justify;"> Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. </td> </tr> </table> <table cellpadding="0" cellspacing="0" class="DSPFListTable" style="font-family: 'Times New Roman'; font-size: 10pt; width: 100%; text-align: left; color: #000000;"> <tr> <td style="width: 20.25pt;"></td> <td style="width: 27pt; vertical-align: top; font-family: 'Times New Roman'; font-size: 10pt;">●</td> <td style="width: auto; vertical-align: top; text-align: justify;"> <span style="font-size: 10pt;

font-family: 'Times New Roman'; font-style: italic;">Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means. </td> </tr> </table> <table cellpadding="0" cellspacing="0" class="DSPFListTable" style="font-family: 'Times New Roman'; font-size: 10pt; width: 100%; text-align: left; color: #000000;"> <tr> <td style="width: 20.25pt;"></td> <td style="width: 27pt; vertical-align: top; font-family: 'Times New Roman'; font-size: 10pt;">●</td> <td style="width: auto; vertical-align: top; text-align: justify;"> Level 3 Inputs - Significant unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities. </td> </tr> </table>

 Securities – Fair value is calculated based on market prices of similar securities using matrix pricing. Matrix pricing is a mathematical technique commonly used to price debt securities that are not actively traded.

  Mortgage servicing rights – Mortgage servicing rights are reported at fair value using Level 3 inputs. The mortgage servicing rights asset is valued by projecting net servicing cash flows, which are then discounted to estimate the fair value. The fair value of the mortgage servicing rights asset is impacted by a variety of factors, including prepayment speeds, default rates, and discount rates, which are significant unobservable inputs. Mortgage servicing rights are the only Level 3 asset measured at fair value on a recurring basis, see Note 5 for the Level 3 change activity for the three and nine months ended September 30, 2024 and 2023.
  Derivatives – Fair value of derivatives is based on valuation models using observable market data as of the measurement date.
  Loans held for investment – Includes certain collateral-dependent loans which are reported at fair value, for which a specific allocation of the allowance for credit losses is based off of the underlying collateral, less estimated disposal costs, if repayment is expected solely from the sale of the collateral. Collateral values are estimated using Level 2 inputs based on observable market data or Level 3 inputs based on customized discounting criteria.
  Fair Values of Assets Recorded on a Recurring Basis for which the Fair Value Option has been Elected
  Loans held for sale (mandatory) –<span style="background-color: rgb(255, 255, 255); font-weight: normal; color: rgb(0, 0, 0); font-family: 'Times New Roman'; font-size: 10pt; font-style: normal; font-variant: normal; text-transform: none;"> Loans held for sale originated for mandatory delivery are reported at fair value on a recurring basis due to the Company's election to adopt fair value accounting treatment for these assets. This election allows for a more effective offset of the changes in fair values of the assets and the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting under ASC Topic 815, Derivatives and Hedging. For assets for which the fair value option has been elected, the earned current contractual interest payment is recognized in interest income, loan origination costs and fees on fair value option loans are recognized in earnings as incurred and not deferred. At September 30, 2024, and December 31, 2023, there were no gains or losses recorded attributable to changes in instrument-specific credit risk. Fair value is determined using quoted prices for similar assets, adjusted for specific attributes of that loan. At September 30, 2024 and December 31, 2023 the aggregate fair value of loans held for sale for mandatory delivery was $9.5 million and $6.6 million, respectively. The aggregate unpaid principal balance as of the same dates was $9.3 million and $6.4 million, respectively, representing differences between fair value and unpaid principal balance of $216 thousand and $190 thousand, respectively. The Company had no loans held for sale for mandatory delivery designated as nonaccrual or 90 days or more past due at each of September 30, 2024 and December 31, 2023.
 <div style="text-align: justify; color: rgb(0, 0, 0); font-family: 'Times New Roman'; font-size: 10pt; background-color: rgb(255, 255, 255); font-weight: normal; font-style: normal; font-variant: normal; text-transform: none;">The total fair value option impact on noninterest income for loans held for sale for mandatory delivery is included in Net gain on sales of loans in the Consolidated Statements of Comprehensive Income (loss). For the three months ended September 30, 2024 and 2023 the net (gain) loss amount totaled $94 thousand and $330 thousand, respectively. For the nine months ended September 30, 2024 and 2023 the net (gain) loss amount totaled $(246) thousand and $78 thousand, respectively.</div> <div style="text-align: justify; color: rgb(0, 0, 0); font-family: 'Times New Roman'; font-size: 10pt; background-color: rgb(255, 255, 255); font-weight: normal; font-style: normal; font-variant: normal; text-transform: none;">

The Company assessed the materiality of this change in presentation on prior period consolidated financial statements in accordance with SEC Staff Accounting Bulletin No. 99, "Materiality," (ASC Topic 250, Accounting Changes and Error Corrections). Based on this assessment, the Company concluded that these error corrections in its Consolidated Statements of Cash Flows are not material to any previously presented consolidated financial statements. The corrections had no impact on the Consolidated Balance Sheets, Consolidated Statements of Comprehensive Income (Loss), or Consolidated Statements of Changes in Stockholders' Equity, or notes to these consolidated financial statements, for any previously presented interim or annual consolidated financial statements.
