AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) 1.Â SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Nature of Operations â€“ South Plains Financial, Inc. (â€œSPFIâ€) is a Texas corporation and registered bank holding company that conducts its principal activities through its subsidiaries from offices located throughout Texas and Eastern New Mexico. Principal activities include commercial and retail banking, along with investment, trust, and mortgage services. The following were subsidiaries of SPFI as of September 30, 2024: Wholly-Owned, Consolidated Subsidiaries: Â City Bank Bank subsidiary Ruidoso Retail, Inc. Non-bank subsidiary CB Provence, LLC Non-bank subsidiary CBT Brushy Creek, LLC Non-bank subsidiary CBT Properties, LLC Non-bank subsidiary Wholly-Owned, Equity Method Subsidiaries: Â South Plains Financial Capital Trusts (â€œSPFCTâ€) III-V Non-bank subsidiaries On April 1, 2023, SPFI entered into a Securities Purchase Agreement (â€œAgreementâ€) with Alliant Insurance Services, Inc. (â€œAlliantâ€), providing for the sale of Windmark Insurance Agency, Inc. (â€œWindmarkâ€), City Bankâ€™s wholly-owned subsidiary, through a sale of all of the outstanding shares of capital stock of Windmark to Alliant. The transaction was consummated on April 1, 2023. Pursuant to the terms and subject to the conditions of the Agreement, SPFI received an aggregate purchase price of $36.1 million in exchange for Windmarkâ€™s common shares, representing a pre-tax gain of $33.8 million through the nine months ended September 30, 2023. This transaction did not meet the criteria for discontinued operations reporting. Basis of Presentation and Consolidation â€“ The consolidated financial statements in this Quarterly Report on Form 10-Q for the three and nine months ended September 30, 2024 (this â€œForm 10-Qâ€) include the accounts of SPFI and its wholly-owned consolidated subsidiaries (collectively referred to as the â€œCompanyâ€) identified above. All significant intercompany balances and transactions have been eliminated in consolidation. The interim consolidated financial statements in this Form 10-Q have not been audited by an independent registered public accounting firm, but in the opinion of management, reflect all adjustments necessary for a fair presentation of the Companyâ€™s financial position, results of operations, and cash flows. All such adjustments were of a normal and recurring nature. The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (â€œGAAPâ€) for interim financial information and with the instructions to Form 10-Q adopted by the U.S. Securities and Exchange Commission (â€œSECâ€). Accordingly, the financial statements do not include all of the information and notes required by GAAP for complete financial statements and should be read in conjunction with the Companyâ€™s audited consolidated financial statements, and notes thereto in the Companyâ€™s Annual Report on Form 10-K for the year ended December 31, 2023 as filed with the SEC on March 15, 2024 (the â€œ2023 Annual Report on Form 10-Kâ€). Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period. Use of Estimates â€“ The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Determination of the adequacy of the allowance for credit losses (â€œACLâ€) is a material estimate that is particularly susceptible to significant change in the near term; the assumptions used in stock-based compensation, derivatives, mortgage servicing rights, and fair values of financial instruments can also involve significant management estimates. Recent Accounting Pronouncements â€“ Updates to the Financial Accounting Standards Board (â€œFASBâ€) Accounting Standards Codification (â€œASCâ€) are prescribed in Accounting Standards Updates (â€œASUsâ€), which are not authoritative until incorporated into the ASC. ASU 2023-06, Disclosure Improvements: Codification Amendments in Response to the SECâ€™s Disclosure Update and Simplification Initiative. The amendments in this ASU modify the disclosure or presentation requirements of a variety of Topics in the Codification. Certain of the amendments represent clarifications to, or technical corrections of the current requirements. Each amendment in the ASU will only become effective if the SEC removes the related disclosure or presentation requirement from its existing regulations by June 30, 2027. The amendments in this ASU are not expected to have a material impact on the results of operations or financial position. 8 Table of Contents ASU 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures. The amendments in this ASU require public entities to disclose information about reportable segmentsâ€™ significant expenses on an interim and annual basis.Â This ASU is effective for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024. The adoption of ASU 2023-07 is not expected to have a material effect on the Companyâ€™s financial statements. ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures.Â The amendments in this ASU areÂ intended to improve the transparency of income tax disclosures by requiring consistent categories and greater disaggregation of information in the rate reconciliation and income taxes paid disaggregated by jurisdiction. It also includes certain other amendments intended to improve the effectiveness of income tax disclosures. This ASU is effective for fiscal years beginning after December 15, 2024. The adoption of ASU 2023-09 is not expected to have a material effect on the Companyâ€™s financial statements. Subsequent Events â€“ The Company has evaluated subsequent events and transactions from September 30, 2024 through the date this Form 10-Q was filed with the SEC for potential recognition or disclosure as required by GAAP. 2.Â SECURITIES The amortized cost, related gross unrealized gains and losses, allowance for credit losses, and estimated fair value of securities available for sale at the dates indicated follows (dollars in thousands): Â Amortized Cost Â Â Gross Unrealized Gains Â Â Gross Unrealized Losses Â Â Allowance for Credit Losses Â Â Fair Value Â September 30,Â 2024 Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Available for sale: Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â State and municipal Â $ 200,215 Â Â $ 2 Â Â $ (19,293) Â $ â€” Â Â $ 180,924 Â Residential mortgage-backed securities Â Â 328,928 Â Â Â â€” Â Â Â (41,183) Â Â â€” Â Â Â 287,745 Â Commercial mortgage-backed securities Â Â 46,932 Â Â Â â€” Â Â Â (4,637) Â Â â€” Â Â Â 42,295 Â Commercial collateralized mortgage obligations Â Â 69,027 Â Â Â â€” Â Â Â (142) Â Â â€” Â Â Â 68,885 Â Asset-backed and other amortizing securities Â Â 16,858 Â Â Â â€” Â Â Â (1,003) Â Â â€” Â Â Â 15,855 Â Other securities Â Â 12,000 Â Â Â â€” Â Â Â (815) Â Â â€” Â Â Â 11,185 Â Â Â $ 673,960 Â Â $ 2 Â Â $ (67,073) Â $ â€” Â Â $ 606,889 Â December 31,Â 2023 Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Available for sale: Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â State and municipal Â $ 202,814 Â Â $ 2 Â Â $ (22,241) Â $ â€” Â Â $ 180,575 Â Residential mortgage-backed securities Â Â 351,251 Â Â Â â€” Â Â Â (50,547) Â Â â€” Â Â Â 300,704 Â Commercial mortgage-backed securities Â Â 47,898 Â Â Â â€” Â Â Â (6,150) Â Â â€” Â Â Â 41,748 Â Commercial collateralized mortgage obligations Â Â 72,391 Â Â Â â€” Â Â Â (461) Â Â â€” Â Â Â 71,930 Â Asset-backed and other amortizing securities Â Â 18,476 Â Â Â â€” Â Â Â (1,436) Â Â â€” Â Â Â 17,040 Â Other securities Â Â 12,000 Â Â Â â€” Â Â Â (1,235) Â Â â€” Â Â Â 10,765 Â Â Â $ 704,830 Â Â $ 2 Â Â $ (82,070) Â $ â€” Â Â $ 622,762 Â The amortized cost and estimated fair value of securities at September 30, 2024 are presented below by contractual maturity (dollars in thousands). Management evaluates AFS securities in unrealized loss positions to determine whether the impairment is due to credit-related factors or non-credit related factors. Consideration is given to the extent to which the fair value is less than cost, the financial condition and near-term prospects of the issuer, and the intent and ability of the Company to retain its investment in the security for a period of time sufficient to allow for the anticipated recovery in fair value. Management does not have the intent to sell any of the securities in an unrealized loss position as there are adequate liquidity sources to meet expected and unexpected funding needs. The fair value of these securities is expected to recover as the securities approach their maturity date or repricing date or if market yields for such investments decline.

Accordingly, as of September 30, 2024, management believes the unrealized loss positions detailed in the previous table are due to non-credit related factors, including changes in interest rates and other market conditions, and therefore no ACL or losses have been recognized or realized in the consolidated financial statements. 3.Â LOANS HELD FOR INVESTMENT Loans held for investment are summarized by category as of the dates presented below (dollars in thousands): Â September 30, 2024 Â Â December 31, 2023 Â Commercial real estate Â $ 1,120,447 Â Â $ 1,081,056 Â Commercial - specialized Â Â 406,255 Â Â Â 372,376 Â Commercial - general Â Â 526,448 Â Â Â 517,361 Â Consumer: Â Â Â Â Â Â Â Â 1-4 family residential Â Â 562,401 Â Â Â 534,731 Â Auto loans Â Â 253,509 Â Â Â 305,271 Â Â Â Other consumer Â Â 65,789 Â Â Â 74,168 Â Construction Â Â 102,526 Â Â Â 129,190 Â Â Â Â 3,037,375 Â Â Â 3,014,153 Â Allowance for credit losses on loans Â Â (42,886) Â Â (42,356) Loans, net Â $ 2,994,489 Â Â $ 2,971,797 Â The Company has certain lending policies, underwriting standards, and procedures in place that are designed to maximize loan income with an acceptable level of risk. Management reviews and approves these policies, underwriting standards, and procedures on a regular basis and makes changes as appropriate. Management receives frequent reports related to loan originations, quality, concentrations, delinquencies, non-performing, and potential problem loans. Diversification in the loan portfolio is a means of managing risk associated with fluctuations in economic conditions, both by type of loan and geography. 10 Table of Contents Commercial Real Estate â€“ Underwriting standards have been designed to determine whether the borrower possesses sound business ethics and practices, evaluate current and projected cash flows to determine the ability of the borrower to repay their obligations as agreed and ensure appropriate collateral is obtained to secure the loan. Commercial real estate loans are underwritten primarily based on projected cash flows for income-producing properties and collateral values for non-income-producing properties. The repayment of these loans is generally dependent on the successful operation of the property securing the loans or the sale or refinancing of the property. Real estate loans may be adversely affected by conditions in the real estate markets or in the general economy. The properties securing the Companyâ€™s real estate portfolio are diversified by type and geographic location. This diversity helps reduce the exposure to adverse economic events that affect any single market or industry. Commercial â€“ General and Specialized â€“ Commercial loans are underwritten after evaluating and understanding the borrowerâ€™s ability to operate profitably. Underwriting standards have been designed to determine whether the borrower possesses sound business ethics and practices, evaluate current and projected cash flows to determine the ability of the borrower to repay their obligations, as agreed and ensure appropriate collateral is obtained to secure the loan. Commercial loans are primarily made based on the identified cash flows of the borrower and, secondarily, on the underlying collateral provided by the borrower. Most commercial loans are secured by the assets being financed or other business assets, such as real estate, accounts receivable, or inventory, and typically include personal guarantees. Owner-occupied real estate is included in commercial loans, as the repayment of these loans is generally dependent on the operations of the commercial borrowerâ€™s business rather than on income-producing properties or the sale of the properties. Commercial loans are grouped into two distinct sub-categories: specialized and general. Commercial related segments that are considered â€œspecializedâ€ include agricultural production and real estate loans, energy loans, and finance, investment, and insurance loans. Commercial related segments that contain a broader diversity of borrowers, sub-industries, or serviced industries are grouped into the â€œgeneral category.â€ These include goods, services, restaurant & retail, construction, and other industries. Performance of these loans is subject to operating and cash flow results of the borrower, with risk in the volatility of operating results for particular industries. Consumer â€“ Loans to consumers include 1-4 family residential loans, auto loans, and other loans for recreational vehicles or other purposes. The Company utilizes a computer-based credit scoring analysis to supplement its policies and procedures in underwriting consumer loans. The Companyâ€™s loan policy addresses types of consumer loans that may be originated and the collateral, if secured, which must be perfected. The relatively smaller individual dollar amounts of consumer loans that are spread over numerous individual borrowers also minimizes the Companyâ€™s risk. The Company generally requires mortgage title insurance and hazard insurance on 1-4 family residential loans. All consumer loans are generally dependent on the risk characteristics of the borrowerâ€™s ability to repay the loan, a consideration of the debt to income ratio, employment and income stability, the loan-to-value ratio, and the age, condition and marketability of the collateral. Construction â€“ Loans for residential construction are for single-family properties to developers, builders, or end-users. These loans are underwritten based on estimates of costs and completed value of the project. Funds are advanced based on estimated percentage of completion for the project. Performance of these loans is affected by economic conditions as well as the ability to control costs of the projects. The commercial real estate and construction categories comprise the Companyâ€™s nonowner-occupied real estate loans. Total nonowner-occupied real estate loans were $1.22 billion at September 30, 2024, and $1.21 billion at December 31, 2023. The ACL for loans was $42.9 million at September 30, 2024, compared to $42.4 million at December 31, 2023. The ratio of ACL for loans to loans held for investment was 1.41% at September 30, 2024 and 1.41% at December 31, 2023. 11 Table of Contents The following tables detail the activity in the ACL for loansÂ for the periods indicated (dollars in thousands). The increase in the provision for credit losses during the three months ended September 30, 2024, compared to the same period in 2023, was primarily due to a decrease of $1.3 million in specific reserves during the three months ended September 30, 2023. The provision increased during the nine months ended September 30, 2024, compared to the same period in 2023, mainly due to a larger growth in loans during the 2023 period compared to the 2024 period. 12 Table of Contents The following tables show the Companyâ€™s amortized cost in loans and related ACL for collateral dependent loans by class using the fair value of collateral loss estimation methodology of evaluating expected credit losses at the dates indicated (dollars in thousands). These grades fit in one of the following categories: (i) pass, (ii) special mention, (iii) substandard, (iv) doubtful, or (v) loss. Loans categorized as loss are charged-off immediately. The grading of loans reflect a judgment by the Company about the risks of default associated with the loan. The Company reviews the grades on loans as part of the Companyâ€™s on-going monitoring of the credit quality of the loan portfolio.Â These risk ratings are assigned based on relevant information about the ability of the borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. Pass loans have financial factors or nature of collateral that are considered reasonable credit risks in the normal course of lending and encompass several grades that are assigned based on varying levels of risk, ranging from credits that are secured by cash or marketable securities, to watch credits which have all the characteristics of an acceptable credit risk but warrant more than the normal level of monitoring. Special mention loans have potential weaknesses that deserve managementâ€™s close attention. If left uncorrected, these potential weaknesses may result in deterioration of repayment prospects for the loans at some future date. 13 Table of Contents Substandard loans are inadequately protected by the current net worth and paying capacity of the borrower or by the collateral pledged, if any. These loans have a well-defined weakness or weaknesses that jeopardize collection and present the distinct possibility that some loss will be sustained if the deficiencies are not corrected. A protracted workout on these credits is a distinct possibility. Prompt corrective action is therefore required to strengthen the Companyâ€™s position, and/or to reduce exposure and to assure that adequate remedial measures are taken by the borrower. Credit exposure becomes more likely in such credits and a serious evaluation of the secondary support to the credit is performed. Substandard loans can be accruing or can be nonaccrual depending on the circumstances of the individual loans. Doubtful loans have all the weaknesses inherent in substandard loans with the added characteristics that the weaknesses make collection or liquidation in full on the basis of currently existing facts, conditions, and values highly questionable and improbable. All doubtful loans are on nonaccrual. In connection with the review of the Companyâ€™s loan portfolio, management considers risk elements attributable to particular loan type or categories in assessing the quality of individual loans. The list of loans to be analyzed for individual evaluation consists of non-accrual loans over $250 thousand with direct exposure. Interest income recognized using a cash-basis method on non-accrual loans for the three and nine months ended September 30, 2024 and 2023 was not significant.Â In addition, the Company closely monitors substandard accruing loans over $1 million with direct exposure, and past due accruing loans over $100 thousand for possible individual evaluation.Â All other loans will be evaluated collectively in designated pools unless a loss exposure has been identified. Additional funds committed to be advanced on individually analyzed loans are not significant. The following tables reflect the amortized cost basis in loans held for investment by credit quality indicator and origination year at the dates indicated, and related year-to-date gross charge-offs. Loans acquired are shown in the table by origination year, not merger date. The Company had an immaterial amount of revolving loans converted to term loans at September 30, 2024 and December 31, 2023. Occasionally, the Company modifies loans to borrowers in financial distress by providing principal forgiveness, term extensions, an other than insignificant payment delay, or interest rate reduction.Â When principal forgiveness is provided, the amount of forgiveness is charged-off against the allowance for credit losses. Typically, one type of concession, such as term extension, is granted initially. If the borrower continues to experience financial difficulty, another concession, such as principal forgiveness, may be granted. In some cases, the Company provides multiple types of concessions on one loan. For the loans included in the â€œcombinationâ€ columns below, multiple types of modifications have been made on the same loan within the current reporting period. 15 Table of Contents The following tables present the amortized cost basis of loans at September 30, 2024 and 2023 that were both experiencing financial difficulty and modified during the periods indicated, by class and by type of modification.Â The percentage of the amortized cost basis of loans that were modified to borrowers in financial distress as compared to the amortized cost basis of each class of financing receivable is also presented below (dollars in thousands): Â Â Payment Delay Â Â Term Extension Â Â RateÂ Reduction Â Â Term Extension and Payment Â Delay Â Â Term Extension and Interest Rate Â Reduction Â Â Payment Delay and Interest Rate Reduction Â Â Payment Delay, Term Extension, and Interest Rate Reduction Â Â Total Class of Financing Receivable Â Three Months Ended September 30, 2024 Â Commercial real estate Â $ 74 Â Â $ â€” Â Â $ â€” Â Â $ â€” Â Â $ â€” Â Â $ â€” Â Â $ â€” Â Â Â 0.01 % Commercial - After the fixed rate periods, these notes will float at the Wall Street Journal prime rate, with a floor of 4.0% and a ceiling of 7.5%. These notes pay interest quarterly, are unsecured, and may be called by the Company at any time after the remaining maturity is five years or less. Additionally, these notes are intended to qualify for Tier 2 capital treatment, subject to regulatory limitations. On September 29, 2020, the Company issued $50.0 million in subordinated debt notes. Proceeds were reduced by approximately $926 thousand in debt issuance costs. These notes have a maturity date of September 2030 with a fixed rate of 4.50% for the first five years. After the expiration of the fixed rate period, these notes will reset quarterly at a variable rate equal to the then current three-month Secured Overnight Financing Rate (â€œSOFRâ€), as published by the Federal Reserve Bank of New York, plus 438 basis points. These notes pay interest semi-annually, are unsecured, and may be called by the Company at any time after the remaining maturity is five years or less. Additionally, these notes are intended to qualify for Tier 2 capital treatment, subject to regulatory limitations. As of September 30, 2024, the total amount of subordinated notes outstanding was $64.1 million less approximately $186 thousand of remaining debt issuance costs for a total balance of $63.9 million. As of December 31, 2023, the total amount of subordinated notes outstanding was $64.1 million less approximately $325 thousand of remaining debt issuance costs for a total balance of $63.8 million. Notes Payable and Other Borrowings As of September 30, 2024 and December 31, 2023, City Bank had no outstanding advances from the Federal Home Loan Bank of Dallas (â€œFHLBâ€). 7.Â STOCK-BASED COMPENSATION Equity Incentive Plan The 2019 Equity Incentive Plan (â€œPlanâ€) was approved by the Companyâ€™s Board of Directors on January 16, 2019 and by its shareholders on March 6, 2019. The purpose of the Plan is to: (i) attract and retain the best available personnel for positions of substantial responsibility, (ii) provide additional incentive to employees, directors and consultants, and (iii) promote the success of the Companyâ€™s business. The Plan permits the grant of incentive stock options, non-statutory stock options,

stock appreciation rights, restricted stock, restricted stock units, performance units, performance shares, and other stock-based awards. The maximum aggregate number of shares of common stock that may be issued pursuant to all awards under the Plan was 4,919,509 at September 30, 2024. The maximum aggregate number of shares that may be issued under the Plan may be increased annually by up to 3% of the total issued and outstanding common shares of the Company at the beginning of each fiscal year. 19 Table of Contents The fair value of each option award is estimated on the date of grant using the Black-Scholes model that uses the assumptions noted in the table below. Expected volatilities are based on historical volatilities of the Companyâ€™s common stock and similar peer company averages. The Company uses historical data to estimate option exercise and post-vesting termination behavior. The expected term of options granted represents the period of time that options granted are expected to be outstanding, which takes in to account that the options are not transferable. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of the grant. Compensation expense for these grants will be recognized over the vesting period of the awards based on the fair value of the stock at the issue date. The total fair value of restricted stock units vested during each of the nine months ended September 30, 2024 and 2023 was $643 thousand and $931 thousand, respectively. 20 Table of Contents For the three months ended September 30, 2024 and 2023 the Company recorded stock-based compensation expense related to the Plan of $563 thousand and $511 thousand, respectively. The Company recorded stock-based compensation expense related to the Plan of $1.7 million and $1.6 million for the nine months ended September 30, 2024 and 2023, respectively. The total unrecognized compensation cost for the awards outstanding under the Plan at September 30, 2024 was $3.8 million and will be recognized over a weighted average remaining period of 1.67 years. 8.Â OFF-BALANCE-SHEET ACTIVITIES, COMMITMENTS AND CONTINGENCIES Financial instruments with off-balance-sheet risk - The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Companyâ€™s consolidated financial statements. The Companyâ€™s exposure to credit loss is represented by the contractual amount of these commitments. The Company follows the same credit policies in making commitments as it does for recorded instruments. Financial instruments whose contract amounts represent credit risk outstanding at the dates indicated follow (dollars in thousands): Â September 30, 2024 Â Â December 31, 2023 Â Commitments to grant loans and unfunded commitments under lines of credit Â $ 545,480 Â Â $ 598,800 Â Standby letters of credit Â Â 16,309 Â Â 11,503 Â Commitments to grant loans and extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company, is based on managementâ€™s credit evaluation of the customer. Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those letters of credit are primarily issued to support public and private borrowing arrangements. Essentially all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company requires collateral supporting those commitments if deemed necessary. FHLB Letters of CreditÂ - The Company may use FHLB letters of credit to pledge to certain public deposits. AtÂ September 30, 2024 there were FHLB letters of credit outstanding of $75.0 million. There were no FHLB letters of credit outstanding at December 31, 2023. Litigation â€“ The Company is a defendant in legal actions arising from time to time in the normal course of business. Management believes that the ultimate liability, if any, arising from these matters will not materially affect the consolidated financial statements, based on information known as of the date the consolidated financial statements were issued. 9.Â CAPITAL AND REGULATORY MATTERS The Company and its bank subsidiary are subject to various regulatory capital requirements administered by its banking regulators. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Companyâ€™s and its bank subsidiaryâ€™s financial statements. Under capital guidelines and the regulatory framework for prompt corrective action, the Company and its bank subsidiary must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Prompt corrective action provisions are not applicable to bank holding companies. Quantitative measures established by regulation to ensure capital adequacy require the Company and its bank subsidiary to maintain minimum amounts and ratios (set forth in the following table) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average assets (as defined). Management believes, as of September 30, 2024 and December 31, 2023, that the Company and its bank subsidiary met all capital adequacy requirements to which they are subject. 21 Table of Contents As of September 30, 2024 and December 31, 2023, the Company met the definition of â€œwell-capitalizedâ€ under the applicable regulations of the Board of Governors of the Federal Reserve System and the bank subsidiary was â€œwell capitalizedâ€ under the FDICâ€™s regulatory framework for prompt corrective action and the Basel III capital guidelines. To be categorized as well capitalized, an institution must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following tables. There are no conditions or events since September 30, 2024 that management believes have changed the bank subsidiaryâ€™s category. This 2.50% capital conservation buffer is reflected in the table above. Both the Companyâ€™s and the Bankâ€™s actual ratios, as outlined in the table above, exceeded the Basel III risk-based capital requirement with the capital conservation buffer as of September 30, 2024. State banking regulations place certain restrictions on dividends paid by banks to their shareholders. Dividends paid by the Companyâ€™s bank subsidiary would be prohibited if the effect thereof would cause the bank subsidiaryâ€™s capital to be reduced below applicable minimum capital requirements. 10.Â DERIVATIVES The Company utilizes interest rate swap agreements as part of its asset-liability management strategy to help manage its interest rate risk position. These interest rate swaps are designated and qualify as fair value hedges and are entered into to reduce exposure to changes in fair value of fixed rate financial instruments. The notional amounts of the interest rate swaps do not represent amounts exchanged by the parties. The amount exchanged is determined by reference to the notional amounts and the other terms of the individual interest rate swap agreements. 22 Table of Contents The following table reflects the changes in fair value hedges included in the Consolidated Statements of Comprehensive Income (Loss) for the periods indicated (dollars in thousands): Â Â Three Months Ended Â Â Â Â Â September 30, Â Interest Rate Contracts Â Location Â 2024 Â 2023 Â Change in fair value of interest rate swaps hedging investment securities Â Other noninterest expense Â Â $ (4,409) Â $ 2,265 Â Change in fair value of hedged investment securities Â Other noninterest expense Â Â Â 4,196 Â Â Â Â (2,091) Change in fair value of interest rate swaps hedging fixed rate loans Â Interest income - Loans Â Â $ (179) Â $ 23 Â Change in fair value of hedged fixed rate loans Â Interest income - Loans Â Â Â 168 Â Â Â (22) Â Â Â Â Nine Months Ended Â Â Â Â Â Â Â September 30, Â Interest Rate Contracts Â Location Â Â 2024 Â Â 2023 Â Change in fair value of interest rate swaps hedging investment securities Â Other noninterest expense Â Â $ (3,545) Â $ 1,455 Â Change in fair value of hedged investment securities Â Other noninterest expense Â Â Â 3,274 Â Â Â (1,320) Change in fair value of interest rate swaps hedging fixed rate loans Â Interest income - Loans Â Â $ 26 Â Â $ 49 Â Change in fair value of hedged fixed rate loans Â Interest income - Loans Â Â Â 52 Â Â Â (47) The following table reflects the fair value hedges included in the Consolidated Balance Sheets at the dates indicated (dollars in thousands): Â Â September 30, 2024 Â Â December 31, 2023 Â Â Â Notional Amount Â Â Fair Value Â Â Notional Amount Â Â Fair Value Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Included in other liabilities: Â Â Â Â Â Â Â Â Â Â Â Â Interest rate swaps related to fixed rate loans Â $ â€” Â Â $ â€” Â Â $ 987 Â Â $ 10 Â Interest rate swaps related to state and municipal securities Â Â â€” Â Â Â â€” Â Â Â â€” Â Â Â â€” Â Included in other assets: Â Interest rate swaps related to fixed rate loans Â $ 11,803 Â Â $ 174 Â Â $ 7,796 Â Â $ 158 Â Interest rate swaps related to state and municipal securities Â Â 123,760 Â Â Â 13,083 Â Â 123,760 Â Â Â Â 16,628 Â Mortgage banking derivatives The net gains (losses) relating to free standing derivative instruments used for risk management are summarized below for the periods indicated (dollars in thousands): Â Three Months Ended Â Â Â Â Â September 30, Â Â Location Â 2024 Â Â Â 2023 Â Gain (loss) on mortgage banking derivatives Â Net gain (loss) on sales of loans Â Â $ (25) Â $ (137) Â Nine Months Ended Â Â Â Â Â September 30, Â Â Location Â 2024 Â Â 2023 Â Gain (loss) on mortgage banking derivatives Â Net gain (loss) on sales of loans Â Â $ 219 Â $ (48) 23 Table of Contents The following table reflects the amount and fair value of mortgage banking derivatives in the Consolidated Balance Sheets at the dates indicated (dollars in thousands): September 30, 2024 Â December 31, 2023 Â Â Notional Amount Â Fair Value Â Notional Amount Â Fair Value Â Included in other assets: Â Â Â Â Â Â Â Â Â Â Â Â Forward contracts related to mortgage loans held for sale Â $ â€” Â Â $ â€” Â Â $ â€” Â Â $ â€” Â Interest rate lock commitments Â Â 21,865 Â Â Â 343 Â Â Â 16,887 Â Â Â 444 Â Included in other liabilities: Â Forward contracts related to mortgage loans held for sale Â $ 22,166 Â Â $ 102 Â Â $ 19,021 Â Â $ 422 Â The Company had received cash collateral of $13.7 million and $18.3 million to offset asset derivative positions on its interest rate swaps at September 30, 2024 and December 31, 2023, respectively. This amount is reported in other liabilities in the Consolidated Balance Sheets. The Company had advanced $1.1 million to offset liability derivative positions on its interest rate swaps at September 30, 2024 and December 31, 2023, respectively. Additionally, the Company had advanced $440 thousand on its mortgage forward contracts at September 30, 2024 and December 31, 2023, respectively. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability is not adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are: (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact. Valuation techniques that are consistent with the market approach, the income approach and/or the cost approach are required by GAAP. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset. Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entityâ€™s own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy for valuation inputs gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows: â— Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. â— Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally

from or corroborated by market data by correlation or other means. â— Level 3 Inputs - Significant unobservable inputs for determining the fair values of assets or liabilities that reflect an entityâ€™s own assumptions about the assumptions that market participants would use in pricing the assets or liabilities. 24 Table of Contents The following table summarizes fair value measurements as of the dates indicated below (dollars in thousands): Â Level 1 Â Â Level 2 Â Â Level 3 Â Â Total Â September 30,Â 2024 Â Â Â Â Â Â Â Â Â Â Â Â Assets (liabilities) measured at fair value on a recurring basis: Â Â Â Â Â Â Â Â Â Â Â Â Securities available for sale: Â Â Â Â Â Â Â Â Â Â Â Â State and municipal Â $ â€” Â Â $ 180,924 Â Â $ â€” Â Â $ 180,924 Â Residential mortgage-backed securities Â Â â€” Â Â Â 287,745 Â Â Â â€” Â Â Â 287,745 Â Commercial mortgage-backed securities Â Â â€” Â Â Â 42,295 Â Â Â â€” Â Â Â 42,295 Â Commercial collateralized mortgage obligations Â Â â€” Â Â Â 68,885 Â Â Â â€” Â Â Â 68,885 Â Asset-backed and other amortizing securities Â Â â€” Â Â Â 15,855 Â Â Â â€” Â Â Â 15,855 Â Other securities Â Â â€” Â Â Â 11,185 Â Â Â â€” Â Â Â 11,185 Â Loans held for sale (mandatory) Â Â â€” Â Â Â 9,490 Â Â Â â€” Â Â Â 9,490 Â Mortgage servicing rights Â Â â€” Â Â Â â€” Â Â Â 24,573 Â Â Â 24,573 Â Asset derivatives Â Â â€” Â Â Â 13,600 Â Â Â â€” Â Â Â 13,600 Â Liability derivatives Â Â â€” Â Â Â (102) Â Â â€” Â Â Â (102) Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Assets measured at fair value on a non-recurring basis: Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Loans held for investment Â Â â€” Â Â Â â€” Â Â Â 20,905 Â Â Â 20,905 Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â December 31,Â 2023 Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Assets (liabilities) measured at fair value on a recurring basis: Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Securities available for sale: Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â State and municipal Â $ â€” Â Â $ 180,575 Â Â $ â€” Â Â $ 180,575 Â Residential mortgage-backed securities Â Â â€” Â Â Â 300,704 Â Â Â â€” Â Â Â 300,704 Â Commercial mortgage-backed securities Â Â â€” Â Â Â 41,748 Â Â Â â€” Â Â Â 41,748 Â Commercial collateralized mortgage obligations Â Â â€” Â Â Â 71,930 Â Â Â â€” Â Â Â 71,930 Â Asset-backed and other amortizing securities Â Â â€” Â Â Â 17,040 Â Â Â â€” Â Â Â 17,040 Â Other securities Â Â â€” Â Â Â 10,765 Â Â Â â€” Â Â Â 10,765 Â Loans held for sale (mandatory) Â Â â€” Â Â Â 6,615 Â Â Â â€” Â Â Â 6,615 Â Mortgage servicing rights Â Â â€” Â Â Â â€” Â Â Â 26,569 Â Â Â 26,569 Â Asset derivatives Â Â â€” Â Â Â 17,230 Â Â Â â€” Â Â Â 17,230 Â Liability derivatives Â Â â€” Â Â Â (432) Â Â â€” Â Â Â (432) Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Assets measured at fair value on a non-recurring basis: Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Loans held for investment Â Â â€” Â Â Â â€” Â Â Â 1,482 Â Â Â 1,482 Â Securities â€“ Fair value is calculated based on market prices of similar securities using matrix pricing. Matrix pricing is a mathematical technique commonly used to price debt securities that are not actively traded. Mortgage servicing rights â€“ Mortgage servicing rights are reported at fair value using Level 3 inputs. The mortgage servicing rights asset is valued by projecting net servicing cash flows, which are then discounted to estimate the fair value. The fair value of the mortgage servicing rights asset is impacted by a variety of factors, including prepayment speeds, default rates, and discount rates, which are significant unobservable inputs. Mortgage servicing rights are the only Level 3 asset measured at fair value on a recurring basis, see Note 5 for the Level 3 change activity for the three and nine months ended September 30, 2024 and 2023. Derivatives â€“ Fair value of derivatives is based on valuation models using observable market data as of the measurement date. Loans held for investment â€“ Includes certain collateral-dependent loans which are reported at fair value, for which a specific allocation of the allowance for credit losses is based off of the underlying collateral, less estimated disposal costs, if repayment is expected solely from the sale of the collateral. Collateral values are estimated using Level 2 inputs based on observable market data or Level 3 inputs based on customized discounting criteria. 25 Table of Contents Fair Values of Assets Recorded on a Recurring Basis for which the Fair Value Option has been Elected Loans held for sale (mandatory) â€“ Loans held for sale originated for mandatory delivery are reported at fair value on a recurring basis due to the Companyâ€™s election to adopt fair value accounting treatment for these assets. This election allows for a more effective offset of the changes in fair values of the assets and the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting under ASC Topic 815, Derivatives and Hedging. For assets for which the fair value option has been elected, the earned current contractual interest payment is recognized in interest income, loan origination costs and fees on fair value option loans are recognized in earnings as incurred and not deferred. At September 30, 2024, and December 31, 2023, there were no gains or losses recorded attributable to changes in instrument-specific credit risk. Fair value is determined using quoted prices for similar assets, adjusted for specific attributes of that loan. At September 30, 2024 and December 31, 2023 the aggregate fair value of loans held for sale for mandatory delivery was $9.5 million and $6.6 million, respectively. The aggregate unpaid principal balance as of the same dates was $9.3 million and $6.4 million, respectively, representing differences between fair value and unpaid principal balance of $216 thousand and $190 thousand, respectively. The Company had no loans held for sale for mandatory delivery designated as nonaccrual or 90 days or more past due at each of September 30, 2024 and December 31, 2023. The total fair value option impact on noninterest income for loans held for sale for mandatory delivery is included in Net gain on sales of loans in the Consolidated Statements of Comprehensive Income (Loss). For the three months ended September 30, 2024 and 2023 the net (gain) loss amount totaled $94 thousand and $330 thousand, respectively. For the nine months ended September 30, 2024 and 2023 the net (gain) loss amount totaled $(246) thousand and $78 thousand, respectively. The Company assessed the materiality of this change in presentation on prior period consolidated financial statements in accordance with SEC Staff Accounting Bulletin No. 99, â€œMateriality,â€ (ASC Topic 250, Accounting Changes and Error Corrections). Based on this assessment, the Company concluded that these error corrections in its Consolidated Statements of Cash Flows are not material to any previously presented consolidated financial statements. The corrections had no impact on the Consolidated Balance Sheets, Consolidated Statements of Comprehensive Income (Loss), or Consolidated Statements of Changes in Stockholdersâ€™ Equity, or notes to these consolidated financial statements, for any previously presented interim or annual consolidated financial statements. The financial reporting periods affected by this error include the Companyâ€™s previously reported interim unaudited consolidated financial statements for each of the fiscal year-to-date periods ended March 31, 2023; June 30, 2023Í¾ and September 30, 2023. Managementâ€™s Discussion and Analysis of Financial Condition and Results of Operations The following discussion and analysis of our financial condition and results of operations for the periods covered by this Quarterly Report on Form 10-Q (this â€œForm 10-Qâ€) and should be read in conjunction with our consolidated financial statements and the accompanying notes thereto included in this Form 10-Q and in our Annual Report on Form 10-K for the year ended December 31, 2023 (the â€œ2023 Annual Report on Form 10-Kâ€) filed with the U.S. Securities and Exchange Commission (the â€œSECâ€) pursuant to Rule 424(b) of the Securities Act of 1933, as amended (the â€œSecurities Actâ€), on March 15, 2024. Unless we state otherwise or the context otherwise requires, references in this Form 10-Q to â€œwe,â€ â€œour,â€ â€œusâ€ and â€œthe Companyâ€ refer to South Plains Financial, Inc., a Texas corporation, our wholly-owned banking subsidiary, City Bank, a Texas banking association and our other consolidated subsidiaries. References in this Form 10-Q to the â€œBankâ€ refer to City Bank. Cautionary Notice Regarding Forward-Looking Statements This Form 10-Q contains statements that we believe are â€œforward-looking statementsâ€ within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act of 1934, as amended (the â€œExchange Actâ€). These forward-looking statements reflect our current views with respect to, among other things, future events and our financial performance. These statements are often, but not always, made through the use of words or phrases such as â€œmay,â€ â€œmight,â€ â€œshould,â€ â€œcould,â€ â€œpredict,â€ â€œpotential,â€ â€œbelieve,â€ â€œexpect,â€ â€œcontinue,â€ â€œwill,â€ â€œanticipate,â€ â€œseek,â€ â€œestimate,â€ â€œintend,â€ â€œplan,â€ â€œstrive,â€ â€œprojection,â€ â€œgoal,â€ â€œtarget,â€ â€œoutlook,â€ â€œaim,â€ â€œwould,â€ â€œannualizedâ€ and â€œoutlook,â€ or the negative version of those words or other comparable words or phrases of a future or forward-looking nature. These forward-looking statements are not historical facts, and are based on current expectations, estimates and projections about our industry, managementâ€™s beliefs and certain assumptions made by management, many of which, by their nature, are inherently uncertain and beyond our control. Accordingly, we caution you that any such forward-looking statements are not guarantees of future performance and are subject to risks, assumptions, estimates and uncertainties that are difficult to predict. Although we believe that the expectations reflected in these forward-looking statements are reasonable as of the date made, actual results may prove to be materially different from the results expressed or implied by the forward-looking statements. There are or will be important factors that could cause our actual results to differ materially from those indicated in these forward-looking statements, including, but not limited to, the following: â— potential recession in the United States and our market areas; â— the impacts related to or resulting from bank failures and any uncertainty in the banking industry, including the associated impact to the Company and other financial institutions of any regulatory changes or other mitigation efforts taken by government agencies in response thereto; â— increased competition for deposits and related changes in deposit customer behavior; â— the resurgence of elevated levels of inflation or inflationary pressures, in the United States and our market areas, and its impact on market interest rates, the economy and credit quality; â— the adequacy of the allowance for credit losses; â— our ability to effectively execute our expansion strategy and manage our growth, including identifying and consummating suitable acquisitions; â— business and economic conditions, particularly those affecting our market areas, as well as the concentration of our business in such market areas; â— high concentrations of loans secured by real estate located in our market areas; â— risks associated with our commercial loan portfolio, including the risk of declines in commercial real estate prices or deterioration in value of the general business assets that secure such loans; â— potential changes in the prices, values and sales volumes of commercial and residential real estate securing our real estate loans; â— increases in unemployment rates in the United States and our market areas; â— risks associated with our agricultural loan portfolio, including the heightened sensitivity to weather conditions, commodity prices, and other factors generally outside the borrowers and our control; â— risks related to the significant amount of credit that we have extended to a limited number of borrowers and in a limited geographic area; â— public funds deposits comprising a relatively high percentage of our deposits; â— potential impairment on the goodwill we have recorded or may record in connection with business acquisitions; â— our ability to maintain our reputation; â— our ability to successfully manage our credit risk and the sufficiency of our allowance for credit losses; â— our ability to attract, hire and retain qualified management personnel; â— our dependence on our management team, including our ability to retain executive officers and key employees and their customer and community relationships; 28 Table of Contents â— interest rate fluctuations, whether due to the current elevated interest rate environment or future reductions in interest rates, which could negatively impact the pricing of our loans and deposits and decrease our net interest income or net interest margin; â— competition from banks, credit unions and other financial services providers; â— our ability to keep pace with technological change or difficulties we may experience when implementing new technologies; â— cybersecurity risk, including cyber incidents or other failures, disruptions or security breaches of our operational or security systems or infrastructure, or those of our third-party vendors or other service providers, including as a result of cyber-attacks; â— our ability to maintain effective internal control over financial reporting; â— employee error, fraudulent activity by employees or customers and inaccurate or incomplete information about our customers and counterparties; â— increased capital requirements imposed by banking regulators, which may require us to raise capital at a time when capital is not available on favorable terms or at all; â— our ability to maintain adequate liquidity and to raise necessary capital to fund our acquisition strategy and operations or to meet increased minimum regulatory capital levels; â— costs and effects of litigation, investigations or similar matters to which we may be subject, including any effect on our reputation; â— natural disasters, severe weather, acts of god, acts of war or terrorism, geopolitical instability, outbreaks of hostilities, public health outbreaks (such as the COVID-19 pandemic or any future pandemic), other international or domestic calamities, and other external events or matters beyond our control; â— the impact of changes in U.S. presidential administrations or Congress; â— uncertainty regarding United States fiscal debt, deficit, and budget matters; â— tariffs and trade barriers; â— compliance with governmental and regulatory requirements, including the Dodd-Frank Act Wall Street Reform and Consumer Protection Act, the Economic Growth, Regulatory Relief, and Consumer Protection Act (â€œEGRRCPAâ€), and others relating to banking, consumer protection, securities and tax matters; and â— changes in the laws, rules, regulations, interpretations or policies relating to financial institutions, accounting, tax, trade, current and future governmental monetary and fiscal policies, including the uncertain impacts of ongoing quantitative tightening and current and future policies of the Board of Governors of the Federal Reserve System (â€œFederal Reserveâ€) and as a result of initiatives of the Biden administration. The foregoing factors should not be construed as exhaustive and should be read together with the other cautionary statements included in this Form 10-Q and the risk factors set forth in our 2023 Annual Report on Form 10-K. Because of these risks and other uncertainties, our actual future results, performance or achievements, or industry results, may be materially different from the results indicated by the forward-looking statements in this Form 10-Q. In addition, our past results of operations are not necessarily indicative of our future results. Accordingly, you should not rely on any forward-looking statements, which represent our beliefs, assumptions and estimates only as of the dates on which such forward-looking statements were made. Any forward-looking statement speaks only as of the date on which it is made, and we do not undertake any obligation to update or review any forward-looking statement, whether as a result of new information, future developments or otherwise, except as required by applicable law. Through City Bank, we provide a wide range of commercial and consumer financial services to small and medium-sized businesses and individuals in our market areas. Our principal business activities include commercial and retail banking, along with investment, trust and mortgage services. Results of Operations We had net income of $11.2 million, or $0.66 per diluted common share, for the three months ended September 30, 2024, compared to net income of $13.5 million, or $0.78 per diluted common share for the three months ended September 30, 2023. Return on average equity (annualized) was 10.36% and return on average assets (annualized) was 1.05% for the three months ended September 30, 2024, compared to 14.01% and 1.27%, respectively, for the three months ended September 30, 2023. We had net income of $33.2 million, or $1.96 per diluted common share for the nine months ended September 30, 2024, compared to net income of $52.4 million, or $3.01 per diluted common share for the nine months ended September 30, 2023. Return on average equity (annualized) was 10.63% and return on average assets (annualized) was 1.05% for the nine months ended September 30, 2024, compared to 18.70% and 1.73%, respectively, for the nine months ended September 30, 2023. Net Interest Income Net interest income is the principal source of the Companyâ€™s net income and represents the difference between interest income (interest and fees earned on assets, primarily loans and investment securities) and interest expense (interest paid on deposits and borrowed funds). We generate interest income from interest-earning assets that we own, including loans and investment securities. We incur interest expense from interest-bearing liabilities, including interest-bearing deposits and other borrowings, notably FHLB advances and subordinated notes. To evaluate net interest income, we measure and monitor (i) yields on our loans and other interest-earning assets, (ii) the costs of our deposits and other funding sources, (iii) our net interest spread and (iv) our net interest margin. Net interest spread is the difference between rates earned on interest-earning assets and rates paid on interest-bearing liabilities. Net interest margin is calculated as the annualized net interest income on a fully tax-equivalent basis divided by average interest-earning assets. Changes in the market interest rates and interest rates we earn on interest-earning assets or pay on interest-bearing liabilities, as well as the volume and types of interest-earning assets, interest-bearing and noninterest-bearing liabilities, are usually the largest drivers of periodic changes in net interest spread, net interest margin and net interest income. The following tables present, for the periods indicated, information about: (i) weighted average balances, the total dollar amount of interest income from interest-earning assets and the resultant average yields; (ii) average balances, the total dollar amount of interest expense on interest-bearing liabilities and the resultant average rates; (iii) net interest income; (iv) the interest rate spread; and (v) the net interest margin. For purposes of this table, interest income, net interest margin and net interest spread are shown on a fully tax-equivalent basis. The following tables set forth the effects of changing rates and volumes on our net interest income during the period shown. Information is provided with respect to (i) effects on interest income attributable to changes in volume (change in volume multiplied by prior rate) and (ii) effects on interest income attributable to changes in rate (changes in rate multiplied by prior volume). The growth in interest income was primarily attributable to an increase of $5.3 million in loan interest income from growth of $64.2 million in average loans outstanding and an increase of 58 basis points in the yield on loans. The $3.5 million increase in interest expense was primarily related to an increase of $111.2 million in average interest-bearing deposits and a 40 basis point increase in the rate paid on interest-bearing deposits over the same period in 2023. Additionally, average noninterest-bearing demand deposits decreased $95.1 million for the three months ended September 30, 2024 as compared to the three months ended September 30, 2023. For the three months ended September 30, 2024, net interest margin and net interest spread were 3.65% and 2.55%, respectively, compared to 3.52% and 2.48%, respectively, for the same period in 2023, which reflects the changes in interest income and interest expense discussed above. Net interest income for the nine months ended September 30, 2024 was $108.6 million, compared to $104.6 million for the nine months ended September 30, 2023, an increase of $4.0 million, or 3.8%, and was comprised of an increase of $24.8 million in interest income, partially offset by an increase of $20.8 million in interest expense. The growth in interest income was attributable to increases of $22.3 million in loan interest income and $2.4 million in interest income from securities and other interest-earning assets. The increase in loan interest income was mainly due to growth of $162.8 million in average loans outstanding and an increase of 65 basis points in the yield on loans. The increase in interest income on securities and other interest-earning assets was primarily due to higher market interest rates. The $20.8 million increase in interest expense was primarily related to an increase of $251.7 million in average interest-bearing deposits and an 82 basis point increase in the rate paid on interest-bearing deposits over the same period in 2023. Additionally, average noninterest-bearing demand deposits decreased $120.5 million for the nine months ended September 30, 2024 as compared to the nine months ended September 30, 2023. For the nine months ended September 30, 2024, net interest margin and net interest spread were 3.61% and 2.53%, respectively, compared to 3.64% and 2.71%, respectively, for the same period in 2023, which reflects the changes in interest income and interest expense discussed above. Provision for Credit Losses Credit risk is inherent in the business of making loans. We establish an allowance for credit losses (â€œACLâ€) through charges to earnings, which are shown in the consolidated statements of comprehensive income (loss) as the provision for credit losses. Credit losses on loans are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. The provision for credit losses is determined by conducting a quarterly evaluation of the adequacy of our ACL and charging the shortfall or excess, if any, to the current quarterâ€™s expense. This has the effect of creating variability in the amount and frequency of charges to our earnings. The provision for credit losses and the amount of allowance for each period are dependent upon many factors, including loan growth, net charge offs, changes in the composition of the loan portfolio, delinquencies, managementâ€™s assessment of the quality of the loan portfolio, the valuation of problem loans and the general economic conditions in our market areas. The Company recorded a provision for credit losses of $495 thousand for the three months ended September 30, 2024, compared to a negative provision of $700 thousand for the three months ended September 30, 2023. The increase in provision of $1.2 million was largely attributable to a decrease of $1.3 million in specific reserves during the three months ended September 30, 2023. The Company recorded a provision for credit losses for the nine months ended September 30, 2024 of $3.1 million, compared to $4.0 million for the nine months ended September 30, 2023. The decline in provision of $900 thousand was largely attributable to a decrease in loan growth, partially offset by an increase in net charge-offs for the nine months ended September 30, 2024, compared to the same period in 2023. The provision for credit losses is a significant factor in the Companyâ€™s operating results. For further discussion regarding the provision for credit losses and managementâ€™s assessment of the adequacy of the ACL for loans, see â€œAllowance for Credit Losses for Loansâ€ and â€œAsset Qualityâ€ under â€œFinancial Conditionâ€ in this Item 2, below. Noninterest Income While interest income remains the largest single component of total revenues, noninterest income is an important contributing component. The largest portion of our noninterest income is associated with our mortgage banking activities. Other sources of noninterest income include service charges on deposit accounts, bank card services and interchange fees, and income from insurance activities. The following table sets forth the major components of our noninterest income for the periods indicated: 33 Table of Contents Â Â Three Months Ended September 30, Â Â Nine Months Ended September 30, Â Â Â 2024 Â Â 2023 Â Â Increase (Decrease) Â Â 2024 Â Â 2023 Â Â Increase (Decrease) Â Â Â (Dollars in thousands) Â Noninterest income: Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Service charges on deposit accounts Â $ 2,023 Â Â $ 1,840 Â Â $ 183 Â Â $ 5,785 Â Â $ 5,286 Â Â $ 499 Â Income from insurance activities Â Â 28 Â Â Â 30 Â Â Â (2) Â Â 92 Â Â Â 1,478 Â Â Â (1,386) Bank card services and interchange fees Â Â 3,302 Â Â Â 3,157 Â Â Â 145 Â Â Â 10,415 Â Â Â 10,156 Â Â Â 259 Â Mortgage banking activities Â Â 1,890 Â Â Â 4,602 Â Â Â (2,712) Â Â 9,232 Â Â Â 12,146 Â Â Â (2,914) Investment commissions Â Â 391 Â Â Â 430 Â Â Â (39) Â Â 1,275 Â Â Â 1,239 Â Â Â 36 Â Fiduciary income Â Â 613 Â Â Â 582 Â Â Â 31 Â Â Â 2,087 Â Â Â 1,779 Â Â Â 308 Â Gain on sale of subsidiary Â Â â€” Â Â Â 290 Â Â Â (290) Â Â â€” Â Â Â 33,778 Â Â Â (33,778) Other income and fees(1) Â Â 2,388 Â Â Â 1,346 Â Â Â 1,042 Â Â Â 5,867 Â Â Â 4,218 Â Â Â 1,649 Â Total noninterest income Â $ 10,635 Â Â $ 12,277 Â Â $ (1,642) Â $ 34,753 Â Â $ 70,080 Â Â $ (35,327) (1) Other income and fees includes income and fees associated with the increase in the cash surrender value of life insurance, safe deposit box rental, check printing, collections, legal settlements, wire transfer, Small Business Investment Company (â€œSBICâ€) investments, and other miscellaneous services. Noninterest income for the three months ended September 30, 2024 was $10.6 million, compared to $12.3 million for the three months ended September 30, 2023, a decrease of $1.6 million, or 13.4%. Significant changes in the components of noninterest income are detailed below. Service charges on deposit accounts - Income from service charges on deposit accounts increased $183 thousand, or 9.9%, for the three months ended September 30, 2024 as compared to the same period in 2023. The increase was primarily the result of treasury management initiatives taken to drive growth. Mortgage banking activities - Income from mortgage banking activities decreased $2.7 million, or 58.9%, to $1.9 million for the three months ended September 30, 2024 from $4.6 million for the three months endedÂ September 30, 2023. This decrease was mainly the result of a decline of $2.7 million in the fair value adjustment of the mortgage servicing rights assets as interest rates that affect the value declined in the third quarter of 2024. Gain on sale of subsidiary - A $33.5 million gain from the sale of Windmark Insurance Agency, Inc. (â€œWindmarkâ€) was recorded in the second

quarter of 2023 and an additional $290 thousand was recorded in the third quarter of 2023. Other income and fees - The Company recognized $700 thousand in property insurance proceeds in the third quarter of 2024. Noninterest income for the nine months ended September 30, 2024 was $34.8 million, compared to $70.1 million for the nine months ended September 30, 2023, a decrease of $35.3 million, or 50.4%. Significant changes in the components of noninterest income are detailed below. Service charges on deposit accounts - Income from service charges on deposit accounts increased $499 thousand, or 9.4%, for the nine months ended September 30, 2024 as compared to the same period in 2023. The increase was primarily the result of treasury management initiatives taken to drive growth. Mortgage banking activities - Income from mortgage banking activities decreased $2.9 million, or 24.0%, to $9.2 million for the nine months ended September 30, 2024 from $12.1 million for the nine months endedÂ September 30, 2023. This decrease was mainly the result of a decline of $1.8 million in the fair value adjustment of the mortgage servicing rights assets as interest rates that affect the value declined in the third quarter of 2024. Additionally, mortgage loan originations declined $37.0 million, or 14.1%, in the current year period as compared to the prior year period. Gain on sale of subsidiary - A $33.8 million gain from the sale of Windmark was recorded in the second and third quarters of 2023. Income from insurance activities - Due to the sale of Windmark in the second quarter of 2023, there was a decline of $1.4 million in income from insurance activities for the nine months ended September 30, 2024 as compared to the same period in 2023. Other income and fees - The Company recognized $700 thousand in property insurance proceeds in the third quarter of 2024. Noninterest expense for the three months ended September 30, 2024 was $33.1 million compared to $31.5 million for the three months ended September 30, 2023, an increase of $1.6 million, or 5.2%. Significant changes in the components of noninterest expense are detailed below. IT and data services - IT and data services increased $274 thousand, or 33.5%, from $818 thousand for the three months ended September 30, 2023 to $1.1 million for the three months ended September 30, 2024. The increase relates primarily to the Companyâ€™s cloud migration project. Other expenses - Other expenses increased $742 thousand, or 20.0%, from $3.7 million for the three months ended September 30, 2023 to $4.4 million for the three months ended September 30, 2024. The largest increase in the compared periods was an increase of $388 thousand in the ineffective portion of fair value hedges. Additionally, there was also a $50 thousand loss on the disposal of fixed assets in the third quarter of 2024. Noninterest expense for the nine months ended September 30, 2024 was $97.6 million, compared to $104.3 million for the nine months ended September 30, 2023, a decrease of $6.7 million, or 6.4%. Significant changes in the components of noninterest expense are detailed below. Salaries and employee benefits - Salaries and employee benefits decreased $4.4 million, or 7.2%, from $61.4 million for the nine months ended September 30, 2023 to $57.0 million for the nine months ended September 30, 2024. This decrease was primarily driven by $4.3 million of Windmark transaction and related incentive-based compensation expenses incurred in the second quarter of 2023. IT and data services - IT and data services increased $598 thousand, or 23.3%, from $2.6 million for the nine months ended September 30, 2023 to $3.2 million for the nine months ended September 30, 2023. The increase relates primarily to the Companyâ€™s cloud migration project. Loss on sale of securities - The Company sold approximately $56.2 million of available for sale securities in the second quarter of 2023. This resulted in a loss on sale of $3.4 million. Financial Condition Our total assets increased $132.9 million, or 3.2%, to $4.34 billion at September 30, 2024, compared to $4.20 billion at December 31, 2023. Our gross loans held for investment increased $23.2 million, or 0.8%, to $3.04 billion at September 30, 2024, compared to $3.01 billion at December 31, 2023. Our securities portfolio decreased $15.9 million, or 2.5%, to $606.9 million at September 30, 2024, compared to $622.8 million at December 31, 2023. Total deposits increased $93.2 million, or 2.6%, to $3.72 billion at September 30, 2024, compared to $3.63 billion at December 31, 2023. Loan Portfolio Our loans represent the largest portion of earning assets, greater than our securities portfolio or any other asset category, and the quality and diversification of the loan portfolio is an important consideration when reviewing the Companyâ€™s financial condition. We originate substantially all of the loans in our portfolio, except certain loan participations that are independently underwritten by the Company prior to purchase. 35 Table of Contents Loans held for investment increased $23.2 million, or 0.8%, to $3.04 billion at September 30, 2024, compared to $3.01 billion at December 31, 2023. The growth in loans remained relationship-focused and occurred primarily in direct-energy loans, seasonal agricultural-related loans, and single-family property loans, partially offset by decreases in consumer auto loans and residential construction loans. Of these loans that mature or reprice in the next twelve months, $587.6 million will reprice immediately upon changes in the underlying index rate, with the remaining $313.3 million being subject to rate floors above the current index or a future repricing date. The Wall Street Journal prime rate is the predominate index used by the Bank. Further, there is $169.9 million of fixed rate loans that mature in the next twelve months as of September 30, 2024. The Bank is primarily involved in real estate, commercial, agricultural and consumer lending activities with customers throughout Texas and Eastern New Mexico. We have a collateral concentration, as 72.8% of our loans were secured by real property as of September 30, 2024, compared to 72.7% as of December 31, 2023. We believe that these loans are not concentrated in any one single property type and that they are geographically dispersed throughout the areas we serve. Although the Bank has diversified portfolios, its debtorsâ€™ ability to honor their contracts is substantially dependent upon the general economic conditions of the markets in which it operates, which consist primarily of agribusiness, wholesale/retail, oil and gas and related businesses, healthcare industries and institutions of higher education. Commercial real estate loans and residential construction loans represent 40.2% of loans held for investment as of September 30, 2024 and represented 40.1% of loans held for investment as of December 31, 2023. Further, 97% of the total dollar amount of these loans are secured by collateral located in the state of Texas. We have established concentration limits in the loan portfolio for commercial real estate loans and unsecured lending, among other loan types. All loan types are within established limits. We use underwriting guidelines to assess the borrowersâ€™ historical cash flow to determine debt service, and we further stress test the debt service under higher interest rate scenarios. Financial and performance covenants are used in commercial lending to allow us to react to a borrowerâ€™s deteriorating financial condition, should that occur. 36 Table of Contents Commercial Real Estate. Our commercial real estate portfolio includes loans for commercial property that is owned by real estate investors, construction loans to build owner-occupied properties, and loans to developers of commercial real estate investment properties and residential developments. Commercial real estate loans are subject to underwriting standards and processes similar to our commercial loans. These loans are underwritten primarily based on projected cash flows for income-producing properties and collateral values for non-income-producing properties. The repayment of these loans is generally dependent on the successful operation of the property securing the loans or the sale or refinancing of the property. Real estate loans may be adversely affected by conditions in the real estate markets or in the general economy. The properties securing our real estate portfolio are diversified by type and geographic location. This diversity helps reduce the exposure to adverse economic events that affect any single market or industry. Commercial real estate loans increased $39.4 million, or 3.6%, to $1.12 billion as of September 30, 2024 from $1.08 billion as of December 31, 2023. The increase was primarily driven by an increase in multifamily property loans of $67.1 million and an increase in other commercial real estate loans of $24.0 million, partially offset by a decrease in commercial land development and construction loans of $51.9 million due to the completion of several large projects. Commercial â€“ General and Specialized. Commercial loans are underwritten after evaluating and understanding the borrowerâ€™s ability to operate profitably. Underwriting standards have been designed to determine whether the borrower possesses sound business ethics and practices, to evaluate current and projected cash flows to determine the ability of the borrower to repay their obligations as agreed, and to ensure appropriate collateral is obtained to secure the loan. Commercial loans are primarily made based on the identified cash flows of the borrower and, secondarily, on the underlying collateral provided by the borrower. Most commercial loans are secured by the assets being financed or other business assets, such as real estate, accounts receivable, or inventory, and typically include personal guarantees. Owner-occupied real estate is included in commercial loans, as the repayment of these loans is generally dependent on the operations of the commercial borrowerâ€™s business rather than on income-producing properties or the sale of the properties. Commercial loans are grouped into two distinct sub-categories: specialized and general. Commercial related loans that are considered â€œspecializedâ€ include agricultural production and real estate loans, energy loans, and finance, investment, and insurance loans. Commercial related loans that contain a broader diversity of borrowers, sub-industries, or serviced industries are grouped into the â€œgeneral category.â€ These include goods, services, restaurant & retail, construction, and other industries. Performance of these loans is subject to operating and cash flow results of the borrower, with risk in the volatility of operating results for particular industries. Commercial general loans increased $9.1 million, or 1.8%, to $526.4 million as of September 30, 2024 from $517.4 million as of December 31, 2023. The increase in commercial general loans was primarily due to increases in loans to companies in the services industry of $16.0 million, partially offset by a decrease of $4.5 million in restaurant and retail loans. Commercial specialized loans increased $33.9 million, or 9.1%, to $406.3 million as of September 30, 2024 from $372.4 million as of December 31, 2023. This increase was primarily due to growth of $28.5 million in energy sector loans and $5.6 million in agricultural loans. Consumer. We utilize a computer-based credit scoring analysis to supplement our policies and procedures in underwriting consumer loans. Our loan policy addresses types of consumer loans that may be originated and the collateral, if secured, which must be perfected. The relatively smaller individual dollar amounts of consumer loans that are spread over numerous individual borrowers also minimize our risk. Residential real estate loans are included in consumer loans. We generally require mortgage title insurance and hazard insurance on these residential real estate loans. All consumer loans are generally dependent on the risk characteristics of the borrowerâ€™s ability to repay the loan, a consideration of the debt to income ratio, employment and income stability, the loan-to-value ratio, and the age, condition and marketability of the collateral. Consumer and other loans decreased $32.5 million, or 3.6%, to $881.7 million as of September 30, 2024, from $914.2 million as of December 31, 2023. The decrease in these loans was a result of declines of $51.8 million in consumer auto loans and $8.4 million in other consumer loans, partially offset by an increase of $27.7 million in residential mortgage loans. As of September 30, 2024, our consumer loan portfolio was comprised of $562.4 million in 1-4 family residential loans, $253.5 million in auto loans, and $65.8 million in other consumer loans. The consumer auto and other consumer loans portfolios have experienced a decline in new originations due to higher loan rates and economic pressures from inflation on consumers. Construction. Loans for residential construction are for single-family properties to developers, builders, or end-users. These loans are underwritten based on estimates of costs and completed value of the project. Funds are advanced based on estimated percentage of completion for the project. Performance of these loans is affected by economic conditions as well as the ability to control costs of the projects. Construction loans decreased $26.7 million, or 20.6%, to $102.5 million as of September 30, 2024 from $129.2 million as of December 31, 2023. The decrease resulted from reduced demand for residential construction as interest rate levels remained elevated and projects were completed and sold. 37 Table of Contents The commercial real estate and construction categories comprise the Companyâ€™s nonowner-occupied real estate loans. Total nonowner-occupied real estate loans were $1.22 billion at September 30, 2024 and $1.21 billion at December 31, 2023. Nonowner-occupied commercial real estate loans are made up of income-producing commercial real estate property loans and construction, acquisition, and development property loans. As of September 30, 2024, total income-producing commercial real estate property loans totaled $865.9 million and was comprised of $286.6 million of multi-family property loans, $175.1 million of retail property loans, $138.6 million of office property loans, $63.5 million in hospitality loans, and $202.1 million in other property loans. Other property loans include types such as industrial, warehouse, mini-storage, and convenience stores. As of September 30, 2024, total construction, acquisition, and development property loans totaled $357.0 million and was comprised of $102.5 million in residential construction property loans and $254.5 million of commercial construction and other land development loans. The weighted average loan-to-value of income-producing nonowner-occupied commercial real estate loans was approximately 53% at September 30, 2024. The weighted average loan-to-value of nonowner-occupied office commercial real estate loans was approximately 59% at September 30, 2024. Owner-occupied commercial real estate loans totaled $335.4 million at September 30, 2024 and $341.1 million at December 31, 2023. We are a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of our customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Companyâ€™s Consolidated Balance Sheets. The Companyâ€™s exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit to our customers is represented by the contractual or notional amount of those instruments. Commitments to extend credit and standby letters of credit are not recorded as an asset or liability by the Company until the instrument is exercised. The contractual or notional amounts of those instruments reflect the extent of involvement we have in particular classes of financial instruments. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company uses the same credit policies in making commitments and conditional obligations as they do for on-balance sheet instruments. The amount and nature of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on managementâ€™s credit evaluation of the potential borrower. Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private short-term borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company holds collateral supporting those commitments for which collateral is deemed necessary. The following table summarizes commitments we have made as of the dates presented. Â Â September 30, 2024 Â Â December 31, 2023 Â Â Â (Dollars in thousands) Â Commitments to grant loans and unfunded commitments under lines of credit Â $ 545,480 Â Â $ 598,800 Â Standby letters of credit Â Â 16,309 Â Â Â 11,503 Â Total Â $ 561,789 Â Â $ 610,303 Â Allowance for Credit Losses for Loans The ACL provides a reserve against which loan losses are charged for current expected credit losses. Management evaluates the appropriate level of the ACL on a quarterly basis. The analysis takes into consideration the results of an ongoing loan review process, the purpose of which is to determine the level of credit risk within the portfolio and to ensure proper adherence to underwriting and documentation standards. Additional allowances are provided to those loans which appear to represent a greater than normal exposure to risk. The quality of the loan portfolio and the adequacy of the ACL is assessed by regulatory examinations and the Companyâ€™s internal and external loan reviews. The ACL consists of two elements: (1) specific valuation allowances established for expected losses on specifically analyzed loans and (2) collective valuation allowances calculated using comparable and quantifiable information from both internal and external sources about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the

collectability of the reported amount. Expected credit losses are estimated over the contractual term of the loans and adjusted for expected prepayments. 38 Table of Contents To determine the adequacy of the ACL on loans,Â the Company applied a dual credit risk rating (â€œDCRRâ€) methodology that estimates each loanâ€™s probability of default and loss given default to calculate the expected credit loss to non-analyzed loans. The DCRR process quantifies the expected credit loss at the loan level for the entire loan portfolio. Loan grades are assigned by a customized scorecard that risk rates each loan based on multiple probability of default and loss given default elements to measure the risk of the loan portfolio. The ACL estimate incorporates the Companyâ€™s DCRR loan level risk rating methodology and the expected default rate frequency term structure to derive loan level life of loan estimates of credit losses for every loan in the portfolio. The estimated credit loss for each loan is adjusted based on one-year through the cycle estimate of expected credit loss to a life of loan measurement that reflects current conditions and forecasts. The life of loan expected loss is determined using the contractual weighted average life of the loan adjusted for prepayments. Prepayment speeds are determined by grouping the loans into pools based on segments and risk rating. After the life of loan expected losses are determined, they are adjusted to reflect the Companyâ€™s reasonable and supportable economic forecast over a selected range of a one to two years. The Company has developed regression models to project net charge-off rates based on macroeconomic variables (â€œMEVsâ€), typically a one-year period is used. MEVâ€™s considered in the analysis consist of data gathered from the St. Louis Federal Reserve Research Database (â€œFREDâ€), such as, federal funds rate, 10-year treasury rates, 30-year mortgage rates, crude oil prices, consumer price index, housing price index, unemployment rates, housing starts, gross domestic product, and disposable personal income. These regression models are applied to the Companyâ€™s economic forecast to determine the corresponding net charge-off rates. The projected net charge-off rates for the given economic scenario are used to adjust the through the cycle expected losses. Qualitative adjustments are also made to ACL results for additional risk factors that are relevant in assessing the expected credit losses within our loan segments. These qualitative factor (â€œQ-Factorâ€) adjustments may increase or decrease managementâ€™s estimate of the ACL by a calculated percentage based upon the estimated level of risk within a particular segment. Q-Factor risk decisions consider concentrations of the loan portfolio, expected changes to the economic forecasts, large relationships, and other factors related to credit administration, such as borrowerâ€™s risk rating and the potential effect of delayed credit score migrations. Management quantifiably identifies segment percentage Q-Factor adjustments using a scorecard risk rating system scaled to historical loss experience within a segment and managementâ€™s perceived risk for that particular segment. In addition to the loan level evaluations, nonaccrual loans with a balance of $250 thousand or more are individually analyzed based on facts and circumstances of the loan to determine if a specific allowance amount may be necessary. Specific allowances may also be established for loans whose outstanding balances are below the above threshold when it is determined that the risk associated with the loan differs significantly from the risk factor amounts established for its loan category. The ACL for loans was $42.9 million at September 30, 2024, compared to $42.4 million at December 31, 2023, an increase of $500 thousand, or 1.3%. The increase is primarily a result of a provision for credit losses on loans of $3.1 million being recorded during the nine months ended September 30, 2024 largely attributable to growth of $23.2 million in loans held for investment, partially offset by net charge-offs of $2.6 million during the period. Uncertainty regarding forecasted economic conditions remains, due to the continued elevated interest rate environment and persistent inflation in the United States, and additional provisions for credit losses may be necessary in future periods. The following table provides an analysis of the ACL for loans and other data during the periods indicated. Delinquent loans may remain on accrual status between 30 days and 90 days past due. Loans on which the accrual of interest has been discontinued are designated as nonaccrual loans. Typically, the accrual of interest on loans is discontinued when principal or interest payments are past due 90 days or when, in the opinion of management, there is a reasonable doubt as to collectability in the normal course of business. When loans are placed on nonaccrual status, all interest previously accrued but not collected is reversed against current period interest income. Income on nonaccrual loans is subsequently recognized only to the extent that cash is received and the loanâ€™s principal balance is deemed collectible. Loans are restored to accrual status when loans become well-secured and management believes full collectability of principal and interest is probable. 40 Table of Contents Loans that exhibit characteristics different from their pool characteristics are evaluated on an individual basis. Loans evaluated individually are not included in the collective ACL evaluation. Income from loans on nonaccrual status is recognized to the extent cash is received and when the loanâ€™s principal balance is deemed collectible. Depending on a particular loanâ€™s circumstances, we analyze loans for specific allowance based upon either the present value of expected future cash flows discounted at the loanâ€™s effective interest rate, the loanâ€™s observable market price, or the fair value of the collateral less estimated costs to sell if the loan is collateral dependent. A loan is considered collateral dependent when repayment of the loan is based solely on the liquidation of the collateral. Fair value, where possible, is determined by independent appraisals, typically on an annual basis. Between appraisal periods, the fair value may be adjusted based on specific events, such as if deterioration of quality of the collateral comes to our attention as part of our problem loan monitoring process, or if discussions with the borrower lead us to believe the last appraised value no longer reflects the actual market for the collateral. The specific allowance amount on a collateral-dependent loan is charged-off to the allowance if deemed not collectible and the impairment amount on a loan that is not collateral-dependent is set up as a specific reserve. Real estate we acquire as a result of foreclosure or by deed-in-lieu of foreclosure is classified as other real estate owned (â€œOREOâ€) until sold and is initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. OREO and repossessed assets are reported as foreclosed assets. Nonperforming loans include nonaccrual loans and loans past due 90 days or more. Nonperforming assets consist of nonperforming loans plus foreclosed assets. At September 30, 2024, our total nonaccrual loans were $22.6 million, or 0.74% of total loans held for investment, as compared to $3.2 million, or 0.11% of total loans held for investment, at December 31, 2023. These loans within this amount that exceeded $250 thousand were specifically analyzed and specific valuation allowances were established as necessary and included in the ACL for loans as of September 30, 2024 to cover any probable loss. The previously disclosed $20.0 million multi-family property credit that was placed on nonaccrual status in the second quarter of 2024 after the maturity date was accelerated, was subsequently modified during the third quarter. The modification included more stringent credit metrics. Although the loan remains in nonaccrual status, the loan continues to pay as agreed and is showing improving credit trends. Additionally, two relationships totaling approximately $972 thousand that were on nonaccrual at December 31, 2023 were fully repaid in the first quarter of 2024. Nonperforming loans were $24.7 million at September 30, 2024 and $5.2 million at December 31, 2023. This increase of $19.5 million is mainly due to the changes in nonaccrual loans noted above. Occasionally, the Company modifies loans to borrowers in financial distress by providing principal forgiveness, term extensions, an other than insignificant payment delay, or interest rate reduction. When principal forgiveness is provided, the amount of forgiveness is charged-off against the ACL for loans. Typically, one type of concession, such as term extension, is granted initially. If the borrower continues to experience financial difficulty, another concession, such as principal forgiveness, may be granted. In some cases, the Company provides multiple types of concessions on one loan. The Company closely monitors the performance of loans that are modified to borrowers experiencing financial difficulty to understand the effectiveness of its modification efforts. Upon the Companyâ€™s determination that a modified loan has subsequently been deemed to not be fully collectible, the uncollectible amount is written off. Therefore, the amortized cost basis of the loan is reduced by the uncollectible amount and the ACL for loans is adjusted by the same amount. If a borrower on a restructured accruing loan has demonstrated performance under the previous terms, is not experiencing financial difficulty and shows the capacity to continue to perform under the restructured terms, the loan will remain on accrual status. Otherwise, the loan will be placed on nonaccrual status until the borrower demonstrates a sustained period of performance, which generally requires six consecutive months of payments. Securities Portfolio The securities portfolio is the second largest component of the Companyâ€™s interest-earning assets, and the structure and composition of this portfolio is important to an analysis of the financial condition of the Company. The securities portfolio serves the following purposes: (i) it provides a source of pledged assets for securing certain deposits and borrowed funds, as may be required by law or by specific agreement with a depositor or lender; (ii) it provides liquidity to even out cash flows from the loan and deposit activities of customers; (iii) it can be used as an interest rate risk management tool, since it provides a large base of assets, the maturity and interest rate characteristics of which can be changed more readily than the loan portfolio to better match changes in the deposit base and other funding sources of the Company; and (iv) it is an alternative interest-earning asset when loan demand is weak or when deposits grow more rapidly than loans. The securities portfolio consists of securities classified as either held-to-maturity or available-for-sale. Securities consist primarily of state and municipal securities, mortgage-backed securities and U.S. government sponsored agency securities. We determine the appropriate classification at the time of purchase. All held-to-maturity securities are reported at amortized cost, adjusted for premiums and discounts that are recognized in interest income using the interest method over the period to maturity. All available-for-sale securities are reported at fair value. Our securities portfolio decreased $15.9 million, or 2.5%, to $606.9 million at September 30, 2024, compared to $622.8 million at December 31, 2023. The decrease was primarily due to $28.9 million in maturities, prepayments and calls, net of purchases, partially offset by a $15.0 million increase in the fair value of available for sale securities at September 30, 2024 as compared to December 31, 2023. 41 Table of Contents Certain securities have fair values less than amortized cost and, therefore, contain unrealized losses. At September 30, 2024, the unrealized loss on the Companyâ€™s available for sale securities was $67.1 million, down from $82.1 million at December 31, 2023. At September 30, 2024, the Company evaluated whether the decline in fair value has resulted from credit losses or other factors. Within this evaluation, management considers the extent to which fair value is less than amortized cost, any changes to the rating of the security by rating agency, and adverse conditions specifically related to the security, among other factors. Based on managementâ€™s evaluation no unrealized losses on securities were determined to be due to credit loss. Additionally, we anticipate full recovery of amortized cost with respect to these securities by maturity, or sooner in the event of a more favorable market interest rate environment. We do not intend to sell these securities and it is not probable that we will be required to sell them before recovery of the amortized cost basis, which may be at maturity, thus no ACL or losses have been recognized in the Companyâ€™s consolidated financial statements. The following table sets forth certain information regarding contractual maturities and the weighted average yields of our investment securities as of the date presented. Expected maturities may differ from contractual maturities if borrowers have the right to call or prepay an obligation with or without call or prepayment penalties. We put continued effort into gathering noninterest-bearing demand deposit accounts through loan production, customer referrals, marketing staffs, mobile and online banking and various involvements with community networks. Total deposits at September 30, 2024

were $3.72 billion, representing an increase of $93.2 million, or 2.6%, compared to $3.63 billion at December 31, 2023. The increase since December 31, 2023 consisted of increases of $69.0 million in interest-bearing deposits and $24.2 million in non-interest-bearing deposits. As of September 30, 2024, 26.8% of total deposits were comprised of noninterest-bearing demand accounts, 61.3% of interest-bearing non-maturity accounts and 11.9% of time deposits. Borrowed Funds In addition to deposits, we may utilize advances from the FHLB and other borrowings as a supplementary funding source to finance our operations. FHLB Advances. The FHLB allows us to borrow, both short and long-term, on a blanket floating lien status collateralized by first mortgage loans and commercial real estate loans as well as FHLB stock. At September 30, 2024 and December 31, 2023, we had total remaining borrowing capacity from the FHLB of $1.11 billion and $1.10 billion, respectively, with no outstanding balance. We had no long-term FHLB borrowings during the three and nine months ended September 30, 2024 or 2023. Federal Reserve Bank of Dallas. The Bank has a line of credit with the Federal Reserve Bank of Dallas (the â€œFRBâ€). The amount of the line is determined on a monthly basis by the FRB. The line is collateralized by a blanket floating lien on all agriculture, commercial and consumer loans. The amount of the line was $664.2 million and $595.4 million at September 30, 2024 and December 31, 2023, respectively, with no outstanding balance. We had no long-term FRB borrowings during the nine months ended September 30, 2024 or 2023. Lines of Credit. The Bank has uncollateralized lines of credit with multiple banks as a source of funding for liquidity management. The total amount of the lines was $140.0 million and $140.0 million as of September 30, 2024 and December 31, 2023, respectively. The lines were not used, other than testing during the three and nine months September 30, 2024 or the three and nine months September 30, 2023. FHLB Letters of Credit - The Company may use FHLB letters of credit to pledge to certain public deposits. The outstanding balance of FHLB letters of credit was $75.0 million and $-0- at September 30, 2024 and December 31, 2023, respectively. Subordinated Debt. In December 2018, the Company issued $14.1 million of subordinated notes that have a maturity date of December 2030 and an average fixed rate of 6.41% for the first seven years. After the fixed rate periods, these notes will float at the Wall Street Journal prime rate, with a floor of 4.0% and a ceiling of 7.5%. These notes pay interest quarterly, are unsecured, and may be called by the Company at any time after the remaining maturity is five years or less. Additionally, these notes are intended to qualify for Tier 2 capital treatment, subject to regulatory limitations. On September 29, 2020, the Company issued $50.0 million in subordinated notes. Proceeds were reduced by approximately $926 thousand in debt issuance costs. These notes have a maturity date of September 2030 with a fixed rate of 4.50% for the first five years. After the expiration of the fixed rate period, the notes will reset quarterly at a variable rate equal to the then current three-month Secured Overnight Financing Rate, as published by the Federal Reserve Bank of New York, plus 438 basis points. These notes pay interest semi-annually, are unsecured, and may be called by the Company at any time after the remaining maturity is five years or less. Additionally, these notes are intended to qualify for Tier 2 capital treatment, subject to regulatory limitations. As of September 30, 2024, the total amount of subordinated debt securities outstanding was $64.1 million less approximately $186 thousand of remaining debt issuance costs for a total balance of $63.9 million. Junior Subordinated Deferrable Interest Debentures and Trust Preferred Securities. Between March 2004 and June 2007, the Company formed three wholly-owned statutory business trusts solely for the purpose of issuing trust preferred securities, the proceeds of which were invested in junior subordinated deferrable interest debentures. The trusts are not consolidated and the debentures issued by the Company to the trusts are reflected in the Companyâ€™s Consolidated Balance Sheets. The Company records interest expense on the debentures in its consolidated financial statements. The amount of debentures outstanding was $46.4 million at September 30, 2024 and December 31, 2023. The Company has the right, as has been exercised in the past, to defer payments of interest on the securities for up to twenty consecutive quarters. During such time, corporate dividends may not be paid. The Company is current in its interest payments on the debentures. The chart below indicates certain information, as of September 30, 2024, about each of the statutory trusts and the junior subordinated deferrable interest debentures, including the date the junior subordinated deferrable interest debentures were issued, outstanding amounts of trust preferred securities and junior subordinated deferrable interest debentures, the maturity date of the junior subordinated deferrable interest debentures, and the interest rates on the junior subordinated deferrable interest debentures. 44 Table of Contents Name of Trust Â Issue Date Â Amount of Trust Preferred Securities Â Â Amount of Debentures Â Â Stated Maturity Date of Trust Preferred Securities and Debentures(1) Â Interest Rate of Trust Preferred Securities and Debentures(2)(3) Â Â (Dollars in thousands) South Plains Financial Capital Trust III Â 2004 Â $ 10,000 Â Â $ 10,310 Â Â Â 2034 Â 3-mo. Liquidity and Capital Resources Liquidity Liquidity refers to the measure of our ability to meet the cash flow requirements of depositors and borrowers, while at the same time meeting our operating, capital and strategic cash flow needs, all at a reasonable cost. We continuously monitor our liquidity position to ensure that assets and liabilities are managed in a manner that will meet all short-term and long-term cash requirements. We manage our liquidity position to meet the daily cash flow needs of customers, while maintaining an appropriate balance between assets and liabilities to meet the return on investment objectives of our shareholders. Our liquidity position is supported by management of liquid assets and access to alternative sources of funds. Our liquid assets include cash, interest-bearing deposits in correspondent banks, federal funds sold, and fair value of unpledged investment securities. Other available sources of liquidity include wholesale deposits, and additional borrowings from correspondent banks, FHLB advances, and the Federal Reserve discount window. At September 30, 2024, the Bank had the capacity to borrow additional funds from the FHLB and Federal Reserve discount window of up to approximately $1.1 billion and $664.2 million, respectively. Our short-term and long-term liquidity requirements are primarily met through cash flow from operations, redeployment of prepaying and maturing balances in our loan and investment portfolios, and increases in customer deposits. Other alternative sources of funds will supplement these primary sources to the extent necessary to meet additional liquidity requirements on either a short-term or long-term basis. Management believes that the Company has adequate liquidity to meet its obligations. However, if general economic conditions, potential recession in the United States and our market areas, the impacts related to or resulting from bank failures and any uncertainty in the banking industry, including the associated impact to the Company and other financial institutions of any regulatory changes or other mitigation efforts taken by government agencies in response thereto, increased competition for deposits and related changes in deposit customer behavior, changes in market interest rates, the resurgence of elevated levels of inflation or inflationary pressures in the United States and our market areas, or other events, cause these sources of external funding to become restricted or are eliminated, the Company may not be able to raise adequate funds or may incur substantially higher funding costs or operating restrictions in order to raise the necessary funds to support the Companyâ€™s operations and growth. Capital Total stockholdersâ€™ equity increased to $443.1 million as of September 30, 2024, compared to $407.1 million as of December 31, 2023, an increase of $36.0 million, or 8.8%. The increase from December 31, 2023 was primarily the result of $33.2 million in net earnings for the nine months ended September 30, 2024 and an increase in accumulated other comprehensive income (â€œAOCIâ€) of $9.3 million, net of tax, partially offset by $6.7 million of dividends paid. The increase in AOCI was attributable to the increase in fair value of our available for sale securities and fair value hedges, net of tax, as a result of the decline in market interest rates experienced during the period. We are subject to various regulatory capital requirements administered by the federal and state banking regulators. Failure to meet regulatory capital requirements may result in certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have a direct material effect on our financial statements. Under capital adequacy guidelines and the regulatory framework for â€œprompt corrective actionâ€ (described below), we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting policies. The capital amounts and classifications are subject to qualitative judgments by the federal banking regulators about components, risk weightings and other factors. Qualitative measures established by regulation to ensure capital adequacy required us to maintain minimum amounts and ratio of common equity tier 1 (â€œCET1â€) capital, tier 1 capital and total capital to risk-weighted assets and of tier 1 capital to average consolidated assets, referred to as the â€œleverage ratio.â€ 45 Table of Contents The risk-based capital ratios measure the adequacy of a bankâ€™s capital against the riskiness of its assets and off-balance sheet activities. Failure to maintain adequate capital is a basis for â€œprompt corrective actionâ€ or other regulatory enforcement action. In assessing a bankâ€™s capital adequacy, regulators also consider other factors such as interest rate risk exposure; liquidity, funding and market risks; quality and level of earnings; concentrations of credit, quality of loans and investments; risks of any nontraditional activities; effectiveness of bank policies; and managementâ€™s overall ability to monitor and control risks. At September 30, 2024 and December 31, 2023, both we and the Bank met all the capital adequacy requirements to which we and the Bank were subject. At September 30, 2024, we and the Bank were â€œwell capitalizedâ€ under the regulatory framework for prompt corrective action. Management believes that no conditions or events have occurred since September 30, 2024 that would materially adversely change such capital classifications. From time to time, we may need to raise additional capital to support our and the Bankâ€™s further growth and to maintain our â€œwell capitalizedâ€ status. The table below summarizes the capital requirements applicable to us and the Bank in order to be considered â€œwell capitalizedâ€ from a regulatory perspective, as well as our and the Bankâ€™s capital ratios as of the dates indicated. The final rule became effective on January 1, 2020, and the CBLR framework became available for banks to use beginning with their March 31, 2020 Call Reports. Under the final rule, if a qualifying community banking organization opts into the CBLR framework and meets all requirements under the framework, it will be considered to have met the well-capitalized ratio requirements under the â€œprompt corrective actionâ€ regulations described above and will not be required to report or calculate risk-based capital. In order to qualify for the CBLR framework, a community banking organization must have a tier 1 leverage ratio of greater than 9%, less than $10 billion in total consolidated assets, and limited amounts of off-balance sheet exposures and trading assets and liabilities. Although the Company and the Bank are qualifying community banking organizations, the Company and the Bank have elected not to opt in to the CBLR framework at this time and will continue to follow the Basel III capital requirements as described above. Treasury Stock The Company repurchased stock in accordance with its previously-announced stock repurchase program during the three and nine months endedÂ September 30, 2024. For the three months ended September 30, 2024, we repurchased 40,000 shares of common stock for a total of $1.0 million. For the nine months endedÂ September 30, 2024, we repurchased 53,799 share of common stock for a total of $1.3 million. These shares were retired immediately upon repurchase by the Company and not included in treasury stock. See Part II, Item 2, â€œUnregistered Sales of Equity Securities and Use of Proceeds,â€ of this Form 10-Q for further information. Interest Rate Sensitivity and Market Risk As a financial institution, our primary component of market risk is interest rate volatility. Our interest rate risk policy provides management with the guidelines for effective funds management, and we have established a measurement system for monitoring our net interest rate sensitivity position. We have historically managed our sensitivity position within our established guidelines. 46 Table of Contents Interest rate sensitivity involves the relationships between rate-sensitive assets and liabilities and is an indication of the probable effects of interest rate fluctuations on the Companyâ€™s net interest income. Interest rate-sensitive assets and liabilities are those with yields or rates that are subject to change within a future time period due to maturity or changes in market rates. The model is used to project future net interest income under a set of possible interest rate movements. The Companyâ€™s Investment/Asset Liability Committee (â€œALCO Committeeâ€) reviews this information to determine compliance with the limits set by the Bankâ€™s board of directors. Fluctuations in interest rates will ultimately impact both the level of income and expense recorded on most of our assets and liabilities, and the market value of all interest-earning assets and interest-bearing liabilities, other than those which have a short term to maturity. Interest rate risk is the potential of economic losses due to future interest rate changes. These economic losses can be reflected as a loss of future net interest income and/or a loss of current fair market values. The objective is to measure the effect on net interest income and to adjust the balance sheet to minimize the inherent risk while at the same time maximizing income. We manage our exposure to interest rates by structuring our balance sheet in the ordinary course of business. Based upon the nature of our operations, we are not subject to foreign exchange or commodity price risk. We do not own any trading assets. Our exposure to interest rate risk is managed by the ALCO Committee, in accordance with policies approved by the Bankâ€™s board of directors. The ALCO Committee formulates strategies based on appropriate levels of interest rate risk. In determining the appropriate level of interest rate risk, the ALCO Committee considers the impact on earnings and capital on the current outlook on interest rates, potential changes in interest rates, regional economies, liquidity, business strategies and other factors. The ALCO Committee meets regularly to review, among other things, the sensitivity of assets and liabilities to interest rate changes, the book and market values of assets and liabilities, commitments to originate loans and the maturities of investments and borrowings. Additionally, the ALCO Committee reviews liquidity, cash flow flexibility, maturities of deposits and consumer and commercial deposit activity. Management employs methodologies to manage interest rate risk, which include an analysis of relationships between interest-earning assets and interest-bearing liabilities and an interest rate shock simulation model. We use interest rate risk simulation models and shock analyses to test the interest rate sensitivity of net interest income and fair value of equity, and the impact of changes in interest rates on other financial metrics. Contractual maturities and re-pricing opportunities of loans are incorporated in the model. The average lives of non-maturity deposit accounts are based on decay assumptions and are incorporated into the model. All of the assumptions used in our analyses are inherently uncertain and, as a result, the model cannot precisely measure future net interest income or precisely predict the impact of fluctuations in market interest rates on net interest income. Actual results will differ from the modelâ€™s simulated results

due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and the application and timing of various management strategies. On a quarterly basis, we run a simulation model for a static balance sheet and other scenarios. These models test the impact on net interest income from changes in market interest rates under various scenarios. Under the static model, rates are shocked instantaneously and ramped rates change over a 12-month and 24-month horizon based upon parallel and non-parallel yield curve shifts. Parallel shock scenarios assume instantaneous parallel movements in the yield curve compared to a flat yield curve scenario. Non-parallel simulation involves analysis of interest income and expense under various changes in the shape of the yield curve. Our internal policy regarding internal rate risk simulations currently specifies that for gradual parallel shifts of the yield curve, estimated net interest income at risk for the subsequent one-year period should not decline by more than 7.5% for a 100 basis point shift, 15% for a 200 basis point shift, and 22.5% for a 300 basis point shift. The following table summarizes the simulated change in net interest income over a 12-month horizon as of the dates indicated: Â Â Â September 30, 2024 Â Â December 31, 2023 Â Change in Interest Rates (Basis Points) Â Â Percent Change in Net Interest Income Â Â Percent Change in Net Interest Income Â +300 Â Â Â (3.48)% Â Â (10.02)% +200 Â Â Â (2.22)% Â Â (6.59)% +100 Â Â Â (1.04)% Â Â (3.21)% -100 Â Â Â 0.27 % Â Â 3.35 % -200 Â Â Â 0.85 % Â Â 6.86 % Impact of Inflation Our consolidated financial statements and related notes included elsewhere in this Form 10-Q have been prepared in accordance with U.S. generally accepted accounting principles (â€œGAAPâ€). GAAP requires the measurement of financial position and operating results in terms of historical dollars, without considering changes in the relative value of money over time due to inflation or recession. 47 Table of Contents The Companyâ€™s asset and liability structure is substantially different from that of an industrial company in that virtually all assets and liabilities of the Company are monetary in nature. Management believes the impact of inflation on financial results depends upon the Companyâ€™s ability to react to changes in interest rates and by such reaction, reduce the inflationary impact on performance. Interest rates do not necessarily move in the same direction, or at the same magnitude, as the prices of other goods and services. However, other operating expenses do reflect general levels of inflation. Management seeks to manage the relationship between interest rate-sensitive assets and liabilities in order to protect against wide net interest income fluctuations, including those resulting from inflation. Various information shown elsewhere in this Report will assist in the understanding of how well the Company is positioned to react to changing interest rates and inflationary trends. In particular, additional information related to the Companyâ€™s interest rate-sensitive assets and liabilities is contained in this Item 2, â€œManagementâ€™s Discussion and Analysis of Financial Condition and Results of Operationsâ€ of this Report under the heading â€œInterest Rate Sensitivity and Market Risk.â€ Non-GAAP Financial Measures Our accounting and reporting policies conform to GAAP and the prevailing practices in the banking industry. However, we also evaluate our performance based on certain additional financial measures discussed in this Report as being non-GAAP financial measures. We classify a financial measure as being a non-GAAP financial measure if that financial measure excludes or includes amounts, or is subject to adjustments that have the effect of excluding or including amounts, that are included or excluded, as the case may be, in the most directly comparable measure calculated and presented in accordance with GAAP as in effect from time to time in the U.S. in our consolidated statements of comprehensive income (loss), balance sheets or statements of cash flows. Non-GAAP financial measures do not include operating and other statistical measures or ratios or statistical measures calculated using exclusively either financial measures calculated in accordance with GAAP, operating measures or other measures that are not non-GAAP financial measures or both. The non-GAAP financial measures that we discuss in this Report should not be considered in isolation or as a substitute for the most directly comparable or other financial measures calculated in accordance with GAAP. Moreover, the manner in which we calculate the non-GAAP financial measures that we discuss in this Report may differ from that of other companies reporting measures with similar names. It is important to understand how other banking organizations calculate their financial measures with names similar to the non-GAAP financial measures we have discussed in this Report when comparing such non-GAAP financial measures. Tangible Book Value Per Common Share. Tangible book value per share is a non-GAAP measure generally used by investors, financial analysts and investment bankers to evaluate financial institutions. The most directly comparable GAAP financial measure for tangible book value per common share is book value per common share. We believe that the tangible book value per common share measure is important to many investors in the marketplace who are interested in changes from period to period in book value per common share exclusive of changes in intangible assets. Goodwill and other intangible assets have the effect of increasing total book value while not increasing our tangible book value. Tangible Common Equity to Tangible Assets. Tangible common equity to tangible assets is a non-GAAP measure generally used by investors, financial analysts and investment bankers to evaluate financial institutions. We calculate tangible common equity, as described above, and tangible assets as total assets less goodwill, core deposit intangibles and other intangible assets, net of accumulated amortization. The most directly comparable GAAP financial measure for tangible common equity to tangible assets is total common stockholdersâ€™ equity to total assets. We believe that this measure is important to many investors in the marketplace who are interested in the relative changes from period to period of tangible common equity to tangible assets, each exclusive of changes in intangible assets. Goodwill and other intangible assets have the effect of increasing both total stockholdersâ€™ equity and assets while not increasing our tangible common equity or tangible assets. The following table reconciles, as of the dates set forth below, total stockholdersâ€™ equity to tangible common equity and total assets to tangible assets and then presents book value per common share, tangible book value per common share, total stockholdersâ€™ equity to total assets, and tangible common equity to tangible assets: Â Â September 30, Â Â December 31, Â Â Â Â 2024 Â Â Â 2023 Â Â Â (Dollars in thousands) Â Total stockholdersâ€™ equity Â $ 443,122 Â Â $ 407,114 Â Less:Â Goodwill and other intangibles Â Â (21,197) Â Â (21,744) Tangible common equity Â $ 421,925 Â Â $ 385,370 Â Â Â Â Â Â Â Â Â Â Total assets Â $ 4,337,659 Â Â $ 4,204,793 Â Less:Â Goodwill and other intangibles Â Â (21,197) Â Â (21,744) Tangible assets Â $ 4,316,462 Â Â $ 4,183,049 Â Â Â Â Â Â Â Â Â Â Shares outstanding Â Â 16,386,627 Â Â Â 16,417,099 Â Â Â Â Â Â Â Â Â Â Total stockholdersâ€™ equity to total assets Â Â 10.22 % Â Â 9.68 % Tangible common equity to tangible assets Â Â 9.77 % Â Â 9.21 % Book value per share Â $ 27.04 Â Â $ 24.80 Â Tangible book value per share Â $ 25.75 Â Â $ 23.47 Â 48 Table of Contents Critical Accounting Policies and Estimates Our accounting and reporting policies conform to GAAP and conform to general practices within the industry in which we operate. To prepare consolidated financial statements in conformity with GAAP, management makes estimates, assumptions and judgments based on available information. These estimates, assumptions and judgments affect the amounts reported in the consolidated financial statements and accompanying notes. These estimates, assumptions and judgments are based on information available as of the date of the consolidated financial statements and, as this information changes, actual results could differ from the estimates, assumptions and judgments reflected in the consolidated financial statements. In particular, management has identified several accounting policies that, due to the estimates, assumptions and judgments inherent in those policies, are critical in understanding our consolidated financial statements. The Jumpstart Our Business Startups Act (the â€œJOBS Actâ€) permits us an extended transition period for complying with new or revised accounting standards affecting public companies. We have elected to take advantage of this extended transition period, which means that the consolidated financial statements included in this Form 10-Q, as well as any financial statements that we file in the future, will not be subject to all new or revised accounting standards generally applicable to public companies for the transition period for so long as we remain an emerging growth company or until we affirmatively and irrevocably opt out of the extended transition period under the JOBS Act. The following is a discussion of the critical accounting policies and significant estimates that we believe require us to make the most complex or subjective decisions or assessments. Securities. Investment securities may be classified into trading, held-to-maturity, or available-for-sale portfolios. Securities that are held principally for resale in the near term are classified as trading. Securities that management has the ability and positive intent to hold to maturity are classified as held-to-maturity and recorded at amortized cost. Securities not classified as trading or held-to-maturity are available-for-sale and are reported at fair value with unrealized gains and losses excluded from earnings, but included in the determination of other comprehensive income (loss). Management uses these assets as part of its asset/liability management strategy; they may be sold in response to changes in liquidity needs, interest rates, resultant prepayment risk changes, and other factors. Management determines the appropriate classification of securities at the time of purchase. Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. The cost of securities sold is based on the specific identification method. Loans. Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at their outstanding principal balances net of any unearned income, charge-offs, unamortized deferred fees and costs on originated loans, and premiums or discounts on purchased loans. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the related loan yield using the straight-line method, which is not materially different from the effective interest method required by GAAP. Loans are placed on non-accrual status when, in managementâ€™s opinion, collection of interest is unlikely, which typically occurs when principal or interest payments are more than ninety days past due. When interest accrual is discontinued, all unpaid accrued interest is reversed against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured. Allowance for Credit Losses. The ACL for loans is established for future expected credit losses through a provision for credit losses charged to earnings. Expected losses are calculated using comparable and quantifiable information both internal and external about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. Expected credit losses are estimated over the contractual term of the loans and adjusted for expected prepayments when appropriate. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. The Companyâ€™s ACL for loans consists of specific valuation allowances established for probable losses on specifically analyzed loans and collective valuation allowances calculated using comparable and quantifiable information both internal and external about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. The ACL for loans is evaluated on a quarterly basis by management and is based upon managementâ€™s review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrowerâ€™s ability to repay, estimated value of any underlying collateral, and prevailing economic conditions. This evaluation is inherently subjective, as it requires estimates that are susceptible to significant revision as more information becomes available. The determination of the adequacy of the ACL for loans is based on estimates that are particularly susceptible to significant changes in the economic environment and market conditions. In connection with the determination of the estimated losses on loans, management obtains independent appraisals for significant collateral. The Bankâ€™s loans are generally secured by specific items of collateral including real property, crops, livestock, consumer assets, and other business assets. 49 Table of Contents While management uses available information to recognize losses on loans, further reductions in the carrying amounts of loans may be necessary based on various factors. In addition, regulatory agencies, as an integral part of their examination process, periodically review the estimated losses on loans. Such agencies may require the Bank to recognize additional losses based on their judgments about information available to them at the time of their examination. Because of these factors, it is reasonably possible that the estimated losses on loans may change materially in the near term. However, the amount of the change that is reasonably possible cannot be estimated. Loans that exhibit characteristics different from their pool characteristics are evaluated on an individual basis. Loans evaluated individually are not included in the collective ACL for loans evaluation. Certain of these loans are considered to be collateral dependent with the borrower experiencing financial difficulty. For these loans, the fair value of collateral practical expedient is elected whereby the allowance is calculated as the amount by which the amortized cost exceeds the fair value of collateral, less costs to sell. All non-accrual loans $250 thousand or greater are analyzed for a specific ACL. The Company estimates expected credit losses on off-balance sheet credit exposures over the contractual period in which the Company is exposed to credit risk via a contractual obligation to extend credit, unless that obligation is unconditionally cancellable by the Company. The ACL for off-balance sheet credit exposures is adjusted through provision for credit losses. The estimate includes consideration of the likelihood that funding will occur and an estimate of expected credit losses on commitments expected to be funded over its estimated life. Utilization rates are determined based on a two-year rolling average of historical usage. Expected loss rates for all pass rated loans are used to determine the ACL for off-balance sheet credit exposures. For AFS securities in an unrealized loss position, the Company first assesses whether it intends to sell, or it is more likely than not that it will be required to sell the security before recovery of its amortized cost basis. If either of the criteria regarding intent or requirement to sell is met, the securityâ€™s amortized costs basis is written down to fair value through income. For AFS securities that do not meet the aforementioned criteria, the Company evaluates whether the decline in fair value has resulted from credit losses or other factors. In making this assessment, management considers the extent to which fair value is less than amortized cost, any changes to the rating of the security by rating agency, and adverse conditions specifically related to the security, among other factors. If this assessment indicates that a credit loss exists, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an ACL is recorded for the credit loss, limited by the amount that the fair value is less than the amortized cost basis. Any impairment that has not been recorded through an ACL is recognized in other comprehensive income (loss). Changes in the ACL are recorded as provision for credit losses. Losses are charged against the allowance when management believes the uncollectibility of an AFS security is confirmed or when either of the criteria regarding intent or requirement to sell is met. Accrued interest is excluded from the estimate of credit losses on securities. Loans Held for Sale. Loans held for sale are comprised of residential mortgage loans. Loans that are originated for best efforts delivery are carried at the lower of aggregate cost or fair value as determined by aggregate outstanding commitments from investors or current investor yield requirements. All other loans held for sale are carried at fair value. Loans sold are typically subject to certain indemnification provisions with the investor; management does not believe these provisions will have any significant consequences. Mortgage Servicing Rights Asset. When mortgage loans are sold with servicing retained, servicing rights are initially recorded at fair value with the consolidated statement of comprehensive income (loss) effect recorded in net gain on sale of loans. Fair value is based on market prices for comparable mortgage servicing contracts, when available, or alternatively, is based on a valuation model that calculates present value of estimated future servicing income. Under the fair value measurement method, the Company measures servicing rights at fair value at each reporting date and reports change in fair value of servicing assets in earnings in the period in which the changes occur, and are included with other noninterest income in the consolidated financial statements. The fair values of servicing rights are subject to significant fluctuations as a result of changes in estimated and actual prepayment speeds and default rates and losses. Goodwill and Other Intangible Assets. Goodwill resulting from business combinations is generally determined as the excess of the fair value of the consideration transferred over the fair value of the net assets acquired and liabilities assumed as of the acquisition date. Goodwill is not amortized, but is tested for impairment at least annually or more frequently if events and circumstances exist that indicate that an impairment test should be performed. Intangible assets with definite lives are amortized over their estimated useful lives. Recently Issued Accounting Pronouncements See Note 1, Summary of Significant Accounting Policies, in the notes to the consolidated financial statements included elsewhere in this Form 10-Q regarding the impact of new accounting pronouncements. 50 Table of Contents Item 3. Quantitative and Qualitative Disclosure about Market Risk The Company manages market risk, which, as a financial institution is primarily interest rate volatility, through the ALCO Committee of the Bank, in accordance with policies approved by its board of directors. The Company uses an interest rate risk simulation model and shock analysis to test the interest rate sensitivity of net interest income and fair value of equity, and the impact of changes in interest rates on other financial metrics. See â€œManagementâ€™s Discussion and Analysis of Financial Condition and Results of Operationsâ€”Interest Rate Sensitivity and Market Riskâ€ herein for a discussion of how we manage market risk. Item 4. Controls and Procedures Evaluation of Disclosure Controls and Procedures As of the end of the period covered by this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of its management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management was required to apply judgment in evaluating its controls and procedures. Based on this evaluation, the Companyâ€™s Chief Executive Officer and Chief Financial Officer concluded that the Companyâ€™s disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act) were effective as of the end of the period covered by this Form 10-Q. Internal Control over Financial Reporting There were no changes in the Companyâ€™s internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the three months ended September 30, 2024 that have materially affected, or are reasonably likely to materially affect, the Companyâ€™s internal control over financial reporting. 51 Table of Contents PART II. OTHER INFORMATION Item 1. Legal Proceedings The Company and its subsidiaries are subject to various legal actions, as described in our Annual Report on Form 10-K for the year ended December

31, 2023 (the â€œ2023 Annual Report on Form 10-Kâ€) filed with the SEC on March 15, 2024. Except as described in our 2023 Annual Report on Form 10-K, we are not presently involved in any other litigation, nor to our knowledge is any litigation threatened against us, that in managementâ€™s opinion would result in any material adverse effect on our financial position or results of operations or that is not expected to be covered by insurance. Item 1A.Â Risk Factors In evaluating an investment in any of our securities, investors should consider carefully, among other things, information under the heading â€œCautionary Notice Regarding Forward-Looking Statementsâ€ in Part I, Item 2, â€œManagementâ€™s Discussion and Analysis of Financial Condition and Results of Operations,â€ of this Form 10-Q and the risk factors previously disclosed under the heading â€œRisk Factorsâ€ in Part I, Item 1A of our 2023 Annual Report on Form 10-K. Management believes there have been no material changes in the risk factors disclosed by the Company in Part I, Item 1A, â€œRisk Factors,â€ of the 2023 Annual Report on Form 10-K. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results. Â Item 2. Unregistered Sales of Equity Securities and Use of Proceeds Issuer Purchases of Equity Securities On February 21, 2024, the Companyâ€™s board of directors approved a new stock repurchase program pursuant to which the Company may, from time to time, purchase up to $10.0 million of its outstanding shares of common stock (the â€œNew Programâ€). The shares can be repurchased from time to time in privately negotiated transactions or the open market, including pursuant to Rule 10b5-1 trading plans, and in accordance with applicable regulations of the SEC. The Company is not obligated to purchase any shares of its common stock under the New Program and the timing and exact amount of any repurchases depends on various factors including, the performance of the Companyâ€™s stock price, general market and other conditions, applicable legal requirements and other factors. The New Program may be terminated or amended by the Companyâ€™s board of directors at any time prior to the expiration date of February 26, 2025. Â The following table summarizes the share repurchase activity for the three months ended September 30, 2024. Other Information During the three months ended September 30, 2024, none of the directors or officers of the Company adopted or terminated a â€œRule 10b5-1 trading arrangementâ€ or a â€œnon-Rule 10b5-1 trading arrangement,â€ as each term is defined in Item 408 of Regulation S-K. Announcement of Designation of Principal Executive Officer The Companyâ€™s Board of Directors routinely reviews and considers the roles and responsibilities of the Companyâ€™s executive officers on an annual basis. As a result of such routine annual review, effective November 5, 2024, the Companyâ€™s Board of Directors determined that it is most appropriate for Mr. Cory T. Newsom, the current President of the Company, to be designated as the principal executive officer of the Company. Previously, Mr. Curtis C. Griffith, the Chairman and Chief Executive Officer of the Company, was designated as the principal executive officer of the Company for SEC reporting purposes. 52 Table of Contents Mr. Griffith will continue to serve as Chairman and Chief Executive Officer of the Company and his role and responsibilities within the organization have not been diminished. The change in designation of the Companyâ€™s principal executive officer was approved by the Companyâ€™s Board of Directors in light of Mr. Newsomâ€™s responsibilities and role within the organization as President of the Company, as well as the Companyâ€™s upcoming loss of its status as an emerging growth company on December 31, 2024, which will require additional and more robust executive compensation disclosures of the Companyâ€™s named executive officers. Because Mr. Newsom is currently, and is expected to remain, the highest compensated executive officer of the Company, the designation of Mr. Newsom as the principal executive officer of the Company is also intended to provide a more fulsome pay ratio disclosure, as will be required under Item 402(u) of Regulation S-K following the Companyâ€™s upcoming loss of its status as an emerging growth company. Amendment to Employment Agreement with Curtis C. Griffith. Â On November 5, 2024, the Companyâ€™s Board of Directors approved an Amendment No. 2 to that certain Employment Agreement, dated December 18, 2019, by and among the Company, City Bank and Mr. Curtis C. Griffith, as previously amended by an Amendment No. 1, dated December 15, 2021 (as so amended, the â€œGriffith Employment Agreementâ€), providing for: (i) an increase in Mr. Griffithâ€™s annual base salary to $425,000, annualized, commencing with the first pay period for January 1, 2025, and (ii) a cost-of-living adjustment of $14,200 to Mr. Griffithâ€™s annual base salary on January 1st of each year beginning with January 1, 2026. NEWSOM EMPLOYMENT AGREEMENT Amendment No. 2 THIS AMENDMENT NO. 2 (this "Amendment") is entered into by and between City Bank, Texas (the "Company"), Cory T. Newsom (the "Executive") and South Plains Financial, Inc. (the "Parent") to amend the Employment Agreement previously entered into by and between the parties on March 6, 2019, as previously amended on December 15, 2021 (as amended, the "Employment Agreement").Â Unless otherwise indicated, all terms used in this Amendment shall have the meaning as set forth in the Employment Agreement. NOW, THEREFORE, the parties hereby amend the terms of the Employment Agreement in the following respects: 1.Â Â Â Â Â Â Â Â Â Â Â Â Base Salary.Â Section 3(a) of the Employment Agreement is hereby deleted in its entirety and replaced with the following: (a) Base Salary.Â The Employer shall pay to the Executive an annual salary of not less than $720,000.00, plus a cost-of-living adjustment of $24,000.00 on January 1st of each year beginning with January 1, 2026 (the foregoing, with the cost-of-living adjustment each year, being the "Base Salary"), payable in substantially equal installments at such intervals as may be determined by the Employer in accordance with the Employerâ€™s then-current ordinary payroll practices as established from time to time, but not less frequently than monthly.Â The Base Salary shall be reviewed in good faith by the Compensation Committee of the Parent Board (the "Committee"), or in the absence thereof, the Parent Board, based upon the Executiveâ€™s performance, not less often than annually, and may be increased, but not decreased, from time to time by the Parent Board. 2.Â Â Â Â Â Â Â Â Â Â Â Â Effective Date; Full Force and Effect.Â The effective date of this Amendment is January 1, 2025.Â Except as otherwise set forth in this Amendment, the Employment Agreement shall continue in full force and effect. 3.Â Â Â Â Â Â Â Â Â Â Â Â Incorporation by Reference and Counterparts.Â Except as otherwise provided herein, all terms and conditions of the Employment Agreement are fully incorporated herein.Â This Amendment may be executed simultaneously in two or more counterparts, each of which shall be deemed an original, and together constitute one instrument. [SIGNATURES ON NEXT PAGE] -1- IN WITNESS WHEREOF, the parties hereto have duly executed this Amendment No. 2 to the Employment Agreement as of the effective date set forth herein. DefinitionThe sum of the periodic adjustments of the differences between securities' face values and purchase prices that are charged against earnings. This is called accretion if the security was purchased at a discount and amortization if it was purchased at premium. As a noncash item, this element is an adjustment to net income when calculating cash provided by or used in operations using the indirect method. + ReferencesReference 1: http://fasb.org/us-gaap/role/ref/legacyRef -Topic 230 -SubTopic 10 -Name Accounting Standards Codification -Section 45 -Paragraph 28 -Publisher FASB -URI https://asc.fasb.org/1943274/2147482740/230-10-45-28 + Details Name: us-gaap_AccretionAmortizationOfDiscountsAndPremiumsInvestments Namespace Prefix: us-gaap_ Data Type: xbrli:monetaryItemType Balance Type: credit Period Type: duration X - ReferencesNo definition available. + Details Name: us-gaap_AdjustmentsToReconcileNetIncomeLossToCashProvidedByUsedInOperatingActivitiesAbstract Namespace Prefix: us-gaap_ Data Type: xbrli:stringItemType Balance Type: na Period Type: duration X - DefinitionEarnings on or other increases in the value of the cash surrender value of bank owned life insurance policies. + ReferencesReference 1: http://fasb.org/us-gaap/role/ref/legacyRef -Topic 942 -SubTopic 220 -Name Accounting Standards Codification -Section S99 -Paragraph 1 -Subparagraph (SX 210.9-04(13)) -Publisher FASB -URI https://asc.fasb.org/1943274/2147478524/942-220-S99-1 + Details Name: us-gaap_BankOwnedLifeInsuranceIncome Namespace Prefix: us-gaap_ Data Type: xbrli:monetaryItemType Balance Type: credit Period Type: duration X - DefinitionAmount of cash and cash equivalents, and cash and cash equivalents restricted to withdrawal or usage. (â€œSPFIâ€) is a Texas corporation and registered bank holding company that conducts its principal activities through its subsidiaries from offices located throughout Texas and Eastern New Mexico. Principal activities include commercial and retail banking, along with investment, trust, and mortgage services. The following were subsidiaries of SPFI as of September 30, 2024: Wholly-Owned, Consolidated Subsidiaries: Â City Bank Bank subsidiary Ruidoso Retail, Inc. Non-bank subsidiary CB Provence, LLC Non-bank subsidiary CBT Brushy Creek, LLC Non-bank subsidiary CBT Properties, LLC Non-bank subsidiary Wholly-Owned, Equity Method Subsidiaries: Â South Plains Financial Capital Trusts (â€œSPFCTâ€) III-V Non-bank subsidiaries On April 1, 2023, SPFI entered into a Securities Purchase Agreement (â€œAgreementâ€) with Alliant Insurance Services, Inc. (â€œAlliantâ€), providing for the sale of Windmark Insurance Agency, Inc. (â€œWindmarkâ€), City Bankâ€™s wholly-owned subsidiary, through a sale of all of the outstanding shares of capital stock of Windmark to Alliant. The transaction was consummated on April 1, 2023. Pursuant to the terms and subject to the conditions of the Agreement, SPFI received an aggregate purchase price of $36.1 million in exchange for Windmarkâ€™s common shares, representing a pre-tax gain of $33.8 million through the nine months ended September 30, 2023. This transaction did not meet the criteria for discontinued operations reporting. Basis of Presentation and Consolidation â€" The consolidated financial statements in this Quarterly Report on Form 10-Q for the three and nine months ended September 30, 2024 (this â€œForm 10-Qâ€) include the accounts of SPFI and its wholly-owned consolidated subsidiaries (collectively referred to as the â€œCompanyâ€) identified above. All significant intercompany balances and transactions have been eliminated in consolidation. The interim consolidated financial statements in this Form 10-Q have not been audited by an independent registered public accounting firm, but in the opinion of management, reflect all adjustments necessary for a fair presentation of the Companyâ€™s financial position, results of operations, and cash flows. All such adjustments were of a normal and recurring nature. The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (â€œGAAPâ€) for interim financial information and with the instructions to Form 10-Q adopted by the U.S. Securities and Exchange Commission (â€œSECâ€). Accordingly, the financial statements do not include all of the information and notes required by GAAP for complete financial statements and should be read in conjunction with the Companyâ€™s audited consolidated financial statements, and notes thereto in the Companyâ€™s Annual Report on Form 10-K for the year ended December 31, 2023 as filed with the SEC on March 15, 2024 (the â€œ2023 Annual Report on Form 10-Kâ€). Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period. Use of Estimates â€" The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Determination of the adequacy of the allowance for credit losses (â€œACLâ€) is a material estimate that is particularly susceptible to significant change in the near term; the assumptions used in stock-based compensation, derivatives, mortgage servicing rights, and fair values of financial instruments can also involve significant management estimates. Recent Accounting Pronouncements â€" Updates to the Financial Accounting Standards Board (â€œFASBâ€) Accounting Standards Codification (â€œASCâ€) are prescribed in Accounting Standards Updates (â€œASUsâ€), which are not authoritative until incorporated into the ASC. ASU 2023-06, Disclosure Improvements: Codification Amendments in Response to the SECâ€™s Disclosure Update and Simplification Initiative. The amendments in this ASU modify the disclosure or presentation requirements of a variety of Topics in the Codification. Certain of the amendments represent clarifications to, or technical corrections of the current requirements. Each amendment in the ASU will only become effective if the SEC removes the related disclosure or presentation requirement from its existing regulations by June 30, 2027. The amendments in this ASU are not expected to have a material impact on the results of operations or financial position. ASU 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures. The amendments in this ASU require public entities to disclose information about reportable segmentsâ€™ significant expenses on an interim and annual basis.Â This ASU is effective for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024. The adoption of ASU 2023-07 is not expected to have a material effect on the Companyâ€™s financial statements. ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures.Â The amendments in this ASU areÂ intended to improve the transparency of income tax disclosures by requiring consistent categories and greater disaggregation of information in the rate reconciliation and income taxes paid disaggregated by jurisdiction. It also includes certain other amendments intended to improve the effectiveness of income tax disclosures. This ASU is effective for fiscal years beginning after December 15, 2024. The adoption of ASU 2023-09 is not expected to have a material effect on the Companyâ€™s financial statements. Subsequent Events â€" The Company has evaluated subsequent events and transactions from September 30, 2024 through the date this Form 10-Q was filed with the SEC for potential recognition or disclosure as required by GAAP. Management evaluates AFS securities in unrealized loss positions to determine whether the impairment is due to credit-related factors or non-credit related factors. Consideration is given to the extent to which the fair value is less than cost, the financial condition and near-term prospects of the issuer, and the intent and ability of the Company to retain its investment in the security for a period of time sufficient to allow for the anticipated recovery in fair value. Management does not have the intent to sell any of the securities in an unrealized loss position as there are adequate liquidity sources to meet expected and unexpected funding needs. The fair value of these securities is expected to recover as the securities approach their maturity date or repricing date or if market yields for such investments decline. Accordingly, as of September 30, 2024, management believes the unrealized loss positions detailed in the previous table are due to non-credit related factors, including changes in interest rates and other market conditions, and therefore no ACL or losses have been recognized or realized in the consolidated financial statements. Management reviews and approves these policies, underwriting standards, and procedures on a regular basis and makes changes as appropriate. Management receives frequent reports related to loan originations, quality, concentrations, delinquencies, non-performing, and potential problem loans. Diversification in the loan portfolio is a means of managing risk associated with fluctuations in economic conditions, both by type of loan and geography. Commercial Real Estate â€“ Underwriting standards have been designed to determine whether the borrower possesses sound business ethics and practices, evaluate current and projected cash flows to determine the ability of the borrower to repay their obligations as agreed and ensure appropriate collateral is obtained to secure the loan. Commercial real estate loans are underwritten primarily based on projected cash flows for income-producing properties and collateral values for non-income-producing properties. The repayment of these loans is generally dependent on the successful operation of the property securing the loans or the sale or refinancing of the property. Real estate loans may be adversely affected by conditions in the real estate markets or in the general economy. The properties securing the Companyâ€™s real estate portfolio are diversified by type and geographic location. This diversity helps reduce the exposure to adverse economic events that affect any single market or industry. Commercial â€“ General and Specialized â€“ Commercial loans are underwritten after evaluating and understanding the borrowerâ€™s ability to operate profitably. Underwriting standards have been designed to determine whether the borrower possesses sound business ethics and practices, evaluate current and projected cash flows to determine the ability of the borrower to repay their obligations, as agreed and ensure appropriate collateral is obtained to secure the loan. Commercial loans are primarily made based on the identified cash flows of the borrower and, secondarily, on the underlying collateral provided by the borrower. Most commercial loans are secured by the assets being financed or other business assets, such as real estate, accounts receivable, or inventory, and typically include personal guarantees. Owner-occupied real estate is included in commercial loans, as the repayment of these loans is generally dependent on the operations of the commercial borrowerâ€™s business rather than on income-producing properties or the sale of the properties. Commercial loans are grouped into two distinct sub-categories: specialized and general. Commercial related segments that are considered â€œspecializedâ€ include agricultural production and real estate loans, energy loans, and finance, investment, and insurance loans. Commercial related segments that contain a broader diversity of borrowers, sub-industries, or serviced industries are grouped into the â€œgeneral category.â€ These include goods, services, restaurant & retail, construction, and other industries. Performance of these loans is subject to operating and cash flow results of the borrower, with risk in the volatility of operating results for particular industries. Consumer â€“ Loans to consumers include 1-4 family residential loans, auto loans, and other loans for recreational vehicles or other purposes. The Company utilizes a computer-based credit scoring analysis to supplement its policies and procedures in underwriting consumer loans. The Companyâ€™s loan policy addresses types of consumer loans that may be originated and the collateral, if secured, which must be perfected. The relatively smaller individual dollar amounts of consumer loans that are spread over numerous individual borrowers also minimizes the Companyâ€™s risk. The Company generally requires mortgage title insurance and hazard insurance on 1-4 family residential loans. All consumer loans are generally dependent on the risk characteristics of the borrowerâ€™s ability to repay the loan, a consideration of the debt to income ratio, employment and income stability, the loan-to-value ratio, and the age, condition and marketability of the collateral. Construction â€“ Loans for residential construction are for single-family properties to developers, builders, or end-users. These loans are underwritten based on estimates of costs and completed value of the project. Funds are advanced based on estimated percentage of completion for the project. Performance of these loans is affected by economic conditions as well as the ability to control costs of the projects. The commercial real estate and construction categories comprise the Companyâ€™s nonowner-occupied real estate loans. Total nonowner-occupied real estate loans were $1.22 billion at September 30, 2024, and $1.21 billion at December 31, 2023. The ACL for loans was $42.9 million at September 30, 2024, compared to $42.4 million at December 31, 2023. The ratio of ACL for loans to loans held for investment was 1.41% at September 30, 2024 and 1.41% at December 31, 2023. The following tables detail the activity in the ACL for loansÂ for the periods indicated (dollars in thousands). The increase in the provision for credit losses during the three months ended September 30, 2024, compared to the same period in 2023, was primarily due to a decrease of $1.3 million in specific reserves during the three months ended September 30, 2023. The provision increased during the nine months ended September 30, 2024, compared to the same period in 2023, mainly due to a larger growth in loans during the 2023 period compared to the 2024 period. These grades fit in one of the following categories: (i) pass, (ii) special mention, (iii) substandard, (iv) doubtful, or (v) loss. Loans categorized as loss are charged-off immediately. The grading of loans reflect a judgment by the Company about the risks of default associated with the loan. The Company reviews the grades on loans as part of the Companyâ€™s on-going monitoring of the credit quality of the loan portfolio.Â These risk ratings are assigned based on relevant information about the ability of the borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. Pass loans have financial factors or nature of collateral that are considered reasonable credit risks in the normal course of lending and encompass several grades that are assigned based on varying levels of risk, ranging from credits that are secured by cash or marketable securities, to watch credits which have all the characteristics of an acceptable credit risk but warrant more than the normal level of monitoring. Special mention loans have potential weaknesses that deserve managementâ€™s close attention. If left uncorrected, these potential weaknesses may result in deterioration of repayment prospects for the loans at some future date. Substandard loans are inadequately protected by the current net worth and paying capacity of the borrower or by the collateral pledged, if any. These loans have a well-defined weakness or weaknesses that jeopardize collection and present the distinct possibility that some loss will be sustained if the deficiencies are not corrected. A protracted workout on these credits is a distinct possibility. Prompt corrective action is therefore required to strengthen the Companyâ€™s position, and/or to reduce exposure and to assure that adequate remedial measures are taken by the borrower. Credit exposure becomes more likely in such credits and a serious evaluation of the secondary support to the credit is performed. Substandard loans can be accruing or can be nonaccrual depending on the circumstances of the individual loans. Doubtful loans have all the weaknesses inherent in substandard loans with the added characteristics that the weaknesses make collection or liquidation in full on the basis of currently existing facts, conditions, and values highly questionable and improbable. All doubtful loans are on nonaccrual. In connection with the review of the Companyâ€™s loan portfolio, management considers risk elements attributable to particular loan type or categories in assessing the quality of individual loans. The list of loans to be analyzed for individual evaluation consists of non-accrual loans over $250 thousand with direct exposure. Interest income recognized using a cash-basis method on non-accrual loans for the three and nine months ended September 30, 2024 and 2023 was not significant.Â In addition, the Company closely monitors substandard accruing loans over $1 million with direct exposure, and past due accruing loans over $100 thousand for possible individual evaluation.Â All other loans will be evaluated collectively in designated pools unless a loss exposure has been identified. Additional funds committed to be advanced on individually analyzed loans are not significant. The following tables reflect the amortized cost basis in loans held for investment by credit quality indicator and origination year at the dates indicated, and related year-to-date gross charge-offs. Loans acquired are shown in the table by origination year, not merger date. Occasionally, the Company modifies loans to borrowers in financial distress by providing principal forgiveness, term extensions, an other than insignificant payment delay, or interest rate reduction.Â When principal forgiveness is provided, the amount of forgiveness is charged-off against the allowance for credit losses. Typically, one type of concession, such as term extension, is granted initially. If the borrower continues to experience financial difficulty, another concession, such as principal forgiveness, may be granted. In some cases, the Company provides multiple types of concessions on one loan. For the loans included in the â€œcombinationâ€ columns below, multiple types of modifications have been made on the same loan within the current reporting period. The following tables present the amortized cost basis of loans at September 30, 2024 and 2023 that were both experiencing financial difficulty and modified during the periods indicated, by class and by type of modification.Â The percentage of the amortized cost basis of loans that were modified to borrowers in financial distress as compared to the amortized cost basis of each class of financing receivable is also presented below (dollars in thousands): Â Â Payment Delay Â Â Term Extension Â Â RateÂ Reduction Â Â Term Extension and Payment Â Delay Â Â Term Extension and Interest Rate Â Reduction Â Â Payment Delay and Interest Rate Reduction Â Â Payment Delay, Term Extension, and Interest Rate Reduction Â Â Total Class of Financing Receivable Â Three Months Ended September 30, 2024 Â Commercial real estate Â $ 74 Â Â $ â€” Â Â $ â€” Â Â $ â€” Â Â $ â€” Â Â $ â€” Â Â $ â€” Â Â Â 0.01 % Commercial - BORROWING ARRANGEMENTS [Abstract] Â BORROWING ARRANGEMENTS 6.Â BORROWING ARRANGEMENTS Subordinated Debt In December 2018, the Company issued $14.1 million of subordinated notes that have a maturity date of December 2030 and a weighted average fixed rate of 6.41% for the first seven years. After the fixed rate periods, these notes will float at the Wall Street Journal prime rate, with a floor of 4.0% and a ceiling of 7.5%. These notes pay interest quarterly, are unsecured, and may be called by the Company at any time after the remaining maturity is five years or less. Additionally, these notes are intended to qualify for Tier 2 capital treatment, subject to regulatory limitations. On September 29, 2020, the Company issued $50.0 million in subordinated debt notes. Proceeds were reduced by approximately $926 thousand in debt issuance costs. These notes have a maturity date of September 2030 with a fixed rate of 4.50% for the first five years. After the expiration of the fixed rate period, these notes will reset quarterly at a variable rate equal to the then current three-month Secured Overnight Financing Rate (â€œSOFRâ€), as published by the Federal Reserve Bank of New York, plus 438 basis points. These notes pay interest semi-annually, are unsecured, and may be called by the Company at any time after the remaining maturity is five years or less. Additionally, these notes are intended to qualify for Tier 2 capital treatment, subject to regulatory limitations. As of September 30, 2024, the total amount of subordinated notes outstanding was $64.1 million less approximately $186 thousand of remaining debt issuance costs for a total balance of $63.9 million. As of December 31, 2023, the total amount of subordinated notes outstanding was $64.1 million less approximately $325 thousand of remaining debt issuance costs for a total balance of $63.8 million. Notes Payable and Other Borrowings As of September 30, 2024 and December 31, 2023, City Bank had no outstanding advances from the Federal Home Loan Bank of Dallas (â€œFHLBâ€). COMPENSATION [Abstract] Â STOCK-BASED COMPENSATION 7.Â STOCK-BASED COMPENSATION Equity Incentive Plan The 2019 Equity Incentive Plan (â€œPlanâ€) was approved by the Companyâ€™s Board of Directors on January 16, 2019 and by its shareholders on March 6, 2019. The purpose of the Plan is to: (i) attract and retain the best available personnel for positions of substantial responsibility, (ii) provide additional incentive to employees, directors and consultants, and (iii) promote the success of the Companyâ€™s business. The Plan permits the grant of incentive stock options, non-statutory stock options, stock appreciation rights, restricted stock, restricted stock units, performance units, performance shares, and other stock-based awards. The maximum aggregate number of shares of common stock that may be issued pursuant to all awards under the Plan was 4,919,509 at September 30, 2024. The maximum aggregate number of shares that may be issued under the Plan may be increased annually by up to 3% of the total issued and outstanding common shares of the Company at the beginning of each fiscal year. The fair value of each option award is estimated on the date of grant using the Black-Scholes model that uses the assumptions noted in the table below. Expected volatilities are based on historical volatilities of the Companyâ€™s common stock and similar peer company averages. The Company uses historical data to estimate option exercise and post-vesting termination behavior. The expected term of options granted represents the period of time that options granted are expected to be outstanding, which takes in to account that the options are not transferable. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of the grant. The total fair value of restricted stock units vested during each of the nine months ended September 30, 2024 and 2023 was $643 thousand and $931 thousand, respectively. For the three months ended September 30, 2024 and 2023 the Company recorded stock-based compensation expense related to the Plan of $563 thousand and $511 thousand, respectively. The Company recorded stock-based compensation expense related to the Plan of $1.7 million and $1.6 million for the nine months ended September 30, 2024 and 2023, respectively. The total unrecognized compensation cost for the awards outstanding under the Plan at September 30, 2024 was $3.8 million and will be recognized over a weighted average remaining period of 1.67 years. the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Companyâ€™s consolidated financial statements. The Companyâ€™s exposure to credit loss is represented by the contractual amount of these commitments. The Company follows the same credit policies in making commitments as it does for recorded instruments. Financial instruments whose contract amounts represent credit risk outstanding at the dates indicated follow (dollars in thousands): Â September 30, 2024 Â Â December 31, 2023 Â Commitments to grant loans and unfunded commitments under lines of credit Â $ 545,480 Â Â $ 598,800 Â Standby letters of credit Â Â 16,309 Â Â Â 11,503 Â Commitments to grant loans and extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company, is based on managementâ€™s credit evaluation of the customer. Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those letters of credit are primarily issued to support public and private borrowing arrangements. Essentially all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company requires collateral supporting those commitments if deemed necessary. FHLB Letters of CreditÂ - The Company may use FHLB letters of credit to pledge to certain public deposits. AtÂ September 30, 2024 there were FHLB letters of credit outstanding of $75.0 million. There were no FHLB letters of credit outstanding at December 31, 2023. Litigation â€“ The Company is a defendant in legal actions arising from time to time in the normal course of business. Management believes that the ultimate liability, if any, arising from these matters will not materially affect the consolidated financial statements, based on information known as of the date the consolidated financial statements were issued. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Companyâ€™s and its bank subsidiaryâ€™s financial statements. Under capital guidelines and the regulatory framework for prompt corrective action, the Company and its bank subsidiary must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Prompt corrective action provisions are not applicable to bank holding companies. Quantitative measures established by regulation to ensure capital adequacy require the Company and its bank subsidiary to maintain minimum amounts and ratios (set forth in the following table) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average assets (as defined). Management believes, as of September 30, 2024 and December 31, 2023, that the Company and its bank subsidiary met all capital adequacy requirements to which they are subject. As of September 30, 2024 and December 31, 2023, the Company met the definition of â€œwell-capitalizedâ€ under the applicable regulations of the Board of Governors of the Federal Reserve System and the bank subsidiary was â€œwell capitalizedâ€ under the FDICâ€™s regulatory framework for prompt corrective action and the Basel III capital guidelines. To be categorized as well capitalized, an institution must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following tables. There are no conditions or events since September 30, 2024 that management believes have changed the bank subsidiaryâ€™s category. Both the Companyâ€™s and the Bankâ€™s actual ratios, as outlined in the table above, exceeded the Basel III risk-based capital requirement with the capital conservation buffer as of September 30, 2024. State banking regulations place certain restrictions on dividends paid by banks to their shareholders. Dividends paid by the Companyâ€™s bank subsidiary would be prohibited if the effect thereof would cause the bank subsidiaryâ€™s capital to be reduced below applicable minimum capital requirements. types:textBlockItemType Balance Type: na Period Type: duration XML 32 R19.htm IDEA: XBRL DOCUMENT v3.24.3 FAIR VALUE DISCLOSURES 9 Months Ended Sep. 30, 2024 FAIR VALUE DISCLOSURES [Abstract] Â FAIR VALUE DISCLOSURES 12.Â FAIR VALUE DISCLOSURES Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability is not adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are: (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact. Valuation techniques that are consistent with the market approach, the income approach and/or the cost approach are required by GAAP. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset. Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entityâ€™s own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy for valuation inputs gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows: â— Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. â— Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means. â— Level 3 Inputs - Significant unobservable inputs for determining the fair values of assets or liabilities that reflect an entityâ€™s own assumptions about the assumptions that market participants would use in pricing the assets or liabilities. The following table summarizes fair value measurements as of the dates indicated below (dollars in thousands): Â Level 1 Â Â Level 2 Â Â Level 3 Â Â Total Â September 30,Â 2024 Â Â Â Â Â Â Â Â Â Â Â Â Assets (liabilities) measured at fair value on a recurring basis: Â Â Â Â Â Â Â Â Â Â Â Â Securities available for sale: Â Â Â Â Â Â Â Â Â Â Â Â State and municipal Â $ â€” Â Â $ 180,924 Â Â $ â€” Â Â $ 180,924 Â Residential mortgage-backed securities Â Â â€” Â Â Â 287,745 Â Â Â â€” Â Â Â 287,745 Â Commercial mortgage-backed securities Â Â â€” Â Â Â 42,295 Â Â Â â€” Â Â Â 42,295 Â Commercial collateralized mortgage obligations Â Â â€” Â Â Â 68,885 Â Â Â â€” Â Â Â 68,885 Â Asset-backed and other amortizing securities Â Â â€” Â Â Â 15,855 Â Â Â â€” Â Â Â 15,855 Â Other securities Â Â â€” Â Â Â 11,185 Â Â Â â€” Â Â Â 11,185 Â Loans held for sale (mandatory) Â Â â€” Â Â Â 9,490 Â Â Â â€” Â Â Â 9,490 Â Mortgage servicing rights Â Â â€” Â Â Â â€” Â Â Â 24,573 Â Â Â 24,573 Â Asset derivatives Â Â â€” Â Â Â 13,600 Â Â Â â€” Â Â Â 13,600 Â Liability derivatives Â Â â€” Â Â Â (102) Â Â â€” Â Â Â (102) Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Assets measured at fair value on a non-recurring basis: Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Loans held for investment Â Â â€” Â Â Â â€” Â Â Â 20,905 Â Â Â 20,905 Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â December 31,Â 2023 Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Assets (liabilities) measured at fair value on a recurring basis: Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Securities available for sale: Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â State and municipal Â $ â€” Â Â $ 180,575 Â Â $ â€” Â Â $ 180,575 Â Residential mortgage-backed securities Â Â â€” Â Â Â 300,704 Â Â Â â€” Â Â Â 300,704 Â Commercial mortgage-backed securities Â Â â€” Â Â Â 41,748 Â Â Â â€” Â Â Â 41,748 Â Commercial collateralized mortgage obligations Â Â â€” Â Â Â 71,930 Â Â Â â€” Â Â Â 71,930 Â Asset-backed and other amortizing securities Â Â â€” Â Â Â 17,040 Â Â Â â€” Â Â Â 17,040 Â Other securities Â Â â€” Â Â Â 10,765 Â Â Â â€” Â Â Â 10,765 Â Loans held for sale (mandatory) Â Â â€” Â Â Â 6,615 Â Â Â â€” Â Â Â 6,615 Â Mortgage servicing rights Â Â â€” Â Â Â â€” Â Â Â 26,569 Â Â Â 26,569 Â Asset derivatives Â Â â€” Â Â Â 17,230 Â Â Â â€” Â Â Â 17,230 Â Liability derivatives Â Â â€” Â Â Â (432) Â Â â€” Â Â Â (432) Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Assets measured at fair value on a non-recurring basis: Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Loans held for investment Â Â â€” Â Â Â â€” Â Â Â 1,482 Â Â Â 1,482 Â Securities â€“ Fair value is calculated based on market prices of similar securities using matrix pricing. Matrix pricing is a mathematical technique commonly used to price debt securities that are not actively traded. Mortgage servicing rights â€“ Mortgage servicing rights are reported at fair value using Level 3 inputs. The mortgage servicing rights asset is valued by projecting net servicing cash flows, which are then discounted to estimate the fair value. The fair value of the mortgage servicing rights asset is impacted by a variety of factors, including prepayment speeds, default rates, and discount rates, which are significant unobservable inputs. Mortgage servicing rights are the only Level 3 asset measured at fair value on a recurring basis, see Note 5 for the Level 3 change activity for the three and nine months ended September 30, 2024 and 2023. Derivatives â€“ Fair value of derivatives is based on valuation models using observable market data as of the measurement date. Loans held for investment â€“ Includes certain collateral-dependent loans which are reported at fair value, for which a specific allocation of the allowance for credit losses is based off of the underlying collateral, less estimated disposal costs, if repayment is expected solely from the sale of the collateral. Collateral values are estimated using Level 2 inputs based on observable market data or Level 3 inputs based on customized discounting criteria. Fair Values of Assets Recorded on a Recurring Basis for which the Fair Value Option has been Elected Loans held for sale (mandatory) â€“ Loans held for sale originated for mandatory delivery are reported at fair value on a recurring basis due to the Companyâ€™s election to adopt fair value accounting treatment for these assets. This election allows for a more effective offset of the changes in fair values of the assets and the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting under ASC Topic 815, Derivatives and Hedging. For assets for which the fair value option has been elected, the earned current contractual interest payment is recognized in interest income, loan origination costs and fees on fair value option loans are recognized in earnings as incurred and not deferred. At September 30, 2024, and December 31, 2023, there were no gains or losses recorded attributable to changes in instrument-specific credit risk. Fair value is determined using quoted prices for similar assets, adjusted for specific attributes of that loan. At September 30, 2024 and December 31, 2023 the aggregate fair value of loans held for sale for mandatory delivery was $9.5 million and $6.6 million, respectively. The aggregate unpaid principal balance as of the same dates was $9.3 million and $6.4 million, respectively, representing differences between fair value and unpaid principal balance of $216 thousand and $190 thousand, respectively. The Company had no loans held for sale for mandatory delivery designated as nonaccrual or 90 days or more past due at each of September 30, 2024 and December 31, 2023. The total fair value option impact on noninterest income for loans held for sale for mandatory delivery is included in Net gain on sales of loans in the Consolidated Statements of Comprehensive Income (Loss). For the three months ended September 30, 2024 and 2023 the net (gain) loss amount totaled $94 thousand and $330 thousand, respectively. For the nine months ended September 30, 2024 and 2023 the net (gain) loss amount totaled $(246) thousand and $78 thousand, respectively. The Company assessed the materiality of this change in presentation on prior period consolidated financial statements in accordance with SEC Staff Accounting Bulletin No. 99, â€œMateriality,â€ (ASC Topic 250, Accounting Changes and Error Corrections). Based on this assessment, the Company concluded that these error corrections in its Consolidated Statements of Cash Flows are not material to any previously presented consolidated financial statements. The corrections had no impact on the Consolidated Balance Sheets, Consolidated Statements of Comprehensive Income (Loss), or Consolidated Statements of Changes in Stockholdersâ€™ Equity, or notes to these consolidated financial statements, for any previously presented interim or annual consolidated financial statements. The financial reporting periods affected by this error include the Companyâ€™s previously reported interim unaudited consolidated financial statements for each of the fiscal year-to-date periods ended March 31, 2023; June 30, 2023Í¾ and September 30, 2023. All significant intercompany balances and transactions have been eliminated in consolidation. Basis of Presentation The interim consolidated financial statements in this Form 10-Q have not been audited by an independent registered public accounting firm, but in the opinion of management, reflect all adjustments necessary for a fair presentation of the Companyâ€™s financial position, results of operations, and cash flows. All such adjustments were of a normal and recurring nature. The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (â€œGAAPâ€) for interim financial information and with the instructions to Form 10-Q adopted by the U.S. Securities and Exchange Commission (â€œSECâ€). Accordingly, the financial statements do not include all of the information and notes required by GAAP for complete financial statements and should be read in conjunction with the Companyâ€™s audited consolidated financial statements, and notes thereto in the Companyâ€™s Annual Report on Form 10-K for the year ended December 31, 2023 as filed with the SEC on March 15, 2024 (the â€œ2023 Annual Report on Form 10-Kâ€). Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period. Use of Estimates Use of Estimates â€“ The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Determination of the adequacy of the allowance for credit losses (â€œACLâ€) is a material estimate that is particularly susceptible to significant change in the near term; the assumptions used in stock-based compensation, derivatives, mortgage servicing rights, and fair values of financial instruments can also involve significant management estimates. Recent Accounting Pronouncements Recent Accounting Pronouncements â€“ Updates to the Financial Accounting Standards Board (â€œFASBâ€) Accounting Standards Codification (â€œASCâ€) are prescribed in Accounting Standards Updates (â€œASUsâ€), which are not authoritative until incorporated into the ASC. ASU 2023-06, Disclosure Improvements: Codification Amendments in Response to the SECâ€™s Disclosure Update and Simplification Initiative. The amendments in this ASU modify the disclosure or presentation requirements of a variety of Topics in the Codification. Certain of the amendments represent clarifications to, or technical corrections of the current requirements. Each amendment in the ASU will only become effective if the SEC removes the related disclosure or presentation requirement from its existing regulations by June 30, 2027. The amendments in this ASU are not expected to have a material impact on the results of operations or financial position. ASU 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures. The amendments in this ASU require public entities to disclose information about reportable segmentsâ€™ significant expenses on an interim and annual basis.Â This ASU is effective for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024. The adoption of ASU 2023-07 is not expected to have a material effect on the Companyâ€™s financial statements. ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures.Â The amendments in this ASU areÂ intended to improve the transparency of income tax disclosures by requiring consistent categories and greater disaggregation of information in the rate reconciliation and income taxes paid disaggregated by jurisdiction. It also includes certain other amendments intended to improve the effectiveness of income tax disclosures. This ASU is effective for fiscal years beginning after December 15, 2024. The adoption of ASU 2023-09 is not expected to have a material effect on the Companyâ€™s financial statements. Subsequent Events Subsequent Events â€“ The Company has evaluated subsequent events and transactions from September 30, 2024 through the date this Form 10-Q was filed with the SEC for potential recognition or disclosure as required by GAAP. The increase in the provision for credit losses during the three months ended September 30, 2024, compared to the same period in 2023, was primarily due to a decrease of $1.3 million in specific reserves during the three months ended September 30, 2023. The provision increased during the nine months ended September 30, 2024, compared to the same period in 2023, mainly due to a larger growth in loans during the 2023 period compared to the 2024 period.
